ECONOMICS (ECON)

ECON101 Introduction to Economics
A general introduction to the principles of economic analysis and their implications for public policy, covering concepts and issues in both microeconomics (concerning the function and performance of individual markets, organizations, or institutions) and macroeconomics (concerning the function and performance of the economy as a whole). This course is intended primarily for students without significant prior study in the discipline, and it satisfies the prerequisites for most 200-level economics electives.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: None

ECON110 Introduction to Economic Theory
An introduction to the principles of micro- and macroeconomic theory, this course is intended for prospective majors and students wishing to prepare themselves for a broad range of upper-level elective courses in economics. Mathematical tools essential for further study in economics are introduced throughout the course.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: MATH118 OR MATH 120 OR MATH122 OR MATH221 OR MATH222

ECON125 Economics and Epidemics
Individuals and societies have been battling epidemic diseases throughout history using weapons bought in markets and provided by governments, churches, and nongovernmental organizations (NGOs). For example, mosquito nets to protect people from malaria can be bought at roadside markets in Nigeria but are also distributed by the Nigerian government and NGOs. The principal goal of this course is to teach students how to write essays that apply economic concepts to investigate the effects of major epidemics and the ways in which individuals and societies sought protection from epidemics. The course will examine the rationales for government intervention in markets to combat epidemic diseases and will emphasize the pivotal role of the production of information about the causes of epidemic disease and the effectiveness of cures. As examples of epidemics, we will read about the Black Death of 14th-century Europe, the cholera epidemic of 19th-century London, the emergence of polio in 20th-century America, and the battle against malaria in Africa today.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: MATH118 OR MATH 120 OR MATH122 OR MATH221 OR MATH222

ECON127 Introduction to Financial Accounting
In this course, students learn how accountants define assets, liabilities, revenues, and expenses and where those items are placed in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting numbers that appear in financial statements for inventories, depreciation, and leases; the choices given to firms in their reporting of those items; and how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Firms' filings of financial statements and note disclosures with the SEC are examined throughout the course.
Offering: Host
Grading: A-F

ECON211 Introduction to Behavioral and Experimental Economics
This course compares what economic theory predicts with what economic agents actually do when faced with decisions. A number of in-class experiments will be conducted to identify systematic deviations or to confirm theoretical models. Students will learn new material both by participating in experiments and by studying related economic theory. This course will investigate some of the major subject areas that have been addressed by laboratory and field experiments: market behavior, decisions under risk, self-control issues, bargaining, auctions, public goods, cooperation, trust, and gender effects.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON212 The Economics of Sustainable Development, Vulnerability, and Resilience
This course will build on the first principles of economics as applied to sustainable development and decision making under uncertainty. One of the course's major objectives will be to explore how efficiency-based risk analysis can inform assessments of vulnerability and resilience from uncertain sources of external stress in ways that accommodate not only attitudes toward risk but also perspectives about discounting and attitudes toward inequality aversion. Early sessions will present these principles, but two-thirds of the class meetings will be devoted to reviewing the applicability of insights drawn from first principles to published material that focuses on resilience, vulnerability, and development (in circumstances where risk can be quantified and other circumstances where it is impossible to specify likelihood, consequence, or both). Students will complete a small battery of early problem sets that will be designed to illustrate how these principles work in well-specified contexts. Students will be increasingly responsible, as the course progresses, for presenting and evaluating published work on vulnerability and resilience—offering critiques and proposing next steps. Initial readings will be provided by the instructor and collaborators in the College of the Environment, but students will be expected to contribute by bringing relevant readings to the class from sources germane to their individual research projects. Collaboration across these projects will thereby be fostered and encouraged by joint presentations and/or presenter-discussant interchanges.
Offering: Crosslisting
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ENVS
Identical With: ENVS310
Prereq: ECON110

ECON213 Economics of Wealth and Poverty
Who are the very wealthy and how do they acquire their wealth? Why is poverty still with us after almost 50 years of antipoverty programs? What explains rising inequality in the distribution of income and wealth? These are just a few of the questions that we address in this course. The problem of scarcity and the question of production for whom are basic to the study of economics. Virtually all courses in economics give some attention to this topic, yet few study the distribution of income in depth. This course takes a close look at evidence on the existing distribution of income and examines the market and nonmarket forces behind the allocation process. Our investigation makes use of U.S. economic history, cross-country comparisons, and fundamental tools of economic analysis. Topics include normative debates surrounding the notions of equality and inequality, analytic tools for measuring and explaining income inequality, determinants of wage income and property income, the importance of inheritance, the feminization of poverty, and the economic analysis of racial
discrimination. A central subject throughout the course is the role of policy in altering the level of poverty and inequality.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Identical With: AMST274
Prereq: ECON101 OR ECON110

ECON215 Labor Economics
This course will survey the economics of labor markets with particular consideration given to the determinants of labor supply and labor demand. Other topics will include the economics of education, economic inequality, and the role of unions.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON218 Labor and Development Economics in Latin America
This course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at times on evidence from across the world for comparison with the Latin America region.

Students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss research results and work on individual or group projects. Basic quantitative methods will be taught throughout the course, relating to economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Identical With: ENVS241, LAST341
Prereq: ECON101 OR ECON110

ECON220 Alliances, Commons, and Shared Resources
Some resources are only useful in large units and therefore need to be shared by multiple users. Examples include agricultural and forest land, fisheries, streaming video and music services, highways, computer platforms, and news reporting. This course studies methods of sharing resources including common property, formal and informal alliances, clubs, open source, and government regulation and ownership. Students interested in the environment, rural development, news and entertainment media, transportation, and communications should consider this course, as we will cover all of those topics and see their economic similarities.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Identical With: CHUM302
Prereq: ECON101 OR ECON110

ECON221 Market Structure, Firms, and Organizations
This course provides an introduction to the basic concepts of industrial organization and analyzes the relationship between industry structure and market outcomes. We will also examine economic theories of the firm and alternative contractual relationships.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON222 Public Economics
In this course, we examine the economic roles of government and the tools that governments use to fulfill these roles. We will start with the questions, Under what circumstances is it possible for governments to improve on the outcomes that would occur in their absence? And how do we decide whether one outcome is better than another? The course will continue with an examination of the performance of governments in the United States. The primary questions addressed will be, What policies do governments pursue? How do they spend money to achieve the goals of these policies? How do they raise the money that they spend? And what sorts of undesired side effects might result from taxation and expenditure policies?

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON224 Regulation and Antitrust: Government and the Market
Firms and the public sector interact via regulation and antitrust. Firms use (or fail to use) the regulatory process for competitive advantage, and agencies and legislators use (or misuse) regulation to accomplish their policy objectives. Topics covered in this course include the analysis of market power, predation and discrimination, mergers, regulation of infrastructure industries, and health and safety regulation. Case studies include railroads; telephone, cable, and broadband; the energy industry; differences between the EU and United States in merger reviews; and cybersecurity.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON225 Economic Analysis and the Law
The course uses economic analysis as a way of understanding the structure and evolution of the legal system. Selected rules and institutional forms drawn from the common law of property, contract, tort, and crime are studied as evolved responses to particular kinds of problems or failures in the market system. Readings are drawn from judicial opinions and scholarly sources in law, economics, philosophy, and political theory.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON227 Introduction to Financial Analysis
The course introduces students to the primary sources of information and data used in equity and debt valuation and portfolio management. Both corporate finance and investment finance topics will be covered: financial statement analysis, micro- and macroeconomic analyses of how industry trends and economic growth impact corporate performance, discounted cash flow analysis, asset pricing models (bonds, DDM, CAPM, APT), portfolio theory, and, time
ECON227 Financial Crises: Beginning to End
This course will examine historical financial crises from around the world, using standard macroeconomic theories. We will then use this historical knowledge of crises to carefully analyze the Great Recession (December 2007-June 2009), its causes, and what was done to encourage recovery. This will include analysis of monetary and fiscal responses as well as the precrisis policy environment. Some of the topics that will be covered to properly analyze the financial crises include currency crises, IS/MP models, bank runs, liquidity, leverage, quantitative easing (QE), Troubled Asset Relief Program, mortgage-backed securities, subprime lending, risk premium, Taylor rule, fiscal stimulus, and aggregate supply/aggregate demand.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON241 Money, Banking, and Financial Markets
This course provides an introduction to money, banking, and financial markets, from both a theoretical and policy perspective. The class will emphasize the evolution of banking and financial market institutions—both in the United States and in other developed countries.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON254 State and Economy in Industrial America, 1870–1940
This course considers the transformation of the political and economic institutions of the United States in the 70 years ending in 1940 and the revolution in political ideology that occurred alongside this transformation, helping bring it about. We begin by examining the growth of large corporations after 1870, the new techniques of management they called forth, and the antitrust movement that arose in response to them. We then turn to the many changes in American government brought by the Fourteenth Amendment, the granting of constitutional personality to business corporations, and the attempt of Progressives before World War I to analogize the administrative state to business firms and bring the newly developing techniques of management science to bear in policy and politics, an effort with profound effects on American life. Finally, the role played by war in these changes, the creation of the modern American economy in the 1920s, and the New Deal’s attempt to adapt the nation’s political and legal institutions to the economic and ideological realities of the 20th century are considered. Along the way, the course addresses a range of theoretical issues, including the contrast between markets and central planning as ways of organizing economic activity, the tension between the individual and the collective in complex societies, technocracy and social engineering, and the impact of war on economic and political institutions.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 or ECON110

ECON255 Introduction to Open-Economy Macroeconomics
The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON101 OR ECON110

ECON261 Latin American Economic Development
In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

Identical With: LAST219
Prereq: ECON101 OR ECON110

ECON262 Economy of Japan
This is a course designed for students who have taken ECON110 or ECON101 but have yet to take ECON302. It has two specific goals. First, students will learn (or review) the basic knowledge of macroeconomic theory as well as the basic tools of data analysis in Excel. Second, students will apply these tools to understand Japan’s macroeconomic and financial history from the mid-19th century to the present, including the industrialization of Japan, prewar instability, postwar recovery, and Heisei Recession.

Identical With: CEAS250
Prereq: ECON101 OR ECON110

ECON263 China’s Economic Transformation
China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China’s great economic transformation beginning in 1978 in what is often described as a “gradualist” transition to market economy. In the past three decades, the speed
of China’s development and its growth rates of GDP are without precedent in history. The course concludes by addressing the incompleteness of China’s transition to a mature, developed market economy and by probing the issue of what is left to be done to create a harmonious society.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Identical With: CEAS263
Prereq: ECON110 OR ECON110

ECON266 The Economics of Developing Countries—Lower Level
This course presents an examination of the structural characteristics of Third World economies and the bottlenecks inhibiting their growth. We begin with an exploration of the defining features of low-income agrarian societies and the principal decision makers shaping the development process—incumbent national governments, international banks for reconstructions and development and the international monetary fund, UN agencies, and bilateral donors. Specific sectoral topics include choice of agricultural strategy, import substitution, the oil syndrome, structural adjustment, microenterprise finance, the anatomy of foreign aid, and project analysis.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON270 International Economics
This class examines the economic interactions between countries in the world economy and recent international economic events. The first part of the course will focus on explaining trade patterns between countries and the gains and losses associated with international trade. Trade policies such as tariffs and the institutional arrangements governing them (e.g., the World Trade Organization) will also be analyzed. The second part of the course covers international finance topics including the balance of payments, exchange rates, and the history of the international monetary system. We will also discuss how international linkages between countries affect economic development.

Economics majors who want to be exposed to a more advanced treatment of international trade and international finance topics are encouraged to take ECON371 and/or ECON331.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON273 Economic Growth and Development in Sub-Saharan Africa
This course will focus on macroeconomic theories and practices of growth and development by using the Sub-Saharan African economies as case studies. The course will be both a retrospective and prospective analysis of the Sub-Saharan African economies. In particular, it will attempt to provide some answers to various questions such as:

What are the determinants of long-run growth? Why has Sub-Saharan Africa lagged behind the rest of the world in terms of economic growth and development? What are the economic explanations and implications of some of the conflicts in Sub-Saharan Africa? What are the long run growth implications of foreign aid, remittances, and immigration?

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON282 Economics of Big Data
Big data™ is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly, there are opportunities and pressures to employ these techniques in other areas of the economy such as government, health care, and education. This course examines big-data analysis techniques and how they relate to conventional economic statistics; the effect of big data on the economy, society, and privacy; and practical methods of big-data analysis using the R statistics package.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Identical With: QAC282
Prereq: ECON101 OR ECON110

ECON300 Quantitative Methods in Economics
This course is an introduction to quantitative techniques widely used by economists. Topics include various methods of applied statistics that facilitate the understanding of economic literature and the pursuit of empirical research: elements of probability, correlation, multiple regression, and hypothesis testing. The weekly lab sections are required; labs explore issues relating to the nature and sources of economics data and introduce appropriate statistical computing tools. This class will meet three times each week: twice with an economics professor, and once with a Quantitative Analysis Center (QAC) instructor.

Offering: Host
Grading: A-F
Credits: 1.25
Gen Ed Area: SBS-ECON
Prereq: ECON110

ECON301 Microeconomic Analysis
This course develops the analytical tools of microeconomic theory; studies market equilibrium under conditions of perfect and imperfect competition; and considers welfare economics.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON300

ECON302 Macroeconomic Analysis
This course focuses on the study of economic aggregates such as employment and inflation and on the public policies (monetary and fiscal) aimed at controlling these aggregates. The first half of the course will concentrate on short-run issues: aggregate demand and supply in closed and open economies, business cycles, and stabilization policies. The second half of the course will focus on long-run issues: economic growth and microfoundations of unemployment and consumption. Upon completion of this course, students should be capable of an informed analysis of recent macroeconomic debates and should be prepared for upper-level electives on a variety of macroeconomic subjects.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON300

ECON308 Healthcare Economics
In this course, we examine the United States healthcare system in some detail, with some attention to useful international comparisons. We will start with the questions: What makes healthcare provision different from that of other goods and services? And how are these differences reflected in the structure of the healthcare industry in the United States? We will use our new understanding
of the U.S. health system to evaluate various reforms that have been proposed. Other questions that we will address include, What is health? How is it measured and valued? What do we get for the money that we spend on health care? And How do we decide whether what we get is a "good value" or not?

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: (ECON300 AND ECON301)

ECON310 Environmental and Resource Economics
This course features an analytical study of the major theoretical and applied issues of environmental economics and resource management. Topics will include the fundamental underpinnings of externalities, alternative control strategies, uncertainties, long-term environmental concerns, and resource utilization across a finite globe. Applications will be gleaned from a vast array of issues, including clean air and water legislation, acid rain, carbon dioxide and chlorofluorocarbons, global warming, and other global environmental change phenomena.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON311 Behavioral Economics
This course is an advanced undergraduate treatment of behavioral economics. Behavioral economics is the study of human behavior that falls outside of the standard model of perfect rationality, pure selfishness, and exponential discounting. The objectives of this course include the following: (1) review the standard economic model; (2) show empirical evidence (both experimental and observational) that deviates from the standard model; (3) discover new models of decision making that better explain behavior in certain areas; and (4) learn about best practices in data collection and analysis. Course work will include readings of economics research papers as well as textbooks, along with problem sets with both theoretical and empirical aspects. Students will participate in classroom experiments and, as part of a final project, will write a behavioral economics research proposal.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON314 Comparative Economics of Child and Family Policy in Postindustrial Countries
This course uses tools of economic analysis and measures of child well-being to make cross-country comparisons of policies and outcomes. Children rank high on the list of a country's most valuable resources. Yet equally rich nations differ dramatically in funding investments for children and providing support for the people who raise them. These differences in investment persist despite a growing body of research that shows costly negative consequences for early child development of both absolute and relative deprivation. With these observations in mind, this course investigates the following questions: Why do equally wealthy nations differ so profoundly when evaluated by these fundamental indicators of economic success? What factors and policies explain the differences? What are the economic consequences? How might the research on international comparisons inform the construction of more successful child and family policy?

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: (ECON300 AND ECON301) OR (ECON300 AND ECON302)

ECON316 Urban Economics
This course uses economic methods and perspectives to analyze urban issues. The first half of the course has a more theoretical focus; the second half, a more applied and empirical focus. Topics covered include how and why cities arise and develop and how their growth or decline is affected by various events. Policy areas studied in the second half of the course include regional development and zoning, housing programs and regulations, antipoverty programs, local public finance, development of transportation systems, education, and crime.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON317 Low-Wage Labor Markets: A Data-Driven Exploration
Students will read journal articles on low-wage labor markets and will be introduced to several data sets that are useful for exploring such markets. Throughout the course, students will work on their own empirical projects and will be guided in carrying out these individual investigations.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: (ECON300 AND ECON301)

ECON318 Economics of Science and Technology
This course examines technology and technological change using the tools of microeconomics. We will study the historical evolution of technology and compare it with modern developments. Then we will analyze the interaction of technology with industrial market structure and public policy. Particular emphasis is given to transportation, communications and the internet, big data, and blockchains.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON321 Industrial Organization
This seminar focuses on game-theoretic and empirical research in several topic areas: extensions to the model of perfect competition, investment and preemption, network effects, and vertical interaction.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON322 Public Finance
This course analyzes the government's influence on economic efficiency, resource allocation, income distribution, and economic growth. The course covers government spending, regulation, and tax policy. Concepts discussed include tax incidence, public goods, market imperfections, and externalities. Reference is made to issues of health care and environmental issues, welfare reform, the U.S. tax system, the federal budget, and the Congressional budget process.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON327 The Global Firm: A Calderwood Public Writing Seminar
Students will combine their knowledge of economics, including macro, micro, and quantitative methodologies, with their skills at exposition in a journalistic
format, in order to address current economic issues related to firm-level decisions (e.g., where to locate production) and the economic consequences of these decisions at home and abroad for different shareholders. Students will conduct independent research to produce weekly articles. Assignments may include coverage of journal articles, book reviews, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301 AND ECON 302

ECON328 Investment Finance
This course explores theoretical and empirical aspects of investment finance. Topics include portfolio theory, portfolio evaluation, and asset pricing models for equities, bonds, and options.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON329 Corporate Finance
The course aims to develop an understanding of the applications of the principles of economics to the study of financial markets, instruments, and regulations. The objective is to provide an understanding of the theory of corporate finance and how it applies to the real world. Students will work with financial data and case studies to explore the potential and limitations of financial theory in dealing with real-world problems.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON330 The Multinational Enterprise
An examination of the economic consequences of the globalization of markets and industries will be used as the foundation for discussion of firm-level responses, focusing on foreign direct investment and corporate strategy.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON331 Open-Economy Macroeconomics
The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON302

ECON341 Money, Banking, and Financial Markets
This course applies macroeconomic theory and econometric tools to selected topics in money, banking, and financial markets. The course will cover monetary policy, financial crisis, financial regulation, and the role of financial development in economic growth. Students will replicate the key empirical results in the literature throughout the semester and, toward the end of the semester, write an empirical paper of their own. Proficiency in statistical softwares (e.g., Eviews or Stata) is required.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON302

ECON348 Equilibrium Macroeconomics
Since the 1970s, macroeconomics has witnessed a methodological shift away from models based on relationships among aggregate variables in favor of models based on optimizing individual behavior in multiperiod settings. This course will develop skills and introduce concepts and techniques necessary to understand these models. Likely topics include the Solow growth model, dynamic consumption theory, the equity-premium puzzle, and real-business-cycle theory. This course introduces some graduate-level material and makes intensive use of mathematics.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON302

ECON349 Economic Growth
What causes differences in economic performance across countries? Why are some nations much wealthier than others? What is the role of politics in the growth process? We will examine this set of questions with the aid of formal growth theory, political theory, statistical analysis, and an in-depth discussion of various country cases. Topics covered include the role of savings and technology in economic growth, democracy and growth, growth miracles, and economic policy reform.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON302

ECON352 Political Economy
This course introduces the tools of rational-choice and evolutionary game theory and applies them to the study of social interactions with both political and economic elements. This study concerns the distinction between public and private elements of social life. Topics covered include the economics of lawlessness and the emergence of property rights, the economic nature of the state, effects of political structure on economic development, and the economic determinants of democracy and dictatorship.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON353 American Economic History
This course focuses on 19th- and 20th-century U.S. economic history. The course emphasizes the application of economic tools to the analysis of U.S. history. In addition, it aims to provide students with a sense of the historical dynamics that have shaped the contemporary economic system. Rather than providing a general survey of the economic history of the entire period, the course will focus on topics including cyclical fluctuations, the evolution of the monetary and financial systems, immigration, labor markets, and the role of government policy.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ECON
This course explores the major ideas of the classical school of political economy as developed by its central figures and traces the unfolding legacy of these ideas in the history of economic thought. For each author studied, the goals will be to understand the arguments presented on their own terms, interpret those arguments in the terms of modern economic theory, and consider their contemporary empirical relevance.

ECON356 The Economics of Developing Countries

This course presents an examination of the characteristics of developing economies and an evaluation of various policies to foster development. Specific topics include health, education, savings and credit, microfinance, insurance, and institutions, with particular emphasis on experimental and quasi-experimental methods of rigorous evaluation.

ECON361 Development and Labor in Latin American Economies

This upper-level elective course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and various ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at time on evidence from across the world with which to compare the Latin America region.

In this course, students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss them and work on individual or group projects and also have to produce their own research paper. Basic quantitative methods will be taught throughout the course, relating to the economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

ECON380 Mathematical Economics

The uses of mathematical argument in extending the range, depth, and precision of economic analysis are explored. The central goal of the course is to promote sophistication in translating the logic of economic problems into tractable and fruitful mathematical models. Particular attention is paid to the analysis of optimization and strategic interaction.
Economics (ECON)

Gen Ed Area: SBS-ECON
Prereq: (ECON301 AND MATH221 AND MATH222) OR (ECON301 AND MATH223 AND MATH222)

ECON381 Advanced Game Theory
This course is a quantitative introduction to game theory and its applications to economics. This means the application of algebra and logic to solving formal models of strategic situations. Topics will include strategic and extensive form games, pure and mixed strategies, Nash equilibrium, subgame perfect equilibrium, games of incomplete information, formation of expectations, collective action games, evolutionary games, and the suitability of equilibrium concepts. Examples will be drawn from bargaining, auctions, market competition, employment markets, voting and collective choice, and other areas. In-class experiments as time permits.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301

ECON385 Econometrics
Econometrics is the study of statistical techniques for analyzing economic data. This course reviews multiple regression and develops several more advanced estimation techniques. Students work on individual research projects and learn to use econometric software.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ECON
Prereq: ECON301 AND MATH221 OR (ECON301 AND MATH223) OR (ECON302 AND MATH221) OR (ECON302 AND MATH223)

ECON386 Introduction to Forecasting in Economics and Finance
This course is an introduction to forecasting widely used by economists; forecasts are constantly made in business, finance, economics, government, and many other fields, and they guide many important decisions. The course focuses on core modeling and forecasting methods that are very widely applicable. We first introduce several fundamental issues relevant to any forecasting exercise, and then treat the construction, use, and evaluation of modern forecasting models.
Students work on individual research projects and learn how to build and use forecasting models.

Gen Ed Area: SBS-ECON
Prereq: ECON301 AND MATH221 OR (ECON301 AND MATH223) OR (ECON302 AND MATH221) OR (ECON302 AND MATH223)

ECON408 Senior Tutorial (downgraded thesis)
Downgraded Senior Thesis Tutorial - Project to be arranged in consultation with the tutor. Only enrolled in through the Honors Coordinator.
Offering: Host
Grading: A-F

ECON409 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.
Offering: Host
Grading: OPT

ECON410 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.
Offering: Host
Grading: OPT

ECON411 Group Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: Host
Grading: OPT

ECON420 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: Host
Grading: Cr/U

ECON466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: Host
Grading: OPT

ECON469 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: Host
Grading: OPT

ECON491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member’s course for academic credit.
Offering: Host
Grading: Cr/U

ECON492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member’s course for academic credit.
Offering: Host
Grading: Cr/U

ECON495 Research Apprentice, Undergraduate
Project to be arranged in consultation with the tutor.
Offering: Host
Grading: Cr/U

ECON496 Research Apprentice, Undergraduate
Project to be arranged in consultation with the tutor.
Offering: Host

Grading: Cr/U
