**ARCHAEOLOGY PROGRAM**

Archaeology is the discipline most directly concerned with the understanding and explanation of past societies through the study of their material remains. The reconstruction of these societies through the interpretation of material culture permits archaeology to span both the prehistoric and the historic periods. While certain archaeology courses originate within the program, others are cross-listed from the departments of Anthropology, Art and Art History, and Classical Studies. Majors design their own curriculum in close consultation with their advisor according to the specific area of concentration within the discipline.

**FACULTY**

**Katherine Brunson**  
BA, Harvard University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles  
Assistant Professor of Archaeology; Assistant Professor, East Asian Studies; Assistant Professor, College of the Environment

**AFFILIATED FACULTY**

**Kate Birney**  
BA, Yale University; MT, Harvard University; PHD, Harvard University  
Associate Professor of Classical Studies; Chair, Archaeology; Associate Professor, Archaeology; Associate Professor, Art History

**Wendi Field Murray**  
BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona  
Adjunct Assistant Professor, Archaeology; Adjunct Assistant Professor of East Asian Studies; Archaeology Collections Manager

**Christopher Parslow**  
BA, Grinnell College; MA, University of Iowa; PHD, Duke University  
Robert Rich Professor of Latin; Professor of Classical Studies; Professor, Archaeology; Professor, Art History

**Phillip B. Wagoner**  
BA, Kenyon College; PHD, University of Wisconsin at Madison  
Professor of Art History; Professor, Global South Asian Studies; Professor, Archaeology

**DEPARTMENTAL ADVISING EXPERTS**

Kate Birney, Douglas Charles, Clark Maines, Christopher Parslow, Phillip Wagoner

- Undergraduate Archaeology Minor (https://catalog.wesleyan.edu/departments/arcp/ugrd-arcp-mn/)

**ARCP153F Single Combat in the Ancient World (FYS)**
This course celebrates the clash of warriors in warfare, sport, and spectacle in the classical world. Using primary sources and archaeological evidence, the class will survey traditions of combat in ancient art, literature, and society, beginning with Greek and Near Eastern epic; the modes of warfare in Greek society; ancient Olympic combat sports; and, finally, Roman gladiator spectacle. We will examine the role of violent sport in Greek and Roman society, the reception of the competitors, and the use of these events for political or nationalistic ends. Throughout the course we will explore the flexibility of concepts such as military ethics, "western" warfare, violence, honor, and excellence, both in the classical world and in our modern lives.  
Offering: Crosslisting  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: HA-CLAS  
Identical With: CLST153F  
Prereq: None

**ARCP201 Art and Archaeology of the Bronze Age Mediterranean**
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We will also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.  
Offering: Crosslisting  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: HA-CLAS, SBS-CLAS  
Identical With: CLST201, ARHA202  
Prereq: None

**ARCP203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology**
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.  
Offering: Host  
Grading: OPT  
Credits: 1.00  
Gen Ed Area: SBS-ARCP  
Identical With: ENVS203, ANTH212, SISP203, IDEA203  
Prereq: None

**ARCP204 Introduction to Archaeology**
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts—including artifacts excavated from historic Middletown—and will be encouraged to think critically.
about the ways that archaeology informs our understanding of both the past and the present.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-ARCP
Identical With: ANTH214, ENV207, IDEA204
Prereq: None

**ARCP209 Tradition & Testimony: Protecting Native American Sacred Lands, Ancestral Remains, & Cultural Items**

This course will explore the historic genesis of present-day U.S. and international policies toward Native American peoples and other indigenous communities. In addition, studies will include traditional indigenous and tribal perspectives, investigate indigenous-specific origin stories and the connections these stories have with historic events and places, and take a hard look at repatriation policies. Students will investigate several case studies involving current issues Native American communities are facing in repatriation and protecting sacred places, both local and national.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ANTH
Identical With: ANTH209
Prereq: None

**ARCP214 Survey of Greek Archaeology and Art**

This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CLAS
Identical With: CLST214, ARHA203
Prereq: None

**ARCP223 Survey of Roman Archaeology and Art**

This course begins with the art, archaeology, and culture of the Etruscans and their important contributions to the early history of Rome. After a brief examination of the influences of Hellenistic culture on Rome, the course surveys the archaeological evidence illustrating the principal architectural and artistic achievements of the Romans down to the reign of Constantine the Great.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-ART
Identical With: CLST223, ARHA207
Prereq: None

**ARCP232 Roman History**

This course traces the history of Rome from its foundation, through its rise as an Italic and Mediterranean power, up to the transfer of the empire to Constantinople. It focuses on the political, military, and social achievements of the Roman people and the contributions of its principal historical figures, from the legendary kings of the regal period, to Republican leaders such as Marius, Sulla, Pompey, and Caesar, through Augustus and the establishment of the principate and subsequent emperors such as Vespasian, Hadrian, and Diocletian.

This course will fall under the History/Social Justice track.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ARCP
Identical With: CLST232, HIST205
Prereq: None

**ARCP242 Tablets, Temples, and Cities: Near Eastern Art and Archaeology**

History starts in the Near East with many firsts in human culture: domestication, writing, cities... Throughout its long history, the ancient Near East has produced a unique corpus of material culture, architecture, and textual records. In this course, we will survey the art and archaeology of the ancient Near Eastern civilizations with contextual information about the cultures that created them.

Every week we will progress chronologically and will explore broader socioeconomic, political, and cultural changes by discussing art historical, archaeological, and textual evidence. We will look at examples from Anatolia, Mesopotamia, and the Levant, and compare these to one another. Students will gain a larger understanding of commonalities and differences in the cultural expressions of these cultures. The last section of this course will be dedicated to current issues concerning the archaeology and cultural heritage of the Middle East.

This course will also have various hands-on components: We will learn about textile production by using spindle whorls, learn about cuneiform writing by making clay tablets, and create our own seals based on ancient Near Eastern imagery and mythology.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ARCP
Prereq: None

**ARCP244 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt**

This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house
The primary focus of the course will be on the ancient Mediterranean, with additional case studies drawn from other parts of the world serving to illustrate the reconstruction of ancient societies.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CLAS
Identical With: CLST244, ARHA201
Prereq: None

ARCP248 Who Owns the Past? Cultural Heritage, Archaeology, and Politics

"Who controls the past controls the future; who controls the present controls the past." - George Orwell, 1984

When Orwell wrote these words, there was no ISIS destroying non-Islamic monuments, no Saddam Hussein claiming to be a Babylonian king, and no cultural heritage news appearing on our Facebook feeds every day. Yet this statement is still as relevant as it was in Orwell's dystopia. Cultural heritage is an important part of state ideologies, national identities, and politics in the Middle East. The idea of controlling or owning the past is not new however; even ancient Near Eastern kings and rulers used their heritage or their conquests over older temples and monuments as a tool to claim political power.

In this course students will become familiar with the concept of cultural heritage, both tangible and intangible; learn about cultural heritage institutions and laws; and understand how these institutions protect heritage in different situations. By looking at past and modern case studies from Egypt, Turkey, Iraq, Iran, Afghanistan, Palestine, Israel, Syria, the U.S., and examples from other parts of the world, students will learn about the role of archaeology, colonialism, international politics, and indigenous cultures in creating, identifying, and protecting (or destroying) cultural heritage.

ARCP255 The Archaeology of Identities in the Ancient Mediterranean and Beyond

Human beings all hold a wide range of socially constructed and physically lived identities, expressed and experienced sometimes continuously and simultaneously, and sometimes only occasionally under specific circumstances. These identities might include, but are not limited to, race, ethnicity, gender, sexuality, social status, occupation, and health. Many of these identities, expressed and experienced in various tangible and intangible ways in our lived reality, can only be accessed indirectly through the physical proxy of the archaeological record when it comes to people living in the past. This course will explore a variety of archaeological methodologies for accessing the social identities of past lives, as well as the sometimes problematic role that archaeology has played in this type of research over the course of the 20th and 21st centuries (Is ancient DNA bringing us back full circle to scientific racism?). The primary focus of the course will be on the ancient Mediterranean, with additional case studies drawn from other parts of the world serving to illustrate the cross-regional applicability of approaches to past identities.

Gen Ed Area: SBS-ARCP
Identical With: CLST260
Prereq: None

ARCP257 Environmental Archaeology

Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.

Prereq: None

ARCP260 Art and Archaeology of Ancient India

This course is an introduction to the art and material culture of ancient India, from prehistory through the formation of the classical tradition in the fourth century CE. The broad swath of human experience covered necessitates a thematic approach, focusing on key moments, cultures, object types, and methodological approaches, arranged in a roughly chronological fashion. Thematic units may vary somewhat from year to year, but are likely to include: the meaning and use of the carved stone seals of the Indus Valley civilization; the impact of the Vedic Aryas on the development of Indian ritual and imagery; how to read the iconographic language of the "plant and animal style" in decorative sculpture; the meaning and significance of the Asokan pillars; and the architecture and ritual of Buddhist monastic life in the cave monasteries of western India.

ARCP267 Museum Collections: Ethical Considerations and Practical Applications

Serving as a broad overview of museology, this course introduces students to the principles underlying the foundations of museum work and collections stewardship. Topics covered will include the origins of museums and collecting, the rationale behind museum policies, and the legal frameworks and professional standards that guide collections management. Ethical considerations surrounding issues such as NAGPRA/repatriation, decolonization, accessibility, looted artifacts, and cultural patrimony will also be covered. Finally, students will explore the practical aspects of preventive conservation, museum documentation, and exhibition development. Although topics covered in this course will apply to a variety of museums, the primary focus will be on cultural heritage collections. Readings and class discussions will be supplemented with hands-on exercises using the Wesleyan University Archaeology & Anthropology Collection.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-ARCP
Identical With: ANTH276
The course will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life—agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority—as well as historical events and processes that brought change to those patterns. The course capitalizes on South India’s rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.

In this hands-on course, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

Archaeologists draw upon diverse data sets and approaches to reconstruct rich pictures of ancient ecologies, build environments, economies, cultural and cognitive practices. This 0.5 credit seminar explores, challenges, and evaluates the theoretical frameworks employed by archaeologists in research design and analyses of past societies. Topics will rotate depending upon student interests and current research projects but will be chosen from among anti-racist archaeology, gender and ethnicity studies, object and entanglement theory, frameworks for experimental archaeology, funerary analyses, typology and data management, landscape archaeology, conservation, or ethical approaches to archaeological science, among others. Foundational theoretical texts will
be discussed alongside current publications in each topic area. The seminar is designed to prepare students for independent research in archaeology and related fields.

This seminar is required for all Archaeology majors and strongly recommended for Archaeology minors, in addition to being open to all students in related disciplines.

**Offering:** Host
**Grading:** Cr/U
**Credits:** 0.50
**Gen Ed Area:** SBS-ARCP
**Prereq:** None

**ARCP329 Roman Villa Life**
This seminar will explore life in the Roman countryside, from the luxurious suburban villas near major urban centers to working estates in Italy and the Roman provinces. The course will begin with a general survey of Roman villa life and then move to a more focused inquiry into specific topics including art and architecture, production, slave life, and transportation. Readings will be drawn from ancient literary sources, inscriptions, and modern social and archaeological studies. The course is intended for students from a variety of disciplines and backgrounds, but some knowledge of the Roman world is recommended.

**Offering:** Crosslisting
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** HA-CLAS
**Identical With:** CLST329
**Prereq:** None

**ARCP341 Visualizing the Classical**
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen—through landscape, sound, light, functionality/monumentality, and spatial relationships—shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical modeling, mapping, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup, and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.

**Offering:** Crosslisting
**Grading:** A-F

**ARCP350 Animals in Archaeology**
This laboratory course will explore zooarchaeological methods for analyzing animal bones and teeth excavated from archaeological sites allowing us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and techniques, including hands-on sessions for the identification and quantification of faunal remains. By the end of the course, students will be able to identify every bone in the mammalian skeleton and distinguish between the bones of common non-mammalian taxa. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-ARCP, SBS-ARCP
**Identical With:** E&ES350, ENV5348
**Prereq:** None

**ARCP352 Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean**
This course brings a blend of ethnographic, environmental, philological, and scientific frameworks to the study of ancient medicine. For the first half of the course, students will explore the theories and concepts of medicine and the body in classical antiquity from Hippocrates to Galen. Students will tackle case studies (e.g., treatment of war wounds, epilepsy, gynecological ailments) and suggest appropriate treatments. The second half of the course will focus on medicinal plants as discussed in Dioscorides, considering their ecology, archaeology, and phytochemistry, with hands-on lab modules in which students will learn how to extract and analyze bioactive compounds of medicinal plant species. In final group-based projects, students will present a “plant biography,” tracking the arc of the medicinal and cultural uses of a particular species from the ancient Mediterranean to the present day.

**Offering:** Crosslisting
**Grading:** A-F
**Credits:** 1.00

**Identical With:** CLST352
**Prereq:** None

**ARCP380 Relic and Image: The Archaeology and Social History of Indian Buddhism**
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha’s relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha’s enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

**Offering:** Crosslisting
**Grading:** A-F
ARCP382 Numismatics and the Archaeology of Money

In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These “treasure-trove” finds—also known as coin hoards—provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard; the numbers in which they occur, and the spatial patterning of their findspots all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value. In this seminar, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

ARCP385 The Indian Temple

The temple (devalaya, “house of god”) was the unparalleled building type in South Asia from the fourth through fourteenth centuries, and it is still of great importance today. This seminar examines the type from an interdisciplinary perspective, considering theological and ritual dimensions, matters of design and style, programs of decorative sculpture and painting, and the economic and political functions these buildings and institutions carried. Sessions will be arranged thematically, but we will also be concerned with processes of temporal change. No prior knowledge of temple architecture or Indian history and religion is assumed.

ARCP390 Making Rome: Monuments of Life in Ancient Rome

The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

ARCP422 Undergraduate Research, Science
Advanced students in archaeology have an opportunity to work intensively with departmental faculty to contribute to a variety of ongoing faculty research projects. These collaborations offer the chance for students to refine their research skills, gain exposure to conservation and research methods outside the basic curriculum, and work towards tangible research outcomes. Such outcomes may include research posters, creation of online databases, contributions to published works, contributions to or solo exhibit designs, or senior essay/thesis projects. Faculty projects vary from year to year but currently include studies in Mediterranean palaeoclimate, lab-based scientific study and digital modeling of archaeological artifacts, organic residue or ceramic studies (Dr. Birney, the OpenARCHEM project), or museum research projects in the Wesleyan Collections (which comprise approximately 35,000 objects), cataloging and researching artifacts (Dr. Murray, Wesleyan Collections). Participation is POI only. Contact the Archaeology Program Chair for more information.
