COL258 The Word for World is Information: Ideologies of Language in Science Fiction & Film

By the middle of the 20th century, it had begun to seem possible to produce a grand theory of communication that would use language as a basis for understanding all of human thought, behavior, and culture. As competing versions of such a theory circulated through academic disciplines as disparate as anthropology, neurophysiology, and the emerging field of computer science, they also filtered out--sometimes in strangely warped or oversimplified forms--into popular culture.

This course will examine the most interesting and influential of these theories, both in their scholarly origins and in their most puzzling and promising elaborations in works of literary and filmic science fiction. We will be particularly attentive to the ways that the narrative logic of science fiction texts can gloss over certain logical and philosophical inconsistencies in these theories while revealing others.

COL261 Castles of Cards: Italian Romance Epic Storytelling Lab

Celebrated authors of 20th-century Italian literature such as Italo Calvino and Gianni Celati have included in their works several features of Renaissance romance epic, from the importance of orality and the idea of sharing stories with a community of listeners to multi-threaded narratives and a playful attitude to the world of storytelling. The current popularity of fantasy literature and TV series puts us in an ideal position for the study of the chivalric romance and for an exploration of the continuities and the differences between past and present literary forms. In this course we focus on canonical and less canonical texts of the Italian Renaissance epic and their modern rewritings. After a multimedia investigation of Andrea da Barberino's "Guerrin Meschino," Luigi Pulci's "Morgante," Boiardo's "Innamoramento de Orlando," Ariosto's "Orlando Furioso," and Tasso's "Gerusalemme liberata" along with their rewritings by authors such as Bufalino, Nori, Celati, Calvino, and Giuliani, we will take inspiration from Calvino's "Il castello dei destini incrociati" to transform the classroom into a storytelling lab. The same deck of tarot cards that Calvino used for his book will help us to take part in a role-playing game and create a collaborative story that will gradually unfold throughout the semester. The class aims both at studying the Italian romance epic in order to reenact it creatively and also at using this collaborative rewriting as an interpretive tool to explore Renaissance literature from within.

COL262 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich

potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

COL264 Critical Theory: From Karl Marx to Angela Davis

According to the Frankfurt School philosopher Max Horkheimer's 1937 essay "Traditional and Critical Theory," Critical Theory aims at dislodging traditional theory's reliance on the assumption that to theorize means to categorize and explain facts from a trans-historically fixed position. Instead, Critical Theory wants to uncover the formative socio-economic processes of exploitation, struggle, and domination that underpin both the objective appearance of reality and our subjective ability to become conscious of them. In doing so, it not only wants to critique the very foundations of society and subjectivity but also wants to ignite a utopian imagination. Although Critical Theory draws on the concepts of the Western philosophical tradition (in particular on Kant and Hegel), it views them as being tainted by the "irrational totality" of bourgeois society that structurally blocks the realization of genuine freedom, equality, and liberation from fear. Hence, Critical Theory is concerned not only with the critique of specific social ills but also with the abolition of their systemic causal conditions. For this reason, it is by design a practical and activist mode of theory, as exemplified by an insight Herbert Marcuse attributes to Angela Davis: "the philosophical idea, unless it was a lie, must be translated into reality."

In this seminar, we will do three things: 1) Retrace the genesis of Critical Theory from Marx's appropriation of Hegel's dialectical method to Lukács's theory of reification; 2) Explore the Frankfurt School's ambition to establish Critical Theory as an encompassing, multi-disciplinary research program addressing the pathologies of capitalism from the interlocking perspectives of social and economic theory, psychoanalysis, empirical social research, aesthetics, and ethics; 3) Examine how contemporary heirs to the tradition of Critical Theory such as Angela Davis, Sianne Ngai, or Rei Terada have challenged and advanced the concerns of the earlier theory in light of our current neoliberal and authoritarian predicament.

COL266 History and Limits of Aesthetic Theory

This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what

it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

COL269 Modern Aesthetic Theory

As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebosity of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

COL270 Modernist City-Texts

Since the 19th century, the city has been both a privileged and a problematic object of representation for narrative realism: privileged because urban spaces have increasingly been seen as shaping or producing the very social relations and individual experiences that realism wants to describe; problematic because the city itself, as a coherent totality that might explain those relations and experiences, is too vast, heterogeneous, and complex to be represented through the traditional techniques of realism.

This course will approach the problems and possibilities of the city for realism through a close reading of two large, ambitious texts that attempt to represent the city as a totality: James Joyce's novel *ULYSSES* (1922) and David Simon's television series *THE WIRE* (2002-2008). We will be particularly concerned with two techniques, pioneered by Joyce, for representing the city: stream of consciousness, which creates a tour of the city from the perspective of a single, mobile flâneur; and montage, which creates a map of the city by juxtaposing various cross-sections of social life or various institutions central to the city's functioning.

COL271 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain

In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged into the limelight of Spanish national cultural discourses. Although they represent discrete realities--not all Gypsies identify with flamenco and not all flamenco artists are Gypsies--correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain's dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to foster a deeper understanding of the importance of the Roma community within the framework of European and Spanish culture and a deeper appreciation for flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

COL273 The Agony and the Ecstasy: The German Novel and Novella

Starting with Goethe in the 18th century, German, Austrian, and Swiss authors have made major contributions to the literary genre of the novel and the sub-genre of the novella, typically shorter than a novel and restricted to one plot line. German prose works often grapple with profound philosophical questions, particularly those that bear on the meaning of life, the relation of the individual to society and to other individuals, the character of justice, definitions of ethics and morality, the nature and calling of the artist, and the tension between thought and emotion. In this course we will read, in English translation, longer or shorter works by some of the most significant and enduring authors writing in German between the 18th and 21st centuries. Particular attention will be paid to the portrayal of social and political issues, to narrative strategies and style, and to thematic continuities in the cultures of the German-speaking regions. We will also consider the challenges of translating fiction from one language and culture to another. Several films based on works read in the course will be viewed and

analyzed. Ample opportunities will be provided for writing, in both expository and creative veins, and receiving detailed feedback.

COL276 Creativity and Crisis: Germany 1918-1933

This course investigates the fascinating culture of the Weimar Republic, Germany's first, heady, and ultimately unsuccessful experience with democracy between the end of the First World War and the Nazis' rise to power. We will focus particularly on Berlin, coming into its own as Germany's first true metropolis, but will also look at Munich, another hub of cultural activity and the site of Hitler's early organizing activities. Among the topics to be studied may be the increasing influence of film, radio, and the press; modernism in literature; new impulses in art; the economic and social impact of hyperinflation and the Great Depression; changes in the roles of women; assertion of previously taboo gender identities; competing political ideologies; reactions to the immigration of Jews from Eastern Europe; the emergence of proletarian mass culture; and the observations of cultural critics such as Walter Benjamin and Siegfried Kracauer on the world taking shape before their eyes. We will also read works set in Berlin but written by outsiders (Isherwood and Porter).

COL278 European Realist Novels

The realist novel has a strangely ambivalent legacy. On the one hand, like other literary forms, it is repeatedly consigned, dismissively, to an earlier moment in literary history: surpassed by modernism, reimagined by postmodernism, and replaced by film, television, and whatever forms of new media might presently emerge. Yet it has also clearly endured--in the popular imagination as well as in the academy--as a pervasive norm, continually setting the standard against which popular narratives may be judged to be successful and (more importantly) serious. Reading these novels, then, does not just teach about an important period in literary history (though it does that, too); it gives us a better understanding of what we continue to expect from the fictional stories that claim to represent the world around us.

We will spend the first six weeks on an overview of the influential tradition of French realism, reading representative texts by Stendhal, Balzac, and Zola. In the second half of the semester, we will delve into two longer novels that have often been regarded as exemplary (even paradigmatic) works of realist fiction: Eliot's *Middlemarch* and Tolstoy's *Anna Karenina*. While the emphasis will be on the novels themselves--what they do and how they work--we will also read a small selection of secondary texts (variously critical, historical, and theoretical) on realism, narrative, and the novel as genre.

COL279F Good, Evil, Human: German Fairy Tales and Their Cultural Impact (FYS)

The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

COL280 Work: Its History and Future

In this course, we will explore one of the fundamental concerns of human existence: "the creation of man through human labor," as Karl Marx once put it. Marx's interest in self-creation through work and the possibility of overcoming all forms of alienated work is arguably at the heart of what we imagine living well means today. For many of us, an idle life without work has become unthinkable. We live to work and we work to live. Yet while we have become ever more immersed in intimate forms of immaterial labor (keeping in touch with clients at all times, collaborating via digital platforms no matter where we are, tackling our jobs with ceaseless enthusiasm and creativity), waged labor has diminished and might now be thought of as a rare good. Soon the work of truck drivers will be replaced by self-driving vehicles, and the bulk of industrial production will be designated to robots. Automation and artificial intelligence will increasingly restructure intellectual labor, like that of lawyers, accountants, and data analysts, as well. What may once have been the dream of a liberated life is now motivating a feeling of dystopian dread: Fear of losing one's job,

of being replaceable, is an all too common feeling. The jobs that remain are demanding but often monotonous. Moreover, deindustrialization in Western countries has created real misery in what used to be the core zones of global wealth accumulation--a development that right-wing populists in the United States and in Europe have been eagerly exploiting to advance protectionist and racist politics.

Against the social backdrop of precarious employment, stagnant wages, deindustrialization, the rapid expansion of vast unemployed and underemployed surplus populations, looming ecological disaster, and, crucially, the financialization of a structurally unstable global economy that seems to have exhausted its capacity for substantial growth in productivity, the future of work must be interrogated with renewed urgency. In addition to reading past and present theories of work, including some essential selections from Karl Marx and critical theory (e.g., Lukács, Adorno, Benjamin, Kracauer), Hannah Arendt's response to Marx in her distinction between labor and work, as well as recent academic work by feminists, affect theorists, and crisis theorists (e.g., Federici, Berlant, La Berge, Weeks, Clover), we will examine narratives and representations of work in films by Fritz Lang, Charlie Chaplin, Laurent Cantet, and Alexander Kluge, and literary texts by Brecht, Kafka, Dickens, Twain, Melville, Steinbeck, and Vonnegut. These thinkers and artists will give us a foundation for understanding the radical historical changes in the meaning of work in the past 200 years as well as its uncertain status in our immediate future.

COL281 Histories of Race: Science and Slavery in an Age of Enlightenment

A spurious abstraction when it was first "invented" during the 18th century, the concept of race has nonetheless forever left its imprint on history, not to mention all of our lives. This class will examine the history of race in two ways. First, we will read excerpts from travelogues to Africa and the Caribbean (as well as short excerpts from natural history) in order to chart the slow and halting creation of the concept of race as it crystallized in European thought during the 18th century. Having studied this "proto-raciology," the class will then examine several short manuscripts that were submitted to a contest on the source of "blackness" in 1741. Students in this class will come to understand the competing histories of race during the era, including religious accounts of race, anatomical understandings of race, conjectural histories of humankind, and the rise of classification schemes of humankind (in an era when tens of thousands of Africans were being deported to European colonies on an annual basis). The ultimate goal of this course is to provide students with a historicized understanding of the subject that will inform their reactions to both race and ethnicity in the future.

COL283 The Rationalist Tradition in Early Modern European Philosophy

This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read

texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

COL285 The Essay from Page to Web Page

We will begin by familiarizing ourselves with canonical examples (ranging from the 18th century to the end of the 20th century) of the two largest categories of the heterogeneous essay genre: the personal, meditative, expressive essay on the one hand and the public, satirical, argumentative-critical, journalistic essay forms on the other. We will then investigate - by both reading and writing - how essayistic prose has been reshaped, even transformed, in the digital era. Both the enduring aspects of the essay and those that change from print to pixel will be our objects of investigation. One month into the semester, students will begin research on the web, identifying and sharing both shorter online posts and long-form descriptive, analytical and polemical writings they argue for as significant. Concurrently, they will begin to compose original work in the emergent genres and forms of digital prose, in both short postings and longer pieces ranging from the descriptive to the intellectual and polemical, such as reviews and political and cultural critiques. The course will explore how form and content alter together, as cultures think about, criticize, theorize, and reshape themselves in new media. We will analyze the new norms and conventions of reading and writing that emerge in this process to develop an understanding of how we skim, read, absorb and experience the digital writing that now constitutes much of the public sphere.

COL287 Nietzsche als Versucher (CLAC)

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while

also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

COL290 Nietzsche - Science, Psychology, Genealogy

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

COL291 Forward, Without Forgetting: The GDR in Literature and Film

In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include works by Günther de Bruyn, Christa Wolf, Brigitte Reimann, and Stefan Heym, among others. Participants will view and discuss films and TV series produced before and after unification.

COL292 Reason and Its Limits

This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question

reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

COL297 Reading Nietzsche

Friedrich Nietzsche, trained philologist and self-proclaimed "free spirit," remains one of the most controversial figures in modern thought, a source of fascination and outrage alike. Best known as the philosopher of the "Dionysian," the "will to power," the "eternal return of the same," the "transvaluation of all values," and the "over-man," Nietzsche also proudly considered himself the most accomplished prose stylist in the German language. In this course, we will examine two closely interrelated issues: (1) the genesis of Nietzsche's major philosophical thoughts in the areas of epistemology, aesthetics, ethics, and the critique of religion, from his earliest to his latest writings; (2) the cultivation of a philosophical style that, in its mobilization of highly artistic modes of aphoristic reduction, metaphorization, personification, and storytelling, aspires to turn critical thinking into a life-affirming art form.

The course will combine philosophical interpretation with textual analysis. No prior knowledge of Nietzsche's works is expected; however, a willingness to set aside significant chunks of time to dwell in Nietzsche's texts is required. Students with reading knowledge in German are encouraged to read at least some of the assignments in the original. Guidance in doing so will be provided based on individual need.

COL303 Matter, Community, Environment

In recent years, it has become increasingly difficult to consider human communities without also considering questions of "nature" or "environment." Actor-network theory condemns nature/society dualisms; ecological theory argues that there is indeed no "nature" or "society"—only the anthropocene; and, drawing from the former two positions, object-oriented ontology conceives of ideas (such as "community" or "society") as objects and ecological actors. In this seminar, we will consider various approaches taken in recent years to thinking about our relations to the worlds we inhabit. We will attempt to think not only outside a focus on "us" as humans in the first place but even outside a focus on sentient life or life in general. Examining theories of matter, community, and environment, we will discuss and analyze work by philosophers, evolutionary biologists, literary scholars, and sociologists, among others. We will pay special attention to how theorists and critics are blurring the boundaries between nature and society, environment and community, life and matter. In addition to class participation and a series of brief reading responses, students will be required to produce a final paper dealing with any topic related to the course.

COL306 Spectacles of Violence in Early Modern French Tragedy

The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts—many of which staged physical violence—not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

COL307 Negotiating French Identity: Migration and Identity in Contemporary France

With the largest minority in France being of Maghrebi origin, Islam has become the second largest religion in France today. What are the repercussions of this phenomenon for French identity? How did French society understand its identity and regard foreigners in the past? What do members of the growing Franco-Maghrebi community add to the ongoing dialogue surrounding France's republican and secular identity? This course will analyze the recent attempts at redefining French identity through a study of literary texts, films, and media coverage of important societal debates (e.g., the Scarf Affair, French immigration laws, the Algerian war). Readings, discussions, and papers will be in French.

COL308 Medievals on the Move: Pilgrimage, Jihad, Crusade, and Apocalypse

Medieval people moved: They traded and sent emissaries; they invaded and migrated; they wandered, begged, and ascended the heavens; they went on crusade, jihad, and pilgrimage. This course will first analyze the most consistently preserved sources on medieval movement: accounts of pious travel "for God's sake and not for pleasure." We will then contextualize such accounts with two other types of movement: the physical journeys of traders, diplomats, and warriors, as well as the interiorized journeys of the prophet, the mystic, and the storyteller. By encompassing this variety we will be able to pursue a larger question: Can patterns of exchange across the physical and cultural barriers of geography, language, religion, and governance reveal a more global medieval world than we usually envision?

COL309 Truth & the Poet: Lyric Subjectivity and Phenomenology

Who is the poet? What is subjectivity? How is the "Lyric I" located and articulated? How do lyrics reify their own claims to truth? Is there a role for the poet in society? What is the relationship between critique and creation? This course examines the poet in relation to various formulations of subjectivity in the history of phenomenology. We will explore how lyric subjectivity may speak truth without deferring to or differing from empirical and objective truth claims. We will consider whether the history of the lyric can be read as a series of observations that contribute to understandings of subjectivity, agency, and intersubjectivity before and after the theological turn in French phenomenology. Readings in lyric poetry will be paired with readings in phenomenology as a way of putting poetry and philosophy into conversation. Assignments will be both analytic and creative.

COL313 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage

From 1580 to 1680, Spanish playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, and Tirso de Molina in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Cervantes's border-crossing Catalina, the Ottoman sultan's Spanish queen) and their virtuoso dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

COL320 Modern Intellectual History in Global Perspectives

Recently, postcolonial critics have urged historians to reconsider the emergence of ideas central to European intellectual history—including reason, society, and human rights—as part of a global process. In this course, we will explore intellectual history in dialogue with the non-West. Topics include the Enlightenment, romanticism, nationalism, modernity, and postmodernity. Discussions will address how these movements took shape through a series of cross-cultural exchanges and exclusions.

COL324 Interpreting the "New World": France and the Early Modern Americas

The impact and long-lasting effects of the "discovery" of the "New World" on Europeans cannot be overestimated. This advanced seminar will compare and contrast styles of expedition and conquest among the European nations, though the course will focus on the French context and the various events and encounters that occurred in the early modern Americas, particularly between 1492 and 1610, a period that laid the groundwork for the subsequent colonial project. Throughout the course, we will pay special attention to the Amerindians' points of view. In turn, students will examine the insights and blind spots in 16th-century French navigators', cosmographers', cartographers', and intellectuals' interpretations, representations, and negotiations of difference by critically engaging with concepts such as nature, culture, alterity, gender, sexuality, marriage, religion, exchange, possession, conquest, and war. Reading, writing, and class discussions will be in French.

COL327 Cervantes

Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

COL335 Sophist, Statesman, Philosopher: Plato's Later Metaphysics and Politics

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides's puzzle and explore Plato's solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

COL336 Theories of Translation

This course will examine a range of predominately 20th-century theoretical approaches to literary translation in the fields of philosophy, linguistics, literary criticism, and translation studies. In an effort to derive a definition of literary translation, we will focus on two questions. First: What is literal (or word-for-

word) translation? How does it differ from other kinds of translation; how does it conceptualize meaning; what are its purposes; and what oppositions (e.g., literal vs. figurative) can we use to make sense of it? Second: What is the relationship between language and culture? Can translation give us access to an unfamiliar culture; can literary translation affect the culture in which it is produced; or does translation simply colonize foreign texts by transforming them into something legible to a domestic culture?

COL338 Utter Nonsense: Modernist Experiments with Meaning

In "The Use of Poetry and The Use of Criticism" (1933) T.S. Eliot wrote, "The chief use of the 'meaning' of a poem, in the ordinary sense, may be [...] to satisfy one habit of the reader, to keep his mind diverted and quiet, while the poem does its work upon him: much as the imaginary burglar is always provided with a bit of nice meat for the house-dog."

To extend this analogy: this course will look at texts by meatless burglars, writers who set out not to sedate but to conscript the sense-sniffing house-dog as they pillage the house for things of value.

This course will survey some of literary modernism's most defamiliarizing texts, ones that challenge interpreters by withholding or avoiding that digestible (and perhaps soporific) "meaning" Eliot referred to. We will look at modernist formal experiments from Gertrude Stein and Guillaume Apollinaire through Dada, surrealism, the French New Novel, and the theater of the absurd, alongside the less prominent but equally influential exploration of aleatory, procedural, and machine-generated poetry by writers such as Jackson Mac Low and the Oulipo. Working with authors' manifestos and critics' interpretations alongside the primary texts, we'll pay special attention to the varied relationships to meaning that can be found at work in texts that a casual reader might lump together as simply meaningless or nonsensical.

As the semester progresses and we get a clearer sense of what these texts require from their readers, we'll begin to ask (with the help of some basic readings in semiotic and psychoanalytic literary theory) how our interpretive behavior when confronted with seeming nonsense might relate to the various things we do when we read normal or typical texts--ones that strike us as already or obviously meaningful. Is making sense something that a text can ever do on its own or something that we must always do to (or for) the text?

COL341 Plato's REPUBLIC

"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

COL342 The Word for World is Information: Ideologies of Language in Science Fiction & Film

By the middle of the 20th century, it had begun to seem possible to produce a grand theory of communication that would use language as a basis for understanding all of human thought, behavior, and culture. As competing versions of such a theory circulated through academic disciplines as disparate as anthropology, neurophysiology, and the emerging field of computer science, they also filtered out--sometimes in strangely warped or oversimplified forms--into popular culture.

This course will examine the most interesting and influential of these theories, both in their scholarly origins and in their most puzzling and promising elaborations in works of literary and filmic science fiction. We will be particularly attentive to the ways that the narrative logics of science fiction texts can gloss over certain logical and philosophical inconsistencies in these theories while revealing others.

Readings will likely include scholarly works by Norbert Wiener, Benjamin Lee Whorf, Roman Jakobson, Noam Chomsky, Warren Weaver, and others alongside science fiction texts by George Orwell, Damon Knight, Samuel Delaney, Ursula K. Le Guin, Suzette Haden Elgin, Neal Stephenson, Koji Suzuki, and Ted Chiang (with special attention to television and film adaptations).

COL347 Emperor, Caliph, King: Comparing the Byzantines, Abbasids, and Carolingians

This seminar investigates a unique "age of empires" in the wider Mediterranean world--the ninth century--during which imperializing political revolutions inspired intense cultural production among the Byzantines in Constantinople, the Abbasids in Baghdad, and the Carolingians across Europe. Using the cultural artifacts surviving from these "renaissances," we will investigate how political cultures accounted for their own contested identities through myths of rebirth and return, specifically of Greek, Roman, and Persian imperial traditions. The course uses a workshop environment that relies on both collaboration and independent research; students will apply skills of analysis, creative thinking, and persuasive communication to presentations and a (in-translation) source-based research project.

COL348 Cybernetics and Ghosts: Narrative Machines and Posthumanist Fiction

Within certain texts that have been canonized under the various rubrics of postmodernist, posthumanist, and cyber fiction, there is a yearning to either discover or banish what in the mid-20th century was quaintly referred to as the "ghost in the machine." On the one hand, these texts offer a model of literature and of narrative as machine: produced algorithmically (e.g. via combinatorial recursion) or through the application of some experimental constraint, conceit, or gimmick, they seem to be functioning according to a program or plan rather than relating the events of a human life. Against or within this formal framing, these novels find themselves having to account for their human characters (and readers) in one of two ways: either by mechanizing them (in their motivations, their behaviors, and even their narrative desires) or by appealing ultimately to some sort of spirit, inspiration, or even ghost.

This course will examine the ways that several of these texts attempt to make sense--simultaneously--of mechanist models of the human (particularly derived from cybernetics) and of their own seemingly inorganic--and even alienating--narrative forms.

Primary texts will include novels and stories by Georges Perec, Jorge Luis Borges, Alain Robbe-Grillet, Italo Calvino, Vladimir Nabokov, John Barth, Julio Cortázar, Gabriel García Márquez, Mark Danielewski.

COL349 Modernism and the Total Work of Art

The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after

Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

COL350 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena

Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena--a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire--to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with "The Alexiad" through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

COL360 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant

Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' *MEDITATIONS*, Locke's *ESSAY CONCERNING HUMAN UNDERSTANDING*, Hume's *ENQUIRY CONCERNING HUMAN UNDERSTANDING*, and Kant's *CRITIQUE OF PURE REASON*.

COL370 Digital History

This course offers an introduction to the emerging field of digital history, part of the broader digital humanities (DH), the application of computing techniques and new media to humanities disciplines. DH has important implications for teaching, research, and the presentation of cultural artifacts to the scholarly and general public. Digital humanists employ a wide-ranging set of techniques, from text- and data-mining to network analysis, topic modeling, GIS, and visualizations. DH also offers opportunities for cross-disciplinary collaborations among humanists, computer scientists, media specialists, and others. As a result, this course seeks to bring together students with a variety of skills and backgrounds (e.g. history, writing, programming, web and graphic design, sound and video) who share an interest in historical communication and making things.

Through readings, conversations, and hands-on work with DH tools and historical resources, we will examine questions pertinent to historical scholarship and consider how they may be reconfigured by new media and new applications of computing power. How does DH allow us to ask new questions as historians, and what perils do digital techniques pose for the discipline of history? Together, we will cultivate our skills as practitioners of history in the digital age.

A central component of the course will be collaborative DH projects of our own devising. Much of the course will have the character of a digital history research lab as we take real problems and relevant sources to advance historical knowledge as well as our skills. This might involve projects in which we conceive, design, build, publicize, and launch a tool, website, or other contribution to digital history. Students should be prepared to collaborate in and out of class, to teach and learn from each other, and to cope with a dynamic and flexible syllabus and group of tasks.

This course is part of Wesleyan's Digital and Computational Knowledge Initiative.

COL390 Romanticism-Realism-Modernism

In the study of German literature (and art), the terms romanticism, realism, and modernism designate a span of time extending from the "Age of Goethe" to the mid-20th century literary cultures of West Germany, East Germany, Austria, and Switzerland. In this seminar, we want to take a closer look at representative examples for each of the three categories: What kind of subject matters are prevalent in each respective period, what narrative, dramatic, and poetic devices and forms are typically employed? What distinguishes these periods from one another, how useful are these distinctions? What, finally, is the purpose of such periodizing of literature?

The purpose of this seminar is twofold: 1. It is intended to provide a historical overview of German literature by engaging with representative romanticist, realist, and modernist works of prose, drama, and lyric; 2. It is designed to critically probe the concepts of romanticism, realism, and modernism: How useful are these categories in making us understand the evolution of fiction, authorship and readership, literary subjectivity, or narrative form? What are some pitfalls of using these categories?

All readings, papers, and discussions will be in German.

COL391 Diderot

In this class we will come to know the most progressive and often radical thinker of the French Enlightenment, Denis Diderot (1713-1784). We will begin this seminar with an examination of how this country abbot grew into the most well known atheist of his generation. We will then move onto his famous 74,000 article Encyclopédie, a book that not only dragged sacrilege and freethinking out into the open, but triggered a decades-long scandal that involved the Sorbonne, the Paris Parliament, the King, and the Pope. (During this portion of the class, students will undertake translations of select entries [from French to English] of the "dictionnaire" for possible publication.) In the second half of the semester, we will also study the writer's freewheeling art criticism. Finally, we will read two groundbreaking novels. The first of these, "La Religieuse", is a gripping pseudo-memoir of a nun who suffers unspeakably cruel abuse after she announces that she wants to leave her convent. The second, "Jacques le Fataliste", is a freewheeling anti-novel where Diderot used fiction to take up the problem of free will. In the final portion of the class, we will also read selections from his anticolonial and antislavery writings.

COLLEGE OF SOCIAL STUDIES (CSS)

CSS220 Sophomore Economics Tutorial: Topics in the History of Economic Thought

This tutorial uses a topical approach to explore the history of economic thought. We begin with a brief introduction to writers who predated Adam Smith: the scholastics, mercantilists, and physiocrats. Over the subsequent weeks, we compare competing schools of economic thought: classical, Marxian, utilitarian,

Austrian, neoclassical, and Keynesian. We include selections of radical critiques from the political right and left including monetarist, supply-side, behavioral, Austrian, evolutionist, and institutional approaches. The theoretical debates both reflect and shed light on the economic and social problems of their time. As you master the material, you should keep several goals in mind. First, learn to link the debates to the economic problems faced by nations over the past 300 years. Second, become skilled at explaining how economic theory has altered its shape and content from the 1700s to the present. Third, sharpen your awareness of the interaction between the scientific and the social aspects of human knowledge. Finally, develop and learn to defend your assessment of mainstream economics; decide which aspects reflect theoretical advancement and which are simply reflections of political agendas or outmoded perspectives. Throughout the course we will use contemporary articles to illustrate modern-day versions of the historical disputes. The course material is designed to provide a fuller context for what you learn in politics, history, and social theory while deepening your understanding of contemporary economic debates.

CSS230 Sophomore Government Tutorial: State and Society in the Modern Age

This tutorial examines the rise and evolution of the modern state. While many of the readings focus on Western Europe and the United States, the course draws on cross-regional comparisons to tease out theoretical propositions, compare historical processes across different parts of the world, and consider different understandings of the body politic. We start by exploring what factors account for the rise and consolidation of the nation state in the Western context, after which we consider how the process of state-building occurred in the Middle East and North Africa, and explore some of the challenges the sovereign state model faces outside the European context. We then move on to discuss the emergence of different systems of governance and some of the challenges to the state. We will consider whether there are certain paths that lead to democracy, and whether there is something unique about American democracy. We will take into account the challenges posed by modernization and evaluate what factors best explain the rise of communism and fascism. We will then consider how the communist and fascist past impacted the rise of the social democratic model in Europe, and compare the European and Japanese approaches to welfare provisions. We conclude by considering yet another model for organizing the political community--the religious state. We will examine when, how, and why the notion of the Islamic state emerged, reflect on the extent to which the concept of an Islamic state challenges Western notions of the nation-state, and investigate how the discourse on Islam and the state has changed over time in Indonesia, the largest Muslim majority country.

CSS240 Sophomore History Tutorial: The Emergence of Modern Europe

This tutorial sequence analyzes the formation of modern European society from the late 18th to the last quarter of the 20th century. Most attention will be placed on Britain, France, Germany and Russia as these countries were shaped by, and responded to, demographic, economic, social, political, and intellectual forces that led to revolutions, political and social reforms, new modes of production, changes in social hierarchies, and new forms of warfare. Much attention will be placed on the social and political consequences of the French Revolution and industrialization, but empire, the origins and consequences of the two world wars (including the Russian revolution and the rise and defeat of Nazism) will also come under extensive discussion, as will the creation of a more stable and prosperous postwar European order. Europe's links to Africa, Asia and

the Americas will be discussed in the context of imperialism and the two world wars. In addition to developing knowledge of the most important processes that have shaped the modern world, this tutorial seeks to foster a critical awareness of the varieties of historical narrative, the skills needed to interpret historical primary sources, and the possibilities and limits of history as a tool of social investigation.

CSS320 Junior Economics Tutorial: China in the Global Economy

China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China's great economic transformation beginning in 1978 in what is often described as a "gradualist" transition to a market economy. In the last four decades, the speed of China's development and its growth rates of GDP are without precedent in history.

China entered the current decade with an unbalanced economy highly dependent on both state-financed investment through a state-controlled financial sector and a growth strategy focused on exporting finished goods to the global economy with the support of foreign direct investment. The current leadership recognizes the need to rebalance the economy by promoting more domestic-fueled growth through increased consumption so as to achieve more broad-based economic development. Many social issues remain to be tackled, among which are environmental degradation, income inequality, and an aging workforce. After developing the economic background that propelled China rapidly into middle-income-country status, this course considers these issues (and others) to provide insights into the fundamental question of "what is left to be done" to create a fully mature, developed market-oriented economic system open to the global economy.

CSS330 Junior Government Tutorial: Global Trends, National Responses

This tutorial will take a look at a number of "great books" of recent vintage that have advanced broad claims about the character of global trends in politics and economics since 1990. What are the forces promoting the homogenization of political values and institutions, and of economic practices? Do countries have any choice but to follow the policies advocated by the institutions of global capitalism? How successful are different local strategies in response to these trends? Is globalization a threat or an opportunity?

CSS340 Junior History Tutorial: The Atomic Bombings of Japan

The dropping of atomic bombs on Hiroshima and Nagasaki in August 1945 was a pivotal moment in the 20th century. This course examines how the histories of Japan and the United States and the history of science and technology came to intersect in this event. There is no question that the atomic bombings were horrific--but how can we best understand them? What do we really know about them? These questions are the starting point for this class. The answers are drawn in part from the trajectory of Japanese and American history, in particular the rise of Japanese imperialism. Another important part of the answer is based on the history of warfare, nuclear science, and the development of the bombs. We also examine some of the political and cultural dimensions of these bombings, especially the question as to what degree the bombs led to Japan's surrender and the impact the bombs had on both the Japanese and American peoples. Underlying the entire course is the historiographical theme of understanding a single event through multiple narrative dimensions.

CSS371 Junior Colloquium: Liberalism and Its Discontents

This course presents an overview of social and political theories developed in the post-World War II period. It focuses particular attention upon developments within Liberal political theory during this time, examining this scholarship both for the insights it offers and for the ways in which these ideas have been used to obscure oppressive social relations. Considering the general contours of the Liberal tradition--particularly its relationship to forms of social domination such as colonialism, racism, class inequality, and gender and sexual oppression--the course moves through an examination of canonical thinkers who have both challenged and contributed to Liberal social thought. Taking the ruminations of Nazi jurist Carl Schmidt as a problematic yet demanding provocation, the course asks in part how successfully Liberal theorists have resolved the dilemmas Schmidt identifies within Liberalism (or if, indeed, fascist tendencies pervade Liberal social thought, as Schmidt contends). Theorists within the Liberal tradition such as Friedrich Hayek, Hannah Arendt, and Jürgen Habermas are joined by critics such as Franz Fanon, Carole Pateman, and Michel Foucault in this critical overview of contemporary Liberal social theory. Through this examination of recent interventions in Liberal thinking regarding the social, this class is meant to provide students with an opportunity to think through ways in which various contemporary approaches to social issues both invoke and reformulate political debates of long standing.

CSS391 Senior Colloquium: Crime and Punishment

This course considers the American criminal law, the procedures through which it is enforced and the nature of criminal punishment from a variety of perspectives. It begins with the criminal law itself, its moral foundations and assumptions, the essential elements of criminal liability and several of the law's more important doctrines and rules. It then turns to the institutions of enforcement and punishment, the police, the public prosecutor, the criminal courts and the system of punishment, to see how they work "on the ground" and compare this to the ideals of the law. Finally, it puts the American system in international perspective by comparing it to European institutions of criminal justice.

COMP114 How to Talk to Machines

How do we tell robots and computers how to do what they do? Getting a handle on this question is the goal of this course. Since telling a device how to do something depends a lot on what that device can do, along the way we will learn a bit about what is "in the box." We will start with the kind of programming one might use to instruct a robot how to interact with the world around it. That will lead us to the Turing machine, a beautiful mathematical model of a computer.

We will adapt that model to something that is closer to how most computer systems today are designed. We will end with an introduction to high-level programming, learning the fundamentals of programming in a language such as Python or Java.

The goal of the course is to understand not just programming, but how computers are designed, and how those designs are reflected in the way we program them. After passing this course, students will have a basic knowledge of programming and how a computer works. COMP 114 can be used to satisfy the COMP 211 prerequisite and also the mathematics major "elementary knowledge of algorithms and computer programming" requirement.

Offering: **Host**

Grading: **OPT**

Prereq: **None**

COMP115 How to Design Programs

In this course, students will learn to systematically design programs, going from a problem statement to a well-organized solution in a step-by-step fashion. We will apply these program design skills to many applications within computer science and in other disciplines. Students will develop their mathematical skills, because we will use a symbolic view of computation that explains the process of running a program as simple manipulations of its text. Students will also develop their technical reading and writing skills, such as understanding complex problem descriptions and precisely articulating the design of solutions. No prior experience with programming or computer science is expected.

Gen Ed Area: **NSM-MATH**

Identical With: **COMP523**

Prereq: **COMP212 AND MATH228**

COMP327 Evolutionary and Ecological Bioinformatics

Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.

Gen Ed Area: **NSM-MATH**

Prereq: **COMP212 AND MATH228**

COMP360C Special Topics in Computer Science: Network Science

Network science is an emerging field that focuses on the analysis of real-world complex systems arising in the social, biological, and physical sciences by abstracting them into networks (or graphs). The size and complexity of real networks has produced a deep change in the way that graphs are approached, and led to the development of new mathematical and computational tools.

This course provides an introduction to network science by walking through modern techniques for modeling, analyzing, and simulating the structures and dynamics of complex networks. Specific topics to be discussed will include: network models and measures, graph algorithms, visualization and simulation, models of dynamic/adaptive networks, network modularity and community detection, and some applications. Python and NetworkX will be used for modeling and analysis of networks, in addition to other computational tools. Students should have a reasonable amount of experience in Python programming or willingness to learn "on the go."

COMP500 Automata Theory and Formal Languages

This course is an introduction to formalisms studied in computer science and mathematical models of computing machines. The language formalisms discussed will include regular, context-free, recursive, and recursively enumerable languages. The machine models discussed include finite-state automata, pushdown automata, and Turing machines.

Identical With: **COMP323**

Prereq: **COMP212 AND MATH228**

COMP527 Evolutionary and Ecological Bioinformatics

Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology

and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.

DANCE (DANC)

DANC103 Dancing Bodies

This course introduces students to basic dance literacy by viewing dances on film and video, making movement studies, and practicing writing in different modes about bodies in motion. The utopian ideal of "the natural" dancing body will guide our investigation of dance as art and culture, from Isadora Duncan to the postmoderns. We seek answers to such questions as, What do performance codes about the natural body feel and look like? How do dance traditions preserve, transmit, and reconfigure eco-utopian desires? No dance experience is necessary. The desire and confidence to create and move collaboratively with others is expected.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC104F Introduction to Contemporary Dance from Global Perspectives (FYS)

This interdisciplinary course aims to understand contemporary dance and the moving body from global perspectives. It draws from a range of approaches to aesthetics and choreography, politics, and understandings of culture-at-large. It examines an eclectic array of movement and choreographic styles from North America to Europe to Asia.

The course is divided into 6 units:

1. Old and New Definitions of Contemporary Dance
2. "East Meets West" -- Global-Cultural Flows in Contemporary Dance
3. Social Justice and Contemporary Dance
4. Queering Contemporary Dance
5. Special Topics -- Stillness and Silence
6. Traditional Dance/Contemporary Dance -- Deconstruction and Reconstruction

Offering: **Host**

Grading: **OPT**

Prereq: **None**

DANC105 Dance Tech Lab: Lights, Screen, Projection

This class includes the practicum and experimentation of lighting design and production with use of projection, video-screen technology, stage management, costume and scene design, and set construction.

The practical experience in the Dance Department's production season is emphasized in the course.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC107 Writing Is Dancing, Dancing Is Writing

We watch dance and then we write about it. Dance needs writing to be understood and to endure. Or maybe not. Maybe dance needs no help. Then, what do we write? Writing as dance, in dance, of, from, alongside... As readers, writers, and performers, we will explore established and experimental modes

of writing and choreography and look for ways that each form can stretch and challenge the other.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC111 Introduction to Dance

This is an introduction to dance as an educational, technical, and creative discipline for students with no previous formal dance training. Classes will introduce the basic components of dance technique--stretching, strengthening, aligning the body, and developing coordination in the execution of rhythmic movement patterns. Through improvisation, composition, and performing, students will develop a solid framework applicable to all forms of dance.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC212 Composition Across the Arts

Grounded in embodied art-making practices, this survey course will introduce students to art-making processes in dance, performance, creative writing, and sound. Connections will be explored amongst the disciplines and students will be encouraged to discover their own unique and hybrid forms. The class will be facilitated by Nicole Stanton with modules taught by resident and visiting artists from across the arts. The first part of the semester will focus on hands-on experimentation, contextual readings, viewings, and discussion. In the second part of the semester, students will create their own creative projects, participate in in-depth critique sessions, and develop a digital portfolio to document their work. The course will culminate in public exhibitions and performances of the

student's creative projects. This course can serve as the gateway to the Dance Major.

Prereq: **None**

DANC220 Performing Indonesia

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

Offering: **Crosslisting**

Gen Ed Area: **HA-THEA**

Identical With: **THEA220, CEAS229**

Prereq: **None**

DANC231 Performing Arts Videography

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues

in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's *Pina*, Elliot Caplan's *Cage/Cunningham*, John Cohen's *The High Lonesome Sound*, and Peter Greenaway's *Four American Composers*.

Offering: **Crosslisting**

Identical With: **MUSC231, THEA213**

Prereq: **None**

DANC237 Performance Art

This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

Identical With: **THEA237**

Prereq: **None**

DANC244 Delicious Movement: Time Is Not Even, Space Is Not Empty

This course contemplates metaphorical nakedness and human and bodily experiences of time and space through interdisciplinary discourse. Taught by NYC-based artist Eiko Otake of Eiko & Koma, students will examine how being or becoming a mover reflects and alters each person's relationships with the environment, with history, and with other beings. Topics of study and discussion include Eiko & Koma's body of works, atomic bomb literature, postwar Japan, and environmental violence such as Fukushima nuclear explosions. A key concept of study will be metaphorical nakedness and how distance is malleable.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Identical With: **CEAS244**

Prereq: **None**

DANC249 Making Dances I: Solo Work

This course is a practical lab in body-based performance making with a focus on the solo form. Students will work towards developing and honing their personal artistic interests and goals, and supporting those of their peers. We will experiment with various modes of composition, viewing and researching a broad range of artistic work and ideas, expanding our notions of what constitutes a dance. Students will explore performance in public space, collaboration, and work across artistic disciplines, engagement with technology, awareness of cultural context and appropriation, and social practice/participatory/community engaged art. Finally, we will develop methods for peer critique, working towards finding a challenging and supportive approach that pushes each artist forward.

NOTE: This is a laboratory course for students interested in diving deeply into body-based artistic practice. It is appropriate to students with a background in any artistic discipline. An interest in rigorous (and playful) experimentation and research is key.

DANC250 Dance Composition: Choreography Workshop

This course in creating and performing choreography emphasizes the diversity of techniques, methods, and aesthetic approaches available to the choreographer. Assignments will revolve around inventing, organizing, and evaluating movement styles and on solving composition tasks that are drawn from various art mediums.

This class will focus on the process of making a dance in a theatrical setting. Skills in organizing and leading rehearsals, creative decision-making, and movement observation will be developed within the context of individual students honing their approach and style as choreographers. Practical and theoretical issues raised by the works in progress will frame in-class discussions and all necessary technical aspects of producing the dances will be addressed.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC251 Javanese Dance I

Instruction in the classical dance of central Java will begin with the basic movement vocabulary and proceed to the study of dance repertoires. At the end of the semester, an informal recital will be arranged with the accompaniment of live gamelan music. Emphasis is on both the male and the female style.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC260 West African Dance I

West African dance is a gateway to the cultures and ways of life of its people. It is the medium on which the very existence of the people is reinforced and celebrated. In this introductory course, students will learn the fundamental principles and aesthetics of West African dance through learning to embody basic movement vocabulary and selected traditional dances from Ghana. The physical embodiment of these cultures will be complemented with videos, lectures, readings, and discussions to give students an in-depth perspective on the people and cultures of Ghana. Students will also learn dances from other West Africa countries periodically.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC261 Bharata Natyam I: Introduction of South Indian Classical Dance

This course is designed to introduce students to the fundamental aesthetic, social, and technical principles underscoring the culture of Bharata Natyam dance in its both indigenous and modern contexts. The course introduces students to Bharata Natyam largely through classroom practice (in the form of rhythmic and interpretive exercises), supplemented by brief lectures outlining the sociohistorical and cultural contexts of the form. Class lectures will also include video presentations. Occasionally, the class could include a guest lecture given by either a visiting scholar, dancer, or choreographer respected in the field of South Asian dance internationally.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC300 Contemporary Dance Technique II/III

Fly, dive, suspend, dream, risk, breathe, release, embrace, hope, sweat, believe, soar. Katja Kolcio treats contemporary dance practice as life practice. You are the artist. This class combines structured movement phrases focused on the activation and release of momentum, setting intention, discovering the new, and following the unknown. Drawing on multiple approaches to dance techniques and the moving body, students will be encouraged to cultivate greater awareness of space, time, corporal navigation, energy, and kinetic alignment. Join the dance. Some experience with dance and a willingness to try new things is the prerequisite.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **DANC215**

DANC301 Anatomy and Kinesiology

This course will cover structure and function of skeletal and muscular systems, basic mechanics of efficient movement, concepts essential for re-patterning and realigning the body, common dance and sports injuries, and information regarding injury prevention and approaches to treatment.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC302 Ballet II

This is an intermediate-level course. Strong emphasis on correct alignment and the development of dynamics and stylistic qualities will be prominent while students learn combinations.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC307 Mobilizing Dance: Cinema, the Body, and Culture in South Asia

This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

Offering: **Host**

Gen Ed Area: **HA-DANC**

Identical With: **FGSS307, ANTH306**

Prereq: **None**

DANC309 Modern Dance III

This advanced-level class draws on multiple approaches to dance technique and the moving body. Some of these include modern dance techniques, contemporary/release techniques, contact and other improvisational forms, as well as somatic practices. Modern III focuses on the exploration of complex dance movement sequences, cultivating a specific and personal engagement with movement material, along with heightened attention to the subtleties of

phrasing, initiation, and musicality. The course's primary aim is each individual's continued development as a strong, well-rounded, creative, and thoughtful dancer.

Offering: **Host**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **DANC215**

DANC311 Immersive Theater: Experimental Design, Material Culture and Audience-Centered Performance

This course offers a comprehensive exploration of Third Rail Projects' approach to crafting and performing in immersive performance formats. Students will work closely alongside Co-Artistic Director Tom Pearson to explore Third Rail's toolbox of techniques, including:

- Developing presence and clarity around audience engagement
- Remaining spontaneous and responsive to the changing landscape of an active audience
- Generating game play for crafting immersive scenes
- Understanding ritual, narrative, and audience initiation through the study of a scene from one of our immersive productions

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-THEA**

Identical With: **THEA301**

Prereq: **None**

DANC318 Introduction to Viewpoints

In this studio class, students learn and are immersed in the Viewpoints--a vocabulary which breaks down the two dominant issues any performance-based artist deals with: Time and Space. Students practice the Viewpoints and learn a language for talking about what happens on stage. Through practice, students develop tools not only for their own individual work, but for collaboration, offering ensembles a way to quickly generate original work. While a form of movement improvisation, students will also apply the Viewpoints as a means to staging to text as well as generate composition pieces. This class is open to directors, actors, designers, dancers, choreographers, musicians, composers, and writers.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **1.00**

Gen Ed Area: **HA-THEA**

Identical With: **THEA318**

Prereq: **None**

DANC354 Improvisational Forms: Contact Improvisation

This class is designed to explore dance improvisation, specifically through contact with the environment and with other people. Students will expand movement vocabulary, increase compositional awareness, and develop their creative thinking and observation skills, as well as explore personal boundaries, consent, and listening through touch. Material covered will include improvisation exercises, structured improvisational forms, developmental movement patterns and efficient use of self, and an inquiry into relationships and choice.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Identical With: **THEA354**

Prereq: **None**

DANC359 Space Design for Performance

In this course, students will study, construct, and deconstruct the performative space, whether theatrical or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software, utilizing design-technology tools, such as laser cutters and 3D printing, to develop and enhance their work.

Offering: **Crosslisting**

DANC360 West African Dance II

This intermediate-level course is intended for students who have had some previous training in West African dance. In this course students will learn more complex and physically challenging dances drawn from several cultures in Ghana. In addition, students will be presented with a rich pallet of general West African movement vocabulary and will continue to engage in the discussion of the cultural context in which the dances occur, through reading, writing, video, and lecture.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC362 Bharata Natyam II: Embracing the Traditional and the Modern

This advanced course is designed to further students' understanding of the technique, history, and changing nature of Bharata Natyam dance and of Indian classical dance in general. The primary aim of the course is to foster an understanding of the role, function, and imaging of Bharata Natyam dance vis-à-vis ideas about tradition and modernity. Although the course assumes no prior knowledge of Bharata Natyam, we will move rapidly through the material. We will focus mainly on more complex studio work, extensive readings, and video presentations. In preparation for this course, students should have movement experience in other dance tradition(s). Occasionally, the class could include a guest lecture given by either a visiting scholar, dancer, or choreographer respected in the field of South Asian dance internationally.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC364 Media for Performance

This course examines the use of technology in performance, from the creation of mechanical moving scenery to 3D scenography. We will look into the development of the theatrical technology from the Renaissance to today's

conception of the digital theater, virtual reality, and online performances. The class format will be divided into lectures and studio class, where students will develop practical work creating their own digital performances.

Prereq: **None**

DANC366 Queering the Dancing Body: Critical Perspectives on LGBTQ Representation

This course focuses on questions of "queering" dance as a historical, cultural, social, and political enterprise. Focusing on both historical and postmodern dance contexts, the course explores key issues around gender and identity, with special reference to the concepts of performativity, impersonation, sexuality, and transformation. The course places the notion of "flows of gender and transformation" at its center, and examines historical, social, and aesthetic shifts in these ideas over the past 50 years. It draws on case studies ranging from female/male dance traditions of impersonation in India, China, Japan, and Indonesia, to postmodern shifts of "classical" dance (such as the all-male cast of Matthew Bourne's "Swan Lake") and more popular forms such as voguing and "RuPaul's Drag Race."

DANC371 Site-Specific Choreography

This course addresses the construction of contemporary performance in alternative, nontheatrical spaces. Students will create, design, and structure movement and image metaphors; design and realize scenic objects; and integrate technologies that enhance performance at large. Daily practice will focus on developing compositional tools to trigger events, to set off the performance space, and to create optimal conditions for audience and performer participation. Skills in movement observation, critical reading, and video analysis will inform the course's practical and historical frameworks.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC372 Choreography and Performance Art Perspectives

This course considers theories and methods of dance scholarship and takes a comparative approach to dance as research, research as choreography. This is a research methods course in which we will consider ways that knowledge is constructed and legitimated, focusing on the role of physical/somatic

engagement, creativity, and performance in research. Problems and issues central to research pertaining representation, authority, validity, rigor, reliability, and ethics will be addressed in the context of dance studies and critical qualitative research studies. A final research project will be required.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC374 Perspectives on Dance of the African Diaspora

In this combined technique and ethnography course we will explore some of the many dance practices of the African diaspora. We will focus on Senegal and Ghana in West Africa and follow the path of the Middle Passage to Cuba, Brazil, and the United States. Investigating both traditional and popular dance forms, we will consider how African dance and culture has influenced many performance practices throughout the Americas. To these ends, coursework will include: learning specific dances (Sabar, Capoeira, Orisha dancing, salsa, tap, and hip-hop for example); engaging in readings that provide critical, cultural, and historical context; participating in analytical and self-reflective dialogue; as well as creating an independent research paper.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC375 Dance History: Why Dance Matters

Dance History: Why Dance Matters investigates myriad social, political, and historical events that have impelled performers and choreographers to create dances that broadcast their personal concerns to society in powerful ways. Artistic movements, choreographers, and dancers examined will include the aristocratic Imperial Russian Ballet; gender fluidity in Nijinsky's roles in Diaghilev's Les Ballets Russes; the microcosm of immigrant and black performers in vaudeville; dance and the Harlem Renaissance; the rejection of ballet by L ie Fuller, Isadora Duncan, and Ruth St. Denis; the political work of early modern dancers Martha Graham, Doris Humphrey, and Charles Weidman; war's aftermath in the German Ausdruckstanz of Mary Wigman and Kurt Jooss and Japanese butoh; the anthropological research of black choreographers Katherine Dunham and Pearl Primus; the psychological dance-theater of Antony Tudor and Pina Bausch; democracy within the postmodern rebellion of the Judson Dance Theater; Civil Rights-era social activist choreographers; and the response of choreographers and performance artists to the culture wars of the 1990s and the AIDS crisis. Students will pursue extended research, view performance videos and documentaries, and be expected to write and talk about dance.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC376 Artist in the Community: Civic Engagement and Place-Based Dance Making

Through both theoretical analysis and practical application, students will explore how, in a collaborative community setting, performance and art-making come into relationship with the local environment, history, and communities. This hybrid course includes readings, seminar discussion, project-based learning, and community engaged research and practice. We will gain an overview of artists who engage directly with communities, places and environments, and explore new means of civic participation. The class will work on a collaborative project based in Middletown area and history. For final projects, students will develop short, creative projects in collaboration with a site of their choosing.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-ENVS**

Prereq: **None**

DANC377 Perspectives in Dance: Queering the Dancing Body: Critical Perspectives on LGBTQ Representation

This course focuses on questions of "queering" dance as a historical, cultural, social, and political enterprise. Focusing on both historical and postmodern dance contexts, the course explores key issues around gender and identity, with special reference to the concepts of performativity, impersonation, sexuality, and transformation. The course places the notion of "flows of gender and transformation" at its center, and examines historical, social, and aesthetic shifts in these ideas over the past 50 years. It draws on case studies ranging from female/male dance traditions of impersonation in India, China, Japan, and Indonesia, to postmodern shifts of "classical" dance (such as the all-male cast of Matthew Bourne's "Swan Lake") and more popular forms such as voguing and "RuPaul's Drag Race."

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC378 Repertory and Performance

This course examines choreography and its performance as an embodied experience. Students will research a theme-specific topic and participate in the creation of a contemporary work under the direction, guidance, and mentorship of a faculty choreographer. The class will serve as a laboratory for experimenting with the performance techniques and evolving methodologies of the teaching artist, preparing the student for the practice of embodied research. The work will use video projections. The course culminates in the performance of the work developed during the semester of study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC378A Repertory and Performance: Storied Places

Grounded in the experiences of the multiple African American migrations of the late-19th and early-20th centuries, this course will explore the ideas of migration, displacement, home, and place writ large. As a community, we will collaboratively develop a performance that will utilize movement, text, and objects as research tools and creative processes as our methodology to engage these themes.

Our process in creating this work will include improvisation, development of set materials, readings, discussion, and writing. Students will have the opportunity to work alongside professional dancers as well as Wesleyan faculty and their peers in preparation for an interdisciplinary performance in the spring.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC379 Dance as Activism

How does art effect change? Why does the phrase "social movements," include the action word - movement? In what ways does dance instigate action as a means of resistance? This course is an investigation into these questions through both lecture/discussion and embodied practices. It will look at various choreographers whose work is rooted in grappling social justice issues, choreographic and community engagement tools, as well as protests as choreographed performance art. All course work and inquiry will lead up to a final project wherein students create their own choreographic sketch/community

engagement using the language of dance/performance art, as the foundation for addressing a particular historical or present social issue of their choice.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-DANC**

Prereq: **None**

DANC381 Japan's Nuclear Disasters

The atomic bombings of Hiroshima and Nagasaki in 1945 are central to the history of the 20th century. This course examines the scientific, cultural, and political origins of the bombs; their use in the context of aerial bombings and related issues in military history; the decisions to use them; the human cost to those on whom they were dropped; and their place in history, culture, and identity politics to the present. Sources will include works on the history of science; military, political, and cultural history; literary and other artistic interpretations; and a large number of primary source documents, mostly regarding U.S. policy questions. In addition, we will be examining the development of the civilian nuclear industry in Japan with a focus on the nuclear meltdowns in Fukushima and other accidents. This is an extremely demanding course.

This interdisciplinary, experiential, and experimental course combines studio learning (movement studies and interdisciplinary, creative exploration) and seminars (presentations and discussions). No previous dance or movement study is required, and the course is not particularly geared toward dancers or performers. However, your willingness to experiment on and share movement is important. We encourage you to think about movement as a method of accessing human experiences and making distance malleable, a way to explore your own sensations, thoughts, and reactions in learning history.

DANC398 Senior Colloquium in Dance Research

This course focuses on workshopping senior capstone research projects/theses, critically analyzing and situating their work within the larger fields of dance and dance research. In addition to sharing senior capstone research in progress, the course incorporates opportunities to interact and study with successful dance artists/scholars, including but not limited to, CFA visiting artists and current faculty, and to thereby encounter the most current shifts happening in the field of dance and dance research. Issues concerning dance/research that will be addressed include the following: relevance, validity, rigor, diversity and globalization, interdisciplinarity, citizenship, and social justice as they pertain to dance and dance research and to the senior capstone projects/theses specifically. This is an opportunity for our students to delve deeper into their own research while expanding their focus to better understand and frame their work in a larger context.

EARTH AND ENVIRONMENTAL SCIENCES (E&ES)

E&ES101 Dynamic Earth

The earth is a dynamic planet, as tsunamis, hurricanes, earthquakes, and volcanic eruptions make tragically clear. The very processes that lead to these natural disasters, however, also make life itself possible and create things of beauty and wonder. In this course we will study the forces and processes that shape our natural environment, as well as the effect we have on this world. Topics range in scale from the global pattern of mountain ranges to the atomic structure of minerals and in time from billions of years of Earth history to the few seconds it takes for a fault to slip during an earthquake. Hands-on activities and short field trips complement lectures to bring the material to life--so put on your hiking boots and get ready to explore our planet.

Offering: **Host**

Grading: **A-F**

Credits: **1.25**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES115 Introduction to Planetary Geology

This course will examine the workings of Earth and what we can learn from examining Earth in the context of the solar system. Comparative planetology will be used to explore such topics as the origin and fate of Earth, the importance of water in the solar system, the formation and maintenance of planetary lithospheres and atmospheres, and the evolution of life. Exercises will utilize data from past and present planetary missions.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **NSM-EES**
 Prereq: **None**

E&ES125 Black Speculative Fictions and the Anthropocene

The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CHUM**

Identical With: **CHUM302, AFAM312, FGSS301**

Prereq: **None**

E&ES130F Digital Storytelling with Maps: Science Stories (FYS)

Digital storytelling describes the practice of using digital tools to tell a 'story' in an engaging and compelling format. A story map is a digital storytelling tool that combines maps with multimedia content (e.g., images, video, text) to convey geographic information as a narrative. In this course, students will employ elements of cartographic design, spatial analysis, and data visualization within story maps as a means for creating interactive 'stories' about empirical scientific data. (No prior experience with web maps or story maps is required.) Students will explore multiple story map formats and their utility in the effective communication of science to scientists, the public, and policy makers.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

E&ES160 Life in the Oceans in the Anthropocene and Beyond

Little is known about life in the deep sea, the largest habitat on Earth, even about the largest animals living there, such as the giant squid. Humans, however, are severely affecting even these most remote areas of our planet, and wildlife populations in the oceans have been badly damaged by human activity. We will look at the amazing diversity of ocean life and the disparate building plans of its animals, and see how oceanic ecosystems are fundamentally different from land ecosystems. Then we will explore how human actions are affecting oceanic ecosystems directly, for instance by overfishing (especially of large predators and filter feeders), addition of nutrients (eutrophication) and pollutants, and the spread of invasive species, as well as indirectly, through emission of carbon

compounds into the atmosphere. Rising atmospheric CO₂ levels lead to ocean acidification and global warming, affecting the all-important metabolic rates of ocean life, as well as oceanic oxygen levels and stratification, thus productivity. We will try to predict the composition of future ecosystems by looking at ecosystem changes during periods of rapid warming in the geological past and see whether future ecosystems will become dominated by jellyfish, as they were 600 million years ago.

Gen Ed Area: **NSM-EES**

Identical With: **CIS160**

Prereq: **None**

E&ES195 Sophomore Field Course

This course is designed for sophomores who have declared a major in earth and environmental sciences. The course will give students a common experience and a more in-depth exposure to the department curriculum prior to their junior year. Students will be exposed to the wide variety of geological terrains and ecological environments of southern New England.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES197 Introduction to Environmental Studies

This interdisciplinary study of human interactions with the environment and the implications for the quality of life examines the technical and social causes of environmental degradation at local and global scales, along with the potential for developing policies and philosophies that are the basis of a sustainable society. This will include an introduction to ecosystems, climatic and geochemical cycles, and the use of biotic and abiotic resources over time. It includes the relationship of societies and the environment from prehistoric times to the present. Interrelationships, feedback loops, cycles, and linkages within and among social, economic, governmental, cultural, and scientific components of environmental issues will be emphasized.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Identical With: **BIOL197, ENV5197**

Prereq: **None**

E&ES199 Introduction to Environmental Science and Sustainability

Earth's natural systems have operated for billions of years but are now severely altered by human activity. The rate of environmental change caused by humans is unprecedented. This course is designed to help students explore the science behind four interrelated environmental areas; water, energy, food and climate change. We will explore some of the basic principles of atmospheric science, ecology, environmental chemistry, geosciences, and hydrology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES201 Geology of Connecticut

The geology of Connecticut offers a unique opportunity to study the formation and deformation of rocks dating back more than a billion years. These rocks occur in belts that each record the arrival of exotic (plate tectonic) terranes that together built and rebuilt the Appalachian mountain belt. Few states in the nation possess a similar diversity of exposed rock and mineral occurrences. The course consists of weekly Friday afternoon field trips to key localities. Students

will learn how to recognize and classify different rock types and distinguish their formational and deformational histories. Emphasis will be on learning (1) to recognize the clues to identifying the origin and evolution of the large variety of sedimentary, volcanic, metamorphic, and igneous rocks in Connecticut and (2) to use them to reconstruct their plate tectonic context. We will include visits to historic sites that influenced our socioeconomic development such as the brownstone quarries and "copper" mines in the Connecticut Valley, and the granite quarries in the southeastern part of the state. A one-day required Saturday field trip will be scheduled during the first class meeting. Student co-enrollment in EE&S 213 or 223 or 230 is encouraged.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES115 OR E&ES213 OR E&ES223 OR E&ES230**

E&ES213 Mineralogy

Most rocks and sediments are made up of a variety of minerals. Identifying and understanding these minerals are initial steps toward an understanding of the genesis and chemistry of Earth materials. Crystallography is elegant in its own right. In this course we will study the crystal structure and composition of minerals, how they grow, their physical properties, and the principal methods used to examine them, including polarized-light microscopy and x-ray diffraction.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES214 Laboratory Study of Minerals

This lab course presents practical aspects of the recognition and study of the common minerals in the lab and in the field. It includes morphologic crystallography and hand specimen identification, use of the polarizing microscope, and x-ray powder diffractometry.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES215 Earth Materials

This course introduces students to the solid, natural, and nonbiological materials that make up our world. We will cover the fundamentals of mineralogy and the petrology of igneous, metamorphic, and sedimentary rocks. We will also discuss materials that are used by humans and form the basis of societies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES216 Earth Materials Laboratory

This course will introduce students to laboratory techniques used in identifying and understanding rocks, minerals, and other Earth materials.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES220 Geomorphology

This inquiry into the evolution of the landscape emphasizes the interdependence of climate, geology, and physical processes in shaping the land. Topics include weathering and soil formation, fluvial processes, and landform development in cold and arid regions on Earth and other planets. Applications of geomorphic

research and quantitative theories of landform development are introduced throughout the course where appropriate.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES199 OR E&ES115 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES221 Geomorphology Laboratory

This course will introduce various methods of measuring landforms in the field, including stream measurement, hazard assessment, and the classification of glacial, volcanic, coastal, and tectonic features. The course includes laboratory exercises in the utilization of topographic maps, aerial photographs, and various remote-sensing techniques. This will include field trips to various locations in CT.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES199 OR E&ES115 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES223 Structural Geology

Structural geology is the study of the physical evidence and processes of rock deformation, including jointing, faulting, folding, and flow. Geologic structures can be used to interpret tectonic history and understand physical process responsible for geologic hazards such as earthquakes, volcanoes, and landslides. Many structures also exert a primary control on fluid flow in the earth's crust and thus play an important role in determining the distribution of natural resources and environmental contaminants.

In this course students will learn the theoretical foundations, observational techniques, and analytical methods used in modern structural geology. Case studies are drawn from local field work (see description of E&ES224) and published data sets from around the world.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES199 OR E&ES115 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES224 Field Geology

This course is designed to provide students with a basic understanding of geological principles in the field. Emphasis will be on describing, measuring, and mapping bedrock geology and structures with applications to tectonics, mountain building, earthquake science, volcanology, and groundwater hydrology.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES199 OR E&ES115 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES230 Sedimentology

Sedimentary geology impacts many aspects of modern life. It includes the study of sediment formation, erosion, transport, deposition, and the chemical changes that occur thereafter. It is the basis for finding fossil fuels, industrial aggregate, and other resources. The sedimentary record provides a long-term history of biological evolution and of processes such as uplift, subsidence, sea-level fluctuations, climate change, and the frequency and magnitude of earthquakes, storms, floods, and other catastrophic events. This class will examine the origin and interpretation of sediments, sedimentary rocks, fossils, and trace

fossils. Students must take E&ES231 Sedimentology/Stratigraphy Techniques concurrently.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES115 OR [E&ES197 or BIOL197 or ENV5197] OR E&ES199**

E&ES231 Sedimentology/Stratigraphy Techniques

This course provides macroscopic and microscopic inspection of sedimentary rocks. It will include field trips, experiments, and laboratory analyses. There will be an optional weekend field trip and there may be one daylong industry event. E&ES230 must be taken concurrently.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Prereq: **None**

E&ES234 Geobiology

Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology); typically, this involves studying fossils within the context of their sedimentary setting. In this course we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on climate.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Prereq: **E&ES101 OR E&ES115 OR E&ES199 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES235 Geobiology Laboratory

This laboratory course will explore more deeply some of the concepts introduced in E&ES234. Both the fundamental patterns and practical applications of the fossil record will be emphasized.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-EES**

Identical With: **BIOL229**

Prereq: **E&ES101 OR E&ES115 OR E&ES199 OR [E&ES197 or BIOL197 or ENV5197]**

E&ES236 Mass Extinctions in the Oceans: Animal Origins to Anthropocene

Geoscientists are debating whether we are living in the Anthropocene, defined as a period during which humans are having a significant effect on atmospheric, geologic, hydrologic, and biospheric earth system processes. There is considerable discussion whether we are indeed affecting the biosphere to such an extent that life on Earth will suffer an extinction similar in magnitude to these that have occurred during earth history. Studies of the fossil record provide unique evidence that is used to evaluate the large extinctions of the past and compare them to ongoing extinction processes, extinctions rates and patterns, and magnitude. Organisms with hard skeletons are most easily and most abundantly preserved in the rock record. Many of these are invertebrates that lived in the oceans (e.g., clams, sea urchins, corals). In the first part of this course, students will become familiar with the nature of the fossil record, the most common marine animals in the fossil record, and their evolution and diversification. Lectures will be combined with studying fossils. In the second part of the course, possible causes for mass extinction will be considered, together

with their specific effects on environments and biota, and these predicted effects will be compared to what has been observed. Potential causes include asteroid and comet impacts, large volcanic eruptions, "hypercanes," and "methane ocean eruptions," and more exotic processes. Students will present in class on these topics, and we will compare rates and magnitude of environmental change with severity and patterns of extinction.

Offering: **Host**

E&ES240 Invasive Species: Biology, Policy, and Management

Invasive species account for 39 percent of the known species extinctions on Earth, and they are responsible for environmental damages totaling greater than \$138 billion per year. However, the general population has little knowledge of what invasive species are or what threats they pose to society. In this course, we will explore the biological, economic, political, and social impacts of invasive species. We will begin by exploring a definition of an invasive species and looking at the life history characteristics that make them likely to become pests. Then we will consider the effects of invasive species expansion on the conservation of biodiversity and ecosystem function, as well as their global environmental and political impacts. Finally, we will explore the potential future changes in invasive species distributions under a changing climate.

E&ES250 Environmental Geochemistry

A qualitative and quantitative treatment of chemical processes in natural systems such as lakes, rivers, groundwater, the oceans, and ambient air is studied. General topics include equilibrium thermodynamics, acid-base equilibria, oxidation-reduction reactions, and isotope geochemistry. This course (together with the associated lab course, E&ES 251) is usually taught as a service-learning course in which students work with a community organization to solve an environmental problem. Previous classes have evaluated the energy potential of a local landfill and investigated the cause and possible remediation of local eutrophic lakes.

Gen Ed Area: **NSM-EES**

Identical With: **ENV5280**

Prereq: **None**

E&ES251 Environmental Geochemistry Laboratory

This course will supplement E&ES 250 by providing students with hands-on experience of the concepts taught in E&ES 250. The course will emphasize the field collection, chemical analysis, and data analysis of environmental water, air, and rock samples. This course is often taught as service-learning course where the class works with a community organization to solve an environmental problem. The course usually concludes with a public presentation of the work. Past service-learning projects have examined landfills, dammed rivers, and polluted lakes.

Gen Ed Area: **NSM-EES**

Identical With: **ENV5281**

Prereq: **None**

E&ES260 Oceans and Climate

Earth's climate is not static. Even without human intervention, the climate has changed. In this course we will study the major properties of the ocean and its circulation and changes in climate. We will look at the effects of variations in greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. We will look at these variations on several time scales. For billions of years, the sun's energy, the composition of the atmosphere, and the biosphere have experienced changes. During this time, Earth's climate has varied from much hotter to much colder than today, but the variations were relatively small when compared to the climate on our neighbors Venus and Mars. Compared with them, Earth's climate has been stable; the oceans neither evaporated nor froze solid. On shorter time scales, different processes are important. We will look at these past variations in Earth's climate and oceans and try to understand the implications for possible climates of the future.

Offering: **Host**

E&ES270 Quantitative Methods for the Biological and Environmental Sciences

This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on

data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.

E&ES280 Introduction to GIS

Geographical information systems (GIS) are powerful tools for organizing, analyzing, and displaying spatial data. GIS has applications in a wide variety of fields including the natural sciences, public policy, business, and the humanities--literally any field that uses spatially distributed information. In this course we will explore the fundamentals of GIS with an emphasis on practical application of GIS to problems from a range of disciplines. The course will cover the basic theory of GIS, data collection and input, data management, spatial analysis, visualization, and map preparation. Coursework will include lecture, discussion, and hands-on activities.

E&ES301 New England Geology

For more than a century, students and professionals interested in the geology of New England have gathered at the annual meeting of the New England Intercollegiate Geologic Conference (NEIGC), a weekend of field-based education. In this seminar, we will choose three NEIGC fieldtrips to attend, study the appropriate background material in preparation for the trips, and compile our own guide to the trips that summarizes the appropriate background material. The class will culminate in attendance at the annual NEIGC meeting on the weekend of October 12-14, 2018 in the Lake George region of Upstate New York and Vermont.

At the end of this course, you will not only know a lot more about New England geology and have met many current and future field geologists, but you will also have learned to synthesize the literature to assess the current state of knowledge and evaluate how field studies can advance our understanding of regional geology and environmental issues.

Offering: **Host**

Grading: **Cr/U**

Identical With: **E&ES517**

Prereq: **E&ES101 OR E&ES213**

E&ES319 Meteorites and Cosmochemistry

This course will focus on the materials in the world's collection of extraterrestrial samples and what they tell us about Earth, our nearest planetary neighbors, and the origin of our solar system. Planetary geochemical processes will be discussed through the examination of samples from comets, asteroids, Mars, the moon, Vesta, and Earth. Other topics covered will be impact cratering and the delivery of meteorites to Earth. Meteorites teach us about the earliest history of planet formation in this solar system, and we will compare this to what is observed in other solar systems. The course is intended for majors and graduate students in Wesleyan's Natural Science and Mathematics (NSM) division.

Gen Ed Area: **NSM-EES**

Identical With: **E&ES520**

Prereq: **None**

E&ES321 Planetary Evolution

Why are we the only planet in the solar system with oceans, plate tectonics, and life? This course examines how fundamental geologic processes operate under the unique conditions that exist on each planet. Emphasis is placed on the mechanisms that control the different evolutionary histories of the planets.

Much of the course will utilize recent data from spacecraft. Readings of the primary literature will focus on planetary topics that constrain our understanding of geology as well as the history and fate of our home, the Earth.

Offering: **Host**

Grading: **A-F**

E&ES325 Geologic Field Mapping

In this project-based service learning course students will learn to construct accurate large-scale (>1:24000) geologic maps (2D) and photo-realistic outcrop models (3D). They will apply these skills to make maps and models of local open-spaces to enhance recreational use and environmental education. The specific mapping technologies learned and applied will depend on the project and be determined in consultation with community partners. Methods may include GPS and/or total station surveying, structure from motion (photogrammetric) ranging, lidar data processing and analysis, drone imaging, and GIS synthesis. The instructor will introduce the theory and practice for each method used.

E&ES342 Ecological Resilience: The Good, the Bad, and the Mindful

This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.

E&ES359 Global Climate Change

The climate of the earth has been changing over the course of Earth history. Over the last few decades, we have come to realize that humans may be the strongest driver of climate change in the 20th century and near future. In this class we evaluate that hypothesis in some depth, using the basic physical foundations of climate science with a focus on radiative principles. We study the details of the short carbon cycle and the empirical climate record of the last 1000 years, with data from the instrumental record, historical indicators, and physical (pollen, geochemical/isotopic temperature indicators) records. Besides the principles of fundamental climate science, we will deal with some of the results of climate change, mainly sea-level rise and feedbacks on the biosphere. We look at the

impact of humans on atmospheric chemistry and how human civilization has caused changes in the carbon cycle, possibly as early as the transition period from hunter-gatherers to agricultural society. The final part of the lecture section is on future climate, using economic scenarios, mitigation and adaptation efforts, and climate/economics models.

Parallel to the lectures, several experimental projects are done by groups of students: studies with our experimental "analog earth" climate model; monitoring CO₂ in Middletown air for a semester; working with data from the Wesleyan weather station to calculate theoretical climate fluctuations; experimental work on the absorption of CO₂ into water for the geochemically inclined; the impact of increased CO₂ levels on plant growth for the biologically inclined; and a social-economic global assessment on carbon policies for the environmental studies types. In other years, students built solar ovens and a basic infrared spectrometer among projects.

E&ES361 Living in a Polluted World

This course treats the occurrences and origins, natural pathways, toxicologies, and histories of the major environmental contaminants. We all know about lead and its effects on humans, but how about cadmium and hexachromium, or the many unpronounceable organic contaminants, usually referred to by some acronym (e.g., DDT, POPs)? To be effective in this course, students will need basic college-level proficiency in chemistry and math as we will delve into aspects of geochemistry, geology, toxicology, environmental law, and some math. The class consists of lectures, one major problem set, the Hg-in-hair class study, and a class project on pollution records from a 125-year-old tree slab that has year rings. We will drill all rings and analyze the wood for Hg, Pb, nuclear contaminants, and several stable isotopes. Some will do a paleoclimate record on the rings as well. Students will jointly write various sections of a report on this original research. This is also a service learning course, providing environmental outreach to the larger Middletown community on local pollution over the last 125 years (the tree slab with its records will go on display at Wesleyan).

E&ES380 Advanced GIS and Spatial Analyses

A geographic information system (GIS) is a powerful database that allows for the collection, manipulation, analysis, and presentation of spatially referenced data. GIS technologies facilitate natural science, social science, and humanities research and any other project that uses location-based data. This course will focus on individual projects conducted within a collaborative learning framework. Each student is responsible for developing and producing a semester-long project focused on advanced spatial data analyses and/or advanced cartographic design using a GIS. Students will enter the course with an individual or small team (2--3 students) project in mind. The project may be a component of a senior thesis, work on a faculty member's research project, a community-based service-learning project, and so on. Course sessions will be a mix of studio time for projects (e.g., work time, critiques), skill development (e.g., lectures, student-led skills-training sessions), and intellectual advancement (e.g., guest speakers, conference attendance). Specific skills-training sessions will be determined by components of each project.

E&ES497 Senior Seminar

This seminar-style capstone course for E&ES seniors explores major topics that span multiple sub-disciplines of the Earth and Environmental Sciences. Students will use the primary literature to create hypothesis-driven oral presentations and written reports. In groups, students will develop and execute original, field-based research projects. Data will be collected for these projects during a multi-day field trip. Students will then analyze and interpret their data, and then present their findings with a group presentation and written report. The goal of the course is to help students transition to independent, professional scientists.

Offering: **Host**

E&ES519 Meteorites and Cosmochemistry

This course will focus on the materials in the world's collection of extraterrestrial samples and what they tell us about Earth, our nearest planetary neighbors, and the origin of our solar system. Planetary geochemical processes will be discussed through the examination of samples from comets, asteroids, Mars, the moon, Vesta, and Earth. Other topics covered will be impact cratering and the delivery of meteorites to Earth. Meteorites teach us about the earliest history of planet formation in this solar system, and we will compare this to what is observed in other solar systems. The course is intended for majors and graduate students in Wesleyan's Natural Science and Mathematics (NSM) division.

Identical With: **E&ES320**

Prereq: **None**

E&ES521 Planetary Evolution

Why are we the only planet in the solar system with oceans, plate tectonics, and life? This course examines how fundamental geologic processes operate under the unique conditions that exist on each planet. Emphasis is placed on the mechanisms that control the different evolutionary histories of the planets. Much of the course will utilize recent data from spacecraft. Readings of the primary literature will focus on planetary topics that constrain our understanding of geology as well as the history and fate of our home, the Earth.

E&ES560 Oceans and Climate

Earth's climate is not static. Even without human intervention, the climate has changed. In this course we will study the major properties of the ocean and its circulation and changes in climate. We will look at the effects of variations in greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. We will look at these variations on several time scales. For billions of years, the sun's energy, the composition of the atmosphere, and the biosphere have experienced changes. During this time, Earth's climate has varied from much hotter to much colder than today, but the variations were relatively small when compared to the climate on our neighbors Venus and Mars. Compared with them, Earth's climate has been stable; the oceans neither evaporated nor froze solid. On shorter time scales, different processes are important. We will look at these past variations in Earth's climate and oceans and try to understand the implications for possible climates of the future.

E&ES570 Quantitative Methods for the Biological and Environmental Sciences

This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.

E&ES580 Introduction to GIS

Geographical information systems (GIS) are powerful tools for organizing, analyzing, and displaying spatial data. GIS has applications in a wide variety of fields including the natural sciences, public policy, business, and the humanities--literally any field that uses spatially distributed information. In this course we will explore the fundamentals of GIS with an emphasis on practical application of GIS to problems from a range of disciplines. The course will cover the basic theory of GIS, data collection and input, data management, spatial analysis, visualization, and map preparation. Coursework will include lecture, discussion, and hands-on activities.

Offering: **Crosslisting**

Grading: **A-F**

E&ES590 Advanced GIS and Spatial Analyses

A geographic information system (GIS) is a powerful database that allows for the collection, manipulation, analysis, and presentation of spatially referenced data. GIS technologies facilitate natural science, social science, and humanities research and any other project that uses location-based data. This course will focus on individual projects conducted within a collaborative learning framework. Each student is responsible for developing and producing a semester-long project focused on advanced spatial data analyses and/or advanced cartographic design using a GIS. Students will enter the course with an individual or small team (2--3 students) project in mind. The project may be a component of a senior thesis, work on a faculty member's research project, a community-based service-learning project, and so on. Course sessions will be a

mix of studio time for projects (e.g., work time, critiques), skill development (e.g., lectures, student-led skills-training sessions), and intellectual advancement (e.g., guest speakers, conference attendance). Specific skills-training sessions will be determined by components of each project.

ECONOMICS (ECON)

ECON101 Introduction to Economics

A general introduction to the principles of economic analysis and their implications for public policy, covering concepts and issues in both microeconomics (concerning the function and performance of individual markets, organizations, or institutions) and macroeconomics (concerning the function and performance of the economy as a whole). This course is intended primarily for students without significant prior study in the discipline, and it satisfies the prerequisites for most 200-level economics electives.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **None**

ECON110 Introduction to Economic Theory

An introduction to the principles of micro- and macroeconomic theory, this course is intended for prospective majors and students wishing to prepare themselves for a broad range of upper-level elective courses in economics. Mathematical tools essential for further study in economics are introduced throughout the course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **MATH120 OR MATH121 OR MATH122 OR MATH221**

ECON127 Introduction to Financial Accounting

In this course, no prior accounting knowledge is required or assumed. Students learn how accountants define assets, liabilities, revenues, and expenses and where those items appear in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting choices allowed to firms for reporting to stockholders and creditors and learn how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Later assignments focus on ratio analysis of actual firms' financial statements, including techniques to identify firms in financial trouble.

Identical With: **CSPL127**

Prereq: **ECON101 OR ECON110**

ECON129 Selected Problems in American Criminal Law

Crime and punishment are constantly in the news, and lay observers of the American system of criminal justice are often puzzled by its procedures and outcomes. What exactly is the criminal law trying to do? Why does it seem so difficult to convict criminals? What are the governing principles of American criminal justice, and how are they actually applied in the courts? This First-Year-Initiative course is intended to address these questions through a close analysis of cases and related materials concerned with the substantive criminal law and, at the same time, to introduce students to the legal method itself and the close-case-analysis characteristic of legal argument. It is thus not a course in law and economics, or law and philosophy, or law and government, but a course in law itself, much as it is taught to law students. Topics include the legal definition of criminal acts, causation, the mental element of crime, basic principles of justification, criminal responsibility and mental abnormality, and the law of homicide. Readings consist entirely of judicial opinions and related materials, and in class we will analyze these readings in detail to expose their logic and consider their practical implications. These readings are dense and intensive, and students will be asked in class to address difficult issues and defend their answers against rigorous critical questioning.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **None**

ECON211 Introduction to Behavioral and Experimental Economics

This course compares what economic theory predicts with what economic agents actually do when faced with decisions. A number of in-class experiments will be conducted to identify systematic deviations or to confirm theoretical models. Students will learn new material both by participating in experiments and by studying related economic theory. This course will investigate some of the major subject areas that have been addressed by laboratory and field experiments: market behavior, decisions under risk, self-control issues, bargaining, auctions, public goods, cooperation, trust, and gender effects.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON110**

ECON212 The Economics of Sustainable Development, Vulnerability, and Resilience

This course will build on the first principles of economics as applied to sustainable development and decision making under uncertainty. One of the course's major objectives will be to explore how efficiency-based risk analysis can inform assessments of vulnerability and resilience from uncertain sources of external stress in ways that accommodate not only attitudes toward risk but also perspectives about discounting and attitudes toward inequality aversion. Early sessions will present these principles, but two-thirds of the class meetings will be devoted to reviewing the applicability of insights drawn from first principles to published material that focuses on resilience, vulnerability, and development (in circumstances where risk can be quantified and other circumstances where it is impossible to specify likelihood, consequence, or both). Students will complete a small battery of early problem sets that will be designed to illustrate how these principles work in well-specified contexts. Students will be increasingly responsible, as the course progresses, for presenting and evaluating published work on vulnerability and resilience--offering critiques and proposing next steps. Initial readings will be provided by the instructor and collaborators in the College of the Environment, but students will be expected to contribute by bringing relevant readings to the class from sources germane to their individual research projects. Collaboration across these projects will thereby be fostered and encouraged by joint presentations and/or presenter-discussant interchanges.

ECON213 Economics of Wealth and Poverty

Who are the very wealthy and how do they acquire their wealth? Why is poverty still with us after almost 50 years of antipoverty programs? What explains rising inequality in the distribution of income and wealth? These are just a few of the questions that we address in this course. The problem of scarcity and the question of production for whom are basic to the study of economics. Virtually all courses in economics give some attention to this topic, yet few study the distribution of income in depth. This course takes a close look at evidence on the existing distribution of income and examines the market and nonmarket forces behind the allocation process. Our investigation makes use of U.S. economic history, cross-country comparisons, and fundamental tools of economic analysis. Topics include normative debates surrounding the notions of equality and inequality, analytic tools for measuring and explaining income inequality, determinants of wage income and property income, the importance of inheritance, the feminization of poverty, and the economic analysis of racial discrimination. A central subject throughout the course is the role of policy in altering the level of poverty and inequality.

Gen Ed Area: **SBS-ECON**

Identical With: **AMST274**

Prereq: **ECON101 OR ECON110**

ECON215 Jobs, Technological Change, and Globalization

Unlike markets for widgets, labor markets involve the lives of those whose work is being bought and sold. Beliefs about fairness affect these markets, and we pay particular attention when they are jolted by technological change and globalization. The human element makes such markets worthy of special attention. The course starts with foundations for understanding labor markets: the "derived" demand for labor, factors affecting labor supply, the decision to work (or not) and the often costly choice to acquire job skills. Next we study a wide range of special topics: worker mobility and immigration, pay and productivity, unemployment and wage inequality, and the effects of both technological change and global trade. We probe these issues both theoretically and empirically. Throughout the course we apply economic theory to policy issues including minimum wage and immigration laws, anti-discrimination policies, job training programs, welfare plans, and occupational safety and health standards.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON218 Labor and Development Economics in Latin America

This course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at times on evidence from across the world for comparison with the Latin America region.

Students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss research results and work on individual or group projects. Basic quantitative methods will be taught throughout the course, relating to economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

Offering: **Crosslisting**

Identical With: **ENVS241, LAST341**

Prereq: **ECON101 OR ECON110**

ECON220 Alliances, Commons, and Shared Resources

Some resources are only useful in large units and therefore need to be shared by multiple users. Examples include agricultural and forest land, fisheries, streaming video and music services, highways, computer platforms, and news reporting. This course studies methods of sharing resources including common property, formal and informal alliances, clubs, open source, and government regulation and ownership. Students interested in the environment, rural development, news and entertainment media, transportation, and communications should consider this course, as we will cover all of those topics and see their economic similarities.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON222 Public Economics

In this course, we examine the economic roles of government and the tools that governments use to fulfill these roles. We will start with the questions, Under what circumstances is it possible for governments to improve on the outcomes that would occur in their absence? And how do we decide whether one outcome is better than another? The course will continue with an examination of the performance of governments in the United States. The primary questions addressed will be, What policies do governments pursue? How do they spend money to achieve the goals of these policies? How do they raise the money that they spend? And what sorts of undesired side effects might result from taxation and expenditure policies?

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON224 Regulation and Antitrust: Government and the Market

Firms and the public sector interact via regulation and antitrust. Firms use (or fail to use) the regulatory process for competitive advantage, and agencies and legislators use (or misuse) regulation to accomplish their policy objectives. Topics covered in this course include the analysis of market power, predation and discrimination, mergers, regulation of infrastructure industries, and health and safety regulation. Case studies include railroads; telephone, cable, and broadband; the energy industry; differences between the EU and United States in merger reviews; and cybersecurity.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON225 Economic Analysis and the Law

The course uses economic analysis as a way of understanding the structure and evolution of the legal system. Selected rules and institutional forms drawn from the common law of property, contract, tort, and crime are studied as evolved responses to particular kinds of problems or failures in the market system. Readings are drawn from judicial opinions and scholarly sources in law, economics, philosophy, and political theory.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON227 Introduction to Financial Analysis

The course introduces students to the primary sources of information and data used in equity and debt valuation and portfolio management. Both corporate finance and investment finance topics will be covered: financial statement analysis, micro- and macroeconomic analyses of how industry trends and economic growth impact corporate performance, discounted cash flow analysis, asset pricing models (bonds, DDM, CAPM, APT), portfolio theory, and, time permitting, capital structure. This will be a very intense, inquiry-based course with significant hands-on work analyzing data of publicly traded companies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON231 Corporate Governance

The objective of this course is to introduce the topic of corporate governance with a focus on large publicly traded corporation. At the firm level, the importance of corporate governance is justified by the complexity of the contractual environment where owners (shareholders), executive managers, board of directors and other stake holders interact. We will cover topics in ownership and control, managerial monitoring and compensation, the structure and diversity of the board of directors, and shareholder engagement and activism. Also, in the wake of various corporate scandals worldwide, the role of corporate governance codes and regulation in setting new standards and best practices is evident. We will look at the evolution of these corporate governance standards, both in the U.S. and internationally.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON234 Economics of Religion

This class explores how economic ideas and statistical tools can be used to look at the role of religion in society. This course examines both the application of economic techniques to the study of religion and the relationship between economic and religious behaviors. Course topics may include: the demand for religion, religious supply, giving behavior, religion-based terrorism/extremism, and religion and economic development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

ECON237 Financial Crises: Beginning to End

This course provides an introduction to the economics of financial crises. Using introductory economics we will examine banking, security, and currency crises in order to illuminate the role of financial crises more generally in the archetypical life cycle of financial systems. By the end of the course, students will be able to

define what causes financial crises, how they lead to contractions in economic activity, why they reoccur, and what policy measures can be used to promote financial stability.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 or ECON110**

ECON241 Money, Banking, and Financial Markets

This course provides an introduction to money, banking, and financial markets, from both a theoretical and policy perspective. The class will emphasize the evolution of banking and financial market institutions--both in the United States and in other developed countries.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON110 OR ECON101**

ECON251 Economics of Alexander Hamilton's America

What was Alexander Hamilton's contribution to the early American republic? This course combines concepts and models from introductory economics with a mix of primary sources and modern-day scholarship. After a survey of the colonial American economy, we will focus on the role of economics in the American Revolution, the movement from the Articles of Confederation to the Constitution, and major economic policy debates of the early republic. Throughout, students will encounter the views and influence of the first U.S. Treasury Secretary, Alexander Hamilton. By the end of the course, students will be equipped to assess Hamilton's economic legacy.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON254 State and Economy in Industrial America, 1870--1940

This course considers the transformation of the political and economic institutions of the United States in the 70 years ending in 1940 and the revolution in political ideology that occurred alongside this transformation and helped bring it about. We begin by examining the growth of large corporations after 1870, the new techniques of management they called forth, and the antitrust movement that arose in response to them. We then turn to the many changes in American government brought by the Fourteenth Amendment, the granting of constitutional personality to business corporations, and the attempt of Progressives before World War I to analogize the administrative state to business firms and bring the newly developing techniques of management science to bear in politics and policy, an effort with profound effects on American life. Finally, the role played by war in these changes, the creation of the modern American economy in the 1920s, and the New Deal's attempt to adapt the nation's political and legal institutions to the economic and ideological realities of the 20th century are considered. Along the way, the course addresses a range of theoretical issues, including the contrast between markets and central planning as ways of organizing economic activity, the tension between the individual and the collective in complex societies, technocracy and social engineering, and the impact of war on economic and political institutions.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 or ECON110**

ECON255 Introduction to Open-Economy Macroeconomics

The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON261 Latin American Economic Development

In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

ECON263 China's Economic Transformation

China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China's great economic transformation beginning in 1978 in what is often described as a "gradualist" transition to market economy. In the past three decades, the speed of China's development and its growth rates of GDP are without precedent in history. The course concludes by addressing the incompleteness of China's transition to a mature, developed market economy and by probing the issue of what is left to be done to create a harmonious society.

ECON266 The Economics of Developing Countries--Lower Level

This course presents an examination of the structural characteristics of Third World economies and the bottlenecks inhibiting their growth. We begin with an exploration of the defining features of low-income agrarian societies and the

principal decision makers shaping the development process--incumbent national governments, International Bank for Reconstructions and Development and the International Monetary Fund, UN agencies, and bilateral donors. Specific sectoral topics include choice of agricultural strategy, import substitution, the oil syndrome, structural adjustment, microenterprise finance, the anatomy of foreign aid, and project analysis.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON110**

ECON270 International Economics

This class examines the economic interactions between countries in the world economy and recent international economic events. The first part of the course will focus on explaining trade patterns between countries and the gains and losses associated with international trade. Trade policies such as tariffs and the institutional arrangements governing them (e.g., the World Trade Organization) will also be analyzed. The second part of the course covers international finance topics including the balance of payments, exchange rates, and the history of the international monetary system. We will also discuss how international linkages between countries affect economic development.

Economics majors who want to be exposed to a more advanced treatment of international trade and international finance topics are encouraged to take ECON371 and/or ECON331.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON101 OR ECON110**

ECON273 Economic Growth and Development in Sub-Saharan Africa

This course will focus on macroeconomic theories and practices of growth and development by using the Sub-Saharan African economies as case studies. The course will be both a retrospective and prospective analysis of the Sub-Saharan African economies. In particular, it will attempt to provide some answers to various questions such as:

What are the determinants of long-run growth? Why has Sub-Saharan Africa lagged behind the rest of the world in terms of economic growth and development? What are the economic explanations and implications of some of the conflicts in Sub-Saharan Africa? What are the long run growth implications of foreign aid, remittances, and immigration?

Gen Ed Area: **SBS-ECON**

Prereq: **ECON110**

ECON282 Economics of Big Data

"Big data" is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly, there are opportunities and pressures to employ these techniques in other areas of the economy and society such as government, health care, and education. This course examines big-data analysis techniques and how they relate to conventional economic statistics; the effect of big data on the economy, society, and privacy; and practical methods of big-data analysis using the R statistics package.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Identical With: **QAC282**

Prereq: **ECON101 OR ECON110**

ECON300 Quantitative Methods in Economics

This course is an introduction to quantitative techniques widely used by economists. Topics include various methods of applied statistics that facilitate the understanding of economic literature and the pursuit of empirical research: elements of probability, correlation, multiple regression, and hypothesis testing. The weekly lab sections are required; labs explore issues relating to the nature and sources of economics data and introduce appropriate statistical computing tools. This class will meet three times each week: twice with an economics professor, and once with a Quantitative Analysis Center (QAC) instructor.

Offering: **Host**

Grading: **A-F**

Credits: **1.25**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON110**

ECON301 Microeconomic Analysis

This course develops the analytical tools of microeconomic theory; studies market equilibrium under conditions of perfect and imperfect competition; and considers welfare economics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300**

ECON302 Macroeconomic Analysis

This course focuses on the study of economic aggregates such as employment and inflation and on the public policies (monetary and fiscal) aimed at controlling these aggregates. The first half of the course will concentrate on short-run issues: aggregate demand and supply in closed and open economies, business cycles, and stabilization policies. The second half of the course will focus on long-run issues: economic growth and microfoundations of unemployment and consumption. Upon completion of this course, students should be capable of an informed analysis of recent macroeconomic debates and should be prepared for upper-level electives on a variety of macroeconomic subjects.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300**

ECON308 Healthcare Economics

In this course, we examine the United States healthcare system in some detail, with some attention to useful international comparisons. We will start with the questions: What makes healthcare provision different from that of other goods and services? And How are these differences reflected in the structure of the healthcare industry in the United States? We will use our new understanding of the U.S. health system to evaluate various reforms that have been proposed. Other questions that we will address include, What is health? How is it measured and valued? What do we get for the money that we spend on health care? And How do we decide whether what we get is a "good value" or not?

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **(ECON300 AND ECON301)**

ECON310 Environmental and Resource Economics

This course features an analytical study of the major theoretical and applied issues of environmental economics and resource management. Topics will include the fundamental underpinnings of externalities, alternative control strategies, uncertainties, long-term environmental concerns, and resource

utilization across a finite globe. Applications will be gleaned from a vast array of issues, including clean air and water legislation, acid rain, carbon dioxide and chlorofluorocarbons, global warming, and other global environmental change phenomena.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON311 Behavioral Economics

This course is an advanced undergraduate treatment of behavioral economics. Behavioral economics is the study of human behavior that falls outside of the standard model of perfect rationality, pure selfishness, and exponential discounting. The objectives of this course include the following: (1) review the standard economic model; (2) show empirical evidence (both experimental and observational) that deviates from the standard model; (3) discover new models of decision making that better explain behavior in certain areas; and (4) learn about best practices in data collection and analysis. Course work will include readings of economics research papers as well as textbooks, along with problem sets with both theoretical and empirical aspects. Students will participate in classroom experiments and, as part of a final project, will write a behavioral economics research proposal.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300 AND ECON301**

ECON315 Labor Economics

This course will survey the economics of labor markets with a focus on the determinants of labor supply and labor demand. Other topics will include the returns to education, globalization, automation, pay gaps, and the minimum wage.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300 AND ECON301**

ECON316 Urban Economics

This course uses economic methods and perspectives to analyze urban issues. The first half of the course has a more theoretical focus; the second half, a more applied and empirical focus. Topics covered include how and why cities arise and develop and how their growth or decline is affected by various events. Policy areas studied in the second half of the course include regional development and zoning, housing programs and regulations, antipoverty programs, local public finance, development of transportation systems, education, and crime.

Offering: **Host**

Prereq: **ECON301**

ECON319 Low-wage Labor Markets - A Data-driven Exploration

This course is a data-driven exploration of low-wage labor markets providing students with the skills to work independently on a major project of their own design. In the first half of the course, students will be introduced to several data sets including the Panel Survey of Income Dynamics, the Current Population Survey, and the National Longitudinal Studies of Young Men and Women. During that time, students will also be introduced to useful resources for exploring research topics and will begin to craft research questions. In the second half of the course, students will design and complete their own research papers using the data sets and research resources introduced in the first half of the course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301 OR ECON302**

ECON321 Industrial Organization

This seminar focuses on game-theoretic and empirical research in several topic areas: extensions to the model of perfect competition, investment and preemption, network effects, and vertical interaction.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON322 Public Finance

This course analyzes the government's influence on economic efficiency, resource allocation, income distribution, and economic growth. The course covers government spending, regulation, and tax policy. Concepts discussed include tax incidence, public goods, market imperfections, and externalities. Reference is made to issues of health care and environmental issues, welfare reform, the U.S. tax system, the federal budget, and the Congressional budget process.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON323 Media Economics

This course covers the economics of entertainment and news both in their traditional forms (newspapers, magazines, radio, television) and their social media manifestations (social networks, media sharing, discussion forums, blogging). It uses economic analysis to understand the structure of media industries, the characteristics of media products, the effects of regulation in media markets, and changes brought about by digital technology.

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300 AND ECON301**

ECON327 The Global Firm: A Calderwood Public Writing Seminar

Students will combine their knowledge of economics, including macro, micro, and quantitative methodologies, with their skills at exposition in a journalistic format, in order to address current economic issues related to firm-level decisions (e.g., where to locate production) and the economic consequences of these decisions at home and abroad for different shareholders. Students will conduct independent research to produce weekly articles. Assignments may include coverage of journal articles, book reviews, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301 AND ECON 302**

ECON328 Investment Finance

This course explores theoretical and empirical aspects of investment finance. Topics include portfolio theory, portfolio evaluation, and asset pricing models for equities, bonds, and options.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON329 Corporate Finance

The course aims to develop an understanding of the applications of the principles of economics to the study of financial markets, instruments, and regulations. The objective is to provide an understanding of the theory of corporate finance and how it applies to the real world. Students will work with financial data and case studies to explore the potential and limitations of financial theory in dealing with real-world problems.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON330 The Multinational Enterprise

An examination of the economic consequences of the globalization of markets and industries will be used as the foundation for discussion of firm-level responses, focusing on foreign direct investment and corporate strategy.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON302 OR ECON301**

ECON331 Open-Economy Macroeconomics

The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Prereq: **ECON302**

ECON341 Money, Banking, and Financial Markets

This course applies macroeconomic theory and econometric tools to selected topics in money, banking, and financial markets. The course will cover monetary policy, financial crisis, financial regulation, and the role of financial development in economic growth. Students will replicate the key empirical results in the literature throughout the semester and, toward the end of the semester, write an empirical paper of their own. Proficiency in statistical softwares (e.g., Eviews or Stata) is required.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON302**

ECON347 Transmission Mechanisms of Monetary Policy

This course applies macroeconomic theory and econometric tools to evaluate the empirical evidence on the timing and effect of monetary policy decisions on the economy. The course will cover interest rate, asset price, credit, and unconventional transmission channels of monetary policy. Students will read about, evaluate, and replicate key empirical results in the literature throughout the semester and, toward the end of the semester, write an empirical paper of their own. Familiarity with statistical softwares such as Stata is helpful.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300 AND ECON302**

ECON348 Equilibrium Macroeconomics

Since the 1970s, macroeconomics has witnessed a methodological shift away from models based on relationships among aggregate variables in favor of models based on optimizing individual behavior in multiperiod settings. This course will develop skills and introduce concepts and techniques necessary to understand these models. Likely topics include the Solow growth model, dynamic consumption theory, the equity-premium puzzle, and real-business-cycle theory. This course introduces some graduate-level material and makes intensive use of mathematics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON302**

ECON349 Economic Growth

What causes differences in economic performance across countries? Why are some nations much wealthier than others? What is the role of politics in the growth process? We will examine this set of questions with the aid of formal growth theory, political theory, statistical analysis, and an in-depth discussion of various country cases. Topics covered include the role of savings and technology in economic growth, democracy and growth, growth miracles, and economic policy reform.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON302**

ECON352 Political Economy

This course introduces the tools of rational-choice and evolutionary game theory and applies them to the study of social interactions with both political and economic elements. This study concerns the distinction between public and private elements of social life. Topics covered include the economics of lawlessness and the emergence of property rights, the economic nature of the

state, effects of political structure on economic development, and the economic determinants of democracy and dictatorship.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON353 American Economic History

This course focuses on 19th- and 20th-century U.S. economic history. The course emphasizes the application of economic tools to the analysis of U.S. history. In addition, it aims to provide students with a sense of the historical dynamics that have shaped the contemporary economic system. Rather than providing a general survey of the economic history of the entire period, the course will focus on topics including cyclical fluctuations, the evolution of the monetary and financial systems, immigration, labor markets, and the role of government policy.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **(ECON300 AND ECON301) OR (ECON300 AND ECON302)**

ECON354 Institutions

Neoclassical economic theory has relatively little to say about the problem of economic organization, how the economic activity of individuals is structured and governed by a complex network of social institutions that includes the law of property and liability, informal codes of morality and fair dealing, and formal organizations. This course attempts to address this imbalance by examining the origins and historical development of two of the most important of these institutions, firms and states. Why do firms and states exist? What functions do they perform in economic systems? How do they arise, and how do they change over time? In considering these questions, students will be introduced to several contemporary alternatives to neoclassical analysis, including the institutional, Austrian, public-choice, and constitutional approaches to the problem of economic organization. All of these traditions have both a rich history and an active research community, and readings will include both classic texts and modern scholarship in each of them.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON356 American Macroeconomic Policy

What can history teach us about macroeconomic policy? This course will use American macroeconomic history from 1870 to the present to explore key issues in macroeconomic policy which remain relevant today. We will both extend the theoretical frameworks presented in ECON302 and delve into the empirical literature on both historical and contemporary monetary and fiscal policy. Students will produce an original, independent research paper on a topic relating to macroeconomics. Previous completion of or concurrent enrollment in ECON385 is useful though not required.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON300 AND ECON302**

ECON357 Topics in European Economic History

This course emphasizes the application of economic tools to the analysis of European history since the Industrial Revolution. Much of the course will center on Britain, although the experiences of France, Germany, Scandinavia, and other countries will also be discussed. Rather than providing a survey of all of modern European economic history, the course will focus on topics such as

industrialization, demography, the evolution of money and capital markets, and cyclical fluctuations.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **(ECON300 AND ECON301) OR (ECON300 AND ECON302)**

ECON358 History of Economic Thought

This course explores the major ideas of the classical school of political economy as developed by its central figures and traces the unfolding legacy of these ideas in the history of economic thought. For each author studied, the goals will be to understand the arguments presented on their own terms, interpret those arguments in the terms of modern economic theory, and consider their contemporary empirical relevance.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON302 OR ECON301**

ECON361 Development and Labor in Latin American Economies

This upper-level elective course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and various ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at time on evidence from across the world with which to compare the Latin America region.

In this course, students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss them and work on individual or group projects and also have to produce their own research paper. Basic quantitative methods will be taught throughout the course, relating to the economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **[ECON 300 AND ECON 301] OR [ECON 300 AND ECON 302]**

ECON362 Japanese Economy

This course will use modern macroeconomics and economic history of Japan to shed some light on important questions in macroeconomics. Students will read empirical macroeconomics research not only on Japanese economy but also on the United States and other countries to develop a sense of empirical research in macroeconomics. The course will also emphasize the major developments of macroeconomic policy in Japan since the Meiji Restoration to appreciate the role of history in understanding contemporary macroeconomic policy debates.

ECON366 The Economics of Developing Countries

This course presents an examination of the characteristics of developing economies and an evaluation of various policies to foster development. Specific topics include health, education, savings and credit, microfinance, insurance, and institutions, with particular emphasis on experimental and quasi-experimental methods of rigorous evaluation.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301 OR ECON302**

ECON371 International Trade

This course examines the causes and consequences of cross-border flows of goods and services. We will investigate various theories of international trade and discuss the empirical validity of their predictions. Particular emphasis will also be placed on the motives for countries to restrict or regulate trade and the institutional arrangements governing the world trading system. Moreover, we will discuss how trade between countries can shape economic development. Over the course of the semester, we will also address numerous controversial issues with regard to international trade. Examples include the impact of trade on the environment, labor standards, wages, jobs, and inequality.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON381 Advanced Game Theory

This course is a quantitative introduction to game theory and its applications to economics. This means the application of algebra and logic to solving formal models of strategic situations. Topics will include strategic and extensive form games, pure and mixed strategies, Nash equilibrium, subgame perfect equilibrium, games of incomplete information, formation of expectations, collective action games, evolutionary games, and the suitability of equilibrium concepts. Examples will be drawn from bargaining, auctions, market competition, employment markets, voting and collective choice, and other areas. In-class experiments as time permits.

Offering: **Host**

Gen Ed Area: **SBS-ECON**

Prereq: **ECON301**

ECON385 Econometrics

Econometrics is the study of statistical techniques for analyzing economic data. This course reviews multiple regression and develops several more advanced estimation techniques. Students work on individual research projects and learn to use econometric software.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Prereq: **(ECON301 OR ECON302) AND (MATH221 OR MATH223)**

ECON386 Introduction to Forecasting in Economics and Finance

This course is an introduction to forecasting widely used by economists; forecasts are constantly made in business, finance, economics, government, and many other fields, and they guide many important decisions. The course focuses on core modeling and forecasting methods that are very widely applicable. We first introduce several fundamental issues relevant to any forecasting exercise, and then treats the construction, use, and evaluation of modern forecasting models.

Students work on individual research projects and learn how to build and use forecasting models.

EDUCATION STUDIES (EDST)

EDST110F Writing about Teaching: An Exploration of American Educational Ideals through Writing and Film (FYS)

This seminar explores conceptions of teaching and learning through examination of fictional, ethnographic, and documentary accounts of teachers and their work. We will examine the portrayal of teaching in literature, creative nonfiction, journalism, and scholarly field research, as well as in film. What do these forms of representation tell us about cultural perceptions of schooling, teaching, and learning in the 20th and 21st century? What can we learn from close analysis of the ways in which authors use words and images to portray teachers and students? Participants in this seminar will have the opportunity to reflect upon their own perceptions of teaching and learning, to ground those perceptions in a philosophy of education, and to explore the ways in which writing well about teaching, from many disciplinary perspectives, can impact the profession and our

understanding of the enterprise of teaching and learning. Students will practice a variety of modes of writing (critical and analytical essays; personal essays; creative writing; brief ethnography and Lightfoot's social science "portraiture" method) and analysis of both writing and film, as well as visual thinking strategies and techniques for observing and documenting cultures of learning.

Prereq: **None**

EDST114F Why You Can't Write (FYS)

As anyone who has ever sat at a keyboard knows, writing can be frustrating. And intimidating. Even the most successful writers often doubt themselves and feel frightened of the blank page. As John Warner points out in his 2018 book "Why They Can't Write," schools and other institutions often stress approaches to writing that seem designed to limit rather than enable a writer's skill and creativity. In this First Year Seminar, students will explore and develop their writing strengths as we join scholars and thinkers like Warner in investigating what writing means and how it functions both inside and outside of higher education. Reading widely in composition studies, rhetorical studies, literacy studies, and critical university studies, students will explore ideas about the writing process and practice, multilingualism, code-meshing, and pedagogy that will require us to consider the purpose of education and communication quite broadly. Students can expect to write weekly reading responses, produce a personal literacy narrative, develop writing assignments, and practice conducting research during the semester.

EDST140L Teaching English as a Second Language

This course explores theories and teaching methods related to learning English as a second language (ESL). Students will critically examine current and past "best practices" for teaching ESL and the seminal theories they are based on. In addition, we will discuss the various needs of English language learners coming from a variety of social and cultural backgrounds, at varying levels and varying ages. As a service-learning course, students will have the opportunity to actively work with ESL students at the Woodrow Wilson Middle School. They will be asked to apply the theories and pedagogical techniques they are learning to their sessions at the school and reflect on their experience. They will also critique ESL textbooks, give teaching demonstrations, and develop an activities resource for all of the ESL tutors.

EDST202 Pedagogy for Teaching English to Speakers of Other Languages Tutors

This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the U.S. every year. Students enrolled in this course will gain practical experience by committing to volunteering at Middletown public schools while taking this course and are encouraged to continue their service afterward. There is a volunteering commitment of 2 hours/week minimum during the semester.

EDST205 English Language Learners and US Language Policy

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the U.S. legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

EDST230 Schools in Society

What role have schools played in the evolution of American Society? What role could/should they play, going forward? This course takes a topical approach to these questions. We will explore the relationship between schools, democracy, and social progress; take a close look at race and racism in America's schools; learn how schools work in terms of policy, governance, and funding; and critically analyze the effects of many waves of educational "reform," including the current movement towards school privatization. While the focus is on the American school system, our perspective will be enlarged by comparison between this system and other approaches to education around the globe.

EDST310 Practicum in Education Studies

This seminar is intended to help students develop the skills to learn from experience in educational settings, through rigorous reflection, analysis, scholarly inquiry into educational questions, and action/implementation of new ideas. It is designed for students with previous coursework in education, experience in educational settings, or both. Students will be placed in a variety of educational settings in the community and each student will craft an independent study, with ongoing guidance from the professor and from

the group, related to their placement. Class sessions will be seminar-style with students sharing and workshopping their studies and their practice. There will be group readings on aspects of education studies including reflective practice, classroom ethnography/teacher research, and observational techniques, but students will also develop individualized reading lists according to the focus of their independent study. In addition to ongoing written work in the form of analytic journals and critical reading synopses, students will complete an individualized final paper or project integrating their research and experience over the semester, and give a final presentation.

ENGLISH (ENGL)

ENGL113 A Nation of Immigrants?

America is a nation of immigrants. This ideological epithet has come to define the American experience as one of opportunity, advancement, and national incorporation. This course will interrogate the popularity of this story: How did the American experience become defined through an immigrant experience? What experiences does this narrative absorb and what experiences does it erase?

To answer these questions, we will practice close reading, critical thinking, and consistent writing in order to exhume narratives embedded in a variety of texts such as legal documents, political speeches, poetry, social movements, and short stories in order to explore how this particular American experience is constructed, deconstructed, and reconstructed in the social and cultural imaginary. The first part of the course will historicize the narrative of "America as a nation of immigrants" and investigate how it developed throughout the 20th century. We will then consider what stories this national narrative mutes by exploring how contemporary writers take up, challenge, and change the story of America as a nation of immigrants.

ENGL131 Writing About Places

This course is one in a series called "writing about places" exploring the long tradition of writing about travel and places and changing attitudes toward crossing cultural and geographical borders. Readings will focus largely on the writings of 20th-century travelers and will include an examination of the phenomenon of migration. We will examine historical and cultural interactions/confrontations as portrayed by both insiders and outsiders, residents and visitors, colonizers and colonized, and from a variety of perspectives: fiction, literary journalism, travel accounts, and histories. Writing assignments will include critical and analytical essays and will encourage students to examine their own experiences with places and cultural encounters.

ENGL135 Writing about Research: U.S. Style

This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

ENGL140F Literature, Laughter, Philosophy: Tristram Shandy (FYS)

Laurence Sterne's novel, *THE LIFE AND OPINIONS OF TRISTRAM SHANDY, GENTLEMAN* (1759-67) has been described as a literary masterpiece, a hilarious satire, a sentimental tear-jerker, and an obscene abomination. Thomas Jefferson thought it formed "the best course of morality that was ever written"; it was a favorite of Karl Marx and Friedrich Nietzsche; and it was even heralded (in a recent film adaptation) as "a postmodern classic written before there was any modernism to be post about." The book is deeply learned--engaging texts from skeptical philosophy to 18th-century science and from Hamlet to early novels. It is also, indisputably, very odd: Though Tristram is trying to tell the story of his life, he fails to get himself born in the first hundred pages, and the text is full of doodles, blank pages, madcap digressions, and missing chapters. In this course, we will read *Tristram Shandy* alongside the many, many texts it references, borrows from, and mocks, as well as the many, many texts it has influenced. Throughout, we will take *Tristram Shandy* as our rich test case for some fundamental theoretical questions. What is literature, and why do we tell stories anyway? How is literature related to philosophy? How do our minds work? What is the meaning of human life--of laughter, learning, sex, and death?

ENGL141F Slavery, Latifundio, and Revolution in Latin American Literature and Cinema (FYS)

In this course, we will study literatures and cinemas of Haiti, the Dominican Republic, Mexico, Guatemala, Puerto Rico, and Cuba that depict insurrectionist and revolutionary ruptures that take place on plantations, latifundios, and other spaces beyond what those formations could capture. We will study how insurrections (plural), revolution (as a large scale phenomenon), and (sometimes archivally elusive) racialized female insurgencies are deployed by Caribbean and Latin American literary imaginations to critique the dangerous economic situations in the early 20th century of U.S.-backed client states--referred to dismissively in the United States as "banana republics" after the United Fruit Company converted U.S. naval ships into cargo boats that would import exploitatively planted and harvested bananas--and the schemes of "underdevelopment" that aligned with expanding U.S. hegemony in the hemisphere. We will engage narratives, poetics, and music of revolution that expose different systems of oppression, and different scales of radical motion, including the range of events and phenomena in Hispaniola that aggregate as the Haitian Revolution of the late 18th century, insurrections in Chiapas against *casta* and *latifundio* before and after the Mexican Revolution of 1910, and revolts against U.S. economic and military interventions in Guatemala, Puerto Rico, and Cuba in the 20th century. We will attend to the aesthetic, formal, and structural ways that revolutions are (re)presented as vertical ruptures that explode the past, and as horizontal historical formations that continue select legacies of the past that they claim to critique. While we're at it, we will deconstruct revolutionary progressive discourses of hetero-masculinity, modernity, and development. We'll sense for smaller scales of varied aesthetic, sensorial, and slow forms of something in the neighborhood of revolutions.

ENGL152F The Armchair Adventurer (FYS)

At the turn of the 20th century, stories of travel, action, and adventure enjoyed enormous market success and cultural prominence. This course examines the interaction between the adventure stories told in popular genre fiction--science fiction, historical romance, detective novels, children's literature, stories of overseas adventure, etc.--and their "high" literary cousins. We will read classic works of genre fiction in order to understand the appeal of these stories and storytelling modes, for both writers and readers, and to identify their generic structures, plots, and premises. And we will examine how prestige-oriented fiction drew from, adapted, and altered these conventions.

ENGL153F Ethnicity, Race, and Religion in the Middle Ages (FYS)

This course concerns the invention of premodern ideas of ethnicity and race. Our focus will be on a selection of medieval texts dealing with the encounters--real and imaginary--of Western European Christians with other cultures, from the Celtic borderlands to the Mongol Empire. The readings will begin historically with

the Crusades and the (often grisly) chronicles written by Christian, Muslim, and Jewish authors. Other genres will include religious polemics, autobiographical narratives of religious conversion, and travel accounts by missionaries, spies, and colonial propagandists. We will also read some later "romances" that re-imagine the crusades in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasy.

ENGL154F Maps, Globes, Moons: Renaissance Worldmaking (FYS)

When Margaret Cavendish wrote of her desire to be "authoress of a whole world," she voiced an era's fascination with the idea of the world. Spurred by Galileo's discoveries about the cosmos and reports from what Europeans called "the New World," writers and readers in the Renaissance sought new ways to chart this world--and to imagine other worlds. In this course, we will read stories of global exploration, utopian fantasy, and moon travel. We will also examine early modern maps and atlases in Wesleyan's Special Collections and Archives. In doing so, we will ask the same questions as writers such as Cavendish: What is the world? What are its limits? And is it possible to go beyond them?

Offering: **Host**

Grading: **OPT**

ENGL155F Utopian Planning from Plato's Republic to UFO Cults (FYS)

What does the perfect society look like? What are the barriers to realizing it? For centuries, schemers, dreamers, and radicals have turned to fiction to imagine the answers to these questions. In this course, we will look at the long history of texts that imagine ideal societies, beginning with Plato's Republic, moving through its Renaissance revivals, and concluding with 19th- and 20th-century texts that turned the language of utopia to address issues of gender, class, and race. We conclude with a section on the realization of utopia, in which we read literary works that imagine the barriers and follies that accompany attempts to put these plans into reality and look at examples of groups--cults, convents, and communes--that have attempted to create utopian communities. We will even head to the Shaker village in nearby Enfield, Connecticut to see the remains of a 19th-century utopian experiment.

ENGL163F Literature of London (FYS)

This course examines the role of London in the literary imagination of 19th-century Britain. A vibrant multiclass and multiethnic jigsaw puzzle, London was a "world city" at the center of the empire, the seat of crown and parliament, and a place of both danger and opportunity. In addition to being the economic and political center of Great Britain, some authors viewed London as the nation's narrative center as well. Together, we will explore how writers depicted the city, how they envisioned the relationship between urban living and modern life, how they understood London's inhabitants and their plots, and how they placed the city in networks of stories reaching around the world.

ENGL175F Staging America: Modern American Drama (FYS)

Can modern American drama--as cultural analysis--teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

ENGL190F Place, Character, and Design: Techniques in Writing Nonfiction and Fiction (FYS)

We begin this writing course with questions central to students' work in both nonfiction and fiction: how to establish characters and a narrator's voice and how to frame the spatial and emotional world of the piece. The course encourages students to explore questions of design and structure while focusing also on style and technique at the sentence level. This creative writing course explores features of narrative and design that are central to work in fiction and creative nonfiction. We will also compare the design of college papers, written for academic courses, with pieces written for general readers. Readings include works by writers interested in these questions, including, in fiction, Andre Aciman, Vladimir Nabokov, Henry James, Robert Stone, Deborah Eisenberg, and Edward P. Jones, and, in nonfiction, Brian Doyle, Junichiro Tanizaki, Joan Didion, Charles Bowden, Mark Doty, Linh Dinh, Dubravka Ugresic, and George Orwell.

ENGL201C Ways of Reading: Texts and Territories

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems,

novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will deal with issues of territory and land in literary texts from the 12th century to the 21st century. We will focus on questions both of how texts negotiate their places and how specific territories generate texts.

Offering: **Host**

ENGL201D Ways of Reading: Reading for Genre: Form, History, Theory

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will explore the three major genres of literature: poetry, drama, and prose narrative. We will examine their building blocks, or basic elements, and seek to understand how individual works of literature exemplify, reveal, and experiment with them. We will attend to formal and theoretical matters ranging from the operation of words to the patterns that structure poems, plays, and plots. We will ask how literary texts respond to, represent, and capture both literary history and their historical moments by depicting their time and place and by participating in debates about art and society. Throughout, our emphasis will be on the rigors and pleasures of close reading, sustained and detailed textual analysis. We will strive to cultivate the lively, generous, nourishing, and ennobling engagement that S. T. Coleridge had in mind when he said nearly 200 years ago that "the poet, described in ideal perfection, brings the whole soul of man into activity."

ENGL201H Ways of Reading: Influence, Imitation, Invention

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will consider how texts respond to one another and to the world, imitating and rebutting what has come before. Looking particularly at how authors deploy generic and stylistic strategies to do this, we will examine works that use realism to imitate the world as well as those that break with such

ways of seeing. As we read, we will develop a set of technical and conceptual approaches to various literary genres to generate a facility and ease with close reading. At the same time, class materials will demand we recognize the influence of historical, geographic, and social contexts on the production and reception of works of literature. Therefore, as responsible readers, we will combine attention to a text's formal properties with an awareness of its relations to worlds outside the text.

ENGL201J Ways of Reading: Literary Form and Forms

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course focuses on the techniques of interpretation, beginning with words and tropes like metaphor and metonymy and advancing to narrative theory. It introduces students to different theoretical approaches to the text, including formalist, psychoanalytic, cultural, and new historicist studies.

ENGL201K Ways of Reading: Borrowing and Stealing: Authorship and Originality in Literature

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will explore the meaning of authorship and originality in literary study. What does it mean to be original within a literary tradition? How do genres retain their coherence while also enabling originality? When does inspiration become plagiarism? Where do we draw the line between borrowing and stealing in literature? What legal, ethical, and historical frameworks help us to distinguish between them? How do such norms vary across genres and

media? This course will focus on the different ways that poetry, fiction, and drama foster the recirculation of particular plots, figures, and formal structures while still maintaining the value of originality. We will pay particular attention to the crises of authorship that mark what Walter Benjamin famously called the "Age of Mechanical Reproduction." But we will also look at the central role that borrowing and rewriting has played in the very constitution of the idea of a literary tradition.

ENGL201L Ways of Reading: Forms of Difference

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will focus on the politics of literary form--that is, how literary form and content work together to produce arguments about the social world. We will pay special attention to how 20th- and 21st-century writers use literary form to explore, illuminate, negotiate, and challenge categories of social difference, including race, gender, and sexuality. In addition to practicing techniques of close reading on a range of texts from different genres, we will also read literary criticism from a variety of theoretical and political perspectives--psychoanalytic, feminist, postcolonial, historicist, etc.

ENGL201N Ways of Reading: Adaptations: From Page to Stage

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course investigates dramatic adaptations that have originated from poetry, short stories, novels, and historical events. Through multiple modes of inquiry, we interrogate form, genre, narrative, aesthetic, and intended audience as well

as the social, political, gender, sexuality, and/or racial context of each literary piece. Within these various "page to stage" adaptation processes, we track the evolution of our source texts and chart the longevity and changeable dynamics of elements, such as character, theme, plot, point of view, setting, and time, as they appear within each dramatic iteration.

ENGL201P Ways of Reading: Autobiography

"Ways of Reading" introduces students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major, and only one of the ENGL201 series may be taken for credit.

"Ways of Reading" courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry, drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays; but also in political speech, in popular culture, and in the discourses that shape everyday life.

Attending closely to the transformative properties of figurative language and the structuring principles of narrative, in this "Ways of Reading" course we will consider how language creates a life. We will begin with the lyric poetry and prose memoir of Lucille Clifton, and will encounter similar pairings over the course of this semester. We will explore the formal dimensions of lyric poetry by analyzing the ways that figurative language simultaneously compresses and expands meanings, the significance of where one line ends and another begins, and the creation of a speaker and addressee. When reading prose, we will study larger structures of meaning, and learn how to track the accretion of detail over many pages, and will explore our expectations for how a first-person account should be structured. Throughout, we will be exploring how literary language represents a human life.

ENGL201R Ways of Reading: Sound Sense, Nonsense, and Language's Radical Desires

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

How do we listen to a text? How do we articulate the sensory experiences of music? What shapes do we imagine when we imagine listening so closely that the feeling of listening goes bone-deep? How do we explain, describe, and put into language the feeling of how we approach a text, object, performance, etc., aurally? What does listening have to do with improvisation? With something like freedom? How does the visual appear sonically, and what is its relationship to constraint, to un-constraint? How do we imagine a relation between the practices of close reading and methods of (brown and black) sound studies?

This Ways of Reading course is dedicated to a sonically playful displacement of the technique of close reading into a synesthetic, or multisensorial and improvisational, "poetic listening." The field of this Ways of Reading course is marked on some sides by what Fred Moten calls "philosophy's color line" or "the problem of feeling" (In the Break 77), and by what Jacques Derrida calls "the problem of the cry--of that which one has always excluded, pushing it into the area of animality or of madness ... and the problem of speech (voice) within the history of life" (Of Grammatology 166). We will engage texts by a range of minoritarian and queer writers who compose an American poetics that makes a lot of sounds, has a lot of problems, and opens swishy, stiff, curvy, porous, disturbing, and bent pleasures. Rhetoric, prosody, literary terms and devices, and genre will help us along this path of study.

ENGL201T Ways of Reading: Literature About Literature

Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will explore the methods, meanings, and very purposes of literature by reading literature about literature--literature written by authors in their most playfully self-aware and self-interrogating of moods. In one of her novels, Jane Austen celebrates the pleasures and dramatizes the perils of novel reading, and an array of 20th- and 21st-century fiction writers sound similarly self-referential--if slightly more self-defeating--notes. Poets from Edmund Spenser and Alexander Pope to W. H. Auden and Billy Collins have written poetry about poetry, and both Shakespeare and Tom Stoppard write imaginative plays that raise questions about the nature and limits of imagination. We will attend to the different ways that these authors imagine the purposes and possibilities of literature, developing a nuanced sense of literature as a culturally specific phenomenon that fulfills constantly changing needs and desires. Throughout, our emphasis will be on the practice of close reading, on careful attention to how texts construct meanings and make demands on readers.

ENGL203 American Literature from the Colonial Period to the Civil War

This lecture course marks a path through American literature, moving from European fantasies and narratives of the conquest of the New World to representations of slavery, industrialization, and U.S. national expansion. We will begin by considering the role of "America" (both the idea and the real continents) in world history; the questions we raise will return often as we look closely at the literature. Whether sermon, imperial report to the metropole, memoir, poem, or novel, the forms of our texts differentiate them as much as their content sometimes unites them; therefore, we will examine the consequences, both political and aesthetic, of literary conventions. We will pay special attention to the relationship between texts and images (illustration, painting, iconography).

ENGL203A American Literature on Fire: Conquest, Capitalism, Resistance: 1492-1865

We begin with a 1938 Langston Hughes poem, a north star shining light on American unexceptionalism and then move back in time: from Columbus's dismemberment and enslavement of the Arawaks when demanding gold; to Cabeza de Vaca's feel-good handbook for the conquest of indigenous peoples; to Puritan inventions of a "God" that pulls the trigger; to Franklin's blowing the whistle on a mercantile capitalism he supercharged with a secular work ethic; to a Declaration of "Independence" in 1776 that provoked alternative declarations written by workers, women, and ex-slaves in the 19th century; to Poe's readings of a Divided States of America (race, gender, domesticity) as gothic; to Douglass's representations of the tactical artfulness of slave culture; to Hawthorne's

deconstruction of the Americanization of power; to Thoreau's entwining of collective protest and what he hoped would be an individualized escape route; to Melville's attacks on imperialism, racism, and class domination; to Elizabeth Stuart Phelps's critique of domestic slavery; to Stowe's socially transformative antislavery novel (whose sentimentalization recirculated stereotypes). During our literary-intellectual time travel, we will engage some of America's most "on fire" writers who make possible insights into the ideological foundations of American cultures, identities, and hegemonies that provocatively illuminate America's situation today (and offer some lessons for how to change it).

ENGL204 American Literature, 1865--1945

Together we will explore not only the complexities of American literature from the 1860s to the 1940s but how this literature excels as a usable critical resource that can advance our understanding of how America has "ticked" as a culture; a socioeconomic system that established and sought to maintain class, gender, and racial difference; and a political power structure. In our ongoing analyses of the relationship of literary form and social form, we will trace connections between historical developments such as the gothic genre and gender ideologies, domestic romance and the social reproduction of labor, realism and mass-urbanism, naturalism and immigration, and modernism and imperialism. The creative works of Emily Dickinson, Elizabeth Stuart Phelps, Fanny Fern, Mark Twain, Stephen Crane, Henry James, Charlotte Perkins Gilman, Charles Chesnutt, F. Scott Fitzgerald, Langston Hughes, Meridel Le Sueur, Ernest Hemingway, Eugene O'Neill, Nathanael West, William Faulkner, Richard Wright, and Zora Neale Hurston will help equip us to be more imaginative readers of literature, ourselves, and America. This literature offers us expansive insights into what was at stake in America's production of "the modern." We will experience the aesthetic pleasures and critical pleasures of reading great writing.

ENGL204A American Literature, 1865--1945

This course considers the way a large range of American writers responded to the industrial transformation of the United States. We will look at the way writers conceived and understood the rise of the corporation, the growth of the metropolis, the surge of migration, and the expansion of American power through war and settlement, and we will consider the way such visions related to the writers' understanding of the nature of American culture and the significance of literary expression. Among the authors discussed will be William Dean Howells, Charles Chesnutt, Henry James, Mark Twain, Stephen Crane, Sarah Orne Jewett, Mary Wilkins Freeman, Kate Chopin, Edith Wharton, Frank Norris, T. S. Eliot, Willa Cather, F. Scott Fitzgerald, Langston Hughes, Ernest Hemingway, Jean Toomer, and Richard Wright.

ENGL205 Shakespeare

This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious,

and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of their plays by examining their cultural contexts.

ENGL206 British Literature in the Enlightenment: Individualism, Consumer Culture, and the Public Sphere

England was changing rapidly in the 17th and 18th centuries. Indeed, it is often said that this period was crucial for the emergence of individualism, consumer culture, and the public sphere--for the modern world itself. The period is sometimes described as the Age of Reason, but it was also an age of bawdy laughter, intense emotion, brazen self-promotion, serious faith, and gossip in coffeehouses and magazines. It was an age, too, of flourishing marketplaces, imperial expansion, slavery and abolition. This course will track how literary writers celebrated, condemned, participated in, or simply tried to make sense of their changing moment (and the changing understandings of literature available in it).

ENGL207 Chaucer and His World

In this course, we will read Chaucer's fascinating dream-visions, *The Book of the Duchess* and *The House of Fame* and his best-known work, *The Canterbury Tales*. We will also read selections from Chaucer's sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer's poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer's reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

ENGL209 From Seduction to Civil War: The Early U.S. Novel

This course examines the relationship between nation and narrative: the collective fantasies that incited reading and writing into the 19th century. We will study the novel as a field of literary production both in dialogue with European models and expressive of changes in national culture, a form that both undermined and reinforced dominant ideologies of racial, gender, and class inequality during this turbulent period of national formation and imperial expansion. We will consider the ways the pleasure of novel-reading depends upon, even as it often disavows, the world outside the story. Throughout our reading, we will trace the ways these novels both reflect and participate in the historical development of the United States during a period that spans national founding, the consolidation of northern capitalism and an exacerbated North/South division, expansion into Mexico and the Pacific, and civil war. Through close attention to literary form, we will continually pose the question, What is the relationship between literary culture and historical change? We will examine who was writing, for whom they wrote, and the situation--political, commercial--in which the American novel was produced and consumed. We will begin with the novel of sentiment and seduction and conclude with reflections on slavery and racial revolution on the eve of the Civil War, all the time asking about the ways the novel might seduce us into either tolerating or resisting the way of the world.

ENGL210 The Rise of the Novel

The novel as we know it emerged in 18th-century England. The real questions are, how and why? Were novels first written by white men, expressing the attitudes and capitalizing on the reading practices of an emergent middle class? Or did they evolve from a somewhat less respectable tradition of romance writing by and for women? Did novelistic prose draw on scientific and economic discourses as it naively sought to present a realistic picture of the world? Or was the genre playfully self-aware, from its very origins, of the difficult relationship between reality and language? This course will explore some of the complexities of the rise of the novel, one of the most important and oft-told tales of literary history. As we read fictions full of criminals, love letters, scandals, and satirical self-referentiality, we will think about the differences between early novels and the not-quite novels that preceded them. We will focus on how novels work through plot, character, and realistic prose, but we will also consider how critical narratives like the rise of the novel work. How do these narratives help us, as novel readers today, understand our relationship to the past and to the novel as a form?

ENGL212 Edgar Allan Poe and Literary Culture

Edgar Allan Poe is best known for his grotesque characters and macabre plot-twists. But though Poe seems capable of offering readers only a very specific form of literary experience - dark, brooding, atmospheric - what's striking about his work when taken as a whole is its variety. Poe was a writer of short stories, a poet, a novelist, an essayist, and an editor. He invented the detective story, wrote science fiction, and published tales of romance, family discord, and horror. This course sets out to appreciate Poe's eclectic literary output in the context of the emergent nineteenth-century publishing industry, seeing Poe - whether playing the role of novelist, poet, or critic - most of all as a writer struggling to earn a living in the 1830's and 1840's.

ENGL215 Place, Belonging, and Sound in the 20th c. Latina/o/x, Black, & Caribbean Imaginations--NYC

Throughout the latter 20th century, various aesthetic renderings of New York City have positioned it as a site of voyeuristic allure and racialized excess and pleasure--simultaneously posh, unfriendly, tourist-trapped, "seedy," "gritty," and segregated. Through select literary, cinematic, and performance optics of Latina/o/x, black, and Caribbean writers and artists, especially queer and bisexual writers and artists, this course will focus on memory, representation, form, sound, and the imagination in the layered and shifting site of mid-20th- to 21st-century New York City--and even more specifically, of Harlem, the Bronx, the Lower East Side, Brooklyn, and Elizabeth, N.J. Fictionalizations, poetizations, and performances of first-person memories and reimaginings of overheard stories

from older generations about life in the U.S. South and life in the Caribbean will feature in the works that we will study in this course.

ENGL221 The African Novel I: Nervous Conditions

This class will consider several canonical novels from sub-Saharan Africa. Our focus will be on their aesthetic and thematic properties; the novels are not meant as introductions to African histories, cultures, peoples, or practices. We will explore, instead, the specific subjects and styles of each work in the context of wider debates about orality, language, colonialism, gender, and the novel. To better understand the political and aesthetic stakes of African literary canon formation, we will also attempt to identify what makes a work canonical.

ENGL222 Slavery and the Literary Imagination

Enslavement in America and the New World was inextricably linked to the written word. What, then, does it mean to write the story of enslavement, loss, forced migration, liberation, and restoration? How does one tell the story of enslavement when that effort depends on articulating the unspeakable?

The works and writers examined in this course will prompt students to consider how one revisits history and what is required to imagine, write, and rewrite the stories and histories of people, places, and nations. We will discuss the ways in which specific literary forms enable, contain, and transform unwieldy, complicated, and stunning stories of enslavement, liberation, self-determination, activism, racialization, and nationhood.

Our readings will include an array of well-known, understudied, and newly recovered primary works and materials by and about individuals such as William Wells Brown, Charles Chesnut, Frederick Douglass, Briton Hammon, Jupiter Hammon, James Mars, Pauline Hopkins, Mattie Jackson, Mary Prince, Chloe Spear, and Phillis Wheatley. Additional primary materials will include writings published in 18th- and 19th-century newspapers such as the "Boston Weekly Newsletter," "The Connecticut Journal," "The Liberator," and "North Star."

ENGL223 The African Novel II: After Achebe

Chimamanda Ngozi Adichie's 2003 novel, PURPLE HIBISCUS, summons Chinua Achebe, the "grandfather of African literature," in its opening line: "Things started to fall apart at home when my brother, Jaja, did not go to communion." While Achebe is a formative influence on Adichie and on many other contemporary African writers, the central preoccupations of African literature have shifted considerably in recent years. This class will consider recent topics animating the field. These include debates about Afropolitanism, the role of publication houses and prize committees in the canonization and circulation of texts, queer African literature, African-language literature, and the position of African literature vis-à-vis world literature. Readings will be chosen from among the newest novels and short stories in publication.

ENGL224 Medieval Drama: Read It and Be in It

It was and still is revolutionary theater! This course will examine early English drama in its many forms, from the civic mystery cycles of the 15th century to the morality plays *Mankind* and *Everyman*. We will cover topics including the role of drama in defining communal identities, dramatic interpretations of gender, and the responses of drama to contemporary social and religious controversies. Most readings will be in modernized and annotated Middle English, so we will pay close attention to language.

ENGL225 Darwinian Fictions

This class tracks the discourse surrounding evolutionary science as it circulated through various spheres of American intellectual life in the decades after the Civil War. If the ideas proposed by Charles Darwin and Herbert Spencer fundamentally changed the way scientists and politicians understood the natural world and human beings' relation to it, these ideas would also influence the way writers understood the function of literature. Best summed up by Emile Zola's suggestion that, through literature, we are capable of "possess[ing] knowledge of man, scientific knowledge of him, in both his individual and social relations," authors during this period began to explore the literary possibilities of evolutionary science. By reading works of literature alongside influential scientific treatises, this course encourages students to think about the kinds of knowledge literary experience gives us access to, and the relationship between literary knowledge and other disciplinary forms that emerged at the turn of the twentieth century.

ENGL226 Romantic-Era Extremities: Madness, Revolution, Sublimity, and the Celtic Fringe

This course examines the Romantic fascination with psychological, political, aesthetic, and geographical extremes. We will explore how Romantic writers, who were by turns attracted and repelled by these extremities, found literary means of investigating and representing them. In the process, they refashioned forms such as the Gothic tale and verse narrative, and they reconsidered artistic categories such as sublimity, disorder, and fragmentation. Some questions we will ask include, How did the idea of extremity shape Romantic ideas about literary form? How did various sorts of extremity become aligned with one another? How did writers present the relationship between the center and the periphery, between norm and deviation? Were extreme experiences or states of being, whether individual or collective, aberrant parts of life, or were they intrinsic to what it meant to be human, or to be a society? Did extremity offer wisdom as well as danger, and, if so, how were the two related to one another? Might one grow from extremity toward a maturity that was at once stable and wiser for having ventured into those dangerous places?

ENGL227 Reading The Victorians

Why read the Victorians? To know more about how an industrializing, urbanizing, commercial, and imperial nation imagines itself; to understand better how middle-class culture is established and comes to work all by itself; to explore the power of representations of sexual difference--the famous separate spheres for 19th-century men and women--and of the great divide that opens between the public and the private; to understand how sexuality extends the reach of disciplinary power, and how money, increasingly nothing but paper, extends value. Our primary focus will be on novels. We will study how large Victorian "triple-deckers" project intricately detailed worlds populated with compelling, three-dimensional characters. We will consider how novels represent the way we live now.

ENGL228 Life Writing: Writing About the Self and from Experience

This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.

ENGL229 Afro-Surrealism

Amiri Baraka coined the term "Afro-Surreal" to describe the writer Henry Dumas's "skill at creating an entirely different world organically connected to this one." In his 2009 "Afro-Surrealist Manifesto," D. Scot Miller builds on Baraka's observations and distinguishes Afro-Surrealism from Afrofuturism in the former's concern with the "RIGHT NOW." Indeed, in the "right now" of 2018, Afro-Surrealism seems to be having a moment, with the success of films like "Sorry to Bother You" and "Get Out," the musical and filmic work of Donald Glover/Childish Gambino, the visual art of Kara Walker and Kehinde Wiley, and the literature of Paul Beatty and Colson Whitehead, among others. This course will examine this contemporary resurgence of the Afro-Surreal, and trace its echoes in black popular music, in the work of African American literary figures like Dumas, Toni Morrison, Bob Kaufman, Ralph Ellison, Jean Toomer, and Zora Neale Hurston, and through its African and Afrodiasporic foundations in the work of artists inspired by Léopold Senghor's Négritude movement. All of these artists "distort reality for emotional impact," as Miller puts it, and we will aim to connect these distortions of the "right now" to the material reality of life under regimes of anti-blackness and racial oppression that these Afro-Surreal works lays bare.

ENGL230 Introduction to Asian American Literature

This course introduces students to Asian American literature, literary criticism, and culture by surveying how meanings of "America" have long depended on "Asian America." Conventional understandings of this relationship in US literature and history tend to emphasize Chinese Americans in California, Asian exclusion laws, model minority myths, changing patterns in Asian immigration following relaxed restrictions between 1965-68, and the institutionalization of Asian American studies in higher education in the 1970s. We will pay attention to these contexts, but we will also focus on emergent trajectories, including representations of Asian Americans in the South, critical refugee studies, and how global cultures such as breakdancing stage Asian American self-representation. By examining a range of genres and the critical apparatuses that these works have generated, we will explore how representing Asian America has shaped the making of American culture.

ENGL231 Contemporary Puerto Rican Art and Literature

This course studies the works of contemporary Puerto Rican filmmakers, performance artists, poets, novelists, painters, conceptual artists, musicians and sound artists. Puerto Rico continues to be one of the U.S. military's and its corporate guises' favorite laboratories; its beauty and complexity are part of what filmmaker Beatriz Santiago Muñoz calls a "chimerical ecology." In this course, we will think with this key phrase, "chimerical ecology," and many aesthetic survival strategies generated by contemporary Puerto Rican literature and art. We will consider the many forms of camouflage set into play in this "chimerical ecology," which reveal the multiple forms of destruction at work by the U.S. war machine, the debt crisis, tourism, and other forces, and the forms of resistance, transformation, and life that only art help us sense. How do you prepare to see what is camouflaged? How do you get ready for what you don't know? Can we reshape our sensorium to feel out and make possibilities that capitalism and settler colonialism render impossible? We will study what appears to hide out in language and visual codes, along with the disidentifying discourses, counter-discourses, aesthetics, poetics, and live art forms that transform the sensorial experiences of space. Students who do not read and think in Caribbean Spanishes are very welcome to take this course, but a minimally playfully bilingual attitude is encouraged.

ENGL232 Mystics and Militants: Medieval Women Writers

In this class we will read a wide range of works written by European women between ca. 1100-1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

ENGL233 All Ah We: Contemporary Afro-Caribbean Drama & Performance

What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

ENGL236 The British Modernist Novel, 1900--1945

This course will introduce students to British novels from the modernist period of 1900-1945, a time of massive formal innovation. We will explore the formal, thematic, and philosophical features of British modernist fiction through close readings of novels and through occasional readings in essays of the period and more recent criticism. This course will provide a broad, if necessarily selective, picture of modernist fiction in all its considerable variety. In addition to some iconic examples of high modernism, we will read some arguably minor novels as well. Much of our attention will be on modernism's recurrent concern with the meaning of modernity itself. Are modernism and modernity identical, antagonistic, or mutually dependent? How is modernism implicated in Britain's waning imperial fortunes? Is modernism avant-garde or canonical, elitist or engaged with popular culture?

Offering: **Host**

ENGL238 Contemporary African American Poetry and Its Pasts

In this course, students will engage African American poetry after 1960. Alongside gaining a thorough understanding of the currents of literary history from the civil rights movement through the age of Obama, students will gain an appreciation of what traditions contemporary poets engage. Using *ANGLES OF ASCENT: A NORTON ANTHOLOGY OF CONTEMPORARY AFRICAN AMERICAN POETRY* as the primary text for the course, students will be able to gain a comprehensive overview of the rich literary moment of which they are a part. At the same time, students will explore the meaning of the anthology itself

as a mechanism of canon-making. How does being part of a canon affect the possibilities in one's literary production?

By engaging the traditions upon which contemporary African American poets build their own poetics, students will gain a deeper understanding of the poetry itself. In addition, students will read critical works by the poets as part of their course-work gaining insight into the poets' creative processes. In addition to developing their critical voices through analytical papers, students will have a chance to develop their own poetics through a semester-long poetry collection assignment.

ENGL240 Introduction to African American Literature

This course is a survey of the history and traditions of African American literature from its earliest origins to its most modern manifestations. We will examine, in particular, the poetry, essays, and fiction produced by people of African descent from the 18th to the 21st centuries. The courses will focus on the ways African Americans used literature to document their New World experiences, bear witness to enduring traditions, and shape American society. We will work with poetry, drama, short fiction, essays, and novels, alongside music and visual culture, as we explore African American literary and cultural aesthetics, African American literary history, and issues of class, gender, and place.

ENGL242 Storied Places: Revival, Renewal, and African American Landscapes

Conceptions and histories of place figure prominently and powerfully in African American literary, social, and cultural histories. Writers and artists have used the written word, images, and film to explore issues of presence and absence, claim and trespass, ownership and dispossession, as well as safety and vulnerability. We will use this course to think about how African American writers and artists in particular have used word, image, sound, and movement to highlight the histories of iconic places and terrains and to reclaim erased histories and disappeared bodies. We also will consider how revival and renewal function both as essential tropes and necessary efforts in the work to make African American life and history visible. Readings may include works by Gwendolyn Brooks, Octavia Butler, Langston Hughes, Randall Kenan, Gloria Naylor, Marilyn Nelson, Natasha Trethewey, Alice Walker, Dorothy West, and Richard Wright.

ENGL244 Kill Anything That Moves: The Vietnam War in Literature and Film

This course examines various forms of literature and film to understand the legacies of one of the most transformative events in American culture and history: the Vietnam War. "Kill anything that moves" were the orders that American soldiers reportedly received while on the ground in Vietnam, yet, to a large extent, the historical focus on the American experience of the conflict has overshadowed other perspectives. Thus, this class will take a comparative approach, exploring works by canonical and noncanonical American, Southeast Asian, and Southeast Asian American authors and directors. Among the diverse genres we will study are prose, poetry, graphic narrative, and narrative and documentary film. To think about the Vietnam War's broader relevance, we will situate the works under study within current debates concerning refugees, genocide, human rights, and the complex politics and aesthetics of war representation. Students will have the opportunity to investigate an understudied aspect of the Vietnam War toward the end of the semester.

ENGL245 The Book as Object

Look at this paragraph. A decade ago, you would have found it flipping through the pages of a printed course catalog, a book marked with your highlights and dogears. Now you scroll through it on Firefox or Chrome; you click through to check the textbooks; you copy and paste the description in an e-mail to a friend; or else you hit the back button and move on to something better. Is this the same paragraph, and are you the same reader?

This course is an exploration of the material forms in which we encounter the written word--from the scroll and the codex to the Word document and the website. Medium matters, and our goal will be to understand how. We will ask how different media technologies shape us as readers and writers; why books have come to mean so much to us as cultural objects; and how moments of media shift (like the rise of the Internet) transform our relation to words. Readings will set essays in the history of the book and media studies alongside literary case studies, and projects will engage with textual materiality through the creation of book-objects of our own.

ENGL246 Personalizing History

How much are we shaped by our historical times and places? How much power do we have to make our historical conditions respond to our needs and desires? These questions and others are at the foundation of this course, which includes both memoir writing and memoir reading. We will construct narratives about our times and selves in a series of writing workshops. There will be some exercises where you will be asked to research specific aspects of your times and places. For example, you might be asked to research and write about such questions as when and where were you born, what were the major cultural or political currents of that time, and how was your early childhood influenced by them? Or you may be asked to bring in a photograph of someone important in your personal history and write about that person.

The memoir is a distinct genre, with topics/themes particular to it. Some of the most important are memory itself, childhood, place and displacement, language, loss/trauma/melancholia/nostalgia, self-invention or transformation, family, and generational differences. The class will engage with these topics in the analysis of the readings and also in the writing of memoirs. Specific techniques will be highlighted for writing practice: the catalog, diction, dialogue, metaphor, description, point of view, and narrative structure, including temporal organization, the doubled narrative, and the narrative frame.

ENGL247 Narrative and Ideology

When ballads were popular songs that told stories, Andrew Fletcher (1655--1716) emphasized the importance of controlling dominant narratives: "If a man were permitted to make all the ballads, he need not care who should make the laws of a nation." Nowadays, stories take various forms, among them cinematic, and they circulate and are consumed in vast quantities. People make stories, and the consumption of those stories, in turn, "makes" people, helping to construct individual subjectivity and collective discourse. How do narratives function as the vehicles for both overt and covert ideologies? How do stories change as they become such vehicles, and how do ideologies change when they are embedded in stories? This course pursues these questions through the analysis of the narrative structure of post-1980 American films, supplemental by reading some film theory. It combines short lectures (mainly in the first few weeks) with much discussion.

ENGL248 Shakespearean Revolutions

Shakespeare's works emerged during a period of revolutionary social, political, religious, economic, and cultural change, including the Protestant Reformation, the rise of print culture, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the emergence of the first, purpose-built, commercial playhouses. Innovations in dramatic form and genre, which Shakespeare helped craft, sought in varying ways to make sense of these momentous shifts for diverse theater publics. Revivals and adaptations of his works on stage and screen during times of revolutionary change have rendered the Shakespearean canon a site of subsequent social and cultural contestation. This class considers the "revolutionary" dimension of four Shakespeare plays both in their own time and place, and in later theatrical and filmic productions and adaptations. We will trace first-, second-, and third-wave feminist reimaginings of "The Taming of the Shrew"; Second World War- and

Vietnam War-era renderings of "Henry V"; civil rights and anti-apartheid era restagings of "Othello"; and attempts to decolonize "The Tempest."

ENGL249 The Great American Novella

Why is it important that Americans write great novels, and what would it mean to think of American novellas as being great, too? Can a novella even be great? Why are novellas more likely to be "startling," as the New Yorker described Philip Roth's "Goodbye, Columbus," or "shimmering," as The Seattle Times called Teju Cole's "Every Day Is for the Thief," or pretty much ignored, as Herman Melville's "Benito Cereno" was for decades after its publication? In this class we will study the internal mechanics of the novella, considering how formal categories like "character" and "plot" operate in a genre that is out of whack with our normal sense of narrative scale. We will also think about how external conditions in literary culture have influenced the production and consumption of novellas in the US, such as the emergence of magazine culture at the end of the 19th century, and the rise of the creative writing program after World War II. This course, in short, examines 10 great American novellas in the hope of gaining a better understanding of American literary history, the novella as a genre, and "greatness" as a label of critical and institutional consecration.

ENGL250 Technologies of the Self

Where does the idea of an authentic self come from? This desire to represent the authentic self informs the narrative genre of the confession and memoir and the visual one of the selfie alike. Yet both the memoir and the selfie "self" are mediated, first, via the technologies of print and screen, and second, via the conventions of particular genres that make these legible as a memoir and selfie, as opposed to, for example, an interview or a portrait. In this course, we will examine how different technologies not only represent but produce the self. These technologies include "writing" technologies: print and digital; genre and medium (autobiography, the slave narrative, memoir, self-portraits, and selfies); and technologies of the state, which produce citizens, subjects, and humans.

ENGL252 Animal Theories/Human Fictions

The question of "the animal" has become a recent focus of theory, although depictions of nonhuman animals can be traced to the very origins of representation. This course will move among literature, philosophy, art, and

theory in an effort to trace the changing conceptions of human-animal difference and human-animal relations from 18th-century fictions of savage men and wild children to current theories of the posthuman. We will consider the ways that the representation of "the animal" intersects with theories of gender and race as it also contests the grounds of representation itself. Authors may include Rousseau, Poe, Sewell, Mann, Colette, Coetzee, Heidegger, Agamben, Derrida, and Harway.

ENGL253 Science and/as Literature in Early Modern England

Seventeenth- and 18th-century England saw the development and popularization of the "new science." Microscopes, telescopes, airpumps, automata, and experiments captured the popular imagination. The first important scientific societies and journals were founded, and the public learned about new discoveries through sermons and coffeehouse lectures. This course will trace the literary reaction to these cultural changes. A female natural philosopher wrote utopian science fiction, and Jonathan Swift satirically skewered mathematicians and experimenters. While the best of early 18th-century nature poetry takes Newton quite seriously as it depicts the way light glimmers off objects, by the century's end, William Blake villainized Newtonian thought as reductive and deadening. We will try to understand what writers found exhilarating, scary, confusing, hilarious, or important about science at this key moment of its development. At the same time, we will read this science as literature--considering, say, Francis Bacon's symbolically fraught "idols" and Robert Boyle's "literary technology," the role of poetry in spreading scientific ideas, and the importance of analogy and metaphor to the very logic of scientific thought. The disciplines of science and literature were not as cleanly separated in this period as they are now, and we can better understand both by exploring their intersections.

ENGL256 The Emergence of World Literature(s)

In the past four decades, the traditional study of national territories, their cultures, and literatures has been supplemented and challenged by concepts and phenomena such as the transnational, the diasporic, the global, and the cosmopolitan, as well as by new curricular categories such as world history, world politics, and world literature. This course will focus on world literature and will examine literary, historical, and theoretical texts to ask what is at stake in this new area. Topics will include, but are not limited to, the networks along which narratives circulate; the aesthetic and other standards that regulate the selection of plots and themes that appeal to the cultural gatekeepers; the politics of continued domination, subordination, and cultural imperialism; inclusion and exclusion; and margins, peripheries, and centers. There is as yet no single accepted theory, no consensus history, and no established canon or geography of world literature--all are evolving as literary scholars attempt to weave together elements of comparative and postcolonial literatures with the above-mentioned concepts into a new object of readerly experience and critical knowledge. We will use literary and theoretical texts to explore how world literature is being created.

ENGL257 Literature of the Gilded Age

The decades after the Civil War witnessed a dramatic upheaval in American social experience. This was the period of big business and class conflict; mass urbanization and transportation; race-based segregation and non-Anglo immigration; globalization, imperialism, and the closing of the West; the increased agitation for women's rights; the growth of tourism both at home and abroad; and the rise of professional institutions and institutionalized social reform. This course will examine writers who creatively responded to these massive social changes.

ENGL258 New World Poetics

God and money, love and beauty, slavery and freedom, war and death, nation and empire: The themes of early American poetry will carry us from London coffeehouses to Quaker meetinghouses, from Massachusetts drawing rooms to Jamaican slave-whipping rooms. Our texts will range from pristine salon couplets to mud-bespattered street ballads, from sweetest love poems to bitterest satire. Digging deeply into the English-language poetry written, read, and circulated after the first English settlement in North America, we will trace the sometimes secret connections between history and poetic form, and we will listen to what these links can tell us about poetry and politics, life and literature in our own time. Our poets ignored false divisions between art and society, and so will we.

ENGL259 The Art of the Personal Essay

The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays--what author and critic Philip Lopate calls "the self-interrogative genre"--helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others' writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

ENGL260 The Word for World is Information: Ideologies of Language in Science Fiction & Film

By the middle of the 20th century, it had begun to seem possible to produce a grand theory of communication that would use language as a basis for understanding all of human thought, behavior, and culture. As competing versions of such a theory circulated through academic disciplines as disparate as anthropology, neurophysiology, and the emerging field of computer science, they also filtered out--sometimes in strangely warped or oversimplified forms--into popular culture.

This course will examine the most interesting and influential of these theories, both in their scholarly origins and in their most puzzling and promising elaborations in works of literary and filmic science fiction. We will be particularly attentive to the ways that the narrative logic of science fiction texts can gloss over certain logical and philosophical inconsistencies in these theories while revealing others.

ENGL261 Pirates, Puritans, and Pequots: Literatures of the Renaissance Atlantic

This course opens the traditional canon of Renaissance literature westward, examining the connections between English Renaissance authors and the slaves, indigenes, and colonists living in and around England's emerging colonies in the New World. What picture emerges when New World authors ranging from Puritans to pirates to Pequots are put in sustained dialogue with the points of view of investors, planners, and dreamers "at home" in England? We will answer this question by surveying a variety of texts and objects including travel narratives, pirate plays, utopian fictions, indigenous craftwork, maps, eccentric political tracts, diaries, colonial promotion materials, and early ethnographies produced by authors all around the Atlantic rim (some even in 17th-century Connecticut!). Together, we will think about the relationship between these objects and slavery, religious radicalism, indigenous-European relations, inter-European conflict, exploration, and trade.

ENGL262 Beyond the Talking Book: Reading African American Literature in the Newspapers

The majority of late-nineteenth and early twentieth century African American writers, such as Frances Harper, Martin Delany, Pauline Hopkins, W.E.B. Du Bois, and Cyril Briggs, published their work in African American periodicals. In this course, we will examine the works of these canonical authors (as well as some lesser known ones) in their original publication context, the magazine archives of *The Christian Recorder*; *The Anglo-African Magazine*; *The Colored American Magazine*; *The Crisis*; *The Crusader*; *Opportunity*; and *Fire!!* The guiding question in our readings is this: how does our understanding of these canonical texts change when we read them in their original context--as either serial novels, or as components of a larger composite magazine, consisting of multiple different texts and images? In addition to honing students' literary close-readings skills, this course aims to teach students how to do original research and critically engage with multi-genre, mixed forms like the magazine.

Authors we will read include: Frederick Douglass, Charles Chesnut, Frances Ellen Watkins Harper, Langston Hughes, Zora Neale Hurston, W.E.B. Du Bois. In order to get a better understanding of the literary conventions of the serial form, students will read one of the assigned serialized novels (*Pauline Hopkins' Of One Blood*) in its original installment-format, week-by-week. Reading these works serially will also enable them to pay closer attention to each installment's relationship to its surrounding texts and images.

ENGL263 Black Performance Theory

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

ENGL264 Outsiders in European Literature

Modern literature is replete with protagonists who represent a position or identity that is outside an accepted mainstream; they are different, peculiar and/or attractive, and potentially dangerous. This course will focus on the experience of being or being made into such an outsider, or other, and on the moral, cultural, racial, gendered, sexual, or national norms or boundaries such an outsider establishes for the inside. Reading both fiction and theory, we will ask how the terms of inside and outside are culturally and historically constructed

as we also look for proposals for dealing with outsiders and their otherness. Authors may include Kafka, Mann, Camus, Colette, Fanon, Sartre, Beauvoir, Duras.

ENGL267 The 1850s

The 1850s was a period of tremendous social unrest in the United States. And yet, for all of its upheavals, the decade that immediately preceded the Civil War also witnessed the publication of some of the country's most iconic works of literature, what a later generation of scholars would call the "American Renaissance." This course sets out to explore the relationship between literature and its historical context(s). What were the material, political, and economic conditions that led to the production of so many great works of American literature? How does a literary text overcome its own embeddedness in history to become a "classic," a work of universal, timeless value? Keeping our own historical moment in mind, this class will examine the 1850s to determine whether periods of political turmoil produce better literature. (Let's hope that they do!)

ENGL272 Modernist City-Texts

Since the 19th century, the city has been both a privileged and a problematic object of representation for narrative realism: privileged because urban spaces have increasingly been seen as shaping or producing the very social relations and individual experiences that realism wants to describe; problematic because the city itself, as a coherent totality that might explain those relations and experiences, is too vast, heterogeneous, and complex to be represented through the traditional techniques of realism.

This course will approach the problems and possibilities of the city for realism through a close reading of two large, ambitious texts that attempt to represent the city as a totality: James Joyce's novel *ULYSSES* (1922) and David Simon's television series *THE WIRE* (2002-2008). We will be particularly concerned with two techniques, pioneered by Joyce, for representing the city: stream of consciousness, which creates a tour of the city from the perspective of a single, mobile flâneur; and montage, which creates a map of the city by juxtaposing various cross-sections of social life or various institutions central to the city's functioning.

ENGL274 Caribbean Poetry and Cinema: "Fields of Islands" in an Open Sea

In this course, we will consider poetry and cinema that make radical images, sounds, and shapes of the Caribbean as a "field of islands"--islands that presume other islands, islands of foraging, convening, gathering, and concentrating on the small, in the words of Édouard Glissant--in an open, relational sea.

We will trace how the Enlightenment installs itself in the longstanding colonial tropes that render the Caribbean as a space outside of time, outside of history, perpetually under the sun, and, were it not for machetes, filled with redundantly bursting vegetation. This course will present an array of 20th-21st century Caribbean poetics and cinemas that deviate from, challenge, escape, and mangle these tropes and their spatio-temporal unimaginativeness. And we will investigate the ways that these texts and forms make use of the figures of sea, plantation, slavery, indigenities, uprising, marronage, desire, revolution, apocalypse, vengeance, and imagination. Concerns of nationalism, development, humanism, capitalism, and subjectivity will manifest.

ENGL275 Race and Place in Early American Writing

This semester, we will examine early American texts that are preoccupied with the intersection between the unsettled (and often unsettling) categories of race and place. In the wake of colonial contact and in the midst of chattel slavery, people in varying positions of power and subjection took to the pen in order to reify or resist white supremacy and its attendant discursive and physical violence and violation. With an eye toward the strategic uses of memory and witnessing by those who were displaced and/or enslaved, we will read primary texts from the 17th to the mid-19th century that were written by people of color. To conceptualize race and nation is to think relationally, so we will also take up texts about people of color, which are often animated by the seductive effects of nostalgia and sentimentality.

ENGL276 Diasporic South Asian Writing and American Studies

The South Asian diaspora spans the world; communities are located in Africa, the Middle East, England, North and South America, the Caribbean, as well as Southeast Asia. Using novels, poems, short stories, and film, as well as scholarship on history, this course will focus upon the literary and cultural production of the South Asian diaspora in the United States. We will examine the conditions of historical arrival and identity-making under shifting regimes of politics, economics, and culture. What does being in the United States mean for the claiming of "Indian" and "American" identities, and how is this inflected by relationships with other ethnic or racial communities? The relationship with an often romanticized "India" is a central question, expressed through the concepts of diaspora, exile, and transnationalism. Consequently, what are the conditions of "authenticity," and of cultural authority? What aesthetic forms, questions, and issues express or preoccupy the artists of the South Asian American community?

ENGL277 Race and Ethnicity on the Shakespearean Stage

In this class, we will take up the question of race in relation to the Shakespearean canon. We will look at four plays by Shakespeare and one by Christopher Marlowe, each of which features a major character that early modern audiences would have perceived as racially "other" (e.g., Moors, Jews, Indians, Turks, Egyptians), as well as some relevant Shakespearean poetry. We will set these plays against other texts and artworks that explore and make arguments about racial/ethnic difference, investigating the ways in which ideas about race intersected with ideas about geography, climate, religion, custom, and sexuality in 16th- and 17th-century Europe. Our goal, throughout, will be to come to grips with historical ideas about racial difference that will seem alternately alien and familiar from our contemporary perspective, as well as to interrogate the popular understanding of Renaissance Europe as exclusively "white." In the course's final section, we will look at the subsequent history of Shakespearean performance and race, reading and watching adaptations from the 18th to the 21st century and discussing issues ranging from colorblind casting to arguments over whether "original practices" such as blackface still have a place in the repertory.

ENGL279 Introduction to Latina/o/x Literature and Art: Border, Citizen, Body

This course will engage Latina/o aesthetics to think about borders, desire, citizenship, personhood, and embodiment. By engaging the Latina/o artistic imaginary, we will consider the emergence of contradictory social phenomena, such as dreamers, assimilative drives, utopic desires for anti-assimilative places of habitation, the minuteman militia, consumer drives for representations of "spicy" and "exotic" and "degenerate" brown bodies, reclamations by Latina/o artists of brownness, spiciness and degeneracy, as well as laws in Arizona, Texas, and California that endow police with the power to discern visually whether a brown body is "legal" or not. Several questions and themes will focus our engagements of literature, cinema, and music: How does the Latina/o artistic imaginary depict distinct migrant journeys and rural or urban forms of labor? How do intersecting discussions of race, ethnicity, gender, sexuality, and class in relation to Latina/o aesthetics complicate the existing definitions of these terms in the United States? How do artists interrogate heteronormativity in Latina/o and dominant U.S. cultures? How do they conceive of their specific crises of representation, which include the demand for realism and personal narratives

by critics and mainstream readers? What deviant and beautiful forms of life does Latina/o aesthetics make imaginable for everyone?

ENGL280 Staging Race in Early Modern England

This course analyzes the dramatic representation of race in the plays of Shakespeare and his contemporaries. We will examine the historical emergence of race as a cultural construct in relation to related conceptions of complexion, the humoral body, gender, sexuality, and religious, ethnic, and national identity. Readings focus on three racialized groups: Moors, Jews, and Native American "Indians." After reading the play-texts in relation to the historical moment in which they were first produced (using both primary and secondary sources) we will then consider their post-Renaissance performance histories, including literary, theatrical, and film adaptations.

ENGL281 Award-Winning Playwrights

With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

ENGL282 Narrative: Theory and Practice

What is "narrative" and how does it shape the way we understand the world around us? How are stories constructed in language? How do writers create a sense of time, plot, and character? In this course, we will explore these questions by identifying the strategies and structures of narrative across various media. Genres under study will include folktales, prose fiction, and film, but also less traditional subjects of narrative inquiry, such as journalism, poetry, photography, and digital media. Students will put theory into practice, investigating the mechanisms of narrative by writing in multiple genres. For the final project, students will have the choice of either a critical essay or a work of creative writing.

ENGL283 Old Poetics for New Poets

We today tend to assume that poetry is lyrical, personal, emotional, and short. These assumptions are not universal truths but products of a specific historical moment; they were popularized by Romantic poets such as William Wordsworth

at the turn of the 19th century. This class will explore poetry and poetics before Romanticism, when poems were as often public and political as personal, as often philosophical and scientific as emotional, as often book-length as quite short. These are poems in which metaphors are stretched to their furthest limits, and passions pop to life to figure in allegorical plots. In them, the lyric "I" is less important than the didactic "you," the narrative "he"/"she," or the satirical persona. We will explore the workings of different forms and figures in this old poetics, including rhymes, couplets, personas, personifications, periphrases, and conceits. Wonderfully, some of these old techniques are in the ascendant again today: hip hop privileges rhyme, and posthumanism raises new questions about personification.

Students in this course will read poetry, but they will also write it. We will think about how older poetic techniques and tropes offer resources to new poets.

Both trained and amateur poets are welcome!

ENGL285 Enlightenment to Modernism: British Literature, 1780-1914

This course offers an introduction to modern British literature and culture, with an emphasis on the ways in which literary form responds to and shapes the movements of history. We begin with the emergence in the late 18th century of two new literary forms with substantial debts to the Enlightenment--the novel and Romantic poetry--and trace the development of these genres in the hands of later writers, from George Eliot's panoramic depiction of a small city at a moment of profound historical, social, and economic transformation to E. M. Forster's portrait of two sisters who exemplify a country caught between its ideals and the reality it has made for itself; from Robert Browning's repudiation of Romantic confession to Oscar Wilde's definition of art as artifice, or "lying." Central themes include changing concepts of personhood; the relation among science, nature, and faith; the politics of class and gender; the tension between the language of everyday life and the language of literature; and the role of art in a rapidly changing, chaotic, and often exhilarating modern world.

ENGL286 When Harlem Was in Vogue

This course will examine the aesthetics and politics of the first Modern African American cultural movement, known today as the Harlem Renaissance. In our readings of key literary texts by authors such as Alain Locke, Jessie Fauset, Zora Neale Hurston, Eric Walrond, Langston Hughes, Claude McKay, Nella Larsen, and Jean Toomer, we will discuss both the national and global contexts of so-called "New Negro Writing" and focus on debates surrounding representation, "respectability," and racial authenticity. During this course students will read canonical and popular literary works by early 20th-century African American authors in tandem with the vibrant body of literary criticism that emerged from this cultural moment in order to arrive at a richer understanding of how the early 20th-century African American canon was curated and proliferated. To this end, we will pay special attention to the role of anthologies and literary magazines (such as "The Crisis," "Opportunity," and "Fire!!") in collating an emergent modern African American literary tradition. At the end of this course, students will not only be familiar with the key authors and works of the Harlem Renaissance, but also with the central debates about the direction and uses of African American art.

ENGL289 Intertextual Aesthetics in African American Culture: From Signifyin(g) to Sampling

Intertextuality, the integration of references to multiple texts into a single artistic work, has long been considered a hallmark of postmodern aesthetics. This course will begin from the premise that this intertextual approach was a foundational aesthetic technique for African American cultural producers long before any discourse around postmodernism entered the lexicon. From David Walker's "sampling" of the Declaration of Independence in making his 1830 anti-slavery Appeal, to Kara Walker's incorporations of imageries and artistic techniques of the antebellum South to comment on contemporary realities of blackness, African American artists have long made use of intertextual aesthetics not merely in the service of postmodern indirection, but in order to represent the realities of black lived experience in America. This course will investigate the transmedial history of this intertextual black aesthetic, examining African American literature, music, film, and visual art, and will consider various ways in which black intertextual aesthetics have been theorized, from Henry Louis Gates' notion of "signifyin(g)," to discussions of hip hop sampling and Black Twitter. As mass-mediated technologies have proliferated in the 20th and 21st centuries and representations of "Blackness" writ large have exponentially multiplied in the popular imagery, contemporary artists increasingly sample and signify on these representations themselves. So a significant piece of our work in the course will be in analyzing the ways that the intertextual aesthetic is mobilized in the contemporary moment to speak to material realities of postmodern blackness, and to articulate nuanced black subjectivities in the face of subjection.

ENGL292 Techniques of Nonfiction

In this course, we will learn how to craft and revise short pieces of nonfiction writing that draw on our own life experiences and our observations of the world around us. To achieve this goal, we will constantly be creating and editing our own prose, and we will perform various writing exercises. Moreover, we will read our colleagues' nonfiction prose and offer them thoughtful, generous feedback. Finally, we will read various published nonfiction essays--memoirs, musings, reviews, and reportage--and we will analyze these pieces in order to understand how veteran authors narrate "real-life" stories in a way that is engaging, beautiful, and meaningful. Upon completing this course, you will have a deeper knowledge of how to construct resonant nonfiction narratives, and a better understanding of various literary concepts, including pacing, arc, imagery, place, and character. You will have learned how to harvest experiences and observations from your own life in order to tell a story that reveals subtle but acute information about the larger world.

ENGL293 Love, War, and a Few Monsters: An Introduction to Medieval Literature

This course engages with a selection of French and English literature from ca. 1200 to 1400, with an emphasis on the popular genres of romance and epic. Our authors and works will include Marie de France's and Béroul's poems of magical and doomed love; contacts between Christians, Muslims, and Jews in the Song of Roland and the Song of the Cid; and finally Chaucer's masterpiece The Canterbury Tales. The topics that we will examine include the politics of chivalry and crusading, medieval views of gender and sexuality, religious controversies, and representations of the world beyond Europe.

ENGL297 Creating Children's Books I

In this course each student will create and illustrate a children's book, at the picture book or illustrated chapter book level. Assignments include examining a variety of children's books (from 1930 to the present) and emulating specific authors and illustrative techniques as we develop original work. We will discuss both text and illustration in published picture books, and the creative assignments and workshop discussions will focus on both components, and their interaction. We will look at a range of questions: What is this book for? Who is it for? Does it appeal to children and adults in different ways? What assumptions does it make about the world of childhood and the relationships children have? How does it obscure, reveal, comment on, or attempt to change the truths of life—things like love, desire, satisfaction, hurt, difference, sickness, and death? What values or norms does it establish—or subvert? What do the words and pictures do to each other? What values or expectations are at stake as the story or pattern unfolds? We will use questions like these to help drive our experiments and revisions as we workshop all stages of our books.

ENGL298 Richard Wright and Company

This course offers an in-depth consideration of the work and career of Richard Wright, a defining figure in 20th-century African American literature, and seeks to understand Wright's interactions with a wide array of mentors, proteges, and enemies. By placing Wright amid the network of supporters, admirers, and detractors who surrounded him, we will gain a deepened understanding of Wright's development and a useful map of 20th-century African American literary expression and American literary history more broadly. Writers to be covered in the course may include, along with Wright, Hannah Arendt, James Baldwin, Gwendolyn Brooks, Horace Cayton, Ralph Ellison, James T. Farrell, Dorothy Canfield Fisher, Chester Himes, Langston Hughes, Zora Neale Hurston, Alain Locke, Gertrude Stein, Margaret Walker, John Williams, and Frank Yerby.

ENGL301 Philosophy of Memory in African American Literature

This course will consider the importance of memory in African American literature and will explore the many ways in which authors of African descent engage, transform, and build on long-established intellectual traditions of the mind. Students will explore the importance of the idea of "memory" to these intellectual traditions of the mind and will trace the praxis of remembering as a literary act through African American literature of the long 19th century. Finally, students will explore how persons of African descent are dehumanized through a systematic reduction of their mental capacities in these same philosophical traditions of the mind. We will discuss the ways in which memory specifically figures into this dehumanization and how authors of African descent used these very theories to resist the reification and overdetermination of both their literary works and their selves.

ENGL302 Matter, Community, Environment

In recent years, it has become increasingly difficult to consider human communities without also considering questions of "nature" or "environment." Actor-network theory condemns nature/society dualisms; ecological theory argues that there is indeed no "nature" or "society"—only the anthropocene; and, drawing from the former two positions, object-oriented ontology conceives of ideas (such as "community" or "society") as objects and ecological actors. In this seminar, we will consider various approaches taken in recent years to thinking about our relations to the worlds we inhabit. We will attempt to think not only outside a focus on "us" as humans in the first place but even outside a focus on sentient life or life in general. Examining theories of matter, community, and environment, we will discuss and analyze work by philosophers, evolutionary biologists, literary scholars, and sociologists, among others. We will pay special attention to how theorists and critics are blurring the boundaries between nature and society, environment and community, life and matter. In addition to class participation and a series of brief reading responses, students will be required to produce a final paper dealing with any topic related to the course.

ENGL303 Narrative Theory

Narrative, one great critic suggests, may be the central function of the human mind. It is, as another once wrote, "simply there, like life itself." As these claims indicate, narrative gives form to our collective experience: from the shadow of history and the shape of the future to the very texture and meaning of time itself. This course provides an introduction to the tradition of narrative theory—the theory of how stories work and of how we make them work—through a sustained engagement with three core narrative-theoretical concepts: structure, text, and time. A single book will anchor and orient each of the course's units: for structure, Vladimir Propp's *MORPHOLOGY OF THE FOLKTALE*; for text, Roland Barthes's *S/Z*; for time, Gérard Genette's *NARRATIVE DISCOURSE*. Herman Melville's novella *BENITO CERENO* will supply our "control text," a narrative to which we will return as we study the theory and through which we will test the powers and the limits, both analytical and historical, of our theorists. In each of our units, we will begin with a careful reading of our main theorist,

move on to consider work that elaborates on the theory, and then turn to robust approaches--Marxist, historicist, queer, psychoanalytic, sociological--that challenge or modify the theoretical terms with which we started.

ENGL304 Lyric Poetry and Music: The Color and Politics of Cry, Sound, and Voice

Lyric poetry may be the most musical of literary forms. In one of its basic definitions, the lyric poem begins after the overhearing of a sound. This sound may be familiar and pleasant, like the timbre and cadence of a lover's voice. Or it may be unrecognizable and terrifying. It may be imbricated with other senses and feelings, provoking a memory that stimulates a sense of touch or smell. Or it may stimulate a sense of horror at the inevitability of death. In any of these cases, sound is thought to reveal an attachment, a memory, and to give rise to composition in the poet's effort to reshape memory and feeling in lyric form. But such articulations do not always come out as evenly as this description may imply. Indeed, moans, screams, stutters, cries, and the madness of possession by the Muses are part of lyric's history and practice. In this course, we will read from African American, African diasporic, Caribbean, Latina/o/x, and Indigenous poetics, and we will consider their relation to myth and musical forms, such as the blues, son, bomba, biguine, jazz, reggae, hip-hop, salsa, among others. The dynamics between lyric speakers and musicians, sound and story, seen and voiced language will play out.

ENGL305 Shakespeare's Macbeth: From Saga to Screen

A close reading of Shakespeare's play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare's "sources," then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare's contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of *MACBETH* from 1948 to the present.

ENGL307 Britons and Other Life Forms

George Eliot wrote in *Middlemarch* that "if we had a keen vision and feeling of all ordinary human life, it would be like hearing the grass grow and the squirrel's heart beat, and we should die of that roar which lies on the other side of silence." This course will require us to think about the various ways in which writers conceive of and represent precisely our potential--or, as Eliot suggests, our inability--to comprehend "all" life, or even just "other" life forms. We will consider literary approaches to relationality, with an emphasis on 19th-century British literature: How do these writers envision the connections between individuals and organisms, and how do they conceive of intimacies, environments, and totalities? To what extent do they imagine themselves as able to represent those connections? And how to these understandings impact literary form and political understanding? We will focus on formal questions,

such as those of protagonist and minor character, poetic "I" and listener, as well as on two major forces of 19th-century culture: an emergent social theory that tried to conceive of humanity in terms of communities, populations, and "social bodies," and an increasingly prominent science that was starting to think in terms of environments and ecologies (it's worth noting that the terms "environment" and "ecology" are 19th-century in origin).

ENGL308 All the Feels: Affect Theory and Cultural Studies

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we manage sensorial and embodied experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the individualized experience of feeling and power by introducing students to the vibrant field of affect studies. A recent "turn" in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to, ultimately, contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

ENGL309 Entertaining Social Change

"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially true of "entertainment" as a transformative power. Our aim will be to advance critical entertainment studies. A thread that connects all of our texts will be: how has the systemic critique of social contradictions been popularized as fascinating in modern times? We will consider the diverse strategies that progressive songwriters/performers, radical historians (working with cartoonists), and mainly moviemakers have developed to entertain Americans--to teach, persuade, provoke, seduce, and move them through laughter, tears, and not least of all ideas--so that Americans will be more inclined to entertain social critique that inspires social change. We will explore the popularizing (and sometimes the selling) of social critique in several genres: graphic history (Howard Zinn, Paul Buhle); songs/song lyrics of folk-protest singers (such as Woody Guthrie, Pete Seeger, and Phil Ochs), of folk-rock stars (such as Jackson Browne, Ani DiFranco, and Father John Misty), and of the developers of hip-hop (such as Gil Scott-Heron, Public Enemy, and NWA); and politically edgy comedy (Jon Stewart, Stephen Colbert). We will devote most of our attention to movies (*STRAIGHT OUTTA COMPTON*, *THE PEOPLE SPEAK*, *MALCOLM X*, *MEDIUM COOL*, *NETWORK*, *EL NORTE*, *SMOKE SIGNALS*, *BEFORE THE FLOOD*, *THE BLACK PANTHERS: VANGUARD OF THE REVOLUTION*, *SALT OF THE EARTH*, *MATEWAN*, *99 HOMES*, *THE WOLF OF WALL STREET*, *THE BIG SHORT*). And we will place special emphasis on self-reflexive movies about entertainment and about labor/social movement organizing.

ENGL314 Circulating Bodies: Commodities, Prostitutes, and Slaves in 18th-Century England

In the newly booming consumer culture of 18th-century England, people were constantly buying and selling things--bespoke suits and manufactured trinkets as well as prostitutes and slaves. This course will explore the period's circulating bodies as they were passed from hand to hand, valued and revalued, used, abused, and discarded. We will trace processes of circulation in 18th-century novels and poetry and listen as the "things" themselves tell stories: in the period, commodities, prostitutes, and slaves all wrote memoirs (or had ones imagined for them). We will read these texts alongside contemporary debates about economics, abolition, and women's rights, and we will return again and again to fundamental questions about personal identity, individual agency and passivity, commodification, objectification, and the very limits of the human.

ENGL316 Rethinking World Literature

Globalization has changed the speed at which people, goods, information, and ideas circulate in space. It has also changed how we read and write, and what we read and write. What does the "world" in "world literature" mean, and who writes world literature? To better understand how recent economic, cultural, environmental, technological, and political transformations affect our understanding of world literature, we will read key theoretical works that interrogate world literature as a category, along with literary works that thematize the scales of global comparison.

Offering: **Host**

ENGL319 Crossing the Color Line: Racial Passing in American Literature

Narratives of racial passing have long captivated readers and critics alike for the way in which they provocatively raise questions about the construction, reinforcement, and subversion of racial categories. This course will consider several examples of the "literature of passing" as it has been established as a category within African American literature alongside more ambiguously classified 20th-century narratives of ethnic masquerade and cultural assimilation as a way of exploring how literary and filmic texts invoke, interrogate, and otherwise explore categories of race, gender, class, and sexual identity.

ENGL320 The Senses and the Subject in Cinema and Poetry

In this course, we will study a mixture of emotionally stimulating and structurally difficult cinema and lyric poetry to intensify our capacity to articulate a notion of the senses. Do the senses presume the subject? How do poetry and cinema imagine, racialize, gender, and play with the relation of the senses to the subject? While these two art forms might seem like strange neighbors, this course specifically imagines cinema and lyric poetry as "repositor[ies] of synesthesia" wherein feelings move fugitively, where one sense dubs into and

disturbs the imagined discrete domain of the other in measured intervals of time that are generative of sounds, images, and of that which overflows the visual.

The films and poetry selected may carry students into cuts of the Caribbean, the black Atlantic, France, Sweden, Mexico, the U.S., Senegal, Mali, and Spain at distinctly urgent moments in the mid-20th to early 21st century. The threads that will sew the course's images together and bind them to the human subject and senses are the celestial and terrestrial, creation, decomposition, displacement, migration, fascism, colonialism, globalization, and love.

ENGL323 What Was the Public Sphere?

The democratic revolutions of the 18th century are often thought to have originated with the emergence of modern reading publics--groups of strangers who, through the alchemy of print, came to understand themselves as coherent entities capable of exercising political power against the state. The "public sphere" is central to American identity in particular, from the debates that raged in newspapers before the ratification of the Constitution to the calls for civility that have appeared more recently on Twitter and in New York Times op-eds. This course will explore the relationship between print culture and political action by reading 18th- and early-19th-century American literature. We will consider the material and social conditions that gave rise to the public sphere. We will examine the role of rational discourse in adjudicating political claims. We will ask whether the public sphere ever actually existed, and whether it does--or can--exist in our current historical moment.

ENGL324 Black Power and the Modern Narrative of Slavery

The historical moment immediately after the civil rights and black power movements saw an explosion of African American writing about slavery. In the past half-century, black writers have written award-winning novels that have given unprecedented attention to the intricacies of the life of people who are enslaved and to slavery as a system that they suggested could help us better understand late-20th-century American culture. We will read some of the most important works written by contemporary African American writers to see how and why they transformed the first autobiographical form for black writers--the slave narrative--into a fictional form that has served them as they dissect their own cultural moment.

ENGL327 Criticism and Psychoanalysis

This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to force us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

Offering: **Host**

ENGL328 Brown, Black, and Queer Forms and Feelings

Given how brutally not neutral the world is to black, brown, and queer forms of life and pleasure, this course thinks with "otherwise" spaces, figures, and feelings, like the queer club, the dance floor, abnormality, errancy, illegality, fugitivity, rage, indifference, and love. We will take up José E. Muñoz's invocation of a "minoritarian theory of affect" that insists that "whiteness is a cultural logic which can be understood as an affective code that positions itself as the law." We will study affect beyond whiteness through attention to sonic forms and "audio-visual shapes" in African diasporic, Latina/o/x, and Caribbean arts. We will consider the diasporas and collectives grouped together in the terms "minoritarian," "brown," and "black" as abnormals that generate alternative modes of moving through and feeling ourselves in the world. We will study for radical potentiality in the beautiful, obscene, and off-kilter affects of brown, black, and queer aesthetic and poetic forms.

ENGL334 Special Topic: Something in the Air: Mining the Oral/Aural Tradition in African American Poetry

In his book-length manifesto, *Poetry as an Insurgent Act*, Lawrence Ferlinghetti claims that "the printing press killed poetry." What he seems to be lamenting--at least, in part--is the privileging of the written word to the detriment of poetry's

musical, or aural, qualities. In this advanced-level workshop, we will focus on the poem as something intended to be read aloud and listened to. This course will also examine the roots and evolution of the African American oral poetic tradition with special attention paid to the rhetorical strategies derived from the black church, adopted by civil rights leaders and speech writers, and used to varying degrees by poets ranging from those of the Black Arts Movement of the 1960s and '70s to practitioners of contemporary hip-hop and spoken word. Some of the poets under consideration include Amiri Baraka, Oscar Brown Jr., Jayne Cortez, Gil-Scott Heron, June Jordan, The Last Poets, Carl Hancock Rux, Sonia Sanchez, Patricia Smith, Jessica Care Moore, Laini Mataka, and Saul Williams.

ENGL337 Advanced Poetry Workshop

This seminar-style course will focus on the reading and constructive discussion of poetry submitted by members of the workshop. We will explore an extensive reading list of contemporary poetry as well as philosophies of art-making written by both writers and artists. A final book arts project--consisting of 15 pages of revised poetry and a statement of poetics--is due at the end of the semester.

ENGL337A Advanced Poetry Workshop: Radical Revision

"Poetry," writes Yusef Komunyakaa in his essay collection *Blue Notes*, "is an act of meditation and improvisation. And need is the motor that propels the words down the silent white space." In this intermediate poetry workshop, students will consider various perspectives on the revision process and explore strategies for redrafting poems-in-progress. While this class is open to any poetry student with previous workshop experience, those who stand to gain the most are those who've already amassed a sizable body of work--poems, drafts, notes--with which they are, for the most part, dissatisfied and eager to improve. It is imperative that students come with an open mind and a willingness to surprise themselves and one another.

ENGL338 Serial Sensations

Regardless of their medium or period, serial texts are often associated with sensationalism. Not only do they frequently feature sensational plots, but by virtue of producing intense fan cultures the texts themselves become public sensations. From "Bleak House" to Marvel comics, and from "Game of Thrones" to the podcast "Serial," serials have produced vibrant if not fanatical fan forums

and fan cultures. This course will examine the aesthetics and politics of serial texts ranging from didactic novels to gory and racy ones, and from television shows to podcasts and audio books. Throughout the course of the semester, students will engage in forms of serial reading, listening, and writing, and will discuss the effect of the serial format on plot, characterization, and genre. Moreover, they will examine the ways in which the serial format shapes narrative desire, and the ways in which it molds reading and viewing habits--that is, the mechanisms and logics through which a serial reader, listener, or viewer is produced.

ENGL340 Special Topics: Ecopoetics - Experimental Poetry in the Anthropocene

How do poets speak for and from a world in flux and crisis? How do poets register and attempt to restore the degradation of the planet through language? How might altering the boundaries of conventional language use--through poetry--alter the bounds of conventional thinking and behaving, thus leading to more engaged and sustainable modes of living? This course, in part, will serve as a tour of contemporary ecopoets invested in looking at and caring for the current state of our planet through poetry. We will read poems that reflect the most critical environmental concerns of our time and we will learn to see how these poems resist closure and are instead guided by experimentation, exploration, and interrogation in an attempt at reorienting our attention and intention as inheritors of this planet.

This is a workshop for students committed to developing an understanding of ecopoetry's place in the more-than-literary world, as well as developing a personal ecopoetics from which to write, read, and live. Students will choose an environmental topic to research and write in service of for the semester and, by the end of the semester, each student will have written a project-centered collection of ecopoems. There will be bi-weekly presentations on the poetry collections we read, in-class writing experiments, and intensive workshops of one another's work. The class will culminate in an ecobook arts project and reflective essay.

ENGL341 Archiving America

How do we know what we know? This seminar will explore the notion of archives as a way to understand the politics of knowledge production. We will read primary works in which archives--in the form of documents, photographs, postcards, and more--feature prominently and compel us to question how we determine what an archive is and what its meanings are. We will also examine theoretical texts to understand how the archive can be used to discipline knowledge, but when used creatively and critically, can also reveal new forms of understanding. Work with Wesleyan's Special Collections and Archives will give us a hands-on approach to the course's subject matter, and students will have the option of conducting their own archival projects to illuminate something new about our understanding of America.

ENGL343 Contesting American History: Fiction After 1967

The American novel of the late 1960s onward is preoccupied with history and the American past. Indeed, this obsession with history is central to what critics mean when they talk about postmodernism. This course will explore the theories of history fostered by novelists over the past five decades. What visions of American history do these novels construct and contest? How, if at all, do they change our notion of what counts as history? This course will try to understand what is at stake in the turn to history, how it shapes our understanding of the past, and what claims for and against fiction it makes.

ENGL344 Women's Lib, Women's Lit

The social movement known as second-wave feminism, but often referred to at the time as "Women's Lib," took center stage in much of the best-selling fiction of the 1970s. This course will look at popular fiction that concerned itself with women's issues and the way it popularized, memorialized, complicated, and contested feminism in the popular imagination. We will look at a range of novels that focused attention on the nature of and possible solutions to women's political, material, and sexual subjection by men. Although our focus will be on the 1970s, we will look at both some important pretexts, and some later responses to the ongoing crises of gendered inequality in the 1980s. We will pay particular attention the gendering of publishing and reception, exploring the contexts in which these books were produced, marketed, reviewed, and read.

ENGL345 Forms of Presence in Renaissance Lyric

Lyric poems depend on immediacy---on the sense that, when we read them, we hear a real voice, speaking right now. Yet the presence that lyrics create is always at risk of being exposed as fantasy, an illusion conjured by the written texts in which we encounter them. How, then, do lyrics bring voices to life? What gives those voices the thrill of immediate presence? And what do lyrics do to us, the readers whom they seek out or evade, seduce or resist, sometimes all at once?

These questions were particularly urgent in early modern England, where an astonishing outpouring of lyric poetry coincided with the rise of print. In this course, we will take this historical coincidence seriously: studying the major lyric poets of the period by paying special attention to the material forms in which their poems reached readers. Our approach will be guided by readings in lyric theory and the history of the book; together, they will prompt us to ask how the book as medium shapes and troubles lyric's imagined presences--and the problems of self, love and desire, of sex and gender, of religious belief and political commitment, with which lyric wrestles.

ENGL346 Utter Nonsense: Modernist Experiments with Meaning

In "The Use of Poetry and The Use of Criticism" (1933) T.S. Eliot wrote, "The chief use of the 'meaning' of a poem, in the ordinary sense, may be [...] to satisfy one habit of the reader, to keep his mind diverted and quiet, while the poem does its work upon him: much as the imaginary burglar is always provided with a bit of nice meat for the house-dog."

To extend this analogy: this course will look at texts by meatless burglars, writers who set out not to sedate but to conscript the sense-sniffing house-dog as they pillage the house for things of value.

This course will survey some of literary modernism's most defamiliarizing texts, ones that challenge interpreters by withholding or avoiding that digestible (and perhaps soporific) "meaning" Eliot referred to. We will look at modernist formal experiments from Gertrude Stein and Guillaume Apollinaire through Dada, surrealism, the French New Novel, and the theater of the absurd, alongside the less prominent but equally influential exploration of aleatory, procedural, and machine-generated poetry by writers such as Jackson Mac Low and the Oulipo. Working with authors' manifestos and critics' interpretations alongside the primary texts, we'll pay special attention to the varied relationships to meaning that can be found at work in texts that a casual reader might lump together as simply meaningless or nonsensical.

As the semester progresses and we get a clearer sense of what these texts require from their readers, we'll begin to ask (with the help of some basic readings in semiotic and psychoanalytic literary theory) how our interpretive behavior when confronted with seeming nonsense might relate to the various things we do when we read normal or typical texts--ones that strike us as already or obviously meaningful. Is making sense something that a text can ever do on its own or something that we must always do to (or for) the text?

ENGL349 Historicizing Early Modern Sexualities

This course will examine recent historical and theoretical approaches to the history of sexuality in early modern English literature (ca. 1580-1680). Our focus will be the historical construction of sexuality in relation to categories of gender, race, religion, and social status in a variety of sources, both literary and nonliterary, verbal and visual, including poetry, plays, masques, medical treatises, travel narratives, and visual media. Topics covered include intersecting constructions of the sexed/gendered/racialized body; diverse sexual practices; sexual identities prior to the homo/hetero divide; and the histories of pornography and masturbation.

ENGL350 The Law, the Citizen, and the Literary and Cinematic Imaginations

In this course, we will study several major legal events that highlight the contradictions and injustices in the history of U.S. citizenship and the ways this history has been reimagined in literature and cinema. Among the topics discussed will be the slave codes, the Treaty of Guadalupe Hidalgo, the Fugitive Slave Act, the Jim Crow order, the Bracero program, sodomy laws, and SB 1070. We will consider theories of citizen, state, race, and sexuality implicit in these legal structures, with an eye for who may be incorporated into the body politic and who is unassimilable by design, and on what terms. In addition, we will consider the way literary and cinematic texts engage the rhetoric and psychic effects of the law and the way they present different imaginaries of human bodies, communities, and temporalities. Our focus will be on African American, African diasporic, Latina/o/x and Indigenous literatures and cinemas, as they reveal the rifts and conjunctions among the categories citizen, "savage," "gente sin razón," slave, illegal, pervert, and deviant.

ENGL351 Debate and Destruction: Jews and Christians in the Middle Ages

This course will consider relations between the Jewish minority and their Christian neighbors in England before the Jews' expulsion in 1290. We will also look at how the Jews are depicted in subsequent Christian writing. We will read texts originally written in Hebrew, French, and Latin (all in translation) as well as English, giving us a sense of the conversations that took place between two groups that were both inextricably bound together and set apart by centuries of conflict and persecution. Among the issues we will explore are the popularity of Jewish-Christian debate as a literary form, the Crusades, gender roles and gender fluidity, Jewish and Christian apocalyptic programs, and the curious afterlife of Jews in Middle English literature..

ENGL353 Race, Ethnicity, and Religion in Medieval Literature

Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question by considering the invention of medieval ideas of race, ethnicity and religious difference. Our focus will be on a selection of texts dealing with encounters--real and imaginary--of Western European Christians with cultures from the Mongol Empire to the Celtic "borderlands." The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts and, above all, romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasy.

ENGL354 Reading and Rereading Moby Dick

For many, Herman Melville's Moby Dick is the greatest novel in all of American literature, an undisputed classic. "It is a great book, a very great book," D.H. Lawrence declared. "It moves awe in the soul." E.L. Doctorow once proclaimed that American literature begins with Moby Dick, "the book that swallowed European civilization whole." When Moby Dick was first published, however, it was a critical and commercial failure. This class will encourage students to reflect on the nature of literary experience by reading Moby Dick twice. We will try to figure out why readers overlooked the novel when it was originally published, and why readers later, after a second closer inspection, gained a greater appreciation for the novel. We will think about what happens when we encounter a text for the first time, and how different kinds of meaning might accumulate over multiple readings. We will consider whether twentieth-century institutional structures, from the modern seminar to the cheap trade paperback, made Moby Dick more likely to be read and reread. In the end, this course offers students the chance to study a literary classic in depth. We will read and reread Moby Dick to better understand how literature works, and how American literary history has taken shape.

ENGL355 Scribes, Book Worms, and Bibliomaniacs: The Thrall of the Book

Even in the age of electronic and audiobooks one still hears book lovers exclaim on the unique sensation of "holding the physical book," the smell of its pages, and the pleasures (or transgressions) of being able to write notes in one's own physical copy. Loving books thus amounts to more than reading text, it often involves a relationship with the physical objects of books. The course has a two-

pronged focus: the history of the evolution of the book as medium and the literature on the creation, collecting, and circulation of books. This means that we will be tracing the evolution of reading and writing as technologies on the one hand, and reading literary representations of this evolution on the other. Our discussions of bibliomania and the preservation impulse of archivists and book collectors will be accompanied by practical exercises with physical books in Special Collections.

ENGL356 Theories of Translation

This course will examine a range of predominately 20th-century theoretical approaches to literary translation in the fields of philosophy, linguistics, literary criticism, and translation studies. In an effort to derive a definition of literary translation, we will focus on two questions. First: What is literal (or word-for-word) translation? How does it differ from other kinds of translation; how does it conceptualize meaning; what are its purposes; and what oppositions (e.g., literal vs. figurative) can we use to make sense of it? Second: What is the relationship between language and culture? Can translation give us access to an unfamiliar culture; can literary translation affect the culture in which it is produced; or does translation simply colonize foreign texts by transforming them into something legible to a domestic culture?

ENGL358 Writing the War on Terror: Crafting Literary Responses to Fiction, Film, and Television after 9/11

In this interdisciplinary, mixed-genre writing seminar, students will create works of creative non-fiction--book and film reviews, op-ed pieces, and memoirs--and short fictional pieces as they explore the ways contemporary literature and film have depicted the post-9/11 War on Terror. They will watch documentaries by Laura Poitras, as well as Alex Gibney's We Steal Secrets: The Story of WikiLeaks. They will read fiction by Mohsin Hamid, Elina Hirvonen, Deborah Eisenberg, and Martin Amis, and nonfiction prose by Dunya Mikhail, Pankaj Mishra, and George Packer. There will be a significant workshop component to this course. Students will focus on presenting their ideas in sophisticated, accessible prose, paying close attention to language, style, and syntax at the line and paragraph levels.

ENGL359 Criticism and Marxism

This course introduces students to the Marxist (or historical-materialist) tradition, with accent on its centrality to interpretative methods in literary studies and related fields in the human sciences. We will study foundations, beginning with Marx and Engels, and our reading will carry us through the range of Marxisms that inform contemporary critical practice. We will focus on historical materialism as a style of dialectical thought, uniquely equipped to grasp both our immediate objects of study (literary texts and other cultural productions) and the social forces through which those objects are determined. In the same dialectical mode, we will reflect often on the relation between our work in the classroom and our contemporary social and historical situation. Students with an interest in literary and social theory will benefit from the course, as will students who know a little bit about Marxism but want to understand the logic of this crucial body of thought.

ENGL360 Special Topics: Writing Lives

In this course, students will read profiles, biographies, and theories of biography, texts that focus on the stakes of writing the lives of women, people of color, people with disabilities, and queer subjects. As we analyze these attempts to capture a life, to define the problems of this form, and to expand its possibilities, students will work on their own biographical writing. Throughout the semester, we will ask: Whose lives get written, and by whom? What constitutes evidence of a life, according to whom--and what gets left out? What kinds of research are necessary? How does a writer's relationship to her subject inform such a portrait, and what are the ethics of that relationship?

ENGL361 After Orientalism: Asian American Literature and Theory After 2000

From early articulations of cultural nationalist pride to today's transnational, intersectional, deconstructive, feminist, and queer critiques, Asian American studies is a field that has radically expanded and transformed since its original emergence out of the Third World and student strikes of the late 1960s. This course seeks to take the temperature of Asian America today by exploring a range of contemporary works published after the millennium, more than 30 years after the field's inception. Alongside a selection of novels, poetry, short stories, and graphic novels by some of the most acclaimed contemporary writers in America, we will also consider critical and theoretical texts that offer different perspectives on our contemporary historical moment, exploring frameworks of modernity, postmodernity, neoliberalism, and the university as ways of situating contemporary Asian America's aesthetic innovations.

Though not required, it is strongly recommended that students have taken ENGL230 Introduction to Asian American Literature or a comparable substitute prior to enrolling.

ENGL362 Friendship and Collaboration: In Theory, In Practice

How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, black thought, and indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness.

This counts as an Expanded Field of Theater course for the Theater Major.

ENGL363 The Sounds of Black and Brown Performance

This course organizes itself as a scene of listening with care to black and brown sounds, where listening is conceived as a mode of audience engagement of performances informed by avant-garde, queer, and critical race theories. Listening, then, is part of the artistic-theoretical practices that students will both read about and act out in this course. Here, we will engage theater, dance, and performance with the demand of listening in brown for the distinct sounds made in different performances, whether by identifiably racialized artist-subjects or not, and how they compel us to think of embodiment. If to say black is to say abjection, prison, AIDS, as well as the generative, the contra-rationally beautiful (Moten), and if to say "gender-y" is to say threatening, off-kilter, violatable, as well playful, and transformative (Sedgwick, Doyle), then what happens when we listen in brown, that is, with the headphones of melancholia, depression, as well as wildness, the excessive, the "hot and spicy" as critiques of the violence of the whitened norm (Muñoz)?

ENGL365 Ethics and Literature

P. B. Shelley's claim that "the great instrument of moral good is the imagination" lacks the 20th-century pessimism of his inheritor, W. H. Auden, who wrote that "poetry makes nothing happen." Beginning from this disagreement about the influence of creative work on social and material relations, this course will explore the ethical effects of aesthetic production. Drawing on a historically broad set of readings--from the Enlightenment and Romantic period through the 21st century--we will look at how writers and philosophers have addressed the relationship between literary and cultural works and moral transformation. These works help us examine how "words are also deeds," as Wittgenstein puts it.

ENGL367 Nature Description: Literature and Theory

What happens to the world when we describe it using language? What happens to language? Do different modes of description and figurative language do different things to the world? Might we think of such modes--and the literary genres that offer them--as tools that help us approach and understand nature? And in what ways do these modes and the unexamined assumptions that structure them limit what we can see? How much can we really know about nature as it is, in itself, outside of our representational strategies? Further, how have modes of description changed over time, and what can we today learn from studying other ways of understanding how language reflects, touches, and transforms the material world?

This course will grapple with big questions about nature, language, literary form, and human minds--as well as the complex interactions between and among these. We will seek answers by attending closely to both literary and theoretical texts.

ENGL369 Sex, Death, and God: English Metaphysical Poetry from Donne to Marvell

This course surveys 17th-century English metaphysical poetry, a body of verse known for both its formal experimentation and its transgressive choices and combinations of subject matter. Surveying poetry by the major metaphysicals (e.g., Donne, Herbert, Marvell), as well as lyrics by more minor poets, we will examine the central concerns of the metaphysical lyric: sex, death, God, and politics. We will think about how these authors used poetry to imagine a whole range of bodies and desires, from Crashaw's homoerotic "liquid poetics" to Donne's intertwined desires for profane and divine love to Marvell's imaginative preoccupation with plant bodies and their sexuality. We will discuss how these poems think about the prospect of death and what comes after, as their authors imagine their future selves as skeletons, as angels, as dust and their poems as tombstones, as wills, as relics. We will talk about 17th-century Christianity, asking how these poems characterize the relationship between the human, organized religion, and the divine, as well as how these poems imagine other religious traditions. Finally, we will think about politics, asking how and if these famously self-contained, abstract lyrics engaged with contemporary political issues from changes in agricultural labor to New World exploration to the regicide of Charles I.

ENGL371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora

This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

ENGL372 Race, Violence, and Resistance: Pauline Hopkins and Charles Chesnutt

This course undertakes to look at the careers of two African American writers who flourished at the end of the 19th and the beginning of the 20th centuries. Through an exploration of a range of their published writings--novels, short stories, political and historical essays, biographical sketches, and journalism--we will attempt to understand some of the key cultural, social, and political issues of the era in which they wrote. We will also see the ways these two different writers conceived of and entered the literary marketplace, and how the independent venues and established publishing houses with which they were associated affected their artistry. In the end, an examination of two writers of different temperaments, different literary sensibilities, and different political affiliations will help us more profoundly understand the remarkable challenges African American writers faced during the decades from 1890 to 1910.

ENGL373 From Courtly Love to Cannibalism: Medieval Romances

Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist loses gender, skin color changes with religion, and a dog might be the hero of a tale. In this course, we will begin with texts that date from the Romance's origins in 12th-century France and continue with the form's development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur's court. Some of the topics we will consider are Romance's engagement with the religious and ethnic conflicts of the Crusades, theories of good and bad government, and of course, Christian mysticism and the Holy Grail.

ENGL374 Special Topic: Unreliable Narrators

An unreliable narrator may be devilish or deceitful, but any of us can become unreliable narrators when forced to confront and explain unpleasant truths. In this special topics course we will study the unreliable narrator in both fiction and nonfiction. We will examine how the subjectivity of all narrators gives them

limited access to the truth, and how we can use this interesting psychological phenomenon in our own writing.

ENGL375 Black Global Cities

In this course, we will analyze representations of cities and Black urban modernity in Afro- diasporic literature of the twentieth and twenty-first century. Placing special emphasis on the global hubs of London, Cape Town, Kinshasa Lagos, New York, Marseilles, and Kingston, we will ask what makes these former imperial sites Black global cities? We will read literary works on and from Black Global Cities alongside sociological texts on urbanization, globalization and discuss the extent to which literary representations either collude with or challenge dominant national and transnational narratives about Black urban modernity. Although each week's readings will focus on a different location, we will approach these locales as nodes in larger global networks of people, texts, and goods rather than as discreet, bounded places. To this end, we will trace how histories of racial formation move across borders and are transposed onto different spaces, and to what effect. Authors we will read include: Claude McKay, James Baldwin, Gabeba Baderoon, Petina Gappah, Kei Miller, and Teju Cole. We will also watch films such as *Girlhood* (2014), *Black Panther* (2018), *The Harder They Come* (1972), *Bad Friday: Rastafari After Coral Gardens* (2011), *Welcome to Nollywood* (2007).

ENGL376 The New York Intellectuals

This course is a research seminar on the lives and work of the small group of mainly Jewish left-wing intellectuals who reshaped American culture in the two decades after World War II. We will consider how it was that a small group of poor Jewish kids, who had grown up thinking themselves marginal to American society, ended up becoming among the most revered and influential intellectuals of the postwar era. Our main focus will be on the development of their ideas about art, politics, and culture and on the way their ideas bore fruit in some of the important literary expression of the postwar decades. But we will also consider the sociological and political factors that help explain their rise to influence. Among the writers whose work we will discuss will be Woody Allen, James Baldwin, Daniel Bell, Saul Bellow, Ralph Ellison, Clement Greenberg, Elizabeth Hardwick, Irving Howe, Alfred Kazin, Irving Kristol, Dwight Macdonald, Mary McCarthy, Norman Podhoretz, and Lionel Trilling. Readings will include critical essays, novels, poems, memoirs, and short stories. Viewings of paintings, photographs, and documentary films will be recommended.

ENGL379 Special Topic: Writing the Sonnet

The sonnet is one of our oldest and most ubiquitous poetic forms. For centuries, writers as disparate as William Shakespeare, Marilyn Nelson, Wanda Coleman, and David Wojahn have dabbled, innovated, succeeded, and sometimes failed with the form. In this course, we will explore the demands and nuances of the sonnet, in an effort to discover what has attracted and continues to attract so many practitioners. By semester's end, students will possess greater facility with the form itself, as well as skills and techniques that may be of use when composing future poems, whether formal or free-verse.

ENGL380 Special Topics: Prosody and Poetic Forms

In this course, we will study various forms--received and organic, traditional and non--from the inside out. We will also explore the uses and effects of metered verse. By the end of the semester, students will possess both a historical and applied understanding of prosody and of each form covered. More importantly, they'll know why, when, and how some conventions and techniques work better than others, and will be able to apply what they've learned to their own poems, formal or otherwise.

ENGL382 Reading Between Freedom and Necessity

Mostly the culture of literacy has taken shape within a realm of freedom, seemingly distant from the needs of the body and the demands of sustenance. At the same time, the world represented within so much of the world's narratives, both truth and fiction, has been saturated in struggle and deprivation. In this seminar we will try to make some sense of this juxtaposition, freedom on one side and necessity on the other, to explore the flip side of the drama of revolution in modern times. For us, revolutions, those great upheavals that unite hope with practical action, will be the background against which we will try to understand the gravity and persistence of dispossession itself: the pull of past or residual forms of unfreedom in the sphere of cultural representation, within and against new or emerging expressions of emancipation, themselves accompanied or countered in modern times by ever-novel styles of exploitation.

ENGL386 Special Topics: Improvisation--Collaborating with the Unknown

To improvise is to compose as one goes along, to arrange the unexpected, to make work from whatever materials and sources are at hand without previous planning. In this course, students will cultivate their relationships with what lies outside their realm of knowledge or experience in order to invent unforeseen but dynamic written works. We will study contemporary practitioners (e.g., poets, composers, essayists, dancers, and visual artists), who use found materials, somatic experiments, creative acts of translation, divination, and other innovative modes of improvisation to generate work. Together, while always keeping language close, we will create a forum in which bewilderment guides us. The class will culminate in an installation of creative writing projects spanning fields.

ENGL387 Literature of London

This course examines the role of London in the literary imagination of 19th-century Britain. A vibrant multi-class and multi-ethnic jigsaw puzzle, London was a "world city" at the center of the empire, the seat of crown and Parliament, and a place of both danger and opportunity. In addition to being the economic and political center of Great Britain, some authors viewed London as the nation's narrative center as well. Together, we will explore how writers depicted the city, how they envisioned the relationship between urban living and modern life, how they understood London's inhabitants and their plots, and how they placed the city in networks of stories reaching around the world. Along the way, we will read works of literary and social theory from the 19th century to the present, and we will conduct our own investigations. This is a research seminar, and students will choose whether to undertake a single project culminating in a long paper (fulfilling the research requirement for honors thesis writers) or several smaller projects, which may also have a creative component.

ENGL397 Creating Children's Books II

In this course, each student, already experienced in writing for children, will create and illustrate a children's book, at the picture book or illustrated chapter book level. Assignments include examining a variety of children's books (from 1930 to the present) and emulating specific authors and illustrative techniques as we develop original work. We will discuss both text and illustration in published picture books, and the creative assignments and workshop discussions will focus

on both components, and their interaction. We will look at a range of questions: What is this book for? Who is it for? Does it appeal to children and adults in different ways? What assumptions does it make about the world of childhood and the relationships children have? How does it obscure, reveal, comment on, or attempt to change the truths of life--things like love, desire, satisfaction, hurt, difference, sickness, and death? What values or norms does it establish--or subvert? What do the words and pictures do to each other? What values or expectations are at stake as the story or pattern unfolds? We will use questions like these to help drive our experiments and revisions as we workshop all stages of our books.

ENGL450 Senior Seminar in Creative Writing

This course is for seniors interested in the chance to devote more time to their creative writing. Structured as a space for workshop and exchange, the goal of this class will be fostering a community of ideas for students who may be pursuing a creative writing thesis or other project, as well as those who might be working more independently. Our concerns and topics will be generated as a group with an eye toward flexibility with commitments. In part we will be exploring what it might mean to be a writer beyond the classroom. A spirit of generosity and adventure will be expected. We will be open to considering work in all its stages, and participants will have a part in setting readings to introduce issues and supplement concerns pertinent to ongoing writing, as we embark from inspirations to questions of generating goals, both as a group of writers and as individual artists.

ENVIRONMENTAL STUDIES (ENVS)

ENVS135 American Food

This course investigates topics in the history of food production from the colonial period to the present, with emphasis on the American contribution to the development of world food systems and cultures of consumption. Topics to be addressed include the production of agricultural commodities, development of national markets, mass production of food, industrialization of agriculture, and the recent emergence of organics, slow food, and local movements.

Prereq: **None**

ENVS197 Introduction to Environmental Studies

This interdisciplinary study of human interactions with the environment and the implications for the quality of life examines the technical and social causes of environmental degradation at local and global scales, along with the potential

for developing policies and philosophies that are the basis of a sustainable society. This will include an introduction to ecosystems, climatic and geochemical cycles, and the use of biotic and abiotic resources over time. It includes the relationship of societies and the environment from prehistoric times to the present. Interrelationships, feedback loops, cycles, and linkages within and among social, economic, governmental, cultural, and scientific components of environmental issues will be emphasized.

Identical With: **E&ES197, BIOL197**

Prereq: **None**

ENVS201 Sophomore Seminar in Environmental Studies

This course is designed to introduce students to critical methods for conducting research on environmental issues. Students will gain in-depth experience with methods and paradigms of inquiry from multiple lenses including arts, humanities, and the social and natural sciences as a primer for performing research in the ENVS major. We will explore environmental theory and management at various levels of organization from ecosystems to human communities and countries. This course will challenge the students to rethink the human-environment relationship by recasting policy and science in the context of social-ecological systems. Students will be responsible for weekly writing assignments and discussions on the critical environmental issues of our time. Through the process of reflection, writing, and discussion, students will engage in deep inquiry, exploration, and research of environmental issues and their potential solutions. In the process, students will learn and apply the four stages of scholarly research: (1) critique contemporary theory, (2) identify critical questions and research needs; (3) analysis; and (4) synthesis.

ENVS204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to documentary film, and critical discussion and debate. In this course, we will consider texts that investigate extreme worlds, from the far north and Antarctic to the forests of the Amazon, and discuss the ways these texts incorporate ethnography, social ecology, political economy, history, biology, and technology. In addition to extreme landscapes, we will dive into social, political, economic, and scientific "scapes," from race and migration to late liberal ideology to corporate/industrial influence on science. This course is designed to explore and challenge the term "Anthropocene" as well as tackle the question of probable futures versus fictional ones, questioning how narrative and drama are entangled in the dissemination of complex truths.

ENVS205 Sciences as Social and Cultural Practices

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some

of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

Offering: **Crosslisting**

Grading: **OPT**

Identical With: **GOVT206**

Prereq: **None**

ENVS211 History of Ecology

The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

Gen Ed Area: **SBS-HIST**

Identical With: **HIST221, SISP221**

Prereq: **None**

ENVS212 Introduction to Ethics

This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ

radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

ENVS216 Ecology

Ecology is the scientific study of interactions between organisms and their environment, both biotic and abiotic. We will look at how these interactions shape fundamental characteristics of populations, communities, and ecosystems. Topics will include predation, competition, symbioses, and effects of stress and resource limitation in diverse environments. We will cover important consequences of interactions such as coevolution, population outbreaks, ecological coexistence, patterns of biodiversity, ecological succession, species invasions, food web dynamics, nutrient and energy cycling, variation in ecosystem goods and services, and global change.

Identical With: **GOVT221**

Prereq: **None**

ENVS222 Metabolism and Technoscience

This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

ENVS223 Traditional China: Eco-civilization and Its Discontents

This course introduces students to the history of China from ancient times to the middle of the Ming Dynasty circa 1450. This is a period when China invented and reshaped its cultural identity by moving into new frontiers and creatively incorporating foreign ideas with indigenous practices. It is also a period when the natural environment was drastically transformed by agrarian civilizations and nomadic neighbors.

The course places concepts of sustainability in the center of the history of traditional China. We will explore the relationship between power and social

inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the imperial period. Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs? How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice?

ENVS226 Invasive Species: Biology, Policy, and Management

Invasive species account for 39 percent of the known species extinctions on Earth, and they are responsible for environmental damages totaling greater than \$138 billion per year. However, the general population has little knowledge of what invasive species are or what threats they pose to society. In this course, we will explore the biological, economic, political, and social impacts of invasive species. We will begin by exploring a definition of an invasive species and looking at the life history characteristics that make them likely to become pests. Then we will consider the effects of invasive species expansion on the conservation of biodiversity and ecosystem function, as well as their global environmental and political impacts. Finally, we will explore the potential future changes in invasive species distributions under a changing climate.

ENVS228 Going Green, German-Style: The Relationship to Nature, 1800--Today

Few countries display as active a commitment to protect natural resources and the environment as Germany. Its focus on renewable energies, recycling, and conservation in general is unique even by European standards, and in the U.S., Germany's policies on sustainability and environmental preservation are often held up as models. It is important to recognize, however, that Germans did not achieve this degree of environmental awareness overnight. Rather, it represents the result of centuries of contemplating, controlling, and conserving nature and cannot simply be transferred to other cultures. In this course, we will examine the German (and European) cultural tradition by analyzing artworks and texts from the past two centuries that have both expressed and shaped salient attitudes and emotional responses. The goals of the course are to provide insight into Germany's long and complicated history of defining and relating to nature and to allow you to reflect critically on your own attitudes toward nature and the environment.

ENVS229 Ancient Monuments: Landscape, History, and Memory

In this course, we will examine some of the most renowned sites from Greek and Roman antiquity, such as the Parthenon and the other monuments on and near the Athenian Acropolis, the Colosseum and Forum in Rome, and Pompeii. The aim is to get a broad understanding of their significance, and so the sources will include ancient texts, modern scholarship and travel narrative, and visual representations such as drawings and photographs. Because the course is

connected to a theme of "shifting landscapes," we will pay particular attention to the ways in which the ancient sites interact with their surroundings.

ENVS230F The Simple Life (FYS)

As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

ENVS233 Geobiology

Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology); typically, this involves studying fossils within the context of their sedimentary setting. In this course we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on climate.

ENVS235 Science of Sustainability

What is sustainability? It most certainly is not switching light bulbs or "buying organic," although perhaps those activities contribute to sustainability. The task for our course will be to undertake a scientific inquiry into the conditions for an enduring human presence on Earth. To do so, we must begin with physical principles, examining both what humans require and demand from the world and what the world is capable of providing. Our inquiry will broaden to include chemical and ecological principles, ultimately asking what the social sciences can do to illuminate the problem without violating the physical constraints nature imposes.

Students should have a familiarity with quantitative and algebraic concepts and, above all, a desire to incorporate quantitative thinking into verbal discourse. Writing is also a core element of the course with frequent writing assignments in various formats.

ENVS241 Labor and Development Economics in Latin America

This course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at times on evidence from across the world for comparison with the Latin America region.

Students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss research results and work on individual or group projects. Basic quantitative methods will be taught throughout the course, relating to economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

ENVS242 Quantitative Methods for the Biological and Environmental Sciences

This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.

ENVS245 Climate, Change, and the Ancient World

Climate change has recently become shorthand for Global Warming, the clearcutting of rainforests, and the burning of fossil fuels. Yet while anthropogenic climate change on the global scale is indeed a modern phenomenon, climate change itself is nothing new, and human societies have been negotiating their natural world for millennia: adapting to changing conditions by inventing new technologies, adopting new social structures, and even modifying the landscapes around them.

Examples from around the world, including Africa, the Mediterranean, Australia, the Americas, Asia, and the British Isles, will be used to examine how past societies perceived and interacted with their environments. Aspects of collecting, analyzing and interpreting various climate proxies, and the theoretical foundations for interpreting their relevance to archaeological questions, will constitute major components of this course.

ENVS252 Industrializations: Commodities in World History

This course defines "industrialization" broadly to encompass the development and application of systematic knowledge to agriculture and manufacturing in 18th- to 21st-century societies. Although special attention will be devoted to the British and American examples, the course will be organized by commodity rather than nationality, focusing on traffic in materials used in production of food, clothing, and medicines, for example, cotton, rubber, guano, wheat, bananas, and quinine.

ENVS254 Architecture of the 20th Century

The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-aided design, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa.

Prereq: **None**

ENVS260 Global Change and Infectious Disease

Among the most insidious effects of global change are the expanded geographical ranges and increased transmission of infectious diseases. Global warming is bringing tropical diseases, such as malaria, poleward from the tropics; the extreme weather events of a changed world are leading to outbreaks of zoonotic diseases, such as those caused by Hantaviruses; and nonclimatic anthropogenic factors, such as forest fragmentation, are taking their toll on human health, for example, by increasing the incidence of Lyme disease. This course will cover the evidence that global change has increased the geographical ranges and rates of incidence of infectious diseases in humans, in agricultural animals and plants, and in endangered species. We will explore how interactions between different anthropogenic effects (for example, habitat loss and pollution) exacerbate the effects of global warming on infectious diseases. We will analyze and critique projections for future changes in geographic ranges in infectious diseases. Finally, we will cover how revolutions in bioinformatics will increase the resolution of tracking and predicting responses of disease organisms to global change. The course has no formal prerequisites and will introduce material from ecology and microbiology, as needed, to allow students to read and interpret the recent literature on global change and infectious disease.

ENVS264 Waterways: Maritime World History

Human history has been shaped by the sea. Whether as a source of food, a frontier, a boundary, or a bridge, the sea has represented a site of both opportunity and danger. This course will examine the way humans have responded to their marine and maritime environments, both in terms of the technologies they have developed to navigate and exploit them but also insofar as the sea has shaped the way humans think about themselves. While our inquiry will extend into the deep past and the early development of human culture and civilization, we will focus on maritime history over the past millennium, the development of oceanic worlds, the rise of the "age of sail" between the 16th and 19th centuries, and the transformation of global navigation and politics with the rise of steam, diesel, and nuclear power.

ENVS267 Development in Question: Conservation in Africa

"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, scientists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international and

governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine game park politics, the history of resource extraction, climate change, and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

ENVS268 North America Before Columbus

Sometime before the end of the Pleistocene, people living in Siberia or along the Pacific Coast of Asia traveled east and found an hemisphere of arctic, temperate, and tropical climates uninhabited by other humans. Over the next 12,000 years or more, populations diversified into, and thrived in, a range of environments--the last great experiment in human adaptation. This course will follow that process as it unfolded across the continent of North America, from the earliest Paleoindians through 1491. Particular emphasis will be on the nature and timing of the colonization(s) of North America from Asia, the impact of environmental diversity across the continent, and the rise of complex societies.

ENVS275 The American Landscaping in Painting, Literature, Science and the Popular Imagination

In a time of global warming, the issue of mankind's relationship with the natural landscape has never been more pressing. The course will focus on how the field of 19th-century American landscape painting helped stimulate new ideas about our place in the environment--for example spurring the creation of America's National Parks as well as of city parks and greenspaces designed to look natural, such as Central Park in New York. This course will also explore the notion of landscape more largely. What is our personal landscape, and how does it help define our personal identity? How can you detect traces of history in the landscape? In what ways is the American landscape unique, and how did scientists, writers and painters discover and respond to these qualities? How

should we respond to the crisis of global warming, which is rapidly transforming and upending our familiar landscape and even placing human existence at risk?

ENVS279 Eating Others: Histories and Cultures of Animal Edibility

For many people, animals form a significant and cherished part of their diet. Indeed, humans have used other animals as sources of nutrients for hundreds of thousands of years. What can these animal-based dietary practices tell us about humans and their relationships with other animals? Of course, these inter-species relationships have varied as radically across time and cultures as the dietary practices that have shaped them. To better understand some of these practices and the relationships they generate, this course will explore the following questions: How did animal-based food practices develop from pre-domestication to the contemporary era of industrialized animal agriculture? How have cultural categories of "edibility" developed in different cultural contexts? What is meat, and how does it differ from inedible flesh? How has gender, class, race, sexuality, and other categories of difference intersected with and shaped animal consumption practices in different times and contexts? How has animal consumption shaped and been shaped by animal ethics, philosophy, and scientific knowledge production? How has large-scale animal consumption contributed to the ecological crises of the Anthropocene, and how have these in turn affected animal consumption practices? What is the future of animal-based food?

This course will use ethnographies, historical and legal analyses, and philosophical inquiries to examine the histories and cultures of animal edibility. Specifically, it will focus on topics including human evolution, animal domestication, slaughter practices, industrialized animal agriculture, indigenous ecological ontologies, hunting, dairy and egg consumption, cannibalism, cultural conflicts over the edibility of specific species, and recent technological innovations that can produce animal products without animals.

ENVS280 Environmental Geochemistry

A qualitative and quantitative treatment of chemical processes in natural systems such as lakes, rivers, groundwater, the oceans, and ambient air is studied. General topics include equilibrium thermodynamics, acid-base equilibria, oxidation-reduction reactions, and isotope geochemistry. This course (together with the associated lab course, E&ES 251) is usually taught as a service-learning course in which students work with a community organization to solve an environmental problem. Previous classes have evaluated the energy potential of a local landfill and investigated the cause and possible remediation of local eutrophic lakes.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-EES**

Identical With: **E&ES250**

Prereq: **None**

ENVS281 Environmental Geochemistry Laboratory

This course will supplement E&ES 250 by providing students with hands-on experience of the concepts taught in E&ES 250. The course will emphasize the field collection, chemical analysis, and data analysis of environmental water, air, and rock samples. This course is often taught as service-learning course

where the class works with a community organization to solve an environmental problem. The course usually concludes with a public presentation of the work. Past service-learning projects have examined landfills, damned rivers, and polluted lakes.

Offering: **Crosslisting**

Grading: **A-F**

ENVS287 Performing the Posthuman: Music and Auditory Culture in the Age of Animantities

"Animantities" takes seriously the aural and performance worlds of the nonhuman. "Posthuman," according to the Oxford English Dictionary (OED), refers to the idea that "humanity can be transformed, transcended, or eliminated either by technological advances or the evolutionary process; artistic, scientific, or philosophical practice which reflects this belief." This seminar engages questions of musical difference by addressing posthuman performance, the musicality of animals, music that imitates nonhuman sound worlds, and cross-species and multi-species performance. Throughout the course, we will think across varied types of sounds to explore and contextualize familiar questions about how we sing, play, perform, stage, and sound musical identity, examining the intersections among the humanities, science and technology studies, and the sonic arts. Our explorations will cross through the fields of musicology, ethnomusicology, and sound studies. By listening across different kinds of sound cultures, we will interrogate how traditions of listening shape our habits of perceiving others, how we hear nonhuman animals, how we incorporate nonhuman sounding into music composed by humans, how technology has played a role in the study and development of nonhuman and human musicality, and what it means to listen to and value sonic difference more broadly. Through discussions of musical and cultural difference that enrich ongoing discussions of race, gender, and sexuality, we will come to a stronger understanding of music's role in imagined and experienced natural worlds. Topics and case studies will include audio bird guides, new age nature recordings, multi-species "collaborative" performances, sampled and electronically rendered animal

and nature performance in digital video games, wildlife field recordings and documentary sound design, forms of animal and environmental mimesis used by composers, the way nonhuman animal behavior influenced experimental music communities, and descriptions of the musicking of nonhuman animals by the National Audubon Society and other wildlife guides and field recording initiatives. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can succeed in this course without previous musical knowledge.

ENVS288 Music, Sound, and the Environment in the Anthropocene

In this course we will explore how environmental works have proliferated throughout the academy and how scholars across the humanities are re-evaluating the reciprocal relationships among society, culture, and the environment. Over the course of the semester we will explore the diverse and interconnected ways in which contemporary composers, popular musicians, sound artists, world music practices, and collaborative arts practitioners draw on natural and urban environments in order to comment on current environmental and energy issues, trauma, the relationships among the arts, humanities and science and technology studies, representations of the environment and the environmental past, and participate in social activism. Employing socially and environmentally engaged musicological analysis, this course will focus on five distinct areas: We will analyze how environmental sites and situations are represented in music; examine why environmentalist ideologies are integrated into the musical narratives and/or sonic choices made by the artist; address how artists conceptualize the environment and express their relationship to it; grapple with what motivates these artists to incorporate environmental commentary into their compositions, illustrating how sociocultural and environmental factors influence creative expression; and question how personal and societal values concerning relationships between society and the environment are disseminated and constructed through music. We will also explore the various ways in which nature, urbanity, and environment are constructed in the production, performance, consumption, and reception of music. Through our reading discussions, writing, and applied projects, some of the questions we will address include: How do the intersections of landscapes and cityscapes produce multifarious artistic responses? How are communities whose economy depend on, or historically depended on, energy and/or natural resource industries signified or evoked through music? How are past and present histories of place expressed, recorded, and remembered through detailed and affective sensory experience? How do we determine the health of our soundscapes? How is music and sound mobilized in social activism? How are notions of identity, as shaped by a physical environment and the ideologies connected to place, constructed and communicated? As we engage with the critical geography of sound, we will address the global networks, musical mobilities, circulation of sounds, traditions and musicians, and the ways in which landscape, mapping, urban planning, and landscapes are expressed in music.

ENVS290 Oceans and Climate

Earth's climate is not static. Even without human intervention, the climate has changed. In this course we will study the major properties of the ocean and its circulation and changes in climate. We will look at the effects of variations in

greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. We will look at these variations on several time scales. For billions of years, the sun's energy, the composition of the atmosphere, and the biosphere have experienced changes. During this time, Earth's climate has varied from much hotter to much colder than today, but the variations were relatively small when compared to the climate on our neighbors Venus and Mars. Compared with them, Earth's climate has been stable; the oceans neither evaporated nor froze solid. On shorter time scales, different processes are important. We will look at these past variations in Earth's climate and oceans and try to understand the implications for possible climates of the future.

ENVS303 Ukraine and Its Environment

International perspectives on environmental issues are critical in order to address the challenges facing the world. Developing an international perspective requires more than learning from printed literature—it requires in-country experience and the desire to be able to view issues through different cultural lenses. This course will provide such experience by learning about the diversity of Ukrainian environments, people, and cultures both in the classroom at Wesleyan and by traveling to Ukraine during Spring Break. During our time in Ukraine we will receive lectures in English from noted scholars, politicians, professors and scientists on topics such as environmental law, global environmental security, urban environment, environmental policy in developing states, and sustainable

development for the developing world. We will travel and learn from scientists at Chernobyl about the regeneration of forest ecosystems, learn from agronomists about agriculture on the steppes, and learn from politicians and scholars about Ukrainian environmental policy and their views of U.S. policies. We will also enter into round table discussions with university students to exchange ideas about potential international solutions and approaches to environmental problems. These are just some of the experiences that are planned for our visit. Ukraine, as a pivotal democracy of the former Soviet Bloc, is an amazing place to witness how a nation wrestles with dramatic changes in policy. At the same time Ukraine is culturally diverse, which presents interesting challenges to formulating fair and cohesive policies.

ENVS307 The Economy of Nature and Nations

On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek *oikos*, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the *oikos* over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

ENVS310 The Economics of Sustainable Development, Vulnerability, and Resilience

This course will build on the first principles of economics as applied to sustainable development and decision making under uncertainty. One of the course's major objectives will be to explore how efficiency-based risk analysis can inform assessments of vulnerability and resilience from uncertain sources of external stress in ways that accommodate not only attitudes toward risk but also perspectives about discounting and attitudes toward inequality aversion. Early

sessions will present these principles, but two-thirds of the class meetings will be devoted to reviewing the applicability of insights drawn from first principles to published material that focuses on resilience, vulnerability, and development (in circumstances where risk can be quantified and other circumstances where it is impossible to specify likelihood, consequence, or both). Students will complete a small battery of early problem sets that will be designed to illustrate how these principles work in well-specified contexts. Students will be increasingly responsible, as the course progresses, for presenting and evaluating published work on vulnerability and resilience--offering critiques and proposing next steps. Initial readings will be provided by the instructor and collaborators in the College of the Environment, but students will be expected to contribute by bringing relevant readings to the class from sources germane to their individual research projects. Collaboration across these projects will thereby be fostered and encouraged by joint presentations and/or presenter-discussant interchanges.

ENVS314 Environmentalism in a Global Age

Over the second half of the 20th century, popular movements in the United States and around the world achieved landmark protections for the environment. Yet in that same period, accelerating globalization and the emergence of transnational environmental issues like acid rain threatened to undercut the effectiveness of national laws and regulations. This seminar investigates how environmental activists have responded to a range of challenges in the global age, from economic development and species conservation to population growth and Malthusian family planning campaigns. As those two examples suggest, environmentalists have engaged with key developments in the modern world, in sometimes troubling ways. Although the subject matter is historical, this course will also focus on what the history of global environmentalism can contribute to contemporary advocacy, not least with regards to climate change.

ENVS316 Community Research Seminar

Small teams of students will carry out research projects submitted by local community groups and agencies. These may involve social science, natural science, or arts and humanities themes. The first two weeks of the course will be spent studying the theory and practice of community research. Working with the community groups themselves, the teams will then design and implement the research projects.

ENVS325 Healthy Places: Practice, Policy, and Population Health

The built environment influences many aspects of health and well-being: psychological stressors (crime, noise, and violence), what people eat, the water they drink, the air they breathe, where (or if) they work, the housing that shelters them, where they go for health care, what social networks are available for support, and how political power is distributed and public resources allocated. How cities, suburbs, and rural areas are managed; local policy; and planning and design decisions can all help determine whether the places we

live will be threats to public health and, perhaps more important, to an aging society. The focus of this course connects the fields of planning, psychology, and public health to explore contemporary challenges (and innovations) in the 21st-century built environment. Students will explore the multiple forces that impact population health, how to analyze these determinants, and what roles planning and public health agencies, as well as other institutions such as local governments, civil society, the private sector, and communities themselves, can play in research and action aimed at improving physical and mental health.

ENVS330 Special Topics: Eco-poetics - Experimental Poetry in the Anthropocene

How do poets speak for and from a world in flux and crisis? How do poets register and attempt to restore the degradation of the planet through language? How might altering the boundaries of conventional language use--through poetry--alter the bounds of conventional thinking and behaving, thus leading to more engaged and sustainable modes of living? This course, in part, will serve as a tour of contemporary eco-poets invested in looking at and caring for the current state of our planet through poetry. We will read poems that reflect the most critical environmental concerns of our time and we will learn to see how these poems resist closure and are instead guided by experimentation, exploration, and interrogation in an attempt at reorienting our attention and intention as inheritors of this planet.

This is a workshop for students committed to developing an understanding of eco-poetry's place in the more-than-literary world, as well as developing a personal eco-poetics from which to write, read, and live. Students will choose an environmental topic to research and write in service of for the semester and, by the end of the semester, each student will have written a project-centered collection of eco-poems. There will be bi-weekly presentations on the poetry collections we read, in-class writing experiments, and intensive workshops of one another's work. The class will culminate in an ecobook arts project and reflective essay.

ENVS337 The Origins of Bacterial Diversity

Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

ENVS347 Ethics, Ecology, and Moral Change

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

ENVS352 Energy and Modern Architecture, 1850--2015

This seminar explores the evolution of mechanical systems for heating, ventilating, and cooling in modern architecture from the mid-19th century to the present. The aim is to show how architects, engineers, fabricators, and urban governments worked to develop modern systems of environmental controls, including lighting, as means of improving both the habitability of

buildings and health of their occupants. The course will trace the adaptation of technical innovations in these fields to the built environment and how those responsible for it sought to manage energy and other resources, such as funds and labor, to create optimal solutions for different building types, such as factories, theaters, assembly halls, office buildings, laboratories, art museums, libraries, and housing of various kinds, including apartment buildings for higher- and lower-income residents. An important theme will be the relationship of energy systems for individual buildings and urban infrastructure, including water systems, electrical, and other utilities. The last part of the course focuses on contemporary green, or sustainable, architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling, LEED certification, wind and geo-exchange energy, green skyscrapers, net-zero energy buildings, vertical farming, and zero carbon cities in the United States, Europe, and Asia.

Identical With: **BIOL354**

Prereq: **BIOL182 or BIOL197**

ENVS359 Space Design for Performance

In this course, students will study, construct, and deconstruct the performative space, whether theatrical or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software, utilizing design-technology tools, such as laser cutters and 3D printing, to develop and enhance their work.

ENVS361 Living in a Polluted World

This course treats the occurrences and origins, natural pathways, toxicologies, and histories of the major environmental contaminants. We all know about lead and its effects on humans, but how about cadmium and hexachromium, or the many unpronounceable organic contaminants, usually referred to by some acronym (e.g., DDT, POPs)? To be effective in this course, students will need basic college-level proficiency in chemistry and math as we will delve into aspects of geochemistry, geology, toxicology, environmental law, and some math. The class consists of lectures, one major problem set, the Hg-in-hair class study, and a class project on pollution records from a 125-year-old tree slab that has year rings. We will drill all rings and analyze the wood for Hg, Pb, nuclear contaminants, and several stable isotopes. Some will do a paleoclimate record on the rings as well. Students will jointly write various sections of a report on this original research. This is also a service learning course, providing environmental outreach to the larger Middletown community on local pollution over the last 125 years (the tree slab with its records will go on display at Wesleyan).

ENVS369 Ecological Resilience: The Good, the Bad, and the Mindful

This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.

ENVS381 Japan's Nuclear Disasters

The atomic bombings of Hiroshima and Nagasaki in 1945 are central to the history of the 20th century. This course examines the scientific, cultural, and political origins of the bombs; their use in the context of aerial bombings and related issues in military history; the decisions to use them; the human cost to those on whom they were dropped; and their place in history, culture, and identity politics to the present. Sources will include works on the history of science; military, political, and cultural history; literary and other artistic interpretations; and a large number of primary source documents, mostly regarding U.S. policy questions. In addition, we will be examining the development of the civilian nuclear industry in Japan with a focus on the nuclear meltdowns in Fukushima and other accidents. This is an extremely demanding course.

This interdisciplinary, experiential, and experimental course combines studio learning (movement studies and interdisciplinary, creative exploration) and seminars (presentations and discussions). No previous dance or movement study is required, and the course is not particularly geared toward dancers or performers. However, your willingness to experiment on and share movement is important. We encourage you to think about movement as a method of accessing human experiences and making distance malleable, a way to explore your own sensations, thoughts, and reactions in learning history.

ENVS440 Painting II: The Shifting Landscapes of the Mind, Nature, and History

Since the beginning of time, people have created art to document events in nature and society and to convey ideas and emotions as they responded to shifting conditions in the world--be they man-made or natural. Before written language, visual expressions of morality, concepts of the future, and abstract thought in the sciences and religion were represented in painting. Whenever dramatic shifts were experienced in society, painting documented them and commented on them. In this class, the skills and knowledge gained in ARST239 will serve as the foundation upon which students will be challenged to become technically proficient while they explore the topic of shifting landscapes or the shifting viewpoints of the mind, history, and nature. The themes, prompts, and concerns addressed in this course will allow for any formal, conceptual, or stylistic form of expression to resolve them--each student will be working differently. The goal of this class is for students to become fluent with the medium and make aesthetic choices that can best convey their ideas about and responses to each prompt. Lectures and meaningful class discussions will provide information and feedback about historical and contemporary issues and the plans for work. Individual and group critiques as well as museum and gallery trips will complement class work.

FEMINIST, GENDER, AND SEXUALITY STUDIES (FGSS)

FGSS115F Reporting from the Inside: Journalism, Activism, and Intimacy (FYS)

What is the role of the reporter in today's divided and divisive America? While one approach has been to dip into the lives of others, get the story, and get out, this class will focus on pursuing the deeply human stories that matter most to you, guided by your own experience so that you can intimately connect with your subjects, your world, and yourself. From Black Lives Matter to the #MeToo movement to LGBTQ and Trans Rights, we are seeing writers and activists reporting events in real time, as they happen to and around them, celebrating the journalist as participant. This is hardly a new phenomenon. Many major historical moments--the Great Depression, the fight for Civil Rights and Women's Rights, the AIDS crisis--have had reporters on the inside, covering their own communities. In this First Year Seminar, students will immerse themselves in this kind of "intimate reporting" and its historical contexts, and also create a newsroom of their own design: learning the fundamentals of journalism through story idea meetings, research, and interview strategies; editing and fact-checking techniques; social media engagement; and pitching their work. Students will leave the class with a portfolio of writing that explores, from their own points of view, issues of gender, class, race, and sexuality.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-FGSS**

Prereq: **None**

FGSS117F Social Norms and Social Power (FYS)

This FYS is an interdisciplinary exploration of the privileges and penalties associated with "the normal" in the United States. We will think through the intersections of queerness, race, ethnicity, class, disability, and gender in terms of social power, drawing on novels, ethnographies, memoirs, and films. Throughout, we will pay particular attention to the ways bodily difference and social identity interarticulate with "normalness" to locate individuals within hierarchical power structures, and we will think creatively about ways to challenge this.

FGSS123 Love, Sex, and Marriage in Renaissance Europe

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and

female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

FGSS130F Thinking Animals: An Introduction to Animal Studies (FYS)

The question of "the animal" has become a recent focus across the disciplines, extending debates over identity and difference to our so-called nonspeaking others. This course will examine a range of theories and representations of the animal to examine how human identity and its various gendered, classed, and racial manifestations have been conceived of through and against notions of animality, as well as how such conceptions have affected human-animal relations and practices such as pet-keeping and zoos. We will seek to understand the desire to tame or objectify animals as well as evidence of a contrasting desire that they remain guardians of inaccessible experience and knowledge. Readings may include Darwin, Poe, Kafka, Mann, Woolf, Coetzee, and Hearne.

FGSS164F Hurting (FYS)

This course examines representations of harm (both received and enacted) at the intersections of race, gender, class, and sexuality. Through engagement with both artistic and social movements, we will explore questions about the ethics of representing pain. How do artists navigate depicting pain without simply reproducing violence? What constitutes an effective apology? (How) can complexly narrating the harm one has inflicted on others offer a reckoning rather than an excuse? How might we consider the relationship between identity and formal artistic choices, and how might such considerations open onto a more rigorous engagement of the social spaces texts make? How might we imagine and enact ecologies of care in the midst of ongoing histories of harm? We will consider these questions across media and genre and amidst structured self-reflection.

Offering: **Host**

FGSS175F Staging America: Modern American Drama (FYS)

Can modern American drama—as cultural analysis—teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will

introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

FGSS200 Sex/Gender in Critical Perspective (FGSS Gateway)

Feminist, gender and sexuality studies is an exciting interdisciplinary field that addresses gender, sex, and sexuality as well as related issues of race, class, nation, and citizenship across multiple disciplines, epistemologies, methods, and vantage points. At its most fundamental, the field addresses how persons are identified and identify themselves as similar to and different from each other and the relation of these categories of difference to power relations. The study of feminist and queer thought on sex/gender and sexuality offers a critical lens through which to examine social structures and social problems, inequality, difference and diversity, identity and the self, belonging and community, and the possibility of social change, among other topics. This course will offer a broad introduction to the field and provide a foundation for further study of specific areas of interest. The primary goals are to (1) explore the multiple ways feminist and queer scholars have understood sex, gender, and sexuality; (2) explore different methods and styles of feminist thought and expression; (3) situate these in time and place, with attention to historical and cultural contexts; and (4) explore the intersections of sex, gender, and sexuality with race, nation, and other categories of difference. The course will cover aspects of first-wave feminism (e.g., suffrage and the abolitionist movement); second-wave feminism and critical theories of sex/gender; and contemporary feminism, including queer theory, intersectionality and race, and transnational and postcolonial feminism.

FGSS200F Sex/Gender in Critical Perspective (FGSS Gateway)(FYS)

Feminist, gender and sexuality studies is an exciting interdisciplinary field that addresses gender, sex, and sexuality as well as related issues of race, class, nation, and citizenship across multiple disciplines, epistemologies, methods, and vantage points. At its most fundamental, the field addresses how persons are identified and identify themselves as similar to and different from each other and the relation of these categories of difference to power relations. The study of feminist and queer thought on sex/gender and sexuality offers a critical lens through which to examine social structures and social problems, inequality, difference and diversity, identity and the self, belonging and community, and the possibility of social change, among other topics. This course will offer a broad introduction to the field and provide a foundation for further study of specific areas of interest. The primary goals are to (1) explore the multiple ways feminist and queer scholars have understood sex, gender, and sexuality; (2) explore different methods and styles of feminist thought and expression; (3) situate these in time and place, with attention to historical and cultural contexts; and (4) explore the intersections of sex, gender, and sexuality with race, nation, and other categories of difference. The course will cover aspects of first-wave feminism (e.g., suffrage and the abolitionist movement); second-wave feminism and critical theories of sex/gender; and contemporary feminism, including queer theory, intersectionality and race, and transnational and postcolonial feminism.

FGSS201 Junior Colloquium: Critical Queer Studies

This junior colloquium will give you a solid theoretical foundation in the field of queer studies. Although "queer" is a contested term, it describes--at least potentially--sexualities and genders that fall outside normative constellations. However, as queer studies has been institutionalized in the academy, in popular culture, and in contemporary political movements, many argue that today, "queer" has lost its political charge. This course, a reading-intensive seminar, will give you the opportunity to explore this history and these debates. We will start with some of the foundational works in queer theory and then move to tensions and unlikely correspondences between queer theory and critical race theory, trans studies, queer anthropology, Marxism, feminist theory, and disability studies. Rather than understanding queer studies as a singular or bounded school of thought, we will continuously problematize queer studies as a field and a mode of analysis, asking, What kinds of bodies or desires does queer describe? What are the politics of queer? What are the promises of queer theory, and what are its perils? What is the future of queer?

This course is excellent preparation for a queer studies concentration in American studies. Students should expect to end the semester confident of their ability to read queer theory, critique it, and imagine the uses to which queer theory might be put.

FGSS204 Latina Historical Narratives (FGSS Gateway)

In this course, we will engage the historical experiences of Latinas through a range of historical and literary narratives. Using a comparative approach as well as exploring issues of race, class, gender, and sexuality, this course will address a number of themes relevant to the lived experiences of these women, including migration, labor, education, cultural negotiations, and transnational family and economic relations. We will consider questions such as: How does migration impact the cultural and gendered understandings of themselves as Latina women? How do Latinas (re)imagine the histories of Mexican-Americans, Puerto Ricans, Cuban-Americans, and transnational Dominicans in the U.S.? How do Latinas challenge definitions of womanhood in their literary and historical narratives?

FGSS205 #Sayhername: Intersectionality and Feminist Activism (FGSS Gateway)

The hashtag #sayhername has been used throughout social media in the past few years to bring awareness to the ways in which African American women and other women of color have been both targeted and silenced by racialized and sexualized violence. This course aims to provide a broader historical and cultural context to this movement by "saying the names" of the many women of color who have organized feminist intersectional movements against racism and patriarchy. We will explore the ways African American, Latina, Asian American, and Native American women have challenged patriarchy within and outside of their own communities through both overtly feminist organizations and within movements for racial and class justice such as labor and cultural nationalist movements. Finally, we will look at contemporary expressions of feminist activism by women of color that problematize definitions of feminism.

FGSS206 Introduction to African American Women's History

This course offers a solid foundation in the history of black women in the United States, from the 17th-century beginnings of North American slavery to the present. Using a broad range of primary and secondary sources, from writings by and about enslaved women to films and documentaries, we will examine the experiences, voices, and contributions of everyday black women as well as famous figures in African American women's history. Major questions of the course will include how black women forged political and social movements that transformed the United States, even as they faced the constraints of slavery, segregation, and gender-based exclusion. Students will practice reading, thinking, speaking, and writing critically about a range of historical sources and questions, with an aim of understanding how race, gender, class, legal status, and sexuality have intersected to shape the lives of African American women throughout U.S. history.

FGSS209 Feminist Theories

How does "feminist" (a political commitment) modify "theory" (an intellectual practice)? We will address this question by reading a range of contemporary feminist theorists working to analyze the complex interrelations of social differences (gender, race, class, sexual orientation, religion, and so on), and relations of social domination and economic exploitation in a globalized world. The question, What is to be done? will oversee our work.

FGSS210 Ethics of Embodiment (FGSS Gateway)

Why is the human body such a contested site of ethical concern? Why are bodies thought to be so in need of description and regulation? Sexual practices, gendered presentations, bodily sizes, physical aptitudes, colors of skin, styles of hair--all are both intimately felt and socially inscribed. Bodies exist at the intersection of the most private and the most public and are lived in relation to powerful social norms. In this course, we turn to the critical work of feminist and queer scholars committed to analyzing how bodies matter.

FGSS215 Buddhism and the Body: Desire, Disgust, and Transcendence

This is a course about the body and the various ways that Buddhists have constructed, disciplined, despised, and venerated the human body. We will explore the Buddhist body in its various incarnations: the disciplined monastic body of monks and nuns, the hyper-masculine body of the Buddha, the sacred corpses of saints, the body given away in sacrifice, the body as marker of virtue and vice, the sexual body, the body transformed in ritual, and the body as understood in Buddhist medicine. Careful attention to ancient and modern Buddhist writing should enrich our understanding of what it means to inhabit a human body.

FGSS216 Global America: Gender, Empire & Internationalism Since 1890

This course explores the cultural history of America's relationship to the world across the long 20th century with particular attention to the significance of gender and sexuality. We will locate U.S. culture and politics within an international dynamic, exposing the interrelatedness of domestic and foreign affairs. While exploring specific geopolitical events like the Spanish-American War, World War I and II, and the Global Cold War, this course emphasizes the political importance of culture and ideology rather than offering a formal overview of U.S. foreign policy. How have Americans across the 20th century drawn from ideas about gender to understand their country's relationship to the wider world? In what ways have gendered ideologies and gendered approaches to politics shaped America's performance on the world's stage? How have geopolitical events impacted the construction of race and gender on the home front? In the most general sense, this course is designed to encourage students to understand American cultural and gender history as the product of America's engagement with the world. In so doing, we will explore the rise of U.S. global power as an enterprise deeply related to conceptions of race, sexuality, and gender. While reading key American studies texts in the history of the United States and the World, we will also examine films, political speeches, visual culture, music, and popular culture.

FGSS217 Key Issues in Black Feminism (FGSS Gateway)

This course surveys key issues in the historical development of black feminist thoughts and practices through readings of canonical works especially from the 1980s and '90s that contribute to this extensive body of knowledge. Our aim is to engage black feminist and womanist theorists, activists and artists from the diaspora who are exploring intersections of race, class, sexuality, religion, and other indices of identity affecting their daily lives. To that end, we will take an interdisciplinary approach to unpacking the historical tensions and politics and poetics in theory/practice, representation/self-making and expression/performance. We will also examine more recent turns in #BlackLivesMatter, #SayHerName and #BlackGirlMagic and conclude with Post-Zora Interventions--feminist interrogations on the borders anthropology, art, and activism.

FGSS218 Introduction to Queer Studies

This course will examine major ideas in the field of queer studies. Relying upon theoretical, historical, and cultural studies texts, we will consider the representation and constructions of sexuality-based identities as they have been formed within the contemporary United States. We will explore the idea of sexuality as a category of social identity, probing the identities of lesbian, gay, bisexual, and transgender to try to understand what they really mean in various cultural, social, legal, and political milieus. In doing so, we will ask, What does it mean to study queerness? What do we mean by "queer studies"? How do institutions--religious, legal, and scientific--shape our understandings of queer identities? In what ways do sexuality and gender interact, and how does this interaction inform the meanings of each of these identity categories? How do

other social categories of identification--race, ethnicity, and class--affect the ways in which we understand expressions of queerness? Moreover, what does studying queerness tell us about the workings of contemporary political, cultural, and social life?

FGSS221 Slavery and the Literary Imagination

Enslavement in America and the New World was inextricably linked to the written word. What, then, does it mean to write the story of enslavement, loss, forced migration, liberation, and restoration? How does one tell the story of enslavement when that effort depends on articulating the unspeakable?

The works and writers examined in this course will prompt students to consider how one revisits history and what is required to imagine, write, and rewrite the stories and histories of people, places, and nations. We will discuss the ways in which specific literary forms enable, contain, and transform unwieldy, complicated, and stunning stories of enslavement, liberation, self-determination, activism, racialization, and nationhood.

Our readings will include an array of well-known, understudied, and newly recovered primary works and materials by and about individuals such as William Wells Brown, Charles Chesnut, Frederick Douglass, Briton Hammon, Jupiter Hammon, James Mars, Pauline Hopkins, Mattie Jackson, Mary Prince, Chloe Spear, and Phillis Wheatley. Additional primary materials will include writings published in 18th- and 19th-century newspapers such as the "Boston Weekly Newsletter," "The Connecticut Journal," "The Liberator," and "North Star."

FGSS223 Sex, Money, and Power: Anthropology of Intimacy and Exchange

Sex and money--intimacy and economy--are often imagined to occupy distinct and separate spheres. Sex and intimacy are located in the private or domestic realm, in spaces of leisure, feelings, care, and personal connections. Money and economy, on the other hand, are purportedly public, located in the market and tied to labor, rationality, and impersonal (non)-relations. This course brings these spheres together, focusing on the links, exchanges, and circuits between the intimate and the economic in diverse cultural contexts across the Americas. Case studies will be drawn from sex work and tourism; marketing and pornography; reproduction, domestic labor, transnational adoption; marriage; class and sexual lifestyle; labor and carework; the global market in organs and body parts; outsourced surrogacy; sex stores and commodities; and sexual activism and identity politics. We will be centrally concerned with the relationship between economic, cultural, and political formations and with the differences race, ethnicity, nation, class, gender, and sexuality make. Throughout, we will ask, How do practices and bodies accrue value? When are intimacies--sexual and social--commoditized? How have transnational flows complicated relationships between sex and money? How do these intersections constrain and/or empower people? And, finally, who benefits from such arrangements, and who does not?

FGSS224 Mystics and Militants: Medieval Women Writers

In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

FGSS225 Place, Belonging, and Sound in the 20th c. Latina/o/x, Black, & Caribbean Imaginations--NYC

Throughout the latter 20th century, various aesthetic renderings of New York City have positioned it as a site of voyeuristic allure and racialized excess and pleasure--simultaneously posh, unfriendly, tourist-trapped, "seedy," "gritty," and segregated. Through select literary, cinematic, and performance optics of Latina/o/x, black, and Caribbean writers and artists, especially queer and bisexual writers and artists, this course will focus on memory, representation, form, sound, and the imagination in the layered and shifting site of mid-20th- to 21st-century New York City--and even more specifically, of Harlem, the Bronx, the Lower East Side, Brooklyn, and Elizabeth, N.J. Fictionalizations, poetizations, and performances of first-person memories and reimaginings of overheard stories from older generations about life in the U.S. South and life in the Caribbean will feature in the works that we will study in this course.

FGSS227 Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa

The 1929 Women's War is a touchstone for women's history in Africa. By 'sitting on a man' women in Nigeria shocked colonial authorities and demanded economic rights and a public voice. These unruly women danced in protest and rioted (sometimes nude), but their actions were not uncommon sights for their African audience. African women across the continent had long wielded power as queen mothers, prophets, and traders. Others challenged the constraints of ordinary domestic life through their labor, dress, or spirit possession.

Gender and contested authority are central to everyday life and politics in Africa. In this course, we will study the history of political and domestic authority on the continent with special consideration for the ways in which gender, sexuality, and power intersect. These histories are diverse both in time and place. For this reason, this course will not present a single narrative of gender in African history. However, students who satisfactorily complete the course will be able to write knowledgeably about the major debates surrounding gender and sexuality in Africa. Major themes include: spiritual authority; domestic and sexual life; the division of labor; and the impact of colonial rule and post-colonial politics. We will examine how women (and also men) have grappled with these intricate social and political relations from the pre-colonial period into the post-colonial era.

FGSS233 Global Queer Studies

This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives.

Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and the transnational lives of Filipino gay men in New York. Our aim is to expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative), and to understand how sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.

This semester will feature a lecture/film series as part of our course, with visiting scholars Erin Durban-Albright (on postcolonial homophobia in Haiti), Martin Manalansan (on QTPOC Filipino lives), and filmmaker Harjant Gill (on gender/sexuality in India).

FGSS234 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

FGSS235 Economies of Death, Geographies of Care

Living, dying, and care work are processes often governed by economic logics that render some lives killable and others grievable in global regimes of power. This course explores how theoretical frameworks of "economies of death" and "geographies of care" can help to illuminate how human and nonhuman lives, deaths, and systems of care are intertwined with economic logics. Whose lives are privileged over others and with what consequences? How are certain bodies made killable and others grievable? How do we understand and face care processes of death and dying, and how are these processes often geographically

determined? How do we live and die well, give and receive care, and who has this privilege? This class interrogates these and other questions related to how we live and die with others in a multispecies world. With attention to race, gender, species, and other sites of perceived difference, students will gain a nuanced understanding of core themes related to fundamental processes of living, dying, and caring labor. This course asks students to theorize economies of death and geographies of care to understand the deeply political nature of life and death as differential moments on a continuum of being. We focus on key questions related to an affirmative politics of life--in other words, how we should live, how we care and for whom, and how we might foster nonviolent interpersonal life-affirming encounters. Students can expect to explore pressing contemporary issues such as mass incarceration and "social death"; climate change; valuing and commodifying life; breeding and raising nonhuman animals for food; plant consciousness; end-of-life care and euthanasia; and the role of marginalized bodies in biomedical research. The course will be primarily discussion-based.

FGSS236 Activism and Theories of Change

In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. When do they strengthen one another, and when do they collide? What ethical or moral questions are raised by various types of protest and communications? The instructor will draw on her own experiences as an activist for women's rights, queer rights, and economic justice. We will also consider the strategies of other recent movements such as Occupy, Black Lives Matter and gun safety activism, and we will allow time to discuss events that may occur in real time over the course of the semester. This course will be relevant to students interested in public policy, feminism, gender and sexuality studies, and other social sciences, and will provide useful insight for future organizers and activists, lawyers, and public policy makers.

FGSS237 Histories of Modern U.S. Gender and Sexuality

This course will explore constructions of U.S. gender and sexuality from the late 19th century to the present. We will consider ideologies of gender and sexuality as social, political, economic, and biomedical systems, as well as lived, material realities. Particular attention will be paid to intersectional politics, by interrogating how categories such as race, class, disability, and national identity operate in relation to gender and sexual politics. Topics covered will include: the scientific "invention" of hetero- and homosexuality; anti-miscegenation law; gender-based immigration regulations; ideas of normative domesticity and kinship; labor patterns and gender-based disparities; gender- and sexuality-based rights' movements, including first, second, and third wave feminisms and LGBTQIA liberation; and reproductive technologies and rights.

FGSS238 Witnessing Animal Others: Mourning, Haunting, and the Politics of Animal (After) Lives

Witnessing, mourning, and haunting are frameworks that make political the lives and deaths of human and nonhuman others. Bringing these frameworks into conversation, this course will explore the following questions: What does witnessing and grieving animal lives and deaths show us about economic logics, racialization, and species hierarchies that form the foundation of contemporary social relations? How does the emotional become political in these contexts? What are the limits and possibilities of witnessing and mourning as political acts? How is witnessing distinct from spectatorship or voyeurism? What power dynamics exist in witnessing? What do different rituals or practices of mourning say about the mourner and the subject being mourned? What further action does witnessing or mourning provoke or demand? How do conceptualizations of haunting help to theorize and inform political practices of witnessing and mourning? Central to these questions is a consideration of the way histories track forward and haunt the present--how racialized, gendered, and anthropocentric histories shape contemporary social and economic relations. The course will use these theoretical frames to explore a series of empirical examples, such as: What does it mean to witness and mourn the settler-colonial histories that haunt the present in daily practices of ranching and farming animals for food? How are settler-colonial histories implicated in the phenomenon of animals killed on roads (innocuously termed roadkill) through the development of the U.S. railroad and interstate highway system and through land use change and habitat destruction? What does witnessing the captive animal in the zoo tell us about the imperialist histories of the zoo where humans and animals have been exhibited? What does witnessing or mourning do for the ghostly specters of "spent" dairy cows (lively-yet-soon-to-be-dead commodities) moving through the farmed animal auction yard and for their commodity afterlives born through slaughter and rendering? How does art act as a form of witnessing, for instance, through photographers such as Chris Jordan documenting the afterlives of plastic in the bellies of albatrosses on Midway Island? Throughout the semester, we will use art, fiction, poetry, and memoir to explore these concepts of witnessing, mourning, and haunting in the context of animal lives and deaths. The course will be heavily discussion-based.

FGSS239 Animal Theories/Human Fictions

The question of "the animal" has become a recent focus of theory, although depictions of nonhuman animals can be traced to the very origins of representation. This course will move among literature, philosophy, art, and theory in an effort to trace the changing conceptions of human-animal difference and human-animal relations from 18th-century fictions of savage men and wild children to current theories of the posthuman. We will consider the ways that the representation of "the animal" intersects with theories of gender and race as it also contests the grounds of representation itself. Authors may include Rousseau, Poe, Sewell, Mann, Colette, Coetzee, Heidegger, Agamben, Derrida, and Harway.

FGSS243 Television: The Domestic Medium

Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

FGSS244 Feminist and Queer Theories of Social Reproduction

This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

FGSS247 Major Themes in Black Feminism

This course will explore critical issues and debates in black feminism from early feminist works to more contemporary writers and theorists. Fundamentally, the course will help students critically analyze feminist texts, paying attention to the ways that black feminism challenges and reflects mainstream social and political hierarchies. This course will also draw upon a range of texts including art, literature, poetry, film and music.

FGSS255 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

FGSS256 Social Movements

How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

This course will explore Black feminist intellectual productions, highlighting the many theoretical, political, and critically imaginative elements found throughout early and contemporary works. Our discussions will reflect on power, the production of knowledge, identity, inequality, and the politics and perils of Black feminist struggle. Relying on a variety of texts and media—such as writings, visual & performance arts, poetry, music, and film—students should expect to engage with key issues and debates, along with the epistemological challenges offered by queer of color critique, trans/national perspectives, and social alternatives emerging from across the Black (feminist) diaspora.

"By the sweat of thy brow shalt thou eat bread," the Lord enjoined in Genesis.

But who did the hard work in the United States? How did they live? How were they organized? To what ends? Why has their power declined in recent times? These questions are explored in this course, which will reach back to the 18th century but highlight the 20th century.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **HIST266, AMST265**Prereq: **None****FGSS266 Future Visions: Temporality and the Politics of Change**

What is the time of political change? This course explores alternative temporal frameworks embraced by artists, writers, activists, and interdisciplinary scholars from diverse social and cultural locations. We ask, How do concepts of temporality help us understand, resist, contest, and transform prevailing social orders?

We will begin by assembling some conceptual tools for understanding the relationship of time to historical change and to racial, sexual, cultural, and national difference. Drawing on psychoanalysis, literary theory, history, trauma studies, anthropology, African American studies, queer theory, feminist studies, and postcolonial studies, we will explore the telos of modernity and narratives of liberal progress. We will then consider some of the critical and oppositional possibilities of being out of sync with dominant temporal frameworks, asking, Are there other, perhaps more livable, temporalities? Next, we will consider the possibilities for memory and memorialization to work against historical forgetting and cultural amnesia—alongside the ways historical pasts might be appropriated to serve nationalist ends. Finally, we will turn to the question of the future as found in meditations on utopias and dystopias; in political, cultural, and ecological justice movements; in ideologies of newness; and in rhetorics of apocalypse.

Our readings include three texts that highlight the form and futures of political change: Theresa Hak Kyung Cha's *Dictee*, an avant-garde text that uses multiple genres (poetry, autobiography, history, photography, etc.) juxtaposing historical trauma and aesthetic experimentation; Kim Fortun's *Advocacy After Bhopal: Environmentalism, Disaster, New Global Orders*, an experimental ethnography

of environmental disaster and its aftermath; and Octavia E. Butler's *Kindred*, a speculative fiction about time travel and the memory of slavery. As we consider social change, revolutions, and new "ends" and beginnings, students are invited to explore current social justice movements.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-AMST**Identical With: **AMST266, ANTH205**Prereq: **None****FGSS267 Revolution Girl-Style Now: Queer and Feminist Performance Strategies**

Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer" and "feminist," we will pair theoretical readings with theatrical sites. Authors and artists to be discussed will include Judith Butler, Paula Vogel, Holly Hughes, Beth Henley, Karen Finley, Samuel Delany, Nao Bustamante, Rebecca Schneider, Anna Deavere Smith, José Muñoz, Jill Dolan, Sylvia Rivera, Sharon Hayes, Sharon P. Holland, Bikini Kill, boychild, Lucy Lippard, Laurie Weeks, and Dean Spade.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **THEA267, AMST276**Prereq: **None****FGSS276 Black Performance Theory**

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheliye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a

range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

FGSS281 Gender and Sexuality in Ancient Greek Culture

In this course we will examine the construction of gender roles in ancient Greece and approach gender as an organizing principle of private and public life in ancient Greek society. Using literary, scientific, historical, and philosophical sources as well as material evidence, we will address issues including the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution, adultery); and ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties, the law court, and the theater. How ancient approaches to gender and sexuality are in dialogue or have informed recent debates will be a question throughout the course. We will end by looking at how ideas about sexuality in classical antiquity were used in ROMER V. EVANS, otherwise known as the 1993 Colorado Gay Rights Case.

FGSS286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice

This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activism, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

FGSS288 Gender and Sexuality in Chinese Narrative

This course pays particular attention to gender relations and representations of sexuality in Chinese narrative. This course will require close readings of translated Chinese novels, short stories and movies. We will explore themes and motifs such as gender roles in Confucianism, female chastity, same sex desire, cross-dressing, masculinity and femininity, manhood and misogyny, eroticism, the cult of qing (passion), the New Woman, socialist and post-socialist desires, and writing bodies in the era of globalization. In addition to providing a

platform for appreciation of the aesthetic beauty of Chinese narrative, the course encourages students to think about how representations of gender and sexuality incorporate or confront the mainstream moral values and social principles in China.

All readings are in English, no prior knowledge of Chinese language or culture is required. No text book requirement.

FGSS295 Queer Opera

Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

FGSS301 Black Speculative Fictions and the Anthropocene

The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's

attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.

FGSS302 Critical Perspectives on the State

This course builds on Marxist, poststructuralist, feminist, anarchist, and cultural analyses to take a critical approach to the state--what it is and what it does. We will examine how the state is imagined by those who write about it and struggle against it. Where does the state begin? How do states act, and what are the consequences of these acts? How is rule consolidated and how are individuals and communities annexed to the project of rule? How do people engage with state acts and ideologies? We will read texts drawn from a variety of disciplines, including anthropology, feminist theory, political theory, philosophy, sociology, and geography, that examine the nature, everyday workings, and effects of state power. Drawing upon ethnographic examples from around the world, we will analyze how states are cultural artifacts that produce and regulate people's identities and bodies, reproduce social inequalities, and engender resistances of all sorts. Some of the topics we will discuss include bureaucracy, governmentality, the security state, the prison industrial complex, terror and militarism, law and justice, citizenship, democracy, refugees, anti-state movements, the "man" in the state, and welfare and post-welfare politics.

FGSS303 Reproductive Politics and the Family in Africa

This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced political practices and ideologies and, in turn, changed conceptions of motherhood, fatherhood, and the family.

Prereq: **None**

FGSS304 Pantheologies: Animal, Vegetable, Mineral, World

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers

and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

FGSS305 Techniques of the Liar: Performance, Artifice, Fraud

This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabrication, exaggeration, and duplicity have also offered means of freedom or resistance.

Offering: **Crosslisting**

FGSS307 Mobilizing Dance: Cinema, the Body, and Culture in South Asia

This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

FGSS308 Brown, Black, and Queer Forms and Feelings

Given how brutally not neutral the world is to black, brown, and queer forms of life and pleasure, this course thinks with "otherwise" spaces, figures, and feelings, like the queer club, the dance floor, abnormality, errancy, illegality, fugitivity, rage, indifference, and love. We will take up José E. Muñoz's invocation of a "minoritarian theory of affect" that insists that "whiteness is a cultural logic which can be understood as an affective code that positions itself as the law." We will study affect beyond whiteness through attention to sonic forms and "audio-visual shapes" in African diasporic, Latina/o/x, and Caribbean arts. We will consider the diasporas and collectives grouped together in the terms "minoritarian," "brown," and "black" as abnormals that generate alternative modes of moving through and feeling ourselves in the world. We will study for radical potentiality in the beautiful, obscene, and off-kilter affects of brown, black, and queer aesthetic and poetic forms.

FGSS310 The Senses and the Subject in Cinema and Poetry

In this course, we will study a mixture of emotionally stimulating and structurally difficult cinema and lyric poetry to intensify our capacity to articulate a notion of the senses. Do the senses presume the subject? How do poetry and cinema imagine, racialize, gender, and play with the relation of the senses to the subject? While these two art forms might seem like strange neighbors, this course specifically imagines cinema and lyric poetry as "repositor[ies] of synesthesia" wherein feelings move fugitively, where one sense dubs into and disturbs the imagined discrete domain of the other in measured intervals of time that are generative of sounds, images, and of that which overflows the visual.

The films and poetry selected may carry students into cuts of the Caribbean, the black Atlantic, France, Sweden, Mexico, the U.S., Senegal, Mali, and Spain at distinctly urgent moments in the mid-20th to early 21st century. The threads that will sew the course's images together and bind them to the human subject and senses are the celestial and terrestrial, creation, decomposition, displacement, migration, fascism, colonialism, globalization, and love.

FGSS311 Abolitionist University Studies

This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons

but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

FGSS314 All the Feels: Affect Theory and Cultural Studies

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we manage sensorial and embodied experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the individualized experience of feeling and power by introducing students to the vibrant field of affect studies. A recent "turn" in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to, ultimately, contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

FGSS315 Entertaining Social Change

"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially true of "entertainment" as a transformative power. Our aim will be to advance critical entertainment studies. A thread that connects all of our texts will be: how

has the systemic critique of social contradictions been popularized as fascinating in modern times? We will consider the diverse strategies that progressive songwriters/performers, radical historians (working with cartoonists), and mainly moviemakers have developed to entertain Americans--to teach, persuade, provoke, seduce, and move them through laughter, tears, and not least of all ideas--so that Americans will be more inclined to entertain social critique that inspires social change. We will explore the popularizing (and sometimes the selling) of social critique in several genres: graphic history (Howard Zinn, Paul Buhle); songs/song lyrics of folk-protest singers (such as Woody Guthrie, Pete Seeger, and Phil Ochs), of folk-rock stars (such as Jackson Browne, Ani DiFranco, and Father John Misty), and of the developers of hip-hop (such as Gil Scott-Heron, Public Enemy, and NWA); and politically edgy comedy (Jon Stewart, Stephen Colbert). We will devote most of our attention to movies (STRAIGHT OUTTA COMPTON, THE PEOPLE SPEAK, MALCOLM X, MEDIUM COOL, NETWORK, EL NORTE, SMOKE SIGNALS, BEFORE THE FLOOD, THE BLACK PANTHERS: VANGUARD OF THE REVOLUTION, SALT OF THE EARTH, MATEWAN, 99 HOMES, THE WOLF OF WALL STREET, THE BIG SHORT). And we will place special emphasis on self-reflexive movies about entertainment and about labor/social movement organizing.

FGSS321 BioFeminisms: Science, Matter, and Agency

This course rethinks feminism's relationship to nature, the body, and biological matter in light of new considerations of ontology in science studies, cultural studies, and feminist thought. We will read contemporary treatments of science, of Darwin and evolutionary theory, of neurobiology and epigenetics, and other fields and disciplines that consider biological matter, and think about them in feminist and queer frameworks. Readings will include "new materialists" alongside other works on the "new biology" and the "new sciences," and we will also revisit some second- and third-wave feminism. The course raises issues that challenge traditional boundaries of the body and self, conventional ideas of agency, and dualisms of mind/body. Readings include works by Donna Haraway, Anne Fausto-Sterling, Elizabeth Grosz, Karen Barad, Vicki Kirby, and Elizabeth Wilson, among others.

FGSS323 Survey of African American Theater

This course surveys the dynamism and scope of African American dramatic and performance traditions. Zora Neale Hurston's 1925 play *COLOR STRUCK* and August Wilson's 2006 play *GEM OF THE OCEAN* serve as bookends to our exploration of the ways in which African American playwrights interweave various customs, practices, experiences, critiques, and ideologies within their work.

FGSS324 Interpreting the "New World": France and the Early Modern Americas

The impact and long-lasting effects of the "discovery" of the "New World" on Europeans cannot be overestimated. This advanced seminar will compare and contrast styles of expedition and conquest among the European nations, though the course will focus on the French context and the various events and encounters that occurred in the early modern Americas, particularly between 1492 and 1610, a period that laid the groundwork for the subsequent colonial project. Throughout the course, we will pay special attention to the Amerindians' points of view. In turn, students will examine the insights and blind spots in 16th-century French navigators', cosmographers', cartographers', and intellectuals' interpretations, representations, and negotiations of difference by critically engaging with concepts such as nature, culture, alterity, gender, sexuality, marriage, religion, exchange, possession, conquest, and war. Reading, writing, and class discussions will be in French.

FGSS326 Queer Times: Poetics, Activisms, Temporalities

This course will analyze literary, visual, and theoretical works from the early 20th century to the present day paying particular attention to relationships among textuality, sexuality, race, temporality, and political activism. Works studied range from iconic modernist writings to contemporary queer activist, artistic, and theoretical production, with a focus on responses to the AIDS epidemic.

FGSS327 Litanies for Survival, Plots for Revolution

This seminar centers black-feminist and queer-of-color theory, literature, and art from the 1970s to the present in order to interrogate and reimagine revolution and revolutionary praxes. We will examine the interrelatedness of art and activism, hope and despair, collaboration and erotics. Key questions include: How does "survival" put pressure on "revolution," and vice versa, particularly in light of contemporary and imminent catastrophes, local and planetary? How does a joint consideration of survival and revolution affect interpretations of the past, understandings of the present, and imaginings of the future? What political work might intellectual and creative labor perform? Is revolution an event, a practice, or both? A useful term or a ruse?

This seminar is offered in conjunction with the Center for the Humanities' Fall 2018-Spring 2019 theme, "Revolutions: Material Forms, Mobile Futures." Assigned readings will include the work of scholars participating in the Center's Monday night lecture series, and students will be required to attend several lectures over the course of the semester.

FGSS329 Waiting: Bodies, Time, Necropolitics

This interdisciplinary course draws from social theory, gender studies, medical anthropology, disability studies and science studies to address the social stratification of time in corporeal terms. Many theorists have described the 21st century as marked by acceleration; this course addresses its counterpoint: the slow, interminable wait, the being made-to-wait, and the socially structured scenes and experiences of waiting. How can we understand waiting in the city emergency room for the mentally ill immigrant? What is it in the gender transition clinic? The polluted, toxic neighborhood? The refugee camp? We will begin by surveying multiple frameworks through which we can theorize time and its suspension. We will then focus on experiences of waiting in intersectional terms, that is, in relation to gender and sexuality, race, class, and dis/ability. We will explore how practices that produce life, health, and well-being (biopolitics) can also be necropolitical, when attention, care, or action is given to some, but prolonged or suspended for others. Readings will include works on necropolitical theory (Georgio Agamben, Achille Mbembe), medical and state subordination and abandonment (Javier Auyero, Joao Biehl), and queer and crip time (Lee Edleman, Elizabeth Freeman, Alison Kafer). We will explore a wide range of experiences of waiting, from those related to cancer diagnosis (Sarah Jain), gender assignment surgery (Alexandre Baril), to environmental toxicity (Michelle Murphy) and asylum seeking (Jennifer Bagelman).

FGSS330 Race, Science, Gender, and Species

What does it mean to be human or animal? How are these socially constructed lines drawn, redrawn, enforced, and contested? How are categorizations and contestations surrounding humanity and animality a concern for feminist scholars? How does critical theory help us to understand the (at times) uneasy intersections--or "dangerous crossings," as Claire Jean Kim calls them--where race, species, gender, and theories of science intersect to formulate ideas about humanity and animality? What theoretical and practical possibilities arise from exploring these overlapping taxonomies of power?

This course explores these questions, engaging in an ongoing conversation about how theories of science and law shape ideas about race, gender, and species. We will consider human and animal bodies in science and medicine. We interrogate how the human is a site of political contestation, articulated through colonial and racialized processes that render some lives human/subhuman/nonhuman within hierarchies of power and exclusion. Central to this uneven rendering of what it means to be human is the way law and legal processes criminalize and racialize human beings, and sustain anthropocentrism. Informed by these literatures, we move into exploring the possibilities and limits of posthumanism, with a particular emphasis on work that aims to decolonize posthumanist theory.

Within these theoretical frameworks, we move into thinking about the boundaries of the human/animal body; the politics of being and becoming in multispecies worlds; how fraught cultural and political cases where race and species intersect are negotiated; what the "feral" can add to these entanglements of race, species, and gender; the intertwining logics of species, colonialism, and empire; and how different ways of being embodied can inform a politics of multispecies care. We will conclude our work together for the semester with a collectively curated selection of readings, to be determined by our seminar.

FGSS335 The Work of Art Against Work: Art, Labor, Politics

Understandings of late 19th- and early 20th-century avant-gardes are tied inextricably to leftist theory, particularly that of the Frankfurt School. This advanced seminar will consider the legacies of that entwinement, while focusing more specifically on its transformations from the late 20th century to the present: We will examine how artists have engaged the "work" of art in relation to the rise of post-Fordism, a globalized economy, and new theories of work and anti-capitalism. We will pay special attention to gendered notions of work and the division of labor (including "craft," affective labor, domestic work, care work, sex work, and more), to debt and racial capitalism, and to the rise of speculative finance and its links to the art market and the patron class.

FGSS338 Masculinities

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close

analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

FGSS343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture

This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling.

Topics examined will include: reproductive surrogacy; gender reassignment surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of "universality" and "particularity," where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimaging.

FGSS345 Women's Lib, Women's Lit

The social movement known as second-wave feminism, but often referred to at the time as "Women's Lib," took center stage in much of the best-selling fiction of the 1970s. This course will look at popular fiction that concerned itself with women's issues and the way it popularized, memorialized, complicated, and contested feminism in the popular imagination. We will look at a range of novels that focused attention on the nature of and possible solutions to women's political, material, and sexual subjection by men. Although our focus will be on the 1970s, we will look at both some important pretexts, and some later responses to the ongoing crises of gendered inequality in the 1980s. We will pay particular attention the gendering of publishing and reception, exploring the contexts in which these books were produced, marketed, reviewed, and read.

FGSS348 Magic, Sex, and Scholasticism: Tantric Traditions in Asia and Beyond

The word "tantra" conjures many images: ritual feasts on illicit substances, sexual union in the service of religious transformation, alchemical journeys, and explorations of the erotic, the terrifying, and the sublime. But what precisely did tantra look like in practice? Were the worlds of tantra imagined by marginal outcasts? Monastic elites? Or were they just the wild fantasies of Western imperialists?

In this course, we will immerse ourselves in the worlds of tantra, through scriptures, ritual manuals, and art. We will read scholarship on tantra to probe the social and philosophical contexts in which tantra thrived. Finally, we will investigate the history of Western encounters with and appropriations of tantra, from Aleister Crowley to Sting.

FGSS350 Historicizing Early Modern Sexualities

This course will examine recent historical and theoretical approaches to the history of sexuality in early modern English literature (ca. 1580-1680). Our focus will be the historical construction of sexuality in relation to categories of gender, race, religion, and social status in a variety of sources, both literary and nonliterary, verbal and visual, including poetry, plays, masques, medical treatises, travel narratives, and visual media. Topics covered include intersecting constructions of the sexed/gendered/racialized body; diverse sexual practices; sexual identities prior to the homo/hetero divide; and the histories of pornography and masturbation.

Prereq: **ENGL201**

FGSS351 Queer of Color Critique

This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

FGSS355 Social Movements Lab

What can we learn from social justice activists about the economic, political, and environmental struggles facing us today, including mass incarceration, immigration, economic precarity, and the violence of the state? Where are the critical sites of queer, trans, left, feminist, black, indigenous, disability, and environmental struggle? How do these movements converge, and where do they diverge?

This participatory, interdisciplinary research seminar enables you to embark on an independent, semester-long research project on the social movement or activism of your choice. We'll start with some foundational reading on multidisciplinary social movement research; archival, ethnographic, and participatory methodologies; and histories of social justice struggles in the U.S. The remainder and majority of the seminar is laboratory style, taking shape

around your particular projects. Each week, we will collaboratively analyze one or two projects, mapping out and comparing methods, goals, visions, struggles, and contexts of the movements under study. Our goal is to understand a range of social justice activisms in their economic, political, and historical context, with an eye toward integrating activist scholarship and social change.

The activism you research can be contemporary or historical; local, national, or global; and can take any shape: direct action, community organizing, activist philanthropy, art as activism, etc. You do not need previous experience or activist contacts for this course--just passion and the desire to learn collaboratively!

FGSS360 Special Topics: Writing Lives

In this course, students will read profiles, biographies, and theories of biography, texts that focus on the stakes of writing the lives of women, people of color, people with disabilities, and queer subjects. As we analyze these attempts to capture a life, to define the problems of this form, and to expand its possibilities, students will work on their own biographical writing. Throughout the semester, we will ask: Whose lives get written, and by whom? What constitutes evidence of a life, according to whom--and what gets left out? What kinds of research are necessary? How does a writer's relationship to her subject inform such a portrait, and what are the ethics of that relationship?

FGSS371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora

This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

FGSS387 Feminist Dispute Resolution

Is feminist negotiation possible? What would egalitarian alternative dispute resolution (ADR) entail? In the first part of this course, we will study and practice traditional dispute resolution techniques. Each student will participate in two-person and multiparty mediations, arbitrations, and quasi-judicial presentations. In the second part of the course, we will study and practice feminist dispute resolution techniques, including "invitational rhetoric." Students will then draw upon the course readings and in-class negotiation exercises to answer questions such as: Should we match dispute resolution strategies to parties' personalities or desired outcomes? Whose conception of fairness and social good should guide our negotiation practices? Are dispute resolution techniques gendered? By the end of the course, students will be more confident negotiators. They will also be able to discuss, debate, and recommend strategies for resolving conflicts and contributing to social justice. Students will be assessed based upon: their preparation for negotiations; their participation in negotiations; their performance on a written mid-term examination; and their performance on a final oral examination addressing the question: "Is feminist negotiation possible?"

FGSS405 Senior Seminar

This course is a required seminar for senior FGSS majors. Structured as a workshop, the goal of this course is to develop a collaborative intellectual environment for majors to work through the theoretical, methodological, and practical concerns connected with their individual projects. Seminar topics to be examined will be based on students' research projects, and participants are expected to engage critically, yet generously, with the projects of their peers. We begin by addressing feminist methodologies, including questions of praxis, representation, and theory. Participants are expected to lead discussions on readings relating to their own projects, submit written work on their senior

research in stages (project proposal, annotated bibliography, drafts), and do class presentations.

FILM STUDIES (FILM)

FILM104 Documentary Filmmaking: An Introduction to Project Learning

This course is an immersive, hands-on introduction to the documentary film process, in which students will examine the world around them to create compelling stories where real people are the protagonists and the narratives are informed by real life. Through close study and analysis of feature-length and short documentaries, and active research, writing, producing, directing, shooting, sound recording, editing and re-editing, students will rigorously explore the power and possibilities of nonfiction storytelling. The course is a dynamic combination of individual and group production work, in which students will be expected to produce their own exercises, as well as collaborate with their classmates on a short documentary video. Individual and group exercises will focus on the idea of portraiture and how to make effective visual and aural portraits of a place or person, with a particular emphasis on the theme of work and how the jobs we do inform, support and shape our lives. This course is designed to introduce fundamental production concepts and techniques through lectures, projects, and lab experiences. Film production experience is not required, and experience with film-editing software is helpful but not required. Production lessons include discussions of how to build partnerships with documentary subjects, conduct interviews, shoot observational video footage, record sound, and edit digital video. Students will present works in progress in all phases of the creative process and participate in constructive critical discussions.

FILM105 Writing the Moving Image: An Introduction to Crafting Visual Stories

This course is an introduction to the art of writing for film and television. Students will explore the craft of screenwriting in a workshop setting. The class addresses the differences between writing for the page and for the screen, the importance of form and constraint to creative storytelling, the distinctive demands of various media, and the nature of visual narrative. We will approach fundamental concepts and techniques through lectures, discussions, screenings, and analysis of exemplary works. Exercises focus on plot and character in features, short films, and various television formats. Students will complete regular writing assignments culminating in a longer project at the end of the term. Our aim is to write with the image and the audience in mind, to understand essential structures and formats, and to lay the groundwork for future study and work. This is a course for first-year students.

FILM288 Global Film Auteurs

This course offers a critical introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion section. Screenings may include films directed by Fernando Eimbcke, Abbas Kiarostami, Krzysztof Kieslowski, Akira Kurosawa, Satyajit Ray, Jean Renoir, Ousmane Sembène, Céline Sciamma, Seijun Suzuki, Agnès Varda, Luchino Visconti, and Zhang Yimou, among others.

FILM303 History and Analysis of Animated Cinema

Animation is more important than ever to film studies. Over the past decade the boundary between live-action and animation has eroded, reorienting the way practitioners and scholars understand the medium. This course will provide a historical and theoretical introduction to the art of animated film and television. In addition to popular animation, this course will survey auteur, experimental, and animated documentary films in relation to their contributions to big studio productions. It has long been understood that animated features and television series are widely informed by the history of experimental and auteur animation. The curriculum teaches methods of critical research, discussion, writing, critique, and presentation that informs critical growth.

FILM305 Sophomore Colloquium for Declaring Majors: This and That, Here and There, Now and Then

This class is designed for sophomores who have completed the CFILM gateway courses and wish to deepen their exploration of film art. The curriculum aims to draw connections across different eras, origins, and story forms by pairing films for comparison. What can Frank Capra teach us about Pixar? What does Bette Davis have in common with The Babadook? Is there such a thing as a good remake? What are essential parameters of cinema that endure, which every filmmaker must consider? Through close viewing of films from many eras and origins, in-class discussions, and analytical papers, students will strengthen their engagement with the tools of cinema in preparation for continued study in the major.

Gen Ed Area: **HA-FILM**Prereq: **FILM304 AND FILM307****FILM306 First Things Film**

First Things Film is a 0.5-credit seminar to be taken along with FILM 304 History of Global Cinema. We will focus on the fundamentals of thinking and writing about film, expanding on ideas presented in FILM 304 and exploring a diverse range of historical and contemporary movies. Assignments are geared toward supporting and deepening skills for success in FILM 304 and The College of Film and the Moving Image. This class welcomes enrollments from historically underrepresented groups and first-generation college students.

Offering: **Host**Grading: **Cr/U**Credits: **0.50**Gen Ed Area: **HA-FILM**Prereq: **None****FILM307 The Language of Hollywood: Styles, Storytelling, and Technology**

This history course explores how fundamental changes in film technology affected popular Hollywood storytelling. We will consider the transition to sound, to color, and to widescreen, and the current "digital revolutions." Each change in technology brought new opportunities and challenges, but the filmmaker's basic task remained the emotional engagement of the viewer through visual means. We will survey major directors and genres from the studio era and point forward to contemporary American cinema. Our aim is to illuminate popular cinema as the intersection of business, technology, and art. Through film history, we will learn about the craft of filmmaking and how tools shape art.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Prereq: **None****FILM309 Immersion Seminar: Film Noir**

This course is an in-depth examination of the period in Hollywood's history in which the American commercial film presented a world where "the streets were dark with something more than night." The course will study predominant noir themes and visual patterns, as well as the visual style of individual directors such as Fuller, Ray, Mann, Lang, Ulmer, DeToth, Aldrich, Welles, Tourneur, Preminger, and Lewis, using their work to address how films make meaning through the manipulation of cinematic form and narrative structure.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Prereq: **(FILM304 AND FILM307)****FILM311 Israel in Therapy: Society Under the Influence of TV Series**

The course deals with the prototypes of the Israeli character as they appear in the original Israeli TV series *In Treatment*, and other Israeli TV series, such as *Florentine* and *A Touch Away*. We will compare the structure and the characters of the series to other dramatic Israeli series, examine the appearance of the characters, and discuss the similarities and differences between the roles they perform. In addition, we will examine the role of television drama series as a tool to define and characterize our societies, and also look over the five characters that appear in the first season of *In Treatment*, define them, and examine the five prototypes of the Israeli character they represent.

The instructor is the co-creator and head screenwriter of the original version of the TV series *In Treatment* as well as the Center for Jewish Studies distinguished Visiting Professor.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-CJST**Identical With: **CJST234**Prereq: **None****FILM314 Directorial Style: Classic American Film Comedy**

This course examines the personal style (both formal and narrative) of various American film directors and personalities in the comic tradition. The class will discuss the overall world view, the directorial style, and the differing functions of humor in films of each director and/or personality--Keaton, Lubitsch, Capra, Hawks, Tashlin, Blake Edwards, Billy Wilder, Jerry Lewis, and others--covering the silent era through the early 1960s.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Prereq: **FILM304 AND FILM307****FILM315 Myth and Ideology in Cinema: Hollywood Sex, Race, Class, and Culture**

The course is concerned with the ways in which a popular art form like the movies affects and is affected by the ideology of the culture in which it is produced. We will study the processes by which genres arise in movies, how they develop historically, how they register ideological change, and how they break up and recombine. The course will concentrate on Hollywood cinema and its complex engagement with cultural histories of class and identity.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Prereq: **FILM304 AND FILM307****FILM318 Awesome Cinema: Religion, Art, and the Unrepresentable**

How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the nonrational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason. Films will include "Arrival," "Interstellar," "The Exorcist," "Jai Santoshi Maa," "Passion of Joan of Arc," "Ten Canoes," and "Yeelen."

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Identical With: **RELI318**Prereq: **RELI151 OR FILM307****FILM319 Television Storytelling: The Conditions of Narrative Complexity**

This course examines the industrial and cultural conditions for the development of relatively complex forms of storytelling in commercial U.S. television. Narrative complexity is a cross-generic phenomenon that emerged over the 1980s and has proliferated within an increasingly fragmented media environment. In class discussions and individual research projects, students will analyze particular programs in-depth, with attention to their industrial and social conditions of production, their aesthetic and ideological appeals, and the cultural tastes and viewing practices they reflect and promote. We will also consider how television studies has responded and contributed to the increased prestige of certain types of programs.

FILM324 Visual Storytelling: The History and Art of Hollywood's Master Storytellers

This course studies four distinctive auteurs: Frank Borzage, Howard Hawks, John Ford, and Vincente Minnelli. Each director uses popular genres to build unique cinematic worlds. Together, their films form the bedrock of a visual language for telling stories, engaging emotion, and shaping perception. Studying four of the studio era's greatest filmmakers reveals the possibilities of narrative cinema and provides models for new creative work. This class makes the craft of Hollywood visible so that students gain access to the tools of cinematic storytelling. The course includes analytical and creative projects.

FILM326 At Home in the World: Transnational Women's Cinema

What does women's cinema signify? Is it cinema created exclusively by women, for women? Is it cinema that puts women at its center? Do these narratives privilege one type of woman over another? How do we understand and investigate these questions within non-Western and global contexts?

This course delves into the multiple subjectivities, sociocultural geographies, media practices, and politics that are folded into the category called "women's cinema." Beginning with an exploration of the 1970s "cine-feminism" that focused on women's filmmaking and political activism, we will expand our discussion to transnational contexts and explore how feminist politics advocated by female and male filmmakers influence an understanding of women-oriented issues, forms, and values in circulation. We will examine women's films produced within national and transnational geo-cultural spaces and pose questions about national, exilic, or postcolonial auteur subjectivities. We will analyze the films'

aesthetics, institutional contexts, and global circulations and situate them within the frameworks of feminist theory, authorship, postcolonial studies and transnational feminist scholarship. We will study women's cinema from South Asia, North Africa, the Middle East, Europe, and the Americas. The course screenings will include films such as "Fire," "Water," "Like Water for Chocolate," "Bhaji on the Beach," and "Silent Waters/Khamosh Pani."

FILM328 Moving Images Beyond the West: An introduction to Global Media

The globalization of media has become a key issue of debate around the world. Yet, many discussions about globalization tend to obscure the often complex and contradictory relationships among global, national and local forces. This course critically examines the role that film, television, video games, and other media play in shaping our sense of global, national, and local cultures and identities. Focusing on Indian, Chinese, South Korean, African and other media producers, it examines how diverse audiences use global media to negotiate with issues of cultural identity in everyday life.

FILM329 Introduction to Global Bollywood

Bollywood (India's Hindi film industry) is today an acknowledged cultural product with a global audience. This course will offer a historical introduction and contextualization to the study of Indian cinema. Bollywood today signifies more than cinema, it is a global culture industry that encompasses everything from dance, music and fashion to food and yoga. The course will examine this massive culture industry and its circulation in the global space as a unique cultural form. The first part of the course will cover the early history of Bollywood and pay close attention to the aesthetics of Bollywood film; what makes this cinema unique? The second part will hone in on the socio-cultural and industrial logic of Bollywood's global presence and circulation by focusing on specific case studies such as the U.S, U.K, Russia, and China. What constitutes the transnational appeal of Bollywood film culture? We will also try to understand this complex term Bollywood by focusing on globalization and its impact on cinematic representations of nation, family, diaspora, religion, gender, relationships and cultural traditions. How did Indian Hindi Cinema morph into Bollywood? Throughout the course we will bring up questions about nationalism and identity fostered through cinema and notions of home and belonging in a globally mobile world.

FILM330 The Art and Business of Contemporary Film

Taught by a leading professional in independent film distribution, acquisition, and marketing, this course explores the contemporary cinema marketplace and its relationship to filmmaking. We will consider the process of defining and finding the potential audience for independent and studio films. The class mixes case studies of production, marketing, and reception with film screenings and analysis. Students will hone their skills of practical analysis: articulating a film's essential appeal, distilling its story, and assessing its artistic and commercial merits. Visiting producers and filmmakers will discuss their work in light of its intended audience and reception. Assignments include written briefs on recent releases and their market profiles, analyses of exemplary independent American

films, and a collaborative case-study presentation. This is a master class in the film business taught from the perspective of effective cinematic storytelling.

FILM331 Video Games as/and the Moving Image: Art, Aesthetics, and Design

Video games are a mess. As a relatively new medium available on a range of platforms and in contexts ranging from the living room to the line for the bathroom, video games make new but confusing contributions to the meaning and possibilities of the moving image. We will work to understand what games are, what they can do, and how successful games do what they do best. Students will complete game design exercises, create rapid prototypes, playtest their games, and iteratively improve their games with play and their players in mind. They will complete analyses of games and game design projects both alone and in groups and participate in studio-style critiques of one another's work. Experience with computer programming is helpful but not essential.

FILM336 Silent Storytelling

This course examines the development of visual storytelling from the post-nickelodeon cinema's presentational styles to the expressionistic filmic poetry of silent cinema's twilight years. Taught by noted film historian and accompanist Ben Model, it explores how silent-era filmmakers developed creative ways to invoke the audience's imagination as a storytelling component. Major filmmakers include Griffith, Keaton, Pudovkin, Lubitsch, Chaplin, Weber, and Vidor. We will look closely at silent film comedy, melodrama, and action. Our work will be based on close viewing of films and attention to the interaction between image, music, and the viewer's journey through each film. Films will be shown with live accompaniment in class, with additional viewing assigned as homework.

FILM341 The Cinema of Horror

This course focuses on the history and development of the Horror film, and examines how that genre has been blended with Science Fiction. We will seek to understand the appeal of Horror. One of our guiding questions will be: ¿Why do audiences enjoy a genre that, on the surface, seems so unpleasant?¿ Toward this end, we will take up several distinct theories of how the genre is constructed, defined, and used by producers and viewers. Horror has been a watershed topic for scholars interested in film, and this course gives us the chance to critically engage with important arguments and methodologies in contemporary film studies. The genre has been equally inspiring for filmmakers interested in playing with form to elicit audience reaction. So, we will also be concerned with the aesthetics of horror: how film technique has been developed to terrify viewers.

FILM346 Contemporary East Asian Cinema

This is a seminar on comparative narrative and stylistic analysis that focuses on contemporary films from Hong Kong, Taiwan, China, South Korea, and Japan, regions that have produced some of the most exciting commercial and art cinema in the past 30 years. We will begin by examining narrative and stylistic trends at work in the region and by considering individual films in a historical and industrial context. We will then develop our film analysis skills via formal comparison of the aesthetics of individual directors working in both popular and art cinema traditions as well as in different historical periods. Films from Bong Joon-ho, Fei Mu, Hong Sang-soo, Hou Hsiao-hsien, Kitano Takeshi, Kore-eda Hirokazu, Mizoguchi Kenji, Ozu Yasujiro, Tian Zhuangzhuang, Johnnie To, Tsai Ming-liang, Tsui Hark, Wang Xiaoshuai, Wong Kar-wai, Edward Yang, Yoon Ga-eun, and others will be featured.

FILM347 Melodrama and the Woman's Picture

Within film history and criticism, the usage of the term "melodrama" has changed over time, as has the presumed audience for the genre. This course will investigate the various ways in which melodrama and the woman's picture have been understood, beginning in the silent period; ranging through the 1930s, '40s, and '50s; and culminating in contemporary global cinema. We will pay particular attention to issues of narrative construction and visual style as they illuminate or complicate various analytical approaches to melodrama. Screenings include films directed by D. W. Griffith, Evgenii Bauer, John Stahl, Frank Borzage, King Vidor, Douglas Sirk, Vincente Minnelli, Max Ophuls, Kenji Mizoguchi, Kim Ki-young, Rainer Werner Fassbinder, Pedro Almodovar, Lars von Trier, Farah Khan, and Luca Guadagnino, among others.

FILM348 Postwar American Independent Cinema

What exactly defines an "independent" film or filmmaker? How do independent filmmakers situate themselves in opposition to mainstream filmmaking and/or work in tandem with major studios? How have notions of independence changed over time? This course addresses these and other questions as it examines various models of American independent feature filmmaking in use from the studio era to the present day. We will explore the methods of production, distribution, and exhibition used by independent filmmakers and their range of reliance on the major studios. In addition, we will consider the aesthetic relationship between independent films and mainstream filmmaking, focusing in particular on how independents have used film form and narrative to differentiate their product. Screenings include films directed by Ida Lupino,

Sam Fuller, Herbert Biberman, Dwane Esper, Roger Corman, Russ Meyer, Melvin Van Peebles, John Waters, Robert Frank, Morris Engel, John Cassavetes, Shirley Clarke, Andy Warhol, Mike and George Kuchar, Monte Hellman, Robert Altman, Barbara Kopple, Charles Burnett, Steven Soderbergh, the Coen brothers, Richard Linklater, Todd Haynes, Paul Thomas Anderson, Terrence Malick, David Lynch, David Gordon Green, and Kelly Reichardt, among others.

FILM349 Television: The Domestic Medium

Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

FILM352 From Caligari to Hitler: Weimar Cinema in Context

This course offers a critical introduction to German silent and sound films from 1919 to 1932. It will test the thesis of Siegfried Kracauer's classic study that expressionist films in particular prepared the way for Hitler's rise to power. The focus will be on canonical films of the era including *THE CABINET OF DR. CALIGARI*, *NOSFERATU*, and *THE LAST LAUGH* (Murnau); *METROPOLIS* and *M* (Fritz Lang); and *THE JOYLESS STREET* and *PANDORA'S BOX* (Pabst). Some attention will also be given to films made at the ideological extremes of Weimar culture: *KUHLE WAMPE* (with a screenplay by Brecht), Leni Riefenstahl's *THE BLUE LIGHT*, and Pabst's *THREEPENNY OPERA*. Readings will include screenplays, essays, and reviews from the period as well as selected literary works such as Brecht's *THREEPENNY OPERA* and Irmgard Keun's novel *THE ARTIFICIAL SILK GIRL*.

FILM357 Fassbinder & Sirk: Limitations of Life

The relationship between Hollywood and Germany has always been both uneasy and productive. This course will examine the well-known interaction between the master of the postwar melodrama and the enfant terrible of the New German Cinema. Initially, we will follow the lead of Fassbinder's famous essay, "Imitation of Life: On the Films of Douglas Sirk," and consider the films that ostensibly influenced the young German director most immediately. Special focus will be on *FEAR EATS THE SOUL*, Fassbinder's provocative remake of *ALL THAT HEAVEN ALLOWS*, and on the late melodramas of so-called FRG Trilogy, including *THE MARRIAGE OF MARIA BRAUN*. We may also look at some of Fassbinder's important films before his encounter with Sirk, as well as some of Sirk's German films.

FILM358 Italian Cinema: 1945-1965

The decades just after World War II were a transformational period in the history of Italy--and of Italian cinema. After the traumas of war and fascism, the country underwent social and economic changes that affected every aspect of life, changes that fed the imaginations of the nation's filmmakers. Religion, family, gender relations, class struggle, and regional conflict provided themes for comedy, melodrama, and the characteristically Italian hybrid of fiction and documentary known as neorealism.

In examining some of the great films of this period, the course will explore some of these themes, and it will also emphasize the extraordinary creative power and artistic variety of the films themselves. We will examine the contrasting styles and approaches of some of the great Italian auteurs--including Federico Fellini, Luchino Visconti, Roberto Rossellini, and Vittorio de Sica. We will also attend to the careers of charismatic actors like Marcello Mastroianni, Sophia Loren, and Anna Magnani, whose emergence as global movie stars enhanced the glamour and prestige of a national cinema rooted in local experience.

FILM362 Calderwood Seminar in Public Writing: The Dark Turn in Television Storytelling

This course, offered in association with the Calderwood Seminars in Public Writing, examines a certain tendency in contemporary television storytelling. Taking the debut of "The Sopranos" in 1999 as a benchmark, we will explore the emergence in dramas and comedies of a dark, uncertain, pessimistic, or disillusioned address within a medium long known for its reassuring tone. We will consider the industrial and social conditions for this tonal shift, as well as the role it has played in elevating public perceptions of television's cultural value. The course will use the "beat model" developed in certain Calderwood Seminars, where students become "experts" in specific bodies of material. In this case, students will select a particular series on which they will focus over much of the course.

FILM368 Using the Moving Image Archive

Media history begins in the archive. Our understanding of the moving image as a medium and an art is founded on and shaped by the work of archivists. This class draws on Wesleyan's nationally recognized Cinema Archive to explore the role of archives in preserving and making accessible our film and television heritage from the silent film era to today's digital productions. In the early 20th century, films were seen as expendable. Archives today are dedicated to preserving moving images of all types, including home movies, art installations, studio films, television, and video games. Topics include preservation ethics, copyright, the challenges of digital preservation, the history of the archives movement, and how archives work. Students will research various types of moving image archives and work on a group project to trace the lifespan of a film from production through distribution and restoration.

FILM387 Seminar on Television Series and Aesthetics

Through frequent viewing of episodes, classroom discussion, and written exercises, students will consider television programs over multiple seasons and series as they work to describe and differentiate models of television series construction. Of primary interest is the creative decision making that goes into creating this commercial art form—recognizing patterns of intention, choice, and effect; how these operate on a variety of scales; and what attitudes a program may manifest toward the medium and the viewer. Series viewed may include I LOVE LUCY, THE PRISONER, THE LARRY SANDERS SHOW, LOUIE, NEWSRADIO, DAMAGES, and others, including student-generated selections.

FILM388 Advanced Global Film Auteurs

This course offers a critical introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion. Screenings will include films directed by Fernando Eimbcke, Abbas Kiarostami, Krzysztof Kieslowski, Akira Kurosawa, Satyajit Ray, Jean Renoir, Ousmane Sembène, Céline Sciamma, Seijun Suzuki, Agnès Varda, Luchino Visconti, and Zhang Yimou, among others.

FILM389 Film Genres: The Western

This course is devoted to aesthetic and cultural analysis of key films belonging to the Western genre. Our aesthetic approaches will include discussions of typical components of the Western, authorship in the Western, narrative structure, and the construction of the West via visual space and sound. Cultural analysis will place particular emphasis on the myth of the frontier, the relationship between the Western and political rhetoric, and the genre's treatment of race, ethnicity, and gender. Roughly equal weight will be placed on these two approaches. Though primarily a film analysis course, we will also address the historical trajectory of the Western from its early silent days through its decline in the early 1970s to its present-day status.

FILM390 History of Film Sound

This course examines the range of ways that film sound, an important yet often overlooked dimension of film style, has been used across the history of narrative cinema. Focusing especially on U.S. cinema, but also devoting time to sound-conscious international auteurs, the course examines how music, sound effects, dialogue, and even silence have played integral roles in telling stories and affecting viewers.

FILM391 Sex and Violence: American Film-making Under Censorship

This course examines how U.S. filmmakers have used narrative and stylistic techniques to address censorship requirements in U.S. cinema. Though the course will cover early cinema through recent cinema, its primary emphasis will be on studio-era censorship from 1930 to the 1950s. Through close film analysis, we will examine how censorship altered films, and how filmmakers manipulated film form and style to convey their intended meanings. Our analysis will serve as a way to reflect broadly on methods for making films within constraints, the range of cinematic techniques available to filmmakers, and how creative decisions impact viewers.

FILM392 Cinema Stylists: Sternberg, Ophuls, Sirk, Fellini

This course analyzes the films of four international renowned auteurs--Josef von Sternberg, Max Ophuls, Douglas Sirk, and Federico Fellini--whose work is consistently defined by the use of highly noticeable, expressive, and even dazzling stylistic techniques. The course will cover the major works of all four filmmakers and will examine each director's films in terms of narrative techniques, personal worldview and--especially--a distinct set of stylistic concerns. Relevant film style topics will include, but are not limited to, lighting, set design, costume, camera movement, color, sound, and editing. Studying these four filmmakers will reveal how filmmakers can define cinema in deeply personal terms and employ a flashy--even flamboyant--style to achieve their goals.

FILM414 Senior Seminar

In Spring 2019, senior seminar will be taught by a leading professional in independent film distribution, acquisition, and marketing. This course explores the contemporary cinema marketplace and its relationship to filmmaking. We will consider the process of defining and finding the potential audience for independent and studio films. The class mixes case studies of production, marketing, and reception with film screenings and analysis. Students will hone their skills of practical analysis: articulating a film's essential appeal, distilling its story, and assessing its artistic and commercial merits. Visiting producers and filmmakers will discuss their work in light of its intended audience and reception. Assignments include written briefs on recent releases and their market profiles, analyses of exemplary independent American films, and a collaborative case-study presentation. This is a master class in the film business taught from the perspective of effective cinematic storytelling.

FILM418 Documentary Filmmaking for Majors and Minors

This course explores the theory and practice of nonfiction filmmaking. We will pay particular attention to how structural and stylistic choices represent reality and shape viewer response. Through study and making, students will explore topics central to nonfiction filmmaking, including how documentary has been defined and redefined; how filmmakers perceive the relationship between documentaries and the realities they represent; what conceptions of truth guide the work of documentary filmmakers; and the ethics of documentary filmmaking. Students will engage with the issues through documentary filmmaking exercises and projects. Production lessons include shooting verite footage, lighting interviews, the use of wireless lavalier microphones, and documentary editing techniques.

FILM430 Documentary Production

This course is an immersive, hands-on introduction to the documentary film process, in which students will examine the world around them to create compelling stories where real people are the protagonists and the narratives are informed by real life. Students embark on an intensive journey to help foster the emergence of their cinematic voices. Through close study and analysis of feature-length and short documentaries, and active research, writing, producing, directing, shooting, sound recording, editing, and re-editing, students will rigorously explore the power and possibilities of nonfiction storytelling. The course is a dynamic combination of individual and group production work, in which students will be expected to produce their own exercises, as well as collaborate with their classmates on a short documentary video. Individual and group exercises will focus on the idea of portraiture and how to make effective visual and aural portraits of a place or person. This course is designed to introduce fundamental production concepts and techniques through lectures,

projects, and lab experiences. Film production experience is not required.

Production lessons include discussions of how to find story in research materials, build partnerships with documentary subjects, conduct interviews, shoot observational video footage, record sound, and edit digital video. Students will present works-in-progress in all phases of the creative process and participate in constructive critical discussions. Time demands are heavy and irregularly distributed.

FILM442 The Art of Doing: Creative Project Production and Making It Happen

Students learn collaborative creative super filmmaking powers before being dropped off on a metaphoric desert island with nothing but a camera phone and a song. Beauty Ensues. This studio class will focus on non-traditional video production techniques towards a final project of a class-created music video featuring music and performance by Amanda Palmer. Students will co-create every aspect of this video, from conceptualization to editing to screening, with the final product being released to her Patreon community.

The course seeks to illuminate the creative process by way of mindful reflection, and physical training to promote creative cooperation between various artistic mediums. Students are expected to participate in team building physical exercises inspired by physical theater, Butoh and some physical meditations. Meaning: Students will be expected to participate in physical activity that includes jumping, running, yelling, and the like.

The course will allow us to sketch answers to questions like these, among others: How do you forge creative collaborations that allow you to realize your projects and that create the best conditions for your creative work? How do you raise awareness about your creative projects?

FILM459 Writing for Television II

This advanced course requires that each student act as writer, producer/network executive, and lead discussant on one of the professional scripts we read. Students will be responsible for two meetings with the professor during the semester, two to three meetings with their producing partners, and one meeting with their actors (who will perform a short scene from the student's script at the end of the semester). Each student will conceive of and pitch three story ideas in the first classes, winnowing down to one idea for which they will write a story area, an outline, and a final script (which will go through three major revisions). Students are expected to come to class with a background in creative writing, focusing on character and dialogue as well as having completed one TV screenplay.

Prereq: **None**

FILM460 Scripting Series for the Small Screen

This course will introduce television series structure, including both the half-hour and one-hour formats. We will start by analyzing familiar shows and then each student will write original scenes for discussion in class. We will then develop an original series idea in class as a group and function as a "writers room" would on a series. Each student will be required to write equal parts of the outline/beat sheet, develop characters, and write/revise scenes, with the goal of executing a full pilot script in collaboration with one another under the guidance of the instructor. Grading will be based on weekly assignments, as well as regular attendance, class punctuality and attention to deadlines.

FRENCH LANGUAGE AND LITERATURE (FREN)

FREN101 Elementary French I

This multimedia course combines video, audio, and print to teach French language and culture as complementary facets of a single reality. It puts you in the presence of authentic, unsimplified French and trains you to use it in the dynamic context of actual communication. This complete, carefully sequenced course involves you actively in your own learning and emphasizes communicative proficiency--not the study of rules and regulations, but the development of skills, self-expression, and cultural insight. FREN101 is the first semester of the introductory and intermediate French language sequence.

FREN215 Composition and Conversation

This course prepares students for upper-level French courses and for study abroad. It offers students the opportunity to review and strengthen their speaking, writing, and reading abilities in French. Class time is devoted to grammar review and to discussions of short reading assignments (literary and nonliterary) from the French-speaking world (France, Africa, and the Caribbean). The semester ends with students reading an entire novel in French. Daily class discussions, oral presentations, weekly discussions with French teaching assistants, laboratory practice, outside-of-class grammar review, and compositions are to be expected.

FREN220 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes

Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

FREN222 Love and Loss in Medieval and Early Modern French Literature and Culture

The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.

Offering: **Host**

FREN223 French Way(s)

What are French ways? Do the French still wear berets? How do they really speak? What is important to them? How do they view themselves? What do they think about issues facing their country? What do they think of Americans? Students will explore these questions by examining the French press, comic strips, and television and radio broadcasts, as well as other selected readings. This course is designed for highly motivated students with a firm foundation in French who wish to refine their skills in listening, speaking, reading, and writing while gaining more insight into French life and culture.

FREN230 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture

The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

Offering: **Host**
 Grading: **A-F**

Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **MDST257**Prereq: **None****FREN238 Representing the Self, Representing Yourself**

In our digital age, with the pervasiveness of Facebook, Instagram, and other forms of social media, what can testimony do? What stories are told? How are they told? What do they mean? How do writers, artists, musicians, intellectuals, and politicians represent themselves? As students, how can you give your memories material substance? How do others' narratives influence the way you interpret your own being? In this course, we will begin to answer these questions by reading, watching, and examining a vast selection of French and Francophone texts, films, and images that recount the self from the Middle Ages to today. There will be a particular focus on queer people, women, and people of color, and how they negotiate difference and alterity in their work. Throughout the course, you will also journal your own experiences and imitate other writers' modes of expression (e.g., memoirs, autobiographies, autofiction, the graphic novel, film, documentary, theater, poetry, music, photography). The course will culminate in the creation of your own story, which will in turn prepare you to think critically about the world around you and how to tell your story in interesting, creative, and provocative ways. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****FREN254 Paris to Saigon: French Representations of Asia**

The course explores the ways in which French explorers, writers, and artists traveled to Asian countries, such as Japan, China, and Vietnam, in the 19th and 20th centuries and represented "Extrême-Orient," a Eurocentric designation. Attentive analysis of their works will allow us to question the colonial construction of the Far East as "other"; examine Asian influences on cultural, aesthetic, and literary expressions; and discuss Asian presence in postcolonial France. Issues such as orientalization, eroticization, and hybridization of genres and identities will be the subjects of our study.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****FREN258 France in an Age of Enlightenment**

The French 18th century is often referred to as an "Age of Enlightenment"—an era when philosophers attacked the values and traditions of the Catholic Church, theoretically replacing them with the universal values and rights that would become the foundation of the French Revolution. This 200-level class, which is designed for students who have taken French 215, will provide an introduction to this massive cultural movement (sometimes referred to as modern "paganism"). In the first part of the seminar, we will undertake a quick survey of the Scientific Revolution as it was understood by VOLTAIRE in the LETTRES PHILOSOPHIQUES. We will also read a portion of the DISCOURS PRELIMINAIRE and numerous articles by DIDEROT published in the ENCYCLOPEDIE. Finally we will read excerpts from ROUSSEAU's so-called "DISCOURS SUR L'INEGALITE." In the second half of this course, we will examine the fissures in the Enlightenment's all-encompassing program: its problematic discourses on race, class, and the status of women (MERCIER, L'AN 2440). This survey will ultimately lead us to MARQUIS DE SADE, who took Enlightenment philosophy to its logical conclusion by preaching debauchery and/or nihilistic views of the human condition.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****FREN273 The Business of Letters: The French Epistolary Novel**

Before the 18th century, the first-person narrative was often perceived as self-indulgent, not to mention distasteful. Eighteenth-century readers, however, became fascinated with the intimacy, immediacy, realism, and confessional aspect of highly charged first-person perspectives. It comes as no surprise, then, that this was the golden age of the ROMAN EPISTOLAIRE, the novel composed entirely of letters. In this class we will read a number of epistolary novels that allowed for the development of highly subjective, and often challenging, points of view. Sample works include Madame de Graffigny's critique of European society (LETTRES D'UNE PERUVIENNE), Mme de Charrière's praise of female independence (LETTRES DE MISTRIS HENLEY), Montesquieu's political satire of French life (LETTRES PERSANES), and Laclos's tale of seduction and aristocratic libertinage (LES LIAISONS DANGEREUSES). We will also read one example of the epistolary novel's stylistic counterpart, the ROMAN-MEMOIRE.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****FREN275 Histories of Race: Science and Slavery in an Age of Enlightenment**

A spurious abstraction when it was first "invented" during the 18th century, the concept of race has nonetheless forever left its imprint on history, not to mention all of our lives. This class will examine the history of race in two ways. First, we will read excerpts from travelogues to Africa and the Caribbean (as well as short excerpts from natural history) in order to chart the slow and halting creation of the concept of race as it crystallized in European thought during the 18th century. Having studied this "proto-raciology," the class will then examine several short manuscripts that were submitted to a contest on the source of "blackness" in 1741. Students in this class will come to understand the competing histories of race during the era, including religious accounts of race, anatomical understandings of race, conjectural histories of humankind, and the rise of classification schemes of humankind (in an era when tens of thousands of Africans were being deported to European colonies on an annual basis). The ultimate goal of this course is to provide students with a historicized understanding of the subject that will inform their reactions to both race and ethnicity in the future.

This course introduces students to the history of French cinema (the evolution of its aesthetics as well as of its main themes), from the films of the Lumière brothers in 1895 until now with French filmmakers of Maghrebi origins. One leading question of the course will be, What makes French cinema "French"?

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **COL286**Prereq: **None****FREN281 French and Francophone Theater in Performance**

This course introduces students to the richness of the French and Francophone dramatic repertoires, on the one hand, and, on the other, invites them to discover acting techniques (such as movement, physicalization, memorization,

mise en scène, and so forth). Students will thus put their language skills into motion, and the course will culminate in a public performance at the end of the semester. (Special accommodations will be made for students who do not wish to perform publicly). Taught exclusively in French, the course will place particular emphasis on the improvement of students' oral skills through pronunciation and diction exercises, all the while polishing their written expression and enhancing their aural comprehension.

FREN305 Negotiating French Identity: Migration and Identity in Contemporary France

With the largest minority in France being of Maghrebi origin, Islam has become the second largest religion in France today. What are the repercussions of this phenomenon for French identity? How did French society understand its identity and regard foreigners in the past? What do members of the growing Franco-Maghrebi community add to the ongoing dialogue surrounding France's republican and secular identity? This course will analyze the recent attempts at redefining French identity through a study of literary texts, films, and media coverage of important societal debates (e.g., the Scarf Affair, French immigration laws, the Algerian war). Readings, discussions, and papers will be in French.

FREN306 Spectacles of Violence in Early Modern French Tragedy

The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

FREN310 French Crowds, Mobs, and Mobilities

Under the date of 14th July 1789, Louis XVI entered in his diary but one word: "Rien." That day, a crowd of sans-culottes flooded the streets of Paris, overwhelmed the guards, and captured the Bastille. What the king could not foresee is the political power of a mob, a "foule," deriving its etymology and strength from the pressure of thousands of feet pounding the pavement. From this founding event on, the building of the French nation could be read as a history of mobile crowds kept alive today in yearly student and union demonstrations. How does "rien" become the emblematic event of French

national identity? What moves a crowd, and what does a crowd move? What do such gatherings accomplish, and how do they form in France and why?

Drawing on French sociology and literature, this course will explore the influence that crowds have exerted on French politics, society, and aesthetics. We will discuss the power of numbers by focusing on major subversive events in French history from the 18th century to contemporary France: the French Revolution, Chouanneries, barricades and the Commune in Paris, and May 1968, but also colonial and immigrant demonstrations in France. Students will be encouraged to relate the course to their own experience of mobile crowds, in concerts or sports events, on more quotidian moves such as commuting, and to draw comparisons with demonstrations across time and space, such as the "Arab Spring."

FREN324 Interpreting the "New World": France and the Early Modern Americas

The impact and long-lasting effects of the "discovery" of the "New World" on Europeans cannot be overestimated. This advanced seminar will compare and contrast styles of expedition and conquest among the European nations, though the course will focus on the French context and the various events and encounters that occurred in the early modern Americas, particularly between 1492 and 1610, a period that laid the groundwork for the subsequent colonial project. Throughout the course, we will pay special attention to the Amerindians' points of view. In turn, students will examine the insights and blind spots in 16th-century French navigators', cosmographers', cartographers', and intellectuals' interpretations, representations, and negotiations of difference by critically engaging with concepts such as nature, culture, alterity, gender, sexuality, marriage, religion, exchange, possession, conquest, and war. Reading, writing, and class discussions will be in French.

FREN333 Asia and the Making of France

Enlightenment philosophers, impressionist painters of the 19th century, and French Maoist intellectuals in the 1960s were all influenced by Asia. Although these influences from Asia were at times the fruit of solid knowledge, they were also often the result of imagination. In addition to attracting French intellectuals and artists, Asia also contributed very concretely to the economic development of modern France and its geopolitical position in the world. This relationship relied on voluntary exchanges but also on violence and French exploitation of Asian territories and people. Through the study of historical documents, films, and literary texts, this course aims to understand the various ways Asia shaped France. We will consider the various representations of Asia conveyed in 19th- and 20th-century France and the historical context of their production by focusing on key moments such as the Opium Wars in China, French colonialism in Indochina, and the two world wars. Reading, writing, and discussion will be in French.

FREN348 Artistic Creation in Fin-de-siècle France

The end of the nineteenth and beginning of the twentieth century--the so-called fin de siècle--was a period of remarkable creative energy, production, and upheaval in France. Many of the most-recognized names in the art world were active there during that time: Debussy, Monet, Picasso, Stravinsky, Matisse, Baudelaire, Van Gogh...and many of them collaborated across media. In this course, we'll dig deep into the music, visual arts, and literature of the period, relying on contemporaneous primary sources (literature, of course, but also newspapers and popular periodicals, artists' letters and manifestos, performance reviews and notes, etc) as well as relevant secondary analyses, to get a sense of the competing energies of liberation and decadence that nourished so many remarkable and influential works of art.

FREN382 Jungle and Desert in Francophone African Literature

This course analyzes the constellation of images and sensations conjured up by the terms "jungle" and "desert," which are opposite but equally extreme. We will explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes.

Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And, finally, how do we each see ourselves in relation to landscape? What is our own version of an "extreme" landscape?

FREN391 Diderot

In this class we will come to know the most progressive and often radical thinker of the French Enlightenment, Denis Diderot (1713-1784). We will begin this seminar with an examination of how this country abbot grew into the most well known atheist of his generation. We will then move onto his famous 74,000 article *Encyclopédie*, a book that not only dragged sacrilege and freethinking out into the open, but triggered a decades-long scandal that involved the Sorbonne, the Paris Parliament, the King, and the Pope. (During this portion of the class, students will undertake translations of select entries [from French to English] of the "dictionnaire" for possible publication.) In the second half of the semester, we will also study the writer's freewheeling art criticism. Finally, we will read two groundbreaking novels. The first of these, "La Religieuse", is a gripping pseudo-memoir of a nun who suffers unspeakably cruel abuse after she announces that she wants to leave her convent. The second, "Jacques le Fataliste", is a freewheeling anti-novel where Diderot used fiction to take up the problem of free will. In the final portion of the class, we will also read selections from his anticolonial and antislavery writings.

FREN399 French Histories: National Identity and Narratives since the Third Republic

At the end of the nineteenth century, schooling became free and mandatory in France. Since then, politicians have often considered the teaching of history as key to the construction of French national identity. Even today, some argue that the role of school is to equip children with a national narrative. French historians have questioned and resisted this instrumentalization, denouncing oversimplifications and ideological distortions. They also acknowledge that some biases have pervaded French history.

Through readings of historical novels, biographies, essays, and graphic novels as well as selected film and documentary viewings, this course will explore some of these national narratives and the way French historians, philosophers, and artists have participated in the construction of a French national identity.

The course will focus on France and its colonies since the 1870's and the Third Republic. Preliminary knowledge of the period is not required for this class. The final project will be a re-telling of a French historical event through students' preferred medium (video, graphic novel, essay, or podcast). The assignments during the semester will help students accumulate material and hone their skills toward this goal.

GERMAN LITERATURE IN TRANSLATION (GELT)

GELT228 Going Green, German-Style: The Relationship to Nature, 1800--Today

Few countries display as active a commitment to protect natural resources and the environment as Germany. Its focus on renewable energies, recycling, and conservation in general is unique even by European standards, and in the U.S., Germany's policies on sustainability and environmental preservation are often held up as models. It is important to recognize, however, that Germans did not achieve this degree of environmental awareness overnight. Rather, it represents the result of centuries of contemplating, controlling, and conserving nature and cannot simply be transferred to other cultures. In this course, we will examine the German (and European) cultural tradition by analyzing artworks and texts from the past two centuries that have both expressed and shaped salient attitudes and emotional responses. The goals of the course are to provide insight into Germany's long and complicated history of defining and relating to nature

and to allow you to reflect critically on your own attitudes toward nature and the environment.

GELT230F The Simple Life (FYS)

As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable.

We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GELT239 Modernism and the Total Work of Art

The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GELT260 The Agony and the Ecstasy: The German Novel and Novella

Starting with Goethe in the 18th century, German, Austrian, and Swiss authors have made major contributions to the literary genre of the novel and the sub-genre of the novella, typically shorter than a novel and restricted to one plot line. German prose works often grapple with profound philosophical questions, particularly those that bear on the meaning of life, the relation of the individual to society and to other individuals, the character of justice, definitions of ethics and morality, the nature and calling of the artist, and the tension between thought and emotion. In this course we will read, in English translation, longer or shorter works by some of the most significant and enduring authors writing in German between the 18th and 21st centuries. Particular attention will be paid to the portrayal of social and political issues, to narrative strategies and style, and to thematic continuities in the cultures of the German-speaking regions. We will also consider the challenges of translating fiction from one language and culture to another. Several films based on works read in the course will be viewed and analyzed. Ample opportunities will be provided for writing, in both expository and creative veins, and receiving detailed feedback.

GELT275 Creativity and Crisis: Germany 1918-1933

This course investigates the fascinating culture of the Weimar Republic, Germany's first, heady, and ultimately unsuccessful experience with democracy between the end of the First World War and the Nazis' rise to power. We will focus particularly on Berlin, coming into its own as Germany's first true metropolis, but will also look at Munich, another hub of cultural activity and the site of Hitler's early organizing activities. Among the topics to be studied may be the increasing influence of film, radio, and the press; modernism in literature; new impulses in art; the economic and social impact of hyperinflation and the Great Depression; changes in the roles of women; assertion of previously taboo gender identities; competing political ideologies; reactions to the immigration of Jews from Eastern Europe; the emergence of proletarian mass culture; and the observations of cultural critics such as Walter Benjamin and Siegfried Kracauer on the world taking shape before their eyes. We will also read works set in Berlin but written by outsiders (Isherwood and Porter).

GELT279F Good, Evil, Human: German Fairy Tales and Their Cultural Impact (FYS)

The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GELT302 Forward, Without Forgetting: The GDR in Literature and Film

In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include works by Günther de Bruyn, Christa Wolf, Brigitte Reimann, and Stefan Heym, among others. Participants will view and discuss films and TV series produced before and after unification.

GERMAN STUDIES (GRST)

GRST101 Elementary German

This course is an introduction to German and leads to communicative competence in German by building on the four primary skills--speaking, listening, reading, and writing--while developing participants' awareness of life and culture of German-speaking countries. Learning German and its structure will also enhance students' awareness of commonalities between the English and the German languages. The GRST101/102/211 course sequence will help students appreciate that contemporary Germany is economically and politically the leading country in the European Union and has a dynamic, multicultural society. The German language opens vistas into a world of ideas that is as complex as it is elemental. It provides access to many fields, from philosophy to the natural sciences and many disciplines between: history, musicology, art history, and environmental studies. These three courses prepare students to study abroad in Germany, on one of the two Wesleyan-approved programs in Berlin and Hamburg or continue with GRST212 here at Wesleyan.

GRST102 Elementary German

This is the second part of the two-part sequence in Elementary German (see GRST101). Students will continue their study of the four primary skills--speaking, listening, reading, writing--plus German grammar and culture. They will read a variety of authentic texts, listen to native speakers, handle everyday conversational situations, and write short compositions. At the end of the semester, students will write, perform, and videotape a skit based on the material learned this semester. GRST211 is the course following GRST102. Students who take GRST211 can apply to study abroad in Germany on one of Wesleyan's approved programs in Berlin and Hamburg or continue with GRST214 here at Wesleyan.

GRST211 Intermediate German

This course typically follows GRST101 and 102 and increases students' proficiency in the German language while they learn about different cities and regions in the German-speaking world. Working collaboratively, students engage in cultural activities with authentic readings and contextualized grammar in a unifying context. Through exposure to a variety of texts and text types, students develop oral and written proficiency in description and narration, as well as discourse strategies for culturally authentic interaction with native speakers. Classes focus on active use of the language. Film, music, and other audio clips are regularly integrated into the course to increase students' listening comprehension. Through regular writing assignments, students expand their vocabulary and practice varied styles and techniques. Among the course goals are improved communication and reading skills, an expanded vocabulary, more accurate and nuanced written expression, and increased insight into historical and cultural features of the German-speaking world. After the successful completion of this course, students can study abroad on Wesleyan's approved German programs in Berlin and Hamburg or continue with GRST212 at Wesleyan.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**Gen Ed Area: **HA-GRST**Prereq: **GRST102****GRST212 Practice in Speaking and Writing German**

This course is designed to build and strengthen skills in oral and written German. It functions as a bridge between the basic language series (GRST101&102 and 211) and the more advanced literature/culture courses. This course extends the focus on language and culture through reading, interpreting, and discussing longer German texts (including poems and short stories) begun in GRST211. Moreover, students will research various aspects of the history and culture of Germany and gain practice writing about and presenting the results of their research. Grammar instruction and review as well as vocabulary-building are integral parts of this course, since mastery of the structures of German will facilitate students' ability to express more complex ideas. We will supplement the textbook with additional readings, music, and films. Class discussion will be conducted in German.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-GRST**Prereq: **GRST211****GRST213 German Culture Today**

Readings, class discussion, and written work will be based on current and recent events and developments in Germany. Topics will include Germany's place in the new Europe and the world, Germany as a multicultural society, and German contemporary culture. The course will provide extensive practice in speaking, reading, listening, and writing in German and using literary and nonliterary texts, as well as audio and visual materials. Structured conversation, debates, and analysis of different types of texts, along with writing assignments in a variety of genres, will strengthen proficiency in German and prepare students for 300-level courses. This course can be taken either before or after study in Germany.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-GRST**Prereq: **GRST212****GRST221 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde**

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **SBS-CHUM**Identical With: **CHUM321, REES321, RULE321, RUSS321**Prereq: **None****GRST228 Going Green, German-Style: The Relationship to Nature, 1800--Today**

Few countries display as active a commitment to protect natural resources and the environment as Germany. Its focus on renewable energies, recycling, and conservation in general is unique even by European standards, and in the U.S., Germany's policies on sustainability and environmental preservation are often held up as models. It is important to recognize, however, that Germans did not achieve this degree of environmental awareness overnight. Rather, it represents the result of centuries of contemplating, controlling, and conserving nature and cannot simply be transferred to other cultures. In this course, we will examine the German (and European) cultural tradition by analyzing artworks and texts from the past two centuries that have both expressed and shaped salient attitudes and emotional responses. The goals of the course are to provide insight into Germany's long and complicated history of defining and relating to nature and to allow you to reflect critically on your own attitudes toward nature and the environment.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-GRST**Identical With: **GELT228, ENVS228**Prereq: **None****GRST230F The Simple Life (FYS)**

As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GRST239 Modernism and the Total Work of Art

The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GRST241 Introduction to European Avant-Garde, 1880--1940

This course will introduce students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

GRST251 Kafka: Literature, Law, and Power

Elias Canetti claimed that among all writers, Kafka was "the greatest expert on power." In this course we will focus on Kafka's narratives of power relations. We will read and discuss Kafka's sometimes painfully precise descriptions of how power is exerted in the family and in personal relationships and how scrutiny and discipline are exercised over the body. We will also consider Kafka's depictions of physical violence and of apparatuses and institutions of power and the ethical and political implications of these depictions. The working hypothesis of this course is that Kafka not only tells stories about power, but that his stories also contain an implicit theory of how power works in modern society.

GRST252 From Caligari to Hitler: Weimar Cinema in Context

This course offers a critical introduction to German silent and sound films from 1919 to 1932. It will test the thesis of Siegfried Kracauer's classic study that expressionist films in particular prepared the way for Hitler's rise to power. The focus will be on canonical films of the era including THE CABINET OF DR. CALIGARI, NOSFERATU, and THE LAST LAUGH (Murnau); METROPOLIS and M (Fritz Lang); and THE JOYLESS STREET and PANDORA'S BOX (Pabst). Some attention will also be given to films made at the ideological extremes of Weimar culture: KUHLE WAMPE (with a screenplay by Brecht), Leni Riefenstahl's THE BLUE LIGHT, and Pabst's THREEPENNY OPERA. Readings will include screenplays, essays, and reviews from the period as well as selected literary works such as Brecht's THREEPENNY OPERA and Irmgard Keun's novel THE ARTIFICIAL SILK GIRL.

GRST254 Critical Theory: From Karl Marx to Angela Davis

According to the Frankfurt School philosopher Max Horkheimer's 1937 essay "Traditional and Critical Theory," Critical Theory aims at dislodging traditional theory's reliance on the assumption that to theorize means to categorize and explain facts from a trans-historically fixed position. Instead, Critical Theory wants to uncover the formative socio-economic processes of exploitation, struggle, and domination that underpin both the objective appearance of reality and our subjective ability to become conscious of them. In doing so, it not only wants to critique the very foundations of society and subjectivity but also wants to ignite a utopian imagination. Although Critical Theory draws on the concepts of the Western philosophical tradition (in particular on Kant and Hegel), it views them as being tainted by the "irrational totality" of bourgeois society that structurally blocks the realization of genuine freedom, equality, and liberation from fear. Hence, Critical Theory is concerned not only with the critique of specific social ills but also with the abolition of their systemic causal conditions. For this reason, it is by design a practical and activist mode of theory, as exemplified by an insight Herbert Marcuse attributes to Angela Davis: "the philosophical idea, unless it was a lie, must be translated into reality."

In this seminar, we will do three things: 1) Retrace the genesis of Critical Theory from Marx's appropriation of Hegel's dialectical method to Lukács's theory of reification; 2) Explore the Frankfurt School's ambition to establish Critical Theory as an encompassing, multi-disciplinary research program addressing the pathologies of capitalism from the interlocking perspectives of social and economic theory, psychoanalysis, empirical social research, aesthetics, and ethics; 3) Examine how contemporary heirs to the tradition of Critical

Theory such as Angela Davis, Sianne Ngai, or Rei Terada have challenged and advanced the concerns of the earlier theory in light of our current neoliberal and authoritarian predicament.

GRST260 The Agony and the Ecstasy: The German Novel and Novella

Starting with Goethe in the 18th century, German, Austrian, and Swiss authors have made major contributions to the literary genre of the novel and the sub-genre of the novella, typically shorter than a novel and restricted to one plot line. German prose works often grapple with profound philosophical questions, particularly those that bear on the meaning of life, the relation of the individual to society and to other individuals, the character of justice, definitions of ethics and morality, the nature and calling of the artist, and the tension between thought and emotion. In this course we will read, in English translation, longer or shorter works by some of the most significant and enduring authors writing in German between the 18th and 21st centuries. Particular attention will be paid to the portrayal of social and political issues, to narrative strategies and style, and to thematic continuities in the cultures of the German-speaking regions. We will also consider the challenges of translating fiction from one language and culture to another. Several films based on works read in the course will be viewed and analyzed. Ample opportunities will be provided for writing, in both expository and creative veins, and receiving detailed feedback.

GRST261 Reading Nietzsche

Friedrich Nietzsche, trained philologist and self-proclaimed "free spirit," remains one of the most controversial figures in modern thought, a source of fascination and outrage alike. Best known as the philosopher of the "Dionysian," the "will to power," the "eternal return of the same," the "transvaluation of all values," and the "over-man," Nietzsche also proudly considered himself the most accomplished prose stylist in the German language. In this course, we will examine two closely interrelated issues: (1) the genesis of Nietzsche's major philosophical thoughts in the areas of epistemology, aesthetics, ethics, and the critique of religion, from his earliest to his latest writings; (2) the cultivation of a philosophical style that, in its mobilization of highly artistic modes of aphoristic reduction, metaphorization, personification, and storytelling, aspires to turn critical thinking into a life-affirming art form.

The course will combine philosophical interpretation with textual analysis. No prior knowledge of Nietzsche's works is expected; however, a willingness to set aside significant chunks of time to dwell in Nietzsche's texts is required. Students with reading knowledge in German are encouraged to read at least some of the assignments in the original. Guidance in doing so will be provided based on individual need.

GRST263 Inside Nazi Germany, 1933--1945

This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

GRST264 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933

Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to

ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

GRST266 Ethics After the Holocaust

The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

GRST272 Introduction to History: Germany from Napoleon to the Berlin Republic

Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions. We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler

in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

GRST274 In the Moment of Great Destruction: German Literature from 1600 to Today

German history has been characterized by immense upheavals, crises, and catastrophes, from the destruction of the Thirty Years War to Napoleon and the world wars. At times victims, at times perpetrators, Germans participated in and suffered from events that time and again destroyed established norms and traditions and called into question the very possibility and validity of human experience, morality, and sociability. As a result, German culture repeatedly faced the need to renegotiate how humans perceive and relate to their world, how people can unite to constitute a society, and how ethical standards can be upheld in amoral circumstances. In this course, we will examine the ways in which literary text combine aesthetic presentation with depictions of current chaos and universal or eternal laws to imagine livable lives in the face of uncertainty and adversity.

GRST275 Creativity and Crisis: Germany 1918-1933

This course investigates the fascinating culture of the Weimar Republic, Germany's first, heady, and ultimately unsuccessful experience with democracy between the end of the First World War and the Nazis' rise to power. We will focus particularly on Berlin, coming into its own as Germany's first true metropolis, but will also look at Munich, another hub of cultural activity and the site of Hitler's early organizing activities. Among the topics to be studied may be the increasing influence of film, radio, and the press; modernism in literature; new impulses in art; the economic and social impact of hyperinflation and the Great Depression; changes in the roles of women; assertion of previously taboo gender identities; competing political ideologies; reactions to the immigration of Jews from Eastern Europe; the emergence of proletarian mass culture; and the observations of cultural critics such as Walter Benjamin and Siegfried Kracauer on the world taking shape before their eyes. We will also read works set in Berlin but written by outsiders (Isherwood and Porter).

GRST279F Good, Evil, Human: German Fairy Tales and Their Cultural Impact (FYS)

The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that

we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GRST280 Work: Its History and Future

In this course, we will explore one of the fundamental concerns of human existence: "the creation of man through human labor," as Karl Marx once put it. Marx's interest in self-creation through work and the possibility of overcoming all forms of alienated work is arguably at the heart of what we imagine living well means today. For many of us, an idle life without work has become unthinkable. We live to work and we work to live. Yet while we have become ever more immersed in intimate forms of immaterial labor (keeping in touch with clients at all times, collaborating via digital platforms no matter where we are, tackling our jobs with ceaseless enthusiasm and creativity), waged labor has diminished and might now be thought of as a rare good. Soon the work of truck drivers will be replaced by self-driving vehicles, and the bulk of industrial production will be designated to robots. Automation and artificial intelligence will increasingly restructure intellectual labor, like that of lawyers, accountants, and data analysts, as well. What may once have been the dream of a liberated life is now motivating a feeling of dystopian dread: Fear of losing one's job, of being replaceable, is an all too common feeling. The jobs that remain are demanding but often monotonous. Moreover, deindustrialization in Western countries has created real misery in what used to be the core zones of global wealth accumulation—a development that right-wing populists in the United States and in Europe have been eagerly exploiting to advance protectionist and racist politics.

Against the social backdrop of precarious employment, stagnant wages, deindustrialization, the rapid expansion of vast unemployed and underemployed surplus populations, looming ecological disaster, and, crucially, the financialization of a structurally unstable global economy that seems to have exhausted its capacity for substantial growth in productivity, the future of work must be interrogated with renewed urgency. In addition to reading past and present theories of work, including some essential selections from Karl Marx and critical theory (e.g., Lukács, Adorno, Benjamin, Kracauer), Hannah Arendt's response to Marx in her distinction between labor and work, as well as recent academic work by feminists, affect theorists, and crisis theorists (e.g., Federici, Berlant, La Berge, Weeks, Clover), we will examine narratives and representations of work in films by Fritz Lang, Charlie Chaplin, Laurent Cantet, and Alexander Kluge, and literary texts by Brecht, Kafka, Dickens, Twain, Melville, Steinbeck, and Vonnegut. These thinkers and artists will give us a foundation for understanding the radical historical changes in the meaning of work in the past 200 years as well as its uncertain status in our immediate future.

GRST290 Nietzsche - Science, Psychology, Genealogy

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

GRST301 Advanced Seminar in German Literature: Poetry as a Way of Life

Who am I? What is the world? And what can language (not) do? Throughout its history, German poetry has returned, time and again, to asking these fundamental questions about a self, its relation to the world, and language's capacity to represent, influence, and constitute an I. Poetry serves as one of the central sites where the epistemological, moral, social, and aesthetic potential of mankind is negotiated. Lyric texts play a fundamental role in the creation and exploration of the promises, problems, and paradoxes of modern notions of subjectivity, society, and art. Almost all of the most canonical German poems pick up on some or all of these issues, and we will read a selection from the 18th to the 21st centuries. The goal of this class is to provide students with an overview of German poetic traditions and to give students the tools to talk about poetry in German. We will explicitly engage with analytic terminology as well as aesthetic discourses. All readings, writings, and discussions in German.

GRST302 Forward, Without Forgetting: The GDR in Literature and Film

In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include works by Günther de Bruyn, Christa Wolf, Brigitte Reimann, and Stefan Heym, among others. Participants will view and discuss films and TV series produced before and after unification.

GRST310 Newest German Literature

This seminar is designed to introduce students to literary texts written in the German language in the past few years. Because the texts we will read are of such recent vintage, they are not yet part of a literary canon: What their significance is and how and why we should read them is far from settled. For this reason, this seminar will fulfill a twofold task: (1) It will critically engage with some of the most cutting-edge literary writing currently being done in the German language; and (2) it will offer extensive opportunities to explore

and critique how these texts deal with contemporary social issues such as the ongoing refugee crisis and the revival of nationalist and authoritarian politics, or the accelerating socio-economic inequality and disintegration of the European welfare states.

This seminar is part of a collaboration between the German Departments at Wesleyan and the University of Minnesota. Some assignments require that students collaborate with their peers at the partnering institution. The two instructors will co-teach one session at each institution.

GRST330 Nietzsche als Versucher (CLAC)

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (*Beyond Good and Evil*, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

GRST335 Deutschland "Multikulti": Expressions of Germany's Cultural Diversity

That Germany is an ethnically and culturally homogenous country is a myth cultivated by the Nazis. Germany's position in the center of Europe has made its geographical and cultural identity fluid and the make-up of its population diverse at least since the Migration of Peoples (ca. 200--800 CE). Adding to the ethnic and cultural mix were influxes of Jews during the Middle Ages and later; the incursions of armies from all over Europe during the Thirty Years' War; the 17th-century immigration of French Huguenots to Prussia; the redrawing of borders after both world wars; marriages and liaisons between black GIs and German women after WWII; and, during the labor shortage that followed World War

II, the arrival of guestworkers from southern and eastern Europe and Turkey, many of whom ended up staying. Refugees also came from Eastern Europe during the Soviet era and during the Bosnian War, and for certain people not motivated by political or economic oppression Germany has proved an attractive destination. In this course we will focus on works of fiction and non-fiction by immigrants or descendants of immigrants, all of whom write in German, whether as their first or second language. Among the topics we explore will be homesickness; interactions with the bureaucracy; use of and perspectives on language; questions of citizenship and identity, assimilation, and integration; cultural misunderstandings; and encounters with bigotry and xenophobia. The experiences of Afro-Germans and the most recent immigrants from the Middle East and Africa will receive particular attention.

GRST350 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC)

This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

GRST376 The Volksstueck Tradition

In this course we will be studying the Austrian and German genre of the Volksstück. As the name suggests, plays in this genre are intended to address the joys and sorrows of ordinary people in their everyday lives, both reflecting and commenting on the social life of their times. While 19th-century Austrian Volksstücke owed much to the conventions of the commedia dell'arte, the genre evolved in the 20th century into a form of critical social analysis. This evolution accompanied changing concepts of the "Volk," with salaried office workers coming to the fore during the Weimar Republic. The 20th-century Volksstücke written between the world wars present characters who in real life would likely become supporters of the Nazis. Starting in the 1960s, playwrights and audiences rediscovered the Volksstücke of the prewar period, and new authors emerged. Topics and stylistic features we will examine include the changing figurations of the "Volk," dialogue employing actual or synthetic dialect and colloquial language, the prevalence of inarticulateness or inauthentic speech, oppression

and exploitation of women, shifts in class attitudes, and the increasing influence of the mass media. Interesting parallels to the Volksstück can be found in Norman Lear's long-running television series "All in the Family." Among the authors we will be reading are Johann Nepomuk Nestroy, Bertolt Brecht, Karl Kraus, Marieluise Fleisser, Ödön von Horváth, Rainer Werner Fassbinder, Martin Sperr, Wolfgang Bauer, and Franz Xaver Kroetz. All reading, writing, and class discussion will be in German.

GRST390 Romanticism-Realism-Modernism

In the study of German literature (and art), the terms romanticism, realism, and modernism designate a span of time extending from the "Age of Goethe" to the mid-20th century literary cultures of West Germany, East Germany, Austria, and Switzerland. In this seminar, we want to take a closer look at representative examples for each of the three categories: What kind of subject matters are prevalent in each respective period, what narrative, dramatic, and poetic devices and forms are typically employed? What distinguishes these periods from one another, how useful are these distinctions? What, finally, is the purpose of such periodizing of literature?

The purpose of this seminar is twofold: 1. It is intended to provide a historical overview of German literature by engaging with representative romanticist, realist, and modernist works of prose, drama, and lyric; 2. It is designed to critically probe the concepts of romanticism, realism, and modernism: How useful are these categories in making us understand the evolution of fiction, authorship and readership, literary subjectivity, or narrative form? What are some pitfalls of using these categories?

All readings, papers, and discussions will be in German.

GOVERNMENT (GOVT)

GOVT108 Public Opinion and American Democracy

Central to the concept of a representative democracy is the idea that citizens hold elected officials accountable for the policies they enact (or fail to enact). Yet ordinary American citizens know little about politics and often appear as if they have few consistent opinions. Still, elected officials, aspiring candidates, media, and organized interests spend considerable time scrutinizing political polls, which are increasing in number. Can citizens be uninformed and public opinion informative at the same time? If so, what are the implications for democratic representation? This seminar will introduce the ways in which public opinion is measured, where opinions or attitudes come from and how they are changed, the determinants of vote choice, and the relationship between public opinion and policy outcomes. This course does NOT count toward the government major.

GOVT116F Good Books on Bad Wars (FYS)

This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

GOVT151 American Government and Politics

This course introduces the "building blocks" of American politics and government at the national level. It has four main parts: (1) foundations of our governmental system, (2) political institutions and the way they generate policy, (3) politics at the level of the individual citizen and the mechanisms that link the masses to elites, and (4) how all the factors come together in the making of public policy. We will scrutinize insider accounts of politics, scholarly work on governmental

processes, and popular debates on issues and institutions. In addition, we will discuss why Americans are often so unhappy with their politics and politicians and the challenges faced by elected officials attempting to meet a wide scope of public demands. This course is designed specifically for first-year students.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

GOVT159 The Moral Basis of Politics

An introduction to upper-level courses in political theory, the course considers the basic moral issues that hedge government and politics: Under what, if any, circumstances ought one to obey the laws and orders of those in power? Is there ever a duty to resist political authority? By what values and principles can we evaluate political arrangements? What are the meanings of terms like freedom, justice, equality, law, community, interests, and rights? How is our vision of the good society to be related to our strategies of political action? What are the roles of organization, leadership, compromise, and violence in bringing about social change? Readings will include political philosophy, plays, contemporary social criticism, and modern social science.

GOVT220 From the Great Depression to the Great Recession: US Political Economy

Following the tumult of the Great Depression and World War II, the United States entered a period of great prosperity--two decades that combined steady growth, low inflation and unemployment, growing household incomes, and reduced levels of income inequality. Yet, by the mid-1970s, the nation was mired in stagflation and subsequent decades brought a significant departure from the earlier mix of policy commitments. What many now describe as a "golden age" was replaced by a period of stagnant wages, growing inequality, and heightened vulnerability to a host of risks. In this course, we explore the policies and institutions that emerged out of the New Deal, their subsequent erosion, and the factors that shape the options available to contemporary policymakers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

GOVT238 American Political Parties

This course explores the origins, purposes, roles, and consequences of political parties in the American political system. After a brief consideration of the broader theories behind political party systems, we will turn our focus to the party system in the United States. V. O. Key (1964) presented a tripartite definition of political parties that we will use to structure our exploration of parties for the rest of the course: party as organization, party in government, and party in the electorate. In these sections, we will address political party polarization, party identification, parties' fundraising, and many other related topics. From this rich examination of political parties in the U.S. context, we will discuss why parties exist and enable democracy, but also discuss their potential flaws and failures.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT239 Racial and Ethnic Politics

This course is a historical and contemporary examination of the role of race in American politics and the political behavior of African Americans, Asian Americans, and Latinos in the U.S. Topics will include, but are not limited to, racialization and the persistence of racial segregation in the 21st century, racial and ethnic group identities and consciousness in shaping minority political attitudes and behavior, challenges of minority representation, the role of race in campaigns, and the complex relationship between minorities and America's two major political parties.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-GOVT**

Prereq: **GOVT151**

GOVT250 Civil Liberties

This course, the politics of civil liberties, introduces students to a uniquely American contribution (one that other Western democracies have freely emulated) to the practice of politics: the written specification of individual liberties and rights that citizens possess against the state. This is not, however, a course on law. It is, instead, a course in political science that has as its subject the relationship of law to some of the most fundamental questions of politics. Topics covered will include privacy, due process, equal protection, freedom of expression, and freedom of religion.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT252 National Security Law

This course explores the legal questions raised by historical and contemporary national security issues and policies. We will focus on how to approach national security questions by understanding the fundamental legal tenets of national security policies, the analyses used by courts and administrations to confront various intelligence and terrorism issues, and theories of how to balance the interests of national security with civil liberties. Topics covered include presidential power, intelligence collection and covert action, the Fourth Amendment and electronic surveillance, and the detention, interrogation, and trial of suspected terrorists.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT253 The American National Security State

In this course we will focus on the rise of the national security apparatus in the U.S. through the second half of the 20th century. This topic deals with political issues that are often characterized as "intermestic" because they occur at the point of intersection between domestic and international politics. Accordingly, we will examine the ways in which external forces influence internal state-building. We will also consider the choices and implications of policies designed to provide for what President Roosevelt famously called "freedom from fear."

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

GOVT272 South Asian Politics

When India gained independence from British Rule in 1947, democracy was not expected to last in the heterogenous and poor sub-continent. Yet, democracy has thrived in India for almost 70 years and, more recently, other South Asian countries have democratized. What explains this unexpected trend? Is there a connection between colonial legacies and South Asian democratization successes (and failures)? After an overview of caste, religion and language in the region, this course explores South Asian politics by examining the historical and institutional development of democracy in India, Pakistan, Bangladesh, Nepal, and Sri Lanka. In particular, we will examine how the politics of accommodation and good institutional design have affected the persistence of democracy on the sub-continent, and we will also consider relevant policy implications.

GOVT274 Russian Politics

The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. While the focus of the course is Russia, students will also study the transition process in the other 14 states that came out of the Soviet Union. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

The course will include a role-playing simulation of Kremlin decision making that will run over several weeks.

GOVT276 Arab Spring and Aftermath

The course explores the complexities of political change in the Middle East and North Africa by narrowing in on the series of protests that became collectively known as the "Arab Spring." Drawing from theories of democratization and contentious politics, the readings examine both general patterns across the region and the political dynamics of individual cases. We will ask, for instance, why authoritarianism has persisted in the Middle East, what explains the variation in protests and in government responses, and what factors shape political reform and the prospects of stability and democratization moving forward. At the same time, we will also follow the turn of events in several key cases such as Tunisia and Syria; attempt to understand what factors led to the gradual progression from euphoria to despair in countries like Egypt, Libya, and Yemen; and reflect on why the revolutionary spark did not catch on in certain countries.

GOVT277 Islamic Movements and Parties

This course examines the diversity of movements and political parties that take Islam as a reference point, and situates these discussions within broader debates around religion and politics. Through a variety of cases spanning from the Middle East and North Africa to Southeast Asia, we will explore the rise and evolution of different types of Islamic movements, and discuss different modes of mobilization, organization and interaction with the state and with other social and political actors. We will examine why some groups form political parties, and how they navigate the tensions between the needs of the party and the mission of the movement. We will consider how Islamic parties impact local and national politics, and in turn how they respond to shifting political terrains and challenges from within. The course will conclude with a reflection on "post-Islamism" and Western attitudes towards Islamic movements.

GOVT278 Nationalism

Nationalism is the desire of an ethnic group, a nation, to have a state of its own. Nationalism emerged as a powerful organizing principle for states and social movements in the 19th century and was integral to the wars and revolutions of the 20th century. This course examines rival theories about the character of nationalism and tries to explain its staying power as a political principle into the 21st century. It looks at the role of nationalism in countries such as the U.S., France, India, China, and Japan, and nationalist conflicts in Northern Ireland, Quebec, Yugoslavia, the former U.S.S.R., and Rwanda. The course is reading- and writing-intensive.

GOVT282 African Politics

This course introduces students to contemporary African politics from the colonial period to the present. We analyze independence movements, the rise of authoritarianism, the challenges of economic development, violent conflict, and processes of democratization and nation-building that have shaped the lives of people across the continent. The course also examines persistent themes and theoretical debates including the role of ethnicity and gender, foreign aid, and new forms of protest politics in the social media age. By combining historical and thematic materials, students learn how varied country histories help explain current political institutions, levels of stability and economic opportunity, and modes of social and political participation.

GOVT284 Comparative Politics of Western Europe

The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian "second republic"?

GOVT285 Losers of World War II

This course explores the experiences of Germany and Japan in the postwar era. These countries faced the dual challenge of making political transitions to democratic government and recovering from the economic ruin of World War II. Japan and Germany both were occupied and rebuilt by the United States, and both were blamed for the devastation of the war. How did Japan and Germany respond to being cast as worldwide villains? How strong were the democracies that developed? This course explores these questions by comparing the culture, history, and institutions of these two countries.

GOVT298 Terrorism and Film

This course uses the prism of cinema to address some of the major debates surrounding terrorism. The first part of the course is devoted to understanding terrorism. It explores the root causes of violence as well as the reasons why

individuals and organizations turn to violent tactics. The second part assesses the implications of terrorism for U.S. foreign policy and for the definition of security. Films throughout the course contextualize the theoretical issues and address the question of political violence from alternative perspectives: those of the perpetrators of violence, victims, soldiers, government officials, and police officers. Films will be watched outside of class. Class discussions will address both theoretical issues and the portrayal of terrorism in films.

GOVT302 Latin American Politics

This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include, Why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

GOVT303 The Evolution of War

While most societies condemn physical violence between individuals, they condone and encourage collectively organized violence in the form of warfare. War is obscene, yet all modern societies have engaged in warfare. This course will examine war as a social, political, and historical phenomenon. We will look at the way in which wars have led to the consolidation of political power and the acceleration of social change, as well as the relationship between military service and the concept of citizenship. The course also examines the crucial role played by technology in the interaction between war and society. Films and novels will be examined to test to what extent these literary works accurately reflect, or obscure, the political, social, and technological logic driving the evolution of war. Our examples will include warfare in premodern society, the gunpowder revolution in early modern Europe and Japan, the American Civil War, colonial wars, World War I, World War II, Vietnam, and Iraq.

GOVT306 Land and Conflict in a Global Perspective

For much of the world's population, land sustains livelihoods, shapes identities, and provides a source of investment and security. Yet the centrality of land in everyday life also means that it can become a source of contentious politics and violence. This course explores the meanings that people attach to land, the institutions that affect land access and security, and the mechanisms through which land shapes conflict. We also consider how a close focus on land affects policy debates around issues such as economic development, food security, and post-conflict peacebuilding. The course examines these questions in several country contexts including Kenya, China, Indonesia, Colombia, and Afghanistan. The course is interdisciplinary in its approach and should appeal to students interested in peace and conflict issues, environmental politics, international development, and human rights.

GOVT311 United States Foreign Policy

This course provides a survey of the content and formulation of American foreign policy with an emphasis on the period after World War II. It evaluates the sources of American foreign policy including the international system, societal factors, government processes, and individual decision makers. The course begins with a consideration of major trends in U.S. foreign policy after World War II. With a historical base established, the focus turns to the major institutions and actors in American foreign policy. The course concludes with an examination of the challenges and opportunities that face current U.S. decision makers. A significant component of the course is the intensive discussion of specific foreign policy decisions.

GOVT314 Public Opinion and Foreign Policy

The relationship between leaders and the public remains a core concern of democratic theorists and political observers. This course examines the nature of public views on foreign policy, the ability of the public to formulate reasoned and interconnected perspectives on the issues of the day, and the public's influence on foreign policy decisions with a focus on the U.S. We will consider the role of the media and international events in shaping public perspectives and public attitudes toward important issues such as internationalism and isolationism, the use of force, and economic issues. Finally, the public's influence will be examined across a range of specific decisions. This course provides an

intensive examination of a very specific area of research. As such, strong interest in learning about public opinion and foreign policy is recommended.

GOVT315 Policy and War through Film

This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

GOVT326 Political Consulting for International Business

This course is an applied course in political consulting skills for international business. It is designed for students who are directed toward a career in international business. Entry to the course requires a strong track record in prior involvement and or interest in international business. Emphasis will be placed on developing the most important political skills related to working in an international corporation. Learning will take place by applying what has been learned in real-life international business scenarios. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional environments. The course asks the class to function as a working committee of top executives trying to confront important international business challenges.

Prereq: **None**

GOVT327 Experiments in International Development

Do efforts to help the world's poor actually work? What motivates wealthy countries and organizations to promote development? Are there unintended consequences of these activities? This seminar teaches the experimental method of social science research and applies it to these and related questions. Students will read examples of how social scientists have used experiments to study international development--broadly defined--including topics such as foreign aid, conflict and violence, international investment, elections, global governance, and migration. The course will prepare students to design and analyze their own experimental research project. It is especially appropriate for sophomores or juniors who are considering summer research or writing a thesis in government.

Prereq: **None**

GOVT330 Policy and Strategy in War and Peace

This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.

GOVT331 International Law

International law plays an increasingly important role in global politics. This course will examine the interaction of law and politics at the international level and how each influences the other. The course will examine the sources of international law; the roles played by international organizations such as the United Nations, the World Trade Organization, and the International Criminal Court; and the roles played by various participants in global governance, including both state and nonstate actors. We will focus on several key issue areas, such as human rights, economic governance, the use of force, war crimes, and terrorism. Today it is impossible to completely grasp global politics without an understanding of international law; this course is offered to bridge that gap.

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT339 Contemporary Political Theory

How shall we get along? This course examines some important 20th and 21st century theories of politics. Major issues include the role of reason and emotion in grounding the basic principles of our political lives, the conceptual foundations

of liberal and civic republican democracy, and critiques of liberalism from communitarian, critical theory, and postmodern perspectives. We will explore what political theory can be today. This course, together with GOVT337 and GOVT338, provides a survey of major Western political theories; at least two of these courses are recommended for students concentrating in political theory.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT340 Global Justice

This course examines the moral and political issues that arise in the context of international politics. Is the use of violence by states limited by moral rules, and is there such a thing as a just war? Are there human rights that all states must respect? Should violation of those rights be adjudicated in the international courts? Are states justified in enforcing such rights beyond their own borders? Is a system of independent states morally legitimate? What, if any, are the grounds on which states can claim freedom from interference by other states and actors in their internal affairs? Must all legitimate states be democracies? Do states and/or individuals have an obligation to provide assistance to foreign states and citizens? Are there any requirements of international distributive justice?

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT343 Political Representation

With national political campaigns heating up, it's a good time to ask, Why do we have political representation? Is it inferior to direct democracy? Is a representative supposed to stand and act for the people who elected him or her, for the party platform, for the entire constituency, or for his or her own conscience about what is right? We will read theoretical and empirical works on America and other countries and study social movements and political parties as key mediating institutions. We will ask how representation connects the individual to governing and to sovereignty, citizenship, identity, and community. And, how do new forms of democratic representation contribute to regime change?

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT344 Religion and Politics

The Islamic State movement challenges state borders and the separation of mosque and state. Can theocracy be justified in political theory? In contrast, how can an organized religion accept public constitutional boundaries and rule? Can the concepts of law in religion and politics be reconciled? Should church and state be separate, and if so, how? How has religion affected political institutions, and, in turn, been affected by them? Which religious values are compatible with democracy, and which ones go beyond democracy? We will explore the relation of three monotheisms--Judaism, Christianity, and Islam--to political life in nation-states and empires through theoretical and empirical readings from ancient, medieval, and modern times.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-GOVT**

Prereq: **None**

GOVT345 Citizenship and Immigration

This course examines the concept of citizenship and explores its connection to immigration, ideas of membership, political rights, and processes of incorporation as well as integration. Some of the core questions we will pursue include: What responsibilities do liberal democracies have to immigrants? How should we conceive of citizenship? Should we think of citizenship as a formal political and legal status? As an entitlement to a set of rights? As active participation in self-governance? As an identity? Or, something else entirely? How have racial, ethnic, gender, and class identities and hierarchies shaped the access people have to rights and formal membership? Finally, we will evaluate how political thinkers have argued for the inclusion and exclusion of immigrants into the political community. Most of our readings for the term will be drawn from legal theorists and political philosophers; we will also read some work by historians, political scientists, and sociologists for historical context and background.

Offering: **Host**

Prereq: **None**

GOVT346 Foundations of Civic Engagement

The promise of democracy is that citizens can act together to shape the conditions of their collective lives. This class examines that promise, focusing on the ways in which civic engagement can contribute to its realization. We examine civic engagement both as a theoretical perspective on citizen participation and an active practice. What does it mean to have a truly democratic society? What is the role of citizen participation, both within formal political activity and in civil society generally? What role should experts play in democratic politics, and how can expertise be squared with democratic equality? What, if any, responsibility does the University have to promote civic engagement?

GOVT347 Political Freedom

Is political freedom about doing what you want as long as you don't hurt anyone else? Is it about collectivizing power or actively participating in governance? Is freedom an inherently individual practice or a necessarily collaborative one? A private or public matter? Does it depend upon rights or the transformation of social conditions? Does it emerge from political representation or direct democracy? Is capitalism the scene of human domination, human freedom...or both?

Is freedom a concept, a principle, or a practice? What is the relationship of political freedom to power, equality, and community? What is the relationship of social identity to freedom--is it emancipatory or imprisoning? Is freedom something we even desire, or do we experience it as a burden? What happens when Dr. King meets Karl Marx, when John Stuart Mill meets Kate Bornstein, when Cathy Cohen meets Milton Friedman?

In this course, we will pursue these kinds of questions through consideration of classics in Western political theory, contemporary writings, and some films. We will neither settle the question of what freedom is nor the question of how to produce it. However, we will deepen our appreciation of its importance and complexity.

GOVT348 Justice and Equality

To what extent and in what ways does justice require that people have (roughly) equal life prospects? That issue has become increasingly urgent as inequality has increased rapidly during the last 40 years or so. Although inequality in the US has grown faster than in most other (already developed) countries, the increase in inequality is widespread. At the same time, at the global level there has been a reduction of inequality as economic growth has delivered hundreds of millions of people from deep poverty. This class will examine the relationship between equality and justice. Our principal concern will be to assess how, in what ways, and among whom justice requires equality, but we will also look at the dynamics of inequality—how inequality has developed historically, the factors explaining the recent surge of inequality within countries while equality of life prospects has lessened globally, how growing inequality may be affecting domestic politics, and the policies that could address the issue of equality.

GOVT349 Resistance and Revolution

What is a political revolution and how do you know? What is distinctive about political resistance, and when do such acts succeed in expanding human freedom? Students in this course will read great works in political theory on the concepts of human resistance and political revolution. Examining cases such as the French Revolution, India's independence movement, the Algerian War, and the Revolutions of 1989 in Eastern Europe, we will ask how various theories of revolution, resistance, and regime change shaped political debate in the public and private spheres. Core thinkers we will examine include Hannah Arendt, Emmanuel-Joseph Sieyès, Edmund Burke, Olympe de Gouges, Václav Havel, Albert Camus, and Mahatma Gandhi. This course prompts students to explore the historical contexts in which the respective authors produced their texts and to consider the ways in which their ideas of resistance and revolution emerged from their political landscapes.

GOVT352 Deception and Democracy

What's the best way to tell if a politician is lying? According to the punchline of this old joke, you should simply determine whether their lips are moving. This course will undertake a more complex and nuanced analysis of political deception and democratic government. Is lying for political gain undemocratic? What ethical duties and obligations befall representatives and citizens within a democracy? Where do we draw the line between persuasion and deception? By examining the philosophical treatment and historical practice of political deception - from Plato's Myth of the Metals to Donald Trump's illusory trade deficit with Canada - we will broaden our understanding of various participatory, deliberative, and epistemic forms of democracy and their procedural and substantive commitments.

GOVT355 Political Theory and Transitional Justice

Transitional justice refers to the variety of legal, political, and social processes that occur as a society rebuilds after war; it includes war crimes trials, truth commissions, and the creation of memorials. Although the term "transitional

justice" is a recent one, the philosophical issues contained within it are at the core of political philosophy. What kind of society is best? What is the relationship between political institutions and human nature? What does justice mean? The purpose of this course is to understand the issues of transitional justice from both practical and philosophical perspectives and will include case studies of World War II, South African apartheid, and the genocide in Rwanda.

GOVT366 Empirical Methods for Political Science

This course is an introduction to the concepts, tools, and methods used in the study of political phenomena, with an emphasis on both the practical and theoretical concerns involved in scientific research. Designed to get students to think like social scientists, the course covers topics in research design, hypotheses generation, concept/indicator development, data collection, quantitative and qualitative analysis, and interpretation. Students will become better critical consumers of arguments made in mass media, scholarly journals, and political debates. The course is especially appropriate for juniors who are considering writing a thesis in government.

GOVT367 Political Science by the Numbers

This course covers the basics of probability theory and statistics. The main purpose of this course is to promote the understanding of statistical concepts and how these concepts can be used to make inferences about the political world. Topics include probability distributions, correlation analysis, linear regression, generalized linear models, maximum likelihood, logistic regression, causal inference, experiments, and non-parametric modeling. Lectures will mainly cover theory, while readings will connect the concepts described during lecture to problems in political science. Whenever possible, the instructor will draw upon research in political science to illustrate the why and how of a given concept or technique. Demonstrations will allow students to "play around" with abstract statistical concepts. Most lectures will have an interactive component involving class participation. Problem sets will cover some of the more technical aspects of what we discuss in class along with applications using real data.

GOVT374 Seminar in American Political Economy and Public Policy

This seminar will explore the role of crisis in policy change. After exploring the theoretical debates on political economic and institutional change, we will examine in detail the impact of crisis in the past century. We will focus particular attention on the Great Depression, the stagflation of the 1970s, and the recent financial crisis. In each case, crisis forced a reappraisal of accepted economic and political theories, scrutiny of existing institutions, and efforts (successful and unsuccessful) to introduce new policies and institutions.

GOVT375 American Political Development

This is a course about the big questions in American politics. What is it all about? What does it mean to be living under a text written more than two centuries ago? Is the very concept of development an oxymoron for constitutional government? This course introduces students to a scholarship and a method of

analysis that melds the historical with the institutional, applied to understanding the evolving state/society relationship in American political life. We will examine the ways in which developing state institutions constrain and enable policy makers; the ways in which ideas and policy-relevant expertise have impacted the development of new policies; the ways in which societal interests have been organized and integrated into the policy process; and the forces that have shaped the evolution of institutions and policies over time. This seminar will provide an opportunity to survey the literature drawn from several theoretical perspectives in the field and to consider competing arguments and hypotheses concerning the development of the American state and its changing role in the economy and society.

GOVT376 Political Polarization in America

In the 1950s, political scientists feared that weak parties in the U.S. threatened democratic accountability. Today, many political scientists argue strong, ideologically extreme parties distort representation. Undoubtedly, things have changed, but why? Several possible culprits exist, including partisan gerrymandering, primary elections, the ideological realignment of the electorate, and changing congressional procedures. We will cover the possible explanations and try to decipher what explanation, or combination of explanations, is most convincing. While we evaluate the arguments for why polarization has increased we will also debate the merits and drawbacks of strong parties at the elite level. Finally, we will examine to what extent polarization among elected officials and activists reflects polarization in the public.

GOVT377 American Political Thought

This course will provide students with a thorough discussion of the main currents of American political thought. We will explore a selection of key texts and speeches that have helped to shape American political culture. Beginning with the Founders and ending with the contemporary era, we will cover moments of critical change between then and now. We focus on the intellectual battles of the past because, apart from being rewarding in themselves, they help us to think critically about contemporary politics. Accordingly, this course will emphasize how ideas give rise to individual identities, how they motivate political actors, and how they explain political outcomes.

GOVT381 The Political Economy of Oil

This course examines the strategic, political, and economic aspects of the global oil and gas industry. On one side is the United States as the dominant energy consumer, for whom securing oil supplies has been a major strategic priority since the 1930s. On the other side are a variety of producer countries, for whom oil has brought wealth but also political instability and conflict. Political scientists actively debate the impact of oil on the prospects for democracy and economic development. It is also important to understand the structure of the industry and the goals of the corporations that make it up. Students will complete case studies of individual producer countries and oil companies. The cases selected will cover the whole range--the Middle East (e.g., Saudi Arabia, Iran), Russia and Central Asia, and developing countries (e.g., Venezuela, Nigeria)--not to forget other cases such as Norway and Trinidad. We will also examine the phenomenon of peak oil and the rise of natural gas and other fuels.

GOVT383 Democracy and Development in India

Much has been written and said about the link between democracy and religious/ethnic fragmentation. When India gained independence from British

Rule in 1947, many observed that the likelihood of the new country remaining democratic was limited. Yet, democracy has thrived in India for almost 70 years. Other South Asian countries have recently followed suit. How do countries with multiple social, economic, ethnic, and linguistic cleavages manage democracy and what is the connection between their successes (and failures) in this area and the persistence of widespread poverty? This course focuses on the "politics of accommodation" in South Asia, examining institutions, elite bargaining, the deployment of force, accommodation of regional leaders and their political aspirations, and the constant reconfiguration of caste, party, and religious alliances to explain why Indian politics in particular is often dominated by social accommodation rather than the amelioration of poverty. In addition to focusing on India, we will examine a number of comparative cases from elsewhere in South Asia.

GOVT386 The Nuclear Age in World Politics

This course examines the role of nuclear weapons in world politics. Why do states acquire nuclear weapons? What are they good for? Do nuclear weapons make weak states more secure by leveling the playing field, or less secure by making them targets for annihilation? Are nuclear weapons a force for stability or instability? Are missile defenses defensive or offensive? Are these weapons still relevant, or is it time to rethink their usefulness? Topics include rational and extended deterrence, strategic doctrine, nuclear superiority, the stability-instability paradox, nuclear proliferation, rogue states, nuclear terrorism, missile defense, and Cold War crises.

GOVT387 Foreign Policy at the Movies

Recent research on public opinion has suggested that public attitudes about foreign affairs are informed by many non-news sources. This course examines the messages and information provided by movies with significant foreign affairs content. The questions considered are, What are the messages about international politics sent by the movies? Are these messages consistent with the understanding of the events and processes within the political science literature? What are the implications of movies and the information they provide for democratic governance? Students will watch the movies outside of class. Class periods will be devoted equally to discussion of the political science concepts and their portrayal in films.

GOVT389 The Global Village: Globalization in the Modern World

Globalization is considered by many to be the most powerful transformative force in the modern world system. Modernization and technology, which are greater today than at any time in history, have effectively made the world a smaller place with respect to the interdependence and interpenetration among nations. But while most agree on the transformative power of globalization, many disagree on its nature and its effects on modern society. Liberals hail globalization as the ultimate means to world peace and prosperity. Marxists see it as a means of reinforcing the inequality and unbalanced division of labor created by modern capitalism. Still others, such as mercantilists and nationalists, see it as a source of political instability and cultural conflict. This course analyzes globalization principally through this tripartite theoretical lens. It traces its origins and its evolution across the 19th and 20th centuries. It also tries to determine the impact of globalization on the most important issues of international relations today: on domestic and international political systems and on social, cultural, and international economic relations. Through analytical, critical, and theoretical approaches, the course attempts to ascertain the nature and impact of globalization and ultimately shed light on the fundamental question: To what extent is globalization a force for good and evil in the modern world system?

GOVT390 Presidential Foreign Policy Decision Making

In the realm of foreign policy, good choices can avoid or win wars, while poor choices can lead to disaster. Although analysts consistently evaluate the quality of U.S. presidential foreign policy decision making, the fundamental aspects of good and poor judgment remain controversial. With a focus on the U.S. presidency since World War II, this course starts with a consideration of the effects of both individual character and decision-making processes in determining the quality of foreign policy choices. The majority of the course focuses on these issues through the intensive discussion of case studies written by the students in the course.

GOVT393 The Politics of Authenticity

Is there such a thing as an authentic self? If so, can politics help us realize it? Fifty years ago, authenticity was a thriving political ideal, invoked by radical feminists, black liberation movements, gay and lesbian activists, Marxists and conservatives alike. Over the past four decades, however, political appeals to authenticity have come under heavy scrutiny. Some claim that appeals to authenticity inadvertently marginalized individuals who are not "true women," "real blacks," or "actual natives." Others argue that the idea of an authentic culture can be deployed to constrain individual members of cultural minorities. Where does authenticity reside--in gender, sexuality, experience, or culture--and how do we know which one is "real"? Is it worth faulting politicians for hypocrisy if there is no such thing as a "true self"? What becomes of certain emancipatory or justice claims--such as those coming from trans-politics or multiculturalism debates--without a notion of authenticity? In this course, we will discuss what authenticity is or might be, how it has been conceptualized in political theory and contemporary social movements, and why it has become an object of widespread suspicion and continuing appeal.

Prereq: **None**

GOVT395 Justice

A widely held view of justice in modern political thinking is premised on some conception of human equality, including equal consideration of everyone's interests, and a commitment to a system of equal and extensive basic rights. In the first part of the class we will examine this conception of justice, with special attention to Rawls's formulation of modern liberal theory in his later work. During the rest of the term we will critically assess this account of justice. The central question we will address is whether this theory has the conceptual resources to address the major issues of contemporary society. The issues we will consider are class or economic inequality, democracy and democratic participation, and whether a "scheme of equal basic liberties" can be "fully adequate" to deal with issues of difference with respect to culture, gender, race, and religion.

GOVT396 Human Rights Advocacy: Critical Assessment and Practical Engagement in Global Social Justice

The core animating principles and practices of human rights are under threat. Will the global human rights movement be able to respond effectively? How could or should the movement advance the cause of global social justice most effectively? This seminar seeks to answer these questions by assessing global rights defense and social justice practice and by engaging in structured, self-critical human rights advocacy.

Among the issues considered in this seminar will be the following: What are the origins of the human rights movement? Has the movement been dominated by ideas from the West and elite organizations from the Global North? What does it mean to be a human rights activist? What is the role of documentation, legal advocacy, and social media in human rights advocacy? What are the main challenges and dilemmas facing those engaged in rights promotion and defense?

Students will be required to write several short reflection papers. The final project will be an exercise in developing a human rights advocacy project or supervised engagement in actual human rights advocacy in conjunction with the University Network for Human Rights (humanrightsnetwork.org).

GOVT397 Acting and Citizenship

From Plato's fears about the corrupting effects of tragedy on the civic devotion of citizens, to Rousseau's concerns about the theater as the cause of moral decay, to Richard Sennett's contemporary arguments for an understanding of citizenship as a performance in the "theatrum mundi," the performance and spectacle of theater, through both watching and in acting, has been closely linked to expectations of democratic citizenship. This course will examine the history of acting as a way to consider what we are called to do to sustain democratic life. How is being a citizen or a juror the equivalent of playing a role? Can the practice of acting help develop skills of empathy and deliberation that are needed to navigate difficult political questions? On the other hand, can the "inauthenticity" of acting be a corrosive parallel that treats all civic interactions as strategic ones grounded in self-interest? Drawing on texts from the history of political thought, theater studies, and the psychology of acting, the course will culminate in a performance art piece at Wesleyan, developed by the class, to highlight the demands of citizenship. A willingness to act is expected, but no experience is required.

Prereq: **None**

GOVT399 Citizens, Judges, Juries: Who Decides in Democracy?

The tensions between rule by the people, rule by elites, and rule of law are at the core of democratic theory. What is the proper balance among the three? Under what circumstances is one group of decision makers better than another? What happens when they come into conflict? This is an upper-level course in political theory designed for students who have taken GOVT159, The Moral Basis of Politics or an equivalent course in philosophy and related disciplines. We will focus on the following topics: the role of voting in liberal democracies, the Athenian jury system, deliberative democracy, referendum and initiatives, civil disobedience, and the role of juries in the U.S. criminal justice system.

GREEK (GRK)

GRK101 Introduction to Ancient Greek: Semester I

This course is an introduction to the rich and beautiful language of ancient Greek, the language of Homer, Plato, and Euripides. In the first semester students will begin to learn the grammar and syntax of the language and start developing the vocabulary necessary to appreciate and understand Greek with the goal of reading as soon as possible. Throughout the semester we will also explore some inscriptions and dip our toes into both Herodotus and biblical Greek.

This course is a prerequisite for GRK102.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

GRK102 Introduction to Ancient Greek: Semester II

This course is a continuation of GRK101. We will complete the study of Greek grammar and continue to develop vocabulary and reading skills. We will read selections from Sophocles, Euripides, Lysias, Apollodorus, Demosthenes, Aristotle, and Plato, among others.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **GRK101**

GRK201 Reading Greek Prose: Plato's Crito

We will read the Crito, one of Plato's dialogues that together with his Apology and the Phaedo constitute some of our major sources about Socrates' role in Athens, his trial and conviction to death, and his own approach to death and the good life. In the Crito Socrates addresses the essence of law, the limits of tolerance, and the very notion of civil disobedience. Throughout the semester our goal will be to explore these questions while working closely with the original text to increase steadily the facility and speed with which you read and enjoy Greek. We will also read a selection of scholarly articles.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

GRK250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC)

The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking

at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

GRK258 The Greek Novel

In the course we will read selections from Longus' *DAPHNIS AND CHLOE* and Chariton's *CHAEREAS AND CALLIRHOE*. The former is a story of young love in a pastoral setting on the island of Lesbos; the latter, an incident-packed narrative in which a young husband and wife are separated, but after many vicissitudes, reunited. Subjects covered will include genre and setting, narrative and descriptive techniques, cultural context, and likely readership.

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

GRK263 The Homeric Hymns

Students in this course will read the Homeric hymns to Demeter, Apollo, Hermes, and Aphrodite in ancient Greek. They will also read modern scholarship on the structure of the hymns as examples of narrative discourse and on the mythology of the various divinities. Each of these hymns celebrates one of the principal divinities of the Greek pantheon, and each incorporates a story of the god's adventures. Class sessions will include discussion of the manner in which gender exercises an influence on the structure and content of the hymns.

Prereq: **None**

GRK291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC)

The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their

cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of *ta Aphrodisia* (the things/matters related to Aphrodite) in a culture that has no one term/concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

GRK365 Greek Tragedy: Euripides

Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

GRK367 The Great Greek Creation Myth: Hesiod's Theogony

In this seminar, we will read Hesiod's *Theogony*, the Greek creation myth, in the original ancient Greek and examine this fabulous work in light of other creation stories of the ancient Near East, Egyptian, and Hittite cultures by which it was influenced. Through examination of structural themes and motifs (how the universe was created and ordered, the role of violence, the origins of an application of justice, the creation of mankind, the shaping of women), we will discuss whether and how the *Theogony* diverges from other creation myths to establish or reflect values that can be said to be uniquely Greek. Discussion will be supplemented by passages from Hesiod's *Works and Days*, along with other creation myths and secondary scholarship.

HEBREW (HEBR)

HEBR101 Beginning Hebrew I

This first part of a two-semester course is designed to develop the basic language skills: reading, writing, speaking, and listening comprehension, and basic Hebrew grammar. Emphasis is on modern Israeli Hebrew. No previous knowledge of Hebrew is required. Multimedia and authentic resources will be incorporated into class work. Independent lab work, as well as participation in cultural and literary enrichment activities by Israeli scholars, is required.

Offering: **Host**

Grading: **Amp Graded**

Credits: **1.50**

Gen Ed Area: **HA-CJST**

Prereq: **None**

HEBR102 Beginning Hebrew II

This course is a continuation of HEBR101 with emphasis on enlarging vocabulary, grammar, composition, and further developing language skills. Multimedia resources and computer programs will be used to enhance listening and comprehension. Exposure to cultural material will also be included. Independent lab work, as well as participation in the Israeli film festival, are required.

Offering: **Host**

HEBR413 From Black and White to Colors: Israeli Cinema (CLAC)

This Hebrew course will be linked to a new film course, taught in English and offered in spring 2019. The film course is entitled CJST 249: From Black and White to Colors: Israeli Cinema, a Melting Pot Fragmented. This course is targeted towards heritage Hebrew speakers and students with very advanced knowledge of the Hebrew language. Students will view the same films as the parent class with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. In addition, students will be required to attend all the screenings in the Ring Family Wesleyan University Israeli Film Festival and to meet with native guest speakers. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in format and themes of Israeli films. This course may be repeated for credit.

HINDI-URDU LANGUAGE (HIUR)

HIUR101 Elementary Hindi-Urdu I

An introduction to the modern standard form of the most widely spoken languages in South Asia, this Hindi-Urdu language course offers comprehensive instruction in Hindi and Urdu together from the beginner's level. Hindi, written in the Devanagari script is the official language of the Republic of India. Urdu, written in a modified form of the Perso-Arabic script called Nastaliq, is the official language of Pakistan. In their most basic spoken form, Hindi and Urdu are mutually intelligible, particularly in urban centers in north India.

Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The goal of this course is to provide students with a solid foundation in Hindi-Urdu script, grammar, and vocabulary, as well as the cultural awareness and practical experience necessary for basic, yet accurate and appropriate, communication in spoken and written Hindi-Urdu.

Through scaffolding techniques students will reach their potential zone of proximal development (ZPD), which is Novice-Mid, from their current ZPD, which is Novice-Low. Students will learn to confidently navigate a range of common social and "survival" situations in Hindi-Urdu by using simple sentences, short phrases, or formulaic sequences.

Upon completing this course, students will have mastered the basic constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CGST**

Prereq: **None**

HIUR102 Elementary Hindi-Urdu II

This course is a continuation of Elementary Hindi-Urdu I. It offers a balanced treatment of speaking, listening comprehension, reading, and writing skills. Through scaffolding techniques students will reach to their potential zone of proximal development (ZPD), which is Novice-High, from their current ZPD, which is Novice-Mid.

At the end of the course, students will be able to communicate short messages on highly predictable, everyday topics that affect them directly. They will be able to produce lists and notes, primarily by writing words and phrases. They can provide limited formulaic information on simple forms and documents. These writers can reproduce practiced material to convey the most simple messages. In addition, they can transcribe familiar words or phrases, copy letters of the alphabet or syllables of a syllabary, or reproduce basic characters with some accuracy.

They can understand key words, true aural cognates, and formulaic expressions that are highly contextualized and highly predictable, such as those found in introductions and basic courtesies. They will be able understand words and phrases from simple questions, statements, and high-frequency commands.

Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

Prereq: **None**

HIUR201 Intermediate Hindi-Urdu I

This course is a continuation of Elementary Hindi-Urdu, which emphasizes written expression and texts in both Perso-Arabic and Devanagari script systems. The goal of this course is to provide students with an opportunity to build upon their knowledge of the Hindi-Urdu language and bring them up to the intermediate low/mid-level in all four skills: reading, writing, listening, and speaking.

At the end of this students will be able to successfully handle a limited number of uncomplicated communicative tasks in straightforward social situations. Students will be able to produce some of the concrete exchanges and predictable topics necessary for survival in the target-language culture. These topics relate to basic personal information; for example, self and family, some daily activities and personal preferences, and some immediate needs, such as ordering food and making simple purchases. Students will also be able to ask a few appropriate questions; creating and writing statements and formulating questions based on familiar material.

As listeners, students will be able to understand simple, sentence-length speech, one utterance at a time, in a variety of basic personal and social contexts. They will develop accurate comprehension with highly familiar and predictable topics. Intermediate-mid listeners may get some meaning from oral texts typically understood by advanced-level listeners.

As readers, students are able to understand short, noncomplex texts that convey basic information and deal with basic personal and social topics to which the reader brings personal interest or knowledge, although some misunderstandings may occur. Readers at this level may get some meaning from short connected texts featuring description and narration, dealing with familiar topics.

HIUR202 Intermediate Hindi-Urdu II

This course prepares students to achieve intermediate low-to-high level speaking, listening comprehension, reading, and writing skills. With a strong emphasis on achieving proficiency in spoken Hindi-Urdu, students are encouraged to speak Hindi-Urdu as much as possible, both in and outside of the classroom. Enrolled students are encouraged to form study groups that meet regularly outside of class to practice conversation in Hindi-Urdu.

Students will work with a variety of web-based materials to learn songs; watch short film clips and advertisements; and read letters, dialogues, song lyrics, poems, and short stories in Hindi-Urdu. This course will introduce students to many aspects of Hindi-Urdu-speaking cultures through authentic language use, and students will also have the opportunity to participate in the Hindi-Urdu language learning community on campus.

Standard text, course materials prepared by the instructor, and authentic materials available on the internet will be used with equal emphasis on spoken and written Hindi-Urdu. The structure and conversations will be prepared in a variety of authentic contexts of Hindi-Urdu. Students are also offered extensive exposure to spoken language emphasizing speaking and listening at normal speed with near-native pronunciation and intonation. By the end of this course, the students will be at the intermediate-high level of the ACTFL proficiency scale. At this level student are expected to converse comfortably in colloquial Hindi-Urdu on a wide variety of familiar subjects. The students are also expected to be familiar with all forms of Hindi-Urdu grammar and be able to easily use and understand common grammatical forms.

HISTORY (HIST)

HIST101F History and the Humanities (FYS)

This course offers first-year students an opportunity to explore the humanities from a variety of different disciplinary perspectives, traditionally Western as well as global, and to make connections between humanistic learning and history. The course is a small discussion seminar in which primary source materials, or classic texts, are used exclusively. An effort will be made to examine the interrelationship of ideas in the various disciplines and to compare history, literary analysis, philosophy, and theory as modes of inquiry and as ways of thinking about documents and texts. The course thereby aims to provide students with the critical tools by which to analyze texts produced in the remote or recent past. The course also serves a related purpose: to familiarize students with the heritage of Western historical tradition and to impart knowledge of the crucial role of history and the humanities as a component in general education. Students may take HIST101F without having to take HIST102F.

HIST109F With Bold Knife and Fork: An Introduction to Food History (FYS)

This first-year seminar is an introduction to food history and food studies, two linked fields in which we ask how people have satisfied their appetites, and what their choices mean. This encompasses everything from the question of how agriculture began, to the question of what it meant to eat a Korean taco in Los Angeles in, say, 2014. Food history and food studies are vast fields, and in this seminar we will sample many versions of them. Because this seminar is designed for students just beginning college, it introduces a variety of academic approaches to food, from chronological analyses of how specific ingredients became important for specific populations, to the anthropological treatment of food and identity, to cultural histories informed by primary sources—that is, documents written by historical actors. We even read contemporary

"food writing," including restaurant reviews, which are themselves historical documents of a sort. This course also has a strong chronological through-line, winding from the establishment of agriculture to the modernization and industrialization of global food ways.

HIST112 Living the Latin American City: Urban History, Politics, and Culture

This course offers an introduction to modern Latin American cities, exploring how the region's urban spaces—including sprawling megalopolises like Mexico City and Rio de Janeiro—have been made and re-envisioned by elite and poor inhabitants alike. Approaching urban space and everyday life as a terrain of political and social negotiation as well as cultural ferment, the course traces the growth of Latin American cities through case studies that examine themes including colonialism, citizenship, migration, inequality, and social movements, and the tensions between state planning and informality. We also consider how the urban experience shaped intellectuals' and artists' efforts to chronicle, represent, and reimagine the Latin American city in essays, photography, and film.

HIST116 Environmental History: Telling Stories in Place

This course introduces students to environmental history, the study of the changing relationships between humans and nature through time. We will consider how the natural world has shaped human history; how humans have transformed the environments they have moved through, made use of, and inhabited; and how ideas about nature have shaped people's interactions with the world around them and with one another. Focusing on both historiography and methods, we will read classic and recent work in the field and learn to conduct historical research. We will also pay attention to narrative and the writing of history, through reading, in-class workshops, peer editing, and trying different kinds of historical storytelling. The central assignment will be a short research paper in which students will practice environmental history through the study of a particular place.

HIST117 Chinese Cities

More than half of China's population now resides in cities. Within the next few years, China plans to accelerate the rate of urbanization by building sprawling cities and relocating more people into urban areas.

This course explores the history of Chinese cities from the imperial to modern age. Cities were centers of commerce, intellectual activity, and, in the words of historian and political scientist David Strand, "storehouses of political technique, strategy, and sentiment open to anyone with the understanding and the will to inventory to exploit them." We will study how cities supported massive populations with limited resources, inspired new forms of social organization, and transformed the political and social order of China.

HIST118F History of the U.S.: Social Movements (FYS)

The history of U.S. social movements offers a number of opportunities to enrich the curriculum of the History Department and Wesleyan University's First Year Seminars. U.S. social movements structured many of the discourses—on racial citizenship, gender equality, and social inclusion—that continue today. Understanding the history of social movements, therefore, is vital to understanding the human condition of the United States as it unfolded over time. Taking the study of social movements seriously also fosters critical thinking and the need for flexible interpretations of a material usually presented in an uncomplicated, victorious manner. As a first year seminar, it presents American history in a way that will be new to first year students. The multitude of research opportunities afforded by diverse movements over more than 150 years of American history make it a perfect subject to introduce students to college writing and research. I think that the course will prove effective, popular, and enlightening.

HIST123F Cinema India: South Asia's Past on Film (FYS)

This first year seminar course examines the relationship of film and history in India. We will focus on how filmmakers represent the past and, alternatively, how films inform historical memory—especially in the context of the competing trajectories of nationalism and globalization in South Asia. A central concern will be the historiographical challenges and opportunities of film. We will pay particular attention to Hindi cinema, including films produced by the Bombay/Mumbai ("Bollywood") film industry since the 1950s. We will also examine the rise of "parallel" (or "art") cinema. There will be one session reserved for evening screenings (Tuesdays) and two morning sessions per week (Mondays and Wednesdays). Feature films will range from classics like "Mughal-e Azam" (1960) and "Umraon Jaan" (1981), to lesser known works like "Shatranj ke Khiladi" (1977) and "Hazaaron Khwaishein Aisi" (2005). We will also probe the critical and box-office success of relatively recent blockbusters such as "Lagaan" (2001), "Jodhaa Akbar" (2008), "Bajirao Mastani" (2015), and "Padmaavat" (2018), comparing them to the disappointing performance of budget-busting period dramas like "Thugs of Hindustan" (2018) and "Manikarnika" (2019).

HIST124F The Making of the Modern American Landscape (FYS)

This course uses the contemporary American landscape to tell the history of the modern United States. The political, economic, social, and cultural forces that shaped our nation are also physically embedded in the world around us. An office tower, a city park, a chicken farm, a loft apartment—they all tell revealing stories if we know which questions to ask. This course covers a wide geographic and temporal range, looking closely at particular landscapes to examine how macro-level forces construct the everyday spaces that we inhabit. These close readings allow students to develop their own interpretative skills and the course culminates in individual research projects on landscapes chosen by each student.

HIST129 Philosophy and the Movies: The Past on Film

This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

HIST130F North American Borderlands (FYS)

North American Borderlands explores the physical, social, political, cultural, and economic spaces that borders create and purport to divide. The course covers a long history and a wide variety of material - with subjects ranging from 17th-century contests between Algonquian peoples and Dutch traders along the saltwater frontier to the Gilded Age story of a Texas slave who reinvented himself as a Mexican millionaire, to the sulfur dioxide that blew up from U.S. power plants to fall as acid rain in Canada and sour relations between the two nations in the 1980s. By the end of the course, students will be able to recognize borderlands as distinctive spaces of conflict, exchange, dispossession, and opportunity.

HIST135 American Food

This course investigates topics in the history of food production from the colonial period to the present, with emphasis on the American contribution to the development of world food systems and cultures of consumption. Topics to be addressed include the production of agricultural commodities, development of national markets, mass production of food, industrialization of agriculture, and the recent emergence of organics, slow food, and local movements.

HIST141 Theories and Models

This class will focus on how theories and models are designed and regarded across the university curriculum--in the humanities, the social sciences, and the sciences. This topic is particularly pertinent to intellectual history, a subject that regularly uses texts from across the modern university curriculum as its primary

readings. Given the range of intellectual history, both in terms of chronology and subject matter, intellectual history could be argued to be the subject best positioned to consider the process of making theory.

Questions to be addressed include: What are some of the unexpected results of the increased use of mathematics and computers even in the humanities and social sciences, not just in the sciences, and how has this changed the relationship of theory and models for each of these disciplines? To what extent does the debate about the refutability, the falsifiability--or truth status--of models indicate an ongoing need for theory? The specific modern academic subjects to be examined will be philosophy, economics, and physics. Thomas Kuhn's *THE STRUCTURE OF SCIENTIFIC REVOLUTIONS* (1962) will serve as a starting point for this study; however, most of the readings during the semester will be much more recent.

HIST151 Introduction to History: The "Russian World" Past and Present

The "Russian World" has become a central--though deeply ambiguous and contested--theme in contemporary political discourse both within and beyond Russia. This course will offer a survey of how different conceptions of the "Russian World" have been articulated and deployed over time by following the history of Russian lands and peoples from the eighth century to the present day. This course is one of the gateways to the history major and is intended especially for first- and second-year students. As an introduction to history, the course will introduce students to the discipline of history by examining the historical sources, concepts, theories, and methods necessary for reading and writing history.

HIST154 Introduction to History: Twelve Medieval People

This course is one of the gateways to the history major. It is also an introduction to the Middle Ages through a study of 12 exemplary medieval lives and minds, spanning a thousand years of history. We focus on people--bodies, minds, and souls--coping with history and creating sense for their world. The course will typically feature one person or pair per week, and by examining their writings or stories and the contexts in which these were produced, the nature of medieval life, the pressure on the self, the articulation of gender and ethics for the entire period will come into view. Among the figures studied are likely to be St. Augustine, Queen Brunhild, St. Anselm, Abelard, Heloise, William Marshal, King Louis IX, Dante, Catherine of Siena, Christine de Pisan, Joan of Arc, Margery Kempe, and Pope Pius II.

As an introduction to history course, we will also offer an examination of the basic concepts, techniques, and skills for reading, understanding, and writing history: documents and archives, text and context, sceptical inquiry, argument construction, and an interest in good and expressive writing.

HIST170 Introduction to History: American Material Culture

This course introduces students to the study of history through an investigation of American material culture and the built environment from the pre-colonial period to the present. The course is structured around Friday site visits in

the New England and mid-Atlantic regions, including the Pequot Museum, Mystic Seaport, Central Park, New York City waterfront, Fresh Kills, and local suburbs. Students will consider theories and methods of studying history through objects, landscapes, and architecture. We will consider how changing patterns of settlement and land use shaped human and natural ecology, and how people fashioned cultures and communities through the fabrication, circulation, and use of a wide range of natural and human-made objects.

HIST172 Introduction to History: Germany from Napoleon to the Berlin Republic

Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions. We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

HIST175 Introduction to History: The Atlantic World to 1850

The early modern Atlantic World was an interconnected place. Some of its citizens, such as Samuel Champlain, made dozens of crossings. For others, including hundreds of Indigenous peoples, thousands of settlers, and many more slaves, the voyage was one way. Yet in a pre-national era it was the Atlantic that linked residents in Europe, Africa, and the Americas. This class will explore the nature of the Atlantic World from its beginnings in the fifteenth century to the dawn of a more "global" age around 1850. Exploration, cultural interaction, trade, concepts of sex and gender, slavery, war, and revolutions were Atlantic phenomena. Ideas, like currents, circulated from one shore to the next. Critical reading of academic articles and primary sources will enable us to explore the Atlantic Ocean as a highway (for administrators), a goldmine (for pirates), a death sentence (for slaves), and much more.

HIST176 Introduction to History: Science in the Making: Thinking Historically About Science

This course introduces students to a range of perspectives--drawn from history, sociology, anthropology, geography, media studies, and literary studies, among others--on how to write about the history of science. Throughout, the emphasis is on understanding the relationship between the histories of science we can tell and the materials that our histories draw upon, from publications and archival documents to oral histories, material culture, and film. In addition to reading academic literature, students will gain practical experience working with historical sources and conducting original research. They will also familiarize themselves with new digital tools for presenting historical materials by developing a course website that showcases their research projects.

HIST177 Introduction to History: Ireland's Troubled Past

Ireland's history has been contested by its historians since the start of the 18th century. Was it a colony under the brutal occupation of a foreign power, its neighbor England; or was it an integral part of the United Kingdom with the rights and benefits of the other parts of the realm? The differences in how the island's past was viewed by its inhabitants would contribute to Ireland's partition in 1923 and the ongoing violence in Northern Ireland that lasted until 1999. This course will examine various sorts of primary historical sources from government documents produced by the island's elites to the song lyrics and oral history preserved by the island's people to understand their past. Lastly, we will examine the attempt by Irish historians from both sides of the political divide to produce historical narratives to unite rather than divide the peoples of Ireland.

HIST180 Introduction to Japanese History: A Manga Artist's Life in 20th-Century Japan

This course uses the four-volume autobiographical manga of Mizuki Shigeru (1922-2015) entitled "Showa: A History of Japan" both to survey most of 20th-century Japanese history and to introduce some basic concepts and methods of historical inquiry. Mizuki is most famous for manga that depict supernatural figures--yokai--based on Japanese folk tales. One, "GeGeGe no Kitaro," became a wildly popular animated series (check it out on YouTube). We will use that four-volume series, together with various primary sources and other materials, to track the trajectory of 20th-century Japan from democracy to militarism back to democracy again in the lives of ordinary Japanese people.

HIST186 Introduction to History: The Raj (India and Britain)

This course examines the history of the "Raj," India under British rule, from the 18th to the 20th century. We will explore how merchants from a remote island in western Europe managed to take control of the wealth and manpower of the Indian subcontinent; how Indians helped to build the Raj but gradually turned

against it; and how in rebelling against the Raj, and reshaping it, Indians crafted new forms of social protest and political belonging.

This is an Introduction to History course intended especially for first- and second-year students who are interested in the past and, perhaps, are even (though not necessarily) contemplating the history major. As such, it will introduce students to the discipline by reflecting on the nature of historical evidence, how to use an archive, and how to craft a historical argument.

HIST188 Introduction to History: Revolutionary Women

"I do not think the war would have been won without the women.... Now women have to liberate themselves." The fighter Maudy Muzenda's reflection on the role of women in Zimbabwe's liberation war speaks to a broader pattern in global history. Women have been central to the radical transformation of societies in Africa, Asia, Europe, and the Americas from the early modern era to the present. In this course we will examine revolutionary women who took up arms and others who protested for improved working conditions, voting rights, sexual liberty, and human rights. Our cases will include the history of political revolutions in France, Cuba, Russia, and China, as well as in Zimbabwe. We will also explore the critical role of women in the global Industrial Revolution, the Suffrage Movement, the rise of international feminisms, and the everyday struggles of women in multiple sexual revolutions.

HIST201 Medieval Europe

This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity; its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

The course will also provide students with basic introductory exposure to the ideas and methods of the digital humanities through course illustrations and discussions. This will probably include exercises in visualizing the past, exposure to geographic information systems (GIS) analysis, text-mining, and network analysis.

HIST207 Japan Since 1868: Society and Culture in Modern Japanese History

This course examines the history of Japan from roughly 1800 to the present. With a broad-ranging observation covering politics, economy, society, culture, and foreign relations, we will look at a variety of historical events that the Japanese people experienced. Our goal is not only to understand what happened when, but also to be concerned with how people at different historical stages saw the world around them. Major historical events, trends, ideas, and people will constitute the vital part of the course; however, we will also inquire into everyday life of ordinary people, whose names do not remain in historical records. We will use a wide range of materials including written sources available in the English language, films, literature, and comics.

HIST208 War and Religion in Early America

This course examines the intersection of war and religion in early America. Beginning with the first European settlements in North America and continuing through the early republic (1790s), this course asks students to explore how the religious identities of early Americans influenced their concepts of war and violence. Students will be challenged to rethink the ways in which religious imperatives created and shaped violent conflict and investigate the varied ways in which religious women and men relied upon moral dogma to interpret war and violence. Finally, this course will also require students to reflect on how the early American experience informs our understanding of the relationship between war, violence, and religion in 21st-century America.

HIST211 Digital History

This course offers an introduction to the emerging field of digital history, part of the broader digital humanities (DH), the application of computing techniques and new media to humanities disciplines. DH has important implications for teaching, research, and the presentation of cultural artifacts to the scholarly and general public. Digital humanists employ a wide-ranging set of techniques, from text- and data-mining to network analysis, topic modeling, GIS, and visualizations. DH also offers opportunities for cross-disciplinary collaborations among humanists, computer scientists, media specialists, and others. As a result, this course seeks to bring together students with a variety of skills and backgrounds (e.g. history, writing, programming, web and graphic design, sound and video) who share an interest in historical communication and making things.

Through readings, conversations, and hands-on work with DH tools and historical resources, we will examine questions pertinent to historical scholarship and consider how they may be reconfigured by new media and new applications of computing power. How does DH allow us to ask new questions as historians, and what perils do digital techniques pose for the discipline of history? Together, we will cultivate our skills as practitioners of history in the digital age.

A central component of the course will be collaborative DH projects of our own devising. Much of the course will have the character of a digital history research lab as we take real problems and relevant sources to advance historical knowledge as well as our skills. This might involve projects in which we conceive, design, build, publicize, and launch a tool, website, or other contribution to digital history. Students should be prepared to collaborate in and out of class, to teach and learn from each other, and to cope with a dynamic and flexible syllabus and group of tasks.

This course is part of Wesleyan's Digital and Computational Knowledge Initiative.

HIST212 Modern Africa

What is African Modernity? We will examine this question as we survey the major historical transformations in Africa since approximately 1800. Important themes include: African political innovations, the abolition of the slave trade and its effects, European colonialism, African adaptation and resistance, nationalism and decolonization, and Africa's role in shaping major global events. We will also study the impacts of religious and social transformations amid rapid economic and political change. Finally, we will examine African visions for post-colonial development and how to shape the future of the continent.

During the semester we will also cover some of the issues surrounding African history as a discipline. No single course can cover more than a sliver of the complexity and variety in the continent. For this reason, we approach the study of Modern Africa as comparative history. However, students satisfactorily completing this course will be able to write knowledgeably about African history and will have the foundation necessary to undertake further study about Africa with sensitivity to the complexity of its recent past.

HIST214 The Modern and the Postmodern

In this course we will examine how the idea of "the modern" develops at the end of the 18th century and how being modern (or progressive, or hip) became one of the crucial criteria for understanding and evaluating cultural change during the last 200 years. Our readings will be drawn from a variety of areas-- philosophy, novels, music, painting, and photography--and we will be concerned with the relations between culture and historical change. Finally, we shall try to determine what it means to be modern today and whether it makes sense to go beyond the modern to the postmodern.

HIST217 Empires, Slavery, and Revolution: Africa to 1800

In this course we will examine the dynamic political and social histories of precolonial Africa. We will study the rise of kingdoms and empires such as Mali and Kongo, as well as revolutions in society from the technological development of iron production, to the emergence of trade networks, the development of ancient cities, the spread of religious healing and reform movements such as Cwezi spirit possession, and the role of gender in early African societies. Over the course of the semester we will also consider the impact of slavery and the first African encounters with Europeans. The methods for studying the early African past are interdisciplinary. You will have the opportunity to explore how ancient Africa has been imagined in the past by Africans and early Arabic and European observers, and how contemporary scholars write these histories. As we trace a history of early Africa in the world, we will consider several methods: the study of myths and oral traditions, linguistic and archaeological data, as well as ecological and archival records.

HIST219 Russian and Soviet History, 1881 to the Present

Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory

describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

HIST220 Authority and Resistance: France Since 1870

Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

HIST221 History of Ecology

The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and

to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

HIST222 Disease and Epidemics in Historical Perspective

Disease and epidemics have been powerful agents of historical change as well as determinants of human development before the advent of historical records. In this lecture course we will examine how diseases have changed human societies over time, with special attention given to the place of disease-causing organisms, from viruses to parasites, in the ecological networks they make home. Yet at the same time, we will keep in mind the ways in which human society and culture also have important causal roles in human disease. HIV, for example, arose because of human interactions with animals but reached pandemic proportions, in part, because of cultural, social, and political forces.

HIST223 Traditional China: Eco-civilization and Its Discontents

This course introduces students to the history of China from ancient times to the middle of the Ming Dynasty circa 1450. This is a period when China invented and reshaped its cultural identity by moving into new frontiers and creatively incorporating foreign ideas with indigenous practices. It is also a period when the natural environment was drastically transformed by agrarian civilizations and nomadic neighbors.

The course places concepts of sustainability in the center of the history of traditional China. We will explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the imperial period. Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs? How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice?

HIST224 Modern China: States, Transnations, Individuals, and Worlds

This course examines China's turbulent transition to modernity. It covers the Ming-Qing transition, Manchu conquest of central Eurasia, China's conflict and engagement with the West, birth of China's first republic, and the People's Republic of China under Mao Zedong, Deng Xiaoping, and his successors.

The dramatic transformation of China spanning the late 19th century to the present day is the focus of this course. The Chinese people today continue to deal with the legacy of these reforms, wars, and revolutions, as China's leaders and people dealt with unprecedented challenges. The three central themes of this course are (1) the reconstitution of (a somewhat) unified China after decades of political upheaval, (2) China's vulnerabilities in the face of domestic troubles and threats from abroad, and (3) the challenges of maintaining a high-growth economy with scarce resources.

HIST225 Modern East Asia's Maritime Borderlands

This course offers a perspective of East Asian history from the sea. Between the 17th and mid-20th centuries, port cities of Batavia, Canton, and Nagasaki, as well as the islands of Taiwan, Tsushima, and the Ryukyus, were situated at the crossroads of global trade networks and became sites of political contestation. Mariners, traders, and adventurers from different parts of the world converged on East Asia to profit from trade and military conflict. As a Chinese saying goes, "The mountain is high, and the emperor is far away." As the land-based empires on the Eurasian continent fade into the background, we begin to see the integral role of islands and port cities in shaping the economic and political order of the modern world.

HIST226 Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa

The 1929 Women's War is a touchstone for women's history in Africa. By 'sitting on a man' women in Nigeria shocked colonial authorities and demanded economic rights and a public voice. These unruly women danced in protest and rioted (sometimes nude), but their actions were not uncommon sights for their African audience. African women across the continent had long wielded power as queen mothers, prophets, and traders. Others challenged the constraints of ordinary domestic life through their labor, dress, or spirit possession.

Gender and contested authority are central to everyday life and politics in Africa. In this course, we will study the history of political and domestic authority on the continent with special consideration for the ways in which gender, sexuality, and power intersect. These histories are diverse both in time and place. For this reason, this course will not present a single narrative of gender in African history. However, students who satisfactorily complete the course will be able to write knowledgeably about the major debates surrounding gender and sexuality in Africa. Major themes include: spiritual authority; domestic and sexual life; the division of labor; and the impact of colonial rule and post-colonial politics. We will examine how women (and also men) have grappled with these intricate social and political relations from the pre-colonial period into the post-colonial era.

HIST230 Constantinople: From Rome to Istanbul

Constantinople was founded by a Roman Emperor Constantine the Great in 330. From there the story gets complicated. Should we account for Constantinople from a Western point of view and call it Roman? Or, should we label it by its Eastern religion and call it Christian? Or, should we see Constantinople's true nature in a transnational Hellenic culture and call it Byzantine? Then, once we have chosen a story to explain the city's nature, how should it end? With the pillaging fourth crusade in 1204, or the Ottoman sack in 1453, or is Constantinople yet alive in modern Istanbul? This course diverges from such narrative frameworks by accounting for Constantinople as, first and foremost, a city. Together we will explore the rich, unevenly distributed, textual and material relics of this medieval metropolis and contribute our finds to a collaborative digital database. Students will draw from this database to craft their own histories, applying both imagination and analysis into a believable and reliable story conveying the diversities and paradoxes of life in The City.

HIST232 Turkey and the Balkans, 1453 to present

The Balkan Peninsula physically lies in Europe but it has long been a geographical and cultural bridge between western Asia and Europe. Since Antiquity its past has been linked to its near neighbor Turkey. Starting with the Ottoman conquest of Constantinople in 1453, this course will survey the history of the two regions through the Ottoman centuries and the rise of national independence movements in the 19th century. It will then survey the continuing political, social, and ethnic conflicts in the regions in the 20th century, first under Fascism and then Communism, and finally the re-emergent nationalisms of the late 20th and early 21st centuries. The central question posed by this course is: How do the various peoples in this part of the world remember their past and how do these conflicting narratives shape their present?

HIST237 Making New Worlds: Encounters in Early North America

From the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, North America was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on a continent long inhabited by powerful Indigenous groups. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease).

HIST238 Liberty and Loyalty: Reconfiguring North America in the Age of Revolution, 1774-1848

At the end of the Seven Years' War, Britain found itself in possession of a huge swath of North America peopled by French Catholics, Indigenous nations, and British American subjects. In the years that followed, British North America was torn apart by revolution (which created the United States) and rebuilt by loyalists (who challenged the government at every turn).

This course will examine the revolution that fractured North America, the entangled development of the New Republic and the loyal British colonies, and the experiences of British subjects, American citizens, French inhabitants, and Indigenous peoples, all of whom worked to shape their environment as best they could. From political leaders to slaves, wealthy merchants to poor farmers, British monarchs to Indigenous sachems, this course will explore North America as it was understood by those who lived during a period of intense social and political upheaval.

HIST239 The Long 19th Century

The Long 19th Century explores the history of the United States from the Early Republic to the Progressive Era (1787-1900). During that time, an array of different groups and competing interests structured the course of the United States. The period witnessed the transition of the United States from a confederation of states to a centralized nation. Revolutions in transportation, industrialization, and communication transformed the daily life of every American. The emancipation of African Americans and efforts by women to

achieve gender equality challenged the conceptions of American citizenship. This course examines these ideas, shifts, and challenges to understand how the United States emerged from the 19th century into the modern world and how that emergence informs the world that we live in today.

HIST240 The United States Since 1901

"I am certain that history has equipped modern American liberalism with the ideas and the knowledge to construct a society where men will be both free and happy." - Arthur M. Schlesinger Jr., January 1949

This course will explore the history of the United States from 1901 until recent times. The central focus will be on politics and society, although economics, foreign relations, war, intellectual trends, ethnic and racial relations, and other topics will also be discussed. The unifying theme will be the emergence of modern liberalism during the Progressive Era and its dominance in American politics and thought by the mid-20th century. Although intellectuals hostile to the New Deal and liberalism emerged in the 1930s and 1940s, as time passed, conservative ideas and organizations acquired increasing influence, ultimately conquering the Republican Party and changing the Democratic Party as well. Thus, political divisions that emerged in the 1890s continue to this day.

HIST241 From Romanus Pontifex (1454) to Black Lives Matter: Race and the Formation of the Modern World

This course investigates the belief system of race from its emergence in the 15th century in the wake of European expansion into Africa and the Americas to contemporary dynamics both in the Americas and globally. Rather than viewing this phenomenon in the liberal humanist terms of race relations or more recently of diversity and multiculturalism, or as merely a function ostensibly more fundamental issues (e.g. class), this course proposes to analyze race not only as a central mechanism instituting Western societies, but also as one form of how humans have organized and reproduced their social orders.

HIST242 World History

Using material culture, visual sources, primary texts, and articles, this course will give students a solid understanding of World History from the River Valley Civilizations, the Classical Period, and the Post-Classical Period, to the Early-Modern Period, the Long 19th Century, and the Contemporary Period. Emphasis will be placed on the development of major cultures around the world -- and there will also be discussion of how the major cultures fail to explain much of World History.

In practical terms, students will learn how to assess a broad range of historical sources from varied places and times; how to debate these works in class discussion; how to produce concise and precise short papers; how to write longer papers based on an argument/counter-argument format; and how to work collaboratively on the group project.

HIST243 How to Make History, or the Art of History: Past, Present, & Future

History is one of the oldest of intellectual endeavors and through its many transitions and versions around the world it is unified generally by its literary and artistic character as much as by its research intensity. It is a study of finding out but also always about the telling. With the development of professional historiography in the 19th century, the imaginative and creative aspects of making history have been spoken about less, but they have remained crucial parts of history's success. Today especially, it is important to understand the versions of history-making that have existed and the possibilities for students and other historians to make well-shaped, moving, decisive history. The course will examine the history of history-making, looking through its long history around the world to understand historiographical developments but also to give ourselves examples now for ways of writing history more effectively. The course will pay unusual attention to the possibilities of making history today, not only in the academy, but in fiction, in film, on television--everywhere that history is, in fact, made.

HIST245 Modern Latin America Since 1810

This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

HIST246 France at War, 1934--1944

Beginning with a Parisian riot widely understood to be a fascist insurrection in 1934, followed immediately by massive popular protests from the Left, France entered a decade in which it was at war with itself, often characterized as a Franco-French civil war. These were years of uncommon political engagement, disappointments, struggle, and multiple disasters. A divided France encountered the menace of another European war, concluding with its astonishing defeat in 1940 by Nazi Germany. This seminar explores the ideological antagonisms that shaped French life during the Popular Front, a broad alliance of the Left, 1934--1938, and during the German occupation, 1940--1944, when French authorities collaborated with the occupier. We will consider interpretation and memory of these dark years and draw upon documents, films, memoirs, and journalistic accounts.

HIST247 The Fall of Rome and Other Stories

The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with a range of authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea--to connect the fall of Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

HIST254 Science in Western Culture

This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called "science" and how they have attained

such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have "done science" in different times and places.

Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between science and state power by exploring the changing nature of scientific authority, the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

HIST256 Japan and the Atomic Bomb: History, Myths, and Mysteries

Even today, when discussing the atomic bombings of Hiroshima and Nagasaki, newspaper and other media sources often refer to "Truman's decision" to drop the bomb, the idea that these bombings conclusively brought an end to World War Two, arguments that they saved more lives than they killed, and assertions that the United States would not have dropped the bomb on Germany since its citizens were white. But what do the historical sources actually say on these and other related points? This course emphasizes the use of archival sources to address these and many other issues. It establishes the historical context for the atomic bombings of Japan by tracing events that led to the War in the first place, how civilians became the targets of mass bombings, and the scientific discoveries that made nuclear weapons possible. It also examines how after the War the American press and government strove to establish a particular perspective on the atomic bombings of Japan. By the end of this course students will have a much better idea about the historical facts, the popular myths, and remaining mysteries related to the bombings of Hiroshima and Nagasaki.

HIST257 From Chocolate to Coca: Commodities and the Making of Latin America

Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

HIST261 Enlightenment and Science

For centuries it was assumed that the modern age was drawn from the scientific advances of the European Enlightenment in the 18th century. Then, in the last few decades, many scholars started to attack what has been called the Enlightenment Project with its wholesale emphasis on science and rationality. Others have found that there were also valuable nonscientific achievements in Europe during the Enlightenment. However, there is a need to bring the scientific method and the technological advances of the 18th century back into the conversation about the science of that time and then of our own time. Given that we now live in an age both bettered and dominated by science and technology, it is of paramount importance to understand the origins of modern science and technology.

HIST263 Inside Nazi Germany, 1933–1945

This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that

followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

HIST264 Waterways: Maritime World History

Human history has been shaped by the sea. Whether as a source of food, a frontier, a boundary, or a bridge, the sea has represented a site of both opportunity and danger. This course will examine the way humans have responded to their marine and maritime environments, both in terms of the technologies they have developed to navigate and exploit them but also insofar as the sea has shaped the way humans think about themselves. While our inquiry will extend into the deep past and the early development of human culture and civilization, we will focus on maritime history over the past millennium, the development of oceanic worlds, the rise of the "age of sail" between the 16th and 19th centuries, and the transformation of global navigation and politics with the rise of steam, diesel, and nuclear power.

HIST267 Development in Question: Conservation in Africa

"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, scientists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international and governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine game park politics, the history of resource extraction, climate change,

and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

HIST268 The Origins of Global Capitalism: Economic History, 1400--1800

This course explores how the modern market economy came into being in Europe and why this system expanded outward to bring the rest of the world into its orbit by 1800. Among other things, it seeks to provide answers for why China's economy--perhaps the most sophisticated in the world before 1500--fell into relative stagnation and why Europe was the first region to develop mechanized industry and break out of a poverty trap that had restricted prosperity for millennia. The course begins by exploring late medieval European agriculture, market systems, institutions, and technology to reveal how the paths of economic development taken in Europe began to diverge fundamentally from those taken by societies in Africa, Asia, and the Americas. It will explore the role of the spice trade in the expansion of European influence abroad, the significance of new food and cash crops in the development of plantation systems and long-haul trade, the impact of organized coercion in the development of monopolies and monopoly companies, and the role of proto-industrial methods of production and colonial economies in the birth of the Industrial Revolution. The course aims to be accessible, broad, and comparative, drawing insights from many fields to consider the environmental, geographical, cultural, institutional, and political factors shaping the economic changes that have created modern capitalism.

HIST272 Law, Court, and Crime in England, 600--1660

This course will discuss the nature and development of law, dispute resolution, custom, and rule in England from the arrival of the English on the island in the age of Arthur when feud and compensatory justice dominated. It will then examine the rise of royal power, local custom, and the common law in the 12th and 13th centuries, including the Magna Carta crisis. We will focus on the growing politicization of law and the development of courts and lawyers alongside new sorts of lawmaking in parliament and through the power of the king. The growth and challenge of royal and parliamentary power will frame the last parts of the course that anticipate the revolutionary crisis of the 17th century. Along the way, the course will ask, Who gets to make law, what is the role of writing in the development of custom and law, how did the English decide who was right and who wrong: calculation, testimony, jury, or ordeal? What were the forms of punishment and compensation employed, and what did this tell us of conceptions of the person: mutilation, execution, or incarceration?

How did social status and gender shape expectations and outcomes in the legal process: Who could be a legal actor, a responsible malefactor, a property owner, or a slave; who could be judge and legislator? The course will be based on the examination both of recent scholarship and a wide array of primary sources such as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

HIST274 Public History

This course introduces students to the theory and practice of history in the public realm--in the museums, archives, historic sites, parks, landscapes, and other places we encounter the past. Through readings, discussions, and hands-on work, we will consider the challenges and opportunities of doing history beyond the classroom and develop our skills in historical interpretation directed at broad audiences. We will ask such questions as: How do we tell stories with objects, text, and images? Whose history are we interpreting? How do we connect with the past in our daily lives? What role can historians play in public discourse? The central assignment of the course will involve developing a local public history project.

HIST275 Empires on Fire: Revolutions in the Atlantic World

This class will explore what historians have called the "Age of Revolutions." The ideas, ideologies, and actions that set empires aflame during the long 18th century formed an entangled revolutionary experience that spread from one part of the Atlantic world to the next. From England's "Glorious Revolution" in 1688 to the American, French, and Haitian revolutions at the end of the 18th century, and then on to the South American and Canadian uprisings in the early 19th century, this course will examine revolutions not as discrete events but as interrelated processes. By studying the perspectives of leading politicians, regular subjects and citizens, and marginalized groups, students will investigate the wide variety of revolutionary experiences.

HIST279 The Making of Modern Japan, 1500 to Present

In a global context, Japan emerged as a major player on the world stage after 1500. While in the midst of what later was called the Warring States Period (sometimes dated 1468--1600), Japanese traders and others maintained a broad network of commerce that included not only Korea and China but spread to Southeast Asia. Europeans first reached Japan in 1543, and it was soon obvious that no European state had the military might to colonize Japan. These are the roots from which a modern Japan appeared that in the 19th and early 20th centuries militarized and set upon an imperial project until defeated at war in 1945. Since then, Japan has emerged as a postmodern, highly technological, pop culture-oriented, and aging country. One theme that will be examined across the semester is environmental change over the long term.

HIST280 The Industrial Revolution in Global Context: Economic History Since 1800

With the development of mechanized industry in the late 18th century, a productivity revolution was unleashed that would soon spread from Britain to continental Europe, North America, and Japan. By the early 21st century, three successive industrial revolutions had profoundly transformed these societies as well as the rapidly developing economies of East and South Asia. This course analyzes the historical forces driving this process. It begins by studying the transformation of Europe's overwhelmingly rural and agricultural economy into a predominantly urban and industrial one, looking closely at entrepreneurs, technology, and changing trading patterns during various phases of this process. The focus will be on Britain, Germany, the United States, and Japan, considering not only industrial development but also its broader implications, including colonial empire, great power rivalry, protectionism, economic depressions, and warfare, to highlight the complex relationship between economic and political power. The course will also analyze how industrial capitalism survived the disasters of the 20th century to drive a process of regional and global economic integration in the late 20th century. It will conclude by considering the opportunities and challenges posed to the mature industrial economies by the newly emerging industrial powers China and India.

HIST281 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC)

This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

HIST283 What Is Rationality?

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or,

if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

HIST286 Photography and Law: Mugshots, Privacy and Publicity, Obscenity, Copyright, and Evidence

This seminar is designed as an introduction to the major developments in the legal history of photography in transatlantic (US-UK especially) society from the first law cases involving photography in 1840 through to contemporary legal debates about such topics as cameras in the courtroom, sexting, surveillance, photographing police, dash cam and body cam videos, admissibility of photographs as evidence, obscenity and moral boundaries of subject matter, and copyright. A range of secondary historical and theoretical writings will anchor the discussions, but the course will focus primarily on student analysis and interpretation of primary and archival sources (texts of legal cases, law reviews and dissertation, news articles, and documentary and video footage). Students will gain knowledge of how legal history has shaped the history of photography, and new perspectives on the historical origins of contemporary issues in photography and digital imaging. This course should be of interest especially to history majors and non-majors who are interested in law, photography, and culture and will also contribute to the "Visual and Material Studies" module in History.

HIST287 Science in Modernity and After: 20th-Century Science and Technology

The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship

between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

HIST291 Gender and History: Women Working, the U.S., and Global Capitalism Since 1900 (FGSS Gateway)

This seminar will introduce first- and second-year students to the history of gender, sexuality, and women's paid work in the context of the U.S. and global capitalism since 1900. In this perspective, "U.S." does not denote only the bordered United States, but also a political, economic, and cultural hub for currents of transnational capital and labor. While women have always worked, ideas about "woman's work" shift across race, class, region, and time. Feminist historians have studied gender roles, work, and labor activism, yet recent histories of capitalism too often ignore women's history, gender analysis, and sexualities. Readings will include histories of women in various parts of the world, where they often labored for U.S. enterprises. We will discuss influential theories in the field of gender and sexuality studies and how they apply to the writing of such history. All students interested in gender as a category of historical analysis for their scholarly work in any field, as well as prospective history and feminist, gender, and sexuality studies majors, will benefit from this course.

HIST296 Colonial Latin America

This course studies the history of Latin America and the Caribbean from pre-conquest times to the emergence of independence movements in the early 19th century. Lectures will explore the key environmental, cultural, economic, political, and religious transformations that shaped colonial societies throughout the region. Beginning with the formation of indigenous and Iberian polities before 1492, we will consider how early modern colonial governance functioned and evolved throughout the period of Spanish and Portuguese rule in the Americas. Through an array of primary and secondary sources we will reconstruct the lived experiences of a diversity of actors across the colonial world. We will pay particular attention to the methods and approaches that scholars have used to understand the history of the region.

HIST297 Mexican History and Visual Culture from Conquest to the Present

This course offers an introduction to Mexico's history from the conquest of indigenous empires to the present, paying special attention to how images and visual culture--from the Virgin of Guadalupe to patriotic parades to *lucha libre*--not only reflected, but also shaped, Mexican society and its political development. Through this lens, we explore the construction and unraveling of the colonial system, the emergence of the nation, the upheaval of the first major social revolution of the 20th century and its aftermath, and contemporary events. In addition to providing an introduction to major historical phenomena and debates, this course also familiarizes students with methods for using visual materials to understand and interpret the past.

HIST298 Oh Canada: Creating the Northern Neighbour, 1776--1896

This course will help answer a pressing question: Why does Canada exist? Students will explore the complicated relationships that shaped America's northern neighbor. With its deep Indigenous heritage, long history of British-French rivalries, and constant influence from the United States, Canada was (and is) a unique democratic experience defined in no small part by its inability to define itself. From the outbreak of the American Revolution until the end of the 19th century, the polyglot inhabitants of loyal British colonies north of the United States constructed a multi-faceted identity that remains the topic of great debate to this day. Students will examine the political, cultural, and social histories that transformed British colonies into the Dominion of Canada founded on what was and still is Indigenous territory.

HIST301 The Spanish Civil War, 1936--1939

The Spanish Civil War erupted during a decade in Europe marked by ideological tensions, economic and social crises, the weakness of democracies contrasted to the dynamism of dictatorial regimes, and an international climate that culminated in the outbreak of World War II. The ideological character of the civil war in Spain, which appeared to pit left vs. right, or democracy vs. fascism, or nation and religious faith vs. communism and revolution, captured the imagination of Europeans and spurred their involvement in the war. All of Europe's dangers seemed to have exploded in Spain, whatever the specifically Spanish factors that unleashed and defined the struggle. This seminar will examine the events in Spain and Europe's response to them through contemporary writings, such as journalistic and participants' accounts, diplomatic documents, memoirs, films, biographies, and general and specific studies from the 1930s to the present.

HIST302 Reproductive Politics and the Family in Africa

This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced political practices and ideologies and, in turn, changed conceptions of motherhood, fatherhood, and the family.

HIST303 Medievals on the Move: Pilgrimage, Jihad, Crusade, and Apocalypse

Medieval people moved: They traded and sent emissaries; they invaded and migrated; they wandered, begged, and ascended the heavens; they went on crusade, jihad, and pilgrimage. This course will first analyze the most consistently preserved sources on medieval movement: accounts of pious travel "for God's sake and not for pleasure." We will then contextualize such accounts with two other types of movement: the physical journeys of traders, diplomats, and warriors, as well as the interiorized journeys of the prophet, the mystic, and the storyteller. By encompassing this variety we will be able to pursue a larger question: Can patterns of exchange across the physical and cultural barriers of geography, language, religion, and governance reveal a more global medieval world than we usually envision?

HIST307 The Economy of Nature and Nations

On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance

toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek *oikos*, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the *oikos* over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

HIST310 Moving Through the Revolutionary Age: British Colonies and Early America, 1774--1815

Thomas Jefferson argued in his 1805 inaugural address that boundaries were less important than principles. Regardless of where they lived, Americans were Americans. British colonists were equally mobile and equally sure that their British liberties followed them wherever they went, which in no small part led to the Revolution. In the period during and after the American Revolution, with the creation of states and colonies in northern North America, people and ideas moved with regularity from one region to the next, thus testing Jefferson's ideals and extant imperial bonds. This course will examine the movement of peoples and ideas within and across these new boundaries to explore the idea of mobility as a revolutionary, Native, and loyalist ideal. American settlers wanted to push west, and some later moved north; Natives desired to maintain their migratory patterns and traditional lands; and British Loyalists moved to remain members of--and demand changes within--the British Empire, while also relocating to American states when necessary. The borders that divided colonies and separated states were challenged and ignored as soon as they were created. By exploring the political ideals, territorial claims, and movement of people during and after the American Revolution, students will be encouraged to study the Revolution not as an American event, but rather as a North American process shaped by those who moved through it.

HIST313 Schemers and Redeemers: Capitalism and Religion in Early America

This course examines the intersection of two of the most significant themes in American history: capitalism and religion. Beginning with the first European settlements in North America and continuing through the early republic, this course asks students to explore how early Americans used their religious identities to negotiate and shape market activity and institutions. Students will be challenged to rethink the ways in which economic imperatives drive economic decisions and investigate the varied ways in which religious women and men resolved tensions between moral dogma and market imperatives. Finally, this course will also require students to reflect on how the early American experience informs our understanding of the relationship between capitalism and religion in 21st-century America.

HIST314 Environmentalism in a Global Age

Over the second half of the 20th century, popular movements in the United States and around the world achieved landmark protections for the environment. Yet in that same period, accelerating globalization and the emergence of transnational environmental issues like acid rain threatened to undercut the effectiveness of national laws and regulations. This seminar investigates how environmental activists have responded to a range of challenges in the global age, from economic development and species conservation to population growth and Malthusian family planning campaigns. As those two examples suggest, environmentalists have engaged with key developments in the modern world, in sometimes troubling ways. Although the subject matter is historical, this course will also focus on what the history of global environmentalism can contribute to contemporary advocacy, not least with regards to climate change.

HIST317 The Great Game

The "Great Game" originally referred to the power struggle for "mastery" of Asia during the 19th century, mainly between the British and Russian Empires. Nowhere were the effects of this rivalry more pronounced than in Pakistan and Afghanistan. More recently the term has been applied to grand strategy, global geopolitics, and espionage, more broadly, in scenarios as wide-ranging as Cold War "containment," the global "War on Terror," the current U.S. "pivot" to Asia, and China's "One Belt One Road" policy. This seminar will examine the history of

the Great Game and its wider geopolitical reverberations. We will also examine an array of Great-Game manifestations in popular culture. Readings will combine historical narrative and analysis with film, literature, art, and (yes) gaming.

HIST319 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933

Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

HIST321 Media and Power in Latin America: From Quipus to Twitter

This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

HIST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present

Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike.

This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in *Tristes Tropiques* (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film *Fitzcarraldo* (1982).

HIST324 Homelands and First Nations: Native Worlds in North America

This class will investigate the story of Natives discovering Europeans. It is a difficult story to tell, because few indigenous inhabitants left written records describing what it was like when ships arrived on the shores and the men and women disembarked, established settlements, and began the process

of expanding across the continent. Some encounters were peaceful, while others were violent. Every encounter, however, can be understood by studying Native societies and their worldviews. Far from static and unchanging groups, indigenous nations were constantly adapting to their physical and spiritual world. This class will use primary and secondary sources to explore North America from the Native perspective, including the rise and fall of great societies before the arrival of Europeans, strategies of contact and exchange after 1500, and the quest to maintain authority and independence during the 18th and 19th centuries.

HIST327 Emperor, Caliph, King: Comparing the Byzantines, Abbasids, and Carolingians

This seminar investigates a unique "age of empires" in the wider Mediterranean world--the ninth century--during which imperializing political revolutions inspired intense cultural production among the Byzantines in Constantinople, the Abbasids in Baghdad, and the Carolingians across Europe. Using the cultural artifacts surviving from these "renaissances," we will investigate how political cultures accounted for their own contested identities through myths of rebirth and return, specifically of Greek, Roman, and Persian imperial traditions. The course uses a workshop environment that relies on both collaboration and independent research; students will apply skills of analysis, creative thinking, and persuasive communication to presentations and a (in-translation) source-based research project.

HIST328 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena

Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena--a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire--to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with "The Alexiad" through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

HIST330 American Utopias in the 19th Century

This seminar will examine expressions, both religious and secular, of the utopian impulse in 19th-century American culture. Communitarian experiments launched by Shakers, transcendentalists, perfectionists, and feminists will be studied as manifestations of social and religious turmoil and will be compared with their literary analogues. Utopianism as a philosophical, literary, and literal approach to solving social problems and constructing a more perfect nation-state has been a persistent and recurrent feature in American history. This seminar explores precursors in the long 19th century to more recent utopian theory and experimentation.

HIST333 Appeasement and the Origins of the Second World War

In this study of Europe's crisis, 1933-1939, from Hitler's appointment as chancellor of Germany to the outbreak of the Second World War, attention will focus upon the reassertion of German power and its effects upon the diplomacy and politics of Great Britain and France. Specific topics will include Hitler's aims and actions; critical events concerning the Rhineland, Spain, Czechoslovakia, and Poland; pacifism and the French Left; Neville Chamberlain and British conservatism; and the debate over the immediate origins of the war in 1939. Readings will include memoirs and contemporary diplomatic documents, newspapers, and journals.

HIST334 Social History of Islam in Africa

The history of Islam in Africa spans 14 centuries, and Islam continues to play a central role in shaping contemporary African societies. In this course, we will examine the long social history of Islam on the continent. Islamic expression in Africa is diverse. We will explore the dynamic ways in which Islam has influenced local cultures and politics as well as the various ways in which individual Africans and African communities have made Islam their own. Topics of discussion include early trade and state formation; Islamic education, literacy, and conversion; the role of women in Muslim societies; Islamic cultural productions; Muslim responses to colonialism; and the contemporary development of political Islam. We will end the course by reflecting on the responses of Africans to contemporary changes in the wider Muslim world.

HIST335 Nature, Science, and Empire in Early Latin America

This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

HIST338 History and Theory

This seminar will explore the contemporary theory and philosophy of history, giving special attention to the publications of "History and Theory," the academic journal owned and edited by Wesleyan University faculty for the past 50 years. We might discuss such topics as the nature of historical truth; history as a science, with laws, and as an art, with style; the nature of historical time; gender history; agency and causation; history of the emotions; and history's moral imperatives; as well as the ramifications of the postmodern turn. We will give special attention to recent arguments about the theory of history and the nature of the past.

Key figures are likely to include Walter Benjamin, R. G. Collingwood, Jacques Derrida, Michel Foucault, Hayden White, Frank Ankersmit, Barbara Rosenwein, Joan Scott, and Dominick LaCapra.

HIST341 Body Histories in Africa

African bodies have long generated intrigue and misunderstanding. Outside observers, such as missionaries, travelers, colonial administrators, and anthropologists, have documented practices such as scarification and spirit possession as they simultaneously rendered their African practitioners "other." All too often the body as an instrument for creative expression, ritual healing, or social action was lost in translation. More recently Western feminists have focused their attentions on female circumcision. The persistence of circumcision (for both girls and boys) and other bodily practices speaks to their enduring social value and symbolic meaning. What can we learned from these and other body histories in Africa? In this course we will examine embodied rituals such as spirit possession, which marks the body as a site for human engagement with the supernatural. The widespread practice is also a gendered technique of healing documenting shifting understandings of health and illness. In addition, we will study the practice of "sitting on a man" by which women addressed the body politic through dance and collective nudity. The revealed body in motion shamed men into action and has been employed in the 21st century to shame oil companies for their greed and environmental destruction. In this and other examples, we will approach the body as an archive: it is an archive in motion and subject to social renewal. Our embodied evidence will allow us to explore shifting histories of religion, art, sexuality, the economy, and politics from the precolonial era to the contemporary moment. By taking the body as our lens we will also learn new ways to examine the African past through histories of aesthetics, value, labor, hierarchy, and knowledge production.

HIST342 The Rise of the Conservative Movement in the United States Since 1945

"So inevitable, yet so unexpected," Alexis de Tocqueville declared, referring to the French Revolution of 1789. The same is true of the conservative movement that developed in the United States during the second half of the 20th century. What is the nature of modern American conservatism? How and why did it emerge? What are its social bases? How has conservatism evolved in America since the 1930s? What sort of varieties and conflicts exist within the movement? How did mid- and late-20th-century American conservatives compare to earlier sorts of conservatism in America in the early Republic, the antebellum South, modern American liberalism, and political conservative parties in Europe and Britain? What is the historical significance of the movement?

HIST345 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s

This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

HIST348 Urban Histories of Latin America

Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of

the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

HIST349 Comparing Revolutions: The United States and Early Canada, 1774--1815

The American Revolution didn't just create the United States. Loyalists fled to British colonies in what would become Canada, while Native nations reasserted their sovereignty over ancestral homelands. British, French, American, and Indigenous peoples in North America expanded (or moved) west, established new communities, and struggled to retain (or create) new identities.

Students in this seminar will read widely in the literature of the revolutionary era as it pertains to American, Canadian, and Native groups and will undertake specifically comparative research as part of Professor Lennox's larger book project. What did Benjamin Franklin think of Montreal? Where did Iroquoia go after 1783? How did the creation of states such as Vermont compare to the division of Quebec the same year? What impact did David Thompson's exploration for the Hudson's Bay Company have on Lewis and Clark? By combining close reading of the most recent literature with in-depth exploration of primary sources, this seminar will encourage students to consider the Revolution as a continental rather than national event.

HIST352 The Communist Experience in the Soviet Union (CLAC)

Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

HIST353 The Communist Experience in the 20th Century

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the

birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

HIST355 The 1918 Influenza Pandemic: A Research Seminar

This fall is the centennial of the 1918 influenza pandemic, which swept around the globe that year and caused an estimated 40 million deaths worldwide. It caused more deaths in the 20th century than any other event except World War II. In this seminar we will examine this pandemic from multiple perspectives with the goal of defining how understanding it changed from the time it occurred to the present. In class, we will examine contemporary journalistic and scientific accounts and various secondary sources, with the goal of establishing a starting point for student research projects that will be completed over the second half of the semester. We will explore sources in Olin Special Collections, various digital archives, Middletown and Connecticut State archives, and other collections as available. Possible outcomes for the class can be a paper, documentary, exhibition, or web resource.

HIST356 Between Worlds: Change and Continuity in Early Latin America

The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

HIST357 Regulators: The Administrative State in Modern America

How much arsenic is permissible in drinking water? Should financial firms be required to hold on to some of the risky securities they issue? Can a company sell a jar of peanut butter that contains only 90% peanuts? In the modern United States, the answers to these questions are determined by the administrative state - a collection of dozens of regulatory agencies, bureaus, and commissions comprising millions of officials and staff. Historians, political scientists, and other scholars have long recognized the administrative state as an important site of governance. But unlike Congress, the courts, or the Presidency, most of us have little idea about what exactly the administrative state does, much less how these regulatory bodies came to have so much power and responsibility. EPA G-Men banging down doors in Springfield might get a laugh on "The Simpsons," but why do EPA special agents carry guns?

This course approaches the making of the administrative state as a central component in the history of the modern United States. The seminar begins in the late 19th century, when elected officials created commissions of experts in an attempt to govern an increasingly complex economy, and continues through the 20th century, with its bursts of new state authorities and responsibilities, before concluding in the present, asking what a long history of the administrative state can teach us about contemporary policy. To understand the context in which the administrative state emerged and evolved, we cast a wide net. Among other subjects, students will consider popular movements for environmental protection and worker safety, intellectual transformations in understandings of risk and public welfare, political fights over the scale and scope of the government, and biographies of regulators and the powerful institutions that they make up. Readings include classic texts and new scholarship across different disciplines, alongside contemporary journalism and novel approaches like podcasts - returning throughout the semester to the question of how we can tell an engaging and vital history of the administrative state. Toward that end, students will also explore a variety of different primary source materials throughout the semester before embarking on their own original research projects.

HIST358 Ireland: History Remembered and Forgotten

The writing of history is often a political act. Perhaps nowhere has the practice been as politicized as in Ireland where the two competing traditions on the island, Nationalist/Catholic and Loyalist/Protestant, have advanced their respective cause through the appeal to history so that two very different narratives of the island's past have emerged. This course will examine the history of Ireland from the rebellion of 1641 to the Good Friday Agreement of 1998. In doing so, we will see how differing memories of the past have shaped how members of both communities respond to their present. History here will be broadly defined as being both the formal production of historical texts by scholars and history as it is remembered by ordinary people in stories and songs. Finally, we will examine the "Revisionist" school of Irish history that has sought since the 1970s to put forward a unified narrative of Ireland's past. Did those efforts lead to peace?

HIST367 Life of Modern Fact

Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

HIST368 Postcolonial Paradox: History and Theory in the Global South

This seminar examines postcolonial theory in history, particularly in the wake of Edward Said's classic 1978 text, "Orientalism," and the historiographical intervention known as "Subaltern Studies" (which flourished in the 1980s and '90s). The paradox invoked in the title is both historical and historiographical. At one level it refers to the persistence of colonial practices, ideologies, and regimes of thought (or "epistemes") in the decolonized world; at another level it signals the critique by intellectuals, both within and beyond the "global south," of the forms of knowledge--especially history--that sustained European imperialism and colonialism. Students will explore how philosophically and theoretically inclined historians from the global south and beyond have wrestled with the double-bind of postcolonialism, beginning with historians in South Asia but extending to Africa, the Middle East, Southeast Asia, Oceania, and Latin America--and even the "global north."

HIST369 Issues in the Environmental History of Japan

Many people continue to voice the idea that the Japanese have a special relationship with nature while thinking, for example, of Japanese gardens and

the deification of natural objects such as trees and rocks. The triple disaster of earthquake, tsunami, and nuclear meltdown that occurred in 2011 has challenged that perspective. Yet few are aware of the tremendous human impact on the environment of the Japanese archipelago and its surrounding regions in both premodern and modern times. In this course we will place Japanese environmental history into a wider context while examining how economic, social, and cultural forces have had an impact on the natural environment. Topics include premodern deforestation and water management, the toxic effluvia of mining, mercury poisoning, nuclear contamination, and changes in disease patterns.

HIST370 Disease and Health in Modern Asia

While this course might seem highly focused and specialized at first glance, it is intended for students of all majors and backgrounds. It has two main goals. The first is to explore the influence of epidemics and diseases more broadly over the course of East Asian history while keeping a global context in mind. The focus is on China and Japan, but Korea will be included when possible. The second is to consider how historically, diseases and epidemics are best understood through multiple disciplinary approaches, including biology, epidemiology, anthropology, sociology, and iconology. Colonialism and empire--both Western and Japanese--are, of course, underlying themes throughout. We will examine several important historiographical and methodological approaches as well as some basic issues in the history of science and some important examples of specific diseases such as cholera, tuberculosis, and plague from different approaches using both secondary and primary sources.

HIST373 Language and Power in Latin America

What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that

emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region.

The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of indigenous peoples as social and political actors in contemporary Latin America.

HIST374 Food Security: History of an Idea

The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence.

Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

HIST376 Travel and Communication in Europe

This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

HIST381 Japan's Nuclear Disasters

The atomic bombings of Hiroshima and Nagasaki in 1945 are central to the history of the 20th century. This course examines the scientific, cultural, and political origins of the bombs; their use in the context of aerial bombings and related issues in military history; the decisions to use them; the human cost to those on whom they were dropped; and their place in history, culture, and identity politics to the present. Sources will include works on the history of science; military, political, and cultural history; literary and other artistic interpretations; and a large number of primary source documents, mostly regarding U.S. policy questions. In addition, we will be examining the development of the civilian nuclear industry in Japan with a focus on the nuclear meltdowns in Fukushima and other accidents. This is an extremely demanding course.

This interdisciplinary, experiential, and experimental course combines studio learning (movement studies and interdisciplinary, creative exploration) and seminars (presentations and discussions). No previous dance or movement study is required, and the course is not particularly geared toward dancers or performers. However, your willingness to experiment on and share movement is important. We encourage you to think about movement as a method of accessing human experiences and making distance malleable, a way to explore your own sensations, thoughts, and reactions in learning history.

HIST382 Anthropocene as Modern Grand Narrative

The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's system, and the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and

stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism vs. uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale—one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

HIST384 Critical Approaches to the History of Disease and Epidemics

Epidemic disease is as much a part of the human condition as earthquakes, droughts, floods, heat waves and other natural hazards that can result in disaster. This course will examine four cases of epidemic disease: (tentatively) cholera, tuberculosis, and AIDS. While we will definitely be asking the classic historical question "what happened and how?" we also will be considering how different epistemological frameworks, metaphorical strategies, and historiographical assumptions have shaped past historians' understandings of these events, while exploring alternative approaches. Students will write a research paper as a final project on an epidemic disease of their choice using an approach that helps explore some little-examined dimension of that disease. Choices will not be limited to diseases caused by microorganisms, but also can include cancer, diabetes, and other diseases that arguably have reached epidemic proportions, whether past or present.

HIST386 History of Science and Technology in Modern China

Science, technology, and medicine played an integral role in the China's transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on "its own terms" by understanding how the unique political and social challenges of modern China shaped Chinese science.

HIST392 The Acceleration of Europe: Mobility and Communication, 1000---1700

This research course explores the thesis that during the Middle Ages, Europeans began to move faster, to move more often, and, by doing so, transformed the nature of social life, cultural life, and the character of selves and minds in the world. The course will explore the material aspects of this, such as the nature and development of roads and bridges, ships and canals, inns and hospitality that sustained and encouraged advancing travel. Thematic importance will be given to the place of horses and horseriding in these developments. The course is about the history of communication and the idea that a particular sort of traveler was created through later medieval travel and became the means of cultural and psychological acceleration. The social and cognitive networks established through travel, including the exchange of letters and messages, linked the local to the national. Merchants, pilgrims, soldiers, judges, students, preachers, and bureaucrats became the means of spreading news, changing views, and speeding up the world. This course will expose students to methods and skills in the digital humanities such as network analysis, geographic information systems, and database analysis.

HIST393 Materia Medica: Drugs and Medicines in America

This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

HIST395 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French *laïcité*, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

ITALIAN (ITAL)

ITAL101 Elementary Italian I

This gateway course is the first half of a two-semester elementary sequence and an ampersand (&) course. Our emphasis is on the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will learn to talk about things in your own immediate environment, such as family, friends, daily routine, likes and dislikes, and you will learn how to handle basic social interactions such as meeting people, planning events, eating out, inquiring about other people's lives, and relating information in simple terms. We will explore roughly five units of the textbook; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

ITAL102 Elementary Italian II

This course is the second half of a two-semester elementary sequence. Our emphasis is on the continuing development and strengthening of oral and written competence, and reading and comprehension skills. Specifically, you will master the linguistic skills necessary to describe and narrate simple events in the past and in the future, make comparisons, express possibility, express your point of view, and agree and disagree with the opinions of others. You will also reach a better understanding of culture, society, and everyday life in Italy as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. By the end of this course, you can expect to be able to function quite ably and with assurance in day-to-day circumstances in Italian. We will explore roughly five units of the textbook; additionally, your linguistic and cultural experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. ITAL103 Intensive Italian

Intensive Italian is a course designed for highly motivated students who wish to learn the basics of Italian language in one semester. The course emphasizes the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. We will use the textbook both in class and at home; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in

Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

This course is particularly recommended for students with a background in other romance languages, such as Spanish, French, or Portuguese.

ITAL111 Intermediate Italian I

This course is the first half of a two-semester intermediate sequence and an ampersand (&) course. Authentic artifacts such as literary excerpts, films, newspaper articles, songs, and commercials constitute the starting points of this course. These include topics ranging from stereotypes and perceptions of Italy to significant moments in Italian history and politics, family and student life, employment, immigration/emigration, organized crime, and environmental awareness, all of which shed light on the rich diversity and complexities within Italy and offer a variety of opportunities to improve and refine your ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will build on previously learned grammatical structures and acquire more complex ones that will allow you to improve your ability to relate information, narrate stories, make hypotheses, express your opinions, and debate the opinions of others, both in writing and in conversation. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

ITAL221 Culture, Society, and History in Italy

This course is designed for students who have completed at least two years of college-level Italian or who have achieved equivalent competency through study in Italy. Our primary objective is to enhance students' speaking abilities and Italian cultural literacy through exposure to a variety of Italian texts and contexts. The course will be organized both thematically and chronologically, taking into consideration a group of three themes that could change from one year to the next. Some groups or themes that might organize the course include the following groupings: l'amore, la morte, e l'altro; la città, la campagna, i sogni; il passato, il presente, e il futuro. We examine these themes in literary texts, paying attention to the different genres, and in opera and film. Students are expected to participate actively in this seminar setting. Class is conducted entirely in Italian.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **ITAL112**

ITAL222 Culture, Society, and History in Italy II

This course is the counterpart to ITAL221. Whereas that course addresses specific themes in Italian texts (e.g., of love, death, and the other) from Dante until the end of the 20th century, this course focuses instead on key events in Italian culture and history. Each event narrates a particular moment in Italian history and will be examined from a variety of perspectives and in a variety of genres, including prose fiction, prose nonfiction, poetry, cinema, and history. Combinations of events will change from one academic year to the next, which is why students are allowed to repeat.

Typically, the course will use three to four events as anchors for its teaching units. Some of the possible thematic events that will structure the three or four units making up the course include the return of Marco Polo (1295), the kidnapping of Edgardo Mortara (1858), Marconi invents the radio (1895), the battle of Caporetto (1917), the retreat from the Russian front in World War II, the deportation of the Jews beginning in 1943, introduction of the Fiat 500 (1957), the 1966 flood of the Arno River, the ratification of the divorce law in 1974, the 1977 killing of Francesco Lo Russo by the Bologna police, the 1978 assassination of Aldo Moro by the left-wing terrorist group the Red Brigades, the 1992 Mafia assassinations of Judges Giovanni Falcone and Paolo Borsellino, the Tangentopoli corruption scandals of the 1990s, the election of Denny Mendez as Miss Italia (1997), the economic phenomenon of "Made in Italy" in the 1990s and Berlusconi's terms as prime minister in 1994--1995 and again in the 2000s, and the earthquake in Aquila in 2009.

How does each event resonate through the varied genres, and how do the fictional representations treat the facts of the events and the themes that emerge from them? These are two of the questions we will reflect on as we go along.

ITAL224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics

of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

ITAL226 The Cosmos of Dante's Comedy

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

ITAL227 The Invention of Subjectivity: Erotic Discourse from Dante to Petrarca

In this course, we will investigate the ideology, content, and material forms of love poetry from Dante Alighieri (1265--1321) to Francesco Petrarca (1304--1374). Through a close reading of such texts as Dante's *Vita Nova* and Petrarca's *Rerum vulgarium fragmenta* (often referred to as the poetry book par excellence: *il canzoniere*), we will unveil the literary and fictitious nature of the poetry of love. We will explore the origins of erotic poetry in medieval France and its subsequent interpretation and re-writing in Italian courts and *comuni*. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

ITAL229 Italian Bodies: Race, Gender and National Identity in Modern Italian Literature

The metaphor of the nation as a body--a motherland, a fatherland, a body politic--is a familiar one. Italian literature is rich with images of Italy as a woman to be saved, a mother honored, a father avenged. But what are those bodies made of and how do they behave? What are the shapes and feels of the Italian body? In this course we will test the limits and possibilities of the metaphor, examining texts that offer different bodies and differing notions of what it means to be a body and to be Italian. As we read and discuss these texts we will take into account the times and places in which each narrative is situated, taking note of differences and commonalities, paying special attention to the ways these articulations of identity respond to transformations in the Italian national landscape. This course is conducted in Italian.

ITAL231 Italian Colonialism and Its Legacies

This course is an introduction to the history and consequences of Italian colonialism. We will study literary and historical texts describing the social and political forces that led to colonization as well as writings by colonized people and their descendants in order to gain a balanced, comprehensive understanding of this often-overlooked moment in Italian history. Students will read futurist, fascist and postcolonial theoretical work and will examine Italian, African and Albanian cultural artifacts representative of the colonial experience. We will also discuss current debates about immigration in Italy and their relationship to this colonial history. Literary texts will include: Dell'Oro's *L'abbandono*; Cialente's *Cortile a Cleopatra*; Ali Farah's *Madre piccola*; Marinetti's *Mafarka futurista*; and work by prominent Italian scholars of colonialism such as Del Boca and Isnenghi. This course is conducted in Italian.

ITAL232 Ruin and Redemption: Narrating 20th-Century Italy

When fugitive far-left terrorist Cesare Battisti was extradited to Italy in January 2019 to serve out a life sentence for crimes committed in the late 1970s, he provided fresh evidence for the way that 20th-century events still cast long shadows into contemporary Italy. The events, their narration, and re-narration over time tell the story of unresolved conflicts and overturned verdicts in a context characterized by repression, revisionism, and rehabilitation. In this course we study three historical events of the past century that continue to haunt contemporary Italian society, culture, and politics: Fascism; civil war and resistance; and the political violence of terrorism in the 1970s and 80s. We approach these events by examining the ever-changing narratives about them. For each narrative we focus on specific issues (e.g., for Fascism: the rise of Fascism, racism and anti-Semitism, colonialism, Mussolini's cult of personality, the exaltation of war, Fascist intellectuals, the art of the regime), but we use these as an entry point to articulate contradictions and complexity. We explore these narratives through various media and forms of expression: from films to novels, from landmarks to newspaper articles, from poems to billboards. By exploring how the polarizations of these narratives flow into the 21st century, we unveil the fractures and conflicting agents at the core of contemporary Italy.

ITAL233 Modern Italy on the Silver Screen: 1960–2015

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's *La dolce vita*, Pasolini's *Mamma Roma*, De Sica's *Matrimonio all'italiana*, Leone's *Il buono, il brutto, il cattivo*, Argento's *Suspiria*, Moretti's *Caro diario*, Ozpetek's *Saturno contro*, and Giordana's *Quando sei nato non puoi più nasconderti*. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

ITAL235 The Invention of Fiction: Giovanni Boccaccio's Decameron

In this course we read and discuss Giovanni Boccaccio's *Decameron* (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the *Decameron* as both a product and an interpretation of the world Boccaccio inhabited. We examine the *Decameron's* tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

ITAL236 Inferno

In this course we read and discuss Dante's *Inferno* (ca. 1306-1309) and its afterlife. *Inferno* is the poetic description of Dante's (imagined or actual) journey through Hell. We study how its poetry and narrative embody the notions of love, sorrow, evil, guilt, redemption, and punishment. We examine the poem as both a product and an interpretation of the world it describes and of its radical otherness: its representation of the otherworld, its relationship with religion and faith, its fear of death, its obsession with the Devil. We inquire into Dante's inventiveness and poetic technique, reviewing his magisterial use of realistic and figurative language. We observe how *Inferno* casts its long shadow on modern culture: in the description of the horror of Nazi concentration camps (Primo Levi's memoir), or in the representation of the inauthentic life in consumerist society (Pier Paolo Pasolini's rewriting of *Inferno* in contemporary Italy). We investigate the challenges that Dante's text elicits when it migrates to visual and

cinematic arts (or to Disney comics), continuously camouflaging and adapting to different media. And we critically reflect on how, after seven hundred years, *Inferno* has not finished saying what it has to say. The course is conducted in Italian.

ITAL241 Antonioni and Cinema of the Environment

From its earliest days, the cinema has sought to capture the wonders of the world: exotic landscapes, industrial inventions, and human prowess in the face of nature. At the same time, many important filmmakers--and particularly those in the Italian tradition--have mined their medium's capacity to register and comment upon environmental change. Few directors traversed the upheavals of the 20th century quite like Michelangelo Antonioni. Beginning with his early documentaries, we'll explore cinema's relationship to both the natural world and the built environment across Antonioni's long career. From the foggy landscape of the Po valley to the urban centers of Milan, Rome, London, and Los Angeles, we will assess the images produced by location shooting and realist techniques, but also by formal abstraction and non-narrative time. What might Antonioni's inclination toward abstraction and detachment ("Antonionnui," in a memorable pun) tell us about the world? How should we square his stylistic tendencies with his camera's attention to an environment under pressure? What lessons does his cinema hold for the present?

We'll approach these questions using the core methods of the humanities: close reading, careful viewing, and critical analysis. Along the way, we'll sharpen our understanding of film scholarship, and explore how to make critical (and creative) arguments about cinema and the environment.

ITAL242 Home Movies: Italian Families on Film

What is "the family" in Italy's contemporary social and cultural context? How has it changed over time? How has it responded to the transformations of Italian society since the time of the postwar economic miracle until today? Have its contours changed to adapt to new values? Has it fossilized existing values? Are families limited to flesh-and-blood kinship, or are they constructed along lines of shared values and loyalty? This course seeks some answers to these questions through a sustained exploration of a variety of types of families as they are presented in Italian cinema from roughly 1960 through today. We will take stock of the "traditional" family and the traditional social values connected to it, seeking to understand how filmmakers, through their focus on the family, enter into the debate concerning tradition and change within the social context. In addition to conventional families, we will also examine the elective family that takes shape as the Mafia family. Finally, we will also explore some examples of contemporary families that challenge the traditional paradigm--for example, single-parent and same-sex families. After discussion of critical readings in sociology and anthropology that will help frame our examination throughout the semester, we will concentrate on film texts. This course is conducted in Italian.

ITAL247 Coming Out/Coming of Age: Narratives of Becoming in Italian Culture

By examining narratives of "becoming" in Italian literary and screen texts, we will work to read against a dominant "master" narrative of Italian culture that is cis-

male, patriarchal, and "white." The literary and screen texts we will explore in depth include some "classic" narratives of coming of age in the Italian cultural tradition which we will lay alongside Italian cultural "coming out" narratives, some "classic," others less so. What can we learn from such adjacencies? What does one "come out" of with regard to either strand of inquiry? Is adolescence a "closet" out of which one emerges with a sexual identity? Does one come of age as an artist or "come out" as a practitioner of a particular artistic genre (filmmaker, poet, novelist)? How do artistic choices of practice subtend and inform sexual identity? What gets left behind in this "progress" of "becoming"? These are some of the questions we will address in this course, conducted in Italian.

ITAL260 Castles of Cards: Italian Romance Epic Storytelling Lab

Celebrated authors of 20th-century Italian literature such as Italo Calvino and Gianni Celati have included in their works several features of Renaissance romance epic, from the importance of orality and the idea of sharing stories with a community of listeners to multi-threaded narratives and a playful attitude to the world of storytelling. The current popularity of fantasy literature and TV series puts us in an ideal position for the study of the chivalric romance and for an exploration of the continuities and the differences between past and present literary forms. In this course we focus on canonical and less canonical texts of the Italian Renaissance epic and their modern rewritings. After a multimedia investigation of Andrea da Barberino's "Guerrin Meschino," Luigi Pulci's "Morgante," Boiardo's "Innamoramento de Orlando," Ariosto's "Orlando Furioso," and Tasso's "Gerusalemme liberata" along with their rewritings by authors such as Bufalino, Nori, Celati, Calvino, and Giuliani, we will take inspiration from Calvino's "Il castello dei destini incrociati" to transform the classroom into a storytelling lab. The same deck of tarot cards that Calvino used for his book will help us to take part in a role-playing game and create a collaborative story that will gradually unfold throughout the semester. The class aims both at studying the Italian romance epic in order to reenact it creatively and also at using this collaborative rewriting as an interpretive tool to explore Renaissance literature from within.

JAPANESE (JAPN)

JAPN103 Elementary Japanese I

This course is designed for those who have no previous experience studying Japanese. The objective of this course is for students to acquire communicative and functional skills in Japanese. You will learn the basics of speaking, listening, reading, writing, orthography, and sociolinguistics (when to say what and why) of modern Japanese. Textbook Genki Lesson 1 - Lesson 8 will be covered. Each of the 8 lessons covered in this course includes new vocabulary items and expression patterns related to topics such as time, shopping, daily activities, travel, family, and expressing opinion, etc. In addition, students will learn to read and write 46 basic hiragana and katakana syllables and approximately 86 Kanji (Chinese characters). Class meets daily, five hours per week, and includes weekly

TA sessions. No credit will be received for this course until you have completed JAPN104.

Offering: **Host**

Grading: **Amp Graded**

Credits: **1.50**

Gen Ed Area: **HA-CEAS**

Prereq: **None**

JAPN104 Elementary Japanese II

This course is a continuation of JAPN103, and will approach elementary-level Japanese from two angles: form (grammar) and context (social usage). Students will continue to enhance their fundamental skills in Japanese, with a focus on describing thought and action, expressing intent, and developing intercultural and interpersonal communicative abilities (apologizing, giving/receiving advice, making requests, etc.). The course will continue to emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 9 - Lesson 16 will be covered and 123 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN103**

JAPN205 Intermediate Japanese I

This course will approach intermediate-level Japanese from two angles: form (grammar) and context (social usage). Students will learn complex expressions, such as communicating regret, respect (honorifics/humbling), passive experiences, and causative forms. The course will emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 17 - Lesson 23 will be covered and 107 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

JAPN219 Fourth-Year Japanese I: Conceptualizations of Identity in Contemporary Japan

Enrolled students and faculty will determine the twice-weekly, 80-minute class meeting times together.

This course involves close readings of modern literary texts, attention to current events reported in the media, and examinations of visual materials and critical discussions in Japanese. Placing Japan in a global perspective, the course addresses the following three main themes surrounding Japan in comparison to the world.

(1) Issues pertaining to the modern Japanese family (declining birthrate, aging society, women's social advancement)

(2) Bioethics (regenerative medicine, cloning, reproductive choices, life-extending and end-of-life care)

(3) Identity (questions of "Japanese-ness," as well as issues faced by so-called "gaijin," immigrants, refugees, biracial/bicultural individuals, and resident Koreans or "zainichi")

*These themes are subject to change.

JAPN229 Debating Japan and the World in Japanese

Tied to courses being offered in the CEAS, students in this course read related literature, scholarly articles and blogs, watch videos and films, and debate in Japanese about current events and issues surrounding Japan, Asia, and the world. Guest Japanese speakers may visit the class. Some possible themes are foodways, educational systems, Japanese relations with other Asian countries, identity and stereotypes, and cultural appropriation. However, an overarching

focus will be on the history and current dynamics of Japanese-American relations. All materials, reading and writing assignments, and discussion will be in Japanese, with some comparative materials in English, and some translation by students into English. Native speakers of Japanese are strongly encouraged to participate.

KREA255 Modern History and Culture of Korea: From Imperialism to Two Koreas

This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

LATIN (LAT)

LAT101 First-Year Latin: Semester I

Conquer Latin in two semesters! Acquire a basic vocabulary and build your skills with essential grammar as you develop your ability to read passages in Latin from the principal classical authors—including Cicero, Vergil, and Ovid. This first semester covers half the textbook. In the second semester (LAT 102), you will complete the textbook.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT102 First-Year Latin: Semester II

Continue your conquest of Latin by completing your acquisition of a basic vocabulary and essential grammar.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **LAT101**

LAT104 Intensive Introductory Latin

Learn Latin in a semester with this intensive introduction to grammar and syntax. Readings in original authors help illustrate and reinforce the fundamental principles of the language in preparation for more advanced reading at the intermediate level. Recommended for students wanting accelerated Latin acquisition or those with some background wanting a quick review.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT202 Ovid: METAMORPHOSES

Students will read in Latin selected stories from the METAMORPHOSES, Ovid's great un-epic epic, in which he recounts myths of shape-changers from the creation of the world down to his own time and that of the emperor Augustus. Ovid's stories inspire humor, pathos, and horror and may be grotesque or sentimental, sometimes both at the same time. They deal with issues such as divinity, power, love, rape, order, and identity, all in classic versions of famous myths influential throughout the centuries, told with the poet's distinctive wit and sense of incongruity. The class will focus on close reading of the Latin text and on Ovid's treatment of the myths and the distinctive approach he brings to the ever-shifting world he describes. The course will include an introduction to Latin meter, and class discussion will address modern critical approaches to Ovid.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT203 Latin Prose: Roman Letters

An introduction to the reading of classical Latin prose, the course will include a review of Latin grammar and syntax. Students will read selections from the letters of Seneca the Younger and Pliny the Younger. Seneca, a distinguished philosopher and statesman of the Neronian period, uses his experiences in contemporary Rome as texts from which to derive simple philosophical messages. Pliny recounts events from the life of an Italian aristocrat of the first century CE, including an eyewitness account of the eruption of Vesuvius. The course will begin slowly, with the aim of gradually acclimatizing students to the rhythms and stylistic and syntactical patterns of Latin prose. The emphasis will be on understanding and translating the Latin, but we will consider the social and cultural background to the texts we read.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT230 Love and Suffering in Ancient Rome (CLAC)

In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

LAT254 Apuleius: THE GOLDEN ASS

Fast-paced, magical, sexy, and bizarre, Apuleius' GOLDEN ASS, or METAMORPHOSES, contains more than enough rowdy episodes to keep us entertained for a semester. The novel tells the story of the feckless Lucius, the man-turned-ass whose encounters with the residents of Thessaly range from the vulgar to the weird to the sublime. Our goals, in addition to reading and understanding the Latin, include tracing prominent themes and becoming acquainted with recent relevant scholarship.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT262 Reading Latin, Writing Latin

This is a nontraditional introduction to writing Latin. Through reading and discussing short selections of mainly narrative and descriptive Latin prose from all periods, from the classical to the Renaissance, students will develop greater familiarity with Latin styles and the expressive possibilities of the language. Students will try writing Latin themselves (often collaboratively and with ample opportunity for revision). Subjects will include proverbs, familiar sayings or catchphrases, song lyrics, and so forth (anything is fair game for translation), as well as short narratives, culminating in a final project. As well as developing greater facility with Latin, students will reflect on the experience of learning Latin, the history of Latin, and its place in the modern world.

LAT270 Catullus

The poetry of Catullus often has an immediate appeal to contemporary readers. In Tom Stoppard's play THE INVENTION OF LOVE, the claim is made that he invented love as we think of it. But in addition to his love poetry, Catullus is also the writer of a mini-mythological epic (an epyllion), an account of the strange story of the self-castration of Attis, wedding hymns, translations from Greek lyric, invective, and elegy. In this course, we will read an extensive selection of Catullus' poetry and discuss the critical issues they raise in the light of selected readings from modern scholarship.

LAT281 Roman Satire: Juvenal

Roman satire, as practiced by Lucilius, Horace, Persius, and Juvenal is a strange hybrid: it combines social criticism, literary parody, philosophical rumination, and obscene burlesque, a self-consciously "humble" genre set in the framework of dactylic hexameter, the meter of high-flown Homeric and Vergilian epic. It is among a small minority of ancient literature which directly addresses itself to the humbler aspects of the everyday lives of Roman citizens. This course on Roman satire will focus on Juvenal, the last practitioner of Roman verse satire. We will begin the course with a selection of short readings from each of the four Roman satirists in order to orient ourselves with standard topics of Roman satire (including dining, country vs. urban life, the body, sex, and gender roles) and differentiate the approaches. We will spend the rest of the semester exploring Juvenal's seminal works: his first and second book of Satires, wherein he situates himself as a figure marginalized by a new order of foreign interlopers, powerful gender deviants, and tyrannical patrons and emperors, as well as Satire 10, his caustically philosophical take on the "Vanity of Human Wishes."

LAT301 Petronius

Follow the down-and-out Roman Encolpius as he embarks on a titillating tour of the Mediterranean, persecuted (with impotence!) by the phallic god Priapus. Join him as he attends the longest dinner party in Latin literature, a class-crossing affair including nouveau riche, citizens, slaves, freedmen, and foreigners. In addition to reading the Latin, we will examine issues of scholarship, from the title (Satyricon? Satyricon?), to the genre, to sexuality, to class and status.

LAT331 Vergil: AENEID 2

Vergil's Aeneid book 2 is almost cinematic in its tragic, poignant, and frenetic depiction of the fall of Troy, from looming threat of the Trojan Horse to the firing of the city, rooftop battles, and the violent loss of loved ones while the gods manipulate events with petty disdain for human life. Students will read book 2 in its entirety in Latin, and the rest of the work in English. The purpose of this course is to continue to develop skills in reading Latin poetry and to continue the study of Latin grammar with close reading and critical analysis.

LAT353 Demagogues and Tyrants in the Roman Historians

Reading selections from Livy's ab Urbe Condita, Sallust's Bellum Catilinae, and Tacitus' Annales we will consider these historians' depictions of tyrants and demagogues (e.g., the Tarquins, Catiline, Tiberius, Nero) throughout Rome's political history, their views on the interactions between these controversial figures and the Senate and people of Rome, and their narratives describing the circumstances behind their rise and fall. At the same time, we will explore the role of fact vs. fiction, propaganda, and bias in the writing of Roman history through comparative analysis with contemporary sources and inscriptional evidence.

LATIN AMERICAN STUDIES (LAST)

LAST127 Catholicism and Ideology in the Hispanic World

Catholicism has played a number of roles in the cultural politics of the Hispanic world, appearing as a place of national being, resistance, and conservatism. In this course, we will read a number of texts from different periods and national contexts with a view to understanding how writers and intellectuals from Spain, Latin America, and the U.S. engage with Catholicism and the historical conditions under which they do so.

LAST200 Colonialism and Its Consequences in the Americas

Colonialism is one important foundation for a study of the Americas. This course examines the historical development of contact and settlement, including comparison of Spanish, French, and English colonialisms. Exploitation of the new hemisphere entailed a competitive scramble among the European powers, with consequences for territorial acquisition and for the non-Europeans they encountered. We will examine different models of colonialism, as well as different forms of labor, such as slavery and indenture. Among the most important topics will be the discourses used to justify and explain the subordination of others as well as the acquisition of land, including the scientific development of racial and gender theories. Revolutions and independence movements such as the Haitian Revolution in their turn fashion justifying discourses. We will investigate culture itself as a major arena wherein colonialism and resistance to it operate.

LAST211 Living the Latin American City: Urban History, Politics, and Culture

This course offers an introduction to modern Latin American cities, exploring how the region's urban spaces—including sprawling megalopolises like Mexico City and Rio de Janeiro—have been made and re-envisioned by elite and poor inhabitants alike. Approaching urban space and everyday life as a terrain of political and social negotiation as well as cultural ferment, the course traces the growth of Latin American cities through case studies that examine themes including colonialism, citizenship, migration, inequality, and social movements, and the tensions between state planning and informality. We also consider how the urban experience shaped intellectuals' and artists' efforts to chronicle, represent, and reimagine the Latin American city in essays, photography, and film.

LAST218 From Chocolate to Coca: Commodities and the Making of Latin America

Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

LAST219 Latin American Economic Development

In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

LAST232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America

This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin

America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

LAST240 From the Banjo to Dembow: Afro-Caribbean Music in Motion

This course analyzes the global circulation of Afro-Caribbean musicians, dancers, audiences, musical styles, and even musical instruments from the beginning of European colonialism to the present day. We will seek to understand the political interconnections between the Caribbean and the wider world by focusing our attention on specific "musical itineraries." These will include, among others, the creation of the banjo by enslaved people in the Caribbean and the instrument's role in black resistance in North and South America, the musical aftershocks of the Haitian Revolution in Cuba and Louisiana, the production of black internationalist politics at weekly "reggae" dances led by Jamaicans in early 20th-century Costa Rica, and the rise of reggaetón between Panama, Puerto Rico, Cuba, the Dominican Republic, and the United States.

We will question how these musical itineraries propelled black political movements and shaped larger ideas about race, nation, diaspora, and the meaning of "the Caribbean" itself. No prior musical knowledge is required for this course.

LAST241 Asian Latino Encounters: Imagining Asia in Hispanic America

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Darío, Tablada, Gómez Carrillo, Balmori, etc.). Then we will assess travel writings produced across the Pacific—from Mexico to India (Paz), from Chile to Southeast Asia (Neruda), from the Philippines to Chile (Medina), and from Mexico to Japan (Tinajero). Finally, we will examine diverse works by writers/artists of Asian descent in Hispanic America as well as Asian Latinos in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Hispanic America? How does Philippine literature in Spanish produced during the US colonial period modify our conception of what is "Hispanic," "Asian,"

and "American"? By looking at the trans-Pacific reach of the Hispanic, we will be in a better position to appreciate the complexity of the cultural, social, and ambiguous political legacies of Spanish and US colonialism.

LAST242 Histories of the Caribbean: New Questions, Methods, and Vantage Points

This course explores some of the most exciting new trends in historical scholarship on the Caribbean. We will consider how recent scholars of the Caribbean have turned a critical eye to existing methods and reimagined "archives" as they have crafted new stories about gender, sexuality, race, the environment, and the rise of modern capitalism. In this way, we will question how these new directions in Caribbean studies have reshaped the study of history more generally. We will use a wide geographic lens in order to gain an expansive vision of the circuits of the Greater Caribbean, stretching from Antigua, Guadeloupe, Barbados, Martinique, Jamaica, Trinidad, Guyana, Cuba, Puerto Rico, and Haiti into the wider Atlantic world.

LAST245 Modern Latin America Since 1810

This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

LAST252 Race and Nation in Latin America

How does race operate in Latin America, and in what ways does it intersect with the concept of nation and national belonging? The regions we call Latin America and the Caribbean have, since the first human encounter between "Old" and "New" Worlds of the 15th century, been often understood as places

of mixture--both cultural and biological. From at least the early 19th century, when independent nations in the region began to emerge from colonial rule, intellectuals, statesmen, and citizens alike have had to contend with "race" and its inextricable connection to the concept of "nation." This course aims to introduce students to the history of race and national formation in Latin America and the Caribbean, from the wake of the independence movements of the early 19th century to the present. It draws on historical, anthropological, and literary approaches to identifying, analyzing, and interpreting the varied meanings of race and nation throughout the region.

LAST254 Tales of Resistance: Modernity and the Latin American Short Story

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

LAST258 Bolívar's Afterlife in the Americas: Biography, Ideology, and the Public Sphere

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing

on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

LAST259 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

LAST265 Multilingual Aesthetics in Latin America

This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoinindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

LAST266 Latin American Theater and Performance

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

LAST268 Anthropology of Black Religions in the Americas

This course examines Afro-Creole religions and cultural expressions in selected communities throughout the Atlantic world. How were religious communities created under colonial domination? Under what conditions were religions shaped, and what shapes did they take? How are African-based religions produced through aesthetics and the ritual arts of spiritual talk and sermons, song, dance, drumming, and medicine-making? How do these religions continue to survive, thrive, and, in some cases, grow in the current historical period? This course will pay special attention to the yearly ritual cycle and its attendant festivals: Christmas, carnivals, Lent, Easter, saints' days, feasts, and pilgrimages, as well as the emergent spiritual and aesthetic traditions such as Capoeira and Rara. We will study Orisha religions such as La Regla de Ocha, or Lukumi, in Cuba and the Latino U.S.; Candomble in Brazil; Vodou in Haiti; and Garifuna traditions and spiritism in Puerto Rico.

LAST270 Modern Technologies in Latin American Literature

Modern communication technologies and modes of transportation have been a recurrent theme in works of Latin American writers from the 20th and 21st centuries. For example, radio was a significant source of inspiration for avant-garde Mexican poets Manuel Maples Arce and Luis Quintanilla in the 1920s; they both tried to capture the uncanny experience of hearing disembodied human voices through writing. In this class, we will discuss texts that likewise reflect on the effects of various modern means of transport and communication--such as trains, subways, radio, telephone, tape recording, and the Internet--with an emphasis on how these technologies have revolutionized human relations. We will examine how these literary works exceeded the aesthetic or sociopolitical norms of their time, while keeping in mind that the simple act of writing is also a form of technology, and often a transgressive one.

LAST273 Beyond Machu Picchu and Macondo: Real and Imaginary Worlds in Latin American Letters

Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and of the Nuyorican writer Tato Laviera (1970s), and César Aira's Colón (Panamá) and Fernando Vallejo's Medellín (Colombia). In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904--1914), the Cold War (1947--1991), Latino identity in the context of Puerto Rico and New York City, the coup d'état in Chile on September 11, 1973, and the drug wars. When possible, films and short videos will be used to help build knowledge of historical context.

LAST276 Body, Voice, Text: Theater and the Transmission of Experience

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

LAST278 Dangerous Plots: Fictions of the Latin American Jungle

This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

LAST280 Screening Youth in Contemporary Latin American Cinema

This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

LAST281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as "islas sonantes" (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

LAST285 Narratives of Crisis: Violence and Representation in Contemporary Latin American Culture

How have Latin American literature, film, and performance of the past three decades articulated the many forms of violence in a region facing complex armed conflicts, wars deployed around the drug trade, and diverse forms of political unrest? Focusing on Colombia, Peru, Central America, and Mexico, we will investigate how contemporary cultural artifacts reflect on the linguistic, ethical, and social dimensions of subjectivity in times of crisis and provide productive analytical frameworks to examine violence, history, and memory in the region.

LAST291 From the Muralists to the Narconovela: The Public Intellectual in Mexico

Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and

to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

LAST292 Spanish American 'Modernismo' in a Global Context

The publication of Nicaraguan Rubén Darío's *AZUL...* in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

LAST296 Colonial Latin America

This course studies the history of Latin America and the Caribbean from pre-conquest times to the emergence of independence movements in the early 19th century. Lectures will explore the key environmental, cultural, economic, political, and religious transformations that shaped colonial societies throughout the region. Beginning with the formation of indigenous and Iberian polities before 1492, we will consider how early modern colonial governance functioned and evolved throughout the period of Spanish and Portuguese rule in the Americas. Through an array of primary and secondary sources we will reconstruct the lived experiences of a diversity of actors across the colonial world. We will pay particular attention to the methods and approaches that scholars have used to understand the history of the region.

LAST302 Latin American Politics

This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include, Why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why

did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

LAST306 Liberation Theology and Pentecostalism in the Americas and Africa

This course tackles the question: If liberation theology advocates a preferential option for the poor, why do the poor in Africa and the Americas often choose evangelical Protestantism? For evangelical Christianity, the common good is a by-product of the righteous lives of believers as they enact the outward signs of personal salvation. This course examines both religious thought and analysis of various Christianities of the Americas and Africa, with particular attention to the ways religious thinkers and communities grapple with and resolve questions of human rights, evangelizing race, and structural inequalities that arise in the recent era of globalization and neoliberal capitalism. Other topics will include the prosperity gospel, the growth of Christian NGOs, gender and machismo, and spiritual warfare. Case studies will include readings on the U.S., Colombia, Brazil, Haiti, and Zimbabwe.

LAST308 Greater Latin America: Ideas, Politics, and Culture in the Americas

What is "Latin America," who are "Latin Americans" and what is the relationship among and between places and people of the region we call Latin America, on the one hand, and the greater Latin diaspora in the US on the other? This course will explore the history of Latin America as an idea, and the cultural, social, political, and economic connections among peoples on both sides of the southern and eastern borders of the United States. The course will draw from a variety of sources, including literature, visual arts, music, and oral history. Topics we will consider include the origin of the concept of "Latin" America, Inter-Americanism and Pan-Americanism, transnational social movements and intellectual exchanges, migration, and identity politics.

LAST309 Territory, Community, and Identity in the Americas

How does a place shape community social relations? And in what ways do peoples' relationships to natural resources and the built environment shape their political identities? This course will explore these questions by focusing on particular case studies in the Western Hemisphere. We will consider the ways in which communities are tethered to a particular idea of territory, whether they be "fugitives," "runaways," "natives," or "immigrants." The cases we will explore include quilombos and palenques comprised of people who escaped enslavement in Portuguese and Spanish America, indigenous communities forged before, during, and after colonization by Europeans, and newfound communities or colonies comprised of relatively recent (im)migrants.

LAST320 Media and Power in Latin America: From Quipus to Twitter

This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

LAST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present

Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike.

This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542

with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in *Tristes Tropiques* (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film *Fitzcarraldo* (1982).

LAST335 Nature, Science, and Empire in Early Latin America

This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

LAST341 Labor and Development Economics in Latin America

This course will look specifically at the literature of labor markets and related human capital accumulation in Latin America, which has emerged as an entirely separate area of research in recent years. A large part of this literature in Latin American economic development focuses on urban labor markets, health, and education. The focus of this literature is often on various subsets of the population such as gender and different ethnic groups or rural/urban population. Economic and social policies and external shocks to the local environment will be of particular interest to understand their impact on local economic outcomes. The focus will be foremost on Latin America and cities in Latin America and drawing at times on evidence from across the world for comparison with the Latin America region.

Students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss research results and work on individual or group projects. Basic quantitative methods will be taught throughout the course, relating to economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).

LAST343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations

The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

Gen Ed Area: **SBS-LAST**

Prereq: **None**

LAST344 The Haitian Revolution Beyond Borders

In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti's neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti's founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti's long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

LAST348 Urban Histories of Latin America

Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental

challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

LAST373 Language and Power in Latin America

What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region.

The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of indigenous peoples as social and political actors in contemporary Latin America.

LANG151 Elementary Swahili I

This course is an introduction to the study of the Swahili language.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **HA-LANG**

Prereq: **None**

LANG152 Elementary Swahili II

This course is a continuation of Elementary Swahili I, an introduction to the study of Swahili language.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **HA-LANG**

Prereq: **None**

LANG190 American Sign Language I

This course introduces students to the fundamentals of American Sign Language (ASL), the principal system of manual communication among American deaf people. Not to be confused with Signed English (to which a certain amount of comparative attention is given) or with other artificially developed systems, ASL is a conceptual language and not merely encoded or fingerspelled English. As such, while to some extent influenced by English, depending on the individual signer, it presents its own grammar and structure, involving such elements as topicalization, spatial indexing, directionality, classification, and syntactic body language. By the end of the semester, students should have learned between 700 and 800 conceptual signs and their use. They will also have been introduced to aspects of American deaf culture--sociology, psychology, education, and theater--through a variety of readings and discussions.

Offering: **Host**

Grading: **BMO**

Credits: **1.00**

Gen Ed Area: **HA-LANG**

Prereq: **None**

LANG191 Beginning American Sign Language II

Beginning American Sign Language II will provide a continuation of the work done in LANG190. The course will cover grammatical and linguistic material in some depth, as well as teach additional vocabulary. There will also be a focus on students' use of the language in class to improve their conversational abilities. The course will also introduce students to deaf culture and the signing community and will include ethnographic and analytical readings related to culture, linguistics, and interpretation.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-LANG**

Prereq: **LANG190**

LANG290 American Sign Language and Current Issues

During this third semester of American Sign Language (ASL) study, students will continue to focus on language acquisition while also examining the related ethics and controversies surrounding ASL, deaf culture, and disability issues in America. Several key questions will be considered: How are advances in genetic testing impacting the deaf community? What is the cause of a recent emergence of ASL in popular culture and the huge increase in university course offerings and enrollments? What is the "least restrictive environment" according to the Americans with Disabilities Act compared to day-to-day reality? Is the deaf community a cultural-linguistic minority group or a disabled population? Are cochlear implants a miracle cure, or are they a tool that is misrepresented in the media and/or an attempt at a form of cultural genocide? Why are many parents of deaf children forced to choose a faction of the ongoing oral vs. signing debate, often made to feel guilty by the advocates of the differing methods of education? Guest lectures and discussions will be conducted in a variety of modalities, such as spoken English, ASL, or simultaneous/total communication.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-LANG**

Prereq: **LANG191**

LANG401 Individual Tutorial, Undergraduate

Topic to be arranged in consultation with the tutor.

Offering: **Host**

Grading: **A-F**

LANG419 Student Forum

Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.

Offering: **Host**

LANG420 Student Forum

Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.

Offering: **Host**

Grading: **Cr/U**

LANG466 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Grading: **OPT**

MATHEMATICS (MATH)

MATH117 Introductory Calculus

This course is designed to introduce basic ideas and techniques of differential calculus. Students should enter with sound precalculus skills but with very limited or no prior study of calculus. Topics to be considered include differential calculus of algebraic, exponential, and logarithmic functions. (Integral calculus will be introduced in MATH118.)

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH118 Introductory Calculus II: Integration and Its Applications

This course continues MATH117 and is designed to introduce basic ideas and techniques of calculus. Students should enter MATH118 with sound precalculus skills and with very limited or no prior study of integral calculus. Topics to be considered include differential and integral calculus of algebraic, exponential, and logarithmic functions.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH119 Elements of Calculus, Part I

This course is the first half of a two-semester calculus sequence (MATH119, MATH120). This sequence is designed for students who have not previously studied calculus. The course, together with MATH120, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH120 Elements of Calculus, Part II

This course is the second half of a two-semester calculus sequence. This sequence is designed for students who have not previously studied calculus. The course, together with MATH119, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH119**

MATH121 Calculus I, Part I

MATH121 is designed for students who have completed a high school calculus course and who might pursue study in an area for which calculus is an essential tool but who are not prepared to place out of calculus. This course is a deeper and broader study of calculus than MATH117; theoretical aspects are not the main focus but will not be avoided. The course will, together with MATH122, treat limits, derivatives, and integrals; the calculus of exponential, logarithmic, trigonometric, and inverse trigonometric functions; techniques of integration; plane analytic geometry; various applications of calculus; and sequences and series, including power series and intervals of convergence.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH122 Calculus I, Part II

The continuation of MATH121. Topics covered include techniques and applications of integration and an introduction to sequences and series.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH132 Elementary Statistics

Topics included in this course are organizing data, central measures, measures of variation, distributions, sampling, estimation, conditional probability (Bayes' theorem), hypothesis testing, simple regression and correlation, and analysis of variation.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH211 Problem Solving for the Putnam

This course will explore the problems and problem-solving techniques of the annual William Lowell Putnam mathematical competition. Particular emphasis will be placed on learning to write clear and complete solutions to problems. The competition is open to all undergraduate students.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

MATH221 Vectors and Matrices

This is a course in the algebra of matrices and Euclidean spaces that emphasize the concrete and geometric. Topics to be developed include solving systems of linear equations; matrix addition, scalar multiplication, and multiplication; properties of invertible matrices; determinants; elements of the theory of abstract finite dimensional real vector spaces; dimension of vector spaces; and the rank of a matrix. These ideas are used to develop basic ideas of Euclidean geometry and to illustrate the behavior of linear systems. We conclude with a discussion of eigenvalues and the diagonalization of matrices.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH222 Multivariable Calculus

This course treats the basic aspects of differential and integral calculus of functions of several real variables, with emphasis on the development of calculational skills. The areas covered include scalar- and vector-valued functions of several variables, their derivatives, and their integrals; the nature of extremal values of such functions and methods for calculating these values; and the theorems of Green and Stokes.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH223 Linear Algebra

An alternative to MATH221, this course will cover vector spaces, inner-product spaces, dimension theory, linear transformations and matrices, determinants, eigenvalues and eigenvectors, Hermitian and unitary transformations, and elementary spectral theory. It will present applications to analytic geometry, quadratic forms, and differential equations as time permits. The approach here is more abstract than that in MATH221, though many topics appear in both.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH225 Fundamentals of Analysis: An Introduction to Real Analysis

In this rigorous treatment of calculus, topics will include, but are not limited to, real numbers, limits, sequences and series, continuity and uniform continuity, differentiation, the Riemann integral, sequences and series of functions, pointwise and uniform convergence of functions, and interchange of limiting processes. MATH228 or comparable experience in writing mathematical proofs is strongly recommended for success in this course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH226 Complex Analysis

This course will present the basic properties of complex analytic functions. We begin with the complex numbers themselves and elementary functions and their mapping properties, then discuss Cauchy's integral theorem and Cauchy's integral formula and applications, Taylor and Laurent series, zeros and poles and residue theorems, the argument principle, and Rouché's theorem. In addition to a rigorous introduction to complex analysis, students will gain experience in communicating mathematical ideas and proofs effectively.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH228 Discrete Mathematics

This course is a survey of discrete mathematical processes. Students will be introduced to the process of writing formal mathematical proofs, including mathematical induction. Topics may include set theory, logic, number theory, finite fields, permutations, elementary combinatorics, or graph theory.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH229 Differential Equations

This course is an introduction to the theory of ordinary differential equations. Many aspects of mathematics and computer science are important in this discipline, and a broad view will be presented, in agreement with modern theory and practice. The only prerequisite for the course is multivariable calculus; all other necessary tools will be developed as the course proceeds.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH222**

MATH231 An Introduction to Probability

This course teaches the basic theory of probability. Although the notions are simple and the mathematics involved require only a basic knowledge of the ideas of differential and integral calculus, a certain degree of mathematical maturity is necessary. The fundamental concepts to be studied are probability spaces and random variables, the most important ideas being conditional probability and independence. The main theorems we will study are the law of large numbers and the central limit theorem.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH222 AND MATH228**

MATH232 Mathematical Statistics

This course covers the basic notions of estimation, hypothesis testing, regression, analysis of variance, experimental design, and other topics in statistics from a rigorous mathematical perspective. This material will be supplemented by various case studies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH231**

MATH241 Set Theory

This course covers ordinal and cardinal numbers, cardinal arithmetic, theorems of Cantor and Schroeder-Bernstein, introduction to Zermelo-Fraenkel set theory, Axiom of Choice, and some infinitary combinatorics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH243 Mathematical Logic

This course is an introduction to mathematical logic, including first-order logic and model theory, axiomatic set theory, and, as time permits, Goedel's incompleteness theorem.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH241 OR MATH261 OR MATH228**

MATH244 Topology: Point Set

This is an introduction to general topology, the study of topological spaces. We will begin with the most natural examples, metric spaces, and then move on to more general spaces. This subject, fundamental to mathematics, enables us to discuss notions of continuity and approximation in their broadest sense. We will illustrate topology's power by seeing important applications to other areas of mathematics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH246 Applied Topology

This course teaches the main concepts in Applied Topology. Students will learn to apply nonlinear methods to analyze the shape of data sets. These approaches are drawn from classical topology and focus on the shape in one of two ways: they either 'measure' it, that is count the occurrences of patterns within the data set; or build combinatorial representations of the data set. As an example of the former, we will look at persistent homology, whereas the latter will be represented by mapper. The topics covered include: basic notions from topology, simplicial complexes (Cech complexes, Vietoris-Rips complexes, etc.), homology, persistent homology and applications, mapper.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH223**

MATH252 Differential Forms

This class will be an introduction to differential forms, a central tool in modern topology, geometry, and physics. The course begins where MATH222 ends, with Green's theorem, the divergence theorem, and Stokes' theorem. All of these theorems are special cases of one theorem, known as the general Stokes'

theorem, about integration of differential forms. The objective of the first part of the course will be to understand and prove this theorem. We will then discuss manifolds and what can be learned about them using differential forms, concentrating on de Rham cohomology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 AND MATH222) OR (MATH222 AND MATH223)**

MATH255 Fundamentals of Analysis II

Topics to be addressed include convergence of sequences and series of functions, spaces of functions and their topologies, the Lebesgue integral (on the line) and its basic convergence theorems, and Fourier series.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH225**

MATH261 Abstract Algebra: Groups, Rings, and Fields

This course is an introduction to abstract algebra, a core area of mathematics: the study of the basic properties of structures, with emphasis on fundamental results about groups and rings. MATH228, or comparable experience in writing proofs and in abstract reasoning, is strongly recommended.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 AND MATH228) OR (MATH223 AND MATH228)**

MATH262 Abstract Algebra

This continuation of MATH261 will discuss fields and Galois theory. Additional topics will be covered as time permits.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH261**

MATH271 Error-Correcting Codes

Nowadays messages are sent electronically through different kinds of communication channels. Most of these channels are not perfect and errors are created during the transmission. The object of an error-correcting code is to encode the data so that the message can be recovered if not too many errors have occurred. The goal of this course is to introduce the basic mathematical ideas behind the design of error-correcting codes. It makes use of algebraic techniques involving vector spaces, finite fields, and polynomial rings. These techniques will be developed in this course so that prior knowledge is not necessary.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH221 OR MATH223**

MATH272 Elementary Number Theory

This is a course in the elements of the theory of numbers. Topics covered include divisibility, congruences, quadratic reciprocity, Diophantine equations, and a brief introduction to algebraic numbers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH273 Combinatorics

This course will present a broad, comprehensive survey of combinatorics. Topics may include partitions, the topic of inclusion-exclusion, generating functions, recurrence relations, partially ordered sets, trees, graphs, and min-max theorems.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH274 Graph Theory

A graph is a set V of elements called vertices and a set E of pairs of elements of V called edges. From this simple definition, many elegant models have been developed. Indeed, graph theory is essential to applications of computer science to network analysis and planar mapping. This course will be an introduction to graph theory with an emphasis on the connections between graph theory and linear algebra.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH221 OR MATH223**

MATH275 Probabilistic Graphical Models

Graphical models are used to represent complex, uncertain relationships among several, possibly very many, variables. They are fundamental in many domains of application, including medical diagnosis and prognosis, vision and image processing, robotics, and computational biology. This course will familiarize students with the graph theory and probability theory needed to discuss graphical models. After that, students will investigate exact and approximate statistical inference for graphical models, learning/inference of parameters, and possibly learning of graph structure.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH222**

MATH283 Differential Geometry

This course is an introduction to the classical differential geometry of curves and surfaces in Euclidean 3-space. Topics from global differential geometry and extensions to higher dimensions will be considered as time and the background of the students permit.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

Gen Ed Area: **None**

Prereq: **None**

MATH509 Model Theory

This course will emphasize model theoretic algebra. We will consider the model theory of fields, including algebraically closed, real-closed, and p -adically closed fields; algebraically closed valued fields; and also general questions of definability in fields. As time permits, we will consider more recent applications of model theory in number theory and arithmetic geometry. Ideally, the student should understand what it means to be first-order definable and should have the equivalent of a year's study of abstract algebra. To study various applications, it will be necessary to assume certain results from the areas of application--that is, without proving them *ab initio*.

Prereq: **None**

MEDIEVAL STUDIES (MDST)

MDST125 Love, Sex, and Marriage in Renaissance Europe

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

MDST128 Constantinople: From Rome to Istanbul

Constantinople was founded by a Roman Emperor Constantine the Great in 330. From there the story gets complicated. Should we account for Constantinople from a Western point of view and call it Roman? Or, should we label it by its Eastern religion and call it Christian? Or, should we see Constantinople's true nature in a transnational Hellenic culture and call it Byzantine? Then, once we have chosen a story to explain the city's nature, how should it end? With the pillaging fourth crusade in 1204, or the Ottoman sack in 1453, or is Constantinople yet alive in modern Istanbul? This course diverges from such narrative frameworks by accounting for Constantinople as, first and foremost, a city. Together we will explore the rich, unevenly distributed, textual and material relics of this medieval metropolis and contribute our finds to a collaborative digital database. Students will draw from this database to craft their own histories, applying both imagination and analysis into a believable and reliable story conveying the diversities and paradoxes of life in The City.

MDST151 European Architecture to 1750

This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society's identity? What is the relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially

and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

MDST203 Introduction to The Hebrew Bible (Old Testament)

The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What gender is God? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

MDST204 Medieval Europe

This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity; its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

The course will also provide students with basic introductory exposure to the ideas and methods of the digital humanities through course illustrations and discussions. This will probably include exercises in visualizing the past, exposure to geographic information systems (GIS) analysis, text-mining, and network analysis.

MDST207 Chaucer and His World

In this course, we will read Chaucer's fascinating dream-visions, *The Book of the Duchess* and *The House of Fame* and his best-known work, *The Canterbury Tales*. We will also read selections from Chaucer's sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer's poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer's reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

MDST209 Mosque and Cathedral: Islam and the West, c. 600-1500

This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaic, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.

MDST210 Medieval Art and Architecture, c. 1100-1400

This course introduces the art and architecture of Romanesque and Gothic Europe, c. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

MDST214 Introduction to the New Testament

The purpose of this course is to provide an introduction to those writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, having as one of the chief aims of the course the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

MDST215 Politics and Piety in Early Christianities

The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

MDST220 Love and Loss in Medieval and Early Modern French Literature and Culture

The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.

MDST221 Allegory and Devotion in Medieval and Renaissance Music

This course investigates the mystical and visionary aspects of religious music alongside the secular development of the vernacular love lyric. We explore tensions between individual and communal practices, authorship and artistry, power and politics, and the multiple social functions of music-making. Students learn about the musical legacy from Ancient Greece, tracing its influence

through the Middle Ages to the end of the Renaissance. We cover the music of worship, romance, public ceremony, and private entertainment, observing the shifting balance between innovation and tradition. We study the relationship of notational systems to memory, become familiar with cultures that are remote from ours, and gain a historical respect for difference. By engaging with the deep past, you acquire skills not only to appreciate the musical creativity of a millennium ago, but also to better understand social and cultural distances in the modern world.

The course material will be presented through lectures and discussion, listening assignments, singing, and readings. Weekly lab sessions go over technical terminology and address the challenges that arise. The lab also facilitates reviews for quizzes and provides coaching in essay writing, research skills, and the development of analytical listening.

MDST222 Early Renaissance Art and Architecture in Italy

This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics. Museum trip(s) will expose students to original works of art.

MDST223 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

MDST226 The Cosmos of Dante's Comedy

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

MDST228 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History

This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic *EL CID* (12th--13th century); the bawdy and highly theatrical prose dialogue known as *LA CELESTINA* (1499); the anonymous *LAZARILLO* (1554), the first picaresque novel; and María de Zayas's proto-feminist novella *THE WAGES OF VICE* (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of

the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

MDST230 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes

Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

Prereq: **None**

MDST232 Obscure Enigma of Desire

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

MDST238 Mystics and Militants: Medieval Women Writers

In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

MDST245 The Invention of Fiction: Giovanni Boccaccio's Decameron

In this course we read and discuss Giovanni Boccaccio's Decameron (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio inhabited. We examine the Decameron's tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

MDST254 Cervantes

Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

MDST257 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture

The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

MDST308 Medievalists on the Move: Pilgrimage, Jihad, Crusade, and Apocalypse

Medieval people moved: They traded and sent emissaries; they invaded and migrated; they wandered, begged, and ascended the heavens; they went on crusade, jihad, and pilgrimage. This course will first analyze the most consistently preserved sources on medieval movement: accounts of pious travel "for God's sake and not for pleasure." We will then contextualize such accounts with two other types of movement: the physical journeys of traders, diplomats, and warriors, as well as the interiorized journeys of the prophet, the mystic, and the storyteller. By encompassing this variety we will be able to pursue a larger question: Can patterns of exchange across the physical and cultural barriers of geography, language, religion, and governance reveal a more global medieval world than we usually envision?

MDST310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia

For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why "convivencia" ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

MDST312 The Medieval Beast

How did medieval writers think about the distinction between human and animal? This course will examine the categories of soul and body, ruler and ruled, language and thought--among others. We will also read about human-animal hybrids like werewolves and bird-men in order to think through some of these binaries. Texts will include Marie de France's "Lais and Fables," Chrétien de Troyes's "Knight of the Lion," William of Palerne, Sir Gawain and the Green Knight, and Chaucer's "Parliament of Fowls" and "Nun's Priest's Tale"; also bestiaries (encyclopedias of beasts) and some treatises about hunting and falconry.

MDST330 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes

Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

MDST350 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena

Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena--a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire--to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with "The Alexiad" through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

Prereq: **None**

MDST351 Debate and Destruction: Jews and Christians in the Middle Ages

This course will consider relations between the Jewish minority and their Christian neighbors in England before the Jews' expulsion in 1290. We will also look at how the Jews are depicted in subsequent Christian writing. We will read texts originally written in Hebrew, French, and Latin (all in translation) as well as English, giving us a sense of the conversations that took place between two groups that were both inextricably bound together and set apart by centuries of conflict and persecution. Among the issues we will explore are the popularity of Jewish-Christian debate as a literary form, the Crusades, gender roles and gender fluidity, Jewish and Christian apocalyptic programs, and the curious afterlife of Jews in Middle English literature..

MDST353 Race, Ethnicity, and Religion in Medieval Literature

Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question by considering the invention of medieval ideas of race, ethnicity and religious difference.

Our focus will be on a selection of texts dealing with encounters--real and imaginary--of Western European Christians with cultures from the Mongol Empire to the Celtic "borderlands." The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts and, above all, romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasy.

Prereq: **None**

MDST373 From Courtly Love to Cannibalism: Medieval Romances

Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist loses gender, skin color changes with religion, and a dog might be the hero of a tale. In this course, we will begin with texts that date from the Romance's origins in 12th-century France and continue with the form's development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur's court. Some of the topics we will consider are Romance's engagement with the religious and ethnic conflicts of the Crusades, theories of good and bad government, and of course, Christian mysticism and the Holy Grail.

MDST376 Travel and Communication in Europe

This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

MOLECULAR BIOLOGY AND BIOCHEMISTRY (MB&B)

MB&B101F The Personal Genomics Revolution (FYS)

The first draft of the human genome sequence was published approximately 15 years ago, having taken more than a decade to complete at a cost of approximately three billion dollars. With incredible advances in sequencing technology, accompanying analysis tools, and maturation of sequence databases, we have arrived at the beginning of an era of "personal genomics." Today, individuals can have their genomes sequenced in a few hours for a few hundred dollars! This course explores the kinds of information contained within one's genome and the various ways in which genome sequences can be used for improving quality of life. Students will conduct original research to explore societal attitudes about the use of personal genomics for the purpose of making lifestyle choices (dating, diet, vocations, etc.); establishing notions of personal identity (race, gender, nationality, etc.); creating new social networks (based on genetic kinship); or prolonging life span (and revolutionizing medicine). As part of this research, students will also consider ethical issues (e.g., privacy, discrimination) surrounding the use of personal genomics, as well as how education might impact societal attitudes on particular applications of this technology. As this is an FYS course, student work will focus on developing skills in scholarly writing, which will include peer evaluations of other student writing and production of a final scholarly paper based on the results of their research project.

MB&B103 Copernicus, Darwin, and the Human Genome Project

Much of art and philosophy is inspired by the question: What does it mean to be human? The project of science has provided rational explanations of human identity that threaten our self-perception as special beings--beginning with the Copernican revolution and discoveries about our unspecial place in the universe. In this course, we will discuss three paradigms arising from modern molecular biology that provide perspective on the lines between living and non-living, human and non-human life, and human and machine by exploring the science of DNA, evolution, and the Human Genome Project, respectively. As part of both discussions, we will consider how society negotiates with science, as depicted in politics and popular art, ethical issues pertaining to the advancement of scientific (e.g., reproductive, genetic) technologies, and plausible resolutions to the tension between science and society that arise from a detailed understanding of the scientific method. Little or no background knowledge in science/biology will be assumed.

Offering: **Host**

Grading: **A-F**

MB&B107 The Science of Human Health: Microbiology and Immunology

Studying the molecular and cellular biology of disease-causing viruses and bacteria, we will survey the basic mechanisms that they deploy to colonize and harm our bodies. We will also learn about the cells and macromolecules that comprise our immune system, how they act in concert to detect and combat disease or, in certain instances, cause autoimmune disease. A case-study approach will be pursued to join these two subjects and to illustrate the

complex interplay between pathogens and the immune system that allows us to successfully combat certain diseases, become persistently infected by others, or succumb to debilitating or fatal illnesses.

MB&B117 Life in the Cell from a Molecule's Perspective

What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

MB&B155 Tiny Organisms with a Big Effect: The Microbiome

With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multicellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual's health. This course will look at the true nature of the microbiome, to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.

Prereq: **None**

MB&B181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity

This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of genetics and gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from genetic code in DNA through protein synthesis and function. Topics include DNA replication and repair, chromosome dynamics, RNA transcription, protein translation, gene regulation, and genomics. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including cell signaling, energetics, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology.

MB&B182 Principles of Biology II

This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

MB&B210 Genomics: Modern Genetics, Bioinformatics, and the Human Genome Project

Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL210**

Prereq: **[MB&B181 or BIOL181]**

MB&B212 Principles and Mechanisms of Cell Biology

The cell is the smallest structural and functional unit of an organism. Understanding the molecular basis for its behavior and function is critical to understand biological function at all levels, from molecular to organismic. The primary goal of this course is to understand how cells function within the context of the multicellular organism or tissue--an environment that cells regulate as well as respond to. We also focus on the process of scientific discovery in the field of cell biology--how do we know what we know? Hence whilst the textbook will provide background reading, we will also discuss original research in class. We will cover cell and organelle structure and function, trafficking, cell adhesion and motility, proliferation, signal transduction, and cell differentiation, and consider how these processes are integrated to generate coherent cell behaviors, or go awry in disease.

MB&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

Offering: **Host**

MB&B306 Epigenetics

Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.

MB&B309 Molecular and Cellular Biophysics

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

MB&B313 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function

This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of

critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.

MB&B315 The Regulation of Ribosome Biosynthesis

Ribosomes are the large and highly conserved organelles charged with the task of converting the nucleotide-based messages of mRNAs into the polypeptide sequence of proteins. This act of translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course we will investigate the mechanism of translation as well as the biosynthetic pathways that are involved in the synthesis of ribosomes themselves. Both prokaryotic and eukaryotic systems will be considered, including the question of how ribosome biosynthesis, which constitutes a major fraction of the total cellular economy, is regulated in response to changing cellular conditions.

MB&B333 Gene Regulation

This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. An overarching theme is how genomes encode and execute regulatory programs as revealed by a global systems biology approach in modern genomics research.

Prereq: **[BIOL182 or MB&B182]**

MB&B334 Stochastic Biology: Randomness and Order in Gene Regulation

While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical

phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stem cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B335 Protein Folding: From Misfolding to Disease

Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B340 Practical Methods in Biochemistry

This course centers on currently used techniques for protein separation, characterization, and purification, such as ultracentrifugation, gel

electrophoresis, and chromatography. These topics will be introduced within the general context of the behavior of macromolecules in solution. The relative stability of proteins in different media, the forces stabilizing protein structure, and the interaction of proteins will be discussed. We will explicitly consider different techniques used to study proteins. Relatively novel techniques to be discussed include surface plasmon resonance, microarray methods and mass spectrometry, and single molecule microscopy. In the course, we will go through three or four different protein purification protocols and discuss the methods used in each one. We will also touch upon the commonly used spectroscopic techniques used to characterize proteins, including absorption, fluorescence, and circular dichroism. The course will focus on biochemical techniques and understanding the physical principles underlying these techniques and will also discuss tactics for optimizing established isolation and purification procedures and for isolating and characterizing an unknown protein.

The course content is appropriate for advanced undergraduates (juniors/seniors) and beginning graduate students from chemistry, biology, molecular biophysics or MB&B.

MB&B342 Molecules to Medicine

This course will explore the process of drug development, including target selection, lead discovery using computer-based methods and combinatorial chemistry/high-throughput screening, organic synthesis, bioavailability, clinical trials, and other factors (some economics and politics) involved in bringing a drug to the marketplace. Critical consideration of the variables to contend with at each step will be described and discussed, including aspects of research ethics and patent law. The basic science of molecular recognition, computer-aided drug design, and the role of factors from synthetic chemistry to toxicology will be presented. Case studies of the development of drugs recently successful in making the journey from molecule to medicine will be discussed, as well as the story of some that did not, and why. Emerging new design strategies such as fusion-protein therapies, crisper technology, and enhanced use of rational design and combinatorial methods will be emphasized, and how pharmaceutical research is evolving in the postgenomic era, particularly with biologics. Job opportunities in the pharmaceutical industry will be discussed.

MB&B381 Physical Chemistry for the Life Sciences

The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MB&B382 Practical NMR

This course will cover how a spectrometer works as well as the theory and application of NMR experiments. The topics will include one-dimensional proton and heteronuclear experiments as well as decoupling. The course will begin with how the spectrometer works and how data processing is carried out, as well as how to calibrate the spectrometer and shim the magnet. The one-dimensional TOCSY and NOESY experiments will then be covered. The course will also cover heteronuclear and homonuclear two-dimensional NMR experiments. The experiments will include two-dimensional DQF-COSY, TOCSY, NOESY, and ROESY proton experiments as well as heteronuclear experiments to correlate the chemical shifts of protons and heteronuclei, as well as how to select heteronuclear resonances on the basis of the number of directly attached protons.

The course will consist of lectures as well as a laboratory component in which the Mercury 300 will be used to obtain data that will be analyzed using the methods developed in the lecture part of the course. This course is specifically aimed at general users of the Mercury spectrometer who wish to learn how to carry out and analyze advanced one-dimensional and two-dimensional NMR experiments.

MB&B386 Biological Thermodynamics

This course is addressed to undergraduate and graduate students interested in biological chemistry and structural biology. The course presents thermodynamic methods currently used to relate structure to function in biological molecules. Topics include binding curves, chemical ligand linkages, binding polynomial, cooperativity, site-specific binding processes, and allosteric effects. Several models for allosteric systems, such as the Monod-Wyman-Changeux model, the induced-fit model, and the Pauling model, are analyzed in detail. Applications of these models are illustrated for functional regulation of respiratory proteins and for protein-nucleic-acid complexes involved in control of gene expression.

Prereq: **[MB&B208 or BIOL208]**

MB&B395 Structural Biology Laboratory

One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction,

and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

MB&B506 Epigenetics

Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.

MB&B509 Molecular and Cellular Biophysics

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

MB&B513 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function

This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer

progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.

MB&B515 The Regulation of Ribosome Biosynthesis

Ribosomes are the large and highly conserved organelles charged with the task of converting the nucleotide-based messages of mRNAs into the polypeptide sequence of proteins. This act of translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course we will investigate the mechanism of translation as well as the biosynthetic pathways that are involved in the synthesis of ribosomes themselves. Both prokaryotic and eukaryotic systems will be considered, including the question of how ribosome biosynthesis, which constitutes a major fraction of the total cellular economy, is regulated in response to changing cellular conditions.

MB&B520 Topics in Nucleic Acid Structure

This course focuses on the principles of nucleic acid structure. The scope of this course is to go beyond the common DNA structures such as B-DNA and A-DNA helical structures. The course will concentrate on other DNA structural motifs such as branched DNA, supercoiled DNA, triplex DNA, and quadruplex DNA.

Physical characterization of these structures as well as the functional implication of these structures (in terms of DNA replication, transcription, telomeres, etc.) will be discussed extensively. Discussion will also center on the forces that stabilize these structures, such as H-bonding and stacking interactions. The course will also cover other important DNA structural motifs such as curved or bent DNA as found in A-tracts and the relevance of these structures in promoter recognition and gene expression. Important RNA structures, such as ribozymes and pseudoknots, will be discussed. We will also discuss the significance of DNA structural motifs in eukaryotic genomes and the application of bioinformatic tools to search for these motifs.

MB&B523 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

MB&B533 Gene Regulation

This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms,

is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. An overarching theme is how genomes encode and execute regulatory programs as revealed by a global systems biology approach in modern genomics research.

Prereq: **[BIOL182 or MB&B182]**

MB&B534 Stochastic Biology: Randomness and Order in Gene Regulation

While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stem cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B535 Protein Folding: From Misfolding to Disease

Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B581 Physical Chemistry for the Life Sciences

The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of

physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MUSIC (MUSC)

MUSC102 World Music

This course will map the world musically by introducing a range of sonic expressions from diverse geographic areas, spanning Asia, Africa, Europe, and the Americas. Students will learn about regionally specific concepts of music and sound, types of performance, instruments, and vocal styles, the meanings music carries for its performers and listeners, and the ways in which it is produced and

experienced. They will consider the significance of music in forming a sense of place and identity, and trace the journeys and transformations of local musical sounds in contemporary globalized societies. The course will broaden students' understanding of music as a worldwide phenomenon, raise their awareness of cultural processes constructed through music, and provide them with aural and analytical means to recognize and appreciate a wide variety of sonic repertoires and practices among the world's peoples.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC103 Materials and Design

Music consists of sounds and silences. Diverse composers, songwriters, performers, and improvisers use these basic materials in accordance with their particular musical idioms and traditions. Sometimes music is passed down aurally; sometimes it is written down as a set of instructions for performers or as a record of an ephemeral sonic event. This course is an introduction to contemporary Western musical design and notation. Throughout the semester, we will improve our musicianship through singing, playing, listening, analyzing, reading, and composing. We will learn common terminology for sounds and their properties of frequency, duration, volume, and timbre. We will analyze and employ methods of organizing musical materials into songs and compositions. We will learn the notational system widely used for European art music, discussing its strengths, weaknesses, and relevance to popular and non-Western musics. By the end of the semester, students will be able to recognize written symbols and vocabulary for pitch, rhythm, volume, speed, form, articulation, and expression; perform simple notated pieces vocally or at the keyboard; transcribe, perform, and/or transpose simple pieces of music by ear; and compose simple pieces. In the fall semester, those compositions will draw on the means and methods of Renaissance counterpoint; in the spring semester, they will examine techniques of composing, notating, and improvising with digital audio tools. Students can achieve success in this course without previous musical knowledge.

MUSC105 Music History Seen From Keyboard Instruments

Most composers, from the earliest to the present, write keyboard music.

Invented by the ancient Greeks the pipe organ is the oldest keyboard instrument. Various plucked-string instruments, such as the harpsichord, were perfected in Europe in the 17th and 18th centuries. At first keyboard music spread slowly around the globe with these hand-crafted instruments. Because they are relatively easily transported harpsichords were shipped home by travelers and sent abroad as gifts. Pipe organs which are more expensive and cumbersome were sent first to the Americas by the Spanish in the 17th century and to the near and far east by others, such as an 18th century English organ sent to the Ottoman Sultan. As the 19th century progressed piano manufacturing evolved and increased and it became an expected piece of living room furniture, which coincided with mass-produced musical scores. Both developments allowed music-making to be accessible to larger numbers of people than previous eras. The advent of radio and other mass-media in the 20th century brought the musical saturation we think normal today. After 1970 electronic keyboard overtook pianos in numbers.

Students will be encouraged to use their keyboards as we explore this broad, still growing repertoire.

Offering: **Host**

MUSC106 A Thousand Years of Music History

This course will offer a history of European art music from the early Middle Ages to the present day. Featured composers will include Hildegard, Machaut, Strozzi, Bach, Handel, Mozart, Beethoven, Debussy, Stravinsky, Beach, and Cage. Students will relate course content to art, architecture, and literature of the periods, as well as to major economic and historical events. We will explore the technical workings of music and together build a vocabulary for analyzing music and articulating a response to it; music will be interpreted as a cultural phenomenon. By the end of the semester, students should be equipped for a lifetime of informed listening.

MUSC108 History of Rock and r&b

This course will survey the history of rock and r&b (broadly defined as a conglomeration of loosely connected popular musical genres) from their origins in the 1940s and '50s through the early 1990s. Three parallel goals will be pursued: to become literate in the full range of their constituent traditions; to experience the workings of the music industry by producing group projects; and to become familiar with a variety of theoretical approaches to the music, confronting issues such as economics of the industry, race relations and identities, youth culture and its relationship to American popular culture, and popular music as a creative, cultural, and social force. For the midterm and final projects, the class will form a music industry in microcosm (musicians, journalists, producers, video and sound engineers, visual artists), resulting in audio and video releases and a magazine.

MUSC110 Introduction to South Indian Music

This course will introduce students to one of the world's great musical traditions, one that has been part of Wesleyan's renowned World Music Program for more than 40 years. Students will learn beginning performance techniques in melody (raga) and rhythm (tala), the cornerstones of South Indian music. Through a listening component, they will also learn to identify important ragas (melodic modes). Lectures will cover a wide range of topics, including karnatak (classical) music, temple and folk traditions, music in South Indian film, and pop music. Readings and lectures will also provide the historical and cultural context for this

rich and diverse musical world and will prepare students for the fullest possible enjoyment of the annual Navaratri Festival in October.

MUSC111 Music and Theater of Indonesia

Since the early history of Indonesia, the Indonesian people have continually been in contact with a number of foreign cultures. Particularly, Hinduism, Islam, and the West have had significant impact on the development of Indonesian culture. This course is designed as an introduction to the rich performing arts and culture of Indonesia. A principal theme will be the differing intercultural and interreligious experiences in the two neighboring and related cultures of Java and Bali. In light of the increasingly contentious global geopolitical environment in our post-9/11 world, the course pays special attention to the impact of the recent deeper Islamization on Indonesian performing arts. A portion of the course is devoted to demonstrations and workshops, including instruction of performance of Terbanggan (an Islamic frame drum ensemble) and Gamelan (percussion ensemble of Java and Bali).

Prereq: **None**

MUSC116 Visual Sounds: Graphic Notation in Theory and Practice

There are many different kinds of graphic scores, some providing very minimal performance instruction and, therefore, requiring considerable interpretative strategies, others replete with detailed instructions, differing from conventional scores more in layout than in concept. Are these scores art or music, or some kind of fusion? How does indeterminacy relate to performance in comparisons with traditional notation?

This course will be a forum to study and analyse graphic scores by Mark Applebaum, Anthony Braxton, Earle Brown, Herbert Brün, John Cage, Cornelius Cardew, Anestis Logothetis, Roman Haubenstock-Ramati, Alvin Lucier, Robert Moran, Boguslaw Schäffer, and new generations of emerging composers. One of the reason composers started to experiment with graphic scores in the 1950s and '60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students; no prior knowledge or instrumental expertise is required.

MUSC117F Musicking Body (FYS)

"What is this thing called music?" asks Christopher Small in his book "Musicking" (1998) and observes, "Music is not a thing at all but an activity, something that people do." Taking a cue from Small's concept of 'musicking' as an inherently social and physical process, this course will explore the role of the human body in the act of music performance and the creation of musical meaning. We will discuss interdisciplinary approaches to the study of music as embodied experience, drawing insight from fields as diverse as philosophy, feminist and performance studies, anthropology, ethnochoreology, and ethnomusicology. We will examine the modes, aesthetics, and cultural connotations of bodily expression, movement, and gesture in a variety of music and dance traditions worldwide--from Sufi-shamanic rituals in Central Asia to Indian classical vocal music, and from drumming and martial arts in East Asia to African American popular genres. By engaging with a range of theoretical perspectives and case studies of embodied sounds, we will reflect on the corporeal, sensory aspects of music performance and perception, the tacit nature of learning and transmission, the intersections of human musicking with the environment and technology, and the ways in which the musicking body is entangled with the physical, social, spiritual, and political forces that shape our lives.

MUSC118F Bob Dylan and His World: Sources and Legacies (FYS)

Bob Dylan's songwriting, recordings, and performances in the 1960s are widely recognized as causing a seismic shift in American music and in the youth counterculture. He did not exist in a vacuum, though, and drew deep from the wells represented by songwriter Woody Guthrie, mountain ballad singer Jean Ritchie, and blues musician Robert Johnson, among many others. His meeting with the Beatles and subsequent world tour with the Band caused unforeseen reverberations, such as the Beatles moving into increasingly sophisticated lyrical territory and Aretha Franklin covering a song by the Band. Many artists covered Dylan songs early on (Stevie Wonder, Sam Cooke, the Byrds, and Sonny and Cher), and many credited Dylan with opening up new avenues of creative expression, including Joni Mitchell, who has been recognized as one of the most inspiring and accomplished singer-songwriters of any era. In this course we will explore (1) the sources of Dylan's art; (2) Dylan's albums, performances, and films throughout his career, with a primary focus on the 1960s; and (3) artists who have been touched by Dylan's legacy, including those outside of North America. We bypass hero worship in favor of understanding cultural and social currents that enable individuals like Dylan to blossom. In addition to collecting, interpreting, analyzing, and presenting evidence as part of written scholarly arguments, which will be stressed throughout the semester, either the midterm or final project may take the form of a creative work other than a paper.

MUSC122 Sample, Remix, Reuse, and Replay: Approaches to Musical Adaptation in Audiovisual Culture

Many of the musics we listen to and encounter are palimpsests, collages, and assemblages. Texts are layered upon and juxtaposed against pre-existing texts, creating polyvocal dialogues and contrasting and complementary systems of meaning. This class introduces students to questions and controversies of adapted and remixed musical media in 20th and 21st century society, analyzing the ways music and other texts and materials (e.g., paintings, plays, places,

novels, technologies, genres, historical events, preexisting music) are adapted through processes of revision, remix, remediation, sampling, restaging, and reinterpretation to create new layers of meaning. The course will consider the roles of film, television, video games, music video, digital audiovisual formats and technologies, and related audiovisual media. We will journey from the recycling of preexisting classical music in video games to the remediation and transmission of live operas to the movie theater screen in the MET Live in HD series, from compositions that translate the visuality of iconic paintings into sound to the practice of remix and sampling in hip hop culture, from the digital adaptation of operatic conventions in Final Fantasy VI to cover versions that complicate listeners' expectations of gender performance, from the live performance of video game soundtracks by a symphony orchestra in Video Games Live and Pokémon: Symphonic Evolutions to the compilation mixtape scores of Hollywood films, and from Tan Dun's Internet Symphony for the YouTube Orchestra to how the urban neighborhood of Washington Heights in New York City is repurposed, staged, and cast as a central character in In the Heights or how American political history is adapted and revitalized in Hamilton. Themes in the course include, among others, the changing roles and responsibilities of musicians in an age of digital globalization; the power of musical media and referential texts to structure human experience; and the role of the composer and listener as manipulators and interpreters of musical meaning across comparative audiovisual texts. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can achieve success in this course without previous musical knowledge.

MUSC124F Mapping Culture (FYS)

What is a culture, how can it be intimately wrapped up in a location, and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom—"location, location, location" and "All politics is local"—tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location. From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip-hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti) and social formations. Haight Ashbury (San Francisco) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models as students embark on their own to map out a culture of their choice as their midterm and final projects, using Google maps, Story Maps, or some other interactive multimedia format. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC125 Music and Downtown New York, 1950-1970

This course will explore the history, interconnections, and simultaneous flourishing of four distinct music communities that inhabited and shaped

downtown New York during two particularly rich decades in American culture: Euro-American experimentalists; African American jazz-based avant-garde; blues and folk revivalists; and Lower East Side rock groups. Much of the course will be devoted to understanding their points of convergence and divergence, especially in conversation with broader currents of the time (e.g., the Civil Rights Movement and related notions of freedom, shifting youth subcultures, and avant-garde aesthetics). We will read about and listen to recordings of a wide variety of musicians, identify aesthetic and cultural trends, and study the local industry that supported them. Student research, interpretation, and writing will be emphasized throughout the semester.

MUSC126F Poetry and Song (FYS)

Students will read poems by major poets in English (including Yeats, Shelley, Shakespeare, many living poets) and study settings of these poets by composers (Ives, Barber, Britten, etc.). We will also study the lyrics of many recent popular songs that can be read as poetry, including lyrics of Steely Dan, Patti Smith, and of course The Beatles. The final topic of the class will be, pro and con--did Bob Dylan deserve the Nobel Prize for Literature?

MUSC127 Popular Music in Reform China

Understand the emotional aspect of reform China and the inner feelings of contemporary Chinese people through the country's popular music! How did "red songs" from the cultural revolution become popular songs in the 21st century? How did an "extremely soft and feminine" voice threaten the Chinese Communist Party? Why do songs from the "jazz capital of the Orient" trigger nostalgia? How do underground rock and punk bands negotiate their existence? How is rap in China different from that of the U.S. or anywhere else? How do Chinese artists deal with (trans)gender issues and ethnic minority issues in popular music? What future is there for China's burgeoning "network songs"? Popular music in reform China presents unique issues of state-sponsored popular culture intersecting with bottom-up popular taste and desire; the repressive collective "we" intersecting with the resilient individual "I" in artistic expressions; and the imagined "ancient China" intersecting with contemporary sound and technology. This course offers students opportunities to explore aesthetic, political, and cultural meanings expressed in China's popular music from the 1980s to the present.

MUSC128F Music and the Moving Image: From Music Video to Film to Digital Media (FYS)

On August 1, 1981--the day that a cable TV channel playing music videos 24/7 made its debut--the inaugural video aired on MTV by the band The Buggles announced to viewers, "Video Killed the Radio Star." Since the launch of MTV, music videos have shaped popular culture, and their production, narrative, multimodal, and editing aesthetics have influenced other musical screen media, including film, commercials, television title sequences and end credits, film trailers, live concert films, video games, YouTube fan remixes and more. The development of digital new media technologies made the production technologies once only accessible to commercial record labels and production

companies available to fans and consumers on their computers, cameras, and mobile media devices. This course explores the relationships between music and moving images (e.g. television, film, computer, video games, mobile media, digital media), and how the music video format has influenced modes of music making, performance, reception, and circulation. Music videos have shaped the aesthetic style of a wide range of screen media genres, serving as a form of branding popular music and artists, introducing experimental and avant-garde techniques to a mass audience, and facilitating participatory fan musicking. This course thinks deeply about several key issues concerning music and moving images (e.g. virtuality, identity politics, cross-cultural exchange, participatory musicking, fandom, virtuosity, adaptation, branding, liveness, nostalgia), examining how screen media with their visual and auditory content can be listened to and read as cultural texts.

Case studies in this seminar range from the history, genre expectations, and experimentalism of music videos to ethnographic filmmaking, from the visual album (Beyoncé's *LEMONADE*) to fan produced video game music machinima, from the sound design of documentary film to the movie musical, from Hollywood compilation soundtracks to the pace, camera angles, and dance sequences of post-MTV Bollywood film, from 8-bit video game sound to the music pedagogy of children's television programs (Sesame Street's "Geometry of Circles" scored by Philip Glass), and from the use of pre-existing music in television commercials (United Airlines' use of George Gershwin's *RHAPSODY IN BLUE*, Michael Jackson's "Billie Jean/New Generation" for Pepsi), video games (*ETERNAL SONATA*, *TETRIS*), and mobile media apps (the Clapping Music app, the John Cage Prepared Piano app) to expressions of Indigenous musical modernity (Tanya Tagaq's multimedia collaboration *NANOOK*, the Anishinaabe singing mobile game app *HONOUR WATER*, the soundscapes of the Iñupiat Alaskan Native video game *NEVER ALONE*).

MUSC129 The Art of Listening

Over the 20th century, the advent of electronic sound recording and transmission triggered rapid changes in all forms of auditory culture. We will examine this evolution through the different approaches to listening that emerge with the concepts of soundscape, sound object, sound art, and sound design. We will give particular attention to the artists and composers who explicitly shaped these concepts through their work. This includes figures such as writer William S. Burroughs, composer John Cage, singer Bing Crosby, pianist Glenn Gould, theatre director Elizabeth LeCompte, filmmaker Walter Murch, artist Max Neuhaus, composer Pauline Oliveros, guitarist Les Paul, composer R. Murray Schafer, and theorist Pierre Schaeffer. In addition to readings, listenings, and viewings, class members will perform works by composers such as Maryanne Amacher, John Cage, Alvin Lucier, and David Tudor and create sound works of their own. The class should be of interest to anyone who anticipates working with sound in their creative endeavors, whether as a musician, artist, dancer, or filmmaker.

MUSC201 Tonal Harmony

This course begins a more focused investigation of the materials and expressive possibilities of Western music from the common practice era (ca. 1700--1900). There are also forays into jazz theory, theories of world musics, and freer styles of composition. Topics include modes, the use of seventh chords, nonharmonic tones, tonicizations, modulation, and musical form. Work on sight singing and

dictation continues. Students also learn to play scales and harmonic progressions and to harmonize melodies at the keyboard.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC103**

MUSC202 Theory and Analysis

This course focuses primarily on two aspects of Western tonal music: harmony and form. Harmony is the study of chords: their individual qualities and configurations, their relative importance and function within a given musical context, and ways of moving between them. We will review the treatment of diatonic harmonies and then expand our palettes through sonorities that borrow from or lead to new key areas. Forms, treated in the latter part of the course, are common patterns of repetition and contrast used to structure diverse musical works from pop tunes to symphonies. Working from detail to whole, we will learn how composers and songwriters construct motives, melodies, songs, and large-scale pieces. In addition to these topics on pitch relations and structure, this course contains a short unit on rhythm and meter. While we'll focus predominantly on European art music repertoire, we will also examine how harmony, rhythm, and form function in other musical traditions. Assignments and activities will include reading texts by composers and scholars, analyzing scores and recordings, composing, listening, singing, and keyboard playing.

Offering: **Host**

MUSC203 Chromatic Harmony

This course is an investigation of the tonal system as it functions in extreme situations: selected highly chromatic passages in Mozart, Beethoven, and Schubert; the more adventurous compositions of Chopin and Liszt; Wagnerian opera-drama; and late-19th-century works in which the tonal system approaches collapse (Hugo Wolf, early Schoenberg). Recently developed models from the music-theoretical literature will be introduced. Chromatic harmony will be considered from both technical and expressive points of view.

MUSC208 Post-Tonal Music Theory

At the dawn of the 20th century, European composers began to experiment with a radically new and completely decentered tonal language. Leaving the practice of tonality behind them, these composers used unorthodox numerical relationships to create formal links and motivic connections between the sounds of their compositions. Post-tonal theory represents the body of scholarship that attempts systematically to examine the formal procedures and properties associated with this modernist music; it also represents one attempt to understand the relationships between musical pitches that hold outside the framework of tonality. This course will serve as a general introduction to post-tonal music theory and will also serve as an introduction to the music of the Second Viennese School: Arnold Schoenberg, Alban Berg, and Anton Webern. Beyond the music of these composers, we will also contemplate applications of post-tonal theory to more recent music.

MUSC212 South Indian Music: Solkattu

Solkattu is a system of spoken syllables and hand gestures used to teach and communicate rhythmic ideas in all of South India's performing arts. It has been part of Wesleyan's program in karnatak music for more than 40 years. Students

of many different musical traditions have found solkattu valuable for building and sharpening rhythmic skills and for understanding the intricacies of karnatak tala (meter). Building on the fundamental skills acquired in MUSC110, students will learn increasingly advanced and challenging material in a variety of talas. An extended composition, developed for the group, will be performed in an end-of-semester recital.

MUSC220 Composing, Performing, and Listening to Experimental Music

This is a first course in experimental music composition with a focus on live electronic and electroacoustic music. Using tools such as Logic Pro, Spear, and SuperCollider 3, the course introduces those aspects of acoustics, psychoacoustics, and audio engineering relevant to composing music and creating interactive electronic instruments and sound environments. The course also addresses landmark pieces in electronic and experimental music by composers such as Robert Ashley, David Behrman, Luciano Berio, John Cage, Alvin Lucier, Max Neuhaus, Pauline Oliveros, John Oswald, Henri Pousseur, Carl Stone, and Iannis Xenakis, together with new work currently under development. Course work consists of weekly creative assignments taking the form of both short, original compositions and realizations of works by others and two larger compositional projects. Class sessions are extended to allow time for audition and discussion of those assignments.

MUSC222 Sound Art, Music, and Interactive Media

The focus of this course is on creative projects in digital media conceived in relation to historical considerations of these same techniques. Recording, amplification, and radio transmission have exerted a profound effect on musical practices of all forms since the beginning of the 20th century. In the period immediately after World War II, composers and artists began to focus on changing the relation of composers, performers, and listeners to sound in response to those techniques. We will consider those artistic strategies and the role they have played in shaping musical genres such as musique concrete, serial and spectral composition, interactive computer music systems, circuit bending, and entirely new genres such as sound, video, and performance art. Student projects will be focused on the creation of music, installations, and performances that respond to those ideas and issues. Our primary tool for those projects will be MAX/MSP/Jitter, a software environment designed to enable the composition of real-time interactive sound, video, and network connections.

The fundamental goal of this course is to develop the combination of technical skills and historical awareness needed to creatively engage the ever-expanding accumulation of data and social media that is currently enabling a new period of change in artistic practice.

MUSC230 Music Theater Workshop

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts.

MUSC241 Allegory and Devotion in Medieval and Renaissance Music

This course investigates the mystical and visionary aspects of religious music alongside the secular development of the vernacular love lyric. We explore tensions between individual and communal practices, authorship and artistry, power and politics, and the multiple social functions of music-making. Students learn about the musical legacy from Ancient Greece, tracing its influence through the Middle Ages to the end of the Renaissance. We cover the music of worship, romance, public ceremony, and private entertainment, observing the shifting balance between innovation and tradition. We study the relationship of notational systems to memory, become familiar with cultures that are remote from ours, and gain a historical respect for difference. By engaging with the deep past, you acquire skills not only to appreciate the musical creativity of a millennium ago, but also to better understand social and cultural distances in the modern world.

The course material will be presented through lectures and discussion, listening assignments, singing, and readings. Weekly lab sessions go over technical terminology and address the challenges that arise. The lab also facilitates reviews for quizzes and provides coaching in essay writing, research skills, and the development of analytical listening.

MUSC242 Baroque and Classical Music

At the end of the 18th century, an aesthetic revolution with music at its center gave birth to what we now call modernity. The music that led up to and helped to create that transformation--the music of 17th- and 18th-century Europe--is some of the most widely celebrated and revered in our contemporary moment. But this music's place of privilege in the canon of Western musical artworks has, however, given us a false sense of familiarity with it. When we begin to look closer at this music that otherwise might seem familiar, an entire world of affective shocks, social commentaries, elaborate dances, finely crafted images, inside jokes, and carefully planned dramas reveals itself to us. Understanding the logic with which this music operated can help us to better understand the transformations in aesthetic thought it helped to effect and, therefore, to better understand our world's current configuration of aesthetics, politics, and feeling. This course will provide students with the tools necessary to decipher 17th- and 18th-century music and aesthetics and will invite students to speculate on the relevance of these bodies of creativity and thought to the present day. Repertoire considered will include the music of Monteverdi, Lully, Handel, Bach, Haydn, Mozart, and Beethoven.

MUSC243 Music of the 19th Century

The nineteenth century is a time of great change--politically, socially and artistically. We will study many of the major composers, and major trends, through their relationship to Richard Wagner. Wagner's life intersects with almost every major figure in nineteenth century music, in one way or another, and his legacy defines much of the twentieth century, extending all the way to today. In addition to European composers, we will study selected composers in the United States as well. Europeans include Beethoven, Chopin, Berlioz, Schubert, Liszt, Louise Ferenc, Brahms, Arthur Sullivan, and Hugo Wolf. Americans include Frank Johnson (the first published African American composer), Louis Moreau Gottschalk, and "the Beethoven of America," Anthony Philip Heinrich.

Prereq: **None**

MUSC244 Music of the 20th Century

In the 20th century, European and American art music (classical music in common parlance) became increasingly fragmented. Composition splintered into diverse idioms and methods: the minimalism of Steve Reich, impressionism of Claude Debussy, and indeterminacy of John Cage, to name only a few. Often, the proponents of one school vehemently rejected the techniques of the others. Perhaps as a result of such schisms, the audience for classical music--particularly contemporary composition--diminished in size, to the point that critics were hailing the "postclassical era" by the 1990s. The concert hall ceased to be a showcase for contemporary compositions and became a kind of museum devoted to preserving (and occasionally reinventing) canonic works of the past. Commercial popular musics such as jazz and rock eclipsed classical music in audience appeal and relevance. While some composers attracted listeners through their interface with folk and popular musics or with film (e.g., Aaron Copland, Leonard Bernstein), others preferred to cultivate small but devoted audiences of initiates for their challenging works (e.g., Milton Babbitt, Arnold

Schoenberg). Meanwhile, the advent of mass-produced sound recordings enabled music from distant times and places to be preserved, transported, and heard on demand, with profound consequences for the creation, performance, and consumption of music. In this course, we will explore the many trends that have marked classical musicking in the 20th century. Through extensive listening assignments and primary source readings, we will meet many of the century's influential composers, performers, critics, record producers, pedagogues, patrons, and listeners. In discussions and writing, we will explore what the past century's legacy means for us as musicians and listeners today. While previous experience with music is useful, it is not a requirement for success in this course.

MUSC249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology

The internet has revolutionized how people consume music, along with the ways people read and write about it. This upper-level course will offer an introduction to music journalism and the relationship of public musicology to contemporary life. It looks at the history and function of music criticism, different kinds of writing about music, changing perceptions of music as a public art-form, and the role of cultural policy in the creation and maintenance of public musical institutions. In addition to reviewing recordings, live events, and books on music, students will have the opportunity to engage with professional music journalists, and produce a short radio feature in collaboration with WESU (88.1).

MUSC250 Film and Folk Music of India

What is film music culture in India? What is folk music in India today? How do these genres interact and influence one another? Most research on the music of India has focused on the classical systems. However, for many people, the most important musical expressions found in their personal and social lives are film and folk musics. Even though film music is considered to be entertainment, it reflects almost all aspects of Indian music and culture. Students will be introduced to the culture and heritage of India. Film and folk music will be analyzed with reference to ancient and modern musical treatises. Topics covered will include the diverse cultures within India and its global diaspora. Students will be encouraged to sing or play the pop and folk songs of India.

MUSC261 Music and Modernity in China, Japan, and Korea

This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the issues of global/local cultural contacts, and a better understanding of music's central role in political and social movements in 20th-century East Asia.

MUSC272 History of Jazz in American Culture

This course will provide students with a broad-based literacy in the history of jazz while examining its significance and impact within American culture. As a musical style, jazz has been a staging ground for working out some of the most defining issues and aspects of American culture, including the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, assimilation versus appropriation, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s through the '50s, until it was displaced and pushed to the margins by rock and soul in the 1960s. But it has remained an inspiration for diverse artists in rock and rap up to the

present day, including Kendrick Lamar's jazz-drenched "To Pimp A Butterfly" and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

We will explore the early 20th-century origins of jazz in New Orleans, its rise as America's popular dance music in the 1920s and '30s, a shift to a more concert art-oriented form in the 1940s and '50s (representing the epitome of cool and hipness), avant-garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip-hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, among many others, as well as new directions from recent generations (bringing in guest music department faculty). We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados and those interested in social and cultural dynamics as well as the musical materials.

MUSC274 Hymnody in the United States Before the Civil War

This course is a historical introduction to psalmody in the 17th century, lining out, Anglo-American 18th-century sacred music, the cultivated tradition in the early 19th century, and the various styles that contribute to the SACRED HARP and other shaped-note hymnals. Composers studied will include Thomas Ravenscroft, William Billings, Lowell Mason, and B. F. White. Collections examined will include The Bay Psalm Book, Tansur's ROYAL MELODY COMPLEAT, Lyon's URANIA, and Walker's SOUTHERN HARMONY.

MUSC275 Music and Downtown New York

This course will explore the history and simultaneous flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of dramatic cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of American history. Much of the course will be devoted to discovering their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and politics, and avant-garde aesthetics.

Drawing from primary sources, we will read about and listen to recordings of a wide variety of musicians, view a broad cross-section of film from the era, identify aesthetic and cultural trends, and study the local industry that supported them, including record labels, coffee houses, clubs, and concert spaces. Projects throughout the semester include written papers, individual and group presentations, and adding content to an interactive collaborative Google map of the neighborhood.

MUSC277 Jazz Avant-Gardes

This course will explore the emergence of an avant-garde in jazz in the 1950s and 60s, including earlier efforts and later developments in the preceding and succeeding decades. We will take a holistic approach, examining the music and its surrounding community within the broader social and cultural currents of 1950s and '60s America, especially that of European-inherited avant-garde aesthetics, the increasingly urgent Civil Rights Movement and changing notions of freedom, and artist collectives in the U.S. and Europe. Key artists will include Monk, Coleman, Taylor, Sun Ra, Coltrane, Art Ensemble of Chicago, Bailey, and Braxton, among others. We will immerse ourselves in a combination of reading, listening to recordings, discussion, and in-class performances. Throughout the semester, we will pursue the parallel goals of using this era in jazz to expand our understanding of avant-garde movements in general and using historical avant-garde movements to expand our understanding of how the phenomenon has played out in jazz. The first two weeks will function as a Jazz 101 boot camp, and so no prior experience in jazz is required.

MUSC278 Survey of Jazz Styles

This course is a study of how jazz works, developing the awareness and tools that allow us to understand and evaluate what we are hearing when we listen to live or recorded jazz--how and why the musicians do what they do and the larger context into which a performance fits. We explore historical developments and chronology, the structures that govern jazz improvisation and other performance practices and the instrument roles and sub-styles that typically make up the music. Though there will be ample relevant information for musicians, a background in music theory or performance is not at all necessary for this course.

MUSC286 Playing with Sound: Ludic Performance, Games, and Music as Play

Ludomusicology--the study of music as play--challenges those interested in audiovisual media, aesthetics, performance, improvisation, compositional technique, notation, theory, or historiography to take play seriously. In his 1957 lecture, "Experimental Music," John Cage described music as "a purposeless play" which is "an affirmation of life--not an attempt to bring order out of chaos nor to suggest improvements in creation, but simply a way of waking up to the very life we're living" (1973: 12). Drawing on theories of media, systems, and cultural techniques, this seminar asks: What makes play musical, and music playful? How do the meanings and stakes of performances, choreographies, bodies, and screens play out via sounds and other sensations? How does the music in video games contribute to gameworld development, gameplay, and virtual performance? How is music used and represented in recreational and competitive sport and athletic competition (e.g., SuperBowl halftime shows, walkup music, and the stadium soundscape)? How can we value humor, puzzles, and fun in music and examine how these elements function? How is the composition and performance of music profoundly playful?

The course will consider the diverse relationships among music, play, and performance--from musical automata, player pianos, and orchestrions to practices of sampling and remix in hip hop, from the games African American girls play--handclapping songs, cheers, and double-dutch jump rope--that reflect and inspire the principles of black popular music-making to musical greeting cards, toys and collectables, from the use of recycled pre-existing

classical music (Tetris, Bioshock, Eternal Sonata), genres (the famous opera scene in Final Fantasy VI), in-game composition (Mario Paint) and aleatoric operations (Fez and Proteus) in video games to John Cage's WATERWALK on the popular US television game show I'VE GOT A SECRET and his use of chance operations, from Pamela Z's playful manipulation of sound via physical gesture and technological media to virtual performance in Guitar Hero, Rock Band, Just Dance, and Dance Central, or curating the radio soundscape in Grand Theft Auto, from the material and somatic manipulation of tape in early electroacoustic music to forms of musical acting, adaptation, and disguise in cover versions and tribute bands, from children's music games, television programming (Sesame Street, Mister Rogers' Neighborhood), and the Girl Scouts songbooks to classical music as an educational feature of games and Web 2.0 mobile media apps and new media platforms, and from 18th-century musical dice games to the domestic vocal games of Inuit throat singing. By discussing music as play across diverse case studies from musicology, ethnomusicology, popular music, and science and technology studies, we will trace the lineage of musical play through improvisation, composition, performance, embodied listening, and recreation.

MUSC287 Performing the Posthuman: Music and Auditory Culture in the Age of Animantia

"Animantia" takes seriously the aural and performance worlds of the nonhuman. "Posthuman," according to the Oxford English Dictionary (OED), refers to the idea that "humanity can be transformed, transcended, or eliminated either by technological advances or the evolutionary process; artistic, scientific, or philosophical practice which reflects this belief." This seminar engages questions of musical difference by addressing posthuman performance, the musicality of animals, music that imitates nonhuman sound worlds, and cross-species and multi-species performance. Throughout the course, we will think across varied types of sounds to explore and contextualize familiar questions about how we sing, play, perform, stage, and sound musical identity, examining the intersections among the humanities, science and technology studies, and the sonic arts. Our explorations will cross through the fields of musicology, ethnomusicology, and sound studies. By listening across different kinds of sound cultures, we will interrogate how traditions of listening shape our habits of perceiving others, how we hear nonhuman animals, how we incorporate nonhuman sounding into music composed by humans, how technology has played a role in the study and development of nonhuman and human musicality, and what it means to listen to and value sonic difference more broadly. Through discussions of musical and cultural difference that enrich ongoing discussions of race, gender, and sexuality, we will come to a stronger understanding of music's role in imagined and experienced natural worlds. Topics and case studies will include audio bird guides, new age nature recordings, multi-species "collaborative" performances, sampled and electronically rendered animal and nature performance in digital video games, wildlife field recordings and documentary sound design, forms of animal and environmental mimesis used by composers, the way nonhuman animal behavior influenced experimental music communities, and descriptions of the musicking of nonhuman animals by the National Audubon Society and other wildlife guides and field recording initiatives. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can succeed in this course without previous musical knowledge.

MUSC288 Music, Sound, and the Environment in the Anthropocene

In this course we will explore how environmental works have proliferated throughout the academy and how scholars across the humanities are re-evaluating the reciprocal relationships among society, culture, and the environment. Over the course of the semester we will explore the diverse and interconnected ways in which contemporary composers, popular musicians, sound artists, world music practices, and collaborative arts practitioners draw on natural and urban environments in order to comment on current environmental and energy issues, trauma, the relationships among the arts, humanities and science and technology studies, representations of the environment and the environmental past, and participate in social activism. Employing socially and environmentally engaged musicological analysis, this course will focus on five distinct areas: We will analyze how environmental sites and situations are represented in music; examine why environmentalist ideologies are integrated into the musical narratives and/or sonic choices made by the artist; address how artists conceptualize the environment and express their relationship to it; grapple with what motivates these artists to incorporate environmental commentary into their compositions, illustrating how sociocultural and environmental factors influence creative expression; and question how personal and societal values concerning relationships between society and the environment are disseminated and constructed through music. We will also explore the various ways in which nature, urbanity, and environment are constructed in the production, performance, consumption, and reception of music. Through our reading discussions, writing, and applied projects, some of the questions we will address include: How do the intersections of landscapes and cityscapes produce multifarious artistic responses? How are communities whose economy depend on, or historically depended on, energy and/or natural resource industries signified or evoked through music? How are past and present histories of place expressed, recorded, and remembered through detailed and affective sensory experience? How do we determine the health of our soundscapes? How is music and sound mobilized in social activism? How are notions of identity, as shaped by a physical environment and the ideologies connected to place, constructed and communicated? As we engage with the critical geography of sound, we will address the global networks, musical mobilities, circulation of sounds, traditions and musicians, and the ways in which landscape, mapping, urban planning, and landscapes are expressed in music.

MUSC290 Research Skills in Ethnomusicology--IRL & Digital

This course provides an introduction to research methods in ethnomusicology, a discipline that studies all types of music (and sound), both in real life and digital, from diverse humanistic and social scientific perspectives. The course is organized around weekly hands-on exploratory and empirical mini projects moving from virtual field to real-world fieldwork to interviewing musicians to digital sound-mapping and music video editing, from learning about Wesleyan's wide-ranging music ensembles to writing album reviews to "composing" an ethnography, which will offer orientation to a discipline that has been central to Wesleyan's approach to music and sound for over 50 years.

MUSC291 The Gendering of Music in Cross-Cultural Perspective

This course presents a critical examination of issues explored and debated in recent studies of gender, power, identity, and music from diversified music

traditions, including Western art music, popular music, and world music. Drawing upon interdisciplinary discourse on theories of feminism and gender, as well as the new gay and lesbian musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

MUSC293 Mapping Culture

What is a culture? How can it be intimately wrapped up in a location and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom--"location, location, location" and "all politics is local"--tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location (Nile Project, Playing for Change). From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti and other street art) and social formations. Haight-Ashbury (SF) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models before students embark on their own to map out a culture of their choice as their final project, using either Google Maps or Story Maps. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC294 Queer Opera

Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

MUSC295 Global Hip-Hop

Over the past two decades, hip-hop, in its various facets of rap, deejaying, dance, visual art, fashion, and attitude toward authority, has gradually taken over as a primary medium of expression for youth around the world. Used as mass entertainment, elite aesthetic statement, social and political commentary, tool for education and social change, vehicle for economic opportunity, and as the core of a cultural movement, hip-hop has proven malleable enough to thrive embedded in scores of different languages and cultures around the world and effectively speak to local needs. Yet its local manifestations have also managed to retain their membership in a global hip-hop culture.

In this seminar we will study the global spread of hip-hop from an interdisciplinary approach, examining its varieties of expression from aesthetic, cultural, social, musical, linguistic, kinetic, economic, and technological perspectives. We will first come to an understanding of the rise and dispersion of hip-hop culture in the United States. Then, beginning with France, where it first took hold, we will move around the world examining local case studies and their more global implications.

MUSC296 Soundscapes of Islam

From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

MUSC405 Private Music Lessons for Nonmusic Majors

Private instrumental and vocal lessons meet for one hour weekly at regularly scheduled times. Students contract to take 12 lessons.

Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the Private Lessons Program must contact the instructor to determine whether an interview during the first week of classes is required. Interview information and schedules will be posted in the music studios lobby and on the Music Department web site <http://www.wesleyan.edu/music/lessons> one week prior to the start of the semester.

Students will be billed \$780 for 12 one-hour lessons through their Student Account. When students are accepted into the private lessons program, they become liable for the additional cost of lessons.

If a student intends to drop lessons, the student must notify the instructor at least 24 hours prior to the lesson taking place the week following the end of drop add. Failure to drop prior to this lesson will result in the student being billed the full course fee. When a student drops lessons during the Drop/Add period, the student will be billed only for the lessons already taken.

Financial support may be available for those who qualify. Please see the Music Department web site under Private Lessons for details about financial support for private lessons.

Permission of the instructor is required.

This course may be repeated, regardless of section or combination of sections, four times for credit towards graduation.

Private music lessons (alphabetical by instrument):

SECTION 35: Banjo--Stan Scott

SECTION 01: Bass--Roy Wiseman

SECTION 02: Bassoon--Garrett Bennett

SECTION 03: Cello--Julie Ribchinsky

MUSC406 Private Music Lessons for Declared Music Majors

This course is open only to declared junior and senior music majors. Private instrumental and vocal lessons meet for one hour weekly at regularly scheduled times. Students contract to take 12 lessons.

Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the private lessons program must contact the instructor to determine whether an interview during the first week of classes is required. Interview information and schedules will be posted in the music studios lobby and on the Music Department web site <http://www.wesleyan.edu/music/lessons> one week prior to the start of the semester.

The current private lesson fee is \$780 per semester. If a student intends to drop lessons, the student must notify the instructor 24 hours prior to the lesson taking place the week following the end of drop add. Failure to drop prior to this lesson will result in the student being billed the full course fee. When a student drops lessons during the Drop/Add period, the student will be billed only for the lessons already taken.

A waiver for a portion of the private lessons fee is available for junior and senior music majors. Details regarding the music major waiver can be found on the Music Department web site or in Music Studios room 109.

Music majors may count two semesters of MUSC406 towards their performance credits of the music major.

MUSC413 Korean Drumming and Creative Music

This course is an experiential, hands-on percussion ensemble with the predominant instrument in Korean music, the two-headed janggu drum. Students will learn to play a range of percussion instruments including janggu, barrel drum (buk), hand gong (kwenggari), and suspended gong (jing).

Through the janggu, drumming students gain first-hand experience with the role music plays in meditation and the benefits it offers to develop a calm, focused group experience. In the end they integrate their focused mind, physical body energy, and breathing through a stream of repetitive rhythmic cycles.

The students will be introduced to traditional folk and court styles of janggu drumming. The ensemble plays pieces derived from tradition and new ideas, and creates new works exploring imaginative sounds on their instruments. If there is an opportunity during the semester, the students will have a creative

collaboration with a dancer(s) or musician(s) from other cultures. The ensemble will experience a deep respect for the diverse cultural backgrounds of the students developed from the efforts of teamwork and creating music together through Korean drumming. The semester will end with a live performance for the public.

MUSC416 Beginning Taiko--Japanese Drumming Ensemble

This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and one or two pieces on the Japanese taiko drum. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements).

MUSC430 South Indian Voice--Beginning

Students will be taught songs, beginning with simple forms and increasing in complexity. There will also be exercises to develop the necessary skills for progress into the more complex forms.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC431 South Indian Voice--Intermediate

This course is a continued exploration of the song forms begun in MUSC430, with emphasis on the forms varnam and kriti, the cornerstones of the South Indian concert repertoire. Specific exercises will also be given to prepare students for the improvisational forms they will encounter in the advanced class to follow.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC430**

MUSC432 South Indian Voice--Advanced

Development of a repertoire of compositions appropriate for performance, along with an introduction to raga alapana, and svara kalpana, the principal types of improvisation.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **(MUSC430 AND MUSC431)**

MUSC433 South Indian Music--Percussion

Students may learn mridangam, the barrel-shaped drum; kanjira, the frame drum; or konakkol, spoken rhythm. All are used in the performance of classical South Indian music and dance. Beginning students will learn the fundamentals of technique and will study the formation of phrases with stroke combinations. Advanced classes will be a continuation of lessons in a variety of talas. Individual classes are supplemented by a weekly group section.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC212**

MUSC434 Improvisational Techniques in South Indian Music

This course will introduce advanced students of karnatak vocal music to raga alapana and svara kalpana, the most important forms of melodic improvisation. Students will begin by learning precomposed examples of these forms. As they become comfortable with idiom, they will progress to designing their own improvisations.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC436 Wesleyan Concert Choir

This choral ensemble welcomes members of both Wesleyan and Middletown communities and is devoted to performance of standard choral literature from all eras, both accompanied and a cappella. Solo and leadership opportunities will be available for advanced singers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC438 Wesleyan University Collegium Musicum

The Collegium Musicum is a performance ensemble dedicated to exploring and performing the diverse vocal and instrumental repertoires of the medieval, Renaissance, and baroque periods of European music history. Emphasis is given to the study of musical style, performance practice, singing one-on-a-part, and excellence in performance. Various cultural aspects of the societies that produced the music under study are simultaneously explored; participants will work with primary source materials, such as facsimiles of musical manuscripts, as well as literary and historical writings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Identical With: **MDST212**

Prereq: **None**

MUSC439 Wesleyan University Orchestra

The Wesleyan University Orchestra is a student-community ensemble that is open to everyone with a passion for orchestral literature and an intermediate-to-advanced skill level of performance on an orchestral instrument: Wesleyan music majors, nonmajors, faculty and staff, and community musicians. The orchestra performs music from all genres and time periods, ranging from the 18th-century "classics" to the contemporary academic and popular compositions.

The orchestra presents four hour-long concerts each year:

Middle of October: a "masterworks" program, featuring one of the department's private lessons teachers, or a guest artist, as a soloist

Early December: a program of popular, film, and holiday music

Early March: Children's Concert

Early May: a "masterworks" program, featuring the winner(s) of the annual Wesleyan Concerto Competition

The Orchestra occasionally collaborates with the Wesleyan Concert Choir.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC440 Instrumental Conducting

The theoretical portion of the course will highlight key events in historical development of orchestra and conducting. The practical portion will focus on aspects of basic baton technique, score study strategies, score analysis, rehearsal techniques, interpretation, style, and performance practice, all on examples from standard orchestral literature.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC103**

MUSC441 Pipe Organ in Theory and Practice, from Sanctuary to Stage: A Performance-Based Examination of Music

This course involves weekly group and individual meetings to prepare for public performances at least once per semester. Those employed at area institutions are encouraged to bring and discuss their music.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC442 Chamber Music Ensemble

This course may be repeated for credit. A variety of small chamber music ensembles will be coached by instrumental teachers.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC443 Wesleyan Wind Ensemble (WesWinds)

Rehearsals will combine intensive concert preparation with occasional readings of works not scheduled for performance. Open to all members of the Wesleyan/Connecticut community.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC445 West African Music and Culture--Beginners

This is a performance-based course that focuses on West African music.

The course is designed to provide a practical and theoretical introduction to traditional West African music and culture. Students experience the rhythms, songs, movements, and languages of Ghana and its neighboring countries through oral transmission, assigned readings, film viewing, and guided listening to commercial and/or field recordings. This interdisciplinary approach to learning is in keeping with the integrated nature of drumming, dancing, singing, and hand clapping in West Africa. Students learn to play a range of instruments, including drums, metal bells, and gourd rattles.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC446 West African Music and Culture--Intermediate

This course is designed to build on the skills developed in MUSC445. The beginner repertoire is reviewed, and more demanding call-and-response patterns are learned, along with new, more challenging repertoire. Students may be asked to perform on and off campus.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC445**

MUSC447 West African Music and Culture--Advanced

This course is designed to build on the skills developed in MUSC445 and MUSC446. Complex repertoire is learned and brought to a performing standard. Students experience the intricacies of dance accompaniment while drumming and singing with the advanced West African dance class. The student ensemble will be asked to perform on (and possibly off) campus.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC446 OR MUSC445**

MUSC448 Ebony Singers: Gospel Music

This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM241**

Prereq: **None**

MUSC450 Steelband

This is an ensemble course in the musical arts of the Trinidadian steelband. Students learn to perform on steelband instruments and study the social, historical, and cultural context of the ensemble. We also address issues of theory, acoustics, arranging, and composing. Readings, recordings, and video viewings supplement in-class instruction. The ensemble will present public performances.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM450**

Prereq: **None**

MUSC451 Javanese Gamelan--Beginners

Instruction in the performance of orchestral music of central Java. Various levels of difficulty are represented in the playing techniques of different instruments, mainly tuned gongs and metallophones. Previous formal music instruction is not necessary.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC452 Javanese Gamelan--Advanced

Advanced-level performance of central Javanese gamelan. Emphasis on the classical repertoire and the music of wayang (shadow puppet performance).

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC451**

MUSC454 World Guitar Ensemble

This performance course is designed for students who can already play the guitar and read music to some extent. The lectures will involve finger-style playing with the classical guitar as the main instrument; however, the repertoire will include music from South America and various world cultures as well as American popular styles. Singers and students playing other instruments such as flute or violin are welcome to take the class to form ensembles with the guitar. In a final concert, the students will perform works matching their technical level.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC455 Jazz Ensemble

This course builds small-group performance skills including improvisation, accompaniment, pacing, interaction, repertoire, and arrangements.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC456 Jazz Improvisation Performance

In this extension of MUSC210, Theory of Jazz Improvisation, all materials previously explored will be applied to instruments in a workshop setting. Intensive practice and listening are required.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM390**

Prereq: **None**

MUSC457 Jazz Orchestra I

This course is an intensive study of large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Fletcher Henderson, and others. A yearlong commitment to rehearsal of the compositions as well as listening and reading assignments will culminate in a second-semester public concert.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM396**

Prereq: **None**

MUSC458 Jazz Orchestra II

This course continues the work begun in MUSC457 with intensive study of large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Fletcher Henderson, and others. A yearlong commitment to rehearsal of the compositions as well as listening and reading assignments will culminate in a second-semester public concert.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM397**

Prereq: **None**

MUSC459 Wesleyan New Music Ensemble I

This ensemble class offers a unique opportunity for graduate and undergraduate performers and composers to explore and perform various acoustic and electroacoustic works composed by composers of avant-garde and experimental music in America after 1950. Additionally, composers who are enrolled in the course may be asked to create pieces that are specifically designed for any number of the ensemble participants. Through extensive large ensemble rehearsals and small group rehearsal labs that will culminate in a performance (or a series of performances), students will develop a deep understanding and appreciation of contemporary music performance techniques and collaborative processes. Students will gain skills that pertain to the reading of scores, the execution of complex rhythmic and melodic passages, music composed using graphic and/or textual notation, event scores, and extended instrumental performance techniques. Advanced Western musical literacy is required in order to succeed in this course. All instrumentalists (including those specializing in the human voice) are encouraged to participate.

MUSC461 Sound Systems: The How of Hearing

Since the late 19th century artists, corporations and composers have all proposed, developed, presented, and occasionally commercialized physical systems that reconfigure how sound can be experienced. The early impact of the entertainment industry ranged from the introduction of stereo to movie theaters in Walt Disney's *Fantasia* to the development of close miking for the crooning of Bing Crosby to McCune sound service's introduction of stage monitors for the benefit of Judy Garland. Artists and composers used related methods to propose entirely new understandings of how music can be. Futurist Luigi Russolo's *Intonarumori* of 1913 proposed an Art of Noise, while Pauline Oliveros' concept of deep listening developed listening as a foundational form of music making. R. Murray Schafer's concepts of soundscape and acoustic ecology project a music of environmental relations mediated through sound, while Maryanne Amacher's sound characters create individual sounds understood as capable development and change beyond the expanse of any one performance or composition.

This class will be a performing ensemble focused on "sound systems" as musical instruments and musical practices performing live and fixed media sound pieces through sound systems we will configure for different sites on campus. Together with developing the technical skills required to mount these pieces, we will also investigate and discuss the varied musical, social, acoustical, and psycho-acoustical understandings of music and sound that influenced their shaping.

MUSC463 Teaching Music Lessons to Children in Local Schools

This is a service-learning course. Wesleyan students will teach private and small group music lessons to local children in an appropriate venue. These sessions will be augmented by a weekly classroom session in which readings and the student teachers' journals will be discussed. Some of the Wesleyan Department of Music's private lesson instructors will visit to answer questions and guide the student teachers through the issues, musical and extra-musical, that the lessons will raise.

Written assignments will include responses to weekly readings, regular journal entries, and an end-of-semester paper. There will also be a recital by the school children at the end of the semester.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC464 Laptop Ensemble

This course promotes knowledge and skills in live electronics performance, cultivates new musical repertoire for the group, and increases public awareness of new forms of working music technology while developing overall technological and troubleshooting proficiency. The course accomplishes this through regular rehearsals as well as a combination of required group and "satellite" performances. A range of repertoire is curated over the course of the semester involving new pieces created for the ensemble, as well as the reinterpretation of historical works using live electronics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC465 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Grading: **OPT**

MUSC466 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Offering: **Host**

Grading: **OPT**

MUSC505 Topics in Applied Ethnomusicology/Public Musicology

Work in applied ethnomusicology and public musicology includes a wide range of activities and formats, including: blog posts, magazine articles, public community music performances, tweets, podcasts, pre-concert and public lectures, forensic testimony, and the development of digital open-access tools and resources.

What unifies these and many other possible forms is a desire by scholars to convey the cultural relevance and influence of music by engaging audiences outside the academy. Many are concerned with the social responsibility of the university, and developing methods and projects to collaborate with and give back to the communities in which we live, work, and research. The seminar will also address what the tools, methods, and values of the interdisciplinary field of digital humanities can offer applied ethnomusicology and public musicology. We will apply a suite of open-source analytic, pedagogical, networking, research, and presentation tools developed by digital humanists to our own projects. Through readings and research-creation projects we will better understand the work of institutions for cultural preservation, the role of activist and political scholarship, how to write accessibly for all readers, and how to convey our ideas in a number of different formats (e.g. blogs, "think pieces" or online articles, pre-concert lectures, open-access digital archives and research webspaces).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC506 Reading Ethnomusicology

As one of the two core introductory courses to ethnomusicology, this course lays a general intellectual groundwork for MA students with a concentration in ethnomusicology through in-depth reading of some of the most important writings in ethnomusicology. Focusing on both intellectual history and current issues, the course evolves around the key concepts and themes that have defined, expanded, or challenged the field. Students will critically and comparatively discuss the approaches and contributions of each work they study. At another level, this course also aims at broadening students' knowledge of world musics through studying a wide range of music ethnographies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC507 Practicing Ethnomusicology

This course provides a broad introduction to the research methods of ethnomusicology. The theory and practice of musical ethnography are examined, including fieldwork techniques (interviewing, data collection, audiovisual documentation, participant observation), ethnographic writing, research ethics and representation, insider/outsider perspectives, bimusicality, and approaches to the transcription and analysis of musical sound. Students gain an understanding of the historical development of ethnomusicology and its relationship to allied disciplines such as musicology and anthropology, become familiar with the work of prominent scholars in the field, and acquire the practical skills of ethnography-based research.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC508 Graduate Seminar in Composition

This course is designed for first-year composition students in the Graduate Program. We will discuss and analyze works covering a broad range of compositional styles, focusing on recent European, Asian, and American composers. In addition, student works will be discussed and, when possible, performed.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC509 Graduate Seminar in Composition II

This course will closely examine specific topics in 20th-century music, including serialism, indeterminacy, minimalism, improvisation, and the exploration of acoustic phenomena. Special attention will be given to issues raised in the Boulez-Cage correspondence of the 1950s.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC510 Graduate Proseminar in World Music Studies

This introductory seminar is offered every fall as a required course for all first-year music MA students. The primary focus is developing research, writing, and critical interpretive and analytical skills necessary for initiating and completing the MA thesis projects. Students will be exposed to the breadth of the music department's specialties, and we will identify and discuss current issues that cut across concentrations within the department.

Offering: **Host**

Grading: **OPT**

MUSC513 Improvisation in Cross-Cultural Perspective

This course will explore musical improvisation around the world from a variety of theoretical and practical perspectives. Readings on theories of improvisational processes, as well as on specific musical traditions in the United States, India, Indonesia, Africa, and elsewhere, will complement practical transcription and analysis projects.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC515 Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture

Music circulates, moves, and is mapped through places, pathways, materials, bodies, and technologies. Together, we will encounter a series of conceptual frameworks and case studies that map the nodes, pathways, boundaries, and movements of sonic phenomena and musical life. How do the movements of music and musicians, the places they occupy, and the boundaries they negotiate communicate spatial information about music practices? How they circulate physically and virtually? What are the different methods that ethnomusicologists use to represent and map these circulating sounds? This seminar not only discusses the physical cartography and circulation of music cultures, but also, the virtual spaces music moves through. In the opening decades of the 21st century, new media practices and Web 2.0 modalities (e.g. Spotify, YouTube, Twitter, Facebook) have enabled new cartographies, patterns, and pathways of circulation, and engendered new approaches to participatory musicking. The seminar also raises questions of how technologies and modes of mobility interface with categories of identity, race, and gender.

In-class discussions foreground the role of movement and how musical movement is mapped and represented. The seminar addresses such topics as: musical movements by way of travel, habitation, refuge, trade, ghettoization, migration, or telecommunication; sonic geography; the ways sounds and music flow and vibrate through, in, and among places (e.g. urban streets and neighborhoods, spaces of protest, music scenes, performance venues); composition as travel writing; why some musics and musical actors are more mobile than others; how travel and migration shape music-making and musical senses of place; how the maps and cartographic representations of places are redrawn as music and musical actors move and aural culture makes claims to space; the place of border theory, cartography, migration studies, transnationalism, and human geography in ethnomusicology; the impact of travel, tourism, festivals, and tours on local music scenes; mobile media and technologies; how subversive and DIY cartographies of music cultures and their movements offer alternative representations to conventional social and political customs; and how the spatiality and materiality of musical mobility is experienced through aural, tactile, visual, and haptic sensations.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC520 Explorations in Musicology

What is Musicology? How and why do scholars write about music? This course will address the issues involved in making music a scholarly object of inquiry. It examines the methodologies through which scholarship has been constructed (e.g., archival research, reception history, historiography, practice-led research) and assesses their broader application. The course will be structured around a central point of reference—the musical work, music and the cosmos, notation, ontologies of sound, or performance studies. The chosen topic will serve as a prism through which musicological debate can be understood, and contrasted with ethnomusicological and other approaches.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC521 Seminar in Interdisciplinary Studies

The course, one of the four core PhD seminars in ethnomusicology, examines a number of disciplines as they relate to general current theoretical issues and the interests of ethnomusicology. Visitors from other departments will present their disciplinary perspectives.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC522 Seminar in Comparative Music Theory

This course asks questions about what music and theory might have to do with each other and provocatively collects these inquiries under the rubric of "music theory." Together we will explore methodological frameworks that have sometimes been associated with the investigation of music and musical experience broadly conceived, including (but not limited to) affect, phenomenology, cognition, mediation, form and formalism, and temporality. Through meta-methodological inquiry, we will probe each of these domains of thought to investigate what they may have to offer to the study of music across times and places, and, further, what they might reveal about musical thought in our contemporary moment.

NEUROSCIENCE & BEHAVIOR (NS&B)

NS&B149 Neuroethology: Sensory Basis of Animal Orientation and Navigation

This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.

Offering: **Host**

NS&B213 Behavioral Neurobiology

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Prereq: **None**

NS&B215 Research Methods: Behavioral Methods in Animal Research

This is a research methods course that provides an understanding of the different approaches to animal research, particularly those using rodent models. It provides students with an understanding of the different techniques employed by researchers and the questions they address. This course provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. Students will learn how to handle and inject rats and will also get a sense of how to design a behavioral experiment, including the use of control groups and counterbalancing. The course will follow a lecture/discussion/lab format where students will learn about different forms of conditioning (operant/classical) and how these apply to various behavioral tasks such as operant responding, autoshaping, decision-making, locomotion testing, etc. (see readings for more examples). One class each week will take place in the lab to provide students with hands-on experience with rats and the testing apparatuses. Students will be assigned a rat for the semester that they will use to collect and analyze data during lab classes. This will be combined with regular class discussion of research articles dealing with each topic, including some of the earlier reports and more recent applications. The focus of the course will be on trying to prepare students to design and carry out behavioral/animal research in a laboratory setting.

NS&B220 Cognitive Psychology

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

NS&B222 Sensation and Perception

This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena.

NS&B224 Hormones, Brain, and Behavior

Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.

NS&B239 Functional Anatomy of the Human Brain

A mass of tissue the consistency of firm jello and weighing about 2.5 pounds in the adult human, the brain is an organ that controls nearly every function of the body. It also enables the highest cognitive functions of humans such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will be of special interest to premed students; NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Host**
 Grading: **A-F**

NS&B243 Neurohistology

The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation

and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.

NS&B245 Cellular Neurophysiology

This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.

Identical With: **BIOL245, BIOL599**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B247 Laboratory in Neurophysiology

The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems. Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (*Aplysia*), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.

Offering: **Crosslisting**

NS&B252 Cell Biology of the Neuron

Neuronal cell biology is an important and fast-moving field. The brain cannot be understood without first elucidating the properties and functions of its component neurons. This course will focus on cell biological studies of the nervous system. We will explore the structure and function of neurons, synapses, and circuits. Using both text books and primary literature, we will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include polarity, synapse formation, synaptic transmission, intracellular transport, plasticity, and regeneration.

Offering: **Host**

Grading: **A-F**

Identical With: **BIOL252**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B254 Comparative Animal Behavior

This course explores the scientific study of animal behavior. All animals face similar challenges and we will examine the common, and sometimes unique, behavioral strategies used to meet these challenges. There are two sorts of questions one might ask about the behavior of a given individual or species. First, how is that behavior executed? Second, why is that behavior, rather than another, exhibited? What is the adaptive significance of the behavior? To fully understand the behavior of any organism, both sorts of questions must be addressed. This course will introduce students to the many ways these questions are grappled with for a wide range of organisms. As such, this course will provide an overview of mechanistic, ecological, and evolutionary explanations of behavior.

NS&B257 Neurogenetics

Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.

NS&B299 Waves, Brains, and Music

Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.

NS&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

NS&B316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological

mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

Gen Ed Area: **NSM-PSYC**

Identical With: **PSYC316**

Prereq: **None**

NS&B317 Neuroethics

Ethics, or morality, is one of the complex features of human behavior. This course will explore "Neuroethics" from two perspectives: (1) the neuroscience of ethics (i.e., the role of the human brain in ethical or moral behavior) and (2) the ethics of neuroscience (i.e. the ethical implications of manipulating the brain). The first perspective will relate to the premise that human morality is embodied in and operates based on the principles of the functional architecture of the brain, in particular, the cerebral cortex. The course will examine the organization and neural networks, especially of the association cortices (prefrontal Cortex: ventromedial, dorsolateral and orbitofrontal cortex; the cingulate cortex; temporal association cortex; and the inferior and superior parietal lobes). The course will review studies on the development of moral values in children and their neural underpinnings, leading to studies of the functions of the adult brain in moral or ethical decision-making. Topics such as the neural basis of resolving the "Trolley Problem," neuroeconomics, altruism, poverty, forgiveness, and compassion will provide the basis for this discussion. We will evaluate from a neuroscience perspective questions such as determinism and free will, and the sense of "self"—ideas that have played a significant role in ethical theories. Based on this body of knowledge, we will look at emerging ethical issues arising from technological developments that allow for manipulating the normal and diseased brain. A variety of questions will be examined, including brain imaging and privacy; enhancement of normal brain function through chemical, electrical, and electromagnetic stimulation; implanted neural interfaces; restoring brain damage; and neuroscience and the law.

Offering: **Host**

Prereq: **[NS&B225 or PSYC225] OR [NS&B213 or BIOL213 or PSYC240]**

NS&B323 Biochemistry of Neurodegenerative Disease

Broadly defined, neurodegenerative disease occurs when a specific class of neuron dies and thus fails in its biological action. In this course, we will delve into the many different, intricate ways neuron death can occur and cause disease. From the chemistry of neurotransmitters, aggregation of proteins, and the collapse of neuromuscular junctions, many areas of the neurobiology can go awry.

The focus of the course will be on understanding the complex interplay of small molecules and proteins that keep neurons healthy and functional. In this course, we will use current primary literature and lecture to understand the varied topics. This course aims to improve skills in reading and analysis of primary literature as well as the written and oral presentation of scientific findings.

NS&B341 Psychology of Human Memory

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional

and social factors on memory (e.g., social remembering), and memory in clinical populations.

Offering: **Crosslisting**

Grading: **A-F**

NS&B345 Developmental Neurobiology

Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

NS&B347 Mammalian Cortical Circuits

The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Almost all of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

Identical With: **PSYC348**

Prereq: **None**

NS&B351 Neurobiology of Learning and Memory

Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

NS&B353 Neurobiology of Neurological Disorders

This course aims to provide a foundation in the underlying mechanisms of neurological and psychiatric disorders. We will explore through lectures and readings of primary literature a number of important neurological and psychiatric diseases, including autism, schizophrenia, Alzheimer's disease, mental retardation, epilepsy, and Parkinson's disease. This course focuses on the fundamental molecular and cellular mechanisms that underlie neurological

disorders and is designed to engage students who wish to study basic aspects of brain function.

NS&B357 Sex and Gender: From Synapse to Society

From movies like "Think Like a Man" to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student assessment will include effortful and active participation, short written responses, one long response paper, in-class quizzes, and a final presentation.

NS&B360 Calderwood Seminar in Public Writing: Neuroplasticity and the Brain

This course will examine structural and functional neuroplasticity. Structural plasticity refers to the brain's ability to change its physical structure as a result of learning and experience. The ability to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and how adult neurogenesis is altered by the microbes within us, physical exercise, stress, and neuropsychiatric disorders. We'll also learn about the promise of stem cell therapies for enhancing brain repair and plasticity after brain injuries. Several guest lecturers who are

prominent neuroscientists working in the field of adult neurogenesis will be invited to speak to the class about their research in the field of neuroplasticity. This course will follow a model developed in Calderwood seminars taught at Wellesley College and is writing-intensive. After the basic material is introduced, class sessions will be workshop-based. Students will prepare for class by reading scientific papers and reviews on the topic and will submit short writing assignments on the topic. In class, we will discuss the topic and analyze the experimental approaches and findings. Students will have extensive opportunities for feedback and writing revisions through discussions with the professor, a course writing tutor, and in-class writing workshops.

NS&B390 Experimental Investigations into Reading

Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

Offering: **Crosslisting**

NS&B392 Behavioral Methods in Affective Neuroscience

This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

NS&B399 Advanced Research in Gambling, Drugs, and Junk Food

This intensive laboratory course provides in-depth training on the experimental methods of behavioral neuroscience of motivation and reward and provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. The capstone of the course is to give students the opportunity to carry out an independent group ANIMAL RESEARCH PROJECT in the lab, which may require a heavier time commitment for the duration of the experiment (including some research over the weekends). Students will LEARN HOW TO HANDLE RATS in a behavioral neuroscience research setting and how to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers; students will also develop their writing and presentation skills. In addition, we will review contemporary studies with a particular focus on gambling, diet-induced obesity, and drug addiction. Some of the models examined in more detail will focus on the role of reward uncertainty and decision-making in gambling, the individual differences in the attraction to reward cues in subjects prone to obesity vs. those who are resistant (with a particular emphasis on prenatal and developmental exposure to high-fat diets), and, finally, the individual differences in the resistance to adverse consequences in models of intense desire and addiction.

NS&B545 Developmental Neurobiology

Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

NS&B555 Laboratory in Cellular and Behavioral Neurobiology

The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.

PHILOSOPHY (PHIL)

PHIL111 Introduction to Critical Philosophy of Race

This first-year seminar (FYS) course will examine contemporary figures in the emerging field of critical philosophy of race. We will attempt to examine what contributions (if any) the critical philosophy of race has provided not only to philosophy as a discipline but also to more traditional and established modes of thinking race and racism. We will do so by exploring issues such as the differences between critical philosophy of race and critical race theory, as well as the historical role of race and racism in philosophical thinking, and by attending to the major debates currently held in this emerging tradition.

Offering: **Host**

PHIL154 What Is Rationality?

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures—or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

Grading: **A-F**

Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **HIST283, SISP283**Prereq: **None****PHIL160 Philosophy and the Movies: The Past on Film**

This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-FILM**Identical With: **FILM360, HIST129**Prereq: **None****PHIL201 Philosophical Classics I: Ancient Western Philosophy**

This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-PHIL**Identical With: **COL359, CCIV217**Prereq: **None****PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant**

Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' *MEDITATIONS*, Locke's *ESSAY CONCERNING HUMAN UNDERSTANDING*, Hume's *ENQUIRY CONCERNING HUMAN UNDERSTANDING*, and Kant's *CRITIQUE OF PURE REASON*.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-PHIL**Identical With: **COL360**Prereq: **None****PHIL205 Classical Chinese Philosophy**

Topics in this critical examination of issues debated by the early Confucian, Daoist, and Mohist philosophers will include the nature of normative authority and value, the importance of ritual, and the relation between personal and social goods.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-PHIL**Identical With: **CEAS261, RELI228**Prereq: **None****PHIL207 Live Like a Philosopher**

Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic.

After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

Offering: **Host**Grading: **Cr/U**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Prereq: **None****PHIL211 Critical Philosophy of Race**

This course will examine contemporary figures in the emerging field of critical philosophy of race. We will attempt to examine what contributions (if any) the critical philosophy of race has provided not only to philosophy as a discipline, but also to more traditional and established modes of thinking race and racism. We will do so by exploring issues such as the differences between critical philosophy of race and critical race theory, as well as the historical role of race and racism in philosophical thinking, and by attending to the major debates currently held in this emerging tradition.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Identical With: **AFAM211**Prereq: **None****PHIL212 Introduction to Ethics**

This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and

ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism

This course is an introduction to existentialism. "Existentialism" is both a philosophical tradition and a term that is central to the intellectual history of western thought. The term was explicitly adopted self-descriptively by Jean-Paul Sartre, and was widely disseminated both by his own literary and philosophical contributions and those of his intellectual interlocutors--notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and 1950s. In this course, we will begin by exploring the root and intellectual origins of this tradition through the work of philosophers and authors like Friedrich Nietzsche, Fyodor Dostoyevsky, and Soren Kierkegaard. We will spend a considerable time on some of this philosophical tradition's central tenets like "freedom," "the absurd," "existence precedes essence," "facticity," "authenticity," and "despair." Because existentialism also resonated widely with anti-colonial thinkers across the globe, we will end the course by reading important figures in this movement like Frantz Fanon, Richard Wright, and James Baldwin, in order to understand the ways in which existentialism gradually became an intellectual and political tool of contestation against racism and imperialism.

Prereq: **None**

PHIL214 Reasoning About Justice

This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

Prereq: **None**

PHIL217 Bioethics and Social Justice

"Health has replaced salvation," wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses--the creation and institutionalization of the discipline of bioethics--and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PHIL**

Identical With: **SISP217**

Prereq: **None**

PHIL218 Personal Identity and Choice

This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL219 Evil, Responsibility, and Forgiveness

The problem of evil has long occupied an important position in the history of philosophy. In light, however, of the horrific events of the 20th-century, philosophers and other writers of the past hundred years have begun to ask whether it is time to rethink our own understanding of evil. Is it possible to understand genocide, colonialism, and systematic racism through existing conceptions of evil, responsibility, and forgiveness, conceptions drawn largely

from religion and the law? What happens to our understanding of evil when, as Hannah Arendt famously suggested with her notion of the "banality of evil," mass murder is detached from wicked intentions and is made routine, mundane, even cliché? What happens to our understanding of responsibility when, on the one hand, a whole society, not just an individual, is implicated in a crime--and when, on the other hand, responsibility cannot be confined to geographical or national borders? What happens to our understanding of forgiveness when the very possibility or desirability of such an act becomes eminently questionable? In this course, we will draw from continental philosophy, critical philosophy of race, literature, and film. Readings may include selections from Emmanuel Levinas, Hannah Arendt, Frantz Fanon, Aimé Césaire, Primo Levi, Jacques Derrida, and Susan Neiman.

PHIL220 Human Nature

The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL221F Philosophy as a Way of Life (FYS)

For many philosophers, East and West, philosophy has been more than an effort to answer fundamental questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of life. How does philosophical reasoning interact with lived practice? How do metaphysical views lead to ethical commitments? Despite their differences, Confucians, Christians, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

PHIL222 Global Philosophy

Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves--sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions--in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL231 Reason and Paradox

This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno's Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

PHIL251 Classical Chinese Philosophy: Chinese Lab (CLAC)

This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

PHIL252 Nietzsche - Science, Psychology, Genealogy

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

PHIL253 Nietzsche als Versucher (CLAC)

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

PHIL254 The Rationalist Tradition in Early Modern European Philosophy

This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read

texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

PHIL255 Moral Psychology: Care of the Soul

Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives. Class will meet on Monday and Wednesday in lecture/discussion format. Each student must also be enrolled in one discussion section. Discussion sections will be focused on specific interests in or approaches to moral psychology such as clinical therapy, philosophical analysis, or spirituality in a particular religious tradition. The particular offerings of discussion section topics will vary from year to year. Each discussion section will have a distinctive set of additional readings and exercises.

PHIL256 Existentialism

This course is an introduction to 20th-century French existentialism. "Existentialism" is both a philosophical tradition and a term that is central to the intellectual history of Western thought. The term was explicitly adopted as a self-description by Jean-Paul Sartre and was widely disseminated both by his own literary and philosophical contributions and those of his associates--notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and '50s. It also resonated widely with anti-colonial thinkers across the globe. Thus, through the work of Frantz Fanon, Richard Wright, and Sartre's own intellectual engagement with colonialism and oppression, we will also explore the ways in which existentialism gradually became an intellectual and political tool for contestation against racism and European imperialism.

PHIL258 Post-Kantian European Philosophy

In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

PHIL264 Japanese Philosophy

This course traces the development of lines of thought from the Heian Period (794-1185) to the 21st century. Students will consider Japanese forms of Buddhism (including Zen) and Confucianism, as well as Japan's native tradition of Shinto. Students will also gain familiarity with the confluence of these traditions in the samurai (Bushido), and later incorporations of Western thought by the Kyoto School. The final section of the course, focused on Japanese aesthetics, invites students to engage in Japanese philosophy as a way of life.

PHIL265 Postanalytic Philosophy: Science and Metaphysics

The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic.

Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy's relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL266 Buddhism and Social Justice

In this course students will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a uniquely Buddhist basis for social justice. Historical texts to be covered include the Dhammapada, Therigatha, Jataka Tales, and Shantideva's A Guide to the Bodhisatva's Way of Life. We will discuss major philosophical questions such as, "how can we strive for change, while simultaneously accepting things as they are?" "How do we respect the importance of identities while denying the existence of a self?" "If the world will always be imperfect, why bother trying to improve social conditions?" We will then discuss contemporary applications of Buddhism for social change, and compare these with non-Buddhist approaches. Modern texts include "Soaring and Settling" by Rita Gross, "Freedom in Exile" by His Holiness the 14th Dalai Lama, "Burdened Virtues" by Lisa Tessman, and "Strength to Love" by Martin Luther King Jr.

PHIL267 History and Limits of Aesthetic Theory

This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

PHIL269 Modern Aesthetic Theory

As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenability of traditional aesthetic categories—author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

PHIL271 Moral Responsibility: Doubt, Debate, and Dialogue

This intermediate philosophy course will investigate conflicting ideas about moral responsibility and develop skills in understanding and critiquing the arguments associated with each view.

Key themes include: (1.) For what can we hold people responsible? For their intentions? For consequences? For their character? For other implications of their action? (2.) How much do concepts of moral responsibility reflect particular (and questionable) cultural ideals? (3.) Can we hold someone morally responsible even when there is a good causal explanation for their conduct?

(4.) What is our aim and purpose in holding ourselves and others responsible, and how else might such purposes be achieved?

PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)

This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**Gen Ed Area: **HA-PHIL**Identical With: **FGSS277**Prereq: **None****PHIL278 Political Philosophy**

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Children, particularly impoverished black youth and, increasingly, immigrants, are funneled into correctional supervision. In this course we will ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Prereq: **None****PHIL279 Necropolitics and Black Fugitive Life**

In his important essay interrogating the (im)possibility of black sociality, Fred Moten attempts to find an order of black social life that would unfold in the very confrontation between black (social) death and the law. However, as he argues, this form of black life would be "reducible neither to simple interdiction nor bare transgression." The form of black life that interests Moten is essentially one of "fugitivity." In a recent response to Moten's text, David Marriott worries that "by writing blackness as ceaseless fugitivity," Moten advances "a position in which blackness is only black when it exceeds its racial disavowal" and therefore blackness "can only be recognized as black in so far as it escapes the racism of its history." In this course, we will trace and follow the implications of Moten's intervention. More specifically, we will explore what forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity could yield given that "black life" remains arguably the most precarious form of living under various contemporary "necropolitical" apparatuses of racial exclusion, control, persecution and—in worse cases—genocide. Key figures will include Frantz Fanon, Hortense Spillers, Achille Mbembe, Jacques Derrida, Michel Foucault, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, and Elizabeth Povinelli.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Prereq: **None****PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion**

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence—along with refutations of those proofs and rebuttals to those refutations—the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecodical tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RELI**Identical With: **RELI292**Prereq: **None****PHIL283 Animal Law and Policy**

This course will provide an interdisciplinary and in-depth survey of the growing and dynamic field of animal law. We will address the historical status of animals in the law, how our society views animals, the capacities of animals, how ethics relates to animal treatment, how animals are currently utilized in society, the current application of animal protection laws (including their limitations and efforts to strengthen them), as well emerging efforts to re-classify some animals within our legal system. We will consider how legal systems, specific cases, legislation, and cultural values have affected and continue to affect the evolution of this field. Because this is a field where new developments occur regularly, we will incorporate developments and new legal issues as they arise.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Prereq: **None****PHIL284 African American Philosophy**

This course will examine the philosophical questions that have been of particular interest to African American philosophers. We will explore the domains of knowledge in which African American philosophers and thinkers have felt compelled to intervene. We will approach these questions by engaging with canonical historical figures such as DuBois, Douglass, and Cooper, and then we will assess the extent to which contemporary African American philosophers have remained (and continue to be) concerned with the same questions, albeit with different discursive methodologies. The purpose of this course is to trace the philosophical articulation of race, racism, identity, politics of freedom, and subject formation in the history of African American philosophical thought.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Identical With: **AFAM284**Prereq: **None****PHIL286 Philosophy of Mind**

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PHIL**Identical With: **SISP286**Prereq: **None****PHIL287 Philosophy of Science**

This course is a fast-moving introduction to some central topics in the philosophy of science, aimed at students with some college-level study of at least one natural science. Topics include the norms of scientific understanding or explanation; the relation between finished theories or explanations and ongoing research; the recognition and dissemination of discoveries; the justification of scientific claims; conceptual and technical (revolutionary) change in the science; the significance of instrumentation, experiment, and artifice in science; the places of laws, models, and causal relations in scientific understanding; and whether various sciences differ fundamentally in their aims, methods, and

achievements. Considerable attention will be given to examples of scientific practice, both historical and contemporary.

PHIL288 Sciences as Social and Cultural Practices

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

PHIL291 Reason and Its Limits

This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such

as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

PHIL294 Heidegger and the Being Question

Martin Heidegger argued in BEING AND TIME that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be BEING AND TIME and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger's own views about this question.

PHIL303 Plato's REPUBLIC

"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today—on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics—receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power—the life of a tyrant—is psychologically corrupted. These are

bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL306 Sophist, Statesman, Philosopher: Plato's Later Metaphysics and Politics

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides's puzzle and explore Plato's solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

PHIL310 Concepts of Matter: A Brief Philosophical History of the Concept of Matter

In this course, we will explore changing notions of matter in Western thought from classical Greek thought through the quantum revolution in physics, and philosophical debates about their implications. We will begin with views of matter in Plato, Aristotle, and the ancient atomists and how they were interrelated with views of human beings: the devaluation of matter and the body in Platonist and Gnostic thought, the perhaps surprisingly positive attitude taken toward death without a hope of continued existence by the materialist Lucretius, and the appropriation of Aristotle's hylomorphic philosophy into Christian theology and scholastic science in the late middle ages. We will then look at the emergence of a conception of "material substance" in the 17th century, examining the differences between the mathematical formulations of Galileo and Descartes and those of atomists such as Gassendi. The remainder of the section will focus on the rise of materialism and reactions against it: Descartes and Hobbes on the question of whether human beings are merely machines, the Newton-Leibniz debate about the activity of God in nature, Laplace's demon and the deterministic interpretation of classical mechanics, and the 19th-century reactions of romanticism and spiritualism. Finally, we will examine the radical and counterintuitive changes in the notion of matter occasioned by quantum mechanics, as well as interpretations that put consciousness and subjectivity back into the collapse of the wave function. We will consider whether contemporary physics really has the kind of notion of "material substance" needed for a traditional form of materialism before concluding with readings from philosophers and physicists in the recent revivals of dualism and panpsychism.

PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths

This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth—for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

PHIL337 Comparative Philosophy

This seminar will explore the substantive and methodological issues that arise when one takes seriously the idea that philosophy has been, and continues to be, practiced within multiple traditions of inquiry, in many different ways, and in many different languages. We will examine and critique some of the ways in which "comparison" has been used, as well as examine arguments that comparison across traditions is, in fact, impossible. Although most of our attention will be focused on written academic research, we will also attend to the challenges and benefits of interacting directly with philosophers in other countries and cultures.

PHIL338 Comparative Political Philosophy

Undertaking "comparative philosophy" means to do philosophy by drawing on multiple philosophical traditions. In this course, we will study key topics in political philosophy, such as the justification of political authority, the legitimacy of public critique of social rituals, and the scope of liberty and rights—from both modern Western and contemporary East Asian perspectives. We will examine potential obstacles to comparative theorizing, as well as benefits that can arise both for currently dominant traditions (e.g., Western liberalism) and for alternatives to liberalism such as Chinese and Korean Confucianism.

PHIL347 Ethics, Ecology, and Moral Change

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

PHIL351 Deconstruction and Politics

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

PHIL353 Blackness in the Anthropocene

To deny the "unprecedented" geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this "new era" has afforded us in terms of critical potential. From accusations that what we now call the "Anthropocene" has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the "Anthropocene" are still contested terrains. The aim of this course is to investigate the Anthropocene's many forms of socio-political erasures and theoretical "blind-sights." We will examine the ways in which Anthropocene discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocene times. We will explore

questions like "who are 'recognizable/legitimate' victims in environmental disasters," "do events like hurricane Katrina or the migration crisis teach us anything about our human condition," and "what is the 'post' in post-humanism." We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

PHIL354 Hope and Hopelessness in an Age of Mass Incarceration

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino/a, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Young people, particularly impoverished black youth, are funneled into correctional supervision through the school-to-prison pipeline. For many people in the country today, avoiding prison seems hopeless.

This interdisciplinary course, grounded on philosophical reflections on hope, liberty, respect, and exclusion, will critically explore the moral, psychological, ethical, social, and political issues raised by mass incarceration in the United States. We will be particularly interested in whether and under what conditions hope is possible for those marginalized under the carceral system.

PHIL355 Necropolitics and Black "Fugitive" Politics

In his important essay interrogating the (im)possibility of black sociality, Fred Moten attempts to find an order of black social life which would unfold in the very confrontation between black (social) death and the law. However, as he argues, this form of black life would be "reducible neither to simple interdiction nor bare transgression." The form of black life that interests Moten is essentially one of "fugitivity." In a recent response to Moten's text, David Marriott worries that "by writing blackness as ceaseless futgitivity," Moten advances "a position in which blackness is only black when it exceeds its racial disavowal" and therefore blackness "can only be recognized as black in so far as it escapes the racism of its history." In this course, we will trace and follow the implications of Moten's intervention. More specifically, we will explore what forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity could yield given that "black life" remains arguably the most precarious form of living under various contemporary "necropolitical" apparatuses of sanctioned racial exclusion, control, persecution and--in worse cases--genocide. Key figures will include Frantz Fanon, Achille Mbembe, Jacques Derrida, Michel Foucault, Jared Sexton, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, Alexander G. Weheliye, Elizabeth Povinelli, and Gayatri Spivak.

PHIL357 Animal Minds

Can animals reason? Do they form intentions, do they have beliefs, might they act ethically? What do other animals know? How can we know what they might know, and what can exploring the minds of other animals tell us about our own minds? In this course we will attempt to answer these questions by adopting

a largely comparative perspective and examining philosophical, scientific, psychological, and popular writing about minds. We will examine evidence for mindedness and reasoning in social species. We will also explore the ethical implications of this research.

PHIL359 Michel Foucault: Power and Its Products

Is power productive of reality? What does Michel Foucault (1926-1984) mean when he famously declares that power is not just prohibitive, but productive? Foucault's work has been enormously influential in the fields of philosophy, social theory, history, anthropology, queer theory, and feminist theory, among others. The primary topic of Foucault's work is the way in which we have come to categorize not only our world but ourselves and in particular to categorize ourselves in terms of madness, criminality, disease, and sexuality. Foucault, however, is interested in more than these categories themselves: he aims to investigate the conditions through which these categories come to be seen as capable of capturing truths about ourselves. This investigation leads him, in the mature phase of his work that begins in the 1970s, to the problem of power, which is best thought of as a set of relations and not as a thing or a possession. Foucault takes power relations to be (a) implied in relations of knowledge and (b) to be "productive," in a certain sense, of social reality. In this course, we will try to clarify the relationship between power, the production of the social, and knowledge in Foucault's work.

On the one hand, to call power productive opens the door to a major reconsideration of the basic problems of social and political philosophy, which can no longer be assured of having a timeless set of basic questions or objects (the state, the citizen-subject). On the other hand, there is a risk in this approach of ascribing almost magical qualities to power and of reifying it. Since his death, Foucault's thought has often been taken to end up in a curious impasse, caught between extreme activism that accepts no system of power as established and cynicism that sees co-optation everywhere and resistance as futile. What are the political implications of Foucault's shifting conception of power? What follows for our understanding of ourselves? What is really at stake in the ways that we classify and categorize ourselves today?

PHIL360 Continental Philosophy's Others

This seminar will attend to some of the ways in which philosophers of race, Subaltern thinkers, and "postcolonial" philosophers have engaged with the European philosophical archive (more specifically in this case, deconstruction and contemporary French theory). The aim of this course is to focus on some aspects of the debates that emerged from the confrontation between voices intervening from the "margins" of mainstream continental thought and discourses traditionally perceived to be at the center of knowledge production and/or epistemological practices. We will attempt to assess when, where, and how these "philosophies from the borderlands" have had important bearings on contemporary debates in political philosophy and social theory. We will assess both individuals and collective forms of criticism, not only on geographic frontiers but also on liminal and alternative spaces within the same geographic and institutional location, such as the American academy.

PHIL362 Origins of the Human Mind

Since classical antiquity, philosophers have often characterized human beings by way of contrasts between ourselves and nonhuman animals, particularly in terms of mental abilities humans possess and nonhuman animals (putatively) lack, such as reasoning and language. Only recently, however, have the sciences--particularly evolutionary biology, cognitive psychology, anthropology, and cognitive ethology--begun to offer the tools needed to characterize differences in the cognitive toolkits of different species and to attempt to piece together hypotheses about how human minds differ so greatly from those of our nearest relatives, the great apes, in spite of our genetic similarity and the comparatively brief period since the time of our last common ancestors. In this course, we will read several recent works by philosophers and scientists presenting theories of the evolution of distinctively human cognition.

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

PHIL383 Mind, Body, and World

Social-pragmatist conceptions of language and mind have sought to accommodate the normativity of meaning and justification within a broadly scientific, naturalistic understanding of ourselves and the world by treating mental life as grounded in public practices and norms of communication in partially shared causal circumstances. Such accounts have sometimes been criticized for neglecting the experiential, affective, and first-personal aspects of mind and, at other times, for disconnecting linguistic communication from

accountability to the world. This advanced seminar critically assesses some influential recent efforts to account for objective accountability, perceptual experience, first-person perspectives, and affectivity as constructive components of broadly social-pragmatist approaches to mindedness. With a brief introduction to Quine's and Davidson's criticisms of semantic empiricism as background, we will examine John McDowell's attempt to develop a post-Davidsonian empiricism, Hubert Dreyfus's phenomenological dualism of bodily coping and linguistic articulation, Alva Noe's treatment of perception as bodily activity, John Haugeland on embodied "existential commitment," and Rebecca Kukla and Mark Lance on the pragmatic normativity of the space of reasons.

PHIL385 Understanding Life and Mind

Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

PHYSICAL EDUCATION (PHED)

PHED101 Tennis, Beginning

This course is designed for those who have had no formal instruction in tennis. Basic grips and stroke technique will be taught for the forehand, backhand, serve, and volley. Also covered will be equipment selection, court etiquette, and proper scoring of games, sets, and matches. The introduction of basic doubles formation will also be included. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED102 Tennis, Intermediate

This course is designed for those who have taken beginning tennis and have learned the basic grips and strokes. The intermediate group will have a more detailed analysis of stroke technique. Ladder match play will give students the opportunity to learn singles and doubles strategy. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED104 Golf

This course is designed to teach the basic information necessary to play and enjoy the game of golf. Each classroom period is spent teaching beginning golfers to play the game correctly from the start: mastering the pre-swing, fundamentals of grip and aim, addressing the ball, and swing technique. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Gen Ed Area: **None**

Prereq: **None**

PHED106 Fitness, Beginning

This course is designed to meet the needs of the individual interested in establishing a self-paced exercise program. The emphasis of this course is on the development of cardiovascular endurance. Individuals are instructed how to determine personal work-load levels and pace themselves during various classroom aerobic activities. Participants also receive additional instruction in strength training. Cardiovascular activities include fast walking, jogging, aerobic

exercise, rope jumping, interval training, and rowing ergometer work. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Prereq: **None**

PHED119 Strength Training, Advanced

This course is designed to meet the needs of students who are sincerely involved in strength training, body building, and/or competitive lifting. The course will include the use of four weight-lifting machines and instruction in competitive lifting techniques. There will also be discussion and demonstration of various progressive resistance modes that develop muscular strength and endurance. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED120 Swimming, Beginning

The objective of this course is to equip students with basic water safety skills and knowledge to make them reasonably safe while in, on, or about the water. We

will introduce skills designed to improve stamina and basic coordination and to increase individual aquatic abilities. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED121 Swimming, Advanced Beginner

This course is designed to build upon the skills learned in beginning swimming. Emphasis is placed on improving the overhand crawl stroke with rotary breathing. Students will be introduced to the basic skills needed to learn the backstroke and breaststroke. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED122 Swimming for Fitness

This program is designed for the lap swimmer who is interested in learning and applying cardiovascular conditioning and training to swimming. Instruction is given in breathing exercises and pacing techniques. Individual work-load levels are determined, and self-paced programs are centered around those levels. Various training techniques are discussed and used in the program. A course prerequisite is the ability to swim four lengths (any stroke) continuously and comfortably. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED123 Lifeguard Training

This course is designed to teach potential lifeguards the skills and knowledge needed to prevent and respond to aquatic emergencies. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED124 Squash

This course is geared toward the beginner but may be taken by those who have played some before. Basic grips and strike technique will be taught for the forehand, backhand, serve, and volley. Also covered will be safety precautions, court etiquette, and proper scoring of games and matches. The intermediate player may not get much attention the first two weeks while the beginners learn the basics. The first class of each quarter will meet in the lobby of the Freeman Athletic Center. Students must have their own racket and goggles.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED127 Tabata/Fitness Training

Tabata/fitness training is a program designed to enhance an individual's competency at all physical tasks. The student will perform exercise elements successfully at multiple, diverse, and randomized physical challenges. Areas of fitness will include cardiovascular endurance, stamina, strength, power, speed,

balance, agility, and coordination. The start-stop training design is based on 20-second bursts of high-intensity workout followed by a 10-second rest. Each high-intensity burst/rest is repeated 4–8 times. The course will provide challenging workout programs that provide the health benefits of cardiovascular workouts with high- to moderate-intensity training and/or high- to moderate-intensity interval training. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED130 Skating, Beginning

This introduction course to ice skating will include lectures as well as work on ice and covers all basics of skating. Progress is self-paced. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED133 Interval Training

Interval training involves a series of low- to high-intensity exercise workouts interspersed with rest or relief periods. This course includes a variety of cardio drills and resistance training exercises designed to challenge and improve cardio and muscular strength while maintaining a strong core. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED137 Rowing for Fitness

This course is designed to introduce individuals to the use and benefit of rowing as a lifetime fitness activity. Through the use of the Concept II rowing ergometer, students will be taught proper rowing technique, conditioning, injury prevention, and ways to include rowing as a part of an overall exercise program. No previous rowing experience is necessary. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED138 Indoor Cycling

Indoor cycling, as an organized activity, is a form of exercise with classes focusing on endurance, strength, intervals, high intensity (race days), and recovery that involves using a special stationary exercise bicycle with a weighted flywheel in a classroom setting. During the class the instructor simulates the ride. Together you travel on flat roads, climb hills, sprint, and race! This is a truly fantastic cardiovascular class. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED139 Running for Fitness

This course is an introduction to the basic principles of a fitness running program. The training program will be individualized for each student based on individual

goals. Topics will include proper training techniques, running gear, injury prevention, and stretching. All levels of running welcome. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED140 Racketlon

Racketlon combines tennis, badminton, squash, and table tennis into one sport. It is racketsports' answer to other combination sports such as triathlon or decathlon. Very commonly played in Europe, opponents play each of the sports to 21 points, and the winner is the person with the highest total points. Racketlon is also played in a doubles format where teams of two opponents play against each other. This class will introduce students to each of the four racketsports and how to play them in combination within the sport of racketlon. As a capstone experience, the class will play both a singles and a doubles racketlon. Previous racketsport experience will be valuable in this class, but is not required. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Gen Ed Area: **None**

Prereq: **None**

PHED142 Yoga for Fitness

This yoga class is designed to improve the health, performance, and mental acuity of students interested in improving their level of fitness. The class will blend balance, strength, flexibility, and power in a fitness format. This practical and user-friendly style of yoga is accessible, understandable, and achievable by individuals at any level of fitness. Attendance is required. The first class in each quarter will meet in the lobby of Freeman Athletic Center Lobby. This class meets in the second quarter.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED144 Beginning Volleyball

This class is designed to help players learn and develop a basic understanding of volleyball. The class will include instruction in the basic skills of serving, passing, setting, attacking and blocking. The class will also cover tactical skills of basic volleyball offensive and defensive play as well as the rules and scoring.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED145 Indoor Cycling and Yoga

This is a combination class that warms up your body with some sun salutations, strengthens your lower body with a cycling ride, and then stretches your hard-worked muscles with yoga asanas. Yoga and indoor cycling are natural complements to one another because each exercise has a mental and a physical component and trains your body while developing mind/body awareness. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED147 Hatha Yoga

This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercise aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered: Warm-up: Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).

Stretching: Standing Separate Leg Stretching Pose -Dandayamana-Bibhaktapada-Paschimotthanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit)

Spine Strengthening, Sit up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit). Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana(Sanskrit), Blowing in Firm Pose - Kapalbhathi in Vajrasana(Sanskrit). Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED152 Outdoor Hiking

Hiking is merely walking on a footpath, whether on a neighborhood path or a more adventurous trail that involves some climbing. Hiking is a moderate cardiovascular activity. Common benefits include weight loss, prevention of osteoporosis, decreased blood pressure, and relief of back pain. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED155 Speed Agility Plyometric Training

Learn to increase your cardio by speed and quickness. Agility training focuses on foot speed, quickly changing direction and improving reaction to visual cues. Plyometrics is an explosive movement to build muscle. The two will be combined to enhance the over all body conditioning. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED157 Pickleball

Pickleball is a paddle sport with combined elements of tennis, badminton, and ping pong, and played on a doubles badminton court. The net is similar to a tennis net, but is two inches lower. The game is played with a hard paddle that is similar to table tennis and usually made up of graphite or composite. The ball is comparable to a whiffle ball.

The game can be played in either singles' or doubles' matches. For new players, the basics of the sport are easy to learn. Typically, one session of three or four games is all that it takes to grasp the basics.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED159 Cross Training Fitness

This class will use dynamic warm-up, dynamic flexibility, bodyweight, dumbbells, free weights, kettleballs, interval training, cardio/fitness machines, aquatic training, core training, and neuromuscular training in a fun, progressive way so students have a variety of ideas to implement to stay fit for life. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED169 Indoor Technical Climbing

This is an introductory course that will feature instruction providing the basic skills necessary for technical rock climbing. The climbing wall in the Freeman Athletic Center will be the site for the course, with some outdoor climbing possible when weather permits. All equipment provided. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED170 Sculling

This course is designed for those students that have completed the introductory Rowing for Fitness course (PHED137). It gives them the opportunity to take these skills to the water and learn a fitness activity that can last a lifetime. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **PHED137**

PHED465 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Grading: **OPT**

PHED466 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Grading: **OPT**

PHED469 Education in the Field, Undergraduate

Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

PHED470 Independent Study, Undergraduate

Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

PHED492 Teaching Apprentice Tutorial

The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.

Offering: **Host**

Grading: **OPT**

PHYSICS (PHYS)

PHYS105 Science of Sustainability

What is sustainability? It most certainly is not switching light bulbs or "buying organic," although perhaps those activities contribute to sustainability. The task for our course will be to undertake a scientific inquiry into the conditions for an enduring human presence on Earth. To do so, we must begin with physical principles, examining both what humans require and demand from the world and what the world is capable of providing. Our inquiry will broaden to include chemical and ecological principles, ultimately asking what the social sciences can do to illuminate the problem without violating the physical constraints nature imposes.

Students should have a familiarity with quantitative and algebraic concepts and, above all, a desire to incorporate quantitative thinking into verbal discourse. Writing is also a core element of the course with frequent writing assignments in various formats.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Identical With: **ENVS235**

Prereq: **None**

PHYS107 Life in the Cell from a Molecule's Perspective

What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **MB&B117**

Prereq: **None**

PHYS111 Introductory Physics I

This course, along with PHYS 112 in the spring semester, is an introduction to the fundamental principles of physics. Employing trigonometry, algebra, and basic calculus, the goal is to provide tools for the quantitative understanding of a wide variety of phenomena, with many examples taken from the life sciences. The lab PHYS121 is recommended.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS112 Introductory Physics II

This is the second of two non-calculus courses covering fundamental principles of physics. The emphasis is on developing a conceptual understanding of the physical processes that govern our universe. Proficiency in elementary algebra, vector algebra, trigonometry, and arithmetic is required. The lab PHYS122 is recommended.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS111**

PHYS113 General Physics I

This course is the first term of a general physics course with calculus, recommended for students interested in majoring in the sciences. With the focus on Newtonian dynamics, PHYS 113 seeks to develop both conceptual understanding and the ability to use this knowledge to obtain quantitative predictions of how the universe works. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of mechanics. The associated lab, PHYS123, is highly recommended.

PHYS113 and PHYS116 are part of a sequence of courses that lead into the physics major. PHYS113 is a pre-requisite for PHYS116; therefore, students must take them in sequence.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS115 Newtonian Mechanics

This course in classical mechanics assumes a level of familiarity with general physics and comfort with vectors and calculus that is not assumed in PHYS113. This course will study classical mechanics at a level that is rigorous and mathematically sophisticated, employing contemporary instructional techniques. It will also teach elementary programming and data analysis skills essential to physical science. The course may be ideal for students who have previously taken a general physics course but not at the level required as preparation for PHYS324, Electricity and Magnetism.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS116 General Physics II

This course is the second term of a general physics course with calculus, recommended for students interested in majoring in the sciences. The focus is on the physics of charged particles, including an introduction to the concepts of electric and magnetic fields. Students will develop both conceptual understanding of how charged particles give rise to both electricity and magnetism and the ability to use this knowledge to quantitatively describe

the behavior of these particles in a variety of contexts, including electrical devices. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of electricity and magnetism. The associated lab PHYS124 is highly recommended; any student wishing to major in physics should enroll in PHYS124, since it is a requirement for the major.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113**

PHYS121 Physics Laboratory I

This laboratory course provides experience with phenomena discussed in PHYS111 lectures. While this course is not required by the Physics Department, students planning to enter the health professions should be aware that a year of physics WITH LABORATORY is usually required for admission. Consult your major advisor if you are in doubt about similar requirements in your field. Each laboratory is limited to 16.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS122 Physics Laboratory II

This course provides laboratory experiences for students taking PHYS112.

This laboratory course teaches students how to obtain, process, and evaluate data and compare these data with quantitative models of how our world works.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS123 General Physics Laboratory I

This laboratory course provides experience with phenomena discussed in PHYS113 lecture, integrating calculus with the experiments.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS124 General Physics Laboratory II

This laboratory course is designed to be taken in conjunction with PHYS116. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS116. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113 OR PHYS123**

PHYS162 It's About Time

The course will explore ideas and tools that help us to conceptualize and quantify time. Measurement of time has been accomplished by careful observation of celestial objects, counting growth rings in trees, or determining the abundance of radioactive decay products, and with devices as varied as the hour glass and the atomic clock. A thorough investigation of these and other methods and tools will illuminate old and new views of time and will allow us to venture into various

fields of physics such as classical mechanics, the theory of relativity, atomic and nuclear physics, electricity, and optics. Along the way, we will discuss concepts including, but not limited to: the origin of time, its smoothness, time dilation, the relativity of simultaneity, and the direction of time's arrow.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS170 Introduction to Design and Engineering

This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **1.00**

Gen Ed Area: **NSM-CIS**

Identical With: **IDEA170, CIS170**

Prereq: **None**

PHYS207 Introduction to Biophysics

This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **PHYS116**

PHYS213 Waves and Oscillations

The properties of periodic motion recur in many areas of physics, including mechanics, quantum physics, and electricity and magnetism. We will explore the physical principles and fundamental mathematics related to periodic motions. Topics will include damped and forced harmonic motion, normal modes, the wave equation, Fourier series and integrals, and complex analysis. Principles and techniques developed in this course are central to many subsequent courses, particularly Quantum Mechanics (PHYS214, PHYS315), Classical Dynamics (PHYS313), and Electricity and Magnetism (PHYS324). An important component of this course is to develop the ability to use mathematical software packages to graph expressions, solve equations, and obtain numerical solutions to differential equations.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS116**

PHYS214 Quantum Mechanics I

This course provides an introduction to wave and matrix mechanics, including wave-particle duality, probability amplitudes and state vectors, eigenvalue problems, and the operator formulation of quantum mechanics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS213**

PHYS215 Special Relativity

This calculus-based half-credit, half-semester introduction to Einstein's theory of special relativity promotes both a qualitative understanding of the subject and a quantitative problem-solving approach.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS217 Nonlinear Dynamics and Chaos

The techniques of nonlinear dynamics and chaos have been proven useful for a variety of disciplines, ranging from astrophysics to population dynamics. This course provides an introduction with applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113, PHYS116, AND PHYS213**

PHYS219 Introduction to Contemporary Physics

This course examines the foundations of modern physics, including special relativity, the building blocks of matter, the fundamental interactions and gravity, and recent views of the universe such as entanglement, supersymmetry, strings, and dark matter and dark energy.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **(PHYS113 AND PHYS116)**

PHYS221 Modeling and Data Analysis: From Molecules to Markets

The development of models to describe physical or social phenomena has a long history in several disciplines, including physics, chemistry, economics, and sociology. With the emergence of ubiquitous computing resources, model building is becoming increasingly important across all disciplines. This course will examine how to apply modeling and computational thinking skills to a range of problems. Using examples drawn from physics, biology, economics, and social networks, we will discuss how to create models for complex systems that are both descriptive and predictive. The course will include significant computational work. No previous programming experience is required, but a willingness to learn simple programming methods is essential.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **QAC221, CIS231**

Prereq: **None**

PHYS313 Classical Dynamics

This is a course in classical mechanics at the intermediate level that utilizes problem solving instruction and learning. It approaches Newtonian mechanics from a more advanced point of view and introduces Lagrangian and Hamiltonian dynamics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS513**

Prereq: **(PHYS213 AND MATH221 AND MATH222 AND MATH122)**

PHYS315 Quantum Mechanics II

This course will expand the formalism of quantum mechanics to include spin and angular momentum in three dimensions. The quantum theory of identical particles will be developed and applied to multi-electron atoms. The remainder of the course will explore approximation methods for applying quantum mechanics to more complex systems.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS515**

Prereq: **(PHYS214 AND MATH223) OR (PHYS214 AND MATH221)**

PHYS316 Thermal and Statistical Physics

Thermodynamics and statistical mechanics are pillars of physics.

Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

PHYS339 Molecular and Cellular Biophysics

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

Prereq: **(CHEM251 AND CHEM252)**

PHYS340 Computational Physics

This course introduces students to numerical techniques used in modern computational physics. Using the UNIX operating system and its support software as our programming environment, we will write code using the C programming language to implement the basic numerical techniques necessary for solving the majority of physics problems that do not have an analytical solution. Previous experience with UNIX/C is useful but not required.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **(MATH221 AND PHYS213) OR (MATH223 AND PHYS213)**

PHYS342 Experimental Optics

This is an experimental course in optics, including lenses, lens combinations, interference and diffraction, interferometry, and spectrometry.

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM377**

Prereq: **CHEM251**

PHYS395 Structural Biology Laboratory

One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods.

This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course

provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

PHYS500 Graduate Pedagogy

The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop BEFORE the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.

Prereq: **(PHYS214 AND MATH223) OR (PHYS214 AND MATH221)**

PHYS516 Thermal and Statistical Physics

Thermodynamics and statistical mechanics are pillars of physics. Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

Gen Ed Area: **None**

Prereq: **(PHYS213 AND PHYS217 AND PHYS313) OR (PHYS213 AND PHYS217 AND PHYS513)**

PHYS565 Mathematical Physics

Historically, physics and mathematics are closely related. Physics uses powerful tools developed by mathematicians, while physicists, investigating the actually existing universe, provide mathematicians with new concepts and ideas to explore. This way, many mathematical techniques, and even entire areas of mathematics, developed from the need to solve certain real-life problems posed by physical reality. The purpose of this course is to give students an overview of the powerful array of mathematical tools available for the solution of physical problems. Starting with the presentation of tools of complex analysis, we will apply them to the solution of ordinary and partial differential equations. We will encounter Fourier and Laplace transforms and will study the Green's function method for the solution of bound and scattering problems. We will also look into the elements of Group Theory and apply it to angular momentum in quantum many-body systems.

Offering: **Host**

PSYCHOLOGY (PSYC)

PSYC104 Understanding Prejudice and Discrimination

This first-year seminar (FYS) will explore several different forms of prejudice and discrimination, including racism, sexism, anti-Semitism, heterosexism, and less recognized forms of bias, such as the exploitation and domination of indigenous peoples, animals, and the natural environment. During the first part of the course, students will read about and discuss specific forms of prejudice. In the second half, you will write a final paper and give a brief presentation on a prejudice-related topic.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC105 Foundations of Contemporary Psychology

This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for upper-level courses in psychology and as a valuable contribution to students' liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC109 Psychology and Technologies of the Self and Social World

The psychological sciences are generating novel and remarkable understandings of individual minds, social interactions, groups, and institutions, and these findings are being extended to benefit individual and social welfare. As we dwell in a world increasingly understood in psychological terms and managed through psychological technologies, crucial questions warrant attention. What are the implications of adopting these new understandings of self and others? Does this new knowledge change us and, if so, how? How do we assess the consequences of this knowledge as it is implemented in social practices? These questions guide our examination of cases where psychological knowledge has informed new practices and policies. The cases include research on decision-making, integration, positive psychology, psychopharmacology, stress, and attitudes. Also considered will be instances where psychological ideas have been implemented then challenged, including psychosurgery and token economies.

Offering: **Host**

Grading: **A-F**

PSYC111 Myth, Magic, and Movies

We will examine how the mythic is made and what purposes myth and magic serve in modern culture. Guided by classic psychoanalytic ideas, we will seek

to understand both the conscious and unconscious power of myths. The seven volumes in J. K. Rowling's HARRY POTTER series will be the core texts for the course, and we will explore how these texts were transformed by the eight Potter movies.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC138F Masculinities (FYS)

This course offers an interdisciplinary approach to the study of masculinities, focusing on the difficulty of disentangling the (social-) scientific questions of what men are (and how they come to be that way) from the interpretive question of what masculinity means. We will survey a range of perspectives from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, anthropology, feminist studies, and queer theory that describe and attempt to account for masculinities. In order to understand how these scholarly accounts might fit together to form a more comprehensive interpretive framework, we will also be engaging in critical analysis of examples from contemporary television and film that will help us to understand the role that representation plays in our cultural constructions of masculinity.

Offering: **Crosslisting**

Grading: **Cr/U**

PSYC202 Qualitative Research Methods in Psychology

The goal of the course is to introduce students to basic research strategies for investigating human thought and behavior, with a focus on qualitative methods. The course provides detailed introduction to different qualitative methods, including interview, observation, case study, content analysis, archival, life history, and narrative techniques. Attention is given to the framing of research questions, design of studies, the ethics of psychological research with humans, and assumptions about human nature. The course is problem- and project-based, providing hands-on research experience.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC204 Methods of Interpretation

Projects incorporating issues of race, gender, and class will be the focus of this methods course. Feminist, phenomenological, experiential, textual, and ecological methods of interpreting gender, race, and class in multimedia formats will be explored.

Offering: **Host**

Grading: **OPT**
 Credits: **1.00**
 Gen Ed Area: **SBS-PSYC**
 Prereq: **PSYC261**

PSYC205 Research Methods in Psychopathology

How do psychological researchers study unusual and distressing human experiences? This combined laboratory and lecture/discussion course provides an introduction to methods used in the study of clinical and subclinical phenomena. With an emphasis on methodological pluralism in the 'psy' disciplines, the course covers both quantitative and qualitative approaches, exploring the intersections between diverse modes of inquiry. Throughout the semester, students conduct a team research project on a psychological topic of the group's choosing, proceeding through each stage of the research process. Along the way, we consider the historical context of psychological science, as well as contemporary debates about the nature of psychopathology. We also think critically about the relationship between research methods and the topic(s) under investigation, asking questions such as: Why do psychologists use the methods that they use? How is research in psychology different from research in the other sciences and humanities?

Offering: **Host**

 Gen Ed Area: **SBS-PSYC**
 Prereq: **PSYC105**

PSYC206 Research Methods in Cognitive Development and Education

This course introduces students to translational research in psychology--research that draws on psychological science to inform practice. The course is built around a central case study, early numeracy in preschool children, with an emphasis on the effects of differences in language input (e.g., deafness). We will cover existing research on cognitive and language development, early numeracy, deaf education, and teaching strategies to understand the relationship between research and practice in these areas.

The first one-quarter to one-third of the course will cover basic research methods, fulfilling the requirement for the major and preparing students to engage in both research and practice. The final project will entail drawing on the research literature and research methods to develop and test math-related materials for preschools. Each year of PSYC206 draws on the work done by previous students in the class.

The service-learning component of the course, in which students will spend two hours per week in a preschool, provides a hands-on opportunity to interact with preschool children and learn firsthand about their learning environment and styles.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.25**
 Gen Ed Area: **SBS-PSYC**
 Prereq: **PSYC105**

PSYC207 Research Methods in Developmental Psychology

The goal of this course is to introduce students to basic research strategies and methods, with a focus on those pertinent to developmental psychology. Course materials will focus on the conceptual, design, and analytic issues to research across development. This course is designed to provide students with the knowledge, skills, and understanding to conduct and evaluate research. In the service of these goals, students will participate in lectures, readings, discussions, and hands-on projects.

Offering: **Host**
 Grading: **OPT**
 Credits: **1.00**

PSYC208 Research Methods on Emotion

This course will focus on methods and techniques to study emotions in their social context, including emotional narratives, interviews, experiments with emotional stimuli (e.g., mood induction), surveys, and daily diaries. We will investigate which methods and techniques are best suited to study various positive and negative emotions. The course will give special attention to ethical issues in emotion research.

 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **SBS-PSYC**
 Prereq: **PSYC105**

PSYC209 Research Methods in Ecological-Community Psychology

The focus of this course is to introduce the student to the historical and conceptual foundations of ecological and community psychology. Special emphasis will be placed on research ethics and framing research questions that address social problems. Students will learn about study design and mixed-method approaches that will provide a foundation to engage in research and practice.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **SBS-PSYC**
 Prereq: **PSYC105**

PSYC210 Research Methods in Cognition

This course will examine the experimental method as a means of gaining knowledge about human cognition. Students in this course will learn about general research methods in cognitive psychology related to experimental design, understanding and interpreting research, and ethical issues involved in research with human subjects. Classic research paradigms in cognitive psychology will be explored through the use of interactive demonstrations and in-class experiments.

Offering: **Host**

PSYC213 Research Methods in Social Psychology

The course examines research methods and techniques used in social psychology, including observation, correlation, and experimentation. Students will learn about study design, research ethics, and how to collect and analyze data, as well as effective ways to report results. All students are expected to undertake a research project.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC214 Research Methods in Sleep Research

Have you ever read an empirical research article and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting findings when researchers test the same phenomenon?

This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. This is an interactive lecture and lab-based course. Through a series of hands-on lab assignments, students will acquire the necessary skill set to be able to critique, analyze, and design psychological research. Students will explore both qualitative and quantitative methodological designs used in psychological research (e.g., experiments, interviews, and surveys). Additionally, students will gain skills in conducting basic statistical analyses (e.g., correlation, t-test, ANOVA). The course will culminate with a final project in which students will design an original research study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Prereq: **PSYC105**

PSYC215 Research Methods: Behavioral Methods in Animal Research

This is a research methods course that provides an understanding of the different approaches to animal research, particularly those using rodent models. It provides students with an understanding of the different techniques employed by researchers and the questions they address. This course provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. Students will learn how to handle and inject rats and will also get a sense of how to design a behavioral experiment, including the use of control groups and counterbalancing. The course will follow a lecture/discussion/lab format where students will learn about different forms of conditioning (operant/classical) and how these apply to various behavioral tasks such as operant responding, autoshaping, decision-making, locomotion testing, etc. (see readings for more examples). One class each week will take place in the lab to provide students with hands-on experience with rats and the testing apparatuses. Students will be assigned a rat for the semester that they will use to collect and analyze data during lab classes. This will be combined with regular class discussion of research articles dealing with each topic, including some of the earlier reports and more recent applications. The focus of the course will be on trying to prepare students to design and carry out behavioral/animal research in a laboratory setting.

PSYC220 Cognitive Psychology

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory,

knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

PSYC225 Cognitive Neuroscience

This course provides an introduction to cognitive neuroscience—the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders.

PSYC228 Clinical Neuropsychology

This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

PSYC230 Developmental Psychology

This course is an introduction to human behavior and psychological development focusing on infancy and childhood. We will examine theory and research about physical, social, emotional, language, brain and cognitive development, with emphasis on cognitive development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC239 Functional Anatomy of the Human Brain

A mass of tissue the consistency of firm jello and weighing about 2.5 pounds in the adult human, the brain is an organ that controls nearly every function of the body. It also enables the highest cognitive functions of humans such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will be of special interest to premed students; NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **NS&B239, BIOL239**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

PSYC240 Behavioral Neurobiology

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Offering: **Crosslisting**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **NS&B213, BIOL213**

Prereq: **None**

PSYC245 Psychological Measurement

This course will discuss various approaches to the measurement of psychological constructs such as intelligence and personality. Topics covered will include ability tests (e.g., IQ tests), achievement tests (e.g., classroom assessments), and diagnostic clinical assessments (e.g., the draw-a-person test). Strengths and weaknesses associated with various methods of measurement (e.g., self-report vs. performance measures) will also be discussed. Special attention will be given to the criteria used to critically evaluate the psychometric quality of measurement instruments. Students will learn the steps necessary to develop psychometrically sound, practically useful, and legally defensible tests.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC248 Adolescence and Emerging Adulthood

This course takes a global, cultural perspective to the study of human development during adolescence (ages 10–18 years) and emerging adulthood (ages 18–25 years). Students will gain a deeper understanding of key aspects of psychosocial functioning during these two developmental age periods. The course approaches adolescence and emerging adulthood as periods of both opportunity and vulnerability. Topics include cognitive development, love and sexuality, media, peer relationships, and risk and resilience. Class activities and assignments provide opportunities for students to actively engage with the material presented and discussed in class. Students also will have the opportunity to participate in a cross-cultural experience, culminating in a class documentary on a selected topic related to adolescent and emerging adulthood development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC249 Psychology of Sexual and Gender Diversity

There is a wide range of variability in sexuality and gender. This course reviews psychological research on the experiences of people with various sexualities, gender identities, and gender expressions, as well as how people come to develop beliefs about sexuality and gender.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC250 Personality

What does personality mean? Can you measure it? Who studies it and why? This course is designed to give a deeper understanding of these questions that psychologists interested in personality study, how they study these in a scientific manner, and how they use this knowledge to help others.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC251 Psychopathology

This course provides an overview of psychopathology, the study of "abnormal" behavior or mental disorders. From various theoretical perspectives, the ways that abnormality is defined will be considered. You will learn what we know and don't know about the phenomenology, diagnosis, and causes of mental disorders. Major domains of psychopathology, the symptoms and behaviors associated with common mental disorders, and the mechanisms hypothesized to be involved with them will be covered. The ways that different paradigms steer the development and implementation of treatments will be examined. This course is not designed to help resolve personal experiences with mental illness. This class will challenge widely accepted ideas about mental illness. You will learn to think critically about how mental illness is understood by society, mental health professionals, and clinical researchers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

PSYC253 Educational Psychology

This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC259 Discovering the Person

This course surveys major developments in psychology and psychiatry from 1860 to 1980. Through readings and lectures, the course introduces the major schools, theories, and systems in the American "psy" sciences. We examine the kinds of persons who were "discovered," the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine psychological phenomena that were located, catalogued, and explained by these sciences, including irrationality, sexuality, cognitive powers, personality, emotional processes, neurotic behaviors, intelligence, addictive tendencies, and the will. Attention is also given to the scientific grounds for investigating persons, the empirical evidence sought in the century-long process of discovering and naming psychological kinds, and the modes of producing this knowledge (aggregate methods, case study, and theories). Readings include primary source documents, histories of the disciplines, and philosophical analyses.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **AMST259, SISP259**

Prereq: **PSYC105**

PSYC260 Social Psychology

What leads us to become attracted to one person rather than another? How does prejudice develop, and how can it be reduced? Can psychological

research help protect the environment and, if so, how? This course offers an overview of classic and contemporary social psychology, covering topics such as group behavior, friendship, stereotyping, conformity, obedience, and conflict resolution.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC261 Cultural Psychology

Through essays, novels, videos, and film, we will explore the intersection of culture, ideology, and psychology. We will examine how gender, ethnicity, and class are interwoven in the social fabric and individual identity. Employing feminist, psychoanalytic, and deconstructive interpretive methods, we will try to decipher the many ways we inscribe ourselves in culture.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC265 Culture in Psychology: An Introduction to Theory and Research

Culture is central to the study of mind and behavior. This course will provide students with an introduction to theory and research on culture in psychology. We will discuss what culture is, the methods that psychologists use to study culture, and how much of our behavior is universal or culture-specific. We will explore how culture influences how we think, feel, and behave. Studies and examples from cultures around the world (e.g., Africa, Latin America, North America) will be presented.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC266 Psychology of Communities: Identity, Activism, and Social Engagement

This course serves as an introduction to community psychology. Students will read about, research, and discuss major topics in the field, including the ecological framework, diversity paradigms, social change, and empowerment.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC267 Global Mental Health

During the past half-century, mental health professionals have increasingly explored the international reach and cross-cultural relevance of their work. Practitioners have traveled from country to country in order to work with local populations, including those experiencing traumatic circumstances such as war and natural disasters. Professional organizations such as the American Psychological Association have developed guidelines and recommendations for multicultural competence. Researchers have investigated the cross-cultural epidemiology and expression of mental health challenges; for example, according to the World Health Organization, one in four people across the globe will experience a mental disorder at some point in their lives.

What does it mean to establish the global prevalence of mental disorders? Is psychological distress, including the distress that results from traumatic exposure, experienced and interpreted in the same way in all cultural contexts? While some scholars have argued that mental disorders are a global epidemic requiring a uniform, universal response, others have suggested that the exportation of psychological discourse and approaches from Western countries

has eclipsed local expressions of distress and indigenous healing traditions. This course will explore these questions and controversies using the tools and frameworks of multicultural psychology. We will place particular emphasis on the social, cultural, structural, and environmental determinants of mental health. We will address mental health disparities between high- and low-income countries, as well as the meanings of psychiatric explanatory models in advantaged and disadvantaged communities. Populations of focus will include migrants, refugees, internally displaced persons, and the urban homeless. Throughout the course, we will explore the growing research in the field of indigenous psychology, which promotes local knowledge, as well as the structural competency movement, which emphasizes the socio-institutional origins of health disparities.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC269 Health Psychology

This course will cover how biological, psychological, and social factors interact to influence health and illness. Students will learn the theories of health behavior and how they are applied to promote positive change. Other topics will include the influence of stress on health and stress coping strategies; nutrition, obesity, and eating disorders; addiction and substance abuse; and chronic and life-threatening illnesses. Students will develop a working knowledge of the history, major theories and concepts, and practical applications of health psychology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC277 Psychology and the Law

This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC280 Applied Data Analysis

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course

offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC**

Identical With: **QAC201, SOC257, GOV201, NS&B280**

Prereq: **None**

PSYC291 Language and Thought

This course provides a close examination on the relationship between language and thought, a central question in cognitive science and a very active area of research and theory in recent years. Students will be exposed to theoretical and empirical work evaluating several prominent hypotheses about language and thought, including the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC294 Developmental Tasks of Adolescence

Based on both clinical and developmental theory, this seminar is aimed at enabling students to master the primary intellectual and emotional tasks of adolescence through reading and group experience. We will ask what it means to have successfully individuated from family and explore how this need is expressed across four developmental domains--family, friends, fertility, and future--and how these milestones are evaluated and appraised. Students completing the course will be able to articulate why individuation and separation are essential to normal adult functioning and will also be able to develop summary statements that can be used to describe the level of functioning of an adolescent seeking therapy for a behavioral disorder.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC309 Social Stigma

This seminar aims to introduce students to theoretical and empirical social psychological research on prejudice and social stigma. The topics covered will include examinations of why individuals stigmatize: exploring cognitive, evolutionary, self, and system justification explanations. The course will examine the effects of stigmatization for low-status groups (stereotype threat, dis-identification, compensation, and health outcomes). We will explore the role of stigma in intergroup interactions. Finally, we will explore perceptions of bias from the perspective of high-status groups (e.g., perceptions of antiwhite prejudice).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105 AND PSYC260**

PSYC314 Theories in Psychology

Theory is a central tool in psychology, directing empirical investigations and interpretations of human action. Psychology theory likewise has come to significantly guide social policy and personal understandings of human actions.

This course introduces the practice of theory construction and appraisal. We will ask, What is a good psychological theory, what are its origins, and how should it be appraised? The theories to be considered include classic works from learning theory to psychoanalysis; mid-range theories such as dissonance, mass action, script, and role theory; and contemporary theories emerging in social psychology, cognitive psychology, emotion research, and neuroscience.

Identical With: **SISP314**

Prereq: **None**

PSYC316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

PSYC320 Cognition, Learning, and Instruction in the Classroom

This course examines learning in formal and informal educational settings (primarily K-12) through the lenses of cognitive and developmental psychology. The course is divided into units on the theoretical perspectives on learning and instruction, neuroscience and education, cognition, learning environments, and academic achievement. We start with a focus on prominent theories and principles and recent work integrating neuroscience and educational psychology, so that the applications in the classroom, such as conceptual change, problem solving, strategy development, the design and implementation of instruction, and variables influencing academic achievement are better situated. By the end of the course, students will be able to articulate the interdisciplinary contributions and connections of education, neuroscience, and psychology; critically evaluate and analyze how different theories of learning and research findings influence educational practices; understand how different aspects of thinking (e.g., memory, problem solving) and social context (e.g., schools) affect learning; appreciate the bidirectional contributions of research and educational practice to one another; and acknowledge different perspectives on some of the "big questions" in the learning sciences.

PSYC322 Psychology of Decision Making

We make decisions all the time. The vast majority of decisions have little consequence, though some are monumental and can deeply affect our lives. The broad goal of this course is to explore the science of judgment and decision making from a cognitive psychological perspective. This means that we will consider how the study of mental processes can inform us about how an individual person's judgments and decisions are made, characteristic patterns and biases of decision making, factors that influence decision making, and whether decision making can be improved. Themes include: What does it mean to be rational, and are humans rational decision makers? How do basic cognitive systems and their interplay underlie more complex decision behavior? What role do affect and emotion play in decision making? How can we move productively between neurobiology, cognition, and social application in thinking about the cognitive psychology of decision making? Do individuals and societies need help in improving decision making, and if so, what kind of help? Overarching goals are to understand the major questions and frameworks that have guided decision research from this perspective, to explore recent empirical studies with an eye toward how they challenge or extend past views, and to generate new research ideas, connections to other disciplines, and practical applications. Foundations of Contemporary Psychology (PSYC 105) and Cognitive Psychology (PSYC 220) are strongly recommended as prerequisites, as this is an upper-level course (that relies on student contributions) in the Psychology Department.

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC261**

PSYC325 Healthy Places: Practice, Policy, and Population Health

The built environment influences many aspects of health and well-being: psychological stressors (crime, noise, and violence), what people eat, the water they drink, the air they breathe, where (or if) they work, the housing that shelters them, where they go for health care, what social networks are available for support, and how political power is distributed and public resources allocated. How cities, suburbs, and rural areas are managed; local policy; and planning and design decisions can all help determine whether the places we live will be threats to public health and, perhaps more important, to an aging society. The focus of this course connects the fields of planning, psychology, and public health to explore contemporary challenges (and innovations) in the 21st-century built environment. Students will explore the multiple forces that impact population health, how to analyze these determinants, and what roles planning and public health agencies, as well as other institutions such as local governments, civil society, the private sector, and communities themselves, can play in research and action aimed at improving physical and mental health.

PSYC326 The Social Self

This course is on the social self, or better put, our social selves. It will examine how (and why) people influence one another and how this shapes perceptions, beliefs, and attitudes. We will study the ways in which we negotiate our multiple

identities in our interactions with others, as well as how our identities are a function of differing social environments.

Offering: **Host**

Grading: **A-F**

Credits: **1.25**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC327 Psychology of Conflict Resolution

This course will focus on the psychological causes and consequences of interpersonal, intergroup, and international conflict. Topics discussed will include such issues as the role of power, status, trust, and social identity. Students will learn about various theories related to the causes of conflict, as well as practical techniques for navigating conflict, including negotiation, mediation, and facilitation. Educational programs that teach conflict-resolution skills will also be examined.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC328 Current Research in Early Childhood

Early childhood is widely seen as a time when the environment exerts particularly strong influences on individuals, with large effects on children's risk or resilience for healthy developmental outcomes. Research in this area provides a way to consider and evaluate claims about this developmental period. What knowledge does society need about this period to promote healthy development for all children? Where do children learn social skills? Why do children play with some toys but not others? How does timing affect the impact of early interventions? What foundational skills help all children learn to read? By what mechanisms does economic poverty affect development?

This advanced seminar will explore current research in early childhood. We will focus on the period from birth to five years, drawing on empirical work in developmental psychology, cognitive science, and education to discuss major topics and debates. These include cognitive and academic foundations for later schooling; emotional development and social skills; social identity and sense of self; self-regulation and executive functions; play; adverse factors in development; risk, resilience, and vulnerability; culture, socioeconomic status, and poverty; developmental neuroscience; early childhood education; and public policy. Guest visits by experts in some of the areas will complement our readings and discussions.

Prereq: **None**

PSYC329 Neural Costs of War

This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

PSYC338 Masculinities

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

PSYC341 Psychology of Human Memory

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

PSYC343 Sleep and Psychosocial Functioning in Youth

Have you ever wondered whether it's worthwhile to pull an all-nighter in hopes of improving your grades on an exam the next day? Have you ever noticed that you snack more when you're having trouble sleeping? And why is it that some individuals seem to have the most energy late at night, while others are most alert early in the morning? This course is designed to orient students to the fascinating world of sleep and psychosocial functioning. We will briefly explore the architecture of sleep and analyze theoretical explanations for the functions of sleep. The bulk of the course will focus on examining predictors and

consequences of ("normal") sleep in relation to various aspects of psychosocial functioning, including mental health, interpersonal relationships, technology use, cognitive functioning, and chronotype. We will examine these associations specifically within the context of late childhood, adolescence, and emerging adulthood. As part of this course, you will have the opportunity to track your own sleep via an objective sleep monitor and keep a sleep diary for part of the course.

Offering: **Host**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC344 The Rise of the Neurosciences

This course examines the expansion and proliferation of the neurosciences from the early modern period to the present. We will investigate the recent claim that we are living in the midst of a "neuro-revolution" with vast social, political, and economic consequences around the globe. Yet at the same time, we will look to the past for similar moments of transition and transformation of the modern sciences abetted by experiments on the nervous system. Students will analyze texts from Descartes to Damasio, paying attention to the rhetorical explanatory power of certain epistemic objects and instruments--samples of brain tissue, synaptic networks, clinical case histories, and MRI scans--as well as the institutional power shifts that sanctioned research practices such as vivisection, phrenology, electrophysiology, and functional imaging. Through our reading of primary sources by philosophers and physicians and secondary sources by historians and sociologists, this course will explore what is at stake in the "neuro-turn," and why it provokes such a mixed reaction of hope and hype, then as well as now.

PSYC347 Science of Suicide Risk & Prevention

This course will explore the science of suicide research, prevention, and intervention. Topics will include terminology, epidemiology, historical and contemporary theories of suicide, ethical and methodological challenges to suicide research, risk and protective factors, empirically supported approaches to prevention and intervention, suicide in the media and popular culture, and emerging issues and controversies in the field of suicidology. In many ways, the field of suicide research is young and knowledge is rapidly changing. Special attention will be paid to novel methodological advances in clinical psychological science. The course will use books, empirical articles, class discussion, critical thinking, exams, and writing assignments to accomplish its learning objectives. This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness nor will it address assessing suicide risk among friends or family members.

PSYC348 Origins of Knowledge

In this course we will discuss in depth a selection of current topics in cognitive development, centering on questions concerning the origins of knowledge. (What kinds of knowledge do we possess even very early in life? How does that knowledge change over time?) We will examine these questions within specific subject areas such as object perception, space perception, number understanding, and understanding of other minds, surveying evidence from

different stages of human individual development as well as evidence from nonhuman species.

Prereq: **None**

PSYC349 Introduction to Madness Studies

What does it mean to be "mad"? Are all mad people mentally ill? In recent years, just as clinical psychologists and psychiatrists have honed their technoscientific infrastructures for studying and classifying psychopathology, a nascent academic discipline called "madness studies" has emerged. Madness studies aims to interrogate and diversify discourse about unusual, extreme, and distressing mental states, as well as to reclaim languages about madness that are viewed as inappropriate and stigmatizing. This course explores the recent history of madness studies as an academic discipline, charting its relationship to historical shifts in mental health research and practice, as well as to related interdisciplinary arenas such as disability studies, liberation psychology, and the philosophy of psychiatry. We examine the rise of consumer, survivor, and expatient (C/S/X) movements, exploring differences among those who identify as having mad pride and mental illness. With particular focus on first-person accounts of lived experience, readings cover issues of epistemic and social justice in mental health discourse. Throughout the course, students attend to pluralistic ways of understanding and studying madness, including biopsychiatric, psychosocial, spiritual, and indigenous approaches.

PSYC357 Seminar on Language and Thought

This course is an advanced seminar on the relationship between language and thought, a central question in cognitive science and a very active area of research and theory in recent years. Students will be exposed to theoretical and empirical work evaluating the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC359 Making the Psychological: Discovering, Manufacturing, Circulating

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth

claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

PSYC365 Seminar on Emotion

This seminar aims to provide an intensive introduction to what emotions are and how they influence our relations with other people. The seminar will cover general theory on emotion as well as theory on specific emotions (e.g., anger, shame, envy, humiliation). As emotions are multicomponential processes, we will examine how the social context shapes different components of the emotion process (e.g., phenomenological experience, regulation, and expression of emotion). Moreover, we will explore how emotions operate at the individual, interpersonal, intergroup, and cultural levels of analysis.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC379 Advanced Research in Conceptual Development

Students in this course work on new and ongoing research projects in the Cognitive Development Laboratory. Students will be individually matched to a research project and participate in all aspects of research including background literature review and designing, running, and analyzing experiments.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC380 Advanced Research on Attitudes

This advanced undergraduate research course is designed to help students conduct a group research project on attitudes. Students will work in close collaboration with the instructor to design, plan, and conduct an original study on social cognition and attitudes. It will include weekly meetings to discuss relevant literature, plan the study, and evaluate progress on the project that is expected to culminate in a publication-style write-up of the results.

Offering: **Host**

PSYC384 Advanced Research in Cognitive Development

This course is designed to allow advanced students to conduct a supervised group research project in cognitive development. Working with the instructor, students will conduct an experiment that seeks to answer a current question in the field of cognitive development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC386 Advanced Research in Sleep

This advanced research course is designed to provide students with an in-depth understanding of how to critique and analyze psychological research. Specifically, we will focus on research within the field of sleep and psychosocial functioning. This seminar course takes an intensive lab-based approach. Students will have access to a comprehensive dataset that includes assessments of stress, anxiety, depression, physical activity, interpersonal relationship quality, personality, procrastination, and chronotype. Based on this data, students will be expected to commit to a semester-long project, which involves analyzing data and reporting findings on a self-selected topic. Upon completion of this course, students will have a strong working knowledge of the field of sleep and psychosocial functioning. This course also provides opportunities for students to develop analytical, writing, critical thinking, and presentation skills. Students also will gain data analytic skills using the Statistical Package for the Social Science (SPSS) program.

Offering: **Host**

Grading: **A-F**
 Credits: **1.00**

PSYC394 Advanced Research in Prejudice and Stereotyping

This course will provide an overview of how to conduct experimental research in social psychology with a particular emphasis on prejudice and stereotyping. The course will progress through all stages of the research process, from idea generation to presentation of findings. Students will learn about a variety of current experimental measurement techniques (both explicit and implicit measures). Groups of students will design and carry out research projects, analyze data, and present findings to the class. In addition, students will complete weekly assignments on methodology and write a final research paper.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC260**

PSYC395 Introduction to Statistical Consulting

In this course, students will be exposed to realistic statistical and scientific problems that appear in typical interactions between statisticians and researchers. The goal is for students to apply what they have learned in their basic statistics and data analysis courses to gain greater experience in the areas of research collaboration, data management and analysis, and writing and presenting reports on the results of the analyses. An important objective of the course is to help develop communication skills, both written and verbal, as well as the professional standards and interpersonal skills necessary for effective statistical consulting.

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC397 Advanced Research in Clinical Psychology

This advanced research course provides students the opportunity to conduct supervised research in clinical psychology, specifically in the area of suicide and self-injurious behaviors. Depending on the semester and student interests, tasks may include study design, data collection, clinical interviewing, data management, data analysis, and manuscript preparation. Weekly lab meetings will focus on current topics in clinical research and will include student presentations. All students will complete a research paper in journal article format. It is expected that those enrolled in this course will work independently and take initiative to extend their learning in the areas most consistent with their interests.

Note: This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness, nor will it address assessing suicide risk among friends or family members.

PSYC398 Advanced Research in Auditory Cognitive Neuroscience

This course provides in-depth training on the methods of auditory cognitive neuroscience. We will review contemporary studies in auditory cognitive neuroscience, specifically in speech, language, and music. Students will design and implement a group project, learn to analyze the data, and write up the results in an end-of-term paper.

Identical With: **NS&B398**

Prereq: **None**

PSYC399 Advanced Research in Gambling, Drugs, and Junk Food

This intensive laboratory course provides in-depth training on the experimental methods of behavioral neuroscience of motivation and reward and provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. The capstone of the course is to give students the opportunity to carry out an independent group ANIMAL RESEARCH PROJECT in the lab, which may require a heavier time commitment for the duration of the experiment (including some research over the weekends). Students will LEARN HOW TO HANDLE RATS in a behavioral neuroscience research setting and how to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers; students will also develop their writing and presentation skills. In addition, we will review contemporary studies with a particular focus on gambling, diet-induced obesity, and drug addiction. Some of the models examined in more detail will focus on the role of reward uncertainty and decision-making in gambling, the individual differences in the attraction to reward cues in subjects prone to obesity vs. those who are resistant (with a particular emphasis on prenatal and developmental exposure to high-fat diets),

and, finally, the individual differences in the resistance to adverse consequences in models of intense desire and addiction.

QUANTITATIVE ANALYSIS CENTER (QAC)

QAC150 Working with SQL and Databases

Many of you have heard of studies that analyzed Twitter messages and predicted some phenomena--spread of flu in New York, consumer confidence index, and so on. Behind the success of these studies are the systems for data storage and retrieval. A regular user can access only the latest nine days of tweets. Any study that aspires to analyze longer periods has to deal with the issues of storing the observations and retrieving them later for analysis. The goal of this course is to show you how to do that--how to connect to various types of databases and how to retrieve and update your data. We will start with relational databases; learn SQL, the language used to query and update the data; and explore the latest developments in the database field--Hadoop and MapReduce.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC151 Working with Excel and VBA

Many of us know Excel for its spreadsheets: a quick and easy way to store some information, share it, and maybe make some charts. The goal of this course is to show you the more advanced features of Excel. We will write code in Visual Basic for Applications (VBA), learn how to import data from external databases and Web-based resources, create custom menus to interact with a user, and examine how Excel can be used in business decision making.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC155 Working with Python

This course introduces students to programming, data management, and analysis with Python. Through a series of hands-on lab exercises, students learn to work with a variety of data using a high-level programming language and associated libraries to effectively manage and analyze their data. The emphasis is on data exploration and visualization and includes work with unstructured data generated by social media interactions. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC156 Working with R

This course introduces students to programming, data management, and analysis with R. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use R's programming language and associated packages to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC158 Working with Stata

This course introduces students to programming, data management, and analysis with Stata. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use Stata's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC171 Business Modeling with Excel

Broadly speaking, this course is about evidence-based decision-making. It is intended for students with a background in Excel and VBA who want to learn how to use spreadsheets to develop business and financial models and communicate the results. Model building is different from the usual Excel skills as it focuses more on the analytical/mathematical aspects than on data wrangling and requires some basic familiarity with economic/financial models and data

analysis tools. We will start with problems where the inputs are deterministic and we must decide on optimal allocation of resources. We will then advance to problems with stochastic inputs and explore solutions either through simulation or through optimization of goal functions. Through this work we will develop the appropriate programming skills (e.g., VBA) and learn to effectively use Excel to implement our models and display the results of our analyses.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **QAC151 AND ECON300**

QAC201 Applied Data Analysis

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

Offering: **Host**

Identical With: **SOC257, GOVT201, PSYC280, NS&B280**

Prereq: **None**

QAC211 Digging the Digital Era: A Data Science Primer

The course introduces students to the practice of what has come to be known as data science. Using a multidisciplinary approach and data from a variety of sources that cover any aspect of everyday life--from credit card transactions to social media interactions and Web searches--data scientists try to analyze and predict events and behavior. The first part of the course defines the area and introduces basic concepts, tools, and emerging applications. We will describe how big data analysis affects both business practices and public policy and discuss applications in different areas/disciplines. We also discuss the ethical, legal, and privacy dimensions of big data analysis. In part two of the course, we work on data acquisition and management and introduce appropriate programming and data management tools. In part three, we concentrate on basic analytical and visualization techniques as we explore and understand the emerging patterns. Using a learning-by-doing approach in a computing laboratory, students will learn how to write computer programs in R--programming in R is a significant part of the course work--to access, organize, and analyze data through a series of small projects designed to illustrate the application of the techniques we develop for a variety of data sets and situations. Students will also engage in a semester-long project where they will access and use data from social media (Twitter) to address their own research questions.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC221 Modeling and Data Analysis: From Molecules to Markets

The development of models to describe physical or social phenomena has a long history in several disciplines, including physics, chemistry, economics, and sociology. With the emergence of ubiquitous computing resources, model building is becoming increasingly important across all disciplines. This course will examine how to apply modeling and computational thinking skills to a range of problems. Using examples drawn from physics, biology, economics, and social networks, we will discuss how to create models for complex systems that are

both descriptive and predictive. The course will include significant computational work. No previous programming experience is required, but a willingness to learn simple programming methods is essential.

Offering: **Crosslisting**

QAC231 Introduction to (Geo)Spatial Data Analysis and Visualization

Geographic information systems (GIS) provide researchers, policy makers, and citizens with a powerful analytical framework for spatial pattern recognition, decision making, and data exploration. This course is designed to introduce social science and humanities students to spatial thinking through the collection, management, analysis, and visualization of geospatial data using both desktop and cloud-based platforms. Classes will consist of short lectures, hands-on training using different spatial analysis and geodesign technologies (e.g., ESRI ArcGIS, Google Fusion Tables, MapBox), group projects, critiques, and class discussions. Weekly readings and assignments will build skills and reinforce concepts introduced in class. The course will culminate in the development of a group project. Guest lectures by faculty across campus will allow students to comprehend the breadth of applied geospatial thinking in today's research arena. The course is part of Wesleyan's Digital and Computational Knowledge Initiative and is aimed at students with limited or no prior GIS experience.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC239 Proseminar: Machine Learning Methods for Text, Audio and Video Analysis

In this course, students will learn machine learning techniques to analyze text, audio, and video data. The course consists of three parts: text analysis, audio analysis and video analysis. Each part will first introduces how these non-traditional data can be converted into mathematical objects suitable for computer processing and, particularly, for the application of machine learning techniques. Then students will learn a selection of supervised and unsupervised learning algorithms that are effective for text, audio, image/video analysis. Finally, students will explore major applications of these techniques such as sentiment analysis, speech emotion recognition, face recognition, pedestrian detection, keyframe extraction.

Identical With: **CIS239**

Prereq: **COMP112 OR QAC155 OR QAC156**

QAC241 Introduction to Network Analysis

This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-QAC**

Identical With: **CIS241**

Prereq: **None**

QAC250 An Introduction to Data Journalism

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-QAC**

Identical With: **CSPL250, WRCT250**

Prereq: **None**

QAC251 Data Visualization: An Introduction

This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.

Prereq: **None**

QAC282 Economics of Big Data

"Big data" is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly, there are opportunities and pressures to employ these techniques in other areas of the economy and society such as government, health care, and education. This course examines big-data analysis techniques and how they relate to conventional economic statistics; the effect of big data on the economy, society, and privacy; and practical methods of big-data analysis using the R statistics package.

Identical With: **ECON282**

Prereq: **ECON101 OR ECON110**

QAC301 Statistics Education Practicum

This course will serve students who are pursuing their undergraduate degree in a variety of disciplines but who want to expand their skills in statistics and applied data analysis in preparation for a future career. It will also serve students who are currently pursuing independent, quantitative research at the undergraduate or graduate level. The course will center on personal interaction in support of introductory statistics students. Active peer mentoring and supporting experiences will be based on the theory that good teachers (and learners) of statistics need to be developed, as opposed to being trained. In line with this theory, this hands-on course will provide an intensive opportunity to build specific knowledge regarding teaching and learning in the area of data-driven statistical inquiry. Students enrolled in this course will (1) attend statistics-mentoring development sessions (one hour per week); (2) provide one-on-one support for introductory statistics students during workshop-oriented class sessions (three hours per week); (3) lead small group-mentored meetings for five to six statistics students (one hour per week); and (4) monitor and critique progress on applied data assignments (one hour per week). In addition to these hands-on experiences, students will pursue a project aimed at furthering the field of statistics education. Projects may take the form of course evaluation, content/conceptual curriculum development, or translation of educational statistical software materials.

Similar to QAC380 (Introduction to Statistical Consulting), this course is aimed at providing students with an opportunity to enhance their statistical skills beyond the introductory level.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC302 Political Science by the Numbers

This course covers the basics of probability theory and statistics. The main purpose of this course is to promote the understanding of statistical concepts and how these concepts can be used to make inferences about the political world. Topics include probability distributions, correlation analysis, linear regression, generalized linear models, maximum likelihood, logistic regression, causal inference, experiments, and non-parametric modeling. Lectures will mainly cover theory, while readings will connect the concepts described during lecture to problems in political science. Whenever possible, the instructor will draw upon research in political science to illustrate the why and how of a given concept or technique. Demonstrations will allow students to "play around" with abstract statistical concepts. Most lectures will have an interactive component

involving class participation. Problem sets will cover some of the more technical aspects of what we discuss in class along with applications using real data.

Gen Ed Area: **SBS-GOVT**

Identical With: **GOVT367**

Prereq: **None**

QAC305 Exploratory Data Analysis and Pattern Discovery

The course introduces the theory and practice of exploring, describing, summarizing and detecting patterns of interest in complex datasets. Various approaches including aggregation, clustering, data visualization, and latent variable modeling will be employed. This course will give students an opportunity to develop computational skills (primarily in SAS) and to learn how to discover and interpret relationships in unstructured observational data. The applications and examples for this course will be broad and relevant to many fields of study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **QAC211 OR ECON300 OR GOVT367**

QAC307 Experimental Design and Causal Inference

The course provides the foundations and statistical thinking to design, collect, and analyze experimental data and introduces appropriate techniques for observational data when causal inference is the objective of the analysis. Throughout the course, we introduce and compare various experimental designs. We will discuss sample size and power calculations as well as the advantages and disadvantages of each of these designs. With observational data, we will explore difference-in-difference models, propensity score matching techniques, regression discontinuity designs. This course gives students the opportunity to develop further their computational skills as we learn how to describe, interpret, control, and draw inferences from experimental and observational data.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Identical With: **CIS307**

Prereq: **QAC201 OR PSYC200 OR MATH132 OR ECON300**

QAC311 Longitudinal Data Analysis

Work across different fields, from medicine and public health to social sciences and education, often involves the collection and analysis of longitudinal data-- combination of cross-sectional and time series (repeated measures for the unit of observation) data. This rich data structure provides opportunities to explore questions that could not be addressed with simpler data sets, but at the same time requires special considerations because we are analyzing observations that are not independent. The course introduces students to appropriate graphical exploration of the data and the specification and estimation of fixed and random-effects models. It also develops the basic framework for difference-in-differences models and explores their applications.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **[QAC201 or SOC257 or GOVT201 or PSYC280 or NS&B280] OR [QAC380 or PSYC395] OR ECON300 OR [GOVT367 or QAC302] OR PSYC200**

QAC312 Hierarchical Linear Models

Research questions cannot always be explored by collecting data with independent observations. Sometimes this is due to limitations or constraints on the data collection method, and other times our questions pertain to data that are measured at both the individual and group levels (e.g., patients from

different hospitals or students from different schools that belong to different districts). Hierarchical linear models (HLM), also called multi-level or mixed models, explicitly model such nested data structures and address analytical and estimation issues not accounted within the framework of the classical linear model. Using data sets from different fields of study (e.g., education, medicine, and health) students will learn to formulate multilevel research questions, estimate and critically examine HLM applications.

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **[QAC201 or SOC257 or GOVT201 or PSYC280 or NS&B280] OR [QAC380 or PSYC395] OR ECON300 OR [GOVT367 or QAC302] OR PSYC200**

QAC313 Latent Variable Analysis

The course is an introduction to latent variable modeling. Students will learn the fundamental statistical methods for structural equation modeling (SEM), including principal component analysis, confirmatory factor analysis, path analysis, and SEM for both quantitative and binary observed variables. In addition, students will learn the basic components of SEM, such as assumptions, testing model fit and indices of fit, testing competing models, estimation methods, and issues in model identification. Students will learn to develop structural equation models using AMOS, R, and/or Mplus statistical software.

QAC314 Survival Analysis

Survival or event history analysis focuses on modeling and analysis of time-to-event data—such as onset of a disease; duration of a strike; failure of a biological, physical, or social system; or recidivism). This course introduces students to survival and hazard functions, the analysis of censored data using parametric and non-parametric estimation methods; compares survival curves for different groups; and discusses competing risk models. The emphasis is on the applications of the different methods with the objective of broadening computational skills in R and/or SAS and to reinforce statistical writing and communication. These skills will be applied to a variety of problems in political science, public health, engineering, and medicine.

QAC323 Bayesian Data Analysis: A Primer

This course introduces the applied principles of Bayesian statistical analysis. The Bayesian paradigm is particularly appealing in research where prior research and historical data are available on parameters of interest. This course will teach students appropriate techniques for analyzing data of this nature as well as broaden computational skills in R. The course will lay the foundation for Bayesian data analysis that students can use to further develop skills in decision making.

QAC344 Advanced GIS and Spatial Analyses

A geographic information system (GIS) is a powerful database that allows for the collection, manipulation, analysis, and presentation of spatially referenced data. GIS technologies facilitate natural science, social science, and humanities research and any other project that uses location-based data. This course will focus on individual projects conducted within a collaborative learning framework. Each student is responsible for developing and producing a semester-long project focused on advanced spatial data analyses and/or advanced cartographic design using a GIS. Students will enter the course with an individual or small team (2--3 students) project in mind. The project may be a component of a senior thesis, work on a faculty member's research project, a community-based service-learning project, and so on. Course sessions will be a mix of studio time for projects (e.g., work time, critiques), skill development (e.g., lectures, student-led skills-training sessions), and intellectual advancement (e.g., guest speakers, conference attendance). Specific skills-training sessions will be determined by components of each project.

QAC356 Advanced R: Building Open-Source Tools for Data Science

An in-depth exploration of the R programming language and development environment; from syntax and data structures, to data analysis and visualization, report writing, project management, and software development. Students will work in teams to create open-source data science applications that can be used to manage and prepare data, perform statistical analysis, and create compelling visualizations and reports. Students will also have an opportunity to contribute to a shared Wesleyan R package that contains datasets and functions that are useful for teaching introductory and advanced data science courses.

QAC380 Introduction to Statistical Consulting

In this course, students will be exposed to realistic statistical and scientific problems that appear in typical interactions between statisticians and researchers. The goal is for students to apply what they have learned in their basic statistics and data analysis courses to gain greater experience in the areas of research collaboration, data management and analysis, and writing and presenting reports on the results of the analyses. An important objective of the course is to help develop communication skills, both written and verbal, as well as the professional standards and interpersonal skills necessary for effective statistical consulting.

QAC381 QAC Praxis Service Learning Lab

As a service learning lab, this course provides students with an opportunity to further develop their abilities to analyze data and apply their knowledge and statistical computing skills as they work closely with nonprofit community partners on data analytic projects. Students in the course will identify research questions of interest to the community partner, gather and manage data, conduct statistical analyses, and interpret and summarize results. The service

component involves providing statistical consulting to community partners by formulating and completing data analytic projects, the results of which may be used to improve services, identify areas requiring increased services and areas in which services can be made more efficient, as well as improving data collection, data reporting, and organizational functioning.

QAC385 Applications of Machine Learning in Data Analysis

The course provides a broad overview of machine learning algorithms and focuses on their application in data mining. Building on a basic background of regression analysis, and following a learning-by-doing approach, students are introduced to data mining tools and techniques that are used to identify patterns and relationships in large and complex data. While the emphasis is on intuition and application rather than theoretical results, through different case studies, students are introduced to the fundamentals of the different methods and learn how to conceptualize a problem, analyze it using appropriate tools, and communicate their results.

QAC386 Quantitative Textual Analysis: Introduction to Text Mining

We encounter computerized processing of text in almost every field of life. Google tries to infer the meaning of our search queries, online review engines try to extract information about what products are popular with the users, and across different fields scholars analyze text for insights into the processes and phenomena they study. This course will introduce you to the skills necessary to mine text for information and knowledge. You will learn how to use R to retrieve text from a variety of sources, how to use regular expressions to identify which pieces of text are useful to your study, and how to use techniques from data mining to analyze the processed text to extract information and for classification and prediction.

RELIGION (RELI)

RELI127 Catholicism and Ideology in the Hispanic World

Catholicism has played a number of roles in the cultural politics of the Hispanic world, appearing as a place of national being, resistance, and conservatism. In this course, we will read a number of texts from different periods and national contexts with a view to understanding how writers and intellectuals from Spain, Latin America, and the U.S. engage with Catholicism and the historical conditions under which they do so.

RELI151 What is Religion? Mystics, The Space Race, Kool-Aid, and the First Amendment

Were the people who "drank the Kool-Aid" at Jonestown brainwashed or did they die for a noble cause? How do evangelical Christians read the Bible and what does that have to do with their support for neoliberal capitalism? Can theology help us be better environmentalists? What's the relationship between Walt Disney, ex-Nazis, and the effort to colonize outer space? What exactly does the First Amendment protect? This class will introduce you to the ways in which we study religions by reading critical case studies about the Peoples Temple, Native American sovereignty, Jerry Falwell, Oprah Winfrey, and "freedom of religion" court cases. This is not a survey of world religions, but a way of asking how the stuff we call religion has been shaped through colonial intervention, scholarly collaboration, and legal expediency--and how it functions in relation to contemporary politics, art, and popular culture.

RELI201 Introduction to The Hebrew Bible (Old Testament)

The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What gender is God? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

RELI203 Jews & Judaism: Race, Religion, Culture

What is a Jew? Are Jews white? Must a Jew believe in God? What is at stake when defining someone as a Jew? Using sources ranging from the Hebrew Bible to contemporary films, this course examines various facets of Jewish life, paying special attention to contesting definitions of Jewishness as race, religion, and culture. Building on a chronological discussion of Jewish history, we will ask theoretical questions such as the relation between gender and biblical interpretation, the relevance of religious law in contemporary society, and the challenges of diasporic thinking to national sovereignty.

RELI204 Judaism(s): Religion, Power, and Identity in Jewish History

This course will offer students an intensive survey of the major currents in Jewish social, political, intellectual, and religious history, while focusing in particular on what it means to be a Jew in the 21st-century. The course explores how Jews are a culture, ethnicity, nation, nationality, race, religion, and more and how Jewishness gets constructed differently across different times and contexts. The course looks both locally and globally at the plurality of Jewish identities. Students will read primary historical texts from prominent Jewish thinkers and writers, as well as texts written about Jews by non-Jews.

RELI205 Dharma, Karma, and Living with the God/dess/es: Hindu Lives

Through fiction, autobiography, biography, art, a comic book, a city, and a village, this course explores some of the myriad understandings of what it is to be Hindu. In an effort to introduce students to Hindu culture and religion, a number of approaches shall engage the questions, What is Hindu dharma? and What is it to be Hindu? The class will also investigate the issue of "Hinduism," a term created in the 19th century to identify a Hindu "religion" rejected by many 21st-century Hindus. This issue expresses just one of many arising from the Indian experience of contact with the West. Overall, the course immerses students in the lives of Hindu individuals and communities so that we, as a class, can draw our conclusions about Hindu practices and meanings in different political, mythic, social, and cultural contexts.

RELI207 Buddhist Psychology in Modern Perspective

The Buddhist tradition preserves a sophisticated model of mind and behavior in the early literature of the Pali Canon, along with a profound set of practices for transforming human experience from unhealthy to healthy states. Much of this lore is of great interest to modern psychologists, scientific researchers, and philosophers of mind, and is having an impact on a wide range of contemporary fields. This course begins with a survey of the core ideas of Buddhist psychology as they are presented in classical texts, then goes on to explore how these ideas are influencing the work of mental health professionals, cognitive scientists, social scientists, and others.

RELI207F Who is the Dalai Lama? (FYS)

This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulku) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the 15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

RELI208 The Buddha: His Life and Teachings

Few human beings have had as much impact upon the world as Siddhartha Gautama Shakyamuni, known to us as the Buddha. This course looks closely at the world he inhabited, the ways he transformed it, and the body of work left behind after a lifetime of teaching. Beginning with challenges of interpretation and literary sources, the course consists of equal parts historical and doctrinal investigation of the classical texts of the Pali Canon. We seek to get a sense of both the man behind the myth and the meaning of his message, while appreciating in the process the extent to which all such investigation is shaped by one's own cultural and historical viewpoints.

RELI211 Religion, Peace, and Violence: Muslim, Hindu, Christian, and Secular Politics

Why did Martin Luther King Jr. believe that Christianity could cure American racism, while Malcolm X thought the religion promoted it? If Islam is a religion of peace as advocated by many Muslims, how do we understand the so-called Islamic State's reign of terror? How has Hindu nationalism led to violence against Muslims and Christians if Mahatma Gandhi demonstrated the essential tolerance of Hindu traditions? Secularists often claim that removing religion from politics creates a more peaceful society, yet the most violent states in the past century have been professedly secular ones.

This seminar looks to explore the complexities of present-day religions and politics by investigating specific case studies in Egypt, India, France, and the U.S. While developing a better understanding of Muslim, Christian, Hindu, and secular traditions (no background in these necessary), we will develop analytic tools to critically comprehend the political dynamics of modern religions and the religious dynamics of contemporary politics.

RELI212 Introduction to the New Testament

The purpose of this course is to provide an introduction to those writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, having as one of the chief aims of the course the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

RELI213 Refugees & Exiles: Religion in the Diaspora

Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. That this crisis also has religious overtones is evident by the so-called travel ban in the United States or the rhetoric used by right wing leaders across Europe. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. A variety of case studies—including the contemporary refugee crises in the Middle East, the black transatlantic, and the destruction of the temple in the Hebrew Bible—will raise for us various questions: What does it mean to be violently forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? This course is a Service Learning course in cooperation with WESU 88.1 FM Middletown. Each student's final project will be a radio show based on an analysis of a selected refugee crisis. To learn more and listen to last year's shows visit <https://reli213.site.wesleyan.edu>.

RELI214 Buddhism and the Body: Desire, Disgust, and Transcendence

This is a course about the body and the various ways that Buddhists have constructed, disciplined, despised, and venerated the human body. We will explore the Buddhist body in its various incarnations: the disciplined monastic body of monks and nuns, the hyper-masculine body of the Buddha, the sacred corpses of saints, the body given away in sacrifice, the body as marker of virtue and vice, the sexual body, the body transformed in ritual, and the body as understood in Buddhist medicine. Careful attention to ancient and modern Buddhist writing should enrich our understanding of what it means to inhabit a human body.

RELI216 Jesus Through Jewish Eyes

In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

RELI218 The Cosmos of Dante's Comedy

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics

and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RELI229 Tibetan Buddhism

This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

RELI232 Religions of China: The Ways and Their Power

In this course, we examine the religious worlds of China from antiquity to the present. Not only will we read key works of Chinese philosophy from the Confucian, Daoist, and Buddhist traditions, we will also investigate how these traditions find expression in art and architecture, poetry and prose, and in the lived realities of Chinese history.

In this exploration of Chinese religions, we will pay special attention to the question of what "counts" as religion, to the role of the state in defining and establishing Chinese religions, and to the power of new religious movements to intervene dramatically (and sometimes violently) in Chinese history.

RELI242 Introduction to Buddhist Thought and Practice

This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

RELI250 Islamic Movements and Modernities

The so-called Islamic State grabs headlines daily with criminal acts primarily committed against other Muslims, but also against non-Muslims. Its violence has overshadowed even al-Qaeda and the Taliban in media coverage. This seminar will track the development of these groups as well as the many more Islamic movements that reject violence and seek peaceful social change. Indeed, many Muslims object to the name "Islamic State" because they recognize the group as neither Islamic nor a legitimate state. The seminar examines how specific Muslim communities in the Middle East, South Asia, and the U.S. have engaged the modern conditions of Western imperialism, nationalism, and globalization and shaped their own forms of modernity. The seminar also

investigates the increasingly digital, transnational, and intercultural realms of Muslim experiences.

RELI255 Heretics and Heresy

What is religion all about? Is it fundamentally about belief, truth, or God? About understanding, revelation, or salvation? Is religion about one's origins, identity, or destiny? Is it about what one does or is supposed to do? How would we ever know? And who gets to say so? This class will explore the emergence of "heresy"--notions of error--in the construction of religious belief and practice in ancient Christianity, and how "heretics" became central to the way Christianity defined itself in relation to Jewish and Greco-Roman religious traditions. We will examine these issues, in part, by reading a number of remarkable, and recently discovered "heretical" texts from antiquity and early Christianity, including the Gospel of Thomas, the Gospel of Mary, the Gospel of Judas, the Gospel of Truth, and the Cologne Mani Codex.

RELI259 Islam and/in the West

Is there a clash of civilizations between Islam and the West? What distinguishes the two and why the conflict? This course, which assumes no familiarity with Islam, explores these questions and the assumptions underlying them. Through a historical and thematic exploration, we will delve into the notions of difference and the interests these have served, as well as the cultural, religious, and political dimensions of interaction at specific historical moments. These will include Arab imperialism, the Crusades, the Spanish Reconquista, European imperialism, Zionism, Islamist revivalism, Western Muslims, and the War Against Terror.

RELI268 Anthropology of Black Religions in the Americas

This course examines Afro-Creole religions and cultural expressions in selected communities throughout the Atlantic world. How were religious communities created under colonial domination? Under what conditions were religions shaped, and what shapes did they take? How are African-based religions produced through aesthetics and the ritual arts of spiritual talk and sermons, song, dance, drumming, and medicine-making? How do these religions continue to survive, thrive, and, in some cases, grow in the current historical period? This course will pay special attention to the yearly ritual cycle and its attendant festivals: Christmas, carnivals, Lent, Easter, saints' days, feasts, and pilgrimages, as well as the emergent spiritual and aesthetic traditions such as Capoeira and Rara. We will study Orisha religions such as La Regla de Ocha, or Lukumi, in Cuba and the Latino U.S.; Candomble in Brazil; Vodou in Haiti; and Garifuna traditions and spiritism in Puerto Rico.

RELI270 Magical Money and Enchanted Capitalisms

In the early days of the 20th century, Max Weber foresaw that with the rise of capitalism and modernity, the world would become increasingly disenchanting. Now, with the turn of the 21st century, people all over the world experience capitalism as a realm of enchantment. In Malaysia, ghosts possess factory workers; in South Africa, capitalism produces zombies; and in Bolivia, mines eat their miners. Instead of Weber's "iron cage," we live in a world of "voodoo economics" where Korean shamans conduct ceremonies to bless new businesses, Russian psychics curse business competitors, and prosperity theology preaches that God will make you rich. This class explores the enchantment of the financial sphere, combining theory on the disenchantment of modernity (Max Weber) and commodity fetishism (Karl Marx, Sigmund Freud, William Pietz) with ethnographic accounts of how capitalism and the economy become mystified and enchanted.

RELI271 Secularism: Godlessness from Luther to Lenin

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

RELI272 Ethics After the Holocaust

The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

RELI275F Religions Resisting Modernity (FYS)

Why did the Taliban forbid television? Why do creationists reject evolution? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western

values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, Mohandas Gandhi, the Branch Davidians, and Egyptian Islamicists each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. Ultimately, the course will challenge our very understandings and expectations of modernity.

RELI278 American Jewish Humor

This course is a look at American Jewish history through one particular lens--that of the peculiar phenomenon of Jewish humor. There is a long history of Jews and humor that has nothing to do with the immigrant experience in America, but the immigrant experience in America nonetheless has a great deal to do with the humor that has been produced by Jews in this country, particularly in the 20th century. We will read some historical background on American Jews and some humor theory as our foundation for our understanding of film viewings, short stories, stand-up comedy performances, and musical recordings. By looking at the way Jewish humor changed throughout the 20th century, we should, in the end, be able to chart the way the lives of American Jews were changing and have a deeper understanding of the American Jewish experience.

RELI279 Liberation Theology and Pentecostalism in the Americas and Africa

This course tackles the question: If liberation theology advocates a preferential option for the poor, why do the poor in Africa and the Americas often choose evangelical Protestantism? For evangelical Christianity, the common good is a by-product of the righteous lives of believers as they enact the outward signs of personal salvation. This course examines both religious thought and analysis of various Christianities of the Americas and Africa, with particular attention to the ways religious thinkers and communities grapple with and resolve questions of human rights, evangelizing race, and structural inequalities that arise in the recent era of globalization and neoliberal capitalism. Other topics will include the prosperity gospel, the growth of Christian NGOs, gender and machismo, and spiritual warfare. Case studies will include readings on the U.S., Colombia, Brazil, Haiti, and Zimbabwe.

RELI282 Religion and the Scientific Imagination

Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring "debates" between them.

RELI288 Buddhism in America: The Dharma Comes to Main Street

The American understanding of Buddhist ideas and acceptance of Buddhist practices, which has been growing slowly for some time, has quickened significantly in the last few decades. In this course we examine this process, from its early phases in the 19th century, through the impact of population displacement and increasing spiritual diversity in the 20th century, to the virtual explosion in the current century of creative engagement between Buddhism and a wide range of fields. We cover such topics as environmentalism; physical and mental health; issues of conflict resolution, social justice, race, and gender; practices relating to optimal performance, end-of-life care, and prison ministry;

and the emerging fields of cognitive science, contemplative studies, and the philosophy of mind.

RELI289 Indigenous Religions: Politics, Land, Healing

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

RELI291 From Jerusalem to Ground Zero: Muslim, Jewish, Christian, Sioux, and Hindu Notions of Sacredness

Many Jews, Christians, and Muslims view Jerusalem as a "sacred" place. But what does this mean? How does a place--or an object or person--become sacred, holy, revered? Is Ground Zero sacred? If so, how do we compare the destruction of an office building that makes part of Manhattan sacred and Native American efforts to protect venerated sites from "development" that they describe as "desecration"? Does the term "sacred" even translate in other languages? When does a stone sculpture become an embodiment of a Hindu deity?

Using examples such as Jewish, Christian, and Muslim views of Jerusalem, Lakota Sioux recognition of revered places and wicasa wakan (medicine men), and Hindu engagements with divine images, this seminar will explore these questions.

RELI292 Reason and Revelation: An Introduction to the Philosophy of Religion

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to

those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

RELI299 Imagining Communities: National Religions and Political Rituals

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadalupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

RELI301 Jesus and the Gods: Christianity and the Religions of Antiquity

This course will focus on the politics and methods of comparison in order to reveal how thinkers have described the myths and practices of early Christianity as they relate to the religions of ancient Israel, Greece, and Rome. In reading carefully a wide range of ancient texts and modern scholarly discussions, we will be thinking on several levels at once. That is, we will learn about the gods and ritual practices of ancient Greece and Rome and also think critically about the agendas of the many writers--from Plato to Thomas Jefferson and beyond--who described them for their own purposes. How did Jesus of Nazareth come to be understood as a god, who dies and rises, in a world brimming with gods? Why was he remembered as a philosopher and a martyr, like Socrates? How--and with what motives--did writers throughout history compare Jesus with the priests and

kings of ancient Israel or with the gods and goddesses of the Hellenistic Mystery Religions? What is the place of Demeter, Isis, and Osiris in the history of religion? How did early Christians understand their rituals of death and resurrection in terms of rebirth, salvation, and martyrdom? Considering themes and theories of piety and sacrifice, purity and prophecy, wisdom and narrative, ethics and philosophy, mythmaking and cultural critique, we will ask how the politics of comparison and classification have shaped not only our understanding of Jesus and Judaism, ancient Greece and Rome, but also the construction of "Judaism" and "Christianity" as religions--and the very category of religion itself.

RELI305 Pantheologies: Animal, Vegetable, Mineral, World

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

RELI307 Ritual

Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

RELI312 Indigenous Religion and the New Age: Inspiration or Appropriation?

Is imitation the sincerest form of flattery? This course examines the way in which indigenous religious practices, images, and ideas become appropriated into New Age religion. In *GOD IS RED*, Native American philosopher Vine Deloria Jr. argued that indigenous religion is superior to western Christianity and the Christian West has much to learn from it, but many indigenous people understandably object when their practices are copied by outsiders, decontextualized, and used to make a profit. Where is the line between respectfully learning from and disrespectfully appropriating? Why are indigenous practices so appealing to the New Age? How do New Age desires intersect with the needs and desires of contemporary indigenous practitioners, as well as national legal structures and neo-liberal economies? What are the contexts within which decontextualized indigenous practices and ideas become re-contextualized as New Age? We will read and deconstruct the classic manifesto of New Age spirituality *THE TEACHINGS OF DON JUAN*, examine the Ayahuasca patent case, and consider questions of intellectual property, cultural appropriation, and spiritual tourism.

RELI314 Buddhist Traditions of Mind and Meditation

This seminar surveys a range of Buddhist meditation practices in the context of traditional theories of mind, perception, and cognition, with an emphasis on the traditions of South Asia, East Asia, and the Himalaya. Beginning with canonical descriptions of the mind and its variety of mental states, the course will then examine early scriptural expositions on the two principal types of meditation techniques: tranquility or concentration meditation (*samatha*) and insight meditation (*vipasyana*). Next will be an examination of techniques for cultivating compassion and the view of emptiness that were central to the later Indian traditions of the Mahayana or Great Vehicle. The course will finally turn to the elaborate systems of Tantra that developed in India and spread through Tibet, which incorporate the visualization of deities and recitation of mantras. Readings will include both primary Buddhist canonical works and commentaries by contemporary Buddhist teachers in English translation as well as secondary scholarship on the historical context of Buddhist meditation systems, cognitive theory, and ritual practice.

RELI315 Ethics and Action in the Buddhist Cosmos

We often think about nirvana, or "enlightenment," as the ultimate goal of Buddhist practice. But the reality is much more complex. Buddhist traditions imagine a huge range of positive outcomes for moral behavior: immediate material benefits, rebirth in a better body or in a wealthier family, and enjoyment of gold-paved heavens or eternally blissful Pure Lands.

In this seminar we will read Buddhist scriptures, commentaries, biographies, narrative anthologies, and scholarly works that trace the many ways of thinking about ethics, action, and rebirth in the vast Buddhist cosmos. We will tour Buddhist heavens and hells, Pure Lands and political dystopias, as well as the complex worlds of Buddhist modernity. Along the way we will begin to think about key issues in the study of religion: narrative and ethics, magic and material culture, cosmology and sacred presence, modernity and globalization.

RELI318 Awesome Cinema: Religion, Art, and the Unrepresentable

How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the nonrational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason. Films will include "Arrival," "Interstellar," "The Exorcist," "Jai Santoshi Maa," "Passion of Joan of Arc," "Ten Canoes," and "Yeelen."

RELI348 Magic, Sex, and Scholasticism: Tantric Traditions in Asia and Beyond

The word "tantra" conjures many images: ritual feasts on illicit substances, sexual union in the service of religious transformation, alchemical journeys, and explorations of the erotic, the terrifying, and the sublime. But what precisely did tantra look like in practice? Were the worlds of tantra imagined by marginal outcasts? Monastic elites? Or were they just the wild fantasies of Western imperialists?

In this course, we will immerse ourselves in the worlds of tantra, through scriptures, ritual manuals, and art. We will read scholarship on tantra to probe the social and philosophical contexts in which tantra thrived. Finally, we will investigate the history of Western encounters with and appropriations of tantra, from Aleister Crowley to Sting.

RELI373 Religion, Science, and Empire: Crucible of a Globalized World

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all

crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

RELI375 Relic and Image: The Archaeology and Social History of Indian Buddhism

This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (1st--3rd century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts and then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, pilgrimage to the sites of the Eight Great Events in the Buddha's life, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

RELI377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or "inflationary," version of the big bang hypothesis in relation to the Christian doctrine of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast "multiverse" in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies--that is, theories that posit a rebirth of the cosmos out of its fiery destruction--in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle "decides" upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

RELI391 Religion and the Social Construction of Race

In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (1) the intersectionality of race and religion as a process in which power plays a pivotal role; and (2) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Rastafari, Haitian Vodou, Jonestown, the Christian White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

RELI393 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

RELI395 The Anthropology of Religion

What do we study when we study religion? We can observe practices, record speech, examine objects and actions—but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of "explaining away" the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

RELI398 Majors Colloquium in Religious Studies

This seminar provides an opportunity for majors to reflect even more critically upon the theories, methods, and discourses that constitute the academic study of religion. We will be concerned with current studies in history and the history of religions, the interpretation of texts, anthropology, feminist theory, and post-colonial theory. Our task is to understand and assess how scholars of religion make critical judgments. The seminar will explore how scholars operate within disciplinary communities, choose their topics, engage interlocutors, and weigh issues of emic and etic interpretation. We will seek to identify and evaluate each scholar's principles of selection, means of description, stipulation of evidence, use of comparative categories, and methods and models of argumentation.

ROMANCE LANGUAGES AND LITERATURES

RL&L122 Muslims, Jews, and Christians: Getting Along in Medieval Spain

For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is often full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why convivencia ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multiconfessional society.

RL&L123 Love, Sex, and Marriage in Renaissance Europe

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions

we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

RL&L125 Jungle and Desert Adventures

This course analyzes the constellation of images and sensations conjured up by the terms "jungle" and "desert" that are opposite but equally extreme. We will explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes. Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And finally, how do we each see ourselves in relation to landscape? What is our own version of an "extreme" landscape?

RL&L126 El Greco to Picasso: Modern Art's Passion for Golden Age Spain

This course examines the life and afterlife of the Spanish artists of the Golden Age, whose achievements reached unprecedented heights in the 17th century. Centuries later, their works took on new roles as artists of other times and cultures found their own inspiration in works of the past: Manet copied Velázquez, Picasso copied El Greco, and (famously on "Project Runway") Christian Soriano copied Murillo. What allowed these complex works to resonate so strongly in another era? Is such influence automatically a sign of success? And why have the works of Francisco Goya inspired more filmmakers than any other artist? Students will be introduced to the reading of visual art for stylistic, historical, and political content and develop a critical understanding of art and society in Golden Age Spain, as well as insights into the role of art as a cultural currency.

RL&L129 Writing the French Revolution

"Liberty, equality, and fraternity" was the slogan of the French Revolution and features three concepts of enduring interest. In this seminar we will explore the French Revolution and its antecedents--and what these can mean for us today. In the process we will delve into a number of ways of thinking and modes of representation: historical thinking, of course, but we will also get a sense of the origins of sociology and political science, the power of scientific thinking, and differences between literary and visual representation (especially films). This course will also serve as a writing workshop emphasizing the nuts and bolts of good writing and experimenting with such rhetorical modes as argument, personal narrative, persuasion, and fiction-writing.

RL&L148F Responding to Political Turmoil (FYS)

"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--including the creation of the U.S.; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The course is both academic and project-based: as we gain perspective through academic readings and assignments on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and intended to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L201 Crossing Identities & Borders: Processing Study Abroad

This course is designed to give students who have studied abroad through the medium of a language other than English the opportunity to process their experience by reflecting on its meaning in terms of their own personal and intellectual trajectory. Students will meet as a group once a week to discuss a reading of common interest. The second weekly meeting or workshop will be held in break-out sessions in the target language, during which time students will discuss the capstone project that this course will allow them to develop: a written essay, a digital narrative, an art installation, or a performance. The

workshops are designed so that students may support each other in the pursuit of their personal goals regarding a project that reflects the broadest and deepest meaning of an immersive linguistic and intercultural experience abroad. Assessment is based on the following criteria: industry and initiative; the ability to work independently; willingness to contribute actively to a collective, project-based learning experience; and the final project. Readings will address topics such as identity, culture and mobility. Students will work to develop a collective bibliography with classmates as well as a specific bibliography that accords with their personal interests and objectives.

RL&L212 Early Renaissance Art and Architecture in Italy

This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics. Museum trip(s) will expose students to original works of art.

RL&L220 Authority and Resistance: France Since 1870

Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action,

extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

RL&L221 The Pedagogy of Second Language Teaching and Learning

This course offers a foundation for second language (L2) acquisition in the classroom and teaching approaches. Specifically:

- characteristics of L2 learning
- an understanding of the most commonly used L2 methodologies and strategies
- basic know-how for analyzing and creating materials for language learning/teaching
- L2 teaching as a profession

Classes and readings will be in English, given that the tutorial combines students of French and Spanish. However, the development of students' target language (TL) is also considered a priority in the course, supported by looking at authentic and pedagogical materials, creating pedagogical materials of their own, and by using the language in class during volunteering hours.

This course is intended for students who, being FREN, HISP, or RMST majors or advanced learners in French or Spanish, may be considering a career in education, and who commit to volunteering at the Middletown public schools while taking this course (at the very least). There is a volunteering commitment of 2 hours/week minimum during the semester. Students must take this course concurrently with a FREN or SPAN course numbered 215 or above.

RL&L223 Second Language Acquisition and Teaching

This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting.

RL&L224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **COL224, ITAL224, MDST223**Prereq: **None****RL&L225F Writing Biography: Denis Diderot, a Case Study (FYS)**

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

This course aims to study five French novels from the 17th to the 20th centuries in translation, alongside and against their respective cinematic adaptations. We will begin with Lafayette's *The Princess of Cleves* (1678), one of the Western world's first psychological novels, and then move on to Choderlos de Laclos' epistolary novel *Dangerous Liaisons* (1782). We will then read Gustave Flaubert's *Madame Bovary* (1856), Albert Camus' *The Stranger* (1942), and Marguerite Duras's *The Lover* (1984). Films will include: Jean Delannoy's 1961 adaptation of Lafayette's novel, Christophe Honoré's *The Beautiful Person* (2008), a modern-day adaptation of the story, and Rémy Sauder's 2011 documentary on how the novel is being used in a French school in Marseille; three adaptations of Laclos's novel: Roger Vadim's cutting-edge *Les Liaisons dangereuses* 1960, Miloš Forman's 1989 *Valmont*, and Stephen Frears's 1998 acclaimed *Dangerous Liaisons*; three adaptations of *Madame Bovary*: Vincent Minnelli's film (1949), Claude Chabrol's adaptation from 1991 starring Isabelle Huppert, and Sophie Barthes's version (2014); Luchino Visconti's adaptation of Camus' *The Stranger* (Lo straniero, 1967); and Jean-Jacques Annaud's *The Lover* (1992). These novels and their adaptations will allow us to think about notions of canon formation; genre and narrative; the uses of history in fiction; censorship, controversy, and crime; gender, class, race, and (post)colonialism; translation; and how these texts have been and continue to be read, used, adapted, and transformed from their time of publication up to the present day.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****RL&L229 Political Turmoil**

"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--the creation of the US; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo, among others--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The goal of the course is ultimately project-based: as we gain perspective on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and destined to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the

emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

RL&L232 Obscure Enigma of Desire

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

RL&L233 Modern Italy on the Silver Screen: 1960--2015

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's *La dolce vita*, Pasolini's *Mamma Roma*, De Sica's *Matrimonio all'italiana*, Leone's *Il buono, il brutto, il cattivo*, Argento's *Suspiria*, Moretti's *Caro diario*, Ozpetek's *Saturno contro*, and Giordana's *Quando sei nato non puoi più nasconderti*. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

RL&L235 The Spanish Inquisition

Few institutions are as notorious as the Spanish Inquisition. Reviled in literature (most famously by Dostoyevsky in his *Brothers Karamazov*) and lampooned in popular culture (by Monty Python, among others), the Spanish Inquisition remains a potent symbol of both religious fanaticism and ecclesiastical power run amok. In this seminar, we will consider the history and legacy of the Spanish Inquisition, which existed for 356 years (1478--1834) and operated in both Spain and Spain's colonies overseas. We will examine not only the historical record itself (e.g., transcripts of actual trials, individual case studies) but also various depictions of the Inquisition found in imaginative media (art, literature, and film). Our subject, then, will be the Spanish Inquisition both real and imagined. Why did this institution arise? How did it survive for as long as it did? And does the legend of the Spanish Inquisition match its history?

RL&L240 Modernism and Modernity in 19th-Century French Painting

This course looks at factors that contributed to Paris's rise as the preeminent artistic center in the West at the time of the French Revolution and traces the evolution of French art throughout what would prove to be an extraordinary century of formal advance and experiment ending in Impressionism and Post-Impressionism. The story of French art is one in which timeless ideals and triumphal narratives were continually put under pressure by the imperative to model the contingency of modern experience. Themes we will explore in this class include the significance of a public sphere for art making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution; history painting; the persistence of classical ideals and their relationship to modern subjects and experience; the new focus on sensation and the rise of landscape painting; the decline of narrative in painting in favor of form and surface; the relationship between modern art and academic practice; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience; the significance of a "scientific" language in painting; and the relationship between art's embrace of privacy, domesticity, and intimacy at the end of the century and France's revolutionary legacy.

RL&L241 Introduction to European Avant-Garde, 1880--1940

This course will introduce students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

RL&L243 Art and Culture of the Italian Baroque

This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

RL&L244 European Architecture and Urbanism, 1750-1910

This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

RL&L250 Integrative Learning Project 1: Reflecting About the Liberal Arts

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

All sophomores, juniors and seniors are welcome in this course. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can take this course more than once, but only once per academic year.

RL&L254 Breaking the Waves: The Japanese and French New Wave Cinemas and Their Legacy

While the French and Japanese New Wave(s) existed as largely contemporaneous cinematic movements, rarely are they discussed together, instilling the impression of two parallel streams, never to converge or intersect. This course hopes to serve as an intervention into this perceived divide through close readings of these groundbreaking cinematic works and an examination of their revolutionary content in the interest of articulating shared philosophical concerns. In many cases, New Wave filmmakers worked as writers and critics before producing films themselves, a fact that speaks to the intensely theoretical nature of their cinema. This course will therefore examine critical writings published in the space of Cahiers du Cinema, Film Art, and other journals as a means of better understanding the thought process that underlies these films. How do these films figure as a response to that of the previous generation and how did they hope to revolutionize cinematic praxis? What was their relationship to political activism and the events of 1968? Finally, we will consider the legacy of these cinemas: What is the prevailing influence of the New Wave on Hollywood and global cinema? What aspects of the movement have been retained and what has been lost along the way?

RL&L278 European Realist Novels

The realist novel has a strangely ambivalent legacy. On the one hand, like other literary forms, it is repeatedly consigned, dismissively, to an earlier moment in literary history: surpassed by modernism, reimagined by postmodernism, and replaced by film, television, and whatever forms of new media might presently emerge. Yet it has also clearly endured--in the popular imagination as well as in the academy--as a pervasive norm, continually setting the standard against which popular narratives may be judged to be successful and (more importantly) serious. Reading these novels, then, does not just teach about an important period in literary history (though it does that, too); it gives us a better understanding of what we continue to expect from the fictional stories that claim to represent the world around us.

We will spend the first six weeks on an overview of the influential tradition of French realism, reading representative texts by Stendhal, Balzac, and Zola. In the second half of the semester, we will delve into two longer novels that have often been regarded as exemplary (even paradigmatic) works of realist fiction: Eliot's Middlemarch and Tolstoy's Anna Karenina. While the emphasis will be on the novels themselves--what they do and how they work--we will also read a small selection of secondary texts (variously critical, historical, and theoretical) on realism, narrative, and the novel as genre.

RL&L325 Race and the Enlightenment: A Historical and Philosophical Enquiry

It was during the Enlightenment Era (c. 1760-1800) that scientific reasoning, a belief in progress, and new claims on personal and political liberty swept away a tenacious medieval worldview. It was also during this era, however, that the notion of race crystalized in European and North American thought. Today, we still live with implications of this major shift, be it in classification schemes, anatomical prejudices, or ethnographical myths. This is particularly true for Africans or people of African descent. This class will bring some the Enlightenment's most prominent thinkers into dialogue with the emergency of the concept of race theory. In particular, we will focus on the clash between the Enlightenment era's belief that "all men were created as equals" and the various ways that the Black African came to be studied within "natural history" and various philosophical models. This historical backdrop will lead us not only to a discussion of the economic imperatives of human slavery but to a series of contemporary reflections on the status of the Enlightenment put forward by postcolonial critics. Note: This class is offered in the context of the Wesleyan's Center for the Humanities' "Grand Narratives/Modest Proposals" theme and speakers series.

RL&L339 Modernism and the Total Work of Art

The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

RUSS208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are

everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RUSS220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RUSS235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RUSS240 Reading Stories: Great Short Works from Tolstoy to Petrushevskaya

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. In each class, we will discuss one or two literary works. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work. These discussions, along with work on English grammar and style as elucidated by Strunk & White and R. L. Trask, will inform students' own writing (four 5-page papers). We will read works in the realist tradition from the mid-19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Babel's stories of the Civil War and of Jewish Odessa; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

RUSS251 Dostoevsky

Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RUSS252 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

RUSS254 Nobel Laureates: The Politics of Literature

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature—Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

RUSS255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *RADETSKY MARCH*, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's *I SERVED THE KING OF ENGLAND*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Milan Kundera's *THE UNBEARABLE LIGHTNESS OF BEING* refracts the Soviet

domination of Czechoslovakia through the traumas and love affairs of a quartet of characters; in Witold Gombrowicz's *TRANS-ATLANTYK* and Aleksandar Hemon's *THE QUESTION OF BRUNO*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RUSS256 The Soviet Century

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature—questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RUSS260 Dostoevsky's BRAT'IA KARAMAZOVY

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of *THE BROTHERS KARAMAZOV* in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RUSS321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSSIAN LITERATURE IN ENGLISH (RULE)

RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, *EUGENE ONEGIN*, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RULE208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RULE220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RULE235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years—whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"—have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RULE321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES)

REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, *EUGENE ONEGIN*, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

REES206 A Matter of Life and Death: Fiction in the Soviet Era

The great Russian writers of the 20th century risked their lives insisting on moral absolutes to counter Soviet doctrine. Zamyatin's *WE* inspired *BRAVE NEW WORLD* and 1984; Bulgakov's *MASTER AND MARGARITA* remained hidden for 27 years; Solzhenitsyn dared to submit *IVAN DENISOVICH* during Khrushchev's Thaw—each decade has its characteristic masterpiece. (Students who wish to read excerpts from the course readings in the original Russian should see the instructor to enroll in a 0.5 credit tutorial.)

REES208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

REES216 Secularism: Godlessness from Luther to Lenin

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

REES219 Russian and Soviet History, 1881 to the Present

Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

REES220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

REES235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years—whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"—have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

REES240 Reading Stories: Great Short Works from Tolstoy to Petrushevskaya

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. In each class, we will discuss one or two literary works. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work. These discussions, along with work on English grammar and style as elucidated by Strunk & White and R. L. Trask, will inform students' own writing (four 5-page papers). We will read works in the realist tradition from the mid-19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Babel's stories of the Civil War and of Jewish Odessa; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

REES251 Dostoevsky

Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

REES252 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

REES254 Nobel Laureates: The Politics of Literature

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature-Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as

Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

REES255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *RADETSKY MARCH*, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's *I SERVED THE KING OF ENGLAND*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Milan Kundera's *THE UNBEARABLE LIGHTNESS OF BEING* refracts the Soviet domination of Czechoslovakia through the traumas and love affairs of a quartet of characters; in Witold Gombrowicz's *TRANS-ATLANTYK* and Aleksandar Hemon's *THE QUESTION OF BRUNO*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

REES256 The Soviet Century

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

REES260 Dostoevsky's BRAT'IA KARAMAZOVY

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

REES267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

REES280 Russian Politics

The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. While the focus of the course is Russia, students will also study the transition process in the other 14 states that came out of the Soviet Union. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

The course will include a role-playing simulation of Kremlin decision making that will run over several weeks.

REES289 Indigenous Religions: Politics, Land, Healing

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

REES299 Imagining Communities: National Religions and Political Rituals

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadalupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

REES321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES344 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in

three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

REES352 The Communist Experience in the Soviet Union (CLAC)

Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

REES353 The Communist Experience in the 20th Century

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

SCIENCE IN SOCIETY PROGRAM (SISP)

SISP109 Psychology and Technologies of the Self and Social World

The psychological sciences are generating novel and remarkable understandings of individual minds, social interactions, groups, and institutions, and these findings are being extended to benefit individual and social welfare. As we dwell in a world increasingly understood in psychological terms and managed through psychological technologies, crucial questions warrant attention. What are the implications of adopting these new understandings of self and others? Does this new knowledge change us and, if so, how? How do we assess the consequences of this knowledge as it is implemented in social practices? These questions guide our examination of cases where psychological knowledge has informed new practices and policies. The cases include research on decision-making, integration, positive psychology, psychopharmacology, stress, and attitudes. Also considered will be instances where psychological ideas have been implemented then challenged, including psychosurgery and token economies.

SISP113 Care and Suffering

In this introductory course, we will explore the production and representation of human suffering, in addition to the modes of care deployed by healers, kin groups, aid workers, and state actors to alleviate the suffering of others. We will begin by mastering dominant approaches within anthropology for studying affliction. We will then examine case examples of bodies in distress. We will discover that suffering is inherently social: it is shared, socially produced, and communicated through socially learned and sanctioned means. Suffering is also social in the sense that it often begs a moral response. With that in mind, we will turn our attention to different regimes of care--such as experimental, pharmaceutical, and humanitarian care--and explore their limitations, paradoxes, and transformative possibilities. Taken as a whole, the course will invite students to question the creation and reproduction of suffering, while at the same time critically reflecting on dominant norms and forms of "doing good."

As a first-year seminar (FYS), this course will also guide and support students in fostering skills as academic researchers and writers. We will start from the position that college-level academic writing is its own genre, distinct from the kind of writing typically taught in high school, and that the steps required to hone this skill are not always transparent, self-evident, or without challenges. As such, the course will include detailed instruction, regular in-class writing exercises, and three take-home writing assignments designed to introduce students to the main principles of successful academic writing.

SISP120F Uncertainty and the Future (FYS)

The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

Identical With: **WRCT120F**

Prereq: **None**

SISP121F Living within the Bio-Logical (FYS)

How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

SISP125 TechnoPrisons: Corrections, Technology, and Society

The United States currently incarcerates more of its citizens than any other nation, and most of them are members of disadvantaged social groups. How does our government practically accomplish mass incarceration? This first-year seminar (FYS) examines prisons as technologies and the role that specific technologies play in the U.S. prison system. To say that prisons are technologies means that prisons operate as an architectural system that is designed to hold people captive within enclosed social spaces. At the same time, prisons are the location for multiple kinds of technological systems including surveillance systems, biomedical technologies, classification and administrative technologies, and military technologies. This seminar introduces basic concepts within science and technology studies (STS), criminology, and sociology to investigate how prison happens.

SISP130 Science and Technology at the Supreme Court in Current Term

This seminar will introduce students to legal decisionmaking in the context of "disruptive" scientific and technical innovation by considering several cases that will be taken up by the U.S. Supreme Court this term that concern science and technology. To contextualize the specific factual and legal disputes in these cases, students will learn about science, technology, and law as social institutions that shape each other and also shape their constituents and publics. The seminar will further consider the history and theory of the state monopoly on the use of force, which is what will be set into action by the enforcement of these court decisions.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

SISP135F Skin, Sex, State, Software: Surveillance & Society (FYS)

Scopophilia is the derivation of pleasure from looking. What pleasures does the surveillance state gain from looking at us? From feeling and documenting us? How do privacy activists fight back against such surveillance, and what might be wrong with privacy rights discourse? Which groups are always already

surveilled? In this class, students will play with notions of surveillance—including sousveillance, lateral surveillance, and counter surveillance—as engaged by queer and feminist studies, the cultural anthropology of expertise, and social studies of science and technology. We will draw on case studies ranging from police technologies, facial recognition software, Pornhub's data collection projects, TSA airport body scanners, Facebook ads, science fiction like *Black Mirror*, and more to understand how bodies, races, genders, and sexualities are made known and contested by activists, artists, corporations, and governments. Students will also collect data for a creative personal surveillance project culminating at the end of the quarter.

SISP204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to documentary film, and critical discussion and debate. In this course, we will consider texts that investigate extreme worlds, from the far north and Antarctic to the forests of the Amazon, and discuss the ways these texts incorporate ethnography, social ecology, political economy, history, biology, and technology. In addition to extreme landscapes, we will dive into social, political, economic, and scientific "scapes," from race and migration to late liberal ideology to corporate/industrial influence on science. This course is designed to explore and challenge the term "Anthropocene" as well as tackle the question of probable futures versus fictional ones, questioning how narrative and drama are entangled in the dissemination of complex truths.

SISP205 Sciences as Social and Cultural Practices

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been

most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

SISP211 Health and Social Justice

How does health become a matter of social justice? In the context of a growing prominence of activist and advocacy groups that work toward health and justice, this course will consider: how and why health advocacy groups emerge; what goals, values, and assumptions inform their work; and how they use science and other cultural resources to make claims. We will also consider the implications of activist efforts for challenging structural inequalities, state and corporate power, and the cultural authority of science and medicine. Case studies will cover a range of geographical sites in the U.S. and abroad and represent the diverse forms that such collectives assume. We will consider, for example, groups that mobilize around broad constituencies (e.g., women's health) or in response to specific health threats (e.g., cancer, HIV, and toxic exposures), as well as those more broadly committed to social justice, equity, and "health for all." In addition to exploring the above questions, readings and class discussion will be designed for students to master some of the concepts and ideas central to medical anthropology, science and technology studies, and allied fields, such as embodiment, medicalization, biosociality, hegemony, citizenship, and the production of scientific and lay knowledge. The role of the scholar-activist will also be addressed, including the particular ethical and methodological questions that arise when scholars seek to combine research and activist agendas.

SISP215 Metabolism and Technoscience

This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies.

Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

SISP217 Bioethics and Social Justice

"Health has replaced salvation," wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses--the creation and institutionalization of the discipline of bioethics--and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

SISP221 History of Ecology

The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental

experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

SISP222 Disease and Epidemics in Historical Perspective

Disease and epidemics have been powerful agents of historical change as well as determinants of human development before the advent of historical records. In this lecture course we will examine how diseases have changed human societies over time, with special attention given to the place of disease-causing organisms, from viruses to parasites, in the ecological networks they make home. Yet at the same time, we will keep in mind the ways in which human society and culture also have important causal roles in human disease. HIV, for example, arose because of human interactions with animals but reached pandemic proportions, in part, because of cultural, social, and political forces.

SISP224 Critical Design Fictions

Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to live--expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.

SISP225 Darwinian Fictions

This class tracks the discourse surrounding evolutionary science as it circulated through various spheres of American intellectual life in the decades after the Civil War. If the ideas proposed by Charles Darwin and Herbert Spencer fundamentally changed the way scientists and politicians understood the natural world and human beings' relation to it, these ideas would also influence the way writers understood the function of literature. Best summed up by Emile Zola's suggestion that, through literature, we are capable of "possess[ing] knowledge of man, scientific knowledge of him, in both his individual and social relations," authors during this period began to explore the literary possibilities of evolutionary science. By reading works of literature alongside influential scientific treatises, this course encourages students to think about the kinds of knowledge literary experience gives us access to, and the relationship between literary knowledge and other disciplinary forms that emerged at the turn of the twentieth century.

SISP235 Economies of Death, Geographies of Care

Living, dying, and care work are processes often governed by economic logics that render some lives killable and others grievable in global regimes of power. This course explores how theoretical frameworks of "economies of death" and "geographies of care" can help to illuminate how human and nonhuman lives, deaths, and systems of care are intertwined with economic logics. Whose lives are privileged over others and with what consequences? How are certain bodies made killable and others grievable? How do we understand and face care processes of death and dying, and how are these processes often geographically determined? How do we live and die well, give and receive care, and who has this privilege? This class interrogates these and other questions related to how we live and die with others in a multispecies world. With attention to race, gender, species, and other sites of perceived difference, students will gain a nuanced understanding of core themes related to fundamental processes of living, dying, and caring labor. This course asks students to theorize economies of death and geographies of care to understand the deeply political nature of life and death as differential moments on a continuum of being. We focus on key questions related to an affirmative politics of life—in other words, how we should live, how we care and for whom, and how we might foster nonviolent interpersonal life-affirming encounters. Students can expect to explore pressing contemporary issues such as mass incarceration and "social death"; climate change; valuing and commodifying life; breeding and raising nonhuman animals for food; plant consciousness; end-of-life care and euthanasia; and the role of marginalized bodies in biomedical research. The course will be primarily discussion-based.

SISP238 Witnessing Animal Others: Mourning, Haunting, and the Politics of Animal (After) Lives

Witnessing, mourning, and haunting are frameworks that make political the lives and deaths of human and nonhuman others. Bringing these frameworks into conversation, this course will explore the following questions: What does witnessing and grieving animal lives and deaths show us about economic logics, racialization, and species hierarchies that form the foundation of contemporary social relations? How does the emotional become political in these contexts? What are the limits and possibilities of witnessing and mourning as political

acts? How is witnessing distinct from spectatorship or voyeurism? What power dynamics exist in witnessing? What do different rituals or practices of mourning say about the mourner and the subject being mourned? What further action does witnessing or mourning provoke or demand? How do conceptualizations of haunting help to theorize and inform political practices of witnessing and mourning? Central to these questions is a consideration of the way histories track forward and haunt the present—how racialized, gendered, and anthropocentric histories shape contemporary social and economic relations. The course will use these theoretical frames to explore a series of empirical examples, such as: What does it mean to witness and mourn the settler-colonial histories that haunt the present in daily practices of ranching and farming animals for food? How are settler-colonial histories implicated in the phenomenon of animals killed on roads (innocuously termed roadkill) through the development of the U.S. railroad and interstate highway system and through land use change and habitat destruction? What does witnessing the captive animal in the zoo tell us about the imperialist histories of the zoo where humans and animals have been exhibited? What does witnessing or mourning do for the ghostly specters of "spent" dairy cows (lively-yet-soon-to-be-dead commodities) moving through the farmed animal auction yard and for their commodity afterlives born through slaughter and rendering? How does art act as a form of witnessing, for instance, through photographers such as Chris Jordan documenting the afterlives of plastic in the bellies of albatrosses on Midway Island? Throughout the semester, we will use art, fiction, poetry, and memoir to explore these concepts of witnessing, mourning, and haunting in the context of animal lives and deaths. The course will be heavily discussion-based.

SISP240 Research Methods in Science Studies: Studying "On-Demand Work" in the 21st Century

Pocket computers, called "smartphones," have become a part of everyday life over the past decade. Earlier, during the early years of the Internet, eBay pioneered the "peer-to-peer" marketplace, in which a business doesn't have a place of business and hire employees, but provides software that links "users" to one another so that they can make exchanges, serving the roles of "customer" and "employee." The firm that creates the software takes a commission on the sale, or simply profits from the information it gathers about the users as they make the exchange. Massive amounts of economic activity have been generated using this model: through services like Amazon's Mechanical Turk, Uber, Postmates, TaskRabbit, and many other software-based labor markets that allow people to work when they choose, as little or as much as they choose. How do we study work and workers in these kinds of contexts? This course will train students in the use of qualitative social scientific methods to examine these new working populations and the work experience of people in them. We will draw, in part, from earlier studies of mobile workplaces (such as of the police on patrol), and more recent studies undertaken by scholars of science and technology in society that help us to look for labor even where it is not intuitively evident in the digitally networked context: such as in computerized gambling, software-facilitated dating, and activity on social media. Students will read a National Science Foundation research proposal and draft their own proposal for a study of work in the "on demand," "contingent," and "gig" economy of the twenty-first century.

SISP245 Ethnography and Design

Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

SISP253 Science and/as Literature in Early Modern England

Seventeenth- and 18th-century England saw the development and popularization of the "new science." Microscopes, telescopes, airpumps, automata, and experiments captured the popular imagination. The first important scientific societies and journals were founded, and the public learned about new discoveries through sermons and coffeehouse lectures. This course will trace the literary reaction to these cultural changes. A female natural philosopher wrote utopian science fiction, and Jonathan Swift satirically skewered mathematicians and experimenters. While the best of early 18th-century nature poetry takes Newton quite seriously as it depicts the way light glimmers off objects, by the century's end, William Blake villainized Newtonian thought as reductive and deadening. We will try to understand what writers found exhilarating, scary, confusing, hilarious, or important about science at this key moment of its development. At the same time, we will read this science as literature--considering, say, Francis Bacon's symbolically fraught "idols" and Robert Boyle's "literary technology," the role of poetry in spreading scientific ideas, and the importance of analogy and metaphor to the very logic of scientific thought. The disciplines of science and literature were not as cleanly separated in this period as they are now, and we can better understand both by exploring their intersections.

SISP254 Science in Western Culture

This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called "science" and how they have attained such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have "done science" in different times and places.

Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between science and state power by exploring the changing nature of scientific authority,

the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

SISP255 Seeing a Bigger Picture: Integrating Environmental History and Visual Studies

This interdisciplinary course approaches the history of environmental policy and opinion making through a frame that takes seriously the rise in power accorded to visual imagery and visual practices (including photography, digital image production, film and new media) in modern society. The course introduces students to key landmarks in the visual history of environmentalism spanning a period from colonial America to the recent past, focusing both on images of nature and on the nature of images.

SISP256 Race and Medicine in America

This course will trace ideas of race in American medical science and its cultural contexts, from the late 19th century to the present. We will explore how configurations of racial difference have changed over time and how medical knowledge about the body has both influenced and helped to shape social, political, and popular cultural forces. We will interrogate the idea of medical knowledge as a "naturalizing" discourse that produces racial classifications as essential, and biologically based.

We will treat medical sources as primary documents, imagining them as but one interpretation of the meaning of racial difference, alongside alternate sources that will include political tracts, advertisements, photographs, and newspaper articles. Key concepts explored will include slavery's medical legacy, theories of racial hierarchy and evolution, the eugenics movement, "race-specific" medications and diseases, public health politics and movements, genetics and modern "roots" projects, immigration and new technologies of identification, and intersections of race and disability.

SISP257 Japan and the Atomic Bomb: History, Myths, and Mysteries

Even today, when discussing the atomic bombings of Hiroshima and Nagasaki, newspaper and other media sources often refer to "Truman's decision" to drop the bomb, the idea that these bombings conclusively brought an end to World War Two, arguments that they saved more lives than they killed, and assertions that the United States would not have dropped the bomb on Germany since its citizens were white. But what do the historical sources actually say on these and other related points? This course emphasizes the use of archival sources to address these and many other issues. It establishes the historical context for the atomic bombings of Japan by tracing events that led to the War in the first place, how civilians became the targets of mass bombings, and the scientific discoveries that made nuclear weapons possible. It also examines how after the War the American press and government strove to establish a particular perspective on the atomic bombings of Japan. By the end of this course students will have a

much better idea about the historical facts, the popular myths, and remaining mysteries related to the bombings of Hiroshima and Nagasaki.

SISP259 Discovering the Person

This course surveys major developments in psychology and psychiatry from 1860 to 1980. Through readings and lectures, the course introduces the major schools, theories, and systems in the American "psy" sciences. We examine the kinds of persons who were "discovered," the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine psychological phenomena that were located, catalogued, and explained by these sciences, including irrationality, sexuality, cognitive powers, personality, emotional processes, neurotic behaviors, intelligence, addictive tendencies, and the will. Attention is also given to the scientific grounds for investigating persons, the empirical evidence sought in the century-long process of discovering and naming psychological kinds, and the modes of producing this knowledge (aggregate methods, case study, and theories). Readings include primary source documents, histories of the disciplines, and philosophical analyses.

SISP262 Cultural Studies of Health

Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SISP265 Anthropology of Science

What are scientific facts? How do we know what we know? In this course, students will gain an introduction to thinking about science and technology as cultural practices shaped by power, politics, race, indigeneity, gender, and sexuality. Students will explore how anthropologists, long interested in how "culture" works, have recently turned their gaze toward critically examining the cultures of people in positions of technoscientific power, including nuclear scientists, Wall Street analysts, drone weapon designers, climate scientists, molecular biologists, and more. Students will also be trained in conducting ethnographic fieldwork on a group of experts in their own communities in order to ask questions about scientific rituals, truth-making, and distributions of power and privilege.

SISP281 Post-Kantian European Philosophy

In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult

but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

SISP282 Religion and the Scientific Imagination

Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring "debates" between them.

SISP283 What Is Rationality?

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

SISP285 History of Science and Technology in Modern China

Science, technology, and medicine played an integral role in the China's transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on "its own terms" by understanding how the unique political and social challenges of modern China shaped Chinese science.

SISP286 Philosophy of Mind

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

SISP287 Science in Modernity and After: 20th-Century Science and Technology

The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

SISP300 Black Phoenix Rising: Death and Resurrection of Black Lives

The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racism and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

SISP303 Matter, Community, Environment

In recent years, it has become increasingly difficult to consider human communities without also considering questions of "nature" or "environment." Actor-network theory condemns nature/society dualisms; ecological theory argues that there is indeed no "nature" or "society"--only the anthropocene; and, drawing from the former two positions, object-oriented ontology conceives of ideas (such as "community" or "society") as objects and ecological actors. In this seminar, we will consider various approaches taken in recent years to thinking about our relations to the worlds we inhabit. We will attempt to think not only outside a focus on "us" as humans in the first place but even outside a focus on sentient life or life in general. Examining theories of matter, community, and environment, we will discuss and analyze work by philosophers, evolutionary biologists, literary scholars, and sociologists, among others. We will pay special attention to how theorists and critics are blurring the boundaries between nature and society, environment and community, life and matter. In addition to class participation and a series of brief reading responses, students will be required to produce a final paper dealing with any topic related to the course.

SISP305 Pantheologies: Animal, Vegetable, Mineral, World

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

SISP307 The Economy of Nature and Nations

On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek *oikos*, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the *oikos* over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation.

Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

SISP318 Critical Global Health

What does it mean to approach global health as not an applied science but an ethnographic object? This course will explore this question by bringing critical, social science perspectives to bear on global health issues and interventions. This course covers three areas of scholarship. First, we will examine the processes by which social inequalities produce patterns of health and disease in globalizing contexts. This will be followed by an interrogation of the term "global health," in which we will trace its emergence as a discourse and enterprise and unpack its contested meanings. While some view global health as a clinical practice, others conceptualize it as a business, security concern, charitable duty, or human right; yet another camp probes the term's ideological construction. We will consider how such vantage points are underpinned by cultural assumptions and ethical agendas that, in turn, can determine how, and to whom, care is delivered. As a third area of inquiry, we will investigate the implications and unintended effects of doing global health by probing such questions as, When are good intentions not good enough? How useful is biomedicine for alleviating locally defined problems? Under what conditions does global health exacerbate the social inequalities it seeks to overcome?

SISP320 Life and Death: Relations of Biopower and Necropower

This seminar is an advanced examination of how science and technology shape the politics of life and death. We will consider how science and technology have become handmaidens to human (and, in some cases, not human) life and death, impacting the social, legal, and ethical frameworks we use to define what constitutes the embodied, relational, and conceptual space between "alive" and "dead." Using theories of biopower and necropower as our guides, we will cover a diverse set of themes including sexual reproduction, birth, population, toxicity, decay, genocide, mortality, and the afterlife as they intersect with modern institutions of power. We will ask, How can we better understand the ways in which social institutions and actors deploy sciences and technologies to foster health or manufacture death?

Offering: **Host**

SISP324 Race and the Enlightenment: A Historical and Philosophical Enquiry

It was during the Enlightenment Era (c. 1760-1800) that scientific reasoning, a belief in progress, and new claims on personal and political liberty swept away a tenacious medieval worldview. It was also during this era, however, that the notion of race crystalized in European and North American thought. Today, we still live with implications of this major shift, be it in classification schemes, anatomical prejudices, or ethnographical myths. This is particularly true for Africans or people of African descent. This class will bring some of the Enlightenment's most prominent thinkers into dialogue with the emergency of the concept of race theory. In particular, we will focus on the clash between the Enlightenment era's belief that "all men were created as equals" and the various ways that the Black African came to be studied within "natural history" and various philosophical models. This historical backdrop will lead us not only to a discussion of the economic imperatives of human slavery but to a series of contemporary reflections on the status of the Enlightenment put forward by postcolonial critics. Note: This class is offered in the context of the Wesleyan's Center for the Humanities' "Grand Narratives/Modest Proposals" theme and speakers series.

SISP330 Race, Science, Gender, and Species

What does it mean to be human or animal? How are these socially constructed lines drawn, redrawn, enforced, and contested? How are categorizations and contestations surrounding humanity and animality a concern for feminist scholars? How does critical theory help us to understand the (at times) uneasy intersections--or "dangerous crossings," as Claire Jean Kim calls them--where race, species, gender, and theories of science intersect to formulate ideas about humanity and animality? What theoretical and practical possibilities arise from exploring these overlapping taxonomies of power?

This course explores these questions, engaging in an ongoing conversation about how theories of science and law shape ideas about race, gender, and species. We will consider human and animal bodies in science and medicine. We interrogate how the human is a site of political contestation, articulated through colonial and racialized processes that render some lives human/subhuman/nonhuman within hierarchies of power and exclusion. Central to this uneven rendering of what it means to be human is the way law and legal processes criminalize and racialize human beings, and sustain anthropocentrism. Informed by these literatures, we move into exploring the possibilities and limits of posthumanism, with a particular emphasis on work that aims to decolonize posthumanist theory.

Within these theoretical frameworks, we move into thinking about the boundaries of the human/animal body; the politics of being and becoming in multispecies worlds; how fraught cultural and political cases where race and species intersect are negotiated; what the "feral" can add to these entanglements of race, species, and gender; the intertwining logics of species, colonialism, and empire; and how different ways of being embodied can inform a politics of multispecies care. We will conclude our work together for the semester with a collectively curated selection of readings, to be determined by our seminar.

SISP343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture

This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling. Topics examined will include: reproductive surrogacy; gender reassignment surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of "universality" and "particularity," where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimagining.

SISP344 The Rise of the Neurosciences

This course examines the expansion and proliferation of the neurosciences from the early modern period to the present. We will investigate the recent claim that we are living in the midst of a "neuro-revolution" with vast social, political, and economic consequences around the globe. Yet at the same time, we will look to the past for similar moments of transition and transformation of the modern sciences abetted by experiments on the nervous system. Students will analyze texts from Descartes to Damasio, paying attention to the rhetorical

explanatory power of certain epistemic objects and instruments--samples of brain tissue, synaptic networks, clinical case histories, and MRI scans--as well as the institutional power shifts that sanctioned research practices such as vivisection, phrenology, electrophysiology, and functional imaging. Through our reading of primary sources by philosophers and physicians and secondary sources by historians and sociologists, this course will explore what is at stake in the "neuro-turn," and why it provokes such a mixed reaction of hope and hype, then as well as now.

SISP352 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s

This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

SISP353 Health, Illness, and Power in America

In this class, we will explore the interlocking histories of health, illness, and power in America. Special attention will be paid to the ways in which discourses of the healthy body have undergirded notions of citizenship and belonging in the nation. We will consider how processes of disease, disability, and contagion have been imagined through the lenses of social difference, including race, gender, sexuality, and class. We will address civil institutions designed to manage individual and population health, and we will consider theories of political power in the making of the "modern" body.

Sample topics covered will include immigration policies and contagious disease scares; STDs and the politics of public health campaigns; physical fitness and the value of bodily labor under capitalism; the management of diseases that are symptomatic and those that are not; race- and gender-based approaches to medicine and medical difference; clinical trials and the ethics of human experimentation; regulations surrounding blood and organ donation; changing rituals of bodily hygiene; preventative medicine and the call to personal responsibility; mental health policies and institutions; and pride movements surrounding the "unhealthy" body.

SISP355 The 1918 Influenza Pandemic: A Research Seminar

This fall is the centennial of the 1918 influenza pandemic, which swept around the globe that year and caused an estimated 40 million deaths worldwide. It caused more deaths in the 20th century than any other event except World War II. In this seminar we will examine this pandemic from multiple perspectives with the goal of defining how understanding it changed from the time it occurred to the present. In class, we will examine contemporary journalistic and scientific accounts and various secondary sources, with the goal of establishing a starting point for student research projects that will be completed over the second half of the semester. We will explore sources in Olin Special Collections, various digital archives, Middletown and Connecticut State archives, and other collections as available. Possible outcomes for the class can be a paper, documentary, exhibition, or web resource.

SISP357 Algorithmic Revolutions: Fakeness, Race, and Labor in the New Artificial Age

This course plays with artificial intelligence (AI) as a cultural, sociopolitical, and literary object. Course readings will begin with the observations of anthropologists at the post-WWII Macy Conferences on cybernetics. Students will put data mining and machine learning in historical context, exploring classification systems, intelligence testing, and forensic sciences. Students will also examine the reanimation of the artificial human in newer discourses of AI, such as big data and predictive policing, virtual reality and drone strikes in commercial and military operations, health and assistive technology, and play and labor on platforms like Fortnite and Mechanical Turk. Course texts will include speculative fiction on artificial life, social theories of simulation and virtuality, and new work from queer studies and critical race studies interrogating the basis for testing artificiality and humanity. Students will conduct a semester-long project on artifice and artificiality using an avatar self, culminating in a "Theatre of the Oppressed"-style performance-activism piece exploring how digital labor produces new forms of (de)humanization.

SISP360 Making the Psychological: Discovering, Manufacturing, Circulating

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the

laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

SISP365 Nature Description: Literature and Theory

What happens to the world when we describe it using language? What happens to language? Do different modes of description and figurative language do different things to the world? Might we think of such modes--and the literary genres that offer them--as tools that help us approach and understand nature? And in what ways do these modes and the unexamined assumptions that structure them limit what we can see? How much can we really know about nature as it is, in itself, outside of our representational strategies? Further, how have modes of description changed over time, and what can we today learn from studying other ways of understanding how language reflects, touches, and transforms the material world?

This course will grapple with big questions about nature, language, literary form, and human minds--as well as the complex interactions between and among these. We will seek answers by attending closely to both literary and theoretical texts.

SISP366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

SISP367 Life of Modern Fact

Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the

present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

SISP370 Disease and Health in Modern Asia

While this course might seem highly focused and specialized at first glance, it is intended for students of all majors and backgrounds. It has two main goals. The first is to explore the influence of epidemics and diseases more broadly over the course of East Asian history while keeping a global context in mind. The focus is on China and Japan, but Korea will be included when possible. The second is to consider how historically, diseases and epidemics are best understood through multiple disciplinary approaches, including biology, epidemiology, anthropology, sociology, and iconology. Colonialism and empire--both Western and Japanese--are, of course, underlying themes throughout. We will examine several important historiographical and methodological approaches as well as some basic issues in the history of science and some important examples of specific diseases such as cholera, tuberculosis, and plague from different approaches using both secondary and primary sources.

SISP373 Religion, Science, and Empire: Crucible of a Globalized World

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

SISP374 Food Security: History of an Idea

The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

SISP377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or "inflationary," version of the big bang hypothesis in relation to the Christian doctrine of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast "multiverse" in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies--that is, theories that posit a rebirth of the cosmos out of its fiery destruction--in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle "decides" upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

SISP381 Japan's Nuclear Disasters

The atomic bombings of Hiroshima and Nagasaki in 1945 are central to the history of the 20th century. This course examines the scientific, cultural, and political origins of the bombs; their use in the context of aerial bombings and related issues in military history; the decisions to use them; the human cost to those on whom they were dropped; and their place in history, culture, and identity politics to the present. Sources will include works on the history of science; military, political, and cultural history; literary and other artistic interpretations; and a large number of primary source documents, mostly regarding U.S. policy questions. In addition, we will be examining the development of the civilian nuclear industry in Japan with a focus on the nuclear meltdowns in Fukushima and other accidents. This is an extremely demanding course.

This interdisciplinary, experiential, and experimental course combines studio learning (movement studies and interdisciplinary, creative exploration) and seminars (presentations and discussions). No previous dance or movement study is required, and the course is not particularly geared toward dancers or performers. However, your willingness to experiment on and share movement is important. We encourage you to think about movement as a method of accessing human experiences and making distance malleable, a way to explore your own sensations, thoughts, and reactions in learning history.

SISP382 Anthropocene as Modern Grand Narrative

The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's system, and the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism vs. uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale--one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

SISP384 Critical Approaches to the History of Disease and Epidemics

Epidemic disease is as much a part of the human condition as earthquakes, droughts, floods, heat waves and other natural hazards that can result in disaster. This course will examine four cases of epidemic disease: (tentatively) cholera, tuberculosis, and AIDS. While we will definitely be asking the classic historical question "what happened and how?" we also will be considering how different epistemological frameworks, metaphorical strategies, and historiographical assumptions have shaped past historians' understandings of these events, while exploring alternative approaches. Students will write a research paper as a final project on an epidemic disease of their choice using an approach that helps explore some little-examined dimension of that disease. Choices will not be limited to diseases caused by microorganisms, but also can include cancer, diabetes, and other diseases that arguably have reached epidemic proportions, whether past or present.

SISP385 Understanding Life and Mind

Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

SISP393 Materia Medica: Drugs and Medicines in America

This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

Through close reading, discussion, and active interpretation, this course will critically examine the basic writings of classical and contemporary social theorists who have influenced the practice of sociology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC231 Sociology of Crime and Punishment

This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the American system of mass imprisonment is effective, and how we might envision improvements and alternatives.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC234 Media and Society

This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding, pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC240 Comparative Race and Ethnicity

This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different consequences. Through comparisons of Western and non-Western societies, we will investigate how race and ethnicity operate as markers of social exclusion in distinctive ways.

Identical With: **AMST244**

Prereq: **SOC151**

SOC241 Mental Illness and Society

Psychiatric disorders are commonly viewed through a purely biomedical and/or a psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private "personal trouble," is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **None**

SOC244 Feminist and Queer Theories of Social Reproduction

This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

SOC246 Social Movements

How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

SOC247 Drugs, Culture, and Society

This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not.

SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

SOC257 Applied Data Analysis

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

SOC259 Cultural Studies of Health

Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications

of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SOC260 Sound and Screen

This course explores contemporary developments in the study of media, focusing on three primary areas--music, video games, and the Internet--that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and "unpack" some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupation with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

SOC269 Bad Sex

In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, "Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations." Brooks is far from alone in this critique of promiscuity. What is it about "casual encounters" and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

SOC270 Urban Societies

This course is a study of the social construction of the city focused primarily on the U.S. context. It examines various themes related to the development of modern cities beginning with the consolidation of capitalism during the industrial revolution. The class will consider the distinct experience of urban life as opposed to other modes of existence, or what Louis Wirth calls "Urbanism as a Way of Life." In addition, students will look at forms of stratification such as race and class inequality and their relationship to spatial issues such as suburbanization and revitalization. Also considered are contemporary issues such as globalization, the revival or renewal process of many American cities, environmental issues, as well as the effect of new media on how we

conceptualize the city. All of this will be done by focusing on the relationship between individual experiences and the effect of the urban environment on issues of identity construction and interpersonal relations. In order to develop critical thinking and engagement around these urban issues, the course emphasizes weekly writings and class participation in development towards a final paper.

SOC284 Memory and Violence

This course offers historical, theoretical, and empirical perspectives to the study of personal and collective violence and memory. We will examine the intersections of biography, history, and memory in reference to traumatic events, ranging from personal abuse to mass atrocity. The course focuses on issues around memory—from memorialization and truth commissions to memoir and PTSD—in the aftermath of various types of violence. The central questions about the nature and politics of memory following traumatic events will entail conversations about the construction of personal and collective identities and the complexities of justice and healing.

SOC299 The Future Perfect

Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

SOC308 Baby Got Back: Embodiment, Gender, and Sexuality in Black Music

This multimedia course uses a sociocultural approach to explore how black bodies continue to be sized, classed, sexed, and gendered through black musical expression. We will examine black music as a cultural object, both embedded in and responsible for steering national cultures, to argue that black music is indeed a lens through which to examine the struggles, contradictions, and triumphs of black peoples in the U.S. and abroad. Connecting theoretical frameworks of race, embodiment, socioeconomic status, gender, and sexuality with: (1) visual cultures of black bodies in motion (stemming from minstrelsy and chitlin' circuits to musicals and music videos) and (2) a variety of songs written, produced, and/or performed by black musicians (that include but are not limited to: the blues, jazz, rock and roll, rhythm & blues, soul, afrobeat, hip hop, dancehall, pop, soca, hip life, and reggaeton), this class will seek to interrogate how black music creates, replicates, regulates, packages, and distributes identity through a paradigm of production and consumption. We will discuss topics such as commodification, resistance, and representation while listening to artists such as Nina Simone, Sir Mix-A-Lot, Las Cruadas, former 2 Live Crew member Luke, Biggie Smalls, Mr. Killa, De La Soul, Lil' Kim, Outkast, Jill Scott, Ayisoba, Big Freedia, Alison Hinds, Nicki Minaj, and Fela Kuti to attempt to understand exactly what type of power (and magic) that music possesses.

SOC309 America's Lure: The Politics of the Transnational US University

Over the course of the last decade the number of international students traveling to the United States has more than doubled. As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the "lure" of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central

institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university.

SOC311 Abolitionist University Studies

This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

SOC313 Time, Masks, Mirrors: Aging in America

Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the socio-cultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the "aging" mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others.

SOC315 The Health of Communities

Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. We explore the concept and history of social medicine, the importance of vocabulary and the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the

generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at the Community Health Center (CHC) of Middletown.

SOC320 Life and Death: Relations of Biopower and Necropower

This seminar is an advanced examination of how science and technology shape the politics of life and death. We will consider how science and technology have become handmaidens to human (and, in some cases, not human) life and death, impacting the social, legal, and ethical frameworks we use to define what constitutes the embodied, relational, and conceptual space between "alive" and "dead." Using theories of biopower and necropower as our guides, we will cover a diverse set of themes including sexual reproduction, birth, population, toxicity, decay, genocide, mortality, and the afterlife as they intersect with modern institutions of power. We will ask, How can we better understand the ways in which social institutions and actors deploy sciences and technologies to foster health or manufacture death?

SOC322 The Sociology of Nina Simone

An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as "Mississippi Goddam" and "To Be Young, Gifted and Black" undoubtedly made social, cultural, and political contributions to American society. However, much of Simone's personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone's career, but ignited her passion to speak truth to power; and utilize cultural and sociological

paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

SOC326 Race, Fantasy and Fetish

What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to `race play`, this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

Prereq: **SOC151 AND SOC240**

SOC352 Race, Immigration, and the U.S. Empire

Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by relaying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are grafted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

SOC399G Advanced Research Seminar: Introduction to Critical University Studies

The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we're here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through a feminist, queer, and anti-racist frame. What, we will ask, does it look like to think in and about the university at this historical moment? What does it mean to consider the university's history in relationship to power and the nation-state? What are the gender, sexual, class, and racial politics of knowledge production?

And how can we most productively take up the university itself as an object of scholarly inquiry?

SOC399H Advanced Research Seminar: Hot Mamas: Black Women, Sexuality, and Body Size

Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of black women. We will journey our way through this course using the works of black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

SOC399K Advanced Research Seminar: Law & Society

In this course we will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government--the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

SPANISH LANGUAGE AND LITERATURE (SPAN)

SPAN101 Elementary Spanish I

This introductory course is designed for students without prior Spanish language study and focuses on the development of receptive and productive language skills (reading, listening, writing, and speaking) within a strong cultural framework.

Offering: **Host**

Grading: **Amp Graded**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN102 Elementary Spanish II

This course, the continuation of SPAN101, further develops basic language skills (reading, listening, writing, and speaking). The course incorporates readings and media from a variety of sources, allowing students to explore the cultures of the Spanish-speaking world.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN101**

SPAN103 Elementary Spanish for High Beginners

This course provides an intense review of elementary Spanish to allow students to advance to the intermediate level. Emphasis is placed on the four basic skills: speaking, listening, reading, and writing. Attention is also given to cultural issues concerning the Spanish-speaking world. Conversational fluency is practiced and highly expected daily.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN110 Spanish for High Beginners

Intermediate-level language course following SPAN103, with emphasis on the development of four basic language skills (reading, listening, writing, and speaking) within a cultural framework.

This course is comparable to SPAN111 and can be followed by SPAN112. Those seeking to follow with SPAN113 require permission of instructor.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN102 AND SPAN103**

SPAN111 Intermediate Spanish I

This intermediate language course places continued emphasis on the development of reading, listening, writing, and speaking skills within a strong cultural framework. The sequence SPAN111 and SPAN112 seeks to expand students' active and passive control of vocabulary and grammar and for students to gain experience in using formal and informal registers of Spanish.

Offering: **Host**

Grading: **Amp Graded**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN102 OR SPAN103**

SPAN112 Intermediate Spanish II

This course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion within a cultural framework that explores an array of topics connecting to other academic disciplines. Students will experience working with written texts and other media materials and produce a variety of written pieces.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN111**

SPAN113 Intermediate-Advanced Spanish

Within a cultural framework focused on Spain, this course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion while providing the experience of working with written texts and other media materials. Students will explore an array of topics that connect to other academic disciplines.

Offering: **Host**

SPAN201 Spanish Play

Students will be in charge of directing and staging a play in Spanish with the assistance of a Spanish professor. The workshop will take place over 10 weeks. Minimum one hour per week, which will increase to 2 as the day of the opening approaches. Rehearsals will be split between activities including reading and commenting on the dramatic text and working on diction, which can be done collectively or in smaller groups, and workshoping and rehearsing the play. Although the play will be in Spanish, we will try to allow for a wider audience by providing a brief English translation of the plot.

Offering: **Host**

Grading: **Cr/U**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN203 Spanish for Heritage Speakers

This course is designed to meet the specific needs of students who are heritage speakers of Spanish to increase their language skills and confidence. Students who take this course must have placed into SPAN112 or above. Emphasis is placed on the following: development of linguistic strategies that advance students' written and oral expression beyond the colloquial level, grammatical and orthographic norms of Spanish, critical reading (reading for understanding and analyzing what is read), and expansion of vocabulary. The linguistic work will be conducted through course materials that explore, through a variety of literary and nonliterary texts, the use of Spanish in the U.S. Materials include a textbook or manual and topics related to the experience of Spanish speakers in the U.S.

Offering: **Host**

SPAN227 Writing Short Fiction in Spanish

This course will introduce students to the fundamentals of writing short fiction in Spanish. It will enhance their command of Spanish and their skills as effective writers through the examination and discussion of many aspects of the craft of fiction writing, which will inform students' own writing and development of their personal style. We will examine essential features of fiction (methods of constructing narrative tension, climax, ambiguity, character, dialogues, and structure), as well as various fictional styles through our discussion of the writing of our peers and a study of the texts of a number of contemporary Latin American and Latinx writers working in a genre that has been crucial to the region's intellectual production.

SPAN230 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History

This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic *EL CID* (12th--13th century); the bawdy and highly theatrical prose dialogue known as *LA CELESTINA* (1499); the anonymous *LAZARILLO* (1554), the first picaresque novel; and *María de Zayas's* proto-feminist novella *THE WAGES OF VICE* (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

SPAN231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage

From 1580 to 1680, Spanish playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-

driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, and Tirso de Molina in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Cervantes's border-crossing Catalina, the Ottoman sultan's Spanish queen) and their virtuoso dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

SPAN232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America

This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

SPAN236 Cervantes

Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

SPAN250 Modern Spain: Literature, Painting, and the Arts in Their Historical Context

In this course, we study the so-called "masterpieces" of modern and contemporary Spanish literature, painting, and film (18th century to the present). The works chosen represent the major literary and cultural movements of the past three centuries: the Enlightenment, Romanticism, realism, and naturalism, the generations of 98 and 27, the avant-garde, neorealism, and postmodernism. As masterpieces, they have achieved canonical status through either the influence they have come to exercise over successive generations or their popular reception at the time of their production. In our close analysis of these works, we will interrogate the processes and conditions of canonicity. We will emphasize the relationship between cultural production and historical context, seeking to draw analogies at all times between the short stories, novels, poems, plays, paintings, and movies under consideration and the social, political, and economic milieu from which they emerged.

SPAN254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde

Our focus will be the Spanish avant-garde as reflected by the plays and poetry of Federico García Lorca, one of Europe's most celebrated authors. A substantial portion of the syllabus includes works that represent the literary traditions (classical, medieval, Golden Age) and contemporary intellectual context (1900-1936) that influenced Lorca. These readings will help us to understand how the modern and the popular interact in the literature and visual arts (Picasso, Dalí, Buñuel) of this period of intense intellectual ferment. Given the interaction of intellectual and ideological ferment during these years, we will also focus on the relationship between art and ideology generally speaking, and especially on Lorca's profile as a modern bard or public intellectual in the context of the Second Republic (1931-1939), Spain's first important experience with progressive democracy.

SPAN255 Constructing Barcelona Through Its Margins: Contemporary Spanish Culture Through Catalonia

This course seeks to examine the physical and cultural construction of Barcelona through the ways it has been understood across artistic mediums, social and historical periods, and political spectrums, especially along its margins. This marginality will allow us to look into contemporary Spanish culture from a new perspective, understanding the complexities that lie under the idea of a nation. The course also explores some of the tensions between modernization projects and cultural production during the 20th and 21st centuries, examining representations of the city in literature (poetry and prose), maps, films, performance, and photography.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN256 City, Mobility, and Technology: Towards the Modern City in Spain

Movements, itineraries, encounters--these are some of the elements that have characterized modern literature. From the Baudelairean figure of the flâneur to the car chases of popular movies like *Bullit*, the city is described from a series of journeys that create a representation of urban space. However, these narratives reveal more than a personal account of the city: they show the urban architectures that allow the movement in those spaces (ie, paths, roads, lighting) and in doing so they portray the development of the modern city.

With this framework in mind, in this course we will analyze the construction of the modern city in Spain through literary and filmic texts. We will pay special attention to Barcelona and Madrid, but we will also look at how other international cities are perceived and represented in Spanish literature. In doing so, we will explore how these authors understand the modern city and the international connections and influences that shaped it at specific historical moments.

SPAN257 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain

In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged into the limelight of Spanish national cultural discourses. Although they represent discrete realities--not all Gypsies identify with flamenco and not all flamenco artists are Gypsies--correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain's dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to foster a deeper understanding of the importance of the Roma community within

the framework of European and Spanish culture and a deeper appreciation for flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

SPAN258 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

SPAN259 Detective Fiction: Procedure and Paranoia in Spanish Narrative

The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective--a person who is generally outside the law and sometimes crazy or paranoid--help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

SPAN261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

SPAN262 Through Foreign Eyes: The U.S. in Spain in the 20th Century

Although the relationship between Spain and the U.S. has a long history that can be traced back to colonial times, during the 20th century, an extensive corpus of literature in which Spanish authors portray the U.S. prominently becomes visible. The appearance of this body of work gives rise to a series of questions: How do Spaniards see the U.S.? What are the consequences of this understanding? Why is there such interest in portraying the U.S. from a Spanish point of view? Of course, cultural and social definitions are constructions always limited to historic, social, and cultural events, be they of a military, political, or purely commercial nature. One could think that these portraits dwell on stereotypes; nonetheless, we are before a literary production that uses the U.S. to create a narrative about how Spain enters a global economic market through a cultural exchange. These are texts about traveling, the construction of the individual, and the shaping of a nation; texts that cross the boundaries of literary genres to define Spanish identity. We are before the construction of a narrative that questions the building of alterity and shapes the identity of modern Spain. In our approach to the main historic events that define the relationship between Spain and the U.S. during the 20th century, we will examine novels, poems, and movies that result from such events to analyze questions related to identity, globalization, localism, modernity, and nation. What we will engage in is, in fact, a debate about how we define ourselves, whether we are Spanish or American, through foreign eyes.

SPAN264 Orientalism: Spain and Africa

Over the past several decades, North African and Middle Eastern cultures have become conspicuously important within the Spanish cultural arena. Translations of writers from Lebanon to Morocco abound in Spanish bookstores. Spanish

writers have begun addressing North African and Middle Eastern issues with greater frequency, especially in their novels. The dramatic rise in the African immigrant population in Spain during the 1980s and 1990s, meanwhile, has been matched by a rise in press coverage of issues pertaining to Africa and the Middle East. These factors constitute the point of departure for our historical overview of the treatment of Islamic cultures in modern Spain, from early 19th century to the present. Guided by Edward Said's seminal essay, *ORIENTALISM*, we will assess the extent to which (and the process by which) Spain passes from the Orientalized subject of European Romanticism (painting, literature, music) to an Orientalizing European power in the late 20th century. In doing so, we will seek to relate the representation of Islamic cultures in Spanish literature and painting to social, political, and economic factors, most important of which was Spain's military invasion into Morocco in the late 19th and early 20th centuries. We will also survey changing attitudes among Spanish intellectuals with regard to the Islamic world and toward Spain's Islamic heritage, the result, perhaps, of 20th-century modernization and, most recently, of Spain's full integration, after Franco's death, into Europe's military and political structures. The tools for this study include works of literature primarily, but we will also focus on painting, historical essays, newspaper articles, and film.

SPAN267 Image/Word: Narrative and Photography in Contemporary Spain

The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization. That is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar in which the students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life. To do so, the students will work with the help of an artist, the photographer Consuelo Bautista, who will help them to develop a project in which they will connect their own experience with what they have seen in class.

SPAN271 Modern Technologies in Latin American Literature

Modern communication technologies and modes of transportation have been a recurrent theme in works of Latin American writers from the 20th and 21st centuries. For example, radio was a significant source of inspiration for avant-garde Mexican poets Manuel Maples Arce and Luis Quintanilla in the 1920s; they both tried to capture the uncanny experience of hearing disembodied human voices through writing. In this class, we will discuss texts that likewise reflect on the effects of various modern means of transport and communication—such as trains, subways, radio, telephone, tape recording, and the Internet—with an emphasis on how these technologies have revolutionized human relations. We will examine how these literary works exceeded the aesthetic or sociopolitical norms of their time, while keeping in mind that the simple act of writing is also a form of technology, and often a transgressive one.

SPAN273 Beyond Machu Picchu and Macondo: Real and Imaginary Worlds in Latin American Letters

Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and of the Nuyorican writer Tato Laviera (1970s), and César Aira's Colón (Panamá) and Fernando Vallejo's Medellín (Colombia). In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904–1914), the Cold War (1947–1991), Latino identity in the context of Puerto Rico and New York City, the coup d'état in Chile on September 11, 1973, and the drug wars. When possible, films and short videos will be used to help build knowledge of historical context.

SPAN275 Multilingual Aesthetics in Latin America

This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

SPAN276 Body, Voice, Text: Theater and the Transmission of Experience

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

SPAN278 Dangerous Plots: Fictions of the Latin American Jungle

This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

SPAN279 Latin American Theater and Performance

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

SPAN280 Screening Youth in Contemporary Latin American Cinema

This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

SPAN281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as "islas sonantes" (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

SPAN282 Narratives of Crisis: Violence and Representation in Contemporary Latin American Culture

How have Latin American literature, film, and performance of the past three decades articulated the many forms of violence in a region facing complex armed conflicts, wars deployed around the drug trade, and diverse forms of political unrest? Focusing on Colombia, Peru, Central America, and Mexico, we will investigate how contemporary cultural artifacts reflect on the linguistic, ethical, and social dimensions of subjectivity in times of crisis and provide productive analytical frameworks to examine violence, history, and memory in the region.

SPAN284 Tales of Resistance: Modernity and the Latin American Short Story

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

SPAN285 Asian Latino Encounters: Imagining Asia in Hispanic America

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Darío, Tablada, Gómez Carrillo, Balmori, etc.). Then we will assess travel writings produced across the Pacific—from Mexico to India (Paz), from Chile to Southeast Asia (Neruda), from the Philippines to Chile (Medina), and from Mexico to Japan (Tinajero). Finally, we will examine diverse works by writers/artists of Asian descent in Hispanic America as well as Asian Latinos in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Hispanic America? How does Philippine literature in Spanish produced during

the US colonial period modify our conception of what is "Hispanic," "Asian," and "American"? By looking at the trans-Pacific reach of the Hispanic, we will be in a better position to appreciate the complexity of the cultural, social, and ambiguous political legacies of Spanish and US colonialism.

SPAN286 Bolívar's Afterlife in the Americas: Biography, Ideology, and the Public Sphere

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

SPAN287 Constructions of the Self

How does one define oneself? What forces are active in the creation of our personal identities? How much control do we exercise over these processes? What role do writing and literature play in the construction of notions of the self? While these questions are timeless and know no geographical boundaries, we will examine how several different Latin American and U.S. Latino authors have addressed these concerns in their art, with an eye toward understanding the cultural specificity of each of their propositions, as well as how writing itself becomes the subject of writing in the search for subjectivity.

SPAN290 From the Muralists to the Narconovela: The Public Intellectual in Mexico

Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

SPAN291 Spanish American 'Modernismo' in a Global Context

The publication of Nicaraguan Rubén Darío's *AZUL...* in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

THEATER (THEA)

THEA105 Production Laboratory

This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions happen. All sections will participate in the backstage work of the Theater Department's productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

THEA135F Documentary Performance: Theater and Social Justice (FYS)

This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course's initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based

on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.

THEA150 Plays and Performances

This course is designed to introduce students to a wide range of plays that are representative of different theatrical genres, styles, and canons. We will read scripts, attend productions on and off campus, and engage in discussions about the artistic merits and sociocultural contexts of these works. The course is divided into two greater units: the meanings of avant-garde (the making of 20th-century theater), and representations of the margins (theater and identity). Some of the plays examined in this seminar are *A Doll's House* (Ibsen), *The Jewish Wife* (Brecht), *Fefu and Her Friends* (Fornes), *They Alone Know* (Tardieu), *Spring Awakening* (Wedekind), *Endgame and Act Without Words* (Beckett), *Cloud Nine* (Churchill), *Kiss of the Spider Woman* (Puig), *The Laramie Project* (Kaufman), *Irma Vep* (Ludlam), *Fires in the Mirror* (Anna Deavere Smith), and *M. Butterfly* (David Henry Hwang).

THEA172F Staging America: Modern American Drama (FYS)

Can modern American drama—as cultural analysis—teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern

This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's *Poetics* and Plato's *Republic*. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy ¿ for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

THEA203 Playing in the Theater Archive: An Introduction to Theater and Performance Studies

This class will serve as an introduction to theatricality, performance studies methods, and aesthetic theories. Over the course of the semester, we will explore theater and performance practices from Sophocles' "Oedipus the King" to Young Jean Lee's "The Shipment." We will analyze plays and performances as we examine classical and contemporary conceptions of the theatrical. Given the complex and varied roles theater has played throughout history, we will begin by placing pressure on the terms "theater" and "history." We will pay particular attention to the intersections between theater history, dramatic literature, cultural performance, and the role of the theater archive as we explore key moments in theatrical development. Readings will be organized geographically and diachronically, giving us a mobile and flexible account of theater, theory, and practice across a variety of cultures. At the end of this course, students will be familiar with touchstones in theater history; be able to write a critical and descriptive performance paper; demonstrate a knowledge of critical performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.

THEA210 Shakespeare

This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

THEA212 Composition Across the Arts

Grounded in embodied art-making practices, this survey course will introduce students to art-making processes in dance, performance, creative writing, and sound. Connections will be explored amongst the disciplines and students will be encouraged to discover their own unique and hybrid forms. The class will be facilitated by Nicole Stanton with modules taught by resident and visiting artists from across the arts. The first part of the semester will focus on hands-on experimentation, contextual readings, viewings, and discussion. In the second part of the semester, students will create their own creative projects, participate in in-depth critique sessions, and develop a digital portfolio to document their work. The course will culminate in public exhibitions and performances of the student's creative projects. This course can serve as the gateway to the Dance Major.

THEA213 Performing Arts Videography

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's *Pina*, Elliot Caplan's *Cage/Cunningham*, John Cohen's *The High Lonesome Sound*, and Peter Greenaway's *Four American Composers*.

THEA220 Performing Indonesia

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breuer, and Julie Taymour, who have all collaborated with Balinese performers.

THEA221 Rescripting America for the Stage

This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of source materials related to all forms of American culture from the revolution to hip hop. Initially our primary source material for adaptation will be Herman Melville's "Confidence Man." We will examine a range of performance texts adapted from nontheatrical sources, including Lin-Manuel Miranda's "Hamilton" and Dario Fo's subversive rewrite of Columbus' voyages, "Johan Padan and the Discovery of the Americas." Ancient Greek drama will also be studied for its dramatic structure and for its significance as a source for American adaptations such as Lee Breuer's "Gospel at Colonus." This course counts as a workshop and techniques course for the Writing Certificate.

THEA224 Medieval Drama: Read It and Be in It

It was and still is revolutionary theater! This course will examine early English drama in its many forms, from the civic mystery cycles of the 15th century to the morality plays Mankind and Everyman. We will cover topics including the role of drama in defining communal identities, dramatic interpretations of gender, and the responses of drama to contemporary social and religious controversies. Most readings will be in modernized and annotated Middle English, so we will pay close attention to language.

THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage

From 1580 to 1680, Spanish playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, and Tirso de Molina in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Cervantes's border-crossing Catalina, the Ottoman sultan's Spanish queen) and their virtuoso dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance

What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

THEA235 Writing On and As Performance

This course focuses on developing descriptive critical writing skills. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Claudia Rankine, Eve Sedgwick, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, and free form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists.

THEA237 Performance Art

This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

THEA238 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective

experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

THEA243 Theater/Drama Traditions of China and Japan

This seminar offers a window into Chinese and Japanese drama and theater traditions from their beginnings to the 20th century. We engage issues of dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the Chinese dramatic genres of zaju and chuanqi; Chinese performance styles of Beijing opera and Kunqu; and Japanese dramatic genres and performance practices of noh, kyogen, kabuki, and puppet theater. Throughout the course, we engage closely with dramatic texts as literature, giving detailed thematic readings to some canonical and non-canonical plays. We also consider how dramatic writing and theatrical performance relate to broader trends in sociopolitical history and literary history, exploring how dramatic texts and theatrical performance embody a multivalent and multisensory space that is unique among creative enterprises. We deal with both the actor and the text, and consider how each are conditioned by modern and premodern contexts. No prerequisites are required, although some prior knowledge of China or Japan is helpful.

THEA246 Adornment: The Human Body on Display

Personal adornment has been important throughout history in demonstrating distinctive features of world cultures, creating forms and images that illustrate spiritual beliefs, as well as representing individuals or groups through the use of decorative elements.

In this course, we will explore the many ways adornment - through the manipulations of makeup, hair and millinery accessories - can create a profound transformation in the appearance of the wearer. These adornment techniques have been a source of fashionable expression for thousands of years - from the kohl rimmed eyes of the ancient Egyptians to the elaborate hairstyles of the Greeks and Romans, to the beauty marks that were popular with French nobility in the 18th century. Contemporary use of adornment can be seen in the constructed artistry of David Bowie's alter egos for performance in the 1970s and Lady Gaga's innovative use of prosthetic makeup for facial enhancement.

THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde

Our focus will be the Spanish avant-garde as reflected by the plays and poetry of Federico García Lorca, one of Europe's most celebrated authors. A substantial portion of the syllabus includes works that represent the literary traditions (classical, medieval, Golden Age) and contemporary intellectual context (1900-1936) that influenced Lorca. These readings will help us to understand how the modern and the popular interact in the literature and visual arts (Picasso, Dalí, Buñuel) of this period of intense intellectual ferment. Given the interaction of intellectual and ideological ferment during these years, we will also focus on the relationship between art and ideology generally speaking, and especially on Lorca's profile as a modern bard or public intellectual in the context of the Second Republic (1931-1939), Spain's first important experience with progressive democracy.

THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **SPAN261**Prereq: **None****THEA266 Black Performance Theory**

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer" and "feminist," we will pair theoretical readings with theatrical sites. Authors and artists to be discussed will include Judith Butler, Paula Vogel, Holly Hughes, Beth Henley, Karen Finley, Samuel Delany, Nao Bustamante, Rebecca Schneider, Anna Deavere Smith, José Muñoz, Jill Dolan, Sylvia Rivera, Sharon Hayes, Sharon P. Holland, Bikini Kill, boychild, Lucy Lippard, Laurie Weeks, and Dean Spade.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **AMST276, FGSS267**Prereq: **None****THEA269 Introduction to Performance Studies**

Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the "performance" as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA276 Body, Voice, Text: Theater and the Transmission of Experience**

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **SPAN276, LAST276**Prereq: **None****THEA279 Music Theater Workshop**

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **MUSC230**Prereq: **THEA199 OR MUSC103 OR MUSC201****THEA280 Award-Winning Playwrights**

With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL281, AFAM279**Prereq: **None****THEA281 Introduction to Directing**

In this basic experimental studio course, students investigate the role and work of a director. Through practice and discourse, topics to be considered include

the director's analysis of text, research, working with actors, blocking, rehearsal procedures, and directorial style.

Prereq: **None**

THEA292 Spectacles of Violence in Early Modern French Tragedy

The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., *Medea*), religious narratives (e.g. *David and Goliath*, *Saint Cecilia*), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

THEA297 Latin American Theater and Performance

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

THEA306 Techniques of the Liar: Performance, Artifice, Fraud

This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding,

fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

THEA309 The Actor's Work on Psychophysical Actions: A Nonrealist Approach

The course offers an in-depth studio experience in Jerzy Grotowski's approach to the creation of psychophysical actions outside of the frame of realism. The term psychophysical action was coined by Russian director and pedagogue Konstantin Stanislavsky, who dedicated his life's work to the elaboration of the first Western acting system. Stanislavsky viewed the acting conventions of Romanticism and melodrama as "false," inadequate, and passé. As a proponent of realism, then an emerging theatrical genre, Stanislavsky sought to develop an acting system that would support the creation of "truthful" actions on stage. The late Polish director Jerzy Grotowski continued Stanislavsky's research on the method of psychophysical actions. In response to the theatrical trends of his time, Grotowski's own research aimed at freeing actors from the conventions and materials of realism. Instead of departing from dramatic literature, students in this course will learn how to create psychophysical actions using points of departure such as personal memory, short stories, poems, visual materials, objects, traditional song, and so forth. The goal is to guide them to create repeatable scores of psychophysical actions; select, extend, and/or omit specific fragments in their score; juxtapose text or song to the physical score; and use objects in a manner that is precise and expressive. During the second half of the semester, students will learn how to "edit" their scores of psychophysical actions in partner and ensemble work. This portion of the course provides actors with insight into directorial work, a knowledge that gives them greater autonomy in the creative process.

THEA310 Shakespeare's Macbeth: From Saga to Screen

A close reading of Shakespeare's play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare's "sources," then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare's contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of *MACBETH* from 1948 to the present.

THEA315 Stage Management

This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time management, industry standards, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work, or hinder it.

Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show.

Potential projects include: Auditions to Opening night paper project of a show, calling a pre-produced dance piece, and interviewing a professional working Stage Manager.

Gen Ed Area: **HA-THEA**

Prereq: **THEA105**

THEA316 Advanced Topics in Performance Studies

Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, linguistics, critical race studies, psychoanalysis, and queer theory) that orbits conceptions of "the live." We will use "performance" as both a practice and lens to explore art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances we will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams. Student projects will take the shape of both critical theoretical papers and practice-based research projects.

This counts as an Expanded Field of Theater course for the theater major.

THEA318 Introduction to Viewpoints

In this studio class, students learn and are immersed in the Viewpoints--a vocabulary which breaks down the two dominant issues any performance-based artist deals with: Time and Space. Students practice the Viewpoints and learn a language for talking about what happens on stage. Through practice, students develop tools not only for their own individual work, but for collaboration, offering ensembles a way to quickly generate original work. While a form of movement improvisation, students will also apply the Viewpoints as a means to staging to text as well as generate composition pieces. This class is open to directors, actors, designers, dancers, choreographers, musicians, composers, and writers.

THEA319 Voice and Heightened Text

This is an advanced acting class in studio format focusing on the skills of voice, speech and movement in current practice as adapted by professional directors and actors. Students will follow a progression of in-class exercises designed to respond to textual demands through ongoing scene study techniques, vocal explorations and physical commitment in performance of heightened text. Examination of text will culminate in close study of Shakespeare's First Folio and its clues to performance. Students will study, analyze, memorize, rehearse and perform scenes and monologues.

THEA348 Music and Theater of Indonesia

Since the early history of Indonesia, the Indonesian people have continually been in contact with a number of foreign cultures. Particularly, Hinduism, Islam, and the West have had significant impact on the development of Indonesian culture. This course is designed as an introduction to the rich performing arts and culture of Indonesia. A principal theme will be the differing intercultural and interreligious experiences in the two neighboring and related cultures of Java and Bali. In light of the increasingly contentious global geopolitical environment in our post-9/11 world, the course pays special attention to the impact of the recent deeper Islamization on Indonesian performing arts. A portion of the course is devoted to demonstrations and workshops, including instruction of performance of Terbanggan (an Islamic frame drum ensemble) and Gamelan (percussion ensemble of Java and Bali).

THEA351 Melodrama Since 1700

Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like Mozart's *Magic Flute*, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator's declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg's *Pierrot Lunaire*. But slowly melodrama as a term began to take on connotations relating to one of comic opera's central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in *Mildred Pierce*). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

THEA357 Space and Materiality: Performing Place

Scenography explores and shapes the material world in and through the performative event. In site-specific performances, scenography transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and hands-on understanding of the material potential and limitations of the four key elements involved in the scenographic project--artistic design, the actor's body, local architecture, and time.

This course is divided in four units: site-specific interventions; street performance; immersive theater; and theatrical apparatus. Each unit includes

scholarly readings, assignments in performance and scenography, and a response paper. The final project for the course is a performance intervention devised for a particular site on campus that demonstrates the student's cumulative grasp of site specificity, scenography, and materiality.

THEA359 Space Design for Performance

In this course, students will study, construct, and deconstruct the performative space, whether theatrical or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software, utilizing design-technology tools, such as laser cutters and 3D printing, to develop and enhance their work.

THEA364 Friendship and Collaboration: In Theory, In Practice

How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, black thought, and indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship,

we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA365 Greek Tragedy: Euripides

Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

THEA366 The Sounds of Black and Brown Performance

This course organizes itself as a scene of listening with care to black and brown sounds, where listening is conceived as a mode of audience engagement of performances informed by avant-garde, queer, and critical race theories. Listening, then, is part of the artistic-theoretical practices that students will both read about and act out in this course. Here, we will engage theater, dance, and performance with the demand of listening in brown for the distinct sounds made in different performances, whether by identifiably racialized artist-subjects or not, and how they compel us to think of embodiment. If to say black is to say abjection, prison, AIDS, as well as the generative, the contra-rationally beautiful (Moten), and if to say "gender-y" is to say threatening, off-kilter, violatable, as well playful, and transformative (Sedgwick, Doyle), then what happens when we listen in brown, that is, with the headphones of melancholia, depression, as well as wildness, the excessive, the "hot and spicy" as critiques of the violence of the whitened norm (Muñoz)?

THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora

This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

THEA390 Performance Ensemble

Since theater is an art of collaboration, this course will offer advanced acting, directing, and playwriting students an opportunity to develop their skills in an ensemble environment and to collaborate on creative practice. Students will explore creating text, embodying performance, and developing an understanding of dynamic space with the goal of engaging collaborative processes. Techniques of storytelling, negotiation of differences in communication, and developing a coherent and cohesive theatrical event will be explored. Students will go through all stages of research, improvisation, rehearsal, and analysis of preparing a theatrical performance for an invited audience in a workshop structure.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.

WRITING (WRCT)

WRCT110F Academic Writing in the US for International Students (FYS)

This course is designed to prepare international students for U.S. academic writing including academic vocabulary, essay structure, and content expectations in all subjects. Students will focus on increasing their academic vocabulary, enhancing their analytical writing, and improving the cohesiveness and mechanics of their writing. They will also read and write essays in a variety of genres. The course is recommended for international students and students who immigrated to the U.S. after middle school.

WRCT112F The Logistics of Climate Change (FYS)

According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about

that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can't be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

WRCT113 A Nation of Immigrants?

America is a nation of immigrants. This ideological epithet has come to define the American experience as one of opportunity, advancement, and national incorporation. This course will interrogate the popularity of this story: How did the American experience become defined through an immigrant experience? What experiences does this narrative absorb and what experiences does it erase?

To answer these questions, we will practice close reading, critical thinking, and consistent writing in order to exhume narratives embedded in a variety of texts such as legal documents, political speeches, poetry, social movements, and short stories in order to explore how this particular American experience is constructed, deconstructed, and reconstructed in the social and cultural imaginary. The first part of the course will historicize the narrative of "America as a nation of immigrants" and investigate how it developed throughout the 20th century. We will then consider what stories this national narrative mutes by exploring how contemporary writers take up, challenge, and change the story of America as a nation of immigrants.

WRCT114F Why You Can't Write (FYS)

As anyone who has ever sat at a keyboard knows, writing can be frustrating. And intimidating. Even the most successful writers often doubt themselves and feel frightened of the blank page. As John Warner points out in his 2018 book "Why They Can't Write," schools and other institutions often stress approaches to writing that seem designed to limit rather than enable a writer's skill and creativity. In this First Year Seminar, students will explore and develop their writing strengths as we join scholars and thinkers like Warner in investigating what writing means and how it functions both inside and outside of higher education. Reading widely in composition studies, rhetorical studies, literacy studies, and critical university studies, students will explore ideas about the writing process and practice, multilingualism, code-meshing, and pedagogy that will require us to consider the purpose of education and communication quite broadly. Students can expect to write weekly reading responses, produce a personal literacy narrative, develop writing assignments, and practice conducting research during the semester.

WRCT116F The Literature of Travel (FYS)

Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of 'travel literature,' including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT120F Uncertainty and the Future (FYS)

The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)

Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)

How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology

impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

WRCT135 Writing about Research: U.S. Style

This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT140 Teaching English as a Second Language

This course explores theories and teaching methods related to learning English as a second language (ESL). Students will critically examine current and past "best practices" for teaching ESL and the seminal theories they are based on. In addition, we will discuss the various needs of English language learners including both children and adults coming from a variety of social and cultural backgrounds. Students will be asked to apply what they've learned by creating their own lesson plans and activities, critiquing ESL textbooks, and giving teaching demonstrations.

WRCT200 Integrative Learning Project 1: Reflecting About the Liberal Arts

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

All sophomores, juniors and seniors are welcome in this course. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can take this course more than once, but only once per academic year.

WRCT204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to documentary film, and critical discussion and debate. In this course, we will consider texts that investigate extreme worlds, from the far north and Antarctic to the forests of the Amazon, and discuss the ways these texts incorporate ethnography, social ecology, political economy, history, biology, and technology. In addition to extreme landscapes, we will dive into social, political, economic, and scientific "scapes," from race and migration to late liberal ideology to corporate/industrial influence on science. This course is designed to explore and challenge the term "Anthropocene" as well as tackle the question of probable futures versus fictional ones, questioning how narrative and drama are entangled in the dissemination of complex truths.

WRCT205 English Language Learners and US Language Policy

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the U.S. legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

WRCT223 Translating a Story

This course aims to survey the process of "translating" an experience into a creative written work. With an emphasis on creative nonfiction, students will consider how a real-life event becomes most alive on the page. What parts are best transformed into scene? How do we choose the right language for dialogue, time period, or a work's mood or tone? What should, or can, we omit? In reading writers who have used both fiction and nonfiction to present a given autobiographical experience, and practicing writing an experience for different audiences, students will compare the craft tools that make a story work within

its given form. Concurrently, the class will pursue exercises in translation from other languages into English to assess these same language and narrative choices in microcosm.

WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

WRCT226 Ethnographies in Medicine

Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT227 Life Writing: Writing About the Self and from Experience

This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.

WRCT228 The Art of the Personal Essay

The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays--what author and critic Philip Lopate calls "the self-interrogative genre"--helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others' writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

WRCT250 An Introduction to Data Journalism

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

WRCT250D Topics in Journalism: Writing (and Arguing) About Inequality: How to Make Your Case

In this nonfiction seminar, students will explore how to write about social issues by identifying inequity, understanding the logic and rhetoric used to both defend and criticize it, and developing their own skills to effectively communicate their opinion. Modeled after journalistic work, the course will also develop students' abilities to conduct first-person research and observation and then translate them into written form for use in nonfiction. We will also explore questions of

authenticity, voice, and dominant narrative, allowing students to examine what it means to write about communities other than their own--and the issues implicit in doing that work. Work from across the political spectrum will be addressed.

WRCT250G Topics in Journalism: Literary Journalism

In this course, we will explore the art and craft of magazine-length journalism that strives to do something different than reporting the news--it aspires to achieve the goals of literature. While this kind of writing tends to be timely, as almost all journalism must be when it's first published, at its best, it ought to be worth reading for decades to come. Truman Capote, for example, conceived of *IN COLD BLOOD*, which he first published as a series of articles in *THE NEW YORKER* in 1965, as a "non-fiction novel": a work of journalism that employed the techniques and artistry of fiction. We will study the writing of new journalists such as Joan Didion, Tom Wolfe, Nora Ephron, and Gay Talese, who pioneered the idea that there is no such thing as unbiased reporting: The writer can't help but bring a point of view to his or her storytelling, so why not admit it? These writers broke with journalistic convention and admitted that there was an "I" behind the typewriter, a mediator between the "true" story and the reader. We will focus on reading and writing two forms in particular, the profile and the essay. While an excellent profile can be a straightforward examination of another person and his or her place in the world, in the hands of a master like Janet Malcolm or George Trow, it can become an eruption of invention. Essays ask a question or argue a point--but how? There are as many ways as there are writers who explore the form, and in this course we will seek to join them.

WRCT250M Topics in Journalism: Storytelling and Social Change

How did a TV show help reduce the rate of teen pregnancy to the lowest point in recorded history? Why did a new narrative approach to gay marriage enable the movement to go from losing 31 state referendums to suddenly winning? Storytelling, across mediums and social platforms, has the power to change behavior and shift the cultural narrative. This class will explore the nature of "effective" stories, across a wide variety of issues, that engage audiences and often prompt action. We will discuss how this process works and ways to develop social impact campaigns. Students will have the chance to question some of the leading creators/practitioners who will join as guest speakers.

WRCT250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s

Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media—from a lack of diversity and inclusion to problems with monetization and "Fake News"—while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

WRCT250R First Person Singular

This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone our own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebald, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koeppel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: <https://petergodwin.com/about/>

WRCT264 Creating Children's Books I

In this course each student will create and illustrate a children's book, at the picture book or illustrated chapter book level. Assignments include examining a variety of children's books (from 1930 to the present) and emulating specific authors and illustrative techniques as we develop original work. We will discuss both text and illustration in published picture books, and the creative assignments and workshop discussions will focus on both components, and their interaction. We will look at a range of questions: What is this book for? Who is it for? Does it appeal to children and adults in different ways? What assumptions does it make about the world of childhood and the relationships children have? How does it obscure, reveal, comment on, or attempt to change the truths of life--things like love, desire, satisfaction, hurt, difference, sickness, and death? What values or norms does it establish--or subvert? What do the words and pictures do to each other? What values or expectations are at stake as the story or pattern unfolds? We will use questions like these to help drive our experiments and revisions as we workshop all stages of our books.

WRCT300 Integrative Learning Project 2: Senior Capstone

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

This course is intended for seniors who wish to document and reflect about their work in a single "capstone" experience. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can only take this course once.

WRCT302 All the Feels: Affect Theory and Cultural Studies

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we manage sensorial and embodied experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the individualized experience of feeling and power by introducing students to the vibrant field of affect studies. A recent "turn" in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to, ultimately, contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

WRCT303 Artifacts of US Empire: Post-Cold War Narratives of Migration and Multiethnic Literature

This course focuses on post-cold war literature about migrating to the US. By reading diasporic fiction coming out of and about Indian, Iranian, Cuban, Dominican, Filipino, Vietnamese, and Korean diasporas, students will examine how stories of migrating to the US are noteworthy artifacts of US empire. Importantly, we will question the ways in which these texts are tasked with the work of representing empire, imperialism, trauma, violence, and, for that matter, assimilation, meritocracy, and the US as benevolent nation-state. How do they challenge these expectations? Rescript them? Fall into their alluring traps?

 Prereq: **None**

WRCT317 Special Topics: Plot

In this special topics course, we will study classic and contemporary novels, stories, and television dramatic series that immerse the reader and viewer in an absorbing fictional plot. Our priorities will be close reading and watching for the pleasure and enlightenment of the works as wholes, as well as an examination of the choices storytellers make to snag our imaginations, drag them into a fictional world, and keep them there. The study will culminate in new creative work: short stories you will write and the class will critique in a workshop setting.

 Identical With: **ENGL317**
 Prereq: **ENGL292 OR ENGL296**

WRCT347 Special Topics: Day Books, Diaries, Notebooks, Etc.

This class will take as its focus both creatively and critically the daily and episodic tracking of our own and others' insights, observations, inspirations, motivations; incidents and encounters that seem worthy of (personal) note, whether this be for instant gratification, imprint, or later expansion, simple records as well as flights of writing. We will read and keep journals of various kinds. Very little will be out of bounds.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL347**Prereq: **ENGL292 OR ENGL296**Offering: **Host**Grading: **Cr/U****WRCT350 Writing Certificate Senior Seminar: Writing and Publishing**

This is the required capstone for the Writing Certificate Program. This new version of the course offers you an opportunity to develop your writing, work closely with other certificate seniors, and receive advice from professionals about editing and compiling work for publication. Visiting writers and editors will speak in class and the schedule includes several social occasions--receptions, talks, and dinners. Guest speakers from the world of writing and publishing will talk about their experiences with new media.

The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.

Offering: **Host**Grading: **Cr/U****WRCT500 Writing as a Multilingual Graduate Student**

This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

PRIZES

George H. Acheson and Grass Foundation Prize in Neuroscience • Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

Alumni Prize in the History of Art • Established by Wesleyan alumni and awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

American Chemical Society Connecticut Valley Section Award • Awarded for outstanding achievement to a graduating chemistry major.

American Chemical Society Undergraduate Award in Analytical Chemistry • Awarded for excellence in analytical chemistry.

American Chemical Society Undergraduate Award in Inorganic Chemistry • Awarded to an undergraduate student in inorganic chemistry to recognize achievement and encourage further study in the field.

American Chemical Society Undergraduate Award in Organic Chemistry • Awarded to a senior who has displayed a significant aptitude for organic chemistry.

American Chemical Society Undergraduate Award in Physical Chemistry • Awarded in recognition of outstanding achievement by undergraduate students in physical chemistry, and to encourage further pursuits in the field.

American Institute of Chemists Award • Awarded for outstanding achievement to a graduating chemistry major.

American Society for Biochemistry and Molecular Biochemistry Honor Society • The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

Ayres Prize • The gift of Daniel Ayres, Class of 1842, to the first-year student who attains the highest academic standing in the first semester.

Baden-Württemberg—Connecticut Sister State Exchange • A grant for one academic year's study at a university in the German state of Baden-Württemberg, administered by the Connecticut Department of Higher Education.

Baldwin Fellowship • Established in 1952 by family and friends of Horace Reed Baldwin, Class of 1947, and awarded annually for study at law school to the member of the senior class who, in the opinion of the committee, shows the most promise of becoming an outstanding lawyer and public-spirited citizen.

Beinecke Scholarship • Awarded by the Sperry Fund for graduate study in the arts, humanities, and social sciences.

Bertman Prize • Established in memory of Bernard T. Bertman, associate professor of physics, by gifts from his colleagues, family, and friends, in 1970. Awarded to a senior majoring in physics who displays a particularly resourceful and creative approach to physics research.

Best Honors Thesis in Sociology Award • Established by the Department of Sociology to honor Herbert H. Hyman, distinguished scholar, pioneer in survey research methodology, and Professor Emeritus in the Department of Sociology.

Awarded annually to students, whether sociology majors or not, who in the opinion of the faculty have written outstanding theses on a sociological topic.

Best Paper Prize in Sociology • Awarded annually to students who have written the best scholarly papers in sociology in the previous year.

Blankenagel Prize • Income from the John C. Blankenagel Fund, established in 1970, awarded at the discretion of the Department of German Studies to enrich educational offerings in the area of humanistic studies, or to assist a superior student in completing a project in German studies.

Boylan Award • Given by Jennifer Boylan in honor of her classmate, Annie Sonnenblick, the award recognizes an outstanding piece of creative nonfiction, journalistic work, or writing for general readers.

Bradley Prize • The gift of Stanley David Wilson, Class of 1909, in memory of Professor Walker Parke Bradley, to the senior or junior who excels in chemistry and particularly in special original work.

Bridge Builder Award • Awarded to a student and student group who have succeeded in strengthening the relationship between Wesleyan and the greater Middletown community.

Briggs Prize • Established in 1900 by the gift of James E. Briggs, to the student who has done the most effective work in intercollegiate debating.

Professor Samuel Hugh Brockunier Prize • Awarded for the best final essay on a social studies topic by a student in the Graduate Liberal Studies program.

Christopher Brodigan Fund Award • Established in memory of Christopher Brodigan, a Wesleyan student who died in an accident in his freshman year. The fund pays tribute to Christopher's deep interest in Africa and to the public service he provided through teaching in Botswana prior to entering Wesleyan. Awarded to graduating seniors and recent graduates who plan to pursue public service or research in Africa.

Erness Brody Prize • Established in 2002 by Ann duCille in honor of Professor Erness Bright Brody, former chair of the African American Studies Program. Awarded annually to a senior African American Studies Program major for excellence in written expression.

Bruner Freshman Improvement Prize • The gift of William Evans Bruner, Class of 1888, to the student whose second-semester first-year record shows the greatest relative improvement over that of the first semester.

Butler Prize • The Butler Prize, established in 1991 in honor of retiring colleague Jeffrey D. Butler, is awarded for the best Honors thesis in African, Asian, or Latin American history.

Butterfield Prize • Established by the Class of 1967 and awarded to the graduating senior who has exemplified those qualities of character, leadership, intellectual commitment, and concern for the Wesleyan community shown by Victor Lloyd Butterfield, eleventh president of the University.

Camp Prize • Established in 1905 by the Board of Trustees in memory of Samuel T. Camp, trustee 1880–1903. Awarded for excellence in English literature.

Nancy Campbell/National Trust for Historic Preservation Summer Internship Program • Established by friends and admirers in honor of Nancy Campbell, wife of former Wesleyan University President Colin Campbell, in recognition of her national leadership in historic preservation, and awarded to rising juniors or rising seniors.

Frank Capra Prize • Established in 1983 to honor Frank Capra, Hon. 1981, the great American film director whose collected papers are in the Wesleyan Cinema

Archives. Best film to exemplify Capra's skill in telling a human story that contains both humor and pathos.

Cardinal Crest Award • Awarded to the member of the WSA who has given honor to his/her post on the WSA or one of its committees through his/her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Chadbourne Prize • The gift of George Storrs Chadbourne, Class of 1858, to that member of the first-year class outstanding in character, conduct, and scholarship.

Citation of Citizenship in the Department of Mathematics and Computer Science • Recognizes those students studying mathematics or computer science, whose contributions both aid the educational mission of the department and foster a sense of community that encourages and supports all members of the department.

Clark Fellowship • Established in memory of John Blanchard Clark by his parents, Mr. and Mrs. Donald L. Clark of Pittsford, New York; his sister, Catherine; relatives; and friends. Awarded annually to a qualified graduating senior of Wesleyan University for graduate study in a school of medicine. Recipients are judged by members of the Health Professions Panel on their potential for outstanding achievement, their promise of community leadership and public-spirited citizenship, and their scholastic record at Wesleyan.

Clee Scholarship • Established by friends and associates of Gilbert Harrison Clee, Class of 1935, late president of the Board of Trustees. Awarded annually to a member of the junior class, who will remain a Clee Scholar throughout his or her junior and senior years, who will have demonstrated high standards of leadership, a deep commitment to Wesleyan University, an interest in the broad implications of multinational business enterprises, a sensitivity to the need for a creative balance between the public and private sectors, and an intention to pursue a career in business. A specific objective will be to select individuals who exemplify the qualities that characterized Gilbert Harrison Clee as a humane person and as a leader.

Dr. Neil Clendeninn Prize • Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed his or her sophomore year and in that time have exemplified those qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

Cole Prize • Established through the gift of George Henry Walker, Class of 1881, in the memory of Charles Edward Cole. Awarded to the first-year student who shows the greatest ability in fiction or nonfiction writing.

Connecticut Higher Education Community Service Award • Established in 1993 by the Connecticut Department of Higher Education to promote community service leadership and activities by students at Connecticut's institutions of higher education. This award recognizes outstanding student contributions to the promotion of community service through projects that increase student participation in their college community and projects that develop a unique approach to effective community service.

Herbert Lee Connelly Prize • Given in 1980 by Mabel Wells Connelly in the name of her husband, a member of the Class of 1909 and alumni secretary, 1924–56. Supplemented by friends, relatives, and sons Hugh Wells and Theodore Sample '48, the fund provides income to be awarded annually to a deserving undergraduate who demonstrates an interest in English literature and an unusual ability in nonfiction writing.

CRC Award for Outstanding First-Year Chemistry Students • Awarded to an outstanding first-year chemistry student, based on grades in organic chemistry over the interval of the current academic year.

Davenport Prize • Established in 1948 by the gift of Ernest W. Davenport in honor of his brother, Frederick Morgan Davenport, Class of 1889, for excellence shown by seniors in the field of government and politics.

Dorchester Prize • Established through the gift of Daniel Dorchester IV, Class of 1874. Awarded for the best thesis submitted to the English department.

W. E. B. Du Bois Prize • Awarded annually for academic excellence to a student majoring in African American studies.

Dutcher Prize • Established by gift of Arthur A. Vanderbilt, Class of 1910, in honor of Professor George Matthew Dutcher, for highest excellence in the history department.

Kevin Echart Memorial Book Prize • Awarded to the graduating College of Letters senior who best exemplifies the intellectual curiosity and range, the pleasure in colloquy, the capacity for admiration and skepticism, and the moral seriousness and love of books that we honored in our late colleague Kevin Echart and seek to foster in the students of the College of Letters.

Exceptional Program of the Year Award • Awarded to the coordinator(s) of an exceptional program, cultural event, speaker, or production that has had positive campus-wide impact.

William Firshein Prize • Awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry Department.

First-Year Leadership Award • Awarded to a first-year student who has demonstrated outstanding leadership or involvement in the Wesleyan community.

Susan Frazer Prize • Awarded annually to the student (or students) who has done the most distinguished work in the elementary and intermediate French language sequence.

Freeman Prize • Established in 1975 by Mansfield Freeman, Class of 1916. Awarded annually to a senior for excellence in East Asian studies.

French Government Teaching Assistantship • One-year assistantship for teaching English at a *lycée* in France, administered by the Institute for International Education (New York).

Beulah Friedman Prize • This prize recognizes work of outstanding achievement by a student in the history of art. The prize is awarded to a member of the senior class.

Friends of the Wesleyan Library Undergraduate Research Prize • Established in 2017 to recognize research projects in any field (besides honors theses) in any field that demonstrate outstanding and creative use of Wesleyan's library collections and resources.

Fulbright Fellowship • These grants are funded by the United States government under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act) and by many foreign countries. The grants, administered by the Institute for International Education, provide for one year of study at a university abroad.

Fulbright-Hays Doctoral Dissertation Research Abroad Grant • Awarded by the United States Department of Education to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of six to twelve months.

Fulbright Teaching Assistantship • Placement abroad providing classroom assistance to English-language teachers who also serve as cultural ambassadors for the United States.

Gay, Lesbian, and Sexuality Studies Prize • Donated by the Wesleyan Gay and Lesbian Alumni Association (GALA), this prize is awarded annually to the undergraduate who has done the best research and writing on a subject in gay, lesbian, and sexuality studies.

German Academic Exchange Service Fellowship • At least one fellowship per year for study at a German university. The German Academic Exchange Service is a private, self-governing organization of German universities, which promotes international exchange among institutions of higher learning.

German Pedagogical Exchange Service Assistantship/Fulbright Grant • A one year teaching apprenticeship in Germany.

Giffin Prize • Established in 1912 by a gift of Mrs. Charles Mortimer Giffin, in memory of her husband, an honorary graduate of the Class of 1875. Awarded for excellence in the Department of Religion.

Akiva Goldsman Prize in Screenwriting • Awarded to the graduating film studies major who has written the best full-length screenplay in the Department of Film Studies.

Barry M. Goldwater Scholarship • Awarded by the Barry M. Goldwater Scholarship and Excellence in Education Foundation to a college student who has outstanding potential and intends to pursue a career in mathematics, the natural sciences, or engineering.

Graduate Student of the Year Award • Awarded to a graduate student who has proven to be a vital and dynamic member of the Wesleyan community through taking on an active leadership role in campus life.

Graham Prize • The gift of James Chandler Graham, Class of 1890, awarded to a member of the graduating class for excellence in natural science.

Grant/Wilcox Prize • Awarded in honor of Connecticut filmmakers Ellsworth Grant and Roy Wilcox to the senior whose work in film and video best addresses significant environmental, social, or artistic issues.

James T. Gutmann Field Studies Scholarship • Established in 2007 by Lisette Cooper '81, to honor her former professor and mentor, James T. Gutmann. Awarded to an especially promising major in earth and environmental sciences to support geologic field research expected to lead to a senior honors thesis.

Hallowell Prize • Established by friends and associates of Burton C. Hallowell, Class of 1936, former professor of economics and executive vice president of the University. Awarded annually to an outstanding senior in the study of social science, as determined by the governing board of the Public Affairs Center.

Sarah Hannah Prize • Offered in memory of Sarah Hannah '88, in association with the Academy of American Poets, and awarded for an outstanding poem.

Hawk Prize • The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

Health Education Prize • Awarded annually to the graduating senior who best exemplifies the goals of Wesleyan's Health Education Program, which are the promotion of healthy lifestyles and disease prevention. The student who is chosen for this prize has demonstrated commitment not only to his or her personal well-being but has also served as a role model to peers in the Wesleyan community and beyond.

Heideman Award • Established in 1972, in honor of Enid and Walter Heideman. Awarded annually to an undergraduate who has helped others in the Wesleyan community, in the tradition of the Heidemans.

Rachel Henderson Theater Prize • Awarded annually to that student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of his or her undergraduate career.

Holzberg Fellowship • Established in memory of Jules D. Holzberg, professor of psychology, by gifts of his colleagues and friends. Awarded to a senior who intends to pursue graduate study in clinical or community psychology in recognition of the commitment to research and applied work on the resolution of social problems on the individual and collective level that is consistent with Professor Holzberg's lifelong professional interests and humanitarian concerns.

Horgan Prize • Established by the Department of English in honor of Paul Horgan, professor emeritus and writer-in-residence. Awarded to the student who has written the best short story of the year.

Ingraham Prize • The gift of Robert Seney Ingraham, Class of 1888, and his wife, for excellence in New Testament Greek or, in years when a course in that subject is not given, for excellence in a course in Greek elective for juniors and seniors.

Jessup Prize • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

Johnston Prize • The gift of David George Downey, Class of 1884, in memory of Professor John Johnston. Awarded to those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

Keasbey Memorial Scholarship • Awarded by the Keasbey Memorial Foundation on the basis of academic excellence and a strong record of extracurricular participation for two years of graduate study in England.

P. L. Kellam Prize • Established in memory of Priscilla L. Kellam '83, by her husband. Awarded annually to a senior woman, under the age of 25, who has majored in East Asian studies and has traveled or plans to travel to China to further her studies.

Barry Kiefer Prize • In memory of Barry I. Kiefer to celebrate outstanding graduating PhD students in biology and molecular biology and biochemistry.

Leavell Memorial Prize—Film • Awarded annually to a senior film student who has done outstanding work in the major, and who best reflects the departmental goals of citizenship, scholarship, and the wedding of theory and practice.

Leavell Memorial Prize—Music • Awarded annually to a senior who has done outstanding work in music, and whose work manifests the ideals of the World Music Program in the Department of Music.

Lebergott-Lovell Prize • In honor of Professors Emeritus of Economics Stanley Lebergott and Michael Lovell. To be awarded to the best paper written in the current academic year that uses econometric techniques to analyze an economic problem. Established in 2011 by Bruce Greenwald; first awarded in 2012.

Leonard Prize • Given in 1917 in memory of William Day Leonard, Class of 1878, by his friends. Awarded annually to the member of the WSA who has given honor to his or her post on the WSA or one of its committees through his or her

leadership, and has selflessly served the greater interest of the Wesleyan student body.

Levy-Spira Prize • Awarded for distinction in Latin American studies. Established in 1992 in memory of Eduardo Levy-Spira '82, by his family and friends.

Limbach Prize • Established in 1966 by Russell T. Limbach, professor of art, in memory of his wife, Edna Limbach. Awarded annually to the student who has contributed the most imaginative, generous, thoughtful, and understanding social service to the people of the city of Middletown and/or the Wesleyan community.

Lipsky Prize • The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unflinching kindness, quiet dignity, and brilliant scholarship.

Littell Prize • The gift of Franklin Bowers Littell, Class of 1891, for excellence in one or more advanced courses in astronomy.

Luce Scholarship • The Henry Luce Foundation selects 18 graduates to spend a year in an Asian country and provides an experience that will broaden the participant's perspective on his or her chosen career field.

Macmillan Scholar of Saint Andrew's Society of the State of New York • Awarded by the Saint Andrew's Society of the State of New York, this scholarship enables outstanding college graduates of Scottish descent to engage in a year of graduate study in Scotland.

John W. Macy Summer Internship in Public Administration • Established by friends and colleagues of John W. Macy, Class of 1938. Awarded to the junior who most clearly exemplifies, in the decision of the selection committee, the characteristics associated with John Macy: high intellectual ability, a capacity for sustained effort in difficult tasks, strong ethical standards, an ingrained sense of duty, and a commitment to public service as a worthy career.

Mann Prize • Established in memory of Albert Mann, Class of 1906, devoted alumnus and faculty member, by his daughters and their families. Awarded annually to the senior(s) showing the most outstanding achievements in the Romance languages.

George C. Marshall Scholarship • Awarded annually for two years of study at any university in the United Kingdom, on the basis of distinction of intellect and character as evidenced by both scholastic attainments and other activities and achievements; strong motivation and seriousness of purpose; and the potential to make a significant contribution to one's own society.

Martius Yellow Award • Awarded for excellence in organic synthesis.

Roger Maynard Award • A memorial award to that senior scholar-athlete who best exemplifies the spirit, accomplishments, and humility of Roger Maynard, Class of 1937, former trustee.

James L. McConaughy Writing Prize • Awarded for a piece of nonfiction writing, on a topic in the social sciences or sciences, that is designed to interest general readers. Funds for this award were given originally by members of the Class of 1936 in honor of their classmate, James L. McConaughy, a former governor of Connecticut and president of Wesleyan University.

Richard McLellan Prize • Awarded annually to a junior who exemplifies those qualities that characterize the late Richard McLellan, director of the Career Planning Center and associate dean of the college: character, leadership, commitment to public service and diversity, wide cultural interests, and a sense of humor.

Priscilla Meyer Fund • Established in honor of Professor Priscilla Meyer's teaching career at Wesleyan. Awarded to Wesleyan students who are the most dedicated to the study of topics related to Russia, Eastern Europe, or Eurasia.

Meyer Prize • Established in 1991 in honor of retiring colleague Donald A. Meyer, and awarded for the best honors thesis in American History.

Joan W. Miller Prize • Established by Professor Miller in 2008. It is awarded for the outstanding honors thesis in the College of Social Studies.

Richard A. Miller Summer Internship Grant • Awarded in honor of Woodhouse/Sysco Professor of Economics Richard A. Miller to students pursuing summer internships related to potential business careers.

George J. Mitchell Scholarship • Awarded annually for one year of graduate study in any discipline offered by an institution of higher learning in Ireland or Northern Ireland on the basis of superior records of academic excellence, leadership, and public service.

Monroe Prize • Established in 1985 by the Center for African American Studies in memory of John G. Monroe, director, scholar, and teacher in the Center for African American Studies and in the Theater Department. This prize is to be awarded annually to the Wesleyan sophomore or junior who, in the opinion of the review committee, submits the best scholarly essay in the field of African American studies.

Janina Montero Prize • Awarded annually to a Latino student who has promoted the health, visibility, and participation of the Latino community at Wesleyan. The individual should best exemplify personal integrity, leadership, and motivation; a strong interest in and knowledge of his or her background; and have maintained a high level of commitment to Wesleyan's academic and intellectual enterprise.

David Morgan Prize • To be awarded annually to the senior major or majors in the College of Social Studies (CSS) and/or the history department who best demonstrated the integrity and commitment to community that characterized David's 37 years of service to the CSS, his department, and to the University.

Peter Morgenstern-Clarren Social Justice Award • Awarded to a sophomore or junior with a demonstrated commitment to social justice issues.

Mosaic Award • This award recognizes the contribution(s) of a person or organization that has brought about cultural awareness and education on one or more of the following issues: race, ethnicity, culture, and/or sexual orientation.

Geraldine J. Murphy Prize • Established in memory of Geraldine J. Murphy, who was the first woman hired as a full-time instructor at Wesleyan (1957), the first woman promoted to a tenured position, and the first woman promoted to the rank of full professor. The prize is endowed by alumni of the Wesleyan Master of Arts in Teaching program. Awarded to a student who has written an outstanding critical essay that focuses on short fiction or novels.

Needler Prize • Established by Sophie Needler, in memory of her husband, Bennett Needler. Awarded annually to one or two graduating seniors who have demonstrated excellence in Hebrew or Jewish studies.

NNK Award • Awarded for the best screenplay for an undergraduate film.

Carol B. Ohmann Memorial Prize • Awarded for excellence in feminist, gender, and sexuality studies.

Olin Fellowship • Founded in 1854 by the wife of Stephen Olin, president, 1839–41 and 1842–51. Later increased by gifts of their son, Stephen Henry Olin, Class of 1866 and acting president, 1922–23, and his wife, Emeline. Awarded in recognition of achievement in English. The fellowship supports supervised work in English outside of the Wesleyan course structure.

Outreach and Community Service Award • Awarded to the senior theater major who, through his or her work in the Theater Department, has done a significant service in the community.

Outstanding Collaboration Award • Awarded for a program that was successfully planned in the spirit of partnership and teamwork.

Parker Prize • Established in 1870 by the Reverend John Parker, trustee 1859–71. Awarded to a sophomore or junior who excels in public speaking.

Peirce Prize • Awarded in successive years for excellence in biology, chemistry, and geology.

Emily White Pendleton Scholarship • Established in 1979 by Ralph Darling Pendleton, founder of the Theater Department, in memory of his wife. Awarded annually to a dance major or to a student who is significantly involved in dance and who shows outstanding promise in the field.

Peterson Fellowship • Established in 1963 by bequest of William Harold Peterson, Class of 1907, for graduate study in biochemistry at Wesleyan.

Plukas Prize • Established in 1986 by John Plukas, Class of 1966, this prize is awarded to graduating economics seniors to be applied toward summer expenses, during which period each student will work under the supervision of a faculty advisor to convert an honors project into a publishable article.

Plukas Teaching Apprentice Award • Established in 1986 by John Plukas, Class of 1966, this prize is awarded for excellent service to the economics department as a teaching apprentice.

Gwen Livingston Pokora Prize • Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

Prentice Prize • The gift of Mrs. Elizabeth Brooks Prentice in memory of Professor George Prentice to that junior or senior who excels in German. This prize is given in alternate years.

The Wallace C. Pringle Prize for Research in Chemistry • Gift of Eleanor and Wallace Pringle and their family and friends. This prize is to be awarded annually by the chemistry department to a student for excellence in research.

Sophie and Anne Reed Prize • Established in 1968 by Leon Reed and his sons, S. Chadwick '41 and Dr. Victor Reed, in memory of Mrs. Sophie Reed, for the best poem or group of poems.

Damain Garth Reeves Memorial Book Prize • Awarded to the first-year student who best embodies the personal and intellectual qualities of Damain Reeves, Class of 2000.

Rhodes Scholarship • Two years of study at Oxford University, awarded on the basis of high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership, and physical vigor.

Rice Prize • Awarded for excellence in mathematics to a senior.

Michael Rice Prize in Computer Science • Endowed in 2008 by the Fernando and Appapillai families in honor of Dr. Michael D. Rice and awarded to a senior for excellence in computer science.

Rich Prize • The gift of Isaac Rich, trustee 1849–72, in memory of his wife, and later supplemented by appropriations from the Board of Trustees. Awarded to those seniors whose orations are judged best in composition and delivery.

Robertson Prize • Awarded to a sophomore for excellence in mathematics.

Robins Memorial Prize • Established in 1969, in memory of George D. Robins (Class of 1898), by Frank D. Robins '34 and Douglas H. Robins '66, for excellence in history.

Steven J. Ross Prize • Established in 1979 as a gift of Steven J. Ross of Warner Communications. Awarded annually for the best undergraduate film, digital and/or virtual, made in the Film Studies Department.

Juan Roura-Parella Prize • Established in 1984 to be awarded annually to an undergraduate whose work represents the kind of catholic curiosity and general learning that Professor Juan Roura-Parella exemplified.

Rulewater Prize • Awarded for outstanding reflection and writing on an interdisciplinary topic in the Graduate Liberal Studies program.

Robert Schumann Distinguished Student Award • Established in 2007 by a gift from the Robert Schumann Foundation. Awarded to an outstanding student who demonstrates academic accomplishment and excellence in environmental stewardship through work at Wesleyan or the greater Middletown community.

Scott Biomedical Prize • Awarded to a member(s) of the molecular biology and biochemistry senior class who has demonstrated excellence and interest in commencing a career in academic or applied medicine.

Scott Prize • Established by Charles Scott Jr., MA, Class of 1886, and trustee 1905–22, in memory of John Bell Scott, Class of 1881, for excellence in modern languages.

Mary and John Sease Prize • Awarded for outstanding work in environmental science.

Sehlinger Prize • Established by the Class of 1965 in memory of Charles Edward Sehlinger III, who died in 1964. The award of a medical dictionary is given to a premedical student for excellence of character, community spirit, and academic achievement.

Senior Legacy Award • Awarded to a senior who has consistently demonstrated outstanding leadership throughout his or her four years in the Wesleyan community.

Frances M. Sheng Prize • Awarded for excellence in Chinese language and excellence in Japanese language.

Sherman Prize—Classical Studies • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Sherman Prize—Math • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Rae Shortt Prize • Established in memory of Rae M. Shortt. Awarded to a junior for excellence in mathematics.

Samuel C. Silipo Prize • Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

Silverman Prize • Established by gift of Elisha Adelbert Silverman, Class of 1922, and awarded to a member of the junior or senior class for excellence in chemistry.

Skirm Prize • Established by members of the Class of 1931 in memory of their classmate, Thomas H. Skirm, this prize is awarded to a government major early in his or her senior year, to recognize the best research or writing project done during the junior year.

Social Activist Award • Awarded to the individual or student group who best exemplifies the spirit of social activism and through whose efforts constructive social change ensued.

Annie Sonnenblick Writing Award • Established by the family of the late Annie Sonnenblick, Class of 1980, in 1992 as a complement to the annual Annie Sonnenblick Lecture. The prize provides financial support for a student who wishes to undertake an independent writing project during the summer between his or her junior and senior years.

Spinney Prize • The gift of Joseph S. Spinney, trustee 1875–82 and 1888–93, for excellence in Greek. Awarded for the best original essay on some aspect of Greek or Roman civilization.

Spurrier Award • The William A. Spurrier Ethics Award, established by Dr. James Case, given to the student who demonstrates in the field of ethics: sensitivity, insight, depth, and humor. Given in memory of William Spurrier III, chaplain and Hedding Professor of Moral Science and Religion.

Student Organization of the Year • Awarded to a student organization that has excelled in sustaining leadership, an active membership, and programmatic efforts that contribute to the larger Wesleyan community.

Studio Art Program Prize • Awarded to one or more students who show particular promise for success as demonstrated through performance in classes and general contributions to the department.

Taylor Scholarship • Awarded to a history major based on outstanding academic achievement and other qualities such as fine character, good fellowship, leadership, and service to the Wesleyan community.

Thorndike Prize • Established by a gift of Elizabeth Moulton Thorndike in memory of her husband, Edward Lee Thorndike, Class of 1895, for excellence in psychology.

Tishler Teaching Award • Established by the family and friends of Dr. Max Tishler, professor emeritus of chemistry and University Professor of the Sciences, emeritus. Awarded annually in his memory to the best graduate teaching assistant in chemistry.

Elizabeth Vermeer Tishler Prize—Art • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

Elizabeth Vermeer Tishler Prize—Music • Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance. Two prizes are given annually: one for Western classical piano performance and the other for jazz piano performance.

David A. Titus Memorial Prize • Established by family, friends, and students in memory of Professor David Titus to support the summer studies of a deserving Wesleyan junior majoring in government, East Asian studies, or the College of Social Studies.

Shu Tokita Prize • Established by friends and relatives of Shu Tokita, Class of 1984, and awarded to students of color studying literature and in area studies with a focus on literature. The recipient will be selected on the basis of his or her application essay and commitment to the study of literature.

Tölölyan Fund for the Study of Diasporas and Transnationalism • Established in 2008 by Bruce Greenwald, professor of economics at Columbia Business School, in honor of Wesleyan Professor Khachig Tölölyan. The award funds the summer research of a junior with the best proposal for a thesis on the study of diasporic or transnational issues.

Trench Prize • The gift of Miss Grace A. Smith, in memory of William James Trench, trustee 1835–67, for excellence in the Department of Religion.

Truman Scholarship • A national competition funded by the United States government that provides scholarships for graduate study to juniors who have outstanding leadership potential and intend to pursue careers in public service.

Kenneth W. Underwood Prize in Social Ethics • Awarded to the College of Social Studies (CSS) student selected to discuss a paper on the subject of social ethics delivered by a guest scholar at one of the two annual CSS banquets.

United States Teaching Assistantship in Austria • One-year assistantship for teaching English in Austria, funded by the Austrian government.

Karl Van Dyke Prize • Awarded each year to one or more students majoring in physical science or having a predominant interest in physical science and technology and who show outstanding achievement in academic work and a promise of productivity in a professional career.

Vanguard Prize • Established by black alumni in tribute to the black members of the Class of 1969, whose perseverance and pioneering leadership earned them designation as the Vanguard Class. The prize is awarded annually to a graduating senior who has achieved academic excellence and contributed significantly to maintaining Wesleyan's racial diversity.

Walkley Prize • Two prizes, the gift of Webster Rogers Walkley, Class of 1860, in memory of David Hart Walkley, Class of 1878, for excellence in psychology. Awarded to those juniors and seniors who present the best reports or work embodying original research.

Watson Fellowship • Awarded by the Thomas J. Watson Foundation, to enable college graduates of unusual promise to engage in an initial postgraduate year of independent study and travel abroad.

Weidenfeld Scholarship • The Weidenfeld Scholarship supports all tuition fees and living costs associated with graduate study at Oxford University. It fosters European networks and promotes the post-university careers of its scholars through work placements, long-term mentoring, and engagement in leadership and conferences.

Weller Prize • The gift of Mrs. LeRoy Weller, in memory of her husband, LeRoy Weller, Class of 1899, to the student having the highest academic average for the sophomore year.

Wesleyan Animal Studies Prize • Awarded for the best thesis or senior essay on a subject in animal studies.

Wesleyan Black Alumni Council Memorial Prize • Established in 1986 by the Wesleyan Black Alumni Council in memory of deceased black alumni. The prize provides a summer stipend to support a deserving student engaged in independent study or community service related to the concerns of black people.

Wesleyan Fiction Award • A gift from Norman Mailer to the Wesleyan Writing Program, this award recognizes an outstanding piece of fiction written by a Wesleyan student.

Wesleyan Memorial Prize • The gift of undergraduates in the Class of 1943 in memory of fellow students who made the supreme sacrifice in the Second World War, to the members of the junior class outstanding in qualities of character, leadership, and scholarship.

White Fellowship—Government • Awarded for excellence in government to a graduate or an advanced undergraduate in government.

White Fellowship—History • Awarded for excellence in history.

White Prize • Established in 1942 by Horace Glenn White Jr., Class of 1933, and increased in 1943 by friends in his memory. Awarded for advanced undergraduate study in economics.

M. G. White Prize • Awarded annually for the best thesis submitted in American studies.

Wilde Prize • Established in 1963 by Frazer B. Wilde, LL.D., Class of 1958, awarded to a junior or senior for excellence in economics.

Winchester ENGL 201 Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best essay written in a section of ENGL 201 in the preceding calendar year.

Winchester Fellowship • Established in 1938, in memory of Professor Caleb Thomas Winchester, by his widow. Awarded to Wesleyan graduates for postgraduate work in English.

Winchester First-Year Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best scholarly essay written by a first-year student in any English department course in the preceding calendar year.

Wise Prize • The gift of Daniel Wise, DD, Class of 1859, for excellence in the philosophy department; for the best essay on moral science or on some subject in the field or values.

Associate Professor of Music; Associate Professor, Medieval Studies

Pedro Alejandro

BS, Cornell University; MFA, Ohio State University
Associate Professor of Dance

Irina Aleshkovsky

MA, Vilnius State University
Adjunct Professor of Russian, East European, and Eurasian Studies

Beth Anderson

BS, University of Iowa; PHD, University of Iowa
Visiting Assistant Professor of Psychology

Calvin O'Malley Anderson

BFA, Point Park College; MFA, University of Connecticut
Visiting Assistant Professor of Theater

Cori Anderson

BS, Wheaton College; PHD, Dartmouth College
Assistant Professor of the Practice in Molecular Biology and Biochemistry

Talia Johanna Andrei

BA, Rutgers University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Art History; Assistant Professor, East Asian Studies

Stephen Angle

BA, Yale University; PHD, University of Michigan
Mansfield Freeman Professor of East Asian Studies; Professor of Philosophy; Director, Center for Global Studies; Professor, East Asian Studies

Robert Antoni

BA, Duke University; MA, Johns Hopkins University; MFA, University of Iowa; PHD, University of Iowa
Assistant Director of Creative Writing; Frank B. Weeks Visiting Associate Professor of English

Francesco Marco Aresu

MA, Indiana University Bloomington; MA, Stanford University; PHD, Harvard University
Assistant Professor of Italian; Assistant Professor, Medieval Studies

Michael Armstrong Roche

BA, Harvard University; MA, Harvard University; PHD, Harvard University
Associate Professor of Spanish; Associate Professor, Medieval Studies; Associate Professor, Latin American Studies

Annemarie Arnold

Adjunct Professor of German Studies, Emerita

Herbert A. Arnold

MAA, Wesleyan University; PHD, University of Wurzburg
Professor of German and Letters, Emeritus

Robyn Kimberley Autry

BS, University of Colorado Boulder; MS, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Associate Professor of Sociology; Chair, Sociology

B

Sally Bachner

BA, Reed College; MA, Princeton University; PHD, Princeton University
Associate Professor of English

Hyejoo Back

BS, Busan National University; MED, Busan National University; PHD, SUNY at Albany

Assistant Professor of the Practice in East Asian Studies

Noah Baerman

BM, Rutgers U School Arts; MM, Rutgers U School Arts
Director, Jazz Ensemble

Martin Baeumel

MA, University of Alabama; MA, Ludwig Maximilians University; PHD, University of Chicago
Assistant Professor of German Studies

Ralph F. Baierlein

BA, Harvard University; MAA, Wesleyan University; PHD, Princeton University
Charlotte Ayres Professor of Physics, Emeritus

B. Balasubrahmanian

BA, University of Madras; MA, University of Madras; MPHIL, University of Madras; PHD, University of Madras
Adjunct Associate Professor of Music

Charles Barber

BA, Harvard University; MFA, Columbia University
Writer-in-Residence in Letters

Rachael Barlow

MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Associate Director for Assessment; Adjunct Assistant Professor of Academic Writing

Joslyn Barnhart Trager

BA, Reed College; MA, Claremont Mckenna; PHD, University of California LA
Assistant Professor of Government

Hilary C. Barth

BA, Bryn Mawr College; PHD, Massachusetts Institute of Technology
Professor of Psychology

Joseph M. Basile

BA, University of Connecticut; MA, New York University
Visiting Instructor in American Sign Language

Jeanine D. Basinger

BS, South Dakota St University; MS, South Dakota St University
Corwin-Fuller Professor of Film Studies, Emerita; Special Advisor to the President

Patricia L. Beaman

BFA, University of Michigan; MA, New York University
Artist-in-Residence, Dance

Martine Rose Bellen

BA, Hunter College; MFA, Brown University
Visiting Assistant Professor in Liberal Studies

L. Kent Bendall

MAA, Wesleyan University
Professor of Philosophy, Emeritus

Allan Berlind

BA, Swarthmore College; MA, Harvard University; PHD, Harvard University
Professor of Biology, Emeritus

Allison Bernard

BA, Middlebury College; MA, Columbia University
Visiting Assistant Professor of East Asian Studies

Garry Bertholf

BA, Colby College; MA, University of Pennsylvania; PHD, University of Pennsylvania

Assistant Professor of African American Studies; Assistant Professor of African American Studies, starting July 1, 2020

Jonathan W. Best

BA, Earlham College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of Art History, Emeritus

David L. Beveridge

BA, College of Wooster; MAA, Wesleyan University; PHD, University Cincinnati
Joshua Boger University Professor of the Sciences and Mathematics, Emeritus; Co-Director, Susan B. and William K. Wasch Center for Retired Faculty; Co-Coordinator, Molecular Biophysics

John E. Biatowas

BA, Colgate University; MA, University of Connecticut
Director, Chamber Music Ensemble

John S. Biddiscombe

BS, Springfield College Illinois; MED, Slippery Rock University
Adjunct Professor of Physical Education, Emeritus

Marina Bilbija

BA, University of Sarajevo; MA, University of Pennsylvania; PHD, University of Pennsylvania
Assistant Professor of English

Tess Bird

BA, University of Connecticut; MSC, Oxford University; PHD, Oxford University
Andrew W. Mellon Postdoctoral Fellow for Writing in the Social Sciences

Kate Birney

BA, Yale University; MT, Harvard University; PHD, Harvard University
Associate Professor of Classical Studies; Chair, Archaeology; Associate Professor, Archaeology; Associate Professor, Art History

Drew Black

BS, Syracuse University; MA, Kent State University
Adjunct Professor of Physical Education; Head Coach of Wrestling/Strength and Fitness Coach

Amy B. Bloom

BA, Wesleyan University; MSW, Smith College
Shapiro-Silverberg Professor of Creative Writing; Professor of the Practice in Creative Writing; Professor of the Practice, English

Reinhold Blümel

PHD, Technical University Munich
Charlotte Augusta Ayres Professor of Physics; Professor of Physics; Co-Coordinator, Informatics and Modeling

Elizabeth A. Bobrick

BA, Marlboro College; MA, Johns Hopkins University; PHD, Johns Hopkins University
Visiting Assistant Professor in Liberal Studies; Writing Consultant; Visiting Scholar in Classical Studies

David Bodznick

BS, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Washington
Professor of Biology, Emeritus

Abigail Huston Boggs

BA, Wesleyan University; PHD, University Calif Davis
Assistant Professor of Sociology; Assistant Professor, Feminist, Gender, and Sexuality Studies

Philip H. Bolton

BS, Michigan State University; MAA, Wesleyan University; PHD, University of California, San Diego
Professor of Chemistry, Emeritus

John P. Bonin

BA, Boston College; MA, University of Rochester; PHD, University of Rochester
Chester D. Hubbard Professor of Economics and Social Science; Professor of Economics; Tutor, College of Social Studies; Professor, Russian, East European, and Eurasian Studies

Jeanne M. Bonner

BA, Wesleyan University; MFA, Bennington College
Visiting Assistant Professor of Academic Writing

Iris Bork-Goldfield

MA, Ludwig Maximilians University; PHD, Ludwig Maximilians University
Adjunct Professor of German Studies; Chair, German Studies

Karl David Boulware

BBA, Baruch College; MA, Duke University; PHD, University Of Alabama
Assistant Professor of Economics

Dannielle Bowman

BS, The Cooper Union; MFA, Yale University
Visiting Assistant Professor of Art

Richard W. Boyd

BA, University of Texas Austin; MAA, Wesleyan University; PHD, Indiana University Bloomington
Professor of Government, Emeritus

William S. Boyd Jr

BA, Rhodes College; MA, The University of Memphis; PHD, University Tennessee
Memph
Visiting Scholar in the Quantitative Analysis Center

Anthony Delano Braxton

John Spencer Camp Professor of Music, Emeritus

Katherine Brewer Ball

BA, Occidental College; MA, New York University; PHD, New York University
Assistant Professor of Theater; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, African American Studies

Nathan Brody

BA, University Of New Hampshire; MA, University of Michigan; MAA, Wesleyan University; PHD, University of Michigan
Professor of Psychology, Emeritus

Judith C. Brown

BA, University of California, Berkeley; MA, University of California, Berkeley; PHD, Johns Hopkins University
Professor of History, Emerita

Neely Bruce

BMU, University of Alabama; DMU, University of Illinois Urbana; MAA, Wesleyan University; MMU, University of Illinois Urbana
John Spencer Camp Professor of Music; Professor of Music

Gillian Brunet

BA, Smith College; PHD, University of California, Berkeley

Assistant Professor of Economics

Joseph W. Bruno

BA, Augustana College; MAA, Wesleyan University; PHD, Northwestern University
Professor of Chemistry, Emeritus

Katherine Brunson

BA, Harvard University; MA, University of California LA; PHD, University of California LA
Assistant Professor of Archaeology, starting January 1, 2020

Justin Alexander Bryant

BS, Seattle University
Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

Richard V. Buel

BA, Amherst College; MA, Harvard University; PHD, Harvard University
Professor of History, Emeritus

Ann Campbell Burke

AB, New York University; MA, Harvard University; PHD, Harvard University
Professor of Biology; Chair, Biology

C**Joe Cacaci**

BA, Manhattan College; MA, Emerson College
Visiting Associate Professor of Film Studies

Michael A. Calter

BS, University of Vermont; PHD, Harvard University
Professor of Chemistry; Chair, Chemistry; Professor, Integrative Sciences

Ron Cameron

BA, Western Kentucky Uni; MAA, Wesleyan University; PHD, Harvard University
Professor of Religion; Chair, Religion

Peggy Carey Best

AB, Earlham College; PHD, Union Institute Grad School
Director, Service Learning; Visiting Assistant Professor of Sociology; Coordinator, Service Learning

Philip D. Carney

BA, Trinity College
Adjunct Professor of Physical Education; Head Coach of Men's Crew

Sarah Kristin Carney

BA, Connecticut College; MA, Wesleyan University; PHD, CUNY The Graduate Center
Assistant Professor of the Practice in Psychology

John F. Carr

BA, St. Michaels College; MAA, Wesleyan University; MFA, The Catholic University of America
Professor of Theater, Emeritus

Robert Cassidy

BA, Fitchburg State; MA, Boston University; MA, Tufts University; PHD, Tufts University
Andersen Fellow in Defense and Foreign Policy; Andersen Fellow in Defense and Foreign Policy

Jim Cavallaro

BA, Harvard University; JD, University of California, Berkeley; MA, University of California, Berkeley; PHD, Universidad Pablo de Olavide
Visiting Professor of Public Policy

Benjamin Chaffee

Associate Director of Visual Arts; Adjunct Instructor in Art

Sonali Chakravarti

BA, Swarthmore College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Associate Professor of Government; Tutor, College of Social Studies

Wai Kiu Chan

BS, University of Hong Kong; MPHIL, University of Hong Kong; PHD, The Ohio State University
Professor of Mathematics

Douglas K. Charles

BA, University of Chicago; MA, Northwestern University; PHD, Northwestern University
Professor of Anthropology, Emeritus

Eric Charry

BMU, New England Conservatory of Mu; MFA, Princeton University; MMU, New England Conservatory of Mu; PHD, Princeton University
Professor of Music

Christopher James Chenier

BA, Bard College; MA, University of Delaware
Digital Design Technologist; Adjunct Assistant Professor, College of Integrative Sciences; Adjunct Assistant Professor of Art

Barry Chernoff

BS, SUNY at Stony Brook; MS, Adelphi University; PHD, University of Michigan
Robert Schumann Professor of Environmental Studies; Professor of Earth and Environmental Sciences; Professor of Biology; Chair, Environmental Studies Program; Director, College of the Environment; Professor, Environmental Studies

Joan Cho

BA, University of Rochester; MA, Harvard University; PHD, Harvard University
Assistant Professor of East Asian Studies; Assistant Professor, Government

Kee-Hong Choi

Visiting Scholar in Psychology

Alcee Chriss

BM, Oberlin College; MM, Oberlin College
Artist-in-Residence, Music; University Organist

Mary Ann Clawson

BA, Carleton College; MA, SUNY at Stony Brook; PHD, SUNY at Stony Brook
Professor of Sociology, Emerita

Frederick M. Cohan

BS, Stanford University; PHD, Harvard University
Huffington Foundation Professor in the College of the Environment; Professor of Biology; Professor, Environmental Studies; Professor, Integrative Sciences

Lisa Cohen

BA, Brown University; MPHIL, Yale University; PHD, Yale University
Douglas J. and Midge Bowen Bennet Associate Professor of English; Associate Professor of English; Associate Professor, Feminist, Gender, and Sexuality Studies

William B. Coley

MAA, Wesleyan University

Professor of English, Emeritus

Karen L. Collins

BA, Smith College; PHD, Massachusetts Institute of Technology
Edward Burr Van Vleck Professor of Mathematics; Professor of Mathematics; Chair, Mathematics and Computer Science; Professor, Integrative Sciences

BA, Wesleyan University; MFA, University of Texas Austin
Associate Professor of Film Studies

Corrado Confalonieri

MA, Harvard University; PHD, Harvard University; PHD, Universitagrave; di Padova
Visiting Assistant Professor of Italian

Robert T. Conn

BA, Dartmouth College; PHD, Princeton University
Professor of Spanish; Professor, Latin American Studies

John Anthony Connor

MA, Manchester University; MAA, Wesleyan University
Professor of English, Emeritus

David Constantine

BS, Eastern Nazarene College; PHD, University of Michigan
Associate Professor of Mathematics

Stephen Anthony Cooke

Visiting Scholar in Chemistry

Joseph David Coolon

BS, Kansas State University; PHD, Kansas State University
Assistant Professor of Biology; Assistant Professor, Integrative Sciences

Julian I. Cornell

BA, Wesleyan University; MA, University of California LA; PHD, New York University
Visiting Adjunct Professor in Liberal Studies

Ethan M. Coven

BA, University of Rochester; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Mathematics, Emeritus

Breanna Craft

Visiting Scholar in Chemistry

Barbara H. Craig

BA, University Maine; MAA, Wesleyan University; MPA, University of Connecticut; PHD, University of Connecticut
Professor of Government, Emerita

Martha Crenshaw

BA, Newcomb College Tulane U; MA, University of Virginia; MAA, Wesleyan University; PHD, University of Virginia
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought, Emerita

John T. Crooke

BS, Saint Josephs University; MS, West Chester University Pa
Adjunct Professor of Physical Education; Head Coach of Cross Country (Men's Women's)

Christina Crosby

BA, Swarthmore College; MAA, Wesleyan University; PHD, Brown University

Professor of English; Professor, Feminist, Gender, and Sexuality Studies

Andrew S. Curran

BA, Hamilton College; MA, New York University; PHD, New York University
William Armstrong Professor of the Humanities; Professor of French; Chair,
Romance Languages and Literatures

Walter Jr. Curry

BA, Iowa State University
Adjunct Associate Professor of Physical Education; Head Coach of Track Field
(Men's Women's)

Jonathan Cutler

BA, Tufts University; MA, Union Theological Seminary; PHD, CUNY The Graduate
Center
Associate Professor of Sociology

D

Catherine Damman

BA, Loyola Marymount University; MA, Columbia University; MPHIL, Columbia
University; PHD, Columbia University
Andrew W. Mellon Postdoctoral Fellow

Logan M. Dancey

BA, University Puget Sound; PHD, Univ. of Minnesota Twin Cities
Associate Professor of Government

John Wesley Dankwa

BA, University of Cape Coast; MA, University of Cape Coast; PHD, Wesleyan
University
Assistant Professor of Music

Norman Danner

BA, University of California, Berkeley; PHD, Indiana University Bloomington
Associate Professor of Computer Science

Saida Daukeyeva

Assistant Professor of Music

Anthony P. Davis

BS, U.S. Coast Guard Academy; MS, Ohio State University; PHD, Wesleyan
University
Associate Professor of the Practice in Chemistry

Morgan Day Frank

BA, Wesleyan University; MA, Stanford University; PHD, Stanford University
Visiting Assistant Professor of English

Nihal C. de Lanerolle

BA, Cambridge University; DS, University of Sussex; MA, Cambridge University;
PHD, University of Sussex
Adjunct Professor of Neuroscience and Biology

Stephen H. Devoto

BA, Haverford College; PHD, Rockefeller University
Professor of Biology; Professor, Neuroscience and Behavior

Daniel A DiCenzo

BA, Williams College
Adjunct Professor of Physical Education; Head Coach of Football

Lisa C. Dierker

BA, Ohio State University; MA, University of Connecticut; PHD, University of
Connecticut

Walter Crowell University Professor of Social Sciences; Professor of Psychology

Kim Diver

BA, Carthage College; MA, Syracuse University; PHD, Syracuse University
Associate Professor of the Practice in Earth and Environmental Sciences

Lindsay R Dolan

BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University;
PHD, Columbia University
Assistant Professor of Government

Lisa A. Dombrowski

BA, Wesleyan University; MA, University of Wisconsin at Madison; PHD,
University of Wisconsin at Madison
Associate Professor of Film Studies; Associate Professor, East Asian Studies

J. James Donady

BS, SUNY at Stony Brook; PHD, University of Iowa

Adam Fieldsteel

BA, Brown University; MAA, Wesleyan University; PHD, University of California, Berkeley
Professor of Mathematics

John E. Finn

BA, Nasson College; JD, Georgetown University; PHD, Princeton University

Professor of Government, Emeritus

Sue C. Fisher

BA, California State Univ - Northr; MA, University of California, San Diego; MAA, Wesleyan University; PHD, University of California, San Diego
Professor of Sociology, Emerita

Joseph J. Fitzpatrick

BA, Harvard University; PHD, Duke University
Assistant Professor of the Practice in Letters; Assistant Professor of the Practice, Russian, East European, and Eurasian Studies

Octavio Flores-Cuadra

BA, Universidad Americas; MA, Universidad Americas; PHD, University of Pittsburgh
Adjunct Professor of Spanish

Mathew Foust

BA, John Carroll University; MA, Texas A&M University; PHD, University of Oregon
Visiting Associate Professor of Philosophy

Douglas C. Foyle

AB, Stanford University; MA, Duke University; PHD, Duke University
Associate Professor of Government; Tutor, College of Social Studies

William H. Francisco

BA, Amherst College; MAA, Wesleyan University; MFA, Yale University
Professor of Theater, Emeritus

Erika Franklin Fowler

BA, St Olaf College; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Associate Professor of Government; Director of the Wesleyan Media Project

Michael A Fried

BA, Brown University
Adjunct Professor of Physical Education; Head Coach of Tennis (Men's Women's)

Harris A. Friedberg

BA, Harvard University; PHD, Yale University
Associate Professor of English

Michael J. Frisch

Research Professor in Chemistry

Richard John Friswell

Associate Director of the Wesleyan Institute for Lifelong Learning

Albert J. Fry

BS, University of Michigan; MAA, Wesleyan University; PHD, University of Wisconsin at Madison
E. B. Nye Professor of Chemistry, Emeritus

Courtney Fullilove

BA, Columbia University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Associate Professor of History; Associate Professor, Environmental Studies; Associate Professor, Science in Society

Susanne Grace Fusso

BA, Lawrence University; MA, Yale University; PHD, Yale University
Marcus L. Taft Professor of Modern Languages; Professor of Russian, East European, and Eurasian Studies; Chair, Russian, East European, and Eurasian Studies

G**Leslie Gabel-Brett**

BA, Wesleyan University; PHD, City College
Visiting Scholar in the Allbritton Center for the Study of Public Life

Amity Gaige

BA, Brown University; MFA, University of Iowa
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Giulio Gallarotti

BA, Hunter College; PHD, Columbia University
Professor of Government; Tutor, College of Social Studies; Professor,
Environmental Studies

Daniella Gandolfo

BA, Pontificia Universidad Católica del Perú; MA, University of Texas
Austin; PHD, Columbia University
Associate Professor of Anthropology; Co-Coordinator, Urban Studies

Matthew Carl Garrett

BA, Bard College; MA, Stanford University; MPHIL, Cambridge University; PHD,
Stanford University
Associate Professor of English; Associate Professor, American Studies;
Coordinator, Social, Cultural, and Critical Theory

Noel R Garrett

Visiting Assistant Professor in Liberal Studies

Caroline Gates

BA, University of Arizona; MA, University of Virginia; PHD, University of Virginia
Visiting Assistant Professor of French

Jeffrey Joseph Gilarde

MALS, Wesleyan University
Director of Scientific Imaging; Head Coach of Golf

C. Stewart Gillmor

BS, Stanford University; MA, Princeton University; MAA, Wesleyan University;
PHD, Princeton University
Professor of History and Science, Emeritus

Martha S. Gilmore

BA, Franklin & Marshall; MSC, Brown University; PHD, Brown University
George I. Seney Professor of Geology; Professor of Earth and Environmental
Sciences; Director, Graduate Studies; Co-Coordinator, Planetary Science

Megan H. Glick

BA, Northwestern University; MA, Yale University; MPHIL, Yale University; PHD,
Yale University
Associate Professor of American Studies; Associate Professor, Feminist, Gender,
and Sexuality Studies; Associate Professor, Science in Society; Coordinator,
Disability Studies

Peter Godwin

MA, University of Cambridge
Koeppel Journalism Fellow

Greg Goldberg

BA, New York University; PHD, CUNY The Graduate Center
Associate Professor of Sociology

James Joseph Golden

Visiting Assistant Professor in Liberal Studies

Bernardo Antonio Gonzalez

BA, University of California, Berkeley; MA, University of California, Berkeley;
MAA, Wesleyan University; PHD, University of California, Berkeley
Professor of Spanish; Spanish Section Head

Justin Peter Good

BA, SUNY Purchase; PHD, Boston University
Visiting Assistant Professor of Philosophy

Martin Gosman

BBA, University of Wisconsin at Madison; MBA, University of Wisconsin at
Madison; PHD, University of Wisconsin at Madison
Adjunct Professor of Economics

Peter S. Gottschalk

BA, College of the Holy Cross; MA, Univ of Wisconsin Fond Du Lac; PHD,
University of Chicago
Professor of Religion; Director, Office of Faculty Career Development; Professor,
Science in Society; Coordinator, Muslim Studies

Victor Gourevitch

BA, University of Wisconsin at Madison; MAA, Wesleyan University; PHD,
University of Chicago
William Griffin Professor of Philosophy, Emeritus

Laura B. Gabel

BA, Brandeis University; MAA, Wesleyan University; PHD, University of California,
San Diego
Professor of Biology, Emerita

Claire Grace

BA, Brown University; MA, Middlebury College; PHD, Harvard University
Assistant Professor of Art History; Assistant Professor, American Studies

Roger Mathew Grant

BM, Ithaca College; PHD, University of Pennsylvania
Associate Professor of Music

Vera K.B. Grant

CER, University of Freiburg
Adjunct Professor of German Studies, Emerita

Laura Grappo

BA, Wesleyan University; MA, Yale University; MPHIL, Yale University; PHD, Yale
University
Assistant Professor of American Studies; Assistant Professor, Feminist, Gender,
and Sexuality Studies

Anne F. Greene

BA, Radcliffe College; MA, Brandeis University
University Professor of English; Director, Wesleyan Writers Conference;
Coordinator, Writing Certificate

Nathanael Greene

BA, Brown University; MA, Harvard University; MAA, Wesleyan University; PHD,
Harvard University
Professor of History

James P. Greenwood

BS, SUNY at Binghamton; MS, Brown University; PHD, Brown University
Assistant Professor of Earth and Environmental Sciences

Amy Grillo

AB, Brown University; EDD, Harvard University; EDM, Harvard University

Associate Professor of the Practice in Education Studies

Erik Grimmer-Solem

BA, Brigham Young University; DPHIL, Oxford University; MPHIL, Cambridge University; MSC, London School of Economics and Political Science
Professor of History; Tutor, College of Social Studies; Professor, German Studies

Richard S. Grossman

AB, Harvard University; MA, Harvard University; MSC, London School of Economics and Political Science; PHD, Harvard University
Professor of Economics; Chair, Economics

Lori Gruen

BA, University of Colorado Boulder; PHD, University of Colorado Boulder
William Griffin Professor of Philosophy; Professor of Philosophy; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies;
Coordinator, Animal Studies

Anisha Gupta

BS, Panjab University; MS, Panjab University; PHD, Carnegie Mellon University
Visiting Assistant Professor of Chemistry

James T. Gutmann

BA, Amherst College; MAA, Wesleyan University; PHD, Stanford University
Professor of Earth and Environmental Sciences, Emeritus

H

Benjamin Haber

BA, New College of Florida; MPHIL, CUNY The Graduate Center; PHD, CUNY The Graduate Center
Visiting Assistant Professor in Sociology

Mary Alice Haddad

BA, Amherst College; MA, University of Washington; PHD, University of Washington
Professor of Government; Chair, College of East Asian Studies; Professor, Environmental Studies; Professor, East Asian Studies

Alice Berliner Hadler

BA, Mount Holyoke College; MA, Columbia Teachers College
Senior Associate Director; Adjunct Instructor in English; Co-Coordinator, African Studies

Nina Hagel

BA, Johns Hopkins University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Assistant Professor of Government

Anthony W. Hager

BS, Pennsylvania State University; PHD, Pennsylvania State University
Professor of Mathematics, Emeritus

Geoffrey Hammerson

Visiting Adjunct Professor in Liberal Studies

Hans Hansen

BA, University of Virginia; PHD, University of North Carolina at Chapel Hill
Visiting Assistant Professor of Classical Studies

I. Harjito

MA, Akademi Seni Karavitan
University Professor of Music

Miyuki Hatano-Cohen

BA, Tohoku Gakuin University
Visiting Assistant Professor of East Asian Studies

Anthony Ryan Hatch

AB, Dartmouth College; MA, University of Maryland College Park; PHD, University of Maryland College Park
Associate Professor of Science in Society; Chair, Science in Society; Associate Professor, African American Studies; Associate Professor, College of the Environment; Associate Professor, Sociology; Associate Professor, Environmental Studies Program; Coordinator, Sustainability and Environmental Justice

Sherman H. Hawkins

MAA, Wesleyan University
Professor of English, Emeritus

Sophia Helverson

BA, Reed College; MA, Yale University; MPL, Yale University
Visiting Instructor in Feminist, Gender, and Sexuality Studies

Elizabeth Ann Hepford

BA, University Of Kansas; MA, Arizona State University; PHD, Temple University
Assistant Professor of the Practice in TESOL; Assistant Professor of the Practice, English

William Herbst

BA, Princeton University; MAA, Wesleyan University; MSC, University of Toronto; PHD, University of Toronto
John Monroe Van Vleck Professor of Astronomy; Professor of Astronomy;
Professor, Integrative Sciences

Scott Higgins

BA, Oakland University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Charles W. Fries Professor of Film Studies; Professor of Film Studies; Director, College of Film and the Moving Image; Chair, Film Studies; Curator of the Wesleyan Cinema Archives

Alyson Hildum

BA, Colorado School Mines; PHD, Brandeis University
Visiting Assistant Professor of Mathematics

Cameron Donnay Hill

BA, Yale University; PHD, University of California, Berkeley
Assistant Professor of Mathematics; Assistant Professor, Integrative Sciences

Patricia R. Hill

BA, College of Wooster; PHD, Harvard University
Professor of American Studies, Emerita

Manju Hingorani

BS, University of Bombay; PHD, Ohio State University
Visiting Scholar in Molecular Biology Biochemistry

Mark Hoffarth

BA, University of North Dakota; BS, University of North Dakota; MA, Brock University; PHD, Brock University
David Scott Williams Visiting Assistant Professor of Psychology

Christiaan Hogendorn

BA, Swarthmore College; PHD, University of Pennsylvania
Associate Professor of Economics

Jay Clinton Hoggard

BA, Wesleyan University; MA, Wesleyan University

Professor of Music; Professor, African American Studies

Andrew Holland

BA, Indiana University So Bend; MFA, Yale University
Visiting Assistant Professor of Theater

Oliver W. Holmes

BA, City College; MA, University of Chicago; MAA, Wesleyan University; PHD, University of Chicago
Professor of History

Scott G. Holmes

BS, College of William and Mary; PHD, University of Virginia
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Abigail S. Hornstein

AB, Bryn Mawr College; MPHIL, New York University; PHD, New York University
Associate Professor of Economics

Steven W. Horst

BA, Boston University; PHD, University of Notre Dame
Professor of Philosophy; Chair, Philosophy; Professor, Science in Society;
Coordinator, Christianity Studies

Mark A. Hovey

BS, Ohio State University; PHD, Massachusetts Institute of Technology
Associate Provost; Professor of Mathematics; Professor, Integrative Sciences

Yu-ting Huang

BA, National Taiwan University; MA, National Taiwan University; PHD, University of California LA
Assistant Professor of East Asian Studies

Quiara Alegria Hudes

BA, Yale University; MFA, Brown University
Visiting Scholar in Theater

Elijah Huges

BA, Yale University; MAR, Yale University
Associate Professor of Art; Section Head; Associate Professor, Environmental Studies

Gertrude Reif Hughes

BA, Mount Holyoke College; MAA, Wesleyan University; MAT, Wesleyan University; PHD, Yale University
Professor of English, Emerita

Meredith Hughes

BS, Yale University; PHD, Harvard University
Associate Professor of Astronomy; Associate Professor, Integrative Sciences

John Hulsey

AB, Harvard University; MA, Universite Paris XII; MFA, University of California LA
Andrew W. Mellon Postgraduate Research Fellow in Interdisciplinary Arts Practices

Judy Hussie-Taylor

BA, Maharishi Intl University; MA, Maharishi Intl University
Visiting Instructor in Curatorial Practice in Performance

Lutz Hüwel

PHD, University of Gottingen
Professor of Physics

Masami Imai

BA, U. of Wisconsin Eau Claire; PHD, University Calif Davis
Professor of Economics; Professor, East Asian Studies

Anthony A. Infante

BA, Temple University; MAA, Wesleyan University; PHD, University of Pennsylvania
Professor of Molecular Biology and Biochemistry, Emeritus

Tushar Irani

BA, Colgate University; PHD, Northwestern University
Associate Professor of Letters; Associate Professor of Philosophy

Ryuichiro Izumi

BA, Keio University; PHD, Rutgers University
Assistant Professor of Economics

Albert Terry Jackson

BS, Springfield College Illinois; MED, Springfield College Illinois
Adjunct Professor of Physical Education, Emeritus

Elizabeth Anne Jackson

BA, Rutgers University; MA, University of Texas Austin; PHD, University of Texas Austin
Adjunct Associate Professor of Portuguese

Joyce Jacobsen

BA, Harvard University; MSC, London School of Economics and Political Science; PHD, Stanford University
Andrews Professor of Economics; Professor of Economics

Anuja Jain

Assistant Professor of Film Studies, starting January 1, 2020

Ronald S. Jenkins

BA, Haverford College; EDD, Harvard University
Professor of Theater; Chair, Theater

Carlos Alberto Jimenez Hoyos

MA, Rice University; PHD, Rice University
Assistant Professor of Chemistry

Khalil Anthony Johnson

BA, University of Georgia Athens; MPHIL, Yale University; PHD, Yale University
Assistant Professor of African American Studies

Ruth Ineke Johnson

BS, University of Witwatersrand; PHD, Cambridge University
Associate Professor of Biology; Associate Professor, Integrative Sciences

Renee Johnson Thornton

BA, SUNY at Binghamton; MALS, Wesleyan University; PHD, University of Rhode Island
Dean for the Class of 2022; Research Affiliate, African American Studies

William D. Johnston

BA, Elmira College; MA, Harvard University; PHD, Harvard University

John E. Andrus Professor of History; Professor of History; Academic Secretary; Professor, Environmental Studies; Professor, Science in Society; Professor, East Asian Studies

Barbara Jean Juhasz

BA, Binghamton University; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Jeffrey L. Shames Professor of Civic Engagement; Associate Professor of Psychology; Chair, Neuroscience and Behavior; Associate Professor, Integrative Sciences; Associate Professor, Neuroscience and Behavior; Coordinator, Civic Engagement

Eun Ju Jung

Visiting Scholar in Psychology

K

Robert Ira Kabacoff

BA, University of Connecticut; PHD, University of Missouri, St. Louis
Professor of the Practice in Quantitative Analysis

Sara Kalisnik Verovsek

PHD, Stanford University
Assistant Professor of Mathematics

Emmanuel I. Kaparakis

Director of Centers for Advanced Computing; Director, Center of Quantitative Analysis; Adjunct Assistant Professor of Quantitative Analysis

Natasha Karageorgos

Assistant Professor of the Practice in Russian, East European Eurasian Studies, starting January 1, 2020

Indira Karamcheti

BA, University Calif Santa Bar; MA, University Calif Santa Bar; PHD, University Calif Santa Bar
Associate Professor of American Studies; Chair, American Studies

Axelle Karera

BA, York University; PHD, Pennsylvania State University
Assistant Professor of Philosophy; Assistant Professor, African American Studies

Dalit Katz

BA, Hebrew University; MA, Hebrew University
Adjunct Associate Professor of Religion; Director, Center for Jewish Studies

Marilyn A. Katz

BS, Columbia University; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Classical Studies, Emerita

Melissa R. Katz

MA, Brown University; MS, University of Delaware; PHD, Brown University
Visiting Scholar in Art History

J. Kehaulani Kauanui

BA, University of California, Berkeley; PHD, University Calif Santa Crz
Professor of American Studies; Professor, Anthropology

Kerwin Kaye

BA, University of Colorado Boulder; MA, University San Francisco; PHD, New York University

Associate Professor of Sociology; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Michael S. Keane

BA, University of Texas Austin; MS, University of Gottingen; PHD, University of Erlangen-Nurnber
Professor of Mathematics, Emeritus

Anthony Bruno Keats

BA, Macalester College; MA, Tufts University; MA, University of California LA; PHD, University of California LA
Assistant Professor of Economics

R. Lincoln Keiser

BA, Lawrence University; MA, Northwestern University; MAA, Wesleyan University; PHD, University of Rochester
Professor of Anthropology, Emeritus

Christine Kemp

BA, Skidmore College; MA, Bridgewater State College
Adjunct Assistant Professor of Physical Education; Head Coach of Field Hockey

Shona Kerr

BMU, Cardiff University
Adjunct Professor of Physical Education; Head Coach of Squash (Men's Women's)

Melanie Khamis

BS, London School of Economics and Political Science; MS, University of Warwick; PHD, London School of Economics and Political Science
Associate Professor of Economics; Associate Professor, Latin American Studies

Roy E. Kilgard

BA, Valdosta St University; PHD, University of Leicester
Associate Professor of the Practice in Astronomy; Associate Professor of the Practice, Integrative Sciences

Jin Hi Kim

BA, Seoul National University; MFA, Mills College
Adjunct Assistant Professor of Music

Kyungmi Kim

MA, Yonsei University; MPHIL, Yale University; MS, Yale University; PHD, Yale University
Assistant Professor of Psychology

Makaela Jane Kingsley

BA, Wesleyan University; MA, Wesleyan University
Director, Patricelli Center for Social Entrepreneurship; Adjunct Instructor in Public Policy

John Kirn

BA, University of Denver; MA, Bucknell University; PHD, Cornell University
Professor of Biology; Professor, Neuroscience and Behavior

Patricia Klecha-Porter

BS, Ithaca College; MS, Springfield College Illinois
Curriculum Coordinator, Physical Education; Adjunct Professor of Physical Education; Head Coach of Field Hockey

Ethan Kleinberg

BA, University of California, Berkeley; MA, University of California LA; PHD, University of California LA
Class of 1958 Distinguished Professor; Professor of Letters; Professor of History; Chair, History; Executive Editor, History and Theory

Joseph L. Knee

BA, SUNY at Binghamton; PHD, SUNY at Stony Brook
Dean of the Natural Sciences and Mathematics; Beach Professor of Chemistry;
Professor of Chemistry

Katja P. Kolcio

MA, University of Georgia Athens; MA, Ohio State University; PHD, Ohio State University
Associate Professor of Dance; Chair, Dance; Associate Professor, Environmental Studies; Associate Professor, Russian, East European, and Eurasian Studies

Bharat Kolluri

Visiting Assistant Professor in Liberal Studies

Natasha Korda

BA, Columbia University; PHD, Johns Hopkins University
Professor of English; Director, Center for the Humanities; Professor, Feminist, Gender, and Sexuality Studies

Tsmpikos Kottos

BA, University of Crete; MS, University of Crete; PHD, University of Crete
Lauren B. Dachs Professor of Science and Society; Professor of Physics; Professor, Integrative Sciences; Professor, Mathematics

Hari Krishnan

BA, University of Manitoba; MFA, York University; PHD, Texas Womans University
Associate Professor of Dance; Associate Professor, Feminist, Gender, and Sexuality Studies

Daniel Krizanc

BS, University of Toronto; PHD, Harvard University
Edward Burr Van Vleck Professor of Computer Science; Professor of Computer Science; Vice-Chair, Mathematics and Computer Science; Professor, Integrative Sciences; Professor, Environmental Studies; Co-Coordinator, Informatics and Modeling

Alex Kruckman

PHD, University of California, Berkeley; SB, Brown University
Assistant Professor of Mathematics

Timothy C.W. Ku

BS, University of Rochester; MS, University of Michigan; PHD, University of Michigan
Associate Professor of Earth and Environmental Sciences; Chair, Earth and Environmental Sciences; Associate Professor, Integrative Sciences

David Julian Kuenzel

DIP, University of Tubingen; MA, University of Washington; PHD, University of Washington
Assistant Professor of Economics

Katherine M. Kuenzli

BA, Yale University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Art History; Section Head; Professor, German Studies

Ronald J. Kuivila

BA, Wesleyan University; MFA, Mills College
Professor of Music; Director, Electronic Music and Recording Studios

Matthew M. Kurtz

BA, Reed College; MA, Princeton University; PHD, Princeton University
Professor of Psychology; Professor, Neuroscience and Behavior

Basak Kus

BA, Bogazici University; MA, SUNY at Stony Brook; PHD, University of California, Berkeley

Associate Professor of Government

L

Gale Lackey

BS, West Chester University; MED, West Chester University
Adjunct Professor of Physical Education, Emerita

Jennifer Shea Lane

BA, Amherst College; MS, Smith College
Adjunct Professor of Physical Education; Head Coach of Softball

Robert P. Lane

BA, Colgate University; PHD, California Institute Tech
Associate Professor of Molecular Biology and Biochemistry; Chair, Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

David Ray Langley

Tishler Professor of Chemistry

Yunjeong Lee

BA, Sun Moon University; MS, Central Connecticut State University
Visiting Instructor in East Asian Studies

Constance Leidy

BS, Tulane University; PHD, Rice University
Associate Professor of Mathematics

Charles C. Lemert

BA, Miami University Middletown; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
John E. Andrus Professor of Social Theory, Emeritus

Jeffers Lennox

BA, University of Toronto; MA, Dalhousie University; PHD, Dalhousie University
Associate Professor of History

Leo A. Lensing

BA, University of Notre Dame; MA, Cornell University; MAA, Wesleyan University; PHD, Cornell University
Professor of Film Studies; Professor, German Studies

Marcus Leppanen

BA, University of Wisconsin-Milwaukee; MS, University of Louisville; PHD, University of Louisville
Postdoctoral Fellow in Psychology

Typhaine Leservot

BA, University of Caen; MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill
Associate Professor of French; Associate Professor of Letters; Co-Coordinator, African Studies

Peter M. LeTourneau

BA, Ricker College; MA, Wesleyan University; PHD, Columbia University
Visiting Scholar in Earth Environmental Sciences

Ariel Victoria Levy

BA, Wesleyan University
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Han Li

BS, Nankai University; PHD, Yale University
Assistant Professor of Mathematics

Lingjing Li

Visiting Scholar in East Asian Studies

Dan Licata

BS, Brown University; PHD, Carnegie Mellon University
Assistant Professor of Computer Science

Richard W. Lindquist

BS, Worcester Poly Institute; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University
Professor of Physics, Emeritus

James Lipton

BS, U Nebraska Lincoln; MSC, Cornell University; PHD, Cornell University
Professor of Computer Science; Professor, Integrative Sciences

Mengjun Liu

BA, Beijing Normal University; MA, Nanjing Normal University
Assistant Professor of the Practice in Chinese

Donald E. Long

BS, Springfield College Ma
Adjunct Professor of Physical Education, Emeritus

Jerome H. Long

BD, University of Chicago; MA, University of Chicago; PHD, University of Chicago
Associate Professor of Religion, Emeritus

Marc Robert Longenecker

BA, Wesleyan University; MA, Wesleyan University
Assistant Professor of the Practice in Film Studies

Fabiana Lopes

BA, University of Saõ Paulo; MA, Sotheby's Institute Of Art
Visiting Instructor in Curatorial Practice in Performance

Valeria López Fadul

BA, Yale University; MA, Princeton University; PHD, Princeton University
Assistant Professor of History; Assistant Professor, Latin American Studies

Psyche Loui

BS, Duke University; PHD, University of California, Berkeley
Visiting Scholar in Psychology

Susan F. Lourie

BA, Temple University; MALS, Wesleyan University
Adjunct Professor of Dance, Emerita

Rachel D. Lowe

Research Scientist in Chemistry

Joyce O. Lowrie

BA, Baylor University; MAA, Wesleyan University; PHD, Yale University
Professor of Romance Languages and Literatures, Emerita

Joshua Daniel Lubin-Levy

BA, Wesleyan University; MA, New York University
Visiting Instructor in Curatorial Practice in Performance

Alvin A. Lucier

BA, Yale University; MAA, Wesleyan University; MFA, Brandeis University
John Spencer Camp Professor of Music, Emeritus

M

Antonio Machado-Allison

MS, Central University of Venezuela; PHD, George Washington University
Visiting Scholar, College of the Environment; Research Fellow in the College of the Environment

Randall M. MacLowry

BA, Wesleyan University
Assistant Professor of the Practice in Film Studies and Co-Director of the Wesleyan Documentary Project

Amy MacQueen

BA, Columbia University; PHD, Stanford University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Urip Sri Maeny

DIPL, Indonesian Conservatory of Mus
Retired Artist-in-Residence, Dance

Clark Maines

BA, Bucknell University; MA, Pennsylvania State University; MAA, Wesleyan University; PHD, Pennsylvania State University
Professor of Art History, Emeritus

Victoria Ursula Manfredi

BA, Smith College; MS, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Assistant Professor of Computer Science

Alyx Mark

BA, Southern Illinois Univer; MA, George Washington University; PHD, George Washington University
Assistant Professor of Government

Peter A. Mark

BA, Harvard University; MA, Syracuse University; MAA, Wesleyan University; PHD, Yale University
Professor of Art History, Emeritus

Douglas Arthur Martin

BA, University of Georgia Athens; MFA, The New School; PHD, CUNY The Graduate Center
Assistant Professor of the Practice in Creative Writing; Director, Creative Writing; Assistant Professor of the Practice, English

Naho Maruta

MA, University of Wisconsin at Madison
Assistant Professor of the Practice in East Asian Studies

Bruce A. Masters

BS, Georgetown University; MAA, Wesleyan University; PHD, University of Chicago
John E. Andrus Professor of History; Professor of History; Coordinator, Middle Eastern Studies

Ioana Emy Matesan

MA, Arizona State University; PHD, Syracuse University
Assistant Professor of Government; Tutor, College of Social Studies

Cynthia Matthew

Visiting Scholar in Psychology

Paula Matthusen

BM, University of Wisconsin at Madison; MA, New York University; PHD, New York University

Associate Professor of Music; Chair, Music

Alexis May

BA, Wesleyan University; MA, University British Columbia; PHD, University British Columbia

Assistant Professor of Psychology

Michael A. McAlear

BS, McGill University; PHD, McGill University

Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Elizabeth McAlister

BA, Vassar College; MA, Yale University; MA, Yale University; MPHIL, Yale University; PHD, Yale University

Professor of Religion; Chair, African American Studies; Professor, African American Studies; Professor, American Studies; Professor, Feminist, Gender, and Sexuality Studies

Sean McCann

BA, Georgetown University; PHD, CUNY The Graduate Center

Professor of English; Director, Shapiro Center for Creative Writing; Director, Academic Writing

James W. McGuire

BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley

Professor of Government; Chair, Latin American Studies; Professor, Latin American Studies

Mark McInerney

BA, Hobart and William Smith Colleges; MA, University of Connecticut

Visiting Instructor in Economics

Jodi McKenna

BA, Brown University; MED, St. Lawrence University

Adjunct Professor of Physical Education; Head Coach of Women's Ice Hockey

Rashida Z. Shaw McMahon

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University

Assistant Professor of English; Assistant Professor, African American Studies

Michael Meere

BA, Northwestern University; MA, University of Virginia; PHD, University of Virginia

Assistant Professor of French; Assistant Professor, Medieval Studies

Laverne Melón

BA, Middlebury College; PHD, Purdue University W Lafayette

Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior

Eva Bergsten Meredith

BA, Franklin Pierce College

Adjunct Professor of Physical Education; Head Coach of Women's Soccer

Priscilla Meyer

BA, University of California, Berkeley; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University

Professor of Russian Language and Literature, Emerita

Christian L. Milik

BA, Brandeis University

Costume Shop Manager; Adjunct Instructor in Theater

Cecilia Miller

BA, LeTourneau College; DPHIL, Oxford University; MPHIL, University of St Andrews

Professor of History; Chair, College of Social Studies; Professor, Medieval Studies; Tutor, College of Social Studies

Richard A. Miller

BA, Oberlin College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University

Woodhouse/Sysco Professor of Economics, Emeritus

Elizabeth Milroy

BA, Queens University; MA, Williams College; PHD, University of Pennsylvania

Professor of Art History, Emerita

Daniel Moller

MS, Louisiana Technical University; PHD, Louisiana Technical University

Assistant Professor of the Practice in Integrative Sciences

Marichal B Monts

BA, Wesleyan University

Conductor, Ebony Singers

J. Donald Moon

BA, University Minnesota Mpls; MA, University of California, Berkeley; PHD, University Minnesota Mpls

Ezra and Cecile Zilkha Professor in the College of Social Studies; Professor of Government; Chair, Government; Professor, Environmental Studies; Tutor, College of Social Studies

Edward C. Moran

BS, Pennsylvania State University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University

Professor of Astronomy; Director, Van Vleck Observatory; Professor, Integrative Sciences; Co-Coordinator, Planetary Science

Jill G. Morawski

BA, Mount Holyoke College; MA, Carleton University; MAA, Wesleyan University; PHD, Carleton University

Willbur Fisk Osborne Professor of Natural Science; Professor of Psychology; Chair, Psychology; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies

Melisa Moreno Garcia

Visiting Scholar in Chemistry

David W. Morgan

BA, Haverford College; DPHIL, Oxford University

Professor of History, Emeritus

Thomas J. Morgan

BA, Montana State University; BS, Montana State University; MAA, Wesleyan University; MSC, University of California, Berkeley; PHD, University of California, Berkeley

Foss Professor of Physics; Professor of Physics

Ishita Mukerji

AB, Bryn Mawr College; PHD, University of California, Berkeley

Fisk Professor of Natural Science; Professor of Molecular Biology and Biochemistry; Director, College of Integrative Sciences; Professor, Integrative

Sciences; Professor, Environmental Studies; Coordinator, Health Studies; Co-Coordinator, Molecular Biophysics

Kate Mullen

BS, Central Connecticut State University; MA, Springfield College Illinois; MED, Springfield College Illinois
Senior Woman Administrator; Adjunct Professor of Physical Education; Head Coach of Women's Basketball

John Murillo

BA, Howard University; MFA, New York University
Assistant Professor of English

Michelle Aaron Murolo

BS, Clarion University of Pennsylvania; PHD, Yale University
Associate Professor of the Practice in Molecular Biology and Biochemistry

Russell D. Murphy

BA, St Johns College; MA, Boston College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Government, Emeritus

N

Jeffrey Kendell Naecker

BA, University of California, Berkeley; MA, Stanford University; PHD, Stanford University
Assistant Professor of Economics

Janice R. Naegele

BA, Mount Holyoke College; PHD, Massachusetts Institute of Technology
Alan M. Dachs Professor of Science; Professor of Biology; Professor, Neuroscience and Behavior

Jesse Nasta

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Visiting Assistant Professor of African American Studies

Valerie L. Nazzaro

BA, University of Connecticut; MA, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut
Assistant Professor of the Practice in Quantitative Analysis

Louise C. Neary

BA, Boston College; MA, Boston College; PHD, University of Illinois Urbana
Adjunct Associate Professor of Spanish

Howard I. Needler

BA, Oxford University; BS, Yale University; MA, Oxford University; PHD, Columbia University
Professor of Letters, Emeritus

David Paul Nelson

BA, Kalamazoo College; MFA, California Institute of Arts; PHD, Wesleyan University
Adjunct Assistant Professor of Music

Ellen Nerenberg

AB, Stanford University; PHD, University of Chicago
Hollis Professor of Romance Languages and Literatures; Professor of Italian

Jaymee Ngerwichit

BA, University of California, San Diego; BA, University of California, San Diego

Visiting Assistant Professor of Theater

Marguerite Nguyen

BA, Duke University; PHD, University of California, Berkeley
Associate Professor of English; Associate Professor, Environmental Studies; Associate Professor, East Asian Studies

Ruth Nisse

BA, Columbia University; PHD, University of California, Berkeley
Professor of English; Chair, English; Associate Professor, Medieval Studies

Brian Hale Northrop

BA, Middlebury College; PHD, University of California LA
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

Stewart E. Novick

BS, SUNY at Stony Brook; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Joshua Boger University Professor of the Sciences and Mathematics; Professor of Chemistry; Professor, Integrative Sciences

Laurie Nussdorfer

BA, Yale University; MA, Princeton University; MSC, London School of Economics and Political Science; PHD, Princeton University
William Armstrong Professor of History, Emerita; Professor of Letters, Emerita

O

Suzanne B. O'Connell

BA, Oberlin College; MS, SUNY at Albany; PHD, Columbia University
Professor of Earth and Environmental Sciences

Alison L. O'Neil

BS, Binghamton University; PHD, Montana State University
Assistant Professor of Chemistry; Assistant Professor, Neuroscience and Behavior; Assistant Professor, College of Integrative Sciences

Richard M. Ohmann

BA, Oberlin College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Benjamin Waite Professor of the English Language, Emeritus

Pavel V Oleinikov

Associate Director, Quantitative Analysis Center; Adjunct Assistant Professor of Quantitative Analysis

Andre Oliveira

Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

Donald B. Oliver

BS, Brandeis University; MAA, Wesleyan University; PHD, Tufts University
Daniel Ayres Professor of Biology; Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Maria-Christina Oliveras

BA, Yale University
Assistant Professor of Theater

Rich Olson

BA, Cornell University; PHD, Columbia University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Chinwe Ezinna Oriji

BS, Rutgers University; MPHIL, University of Cambridge; PHD, University of Texas Austin

Assistant Professor of Sociology

Allison Diane Orr

BA, Wake Forest University; MFA, Mills College
Distinguished Fellow in the College of the Environment

Alexander Cooke Osborn

BA, Wesleyan University; MFA, Rutgers University
Visiting Assistant Professor of Art

Maria Ospina

BA, Brown University; MA, Harvard University; PHD, Harvard University
Associate Professor of Spanish; Associate Professor, Latin American Studies

Ákos A. Östör

BA, University of Melbourne; MA, University of Melbourne; PHD, University of Chicago
Professor of Anthropology, Emeritus

Catherine R. Ostrow

DIPL, Ecole Normale de Berkendale
Adjunct Lecturer in French

Eiko Otake

BA, SUNY Empire St College
Visiting Artist-in-Residence in Dance

Marcela Oteiza

BFA, University of Chile; MFA, California Institute of Arts
Associate Professor of Theater; Associate Professor, Theater; Associate Professor, College of the Environment

P

Paula Paige

BA, Mount Holyoke College; MA, Middlebury College
Adjunct Professor of Romance Languages and Literatures, Emerita

George Mathew Paily

MSC, Indian Institute of Technology; PHD, Pennsylvania State University
Assistant Professor of the Practice in Physics

John T. Paoletti

BA, Yale University; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Kenan Professor of the Humanities, Emeritus

Gregory Pardlo

Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Emmanuel Paris-Bouvret

Director, Language Resources and Technology; Director of Language Resources and Technology; Coordinator, Less Commonly Taught Languages; Adjunct Instructor in Romance Languages and Literatures

Hyun Hee Park

BA, Dankook University; BA, Yonsei University; MA, Korean National Univ of Arts; PHD, University of Chicago
Visiting Assistant Professor of East Asian Studies

Paula C. Park

BA, Rutgers, the State University; MA, University of Texas Austin; PHD, University of Texas Austin

Assistant Professor of Spanish; Assistant Professor, Latin American Studies

Richard Parkin

BA, University of California, Berkeley; MFA, University of California LA
Assistant Professor of the Practice in Film Studies

Christopher Parslow

BA, Grinnell College; MA, University of Iowa; PHD, Duke University
Robert Rich Professor of Latin; Professor of Classical Studies; Professor, Archaeology; Professor, Art History

Andrea L. Patalano

BA, Brown University; MA, University of Michigan; PHD, University of Michigan
Professor of Psychology; Professor, Neuroscience and Behavior

Courtney Patterson-Faye

BA, University of Pennsylvania; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of Sociology

Peter C. Patton

BA, Franklin & Marshall; MAA, Wesleyan University; MS, Colorado St University; PHD, University of Texas Austin
Alan M. Dachs Professor of Science, Emeritus

Mary Paul

BFA, University of Connecticut
Assistant Professor of the Practice Theater

Katie Pearl

BA, University of Washington; MFA, Brown University
Assistant Professor of Theater

Justin Craig Peck

BA, Brandeis University; MA, University of Virginia; PHD, University of Virginia
Assistant Professor of Government

Gayle Pemberton

BA, University of Michigan; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of English, Emerita; Professor of African American Studies, Emerita

Ana M. Perez-Girones

BA, University of Seville; MA, Cornell University
Adjunct Professor of Spanish

Joseph Perna

BA, University of Chicago; MA, New York University; PHD, New York University
Visiting Assistant Professor of Italian

Michelle Louise Personick

BA, Middlebury College; PHD, Northwestern University
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences

George A. Petersson

BS, City College; PHD, California Institute Tech
Fisk Professor of Natural Science, Emeritus

Joel Pfister

BA, Columbia University; MA, University of Sussex; MA, University of London; PHD, Yale University
Olin Professor of English; Professor of English; Director, Center for the Americas; Professor, American Studies; Coordinator, Caribbean Studies

Earl W. Phillips

BA, Wesleyan University; JD, The Catholic University of America
Adjunct Instructor in Environmental Sciences; Visiting Scholar in the College of the Environment

William R. Pinch

BA, University of Virginia; MA, University of Virginia; PHD, University of Virginia
Professor of History; Associate Editor, History and Theory; Professor, Environmental Studies

Victoria Pitts-Taylor

BA, Ohio University; PHD, Brandeis University
Professor of Feminist, Gender, and Sexuality Studies; Chair, Feminist, Gender, and Sexuality Studies; Professor, Science in Society; Professor, Sociology

Ulrich Plass

MA, University of Michigan; PHD, New York University
Professor of German Studies; Chair, College of Letters; Professor, Letters

Scott L. Plous

BA, University Minnesota Mpls; PHD, Stanford University
Professor of Psychology

Catherine Poisson

BA, Sorbonne; MA, New York University; PHD, New York University
Associate Professor of French; Associate Professor, Feminist, Gender, and Sexuality Studies

David Pollack

MA, Harvard University; PHD, Harvard University; SB, University of Chicago
Associate Professor of Mathematics

Philip Pomper

BA, University of Chicago; MA, University of Chicago; MAA, Wesleyan University; PHD, University of Chicago
William Armstrong Professor of History, Emeritus

Gabrielle Piedad Ponce-Hegenauer

BA, University of Illinois Urbana; MFA, Johns Hopkins University; PHD, Johns Hopkins University
Assistant Professor of Letters; Assistant Professor, Feminist, Gender, and Sexuality Studies

Stéphanie Ponsavady

MA, University of Provence; MA, New York University; MPHIL, New York University; PHD, New York University
Associate Professor of French

Nadya Potemkina

DMA, The University of Memphis; MM, University Nthrn Iowa; MM, Ball State University
Adjunct Assistant Professor of Music; Adjunct Assistant Professor, Russian, East European, and Eurasian Studies

Christopher J. Potter

BA, University of Connecticut; MA, University of Connecticut
Adjunct Professor of Physical Education; Head Coach of Men's Ice Hockey

Helen Mills Poulos

BS, Pepperdine University; MPHIL, Yale University; MS, Pennsylvania State University; PHD, Yale University
Adjunct Assistant Professor of Environmental Studies

Joya Powell

BA, Columbia University; MA, New York University

Visiting Assistant Professor of Dance

Joyce Ann Powzyk

BS, Principia College; PHD, Duke University
Associate Professor of the Practice in Biology

Rex F. Pratt

BS, University of Melbourne; MAA, Wesleyan University; PHD, University of Melbourne
Beach Professor of Chemistry, Emeritus

Wallace C. Pringle

BA, Middlebury College; MAA, Wesleyan University; PHD, Massachusetts Institute of Technology
Professor of Chemistry, Emeritus

John Protzko

Visiting Assistant Professor in Liberal Studies

Q**Justine Quijada**

BA, University of Chicago; MA, Columbia University; PHD, University of Chicago
Associate Professor of Religion; Associate Professor, Russian, East European, and Eurasian Studies; Associate Professor, College of the Environment

Andrew H Quintman

BA, Hampshire College; MA, University of Michigan; PHD, University of Michigan
Associate Professor of Religion; Associate Professor, East Asian Studies

R**John G. Raba**

BS, University of New Haven; MED, University of New Haven
Adjunct Professor of Physical Education; Head Coach of Men's Lacrosse

Felipe A. Ramírez

BS, Colorado St University; PHD, University of Michigan
Assistant Professor of Mathematics

Alba Ramos

Temporary Employee, Physics; Temporary Employee, Physics; Visiting Scholar in Physics

Julia A. Randall

BFA, Washington University; MFA, Rutgers University
Associate Professor of Art

Christopher Rasmussen

BA, University of Virginia; MS, University of Virginia; PHD, University of Arizona
Associate Professor of Mathematics

Wendy Rayack

BA, Oberlin College; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Associate Professor of Economics; Tutor, College of Social Studies

Jennifer Raynor

BA, Lemoyne College; MA, Johns Hopkins University SAIS; MS, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Assistant Professor of Economics

Seth Redfield

BM, New Eng Conserv Music; BS, Tufts University; MS, University of Colorado Boulder; PHD, University of Colorado Boulder

Associate Professor of Astronomy; Chair, Astronomy Department; Associate Professor, Integrative Sciences; Co-Coordinator, Planetary Science

Joseph P. Reilly

BA, Trinity College; MBA, University of Rhode Island
Adjunct Professor of Physical Education; Head Coach of Men's Basketball

Phillip G. Resor

AB, Dartmouth College; MS, University of Wyoming; PHD, Stanford University
Associate Professor of Earth and Environmental Sciences

Michael D. Rice

BS, Western Mich University; MS, Western Mich University; PHD, Wesleyan University
Professor of Computer Science, Emeritus

Jeff Rider

BA, Yale University; MA, University of Chicago; PHD, University of Chicago
Professor of French; Chair, Medieval Studies; French Section Head; Professor, Medieval Studies

Blythe Roberson

BA, Harvard University
Visiting Writer in the Shapiro Writing Center

Andrea Roberts

BS, Cornell University; MS, Polytechnic University; PHD, Wesleyan University
Associate Professor of the Practice in Chemistry

Michael J. Roberts

BA, Cambridge University; MA, Cambridge University; MA, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Illinois Urbana
Robert Rich Professor of Latin, Emeritus

Mike Robinson

BS, University of Sussex; MS, McGill University; PHD, McGill University
Assistant Professor of Psychology; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences

Patricia M Rodriguez Mosquera

BA, Autonoma University of Madrid; MA, Autonoma University of Madrid; PHD, University of Amsterdam
Professor of Psychology; Professor, Feminist, Gender, and Sexuality Studies

Robert J. Rollefson

BA, University of Wisconsin at Madison; MAA, Wesleyan University; PHD, Cornell University
Professor of Physics, Emeritus

Jennifer S. Rose

BA, University of Rhode Island; MA, University of Rhode Island; PHD, University of Rhode Island
Professor of the Practice in the Center for Pedagogical Innovation; Director, Center for Pedagogical Innovation; Director, Institutional Review Board; Professor of the Practice, Quantitative Analysis Center

Phyllis Rose

BA, Radcliffe College; MA, Yale University; MAA, Wesleyan University; PHD, Harvard University
Professor of English, Emerita

Rob Rosenthal

BA, Rutgers University; MA, University Calif Santa Bar; PHD, University of California, Santa Barbara

Interim Provost and Senior Vice President for Academic Affairs; John E. Andrus Professor of Sociology, Emeritus

Lauren Rosewarne

BA, University of Melbourne; PHD, University of Melbourne
Visiting Associate Professor of Public Policy

Michael S. Roth

BA, Wesleyan University; MA, Princeton University; PHD, Princeton University
President; University Professor

Joseph T. Rouse

BA, Oberlin College; MA, Northwestern University; MAA, Wesleyan University; PHD, Northwestern University
Hedding Professor of Moral Science; Professor of Science in Society; Professor of Philosophy; Professor, Environmental Studies

Dana Royer

BA, University of Pennsylvania; PHD, Yale University
Professor of Earth and Environmental Sciences; Professor, Environmental Studies

Mary-Jane Victoria Rubenstein

BA, Williams College; MA, Columbia University; MPHIL, Cambridge University; MPHIL, Columbia University; PHD, Columbia University
Professor of Religion; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies

Mirko Rucnov

BA, University Nevada Las Vegas; MFA, Columbia University
Assistant Professor of the Practice in Film Studies

Sasha Rudensky

BA, Wesleyan University; MFA, Yale University
Associate Professor of Art; Associate Professor, Russian, East European, and Eurasian Studies

Ashraf H.A. Rushdy

BA, University of Alberta; MA, University of Alberta; PHD, Cambridge University
Benjamin Waite Professor of the English Language; Professor of African American Studies; Professor of English; Professor, Feminist, Gender, and Sexuality Studies

Donald M. Russell

Professor of Physical Education, Emeritus

Irina M. Russu

BS, University of Bucharest; MAA, Wesleyan University; PHD, University of Pittsburgh
E. B. Nye Professor of Chemistry; Professor of Chemistry; Professor, Integrative Sciences

Peter Rutland

BA, Oxford University; DPHIL, York University
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought; Professor of Government; Director, Allbritton Center for the Study of Public Life; Tutor, College of Social Studies; Professor, Russian, East European, and Eurasian Studies

Sarah Ryan

BA, Capital University; JD, Quinnipiac University; MLS, Texas Womans University; PHD, Ohio University
Associate Professor of the Practice in Oral Communication

Hwayeon Ryu

Visiting Assistant Professor in Liberal Studies

S

Iddrisu Saaka

DIPL, University of Ghana; MFA, University of California LA
Associate Professor of the Practice in Dance

Lily Leopold Saint

BA, University of Pennsylvania; PHD, CUNY The Graduate Center
Associate Professor of English; Coordinator, African Studies

Yoshiko Yokochi Samuel

BA, Aichi Prefectural Women's Coll; MA, Michigan State University; MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Professor of Asian Languages and Literatures, Emerita

Charles A. Sanislow

BS, Northern Michigan Univ; MA, Ball State University; PHD, Duke University
Professor of Psychology; Professor, Neuroscience and Behavior

Hirsh Sawhney

BA, University of Michigan; MFA, Rutgers University
Assistant Professor of English; Coordinator, South Asian Studies

Noelle Sawyer

Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

Said Sayrafiezadeh

Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Ronald W. Schatz

BA, University of Wisconsin at Madison; MAA, Wesleyan University; MAT, Harvard University; PHD, University of Pittsburgh
Professor of History

Karl E. Scheibe

BS, Trinity College; MAA, Wesleyan University; PHD, University of California, Berkeley
Professor of Psychology, Emeritus

Jeffrey Schiff

BA, Brown University; MFA, University of Massachusetts Amherst
Professor of Art

Paul Schwaber

BA, Wesleyan University; MA, University of California, Berkeley; PHD, Columbia University
Professor of Letters, Emeritus

Vera Schwarcz

BA, Vassar College; MA, Yale University; MAA, Wesleyan University; PHD, Stanford University
Mansfield Freeman Professor of East Asian Studies, Emerita

Nancy L. Schwartz

BA, Oberlin College; MAA, Wesleyan University; PHD, Yale University
Professor of Government, Emerita

Salvatore Scibona

BA, St. John's College; MFA, University of Iowa
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Anthony O. Scott

BA, Harvard University; MA, Johns Hopkins University
Distinguished Professor of Film Criticism

Philip H. Scowcroft

BA, Harvard University; MA, Cornell University; PHD, Cornell University
Edward Burr Van Vleck Professor of Mathematics, Emeritus

John G. Seamon

BS, Columbia University; PHD, University of Massachusetts Amherst
Professor of Psychology, Emeritus

Olga Sendra Ferrer

BA, Universidad de Barcelona; MA, North Carolina State University; MA, Princeton University; PHD, Princeton University
Associate Professor of French

Saray Shai

BS, Israel Institute of Technology; PHD, University of St Andrews
Assistant Professor of Computer Science

Norman R. Shapiro

BA, Harvard University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Distinguished Professor of Literary Translation and Poet in Residence

Anu (Aradhana) Sharma

BA, Eugene Lang College; MA, Columbia University; MA, Stanford University; PHD, Stanford University
Associate Professor of Anthropology; Associate Professor, Feminist, Gender, and Sexuality Studies

Gary Shaw

BA, McGill University; DPHIL, Oxford University
Professor of History; Associate Editor, History and Theory; Professor, Medieval Studies

Damien Francis Sheehan-Connor

BA, Amherst College; MD, Tufts University; PHD, University Calif Santa Bar
Associate Professor of Economics; Tutor, College of Social Studies

Meng-ju Renee Sher

BA, Wesleyan University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Physics; Assistant Professor, Environmental Studies; Assistant Professor, Integrative Sciences

Sanford Shieh

AB, Cornell University; BA, Cornell University; BA, Oxford University; PHD, Harvard University
Professor of Philosophy

Keiji Shinohara

Artist-in-Residence, Art; Artist-in-Residence, East Asian Studies

Anna Shusterman

PHD, Harvard University; SB, Brown University
Associate Professor of Psychology; Co-Coordinator, Education Studies

Charles Siebert

BA, SUNY at Binghamton University; MFA, University of Houston
Menakka and Essel Bailey '66 Distinguished Visiting Scholar in the College of the Environment

Lauren Silber

BA, University of Connecticut; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst

Assistant Professor of the Practice in Academic Writing; Assistant Professor of the Practice, English

Ana M. Silva

Visiting Scholar in African American Studies

Michael Singer

BS, University Southern Calif; PHD, University of Arizona
Professor of Biology; Professor, Environmental Studies

Harry M. Sinnamon

BA, La Salle University; MAA, Wesleyan University; MS, Villanova University; PHD, University of Rochester
Professor of Psychology, Emeritus

Joseph M. Siry

BA, Princeton University; MAA, Wesleyan University; MAR, University of Pennsylvania; PHD, Massachusetts Institute of Technology
Kenan Professor of the Humanities; Professor of Art History; Co-Coordinator, Urban Studies

Gilbert L. Skillman

BA, University Kentucky Lexngt; MA, University of Michigan; PHD, University of Michigan
Professor of Economics; Tutor, College of Social Studies

Brando Skyhorse

BA, Stanford University; MFA, University Calif Irvine
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

Joseph P. Slaughter

BS, U.S. Naval Academy; MA, University of Maryland College Park; MA, U.S. Naval War College; PHD, University of Maryland College Park
Visiting Assistant Professor, History; Chamberlain Project Fellow in the Center for the Study of Public Life

Mark Slobin

BA, University of Michigan; MA, University of Michigan; PHD, University of Michigan
Winslow-Kaplan Professor of Music, Emeritus

Richard S. Slotkin

BA, Brooklyn College; MAA, Wesleyan University; PHD, Brown University
Olin Professor of English, Emeritus

Michael James Slowik

BA, Wesleyan University; MA, University of Chicago; MA, University of Iowa; PHD, University of Iowa
Assistant Professor of Film Studies

Colin A. Smith

BA, New York University; PHD, University of California, San Francisco
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences; Assistant Professor, Molecular Biology and Biochemistry

Courtney Weiss Smith

BA, University Of Dayton; MA, Washington University; PHD, Washington University
Associate Professor of English; Associate Professor, Science in Society

Gay Smith

BA, University of Hawaii; MA, University of Hawaii; MAA, Wesleyan University; PHD, University of California LA
Professor of Theater, Emerita

Victoria Smolkin

BA, Sarah Lawrence College; PHD, University of California, Berkeley
Associate Professor of History; Tutor, College of Social Studies; Associate Professor, Russian, Eastern European, and Eurasian Studies

Daniel Smyth

BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago
Assistant Professor of Letters; Assistant Professor, Philosophy

David F. Snyder

BS, St. Lawrence University
Adjunct Professor of Physical Education, Emeritus

Noemie B. Solomon

PHD, New York University
Interim Director, Institute of Curatorial Practice in Performance; Visiting Assistant Professor of Curatorial Practice in Performance

Peter Gordon Solomon

BS, North Carolina State University; MA, University of Connecticut
Adjunct Professor of Physical Education; Head Coach of Swimming/Diving (Men's Women's)

Ben Somera

BA, University Southern Calif
Adjunct Associate Professor of Physical Education; Head Coach of Volleyball

Tyshawn Sorey

BM, William Patern College of NJ; MA, Wesleyan University; PHD, Columbia University
Assistant Professor of Music; Assistant Professor, African American Studies

Elise Springer

BA, Wesleyan University; MA, University of Connecticut; PHD, University of Connecticut
Associate Professor of Philosophy; Associate Professor, Feminist, Gender, and Sexuality Studies

Nicole Lynn Stanton

BA, Antioch College; MFA, Ohio State University
Dean of the Arts and Humanities; Professor of Dance; Professor, Environmental Studies; Professor, African American Studies

Francis W. Starr

BS, Carnegie Mellon University; MS, Boston University; PHD, Boston University
Professor of Physics; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Coordinator, Integrated Design, Engineering and Applied Science

Robert S. Steele

BA, Whitman College; MAA, Wesleyan University; PHD, Harvard University
Professor of Psychology

Steven E. Stemler

BS, University of Washington; MED, Boston College; PHD, Boston College
Associate Professor of Psychology; Co-Coordinator, Education Studies

Brian A. Stewart

BS, Stanford University; PHD, Massachusetts Institute of Technology
Professor of Physics; Professor, Environmental Studies; Professor, Integrative Sciences

William W. Stowe

BA, Princeton University; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University
Benjamin Waite Professor of the English Language, Emeritus

Tracy Heather Strain

AB, Wellesley College; EDM, Harvard University
 Professor of the Practice in Film Studies and Co-Director of the Wesleyan
 Documentary Project

Melvin H. Strauss

BA, Rutgers University; DFA, Cornish Institute; MA, New York University
 Adjunct Professor of Music, Emeritus

Sonia Sultan

BA, Princeton University; MA, Harvard University; PHD, Harvard University
 Professor of Biology; Professor, Environmental Studies

Prof. Sumarsam

BA, Akademi Seni Karawitan; MA, Wesleyan University; PHD, Cornell University
 Winslow-Kaplan Professor of Music; Professor of Music

Andrew Szegedy-Maszak

BA, University of Michigan; MA, Princeton University; MAA, Wesleyan University;
 PHD, Princeton University
 Jane A. Seney Professor of Greek; Professor of Classical Studies; Professor,
 Environmental Studies

T**Ying Jia Tan**

BA, University of California, Berkeley; MA, Stanford University; MPhil, Yale
 University; PHD, Yale University
 Assistant Professor of History; Assistant Professor, East Asian Studies

Amy Cynthia Tang

BA, Harvard University; PHD, Stanford University
 Associate Professor of American Studies; Associate Professor of English

Royette Tavernier Dubar

MS, Brock University; PHD, Brock University
 Assistant Professor of Psychology

Erika A. Taylor

BS, University of Michigan; PHD, University of Illinois Urbana
 Associate Professor of Chemistry; Faculty Director, McNair Program; Associate
 Professor, Environmental Studies; Associate Professor, Integrative Sciences

Steven Taylor

BA, Glassboro St College; MA, Brown University; PHD, Brown University
 Visiting Assistant Professor of Curatorial Practice in Performance

Tula Telfair

BFA, Moore College Of Art; MFA, Syracuse University
 Professor of Art; Professor, Environmental Studies

Kate TenEyck

BFA, Rhode Island School of Design; MFA, University of Hartford
 Art Studio Technician; Adjunct Assistant Professor of Art

Mitali Thakor

BA, Stanford University; PHD, Massachusetts Institute of Technology
 Assistant Professor of Science in Society

Kelly Marie Thayer

BA, Regis College; PHD, Wesleyan University
 Assistant Professor of the Practice in Integrative Sciences

Ellen Thomas

BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
 Harold T. Stearns Professor of Integrative Sciences; Smith Curator of
 Paleontology of the Joe Webb Peoples Museum of Natural History; University
 Professor in the College of Integrative Sciences; Research Professor, Earth and
 Environmental Sciences

Khachig Tölölyan

BA, Harvard University; MA, University of Rhode Island; MAA, Wesleyan
 University; PHD, Brown University
 Professor of English; Professor of Letters; Editor, *Diaspora*; Professor, German
 Studies

Jesse Wayne Torgerson

BA, Biola University; MA, University of California, Berkeley; PHD, University of
 California, Berkeley
 Assistant Professor of Letters; Assistant Professor, Medieval Studies; Assistant
 Professor, History

Edward Torres

BA, Roosevelt University
 Assistant Professor of the Practice in Theater

Elizabeth G. Traube

BA, Radcliffe College; MA, Harvard University; MAA, Wesleyan University; PHD,
 Harvard University
 Professor of Anthropology; Chair, Anthropology; Professor, Feminist, Gender,
 and Sexuality Studies

Helen B. Treloar

BS, University of Melbourne; PHD, University of Melbourne
 Associate Professor of the Practice in Neuroscience and Behavior

Matthew James Treme

BA, Tulane University; MA, University of Arizona; PHD, Princeton University
 Visiting Assistant Professor of French

William L. Trousdale

Associate Professor of Physics, Emeritus

Min-Feng Tu

BS, National Tsing Hua University; MS, California Institute Tech; PHD, California
 Institute Tech
 Assistant Professor of the Practice in Physics

Jennifer Tucker

BA, Stanford University; MPhil, Cambridge University; PHD, Johns Hopkins
 University
 Associate Professor of History; Associate Professor, Feminist, Gender, and
 Sexuality Studies; Associate Professor, Environmental Studies; Associate
 Professor, Science in Society

Alfred Turco

BA, Brown University; MA, Harvard University; PHD, Harvard University
 Professor of English, Emeritus

Laura Ann Twagira

BA, Wellesley College; MA, Sarah Lawrence College; PHD, Rutgers University
 Assistant Professor of History; Assistant Professor, Feminist, Gender, and
 Sexuality Studies

Patrick Tynan

BS, University of Massachusetts Amherst
 Adjunct Professor of Physical Education; Head Coach of Women's Crew

U**Gina Athena Ulysse**

BA, Upsala College; MA, University of Michigan; PHD, University of Michigan
Professor of Anthropology; Professor, Feminist, Gender, and Sexuality Studies

Roman Utkin

MA, Kazan State University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of Russian, East European, and Eurasian Studies; Assistant
Professor, Feminist, Gender, and Sexuality Studies

V**Richard T. Vann**

BA, Southern Methodist C; BA, Oxford University; MA, Oxford University; MA,
Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of History and Letters, Emeritus

Johan C. Varekamp

BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
Smith Curator of Mineralogy and Petrology of the Joe Webb Peoples Museum of
Natural History; Harold T. Stearns Professor of Earth Science; Professor of Earth
and Environmental Sciences; Professor, Environmental Studies; Professor, Latin
American Studies

Heather Vermeulen

BA, University of Richmond; MA, Yale University; MA, Yale Divinity School;
MPHIL, Yale University; PHD, Yale University
Andrew W. Mellon Postdoctoral Fellow

H. Shellae Versey

BS, Tuskegee University; MPH, Columbia University; MS, University of Michigan;
PHD, University of Michigan
Assistant Professor of Psychology; Assistant Professor, Environmental Studies;
Assistant Professor, African American Studies

Keith Vinci

BS, University of Connecticut; MA, Southern Connecticut State University
Visiting Instructor in American Sign Language

Eirene Visvardi

BA, University of Crete; MPHIL, Cambridge University; PHD, Stanford University
Associate Professor of Classical Studies; Chair, Classical Studies

Danielle Vogel

BA, Dowling College; MA, Naropa University; PHD, University of Denver
Assistant Professor of English, Creative Writing

Greg A. Voth

BS, Wheaton College; MS, Cornell University; PHD, Cornell University
Professor of Physics; Professor, Integrative Sciences

Kevin Vrevich

BA, University of Wisconsin at Madison; MA, SUNY at Binghamton University
Visiting Instructor in History

W**Phillip B. Wagoner**

BA, Kenyon College; PHD, University of Wisconsin at Madison

Professor of Art History; Chair, Art and Art History; Professor, Archaeology

Peter Waite

BFA, Hartford Art School; MFA, School Art Institute Chgo
Visiting Assistant Professor in Liberal Studies

Andrew Walker

BA, Duke University; PHD, University of Michigan
Andrew W. Mellon Postdoctoral Fellow in Latin American Studies

Ao Wang

BA, Beijing University; MA, Washington University; PHD, Yale University
Associate Professor of East Asian Studies

Leslie A. Warren

BA, University of Vermont
Visiting Instructor in American Sign Language

Takeshi Watanabe

BA, Yale University; PHD, Yale University
Assistant Professor of East Asian Studies

Clifton Nathaniel Watson

BA, University of Connecticut; MA, North Carolina Central Univ; PHD, Fordham
University
Director, Jewett Center for Community Partnerships; Adjunct Assistant Professor
of Public Policy

Christopher S. Weaver

BS, Hobart and William Smith Colleges; CAS, Wesleyan University; MALS,
Wesleyan University; SM, Massachusetts Institute of Technology
Distinguished Professor of Computational Media in the College of Integrative
Sciences

Kari Weil

BA, Cornell University; MA, Princeton University; PHD, Princeton University
University Professor of Letters; University Professor, College of the Environment;
University Professor, Environmental Studies; University Professor, Feminist,
Gender, and Sexuality Studies; Co-Coordinator, Animal Studies

Leslie A. Weinberg

BA, Case Western Reserve Univ; MFA, University of Connecticut
Retired Artist-in-Residence, Theater

Stephanie Kuduk Weiner

BA, University Minnesota Mpls; PHD, Stanford University
Professor of English

Michael P. Weir

BS, University of Sussex; PHD, University of Pennsylvania
Professor of Biology; Professor, Integrative Sciences; Co-Coordinator, Informatics
and Modeling

Joseph Weiss

BA, University British Columbia; MA, University of Chicago; PHD, University of
Chicago
Assistant Professor of Anthropology

Margot Weiss

BA, University of Chicago; MA, Duke University; PHD, Duke University
Associate Professor of Anthropology; Associate Professor of American Studies;
Associate Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Queer
Studies

Ruth Striegel Weissman

DIP, University of Tubingen; MAA, Wesleyan University; PHD, University of South Carolina

Walter Crowell University Professor of Social Sciences, Emerita

Arthur S. Wensinger

MAA, Wesleyan University

Marcus L. Taft Professor of German Language and Literature and Professor of the Humanities, Emeritus

Phillip Wesolek

BS, University of Wisconsin at Madison; MS, University of Illinois at Chicago; PHD, University of Illinois at Chicago

Visiting Scholar in Mathematics

T. David Westmoreland

BS, Massachusetts Institute of Technology; PHD, University of North Carolina at Chapel Hill

Associate Professor of Chemistry; Associate Professor, Integrative Sciences

Michael F. Whalen

BA, Wesleyan University; MS, Springfield College

Frank V. Sica Director of Athletics and Chair, Physical Education; Adjunct Professor of Physical Education

Geoffrey H. Wheeler

BA, Dartmouth College

Adjunct Professor of Physical Education; Head Coach of Men's Soccer

Duffield White

BA, Wesleyan University; PHD, University of Michigan

Associate Professor of Russian Language and Literature, Emeritus

Ellen B. Widmer

BA, Wellesley College; MA, Tufts University; MA, Harvard University; MAA,

Wesleyan University; PHD, Harvard University

Kenan Professor of the Humanities, Emerita

Ann M. Wightman

BA, Duke University; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University

Professor of History, Emerita

Sarah Wilbur

BFA, University of Wisconsin-Milwaukee; MFA, University of California LA; PHD,

University of California LA

Visiting Assistant Professor of Curatorial Practice in Performance

Sarah E. Wiliarty

BA, Harvard University; MA, University of California, Berkeley; PHD, University of California, Berkeley

Associate Professor of Government; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, German Studies

Clara L. Wilkins

BA, Stanford University; MS, University of Washington; PHD, University of Washington

Associate Professor of Psychology

Kim Williams

BA, C.W. Post Campus, LIU

Adjunct Associate Professor of Physical Education; Head Coach of Women's Lacrosse

Janice D. Willis

BA, Cornell University; MA, Columbia University; PHD, Columbia University

Professor of Religion, Emerita

Jon C. Wilson

Head Coach of Women's Golf

Krishna R. Winston

BA, Smith College; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University

Marcus L. Taft Professor of German Language and Literature, Emerita

Robert Wintsch

BA, Beloit College; PHD, Brown University

Visiting Professor of Earth and Environmental Sciences; Visiting Scholar in Earth Environmental Sciences

Serena S. Witzke

BA, McMaster University; MA, McMaster University; PHD, University of North Carolina at Chapel Hill

Visiting Assistant Professor of Classical Studies

Pippin Wolfe

BA, Brown University; BS, Brown University; PHD, University of Massachusetts Amherst

Postdoctoral Fellow in Computer Science

Carol S. Wood

AB, Randolph Macon W College; MAA, Wesleyan University; PHD, Yale University

Edward Burr Van Vleck Professor of Mathematics, Emerita

Mark A. Woodworth

BA, Wesleyan University; MALS, Wesleyan University

Adjunct Professor of Physical Education; Head Coach of Baseball

Benjamin Wurgaft

BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley

Visiting Assistant Professor in the College of Social Studies; Visiting Assistant Professor of History

X

Chenmu Xing

BA, Shanghai International Studies; MA, Columbia University; PHD, Columbia University

Postdoctoral Fellow in Psychology

Y

Tiphonie Yanique

BA, Tufts University; MFA, University Houston Univ Pk

Professor of English; Professor, African American Studies

Jielu Yao

BS, Fudan University; MSC, National University of Singapore

Research Fellow in the Quantitative Analysis Center

Gary W. Yohe

BA, University of Pennsylvania; MA, SUNY at Stony Brook; MPHIL, Yale University; PHD, Yale University

Huffington Foundation Professor of Economics and Environmental Studies,
Emeritus

Z

Camilla Zamboni

MA, Ohio State University
Assistant Professor of the Practice in Italian; Italian Section Head

Alexandra M. Zax

Visiting Scholar in Psychology

Xiaoxue Zhao

BA, Yale University; PHD, Yale University
Visiting Assistant Professor of Economics

Su Zheng

BA, Central Conservatory of Music; MA, New York University; PHD, Wesleyan
University
Associate Professor of Music; Associate Professor, Feminist, Gender, and
Sexuality Studies; Associate Professor, East Asian Studies

Xiaomiao Zhu

MA, Wesleyan University
Adjunct Professor of East Asian Studies

Sebastian Zimmeck

LLM, University of California, Berkeley; MS, Columbia University; PHD, University
of Kiel; PHD, Columbia University
Assistant Professor of Computer Science

Jeremy Zwelling

BA, Columbia University; MA, Brandeis University; PHD, Brandeis University
Associate Professor of Religion, Emeritus

WESLEYAN UNIVERSITY CATALOG DISCLAIMERS

A copy of the lists of officers and faculty, as well as academic regulations, for the 2019-2020 issue of the Wesleyan University Catalog was prepared as of August, 2019. Information about fees and expenses, financial aid, and scholarships applies to the academic year 2019-2020. However, plans of study, course titles, fees, expenses, and other matters described herein are subject to change at the discretion of the University. Such changes may apply to matriculated students. University policies and guidelines for their implementation are published online at wesleyan.edu (<https://wesleyan.edu>).

As required by law, a copy of the Wesleyan University security report is available upon request. This report includes statistics for three previous years on specific reported crimes that occurred on campus, on property that is owned or controlled by the University, and public property within a reasonably contiguous geographic area to campus. The report also includes institutional policies concerning campus security, crime prevention, the reporting of crimes, University policy on alcohol and drugs, and many other related matters. A copy of this report is available at the Office of Admission, the Office of Public Safety, or the Public Safety website located at wesleyan.edu/publicsafety (<http://wesleyan.edu/publicsafety>).

STATEMENT OF NONDISCRIMINATION

Wesleyan University admits students without regard to race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression, to all rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression in admission to, access to, employment in, or treatment in its programs and activities.
