WRCT110F Academic Writing in the US for International Students (FYS)
This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Reginald Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

WRCT112F The Logistics of Climate Change (FYS)
According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can’t be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

WRCT113 A Nation of Immigrants?
America is a nation of immigrants. This ideological epithet has come to define the American experience as one of opportunity, advancement, and national incorporation. This course will interrogate the popularity of this story: How did the American experience become defined through an immigrant experience? What experiences does this narrative absorb and what experiences does it erase?
To answer these questions, we will practice close reading, critical thinking, and consistent writing in order to exhume narratives embedded in a variety of texts such as legal documents, political speeches, poetry, social movements, and short stories in order to explore how this particular American experience is constructed, deconstructed, and reconstructed in the social and cultural imaginary. The first part of the course will historicize the narrative of “America as a nation of immigrants” and investigate how it developed throughout the 20th century. We will then consider what stories this national narrative mutes by exploring how contemporary writers take up, challenge, and change the story of America as a nation of immigrants.

WRCT114F Why You Can't Write (FYS)
As anyone who has ever sat at a keyboard knows, writing can be frustrating. And intimidating. Even the most successful writers often doubt themselves and feel frightened of the blank page. As John Warner points out in his 2018 book “Why They Can't Write,” schools and other institutions often stress approaches to writing that seem designed to limit rather than enable a writer’s skill and creativity. In this First Year Seminar, students will explore and develop their writing strengths as we join scholars and thinkers like Warner in investigating what writing means and how it functions both inside and outside of higher education. Reading widely in composition studies, rhetorical studies, literary studies, and critical university studies, students will explore ideas about the writing process and practice, multilingualism, code-meshing, and pedagogy that will require us to consider the purpose of education and communication quite broadly. Students can expect to write weekly reading responses, produce a personal literacy narrative, develop writing assignments, and practice conducting research during the semester.

WRCT116F The Literature of Travel (FYS)
Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of ‘travel literature,’ including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT118F Uncertainty and the Future (FYS)
The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and
ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)
How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

WRCT135 Writing about Research: U.S. Style
This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT140 Teaching English as a Second Language
This course explores theories and teaching methods related to learning English as a second language (ESL). Students will critically examine current and past "best practices" for teaching ESL and the seminal theories they are based on. In addition, we will discuss the various needs of English language learners including both children and adults coming from a variety of social and cultural backgrounds. Students will be asked to apply what they've learned by creating their own lesson plans and activities, critiquing ESL textbooks, and giving teaching demonstrations.

WRCT200 Integrative Learning Project 1: Reflecting About the Liberal Arts

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g., employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

All sophomores, juniors and seniors are welcome in this course. This course requires a willingness to discuss one’s strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world’s most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can take this course more than once, but only once per academic year.

WRCT204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term "Anthropocene," questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from "capitalist ruins" to the depleting seas. We will dive into the social, political, economic, and scientific power-scape that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of "non-judgmental attention" to their critical engagement with the Anthropocene.

WRCT205 English Language Learners and US Language Policy

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the U.S. legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers’ ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

WRCT223 Translating a Story

This course aims to survey the process of "translating" an experience into a creative written work. With an emphasis on creative nonfiction, students will consider how a real-life event becomes most alive on the page. What parts are best transformed into scene? How do we choose the right language for dialogue, time period, or a work’s mood or tone? What should, or can, we omit? In reading writers who have used both fiction and nonfiction to present a given autobiographical experience, and practicing writing an experience for different audiences, students will compare the craft tools that make a story work within its given form. Concurrently, the class will pursue exercises in translation from other languages into English to assess these same language and narrative choices in microcosm.

WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)

How does one re-create someone else’s life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence—from the archive, primary sources,
Writing personal essays—what author and critic Philip Lopate calls “the self-singular essay, and the personal essay can expand to include almost any topic: history, and cultural criticism. Yet even these boundaries often blur within a genre that encompasses many genres: memoir, reflection, humor, familial and social confessional narratives, autobiographical poetry and song lyrics, and interviews/derives from personal experience. Topics to be addressed, in turn, are memory and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT226 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative, and art form. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT228 The Art of the Personal Essay
The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays—what author and critic Philip Lopate calls “the self-interrogative genre”—helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others’ writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

WRCT250G Topics in Journalism: Writing (and Arguing) About Inequality: How to Make Your Case
In this nonfiction seminar, students will explore how to write about social issues by identifying inequity, understanding the logic and rhetoric used to both defend and criticize it, and developing their own skills to effectively communicate their opinion. Modeled after journalistic work, the course will also help develop students’ abilities to conduct first-person research and observation and then translate them into written form for use in nonfiction. We will also explore questions of authenticity, voice, and dominant narrative, allowing students to examine what it means to write about communities other than their own—and the issues implicit in doing that work. Work from across the political spectrum will be addressed.

WRCT250H Topics in Journalism: Literary Journalism
In this course, we will explore the art and craft of magazine-length journalism that strives to do something different than reporting the news—it aspires to achieve the goals of literature. While this kind of writing tends to be timely, as almost all journalism must be when it's first published, at its best, it ought to be worth reading for decades to come. Truman Capote, for example, conceived of IN COLD BLOOD, which he first published as a series of articles in THE NEW YORKER in 1965, as a "non-fiction novel": a work of journalism that employed the techniques and artistry of fiction. We will study the writing of new journalists such as Joan Didion, Tom Wolfe, Nora Ephron, and Gay Talese, who pioneered the idea that there is no such thing as unbiased reporting: The writer can't help but bring a point of view to his or her storytelling, so why not admit it? These writers broke with journalistic convention and admitted that there was an ""I"" behind the typewriter, a mediator between the "true" story and the reader. We will focus on reading and writing two forms in particular, the profile and
the essay. While an excellent profile can be a straightforward examination of another person and his or her place in the world, in the hands of a master like Janet Malcolm or George Trow, it can become an eruption of invention. Essays ask a question or argue a point—but how? There are as many ways as there are writers who explore the form, and in this course we will seek to join them.

WRCT250P "It’s a Mess": An Academic and Practical Look at Digital Media in the Late 2010s
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media—from a lack of diversity and inclusion to problems with monetization and “Fake News”—while also giving them the chance to walk through what it’s actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they’ll spend time giving and receiving feedback on writing.

Offering: Crosslisting
WRCT264 Creating Children’s Books I
In this course each student will create and illustrate a children’s book, at the picture book or illustrated chapter book level. Assignments include examining a variety of children’s books (from 1930 to the present) and emulating specific authors and illustrative techniques as we develop original work. We will discuss both text and illustration in published picture books, and the creative assignments and workshop discussions will focus on both components, and their interaction. We will look at a range of questions: What is this book for? Who is it for? Does it appeal to children and adults in different ways? What assumptions does it make about the world of childhood and the relationships children have? How does it obscure, reveal, comment on, or attempt to change the truths of life—things like love, desire, satisfaction, hurt, difference, sickness, and death? What values or norms does it establish—or subvert? What do the words and pictures do to each other? What values or expectations are at stake as the story or pattern unfolds? We will use questions like these to help drive our experiments and revisions as we workshop all stages of our books.

WRCT303 Artifacts of US Empire: Post-Cold War Narratives of Migration and Multiethnic Literature
This course focuses on post-cold war literature about migrating to the US. By reading diasporic fiction coming out of and about Indian, Iranian, Cuban, Dominican, Filipino, Vietnamese, and Korean diasporas, students will examine how stories of migrating to the US are noteworthy artifacts of US empire. Importantly, we will question the ways in which these texts are tasked with the work of representing empire, imperialism, trauma, violence, and, for that matter, assimilation, meritocracy, and the US as benevolent nation-state. How do they challenge these expectations? Recode them? Fall into their alluring traps?

Prereq: None

WRCT317 Special Topics: Plot
In this special topics course, we will study classic and contemporary novels, stories, and television dramatic series that immerse the reader and viewer in an absorbing fictional plot. Our priorities will be close reading and watching for the pleasure and enlightenment of the works as wholes, as well as an examination of the choices storytellers make to snag our imaginations, drag them into a fictional world, and keep them there. The study will culminate in new creative work: short stories you will write and the class will critique in a workshop setting.
Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-ENGL
Identical With: ENGL317
Prereq: ENGL292 OR ENGL296

WRCT347 Special Topics: Day Books, Diaries, Notebooks, Etc.
This class will take as its focus both creatively and critically the daily and episodic tracking of our own and others' insights, observations, inspirations, motivations; incidents and encounters that seem worthy of (personal) note, whether this be for instant gratification, imprint, or later expansion, simple records as well as flights of writing. We will read and keep journals of various kinds. Very little will be out of bounds.

WRCT350 Writing Certificate Senior Seminar: Writing and Publishing
This is the required capstone for the Writing Certificate Program. This new version of the course offers you an opportunity to develop your writing, work closely with other certificate seniors, and receive advice from professionals about editing and compiling work for publication. Visiting writers and editors will speak in class and the schedule includes several social occasions--receptions, talks, and dinners. Guest speakers from the world of writing and publishing will talk about their experiences with new media.

WRCT500 Writing as a Multilingual Graduate Student
This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.
