Doing philosophy means reasoning about questions that are of basic importance to the human experience—questions like, What is a good life? What is reality? How are knowledge and understanding possible? What should we believe? What norms should govern our societies, our relationships, and our activities? Philosophers critically analyze ideas and practices that often are assumed without reflection. Wesleyan’s philosophy faculty draws on multiple traditions of inquiry, offering a wide variety of perspectives and methods for addressing these questions.

**PHIL111 Introduction to Critical Philosophy of Race**

This first-year seminar (FYS) course will examine contemporary figures in the emerging field of critical philosophy of race. We will attempt to examine what contributions (if any) the critical philosophy of race has provided not only to philosophy as a discipline but also to more traditional and established modes of thinking race and racism. We will do so by exploring issues such as the differences between critical philosophy of race and critical race theory, as well as the historical role of race and racism in philosophical thinking, and by attending to the major debates currently held in this emerging tradition.

**Offering:** Host  
**Grading:** A-F

PHIL154 What Is Rationality?
What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures—or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

PHIL160 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

PHIL201 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant
Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' MEDITATIONS, Locke's ESSAY CONCERNING HUMAN UNDERSTANDING, Hume's ENQUIRY CONCERNING HUMAN UNDERSTANDING, and Kant's CRITIQUE OF PURE REASON.

PHIL207 Live Like a Philosopher
Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.
Offering: Host

Prereq: None

PHIL212 Introduction to Ethics
This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality’s basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who argue moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism
This course is an introduction to existentialism. “Existentialism” is both a philosophical tradition and a term that is central to the intellectual history of western thought. The term was explicitly adopted self-descriptively by Jean-Paul Sartre, and was widely disseminated both by his own literary and philosophical contributions and those of his intellectual interlocutors—notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and 1950s. In this course, we will begin by exploring the root and intellectual origins of this tradition through the work of philosophers and authors like Friedrich Nietzsche, Fyodor Dostoyevsky, and Soren Kierkegaard. We will spend a considerable time on some of this philosophical tradition’s central tenets like “freedom,” “the absurd,” “existence precedes essence,” “facticity,” “authenticity,” and “despair.” Because existentialism also resonated widely with anti-colonial thinkers across the globe, we will end the course by reading important figures in this movement like Frantz Fanon, Richard Wright, and James Baldwin, in order to understand the ways in which existentialism gradually became an intellectual and political tool of contestation against racism and imperialism.

PHIL214 Reasoning About Justice
This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

PHIL217 Bioethics and Social Justice
"Health has replaced salvation," wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses—the creation and institutionalization of the discipline of bioethics—and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

Prereq: None
PHIL218 Personal Identity and Choice
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person’s life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL219 Evil, Responsibility, and Forgiveness
The problem of evil has long occupied an important position in the history of philosophy. In light, however, of the horrific events of the 20th-century, philosophers and other writers of the past hundred years have begun to ask whether it is time to rethink our own understanding of evil. Is it possible to understand genocide, colonialism, and systematic racism through existing conceptions of evil, responsibility, and forgiveness, conceptions drawn largely from religion and the law? What happens to our understanding of evil when, as Hannah Arendt famously suggested with her notion of the "banality of evil," mass murder is detached from wicked intentions and is made routine, mundane, even cliche? What happens to our understanding of responsibility when, on the one hand, a whole society, not just an individual, is implicated in a crime--and when, on the other hand, responsibility cannot be confined to geographical or national borders? What happens to our understanding of forgiveness when the very possibility or desirability of such an act becomes eminently questionable? In this course, we will draw from continental philosophy, critical philosophy of race, literature, and film. Readings may include selections from Emmanuel Levinas, Hannah Arendt, Frantz Fanon, Aimé Césaire, Primo Levi, Jacques Derrida, and Susan Neiman.

PHIL220 Human Nature
The idea of “human nature” plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL221F Philosophy as a Way of Life (FYS)
For many philosophers, East and West, philosophy has been more than an effort to answer fundamental questions. It has been an activity aimed at changing one’s orientation to the world and, thus, how one lives one’s life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of life. How does philosophical reasoning interact with lived practice? How do metaphysical views lead to ethical commitments? Despite their differences, Confucians, Christians, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today’s world?

PHIL222 Global Philosophy
Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves—sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions—in what can loosely be called our post-colonial world. This course asks what “philosophy” means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL223 Reason and Paradox
This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno’s Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

Nietzsche inspires such passionate attachment in teenagers and the most diverse (often diametrically opposed) ideological spirits. Nietzsche is a polarizing cult figure who has attracted the fascination of generations as a leader of movements. How is it that Nietzsche inspires such passionate attachment in the minds of his readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors—such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception—notably by the Nazi party (due to the influence of Nietzsche’s sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies’ Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

PHIL254 The Rationalist Tradition in Early Modern European Philosophy
This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital ‘R’) is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics – including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

PHIL255 Moral Psychology: Care of the Soul
Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives.

Class will meet on Monday and Wednesday in lecture/discussion format. Each student must also be enrolled in one discussion section. Discussion sections will be focused on specific interests in or approaches to moral psychology such as clinical therapy, philosophical analysis, or spirituality in a particular religious tradition. The particular offerings of discussion section topics will vary from year to year. Each discussion section will have a distinctive set of additional readings and exercises.

PHIL256 Existentialism
This course is an introduction to 20th-century French existentialism. “Existentialism” is both a philosophical tradition and a term that is central to the intellectual history of Western thought. The term was explicitly adopted as a self-description by Jean-Paul Sartre and was widely disseminated both by his own literary and philosophical contributions and those of his associates—particularly Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and ’50s. It also resonated widely with anti-colonial thinkers across the globe. Thus, through the work of Frantz Fanon, Richard Wright, and Sartre’s own intellectual engagement with colonialism and oppression, we will also explore the ways in which existentialism gradually became an intellectual and political tool for contestation against racism and European imperialism.

PHIL258 Post-Kantian European Philosophy
In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate’s requirement in philosophical origins of theory.

PHIL265 Postanalytic Philosophy: Science and Metaphysics
The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptualizations of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy’s relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL267 History and Limits of Aesthetic Theory
This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a work of art in the first place, what it means for art to be “beautiful” or otherwise “successful,” how differences in media condition and contribute to a works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both
PHIL271 Moral Responsibility: Doubt, Debate, and Dialogue
This intermediate philosophy course will investigate conflicting ideas about moral responsibility and develop skills in understanding and critiquing the arguments associated with each view.

Key themes include: (1.) For what can we hold people responsible? For their intentions? For consequences? For their character? For other implications of their action? (2.) How much do concepts of moral responsibility reflect particular (and questionable) cultural ideals? (3.) Can we hold someone morally responsible even when there is a good causal explanation for their conduct? (4.) What is our aim and purpose in holding ourselves and others responsible, and how else might such purposes be achieved?

PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)
This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a
range of perspectives on feminism and philosophy, we will give a deep reading
to three book-length developments of feminist ethics: one from a Kantian
perspective, one focused on care, and one focused on virtue ethics. As a gateway
course for the FGSS program, this course serves to introduce critical thinking
about the construction of gender and the intersection of gender with race,
etnicity, class, and sexuality.

PHIL278 Political Philosophy
The United States incarcerates more people than any other country in the
world. Over 2 million people are caught in the criminal justice system today. A
disproportionate number of those incarcerated are people of color, particularly
black, Latino, and indigenous men. Women, too, are a growing part of the
prison population, as are queer, transgender, and gender-nonconforming
people. Children, particularly impoverished black youth and, increasingly, immigrants, are funneled into correctional supervision. In this course we will
ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.

PHIL279 Necropolitics and Black Fugitive Life
In his important essay interrogating the (im)possibility of black sociality, Fred
Moten attempts to find an order of black social life that would unfold in the very
confrontation between black (social) death and the law. However, as he argues,
this form of black life would be “reducible neither to simple interdiction nor bare
transgression.” The form of black life that interests Moten is essentially one of
“fugitivity.” In a recent response to Moten’s text, David Marriott worries that
“by writing blackness as ceaseless fugitivity,” Moten advances “a position in
which blackness is only black when it exceeds its racial disavowal” and therefore
blackness “can only be recognized as black in so far as it escapes the racism of
its history.” In this course, we will trace and follow the implications of Moten’s intervention. More specifically, we will explore what forms and figures of
sovereignty an aesthetics and politics of fugitive subjectivity could yield given
that “black life” remains arguably the most precarious form of living under various contemporary “necropolitical” apparatuses of racial exclusion, control,
perssecution and—in worse cases—genocide. Key figures will include Frantz Fanon,
Hortense Spillers, Achille Mbembe, Jacques Derrida, Michel Foucault, David
Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, and Elizabeth Povinelli.

PHIL284 African American Philosophy
This course will examine the philosophical questions that have been of particular
interest to African American philosophers. We will explore the domains of
knowledge in which African American philosophers and thinkers have felt
compelled to intervene. We will approach these questions by engaging with canonical historical figures such as DuBois, Douglass, and Cooper, and then we
will assess the extent to which contemporary African American philosophers
have remained (and continue to be) concerned with the same questions, albeit
with different discursive methodologies. The purpose of this course is to trace
the philosophical articulation of race, racism, identity, politics of freedom, and
subject formation in the history of African American philosophical thought.

PHIL286 Philosophy of Mind
This class is a philosophical investigation into the nature of the mind. We will
explore such questions such: What kinds of beings are capable of having mental
states? Can non-human animals or computers think and feel? What is it to be
conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the
world? By what mechanism do our thoughts, feelings, and desires get linked up
to the things around us? We will ask these questions with the goal of shedding
light on our nature as thinking, feeling beings, and on the relation of our inner
lives to the physical world.

PHIL287 Philosophy of Science
This course is a fast-moving introduction to some central topics in the philosophy
of science, aimed at students with some college-level study of at least one
natural science. Topics include the norms of scientific understanding or explanation; the relation between finished theories or explanations and ongoing research; the recognition and dissemination of discoveries; the justification of scientific claims; conceptual and technical (revolutionary) change in the science; the significance of instrumentation, experiment, and artifice in science; the places of laws, models, and causal relations in scientific understanding; and whether various sciences differ fundamentally in their aims, methods, and achievements. Considerable attention will be given to examples of scientific practice, both historical and contemporary.

PHIL288 Sciences as Social and Cultural Practices

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

PHIL291 Reason and Its Limits

This course offers a close study of Immanuel Kant’s magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason’s ability to offer substantive insights into necessary truths. Kant’s “critique” aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, “transcendental idealism,” holds that “reason has insight only into what it produces after its own plan” (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

PHIL294 Heidegger and the Being Question

Martin Heidegger argued in BEING AND TIME that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be BEING AND TIME and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger’s own views about this question.

PHIL303 Plato’s REPUBLIC

“The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato.” This declaration, famously made by Alfrerd North Whitehead in the early 20th century, seems especially true of Plato’s Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today—on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics—receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various
perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power—the life of a tyrant—is psychologically corrupted. These are bold claims. What is Plato’s argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinctness between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL306 Sophist, Statesman, Philosopher: Plato’s Later Metaphysics and Politics

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides’s puzzle and explore Plato’s solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

PHIL310 Concepts of Matter: A Brief Philosophical History of the Concept of Matter

In this course, we will explore changing notions of matter in Western thought from classical Greek thought through the quantum revolution in physics, and philosophical debates about their implications. We will begin with views of matter in Plato, Aristotle, and the ancient atomists and how they were interrelated with views of human beings: the devaluation of matter and the body in Platonist and Gnostic thought, the perhaps surprisingly positive attitude taken toward death without a hope of continued existence by the materialist Lucretius, and the appropriation of Aristotle’s hylomorphic philosophy into Christian theology and scholastic science in the late middle ages. We will then look at the emergence of a conception of “material substance” in the 17th century, examining the differences between the mathematical formulations of Galileo and Descartes and those of atomists such as Gassendi. The remainder of the section will focus on the rise of materialism and reactions against it: Descartes and Hobbes on the question of whether human beings are merely machines, the Newton-Leibniz debate about the activity of God in nature, Laplace’s demon and the deterministic interpretation of classical mechanics, and the 19th-century reactions of romanticism and spiritualism. Finally, we will examine the radical and counterintuitive changes in the notion of matter occasioned by quantum mechanics, as well as interpretations that put consciousness and subjectivity back into the collapse of the wave function. We will consider whether contemporary physics really has the kind of notion of “material substance” needed for a traditional form of materialism before concluding with readings from philosophers and physicists in the recent revivals of dualism and panpsychism.

PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths

This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth—for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

PHIL337 Comparative Philosophy

This seminar will explore the substantive and methodological issues that arise when one takes seriously the idea that philosophy has been, and continues to be, practiced within multiple traditions of inquiry, in many different ways, and in many different languages. We will examine and critique some of the ways in which “comparison” has been used, as well as examine arguments that comparison across traditions is, in fact, impossible. Although most of our attention will be focused on written academic research, we will also attend to the challenges and benefits of interacting directly with philosophers in other countries and cultures.

PHIL338 Comparative Political Philosophy

Undertaking “comparative philosophy” means to do philosophy by drawing on multiple philosophical traditions. In this course, we will study key topics in political philosophy, such as the justification of political authority, the legitimacy of public critique of social rituals, and the scope of liberty and rights—from both modern Western and contemporary East Asian perspectives. We will examine potential obstacles to comparative theorizing, as well as benefits that can arise both for currently dominant traditions (e.g., Western liberalism) and for alternatives to liberalism such as Chinese and Korean Confucianism.

Offering: Host
the "Anthropocene" are still contested terrains. The aim of this course is to
investigate the Anthropocene’s many forms of socio-political erasures and
theoretical “blind-sights.” We will examine the ways in which Anthropocene
discourses have been powerful at disavowing racial antagonism in our current
ecological crisis. More specifically, in this course, will study the ecological
effects on black communities around the globe with the aim to
questions the shortcomings of ethics in Anthropocenean times. We will explore
questions like “who are ‘recognizable/legitimate’ victims in environmental
disasters,” “do events like hurricane Katrina or the migration crisis teach
us anything about our human condition,” and “what is the ‘post’ in post-
humanism.” We will read philosophical works ranging from Immanuel Kant and
Baruch Spinoza to Rosi Braidotti and Karen Barad.

PHIL347 Ethics, Ecology, and Moral Change
People commonly recognize that in facing global climate crises, we need to
change our habits and practices. Yet our activities are bound up with our
perceptions and with our embodied experience of value and possibility.
This seminar dives into recent attempts to radically rework our ways of
understanding and inhabiting the world. As the flip-side of environmental
alienation is alienation from our embodiment, our sessions will incorporate
movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and
embedded in our surroundings, we will consider the hypothesis that shifts in
action emerge together with shifts in perception. Radical accounts of
metaphor and its uptake will help us develop accounts of perceptual change. Our
readings will follow a variety of metaphorical directions, including animism and
animacies, affordance and hyperobject, process and intra-action, native and
other, inflammation and balance, dwelling and death, consumption and
sustainability. How -- and with what risks and unexpected outcomes -- can these
patterns of recognition help in orienting us to the challenges of environmental
interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman,
via Wesleyan’s Creative Campus Initiative. Sigman will co-shape discussion and
activities during at least two of our sessions.

PHIL354 Hope and Hopelessness in an Age of Mass Incarceration
The United States incarcerates more people than any other country in the
world. Over 2 million people are caught in the criminal justice system today. A
disproportionate number of those incarcerated are people of color, particularly
black, Latino/a, and indigenous men. Women, too, are a growing part of the
prison population, as are queer, transgender, and gender-nonconforming
people. Young people, particularly impoverished black youth, are funneled into
correctional supervision through the school-to-prison pipeline. For many people
in the country today, avoiding prison seems hopeless.

This interdisciplinary course, grounded on philosophical reflections on hope,
liberty, respect, and exclusion, will critically explore the moral, psychological,
ethical, social, and political issues raised by mass incarceration in the United
States. We will be particularly interested in whether and under what conditions
hope is possible for those marginalized under the carceral system.

PHIL355 Necropolitics and Black “Fugitive” Politics
In his important essay interrogating the (im)possibility of black sociality, Fred
Moten attempts to find an order of black social life which would unfold in the
very confrontation between black (social) death and the law. However,
as he argues, this form of black life would be “reducible neither to simple
interdiction nor bare transgression.” The form of black life that interests Moten
is essentially one of “fugitivity.” In a recent response to Moten’s text, David
Marriott worries that “by writing blackness as ceaseless fugitivity,” Moten
advances “a position in which blackness is only black when it exceeds its racial
disavowal” and therefore blackness “can only be recognized as black in so far
as it escapes the racism of its history.” In this course, we will trace and follow
the implications of Moten’s intervention. More specifically, we will explore what
forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity
could yield given that “black life” remains arguably the most precarious form of
living under various contemporary “necropolitical” apparatuses of sanctioned
racial exclusion, control, persecution and--in worse cases--genocide. Key figures
will include Frantz Fanon, Achille Mbembe, Jacques Derrida, Michel Foucault,
Jared Sexton, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman,
Alexander G. Weheliye, Elizabeth Povinelli, and Gayatri Spivak.

PHIL353 Blackness in the Anthropocene
To deny the “unprecedented” geological impact of humans’ force on nature is
now practically untenable. Theorists in the humanities, nonetheless, remain
unimpressed with what this “new era” has afforded us in terms of critical
potential. From accusations that what we now call the "Anthropocene" has
merely established a hegemony of brute facts at the expense of critique, to
concerns about the multiple ways in which the term continues to obscure
catastrophic socio-ecological relations, it is fair to say that the scenes of
the "Anthropocene" are still contested terrains. The aim of this course is to
assess both individuals and collective forms of criticism, not only on geographic and/or epistemological practices. We will attempt to assess when, where, and discourses traditionally perceived to be at the center of knowledge production intervening from the “margins” of mainstream continental thought and aspects of the debates that emerged from the confrontation between voices and contemporary French theory. The aim of this course is to focus on some European philosophical archive (more specifically in this case, deconstruction). This seminar will attend to some of the ways in which philosophers of race, PHIL360 Continental Philosophy’s Others

Prereq: None

PHIL357 Animal Minds
Can animals reason? Do they form intentions, do they have beliefs, might they act ethically? What do other animals know? How can we know what they might know, and what can exploring the minds of other animals tell us about our own minds? In this course we will attempt to answer these questions by adopting a largely comparative perspective and examining philosophical, scientific, psychological, and popular writing about minds. We will examine evidence for mindedness and reasoning in social species. We will also explore the ethical implications of this research.

PHIL359 Michel Foucault: Power and Its Products
Is power productive of reality? What does Michel Foucault (1926-1984) mean when he famously declares that power is not just prohibitive, but productive? Foucault’s work has been enormously influential in the fields of philosophy, social theory, history, anthropology, queer theory, and feminist theory, among others. The primary topic of Foucault’s work is the way in which we have come to categorize not only our world but ourselves and in particular to categorize ourselves in terms of madness, criminality, disease, and sexuality. Foucault, however, is interested in more than these categories themselves: he aims to investigate the conditions through which these categories come to be seen as capable of capturing truths about ourselves. This investigation leads him, in the mature phase of his work that begins in the 1970s, to the problem of power, which is best thought of as a set of relations and not as a thing or a possession. Foucault takes power relations to be (a) implied in relations of knowledge and (b) to be “productive,” in a certain sense, of social reality. In this course, we will try to clarify the relationship between power, the production of the social, and knowledge in Foucault’s work.

On the one hand, to call power productive opens the door to a major reconsideration of the basic problems of social and political philosophy, which can no longer be assured of having a timeless set of basic questions or objects (the state, the citizen-subject). On the other hand, there is a risk in this approach of ascribing almost magical qualities to power and of reifying it. Since his death, Foucault’s thought has often been taken to end up in a curious impasse, caught of ascribing almost magical qualities to power and of reifying it. Since his death, Foucault is interested in more than these categories themselves: he aims to investigate the conditions through which these categories come to be seen as capable of capturing truths about ourselves. This investigation leads him, in the mature phase of his work that begins in the 1970s, to the problem of power, which is best thought of as a set of relations and not as a thing or a possession. Foucault takes power relations to be (a) implied in relations of knowledge and (b) to be “productive,” in a certain sense, of social reality. In this course, we will try to clarify the relationship between power, the production of the social, and knowledge in Foucault’s work.

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in “nature”; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

PHIL383 Mind, Body, and World
Social-pragmatist conceptions of language and mind have sought to accommodate the normativity of meaning and justification within a broadly scientific, naturalistic understanding of ourselves and the world by treating mental life as grounded in public practices and norms of communication in partially shared causal circumstances. Such accounts have sometimes been criticized for neglecting the experiential, affective, and first-personal aspects of mind and, at other times, for disconnecting linguistic communication from accountability to the world. This advanced seminar critically assesses some influential recent efforts to account for objective accountability, perceptual experience, first-person perspectives, and affectivity as constructive components of broadly social-pragmatist approaches to mindedness. With a brief introduction to Quine’s and Davidson’s criticisms of semantic empiricism as background, we will examine John McDowell’s attempt to develop a post-Davidsonian empiricism, Hubert Dreyfus’s phenomenological dualism of bodily coping and linguistic articulation, Alva Noe’s treatment of perception as bodily activity, John Haugeland on embodied “existential commitment,” and Rebecca Kukla and Mark Lance on the pragmatic normativity of the space of reasons.

PHIL385 Understanding Life and Mind
Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.
