PHILOSOPHY

Doing philosophy means reasoning about questions that are of basic importance to the human experience—questions like, What is a good life? What is reality? How are knowledge and understanding possible? What should we believe? What norms should govern our societies, our relationships, and our activities? Philosophers critically analyze ideas and practices that often are assumed without reflection. Wesleyan’s philosophy faculty draws on multiple traditions of inquiry, offering a wide variety of perspectives and methods for addressing these questions.

FACULTY

Stephen Angle
BA, Yale University; PHD, University of Michigan
Mansfield Freeman Professor of East Asian Studies; Professor of Philosophy; Director, Center for Global Studies; Professor, East Asian Studies

Lori Gruen
BA, University of Colorado Boulder; PHD, University of Colorado Boulder
William Griffin Professor of Philosophy; Professor of Philosophy; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Animal Studies

Steven W. Horst
BA, Boston University; PHD, University of Notre Dame
Professor of Philosophy; Chair, Philosophy; Professor, Science in Society; Coordinator, Christianity Studies

Tushar Irani
BA, Colgate University; PHD, Northwestern University
Associate Professor of Philosophy; Associate Professor of Letters; Chair, College of Letters; CPE Instructor

Joseph T. Rouse
BA, Oberlin College; MA, Northwestern University; MAA, Wesleyan University; PHD, Northwestern University
Hedding Professor of Moral Science; Professor of Philosophy; Professor of Science in Society; Professor, Environmental Studies

Sanford Shieh

PHIL111 Introduction to Critical Philosophy of Race
This first-year seminar (FYS) course will examine contemporary figures in the emerging field of critical philosophy of race. We will attempt to examine what contributions (if any) the critical philosophy of race has provided not only to philosophy as a discipline but also to more traditional and established modes of thinking race and racism. We will do so by exploring issues such as the differences between critical philosophy of race and critical race theory, as well as the historical role of race and racism in philosophical thinking, and by attending to the major debates currently held in this emerging tradition.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PHIL
Identical With: AFAM111
Prereq: None

PHIL112 Virtue and Vice in History, Literature, and Philosophy
Beginning with Confucius and Aristotle and reading our way through significant texts of Christianity, humanism, postmodernism, and critical race theory, we will explore the ethics, power, and politics intersecting in ideas of virtue.
Offering: Crosslisting
Grading: OPT
Credits: 1.00

PHIL151 Living a Good Life: Chinese Lab (CLAC.25)
This optional "lab" class is intended for students (1) who have taken or are currently taking PHIL 210: Living a Good Life; and (2) who have little or no exposure to classical Chinese. Each weekly session will introduce students to aspects of the classical Chinese language--the written language of pre-20th-century China. Students will be able to read (in Chinese) and discuss (in English) key passages from the Confucian classics on which the Living a Good Life courses is partly based. No previous knowledge of Chinese (classical or modern) is necessary.
Offering: Host
Grading: Cr/U
Credits: 0.25

Identical With: CGST224
Prereq: None

PHIL152 Living a Good Life: Greek Lab (CLAC.25)
This optional "lab" class is intended for students (1) who have taken or are currently taking Phil 210: Living a Good Life; and (2) who have little or no exposure to Classical Greek. Each weekly session will introduce students to aspects of Attic Greek--the written language of most of the Greek texts we will be studying this semester. Students will be able to read (in Greek) and discuss (in English) key passages from Aristotle's Nicomachean Ethics and Epictetus' Encheiridion, on which the Living a Good Life course is partly based. No previous knowledge of Greek (classical or modern) is necessary.

Prereq: None

PHIL154 What Is Rationality?
What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures—or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

PHIL160 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

PHIL201 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

Gen Ed Area: HA-PHIL
Identical With: COL359, CCIV217
Prereq: None

PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant
Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' MEDITATIONS, Locke's ESSAY CONCERNING HUMAN UNDERSTANDING, Hume's ENQUIRY CONCERNING HUMAN UNDERSTANDING, and Kant's CRITIQUE OF PURE REASON.

PHIL204 Philosophical Classics IV: 20th-Century Analytic Philosophy
This course will study selected writings by the antipsyc speculative, logic- and language-oriented thinkers who have shaped 20th-century Anglo-American philosophy—including Peirce, Frege, Moore, Russell, Wittgenstein, Carnap, Quine, Ryle, and Austin.
PHIL207 Live Like a Philosopher  
Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will “live like a philosopher” by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

Offering: Host  
Grading: Cr/U  
Credits: 1.00  
Gen Ed Area: SBS-PHIL  
Prereq: None

PHIL210 Living a Good Life  
For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one’s orientation to the world and, thus, how one lives one’s life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today’s world?

This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. Please note that the locations for the different sections of this course are NOT all listed below. For details of the locations of each class session and breakout section, please see the course website: https://livingagoodlife.wescreates.wesleyan.edu/.

Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.25-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WesMaps for more information.

PHIL212 Introduction to Ethics  
This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality’s basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism  
This course is an introduction to existentialism. "Existentialism" is both a philosophical tradition and a term that is central to the intellectual history of western thought. The term was explicitly adopted self-descriptively by Jean-Paul Sartre, and was widely disseminated both by his own literary and philosophical contributions and those of his intellectual interlocutors--notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and 1950s. In this course, we will begin by exploring the root and intellectual origins of this tradition through the work of philosophers and authors like Friedrich Nietzsche, Fyodor Dostoyevsky, and Soren Kierkegaard. We will spend a considerable time on some of this philosophical tradition’s central
tenets like "freedom," "the absurd," "existence precedes essence," "facticity," "authenticity," and "despair." Because existentialism also resonated widely with anti-colonial thinkers across the globe, we will end the course by reading important figures in this movement like Frantz Fanon, Richard Wright, and James Baldwin, in order to understand the ways in which existentialism gradually became an intellectual and political tool of contestation against racism and imperialism.

PHIL213F Introduction to Existentialism (FYS)
This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of Fyodor Dostoevsky, Søren Kierkegaard, Martin Heidegger, Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, Gabriel Marcel, Simone Weil, Richard Wright, Frantz Fanon, Toni Morrison, and James Baldwin. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

PHIL214 Reasoning About Justice
This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

PHIL217 Bioethics and Social Justice
"Health has replaced salvation," wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses—the creation and institutionalization of the discipline of bioethics—and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

PHIL218 Personal Identity and Choice
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides

Prereq: None

PHIL218F Personal Identity and Choice (FYS)
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. PHIL219 Evil, Responsibility, and Forgiveness
The problem of evil has long occupied an important position in the history of philosophy. In light, however, of the horrific events of the 20th-century, philosophers and other writers of the past hundred years have begun to ask whether it is time to rethink our own understanding of evil. Is it possible to understand genocide, colonialism, and systematic racism through existing conceptions of evil, responsibility, and forgiveness, conceptions drawn largely from religion and the law? What happens to our understanding of evil when, as Hannah Arendt famously suggested with her notion of the "banality of evil," mass murder is detached from wicked intentions and is made routine, mundane, even cliché? What happens to our understanding of responsibility when, on the one hand, a whole society, not just an individual, is implicated in a crime--and when, on the other hand, responsibility cannot be confined to geographical or national borders? What happens to our understanding of forgiveness when the very possibility or desirability of such an act becomes eminently questionable? In this course, we will draw from continental philosophy, critical philosophy of race, literature, and film. Readings may include selections from Emmanuel Levinas, Hannah Arendt, Frantz Fanon, Aimé Césaire, Primo Levi, Jacques Derrida, and Susan Neiman.

PHIL220 Human Nature
The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL222 Global Philosophy
Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves—sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions—in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL231 Reason and Paradox
This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno’s Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

PHIL233F Bodies and Experiences (FYS)
Philosophers study the world with their minds. But who says that they should only discuss "mental" stuff such as concepts, rationality, or logic? This course is about bodies, and about the experiences that we have in virtue of those
bodies. We will explore a variety of contemporary philosophical topics that have bodies and experiences at their center. These include the experience of skilled movement when we dance or play a sport, having a physical disability, or being shamed for our body size. We will discuss the ways we experience race, gender, sex, and sexual orientation. We will learn what makes a question distinctly philosophical and what methods philosophers follow to answer it. But most importantly, we will learn to be OK with the fact that there might be no true answer at all.

**PHIL253 Nietzsche als Versucher (CLAC.50)**

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"—a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors—such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception—notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

**PHIL254 The Rationalist Tradition in Early Modern European Philosophy**

This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

**PHIL255 Moral Psychology: Care of the Soul**

Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives.
Class will meet on Monday and Wednesday in lecture/discussion format. Each student must also be enrolled in one discussion section. Discussion sections will be focused on specific interests in or approaches to moral psychology such as clinical therapy, philosophical analysis, or spirituality in a particular religious tradition. The particular offerings of discussion section topics will vary from year to year. Each discussion section will have a distinctive set of additional readings and exercises.

PHIL257 Philosophy and Culture of Traditional Korea
Today, Korean studies is a viable subject in leading American institutions, mainly due to the nation’s rising to the world power in the fields of economy and pop culture. Korea is also proud of its long history of intellectual tradition, which, compared with that of China and Japan, is never far behind in depth and breadth.

This course is designed to introduce students to the rich culture and philosophy of traditional Korea. More specifically, we will touch upon various schools or branches of thought that had been prevalent from the latter half of the 14th century to the early 20th century. Among these are Buddhism, Zen Buddhism, Confucianism, Neo-Confucianism, Taoism, and other native schools of thought. We will explore issues surrounding social structure, social and familial ethics, gender politics, legal and penal systems, and values and attitudes of the pre-modern Korean society, which was made up of the major dynasty, Joseon (1392-1910).

Upon successful completion of this course, students will be expected to have acquired enough knowledge about and taste in traditional Korean philosophy and culture to serve as a prerequisite for the further exploration of in-depth Korean studies. Also, students will have an opportunity to compare and contrast the unique cultures of three Far Eastern countries: China, Japan, and Korea.

PHIL258 Post-Kantian European Philosophy
In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate’s requirement in philosophical origins of theory.

PHIL259 Neo-Confucian Philosophy
This course presents critical discussion of issues central to Neo-Confucian (11th–19th centuries CE) philosophers that in many cases are still central in East Asian thought today. Topics will include the relation between knowledge and action, Neo-Confucian conceptions of idealism and materialism, and the connection between Neo-Confucian philosophy and spirituality. While our primary focus is on China, we will also look at distinctive Neo-Confucianism issues in Korea and Japan.

PHIL260 Reading Mencius in Chinese (CLAC.50)
This course offers students the opportunity for guided reading of the original, classical Chinese text of the great Confucian classic Mencius (or Mengzi). Advanced (four-year level or above) competence in Chinese (including native Chinese competence) is required for the class, but previous experience in classical Chinese is not. The pace of reading and language of discussion will be determined based on student enrollment.

PHIL261 Philosophical Classics III: Post-Kantian Analytic Philosophy
This course focuses on the development of a central strand of European and American philosophy after Kant: the analytic tradition of philosophy. The philosophical orientation, problems, and methods of this tradition animate much of contemporary philosophy, and this course aims to provide a basic grounding in this tradition, and thereby a gateway to current mainstream philosophizing. Topics include: logic, mathematics, science, necessity, thought, knowledge, and reality.

PHIL262 Phenomenology and Existentialism
In this course, we will study and discuss two interrelated and complementary schools of thought in Western philosophy: phenomenology and existentialism.
We will cover both history and contemporary debates, as well as phenomenology-inspired research in cognitive science, psychology, and neuroscience. Roughly half the course will be devoted to the origins of phenomenology and existentialism, setting the main views within their historical context. The other half will discuss contemporary philosophical debates and scientific research, for example in artificial intelligence and robotics, involving phenomenological approaches.

PHIL264 Japanese Philosophy
This course traces the development of lines of thought from the Heian Period (794-1185) to the 21st century. Students will consider Japanese forms of Buddhism (including Zen) and Confucianism, as well as Japan's native tradition of Shinto. Students will also gain familiarity with the confluence of these traditions in the samurai (Bushido), and later incorporations of Western thought by the Kyoto School. The final section of the course, focused on Japanese aesthetics, invites students to engage in Japanese philosophy as a way of life.

PHIL265 Postanalytic Philosophy: Science and Metaphysics
The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy's relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL266 Buddhism and Social Justice
In this course students will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a uniquely Buddhist basis for social justice. Historical texts to be covered include the Dhammapada, Therigatha, Jataka Tales, and Shantideva's A Guide to the Bodhisatva's Way of Life. We will discuss major philosophical questions such as, "how can we strive for change, while simultaneously accepting things as they are?" "How do we respect the importance of identities while denying the existence of a self?" "If the world will always be imperfect, why bother trying to improve social conditions?" We will then discuss contemporary applications of Buddhism for social change, and compare these with non-Buddhist approaches. Modern texts include "Soaring and Setting" by Rita Gross, "Freedom in Exile" by His Holiness the 14th Dalai Lama, "Burdened Virtues" by Lisa Tessman, and "Strength to Love" by Martin Luther King Jr.

PHIL267 History and Limits of Aesthetic Theory
This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

and how else might such purposes be achieved?

(4.) What is our aim and purpose in holding ourselves and others responsible, even when there is a good causal explanation for their conduct?

(3.) Can we hold someone morally responsible for their action? (2.) How much do concepts of moral responsibility reflect particular intentions? For consequences? For their character? For other implications of their actions? (1.) For what can we hold people responsible? For their associated with each view.

Key themes include: (1.) For what can we hold people responsible? For their intentions? For consequences? For their character? For other implications of their action? (2.) How much do concepts of moral responsibility reflect particular (and questionable) cultural ideals? (3.) Can we hold someone morally responsible even when there is a good causal explanation for their conduct?

(4.) What is our aim and purpose in holding ourselves and others responsible, and how else might such purposes be achieved?

This intermediate philosophy course will investigate conflicting ideas about moral responsibility and develop skills in understanding and critiquing the arguments associated with each view.

PHIL271 Moral Responsibility: Doubt, Debate, and Dialogue

This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of “doing moral theory.” Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

PHIL272 Human Rights Across Cultures

Are human rights universal? Do cultural differences matter to judgments about human rights? We will look at the current international human rights institutional framework and at theoretical perspectives from Europe and America, China, and the Islamic world. We will look primarily at philosophical materials but will also pay some attention to the premises of international legal documents like the Universal Declaration of Human Rights and to the assumptions behind activist organizations such as Amnesty International.

Offering: Host
Grading: A-F
Credits: 1.00

PHIL274 Global Ethics: Environmental and International

Shared questions may include:

Is there a coherent way of distinguishing "nature" from the non-natural?

What can we understand about non-human experience and value?

How do people become motivated to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies?

How do concepts of moral responsibility apply to climate change?

How does environmentally directed action relate to social justice?

When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another?

Despite near consensus about our times being rife with environmental crises, concepts like "environment" and "nature" defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainable, they may not share any clear positive account of justice or of sustainability.

Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique--each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics).

Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

PHIL270 Environmental Philosophy

This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition--human-centered and individualist accounts of existence, agency, knowledge, and value.

This intermediate philosophy course will investigate conflicting ideas about moral responsibility and develop skills in understanding and critiquing the arguments associated with each view.

Key themes include: (1.) For what can we hold people responsible? For their intentions? For consequences? For their character? For other implications of their action? (2.) How much do concepts of moral responsibility reflect particular (and questionable) cultural ideals? (3.) Can we hold someone morally responsible even when there is a good causal explanation for their conduct?

(4.) What is our aim and purpose in holding ourselves and others responsible, and how else might such purposes be achieved?
PHIL278 Political Philosophy

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Children, particularly impoverished black youth and, increasingly, immigrants, are funneled into correctional supervision. In this course we will ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.

PHIL280 Theory, Critique, Politics

The subject of this course centers on two questions in 20th century continental philosophy. First, what can theory bring to our understanding of politics? Second, what is the role of critique for political judgment? We will begin with Kant for an understanding of the meaning of “critique” that many 20th century continental philosophers draw upon. Following this introduction, the course will be split between German philosophers and French philosophers to allow us to understand the tensions and convergences between the two camps. The German philosophers we will read are Heidegger, Adorno, Herbert Marcuse, and Ernst Bloch. For the French philosophers, we will read Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, and Michel Foucault. By the end of the course students will be able to assess how different thinkers attempted to resolve the relationship of the philosopher to political society.

PHIL281 Africana Political Philosophy 1800s-1970

This course aims to introduce students to both the critical and the constructive dimensions of Africana political thought. Through our readings and discussions, we will assess the claims that African thinkers have made upon the polity, how they have defined themselves, and how they have sought to redefine the basic terms of public life away from either slavery or colonization. Among the themes that we will explore are the relationship between slavery and democracy, the role of historical memory in political life, the political significance of culture, the connections between “race” and “nation,” and the tensions between claims for black autonomy and claims for integration, as well as the meaning of such core political concepts as citizenship, freedom, equality, progress, power, and justice. As we focus our attention on these issues, we will be mindful of the complex ways in which the concept of race has been constructed and deployed throughout historical periods and its interrelationship with other elements of identity such as gender, sexuality, class, and religion. Furthermore, we will attend to differences across black geographies from the Americas to the Caribbean, and parts of Africa.

PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion

With the dawning of modernity, Europe’s colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, “philosophy of religion” is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God’s existence—along with refutations of those proofs and rebuttals to those refutations—the problem of evil, religious ethics, religious experience, the possibility of a universal religion, “divine” racism, the gender of God, the eccocical tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

PHIL286 Philosophy of Mind

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-person experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding
light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

PHIL288 Sciences as Social and Cultural Practices
Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

Gen Ed Area: NSM-PHIL
Prereq: PHIL231 OR PHIL230

PHIL291 Reason and Its Limits
This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

Prereq: None

PHIL294 Heidegger and the Being Question
Martin Heidegger argued in BEING AND TIME that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be BEING AND TIME and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger's own views about this question.

PHIL296 Philosophy of Psychology
How does the mind work? So-called "computationalists" think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called "mental representations") according to rules, and then issues "commands" to guide behavior. On the other hand, the "SE" (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. SE theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn’t happen "in a vacuum," and it isn't separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the SE approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

PHIL297 The Problem of Language in Chinese Philosophy
The class examines the criticisms of language in various schools of Chinese thought, exploring themes such as the ineffability of the absolute, the rejection of logic, naturalistic criticism of language as a vehicle of propositional knowledge, the "heart that precedes words" in apophatic practice, words as generator of duality, and more. Special emphasis will be given to the paradox of "saying the unsayable" in Daoism and Chan Buddhism, and on the various literary techniques by which the early thinkers have tried to avoid this conflict.

PHIL302 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances—animals, vegetables, and minerals; people and artifacts—the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities—parts of parts of parts... and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero—provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science—in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconciled so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

PHIL303 Plato’s REPUBLIC
"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato. " This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato’s Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today—on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics—receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power—the life of a tyrant—is psychologically corrupted. These are bold claims. What is Plato’s argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL306 Sophist, Statesman, Philosopher: Plato’s Later Metaphysics and Politics
How is it possible to speak falsely? Plato connects this question with a puzzle he
inherits from the great pre-Socratic philosopher Parmenides: to speak falsely
is to speak about what is not; but in speaking about what is not, we ascribe
being somehow to not-being, which sounds like a contradiction. This seminar
will focus on the metaphysical, epistemological, and political issues generated
by Parmenides’s puzzle and explore Plato’s solution to them in two of his later-
period works: the Sophist and the Statesman. In the process, we will see how
Plato rethink’s his theory of forms in these dialogues, how he learns to let go of
Socrates, how a sophist should be distinguished from a philosopher, and how all
of this is relevant to politics and the art of ruling.

PHIL327 Progressive Confucianism and Its Critics
Contemporary “Confucianism” designates a diverse set of philosophical, social,
political, and religious approaches that are rooted in traditional East Asia and
are playing significant—and increasing—roles in the modern world. “Progressive
Confucianism” designates a subset of these approaches, emphasizing the
ways that the Confucian tradition has developed throughout the centuries and
arguing both that modern Confucianism must continue to develop, and that
a properly developed Confucianism has much to contribute to contemporary
philosophy and to modern societies. This seminar will explore the background
out of which progressive Confucianism has emerged; its distinctive approach and
key contributions to Confucianism and to global philosophy more generally; and
central criticisms that it has faced, with sources ranging from more conservative
(or even fundamentalist) Confucians to liberals and progressives.

PHIL310 Concepts of Matter: A Brief Philosophical History of the Concept of
Matter
In this course, we will explore changing notions of matter in Western thought
from classical Greek thought through the quantum revolution in physics, and
philosophical debates about their implications. We will begin with views of
matter in Plato, Aristotle, and the ancient atomists and how they were
interrelated with views of human beings: the devaluation of matter and the body
in Platonist and Gnostic thought, the perhaps surprisingly positive attitude taken
toward death without a hope of continued existence by the materialist Lucretius,
and the appropriation of Aristotle’s hylomorphic philosophy into Christian
theology and scholastic science in the late middle ages. We will then look at the
emergence of a conception of “material substance” in the 17th century, examining
the differences between the mathematical formulations of Galilei and Descartes and those of atomists such as Gassendi. The remainder of the
section will focus on the rise of materialism and reactions against it: Descartes and Hobbles on the question of whether human beings are merely machines,
the Newton-Leibniz debate about the activity of God in nature, Laplace’s demon
and the deterministic interpretation of classical mechanics, and the 19th-
century reactions of romanticism and spiritualism. Finally, we will examine
the radical and counterintuitive changes in the notion of matter occasioned
by quantum mechanics, as well as interpretations that put consciousness
and subjectivity back into the collapse of the wave function. We will consider
whether contemporary physics really has the kind of notion of “material
substance” needed for a traditional form of materialism before concluding with
readings from philosophers and physicists in the recent revivals of dualism and
panpsychism.

PHIL337 Comparative Philosophy
This seminar will explore the substantive and methodological issues that arise
when one takes seriously the idea that philosophy has been, and continues
to be, practiced within multiple traditions of inquiry, in many different ways,
and in many different languages. We will examine and critique some of the
ways in which “comparison” has been used, as well as examine arguments
that comparison across traditions is, in fact, impossible. Although most of our
attention will be focused on written academic research, we will also attend to
the challenges and benefits of interacting directly with philosophers in other
countries and cultures.

PHIL338 Comparative Political Philosophy
Undertaking “comparative philosophy” means to do philosophy by drawing
on multiple philosophical traditions. In this course, we will study key topics in
political philosophy, such as the justification of political authority, the legitimacy
of public critique of social rituals, and the scope of liberty and rights-from both
modern Western and contemporary East Asian perspectives. We will examine
potential obstacles to comparative theorizing, as well as benefits that can
arise both for currently dominant traditions (e.g., Western liberalism) and for
alternatives to liberalism such as Chinese and Korean Confucianism.
Offering: Host
compare it to other modern and contemporary approaches. Because our approach will be primarily deconstructive, we shall also attempt to understand why democracy and sovereignty tend to exceed conceptual grasp. Ultimately, we will consider the import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Following the later work of Jacques Derrida, we will investigate the significance of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL340 Human Nature

The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL347 Ethics, Ecology, and Moral Change

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits. Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan’s Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

PHIL351 Deconstruction and Politics

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.
correctional supervision through the school-to-prison pipeline. For many people in the country today, avoiding prison seems hopeless.

This interdisciplinary course, grounded on philosophical reflections on hope, liberty, respect, and exclusion, will critically explore the moral, psychological, ethical, social, and political issues raised by mass incarceration in the United States. We will be particularly interested in whether and under what conditions hope is possible for those marginalized under the carceral system.

**PHIL355 Necropolitics and Black "Fugitive" Politics**
In his important essay interrogating the (im)possibility of black sociality, Fred Moten attempts to find an order of black social life which would unfold in the very confrontation between black (social) death and the law. However, as he argues, this form of black life would be "reducible neither to simple interdiction nor bare transgression." The form of black life that interests Moten is essentially one of "fugitivity." In a recent response to Moten's text, David Marriott worries that "by writing blackness as ceaseless fugitivity," Moten advances "a position in which blackness is only black when it exceeds its racial disavowal" and therefore blackness "can only be recognized as black in so far as it escapes the racism of its history." In this course, we will trace and follow the implications of Moten's intervention. More specifically, we will explore what forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity could yield given that "black life" remains arguably the most precarious form of living under various contemporary "necropolitical" apparatuses of sanctioned racial exclusion, control, persecution and—in worse cases—genocide. Key figures will include Frantz Fanon, Achille Mbembe, Jacques Derrida, Michel Foucault, Jared Sexton, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, Alexander G. Weheliye, Elizabeth Povenelli, and Gayatri Spivak.

**PHIL357 Animal Minds**
Can animals reason? Do they form intentions, do they have beliefs, might they act ethically? What do other animals know? How can we know what they might know, and what can exploring the minds of other animals tell us about our own minds? In this course we will attempt to answer these questions by adopting a largely comparative perspective and examining philosophical, scientific, psychological, and popular writing about minds. We will examine evidence for mental abilities humans possess and nonhuman animals (putatively) lack, such as reasoning and language. Only recently, however, have the sciences—particularly evolutionary biology, cognitive psychology, anthropology, and cognitive ethology—begun to offer the tools needed to characterize differences in the cognitive toolkits of different species and to attempt to piece together hypotheses about how human minds differ so greatly from those of our nearest relatives, the great apes, in spite of our genetic similarity and the comparatively brief period since the time of our last common ancestors. In this course, we will read several recent works by philosophers and scientists presenting theories of the evolution of distinctively human cognition.

**PHIL359 Michel Foucault: Power and Its Products**
Is power productive of reality? What does Michel Foucault (1926-1984) mean when he famously declares that power is not just prohibitive, but productive? Foucault's work has been enormously influential in the fields of philosophy, social theory, history, anthropology, queer theory, and feminist theory, among others. The primary topic of Foucault's work is the way in which we have come to categorize not only our world but ourselves and in particular to categorize ourselves in terms of madness, criminality, disease, and sexuality. Foucault, however, is interested in more than these categories themselves; he aims to investigate the conditions through which these categories come to be seen as capable of capturing truths about ourselves. This investigation leads him, in the mature phase of his work that begins in the 1970s, to the problem of power, which is best thought of as a set of relations and not as a thing or a possession. Foucault takes power relations to be (a) implied in relations of knowledge and (b) to be "productive," in a certain sense, of social reality. In this course, we will try to clarify the relationship between power, the production of the social, and knowledge in Foucault's work.

On the one hand, to call power productive opens the door to a major reconsideration of the basic problems of social and political philosophy, which can no longer be assured of having a timeless set of basic questions or objects (the state, the citizen-subject). On the other hand, there is a risk in this approach of ascribing almost magical qualities to power and of reifying it. Since his death, Foucault’s thought has often been taken to end up in a curious impasse, caught between extreme activism that accepts no system of power as established and cynicism that sees co-optation everywhere and resistance as futile. What are the political implications of Foucault's shifting conception of power? What follows for our understanding of ourselves? What is really at stake in the ways that we classify and categorize ourselves today?

**PHIL360 Continental Philosophy's Others**
This seminar will attend to some of the ways in which philosophers of race, Subaltern thinkers, and “postcolonial” philosophers have engaged with the European philosophical archive (more specifically in this case, deconstruction and contemporary French theory). The aim of this course is to focus on some aspects of the debates that emerged from the confrontation between voices intervening from the "margins" of mainstream continental thought and discourses traditionally perceived to be at the center of knowledge production and/or epistemological practices. We will attempt to assess when, where, and how these “philosophies from the borderlands” have had important bearings on contemporary debates in political philosophy and social theory. We will assess both individuals and collective forms of criticism, not only on geographic frontiers but also on liminal and alternative spaces within the same geographic and institutional location, such as the American academy.

PHIL363 Philosophy of Perception
Roughly, perception is the cognitive activity embodied creatures engage in order to find out things about their environment. In the most basic sense, perception involves conscious awareness of something other than ourselves, which causally depends on sensory organs (our eyes, ears, nose, etc.) being stimulated by something external to our physical body. In this course, we will explore the several different “levels” at which philosophers think about perception and the different questions being asked. At the metaphysical level, the central question is: What kind of “things” do we perceive? What is perceptual awareness of? At the epistemological level, we will deal with the question: can we gain knowledge about the world through perception? Finally, at the psychological level, we will ask: How do the psychological processes—studied by sciences like cognitive science, neuroscience, physiology, etc.—relate to the metaphysical and epistemological questions?

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in “nature”; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

PHIL383 Mind, Body, and World
This seminar in the metaphysics of mind and meaning begins with the philosophical and scientific background to cognitivist conceptions of mind and artificial intelligence. Both classic and recent criticisms of cognitivism and early AI emphasize the role of bodily movement and skill, language, social normativity, and engagement with and within the world as integral to conceptualization and understanding. These themes will then be explored constructively in some recent reconceptions of cognition as embodied and social-pragmatic, and of language and other conceptual repertoires as integral to bodily involvement in the world and with one another.

PHIL385 Understanding Life and Mind
Philosophical conceptions of mind and language are now typically “naturalistic” in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an “internal” representation of an “external” world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an “extended evolutionary synthesis;” reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

PHIL390 Topics in Metaphysics
Among the many enigmatic aspects of Wittgenstein’s Tractatus Logico-Philosophicus are (a) an apparent distinction between what can be said and what can only be shown, (b) the purported doctrine that there is truth in solipsism and mysticism, (c) the supposed coincidence of realism and idealism, and (d) finally, the apparent astonishing “conclusion” of the Tractatus that this book is made up of nonsense, and has itself to be overcome, to see the world right. This seminar focuses on the existence and nature of what cannot be said, in particular on the recent “resolve” approach to interpreting the Tractatus according to which what cannot be said is nothing more than plain nonsense, and a variety of critiques of this “resolve” approach. Investigation of this interpretive controversy points to a spectrum of conceptions of the mystical and the unsayable. We conclude the seminar with the significance of these conceptions for the nature of philosophizing.
