ECON101 Introduction to Economics
A general introduction to the principles of economic analysis and their implications for public policy, covering concepts and issues in both microeconomics (concerning the function and performance of individual markets, organizations, or institutions) and macroeconomics (concerning the function and performance of the economy as a whole). This course is intended primarily for students without significant prior study in the discipline, and it satisfies the prerequisites for most 200-level economics electives.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: None

ECON110 Introduction to Economic Theory
An introduction to the principles of micro- and macroeconomic theory, the course is intended for prospective majors and students wishing to prepare themselves for a broad range of upperclass elective courses in economics. Mathematical tools essential for further study in economics are introduced throughout the course.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON
Prereq: MATH118 OR MATH 120 OR MATH122 OR MATH221 OR MATH222 OR MATH118 OR MATH122 OR MATH221 OR MATH222

ECON122 Schooling and Scarcity
Choice amidst scarcity is central to the field of economics. When economists study schooling, both individual choice and societal choice are at issue. The purposes of this course are twofold: it investigates pressing problems in education policy, and it introduces concepts that are crucial to a wide range of applications in economic analysis. Topics include the following: education of the economically disadvantaged, school choice and vouchers for education, the relative returns to a college education, public versus private schools, educational expenditures and outcomes, equal opportunity and compensatory education, international differences in the funding of education, and differences in the return to schooling by ethnicity, gender, and race.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON
Prereq: None

ECON125 Economics and Epidemics
Individuals and societies have been battling epidemic diseases throughout history using weapons bought in markets and provided by governments, churches, and nongovernmental organizations (NGOs). For example, mosquito nets to protect people from malaria can be bought at roadside markets in Nigeria but are also distributed by the Nigerian government and NGOs. The principal goal of this course is to teach students how to write essays that apply economic concepts to investigate the effects of major epidemics and the ways in which individuals and societies sought protection from epidemics. The course will examine the rationales for government intervention in markets to combat epidemic diseases and will emphasize the pivotal role of the production of information about the causes of epidemic disease and the effectiveness of cures. As examples of epidemics, we will read about the Black Death of 14th-century Europe, the cholera epidemic of 19th-century London, the emergence of polio in 20th-century America, and the battle against malaria in Africa today.
Offering: Host
Grading: A-F

ECON127 Introduction to Financial Accounting
Accounting systems provide financial information critical to managing, valuing, and regulating businesses, government organizations, and households. This course will cover basic accounting concepts and procedures (double-entry bookkeeping, the accounting cycle), summary statements (balance sheets, income statements, flow of funds), evaluation of financial results, and financial planning. Considerable attention will be placed on economic concepts, among them present value and discounting, internal rate of return, risk analysis, normal profit as an economic cost, cost curves of a firm, and the cost of financial capital. Examples of the uses of accounting will include the mortgage crisis, social security and other retirement plans, Ponzi schemes, capital budgeting, and mergers and acquisitions.

ECON128 Economics of Organization Within the Music Industry
The invention of digital music brought rapid changes to the music industry, challenging its previous model of operation and forcing adaptation. Using the tools of economic analysis, this course will examine the historic and current structure of the music industry. Basic economic principles from introductory microeconomics, industrial organization, and game theory will be used to examine various aspects of the music industry, including supply and demand, complements and substitutes, price discrimination, product differentiation, game theory and economics of organization.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON
Prereq: None

ECON211 Experiments and Strategic Behavior
This course compares what economic theory predicts with what economic agents actually do when faced with decisions. A number of in-class experiments will be conducted to identify systematic deviations or to confirm theoretical models. Students will learn new material both by participating in experiments and by studying related economic theory. This course will investigate some of the major subject areas that have been addressed by laboratory and field experiments: market behavior, decisions under risk, self-control issues, bargaining, auctions, public goods, cooperation, trust, and gender effects.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON
Prereq: None

ECON212 The Economics of Sustainable Development, Vulnerability, and Resilience
This course will build on the first principles of economics as applied to sustainable development and decision making under uncertainty. One of its major objectives will be to explore how efficiency-based risk analysis can inform assessments of vulnerability and resilience from uncertain sources of external stress in ways that accommodate not only attitudes toward risk but also perspectives about discounting and attitudes toward inequality aversion. Early sessions will present these principles, but two-thirds of the class meetings will be devoted to reviewing the applicability of insights drawn from first principles to
ECON213 Economics of Wealth and Poverty
Who are the very wealthy and how do they acquire their wealth? Why is poverty still with us after almost 50 years of antipoverty programs? What explains rising inequality in the distribution of income and wealth? These are just a few of the questions that we address in this course. The problem of scarcity and the question of production for whom are basic to the study of economics. Virtually all courses in economics give some attention to this topic, yet few study the distribution of income in-depth. This course takes a close look at evidence on the existing distribution of income and examines the market and nonmarket forces behind the allocation process. Our investigation makes use of U.S. economic history, cross-country comparisons, and fundamental tools of economic analysis. Topics include normative debates surrounding the notions of equality and inequality, analytic tools for measuring and explaining income inequality, determinants of wage income and property income, the importance of inheritance, the feminization of poverty, and the economic analysis of racial discrimination. A central subject throughout the course is the role of policy in altering the level of poverty and inequality.

Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECO
Prereq: ECON101 OR ECON110

ECON218 Labor and Development Economics in Latin America
This course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American Economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes.

The focus will be foremost on Latin America and cities in Latin America and drawing at time on evidence from across the world to compare the Latin America region with.

In this course, students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss them and work an individual or group projects. Basic quantitative methods will be taught throughout the course, relating to the economic research papers, and the course will also draw on the resources provided by the QAC.

Gen Ed Area: SBS-ENVS, SBS-ENVS, SBS-ENVS
Prereq: ECON101 OR ECON110

ECON220 Alliances, Commons, and Shared Resources
Some forms of capital are only useful in large units and therefore need to be shared by multiple users. Examples include agricultural and forest land, fisheries, radio spectrum, highways, computer platforms, and irrigation systems. This course studies methods of sharing capital, including common property, formal and informal alliances, clubs, open source, and government regulation and ownership. Students interested in the environment, rural development, innovation, transportation, and communications networks should consider this course, as we will cover all of those topics and see their economic similarities.

Prereq: ECON101 OR ECON110

ECON221 Market Structure, Firms and Organizations
This course provides an introduction to the basic concepts of industrial organization and analyzes the relationship between industry structure and market outcomes. It will also examine economic theories of the firm and alternative contractual relationships.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ENVS, SBS-ENVS, SBS-ENVS
Prereq: ECON101 OR ECON110

ECON222 Public Economics
In this course, we examine the economic roles of government and the tools that governments use to fulfill these roles. We will start with the questions, Under what circumstances is it possible for governments to improve on the outcomes that would occur in their absence? And how do we decide whether one outcome is better than another? The course will continue with an examination of the performance of governments in the United States. The primary questions addressed will be, What policies do governments pursue? How do they spend money to achieve the goals of these policies? How do they raise the money that they spend? And what sorts of undesired side effects might result from taxation and expenditure policies?
Offering: Host
Grading: OPT
Credits: 1.00

Prereq: ECON101 OR ECON110
ECON224 Regulation and Antitrust: Government and the Market
Firms and the public sector interact via regulation and antitrust. Firms use (or fail to use) the regulatory process for competitive advantage, and agencies and legislators use (or misuse) regulation to accomplish their policy objectives. Topics covered in this course include the analysis of market power, predation and discrimination, mergers, regulation of infrastructure industries, and health and safety regulation. Case studies include railroads; telephone, cable, and broadband; the energy industry; EU/U.S. cooperation in merger reviews; and the food industry.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON101 OR ECON110

ECON225 Economic Analysis and the Law
The course uses economic analysis as a way of understanding the structure and evolution of the legal system. Selected rules and institutional forms drawn from the common law of property, contract, tort, and crime are studied as evolved responses to particular kinds of problems or failures in the market system. Readings are drawn from judicial opinions and scholarly sources in law, economics, philosophy, and political theory.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON227 Introduction to Financial Analysis
The course introduces students to the primary sources of information and data used in equity and debt valuation and portfolio management. Both corporate finance and investment finance topics will be covered: financial statement analysis; micro- and macroeconomic analyses of how industry trends and economic growth impact corporate performance; discounted cash flow analysis; asset pricing models (bonds, DDM, CAPM, APT); portfolio theory; and, time permitting, capital structure. This will be a very intense, inquiry-based course with significant hands-on work analyzing data of publicly traded companies.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON101 OR ECON110

ECON237 Financial Crises: Beginning to End
This course will examine historical financial crises from around the world, using standard macroeconomic theories. We will then use this historical knowledge of crises to carefully analyze the Great Recession (December 2007-June 2009), its causes, and what was done to encourage recovery. This will include analysis of monetary and fiscal responses as well as the precis policy environment. Some of the topics that will be covered to properly analyze the financial crises include currency crises, IS/MP models, bank runs, liquidity, leverage, quantitative easing (QE), troubled asset relief program, mortgage-backed securities, subprime lending, risk premium, Taylor rule, fiscal stimulus, and aggregate supply/aggregate demand.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON101 or ECON110

ECON241 Money, Banking, and Financial Markets
This course provides an introduction to money, banking, and financial markets, from both a theoretical and policy perspective. The class will emphasize the evolution of banking and financial market institutions—both in the U.S. and in other developed countries.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON110 OR ECON110

ECON254 State and Economy in Industrial America, 1870-1940
This course considers the transformation of the political and economic institutions of the U.S. in the 70 years ending in 1940 and the revolution in political ideology that occurred alongside this transformation and helped bring it about. It begins by examining the growth of large corporations after 1870, the new techniques of management they called forth, and the antitrust movement that arose in response to them. It then turns to the many changes in American government brought by the Fourteenth Amendment, the granting of constitutional personality to business corporations, and the attempt of Progressives before World War I to analogize the administrative state to business firms and bring the newly developing techniques of management science to bear in politics and policy, an effort with profound effects on American life. Finally, the role played by war in these changes, the creation of the modern American economy in the 1920s, and the New Deal’s attempt to adapt the nation’s political and legal institutions to the economic and ideological realities of the 20th century are considered. Along the way, the course addresses a range of theoretical issues, including the contrast between markets and central planning as ways of organizing economic activity, the tension between the individual and the collective in complex societies, technocracy and social engineering, and the impact of war on economic and political institutions.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON101 or ECON110

ECON255 Introduction to Open-Economy Macroeconomics
The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.

Prereq: ECON101 or ECON110

ECON261 Latin American Economic Development
Why haven’t at least some Latin American countries reached the status of developed country? Why are there such important differences in the degree of development of different Latin American countries? To what extent have foreign countries and institutions influenced the choice of economic policies? Why has Latin America abandoned import substitution industrialization? Are the current attempts at deeper integration into the global economy conducive to economic development, or are they detrimental to the region’s (or both)? By exploring these and other questions, this course provides an introduction to Latin America’s economic development. In our exploration, we draw on economic analysis, historical narratives, and case studies.

ECON263 China’s Economic Transformation
China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China’s great economic transformation beginning in 1978 in what is often described as a “gradualist” transition to market economy. In the last three decades, the speed of China’s development and its growth rates of GDP are without precedent in history. The course concludes by addressing the incompleteness of China’s transition to a mature, developed market economy and by probing the issue of what is left to be done to create a harmonious society.

ECON265 Economies in Transition
The transition of the formerly centrally planned and bureaucratically managed economies of the now-defunct Soviet bloc to market economies based on private property and individual initiative is an event unparalleled in history. The course begins by examining carefully the early period of transition, focusing on the legacies and initial conditions, and traces the progress of transition countries over more than two decades. Issues considered include macroeconomic stabilization, privatization, and financial sector reform. China is studied as a special case of transition to a more market-oriented economy.

Prereq: ECON101 OR ECON110

ECON270 International Economics
This course examines economic interaction between countries through exchange of goods and services (international trade) and borrowing and lending (international finance). The course will cover basic international trade theory, which seeks to explain patterns of specialization (i.e., which countries produce which goods) and the gains and losses associated with international trade. Trade policies such as tariffs and institutional arrangements governing them (e.g., the World Trade Organization) will also be examined. International finance topics include the balance of payments, exchange rates, and international financial crises.

The course is intended to be accessible for students with an introductory-level background in economics. Economics majors are encouraged to consider instead taking ECON371 and ECON331 that provide more advanced treatment of international trade and international finance topics.

Prereq: ECON101 OR ECON110

ECON273 Economic Growth and Development in Sub-Saharan Africa
This course will focus on macroeconomic theories and practices of growth and development by using the Sub-Saharan African economies as case studies. The course will be both a retrospective and prospective analysis of the Sub-Saharan African economies. In particular, it will attempt to provide some answers to various questions such as:

What are the determinants of long-run growth? Why has Sub-Saharan Africa lagged behind the rest of the world in terms of economic growth and development? What are the economic explanations and implications of some of the conflicts in Sub-Saharan Africa? What are the long run growth implications of foreign aid, remittances, and immigration?

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON282 Economics of Big Data
Big data* is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly there are opportunities and pressures to employ these techniques in other areas of the economy and society such as government, healthcare, and education. This course examines (1) big data analysis techniques and how they relate to conventional economic statistics, (2) the effect of big data on the economy, society, and privacy, and (3) practical methods of big data analysis using the R statistics package.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON300 Quantitative Methods in Economics
This course is an introduction to quantitative techniques widely used by economists. Topics include various methods of applied statistics that facilitate
the understanding of economic literature and the pursuit of empirical research; elements of probability, correlation, multiple regression, and hypothesis testing. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON  
Prereq: ECON110

ECON301 Microeconomic Analysis  
This course develops the analytical tools of microeconomic theory, studies market equilibrium under conditions of perfect and imperfect competition, and considers welfare economics.  
Offering: Host  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON  
Prereq: ECON300

ECON302 Macroeconomic Analysis  
This course focuses on the study of economic aggregates such as employment and inflation and of the public policies (monetary and fiscal) aimed at controlling these aggregates. The first half of the course will concentrate on short-run issues; aggregate demand and supply in closed and open economies, business cycles, and stabilization policies. The second half of the course will focus on long-run issues; economic growth and microfoundations of unemployment and consumption. Upon completion of this course, students should be capable of an informed analysis of recent macroeconomic debates. They should also be prepared for upper-level electives on a variety of macroeconomic subjects.  
Offering: Host  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON  
Prereq: ECON300

ECON308 Healthcare Economics  
In this course, we examine the U.S. healthcare system in some detail, with some attention to useful international comparisons. We will start with the questions: What makes healthcare provision different from that of other goods and services? And how are these differences reflected in the structure of the healthcare industry in the United States? We will use our new understanding of the U.S. health system to evaluate various reforms that have been proposed. Other questions that we will address include, What is health? How is it measured and valued? What do we get for the money that we spend on health care? And how do we decide whether what we get is a "good value" or not?  
Offering: Host  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON  
Prereq: ECON300

ECON310 Environmental and Resource Economics  
This course features an analytical study of the major theoretical and applied issues of environmental economics and resource management. Topics will include the fundamental underpinnings of externalities, alternative control strategies, uncertainties, long-term environmental concerns, and resource utilization across a finite globe. Applications will be gleaned from a vast array of issues including clean air and water legislation, acid rain, carbon dioxide and chlorofluorocarbons, global warming, and other global environmental change phenomena.  
Offering: Host  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON  
Prereq: ECON301

ECON311 Advanced Behavioral and Experimental Economics  
This course introduces students to behavioral and experimental economics. Behavioral economics is the study of human behavior that falls outside of the standard model of perfect rationality, pure selfishness, and exponential discounting. Experimental economics is a tool for collecting data in the laboratory, in the field, or online. The objectives of this course include the following: (1) review the standard economic model; (2) show empirical evidence (both experimental and observational) that deviates from the standard model; (3) discover new models of decision making that better explain behavior in certain areas; (4) learn about best practices in experimental data collection. Course work will include readings of economics research papers as well as textbooks, along with problem sets with both theoretical and empirical aspects. Students will also participate in classroom experiments. Students may be required to collect their own data as part of a final project.

ECON313 Economics of Child Policy in Advanced, Postindustrial Countries  
This seminar can serve as either a senior-year capstone course or a junior-year course on research methods. Using measures of child well-being and applying economic analysis to policy options, we consider how child policy in the U.S. compares with policies in other advanced, postindustrial economies. Students will read from professional journals, explore child policies across a wide variety of economies, and discuss the research methods used in the various studies.

Grading: A-F  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON  
Prereq: ECON300 AND ECON301

ECON314 Comparative Economics of Child and Family Policy in Postindustrial Countries  
This course uses tools of economic analysis and measures of child well-being to make cross country comparisons of policies and outcomes. Children rank high on the list of a country’s most valuable resources. Yet equally rich nations differ dramatically in funding investments for children and providing support for the people who raise them. These differences in investment persist despite a growing body of research that shows costly, negative consequences for early child development of both absolute and relative deprivation. With these observations in mind, this course investigates the following questions: Why do equally wealthy nations differ so profoundly when evaluated by these fundamental indicators of economic success? What factors and policies explain the differences? What are the economic consequences? How might the research on international comparisons inform the construction of more successful child and family policy?  
Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON  
Prereq: ECON300 AND ECON301 OR (ECON300 and ECON301) OR (ECON300 and ECON302)

ECON316 Urban Economics  
This course uses economic methods and perspectives to analyze urban issues. The first half of the course has a more theoretical focus; the second half, a more applied and empirical focus. Topics covered include how and why cities arise and develop and how their growth or decline is affected by various events. Policy areas studied in the second half of the course include regional development and zoning, housing programs and regulations, antipoverty programs, local public finance, development of transportation systems, education, and crime.  
Offering: Host
ECON317 Low-Wage Labor Markets: A Data Driven Exploration
Students will read journal articles on low-wage labor markets and will be introduced to several data sets that are useful for exploring such markets. Throughout the course, students will work on their own empirical projects and will be guided in carrying out these individual investigations.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON301

ECON318 Economics of Science and Technology
This course examines technology and technological change using the tools of microeconomics. It studies the historical evolution of technology and compares it with modern developments. It analyzes the interaction of technology with industrial market structure and public policy. Particular emphasis is given to communications technology and the Internet.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON
Prereq: ECON301

ECON321 Industrial Organization
This seminar focuses on advanced theoretical treatment of few major topic areas: extensions to the model of perfect competition, investment and preemption, network effects, and vertical interaction.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON
Prereq: ECON301

ECON327 The Global Firm: A Calderwood Public Writing Seminar
Students will combine their knowledge of economics, including macro, micro, and quantitative methodologies, with their skills at exposition in a journalistic format, in order to address current economic issues related to firm-level decisions (e.g., where to locate production) and the economic consequences of these decisions at home and abroad for different shareholders. Students will conduct independent research to produce weekly articles. Assignments may include coverage of journal articles, book reviews, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301 AND ECON 302

ECON328 Investment Finance
This course is an introduction to portfolio theory and explores both theoretical and empirical aspects of investment finance. Topics include mean variance portfolio theory, single- and multi-index portfolio models, capital asset pricing model, arbitrage pricing theory, the yield curve and term structure of interest rates, evaluation of portfolio performance, efficient market hypotheses, etc. Additional topics may include derivative markets and instruments, hedging arbitrage, and speculations, well as empirical issues in investment finance.

Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON301 OR ECON301 OR ECON302

ECON329 Corporate Finance
The course aims to develop an understanding of the applications of the principles of economics to the study of financial markets, instruments, and regulations. The objective is to provide an understanding of the theory of corporate finance and how it applies to the real world. Students will work with financial data and case studies to explore the potential and limitations of financial theory in dealing with real-world problems.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON330 The Multinational Enterprise
An examination of the economic consequences of the globalization of markets and industries will be used as the foundation for discussion of firm-level responses, including foreign direct investment and foreign trade.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON302 OR ECON301

ECON331 Open-Economy Macroeconomics
The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON302

ECON341 Money, Banking, and Financial Markets
This course covers an overview of money, banking, and financial markets, from both a theoretical and policy perspective. Students will learn the functioning of financial markets such as bond, stock and foreign exchange markets, the role of the financial institutions and money in the economy. A particular emphasis is placed on understanding banking crisis and banking regulations throughout the semester.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON302

ECON348 Equilibrium Macroeconomics
Since the 1970s, macroeconomics has witnessed a methodological shift away from models based on relationships among aggregate variables in favor of models based on optimizing individual behavior in multiperiod settings. This course will develop skills and introduce concepts and techniques necessary to understand these models. Likely topics include the Solow growth model, dynamic consumption theory, the equity-premium puzzle, and real-business-cycle theory.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON302
ECON349 Economic Growth
What causes differences in economic performance across countries? Why are some nations much wealthier than others? What is the role of politics in the growth process? We will examine this set of questions with the aid of formal growth theory, political theory, statistical analysis, and an in-depth discussion of various country cases. Topics covered include the role of savings and technology in economic growth, democracy and growth, growth miracles, and economic policy reform.

Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON302

ECON352 Political Economy
This course introduces the tools of rational-choice and evolutionary game theory and applies them to the study of social interactions with both political and economic elements. This study concerns the distinction between public and private elements of social life. Topics covered include the economics of lawlessness and the emergence of property rights, the economic nature of the state, effects of political structure on economic development, and the economic determinants of democracy and dictatorship.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON301 OR ECON301

ECON353 American Economic History
This course focuses on 19th- and 20th-century U.S. economic history. The course emphasizes the application of economic tools to the analysis of U.S. history. In addition, it aims to provide students with a sense of the historical dynamics that have shaped the contemporary economic system. Rather than providing a general survey of the economic history of the entire period, the course will focus on topics including cyclical fluctuations, the evolution of the monetary and financial systems, immigration, labor markets, and the role of government policy.
Offering: Host
Grading: OPT
Credits: 1.00

Prereq: ECON300 AND ECON301 OR [ECON300 AND ECON302] OR [ECON300 AND ECON301] OR ECON300 OR ECON302

ECON354 Institutions
Neoclassical economic theory has relatively little to say about the problem of economic organization, how the economic activity of individuals is structured and governed by a complex network of social institutions that includes the law of property and liability, informal codes of morality and fair dealing, and formal organizations. This course attempts to address this imbalance by examining the origins and historical development of two of the most important of these institutions, firms and states. Why do firms and states exist? What functions do they perform in economic systems? How do they arise, and how do they change over time? In considering these questions, students will be introduced to several contemporary alternatives to neoclassical analysis, including the institutional, Austrian, public-choice, and constitutional approaches to the problem of economic organization. All of these traditions have both a rich history and an active research community, and readings will include both classic texts and modern scholarship in each of them.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON301

ECON355 Financial History
This course will focus on the evolution of financial institutions and markets from the ancient world until today. Topics covered will include the emergence of money and payment mechanisms, the beginnings of public debt and central banks, the development of joint stock commercial banking and banking regulation, securities markets, and financial crises. The course will emphasize the application of the tools of economic analysis to financial history.

Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: [ECON300 AND ECON301] OR [ECON300 AND ECON302]

ECON357 Topics in European Economic History
This course emphasizes the application of economic tools to the analysis of European history since the Industrial Revolution. Much of the course will center on Britain, although the experiences of France, Germany, Scandinavia, and other countries will also be discussed. Rather than providing a survey of all of modern European economic history, the course will focus on topics such as industrialization, demography, the evolution of money and capital markets, cyclical fluctuations, etc.

Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: [ECON300 AND ECON301] OR [ECON300 AND ECON302] OR [ECON300 and ECON301] OR [ECON300 and ECON302] OR ECON301 OR ECON302

ECON358 History of Economic Thought
This course explores the major ideas of the classical school of political economy developed by its central figures and traces the unfolding legacy of these ideas in the history of economic thought. For each author studied, the goals will be to understand the arguments presented on their own terms, interpret those arguments in the terms of modern economic theory, and consider their contemporary empirical relevance.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON302 OR ECON301

ECON361 Development and Labor in Latin American Economies
This upper-level elective course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at time on evidence from across the world to compare the Latin America region with.

In this course, students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss them and work on individual or group projects and also have to produce their own research paper. Basic quantitative methods will be taught throughout the course, relating to the economic research papers, and the course will also draw on the resources provided by the QAC.

Grading: A-F
ECON362 Macroeconomic History of Japan
This course will use modern macroeconomics and economic history of Japan to shed some light on important questions in macroeconomics. Students will read empirical macroeconomics research not only on Japanese economy but also on the US and other countries to develop a sense of empirical research in macroeconomics. The course will also emphasize the major developments of macroeconomic policy in Japan since the Meiji Restoration in order to appreciate the role of history in understanding contemporary macroeconomic policy debates.

Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON
Prereq: ECON301 OR ECON302

ECON366 The Economics of Developing Countries
This course presents an examination of the characteristics of developing economies and an evaluation of different policies to foster development. Specific topics include economic growth, political economy, institutions, infrastructure, agriculture, corruption, microfinance, conflict, education, labor markets, health, gender, and methods of impact evaluation.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON
Prereq: ECON301 or ECON302

ECON371 International Trade
This course analyzes theories of international trade and trade policy. Specific topics will include theories of comparative advantage, the Ricardian model, the Heckscher-Ohlin model, and the imperfect competition model. Other topics include tariffs, trade policy, import substitution, industrial policy, and the balance of trade. Current events concerned with international trade are also discussed.

Prereq: ECON301 OR (ECON300 AND ECON301) OR ECON300 AND ECON301 OR ECON301

ECON380 Mathematical Economics
The uses of mathematical argument in extending the range, depth, and precision of economic analysis are explored. The central goal of the course is to promote sophistication in translating the logic of economic problems into tractable and fruitful mathematical models. Particular attention is paid to the analysis of optimization and strategic interaction.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: (ECON301 AND MATH221 AND MATH222) OR (ECON301 AND MATH223 AND MATH222)

ECON381 Advanced Game Theory
This course is a quantitative introduction to game theory and its applications to economics. This means the application of algebra and logic to solving formal models of strategic situations. Topics will include strategic and extensive form games, pure and mixed strategies, Nash equilibrium, subgame perfect equilibrium, games of incomplete information, formation of expectations, collective action games, evolutionary games, and the suitability of equilibrium concepts. Examples will be drawn from bargaining, auctions, market competition, employment markets, voting and collective choice, and other areas.
In-class experiments as time permits.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON385 Econometrics
Econometrics is the study of statistical techniques for analyzing economic data. The course reviews multiple regression and develops several more advanced estimation techniques. Students work on individual research projects and learn to use econometric software.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON, SBS-ECON
Prereq: (ECON301 AND MATH221) OR (ECON301 AND MATH223) OR (ECON302 AND MATH221) OR (ECON302 AND MATH223)

ECON386 Introduction to Forecasting in Economics and Finance
This course is an introduction to forecasting widely used by economists; forecasts are constantly made in business, finance, economics, government, and many other fields, and they guide many important decisions. The course focuses on core modeling and forecasting methods that are very widely applicable. It first introduces several fundamental issues relevant to any forecasting exercise, and then treats the construction, use, and evaluation of modern forecasting models.

Students work on individual research projects and learn how to build and use forecasting models.
