CSPL127 Introduction to Financial Accounting
In this course, no prior accounting knowledge is required or assumed. Students learn how accountants define assets, liabilities, revenues, and expenses and where those items appear in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting choices allowed to firms for reporting to stockholders and creditors and learn how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Later assignments focus on ratio analysis of actual firms' financial statements, including techniques to identify firms in financial trouble.

CSPL115F Diffusion of Innovation (FYS)
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

CSPL116F Good Books on Bad Wars (FYS)
This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

CSPL127 Introduction to Financial Accounting
Human-centered design or design thinking taps the creativity and diversity of a team to develop solutions to complex problems, following careful observation
to gain the human perspective of a problem. Increasingly, this methodology is at the center of innovative practices in business, nonprofits, and governments. It can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. Many of the disciplines that comprise the liberal arts education are valued sources of perspective and ideas contributing to solutions.

The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then encouraging diverse imaginations to create rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. Although the methodology is called “design thinking,” the approach is used in designing experiences, services, and organizations, as well as objects. No design background is required.

The class sessions will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with faculty members from other disciplines and designers who have worked on significant engagements for social change. Design thinking can be a purposeful link to the application of other disciplines to real-world problems, including anthropology, and behavioral economics.

An optional field trip is planned to work through a problem in the IBM Design Studio in New York City.

CSPL206 Group Psychology in Politics: Local, State, and National Perspectives
This course is an introduction to the use of group dynamics to understand the deep personal and systems-level issues at play in the body politic. This framework is applicable at the local, state, national, and international levels. Often, if not most of the time, these issues play an outsized role in any public policy initiative, debate, vote, action, deliberation, and discourse--though they are rarely acknowledged. This class will examine group dynamics as it is practiced in the field of organizational development (OD), a branch of organizational psychology used to implement cultural changes across social systems. The application of OD to politics is not widespread, but its tools are useful in understanding the dynamics in political situations and in the understanding of how power is exercised. The course will introduce concepts in open systems theory and will introduce three models to "hold the data" in our case studies: the Burke-Litwin Model, BART, and GRPI.

CSPL210 Money and Social Change: Innovative Paradigms and Strategies
How do people make decisions about using their money for social change? Where will it have the most impact? When do shifts in the rules or the use of capital create systemic change and address structural inequities? This course will explore the role of capital in social change. If we rethink how social change happens--analyzing the nonprofit and public sectors, but also new sector-blending approaches and concepts like collective impact--how does our perspective on capital shift? As a part of this unique course, students will work through an active process of selecting a set of nonprofits in and around Middletown to which, as a class, they will actually grant a total of $10,000.

CSPL215 Human-Centered Design for Social Change
Design thinking is the way the creative mind approaches complex problem solving. Increasingly, it is at the center of innovative practices in business. Yet it can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. This course will introduce a number of ways to understand how to use this method and will apply it to a number of real-world examples as team work in class. Invited designers who have worked in the field in the United States and in other countries will lead several sessions. An individual project will require fieldwork and will constitute the demonstration of mastery.

This course explores the techniques of human-centered design and design thinking for approaching social challenges ranging from election processes to subsistence challenges in impoverished rural populations. The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then using creativity to make rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. The class session will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with designers who have worked on significant engagements for social change.

CSPL220 Participatory Design: From Helping to Solidarity
As artists and designers increasingly turn their efforts to altering conditions for the vulnerable and oppressed, stubborn questions arise around the ethics of engagement. Socially engaged projects seek meaningful change, yet often discourage dissent, reify privilege, remain agnostic about outcomes, and do little to alter larger, structural inequalities. Artists and designers can easily exit projects deemed failures and write these off as learning experiences. Moving from one social injustice to the next, crises and suffering become "sites" from which to develop serialized projects. Armed with empathy and expertise, but with little local knowledge, these practitioners struggle to form equitable relationships with partners and collaborators. This course will examine a range of projects initiated by artists and designers and will challenge the idea that helping is beyond reproach. The course asks how artists and designers might better situate themselves as allies through developing practices that foster solidarity, exercise humility, and distribute agency.

CSPL225 Critical Design Fictions
Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to live--expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.
This course will feel like a combination of a college class and a rigorous startup incubator program. Success is a student using theories learned in class to validate their ideas by developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model.

By enrolling, students make a commitment to themselves, the instructor, and the other members of the class.

Note: This course is offered by the Patricelli Center for Social Entrepreneurship (wesleyan.edu/patricelli/) and reSET (resetco.org/about/), a Hartford-based nonprofit whose mission is to advance the social enterprise sector, with support from CTNext (ctnext.com/higher-education/). Classes will be taught by reSET staff, and additional advising and coaching will be available through the Patricelli Center.

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model.

This course will feel like a combination of a college class and a rigorous startup incubator program. Success is a student using theories learned in class to validate their ideas by developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model.

Student Incubator students actively participate in one cohort meeting a week: most are "classes" that take the form of lectures or workshops, and some are "practice days" that provide time to practice theories and methods necessary for success. Students also dedicate at least 10 additional hours per week to assignments, self-directed work, customer discovery, networking, and mentoring sessions.

CSPL250D Topics in Journalism: Writing (and Arguing) About Inequality: How to Make Your Case

In this nonfiction seminar, students will explore how to write about social issues by identifying inequity, understanding the logic and rhetoric used to both defend and criticize it, and developing their own skills to effectively communicate their opinion. Modeled after journalistic work, the course will also develop students’ abilities to conduct first-person research and observation and then translate them into written form for use in nonfiction. We will also explore questions of authenticity, voice, and dominant narrative, allowing students to examine what it means to write about communities other than their own—and the issues implicit in doing that work. Work from across the political spectrum will be addressed.

CSPL250G Topics in Journalism: Literary Journalism

In this course, we will explore the art and craft of magazine-length journalism that strives to do something different than reporting the news—it aspires to achieve the goals of literature. While this kind of writing tends to be timely, as almost all journalism must be when it’s first published, at its best, it ought to be worth reading for decades to come. Truman Capote, for example, conceived of IN COLD BLOOD, which he first published as a series of articles in THE NEW YORKER in 1965, as a “non-fiction novel”: a work of journalism that employed the techniques and artistry of fiction. We will study the writing of new journalists such as Joan Didion, Tom Wolfe, Nora Ephron, and Gay Talese, who pioneered the idea that there is no such thing as unbiased reporting: The writer can’t help but bring a point of view to his or her storytelling, so why not admit it? These writers broke with journalistic convention and admitted that there was an “I” behind the typewriter, a mediator between the “true” story and the reader. We will focus on reading and writing two forms in particular, the profile and the essay. While an excellent profile can be a straightforward examination of another person and his or her place in the world, in the hands of a master like Janet Malcolm or George Trow, it can become an eruption of invention. Essays ask a question or argue a point—but how? There are as many ways as there are writers who explore the form, and in this course we will seek to join them. The course will be taught by Steve Almond, the 2016–17 Koeppel Journalism Fellow. He has been an investigative journalist in Miami and El Paso and is an award-winning writer of nonfiction and fiction. He is the author of eight books, including several New York Times bestsellers, and is currently teaching narrative journalism at the Nieman Foundation at Harvard.

CSPL250H Topics in Journalism: Writing Op-Ed Pieces and Political Essays

This course offers practice in writing op-eds and political essays in short and long forms. This class may be of interest not only to writers but also to students studying political science, history, economics, ethics, sociology, or an interdisciplinary field, such as American studies. The main goal of this class is teaching students how to engage in debate in the public sphere over the major themes and issues of our time. Other than an intense reading schedule and a writing workshop, the other major component will be guest speakers. They include journalist, essayists, and scholars working in their fields but with an authoritative presence in the public sphere.

CSPL250M Topics in Journalism: Storytelling and Social Change

How did a TV show help reduce the rate of teen pregnancy to the lowest point in recorded history? Why did a new narrative approach to gay marriage enable the movement to go from losing 31 state referendums to suddenly winning? Storytelling, across mediums and social platforms, has the power to change
behavior and shift the cultural narrative. This class will explore the nature of “effective” stories, across a wide variety of issues, that engage audiences and often prompt action. We will discuss how this process works and ways to develop social impact campaigns. Students will have the chance to question some of the leading creators/practitioners who will join as guest speakers.

CSPL250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s  
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media—from a lack of diversity and inclusion to problems with monetization and "Fake News"—while also giving them the chance to walk through what it’s actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they’ll spend time giving and receiving feedback on writing.

CSPL257 System Mapping for Social and Environmental Impact  
In recent years, growing interest in social entrepreneurship has pushed students to “solve” complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, quarter-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a “systems map” that documents the economic, political, and cultural factors behind their problem, as well as the current “solutions landscape.”

CSPL262 Introduction to Social Entrepreneurship  
This is an intro-level crash course in social entrepreneurship. We will start by defining social entrepreneurship, then we will explore the tactics and tendencies of successful social entrepreneurs. We will partially incubate a real social enterprise, learning by doing. Each session will be a combination of lecture, group work/discussion, and in-class presentations.

This course will be useful for students who want to think critically about how social change happens, launch their own projects or ventures, innovate solutions to social and environmental problems, hone their activism, and/or build practical skills. Although it is introductory level, it will be useful for students already involved with social impact organizations or entrepreneurial enterprises.

CSPL267 Project-Based Learning Lab
In this course, students will bring ideas to life through project-based learning, translating theory to practice and developing a more sophisticated understanding of subjects they are studying in their other courses.

Students will enroll in the Project-Based Learning Lab with a problem they want to address or an idea they want to build. Throughout the semester, we will build a toolbox for studying problems and designing solutions. Themes will include systems thinking, root cause analysis, ethical community research, human-centered design, lean prototyping, and data-driven evaluation. There will be an emphasis on humility, teamwork, oral communication, responsible partnership, and lean experimentation. Most students will complete the semester having launched a basic MVP (minimum viable product) and a road map for continuing to pursue their idea after the conclusion of the semester.

**CSPL315 Policy and War through Film**
This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

**CSPL316 Human Rights Advocacy: Critical Assessment and Practical Engagement in Global Social Justice**
The core animating principles and practices of human rights are under threat. Will the global human rights movement be able to respond effectively? How could or should the movement advance the cause of global social justice most effectively? This seminar seeks to answer these questions by assessing global rights defense and social justice practice and by engaging in structured, self-critical human rights advocacy.

Among the issues considered in this seminar will be the following: What are the origins of the human rights movement? Has the movement been dominated by ideas from the West and elite organizations from the Global North? What does it mean to be a human rights activist? What is the role of documentation, legal advocacy, and social media in human rights advocacy? What are the main challenges and dilemmas facing those engaged in rights promotion and defense?

Students will be required to write several short reflection papers. The final project will be an exercise in developing a human rights advocacy project or supervised engagement in actual human rights advocacy in conjunction with the University Network for Human Rights (humanrightsnetwork.org).

**CSPL317 Social and Political Perspectives on Digital Media**
This course examines the intersection between social media, politics, and society, analyzing platforms like Facebook, Twitter, YouTube, and Instagram to understand their role in our lives, in our political discourse and in shaping our culture. We examine the positives of social media including social activism, the democratization of news, and heightened capacities for community, communication, and connectivity. We also delve into the darker side of these platforms, exploring the proliferation of fake news, hate speech, terrorist networks, and gendered issues including trolling and cyber harassment. This is an interdisciplinary course and in it we will draw upon a broad range of social theories including science and technology studies, communication theory, linguistics, cultural studies, and media studies to understand the complex role of digital media in contemporary society.

**CSPL320 Collaborative Cluster Initiative Research Seminar I**
This course will supplement the seminars providing historical and cultural background of the prison system in the United States. The emphasis will be on the practical application of topics engaged in the other seminars and contemporary concerns related to the prison system in the United States. We will follow current debates at both the national and state level, including legislation, media, and university initiatives. Students will also visit local sites. Speakers will visit the class to share their experiences and expertise. Students will conduct individual research projects and present them in workshop fashion.

CSPL327 Refugees in World Politics
The primary objective of this course is to provide students with i) an introductory overview of the political, economic, social, and security determinants of refugee flows and ii) the political and social responses of receiving governments and societies to them. Using both historical and contemporary case studies, this course will highlight security concerns engendered by internal displacement and transnational migration. These include armed conflict, smuggling, trafficking, and terrorism. This course will also highlight the concepts of citizenship in receiving states, and the roles played by the international institutions in influencing state policies towards refugees.

CSPL330 Policy and Strategy in War and Peace
This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.

CSPL332 Just Cities: Architectures of Public Encounter
What is “the public,” and how has it been conceived, relative to notions of the urban—to the web of ideas, forms, and fantasies constituting “the city”?
Can art and architecture play a role in defining the public, or does the public’s political and social construction place it outside the scope of specifically aesthetic concerns? This course addresses these and other related questions, positioning art and architecture in their broader cultural and historical contexts. It explores a range of socially charged, experiential, and participatory aesthetic and political practices, characterized by their distinctly public character and decidedly architectural and urban settings. At its core, it is concerned with issues of social justice as they relate to the material spaces of the modern city, and the manner in which those spaces are identified, codified, and made operative in the service of aesthetic, social, and political experience.
This course will be taught by M. Surry Schlabs, Yale School of Architecture.

CSPL333 Music Movements in a Capitalist Democracy
This course will focus on music movements that have used the presentation, expression, and production of music and music events to facilitate sociopolitico transitions. The vital context of these movements is the United States in particular, where the speed and power of commerce, as well as the concentration of capital, present unique opportunities for progressive values and goals in music.
We will look at huge events such as the Newport festivals, Woodstock, Michigan Womyn’s Music Festival, Lilith Fair, and Bonaroo, and examine how these movements have both evolved and spread their tendrils into the world (if they have). We will also spend some time on smaller, grassroots venues and music series in Chicago, Boston, San Francisco, and New York and see how blues, folk, punk, and “Americana” venues have affected and interacted with their communities. We will look at how music scenes evolved and grew and sometimes became institutions, like the Chicago Old Town School of Music.

CSPL337 Practicing Democracy
Organizing can make a difference in addressing major public challenges that require civic action, especially by those whose voices will lead, by identifying, recruiting, and developing more leadership; building community around that leadership; and building power from the resources of that community. In this course, each student accepts responsibility for organizing constituents to achieve an outcome by the end of the semester. As reflective practitioners, students learn from critical analysis of their leadership of this campaign. We focus on five key practices: turning values into motivated action through narrative; building relationships committed to common purpose; structuring leadership collaboratively; strategizing to turn resources into the power to achieve outcomes; and turning commitments into measurable action enabling learning, accountability, and adaption.

CSPL341B Topics in Education, Innovation, and Entrepreneurship: Social Entrepreneurship in Education
This seminar focuses upon educational innovation and entrepreneurship as a form of social entrepreneurship, some of society's greatest challenges in education. Students will survey critical issues in contemporary education and explore innovative and entrepreneurial efforts to address these issues. Learners will explore how diverse education startups, non-profit organizations, and non-governmental organizations, individuals and grassroots groups, K-12 schools, universities, foundations, professional associations and others are responding to these issues in innovative ways. As the course progresses, students will explore the roles of foundations, corporations, and government policies and regulations upon educational innovation and entrepreneurship. As part of this course, learners will work individually or in groups to research solutions to a pressing contemporary educational challenge and propose or pitch a means of addressing that challenge through social entrepreneurship.

CSPL341C Entrepreneurship in Education: Past, Present, and Future
Entrepreneurship plays an increasingly important role in the American public education system. This course examines the historic roots of entrepreneurship in education, looking at both the business side of entrepreneurship and the more recent emergence of social entrepreneurship. Furthermore, the course examines the current debates in the United States about the engagement of business with education, addressing such concerns as the proper role of risk, profit motives, privatization, and neoliberalism. The New Orleans public school system will serve as a case study for investigation in this discussion. Students will better understand the entrepreneurial personality, the sources of innovation, and the promise and pitfalls of entrepreneurism in public K-12 schooling.

CSPL341D Topics in Education, Innovation, and Entrepreneurship: A Law and Policy Perspective
Entrepreneurial ideas in education invariably raise rich questions of policy and law. Innovations in the public schools, such as charter schools, the use of student test scores (e.g., value added modeling) to evaluate teachers, and alternative pathways to the profession (e.g., Teach for America) engender deep debate and discussion in policy and legal circles. This course will explore (from both a law and policy lens) the various education reform ideas that have been instituted or debated and characterized as innovative or entrepreneurial. The course material will be framed in a way to be accessible to those with a general interest in the area of education but without a background in law and policy per se. The course will draw heavily from guest lecturers and entrepreneurs working in the field.

CSPL341E Topics in Education: Introduction to Educational Law, Policy, and Educational Reform
This seminar examines how constitutions, statutes, and court cases impact the rights of students and faculty in K-12 education. It also examines how parents and students have used the law to advocate for equal educational opportunity. Finally, this seminar discusses the legal dimension of education reform measures, such as charter schools and school vouchers.

CSPL344A A History of Incarceration in the United States
This course examines the history of incarceration in the United States from the 18th century to the late 20th century. It begins with history of indentured servitude in the colonial era and then considers the intensification of the enslavement of blacks in the 19th century as well as the expansion of prisons in the 20th century. The course seeks to engage how systems of confinement accompanied the development of a political system based on the languages of liberty.
