The Allbritton Center for the Study of Public Life continues Wesleyan’s commitment to preparing students for lives as active citizens and for leadership. It seeks to support Wesleyan’s tradition of the scholar-teacher by encouraging faculty research in a manner that directly benefits and enhances student learning. The center reflects changes that have transpired across the social-scientific disciplines. These include the creation of new multidisciplinary ventures, the growing number of studies employing multiple methodologies, and the rethinking of the idea of the public in a variety of intellectual and social movements. In addition, university-based intellectuals have been rethinking their connection to the greater public and, consequently, are forging knowledge-seeking alliances with innovators and leaders in government and the corporate world. Social scientists are developing innovative and productive relationships with other sectors of the public, including artists, grassroots activists, and independent scholars. Our students are energized and excited by these developments. The center enables Wesleyan to focus resources; encourage curricular innovation, new research, and scholarship; and foster greater public understanding and responsibility.

Visiting Assistant Professor, History; Chamberlain Project Fellow in the Center for the Study of Public Life

CSPL115F Diffusion of Innovation (FYS)  
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

CSPL116F Good Books on Bad Wars (FYS)  
This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war’s end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

The promise of democracy is that citizens can act together to shape the conditions of their collective lives. This class examines that promise, focusing on the ways in which civic engagement can contribute to its realization. We examine civic engagement both as a theoretical perspective on citizen participation and an active practice. What does it mean to have a truly democratic society? What is the role of citizen participation, both within formal political activity and in civil society generally? What role should experts play in democratic politics, and how can expertise be squared with democratic equality? What, if any, responsibility does the University have to promote civic engagement?

CSPL202 Introduction to Design Thinking: Liberal Arts to Epic Challenges
Human-centered design or design thinking taps the creativity and diversity of a team to develop solutions to complex problems, following careful observation to gain the human perspective of a problem. Increasingly, this methodology is at the center of innovative practices in business, nonprofits, and governments. It can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. Many of the disciplines that comprise the liberal arts education are valued sources of perspective and ideas contributing to solutions.

The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then encouraging diverse imaginations to create rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. Although the methodology is called “design thinking,” the approach is used in designing experiences, services, and organizations, as well as objects. No design background is required.

The class sessions will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with faculty members from other disciplines and designers who have worked on significant engagements for social change. Design thinking can be a purposeful link to the application of other disciplines to real-world problems, including anthropology, and behavioral economics.

An optional field trip is planned to work through a problem in the IBM Design Studio in New York City.

CSPL206 Group Psychology in Politics: Local, State, and National Perspectives
This course is an introduction to the use of group dynamics to understand the deep personal and systems-level issues at play in the body politic. This framework is applicable at the local, state, national, and international levels. Often, if not most of the time, these issues play an outsized role in any public policy initiative, debate, vote, action, deliberation, and discourse—though they are rarely acknowledged. This class will examine group dynamics as it is practiced in the field of organizational development (OD), a branch of organizational psychology used to implement cultural changes across social systems. The application of OD to politics is not widespread, but its tools are useful in understanding the dynamics in political situations and in the understanding of how power is exercised. The course will introduce concepts in open systems theory and will introduce three models to “hold the data” in our case studies: the Burke-Litwin Model, BART, and GRPI.

CSPL215 Human-Centered Design for Social Change
Design thinking is the way the creative mind approaches complex problem solving. Increasingly, it is at the center of innovative practices in business. Yet it can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. This course will introduce a number of ways to understand how to use this method and will apply it to a number of real-world examples as team work in class. Invited designers who have worked in the field in the United States and in other countries will lead several sessions. An individual project will require fieldwork and will constitute the demonstration of mastery.

This course explores the techniques of human-centered design and design thinking for approaching social challenges ranging from election processes to subsistence challenges in impoverished rural populations. The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then using creativity to make rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. The class session will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with designers who have worked on significant engagements for social change.

CSPL220 Participatory Design: From Helping to Solidarity
As artists and designers increasingly turn their efforts to altering conditions for the vulnerable and oppressed, stubborn questions arise around the ethics of engagement. Socially engaged projects seek meaningful change, yet often discourage dissent, reify privilege, remain agnostic about outcomes, and do little to alter larger, structural inequalities. Artists and designers can easily exit projects deemed failures and write these off as learning experiences. Moving from one social injustice to the next, crises and suffering become "sites" from which to develop serialized projects. Armed with empathy and expertise, but with little local knowledge, these practitioners struggle to form equitable relationships with partners and collaborators. This course will examine a range of projects initiated by artists and designers and will challenge the idea that helping is beyond reproach. The course asks how artists and designers might better situate themselves as allies through developing practices that foster solidarity, exercise humility, and distribute agency.

CSPL225 Critical Design Fictions
Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to live—expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.

CSPL235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. When do they strengthen one another, and when do they collide? What ethical or moral questions are raised by various types of protest and communications? The instructor will draw on her own experiences as an activist for women's rights, queer rights, and economic justice. We will also consider the strategies of other recent movements such as Occupy, Black Lives Matter and gun safety activism, and we will allow time to discuss events that may occur in real time over the course of the semester. In recognition of the 100th anniversary of women's suffrage in the U.S., we will discuss the American women's suffrage movement with respect to its tactics, conflicts, failures and successes. This course will be relevant to students interested in public policy, feminism, gender and sexuality studies, and other social sciences, and will provide useful insight for future organizers and activists, lawyers, and public policy makers.

CSPL237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change
The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantle of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

CSPL239 Startup Incubator: The Art and Science of Launching Your Idea
The Startup Incubator is a one-semester, experiential learning program designed to teach and enable student entrepreneurs to develop sustainable business models from their ideas.

The program will bring together an ambitious, committed, and diverse group of individuals from all classes and majors who are passionate about developing successful solutions to challenges; identify as entrepreneurs, disruptors, and thought leaders; and have the tenacity, work ethic, and ability to succeed. All participating students should have a promising business idea and take the course with the intention of launching or running their own venture.

Student Incubator students actively participate in one cohort meeting a week: most are "classes" that take the form of lectures or workshops, and some are "practice days" that provide time to practice theories and methods necessary for success. Students also dedicate at least 10 additional hours per week to assignments, self-directed work, customer discovery, networking, and mentoring sessions.

This course will feel like a combination of a college class and a rigorous startup incubator program. Success is a student using theories learned in class to validate their ideas by developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model.

By enrolling, students make a commitment to themselves, the instructor, and the other members of the class.

Note: This course is offered by the Patricelli Center for Social Entrepreneurship (wesleyan.edu/patricelli/) and reSET (resetco.org/about/), a Hartford-based nonprofit whose mission is to advance the social enterprise sector, with support from CTNext (ctnext.com/higher-education/). Classes will be taught by reSET staff, and additional advising and coaching will be available through the Patricelli Center.

CSPL240 Nonprofits and Social Change
This course explores the world of nonprofits and how they help (or don’t help) the process of social change. As nonprofits increasingly address issues and concerns that governments have previously addressed, a critical analysis of how and why they carry out their work is central to the Allbritton Center’s concern with public life. Each class session will include (1) background on a particular social issue (including global health, inner-city education, clean water, hunger, refugees, and national borders); (2) a case study of a nonprofit addressing that issue; and (3) discussion with leaders of that nonprofit.

CSPL244 From Litigation to Restorative Justice: Conflict Resolution in Practice
Litigation, mediation, reconciliation, and consciousness-raising. These and other techniques can help us solve seemingly intractable conflicts. But how does a mediator, reconciler, or consciousness-raiser select an appropriate strategy for a given conflict? And once a strategy is selected, how does a conflict resolution specialist lead the parties to resolution? This course will show you the way...

In the first part of this course, we will study and practice traditional dispute resolution techniques. Each student will participate in two-person and multi-party quasi-judicial role-playing exercises and arbitrations. In the second part of the course, we will study and practice mediation, reconciliation, feminist consciousness-raising, and community-building.

We will then draw upon theory and practice readings, and our experiences, to answer questions such as: Should we match dispute resolution strategies to parties’ personalities or desired outcomes? Whose conception of fairness and social good should guide our negotiation practices? Are dispute resolution techniques gendered, raced, aged, abled, etc.? We will answer some of these questions with the help of other Wesleyan students at a conflict resolution teach-in led by members of the class.

CSPL245 Ethnography and Design
Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

CSPL250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid
familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality—a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

CSPL250D Topics in Journalism: Writing (and Arguing) About Inequality: How to Make Your Case
In this nonfiction seminar, students will explore how to write about social issues by identifying inequity, understanding the logic and rhetoric used to both defend and criticize it, and developing their own skills to effectively communicate their opinion. Modeled after journalistic work, the course will also develop students' abilities to conduct first-person research and observation and then translate them into written form for use in nonfiction. We will also explore questions of authenticity, voice, and dominant narrative, allowing students to examine what it means to write about communities other than their own—and the issues implicit in doing that work. Work from across the political spectrum will be addressed.

CSPL250G Topics in Journalism: Literary Journalism
In this course, we will explore the art and craft of magazine-length journalism that strives to do something different than reporting the news—it aspires to achieve the goals of literature. While this kind of writing tends to be timely, as almost all journalism must be when it’s first published, at its best, it ought to be worth reading for decades to come. Truman Capote, for example, conceived of IN COLD BLOOD, which he first published as a series of articles in THE NEW YORKER in 1965, as a "non-fiction novel": a work of journalism that employed the techniques and artistry of fiction. We will study the writing of new journalists such as Joan Didion, Tom Wolfe, Nora Ephron, and Gay Talese, who pioneered the idea that there is no such thing as unbiased reporting: The writer can't help but bring a point of view to his or her storytelling, so why not admit it? These writers broke with journalistic convention and admitted that there was an "I" behind the typewriter, a mediator between the "true" story and the reader. We will focus on reading and writing two forms in particular, the profile and the essay. While an excellent profile can be a straightforward examination of another person and his or her place in the world, in the hands of a master like Janet Malcolm or George Trow, it can become an eruption of invention. Essays ask a question or argue a point—but how? There are as many ways as there are writers who explore the form, and in this course we will seek to join them.

CSPL250K Topics in Journalism: Writing, Wit, and the Natural World
This course will engage students as readers and writers of essays, opinion pieces, and long-form articles about the natural world. We live in the shadow of climate change and the sixth great extinction event. So when is outrage effective, and when does wit or irony allow a writer to find a more persuasive voice? What's the role of objectivity in a world where everybody seems to be shouting? We will consider the work of such writers as Gerald Durrell, David Quammen, Elizabeth Kolbert, and Peter Matthiessen. Students will also write regularly and collaborate together in class to critique and improve one another's work.

CSPL250M Topics in Journalism: Storytelling and Social Change
How did a TV show help reduce the rate of teen pregnancy to the lowest point in recorded history? Why did a new narrative approach to gay marriage enable the movement to go from losing 31 state referendums to suddenly winning?
Storytelling, across mediums and social platforms, has the power to change behavior and shift the cultural narrative. This class will explore the nature of “effective” stories, across a wide variety of issues, that engage audiences and often prompt action. We will discuss how this process works and ways to develop social impact campaigns. Students will have the chance to question some of the leading creators/practitioners who will join as guest speakers.

CSPL250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and "Fake News"--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

CSPL257 System Mapping for Social and Environmental Impact
In recent years, growing interest in social entrepreneurship has pushed students to "solve" complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, half-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a "systems map" that documents the economic, political, and cultural factors behind their problem, as well as the current "solutions landscape."

CSPL266 Patricelli Center Fellowship I
The Patricelli Center Fellowship is a one-year, project-based, cohort-style
learning experience. Fellows are a self-selected, committed, and diverse
cohort of individuals or teams from all classes and majors who are passionate
about innovation, creativity, and problem-solving; identify as entrepreneurs,
intrapreneurs, changemakers, activists, disruptors, designers, inventors, and/or
thought leaders; and have tenacity, empathy, interdisciplinary thinking, strong
work ethic, and the ability to work independently. Some Fellows will launch or
run their own project or venture, while others will not.
Paticelli Center Fellows actively participate in two cohort meetings per week:
some are "classes" that take the form of lectures or workshops, and some are
"labs" that serve as working or discussion sessions. Fellows also dedicate 10+
additional hours per week to assignments, self-directed work, portfolio-building,
and engaging other members of the Wesleyan community.
This course will feel like a combination of a Wesleyan class, a C-level position on
a startup team, and an extra-curricular leadership activity. By enrolling, Fellows
make a commitment to themselves, the instructor, and the other members of
their cohort.

CSPL265 Patricelli Center Fellowship II
The Patricelli Center Fellowship is a one-year, project-based, cohort-style
learning experience. Fellows are a self-selected, committed, and diverse
cohort of individuals or teams from all classes and majors who are passionate
about innovation, creativity, and problem-solving; identify as entrepreneurs,
intrapreneurs, changemakers, activists, disruptors, designers, inventors, and/or
thought leaders; and have tenacity, empathy, interdisciplinary thinking, strong
work ethic, and the ability to work independently. Some Fellows will launch or
run their own project or venture, while others will not.
Paticelli Center Fellows actively participate in two cohort meetings per week:
some are "classes" that take the form of lectures or workshops, and some are
"labs" that serve as working or discussion sessions. Fellows also dedicate 10+
additional hours per week to assignments, self-directed work, portfolio-building,
and engaging other members of the Wesleyan community.
This course will feel like a combination of a Wesleyan class, a C-level position on
a startup team, and an extra-curricular leadership activity. By enrolling, Fellows
make a commitment to themselves, the instructor, and the other members of
their cohort.

CSPL267 Project-Based Learning Lab
In this course, students will bring ideas to life through project-based
learning, translating theory to practice and developing a more sophisticated
understanding of subjects they are studying in their other courses.
Students will enroll in the Project-Based Learning Lab with a problem they want
to address or an idea they want to build. Throughout the semester, we will build
a toolbox for studying problems and designing solutions. Themes will include
systems thinking, root cause analysis, ethical community research, human-
centered design, lean prototyping, and data-driven evaluation. There will be an
emphasis on humility, teamwork, oral communication, responsible partnership,
and lean experimentation. Most students will complete the semester having
launched a basic MVP (minimum viable product) and a road map for continuing
to pursue their idea after the conclusion of the semester.

CSPL269 Race, Incarceration, and Citizenship: The New Haven Model
This course will explore the elements of local responses to contemporary
criminal justice issues, drawing on current research projects in New Haven,
Connecticut. The course will explore a variety of promising practices, which
emphasize community engagement and individual citizenship over incarceration
and punishment. Topics will include evidence-based practices to reduce criminal
recidivism, mental health issues in the criminal justice system, treatment
engagement, and the creation of valued roles in the community. Students will
have the opportunity to participate in federal research studies.

CSPL277 Community Impact: Building Capacity to Support Educational
Enrichment and Socioemotional Development
In this half-credit course, students will build an intellectual and practical
framework to guide their work in volunteer settings in the local community.
What does it mean to “help?” How do we assess the needs of community
partners and build the knowledge and skills that will allow us to address those
needs? What do we need to know and understand about the people with whom
we work? What does research have to say about effective tutoring techniques
and practices? How can we design meaningful learning experiences? How can
we maximize not only our impact in the community, but our own growth and
learning?
Note: students taking this course must be engaged in at least 80 minutes per
week of community service in an educational setting throughout the semester
and must complete this questionnaire (https://forms.gle/ay9xaXGn1wbxriH7) before enrolling

the dominant political ideal of the 20th century. Students will not only learn the history of the late Ottoman Empire, the Republic of Turkey, and the history of the Armenian minority in the Middle East, but will explore the transition from empire to republic at the end of the 19th century through the twin lenses of secularism and nationalism. Drawing on Ottoman and Turkish history, Armenian history, political science, and anthropology, the course introduces debates about nationalism, secularism, minority rights, and political belonging through the emphasis on Armenians in Turkey.

CSPL316 Human Rights Advocacy: Critical Assessment and Practical Engagement in Global Social Justice

The core animating principles and practices of human rights are under threat. Will the global human rights movement be able to respond effectively? How could or should the movement advance the cause of global social justice most effectively? This seminar seeks to answer these questions by assessing global rights defense and social justice practice and by engaging in structured, self-critical human rights advocacy.

Among the issues considered in this seminar will be the following: What are the origins of the human rights movement? Has the movement been dominated by ideas from the West and elite organizations from the Global North? What does it mean to be a human rights activist? What is the role of documentation, legal advocacy, and social media in human rights advocacy? What are the main challenges and dilemmas facing those engaged in rights promotion and defense?

Students will be required to write several short reflection papers. The final project will be an exercise in developing a human rights advocacy project or supervised engagement in actual human rights advocacy in conjunction with the University Network for Human Rights (humanrightsnetwork.org).

CSPL317 Social and Political Perspectives on Digital Media

This course examines the intersection between social media, politics, and society, analyzing platforms like Facebook, Twitter, YouTube, and Instagram
to understand their role in our lives, in our political discourse and in shaping our culture. We examine the positives of social media including social activism, the democratization of news, and heightened capacities for community, communication, and connectivity. We also delve into the darker side of these platforms, exploring the proliferation of fake news, hate speech, terrorist networks, and gendered issues including trolling and cyber harassment. This is an interdisciplinary course and in it we will draw upon a broad range of social theories including science and technology studies, communication theory, linguistics, cultural studies, and media studies to understand the complex role of digital media in contemporary society.

CSPL320 Collaborative Cluster Initiative Research Seminar I
This course will supplement the seminars providing historical and cultural background of the prison system in the United States. The emphasis will be on the practical application of topics engaged in the other seminars and contemporary concerns related to the prison system in the United States. We will follow current debates at both the national and state level, including legislation, media, and university initiatives. Students will also visit local sites. Speakers will visit the class to share their experiences and expertise. Students will conduct individual research projects and present them in workshop fashion.

CSPL328 Advanced Human Rights Advocacy
This course will enable students to engage in critical assessment of human rights advocacy while participating directly in projects through the University Network for Human Rights. Students in Professor Cavallaro’s Fall CSPL 316 course are encouraged to apply, as are other students interested in gaining practical experience in human rights. The course will involve seminar discussions and readings that assess the strengths, weaknesses, and challenges facing the human rights movement domestically and internationally. In addition, students will be responsible for project-based work guided by Professor Cavallaro and the team of supervisors at the University Network for Human Rights.

CSPL330 Policy and Strategy in War and Peace
This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.

CSPL332 Just Cities: Architectures of Public Encounter
What is “the public,” and how has it been conceived, relative to notions of the urban—to the web of ideas, forms, and fantasies constituting “the city”? Can art and architecture play a role in defining the public, or does the public’s political and social construction place it outside the scope of specifically aesthetic concerns? This course addresses these and other related questions, positioning art and architecture in their broader cultural and historical contexts. It explores a range of socially charged, experiential, and participatory aesthetic and political practices, characterized by their distinctly public character and decidedly architectural and urban settings. At its core, it is concerned with issues of social justice as they relate to the material spaces of the modern city, and the manner in which those spaces are identified, codified, and made operative in the service of aesthetic, social, and political experience.

This course will be taught by M. Surry Schlabs, Yale School of Architecture.

CSPL333 Music Movements in a Capitalist Democracy
This course will focus on music movements that have used the presentation, expression, and production of music and music events to facilitate sociopolitical transitions. The vital context of these movements is the United States in particular, where the speed and power of commerce, as well as the concentration of capital, present unique opportunities for progressive values and goals in music.

We will look at huge events such as the Newport festivals, Woodstock, Michigan Womyn’s Music Festival, Lillith Fair, and Bonaroo, and examine how these movements have both evolved and spread their tendrils into the world (if they have). We will also spend some time on smaller, grassrorts venues and music series in Chicago, Boston, San Francisco, and New York and see how blues, folk, punk, and “Americana” venues have affected and interacted with
CSPL341C Entrepreneurship in Education: Past, Present, and Future
Entrepreneurship plays an increasingly important role in the American public education system. This course examines the historic roots of entrepreneurship in education, looking at both the business side of entrepreneurship and the more recent emergence of social entrepreneurship. Furthermore, the course examines the current debates in the United States about the engagement of business with education, addressing such concerns as the proper role of risk, profit motives, privatization, and neoliberalism. The New Orleans public school system will serve as a case study for investigation in this discussion. Students will better understand the entrepreneurial personality, the sources of innovation, and the promise and pitfalls of entrepreneurship in public K-12 schooling.

CSPL341D Topics in Education, Innovation, and Entrepreneurship: A Law and Policy Perspective
Entrepreneurial ideas in education invariably raise rich questions of policy and law. Innovations in the public schools, such as charter schools, the use of student test scores (e.g., value added modeling) to evaluate teachers, and alternative pathways to the profession (e.g., Teach for America) engender deep debate and discussion in policy and legal circles. This course will explore (from both a law and policy lens) the various education reform ideas that have been instituted or debated and characterized as innovative or entrepreneurial. The course material will be framed in a way to be accessible to those with a general interest in the area of education but without a background in law and policy per se. The course will draw heavily from guest lecturers and entrepreneurs working in the field.

CSPL341E Topics in Education: Introduction to Educational Law, Policy, and Educational Reform
This seminar examines how constitutions, statutes, and court cases impact the rights of students and faculty in K-12 education. It also examines how parents and students have used the law to advocate for equal educational opportunity. Finally, this seminar discusses the legal dimension of education reform measures, such as charter schools and school vouchers.

CSPL341G Case Studies in Educational Innovation and Entrepreneurship
Entrepreneurship, innovation, and reform are a defining part of the fabric of K-12 education in the US and other places, presenting opportunities and risks. Each week we will be visited by one or more experts who have led or studied innovative or entrepreneurial projects in the education sector. Perspectives and cases to be discussed include the founding of schools and businesses, start-up ventures, social entrepreneurship and nonprofit organizations, educational law and policy, and innovation within public schools and districts. Students will learn from conversations with experts in the field about how to define problems in education, how different people have approached solutions to these problems, and lessons learned. The professor and students will work together to draw connections between the various case studies and to articulate larger principles.

CSPL366 A History of Incarceration in the United States
This course examines the history of incarceration in the United States from the 18th century to the late 20th century. It begins with history of indentured servitude in the colonial era and then considers the intensification of the enslavement of blacks in the 19th century as well as the expansion of prisons in the 20th century. The course seeks to engage how systems of confinement accompanied the development of a political system based on the languages of liberty.
