immediately after World War II, composers and artists began to focus on changing the relation of composers, performers, and listeners to sound in response to those techniques. We will consider those artistic strategies and the role they have played in shaping musical genres such as musique concrete, serial and spectral composition, interactive computer music systems, circuit bending, and entirely new genres such as sound, video, and performance art. Student projects will be focused on the creation of music, installations, and performances that respond to those ideas and issues. Our primary tool for those projects will be MAX/MSP/Jitter, a software environment designed to enable the composition of real-time interactive sound, video, and network connections.

The fundamental goal of this course is to develop the combination of technical skills and historical awareness needed to creatively engage the ever-expanding accumulation of data and social media that is currently enabling a new period of change in artistic practice.

#### **MUSC223 Music, Recording, and Sound Design**

This technical and historical introduction to sound recording is designed for upper-level students in music, film, theater, dance, and art. The course covers the use of microphones, mixers, equalization, multitrack recording, and digital sequencing. Additional readings will examine the impact of recording on musical and filmic practice. Participation in the course provides students with access to the Department of Music recording studio.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC103 OR MUSC201**

#### **MUSC230 Music Theater Workshop**

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, 'I Want/I Am' songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the 'rules' to suit their own creative instincts.

Offering: **Crosslisting**

#### **MUSC231 Performing Arts Videography**

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's *Pina*, Elliot Caplan's *Cage/Cunningham*, John Cohen's *The High Lonesome Sound*, and Peter Greenaway's *Four American Composers*.

#### **MUSC241 Allegory and Devotion in Medieval and Renaissance Music**

This course investigates the mystical and visionary aspects of religious music alongside the secular development of the vernacular love lyric. We explore tensions between individual and communal practices, authorship and artistry, power and politics, and the multiple social functions of music-making. Students learn about the musical legacy from Ancient Greece, tracing its influence through the Middle Ages to the end of the Renaissance. We cover the music of worship, romance, public ceremony, and private entertainment, observing the shifting balance between innovation and tradition. We study the relationship of notational systems to memory, become familiar with cultures that are remote from ours, and gain a historical respect for difference. By engaging with the deep past, you acquire skills not only to appreciate the musical creativity of a millennium ago, but also to better understand social and cultural distances in the modern world.

The course material will be presented through lectures and discussion, listening assignments, singing, and readings. Weekly lab sessions go over technical terminology and address the challenges that arise. The lab also facilitates reviews for quizzes and provides coaching in essay writing, research skills, and the development of analytical listening.

#### **MUSC242 Baroque and Classical Music**

At the end of the 18th century, an aesthetic revolution with music at its center gave birth to what we now call modernity. The music that led up to and helped to create that transformation--the music of 17th- and 18th-century Europe--is some of the most widely celebrated and revered in our contemporary moment. But this music's place of privilege in the canon of Western musical artworks has, however, given us a false sense of familiarity with it. When we begin to look closer at this music that otherwise might seem familiar, an entire world of affective shocks, social commentaries, elaborate dances, finely crafted images, inside jokes, and carefully planned dramas reveals itself to us. Understanding the logic with which this music operated can help us to better understand the transformations in aesthetic thought it helped to effect and, therefore, to better understand our world's current configuration of aesthetics, politics, and feeling. This course will provide students with the tools necessary to decipher 17th- and 18th-century music and aesthetics, and will invite students to speculate on the relevance of these bodies of creativity and thought to the present day. Repertoire considered will include the music of Monteverdi, Lully, Handel, Bach, Haydn, Mozart, and Beethoven. In addition to music written in Europe, we will also together investigate music written in the Spanish colonies of South America during the 18th century.

#### **MUSC243 Music of the 19th Century**

The nineteenth century is a time of great change--politically, socially and artistically. We will study many of the major composers, and major trends, through their relationship to Richard Wagner. Wagner's life intersects with almost every major figure in nineteenth century music, in one way or another, and his legacy defines much of the twentieth century, extending all the

way to today. In addition to European composers, we will study selected composers in the United States as well. Europeans include Beethoven, Chopin, Berlioz, Schubert, Liszt, Louise Ferenc, Brahms, Arthur Sullivan, and Hugo Wolf. Americans include Frank Johnson (the first published African American composer), Louis Moreau Gottschalk, and 'the Beethoven of America,' Anthony Philip Heinrich.

#### **MUSC244 Music of the 20th Century**

In the 20th century, European and American art music (classical music in common parlance) became increasingly fragmented. Composition splintered into diverse idioms and methods: the minimalism of Steve Reich, impressionism of Claude Debussy, and indeterminacy of John Cage, to name only a few. Often, the proponents of one school vehemently rejected the techniques of the others. Perhaps as a result of such schisms, the audience for classical music--particularly contemporary composition--diminished in size, to the point that critics were hailing the 'postclassical era' by the 1990s. The concert hall ceased to be a showcase for contemporary compositions and became a kind of museum devoted to preserving (and occasionally reinventing) canonic works of the past. Commercial popular musics such as jazz and rock eclipsed classical music in audience appeal and relevance. While some composers attracted listeners through their interface with folk and popular musics or with film (e.g., Aaron Copland, Leonard Bernstein), others preferred to cultivate small but devoted audiences of initiates for their challenging works (e.g., Milton Babbitt, Arnold Schoenberg). Meanwhile, the advent of mass-produced sound recordings enabled music from distant times and places to be preserved, transported, and heard on demand, with profound consequences for the creation, performance, and consumption of music. In this course, we will explore the many trends that have marked classical musicking in the 20th century. Through extensive listening assignments and primary source readings, we will meet many of the century's influential composers, performers, critics, record producers, pedagogues, patrons, and listeners. In discussions and writing, we will explore what the past century's legacy means for us as musicians and listeners today. While previous experience with music is useful, it is not a requirement for success in this course.

#### **MUSC246 The Symphony: Evolution of Genre**

This course will explore cultural settings and key elements in development of the orchestra as a performing force, conducting as an art form, organology, music history, and theory, by means of tracing the evolution of a single genre: the symphony (from 1750s through the 20th century). Preliminary list of composers includes Sammartini, J. Stamitz, Haydn, Mozart, Beethoven, Schubert, R. Schumann, Mendelssohn, Berlioz, Tchaikovsky, Dvorzak, Franck, Strauss, Mahler, Sibelius, Tippett, Shostakovich, Prokofiev, Stravinsky, Hindemith, Lutoslawski, Ives, Harris, W. Schuman, Copland, Riegger, Sessions, Zwilich.

#### **MUSC248 Music in Outer Space**

Very few people have traveled out of the Earth's atmosphere, but many composers have voyaged extensively in the conceptual realms of outer space. Throughout human history, musicians have been inspired by the 'harmony of the spheres,' knowledge of the universe, celestial bodies, and planetary

motion. From Pythagoras, Boethius, Philippe de Vitry, John Dunstaple, Johannes Kepler, Gustav Holst, Györgi Ligeti, John Cage, Judith Weir, Alvin Lucier, Brian Eno, Karlheinz Stockhausen, Sun Ra, and Jeff Mills to the 1977 Voyager Golden Record, Hawkwind, David Bowie, the Grateful Dead, Pink Floyd, John Williams, Kraftwerk, and the Beastie Boys, we explore the importance of constellations to musical creativity, and the ways in which cosmic sounds have influenced artists. The course will approach the topic through various interpretative lenses. Readings are drawn from a wide range of sources--theoretical, scientific, poetic, and experiential. Discussion topics will include theories relating to the music of the spheres, the study of geometry and proportion, astro-acoustics, sonification, the use of metaphor (in naming the planets in our solar system, lunar and solar imagery), and the influence of imagined and documented sounds of space on composers past and present. Students will each construct their own soundscape of space in the near future. Musicians, astronomers, theorists, and composers: All are welcome.

#### **MUSC249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology**

The internet has revolutionized how people consume music, along with the ways people read and write about it. This upper-level course will offer an introduction to music journalism and the relationship of public musicology to contemporary life. It looks at the history and function of music criticism, different kinds of writing about music, changing perceptions of music as a public art-form, and the role of cultural policy in the creation and maintenance of public musical institutions. In addition to reviewing recordings, live events, and books on music, students will have the opportunity to engage with professional music journalists, and produce a short radio feature in collaboration with WESU (88.1).

#### **MUSC250 Film and Folk Music of India**

What is film music culture in India? What is folk music in India today? How do these genres interact and influence one another? Most research on the music of India has focused on the classical systems. However, for many people, the most important musical expressions found in their personal and social lives are film and folk musics. Even though film music is considered to be entertainment, it reflects almost all aspects of Indian music and culture. Students will be introduced to the culture and heritage of India. Film and folk music will be analyzed with reference to ancient and modern musical treatises. Topics covered will include the diverse cultures within India and its global diaspora. Students will be encouraged to sing or play the pop and folk songs of India.

#### **MUSC261 Music and Modernity in China, Japan, and Korea**

This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers

and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the issues of global/local cultural contacts, and a better understanding of music's central role in political and social movements in 20th-century East Asia.

#### **MUSC262 Korean Music from Shamanism to Television (CLAC.50)**

This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly

moving in many directions with contemporary life and influence from Western culture.

Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking 'Hermit Kingdom,' Korea has now entered into instant global communications with the production of more individual music in various styles.

**MUSC265 African Presences I: Music in Africa**

This is a team-taught course, with instructors Charry and Dankwa bringing their complementary areas of expertise for a wide-ranging, interactive, and engaging immersion into the music, history, and cultures of Africa. We will explore the diversity of musical expression throughout the African continent with a combination of intensive reading, listening to recordings, viewing videos, discussion, and hands-on performance (all levels welcome). We will survey the continent as a whole, explore regional features, discuss in depth specific pieces, genres, and countries, and look at the social and political horizons of music, including its role in everyday life and rituals and how musical experiences have changed in contemporary life. We will also explore the presence of African music in social media, including the spread and impact of African rap and hip hop.

**MUSC272 History of Jazz in American Culture**

This course will provide students with a broad-based literacy in the history of jazz while examining its significance and impact within American culture. As a musical style, jazz has been a staging ground for working out some of the most defining issues and aspects of American culture, including the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, assimilation versus appropriation, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s through the '50s, until it was displaced and pushed to the margins by rock and soul in the 1960s. But it has remained an inspiration for diverse artists in rock and rap up to the present day, including Kendrick Lamar's jazz-drenched 'To Pimp A Butterfly' and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

We will explore the early 20th-century origins of jazz in New Orleans, its rise as America's popular dance music in the 1920s and '30s, a shift to a more concert art-oriented form in the 1940s and '50s (representing the epitome of cool and hipness), avant-garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip-hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, among many others, as well as new directions from recent generations (bringing in guest music department faculty). We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados and those interested in social and cultural dynamics as well as the musical materials.

**MUSC275 Music and Downtown New York**

This course will explore the history and simultaneous flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of dramatic cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of American history. Much of the course will be devoted to discovering their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and politics, and avant-garde aesthetics.

Drawing from primary sources, we will read about and listen to recordings of a wide variety of musicians, view a broad cross-section of film from the era, identify aesthetic and cultural trends, and study the local industry that supported them, including record labels, coffee houses, clubs, and concert spaces. Projects throughout the semester include written papers, individual and group presentations, and adding content to an interactive collaborative Google map of the neighborhood.

**MUSC277 Jazz Avant-Gardes**

This course will explore the emergence of an avant-garde in jazz in the 1950s and 60s, including earlier efforts and later developments in the preceding and succeeding decades. We will take a holistic approach, examining the music and its surrounding community within the broader social and cultural currents of 1950s and '60s America, especially that of European-inherited avant-garde aesthetics, the increasingly urgent Civil Rights Movement and changing notions of freedom, and artist collectives in the U.S. and Europe. Key artists will include Monk, Coleman, Taylor, Sun Ra, Coltrane, Art Ensemble of Chicago, Bailey, and Braxton, among others. We will immerse ourselves in a combination of reading, listening to recordings, discussion, and in-class performances. Throughout the semester, we will pursue the parallel goals of using this era in jazz to expand our understanding of avant-garde movements in general and using historical avant-garde movements to expand our understanding of how the phenomenon has played out in jazz. The first two weeks will function as a Jazz 101 boot camp, and so no prior experience in jazz is required.

#### **MUSC278 Survey of Jazz Styles**

This course is a study of how jazz works, developing the awareness and tools that allow us to understand and evaluate what we are hearing when we listen to live or recorded jazz—how and why the musicians do what they do and the larger context into which a performance fits. We explore historical developments and chronology, the structures that govern jazz improvisation and other performance practices and the instrument roles and sub-styles that typically make up the music. Though there will be ample relevant information for musicians, a background in music theory or performance is not at all necessary for this course.

#### **MUSC286 Playing with Sound: Ludic Performance, Games, and Music as Play**

Ludomusicology—the study of music as play—challenges those interested in audiovisual media, aesthetics, performance, improvisation, compositional technique, notation, theory, or historiography to take play seriously. In his 1957 lecture, 'Experimental Music,' John Cage described music as 'a purposeless play' which is 'an affirmation of life—not an attempt to bring order out of chaos nor to suggest improvements in creation, but simply a way of waking up to the very life we're living' (1973: 12). Drawing on theories of media, systems, and cultural techniques, this seminar asks: What makes play musical, and music playful? How do the meanings and stakes of performances, choreographies, bodies, and screens play out via sounds and other sensations? How does the music in video games contribute to gameworld development, gameplay, and virtual performance? How is music used and represented in recreational and competitive sport and athletic competition (e.g., SuperBowl halftime shows, walkup music, and the stadium soundscape)? How can we value humor, puzzles, and fun in music and examine how these elements function? How is the composition and performance of music profoundly playful?

The course will consider the diverse relationships among music, play, and performance—from musical automata, player pianos, and orchestrions to practices of sampling and remix in hip hop, from the games African American girls play—handclapping songs, cheers, and double-dutch jump rope—that reflect and inspire the principles of black popular music-making to musical greeting cards, toys and collectables, from the use of recycled pre-existing classical music (Tetris, Bioshock, Eternal Sonata), genres (the famous opera scene in Final Fantasy VI), in-game composition (Mario Paint) and aleatoric operations (Fez and Proteus) in video games to John Cage's WATERWALK on the popular US television game show I'VE GOT A SECRET and his use of chance operations, from Pamela Z's playful manipulation of sound via physical gesture and technological media to virtual performance in Guitar Hero, Rock Band, Just Dance, and Dance Central, or curating the radio soundscape in Grand Theft Auto, from the material and somatic manipulation of tape in early electroacoustic

music to forms of musical acting, adaptation, and disguise in cover versions and tribute bands, from children's music games, television programming (Sesame Street, Mister Rogers' Neighborhood), and the Girl Scouts songbooks to classical music as an educational feature of games and Web 2.0 mobile media apps and new media platforms, and from 18th-century musical dice games to the domestic vocal games of Inuit throat singing. By discussing music as play across diverse case studies from musicology, ethnomusicology, popular music, and science and technology studies, we will trace the lineage of musical play through improvisation, composition, performance, embodied listening, and recreation.

#### **MUSC287 Performing the Posthuman: Music and Auditory Culture in the Age of Animinities**

'Animinities' takes seriously the aural and performance worlds of the nonhuman. 'Posthuman,' according to the Oxford English Dictionary (OED), refers to the idea that 'humanity can be transformed, transcended, or eliminated either by technological advances or the evolutionary process; artistic, scientific, or philosophical practice which reflects this belief.' This seminar engages questions of musical difference by addressing posthuman performance, the musicality of animals, music that imitates nonhuman sound worlds, and cross-species and multi-species performance. Throughout the course, we will think across varied types of sounds to explore and contextualize familiar questions about how we sing, play, perform, stage, and sound musical identity, examining the intersections among the humanities, science and technology studies, and the sonic arts. Our explorations will cross through the fields of musicology, ethnomusicology, and sound studies. By listening across different kinds of sound cultures, we will interrogate how traditions of listening shape our habits of perceiving others, how we hear nonhuman animals, how we incorporate nonhuman sounding into music composed by humans, how technology has played a role in the study and development of nonhuman and human musicality, and what it means to listen to and value sonic difference more broadly. Through discussions of musical and cultural difference that enrich ongoing discussions of race, gender, and sexuality, we will come to a stronger understanding of music's role in imagined and experienced natural worlds. Topics and case studies will include audio bird guides, new age nature recordings, multi-species 'collaborative' performances, sampled and electronically rendered animal and nature performance in digital video games, wildlife field recordings and documentary sound design, forms of animal and environmental mimesis used by composers, the way nonhuman animal behavior influenced experimental music communities, and descriptions of the musicking of nonhuman animals by the National Audubon Society and other wildlife guides and field recording initiatives. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can succeed in this course without previous musical knowledge.

#### **MUSC288 Music, Sound, and the Environment in the Anthropocene**

In this course we will explore how environmental works have proliferated throughout the academy and how scholars across the humanities are re-evaluating the reciprocal relationships among society, culture, and the environment. Over the course of the semester we will explore the diverse and interconnected ways in which contemporary composers, popular musicians, sound artists, world music practices, and collaborative arts practitioners draw on

natural and urban environments in order to comment on current environmental and energy issues, trauma, the relationships among the arts, humanities and science and technology studies, representations of the environment and the environmental past, and participate in social activism. Employing socially and environmentally engaged musicological analysis, this course will focus on five distinct areas: We will analyze how environmental sites and situations are represented in music; examine why environmentalist ideologies are integrated into the musical narratives and/or sonic choices made by the artist; address how artists conceptualize the environment and express their relationship to it; grapple with what motivates these artists to incorporate environmental commentary into their compositions, illustrating how sociocultural and environmental factors influence creative expression; and question how personal and societal values concerning relationships between society and the environment are disseminated and constructed through music. We will also explore the various ways in which nature, urbanity, and environment are constructed in the production, performance, consumption, and reception of music. Through our reading discussions, writing, and applied projects, some of the questions we will address include: How do the intersections of landscapes and cityscapes produce multifarious artistic responses? How are communities whose economy depend on, or historically depended on, energy and/or natural resource industries signified or evoked through music? How are past and present histories of place expressed, recorded, and remembered through detailed and affective sensory experience? How do we determine the health of our soundscapes? How is music and sound mobilized in social activism? How are notions of identity, as shaped by a physical environment and the ideologies connected to place, constructed and communicated? As we engage with the critical geography of sound, we will address the global networks, musical mobilities, circulation of sounds, traditions and musicians, and the ways in which landscape, mapping, urban planning, and landscapes are expressed in music.

#### **MUSC291 The Gendering of Music in Cross-Cultural Perspective**

This course presents a critical examination of issues explored and debated in recent studies of gender, power, identity, and music from diversified music traditions, including Western art music, popular music, and world music. Drawing upon interdisciplinary discourse on theories of feminism and gender, as well as the new gay and lesbian musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

#### **MUSC293 Mapping Culture**

What is a culture? How can it be intimately wrapped up in a location and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom--'location, location, location' and 'all politics is local'--tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location (Nile Project, Playing for Change). From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti and other street art) and social formations. Haight-Ashbury (SF) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models before students embark on their own to map out a culture of their choice as their final project, using either Google Maps or Story Maps. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

#### **MUSC294 Queer Opera**

Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

#### **MUSC295 Global Hip-Hop**

Over the past two decades, hip-hop, in its various facets of rap, deejaying, dance, visual art, fashion, and attitude toward authority, has gradually taken over as a primary medium of expression for youth around the world. Used as mass entertainment, elite aesthetic statement, social and political commentary, tool

for education and social change, vehicle for economic opportunity, and as the core of a cultural movement, hip-hop has proven malleable enough to thrive embedded in scores of different languages and cultures around the world and effectively speak to local needs. Yet its local manifestations have also managed to retain their membership in a global hip-hop culture.

In this seminar we will study the global spread of hip-hop from an interdisciplinary approach, examining its varieties of expression from aesthetic, cultural, social, musical, linguistic, kinetic, economic, and technological perspectives. We will first come to an understanding of the rise and dispersion of hip-hop culture in the United States. Then, beginning with France, where it first took hold, we will move around the world examining local case studies and their more global implications.

#### **MUSC296 Soundscapes of Islam**

From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

#### **MUSC297 Music of Central Asia**

This course offers an introduction to the musical traditions of Central Asia, including the former Soviet republics of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Turkmenistan, and Azerbaijan, Mongolia, and the Xinjiang province of China. The musical landscape of the region will be mapped through major performance repertoires, genres, styles, and instruments in the two sociocultural realms: the nomadic world and the world of sedentary-dwellers. The roles and status of musicians, and the aesthetics and meanings of sound will be explored in relation to wider aspects of culture and social life, and the relationship

between Islam and local spiritual beliefs. The dynamics of musical change and the interplay of tradition and innovation in contemporary creativity will be considered in light of the region's political history and connections with contiguous geographical areas (East, South, and West Asia, Eastern Europe), the impact of socialist policies and nation-building in post-Soviet states, and the effects of globalization, migratory processes, and cultural revitalization initiatives.

#### **MUSC308 Composition in the Arts**

Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By 'site,' we mean a semantic field extending through corporeal, environmental, and social dimensions. By 'information,' we mean representations abstracted from sites, 'meaningless' when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

**MUSC405 Private Music Lessons for Nonmusic Majors**

Private instrumental and vocal lessons meet for one hour weekly at regularly scheduled times. Permission of the instructor is required. Students contract to take 12 lessons. Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the Private Lessons Program must contact the instructor to determine whether an interview during the first week of classes is required. This course may be repeated four times for credit towards graduation regardless of section or combination of sections.

Course Fee: \$780 for 12 one-hour lessons billed through the Student Account. Financial support may be available for those who qualify. Please see the Music Department web site under Private Lessons for details.

#### **MUSC413 Korean Drumming and Creative Music**

This course is an experiential, hands-on percussion ensemble with the predominant instrument in Korean music, the two-headed janggu drum. Students will learn to play a range of percussion instruments including janggu, barrel drum (buk), hand gong (kwenggari), and suspended gong (jing).

Through the janggu, drumming students gain first-hand experience with the role music plays in meditation and the benefits it offers to develop a calm, focused group experience. In the end they integrate their focused mind, physical body energy, and breathing through a stream of repetitive rhythmic cycles.

The students will be introduced to traditional folk and court styles of janggu drumming. The ensemble plays pieces derived from tradition and new ideas, and creates new works exploring imaginative sounds on their instruments. If there is an opportunity during the semester, the students will have a creative collaboration with a dancer(s) or musician(s) from other cultures. The ensemble will experience a deep respect for the diverse cultural backgrounds of the students developed from the efforts of teamwork and creating music together through Korean drumming. The semester will end with a live performance for the public.

Offering: **Host**

Grading: **A-F**

Prereq: **None**

#### **MUSC414 Korean Drumming and Creative Music Advanced**

This class offers more advanced techniques for those students who have taken the beginner course or who have some basic experiences in Korean drumming. Attendance and additional practice time is mandatory. In comparison to the beginner class, the advanced class will play rapid, vigorous, and seamless rhythmic patterns on janggu, buk, and kwenggari. Students are expected to be creative in utilizing materials given during the semester.

Each student will focus on a lengthy solo work on any of these instruments, as well as ensemble playing. Students will explore both traditional and new emerging styles of Korean drumming. In the end, they will integrate their solos in the ensemble piece and create a new piece. The ensemble will experience a deeper level of drumming from contributing solo work to the ensemble and the efforts of teamwork. They will learn about group activity in music-making through sharing ideas and assisting each other. The semester will end with a live performance(s) for the public.

#### **MUSC416 Beginning Taiko--Japanese Drumming Ensemble**

This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and one or two pieces on the Japanese taiko drum. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements).

Offering: **Host**

**MUSC439 Wesleyan University Orchestra**

The Wesleyan University Orchestra is a student-community ensemble that is open to everyone with a passion for orchestral literature and an intermediate-to-advanced skill level of performance on an orchestral instrument: Wesleyan music majors, nonmajors, faculty and staff, and community musicians. The orchestra performs music from all genres and time periods, ranging from the 18th-century 'classics' to the contemporary academic and popular compositions.

The orchestra presents four hour-long concerts each year:

Middle of October: a 'masterworks' program, featuring one of the department's private lessons teachers, or a guest artist, as a soloist

Early December: a program of popular, film, and holiday music

Early March: Children's Concert

Early May: a 'masterworks' program, featuring the winner(s) of the annual Wesleyan Concerto Competition

The Orchestra occasionally collaborates with the Wesleyan Concert Choir.

Offering: **Host**

Prereq: **MUSC103**

**MUSC441 Piping Performance: An Exploration of Artistic Expression through the Pipe Organ**

With the ability to create the most delicate and jarring of timbres, and to fill the space with 'other-worldly' soundscapes, the pipe organ is a vehicle that transports one toward artistic and musical growth. This course will introduce students to the history and development of the instrument, while fostering other musical skills and studies that assist each student to find their voice as an artist-creator.

This multi-track course allows students to select their focus in one or more organ-related disciplines: improvisation, composition, performance practice, repertoire playing, church music, musicological research, etc. Students utilize their growing knowledge of the organ to complete three musical performance or research-related projects that they develop over the course of the semester. Final projects are publicly presented. A lab time in the form of private lessons, consultation, and individual practice is required.

Offering: **Host**

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

**MUSC444 African Popular Music Performance**

This course aims at bringing together students with diverse musical skills to explore the riches of African popular music (broadly defined to include a range of styles such as highlife, hiplife, hip-hop, dancehall, reggae, azonto, and gospel highlife) through performance. Popular music, first and foremost, is an urban genre. Its origins go back to the early 1900s when, as a result of European presence in the coastal areas of West Africa, and later spreading to other parts of the continent, new musical instruments, ideas, and imaginings became available. Today, popular music is the driving force of the music industry in Africa. Through intensive studio practice, reading, listening, viewing, and individual and group rehearsals, the goal of the course is twofold: to develop proficiency in African pop music performance; and to become familiar with the intellectual discourse on African popular music, its interactions with traditional African music, and its role in the formation of generational identities. The course is fundamentally performance-based; hence, enrollment is limited to skilled musicians with some proficiency in sound engineering/production, composition, singing, raps, guitar-playing, keyboard, drum sets, bass guitars, trumpets, trombones, and other melodic/harmonic, and percussion instruments. Midterm and end-of-semester projects will include group productions and public concerts, resulting in an album release featuring works by faculty and students.

**MUSC445 West African Music and Culture--Beginners**

This is a performance-based course that focuses on West African music. The course is designed to provide a practical and theoretical introduction to traditional West African music and culture. Students experience the rhythms, songs, movements, and languages of Ghana and its neighboring countries through oral transmission, assigned readings, film viewing, and guided listening to commercial and/or field recordings. This interdisciplinary approach to learning is in keeping with the integrated nature of drumming, dancing, singing, and hand clapping in West Africa. Students learn to play a range of instruments, including drums, metal bells, and gourd rattles.

#### **MUSC450 Steelband**

This is an ensemble course in the musical arts of the Trinidadian steelband. Students learn to perform on steelband instruments and study the social, historical, and cultural context of the ensemble. We also address issues of theory, acoustics, arranging, and composing. Readings, recordings, and video viewings supplement in-class instruction. The ensemble will present public performances.

#### **MUSC451 Javanese Gamelan--Beginners**

Dominated by colorful bronze percussion instruments, the Gamelan ensemble features gongs, bronze and wooden xylophones, drums, and vocalists. Other instruments include bowed- and plucked-string instrument and flute. Some of the instruments date back to the 12th century in Java, Indonesia. The main content of the course is the instruction of various levels of difficulty in the playing techniques of different instruments and singing. Previous formal music instruction is not necessary.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC452 Javanese Gamelan--Advanced**

Dominated by colorful bronze percussion instruments, the Gamelan ensemble features gongs, bronze and wooden xylophones, drums, and vocalists. Other instruments include bowed- and plucked-string instrument and flute. Some of the instruments date back to the 12th century in Java, Indonesia. This course is advanced-level performance of central Javanese gamelan. Emphasis on the classical repertoire.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC451**

#### **MUSC454 World Guitar Ensemble**

This performance course is designed for students who can already play the guitar and read music to some extent. The lectures will involve finger-style playing with the classical guitar as the main instrument; however, the repertoire will include music from South America and various world cultures as well as American popular styles. Singers and students playing other instruments such as flute or violin are welcome to take the class to form ensembles with the guitar. In a final concert, the students will perform works matching their technical level.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC455 Jazz Ensemble**

This course builds small-group performance skills including improvisation, accompaniment, pacing, interaction, repertoire, and arrangements.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC456 Jazz Improvisation Performance**

In this extension of MUSC210, Theory of Jazz Improvisation, all materials previously explored will be applied to instruments in a workshop setting. Intensive practice and listening are required.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Identical With: **AFAM390**

Prereq: **None**

#### **MUSC457 Jazz Orchestra I**

This course is an intensive study of large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Fletcher Henderson, and others. A yearlong commitment to rehearsal of the compositions as well as listening and reading assignments will culminate in a second-semester public concert.

Offering: **Host**

Grading: **A-F**

#### **MUSC459 Wesleyan New Music Ensemble I**

This ensemble class offers a unique opportunity for graduate and undergraduate performers and composers to explore and perform various acoustic and

electroacoustic works composed by composers of avant-garde and experimental music in America after 1950. Additionally, composers who are enrolled in the course may be asked to create pieces that are specifically designed for any number of the ensemble participants. Through extensive large ensemble rehearsals and small group rehearsal labs that will culminate in a performance (or a series of performances), students will develop a deep understanding and appreciation of contemporary music performance techniques and collaborative processes. Students will gain skills that pertain to the reading of scores, the execution of complex rhythmic and melodic passages, music composed using graphic and/or textual notation, event scores, and extended instrumental performance techniques. Advanced Western musical literacy is required in order to succeed in this course. All instrumentalists (including those specializing in the human voice) are encouraged to participate.

#### **MUSC461 Sound Systems: The How of Hearing**

Since the late 19th century artists, corporations and composers have all proposed, developed, presented, and occasionally commercialized physical systems that reconfigure how sound can be experienced. The early impact of the entertainment industry ranged from the introduction of stereo to movie theaters in Walt Disney's *Fantasia* to the development of close miking for the crooning of Bing Crosby to McCune sound service's introduction of stage monitors for the benefit of Judy Garland. Artists and composers used related methods to propose entirely new understandings of how music can be. Futurist Luigi Russolo's *Intonarumori* of 1913 proposed an Art of Noise, while Pauline Oliveros' concept of deep listening developed listening as a foundational form of music making. R. Murray Schafer's concepts of soundscape and acoustic ecology project a music of environmental relations mediated through sound, while Maryanne Amacher's sound characters create individual sounds understood as capable development and change beyond the expanse of any one performance or composition.

This class will be a performing ensemble focused on 'sound systems' as musical instruments and musical practices performing live and fixed media sound pieces through sound systems we will configure for different sites on campus. Together with developing the technical skills required to mount these pieces, we will

also investigate and discuss the varied musical, social, acoustical, and psycho-acoustical understandings of music and sound that influenced their shaping.

#### **MUSC463 Teaching Music Lessons to Children in Local Schools**

This is a service-learning course. Wesleyan students will teach private and small group music lessons to local children in an appropriate venue. These sessions will be augmented by a weekly classroom session in which readings and the student teachers' journals will be discussed. Some of the Wesleyan Department of Music's private lesson instructors will visit to answer questions and guide the student teachers through the issues, musical and extra-musical, that the lessons will raise.

Written assignments will include responses to weekly readings, regular journal entries, and an end-of-semester paper. There will also be a recital by the school children at the end of the semester.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC464 Laptop Ensemble**

This course promotes knowledge and skills in live electronics performance, cultivates new musical repertoire for the group, and increases public awareness of new forms of working music technology while developing overall technological and troubleshooting proficiency. The course accomplishes this through regular rehearsals as well as a combination of required group and 'satellite' performances. A range of repertoire is curated over the course of the semester involving new pieces created for the ensemble, as well as the reinterpretation of historical works using live electronics.

Offering: **Host**  
Grading: **OPT**

#### **MUSC505 Topics in Applied Ethnomusicology/Public Musicology**

Work in applied ethnomusicology and public musicology includes a wide range of activities and formats, including: blog posts, magazine articles, public community music performances, tweets, podcasts, pre-concert and public lectures, forensic testimony, and the development of digital open-access tools and resources. What unifies these and many other possible forms is a desire by scholars to convey the cultural relevance and influence of music by engaging audiences outside the academy. Many are concerned with the social responsibility of the university, and developing methods and projects to collaborate with and give back to the communities in which we live, work, and research. The seminar will also address what the tools, methods, and values of the interdisciplinary field of digital humanities can offer applied ethnomusicology and public musicology. We will apply a suite of open-source analytic, pedagogical, networking, research, and presentation tools developed by digital humanists to our own projects. Through

readings and research-creation projects we will better understand the work of institutions for cultural preservation, the role of activist and political scholarship, how to write accessibly for all readers, and how to convey our ideas in a number of different formats (e.g. blogs, 'think pieces' or online articles, pre-concert lectures, open-access digital archives and research webspaces).

Offering: **Host**  
Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC506 Reading Ethnomusicology**

As one of the two core introductory courses to ethnomusicology, this course lays a general intellectual groundwork for MA students with a concentration in ethnomusicology through in-depth reading of some of the most important writings in ethnomusicology. Focusing on both intellectual history and current issues, the course evolves around the key concepts and themes that have defined, expanded, or challenged the field. Students will critically and comparatively discuss the approaches and contributions of each work they study. At another level, this course also aims at broadening students' knowledge of world musics through studying a wide range of music ethnographies.

Offering: **Host**  
Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC507 Practicing Ethnomusicology**

This course provides a broad introduction to the research methods of ethnomusicology. The theory and practice of musical ethnography are examined, including fieldwork techniques (interviewing, data collection, audiovisual documentation, participant observation), ethnographic writing, research ethics and representation, insider/outsider perspectives, bimusicality, and approaches to the transcription and analysis of musical sound. Students gain an understanding of the historical development of ethnomusicology and its relationship to allied disciplines such as musicology and anthropology, become familiar with the work of prominent scholars in the field, and acquire the practical skills of ethnography-based research.

Offering: **Host**  
Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC508 Graduate Seminar in Composition**

This course is designed for first-year composition students in the Graduate Program. We will discuss and analyze works covering a broad range of compositional styles, focusing on recent European, Asian, and American composers. In addition, student works will be discussed and, when possible, performed.

Offering: **Host**  
Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC509 Graduate Seminar in Composition II**

This course will closely examine specific topics in 20th-century music, including serialism, indeterminacy, minimalism, improvisation, and the exploration of acoustic phenomena. Special attention will be given to issues raised in the Boulez-Cage correspondence of the 1950s.

Offering: **Host**  
Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC510 Graduate Proseminar in World Music Studies**

This introductory seminar is offered every fall as a required course for all first-year music MA students. The primary focus is developing research, writing, and critical interpretive and analytical skills necessary for initiating and completing the MA thesis projects. Students will be exposed to the breadth of the music department's specialties, and we will identify and discuss current issues that cut across concentrations within the department.

Offering: **Host**

Grading: **A-F**

Offering: **Host**

Grading: **OPT**

#### **MUSC513 Improvisation in Cross-Cultural Perspective**

This course will explore musical improvisation around the world from a variety of theoretical and practical perspectives. Readings on theories of improvisational processes, as well as on specific musical traditions in the United States, India, Indonesia, Africa, and elsewhere, will complement practical transcription and analysis projects.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC515 Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture**

Music circulates, moves, and is mapped through places, pathways, materials, bodies, and technologies. Together, we will encounter a series of conceptual frameworks and case studies that map the nodes, pathways, boundaries, and movements of sonic phenomena and musical life. How do the movements of music and musicians, the places they occupy, and the boundaries they negotiate communicate spatial information about music practices? How they circulate physically and virtually? What are the different methods that ethnomusicologists use to represent and map these circulating sounds? This seminar not only discusses the physical cartography and circulation of music cultures, but also, the virtual spaces music moves through. In the opening decades of the 21st century, new media practices and Web 2.0 modalities (e.g. Spotify, YouTube, Twitter, Facebook) have enabled new cartographies, patterns, and pathways of circulation, and engendered new approaches to participatory musicking. The seminar also raises questions of how technologies and modes of mobility interface with categories of identity, race, and gender.

In-class discussions foreground the role of movement and how musical movement is mapped and represented. The seminar addresses such topics as: musical movements by way of travel, habitation, refuge, trade, ghettoization, migration, or telecommunication; sonic geography; the ways sounds and music flow and vibrate through, in, and among places (e.g. urban streets and neighborhoods, spaces of protest, music scenes, performance venues); composition as travel writing; why some musics and musical actors are more mobile than others; how travel and migration shape music-making and musical senses of place; how the maps and cartographic representations of places

are redrawn as music and musical actors move and aural culture makes claims to space; the place of border theory, cartography, migration studies, transnationalism, and human geography in ethnomusicology; the impact of travel, tourism, festivals, and tours on local music scenes; mobile media and technologies; how subversive and DIY cartographies of music cultures and their movements offer alternative representations to conventional social and political customs; and how the spatiality and materiality of musical mobility is experienced through aural, tactile, visual, and haptic sensations.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC517 Sex/Gender/Queerness in Music and Music Scholarship**

This seminar is designed to involve all music graduate students, namely students in composition, ethnomusicology, and performance concentrations, from both MA or PhD programs. This course will examine the major ideas in the recent feminist, gender, and queer studies in the fields of composition, ethnomusicology, musicology, and popular music studies. The class will explore varied approaches in critical re/presentation of femininity/masculinity/transgender/queerness in composing, listening, performing, and analyzing music and sound. We will consider the significance of engaging feminism, gender studies, and queer studies in our varied relations with music. In so doing, each member of the class will have the opportunity to design their own final creative project and to develop a dialogue with the ideas presented in the readings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC519 Current Issues in Ethnomusicology**

This course concentrates on current scholarship, intellectual issues, and music ethnographies in ethnomusicology. It challenges the students with contemporary theoretical debates among ethnomusicologists, such as music and identity, music and gender, race and power, music and technology, and music and globalization. The course will closely examine the impact of interdisciplinary approaches on music ethnography through critical analysis of the readings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

#### **MUSC520 Explorations in Musicology**

What is Musicology? How and why do scholars write about music? This course will address the issues involved in making music a scholarly object of inquiry. It examines the methodologies through which scholarship has been constructed (e.g., archival research, reception history, historiography, practice-led research) and assesses their broader application. The course will be structured around a central point of reference--the musical work, music and the cosmos, notation, ontologies of sound, or performance studies. The chosen topic will serve as a prism through which musicological debate can be understood, and contrasted with ethnomusicological and other approaches.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC521 Seminar in Interdisciplinary Studies**

The course, one of the four core PhD seminars in ethnomusicology, examines a number of disciplines as they relate to general current theoretical issues and the

interests of ethnomusicology. Visitors from other departments will present their disciplinary perspectives.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC522 Seminar in Comparative Music Theory**

In this seminar we will take a deep dive into historical texts of music theory from the 18th, 19th, and early 20th centuries. Because of its significant overlaps with physics, acoustics, aesthetics, and philosophy, music theory can serve as an important site for any inquiry into the history of ideas. Particularly distinctive in music theory of the 18th century and beyond are the linkages that join the empirical and physical sciences with speculative discourses on beauty and subjectivity. In addition to covering major figures in the canonic history of Western music theory after 1700, this seminar will focus in particular on moments of colonial encounter and exchange that occurred through music theory; our aim will be to understand how the modern, Western self was in part fashioned through its investigation of non-Western musical systems. For their final papers, students are encouraged to draw on their own research interests, placing them in dialogue with the historical texts and methodological concerns that we will explore together this semester.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

#### **MUSC530 Department of Music Colloquium**

This lecture series showcases new work by performers, composers, and scholars in ethnomusicology, musicology, music theory, sound art, and cultural history. The colloquia also invite dialogue with professionals working in arts education, curation, and administration. Typically, a 45-minute talk is followed by 30 minutes of questions and discussions.

Offering: **Host**

Grading: **OPT**

## **NEUROSCIENCE & BEHAVIOR (NS&B)**

#### **NS&B149 Neuroethology: Sensory Basis of Animal Orientation and Navigation**

This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC210**

Prereq: **(PSYC105 AND PSYC200) OR (PSYC105 AND ECON300) OR (PSYC105 AND QAC201)**

#### **NS&B213 Behavioral Neurobiology**

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective

neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **BIOL213, PSYC240**

Prereq: **None**

#### **NS&B215 Research Methods: Behavioral Methods in Animal Research**

This is a research methods course that provides an understanding of the different approaches to animal research, particularly those using rodent models. It provides students with an understanding of the different techniques employed by researchers and the questions they address. This course provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. Students will learn how to handle and inject rats and will also get a sense of how to design a behavioral experiment, including the use of control groups and counterbalancing. The course will follow a lecture/discussion/lab format where students will learn about different forms of conditioning (operant/classical) and how these apply to various behavioral tasks such as operant responding, autoshaping, decision-making, locomotion testing, etc. (see readings for more examples). One class each week will take place in the lab to provide students with hands-on experience with rats and the testing apparatuses. Students will be assigned a rat for the semester that they will use to collect and analyze data during lab classes. This will be combined with regular class discussion of research articles dealing with each topic, including some of the earlier reports and more recent applications. The focus of the course will be on trying to prepare students to design and carry out behavioral/animal research in a laboratory setting.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Identical With: **PSYC215**

Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

#### **NS&B220 Cognitive Psychology**

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **PSYC220**

Prereq: **PSYC105**

#### **NS&B221 Human Memory**

This course is designed to provide students with an in-depth overview of the different human memory systems revealed by empirical research in the fields of cognitive psychology and cognitive neuroscience. The different systems include procedural memory, working memory, perceptual memory, semantic memory, and episodic memory.

Offering: **Crosslisting**

Grading: **OPT**

#### **NS&B224 Hormones, Brain, and Behavior**

Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.

Offering: **Crosslisting**

#### **NS&B225 Cognitive Neuroscience**

This course provides an introduction to cognitive neuroscience—the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **PSYC225**

Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

#### **NS&B227 Motivation and Reward**

This course will focus on motivation and reward, providing students with a background in and understanding of the various theories and approaches to studying the topic of motivation, including an introduction to some of the history and the current advances in the field. The course uses animal and human research to try to unravel the brain areas and neurotransmitter systems involved in different forms of reward, including food, sex, and drugs, and examine cases of disordered motivation such as drug addiction, obesity, and disordered gambling.

Offering: **Host**

Grading: **A-F**

#### **NS&B228 Clinical Neuropsychology**

This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

Offering: **Crosslisting**

Grading: **OPT**

Identical With: **PSYC228**

Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

#### **NS&B239 Functional Anatomy of the Human Brain**

A mass of tissue the consistency of firm jello and weighing about 2.5 pounds in the adult human, the brain is an organ that controls nearly every function of the body. It also enables the highest cognitive functions of humans such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will be of special interest to premed students; NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL239, PSYC239**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B243 Neurohistology**

The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL244, BIOL544**

Prereq: **BIOL182 AND NS&B213**

#### **NS&B245 Cellular Neurophysiology**

This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL245, BIOL599**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B247 Laboratory in Neurophysiology**

The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems. Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (Aplysia), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL247**

Prereq: **[(NS&B213 or BIOL213 or PSYC240) AND (BIOL182 or MB&B182)]**

#### **NS&B250 Laboratory in Cellular and Behavioral Neurobiology**

The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL250, NS&B555**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B252 Cell Biology of the Neuron**

Neuronal cell biology is an important and fast-moving field. The brain cannot be understood without first elucidating the properties and functions of its component neurons. This course will focus on cell biological studies of the nervous system. We will explore the structure and function of neurons, synapses, and circuits. Using both text books and primary literature, we will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, plasticity, and regeneration.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **BIOL252**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B254 Comparative Animal Behavior**

This course explores the scientific study of animal behavior. All animals face similar challenges and we will examine the common, and sometimes unique, behavioral strategies used to meet these challenges. There are two sorts of questions one might ask about the behavior of a given individual or species. First, how is that behavior executed? Second, why is that behavior, rather than another, exhibited? What is the adaptive significance of the behavior? To fully understand the behavior of any organism, both sorts of questions must be addressed. This course will introduce students to the many ways these questions are grappled with for a wide range of organisms. As such, this course will provide an overview of mechanistic, ecological, and evolutionary explanations of behavior.

Offering: **Crosslisting**

Grading: **A-F**

#### **NS&B257 Neurogenetics**

Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Identical With: **BIOL257**

Prereq: **BIOL181 AND BIOL182**

#### **NS&B280 Applied Data Analysis**

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

Offering: **Crosslisting**

Grading: **A-F**

Prereq: **None**

#### **NS&B299 Waves, Brains, and Music**

Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.

Offering: **Crosslisting**

Identical With: **BIOL299**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function**

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the

past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

#### **NS&B316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives**

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

Offering: **Crosslisting**

#### **NS&B317 Neuroethics**

Ethics, or morality, is one of the complex features of human behavior. This course will explore 'Neuroethics' from two perspectives: (1) the neuroscience of ethics (i.e., the role of the human brain in ethical or moral behavior) and (2) the ethics of neuroscience (i.e. the ethical implications of manipulating the brain). The first perspective will relate to the premise that human morality is embodied in and operates based on the principles of the functional architecture of the brain, in particular, the cerebral cortex. The course will examine the organization and neural networks, especially of the association cortices (prefrontal Cortex: ventromedial, dorsolateral and orbitofrontal cortex; the cingulate cortex; temporal association cortex; and the inferior and superior parietal lobes). The course will review studies on the development of moral values in children and their neural underpinnings, leading to studies of the functions of the adult brain in moral or ethical decision-making. Topics such as the neural basis of resolving the 'Trolley Problem,' neuroeconomics, altruism, poverty, forgiveness, and compassion will provide the basis for this discussion. We will evaluate from a neuroscience perspective questions such as determinism and free will, and the sense of 'self'--ideas that have played a significant role in ethical theories. Based on this body of knowledge, we will look at emerging ethical issues arising from technological developments that allow for manipulating the normal and diseased brain. A variety of questions will be examined, including brain imaging and privacy; enhancement of normal brain function through chemical, electrical, and electromagnetic stimulation; implanted neural interfaces; restoring brain damage; and neuroscience and the law.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Prereq: **[PSYC225 or NS&B225] OR [NS&B213 or BIOL213 or PSYC240]**

#### **NS&B325 Stem Cells: Basic Biology to Clinical Application**

This course will cover recent advances in stem cell biology, including tissue-specific and pluripotent stem cells. Clinical applications will be covered and we will examine the ethics and politics as well as the science of this emerging field.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL325**

Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182])**

#### **NS&B328 Chemical Senses**

The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **BIOL328**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **NS&B329 Neural Costs of War**

This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

Offering: **Crosslisting**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC329**

Prereq: **None**

#### **NS&B341 Psychology of Human Memory**

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC341**

Prereq: **None**

#### **NS&B342 Music Perception and Cognition**

This course provides an overview of the perceptual, cognitive, and neural bases of performing, composing, and listening to music. Topics include acoustics and biological processing of sound; theories and empirical research on pitch, rhythm, harmony, melody, timbre, and orchestration; similarities and differences between music and language; evolution and development of musical ability; and special populations in musical functions. Meetings each week will include laboratory demonstrations and exercises in experiment design and data analysis.

#### **NS&B345 Developmental Neurobiology**

Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

#### **NS&B347 Mammalian Cortical Circuits**

The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Almost all of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

#### **NS&B348 Origins of Knowledge**

In this course we will discuss in depth a selection of current topics in cognitive development, centering on questions concerning the origins of knowledge. (What kinds of knowledge do we possess even very early in life? How does that knowledge change over time?) We will examine these questions within specific subject areas such as object perception, space perception, number understanding, and understanding of other minds, surveying evidence from different stages of human individual development as well as evidence from nonhuman species.

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC348**

Prereq: **None**

### **NS&B351 Neurobiology of Learning and Memory**

Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

Offering: **Crosslisting**

Grading: **A-F**

Identical With: **BIOL356, PSYC356**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

### **NS&B357 Sex and Gender: From Synapse to Society**

From movies like 'Think Like a Man' to songs like 'God Made Girls,' from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student assessment will include effortful and active participation, short written responses, one long response paper, and a poster presentation during our online symposium.

### **NS&B360 Calderwood Seminar in Public Writing: Neuroplasticity and the Brain**

This course will examine structural and functional neuroplasticity. Structural plasticity refers to the brain's ability to change its physical structure as a result of learning and experience. The ability to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and how adult neurogenesis is altered by the microbes within us, physical exercise, stress, and neuropsychiatric disorders. We'll also learn about the promise of stem cell therapies for enhancing brain repair and plasticity after brain injuries. Several guest lecturers who are prominent neuroscientists working in the field of adult neurogenesis will be invited to speak to the class about their research in the field of neuroplasticity. This course will follow a model developed in Calderwood seminars taught at Wellesley College and is writing-intensive. After the basic material is introduced, class sessions will be workshop-based. Students will prepare for class by reading scientific papers and reviews on the topic and will submit short writing assignments on the topic. In class, we will discuss the topic and analyze the experimental approaches and findings. Students will have extensive opportunities for feedback and writing revisions through discussions with the professor, a course writing tutor, and in-class writing workshops.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

### **NS&B383 Advanced Research in Learning and Memory**

This advanced research course is designed to allow students to conduct supervised research in the area of human learning and memory. Students will become familiar with both classic and contemporary studies in memory and undertake a semester-long experimental research project that seeks to answer a current question in the field of memory research either individually or as a group. Students will get to work on all aspects of the research project, including reviews of the background literature; generation of research ideas; the design, conduct, and analysis of a study; and a write-up of research findings in a journal-article format.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC383**

Prereq: **None**

#### **NS&B390 Experimental Investigations into Reading**

Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **PSYC390**

#### **NS&B392 Behavioral Methods in Affective Neuroscience**

This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

Prereq: **None**

#### **NS&B393 Advanced Research in Cognition and Neuropsychiatric Illness**

Students in this advanced undergraduate research course will work in teams on novel and ongoing research studies focused on understanding neurocognitive dysfunction and its treatment in neuropsychiatric illness. Students will be matched to a research project and will participate in different aspects of this research including background literature review, acquiring elementary skills in neurocognitive and symptom assessment, and collecting and/or analyzing extant data using SPSS. Students may also be involved in learning cognitive training procedures.

Offering: **Crosslisting**

Identical With: **PSYC398**

Prereq: **None**

#### **NS&B399 Advanced Research in Gambling, Drugs, and Junk Food**

This advanced laboratory course provides in-depth training in the experimental methods of behavioral neuroscience of motivation and reward and provides students with hands-on experience with animal research using rodent models. The capstone of the course gives students the opportunity to carry out an independent group animal research project in the lab, which may require a slightly heavier time commitment for the duration of the experiment (typically around two weeks). Students will learn how to handle rats in a behavioral neuroscience research setting and how to design and carry out an experiment to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers. Research typically focuses on rodent models of gambling, diet-induced obesity, and drug addiction. The course also focuses on strengthening students' scientific writing and oral presentation skills.

In addition, the course contains a service learning component in which students will work to develop a brief presentation/talk on a topic related to gambling, eating disorders, or drug addiction. Students will practice their talk in class with the aim of presenting it to local middle and high school students, in order to provide more information and education about these topics and the state of current research surrounding them.

**NS&B545 Developmental Neurobiology**

Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

**NS&B555 Laboratory in Cellular and Behavioral Neurobiology**

The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.

# PHILOSOPHY (PHIL)

**PHIL111 Introduction to Critical Philosophy of Race**

This first-year seminar (FYS) course will examine contemporary figures in the emerging field of critical philosophy of race. We will attempt to examine what contributions (if any) the critical philosophy of race has provided not only to philosophy as a discipline but also to more traditional and established modes of thinking race and racism. We will do so by exploring issues such as the differences between critical philosophy of race and critical race theory, as well as the historical role of race and racism in philosophical thinking, and by attending to the major debates currently held in this emerging tradition.

**PHIL154 What Is Rationality?**

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures—or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as ‘the art of thinking,’ to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

**PHIL160 Philosophy and the Movies: The Past on Film**

This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve ‘the reality effect’? How has the contemporary documentary’s use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

**PHIL201 Philosophical Classics I: Ancient Western Philosophy**

This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

Offering: **Host**

**PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant**

Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' *MEDITATIONS*, Locke's *ESSAY CONCERNING HUMAN UNDERSTANDING*, Hume's *ENQUIRY CONCERNING HUMAN UNDERSTANDING*, and Kant's *CRITIQUE OF PURE REASON*.

**PHIL207 Live Like a Philosopher**

Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will 'live like a philosopher' by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

Offering: **Host**

Grading: **Cr/U**

Credits: **1.00**

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

**PHIL210 Living a Good Life**

For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

This course will typically have two 80-minute lecture/discussion sessions each week in which the texts and ideas of major philosophers will be discussed, supplemented by smaller weekly student-led dialogue sessions. Please note that the locations for the different sections of this course are NOT accurately listed below. For details of the locations of each class session and breakout section, please see the course website: <https://livingagoodlife.wescreates.wesleyan.edu/>.

**PHIL212 Introduction to Ethics**

This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and

ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

#### **PHIL213 Introduction to Existentialism**

This course is an introduction to existentialism. 'Existentialism' is both a philosophical tradition and a term that is central to the intellectual history of western thought. The term was explicitly adopted self-descriptively by Jean-Paul Sartre, and was widely disseminated both by his own literary and philosophical contributions and those of his intellectual interlocutors--notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and 1950s. In this course, we will begin by exploring the root and intellectual origins of this tradition through the work of philosophers and authors like Friedrich Nietzsche, Fyodor Dostoyevsky, and Soren Kierkegaard. We will spend a considerable time on some of this philosophical tradition's central tenets like 'freedom,' 'the absurd,' 'existence precedes essence,' 'facticity,' 'authenticity,' and 'despair.' Because existentialism also resonated widely with anti-colonial thinkers across the globe, we will end the course by reading important figures in this movement like Frantz Fanon, Richard Wright, and James Baldwin, in order to understand the ways in which existentialism gradually became an intellectual and political tool of contestation against racism and imperialism.

#### **PHIL213F Introduction to Existentialism (FYS)**

This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of Fyodor Dostoevsky, Søren Kierkegaard, Martin Heidegger, Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, Gabriel Marcel, Simone Weil, Richard Wright, Frantz Fanon, Toni Morrison, and James Baldwin. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

Offering: **Host**

Grading: **OPT**

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

#### **PHIL214 Reasoning About Justice**

This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason,

knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

#### **PHIL217 Bioethics and Social Justice**

'Health has replaced salvation,' wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses--the creation and institutionalization of the discipline of bioethics--and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

#### **PHIL218 Personal Identity and Choice**

This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some

choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

#### **PHIL218F Personal Identity and Choice (FYS)**

This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose the self? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

#### **PHIL219 Evil, Responsibility, and Forgiveness**

The problem of evil has long occupied an important position in the history of philosophy. In light, however, of the horrific events of the 20th-century, philosophers and other writers of the past hundred years have begun to ask whether it is time to rethink our own understanding of evil. Is it possible to understand genocide, colonialism, and systematic racism through existing conceptions of evil, responsibility, and forgiveness, conceptions drawn largely from religion and the law? What happens to our understanding of evil when, as Hannah Arendt famously suggested with her notion of the 'banality of evil,' mass murder is detached from wicked intentions and is made routine, mundane, even cliché? What happens to our understanding of responsibility when, on the one hand, a whole society, not just an individual, is implicated in a crime--and when, on the other hand, responsibility cannot be confined to geographical or national borders? What happens to our understanding of forgiveness when the very possibility or desirability of such an act becomes eminently questionable? In this course, we will draw from continental philosophy, critical philosophy of race, literature, and film. Readings may include selections from Emmanuel Levinas, Hannah Arendt, Frantz Fanon, Aimé Césaire, Primo Levi, Jacques Derrida, and Susan Neiman.

#### **PHIL220 Human Nature**

The idea of 'human nature' plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining

philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

#### **PHIL221F Philosophy as a Way of Life (FYS)**

For many philosophers, East and West, philosophy has been more than an effort to answer fundamental questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of life. How does philosophical reasoning interact with lived practice? How do metaphysical views lead to ethical commitments? Despite their differences, Confucians, Christians, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

#### **PHIL222 Global Philosophy**

Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves--sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions--in what can loosely be called our post-colonial world. This course asks what 'philosophy' means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

#### **PHIL231 Reason and Paradox**

This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno's Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

#### **PHIL233F Bodies and Experiences (FYS)**

Philosophers study the world with their minds. But who says that they should only discuss 'mental' stuff such as concepts, rationality, or logic? This course is about bodies, and about the experiences that we have in virtue of those bodies. We will explore a variety of contemporary philosophical topics that have bodies and experiences at their center. These include the experience of skilled movement when we dance or play a sport, having a physical disability, or being shamed for our body size. We will discuss the ways we experience race, gender, sex, and sexual orientation. We will learn what makes a question distinctly philosophical and what methods philosophers follow to answer it. But most importantly, we will learn to be OK with the fact that there might be no true answer at all.

#### **PHIL251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)**

This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

#### **PHIL252 Nietzsche - Science, Psychology, Genealogy**

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the

true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

#### **PHIL253 Nietzsche als Versucher (CLAC.50)**

The term 'Versucher' combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes 'Versucher' as 'the not-undangerous name [he] dares to bestow' on the 'philosophers of the future'--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 'Nietzsche - Science, Psychology, Genealogy,' though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

#### **PHIL254 The Rationalist Tradition in Early Modern European Philosophy**

This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

#### **PHIL255 Moral Psychology: Care of the Soul**

Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives. Class will meet on Monday and Wednesday in lecture/discussion format. Each student must also be enrolled in one discussion section. Discussion sections will be focused on specific interests in or approaches to moral psychology such as clinical therapy, philosophical analysis, or spirituality in a particular religious tradition. The particular offerings of discussion section topics will vary from year to year. Each discussion section will have a distinctive set of additional readings and exercises.

#### **PHIL256 Existentialism**

This course is an introduction to 20th-century French existentialism. 'Existentialism' is both a philosophical tradition and a term that is central to the intellectual history of Western thought. The term was explicitly adopted as a self-description by Jean-Paul Sartre and was widely disseminated both by his own literary and philosophical contributions and those of his associates—notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and '50s. It also resonated widely with anti-colonial thinkers across the globe. Thus, through the work of Frantz Fanon, Richard Wright, and Sartre's own intellectual engagement with colonialism and oppression, we will also explore the ways in which existentialism gradually became an intellectual and political tool for contestation against racism and European imperialism.

#### **PHIL257 Philosophy and Culture of Traditional Korea**

Today, Korean studies is a viable subject in leading American institutions, mainly due to the nation's rising to the world power in the fields of economy and pop culture. Korea is also proud of its long history of intellectual tradition, which, compared with that of China and Japan, is never far behind in depth and breadth.

This course is designed to introduce students to the rich culture and philosophy of traditional Korea. More specifically, we will touch upon various schools or branches of thought that had been prevalent from the latter half of the 14th century to the early 20th century. Among these are Buddhism, Zen Buddhism, Confucianism, Neo-Confucianism, Taoism, and other native schools of thought. We will explore issues surrounding social structure, social and familial ethics, gender politics, legal and penal systems, and values and attitudes of the pre-modern Korean society, which was made up of the major dynasty, Joseon (1392-1910).

Upon successful completion of this course, students will be expected to have acquired enough knowledge about and taste in traditional Korean philosophy and culture to serve as a prerequisite for the further exploration of in-depth

Korean studies. Also, students will have an opportunity to compare and contrast the unique cultures of three Far Eastern countries: China, Japan, and Korea.

#### **PHIL258 Post-Kantian European Philosophy**

In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

Prereq: **None**

#### **PHIL265 Postanalytic Philosophy: Science and Metaphysics**

The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy's relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

#### **PHIL266 Buddhism and Social Justice**

In this course students will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a uniquely Buddhist basis for social justice. Historical texts to be covered include the Dhammapadam, Therigatha, Jataka Tales, and Shantideva's A Guide to the Bodhisattva's Way of Life. We will discuss major philosophical questions such as, 'how can we strive for change, while simultaneously accepting things as they are?' 'How do we respect the importance of identities while denying the existence of a self?' 'If the world will always be imperfect, why bother trying to

improve social conditions?' We will then discuss contemporary applications of Buddhism for social change, and compare these with non-Buddhist approaches. Modern texts include 'Soaring and Settling' by Rita Gross, 'Freedom in Exile' by His Holiness the 14th Dalai Lama, 'Burdened Virtues' by Lisa Tessman, and 'Strength to Love' by Martin Luther King Jr.

#### **PHIL267 History and Limits of Aesthetic Theory**

This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be 'beautiful' or otherwise 'successful,' how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we 'enjoy' tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

Credits: **1.00**

Gen Ed Area: **SBS-PHIL**

Identical With: **COL266**

Prereq: **None**

#### **PHIL269 Modern Aesthetic Theory**

As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that 'art, in its highest vocation, is and remains for us a thing of the past.' Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebosity of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

Identical With: **COL269**

Prereq: **None**

#### **PHIL270 Environmental Philosophy**

This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition--human-centered and individualist accounts of existence, agency, knowledge, and value.

Shared questions may include:

Is there a coherent way of distinguishing 'nature' from the non-natural?

What can we understand about non-human experience and value?

How do people become motivated to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies?

How do concepts of moral responsibility apply to climate change?

How does environmentally directed action relate to social justice?

When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another?

Despite near consensus about our times being rife with environmental crises, concepts like 'environment' and 'nature' defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainability, they may not share any clear positive account of justice or of sustainability.

Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique--each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics).

Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

#### **PHIL271 Moral Responsibility: Doubt, Debate, and Dialogue**

This intermediate philosophy course will investigate conflicting ideas about moral responsibility and develop skills in understanding and critiquing the arguments associated with each view.

Key themes include: (1.) For what can we hold people responsible? For their intentions? For consequences? For their character? For other implications of their action? (2.) How much do concepts of moral responsibility reflect particular (and questionable) cultural ideals? (3.) Can we hold someone morally responsible even when there is a good causal explanation for their conduct?

(4.) What is our aim and purpose in holding ourselves and others responsible, and how else might such purposes be achieved?

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

#### **PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)**

This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of 'doing moral theory.' Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

#### **PHIL278 Political Philosophy**

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming

people. Children, particularly impoverished black youth and, increasingly, immigrants, are funneled into correctional supervision. In this course we will ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.

#### **PHIL279 Necropolitics and Black Fugitive Life**

In his important essay interrogating the (im)possibility of black sociality, Fred Moten attempts to find an order of black social life that would unfold in the very confrontation between black (social) death and the law. However, as he argues, this form of black life would be 'reducible neither to simple interdiction nor bare transgression.' The form of black life that interests Moten is essentially one of 'fugitivity.' In a recent response to Moten's text, David Marriott worries that 'by writing blackness as ceaseless fugitivity,' Moten advances 'a position in which blackness is only black when it exceeds its racial disavowal' and therefore blackness 'can only be recognized as black in so far as it escapes the racism of its history.' In this course, we will trace and follow the implications of Moten's intervention. More specifically, we will explore what forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity could yield given that 'black life' remains arguably the most precarious form of living under various contemporary 'necropolitical' apparatuses of racial exclusion, control, persecution and—in worse cases—genocide. Key figures will include Frantz Fanon, Hortense Spillers, Achille Mbembe, Jacques Derrida, Michel Foucault, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, and Elizabeth Povinelli.

#### **PHIL280 Theory, Critique, Politics**

The subject of this course centers on two questions in 20th century continental philosophy. First, what can theory bring to our understanding of politics? Second, what is the role of critique for political judgment? We will begin with Kant for an understanding of the meaning of 'critique' that many 20th century continental philosophers draw upon. Following this introduction, the course will be split between German philosophers and French philosophers to allow us to understand the tensions and convergences between the two camps. The German philosophers we will read are Heidegger, Adorno, Herbert Marcuse, and Ernst Bloch. For the French philosophers, we will read Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, and Michel Foucault. By the end of the course students will be able to assess how different thinkers attempted to resolve the relationship of the philosopher to political society.

#### **PHIL281 Africana Political Philosophy 1800s-1970**

This course aims to introduce students to both the critical and the constructive dimensions of Africana political thought. Through our readings and discussions, we will assess the claims that Africana thinkers have made upon the polity, how they have defined themselves, and how they have sought to redefine the basic terms of public life away from either slavery or colonization. Among the themes that we will explore are the relationship between slavery and democracy, the role of historical memory in political life, the political significance of culture, the connections between 'race' and 'nation,' and the tensions between claims for black autonomy and claims for integration, as well as the meaning of such

core political concepts as citizenship, freedom, equality, progress, power, and justice. As we focus our attention on these issues, we will be mindful of the complex ways in which the concept of race has been constructed and deployed throughout historical periods and its interrelationship with other elements of identity such as gender, sexuality, class, and religion. Furthermore, we will attend to differences across black geographies from the Americas to the Caribbean, and parts of Africa.

#### **PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion**

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, 'philosophy of religion' is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence—along with refutations of those proofs and rebuttals to those refutations—the problem of evil, religious ethics, religious experience, the possibility of a universal religion, 'divine' racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

#### **PHIL283 Animal Law and Policy**

This course will provide an interdisciplinary and in-depth survey of the growing and dynamic field of animal law. We will address the historical status of animals in the law, how our society views animals, the capacities of animals, how ethics relates to animal treatment, how animals are currently utilized in society, the current application of animal protection laws (including their limitations and efforts to strengthen them), as well emerging efforts to re-classify some animals within our legal system. We will consider how legal systems, specific cases, legislation, and cultural values have affected and continue to affect the evolution of this field. Because this is a field where new developments occur regularly, we will incorporate developments and new legal issues as they arise.

#### **PHIL284 African American Philosophy**

This course will examine the philosophical questions that have been of particular interest to African American philosophers. We will explore the domains of knowledge in which African American philosophers and thinkers have felt compelled to intervene. We will approach these questions by engaging with canonical historical figures such as DuBois, Douglass, and Cooper, and then we will assess the extent to which contemporary African American philosophers have remained (and continue to be) concerned with the same questions, albeit with different discursive methodologies. The purpose of this course is to trace the philosophical articulation of race, racism, identity, politics of freedom, and subject formation in the history of African American philosophical thought.

#### **PHIL286 Philosophy of Mind**

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

#### **PHIL287 Philosophy of Science**

This course is a fast-moving introduction to some central topics in the philosophy of science, aimed at students with some college-level study of at least one natural science. Topics include the norms of scientific understanding or explanation; the relation between finished theories or explanations and ongoing research; the recognition and dissemination of discoveries; the justification of scientific claims; conceptual and technical (revolutionary) change in the science; the significance of instrumentation, experiment, and artifice in science; the places of laws, models, and causal relations in scientific understanding; and whether various sciences differ fundamentally in their aims, methods, and achievements. Considerable attention will be given to examples of scientific practice, both historical and contemporary.

#### **PHIL288 Sciences as Social and Cultural Practices**

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

#### **PHIL291 Reason and Its Limits**

This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's 'critique' aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, 'transcendental idealism,' holds that 'reason has insight only into what it produces after its own plan' (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

**PHIL294 Heidegger and the Being Question**

Martin Heidegger argued in *BEING AND TIME* that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be *BEING AND TIME* and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger's own views about this question.

**PHIL296 Philosophy of Psychology**

How does the mind work? So-called 'computationalists' think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called 'mental representations') according to rules, and then issues 'commands' to guide behavior. On the other hand, the 'SE' (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. SE theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn't happen 'in a vacuum,' and it isn't separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the SE approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

**PHIL302 Catching Glimpses: Kantian Approaches to Perceptual Experience**

The scientific revolution in Early Modern Europe exploded the venerable Aristotelean world of enduring finite substances and middle-sized dry goods into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Material objects not only harbored a hitherto unsuspected microscopic substructure, but were in fact divisible without end--pluralities of pluralities without any underlying unities. More astonishing still, this new metaphysical picture of infinitary flux was soon given a precise mathematical description in the infinitesimal calculus and proved immensely successful in accounting for empirical phenomena.

One casualty of this monumental shift was the traditional object of human sense perception--Aristotle's signet ring that would press its enduring contours into the receptive wax of the human sensorium. If there are no ultimate substances out there waiting to impress their forms upon our minds, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to reconcile the fleetingness and flux of impressions with the impression of endurance and stability?

**PHIL303 Plato's REPUBLIC**

'The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato.' This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

**PHIL306 Sophist, Statesman, Philosopher: Plato's Later Metaphysics and Politics**

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides's puzzle and explore Plato's solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

**PHIL310 Concepts of Matter: A Brief Philosophical History of the Concept of Matter**

In this course, we will explore changing notions of matter in Western thought from classical Greek thought through the quantum revolution in physics, and philosophical debates about their implications. We will begin with views of matter in Plato, Aristotle, and the ancient atomists and how they were interrelated with views of human beings: the devaluation of matter and the body in Platonist and Gnostic thought, the perhaps surprisingly positive attitude taken toward death without a hope of continued existence by the materialist Lucretius, and the appropriation of Aristotle's hylomorphic philosophy into Christian theology and scholastic science in the late middle ages. We will then look at the emergence of a conception of 'material substance' in the 17th century, examining the differences between the mathematical formulations of Galileo and Descartes and those of atomists such as Gassendi. The remainder of the section will focus on the rise of materialism and reactions against it: Descartes and Hobbes on the question of whether human beings are merely machines, the Newton-Leibniz debate about the activity of God in nature, Laplace's demon and the deterministic interpretation of classical mechanics, and the 19th-century reactions of romanticism and spiritualism. Finally, we will examine the radical and counterintuitive changes in the notion of matter occasioned by quantum mechanics, as well as interpretations that put consciousness and subjectivity back into the collapse of the wave function. We will consider whether contemporary physics really has the kind of notion of 'material substance' needed for a traditional form of materialism before concluding with readings from philosophers and physicists in the recent revivals of dualism and panpsychism.

**PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths**

This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth—for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

**PHIL327 Progressive Confucianism and Its Critics**

Contemporary 'Confucianism' designates a diverse set of philosophical, social, political, and religious approaches that are rooted in traditional East Asia and

are playing significant--and increasing--roles in the modern world. 'Progressive Confucianism' designates a subset of these approaches, emphasizing the ways that the Confucian tradition has developed throughout the centuries and arguing both that modern Confucianism must continue to develop, and that a properly developed Confucianism has much to contribute to contemporary philosophy and to modern societies. This seminar will explore the background out of which progressive Confucianism has emerged; its distinctive approach and key contributions to Confucianism and to global philosophy more generally; and central criticisms that it has faced, with sources ranging from more conservative (or even fundamentalist) Confucians to liberals and progressives.

**PHIL340 Human Nature**

The idea of 'human nature' plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

### **PHIL347 Ethics, Ecology, and Moral Change**

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

### **PHIL351 Deconstruction and Politics**

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

### **PHIL352 Black Thought and Critical Theory**

This course follows Stuart Hall's insistence in 'What is this 'Black' in Black Popular Culture?' that the theoretical articulations of 'blackness' are always 'conjunctural.' We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of 'blackness' at specific historical and theoretical conjunctions. How is 'blackness' useful for social theory? Must we assume there is a transhistorical identity to 'blackness'? In what ways does 'blackness' conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions

these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

### **PHIL353 Blackness in the Anthropocene**

To deny the 'unprecedented' geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this 'new era' has afforded us in terms of critical potential. From accusations that what we now call the 'Anthropocene' has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the 'Anthropocene' are still contested terrains. The aim of this course is to investigate the Anthropocene's many forms of socio-political erasures and theoretical 'blind-sights.' We will examine the ways in which Anthropocene discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocene times. We will explore questions like 'who are 'recognizable/legitimate' victims in environmental disasters,' 'do events like hurricane Katrina or the migration crisis teach us anything about our human condition,' and 'what is the 'post' in post-humanism.' We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

### **PHIL354 Hope and Hopelessness in an Age of Mass Incarceration**

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino/a, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Young people, particularly impoverished black youth, are funneled into correctional supervision through the school-to-prison pipeline. For many people in the country today, avoiding prison seems hopeless.

This interdisciplinary course, grounded on philosophical reflections on hope, liberty, respect, and exclusion, will critically explore the moral, psychological, ethical, social, and political issues raised by mass incarceration in the United States. We will be particularly interested in whether and under what conditions hope is possible for those marginalized under the carceral system.

### **PHIL355 Necropolitics and Black 'Fugitive' Politics**

In his important essay interrogating the (im)possibility of black sociality, Fred Moten attempts to find an order of black social life which would unfold in the very confrontation between black (social) death and the law. However, as he

argues, this form of black life would be 'reducible neither to simple interdiction nor bare transgression.' The form of black life that interests Moten is essentially one of 'fugitivity.' In a recent response to Moten's text, David Marriott worries that 'by writing blackness as ceaseless futgitivity,' Moten advances 'a position in which blackness is only black when it exceeds its racial disavowal' and therefore blackness 'can only be recognized as black in so far as it escapes the racism of its history.' In this course, we will trace and follow the implications of Moten's intervention. More specifically, we will explore what forms and figures of sovereignty an aesthetics and politics of fugitive subjectivity could yield given that 'black life' remains arguably the most precarious form of living under various contemporary 'necropolitical' apparatuses of sanctioned racial exclusion, control, persecution and—in worse cases—genocide. Key figures will include Frantz Fanon, Achille Mbembe, Jacques Derrida, Michel Foucault, Jared Sexton, David Marriott, Fred Moten, Christina Sharpe, Saidiya Hartman, Alexander G. Weheliye, Elizabeth Povinelli, and Gayatri Spivak.

#### **PHIL357 Animal Minds**

Can animals reason? Do they form intentions, do they have beliefs, might they act ethically? What do other animals know? How can we know what they might know, and what can exploring the minds of other animals tell us about our own minds? In this course we will attempt to answer these questions by adopting a largely comparative perspective and examining philosophical, scientific, psychological, and popular writing about minds. We will examine evidence for mindedness and reasoning in social species. We will also explore the ethical implications of this research.

Prereq: **None**

#### **PHIL359 Michel Foucault: Power and Its Products**

Is power productive of reality? What does Michel Foucault (1926-1984) mean when he famously declares that power is not just prohibitive, but productive? Foucault's work has been enormously influential in the fields of philosophy, social theory, history, anthropology, queer theory, and feminist theory, among others. The primary topic of Foucault's work is the way in which we have come to categorize not only our world but ourselves and in particular to categorize ourselves in terms of madness, criminality, disease, and sexuality. Foucault, however, is interested in more than these categories themselves: he aims to investigate the conditions through which these categories come to be seen as capable of capturing truths about ourselves. This investigation leads him, in the mature phase of his work that begins in the 1970s, to the problem of power, which is best thought of as a set of relations and not as a thing or a possession. Foucault takes power relations to be (a) implied in relations of knowledge and (b) to be 'productive,' in a certain sense, of social reality. In this course, we will try to clarify the relationship between power, the production of the social, and knowledge in Foucault's work.

On the one hand, to call power productive opens the door to a major reconsideration of the basic problems of social and political philosophy, which can no longer be assured of having a timeless set of basic questions or objects (the state, the citizen-subject). On the other hand, there is a risk in this approach of ascribing almost magical qualities to power and of reifying it. Since his death, Foucault's thought has often been taken to end up in a curious impasse, caught between extreme activism that accepts no system of power as established and cynicism that sees co-optation everywhere and resistance as futile. What are the political implications of Foucault's shifting conception of power? What follows

for our understanding of ourselves? What is really at stake in the ways that we classify and categorize ourselves today?

#### **PHIL360 Continental Philosophy's Others**

This seminar will attend to some of the ways in which philosophers of race, Subaltern thinkers, and 'postcolonial' philosophers have engaged with the European philosophical archive (more specifically in this case, deconstruction and contemporary French theory). The aim of this course is to focus on some aspects of the debates that emerged from the confrontation between voices intervening from the 'margins' of mainstream continental thought and discourses traditionally perceived to be at the center of knowledge production and/or epistemological practices. We will attempt to assess when, where, and how these 'philosophies from the borderlands' have had important bearings on contemporary debates in political philosophy and social theory. We will assess both individuals and collective forms of criticism, not only on geographic frontiers but also on liminal and alternative spaces within the same geographic and institutional location, such as the American academy.

#### **PHIL362 Origins of the Human Mind**

Since classical antiquity, philosophers have often characterized human beings by way of contrasts between ourselves and nonhuman animals, particularly in terms of mental abilities humans possess and nonhuman animals (putatively) lack, such as reasoning and language. Only recently, however, have the sciences—particularly evolutionary biology, cognitive psychology, anthropology, and cognitive ethology—begun to offer the tools needed to characterize differences in the cognitive toolkits of different species and to attempt to piece together hypotheses about how human minds differ so greatly from those of our nearest relatives, the great apes, in spite of our genetic similarity and the comparatively brief period since the time of our last common ancestors. In this course, we will read several recent works by philosophers and scientists presenting theories of the evolution of distinctively human cognition.

#### **PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences**

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in 'nature'; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

#### **PHIL383 Mind, Body, and World**

Social-pragmatist conceptions of language and mind have sought to accommodate the normativity of meaning and justification within a broadly scientific, naturalistic understanding of ourselves and the world by treating mental life as grounded in public practices and norms of communication in partially shared causal circumstances. Such accounts have sometimes been criticized for neglecting the experiential, affective, and first-personal aspects of mind and, at other times, for disconnecting linguistic communication from accountability to the world. This advanced seminar critically assesses some influential recent efforts to account for objective accountability, perceptual experience, first-person perspectives, and affectivity as constructive components of broadly social-pragmatist approaches to mindedness. With a brief introduction to Quine's and Davidson's criticisms of semantic empiricism as background, we will examine John McDowell's attempt to develop a post-Davidsonian empiricism, Hubert Dreyfus's phenomenological dualism of bodily coping and linguistic articulation, Alva Noe's treatment of perception as bodily activity, John Haugeland on embodied 'existential commitment,' and Rebecca Kukla and Mark Lance on the pragmatic normativity of the space of reasons.

#### **PHIL385 Understanding Life and Mind**

Philosophical conceptions of mind and language are now typically 'naturalistic' in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an 'internal' representation of an 'external' world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an 'extended evolutionary synthesis;' reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

#### **PHIL390 Topics in Metaphysics**

Among the many enigmatic aspects of Wittgenstein's Tractatus Logico-Philosophicus are (a) an apparent distinction between what can be said and what can only be shown, (b) the purported doctrine that there is truth in solipsism and mysticism, (c) the supposed coincidence of realism and idealism, and (d) finally, the apparent astonishing 'conclusion' of the Tractatus that this book is made up of nonsense, and has itself to be overcome, to see the world right. This seminar focuses on the existence and nature of what cannot be said, in particular on a recent 'resolute' approach to interpreting the Tractatus according to which what cannot be said is nothing more than plain nonsense, and a variety of critiques of this 'resolute' approach. Investigation of this interpretive controversy points to a spectrum of conceptions of the mystical and the unsayable. We conclude the seminar with the significance of these conceptions for the nature of philosophizing.

## **PHYSICAL EDUCATION (PHED)**

#### **PHED101 Tennis, Beginning**

This course is designed for those who have had no formal instruction in tennis. Basic grips and stroke technique will be taught for the forehand, backhand, serve, and volley. Also covered will be equipment selection, court etiquette, and proper scoring of games, sets, and matches. The introduction of basic doubles formation will also be included. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

#### **PHED102 Tennis, Intermediate**

This course is designed for those who have taken beginning tennis and have learned the basic grips and strokes. The intermediate group will have a more detailed analysis of stroke technique. Ladder match play will give students the opportunity to learn singles and doubles strategy. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Gen Ed Area: **None**

Prereq: **None**

#### **PHED106 Fitness, Beginning**

This course is designed to meet the needs of the individual interested in establishing a self-paced exercise program. The emphasis of this course is on the development of cardiovascular endurance. Individuals are instructed how to determine personal work-load levels and pace themselves during various classroom aerobic activities. Participants also receive additional instruction in strength training. Cardiovascular activities include fast walking, jogging, aerobic exercise, rope jumping, interval training, and rowing ergometer work. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

#### **PHED127 Tabata/Fitness Training**

Tabata/fitness training is a program designed to enhance an individual's competency at all physical tasks. The student will perform exercise elements successfully at multiple, diverse, and randomized physical challenges. Areas of fitness will include cardiovascular endurance, stamina, strength, power, speed, balance, agility, and coordination. The start-stop training design is based on 20-second bursts of high-intensity workout followed by a 10-second rest. Each high-intensity burst/rest is repeated 4–8 times. The course will provide challenging workout programs that provide the health benefits of cardiovascular workouts with high- to moderate-intensity training and/or high- to moderate-intensity interval training. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

## **PHYSICS (PHYS)**

#### **PHYS105 Radical Sustainability**

The year 2020 marks the 50th anniversary of the first Earth Day. Writings and legislation from that time sought to discuss and address the many growing

environmental challenges the world faced. The idea of sustainability became current: to create conditions for the human presence to endure, along with the ecosystems in which it is embedded.

Despite some successes, the challenges remain and have grown since that time. The many problems we face are hard to deal with in isolation, and no amount of effort seems enough to keep up as the problems worsen. The climate crisis is a case in point. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way.

Radical Sustainability explores the intersection of these now critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response, within the geo-ecosystem and the human systems embedded within it. Radical Sustainability is radical both by being fundamental and by being activist, recognizing that sustained large-scale change is urgently necessary if we are to persist and thrive on an Earth that itself is changing.

In addition to studying physical science, which establishes the conditions for the life of all beings, a justice-aware sustainability requires us to think scientifically about society as well. The course will consist of lecture, discussion, visits from experts, field trips, and class actions to promote competent and effective engagement with the issues.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **ENVS235**

Prereq: **None**

#### **PHYS107 Life in the Cell from a Molecule's Perspective**

What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor 'walks,' how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **MB&B117**

Prereq: **None**

#### **PHYS111 Introductory Physics I**

This course, along with PHYS 112 in the spring semester, is an introduction to the fundamental principles of physics. Employing trigonometry and algebra the goal is to provide tools for the quantitative understanding of a wide variety of phenomena, with many examples taken from the life sciences. The lab PHYS 121 is recommended. Since algebra is an important prerequisite for PHYS 111, we strongly recommend that all students take a diagnostic test prior to the start of the course. It can be found at <https://www.khanacademy.org/math/algebra/test/subject-challenge?modal=1>

Taking this 'Course Challenge' will take 30-45 minutes and leave you with a good idea of where your algebra skills might need review. Follow-up guided lessons can be chosen at this website.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

#### **PHYS112 Introductory Physics II**

This is the second of two non-calculus courses covering fundamental principles of physics. The emphasis is on developing a conceptual understanding of the physical processes that govern our universe. Proficiency in elementary algebra, vector algebra, trigonometry, and arithmetic is required. The lab PHYS122 is recommended.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS111**

#### **PHYS113 General Physics I**

This course is the first term of a general physics course with calculus, recommended for students interested in majoring in the sciences. With the focus on Newtonian dynamics, PHYS 113 seeks to develop both conceptual understanding and the ability to use this knowledge to obtain quantitative predictions of how the universe works. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of mechanics. The associated lab, PHYS123, is highly recommended.

PHYS113 and PHYS116 are part of a sequence of courses that lead into the physics major. PHYS113 is a pre-requisite for PHYS116; therefore, students must take them in sequence.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

#### **PHYS115 Newtonian Mechanics**

This course in classical mechanics assumes a level of familiarity with general physics and comfort with vectors and calculus that is not assumed in PHYS113. This course will study classical mechanics at a level that is rigorous and mathematically sophisticated, employing contemporary instructional techniques. It will also teach elementary programming and data analysis skills essential to physical science. The course may be ideal for students who have previously taken a general physics course but not at the level required as preparation for PHYS324, Electricity and Magnetism.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

#### **PHYS116 General Physics II**

This course is the second term of a general physics course with calculus, recommended for students interested in majoring in the sciences. The focus is on the physics of charged particles, including an introduction to the concepts of electric and magnetic fields. Students will develop both conceptual understanding of how charged particles give rise to both electricity and magnetism and the ability to use this knowledge to quantitatively describe the behavior of these particles in a variety of contexts, including electrical devices. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of electricity and magnetism. The associated lab PHYS124 is highly recommended; any student wishing to major in physics should enroll in PHYS124, since it is a requirement for the major.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113**

### **PHYS121 Physics Laboratory I**

This laboratory course provides experience with phenomena discussed in PHYS111 lectures. While this course is not required by the Physics Department, students planning to enter the health professions should be aware that a year of physics WITH LABORATORY is usually required for admission. Consult your major advisor if you are in doubt about similar requirements in your field. Each laboratory is limited to 16.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

### **PHYS122 Physics Laboratory II**

This course provides laboratory experiences for students taking PHYS112.

This laboratory course teaches students how to obtain, process, and evaluate data and compare these data with quantitative models of how our world works.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

### **PHYS123 General Physics Laboratory I**

This laboratory course provides experience with phenomena discussed in PHYS113 lecture, integrating calculus with the experiments.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

### **PHYS124 General Physics Laboratory II**

This laboratory course is designed to be taken in conjunction with PHYS116. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS116. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113 OR PHYS123**

### **PHYS162 It's About Time**

The course will explore ideas and tools that help us to conceptualize and quantify time. Measurement of time has been accomplished by careful observation of celestial objects, counting growth rings in trees, or determining the abundance of radioactive decay products, and with devices as varied as the hour glass and the atomic clock. A thorough investigation of these and other methods and tools will illuminate old and new views of time and will allow us to venture into various fields of physics such as classical mechanics, the theory of relativity, atomic and nuclear physics, electricity, and optics. Along the way, we will discuss concepts including, but not limited to: the origin of time, its smoothness, time dilation, the relativity of simultaneity, and the direction of time's arrow.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

### **PHYS170 Introduction to Design and Engineering**

This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-CIS**

Identical With: **IDEA170, CIS170**

Prereq: **None**

### **PHYS170Z Introduction to Design and Engineering**

This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-CIS**

Identical With: **IDEA170Z, CIS170Z**

Prereq: **None**

### **PHYS207 Introduction to Biophysics**

This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS116**

### **PHYS213 Waves and Oscillations**

The properties of periodic motion recur in many areas of physics, including mechanics, quantum physics, and electricity and magnetism. The ubiquity of oscillatory motion in biological and chemical systems, as well as engineering, provides interdisciplinary importance for developing the formal description of periodic motion. We will explore the physical principles and fundamental mathematics related to periodic motions. Topics will include damped and forced harmonic motion, normal modes, the wave equation, Fourier series and integrals, and complex analysis. Principles and techniques developed in this course are central to many subsequent courses, particularly Quantum Mechanics (PHYS214, PHYS315), Classical Dynamics (PHYS313), and Electricity and Magnetism (PHYS324). An important component of this course is to develop the ability to use mathematical software packages to graph expressions, solve equations, and obtain numerical solutions to differential equations.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS116**

#### **PHYS214 Quantum Mechanics I**

This course provides an introduction to wave and matrix mechanics, including wave-particle duality, probability amplitudes and state vectors, eigenvalue problems, and the operator formulation of quantum mechanics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **(PHYS213 AND MATH221) OR (PHYS213 AND MATH223)**

#### **PHYS215 Special Relativity**

This calculus-based half-credit, half-semester introduction to Einstein's theory of special relativity promotes both a qualitative understanding of the subject and a quantitative problem-solving approach.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

#### **PHYS217 Nonlinear Dynamics and Chaos**

The techniques of nonlinear dynamics and chaos have been proven useful for a variety of disciplines, ranging from astrophysics to population dynamics. This course provides an introduction with applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113, PHYS116, AND PHYS213**

#### **PHYS219 Introduction to Contemporary Physics**

This course examines the foundations of modern physics, including special relativity, the building blocks of matter, the fundamental interactions and gravity, and recent views of the universe such as entanglement, supersymmetry, strings, and dark matter and dark energy.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **(PHYS113 AND PHYS116)**

#### **PHYS221 Modeling and Data Analysis: From Molecules to Markets**

The development of models to describe physical or social phenomena has a long history in several disciplines, including physics, chemistry, economics, and sociology. With the emergence of ubiquitous computing resources, model building is becoming increasingly important across all disciplines. This course will examine how to apply modeling and computational thinking skills to a range of problems. Using examples drawn from physics, biology, economics, and social networks, we will discuss how to create models for complex systems that are both descriptive and predictive. The course will include significant computational work. No previous programming experience is required, but a willingness to learn simple programming methods is essential.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **QAC221, CIS231**

Prereq: **None**

#### **PHYS313 Classical Dynamics**

This is a course in classical mechanics at the intermediate level that utilizes problem solving instruction and learning. It approaches Newtonian mechanics from a more advanced point of view and introduces Lagrangian and Hamiltonian dynamics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS513**

Prereq: **(PHYS213 AND MATH221 AND MATH222 AND MATH122)**

#### **PHYS315 Quantum Mechanics II**

This course will expand the formalism of quantum mechanics to include spin and angular momentum in three dimensions. The quantum theory of identical particles will be developed and applied to multi-electron atoms. The remainder of the course will explore approximation methods for applying quantum mechanics to more complex systems.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS515**

Prereq: **(PHYS214 AND MATH223) OR (PHYS214 AND MATH221)**

#### **PHYS316 Thermal and Statistical Physics**

Thermodynamics and statistical mechanics are pillars of physics.

Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

Identical With: **MB&B508, MB&B308, CHEM508, PHYS518, CHEM308**

Prereq: **None**

#### **PHYS321 Physics Colloquium with Journal Club I**

Students will review and discuss materials in preparation for attending the physics colloquium. Attendance at the colloquium is also required.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **None**

Prereq: **None**

#### **PHYS322 Physics Colloquium with Journal Club II**

Students will review and discuss materials in preparation for attending the physics colloquium. Attendance at the colloquium is also required.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **None**

Prereq: **None**

#### **PHYS324 Electricity and Magnetism**

This course covers the classical field theory of electricity and magnetism. The core of the course covers electrostatics and magnetostatics with emphasis on both physical insight and the partial differential equations that describe these fields. We then cover electrodynamics to complete Maxwell's equations and to derive the elementary properties of electromagnetic radiation.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS524**

Prereq: **PHYS116 AND PHYS124 AND PHYS213 AND MATH222**

#### **PHYS339 Molecular and Cellular Biophysics**

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome,

membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM309, MB&B309, CHEM509, MB&B509, PHYS539**

Prereq: **None**

#### **PHYS340 Computational Physics**

This course introduces students to numerical techniques used in modern computational physics. Using the UNIX operating system and its support software as our programming environment, we will write code using the C programming language to implement the basic numerical techniques necessary for solving the majority of physics problems that do not have an analytical solution. Previous experience with UNIX/C is useful but not required.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **(MATH221 AND PHYS213) OR (MATH223 AND PHYS213)**

#### **PHYS342 Experimental Optics**

This is an experimental course in optics, including lenses, lens combinations, interference and diffraction, interferometry, and spectrometry.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS542**

Prereq: **(PHYS116 AND PHYS213)**

#### **PHYS345 Electronics Lab**

This laboratory course covers the fundamentals of analog and digital electronics: passive DC and AC circuits, linear transistor and integrated circuits, and digital integrated circuits.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS545**

Prereq: **(PHYS116 AND PHYS213)**

#### **PHYS358 Condensed Matter**

This course is an introduction to condensed-matter physics with emphasis on fundamental properties of solids. We will explore crystal structure, phonons, and electrons in solids as a basis for understanding the thermal, electronic, and magnetic properties of materials. In addition to lectures and problem sets, there will be several numerical experiments in which computer simulation and visualization tools will be used to explore microscopic properties of materials.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS558**

Prereq: **[PHYS315 or PHYS515] AND [PHYS324 or PHYS524]**

#### **PHYS377 Chemistry of Materials and Nanomaterials**

This course will provide an introduction to materials chemistry, with a special emphasis on nanomaterials. Topics covered will include colloidal metal nanomaterials; semiconductors and quantum dots; carbon nanotubes, fullerenes, and graphene; metal-organic frameworks; self-assembly and

metamaterials; electron and scanning probe microscopies; and lithography. The course will also discuss applications of these materials and techniques in areas such as plasmonics and sensing, catalysis, energy generation, and medicine.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM377**

Prereq: **CHEM251**

#### **PHYS395 Structural Biology Laboratory**

One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

#### **PHYS516 Thermal and Statistical Physics**

Thermodynamics and statistical mechanics are pillars of physics.

Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics

are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

Identical With: **PHYS324**

Prereq: **PHYS116 AND PHYS124 AND PHYS213 AND MATH222**

#### **PHYS539 Molecular and Cellular Biophysics**

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

**PHYS563 Analytical Mechanics**

Advanced classical mechanics: multidimensional motion, rigid bodies and rotational dynamics, chaotic dynamics, and applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **(PHYS213 AND PHYS217 AND PHYS313) OR (PHYS213 AND PHYS217 AND PHYS513)**

**PHYS565 Mathematical Physics**

Historically, physics and mathematics are closely related. Physics uses powerful tools developed by mathematicians, while physicists, investigating the actually existing universe, provide mathematicians with new concepts and ideas to explore. This way, many mathematical techniques, and even entire areas of mathematics, developed from the need to solve certain real-life problems posed by physical reality. The purpose of this course is to give students an overview of the powerful array of mathematical tools available for the solution of physical problems. Starting with the presentation of tools of complex analysis, we will apply them to the solution of ordinary and partial differential equations. We will encounter Fourier and Laplace transforms and will study the Green's function method for the solution of bound and scattering problems. We will also look into the elements of Group Theory and apply it to angular momentum in quantum many-body systems.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **MATH222 AND MATH223 AND PHYS313 AND PHYS315 AND PHYS324**

**PHYS566 Electrodynamics**

This course covers boundary value problems, Green's functions, multipoles, fields in dielectric and magnetic media, electromagnetic radiation, and wave guides.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

**PHYS567 Statistical Mechanics**

This course will develop important concepts in statistical physics by examining several applications in detail. The areas covered will include the classical and quantum gases, critical behavior and phase transitions, and elementary transport phenomena.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **[PHYS316 or PHYS516]**

**PHYS568 Quantum Mechanics**

This course will develop advanced aspects of theory and application of quantum mechanics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **[PHYS315 or PHYS515]**

**PHYS571 Advanced Topics in Atomic and Molecular Physics**

This course will introduce classical and quantum collision theory, with special consideration of atomic and molecular collisions.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **None**

Prereq: **PHYS315**

**PHYS572 Advanced Topics in Atomic and Molecular Physics**

In this round of Advanced Topics (PHYS 572), fundamentals and applications of low temperature plasmas will be considered. We will investigate theoretical and experimental aspects related to the production and diagnostic of such plasmas. Discussion of a several usages of plasmas--for example, in chemical analysis, material processing, environmental monitoring, or medical applications--will conclude the semester.

Offering: **Host**

Grading: **OPT**

#### **PORT402 Individual Tutorial, Undergraduate**

Topic to be arranged in consultation with the tutor.

Offering: **Host**

Grading: **OPT**

## **PSYCHOLOGY (PSYC)**

#### **PSYC104 Understanding Prejudice and Discrimination**

This first-year seminar (FYS) will explore several different forms of prejudice and discrimination, including racism, sexism, anti-Semitism, heterosexism, and less recognized forms of bias, such as the exploitation and domination of indigenous peoples, animals, and the natural environment. During the first part of the course, students will read about and discuss specific forms of prejudice. In the second half, you will write a final paper and give a brief presentation on a prejudice-related topic.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC105 Foundations of Contemporary Psychology**

This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for upper-level courses in psychology and as a valuable contribution to students' liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.

Offering: **Host**

Grading: **Cr/U**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC109 Psychology and Technologies of the Self and Social World**

The psychological sciences are generating novel and remarkable understandings of individual minds, social interactions, groups, and institutions, and these findings are being extended to benefit individual and social welfare. As we dwell in a world increasingly understood in psychological terms and managed through psychological technologies, crucial questions warrant attention. What are the implications of adopting these new understandings of self and others? Does this new knowledge change us and, if so, how? How do we assess the consequences of this knowledge as it is implemented in social practices? These questions

guide our examination of cases where psychological knowledge has informed new practices and policies. The cases include research on decision-making, integration, positive psychology, psychopharmacology, stress, and attitudes. Also considered will be instances where psychological ideas have been implemented then challenged, including psychosurgery and token economies.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Identical With: **SISP109**

Prereq: **None**

#### **PSYC111 Myth, Magic, and Movies**

We will examine how the mythic is made and what purposes myth and magic serve in modern culture. Guided by classic psychoanalytic ideas, we will seek to understand both the conscious and unconscious power of myths. The seven volumes in J. K. Rowling's HARRY POTTER series will be the core texts for the course, and we will explore how these texts were transformed by the eight Potter movies.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC112F Psychoanalysis Then and Now: From Freud to Psychosocial Studies (FYS)**

Psychoanalysis appears to be little more than an anachronism within the context of modern Psychology, and yet it nonetheless is leading a surprising afterlife-- at once defunct as an institutional player and yet at the vanguard of cultural theory and clinical psychology practice. This course traces the trajectory of Psychoanalysis from its origin in Freud's theory of unconscious mental processes and his talking cure to its current manifestations in the field of Psychosocial Studies. We consider how psychoanalysis is an inherently critical practice with the capacity to uniquely situate an individual in relation to social forces that have influenced their personal development, without reducing a person to their social context and/or family history. The course begins with exploration of foundational psychoanalytic concepts (the unconscious, transference, resistance, the drives) and moves to consider the dimensions of social-unconscious processes in groups, institutions, and nations. We also explore how psychoanalysis can inform the psychosocial study of subjectivity, ideology, the intergenerational transmission of trauma, and current sociopolitical issues.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC113F What is 'Typical?' Diversity in Human Development (FYS)**

Much of psychological research aims to describe & understand human behavior by studying how typical people think or act in typical circumstances. However, quite a lot can be learned by looking beyond the average and examining the variability of human behaviors, experiences, and abilities. This First Year Seminar will explore the ways that atypical development, neurodivergent minds, and non-normative populations can broaden our understanding of human development. Students will develop academic writing skills while critically engaging with psychological research.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC114F Race in Everyday Space: The Psychological Impacts of Racism (FYS)**

'We are all products of a racialized society, and it affects everything we bring to our interactions' (Oluo, 2018, p. 15). This seminar uses psychological theory and research as well as interdisciplinary scholarship (e.g., ethnic studies, history, sociology) to critically unpack this statement. Through the semester we examine the nature and experience of racially marginalized communities in the United States, and engage in critical analysis of the ways in which systems of power affect the everyday lives of racially marginalized communities. As a First Year Seminar, this course will emphasize the continued development of written and verbal communication skills.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC138F Masculinities (FYS)**

This course offers an interdisciplinary approach to the study of masculinities, focusing on the difficulty of disentangling the (social-) scientific questions of what men are (and how they come to be that way) from the interpretive question of what masculinity means. We will survey a range of perspectives from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, anthropology, feminist studies, and queer theory that describe and attempt to account for masculinities. In order to understand how these scholarly accounts might fit together to form a more comprehensive interpretive framework, we will also be engaging in critical analysis of examples from contemporary television and film that will help us to understand the role that representation plays in our cultural constructions of masculinity.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **1.00**

Gen Ed Area: **HA-COL**

Identical With: **COL138F**

Prereq: **None**

#### **PSYC200 Statistics: An Activity-Based Approach**

This course will introduce the concepts and methods used in the analysis of quantitative data in the behavioral and life sciences. The approach will emphasize activity-based learning. Lectures will be used for the initial presentation and wrap-up of topics, but most class time will be devoted to activities in which students perform analyses. The topics covered will include descriptive statistics, sampling distributions, estimation, hypothesis testing, analysis of variance, and regression.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

#### **PSYC202 Qualitative Research Methods in Psychology**

The goal of the course is to introduce students to basic research strategies for investigating human thought and behavior, with a focus on qualitative methods. The course provides detailed introduction to different qualitative methods, including interview, observation, case study, content analysis, archival, life history, and narrative techniques. Attention is given to the framing of research questions, design of studies, the ethics of psychological research with humans, and assumptions about human nature. The course is problem- and project-based, providing hands-on research experience.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC204 Methods of Interpretation**

Projects incorporating issues of race, gender, and class will be the focus of this methods course. Feminist, phenomenological, experiential, textual, and ecological methods of interpreting gender, race, and class in multimedia formats will be explored.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC261**

**PSYC205 Research Methods in Psychopathology**

How do psychological researchers study unusual and distressing human experiences? This combined laboratory and lecture/discussion course provides an introduction to methods used in the study of clinical and subclinical phenomena. With an emphasis on methodological pluralism in the 'psy' disciplines, the course covers both quantitative and qualitative approaches, exploring the intersections between diverse modes of inquiry. Throughout the semester, students conduct a team research project on a psychological topic of the group's choosing, proceeding through each stage of the research process. Along the way, we consider the historical context of psychological science, as well as contemporary debates about the nature of psychopathology. We also think critically about the relationship between research methods and the topic(s) under investigation, asking questions such as: Why do psychologists use the methods that they use? How is research in psychology different from research in the other sciences and humanities?

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC206 Research Methods in Cognitive Development and Education**

This course introduces students to translational research in psychology--research that draws on psychological science to inform practice. The course is built around a central case study, early numeracy in preschool children, with an emphasis on the effects of differences in language input (e.g., deafness). We will cover existing research on cognitive and language development, early numeracy, deaf education, and teaching strategies to understand the relationship between research and practice in these areas.

The first one-quarter to one-third of the course will cover basic research methods, fulfilling the requirement for the major and preparing students to engage in both research and practice. The final project will entail drawing on the research literature and research methods to develop and test math-related materials for preschools. Each year of PSYC206 draws on the work done by previous students in the class.

The service-learning component of the course, in which students will spend two hours per week in a preschool, provides a hands-on opportunity to interact with preschool children and learn firsthand about their learning environment and styles.

Offering: **Host**

Grading: **A-F**

**PSYC208 Research Methods on Emotion**

This course will focus on methods and techniques to study emotions in their social context, including emotional narratives, interviews, experiments with emotional stimuli (e.g., mood induction), surveys, and daily diaries. We will investigate which methods and techniques are best suited to study various positive and negative emotions. The course will give special attention to ethical issues in emotion research.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC200 OR QAC201 OR ECON300**

**PSYC209 Research Methods in Ecological-Community Psychology**

The focus of this course is to introduce the student to the historical and conceptual foundations of ecological and community psychology. Special emphasis will be placed on research ethics and framing research questions that address social problems. Students will learn about study design and mixed-method approaches that will provide a foundation to engage in research and practice.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC210 Research Methods in Cognition**

This course will examine the experimental method as a means of gaining knowledge about human cognition. Students in this course will learn about general research methods in cognitive psychology related to experimental design, understanding and interpreting research, and ethical issues involved in research with human subjects. Classic research paradigms in cognitive psychology will be explored through the use of interactive demonstrations and in-class experiments.

Offering: **Host**

**PSYC213 Research Methods in Social Psychology**

The course examines research methods and techniques used in social psychology, including observation, correlation, and experimentation. Students

will learn about study design, research ethics, and how to collect and analyze data, as well as effective ways to report results. All students are expected to undertake a research project.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC214 Research Methods in Sleep Research**

Have you ever read an empirical research article and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting findings when researchers test the same phenomenon?

This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. This is an interactive lecture and lab-based course. Through a series of hands-on lab assignments, students will acquire the necessary skill set to be able to critique, analyze, and design psychological research. Students will explore both qualitative and quantitative methodological designs used in psychological research (e.g., experiments, interviews, and surveys). Additionally, students will gain skills in conducting basic statistical analyses (e.g., correlation, t-test, ANOVA). The course will culminate with a final project in which students will design an original research study.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC215 Research Methods: Behavioral Methods in Animal Research**

This is a research methods course that provides an understanding of the different approaches to animal research, particularly those using rodent models. It provides students with an understanding of the different techniques employed by researchers and the questions they address. This course provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. Students will learn how to handle and inject rats and will also get a sense of how to design a behavioral experiment, including the use of control groups and counterbalancing. The course will follow a lecture/discussion/lab format where students will learn about different forms of conditioning (operant/classical) and how these apply to various behavioral tasks such as operant responding, autoshaping, decision-making, locomotion testing, etc. (see readings for more examples). One class each week will take place in the lab to provide students with hands-on experience with rats and the testing apparatuses. Students will be assigned a rat for the semester that they will use to collect and analyze data during lab classes. This will be combined with regular class discussion of research articles dealing with each topic, including some of the earlier reports and more recent applications. The focus of the course will be on trying to prepare students to design and carry out behavioral/animal research in a laboratory setting.

#### **PSYC216 Research Methods in Diversity Science**

This course introduces students to the research methods important to conducting scientific inquiry into topics related to inequality, oppression, and disparities in life outcomes across a broad range of experiences of marginalization (e.g., gender, race, sexuality, and the experiences at the

intersections of these domains). In the process of introducing research methods pertinent to diversity science, we also discuss foundational and contemporary research in diversity science.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC220 Cognitive Psychology**

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **NS&B220**

Prereq: **PSYC105**

#### **PSYC221 Human Memory**

This course is designed to provide students with an in-depth overview of the different human memory systems revealed by empirical research in the fields of cognitive psychology and cognitive neuroscience. The different systems include procedural memory, working memory, perceptual memory, semantic memory, and episodic memory.

Offering: **Host**

#### **PSYC222 Sensation and Perception**

This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena.

Identical With: **NS&B222**

Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

#### **PSYC225 Cognitive Neuroscience**

This course provides an introduction to cognitive neuroscience—the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms

of brain evolution, development, and repair, and their implications for various diseases and disorders.

#### **PSYC228 Clinical Neuropsychology**

This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

#### **PSYC230 Developmental Psychology**

This course is an introduction to human behavior and psychological development focusing on infancy and childhood. We will examine theory and research about physical, social, emotional, language, brain and cognitive development, with emphasis on cognitive development.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC230Z Developmental Psychology**

Please note: readings and assignments will be due during winter break, prior to arriving on campus for Winter Session. Please visit the Winter Session website for the full syllabus -- <http://www.wesleyan.edu/wintersession>.

In this two-week, full-credit course, students will learn how children develop across different domains -- physical, cognitive, language, social-emotional, identity, personality. We will emphasize the primary research literature in developmental science and expose students to the fundamental methods and theories used to study how children develop. In the process, we will learn to appreciate the beauty and detail of human development, as well as the ingenuity of research in the field over the last several decades.

Please note that the course is broken up into two chunks with a week-long break in the middle. Students will have a writing assignment to work on during the break.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC239 Functional Anatomy of the Human Brain**

A mass of tissue the consistency of firm jello and weighing about 2.5 pounds in the adult human, the brain is an organ that controls nearly every function of the body. It also enables the highest cognitive functions of humans such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will be of special interest to premed students; NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **NS&B239, BIOL239**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

#### **PSYC240 Behavioral Neurobiology**

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **NS&B213, BIOL213**

Prereq: **None**

#### **PSYC245 Psychological Measurement**

This course will discuss various approaches to the measurement of psychological constructs such as intelligence and personality. Topics covered will include ability tests (e.g., IQ tests), achievement tests (e.g., classroom assessments), and diagnostic clinical assessments (e.g., the draw-a-person test). Strengths and weaknesses associated with various methods of measurement (e.g., self-report vs. performance measures) will also be discussed. Special attention will be given to the criteria used to critically evaluate the psychometric quality of measurement instruments. Students will learn the steps necessary to develop psychometrically sound, practically useful, and legally defensible tests.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

**PSYC246 Behavior Change, Clinical Interventions and Health Promotion**

This class will review the current science and historical context of mental and physical health behavior change approaches across three levels of intervention: the self, the individual, and society. Major topics will include fundamental behavioral principles, basic elements of empirically supported individual treatments (e.g., cognitive behavioral therapies, interpersonal therapy), and the design and evaluation of population-level health interventions. Lectures, readings, and clinical examples will illustrate both the theory and step-by-step practice of evidence-based approaches to behavior change across levels. Assignments may include a self-monitoring exercise, in-class role plays, a group project, an exam, and brief writing assignments. This course is designed to introduce students to a broad range of contemporary approaches to psychological and behavioral treatments; however, it will not provide the skills needed to implement psychological interventions.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC248 Adolescence and Emerging Adulthood**

This course takes a global, cultural perspective to the study of human development during adolescence (ages 10–18 years) and emerging adulthood (ages 18–25 years). Students will gain a deeper understanding of key aspects of psychosocial functioning during these two developmental age periods. The course approaches adolescence and emerging adulthood as periods of both opportunity and vulnerability. Topics include cognitive development, love and sexuality, media, peer relationships, and risk and resilience. Class activities and assignments provide opportunities for students to actively engage with the material presented and discussed in class. Students also will have the opportunity to participate in a cross-cultural experience, culminating in a class documentary on a selected topic related to adolescent and emerging adulthood development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC249 Psychology of Sexual and Gender Diversity**

There is a wide range of variability in sexuality and gender. This course reviews psychological research on the experiences of people with various sexualities, gender identities, and gender expressions, as well as how people come to develop beliefs about sexuality and gender.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC250 Personality**

What does personality mean? Can you measure it? Who studies it and why?

This course is designed to give a deeper understanding of these questions that psychologists interested in personality study, how they study these in a scientific manner, and how they use this knowledge to help others.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

**PSYC251 Psychopathology**

This course provides an overview of psychopathology, the study of 'abnormal' behavior or mental disorders. From various theoretical perspectives, the ways

that abnormality is defined will be considered. You will learn what we know and don't know about the phenomenology, diagnosis, and causes of mental disorders. Major domains of psychopathology, the symptoms and behaviors associated with common mental disorders, and the mechanisms hypothesized to be involved with them will be covered. The ways that different paradigms steer the development and implementation of treatments will be examined. This course is not designed to help resolve personal experiences with mental illness. This class will challenge widely accepted ideas about mental illness. You will learn to think critically about how mental illness is understood by society, mental health professionals, and clinical researchers.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

**PSYC253 Educational Psychology**

This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

**PSYC259 Discovering the Person**

This course surveys major developments in psychology and psychiatry from 1860 to 1980. Through readings and lectures, the course introduces the major schools, theories, and systems in the American 'psy' sciences. We examine the kinds of persons who were 'discovered,' the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine psychological phenomena that were located, catalogued, and explained by these sciences, including irrationality, sexuality, cognitive powers, personality, emotional processes, neurotic behaviors, intelligence, addictive tendencies, and the will. Attention is also given to the scientific grounds for investigating persons, the empirical evidence sought in the century-long process of discovering and naming psychological kinds, and the modes of producing this knowledge (aggregate methods, case study, and theories). Readings include primary source documents, histories of the disciplines, and philosophical analyses.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **AMST259, SISP259**

Prereq: **PSYC105**

**PSYC260 Social Psychology**

What leads us to become attracted to one person rather than another?

How does prejudice develop, and how can it be reduced? Can psychological research help protect the environment and, if so, how? This course offers an overview of classic and contemporary social psychology, covering topics such as

group behavior, friendship, stereotyping, conformity, obedience, and conflict resolution.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC261 Cultural Psychology**

Through essays, novels, videos, and film, we will explore the intersection of culture, ideology, and psychology. We will examine how gender, ethnicity, and class are interwoven in the social fabric and individual identity. Employing feminist, psychoanalytic, and deconstructive interpretive methods, we will try to decipher the many ways we inscribe ourselves in culture.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC265 Culture in Psychology: An Introduction to Theory and Research**

Culture is central to the study of mind and behavior. This course will provide students with an introduction to theory and research on culture in psychology. We will discuss what culture is, the methods that psychologists use to study culture, and how much of our behavior is universal or culture-specific. We will explore how culture influences how we think, feel, and behave. Studies and examples from cultures around the world (e.g., Africa, Latin America, North America) will be presented.

Offering: **Host**

Grading: **OPT**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105 OR PSYC200 OR QAC201 OR ECON300**

#### **PSYC266 Psychology of Communities: Identity, Activism, and Social Engagement**

This course serves as an introduction to community psychology. Students will read about, research, and discuss major topics in the field, including the ecological framework, diversity paradigms, social change, and empowerment.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC267 Global Mental Health**

During the past half-century, mental health professionals have increasingly explored the international reach and cross-cultural relevance of their work. Practitioners have traveled from country to country in order to work with local populations, including those experiencing traumatic circumstances such as war and natural disasters. Professional organizations such as the American Psychological Association have developed guidelines and recommendations for multicultural competence. Researchers have investigated the cross-cultural epidemiology and expression of mental health challenges; for example, according to the World Health Organization, one in four people across the globe will experience a mental disorder at some point in their lives.

What does it mean to establish the global prevalence of mental disorders? Is psychological distress, including the distress that results from traumatic exposure, experienced and interpreted in the same way in all cultural contexts? While some scholars have argued that mental disorders are a global epidemic requiring a uniform, universal response, others have suggested that the exportation of psychological discourse and approaches from Western countries has eclipsed local expressions of distress and indigenous healing traditions. This course will explore these questions and controversies using the tools and

frameworks of multicultural psychology. We will place particular emphasis on the social, cultural, structural, and environmental determinants of mental health. We will address mental health disparities between high- and low-income countries, as well as the meanings of psychiatric explanatory models in advantaged and disadvantaged communities. Populations of focus will include migrants, refugees, internally displaced persons, and the urban homeless. Throughout the course, we will explore the growing research in the field of indigenous psychology, which promotes local knowledge, as well as the structural competency movement, which emphasizes the socio-institutional origins of health disparities.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC269 Health Psychology**

This course will cover how biological, psychological, and social factors interact to influence health and illness. Students will learn the theories of health behavior and how they are applied to promote positive change. Other topics will include the influence of stress on health and stress coping strategies; nutrition, obesity, and eating disorders; addiction and substance abuse; and chronic and life-threatening illnesses. Students will develop a working knowledge of the history, major theories and concepts, and practical applications of health psychology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

#### **PSYC271 Life-Span Development**

This course summarizes classic and current theory and research on human development, highlighting the life-span perspective on development and the interacting contributions of biology and environment. Commonalities and differences among ethnic groups and cultures are considered, as are the broader social contexts within which individuals develop. Implications for educational practices and social policy are also discussed.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

#### **PSYC277 Psychology and the Law**

This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature.

Identical With: **QAC201Z, GOVT201Z, NS&B280Z**

Prereq: **None**

#### **PSYC291 Language and Thought**

This course provides a close examination on the relationship between language and thought, a central question in cognitive science and a very active area of research and theory in recent years. Students will be exposed to theoretical and empirical work evaluating several prominent hypotheses about language and thought, including the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

#### **PSYC294 Developmental Tasks of Adolescence**

Based on both clinical and developmental theory, this seminar is aimed at allowing students to master the primary intellectual and emotional tasks of adolescence through reading and group experience. We will ask what it means to have successfully individuated from family and explore how this need is expressed across four developmental domains--family, friends, fertility, and future--and how these milestones are evaluated and appraised. Students

completing the course will be able to articulate why individuation and separation are essential to normal adult functioning and will also be able to develop summary statements that can be used to describe the level of functioning of an adolescent seeking therapy for a behavioral disorder.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC309 Social Stigma**

This seminar aims to introduce students to theoretical and empirical social psychological research on prejudice and social stigma. The topics covered will include examinations of why individuals stigmatize: exploring cognitive, evolutionary, self, and system justification explanations. The course will examine the effects of stigmatization for low-status groups (stereotype threat, dis-identification, compensation, and health outcomes). We will explore the role of stigma in intergroup interactions. Finally, we will explore perceptions of bias from the perspective of high-status groups (e.g., perceptions of antiwhite prejudice).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105 AND PSYC260**

#### **PSYC314 Theories in Psychology**

Theory is a central tool in psychology, directing empirical investigations and interpretations of human action. Psychology theory likewise has come to significantly guide social policy and personal understandings of human actions. This course introduces the practice of theory construction and appraisal. We will ask, What is a good psychological theory, what are its origins, and how should it be appraised? The theories to be considered include classic works from learning theory to psychoanalysis; mid-range theories such as dissonance, mass action, script, and role theory; and contemporary theories emerging in social psychology, cognitive psychology, emotion research, and neuroscience.

Gen Ed Area: **SBS-PSYC**

Identical With: **SISP314**

Prereq: **None**

#### **PSYC316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives**

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

### **PSYC320 Cognition, Learning, and Instruction in the Classroom**

This course examines learning in formal and informal educational settings (primarily K--12) through the lenses of cognitive and developmental psychology. The course is divided into units on the theoretical perspectives on learning and instruction, neuroscience and education, cognition, learning environments, and academic achievement. We start with a focus on prominent theories and principles and recent work integrating neuroscience and educational psychology, so that the applications in the classroom, such as conceptual change, problem solving, strategy development, the design and implementation of instruction, and variables influencing academic achievement are better situated. By the end of the course, students will be able to articulate the interdisciplinary contributions and connections of education, neuroscience, and psychology; critically evaluate and analyze how different theories of learning and research findings influence educational practices; understand how different aspects of thinking (e.g., memory, problem solving) and social context (e.g., schools) affect learning; appreciate the bidirectional contributions of research and educational practice to one another; and acknowledge different perspectives on some of the 'big questions' in the learning sciences.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

### **PSYC322 Psychology of Decision Making**

We make decisions all the time. The vast majority of decisions have little consequence, though some are monumental and can deeply affect our lives. The broad goal of this course is to explore the science of judgment and decision

making from a cognitive psychological perspective. This means that we will consider how the study of mental processes can inform us about how an individual person's judgments and decisions are made, characteristic patterns and biases of decision making, factors that influence decision making, and whether decision making can be improved. Themes include: What does it mean to be rational, and are humans rational decision makers? How do basic cognitive systems and their interplay underlie more complex decision behavior? What role do affect and emotion play in decision making? How can we move productively between neurobiology, cognition, and social application in thinking about the cognitive psychology of decision making? Do individuals and societies need help in improving decision making, and if so, what kind of help? Overarching goals are to understand the major questions and frameworks that have guided decision research from this perspective, to explore recent empirical studies with an eye toward how they challenge or extend past views, and to generate new research ideas, connections to other disciplines, and practical applications. Foundations of Contemporary Psychology (PSYC 105) and Cognitive Psychology (PSYC 220) are strongly recommended as prerequisites, as this is an upper-level course (that relies on student contributions) in the Psychology Department.

### **PSYC324 Culture and Denial**

Intensive research on cultural illusion using interpretive methods will be done. Books and movies about women escaping patriarchy will be our primary focus.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC261**

### **PSYC325 Healthy Places: Practice, Policy, and Population Health**

The built environment influences many aspects of health and well-being: psychological stressors (crime, noise, and violence), what people eat, the water they drink, the air they breathe, where (or if) they work, the housing that shelters them, where they go for health care, what social networks are available for support, and how political power is distributed and public resources allocated. How cities, suburbs, and rural areas are managed; local policy; and planning and design decisions can all help determine whether the places we live will be threats to public health and, perhaps more important, to an aging society. The focus of this course connects the fields of planning, psychology, and public health to explore contemporary challenges (and innovations) in the 21st-century built environment. Students will explore the multiple forces that impact population health, how to analyze these determinants, and what roles planning and public health agencies, as well as other institutions such as local governments, civil society, the private sector, and communities themselves, can play in research and action aimed at improving physical and mental health.

Prereq: **None**

### **PSYC326 The Social Self**

This course is on the social self, or better put, our social selves. It will examine how (and why) people influence one another and how this shapes perceptions, beliefs, and attitudes. We will study the ways in which we negotiate our multiple identities in our interactions with others, as well as how our identities are a function of differing social environments.

Offering: **Host**

Grading: **A-F**

Credits: **1.25**Gen Ed Area: **SBS-PSYC**Prereq: **None****PSYC327 Psychology of Conflict Resolution**

This course will focus on the psychological causes and consequences of interpersonal, intergroup, and international conflict. Topics discussed will include such issues as the role of power, status, trust, and social identity. Students will learn about various theories related to the causes of conflict, as well as practical techniques for navigating conflict, including negotiation, mediation, and facilitation. Educational programs that teach conflict-resolution skills will also be examined.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Prereq: **None****PSYC328 Current Research in Early Childhood**

Early childhood is widely seen as a time when the environment exerts particularly strong influences on individuals, with large effects on children's risk or resilience for healthy developmental outcomes. Research in this area provides a way to consider and evaluate claims about this developmental period. What knowledge does society need about this period to promote healthy development for all children? Where do children learn social skills? Why do children play with some toys but not others? How does timing affect the impact of early interventions? What foundational skills help all children learn to read? By what mechanisms does economic poverty affect development?

This advanced seminar will explore current research in early childhood. We will focus on the period from birth to five years, drawing on empirical work in developmental psychology, cognitive science, and education to discuss major topics and debates. These include cognitive and academic foundations for later schooling; emotional development and social skills; social identity and sense of self; self-regulation and executive functions; play; adverse factors in development; risk, resilience, and vulnerability; culture, socioeconomic status, and poverty; developmental neuroscience; early childhood education; and public policy. Guest visits by experts in some of the areas will complement our readings and discussions.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Prereq: **None****PSYC329 Neural Costs of War**

This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Identical With: **NS&B329**Prereq: **None****PSYC332 Seminar in Cognitive Neuroscience**

This seminar is an in-depth analysis of the ways that scientists study the neural basis of cognition in humans. Topics to be covered include the representation of

visual categories, the neural influence of attention, episodic memory, theories of spatial cognition, and decision-making. Through reading and discussion of primary research articles, we will evaluate the methods and theoretical debates in each domain, while recognizing and integrating common themes that link across the field. Students will also learn how to work with simple computer models and simulations (using Python), in order to gain a strong foundation in the computational principles that underlie recent advances in the field of cognitive neuroscience.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-PSYC**Prereq: **None****PSYC338 Masculinities**

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Identical With: **FGSS338, SISP338**Prereq: **PSYC105 OR [FGSS209 or ENGL208]****PSYC341 Psychology of Human Memory**

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Identical With: **NS&B341**Prereq: **None****PSYC342 Music Perception and Cognition**

This course provides an overview of the perceptual, cognitive, and neural bases of performing, composing, and listening to music. Topics include acoustics and biological processing of sound; theories and empirical research on pitch, rhythm, harmony, melody, timbre, and orchestration; similarities and differences between music and language; evolution and development of musical ability; and special populations in musical functions. Meetings each week will include laboratory demonstrations and exercises in experiment design and data analysis.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-PSYC**

Identical With: **NS&B342**

Prereq: **None**

### **PSYC343 Sleep and Psychosocial Functioning in Youth**

Have you ever wondered whether it's worthwhile to pull an all-nighter in hopes of improving your grades on an exam the next day? Have you ever noticed that you snack more when you're having trouble sleeping? And why is it that some individuals seem to have the most energy late at night, while others are most alert early in the morning? This course is designed to orient students to the fascinating world of sleep and psychosocial functioning. We will briefly explore the architecture of sleep and analyze theoretical explanations for the functions of sleep. The bulk of the course will focus on examining predictors and consequences of ('normal') sleep in relation to various aspects of psychosocial functioning, including mental health, interpersonal relationships, technology use, cognitive functioning, and chronotype. We will examine these associations specifically within the context of late childhood, adolescence, and emerging adulthood. As part of this course, you will have the opportunity to track your own sleep via an objective sleep monitor and keep a sleep diary for part of the course.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

### **PSYC344 The Rise of the Neurosciences**

This course examines the expansion and proliferation of the neurosciences from the early modern period to the present. We will investigate the recent claim that we are living in the midst of a 'neuro-revolution' with vast social, political, and economic consequences around the globe. Yet at the same time, we will look to the past for similar moments of transition and transformation of the modern sciences abetted by experiments on the nervous system. Students will analyze texts from Descartes to Damasio, paying attention to the rhetorical explanatory power of certain epistemic objects and instruments--samples of brain tissue, synaptic networks, clinical case histories, and MRI scans--as well as the institutional power shifts that sanctioned research practices such as vivisection, phrenology, electrophysiology, and functional imaging. Through our reading of primary sources by philosophers and physicians and secondary sources by historians and sociologists, this course will explore what is at stake in the 'neuro-turn,' and why it provokes such a mixed reaction of hope and hype, then as well as now.

### **PSYC347 Science of Suicide Risk & Prevention**

This course will explore the science of suicide research, prevention, and intervention. Topics will include terminology, epidemiology, historical and contemporary theories of suicide, ethical and methodological challenges to suicide research, risk and protective factors, empirically supported approaches to prevention and intervention, suicide in the media and popular culture, and emerging issues and controversies in the field of suicidology. In many ways, the field of suicide research is young and knowledge is rapidly changing. Special attention will be paid to novel methodological advances in clinical psychological science. The course will use books, empirical articles, class discussion, critical thinking, exams, and writing assignments to accomplish its learning objectives. This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness nor will it address assessing suicide risk among friends or family members.

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

### **PSYC348 Origins of Knowledge**

In this course we will discuss in depth a selection of current topics in cognitive development, centering on questions concerning the origins of knowledge. (What kinds of knowledge do we possess even very early in life? How does that knowledge change over time?) We will examine these questions within specific subject areas such as object perception, space perception, number understanding, and understanding of other minds, surveying evidence from different stages of human individual development as well as evidence from nonhuman species.

Identical With: **NS&B348**

Prereq: **None**

### **PSYC349 Introduction to Madness Studies**

What does it mean to be 'mad'? Are all mad people mentally ill? In recent years, just as clinical psychologists and psychiatrists have honed their technico-scientific infrastructures for studying and classifying psychopathology, a nascent academic discipline called 'madness studies' has emerged. Madness studies aims to interrogate and diversify discourse about unusual, extreme, and distressing mental states, as well as to reclaim languages about madness that are viewed as inappropriate and stigmatizing. This course explores the recent history of madness studies as an academic discipline, charting its relationship to historical shifts in mental health research and practice, as well as to related interdisciplinary arenas such as disability studies, liberation psychology, and the philosophy of psychiatry. We examine the rise of consumer, survivor, and ex-patient (C/S/X) movements, exploring differences among those who identify as having mad pride and mental illness. With particular focus on first-person accounts of lived experience, readings cover issues of epistemic and social justice in mental health discourse. Throughout the course, students attend to pluralistic ways of understanding and studying madness, including biopsychiatric, psychosocial, spiritual, and indigenous approaches.

### **PSYC352 Applied Social Psychology**

In this course you will learn about how social psychology theory is used in 'real world' applications. Topics include application of social psychology to social problems, application to practical problems in groups and organizations, and how to design and evaluate a social psychological intervention.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**Gen Ed Area: **SBS-PSYC**Prereq: **PSYC105****PSYC353 Neurobiology of Neurological Disorders**

This course aims to provide a foundation in the underlying mechanisms of neurological and psychiatric disorders. We will explore through lectures and readings of primary literature a number of important neurological and psychiatric diseases, including including schizophrenia, Alzheimer's disease, sleep disorders, anxiety disorders, and Parkinson's disease. This course focuses on the fundamental molecular and cellular mechanisms that underlie neurological disorders and is designed to engage students who wish to study basic aspects of brain function.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **NSM-NSB**Identical With: **NS&B353, BIOL353**Prereq: **[NS&B213 or BIOL213 or PSYC240]****PSYC355 Psychology of Reading**

The study of the psychology of reading encompasses many aspects of human cognition: from sensation and perception to comprehension and reasoning. This class will provide an overview of research in the psychology of reading. Topics such as word recognition, eye movements during reading, comprehension, learning to read, methods of teaching reading, the brain and reading, reading in different languages, and reading impairments in children and adults will be covered.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-PSYC**Prereq: **None****PSYC356 Neurodevelopmental Disorders**

This course aims to provide a foundation in the underlying mechanisms of neurodevelopmental disorders. We will explore through lectures and readings of primary literature a number of important neurological and psychiatric diseases, including genetic disorders such as Down syndrome, Fragile X, and Williams syndrome; spectrum disorders such as autism and fetal alcohol syndrome; ADHD, Tourettes, cerebral palsy, and some motor disorders including developmental coordination disorder, stereotypic movement disorder, sensory integration disorder, and neonatal hypoxia. This course focuses on the fundamental molecular and cellular mechanisms that underlie neurological disorders and is designed to engage students who wish to study basic cellular aspects of brain function.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-NSB**Identical With: **NS&B356, BIOL356**Prereq: **[NS&B213 or BIOL213 or PSYC240]****PSYC357 Seminar on Language and Thought**

This course is an advanced seminar on the relationship between language and thought, a central question in cognitive science and a very active area of research and theory in recent years. Students will be exposed to theoretical and empirical work evaluating the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **NSM-PSYC**Prereq: **None****PSYC359 Making the Psychological: Discovering, Manufacturing, Circulating**

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-CHUM**Identical With: **CHUM359, SISP360**Prereq: **PSYC105****PSYC361 The Psychology of Prejudice and Discrimination**

This seminar offers a social psychological analysis of different forms of prejudice and discrimination, including racism, sexism, anti-Semitism, heterosexism, and less recognized forms of bias, such as the exploitation and control of indigenous peoples, animals, and the natural environment.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Identical With: **AFAM361**Prereq: **PSYC260****PSYC363 The Dramaturgical Approach to Psychology**

The objective of this course is to explore the use of the language of theater in the illumination of psychological questions. Material for the course will be about half drama, half readings from social psychology. Among the issues to be explored are politics as theater, audience effects, role-playing as a teaching and therapeutic technique, the actor's identity problems, and general theory of the mask.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-PSYC**Prereq: **PSYC105****PSYC365 Seminar on Emotion**

This seminar aims to provide an intensive introduction to what emotions are and how they influence our relations with other people. The seminar will cover general theory on emotion as well as theory on specific emotions (e.g., anger, shame, envy, humiliation). As emotions are multicomponential processes, we will examine how the social context shapes different components of the emotion process (e.g., phenomenological experience, regulation, and expression of emotion). Moreover, we will explore how emotions operate at the individual, interpersonal, intergroup, and cultural levels of analysis.

#### **PSYC379 Advanced Research in Conceptual Development**

Students in this course work on new and ongoing research projects in the Cognitive Development Laboratory. Students will be individually matched to a research project and participate in all aspects of research including background literature review and designing, running, and analyzing experiments.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC380 Advanced Research on Attitudes**

This advanced undergraduate research course is designed to help students conduct a group research project on attitudes. Students will work in close collaboration with the instructor to design, plan, and conduct an original study on social cognition and attitudes. It will include weekly meetings to discuss relevant literature, plan the study, and evaluate progress on the project that is expected to culminate in a publication-style write-up of the results.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC381 Project-Based Programming for Research**

This project-based course will introduce students to programming in the context of research design, data visualization, and analysis of big data, focusing on the essential concepts and tools needed to carry out research and problem solving and to keep abreast of new technologies. We will survey these topics by combining scientific problems and modern programming approaches, and students will learn the fundamentals of programming required for structuring and conducting research.

Offering: **Host**

Grading: **A-F**

#### **PSYC384 Advanced Research in Cognitive Development**

This course is designed to allow advanced students to conduct a supervised group research project in cognitive development. Working with the instructor, students will conduct an experiment that seeks to answer a current question in the field of cognitive development.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

#### **PSYC386 Advanced Research in Sleep**

This advanced research course is designed to provide students with an in-depth understanding of how to critique and analyze psychological research. Specifically, we will focus on research within the field of sleep and psychosocial functioning. This seminar course takes an intensive lab-based approach. Students will have access to a comprehensive dataset that includes assessments of stress, anxiety, depression, physical activity, interpersonal relationship quality, personality, procrastination, and chronotype. Based on this data, students will be expected to commit to a semester-long project, which involves analyzing data and reporting findings on a self-selected topic. Upon completion of this course, students will have a strong working knowledge of the field of sleep and psychosocial functioning. This course also provides opportunities for students to develop analytical, writing, critical thinking, and presentation skills. Students also will gain data analytic skills using the Statistical Package for the Social Science (SPSS) program.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Prereq: **(PSYC105 AND PSYC200)**

#### **PSYC387 Advanced Research in Community Psychology**

This course is an advanced research special-topics seminar that will provide individualized training in research, managing data, and various statistical methods.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

#### **PSYC388 Advanced Research in Measurement**

In this advanced seminar on psychological measurement, students will receive individualized mentoring from the instructor on each aspect of the course, including conducting an in-depth literature review on a topic, developing a new measurement instrument, gathering and analyzing pilot data using a variety of advanced statistical methods (e.g., factor analysis, Rasch measurement, item response theory), and writing a professional paper reporting on the results and future directions.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

### **PSYC390 Experimental Investigations into Reading**

Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **NS&B390**

Prereq: **None**

### **PSYC391 Advanced Research in Cultural Phenomenology**

This seminar is designed for seniors doing theses in cultural psychology to share their ideas and for juniors who are thinking about a thesis to explore various research directions.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC261**

### **PSYC392 Behavioral Methods in Affective Neuroscience**

This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Identical With: **NS&B393**

Prereq: **None**

### **PSYC394 Advanced Research in Prejudice and Stereotyping**

This course will provide an overview of how to conduct experimental research in social psychology with a particular emphasis on prejudice and stereotyping. The course will progress through all stages of the research process, from idea generation to presentation of findings. Students will learn about a variety of current experimental measurement techniques (both explicit and implicit measures). Groups of students will design and carry out research projects, analyze data, and present findings to the class. In addition, students will complete weekly assignments on methodology and write a final research paper.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC260**

### **PSYC396 Advanced Research on Culture and Emotion**

This course offers an in-depth examination of how culture (e.g., cultural values, norms) influences the emergence, experience, expression, and social consequences of emotions. Students will work in a team on a semester-long research project on culture and emotion (e.g., envy, humiliation, shame, happiness). The course includes advanced theoretical and empirical literature. The readings and research projects will give special attention to how gender intersects with culture in emotional experience and expression. Students will also learn how to adapt methods (e.g., narrative approaches, diary studies, field experiments) and techniques (e.g., adjustment of research measures to specific cultural communities, translation) to study emotions in their cultural context.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC265 OR PSYC208 OR PSYC365 OR PSYC200 OR QAC201 OR ECON300**

### **PSYC397 Advanced Research in Clinical Psychology**

This advanced research course provides students the opportunity to conduct supervised research in clinical psychology, specifically in the area of suicide and self-injurious behaviors. Depending on the semester and student interests, tasks may include study design, data collection, clinical interviewing, data management, data analysis, and manuscript preparation. Weekly lab meetings will focus on current topics in clinical research and will include student presentations. All students will complete a research paper in journal article format. It is expected that those enrolled in this course will work independently and take initiative to extend their learning in the areas most consistent with their interests.

Note: This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness, nor will it address assessing suicide risk among friends or family members.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

### **PSYC398 Advanced Research in Auditory Cognitive Neuroscience**

This course provides in-depth training on the methods of auditory cognitive neuroscience. We will review contemporary studies in auditory cognitive neuroscience, specifically in speech, language, and music. Students will design and implement a group project, learn to analyze the data, and write up the results in an end-of-term paper.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **NS&B398**

Prereq: **None**

**PSYC399 Advanced Research in Gambling, Drugs, and Junk Food**

This advanced laboratory course provides in-depth training in the experimental methods of behavioral neuroscience of motivation and reward and provides students with hands-on experience with animal research using rodent models. The capstone of the course gives students the opportunity to carry out an independent group animal research project in the lab, which may require a slightly heavier time commitment for the duration of the experiment (typically around two weeks). Students will learn how to handle rats in a behavioral neuroscience research setting and how to design and carry out an experiment to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers. Research typically focuses on rodent models of gambling, diet-induced obesity, and drug addiction. The course also focuses on strengthening students' scientific writing and oral presentation skills.

In addition, the course contains a service learning component in which students will work to develop a brief presentation/talk on a topic related to gambling, eating disorders, or drug addiction. Students will practice their talk in class with the aim of presenting it to local middle and high school students, in order to provide more information and education about these topics and the state of current research surrounding them.

# QUANTITATIVE ANALYSIS CENTER (QAC)

## QAC150 Working with SQL and Databases

Many of you have heard of studies that analyzed Twitter messages and predicted some phenomena--spread of flu in New York, consumer confidence index, and so on. Behind the success of these studies are the systems for data storage and retrieval. A regular user can access only the latest nine days of tweets. Any study that aspires to analyze longer periods has to deal with the issues of storing the observations and retrieving them later for analysis. The goal of this course is to show you how to do that--how to connect to various types of databases and how to retrieve and update your data. We will start with relational databases; learn SQL, the language used to query and update the data; and explore the latest developments in the database field--Hadoop and MapReduce.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

## QAC151 Working with Excel and VBA

Many of us know Excel for its spreadsheets: a quick and easy way to store some information, share it, and maybe make some charts. The goal of this course is to show you the more advanced features of Excel. We will write code in Visual Basic for Applications (VBA), learn how to import data from external databases and Web-based resources, create custom menus to interact with a user, and examine how Excel can be used in business decision making.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

## QAC153 Working with Mathematica

This course introduces students to Mathematica's computing environment and all the basic features of the software. Starting with basic operations and computations, students will be introduced to graphics, visualization, and mathematical computations and will learn through a series of hands-on lab exercises to use the Mathematica programming language for modeling and data analysis. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, a basic calculus background, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC**

Prereq: **None**

## QAC154 Working with MATLAB

The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in

the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Identical With: **IDEA154**

Prereq: **None**

## QAC155 Working with Python

This course introduces students to programming, data management, and analysis with Python. Through a series of hands-on lab exercises, students learn to work with a variety of data using a high-level programming language and associated libraries to effectively manage and analyze their data. The emphasis is on data exploration and visualization and includes work with unstructured data generated by social media interactions. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

## QAC156 Working with R

This course introduces students to programming, data management, and analysis with R. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use R's programming language and associated packages to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

## QAC157 Working with SAS

This course introduces students to programming, data management, and analysis with SAS. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use SAS's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

## QAC158 Working with Stata

This course introduces students to programming, data management, and analysis with Stata. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use Stata's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

#### **QAC171 Business Modeling with Excel**

Broadly speaking, this course is about evidence-based decision-making. It is intended for students with a background in Excel and VBA who want to learn how to use spreadsheets to develop business and financial models and communicate the results. Model building is different from the usual Excel skills as it focuses more on the analytical/mathematical aspects than on data wrangling and requires some basic familiarity with economic/financial models and data analysis tools. We will start with problems where the inputs are deterministic and we must decide on optimal allocation of resources. We will then advance to problems with stochastic inputs and explore solutions either through simulation or through optimization of goal functions. Through this work we will develop the appropriate programming skills (e.g., VBA) and learn to effectively use Excel to implement our models and display the results of our analyses.

Offering: **Host**

Grading: **OPT**

Credits: **0.25**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **QAC151 AND ECON300**

#### **QAC201 Applied Data Analysis**

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

Offering: **Host**

Prereq: **None**

#### **QAC211 Digging the Digital Era: A Data Science Primer**

The course introduces students to the practice of what has come to be known as data science. Using a multidisciplinary approach and data from a variety of sources that cover any aspect of everyday life—from credit card transactions to social media interactions and Web searches—data scientists try to analyze and predict events and behavior. The first part of the course defines the area and introduces basic concepts, tools, and emerging applications. We

will describe how big data analysis affects both business practices and public policy and discuss applications in different areas/disciplines. We also discuss the ethical, legal, and privacy dimensions of big data analysis. In part two of the course, we work on data acquisition and management and introduce appropriate programming and data management tools. In part three, we concentrate on basic analytical and visualization techniques as we explore and understand the emerging patterns. Using a learning-by-doing approach in a computing laboratory, students will learn how to write computer programs in R—programming in R is a significant part of the course work—to access, organize, and analyze data through a series of small projects designed to illustrate the application of the techniques we develop for a variety of data sets and situations. Students will also engage in a semester-long project where they will access and use data from social media (Twitter) to address their own research questions.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

#### **QAC221 Modeling and Data Analysis: From Molecules to Markets**

The development of models to describe physical or social phenomena has a long history in several disciplines, including physics, chemistry, economics, and sociology. With the emergence of ubiquitous computing resources, model building is becoming increasingly important across all disciplines. This course will examine how to apply modeling and computational thinking skills to a range of problems. Using examples drawn from physics, biology, economics, and social networks, we will discuss how to create models for complex systems that are both descriptive and predictive. The course will include significant computational work. No previous programming experience is required, but a willingness to learn simple programming methods is essential.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS221, CIS231**

Prereq: **None**

#### **QAC231 Introduction to (Geo)Spatial Data Analysis and Visualization**

Geographic information systems (GIS) provide researchers, policy makers, and citizens with a powerful analytical framework for spatial pattern recognition, decision making, and data exploration. This course is designed to introduce social science and humanities students to spatial thinking through the collection, management, analysis, and visualization of geospatial data using both desktop and cloud-based spatial analysis platforms. Classes will consist of short lectures, hands-on training, group projects, critiques, and class discussions. Weekly readings and assignments will build skills and reinforce concepts introduced in class. The course will culminate in the development of a group project. Readings across multiple disciplines will allow students to comprehend the breadth of applied geospatial thinking in today's research arena. The course is part of Wesleyan's Digital and Computational Knowledge Initiative and is aimed at students with limited or no prior GIS experience.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

#### **QAC239 Proseminar: Machine Learning Methods for Text, Audio and Video Analysis**

In this course, students will learn machine learning techniques to analyze text, audio, and video data. The course consists of three parts: text analysis, audio analysis and video analysis. Each part will first introduces how these non-traditional data can be converted into mathematical objects suitable for computer processing and, particularly, for the application of machine learning

techniques. Then students will learn a selection of supervised and unsupervised learning algorithms that are effective for text, audio, image/video analysis. Finally, students will explore major applications of these techniques such as sentiment analysis, speech emotion recognition, face recognition, pedestrian detection, keyframe extraction.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-QAC**

Identical With: **CIS239**

Prereq: **COMP112 OR QAC155 OR QAC156**

#### **QAC241 Introduction to Network Analysis**

This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-QAC**

Identical With: **CIS241**

Prereq: **None**

#### **QAC250 An Introduction to Data Journalism**

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-QAC**

Identical With: **CSPL250, WRCT250**

Prereq: **None**

#### **QAC251 Data Visualization: An Introduction**

This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.

Offering: **Host**

Prereq: **None**

#### **QAC282 Economics of Big Data**

'Big data' is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly, there are opportunities and pressures to employ these techniques in other areas of the economy and society such as government, health care, and education. This course examines big-data analysis techniques and how they relate to conventional economic statistics; the effect of big data on the economy, society, and privacy; and practical methods of big-data analysis using the R statistics package.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-ECON**

Identical With: **ECON282**

Prereq: **ECON101 OR ECON110**

**QAC301 Statistics Education Practicum**

This course will serve students who are pursuing their undergraduate degree in a variety of disciplines but who want to expand their skills in statistics and applied data analysis in preparation for a future career. It will also serve students who are currently pursuing independent, quantitative research at the undergraduate or graduate level. The course will center on personal interaction in support of introductory statistics students. Active peer mentoring and supporting experiences will be based on the theory that good teachers (and learners) of statistics need to be developed, as opposed to being trained. In line with this theory, this hands-on course will provide an intensive opportunity to build specific knowledge regarding teaching and learning in the area of data-driven statistical inquiry. Students enrolled in this course will (1) attend statistics-mentoring development sessions (one hour per week); (2) provide one-on-one support for introductory statistics students during workshop-oriented class sessions (three hours per week); (3) lead small group-mentored meetings for five to six statistics students (one hour per week); and (4) monitor and critique progress on applied data assignments (one hour per week). In addition to these hands-on experiences, students will pursue a project aimed at furthering the field of statistics education. Projects may take the form of course evaluation, content/conceptual curriculum development, or translation of educational statistical software materials.

Similar to QAC380 (Introduction to Statistical Consulting), this course is aimed at providing students with an opportunity to enhance their statistical skills beyond the introductory level.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

**QAC302 Political Science by the Numbers**

This course covers the basics of probability theory and statistics. The main purpose of this course is to promote the understanding of statistical concepts and how these concepts can be used to make inferences about the political world. Topics include probability distributions, correlation analysis, linear regression, generalized linear models, maximum likelihood, logistic regression, causal inference, experiments, and non-parametric modeling. Lectures will mainly cover theory, while readings will connect the concepts described during lecture to problems in political science. Whenever possible, the instructor will draw upon research in political science to illustrate the why and how of a given concept or technique. Demonstrations will allow students to 'play around' with abstract statistical concepts. Most lectures will have an interactive component involving class participation. Problem sets will cover some of the more technical aspects of what we discuss in class along with applications using real data.

Identical With: **GOVT367**

Prereq: **None**

**QAC305 Exploratory Data Analysis and Pattern Discovery**

The course introduces the theory and practice of exploring, describing, summarizing and detecting patterns of interest in complex datasets. Various approaches including aggregation, clustering, data visualization, and latent variable modeling will be employed. This course will give students an opportunity to develop computational skills (primarily in R) and to learn how to discover and interpret relationships in unstructured observational data. The applications and examples for this course will be broad and relevant to many fields of study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **QAC211 OR ECON300 OR GOVT367**

**QAC307 Experimental Design and Causal Inference**

The course provides the foundations and statistical thinking to design, collect, and analyze experimental data and introduces appropriate techniques for observational data when causal inference is the objective of the analysis. Throughout the course, we introduce and compare various experimental designs. We will discuss sample size and power calculations as well as the advantages and disadvantages of each of these designs. With observational data, we will explore difference-in-difference models, propensity score matching techniques, regression discontinuity designs. This course gives students the opportunity to develop further their computational skills as we learn how to describe, interpret, control, and draw inferences from experimental and observational data.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Identical With: **CIS307**

Prereq: **QAC201 OR PSYC200 OR MATH132 OR ECON300**

**QAC311 Longitudinal Data Analysis**

Work across different fields, from medicine and public health to social sciences and education, often involves the collection and analysis of longitudinal data—combination of cross-sectional and time series (repeated measures for the unit of observation) data. This rich data structure provides opportunities to explore questions that could not be addressed with simpler data sets, but at the same time requires special considerations because we are analyzing observations that are not independent. The course introduces students to appropriate graphical exploration of the data and the specification and estimation of fixed and random-effects models. It also develops the basic framework for difference-in-differences models and explores their applications.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON300 OR [GOVT367 or QAC302] OR PSYC200**

**QAC312 Hierarchical Linear Models**

Research questions cannot always be explored by collecting data with independent observations. Sometimes this is due to limitations or constraints on the data collection method, and other times our questions pertain to data that are measured at both the individual and group levels (e.g., patients from different hospitals or students from different schools that belong to different districts). Hierarchical linear models (HLM), also called multi-level or mixed models, explicitly model such nested data structures and address analytical and estimation issues not accounted within the framework of the classical linear model. Using data sets from different fields of study (e.g., education, medicine, and health) students will learn to formulate multilevel research questions, estimate and critically examine HLM applications.

**QAC313 Latent Variable Analysis**

The course is an introduction to latent variable modeling. Students will learn the fundamental statistical methods for structural equation modeling (SEM), including principal component analysis, confirmatory factor analysis, path analysis, and SEM for both quantitative and binary observed variables. In addition, students will learn the basic components of SEM, such as assumptions,

testing model fit and indices of fit, testing competing models, estimation methods, and issues in model identification. Students will learn to develop structural equation models using AMOS, R, and/or Mplus statistical software.

#### **QAC314 Survival Analysis**

Survival or event history analysis focuses on modeling and analysis of time-to-event data—such as onset of a disease; duration of a strike; failure of a biological, physical, or social system; or recidivism). This course introduces students to survival and hazard functions, the analysis of censored data using parametric and non-parametric estimation methods; compares survival curves for different groups; and discusses competing risk models. The emphasis is on the applications of the different methods with the objective of broadening computational skills in R and/or SAS and to reinforce statistical writing and communication. These skills will be applied to a variety of problems in political science, public health, engineering, and medicine.

#### **QAC323 Bayesian Data Analysis: A Primer**

This course introduces the applied principles of Bayesian statistical analysis. The Bayesian paradigm is particularly appealing in research where prior research and historical data are available on parameters of interest. This course will teach students appropriate techniques for analyzing data of this nature as well as broaden computational skills in R. The course will lay the foundation for Bayesian data analysis that students can use to further develop skills in decision making.

#### **QAC344 Advanced GIS and Spatial Analyses**

A geographic information system (GIS) is a powerful database that allows for the collection, manipulation, analysis, and presentation of spatially referenced data. GIS technologies facilitate science, social science, and humanities research that uses location-based data. This course will focus on individual projects conducted within a collaborative learning framework. Each student is responsible for developing and producing a semester-long project focused on advanced spatial data analyses and/or advanced cartographic design using a GIS. Students will enter the course with an individual or small team (2-3 students) project in mind, such as a component of a senior thesis, work on a faculty member's research project, or a community-based service-learning project. Course sessions will be a mix of studio time for projects (e.g., work time, critiques), skill development (e.g., lectures, student-led skills-training sessions), and intellectual advancement (e.g., guest speakers, conference attendance).

#### **QAC356 Advanced R: Building Open-Source Tools for Data Science**

An in-depth exploration of the R programming language and development environment; from syntax and data structures, to data analysis and visualization, report writing, project management, and software development. Students will work in teams to create open-source data science applications that can be used to manage and prepare data, perform statistical analysis, and create compelling visualizations and reports. Students will also have an opportunity to contribute to a shared Wesleyan R package that contains datasets and functions that are useful for teaching introductory and advanced data science courses.

#### **QAC378 DeltaLab: Computational Media Analysis**

The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.

#### **QAC380 Introduction to Statistical Consulting**

In this course, students will be exposed to realistic statistical and scientific problems that appear in typical interactions between statisticians and researchers. The goal is for students to apply what they have learned in their basic statistics and data analysis courses to gain greater experience in the areas of research collaboration, data management and analysis, and writing and presenting reports on the results of the analyses. An important objective of the course is to help develop communication skills, both written and verbal, as well as the professional standards and interpersonal skills necessary for effective statistical consulting.

#### **QAC381 QAC Praxis Service Learning Lab**

As a service learning lab, this course provides students with an opportunity to further develop their abilities to analyze data and apply their knowledge and statistical computing skills as they work closely with nonprofit community partners on data analytic projects. Students in the course will identify research questions of interest to the community partner, gather and manage data, conduct statistical analyses, and interpret and summarize results. The service component involves providing statistical consulting to community partners by formulating and completing data analytic projects, the results of which may be used to improve services, identify areas requiring increased services and areas in which services can be made more efficient, as well as improving data collection, data reporting, and organizational functioning.

#### **QAC385 Applications of Machine Learning in Data Analysis**

The course provides a broad overview of machine learning algorithms and focuses on their application in data mining. Building on a basic background of regression analysis, and following a learning-by-doing approach, students are introduced to data mining tools and techniques that are used to identify patterns and relationships in large and complex data. While the emphasis is on intuition and application rather than theoretical results, through different case studies, students are introduced to the fundamentals of the different methods and learn how to conceptualize a problem, analyze it using appropriate tools, and communicate their results.

#### **QAC386 Quantitative Textual Analysis: Introduction to Text Mining**

We encounter computerized processing of text in almost every field of life. Google tries to infer the meaning of our search queries, online review engines try to extract information about what products are popular with the users, and across different fields scholars analyze text for insights into the processes and phenomena they study. This course will introduce you to the skills necessary to mine text for information and knowledge. You will learn how to use R to retrieve text from a variety of sources, how to use regular expressions to identify which pieces of text are useful to your study, and how to use techniques from data mining to analyze the processed text to extract information and for classification and prediction.

## RELIGION (RELI)

#### **RELI127 Catholicism and Ideology in the Hispanic World**

Catholicism has played a number of roles in the cultural politics of the Hispanic world, appearing as a place of national being, resistance, and conservatism. In this course, we will read a number of texts from different periods and national contexts with a view to understanding how writers and intellectuals from Spain, Latin America, and the U.S. engage with Catholicism and the historical conditions under which they do so.

#### **RELI151 What is Religion? Shamans, Kool-Aid, and the First Amendment**

Were the people who drank the Kool-Aid at Jonestown brainwashed, or did they die for a noble cause? How do evangelical Christians read the Bible, and does it have anything to do with their support for Trump? Can theology help us be better environmentalists? What's the relationship between gender, shamans, and Stalin? What exactly does the First Amendment protect? This class will introduce you to the ways in which we study religions by reading critical case studies about the Peoples Temple, Mongolian shamanism, Jerry Falwell, ecospirituality and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.

#### **RELI201 Introduction to the Hebrew Bible (Old Testament)**

This course approaches the Hebrew Bible within its historical context while considering its literary, philosophical, and artistic legacy. Students will be exposed to the main historical strands of biblical criticism, while also engaging with the challenges of interpreting the Bible as modern readers: How and when did the Hebrew Bible come to be, and what relevance might it hold for

us today? By beginning at the beginning and proceeding systematically through the Hebrew Bible, students will hone their skills as readers and interpreters of the Bible as a canon. Students will consider questions of the texts' function, universality, and authority, and will be encouraged to explore the wide range of biblical interpretations in literature, music, and the fine arts from antiquity to the present day.

#### **RELI203 Jews & Judaism: Race, Religion, Culture**

What is a Jew? Are Jews white? Must a Jew believe in God? What is at stake when defining someone as a Jew? Using sources ranging from the Hebrew Bible to contemporary films, this course examines various facets of Jewish life, paying special attention to contesting definitions of Jewishness as race, religion, and culture. Building on a chronological discussion of Jewish history, we will ask theoretical questions such as the relation between gender and biblical interpretation, the relevance of religious law in contemporary society, and the challenges of diasporic thinking to national sovereignty.

#### **RELI204 Judaism(s): Religion, Power, and Identity in Jewish History**

This course will offer students an intensive survey of the major currents in Jewish social, political, intellectual, and religious history, while focusing in particular on what it means to be a Jew in the 21st-century. The course explores how Jews are a culture, ethnicity, nation, nationality, race, religion, and more and how Jewishness gets constructed differently across different times and contexts. The course looks both locally and globally at the plurality of Jewish identities. Students will read primary historical texts from prominent Jewish thinkers and writers, as well as texts written about Jews by non-Jews.

#### **RELI205 Dharma, Karma, and Living with the God/dess/es: Hindu Lives**

Through fiction, autobiography, biography, art, a comic book, a city, and a village, this course explores some of the myriad understandings of what it is to be Hindu. In an effort to introduce students to Hindu culture and religion, a number of approaches shall engage the questions, What is Hindu dharma? and What is it to be Hindu? The class will also investigate the issue of 'Hinduism,' a term created in the 19th century to identify a Hindu 'religion' rejected by many 21st-century Hindus. This issue expresses just one of many arising from the Indian experience of contact with the West. Overall, the course immerses students in the lives of Hindu individuals and communities so that we, as a class, can draw our conclusions about Hindu practices and meanings in different political, mythic, social, and cultural contexts.

#### **RELI207 Buddhist Psychology in Modern Perspective**

The Buddhist tradition preserves a sophisticated model of mind and behavior in the early literature of the Pali Canon, along with a profound set of practices for transforming human experience from unhealthy to healthy states. Much of this lore is of great interest to modern psychologists, scientific researchers, and philosophers of mind, and is having an impact on a wide range of contemporary fields. This course begins with a survey of the core ideas of Buddhist psychology as they are presented in classical texts, then goes on to explore how these ideas are influencing the work of mental health professionals, cognitive scientists, social scientists, and others.

#### **RELI207F Who is the Dalai Lama? (FYS)**

This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulku) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the 15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

#### **RELI208 The Buddha: His Life and Teachings**

Few human beings have had as much impact upon the world as Siddhartha Gautama Shakyamuni, known to us as the Buddha. This course looks closely at the world he inhabited, the ways he transformed it, and the body of work left behind after a lifetime of teaching. Beginning with challenges of interpretation and literary sources, the course consists of equal parts historical and doctrinal investigation of the classical texts of the Pali Canon. We seek to get a sense of both the man behind the myth and the meaning of his message, while appreciating in the process the extent to which all such investigation is shaped by one's own cultural and historical viewpoints.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

**RELI211 Religion, Peace, and Violence: Muslim, Hindu, Christian, and Secular Politics**

Why did Martin Luther King Jr. believe that Christianity could cure American racism, while Malcolm X thought the religion promoted it? If Islam is a religion of peace as advocated by many Muslims, how do we understand the so-called Islamic State's reign of terror? How has Hindu nationalism led to violence against Muslims and Christians if Mahatma Gandhi demonstrated the essential tolerance of Hindu traditions? Secularists often claim that removing religion from politics creates a more peaceful society, yet the most violent states in the past century have been professedly secular ones.

This seminar looks to explore the complexities of present-day religions and politics by investigating specific case studies in Egypt, India, France, and the U.S. While developing a better understanding of Muslim, Christian, Hindu, and secular traditions (no background in these necessary), we will develop analytic tools to critically comprehend the political dynamics of modern religions and the religious dynamics of contemporary politics.

Offering: **Host**

**RELI212 Introduction to the New Testament**

This course invites students to engage the text of the New Testament and other early Christian writings while becoming familiar with critical issues surrounding their composition, authorship, and reception. Students will be expected to demonstrate the following: acute engagement with the New Testament as an ancient text, ability to articulate (though not necessarily to agree with) viewpoints other than one's own, an understanding of the formation of the New Testament, and an appreciation of the New Testament's history of interpretation. Issues that will also be covered in this course include the study of the historical Jesus, the canonicity of the New Testament, extra-New Testament texts, interpretive strategies, and various issues involving the New Testament and race, sexuality, slavery, and gender.

**RELI213 Refugees & Exiles: Religion in the Diaspora**

Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. That this crisis also has religious overtones is evident by the so-called travel ban in the United States or the rhetoric used by right wing leaders across Europe. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. A variety of case studies—including the contemporary refugee crises in the Middle East, the black transatlantic, and the destruction of the temple in the Hebrew Bible—will raise for us various questions: What does it mean to be violently forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? This course is a Service Learning course in cooperation with WESU 88.1 FM Middletown. Each student's final project will be a radio show based on an analysis of a selected refugee crisis. To learn more and listen to last year's shows visit <https://reli213.site.wesleyan.edu>.

**RELI214 Buddhism and the Body: Desire, Disgust, and Transcendence**

This is a course about the body and the various ways that Buddhists have constructed, disciplined, despised, and venerated the human body. We will explore the Buddhist body in its various incarnations: the disciplined monastic body of monks and nuns, the hyper-masculine body of the Buddha, the sacred corpses of saints, the body given away in sacrifice, the body as marker of virtue and vice, the sexual body, the body transformed in ritual, and the body as understood in Buddhist medicine. Careful attention to ancient and modern Buddhist writing should enrich our understanding of what it means to inhabit a human body.

**RELI216 Jesus Through Jewish Eyes**

In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

#### **RELI218 The Cosmos of Dante's Comedy**

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

#### **RELI222 Identity and Jewish Literature: Sexuality, Race, and Gender**

What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

#### **RELI224 Zen Buddhism Across East Asia: Teaching and Practice**

In this course, we will examine Zen/Chan Buddhism in history and in its contemporary practice. We will trace how Zen Buddhism sprouted from Chinese religious traditions in the Tang Dynasty (618-907), flourished in the Song Dynasty (906-1279), and then spread to other East Asian countries such as Japan and Korea. Then, we will pay attention to the ways in which Zen Buddhism found its way to modern Western society, through figures such as D. T. Suzuki and Okakura Kakuzo since the 19th century.

Course readings consist of primary sources of Zen Buddhism, which are available in English translation. A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and

as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

#### **RELI225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)**

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

#### **RELI229 Tibetan Religion**

This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as 'religion' and 'Buddhism' themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

#### **RELI230 Cinematic Encounters: Muslims and/in/of the West**

Examining contemporary films by Americans, Britons, Egyptians, Indians, Pakistanis, and Afghans offers the opportunity to challenge the simplistic binaries of West vs. Islam upon which popular representations often rely. Themes that will be explored include Muslim emigration, European imperialism and colonialism, religion and secularism in the formation of national identity, terrorism and state violence, representation of gender differences, and the problem of multiple identities. Films will include 'The Kingdom of God,' 'The Battle of Algiers,' 'Of Gods and Men,' 'Baby Doll Night,' 'The Beauty Shop of Kabul,' 'Restrepo,' 'Khuda ke Liye,' 'My Name Is Khan,' 'Babel,' 'AmericanEast,' and 'Brick Lane,' plus episodes of 'Battlestar Galactica.'

#### **RELI232 Religions of China: The Ways and Their Power**

In this course, we examine the religious worlds of China from antiquity to the present. Not only will we read key works of Chinese philosophy from the Confucian, Daoist, and Buddhist traditions, we will also investigate how these traditions find expression in art and architecture, poetry and prose, and in the lived realities of Chinese history.

In this exploration of Chinese religions, we will pay special attention to the question of what 'counts' as religion, to the role of the state in defining and establishing Chinese religions, and to the power of new religious movements to intervene dramatically (and sometimes violently) in Chinese history.

#### **RELI242 Introduction to Buddhist Thought and Practice**

This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

#### **RELI250 Islamic Movements and Modernities**

The so-called Islamic State once grabbed headlines daily with criminal acts primarily committed against other Muslims, but also against non-Muslims. Its violence overshadowed even al-Qaeda and the Taliban in media coverage. This seminar will track the development of these groups as well as the many more Islamic movements that reject violence and seek peaceful social change. Indeed, many Muslims object to the name 'Islamic State' because they recognize the group as neither Islamic nor a legitimate state. The seminar examines how specific Muslim communities in the Middle East, Europe, South Asia, and the U.S. have engaged the modern conditions of Western imperialism, nationalism, and globalization and shaped their own forms of modernity. The seminar also investigates the increasingly digital, transnational, and intercultural realms of Muslim experiences.

#### **RELI255 Heretics and Heresy**

What is religion all about? Is it fundamentally about belief, truth, or God? About understanding, revelation, or salvation? Is religion about one's origins, identity, or destiny? Is it about what one does or is supposed to do? How would we ever know? And who gets to say so? This class will explore the emergence of 'heresy'-- notions of error--in the construction of religious belief and practice in ancient Christianity, and how 'heretics' became central to the way Christianity defined itself in relation to Jewish and Greco-Roman religious traditions. We will examine these issues, in part, by reading a number of remarkable, and recently discovered 'heretical' texts from antiquity and early Christianity, including the Gospel of Thomas, the Gospel of Mary, the Gospel of Judas, the Gospel of Truth, and the Cologne Mani Codex.

#### **RELI266 Buddhism and Social Justice**

In this course students will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a uniquely Buddhist basis for social justice. Historical texts to be covered include the Dhammapada, Therigatha, Jataka Tales, and Shantideva's A Guide to the Bodhisattva's Way of Life. We will discuss major philosophical questions such as, 'how can we strive for change, while simultaneously accepting things as they are?' 'How do we respect the importance of identities while denying the existence of a self?' 'If the world will always be imperfect, why bother trying to improve social conditions?' We will then discuss contemporary applications of Buddhism for social change, and compare these with non-Buddhist approaches. Modern texts include 'Soaring and Settling' by Rita Gross, 'Freedom in Exile' by His Holiness the 14th Dalai Lama, 'Burdened Virtues' by Lisa Tessman, and 'Strength to Love' by Martin Luther King Jr.

#### **RELI270 Magical Money and Enchanted Capitalisms**

In the early days of the 20th century, Max Weber foresaw that with the rise of capitalism and modernity, the world would become increasingly disenchanted. Now, with the turn of the 21st century, people all over the world experience capitalism as a realm of enchantment. In Malaysia, ghosts possess factory workers; in South Africa, capitalism produces zombies; and in Bolivia, mines eat their miners. Instead of Weber's 'iron cage,' we live in a world of 'voodoo economics' where Korean shamans conduct ceremonies to bless new businesses, Russian psychics curse business competitors, and prosperity theology preaches that God will make you rich. This class explores the enchantment of the financial sphere, combining theory on the disenchantment of modernity (Max Weber) and commodity fetishism (Karl Marx, Sigmund Freud, William Pietz) with ethnographic accounts of how capitalism and the economy become mystified and enchanted.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**Gen Ed Area: **SBS-RELI**Prereq: **None****RELI271 Secularism: Godlessness from Luther to Lenin**

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **REES216**Prereq: **None****RELI272 Ethics After the Holocaust**

The philosopher Theodor Adorno declared, 'To write poetry after Auschwitz is barbaric.' The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **CJST272, GRST266**Prereq: **None****RELI275F Religions Resisting Modernity (FYS)**

Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of modernity.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **RL&L275F**Prereq: **None****RELI276 The Gospels and Jesus**

In this examination of the history and literature of the earliest writings about Jesus, attention will be given to the literary forms used in the composition of gospel literature, the social and religious functions of the traditions, the role of imagination in the production of gospel texts, and the diversity of interpretations of Jesus in the early church. Readings will focus on the Gospels of Matthew, Mark, Luke, John, Thomas, and 'Q.'

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **SBS-RELI**Prereq: **None****RELI278 American Jewish Humor**

This course is a look at American Jewish history through one particular lens--that of the peculiar phenomenon of Jewish humor. There is a long history of Jews and humor that has nothing to do with the immigrant experience in America, but the immigrant experience in America nonetheless has a great deal to do with the humor that has been produced by Jews in this country, particularly in the 20th century. We will read some historical background on American Jews and some humor theory as our foundation for our understanding of film viewings, short stories, stand-up comedy performances, and musical recordings. By looking at the way Jewish humor changed throughout the 20th century, we should, in the end, be able to chart the way the lives of American Jews were changing and have a deeper understanding of the American Jewish experience.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **CJST278**Prereq: **None****RELI279 Liberation Theology and Pentecostalism in the Americas and Africa**

This course tackles the question: If liberation theology advocates a preferential option for the poor, why do the poor in Africa and the Americas often choose evangelical Protestantism? For evangelical Christianity, the common good is a by-product of the righteous lives of believers as they enact the outward signs of personal salvation. This course examines both religious thought and analysis of various Christianities of the Americas and Africa, with particular attention to the ways religious thinkers and communities grapple with and resolve questions of human rights, evangelizing race, and structural inequalities that arise in the recent era of globalization and neoliberal capitalism. Other topics will include the prosperity gospel, the growth of Christian NGOs, gender and machismo, and spiritual warfare. Case studies will include readings on the U.S., Colombia, Brazil, Haiti, and Zimbabwe.

**RELI282 Religion and the Scientific Imagination**

Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the 'new atheists' so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways 'religion' and 'science' have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring 'debates' between them.

**RELI289 Indigenous Religions: Politics, Land, Healing**

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism

the question of whether or not the 'natives' have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a 'noble savage,' what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

**RELI291 From Jerusalem to Ground Zero: Muslim, Jewish, Christian, Sioux, and Hindu Notions of Sacredness**

Many Jews, Christians, and Muslims view Jerusalem as a 'sacred' place. But what does this mean? How does a place--or an object or person--become sacred, holy, revered? Is Ground Zero sacred? If so, how do we compare the destruction of an office building that makes part of Manhattan sacred and Native American efforts to protect venerated sites from 'development' that they describe as 'desecration'? Does the term 'sacred' even translate in other languages? When does a stone sculpture become an embodiment of a Hindu deity?

Using examples such as Jewish, Christian, and Muslim views of Jerusalem, Lakota Sioux recognition of revered places and wicasa wakan (medicine men), and Hindu engagements with divine images, this seminar will explore these questions.

**RELI292 Reason and Revelation: An Introduction to the Philosophy of Religion**

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, 'philosophy of religion' is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, 'divine' racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

**RELI299 Imagining Communities: National Religions and Political Rituals**

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as 'one nation under God.' How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **REES299**Prereq: **None****RELI301 Jesus and the Gods: Christianity and the Religions of Antiquity**

This course will focus on the politics and methods of comparison in order to reveal how thinkers have described the myths and practices of early Christianity as they relate to the religions of ancient Israel, Greece, and Rome. In reading carefully a wide range of ancient texts and modern scholarly discussions, we will be thinking on several levels at once. That is, we will learn about the gods and ritual practices of ancient Greece and Rome and also think critically about the agendas of the many writers--from Plato to Thomas Jefferson and beyond--who described them for their own purposes. How did Jesus of Nazareth come to be understood as a god, who dies and rises, in a world brimming with gods? Why was he remembered as a philosopher and a martyr, like Socrates? How--and with what motives--did writers throughout history compare Jesus with the priests and kings of ancient Israel or with the gods and goddesses of the Hellenistic Mystery Religions? What is the place of Demeter, Isis, and Osiris in the history of religion? How did early Christians understand their rituals of death and resurrection in terms of rebirth, salvation, and martyrdom? Considering themes and theories of piety and sacrifice, purity and prophecy, wisdom and narrative, ethics and philosophy, mythmaking and cultural critique, we will ask how the politics of comparison and classification have shaped not only our understanding of Jesus and Judaism, ancient Greece and Rome, but also the construction of 'Judaism' and 'Christianity' as religions--and the very category of religion itself.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Prereq: **None****RELI305 Pantheologies: Animal, Vegetable, Mineral, World**

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered 'matter' to be lifeless, dark, and feminine (which is to say, as different as possible from 'God.') This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over

gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the 'environment.'

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **FGSS304, SISP305**Prereq: **None****RELI307 Ritual**

Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze 'their' ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **ANTH303**Prereq: **None****RELI308 Funny, You Don't Look Jewish: Race, Gender, Sexuality, and Judaism**

This course will give advanced students the opportunity to engage deeply with critical current issues in Judaism, including race, gender, and sexuality. In both the U.S. and Israel, issues of Jewish whiteness (or not), straightness (or not), and maleness (or not) dominate conversations about the direction Judaism will take in the 21st century and how Judaism can remain relevant in an increasingly globalized and secularized world.

Students in this course will read contemporary scholarship on those who have been traditionally pushed to the margins of Judaism and will be asked to wade into murky ethical waters as they think about the power of naming and who has the authority to determine 'in' and 'out.'

#### **RELI312 Indigenous Religion and the New Age: Inspiration or Appropriation?**

Is imitation the sincerest form of flattery? This course examines the way in which indigenous religious practices, images, and ideas become appropriated into New Age religion. In *GOD IS RED*, Native American philosopher Vine Deloria Jr. argued that indigenous religion is superior to western Christianity and the Christian West has much to learn from it, but many indigenous people understandably object when their practices are copied by outsiders, decontextualized, and used to make a profit. Where is the line between respectfully learning from and disrespectfully appropriating? Why are indigenous practices so appealing to the New Age? How do New Age desires intersect with the needs and desires of contemporary indigenous practitioners, as well as national legal structures and neo-liberal economies? What are the contexts within which decontextualized indigenous practices and ideas become re-contextualized as New Age? We will read and deconstruct the classic manifesto of New Age spirituality *THE TEACHINGS OF DON JUAN*, examine the Ayahuasca patent case, and consider questions of intellectual property, cultural appropriation, and spiritual tourism.

#### **RELI314 Buddhist Traditions of Mind and Meditation**

This seminar surveys a range of Buddhist meditation practices in the context of traditional theories of mind, perception, and cognition, with an emphasis on the traditions of South Asia, East Asia, and the Himalaya. Beginning with canonical descriptions of the mind and its variety of mental states, the course will then examine early scriptural expositions on the two principal types of meditation techniques: tranquility or concentration meditation (*samatha*) and insight meditation (*vipasyana*). Next will be an examination of techniques for cultivating compassion and the view of emptiness that were central to the later Indian traditions of the Mahayana or Great Vehicle. The course will finally turn to the elaborate systems of Tantra that developed in India and spread through Tibet, which incorporate the visualization of deities and recitation of mantras. Readings will include both primary Buddhist canonical works and commentaries by contemporary Buddhist teachers in English translation as well as secondary scholarship on the historical context of Buddhist meditation systems, cognitive theory, and ritual practice.

#### **RELI315 Ethics and Action in the Buddhist Cosmos**

We often think about nirvana, or 'enlightenment,' as the ultimate goal of Buddhist practice. But the reality is much more complex. Buddhist traditions imagine a huge range of positive outcomes for moral behavior: immediate

material benefits, rebirth in a better body or in a wealthier family, and enjoyment of gold-paved heavens or eternally blissful Pure Lands.

In this seminar we will read Buddhist scriptures, commentaries, biographies, narrative anthologies, and scholarly works that trace the many ways of thinking about ethics, action, and rebirth in the vast Buddhist cosmos. We will tour Buddhist heavens and hells, Pure Lands and political dystopias, as well as the complex worlds of Buddhist modernity. Along the way we will begin to think about key issues in the study of religion: narrative and ethics, magic and material culture, cosmology and sacred presence, modernity and globalization.

#### **RELI317 Colonizing Space: Exploration, Extraction, and Inhabitation**

On March 26, 2019, Vice President Mike Pence directed NASA, under the authority of the president, to ensure that the US be the first nation to return to the moon, and to do so 'by any means necessary.' In this shocking appropriation of Malcolm X's call to black liberation, Pence announced an uncompromising endeavor to secure American sovereignty in the face of the technological advancements of China, Israel, and India—not to mention the perennial aeronautic rival of Russia. Considering the persistent underfunding of scientific research in the US, fulfilling this presidential injunction will require NASA to cooperate with private corporations like lunar minder Moon Express and Planetary Resources, along with aspirational Mars-colonizers SpaceX and Blue Planet. This course will track the ideological and colonial history of the space race before coming to terms with the scientific, corporate, and legislative landscape that enables its contemporary expression. It will explore the mythological underpinnings, narrative imaginings, and theological justifications for unfettered exploration and inhabitation in order to interrogate the possibility of an ethically and ecologically sustainable space program.

#### **RELI318 Awesome Cinema: Religion, Art, and the Unrepresentable**

How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the nonrational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason. Films will include 'Arrival,' 'Interstellar,' 'The Exorcist,' 'Jai Santoshi Maa,' 'Passion of Joan of Arc,' 'Ten Canoes,' and 'Yeelen.'

**RELI319 Zionism: A Political Theology**

This seminar examines the political theology of Zionism by focusing on the intersections of secular aspirations and theological notions embedded in the ideology and practice of the national Jewish mission.

To this end, the seminar is designed to explore the modern concept of political theology. In analyzing a range of selected primary and secondary sources, it will also bring this concept to bear on an understanding of the Zionist secular adaptations of theological concepts, such as heresy, faith, inner experience, and redemption. Finally, the seminar will focus on how this type of political-theology informed the national Jewish language, symbolism, literature, social institutions, and social and political imagination.

**RELI348 Magic, Sex, and Scholasticism: Tantric Traditions in Asia and Beyond**

The word 'tantra' conjures many images: ritual feasts on illicit substances, sexual union in the service of religious transformation, alchemical journeys, and explorations of the erotic, the terrifying, and the sublime. But what precisely did tantra look like in practice? Were the worlds of tantra imagined by marginal outcasts? Monastic elites? Or were they just the wild fantasies of Western imperialists?

In this course, we will immerse ourselves in the worlds of tantra, through scriptures, ritual manuals, and art. We will read scholarship on tantra to probe the social and philosophical contexts in which tantra thrived. Finally, we will investigate the history of Western encounters with and appropriations of tantra, from Aleister Crowley to Sting.

**RELI351 Debate and Destruction: Jews and Christians in the Middle Ages**

This course will consider relations between the Jewish minority and their Christian neighbors in England before the Jews' expulsion in 1290. We will also look at how the Jews are depicted in subsequent Christian writing. We will read texts originally written in Hebrew, French, and Latin (all in translation) as well as English, giving us a sense of the conversations that took place between two groups that were both inextricably bound together and set apart by centuries of conflict and persecution. Among the issues we will explore are the popularity of Jewish-Christian debate as a literary form, the Crusades, gender roles and gender fluidity, Jewish and Christian apocalyptic programs, and the curious afterlife of Jews in Middle English literature..

**RELI373 Religion, Science, and Empire: Crucible of a Globalized World**

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus

through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

**RELI375 Relic and Image: The Archaeology and Social History of Indian Buddhism**

This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (1st--3rd century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts and then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, pilgrimage to the sites of the Eight Great Events in the Buddha's life, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

**RELI377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse**

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? And Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or 'inflationary,' version of the big bang hypothesis in relation to the Christian doctrine of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast 'multiverse' in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies--that is, theories that posit a rebirth of the cosmos out of its fiery destruction--in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle 'decides' upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

#### **RELI391 Religion and the Social Construction of Race**

In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (1) the intersectionality of race and religion as a process in which power plays a pivotal role; and (2) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Rastafari, Haitian Vodou, Jonestown, the Christian White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

#### **RELI393 'If there is no God, then everything is permitted?' Moral Life in a Secular World**

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind 'without God and immortal life,' asking whether this means that 'all things are permitted.' Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and 'godless Soviets,' to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by 'totalitarian' regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

#### **RELI395 The Anthropology of Religion**

What do we study when we study religion? We can observe practices, record speech, examine objects and actions—but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of 'explaining away' the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

#### **RELI398 Majors Colloquium in Religious Studies**

This seminar provides an opportunity for majors to reflect even more critically upon the theories, methods, and discourses that constitute the academic study of religion. We will be concerned with current studies in history and the history

of religions, the interpretation of texts, anthropology, feminist theory, and post-colonial theory. Our task is to understand and assess how scholars of religion make critical judgments. The seminar will explore how scholars operate within disciplinary communities, choose their topics, engage interlocutors, and weigh issues of emic and etic interpretation. We will seek to identify and evaluate each scholar's principles of selection, means of description, stipulation of evidence, use of comparative categories, and methods and models of argumentation.

# ROMANCE LANGUAGES AND LITERATURES

## **RL&L122 Muslims, Jews, and Christians: Getting Along in Medieval Spain**

For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as 'convivencia.' While much of the written record is often full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why convivencia ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multiconfessional society.

## **RL&L123 Love, Sex, and Marriage in Renaissance Europe**

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

## **RL&L125 Jungle and Desert Adventures**

This course analyzes the constellation of images and sensations conjured up by the terms 'jungle' and 'desert' that are opposite but equally extreme. We will explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes. Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And finally, how do we each see ourselves in relation to landscape? What is our own version of an 'extreme' landscape?

## **RL&L126 El Greco to Picasso: Modern Art's Passion for Golden Age Spain**

This course examines the life and afterlife of the Spanish artists of the Golden Age, whose achievements reached unprecedented heights in the 17th century. Centuries later, their works took on new roles as artists of other times and cultures found their own inspiration in works of the past: Manet copied Velázquez, Picasso copied El Greco, and (famously on 'Project Runway') Christian Soriano copied Murillo. What allowed these complex works to resonate so strongly in another era? Is such influence automatically a sign of success? And why have the works of Francisco Goya inspired more filmmakers than any other artist? Students will be introduced to the reading of visual art for stylistic, historical, and political content and develop a critical understanding of art and society in Golden Age Spain, as well as insights into the role of art as a cultural currency.

**RL&L140F Van Gogh and the Myth of Genius (FYS)**

This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist's own account of his career in his paintings and prodigious correspondence. Van Gogh's extensive, insightful, and fascinating writing begs the question of how one should treat an artist's statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886--1890.

**RL&L148F Responding to Political Turmoil (FYS)**

'What just happened? What's going to happen? What do we do now?' Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--including the creation of the U.S.; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The course is both academic and project-based: as we gain perspective through academic readings and assignments on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and intended to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

**RL&L176 Days and Knights of the Round Table**

This course will study the evolution of the Arthurian legend from its origins in sixth-century Britain to its fullest development in the 13th-century French

Lancelot-Grail cycle. The course will look at the way the various developments of the legend were rooted in specific historical circumstances and yet contributed to the elaboration of a rich and complex narrative that has been appropriated in different ways by each succeeding period of Western European culture.

**RL&L201 Crossing Identities & Borders: Processing Study Abroad**

This course is designed to give students who have studied abroad through the medium of a language other than English the opportunity to process their experience by reflecting on its meaning in terms of their own personal and intellectual trajectory. Students will meet as a group once a week to discuss a reading of common interest. The second weekly meeting or workshop will be held in break-out sessions in the target language, during which time students will discuss the capstone project that this course will allow them to develop: a written essay, a digital narrative, an art installation, or a performance. The workshops are designed so that students may support each other in the pursuit of their personal goals regarding a project that reflects the broadest and deepest meaning of an immersive linguistic and intercultural experience abroad. Assessment is based on the following criteria: industry and initiative; the ability to work independently; willingness to contribute actively to a collective, project-based learning experience; and the final project. Readings will address topics such as identity, culture and mobility. Students will work to develop a collective bibliography with classmates as well as a specific bibliography that accords with their personal interests and objectives.

**RL&L203 Modern Europe**

This course surveys the history of Europe since 1815 and is intended primarily as an introduction to decisive events and interpretation of central themes. Attention will be devoted to major political, social, economic, and cultural developments, beginning with the many dimensions of the political and industrial revolutions of the 19th century; continuing with the emergence of nation-states and nationalism, working-class movements, the consequences of imperialism and the World War I, and communism and fascism; and concluding with study of the World War II, the reassertion of Europe, the collapse of the Soviet system, and contemporary issues.

**RL&L210 Medieval Art and Architecture, c. 1100-1400**

This course introduces the art and architecture of Romanesque and Gothic Europe, c. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

#### **RL&L212 Early Renaissance Art and Architecture in Italy**

This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics. Museum trip(s) will expose students to original works of art.

#### **RL&L213 Introduction to Existentialism**

This course is an introduction to existentialism. 'Existentialism' is both a philosophical tradition and a term that is central to the intellectual history of western thought. The term was explicitly adopted self-descriptively by Jean-Paul Sartre, and was widely disseminated both by his own literary and philosophical contributions and those of his intellectual interlocutors--notably Simone de Beauvoir, Maurice Merleau-Ponty, and Albert Camus. Existentialism became identified with a cultural movement that flourished in Europe in the 1940s and 1950s. In this course, we will begin by exploring the root and intellectual origins of this tradition through the work of philosophers and authors like Friedrich Nietzsche, Fyodor Dostoyevsky, and Soren Kierkegaard. We will spend a considerable time on some of this philosophical tradition's central tenets like 'freedom,' 'the absurd,' 'existence precedes essence,' 'facticity,' 'authenticity,' and 'despair.' Because existentialism also resonated widely with anti-colonial thinkers across the globe, we will end the course by reading important figures in this movement like Frantz Fanon, Richard Wright, and James Baldwin, in order to understand the ways in which existentialism gradually became an intellectual and political tool of contestation against racism and imperialism.

#### **RL&L220 Authority and Resistance: France Since 1870**

Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities,

and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the 'yellow vests' in 2018-2019.

#### **RL&L221 The Pedagogy of Second Language Teaching and Learning**

This course offers a foundation for second language (L2) acquisition in the classroom and teaching approaches. Specifically:

- characteristics of L2 learning
- an understanding of the most commonly used L2 methodologies and strategies
- basic know-how for analyzing and creating materials for language learning/teaching
- L2 teaching as a profession

Classes and readings will be in English, given that the tutorial combines students of French and Spanish. However, the development of students' target language (TL) is also considered a priority in the course, supported by looking at authentic and pedagogical materials, creating pedagogical materials of their own, and by using the language in class during volunteering hours.

This course is intended for students who, being FREN, HISP, or RMST majors or advanced learners in French or Spanish, may be considering a career in education, and who commit to volunteering at the Middletown public schools while taking this course (at the very least). There is a volunteering commitment of 2 hours/week minimum during the semester. Students must take this course concurrently with a FREN or SPAN course numbered 215 or above.

#### **RL&L223 Second Language Acquisition and Teaching**

This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting. Students of French and Spanish may also wish to enroll in RL&L 223L, a 0.5 credit service learning course in which students volunteer in the Middletown Public Schools.

**RL&L223L Second Language Pedagogy - Teaching Romance Languages**

This course is intended for students who may be considering a career in education. Readings will introduce students to key concepts in second language acquisition and pedagogy. In this service-learning course, students are required to volunteer a minimum of two hours per week in the Middletown Public Schools, assisting French, Italian, and Spanish teachers in their world language classes. Students will write weekly journal entries reflecting on their classroom experience, and will learn to evaluate, adapt, and create pedagogical materials. By the end of the semester, they will have created a portfolio of activities that can be used in a foreign language classroom. Students must have completed at least FREN 215, ITAL 221, or SPAN 221 to be eligible for the class. It is recommended that students also be enrolled in an upper-level course in the department of RLL in the same semester.

**RL&L224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance**

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

**RL&L225F Writing Biography: Denis Diderot, a Case Study (FYS)**

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence—from the archive, primary sources, secondary sources, and written shreds of a life—to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713–1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

**RL&L226 The Cosmos of Dante's Comedy**

This course provides an in-depth introduction to Dante Alighieri's 14th-century masterpiece as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. Major topics include: representations of the afterlife; the soul's relation to the divine; concepts of modernity and antiquity in the Middle Ages; notions of authorship and authority during the 13th and 14th centuries; vernacular poetics and the medieval genre system; the culture and materiality of manuscripts in the Middle Ages; gender and genre in Dante and the 12th- to 14th-century lyric; intertextuality and imitation; classical and medieval language theory; the role of the classics in the Middle Ages; Dante's concepts of governance; myth and theology in Dante's Christian poetics; and the reception to Dante's work from the 14th-century to present. The course combines a close analysis of Dante's literary strategies with exercises in critical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

**RL&L227 Desire, Deception, Disenchantment: Five French Novels in Translation and on Screen**

This course aims to study five French novels from the 17th to the 20th centuries in translation, alongside and against their respective cinematic adaptations. We will begin with Lafayette's *The Princess of Cleves* (1678), one of the Western world's first psychological novels, and then move on to Choderlos de Laclos' epistolary novel *Dangerous Liaisons* (1782). We will then read Gustave Flaubert's *Madame Bovary* (1856), Albert Camus' *The Stranger* (1942), and Marguerite Duras's *The Lover* (1984). Films will include: Jean Delannoy's 1961 adaptation of Lafayette's novel, Christophe Honoré's *The Beautiful Person* (2008), a modern-day adaptation of the story, and Rémy Sauder's 2011 documentary on how the novel is being used in a French school in Marseille; three adaptations of Laclos's novel: Roger Vadim's cutting-edge *Les Liaisons dangereuses* 1960, Miloš Forman's 1989 *Valmont*, and Stephen Frears's 1998 acclaimed *Dangerous Liaisons*; three adaptations of *Madame Bovary*: Vincent Minnelli's film (1949), Claude Chabrol's adaptation from 1991 starring Isabelle Huppert, and Sophie Barthes's version (2014); Luchino Visconti's adaptation of Camus' *The Stranger* (*Lo straniero*, 1967); and Jean-Jacques Annaud's *The Lover* (1992). These novels and their adaptations will allow us to think about notions of canon formation; genre and narrative; the uses of history in fiction; censorship, controversy, and crime; gender, class, race, and (post)colonialism; translation; and how these texts have been and continue to be read, used, adapted, and transformed from their time of publication up to the present day.

**RL&L229 Political Turmoil**

'What just happened? What's going to happen? What do we do now?' Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions—the creation of the US; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo, among others—to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold

conversations with members of our campus community who have experienced various forms of authoritarianism. The goal of the course is ultimately project-based: as we gain perspective on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and destined to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

#### **RL&L230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s**

In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of 'the children of Marx and Coca-Cola.' This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

#### **RL&L231 Mystics and Militants: Medieval Women Writers**

In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, 'courtly love,' mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

#### **RL&L232 Obscure Enigma of Desire**

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same

subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

#### **RL&L233 Modern Italy on the Silver Screen: 1960–2015**

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's *La dolce vita*, Pasolini's *Mamma Roma*, De Sica's *Matrimonio all'italiana*, Leone's *Il buono, il brutto, il cattivo*, Argento's *Suspiria*, Moretti's *Caro diario*, Ozpetek's *Saturno contro*, and Giordana's *Quando sei nato non puoi più nasconderti*. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

#### **RL&L235B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870**

This course examines the emergence of an 'ecological consciousness' in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term 'ecology' was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's 'ecological imagination' through their representations of landscapes. Known as the 'Barbizon School,' this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

**RL&L236 Don Quixote: How to Read the Ultimate Novel**

No novel is more celebrated than 'Don Quixote,' albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and 'life' or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for 'the real world' is often as nutty as the hero himself. We will read, discuss, and write about 'Don Quixote' in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

**RL&L237 Making New Worlds: Encounters in Early North America**

From the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, North America was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on a continent long inhabited by powerful Indigenous groups. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease).

**RL&L238 Liberty and Loyalty: Reconfiguring North America in the Age of Revolution, 1774-1848**

At the end of the Seven Years' War, Britain found itself in possession of a huge swath of North America peopled by French Catholics, Indigenous nations, and British American subjects. In the years that followed, British North America was

torn apart by revolution (which created the United States) and rebuilt by loyalists (who challenged the government at every turn).

This course will examine the revolution that fractured North America, the entangled development of the New Republic and the loyal British colonies, and the experiences of British subjects, American citizens, French inhabitants, and Indigenous peoples, all of whom worked to shape their environment as best they could. From political leaders to slaves, wealthy merchants to poor farmers, British monarchs to Indigenous sachems, this course will explore North America as it was understood by those who lived during a period of intense social and political upheaval.

**RL&L240 The Birth of Modern Art, 1750-1900**

This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. The story of modern art is one in which timeless ideals and triumphal narratives were continually put under pressure by the imperative to model the contingency of experience, and in which collective ideals gave way to expanded individual freedoms. Themes we will explore in this class include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution; history painting; the persistence of classical ideals and their relationship to modern subjects and experience; the new focus on sensation and the rise of landscape painting; the decline of narrative in painting in favor of form and surface; the relationship between modern art and academic practice; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience; the fragmentation of the visual arts into fine and applied arts and attempts at the end of the century to reunify them.

**RL&L241 Introduction to European Avant-Garde, 1880-1940**

This course will introduce students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

**RL&L243 Art and Culture of the Italian Baroque**

This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity

were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

#### **RL&L244 European Architecture and Urbanism, 1750-1910**

This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

#### **RL&L245 Not Just Neorealism: Italian Cinema, its History and Politics**

This introductory course on Italian cinema, taught in English, investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the 'exquisite' examples of the auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others. Additional material includes readings in film theory and criticism, Italian history, literary sources, screenplays, and interviews. For interested students with advanced competency in Italian, there will be a .50 credit (CLAC) discussion section, ITAL245/CGST245, at a time to be determined. Please see additional comments below.

#### **RL&L250 Integrative Learning Project 1: Reflecting About the Liberal Arts**

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

All sophomores, juniors and seniors are welcome in this course. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can take this course more than once, but only once per academic year.

#### **RL&L254 Breaking the Waves: The Japanese and French New Wave Cinemas and Their Legacy**

While the French and Japanese New Wave(s) existed as largely contemporaneous cinematic movements, rarely are they discussed together, instilling the impression of two parallel streams, never to converge or intersect. This course hopes to serve as an intervention into this perceived divide through close readings of these groundbreaking cinematic works and an examination of their revolutionary content in the interest of articulating shared philosophical concerns. In many cases, New Wave filmmakers worked as writers and critics before producing films themselves, a fact that speaks to the intensely theoretical nature of their cinema. This course will therefore examine critical writings published in the space of Cahiers du Cinema, Film Art, and other journals as a means of better understanding the thought process that underlies these films. How do these films figure as a response to that of the previous generation and how did they hope to revolutionize cinematic praxis? What was their relationship to political activism and the events of 1968? Finally, we will consider the legacy of these cinemas: What is the prevailing influence of the New Wave on Hollywood and global cinema? What aspects of the movement have been retained and what has been lost along the way?

#### **RL&L275F Religions Resisting Modernity (FYS)**

Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in

the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of modernity.

#### **RL&L278 European Realist Novels**

The realist novel has a strangely ambivalent legacy. On the one hand, like other literary forms, it is repeatedly consigned, dismissively, to an earlier moment in literary history: surpassed by modernism, reimagined by postmodernism, and replaced by film, television, and whatever forms of new media might presently emerge. Yet it has also clearly endured--in the popular imagination as well as in the academy--as a pervasive norm, continually setting the standard against which popular narratives may be judged to be successful and (more importantly) serious. Reading these novels, then, does not just teach about an important period in literary history (though it does that, too); it gives us a better understanding of what we continue to expect from the fictional stories that claim to represent the world around us.

We will spend the first six weeks on an overview of the influential tradition of French realism, reading representative texts by Stendhal, Balzac, and Zola. In the second half of the semester, we will delve into two longer novels that have often been regarded as exemplary (even paradigmatic) works of realist fiction: Eliot's *Middlemarch* and Tolstoy's *Anna Karenina*. While the emphasis will be on the novels themselves--what they do and how they work--we will also read a small selection of secondary texts (variously critical, historical, and theoretical) on realism, narrative, and the novel as genre.

#### **RL&L284 Comparative Politics of Western Europe**

The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian 'second republic'?

#### **RL&L300 The Arthurian Legend on Film**

This course will serve both as an introduction to the Arthurian legend and to its cinematographic representation since the 1940s. Medieval texts will be paired with films that are 'based' -- more or less closely -- on them. We will consider the ways in which these stories are told in literature and in film and the differences between them. We will also consider the ways in which the legend was used to address both medieval and modern preoccupations.

#### **RL&L325 Race and the Enlightenment: A Historical and Philosophical Enquiry**

It was during the Enlightenment Era (c. 1760-1800) that scientific reasoning, a belief in progress, and new claims on personal and political liberty swept away a tenacious medieval worldview. It was also during this era, however, that the notion of race crystalized in European and North American thought. Today, we still live with implications of this major shift, be it in classification schemes, anatomical prejudices, or ethnographical myths. This is particularly true for Africans or people of African descent. This class will bring some the Enlightenment's most prominent thinkers into dialogue with the emergency of the concept of race theory. In particular, we will focus on the clash between the Enlightenment era's belief that 'all men were created as equals' and the various ways that the Black African came to be studied within 'natural history' and various philosophical models. This historical backdrop will lead us not only to a discussion of the economic imperatives of human slavery but to a series of contemporary reflections on the status of the Enlightenment put forward by postcolonial critics. Note: This class is offered in the context of the Wesleyan's Center for the Humanities' 'Grand Narratives/Modest Proposals' theme and speakers series.

**RL&L327 Criticism and Psychoanalysis**

This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

**RL&L339 Modernism and the Total Work of Art**

The term 'total work of art' refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

**RL&L351 Deconstruction and Politics**

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

**RUSS205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel**

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

**RUSS208F Otherness & Belonging (FYS)**

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is 'I am alone, I thought, and they are everyone.' Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and 'enemies of the state' - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

Offering: **Crosslisting**

**RUSS220 Speak, Memory: The Russian Memoir**

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

Offering: **Host**

Grading: **OPT**

**RUSS223 After Communism: Animals, Avatars, Hybrids**

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--

all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

**RUSS224 Performing Russian Culture: From Peter the Great to the Russian Revolution**

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of 'Russianness.' The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

**RUSS235 Queer Russia**

Russia is accustomed to playing the role of the 'evil empire.' The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called 'gay propaganda'--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western

narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

#### **RUSS240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)**

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

#### **RUSS251 Dostoevsky**

Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

#### **RUSS252 Tolstoy**

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly

assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

#### **RUSS254 Nobel Laureates: The Politics of Literature**

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature-Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

#### **RUSS255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe**

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's RADETSKY MARCH, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I SERVED THE KING OF ENGLAND, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Milan Kundera's THE UNBEARABLE LIGHTNESS OF BEING refracts the Soviet domination of Czechoslovakia through the traumas and love affairs of a quartet of characters; in Witold Gombrowicz's TRANS-ATLANTYK and Aleksandar Hemon's THE QUESTION OF BRUNO, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

**RUSS256 The Soviet Century**

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

**RUSS260 Dostoevsky's BRAT'IA KARAMAZOVY**

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of *THE BROTHERS KARAMAZOV* in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

**RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred**

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is 'repetition with critical distance, which marks difference rather than similarity,' provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, *MAD* magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of 'restorative parody,' as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

**RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses**

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

**RUSS297 Music of Central Asia**

This course offers an introduction to the musical traditions of Central Asia, including the former Soviet republics of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Turkmenistan, and Azerbaijan, Mongolia, and the Xinjiang province of China. The musical landscape of the region will be mapped through major performance repertoires, genres, styles, and instruments in the two sociocultural realms: the nomadic world and the world of sedentary-dwellers. The roles and status of musicians, and the aesthetics and meanings of sound will be explored in relation to wider aspects of culture and social life, and the relationship between Islam and local spiritual beliefs. The dynamics of musical change and the interplay of tradition and innovation in contemporary creativity will be considered in light of the region's political history and connections with contiguous geographical areas (East, South, and West Asia, Eastern Europe), the impact of socialist policies and nation-building in post-Soviet states, and

the effects of globalization, migratory processes, and cultural revitalization initiatives.

#### **RUSS321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde**

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an 'off-modern' path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

# RUSSIAN LITERATURE IN ENGLISH (RULE)

**RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel**

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, *EUGENE ONEGIN*, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

**RULE206 A Matter of Life and Death: Fiction in the Soviet Era**

The great Russian writers of the 20th century risked their lives insisting on moral absolutes to counter Soviet doctrine. Zamyatin's *WE* inspired *BRAVE NEW WORLD* and 1984; Bulgakov's *MASTER AND MARGARITA* remained hidden for 27 years; Solzhenitsyn dared to submit *IVAN DENISOVICH* during Khrushchev's Thaw--each decade has its characteristic masterpiece. (Students who wish to read excerpts from the course readings in the original Russian should see the instructor to enroll in a 0.5 credit tutorial.)

Prereq: **None**

**RULE208F Otherness & Belonging (FYS)**

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is 'I am alone, I thought, and they are everyone.' Like him, the other protagonists of this course are outcasts,

dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and 'enemies of the state' - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

Identical With: **REES208F, RUSS208F, WLIT245F**

Prereq: **None**

**RULE220 Speak, Memory: The Russian Memoir**

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

Offering: **Crosslisting**

Grading: **OPT**

Gen Ed Area: **HA-REES**

Identical With: **RUSS220, REES220, WLIT243**

Prereq: **None**

**RULE223 After Communism: Animals, Avatars, Hybrids**

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

**RULE224 Performing Russian Culture: From Peter the Great to the Russian Revolution**

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great

and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of 'Russianness.' The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

#### **RULE235 Queer Russia**

Russia is accustomed to playing the role of the 'evil empire.' The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called 'gay propaganda'--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

#### **RULE240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)**

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building

logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

#### **RULE255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe**

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *RADETZKY MARCH*, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's *I SERVED THE KING OF ENGLAND*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Milan Kundera's *THE UNBEARABLE LIGHTNESS OF BEING* refracts the Soviet domination of Czechoslovakia through the traumas and love affairs of a quartet of characters; in Witold Gombrowicz's *TRANS-ATLANTYK* and Aleksandar Hemon's *THE QUESTION OF BRUNO*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

#### **RULE256 The Soviet Century**

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

#### **RULE267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred**

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is 'repetition with critical distance, which marks difference rather than similarity,' provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, *MAD* magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of 'restorative parody,' as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

#### **RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses**

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

**RULE321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde**

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an 'off-modern' path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

# RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES)

**REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel**

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

**REES206 A Matter of Life and Death: Fiction in the Soviet Era**

The great Russian writers of the 20th century risked their lives insisting on moral absolutes to counter Soviet doctrine. Zamyatin's *WE* inspired *BRAVE NEW WORLD* and 1984; Bulgakov's *MASTER AND MARGARITA* remained hidden for 27 years; Solzhenitsyn dared to submit *IVAN DENISOVICH* during Khrushchev's Thaw—each decade has its characteristic masterpiece. (Students who wish to read excerpts from the course readings in the original Russian should see the instructor to enroll in a 0.5 credit tutorial.)

**REES208F Otherness & Belonging (FYS)**

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is 'I am alone, I thought, and they are everyone.' Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and 'enemies of the state' - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

**REES216 Secularism: Godlessness from Luther to Lenin**

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

**REES219 Russian and Soviet History, 1881 to the Present**

Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the 'short' Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

**REES220 Speak, Memory: The Russian Memoir**

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

**REES223 After Communism: Animals, Avatars, Hybrids**

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

**REES224 Performing Russian Culture: From Peter the Great to the Russian Revolution**

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of 'Russianness.' The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

**REES225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)**

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

**REES235 Queer Russia**

Russia is accustomed to playing the role of the 'evil empire.' The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called 'gay propaganda'--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

**REES240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)**

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

Prereq: **None**

**REES252 Tolstoy**

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

**REES254 Nobel Laureates: The Politics of Literature**

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature-Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

**REES260 Dostoevsky's BRAT'IA KARAMAZOVY**

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of *THE BROTHERS KARAMAZOV* in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

#### **REES277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses**

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

#### **REES280 Russian Politics**

The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. While the focus of the course is Russia, students will also study the transition process in the other 14 states that came out of the Soviet Union. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

The course will include a role-playing simulation of Kremlin decision making that will run over several weeks.

#### **REES282 Modern Shamanism: Ecstasy and Ancestors in the New Age**

The wise and mysterious native shaman has long held a particular fascination for Western scholars of religion, but does this figure even exist? What does it mean to be a practicing shaman today? Beginning with Eliade's definition of 'archaic ecstasy,' we examine the idea of the shaman, their role in the New Age movement, and the challenges faced by contemporary indigenous shamans, from negotiating international intellectual property rights law to Ayahuasca tourism and environmental activism. Course materials are supplemented by A/V materials from the instructor's fieldwork in Siberia.

#### **REES289 Indigenous Religions: Politics, Land, Healing**

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the 'natives' have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a 'noble savage,' what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

#### **REES297 Music of Central Asia**

This course offers an introduction to the musical traditions of Central Asia, including the former Soviet republics of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Turkmenistan, and Azerbaijan, Mongolia, and the Xinjiang province of China. The musical landscape of the region will be mapped through major performance repertoires, genres, styles, and instruments in the two sociocultural realms: the nomadic world and the world of sedentary-dwellers. The roles and status of musicians, and the aesthetics and meanings of sound will be explored in relation to wider aspects of culture and social life, and the relationship between Islam and local spiritual beliefs. The dynamics of musical change and the interplay of tradition and innovation in contemporary creativity will be considered in light of the region's political history and connections with contiguous geographical areas (East, South, and West Asia, Eastern Europe), the impact of socialist policies and nation-building in post-Soviet states, and the effects of globalization, migratory processes, and cultural revitalization initiatives.

**REES299 Imagining Communities: National Religions and Political Rituals**

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadalupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as 'one nation under God.' How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

**REES318 The Politics of Death: The Living, the Dead, and the State**

This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, 'the political lives of dead bodies,' the ways in which states mobilize dead bodies to reconfigure the political order.

**REES321 Moscow/Berlin: Socialist Modernity and the Transnational Avant-Garde**

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism,

as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an 'off-modern' path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

**REES344 'If there is no God, then everything is permitted?' Moral Life in a Secular World**

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind 'without God and immortal life,' asking whether this means that 'all things are permitted.' Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and 'godless Soviets,' to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by 'totalitarian' regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

**REES353 The Communist Experience in the 20th Century**

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature,

and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

# SCIENCE IN SOCIETY PROGRAM (SISP)

**SISP109 Psychology and Technologies of the Self and Social World**

The psychological sciences are generating novel and remarkable understandings of individual minds, social interactions, groups, and institutions, and these findings are being extended to benefit individual and social welfare. As we dwell in a world increasingly understood in psychological terms and managed through psychological technologies, crucial questions warrant attention. What are the implications of adopting these new understandings of self and others? Does this new knowledge change us and, if so, how? How do we assess the consequences of this knowledge as it is implemented in social practices? These questions guide our examination of cases where psychological knowledge has informed new practices and policies. The cases include research on decision-making, integration, positive psychology, psychopharmacology, stress, and attitudes. Also considered will be instances where psychological ideas have been implemented then challenged, including psychosurgery and token economies.

**SISP113 Care and Suffering**

In this introductory course, we will explore the production and representation of human suffering, in addition to the modes of care deployed by healers, kin groups, aid workers, and state actors to alleviate the suffering of others. We will begin by mastering dominant approaches within anthropology for studying affliction. We will then examine case examples of bodies in distress. We will discover that suffering is inherently social: it is shared, socially produced, and communicated through socially learned and sanctioned means. Suffering is also social in the sense that it often begs a moral response. With that in mind,

we will turn our attention to different regimes of care--such as experimental, pharmaceutical, and humanitarian care--and explore their limitations, paradoxes, and transformative possibilities. Taken as a whole, the course will invite students to question the creation and reproduction of suffering, while at the same time critically reflecting on dominant norms and forms of 'doing good.'

As a first-year seminar (FYS), this course will also guide and support students in fostering skills as academic researchers and writers. We will start from the position that college-level academic writing is its own genre, distinct from the kind of writing typically taught in high school, and that the steps required to hone this skill are not always transparent, self-evident, or without challenges. As such, the course will include detailed instruction, regular in-class writing exercises, and three take-home writing assignments designed to introduce students to the main principles of successful academic writing.

**SISP120F Uncertainty and the Future (FYS)**

The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the 'negative' side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

**SISP121F Living within the Bio-Logical (FYS)**

How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding

beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

#### **SISP125 TechnoPrisons: Corrections, Technology, and Society**

The United States currently incarcerates more of its citizens than any other nation, and most of them are members of disadvantaged social groups. How does our government practically accomplish mass incarceration? This first-year seminar (FYS) examines prisons as technologies and the role that specific technologies play in the U.S. prison system. To say that prisons are technologies means that prisons operate as an architectural system that is designed to hold people captive within enclosed social spaces. At the same time, prisons are the location for multiple kinds of technological systems including surveillance systems, biomedical technologies, classification and administrative technologies, and military technologies. This seminar introduces basic concepts within science and technology studies (STS), criminology, and sociology to investigate how prison happens.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

#### **SISP127F War and Technology (FYS)**

In this class, we will discuss technological changes caused by war and accompanying social changes and ethical debates in both militaries and civilian societies. Topics will include technological changes in warfare and weapons, as well as the ways in which societies have responded to new injuries and health issues resulting from war. Subjects may include the development of machine guns, trench warfare, chemical warfare, nuclear warfare, drones, cyber-warfare, and surveillance technologies, in addition to the professionalization of nursing, military psychiatry, medical experimentation, environmental contamination, and disability and health issues for veterans and civilians. We will also talk about the implementation in the civilian world of technologies developed or expanded during war. We will discuss cases from across the globe, focusing chronologically on 1850 to the present. Readings may include selections from Margaret Humphreys, John Ellis, Carol Byerly, Warwick Anderson, Beth Linker, Paul Lerner, Jessica Adler, Edmund Russell, Charles Perrow, Susan Smith, Susan Lindee, Jessica Wang, Kelly Moore, Janet Abbate, Stephen Graham, and others.

#### **SISP130 Science and Technology at the Supreme Court in Current Term**

This seminar will introduce students to legal decisionmaking in the context of 'disruptive' scientific and technical innovation by considering several cases that will be taken up by the U.S. Supreme Court this term that concern science and technology. To contextualize the specific factual and legal disputes in these cases, students will learn about science, technology, and law as social institutions that shape each other and also shape their constituents and publics. The seminar will further consider the history and theory of the state monopoly on the use of force, which is what will be set into action by the enforcement of these court decisions.

Offering: **Host**

#### **SISP135F Skin, Sex, State, Software: Surveillance & Society (FYS)**

Scopophilia is the derivation of pleasure from looking. What pleasures does the surveillance state gain from looking at us? From feeling and documenting us? How do privacy activists fight back against such surveillance, and what might be wrong with privacy rights discourse? Which groups are always already surveilled? In this class, students will play with notions of surveillance—including sousveillance, lateral surveillance, and counter surveillance—as engaged by queer and feminist studies, the cultural anthropology of expertise, and social studies of science and technology. We will draw on case studies ranging from police technologies, facial recognition software, PornHub's data collection projects, TSA airport body scanners, Facebook ads, science fiction like Black Mirror, and more to understand how bodies, races, genders, and sexualities are made known and contested by activists, artists, corporations, and governments. Students will also collect data for a creative personal surveillance project culminating at the end of the quarter.

#### **SISP204 Extreme Landscapes of the Anthropocene**

The 'Anthropocene,' a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term 'Anthropocene,' questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from 'capitalist ruins' to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will

collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of 'non-judgmental attention' to their critical engagement with the Anthropocene.

#### **SISP205 Sciences as Social and Cultural Practices**

Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

#### **SISP211 Health and Social Justice**

How does health become a matter of social justice? In the context of a growing prominence of activist and advocacy groups that work toward health and justice, this course will consider: how and why health advocacy groups emerge; what goals, values, and assumptions inform their work; and how they use science and other cultural resources to make claims. We will also consider the implications of activist efforts for challenging structural inequalities, state and corporate power, and the cultural authority of science and medicine. Case studies will cover a range of geographical sites in the U.S. and abroad and represent the diverse forms that such collectives assume. We will consider, for example, groups that mobilize around broad constituencies (e.g., women's health) or in response to specific health threats (e.g., cancer, HIV, and toxic exposures), as well as those more broadly committed to social justice, equity, and 'health for all.' In addition to exploring the above questions, readings and class discussion will be designed for students to master some of the concepts and ideas central to medical anthropology, science and technology studies, and allied fields, such as embodiment, medicalization, biosociality, hegemony, citizenship, and the production of scientific and lay knowledge. The role of the scholar-activist will also be addressed, including the particular ethical and methodological questions that arise when scholars seek to combine research and activist agendas.

#### **SISP213 Calderwood Seminar in Public Writing: Science Studies in the World**

This Calderwood Seminar in Public Writing will give students practice writing about science, technology, and medical studies for general audiences. It will also function as a capstone experience for SISP majors: students will have a chance to reflect on the methodologies and theories they have learned during their time

in the program, while also using those methodologies and theories to analyze issues and texts in our world today. Students will work collaboratively, editing each other's work, and significant class time will be spent workshopping student writing. The aim will be to produce publishable pieces of cultural analysis for the popular press.

#### **SISP215 Metabolism and Technoscience**

This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

#### **SISP217 Bioethics and Social Justice**

'Health has replaced salvation,' wrote the 19th-century philosopher of medicine José Miguel Guardia. This course will examine the increasing importance that health, medicine, biotechnology, and health care systems have taken in contemporary societies. Dramatic changes in medicine allow us to prolong life and treat disease in previously unimaginable ways, even as these same changes open the door to new forms of exploitation, violence, racism, and oppression in the name of medicine itself. Our goal will be to grasp the ethical and philosophical significance of these contradictions. We will begin by examining some of the most prominent medical abuses of the 20th-century, including the Tuskegee syphilis trials and the lingering effects of eugenics and Social Darwinism. Then we will consider the mainstream response in U.S. ethics to these abuses--the creation and institutionalization of the discipline of bioethics--and the critics of this response. From there, we will reflect on the limits of the bioethics approach in light of the current global crises of health, life, and medicine. Readings will include selections from philosophical bioethics (including continental approaches, such as Canguilhem, Foucault, and Fanon), the history of medicine, the social sciences, and current journalism.

#### **SISP220 Human Nature**

The idea of 'human nature' plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals?

Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

Gen Ed Area: **SBS-PHIL**

Identical With: **PHIL220**

Prereq: **None**

#### **SISP221 History of Ecology**

The word 'ecology' has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

#### **SISP222 Disease and Epidemics in Historical Perspective**

Disease and epidemics have been powerful agents of historical change as well as determinants of human development before the advent of historical records. In this lecture course we will examine how diseases have changed human societies over time, with special attention given to the place of disease-causing organisms, from viruses to parasites, in the ecological networks they make home. Yet at the same time, we will keep in mind the ways in which human society and culture also have important causal roles in human disease. HIV, for example, arose because of human interactions with animals but reached pandemic proportions, in part, because of cultural, social, and political forces.

#### **SISP224 Critical Design Fictions**

Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to

live--expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.

#### **SISP225 Darwinian Fictions**

This class tracks the discourse surrounding evolutionary science as it circulated through various spheres of American intellectual life in the decades after the Civil War. If the ideas proposed by Charles Darwin and Herbert Spencer fundamentally changed the way scientists and politicians understood the natural world and human beings' relation to it, these ideas would also influence the way writers understood the function of literature. Best summed up by Emile Zola's suggestion that, through literature, we are capable of 'possess[ing] knowledge of man, scientific knowledge of him, in both his individual and social relations,' authors during this period began to explore the literary possibilities of evolutionary science. By reading works of literature alongside influential scientific treatises, this course encourages students to think about the kinds of knowledge literary experience gives us access to, and the relationship between literary knowledge and other disciplinary forms that emerged at the turn of the twentieth century.

Gen Ed Area: **SBS-SISP**

Prereq: **None**

#### **SISP235 Economies of Death, Geographies of Care**

Living, dying, and care work are processes often governed by economic logics that render some lives killable and others grievable in global regimes of power. This course explores how theoretical frameworks of 'economies of death' and 'geographies of care' can help to illuminate how human and nonhuman lives, deaths, and systems of care are intertwined with economic logics. Whose lives are privileged over others and with what consequences? How are certain bodies made killable and others grievable? How do we understand and face care processes of death and dying, and how are these processes often geographically determined? How do we live and die well, give and receive care, and who has this privilege? This class interrogates these and other questions related to how

we live and die with others in a multispecies world. With attention to race, gender, species, and other sites of perceived difference, students will gain a nuanced understanding of core themes related to fundamental processes of living, dying, and caring labor. This course asks students to theorize economies of death and geographies of care to understand the deeply political nature of life and death as differential moments on a continuum of being. We focus on key questions related to an affirmative politics of life—in other words, how we should live, how we care and for whom, and how we might foster nonviolent interpersonal life-affirming encounters. Students can expect to explore pressing contemporary issues such as mass incarceration and ‘social death’; climate change; valuing and commodifying life; breeding and raising nonhuman animals for food; plant consciousness; end-of-life care and euthanasia; and the role of marginalized bodies in biomedical research. The course will be primarily discussion-based.

#### **SISP236 Race, Gender, and Medicine in U.S. History**

This course will examine the intersections of race, gender, public health, and medicine in the United States, largely focusing on the 20th century. Topics will include the racialization of certain diseases, race and health care access, and the history of African Americans in health care professions and health care activism. Students will learn about the history of medicine and public health in the United States, African American history, and historical research methods. We will consider the built environment, the law, and federal and local politics as they relate to medical care in the United States. By the end of this course, you will gain further understanding of some of the major currents in the history of medicine and public health in the United States; you will make connections between race and health care experiences in the U.S.; you will be able to discuss historical research methods and appraise the values and limitations of various kinds of sources. Possible readings may include selections from Sowande' Mustakeem, Rana Hogarth, Sharla Fett, Deirdre Cooper Owens, Jim Downs, Tera Hunter, Samuel K. Roberts, Susan L. Smith, Natalia Molina, Nayan Shah, Wendy Kline, Vanessa Gamble, Jonathan Metz, Susan Reverby, Alondra Nelson, Keith Wailoo, Jennifer Nelson, and Jennifer Brier.

#### **SISP238 Witnessing Animal Others: Mourning, Haunting, and the Politics of Animal (After) Lives**

Witnessing, mourning, and haunting are frameworks that make political the lives and deaths of human and nonhuman others. Bringing these frameworks into conversation, this course will explore the following questions: What does witnessing and grieving animal lives and deaths show us about economic logics, racialization, and species hierarchies that form the foundation of contemporary social relations? How does the emotional become political in these contexts? What are the limits and possibilities of witnessing and mourning as political acts? How is witnessing distinct from spectatorship or voyeurism? What power dynamics exist in witnessing? What do different rituals or practices of mourning say about the mourner and the subject being mourned? What further action does witnessing or mourning provoke or demand? How do conceptualizations of haunting help to theorize and inform political practices of witnessing and mourning? Central to these questions is a consideration of the way histories track forward and haunt the present—how racialized, gendered, and anthropocentric histories shape contemporary social and economic relations. The course will use these theoretical frames to explore a series of

empirical examples, such as: What does it mean to witness and mourn the settler-colonial histories that haunt the present in daily practices of ranching and farming animals for food? How are settler-colonial histories implicated in the phenomenon of animals killed on roads (innocuously termed roadkill) through the development of the U.S. railroad and interstate highway system and through land use change and habitat destruction? What does witnessing the captive animal in the zoo tell us about the imperialist histories of the zoo where humans and animals have been exhibited? What does witnessing or mourning do for the ghostly specters of ‘spent’ dairy cows (lively-yet-soon-to-be-dead commodities) moving through the farmed animal auction yard and for their commodity afterlives born through slaughter and rendering? How does art act as a form of witnessing, for instance, through photographers such as Chris Jordan documenting the afterlives of plastic in the bellies of albatrosses on Midway Island? Throughout the semester, we will use art, fiction, poetry, and memoir to explore these concepts of witnessing, mourning, and haunting in the context of animal lives and deaths. The course will be heavily discussion-based.

#### **SISP240 Research Methods in Science Studies: Studying ‘On-Demand Work’ in the 21st Century**

Pocket computers, called ‘smartphones,’ have become a part of everyday life over the past decade. Earlier, during the early years of the Internet, eBay pioneered the ‘peer-to-peer’ marketplace, in which a business doesn't have a place of business and hire employees, but provides software that links ‘users’ to one another so that they can make exchanges, serving the roles of ‘customer’ and ‘employee.’ The firm that creates the software takes a commission on the sale, or simply profits from the information it gathers about the users as they make the exchange. Massive amounts of economic activity have been generated using this model: through services like Amazon's Mechanical Turk, Uber, Postmates, TaskRabbit, and many other software-based labor markets that allow people to work when they choose, as little or as much as they choose. How do we study work and workers in these kinds of contexts? This course will train students in the use of qualitative social scientific methods to examine these new working populations and the work experience of people in them. We will draw, in part, from earlier studies of mobile workplaces (such as of the police on patrol), and more recent studies undertaken by scholars of science and technology in society that help us to look for labor even where it is not intuitively evident in the digitally networked context: such as in computerized gambling, software-facilitated dating, and activity on social media. Students will read a National Science Foundation research proposal and draft their own proposal for a study of work in the ‘on demand,’ ‘contingent,’ and ‘gig’ economy of the twenty-first century.

#### **SISP245 Ethnography and Design**

Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems

involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

#### **SISP253 Science and/as Literature in Early Modern England**

Seventeenth- and 18th-century England saw the development and popularization of the 'new science.' Microscopes, telescopes, air pumps, automata, and experiments captured the popular imagination. The first important scientific societies and journals were founded, and the public learned about new discoveries through sermons and coffeehouse lectures. This course will trace the literary reaction to these cultural changes. A female natural philosopher wrote utopian science fiction, and satirists skewered mathematicians and experimenters. While the best of early 18th-century nature poetry takes Newton quite seriously as it depicts the way light glimmers off objects, by the century's end William Blake villainized Newtonian thought as reductive and deadening. We will try to understand what writers found exhilarating, scary, confusing, hilarious, or important about science at this key moment of its development. At the same time, we will read this science as literature--considering, say, Francis Bacon's symbolically fraught 'idols' and Robert Boyle's 'literary technology,' the role of poetry in spreading scientific ideas, and the importance of analogy and metaphor to the very logics that structured scientific thought. The disciplines of science and literature were not as cleanly separated in this period as they are now, and we can better understand both by exploring their intersections.

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-ENGL**

Identical With: **ENGL253**

Prereq: **None**

#### **SISP254 Science in Western Culture**

This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called 'science' and how they have attained such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have 'done science' in different times and places.

Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between science and state power by exploring the changing nature of scientific authority, the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-HIST**

Identical With: **HIST254**

Prereq: **None**

#### **SISP256 Race and Medicine in America**

This course will trace ideas of race in American medical science and its cultural contexts, from the late 19th century to the present. We will explore how

configurations of racial difference have changed over time and how medical knowledge about the body has both influenced and helped to shape social, political, and popular cultural forces. We will interrogate the idea of medical knowledge as a 'naturalizing' discourse that produces racial classifications as essential, and biologically based.

We will treat medical sources as primary documents, imagining them as but one interpretation of the meaning of racial difference, alongside alternate sources that will include political tracts, advertisements, photographs, and newspaper articles. Key concepts explored will include slavery's medical legacy, theories of racial hierarchy and evolution, the eugenics movement, 'race-specific' medications and diseases, public health politics and movements, genetics and modern 'roots' projects, immigration and new technologies of identification, and intersections of race and disability.

Identical With: **AMST256**

Prereq: **None**

#### **SISP257 Japan and the Atomic Bomb: History, Myths, and Mysteries**

Even today, when discussing the atomic bombings of Hiroshima and Nagasaki, newspaper and other media sources often refer to 'Truman's decision' to drop the bomb, the idea that these bombings conclusively brought an end to World War Two, arguments that they saved more lives than they killed, and assertions that the United States would not have dropped the bomb on Germany since its citizens were white. But what do the historical sources actually say on these and other related points? This course emphasizes the use of archival sources to address these and many other issues. It establishes the historical context for the atomic bombings of Japan by tracing events that led to the War in the first place, how civilians became the targets of mass bombings, and the scientific discoveries that made nuclear weapons possible. It also examines how after the War the American press and government strove to establish a particular perspective on the atomic bombings of Japan. By the end of this course students will have a much better idea about the historical facts, the popular myths, and remaining mysteries related to the bombings of Hiroshima and Nagasaki.

Offering: **Crosslisting**

#### **SISP259 Discovering the Person**

This course surveys major developments in psychology and psychiatry from 1860 to 1980. Through readings and lectures, the course introduces the major schools, theories, and systems in the American 'psy' sciences. We examine the kinds of persons who were 'discovered,' the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine psychological phenomena that were located, catalogued, and explained by these sciences, including irrationality, sexuality, cognitive powers, personality, emotional processes, neurotic behaviors, intelligence, addictive tendencies, and the will. Attention is also given to the scientific grounds for investigating persons, the empirical evidence sought in the century-long process of discovering and naming psychological kinds, and the modes of producing this knowledge (aggregate methods, case study, and theories). Readings include primary source documents, histories of the disciplines, and philosophical analyses.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **SBS-PSYC**

Identical With: **PSYC259, AMST259**

Prereq: **PSYC105**

### **SISP260 Bioethics and the Animal/Human Boundary**

In this course, we will explore the construction of the animal/human boundary through the lens of bioethics. We will define bioethics as the study of the ethical consideration of medical, scientific, and technological advances and their effects on living beings. At the same time, we will pay close attention to the cultural contexts in which these advances emerge, imagining the realms of scientific progress and popular culture as mutually constitutive. We will consider topics such as cloning, organ transplantation, pharmaceutical testing, and gestational surrogacy, with a focus on the late 20th and early 21st centuries.

We will begin by interrogating how ideas of the 'animal' and the 'human' are constructed through biomedical and cultural discourses. We will ask, How is the human defined? By intelligence or consciousness levels? By physical capabilities or esoteric qualities? Similarly, how has the human been defined against ideas of the animal? Or, what ethical justifications have been cited in the use of animals in biomedicine? What makes certain species 'proper' research subjects and others not? What do these formulations tell us about our valuation of animal and human life, and what kinds of relationships exist between the two? To answer these questions, we will consult a wide range of interdisciplinary scholarship, from authors in the fields of animal/ity studies, bioethics and medicine/science history, sociology, anthropology, and philosophy. Students will also be exposed to the basics of biopolitical theory.

### **SISP262 Cultural Studies of Health**

Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

### **SISP264 Social and Cultural Studies of Science**

This course provides a survey of theories and methods attending the social and cultural study of science and technology. Students will consider the role of design (such as by engineers) and use (such as by consumers), and will learn historical perspectives that frame the question of whether scientific and technological innovation, and the social and cultural configurations involved, are really 'new.'

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

### **SISP265 Anthropology of Science**

What are scientific facts? How do we know what we know? In this course, students will gain an introduction to thinking about science and technology as cultural practices shaped by power, politics, race, indigeneity, gender, and sexuality. Students will explore how anthropologists, long interested in how 'culture' works, have recently turned their gaze toward critically examining the cultures of people in positions of technoscientific power, including nuclear scientists, Wall Street analysts, drone weapon designers, climate scientists, molecular biologists, and more. Students will also be trained in conducting ethnographic fieldwork on a group of experts in their own communities in order to ask questions about scientific rituals, truth-making, and distributions of power and privilege.

Students who received credit for SISP 265---Introduction to Science as Culture may NOT enroll in this course for credit

### **SISP276 Introduction to History: Science in the Making: Thinking Historically About Science**

This course introduces students to a range of perspectives--drawn from history, sociology, anthropology, geography, media studies, and literary studies, among others--on how to write about the history of science. Throughout, the emphasis is on understanding the relationship between the histories of science we can tell and the materials that our histories draw upon, from publications and archival documents to oral histories, material culture, and film. In addition to reading academic literature, students will gain practical experience working with historical sources and conducting original research. They will also familiarize themselves with new digital tools for presenting historical materials by developing a course website that showcases their research projects.

Offering: **Crosslisting**

### **SISP281 Post-Kantian European Philosophy**

In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult

but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

#### **SISP282 Religion and the Scientific Imagination**

Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the 'new atheists' so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways 'religion' and 'science' have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring 'debates' between them.

#### **SISP283 What Is Rationality?**

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as 'the art of thinking,' to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

#### **SISP285 China as Scientific Powerhouse**

Science, technology, and medicine played an integral role in the China's transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on 'its own terms' by understanding how the unique political and social challenges of modern China shaped Chinese science.

#### **SISP286 Philosophy of Mind**

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

#### **SISP287 Science in Modernity and After: 20th-Century Science and Technology**

The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

#### **SISP296 Philosophy of Psychology**

How does the mind work? So-called 'computationalists' think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called 'mental representations') according to rules, and then issues 'commands' to guide behavior. On the other hand, the '5E' (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. 5E theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn't happen 'in a vacuum,' and it isn't separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the 5E approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

### **SISP300 Black Phoenix Rising: Death and Resurrection of Black Lives**

The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racism and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

### **SISP303 Matter, Community, Environment**

In recent years, it has become increasingly difficult to consider human communities without also considering questions of 'nature' or 'environment.' Actor-network theory condemns nature/society dualisms; ecological theory argues that there is indeed no 'nature' or 'society'—only the anthropocene; and, drawing from the former two positions, object-oriented ontology conceives of ideas (such as 'community' or 'society') as objects and ecological actors. In this seminar, we will consider various approaches taken in recent years to thinking about our relations to the worlds we inhabit. We will attempt to think not only outside a focus on 'us' as humans in the first place but even outside a focus on sentient life or life in general. Examining theories of matter, community, and environment, we will discuss and analyze work by philosophers, evolutionary biologists, literary scholars, and sociologists, among others. We will pay special attention to how theorists and critics are blurring the boundaries between nature and society, environment and community, life and matter. In addition to class participation and a series of brief reading responses, students will be required to produce a final paper dealing with any topic related to the course.

### **SISP305 Pantheologies: Animal, Vegetable, Mineral, World**

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered 'matter' to be lifeless, dark, and feminine (which is to say, as different as possible from 'God.')

This course will explore this generalized panic over pantheism—in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the 'environment.'

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable

from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

### **SISP307 The Economy of Nature and Nations**

On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek *oikos*, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the *oikos* over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the 'economy of nature,' to the design of markets for carbon credits today.

### **SISP310 Transnational Comparison of Technology Regulation in the U.S. and Europe**

A key insight of the sociological study of science is that science and technology are social and cultural as well as scientific and technical things. This relativist philosophical stance has generated a robust research program into what science and technology are in social and cultural context. This course on the social and cultural study of science and technology will teach the theory and practice of transnational comparative research, drawing both on classical and new texts in the field, and on the professor's own experience studying technology in two different national contexts (the U.S. and Denmark).

### **SISP314 Theories in Psychology**

Theory is a central tool in psychology, directing empirical investigations and interpretations of human action. Psychology theory likewise has come to significantly guide social policy and personal understandings of human actions. This course introduces the practice of theory construction and appraisal. We will ask, What is a good psychological theory, what are its origins, and how should it be appraised? The theories to be considered include classic works from learning theory to psychoanalysis; mid-range theories such as dissonance, mass action, script, and role theory; and contemporary theories emerging in social psychology, cognitive psychology, emotion research, and neuroscience.

#### **SISP315 The Health of Communities**

Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. We explore the concept and history of social medicine, the importance of vocabulary and the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at the Community Health Center (CHC) of Middletown.

#### **SISP317 Sexuality, Gender, and Science**

This course will consider how the concepts of gender and sexuality have been treated in scientific fields, focusing primarily on the 19th and 20th centuries. We will examine the history of ideas about gender and sexuality as reflected in the development of sexology, theories of homosexuality, psychology, and endocrinology. We will also discuss contraceptive and reproductive technologies, the inclusion of women in clinical trials, women in scientific professions, and recent studies that use algorithmic predictions of sex or sexual orientation. Readings may include selections from Sigmund Freud, Siobhan Somerville, Emily Martin, Sarah Igo, Laura Briggs, Ronald Bayer, Sandra Morgen, David Serlin, Allan Bérubé, Dorothy Roberts, Johanna Schoen, Jennifer Terry, Carolyn Herbst Lewis, Steven Epstein, Riley Snorton, Rebecca Jordan-Young, Mar Hicks, and Safiya Noble.

#### **SISP318 Critical Global Health**

What does it mean to approach global health as not an applied science but an ethnographic object? This course will explore this question by bringing critical, social science perspectives to bear on global health issues and interventions. This course covers three areas of scholarship. First, we will examine the processes by which social inequalities produce patterns of health and disease in globalizing contexts. This will be followed by an interrogation of the term 'global health,' in which we will trace its emergence as a discourse and enterprise and unpack its contested meanings. While some view global health as a clinical practice, others conceptualize it as a business, security concern, charitable duty, or human right; yet another camp probes the term's ideological construction. We will consider how such vantage points are underpinned by cultural assumptions and ethical agendas that, in turn, can determine how, and to whom, care is delivered. As a third area of inquiry, we will investigate the implications and unintended effects of doing global health by probing such questions as, When are good intentions not good enough? How useful is biomedicine for alleviating locally defined problems? Under what conditions does global health exacerbate the social inequalities it seeks to overcome?

#### **SISP319 Toxic Sovereignities: Life after Environmental Collapse**

What politics emerge at the borders of life and nonlife? Representations of the human species as being on the brink of environmental collapse have become increasingly common, as the specters of climate change and cataclysmic environmental disaster seem to bear down ever more heavily upon us. At the same time, the increasing entanglement of human bodies with various forms of chemical and otherwise man-made pollutants presage a slightly different future, one in which, if the human species does not outright disappear, it will be fundamentally transformed. This course explores different forms of political and social action that have emerged in response to these seemingly epochal shifts with a particular emphasis on the ever-mutating concept of sovereignty. Our goal is to explore the ways in which the shifting borders between human life and its artificially produced absence can serve as productive sites of new political forms and transformations of older ones, even as they also generate tremendous social and cultural anxiety.

#### **SISP320 Life and Death: Relations of Biopower and Necropower**

This seminar is an advanced examination of how science and technology shape the politics of life and death. We will consider how science and technology have become handmaidens to human (and, in some cases, not human) life and death, impacting the social, legal, and ethical frameworks we use to define what constitutes the embodied, relational, and conceptual space between 'alive' and 'dead.' Using theories of biopower and necropower as our guides, we will cover a diverse set of themes including sexual reproduction, birth, population, toxicity, decay, genocide, mortality, and the afterlife as they intersect with modern institutions of power. We will ask, How can we better understand the ways in which social institutions and actors deploy sciences and technologies to foster health or manufacture death?

#### **SISP321 BioFeminisms: Science, Matter, and Agency**

This course rethinks feminism's relationship to nature, the body, and biological matter in light of new considerations of ontology in science studies, cultural studies, and feminist thought. We will read contemporary treatments of science, of Darwin and evolutionary theory, of neurobiology and epigenetics, and other fields and disciplines that consider biological matter, and think about them in feminist and queer frameworks. Readings will include 'new materialists' alongside other works on the 'new biology' and the 'new sciences,' and we will also revisit some second- and third-wave feminism. The course raises issues that challenge traditional boundaries of the body and self, conventional ideas of agency, and dualisms of mind/body. Readings include works by Donna Haraway, Anne Fausto-Sterling, Elizabeth Grosz, Karen Barad, Vicki Kirby, and Elizabeth Wilson, among others.

### **SISP324 Race and the Enlightenment: A Historical and Philosophical Enquiry**

It was during the Enlightenment Era (c. 1760-1800) that scientific reasoning, a belief in progress, and new claims on personal and political liberty swept away a tenacious medieval worldview. It was also during this era, however, that the notion of race crystalized in European and North American thought. Today, we still live with implications of this major shift, be it in classification schemes, anatomical prejudices, or ethnographical myths. This is particularly true for Africans or people of African descent. This class will bring some the Enlightenment's most prominent thinkers into dialogue with the emergency of the concept of race theory. In particular, we will focus on the clash between the Enlightenment era's belief that 'all men were created as equals' and the various ways that the Black African came to be studied within 'natural history' and various philosophical models. This historical backdrop will lead us not only to a discussion of the economic imperatives of human slavery but to a series of contemporary reflections on the status of the Enlightenment put forward by postcolonial critics. Note: This class is offered in the context of the Wesleyan's Center for the Humanities' 'Grand Narratives/Modest Proposals' theme and speakers series.

### **SISP327 Colonizing Space: Exploration, Extraction, and Inhabitation**

On March 26, 2019, Vice President Mike Pence directed NASA, under the authority of the president, to ensure that the US be the first nation to return to the moon, and to do so 'by any means necessary.' In this shocking appropriation of Malcolm X's call to black liberation, Pence announced an uncompromising endeavor to secure American sovereignty in the face of the technological advancements of China, Israel, and India--not to mention the perennial aeronautic rival of Russia. Considering the persistent underfunding of scientific research in the US, fulfilling this presidential injunction will require NASA to cooperate with private corporations like lunar minder Moon Express and Planetary Resources, along with aspirational Mars-colonizers SpaceX and Blue Planet. This course will track the ideological and colonial history of the space race before coming to terms with the scientific, corporate, and legislative landscape that enables its contemporary expression. It will explore the mythological underpinnings, narrative imaginings, and theological justifications for unfettered exploration and inhabitation in order to interrogate the possibility of an ethically and ecologically sustainable space program.

### **SISP329 Waiting: Bodies, Time, Necropolitics**

This interdisciplinary course draws from social theory, gender studies, medical anthropology, disability studies and science studies to address the social stratification of time in corporeal terms. Many theorists have described the 21st century as marked by acceleration; this course addresses its counterpoint: the slow, interminable wait, the being made-to-wait, and the socially structured scenes and experiences of waiting. How can we understand waiting in the city emergency room for the mentally ill immigrant? What is it in the gender transition clinic? The polluted, toxic neighborhood? The refugee camp? We will begin by surveying multiple frameworks through which we can theorize time and its suspension. We will then focus on experiences of waiting in intersectional terms, that is, in relation to gender and sexuality, race, class, and dis/ability. We will explore how practices that produce life, health, and well-being (biopolitics)

can also be necropolitical, when attention, care, or action is given to some, but prolonged or suspended for others. Readings will include works on necropolitical theory (Georgio Agamben, Achille Mbembe), medical and state subordination and abandonment (Javier Auyero, Joao Biehl), and queer and crip time (Lee Edelman, Elizabeth Freeman, Alison Kafer). We will explore a wide range of experiences of waiting, from those related to cancer diagnosis (Sarah Jain), gender assignment surgery (Alexandre Baril), to environmental toxicity (Michelle Murphy) and asylum seeking (Jennifer Bagelman).

Prereq: **None**

### **SISP330 Race, Science, Gender, and Species**

What does it mean to be human or animal? How are these socially constructed lines drawn, redrawn, enforced, and contested? How are categorizations and contestations surrounding humanity and animality a concern for feminist scholars? How does critical theory help us to understand the (at times) uneasy intersections--or 'dangerous crossings,' as Claire Jean Kim calls them--where race, species, gender, and theories of science intersect to formulate ideas about humanity and animality? What theoretical and practical possibilities arise from exploring these overlapping taxonomies of power?

This course explores these questions, engaging in an ongoing conversation about how theories of science and law shape ideas about race, gender, and species. We will consider human and animal bodies in science and medicine. We interrogate how the human is a site of political contestation, articulated through colonial and racialized processes that render some lives human/subhuman/nonhuman within hierarchies of power and exclusion. Central to this uneven rendering of what it means to be human is the way law and legal processes criminalize and racialize human beings, and sustain anthropocentrism. Informed by these literatures, we move into exploring the possibilities and limits of posthumanism, with a particular emphasis on work that aims to decolonize posthumanist theory.

Within these theoretical frameworks, we move into thinking about the boundaries of the human/animal body; the politics of being and becoming in multispecies worlds; how fraught cultural and political cases where race and species intersect are negotiated; what the 'feral' can add to these entanglements of race, species, and gender; the intertwining logics of species, colonialism, and empire; and how different ways of being embodied can inform a politics of multispecies care. We will conclude our work together for the semester with a collectively curated selection of readings, to be determined by our seminar.

### **SISP338 Masculinities**

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

### **SISP339 Catching Glimpses: Kantian Approaches to Perceptual Experience**

The scientific revolution in Early Modern Europe exploded the venerable Aristotelean world of enduring finite substances and middle-sized dry goods into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Material objects not only harbored a hitherto unsuspected microscopic substructure, but were in fact divisible without end--pluralities of pluralities without any underlying unities. More astonishing still, this new metaphysical picture of infinitary flux was soon given a precise mathematical description in the infinitesimal calculus and proved immensely successful in accounting for empirical phenomena.

One casualty of this monumental shift was the traditional object of human sense perception--Aristotle's signet ring that would press its enduring contours into the receptive wax of the human sensorium. If there are no ultimate substances out there waiting to impress their forms upon our minds, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to reconcile the fleetingness and flux of impressions with the impression of endurance and stability?

### **SISP340 Human Nature**

The idea of 'human nature' plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

### **SISP342 Queer Robotics: Cyborgs in Science Fiction & Anthropology**

What do representations of robots and cyborgs in popular film, sci-fi literature, and cultural anthropology tell us about gender, sexuality, race, and what it means to be 'human'? In this class we will use critical race studies, queer and feminist theory, disability studies, and science and technology studies (STS) to analyze representations of 'cyborg' bodies in speculative fiction and ethnography. Our case examples explore the politics of the body through narratives of military research, artificial intelligence, sex work, urbanism and segregation, biotech research, prosthetics and athleticism, new reproductive technologies, and more. We will engage with poetry, film, visual art, and speculative fiction to explore how bodies are dreamed, crafted, and represented.

Offering: **Host**

Gen Ed Area: **SBS-SISP**

Identical With: **FGSS342**

Prereq: **None**

### **SISP343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture**

This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling. Topics examined will include: reproductive surrogacy; gender reassignment surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of 'universality' and 'particularity,' where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimagining.

### **SISP344 The Rise of the Neurosciences**

This course examines the expansion and proliferation of the neurosciences from the early modern period to the present. We will investigate the recent claim that we are living in the midst of a 'neuro-revolution' with vast social, political, and economic consequences around the globe. Yet at the same time, we will look to the past for similar moments of transition and transformation of the modern sciences abetted by experiments on the nervous system. Students will analyze texts from Descartes to Damasio, paying attention to the rhetorical explanatory power of certain epistemic objects and instruments--samples of brain tissue, synaptic networks, clinical case histories, and MRI scans--as well as the institutional power shifts that sanctioned research practices such as vivisection, phrenology, electrophysiology, and functional imaging. Through our reading of primary sources by philosophers and physicians and secondary sources by historians and sociologists, this course will explore what is at stake in the 'neuro-turn,' and why it provokes such a mixed reaction of hope and hype, then as well as now.

### **SISP352 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s**

This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role

of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's 'Civilisation' and 'Monty Python's Flying Circus' (both 1969) to Jacob Bronowski's 'The Ascent of Man' (1973) and Alistair Cooke's 'America' (1972), John Kenneth Galbraith's 'The Age of Uncertainty' (1977), and David Attenborough's 'Life on Earth' (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the 'Visual and Material Culture' module in history and major requirements for the Science in Society Program.

### **SISP353 Health, Illness, and Power in America**

In this class, we will explore the interlocking histories of health, illness, and power in America. Special attention will be paid to the ways in which discourses of the healthy body have undergirded notions of citizenship and belonging in the nation. We will consider how processes of disease, disability, and contagion have been imagined through the lenses of social difference, including race, gender, sexuality, and class. We will address civil institutions designed to manage individual and population health, and we will consider theories of political power in the making of the 'modern' body.

Sample topics covered will include immigration policies and contagious disease scares; STDs and the politics of public health campaigns; physical fitness and the value of bodily labor under capitalism; the management of diseases that are symptomatic and those that are not; race- and gender-based approaches to medicine and medical difference; clinical trials and the ethics of human experimentation; regulations surrounding blood and organ donation; changing rituals of bodily hygiene; preventative medicine and the call to personal responsibility; mental health policies and institutions; and pride movements surrounding the 'unhealthy' body.

### **SISP355 The 1918 Influenza Pandemic: A Research Seminar**

This fall is the centennial of the 1918 influenza pandemic, which swept around the globe that year and caused an estimated 40 million deaths worldwide. It caused more deaths in the 20th century than any other event except World War II. In this seminar we will examine this pandemic from multiple perspectives with the goal of defining how understanding it changed from the time it occurred to the present. In class, we will examine contemporary journalistic and scientific accounts and various secondary sources, with the goal of establishing a starting point for student research projects that will be completed over the second half of the semester. We will explore sources in Olin Special Collections, various digital archives, Middletown and Connecticut State archives, and other collections as available. Possible outcomes for the class can be a paper, documentary, exhibition, or web resource.

### **SISP357 AI, Algorithms, & Power**

This course explores artificial intelligence (AI) as a cultural, sociopolitical, and literary object. Course readings will begin with the observations of anthropologists at the post-WWII Macy Conferences on cybernetics. Students will put algorithmic data mining and machine learning in historical context, exploring classification systems and intelligence testing. Students will also examine the reanimation of the artificial human in newer discourses of AI, such as big data and predictive policing, virtual reality and drone strikes in commercial and military operations, health and assistive technology, and play and labor on platforms like Mechanical Turk. Course texts will include speculative fiction on artificial life, social theories of simulation and virtuality, and new work from queer studies and critical race studies interrogating algorithmic bias and the testing and classification of humanity.

### **SISP360 Making the Psychological: Discovering, Manufacturing, Circulating**

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

### **SISP365 Nature Description: Literature and Theory**

What happens to the world when we describe it using language? What happens to language? Do different modes of description and figurative language do different things to the world? Might we think of such modes--and the literary genres that offer them--as tools that help us approach and understand nature? And in what ways do these modes and the unexamined assumptions that structure them limit what we can see? How much can we really know about nature as it is, in itself, outside of our representational strategies? Further, how have modes of description changed over time, and what can we today learn from studying other ways of understanding how language reflects, touches, and transforms the material world?

This course will grapple with big questions about nature, language, literary form, and human minds--as well as the complex interactions between and among these. We will seek answers by attending closely to both literary and theoretical texts.

Offering: **Crosslisting**

Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL367**Prereq: **None****SISP366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences**

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in 'nature'; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **HIST367**Prereq: **None****SISP370 Disease and Health in Modern Asia**

While this course might seem highly focused and specialized at first glance, it is intended for students of all majors and backgrounds. It has two main goals. The first is to explore the influence of epidemics and diseases more broadly over the course of East Asian history while keeping a global context in mind. The focus is on China and Japan, but Korea will be included when possible. The second is to consider how historically, diseases and epidemics are best understood through multiple disciplinary approaches, including biology, epidemiology, anthropology, sociology, and iconology. Colonialism and empire--both Western and Japanese--are, of course, underlying themes throughout. We will examine several important historiographical and methodological approaches as well as some basic issues in the history of science and some important examples of specific diseases such as cholera, tuberculosis, and plague from different approaches using both secondary and primary sources.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **HIST370, CEAS272**Prereq: **None****SISP373 Religion, Science, and Empire: Crucible of a Globalized World**

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-RELI**Identical With: **RELI373**Prereq: **None****SISP374 Food Security: History of an Idea**

The Food and Agricultural Organization of the United Nations has held that 'food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life.' This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **HIST374**Prereq: **None****SISP377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse**

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or 'inflationary,' version of the big bang hypothesis in relation to the Christian doctrine of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast 'multiverse' in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies--that is, theories that posit a rebirth of the cosmos out of its fiery destruction--in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle 'decides' upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among

them, but toward pointing out their mythic and ontological genealogies and consequences.

#### **SISP381 Japan's Nuclear Disasters**

The atomic bombings of Hiroshima and Nagasaki in 1945 are central to the history of the 20th century. This course examines the scientific, cultural, and political origins of the bombs; their use in the context of aerial bombings and related issues in military history; the decisions to use them; the human cost to those on whom they were dropped; and their place in history, culture, and identity politics to the present. Sources will include works on the history of science; military, political, and cultural history; literary and other artistic interpretations; and a large number of primary source documents, mostly regarding U.S. policy questions. In addition, we will be examining the development of the civilian nuclear industry in Japan with a focus on the nuclear meltdowns in Fukushima and other accidents. This is an extremely demanding course.

This interdisciplinary, experiential, and experimental course combines studio learning (movement studies and interdisciplinary, creative exploration) and seminars (presentations and discussions). No previous dance or movement study is required, and the course is not particularly geared toward dancers or performers. However, your willingness to experiment on and share movement is important. We encourage you to think about movement as a method of accessing human experiences and making distance malleable, a way to explore your own sensations, thoughts, and reactions in learning history.

#### **SISP382 Anthropocene as Modern Grand Narrative**

The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's system, and the Earth is now moving out of its current geological epoch (the Holocene) and into 'a less biologically diverse, less forested, much warmer, and probably wetter and stormier state.' (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism vs. uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale--one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

#### **SISP384 Critical Approaches to the History of Disease and Epidemics**

Epidemic disease is as much a part of the human condition as earthquakes, droughts, floods, heat waves and other natural hazards that can result in disaster. This course will examine four cases of epidemic disease: (tentatively) cholera, tuberculosis, and AIDS. While we will definitely be asking the classic historical question 'what happened and how?' we also will be considering how different epistemological frameworks, metaphorical strategies, and historiographical assumptions have shaped past historians' understandings of these events, while exploring alternative approaches. Students will write a research paper as a final project on an epidemic disease of their choice using an approach that helps explore some little-examined dimension of that disease. Choices will not be limited to diseases caused by microorganisms, but also can include cancer, diabetes, and other diseases that arguably have reached epidemic proportions, whether past or present.

#### **SISP385 Understanding Life and Mind**

Philosophical conceptions of mind and language are now typically 'naturalistic' in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an 'internal' representation of an 'external' world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an 'extended evolutionary synthesis;' reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

#### **SISP393 Materia Medica: Drugs and Medicines in America**

This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants

will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

# SOCIOLOGY (SOC)

## SOC151 Introductory Sociology

This course is an introduction to the systematic study of the social sources and social consequences of human behavior, with emphasis on culture, social structure, socialization, institutions, group membership, social conformity, and social deviance.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **None**

## SOC202 Sociological Analysis

This course is an introduction to the major components of sociological analysis: the language of sociological inquiry, research techniques and methodology, types of explanation, and the relationship between theory and research.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

## SOC212 Sociology and Social Theory

Through close reading, discussion, and active interpretation, this course will critically examine the basic writings of classical and contemporary social theorists who have influenced the practice of sociology.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

## SOC231 Sociology of Crime and Punishment

This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the American system of mass imprisonment is effective, and how we might envision improvements and alternatives.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

## SOC234 Media and Society

This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding,

pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

## SOC240 Comparative Race and Ethnicity

This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different consequences. Through comparisons of Western and non-Western societies, we will investigate how race and ethnicity operate as markers of social exclusion in distinctive ways.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

## SOC241 Mental Illness and Society

Psychiatric disorders are commonly viewed through a purely biomedical and/or a psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private 'personal trouble,' is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **None**

## SOC244 Feminist and Queer Theories of Social Reproduction

This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary 'American' cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Identical With: **FGSS244**

Prereq: **SOC151**

**SOC245 Intersectionality and Identity**

Intersectionality has emerged as a central motif within both social analysis and political debate. We will examine the origins of this framework within black feminism and women-of-color activism, as well as the way this framework traveled to, and is used within, sociology and other disciplines. The course will also address critiques of intersectionality that have emerged within and outside of feminist theory, and extends the concept of intersectionality to think through intersections between various social identities and social institutions such as capitalism and colonialism.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Identical With: **AMST254, FGSS245**

Prereq: **SOC151 OR AMST174 OR AMST178**

**SOC246 Social Movements**

How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Identical With: **FGSS256**

Prereq: **SOC151**

**SOC247 Drugs, Culture, and Society**

This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

**SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex**

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways

have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Identical With: **FGSS255**

Prereq: **SOC151**

**SOC259 Cultural Studies of Health**

Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

**SOC260 Sound and Screen**

This course explores contemporary developments in the study of media, focusing on three primary areas--music, video games, and the Internet--that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and 'unpack' some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupation with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

### **SOC266 The Social Life of Data**

All over the world, actions, feelings, and thoughts are becoming data. Divining future desires and anxieties, promiscuous digital networks collect and collate a wide variety of everyday data, marking populations as risky or profitable. Participation in these networks is frequently mandatory in order to access a wide variety of political, social, and economic opportunities. Even if you manage to delete your account or withdraw from these networks, digital systems leave ghostly activity traces or zombie profiles waiting to come back to life. The rise of these data systems offers profound sociological and philosophical challenges to how we understand social life, power, control, memory, conscious thought, and even the nature of humanity and the environment.

This course engages with the impact of data infrastructures and digital technologies in a non-deterministic fashion, which is to say that technical systems and structures, while powerful, do not fully determine social possibility. Focusing on historical, established, and emergent data systems, we look to understand technology as a field of affordance and prohibition, with feelings, thoughts, and politics dynamically interacting with rapidly modulating standards, norms, and methods. Course themes address a variety of theoretical topics that have been central to the social study of science and technology, including the efficacy of critique in encountering information processing systems.

### **SOC269 Bad Sex**

In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, 'Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations.' Brooks is far from alone in this critique of promiscuity. What is it about 'casual encounters' and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

### **SOC270 Urban Societies**

This course is a study of the social construction of the city focused primarily on the U.S. context. It examines various themes related to the development of modern cities beginning with the consolidation of capitalism during the industrial revolution. The class will consider the distinct experience of urban life as opposed to other modes of existence, or what Louis Wirth calls 'Urbanism as a Way of Life.' In addition, students will look at forms of stratification such as race and class inequality and their relationship to spatial issues such as suburbanization and revitalization. Also considered are contemporary issues such as globalization, the revival or renewal process of many American cities, environmental issues, as well as the effect of new media on how we conceptualize the city. All of this will be done by focusing on the relationship between individual experiences and the effect of the urban environment on issues of identity construction and interpersonal relations. In order to develop critical thinking and engagement around these urban issues, the course

emphasizes weekly writings and class participation in development towards a final paper.

### **SOC284 Memory and Violence**

This course offers historical, theoretical, and empirical perspectives to the study of personal and collective violence and memory. We will examine the intersections of biography, history, and memory in reference to traumatic events, ranging from personal abuse to mass atrocity. The course focuses on issues around memory--from memorialization and truth commissions to memoir and PTSD--in the aftermath of various types of violence. The central questions about the nature and politics of memory following traumatic events will entail conversations about the construction of personal and collective identities and the complexities of justice and healing.

### **SOC292 Death and Dying at the End of the World**

Death looms large over life. The digital has given people unprecedented access to global media focused on death and dying, from far-flung calamities killing thousands to intimate gofundme pages for your friends' cancer treatments. In an age of data-enabled prediction and preemption, death is capricious and untimely, remaining stubbornly resistant to scientific and philosophical certainty, despite ever more complex systems for death management. Meanwhile, circulating discourses of ecological and political catastrophe have proliferated thoughts of genocide, extinction, and planetary death. In this course, we look at contemporary encounters with death and dying at a variety of scales, from the search for death's meaning/a meaningful death, to understanding death as a public feeling and inspiration for political imagination.

### **SOC299 The Future Perfect**

Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what

it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151 AND SOC212**

### **SOC300 Queer and Trans Aesthetics**

The seminar aims to develop intersectional frameworks for analyzing the artistic production of five artists who will be participating in a Trans\*Revolutions symposium at the Center for the Humanities this spring: Tourmaline (film); Vick Quezada (photography, sculpture, film, and performance); Elliot Montague (film); Texas Isaiah (photography); and Emma Frankland (performance). We will also contextualize their work in relation to other artists, such as Ana Mendieta; Rotimi Fani-Kayode; Elle Pérez; Sandie Yi; Isaac Julien; Vaginal Davis; Kent Monkman; Martine Gutierrez; Felix Gonzalez-Torres; Juliana Huxtable; Laura Aguilar; Untitled Queen; and Wu Tsang. For the primary assignment, students will have two options: 1) a research paper on one or more of the participating artists or another relevant artist; or, 2) a creative project (e.g., artwork, performance, poetry) in dialogue with the seminar's topics. Students also will have the opportunity to engage the symposium's featured artists during their visit.

Prereq: **SOC151**

### **SOC308 Baby Got Back: Embodiment, Gender, and Sexuality in Black Music**

This multimedia course uses a sociocultural approach to explore how black bodies continue to be sized, classed, sexed, and gendered through black musical expression. We will examine black music as a cultural object, both embedded in

and responsible for steering national cultures, to argue that black music is indeed a lens through which to examine the struggles, contradictions, and triumphs of black peoples in the U.S. and abroad. Connecting theoretical frameworks of race, embodiment, socioeconomic status, gender, and sexuality with: (1) visual cultures of black bodies in motion (stemming from minstrelsy and chitlin' circuits to musicals and music videos) and (2) a variety of songs written, produced, and/or performed by black musicians (that include but are not limited to: the blues, jazz, rock and roll, rhythm & blues, soul, afrobeat, hip hop, dancehall, pop, soca, hip life, and reggaeton), this class will seek to interrogate how black music creates, replicates, regulates, packages, and distributes identity through a paradigm of production and consumption. We will discuss topics such as commodification, resistance, and representation while listening to artists such as Nina Simone, Sir Mix-A-Lot, Las Crudas, former 2 Live Crew member Luke, Biggie Smalls, Mr. Killa, De La Soul, Lil' Kim, Outkast, Jill Scott, Ayisoba, Big Freedia, Alison Hinds, Nicki Minaj, and Fela Kuti to attempt to understand exactly what type of power (and magic) that music possesses.

### **SOC309 America's Lure: The Politics of the Transnational US University**

Over the course of the last decade the number of international students traveling to the United States has more than doubled. As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the 'lure' of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university.

### **SOC313 Time, Masks, Mirrors: Aging in America**

Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the socio-cultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the 'aging' mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **None**

### **SOC315 The Health of Communities**

Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining

the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. We explore the concept and history of social medicine, the importance of vocabulary and the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at the Community Health Center (CHC) of Middletown.

### **SOC319 Theories of Capitalism**

Capitalism has profoundly shaped world history, acting as one of the primary drivers of social change, and working to shape a tremendous variety of social institutions ranging from colonialism to our sense of time. This course takes a critical approach to the study of capitalism, looking at the ways capitalism has intersected with and transformed the nature of social oppression (particularly in relation to nation, race, gender, and sexuality), as well as the ways it works to shape everyday consciousness. Historical changes within capitalism will be explored, considering particularly the rise of corporate capitalism and of contemporary neoliberalism. We will examine a wide variety of theoretical approaches to capitalism, taking Marx's thought as a jumping-off point for elaboration and critique. We will conclude by considering alternatives to capitalism that have been proposed in both historical and contemporary contexts, together with an examination of practical efforts to implement these possibilities.

### **SOC320 Life and Death: Relations of Biopower and Necropower**

This seminar is an advanced examination of how science and technology shape the politics of life and death. We will consider how science and technology have become handmaidens to human (and, in some cases, not human) life and death, impacting the social, legal, and ethical frameworks we use to define what constitutes the embodied, relational, and conceptual space between 'alive' and 'dead.' Using theories of biopower and necropower as our guides, we will cover a diverse set of themes including sexual reproduction, birth, population, toxicity, decay, genocide, mortality, and the afterlife as they intersect with modern institutions of power. We will ask, How can we better understand the ways in

which social institutions and actors deploy sciences and technologies to foster health or manufacture death?

### **SOC321 Disgusting? Revolting!**

Who or what do we find utterly repugnant? Are we the nasty, vile ones? Is it possible that we are unconsciously attracted to that which disgusts us? What might it take to turn disgust into desire, and vice versa? In what ways might disgust indicate not only disruption or transgression, but some kind of threat and alternative to the status quo? What might be lost or gained when the disgusting clean up their acts, or are shown to have been respectable all along? In this course we will explore the politics of filth, particularly in terms of the desires, attitudes, identities, and behaviors that elicit disgust. We will consider how disgust infuses political ideology--i.e., how people understand and approach the social groups that disgust them (for example, racialized immigrants, queers, fat people, and drug addicts), but also the wealthy, the privileged, the 'basket of deplorables.' We will also explore the psychoanalytic relation of disgust to desire.

Offering: **Crosslisting**

Prereq: **None**

### **SOC322 The Sociology of Nina Simone**

An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as 'Mississippi Goddam' and 'To Be Young, Gifted and Black' undoubtedly made social, cultural, and political contributions to American society. However, much of Simone's personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone's career, but ignited her passion to speak truth to power; and utilize cultural and sociological paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

### **SOC323 'Racing' Across Africa**

Is Africa post-racial? Have you wondered how someone becomes Black/ African, white, ethnic, and/or native and its implicit hierarchies, which scholars refer to as racialization? When you think about race and racism, does Post-Independence (PI) Africa come to mind? If not, why is PI Africa removed from our understanding of race? How can we think about Africa today as always undergoing processes of racial imperialism and how does it intersect with

sexuality, gender, and class? Lastly, how do we conceptualize Post-Independence Africa in relation to the African diaspora?

We will go from Ghana to Kenya, Nigeria to South Africa, to understand how race is articulated in these spaces during colonization and after formal colonization has ended. We will also gain theoretical language needed to refute raceless logic. These processes will help us recognize why PI Africa is perpetually marginalized within a globally racialized capitalist economy. This course will contribute to thinking about forms of solidarity in our own lives toward visions of decoloniality, equity, and justice for those racialized as Black, especially in Africa.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

### **SOC326 Race, Fantasy and Fetish**

What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to 'race play', this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

### **SOC352 Race, Immigration, and the U.S. Empire**

Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by relaying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are grafted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

### **SOC399G Advanced Research Seminar: Introduction to Critical University Studies**

The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we're here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through a feminist, queer, and anti-racist frame. What, we will ask, does it look like to think in and about the university at this historical moment? What does it mean to consider the university's history in relationship to power and the nation-state? What are the gender, sexual, class, and racial politics of knowledge production? And how can we most productively take up the university itself as an object of scholarly inquiry?

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

### **SOC399H Advanced Research Seminar: Hot Mamas: Black Women, Sexuality, and Body Size**

Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of black women. We will journey our way through this course using the works of black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

### **SOC399I Advanced Research Seminar: Assembling the Self**

This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will read a variety of autoethnographic texts, in which the authors use personal experience as a foundation for sociological reflection and insight. We will spend time thinking about the political and methodological benefits and limitations of autoethnography, surveying a range of approaches to incorporating one's experience into scholarship, and attending to the ways that autoethnographic texts respond to existing research and theory. In

the second half of the class, students will develop a substantial and original autoethnographic essay, with class sessions focused on workshoping and presenting writing in progress.

Prereq: **SOC151 AND SOC212**

#### **SOC399K Advanced Research Seminar: Law & Society**

In this course we will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as 'legal problems' and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government--the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

#### **SOC399L Advanced Research Seminar: The Social Body**

This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will survey topics, perspectives, and approaches within the sociology of the body--a disciplinary subfield that examines the human body as a site where the

social materializes and is rendered legible--as well as considering more generally the craft of academic scholarship. Substantive topics will include ADHD, anorexia, pain/pleasure and disability, and racial/ethnic cosmetic surgery. This overview will serve as a foundation for the second half of the course, in which students will develop a substantial and original research essay, with class sessions focused on workshoping and presenting writing in progress.

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **None**

#### **SOC399M Abolitionist University Studies**

This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as 'not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society.' Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

## **SPANISH LANGUAGE AND LITERATURE (SPAN)**

#### **SPAN101 Elementary Spanish I**

This introductory course is designed for students without prior Spanish language study and focuses on the development of receptive and productive language skills (reading, listening, writing, and speaking) within a strong cultural framework.

Offering: **Host**

Grading: **BMO**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

**SPAN102 Elementary Spanish II**

This course, the continuation of SPAN101, further develops basic language skills (reading, listening, writing, and speaking). The course incorporates readings and media from a variety of sources, allowing students to explore the cultures of the Spanish-speaking world.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN101**

**SPAN103 Elementary Spanish for High Beginners**

This course provides an intense review of elementary Spanish to allow students to advance to the intermediate level. Emphasis is placed on the four basic skills: speaking, listening, reading, and writing. Attention is also given to cultural issues concerning the Spanish-speaking world. Conversational fluency is practiced and highly expected daily. A weekly electronic journal is also part of this course.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

**SPAN110 Spanish for High Beginners**

Intermediate-level language course following SPAN103, with emphasis on the development of four basic language skills (reading, listening, writing, and speaking) within a cultural framework.

This course is comparable to SPAN111 and can be followed by SPAN112. Those seeking to follow with SPAN113 require permission of instructor.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN102 AND SPAN103**

**SPAN111 Intermediate Spanish I**

This intermediate language course places continued emphasis on the development of reading, listening, writing, and speaking skills within a strong cultural framework. The sequence SPAN111 and SPAN112 seeks to expand students' active and passive control of vocabulary and grammar and for students to gain experience in using formal and informal registers of Spanish.

Offering: **Host**

Grading: **BMO**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN102 OR SPAN103**

**SPAN112 Intermediate Spanish II**

This course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion within a cultural framework that explores an array of topics connecting to other academic disciplines. Students will experience working with written texts and other media materials and produce a variety of written pieces.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN111**

**SPAN113 Intermediate-Advanced Spanish**

Within a cultural framework focused on the Spanish-speaking world—especially Latin America—this course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion while providing the experience of working with written texts and other media

materials. Students will explore an array of topics that connect to other academic disciplines.

**SPAN201 Spanish Play**

Students will be in charge of directing and staging a play in Spanish with the assistance of a Spanish professor. The workshop will take place over 10 weeks. Minimum one hour per week, which will increase to 2 as the day of the opening approaches. Rehearsals will be split between activities including reading and commenting on the dramatic text and working on diction, which can be done collectively or in smaller groups, and workshoping and rehearsing the play. Although the play will be in Spanish, we will try to allow for a wider audience by providing a brief English translation of the plot.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

**SPAN203 Spanish for Heritage Speakers**

This course is designed to meet the specific needs of students who are heritage speakers of Spanish to increase their language skills and confidence. Students who take this course must have placed into SPAN112 or above. Emphasis is placed on the following: development of linguistic strategies that advance students' written and oral expression beyond the colloquial level, grammatical and orthographic norms of Spanish, critical reading (reading for understanding and analyzing what is read), and expansion of vocabulary. The linguistic work will be conducted through course materials that explore, through a variety of literary and nonliterary texts, the use of Spanish in the U.S. Materials include a textbook or manual and topics related to the experience of Spanish speakers in the U.S.

**SPAN227 Writing Short Fiction in Spanish**

This course will introduce students to the fundamentals of writing short fiction in Spanish. It will enhance their command of Spanish and their skills as effective writers through the examination and discussion of many aspects of the craft of fiction writing, which will inform students' own writing and development of their personal style. We will examine essential features of fiction (methods of constructing narrative tension, climax, ambiguity, character, dialogues, and structure), as well as various fictional styles through our discussion of the writing of our peers and a study of the texts of a number of contemporary Latin

American and Latinx writers working in a genre that has been crucial to the region's intellectual production.

#### **SPAN230 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History**

This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the 'national' epic *EL CID* (12th--13th century); the bawdy and highly theatrical prose dialogue known as *LA CELESTINA* (1499); the anonymous *LAZARILLO* (1554), the first picaresque novel; and María de Zayas's proto-feminist novella *THE WAGES OF VICE* (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of 'the three religions of the book' (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

#### **SPAN231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage**

From 1580 to 1680, Spanish playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, and Tirso de Molina in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's 'Spanish Hamlet' Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Cervantes's border-crossing Catalina, the Ottoman sultan's Spanish queen) and their virtuoso dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures

generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

#### **SPAN232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America**

This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

#### **SPAN236 Cervantes**

Cervantes is known chiefly for *DON QUIXOTE*, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. *DON QUIXOTE* also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes

include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

#### **SPAN250 Modern Spain: Literature, Painting, and the Arts in Their Historical Context**

In this course, we study the so-called 'masterpieces' of modern and contemporary Spanish literature, painting, and film (18th century to the present). The works chosen represent the major literary and cultural movements of the past three centuries: the Enlightenment, Romanticism, realism, and naturalism, the generations of 98 and 27, the avant-garde, neorealism, and postmodernism. As masterpieces, they have achieved canonical status through either the influence they have come to exercise over successive generations or their popular reception at the time of their production. In our close analysis of these works, we will interrogate the processes and conditions of canonicity. We will emphasize the relationship between cultural production and historical context, seeking to draw analogies at all times between the short stories, novels, poems, plays, paintings, and movies under consideration and the social, political, and economic milieu from which they emerged.

#### **SPAN251 Urban Fantasies: The City, Sexuality, and National Identity in the Modern Spanish Novel**

The novel as we know it today reached maturity in Europe in the 19th century against the backdrop of a rapidly changing social and economic context, with the city emerging as a 'capital' coordinate (literally and figuratively) on the map of national cultures. The rapid growth of a powerful bourgeoisie is a defining aspect of this cultural dynamic, manifesting itself as it does through demographic changes, urban expansion, and the rise of a bourgeois aesthetic that will come to influence art, literature, and all other forms of cultural expression for decades to come. In Spain, these phenomena are reflected acutely by one of the nation's greatest novelists, Leopoldo Alas ('Clarín'; 1852-1901). Through a close reading of Clarín's 'La Regenta' (1884-85), a uniquely insightful and polished work of epic scope that is widely regarded as one of Europe's greatest modern novels, we will seek to evaluate how narrative and the cityscape form interlocking textualities within each of which family, the female, and the nation are protagonist, sexuality a central theme.

#### **SPAN254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde**

Our focus will be the Spanish avant-garde as reflected by the plays and poetry of Federico García Lorca, one of Europe's most celebrated authors. A substantial portion of the syllabus includes works that represent the literary traditions (classical, medieval, Golden Age) and contemporary intellectual context (1900-1936) that influenced Lorca. These readings will help us to understand how the modern and the popular interact in the literature and visual arts

(Picasso, Dalí, Buñuel) of this period of intense intellectual ferment. Given the interaction of intellectual and ideological ferment during these years, we will also focus on the relationship between art and ideology generally speaking, and especially on Lorca's profile as a modern bard or public intellectual in the context of the Second Republic (1931-1939), Spain's first important experience with progressive democracy.

#### **SPAN255 Constructing Barcelona Through Its Margins: Contemporary Spanish Culture Through Catalonia**

This course seeks to examine the physical and cultural construction of Barcelona through the ways it has been understood across artistic mediums, social and historical periods, and political spectrums, especially along its margins. This marginality will allow us to look into contemporary Spanish culture from a new perspective, understanding the complexities that lie under the idea of a nation. The course also explores some of the tensions between modernization projects and cultural production during the 20th and 21st centuries, examining representations of the city in literature (poetry and prose), maps, films, performance, and photography.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

#### **SPAN256 City, Mobility, and Technology: Towards the Modern City in Spain**

Movements, itineraries, encounters--these are some of the elements that have characterized modern literature. From the Baudelairean figure of the flâneur to the car chases of popular movies like Bullit, the city is described from a series of journeys that create a representation of urban space. However, these narratives reveal more than a personal account of the city: they show the urban architectures that allow the movement in those spaces (ie, paths, roads, lighting) and in doing so they portray the development of the modern city.

With this framework in mind, in this course we will analyze the construction of the modern city in Spain through literary and filmic texts. We will pay special attention to Barcelona and Madrid, but we will also look at how other international cities are perceived and represented in Spanish literature. In doing so, we will explore how these authors understand the modern city and the international connections and influences that shaped it at specific historical moments.

#### **SPAN257 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain**

In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged into the limelight of Spanish national cultural discourses. Although they represent discrete realities--not all Gypsies identify with flamenco and not all flamenco artists are Gypsies--correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain's dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze

these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to foster a deeper understanding of the importance of the Roma community within the framework of European and Spanish culture and a deeper appreciation for flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

#### **SPAN258 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World**

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

#### **SPAN259 Detective Fiction: Procedure and Paranoia in Spanish Narrative**

The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective--a person who is generally outside the law and sometimes crazy or paranoid--help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

#### **SPAN260 Between Word and World: Major Spanish Poets of the 20th Century**

Our goal in this course is to study how the leading poets in 20th-century Spain use the lyric mode to negotiate the relationship between themselves and their community at key junctures in the nation's history. In doing so, we will also identify and assess the various notions of community that arise in modern Spanish poetry, attempting to evaluate how those notions evolve or are affected by such events or movements as (1) the avant-garde and the second Republic (1920-1936), (2) the Civil War and the Franco regime (1939-1975), and (3) sweeping political and social transformations of the past 30 years as signaled by the country's democratization, integration into the European Union, economic development, and by the massive influx of immigrants from Africa, Latin America, and Eastern Europe (1977-present). Key essays (critical and theoretical), some by the poets themselves, are included in the syllabus to provide critical tools for discussing how the public experience is lyricized through the intimate filter of the poet's own sensitivity. We will seek to understand the role played by context in conditioning the decisions poets make in adopting the epic, elegiac, didactic, or testimonial mode of expression, to name just a few. The image of the poet standing at the crossroads of lyrical creativity--word--and historical circumstance--world--will be central to our critical inquiry.

#### **SPAN261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain**

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

#### **SPAN262 Through Foreign Eyes: The U.S. in Spain in the 20th Century**

Although the relationship between Spain and the U.S. has a long history that can be traced back to colonial times, during the 20th century, an extensive corpus of literature in which Spanish authors portray the U.S. prominently becomes visible.

The appearance of this body of work gives rise to a series of questions: How do Spaniards see the U.S.? What are the consequences of this understanding? Why is there such interest in portraying the U.S. from a Spanish point of view? Of course, cultural and social definitions are constructions always limited to historic, social, and cultural events, be they of a military, political, or purely commercial nature. One could think that these portraits dwell on stereotypes; nonetheless, we are before a literary production that uses the U.S. to create a narrative about how Spain enters a global economic market through a cultural exchange. These are texts about traveling, the construction of the individual, and the shaping of a nation; texts that cross the boundaries of literary genres to define Spanish identity. We are before the construction of a narrative that questions the building of alterity and shapes the identity of modern Spain. In our approach to the main historic events that define the relationship between Spain and the U.S. during the 20th century, we will examine novels, poems, and movies that result from such events to analyze questions related to identity, globalization, localism, modernity, and nation. What we will engage in is, in fact, a debate about how we define ourselves, whether we are Spanish or American, through foreign eyes.

#### **SPAN263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance**

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand 'destiny'? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society.

In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Hispanophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's Iliad and Virgil's Aeneid. This course is taught in conjunction with Italian 263 and French 263. The final collaborative performance, scheduled during the Final Exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

#### **SPAN264 Orientalism: Spain and Africa**

Over the past several decades, North African and Middle Eastern cultures have become conspicuously important within the Spanish cultural arena. Translations of writers from Lebanon to Morocco abound in Spanish bookstores. Spanish writers have begun addressing North African and Middle Eastern issues with

greater frequency, especially in their novels. The dramatic rise in the African immigrant population in Spain during the 1980s and 1990s, meanwhile, has been matched by a rise in press coverage of issues pertaining to Africa and the Middle East. These factors constitute the point of departure for our historical overview of the treatment of Islamic cultures in modern Spain, from early 19th century to the present. Guided by Edward Said's seminal essay, *ORIENTALISM*, we will assess the extent to which (and the process by which) Spain passes from the Orientalized subject of European Romanticism (painting, literature, music) to an Orientalizing European power in the late 20th century. In doing so, we will seek to relate the representation of Islamic cultures in Spanish literature and painting to social, political, and economic factors, most important of which was Spain's military invasion into Morocco in the late 19th and early 20th centuries. We will also survey changing attitudes among Spanish intellectuals with regard to the Islamic world and toward Spain's Islamic heritage, the result, perhaps, of 20th-century modernization and, most recently, of Spain's full integration, after Franco's death, into Europe's military and political structures. The tools for this study include works of literature primarily, but we will also focus on painting, historical essays, newspaper articles, and film.

#### **SPAN265 History of Spanish Cinema for Spanish Speakers (CLAC.50)**

Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: <https://span301.site.wesleyan.edu/>. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

#### **SPAN267 Image/Word: Narrative and Photography in Contemporary Spain**

The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization. That is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar in which the students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life. To do so, the students will work with the help of an artist, the photographer Consuelo Bautista, who will help them to develop a project in which they will connect their own experience with what they have seen in class.

Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN270 Survey of Latin American Literatures, Cultures, and Ideas**

A close study of texts from the colonial period to the present will serve as the basis for a discussion of some of the major ideas, and cultural and political debates that have emerged in modern Latin America to this day. Thinkers include Las Casas, Sor Juana, Bolívar, Sarmiento, Martí, Neruda, Borges, García Márquez, Menchú, and Bolaño, among others. For purposes of understanding context, students will also read selected chapters from works by historians and cultural critics and will watch several films. (Please note that this course was previously called 'Spanish American Literature and Civilization.')

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST226**Prereq: **None****SPAN271 Modern Technologies in Latin American Literature**

Modern communication technologies and modes of transportation have been a recurrent theme in works of Latin American writers from the 20th and 21st centuries. For example, radio was a significant source of inspiration for avant-garde Mexican poets Manuel Maples Arce and Luis Quintanilla in the 1920s; they both tried to capture the uncanny experience of hearing disembodied human voices through writing. In this class, we will discuss texts that likewise reflect on the effects of various modern means of transport and communication—such as trains, subways, radio, telephone, tape recording, and the Internet—with an emphasis on how these technologies have revolutionized human relations. We will examine how these literary works exceeded the aesthetic or sociopolitical norms of their time, while keeping in mind that the simple act of writing is also a form of technology, and often a transgressive one.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST270**Prereq: **None****SPAN272 Cubanidad: Diaspora, Exiles, and Cultural Identity in Cuban Literature and Film**

This course will examine shifting notions of Cubaness, or 'cubanidad,' from the 19th century to the present times from a diasporic framework. We will discuss writings by/about African slaves, Chinese indentured laborers and migrants, and Spanish immigrants in Cuba, as well as Cuban exiles in the U.S. and Spain from the 19th century to the beginning of the 20th century. Through a variety of literary texts and films, we will then study select cases of European exiles who visited Cuba in the 1930s and '40s, the later massive waves of Cuban migration to the U.S. after the Revolution, and the more recent immigrants who have settled in Cuba.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST272**Prereq: **None****SPAN273 Beyond Machu Picchu and Macondo: Real and Imaginary Worlds in Latin American Letters**

Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain

moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and of the Nuyorican writer Tato Laviera (1970s), and César Aira's Colón (Panamá) and Fernando Vallejo's Medellín (Colombia). In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904–1914), the Cold War (1947–1991), Latino identity in the context of Puerto Rico and New York City, the coup d'état in Chile on September 11, 1973, and the drug wars. When possible, films and short videos will be used to help build knowledge of historical context.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST273**Prereq: **None****SPAN275 Multilingual Aesthetics in Latin America**

This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as 'modernismo,' 'creacionismo,' 'negrismo,' 'indigenismo,' 'neoindigenismo,' and 'indianismo,' all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the 'Festival de poesía: lenguas de América,' a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and 'Spanglish' by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST265**Prereq: **None****SPAN276 Body, Voice, Text: Theater and the Transmission of Experience**

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

**SPAN278 Dangerous Plots: Fictions of the Latin American Jungle**

This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

**SPAN279 Latin American Theater and Performance**

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

**SPAN280 Screening Youth in Contemporary Latin American Cinema**

This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

**SPAN281 'Islas sonantes': Music and Sound Technologies in Hispanic Caribbean Literature**

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as 'islas sonantes' (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

**SPAN284 Tales of Resistance: Modernity and the Latin American Short Story**

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Darío, Tablada, Gómez Carrillo, Balmori, etc.). Then we will assess travel writings produced across the Pacific—from Mexico to India (Paz), from Chile to Southeast Asia (Neruda), from the Philippines to Chile (Medina), and from Mexico to Japan (Tinajero). Finally, we will examine diverse works by writers/artists of Asian descent in Hispanic America as well as Asian Latinos in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Hispanic America? How does Philippine literature in Spanish produced during the US colonial period modify our conception of what is 'Hispanic,' 'Asian,' and 'American'? By looking at the trans-Pacific reach of the Hispanic, we will be in a better position to appreciate the complexity of the cultural, social, and ambiguous political legacies of Spanish and US colonialism.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST241**Prereq: **None****SPAN286 Bolívar's Afterlife in the Americas: Biography, Ideology, and the Public Sphere**

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST258**Prereq: **[SPAN270 or LAST226] OR SPAN221 OR [SPAN250 or COL219]****SPAN287 Constructions of the Self**

How does one define oneself? What forces are active in the creation of our personal identities? How much control do we exercise over these processes? What role do writing and literature play in the construction of notions of the self? While these questions are timeless and know no geographical boundaries, we will examine how several different Latin American and U.S. Latino authors have addressed these concerns in their art, with an eye toward understanding the cultural specificity of each of their propositions, as well as how writing itself becomes the subject of writing in the search for subjectivity.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN288 Territories of Dwelling, Desire and Resistance in Latin America**

This course seeks to examine the ways in which diverse geographical spaces in Latin America have been produced, negotiated, and contested from the past century to our times through cultural practices that construct these as territories of dwelling, desire, possession, dispossession, and resistance. We will focus on texts and practices—literature, film, performance, and the visual arts—that seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries, and pay close attention to modes of dwelling and the relationship between location, bodies, gender, and desire. We will trace how these texts intervene in urgent debates about the destiny of rural lands, the uses and abuses of nature, and the place of rural peoples, the struggles for peasant and indigenous rights, environmental justice, and the construction of alternative modernities. We will focus particularly on the Andean and Amazon regions (mountains, rainforests) of South America, as well as other rural tropical areas.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **SPAN221****SPAN290 From the Muralists to the Narconovela: The Public Intellectual in Mexico**

Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910–1917) and the Muralists (1920s–40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST291**Prereq: **None****SPAN291 Spanish American 'Modernismo' in a Global Context**

The publication of Nicaraguan Rubén Darío's *Azul...* in 1888 is often considered to be the inaugural event of 'modernismo,' the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged—at least 'spiritually'—to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but

also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

## **THEATER (THEA)**

#### **THEA105 Production Laboratory**

This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions

happen. All sections will participate in the backstage work of the Theater Department's productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.

#### **THEA135F Documentary Performance: Theater and Social Justice (FYS)**

This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course's initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.

#### **THEA150 Introduction to Performance Studies**

What is performance? Is it an event and action? Is it what happens on a stage? How might we think of theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking?

This course is designed to introduce students to the theoretical, critical, and creative practice of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performance ranging from 'Paris Is Burning' (directed by Jennie Livingston), to 'Slave Play' (written by Jeremy O. Harris), to the work of artists Ana Mendieta, Marina Abramovic, Paula Vogel, Faye Driscoll, Will Rawls, Coco Fusco, Ralph Lemon, Lin-Manuel Miranda, Tony Kushner, and many others. In this course we will pay particular attention to queer and minoritarian artists and makers.

#### **THEA150F Introduction to Performance Studies (FYS)**

What is performance? Is it an event or an action? Is it what happens on a stage or in your living room? Furthermore, what does performance have to do with race, gender, sexuality or community? This course approaches theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking. Students will be introduced to the theoretical, critical, and creative field of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performances ranging from 'Paris Is Burning' (directed by Jennie Livingston), to 'Slave Play' (written by Jeremy O. Harris), to the work of artists Ana Mendieta, Marina Abramovic, Paula Vogel, Amiri Baraka, Faye Driscoll, Zora Neal Hurston, Will Rawls, Coco Fusco, Ralph Lemon, Lin-Manuel Miranda, Eiko Otake, Muriel Miguel, Tony Kushner, and many others. In this writing intensive course we will pay particular attention to queer artists and artists of color.

#### **THEA172F Staging America: Modern American Drama (FYS)**

Can modern American drama—as cultural analysis—teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

### **THEA183 The Actor's Experience**

The Actor's Experience is a class that offers the opportunity to work on plays and scenes with student directors, examining (and experiencing) the actor-director relationship. Through in-class exercises and rehearsals, students will gain experience in analyzing, staging, and performing scenes. In-class exercises will be pulled from Suzan-Lori Parks's '365 Plays/365 Days,' Lorraine Hansberry's 'A Raisin in the Sun,' and Adrienne Kennedy's 'The Owl Answers.' Final, rehearsed scene work will be pulled from Branden Jacobs-Jenkins 'Appropriate,' Bruce Norris's 'Clybourne Park,' and Suzan-Lori Parks's 'Fucking A.'

The Actor's Experience welcomes both experienced and inexperienced actors. Newcomers welcome—it's a great way to get to know the community of the theater department. Students must be available for the entire class period, although you will not always be required to stay the entire time.

### **THEA199 Introduction to Playwriting**

This course provides an introduction to the art and craft of writing for theater. In the course of the semester, students will create plot and characters, as well as compose, organize, and revise a one-act play for the final stage reading. The course will help students develop an artistic voice by completing additional playwriting exercises, as well as reading and discussing classic and contemporary plays. The instructor and students' peers will provide oral and written feedback in workshop sessions.

### **THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern**

This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's Poetics and Plato's Republic. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy & for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-

Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

### **THEA203 Playing in the Theater Archive: An Introduction to Performance Studies**

This class will serve as an introduction to theatricality, performance studies, and aesthetic theories. We will analyze plays and performances as we examine classical and contemporary conceptions of the theatrical. Given the complex and varied roles theater has played throughout history, we will begin by placing pressure on the terms 'theater' and 'history.' We will pay particular attention to the intersections between theater history, dramatic literature, cultural performance, and the role of the theater archive as we explore key moments in theatrical development. Readings will be organized geographically and diachronically, giving us a mobile and flexible account of theater, theory, and practice across a variety of cultures. At the end of this course, students will be familiar with touchstones in theater history; be able to write a critical and descriptive performance paper; demonstrate a knowledge of critical performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.

Offering: **Host**

Grading: **A-F**

### **THEA210 Shakespeare**

This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

### **THEA212 Composition Across the Arts**

Grounded in embodied art-making practices, this survey course will introduce students to art-making processes in dance, performance, creative writing, and sound. Connections will be explored amongst the disciplines and students will be encouraged to discover their own unique and hybrid forms. The class will be facilitated by Nicole Stanton with modules taught by resident and visiting artists from across the arts. The first part of the semester will focus on hands-on experimentation, contextual readings, viewings, and discussion. In the second part of the semester, students will create their own creative projects, participate in in-depth critique sessions, and develop a digital portfolio to document their

work. The course will culminate in public exhibitions and performances of the student's creative projects. This course can serve as the gateway to the Dance Major.

#### **THEA215 Latinx Theater in the U.S.: Analysis & Performance**

This Latinx theater study and performance class will examine American-born playwrights of the Latinx Diaspora. Playwrights who are of Mexican, Cuban, Puerto Rican, and Dominican descent are just a few of the many Latinx identities in the United States. The goal will be to examine the specific cultural identities within the United States, their origins, experiences, and stories in this country. We will analyze and explore the universal resonance of these plays as well as their current relevance to contemporary American culture, both politically and socially. Students will be required to do monologue work and scene study for the performance portion of this course.

#### **THEA217 Performing Democracy: Theater, Activism, and Community Engagement**

This course will give students the opportunity to use theater as a tool for community engagement and social activism. No theater experience is required, but students will be asked to make informal presentations of texts related to issues of social justice, climate change, health care, and economic equality in a variety of community settings that may include senior citizen homes, public schools, or political campaign rallies. During election years these presentations may involve re-enactments of presidential debates and political speeches by figures from Greta Thunberg, Chief Joseph, James Baldwin, and Barack Obama to Richard Nixon, William F. Buckley, Emma Goldman, and Donald Trump. These presentations will be designed to elicit discussion and debate from community audiences and encourage those community members to vote and participate in the democratic process as advocates for the principles they believe in most strongly. Students will collaborate with their community partners in creating new performances that give voice to their experience and concerns.

#### **THEA219 The Anthropology of Performance**

This course traces the intersection of anthropology, theatre, and performance studies to explore cultural phenomena of ritual, event, spectacle, audience, liveness, and mediation in different cultures across the globe. Drawing from both ethnographic writing and anthropological, performance, and media theory concerning the nature of presence, spectatorship, belonging, and representation, students wade into debates on performativity, liveness, affect, and communitas. In turn, students use their knowledge of these debates to put forth their own original analyses of live events they attend while also experimenting with practices of ritual building.

#### **THEA220 Performing Indonesia**

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breuer, and Julie Taymour, who have all collaborated with Balinese performers.

#### **THEA221 Rescripting America for the Stage**

This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of source materials related to all forms of American culture from the revolution to hip hop. Initially our primary source material for adaptation will be Herman Melville's 'Confidence Man.' We will examine a range of performance texts adapted from nontheatrical sources, including Lin-Manuel Miranda's 'Hamilton' and Dario Fo's subversive rewrite of Columbus' voyages, 'Johan Padan and the Discovery of the Americas.' Ancient Greek drama will also be studied for its dramatic structure and for its significance as a source for American adaptations such as Lee Breuer's 'Gospel at Colonus.' This course counts as a workshop and techniques course for the Writing Certificate.

#### **THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage**

From 1580 to 1680, Spanish playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, and Tirso de Molina in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's 'Spanish Hamlet' Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Cervantes's border-crossing Catalina, the Ottoman sultan's Spanish queen) and their virtuoso dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

#### **THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance**

What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present 'Caribbean' and/or 'West Indian' subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

#### **THEA235 Writing on and as Performance**

This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and doing live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Glenn Ligon, Claudia Rankine, Eve Sedgwick, Fred Moten, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading skills, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, artist interviews, and free-form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for 'insurrection' (Moten), 'gaps, overlaps, dissonances' (Sedgwick), and 'listening in detail' (Vazquez).

#### **THEA237 Performance Art**

This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

#### **THEA238 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World**

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones

of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

#### **THEA243 Theater/Drama Traditions of China and Japan**

This seminar offers a window into Chinese and Japanese drama and theater traditions from their beginnings to the 20th century. We engage issues of dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the Chinese dramatic genres of zaju and chuanqi; Chinese performance styles of Beijing opera and Kunqu; and Japanese dramatic genres and performance practices of noh, kyogen, kabuki, and puppet theater. Throughout the course, we engage closely with dramatic texts as literature, giving detailed thematic readings to some canonical and non-canonical plays. We also consider how dramatic writing and theatrical performance relate to broader trends in sociopolitical history and literary history, exploring how dramatic texts and theatrical performance embody a multivalent and multisensory space that is unique among creative enterprises. We deal with both the actor and the text, and consider how each are conditioned by modern and premodern contexts. No prerequisites are required, although some prior knowledge of China or Japan is helpful.

#### **THEA246 Adornment: The Human Body on Display**

Personal adornment has been important throughout history in demonstrating distinctive features of world cultures, creating forms and images that illustrate spiritual beliefs, as well as representing individuals or groups through the use of decorative elements.

In this course, we will explore the many ways adornment - through the manipulations of makeup, hair and millinery accessories - can create a profound transformation in the appearance of the wearer. These adornment techniques have been a source of fashionable expression for thousands of years - from the kohl rimmed eyes of the ancient Egyptians to the elaborate hairstyles of the Greeks and Romans, to the beauty marks that were popular with French nobility in the 18th century. Contemporary use of adornment can be seen in the constructed artistry of David Bowie's alter egos for performance in the 1970s and Lady Gaga's innovative use of prosthetic makeup for facial enhancement.

#### **THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde**

Our focus will be the Spanish avant-garde as reflected by the plays and poetry of Federico García Lorca, one of Europe's most celebrated authors. A substantial portion of the syllabus includes works that represent the literary traditions (classical, medieval, Golden Age) and contemporary intellectual context (1900-1936) that influenced Lorca. These readings will help us to understand how the modern and the popular interact in the literature and visual arts (Picasso, Dalí, Buñuel) of this period of intense intellectual ferment. Given the interaction of intellectual and ideological ferment during these years, we will also focus on the relationship between art and ideology generally speaking, and especially on Lorca's profile as a modern bard or public intellectual in the context of the Second Republic (1931-1939), Spain's first important experience with progressive democracy.

#### **THEA259 Face the Blank Page**

A 13-week course for the beginning playwright. Students will read 12 plays and write essays on each one, in which they will explore the creation of the play. The why of it. Who is the main character, what do they want, what's stopping them from getting it, and finally, what is the point of no return? Students will look at the time and society in which the play is placed. What obstacles were part of their world; what did they have to overcome, and what did they have to accept? Every play will also serve as a prompt for a writing exercise that students will be responsible for. Students will take a character or situation from the play and make it their own. Also, as a group, the class will write an original play. Each student will be assigned a scene, and week by week the play will come together. This collective creation will be inspired by a song; everyone will have the same song, and each student will continue the play based on the scene that preceded it. Each student will be a part of building the structure of the play and will be able to put their own stamp on it.

### **THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain**

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

### **THEA263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance**

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand 'destiny'? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italoophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' *Antigone*, Euripides' *Oedipus* and *Medea*, Aeschylus' *Agamemnon*, as well as figures from the *Oresteia* and from such epics as Homer's *Iliad* and Virgil's *Aeneid*. This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

### **THEA266 Black Performance Theory**

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheliye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

### **THEA267 Revolution Girl-Style Now: Queer and Feminist Performance Strategies**

Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms 'feminist' and 'queer' come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words 'queer' and 'feminist,' we will pair theoretical readings with theatrical sites. Authors and artists to be discussed will include Judith Butler, Paula Vogel, Holly Hughes, Beth Henley, Karen Finley, Samuel Delany, Nao Bustamante, Rebecca Schneider, Anna Deavere Smith, José Muñoz, Jill Dolan, Sylvia Rivera, Sharon Hayes, Sharon P. Holland, Bikini Kill, boychild, Lucy Lippard, Laurie Weeks, and Dean Spade.

### **THEA269 Introduction to Performance Studies**

Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the 'performance' as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-THEA**Prereq: **None****THEA276 Body, Voice, Text: Theater and the Transmission of Experience**

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **SPAN276, LAST276**Prereq: **None****THEA279 Music Theater Workshop**

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, 'I Want/I Am' songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the 'rules' to suit their own creative instincts.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **MUSC230**Prereq: **THEA199 OR MUSC103 OR MUSC201****THEA280 Award-Winning Playwrights**

With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL281, AFAM279**Prereq: **None****THEA281 Introduction to Directing**

In this basic experimental studio course, students investigate the role and work of a director. Through practice and discourse, topics to be considered include the director's analysis of text, research, working with actors, blocking, rehearsal procedures, and directorial style.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **THEA245****THEA285 Acting II**

This course is a continuation of THEA245, Acting I, deepening the investigation of contemporary actor training methods grounded in the work of Konstantin Stanislavsky and other contemporary theorists. Through advanced scene study, students apply their exploration of technique and training. This is an advanced acting course in studio format.

This counts as a Theater Arts course for the Theater Major.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **THEA245****THEA286 Solo Performance**

This course will provide students with acting and playwriting skills that will enable them to research, write and perform a solo performance piece based on a subject of their choice. The work of Anna Deveare Smith, Roger Guenvere Smith, Dario Fo and Franca Rame among others, will be studied as models for the creation of solo performance pieces that combine artistic virtuosity with a concern for social justice.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA289 Writing History**

This course is an intermediate-level playwriting workshop. We will examine plays that use different dramaturgical strategies to grapple with, question, and invigorate the historical record, including Miller's *The Crucible*, Jacob Jenkins's *An Octaroon*, Miranda's *Hamilton*, and Shakespeare's histories. We will then write original plays that spring from, react to, and grapple with the past as it has been told and hidden from telling. In addition to numerous short exercises, students will research and write a 40-page history play.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **ENGL330**Prereq: **[THEA199 or ENGL269]****THEA290 Staging Race in Early Modern England**

This course analyzes the dramatic representation of race in the plays of Shakespeare and his contemporaries. We will examine the historical emergence of race as a cultural construct in relation to related conceptions of complexion, the humoral body, gender, sexuality, and religious, ethnic, and national identity. Readings focus on three racialized groups: Moors, Jews, and Native American 'Indians.' After reading the play-texts in relation to the historical moment in which they were first produced (using both primary and secondary sources) we will then consider their post-Renaissance performance histories, including literary, theatrical, and film adaptations.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL280, FGSS320, CHUM289**Prereq: **None**

**THEA291 French and Francophone Theater in Performance**

This course introduces students to the richness of the French and Francophone dramatic repertoires, on the one hand, and, on the other, invites them to discover acting techniques (such as movement, physicalization, memorization, *mise en scène*, and so forth). Students will thus put their language skills into motion, and the course will culminate in a public performance at the end of the semester. (Special accommodations will be made for students who do not wish to perform publicly). Taught exclusively in French, the course will place particular emphasis on the improvement of students' oral skills through pronunciation and diction exercises, all the while polishing their written expression and enhancing their aural comprehension.

**THEA292 Spectacles of Violence in Early Modern French Tragedy**

The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

**THEA297 Latin American Theater and Performance**

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

**THEA306 Techniques of the Liar: Performance, Artifice, Fraud**

This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of 'emotion'; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how 'authenticity' is both gendered and racialized; and how hiding,

fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

#### **THEA308 Composition in the Arts**

Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By 'site,' we mean a semantic field extending through corporeal, environmental, and social dimensions. By 'information,' we mean representations abstracted from sites, 'meaningless' when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

#### **THEA309 The Actor's Work on Psychophysical Actions: A Nonrealist Approach**

The course offers an in-depth studio experience in Jerzy Grotowski's approach to the creation of psychophysical actions outside of the frame of realism. The term psychophysical action was coined by Russian director and pedagogue Konstantin Stanislavsky, who dedicated his life's work to the elaboration of the first Western acting system. Stanislavsky viewed the acting conventions of Romanticism and melodrama as 'false,' inadequate, and passé. As a proponent of realism, then an emerging theatrical genre, Stanislavsky sought to develop an acting system that would support the creation of 'truthful' actions on stage. The late Polish director Jerzy Grotowski continued Stanislavsky's research on the method of psychophysical actions. In response to the theatrical trends of his time, Grotowski's own research aimed at freeing actors from the conventions and materials of realism. Instead of departing from dramatic literature, students in this course will learn how to create psychophysical actions using points of departure such as personal memory, short stories, poems, visual materials, objects, traditional song, and so forth. The goal is to guide them to create repeatable scores of psychophysical actions; select, extend, and/or omit specific fragments in their score; juxtapose text or song to the physical score; and use objects in a manner that is precise and expressive. During the second half of the semester, students will learn how to 'edit' their scores of psychophysical actions in partner and ensemble work. This portion of the course provides actors with insight into directorial work, a knowledge that gives them greater autonomy in the creative process.

#### **THEA311 Queer and Trans Aesthetics**

The seminar aims to develop intersectional frameworks for analyzing the artistic production of five artists who will be participating in a Trans\*Revolutions symposium at the Center for the Humanities this spring: Tourmaline (film); Vick Quezada (photography, sculpture, film, and performance); Elliot Montague (film); Texas Isaiah (photography); and Emma Frankland (performance). We will also contextualize their work in relation to other artists, such as Ana Mendieta; Rotimi Fani-Kayode; Elle Pérez; Sandie Yi; Isaac Julien; Vaginal Davis; Kent Monkman; Martine Gutierrez; Felix Gonzalez-Torres; Juliana Huxtable; Laura Aguilar; Untitled Queen; and Wu Tsang. For the primary assignment, students will have two options: 1) a research paper on one or more of the participating artists or another relevant artist; or, 2) a creative project (e.g., artwork, performance, poetry) in dialogue with the seminar's topics. Students also will have the opportunity to engage the symposium's featured artists during their visit.

#### **THEA315 Stage Management**

This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time management, industry standards, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work, or hinder it.

Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show.

Potential projects include: Auditions to Opening night paper project of a show, calling a pre-produced dance piece, and interviewing a professional working Stage Manager.

Prereq: **THEA105**

#### **THEA316 Advanced Topics in Performance Studies: Imagining Anticolonial Performance Practices**

Performance studies is an interdisciplinary field (brushing up against anthropology, theater studies, linguistics, critical race studies, psychoanalysis,

and queer theory) that orbits conceptions of 'the live.' We will use 'performance' as both a practice and lens to explore art, theater, dance, music, everyday performances, and presentations of the self. In addition to introducing students to some of the key debates in the field of performance studies, this class will pay particular attention to decolonial and anticolonial performance practices. With a specific attention to Native North American politics, practice, art, and performance, we will study examples of contemporary Indigenous art in order to imagine performance's potential ability to work toward the anti-normalization of settler colonial logics and laws. Student projects will take the shape of semester-long critical research papers.

#### **THEA318 Introduction to Viewpoints**

In this studio class, students learn and are immersed in the Viewpoints--a vocabulary which breaks down the two dominant issues any performance-based artist deals with: Time and Space. Students practice the Viewpoints and learn a language for talking about what happens on stage. Through practice, students develop tools not only for their own individual work, but for collaboration, offering ensembles a way to quickly generate original work. While a form of movement improvisation, students will also apply the Viewpoints as a means to staging to text as well as generate composition pieces. This class is open to directors, actors, designers, dancers, choreographers, musicians, composers, and writers.

Offering: **Host**

Prereq: **None**

#### **THEA327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern**

The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to 'train' citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grapple with demanding questions--legal, ethical, and moral: the 'laws' of war; discrimination (based on gender, class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional engineering.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, Yael Farber, and movie adaptations.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

**THEA351 Melodrama Since 1700**

Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like Mozart's *Magic Flute*, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator's declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg's *Pierrot Lunaire*. But slowly melodrama as a term began to take on connotations relating to one of comic opera's central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in *Mildred Pierce*). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

**THEA352 Following Fornés: Creativity, Intimacy, and Imagination**

This course undertakes an investigation and application of the creative process of visionary iconoclast Maria Irene Fornés: a queer, Latinx playwright whose wildly idiosyncratic plays defied both convention and categorization. Fornés' legendary workshops shaped a generation of playwrights, including Nilo Cruz, Caridad Svich, and Sarah Ruhl.

Students will engage with Fornés' own creative process via her ephemera: in this case, the spoken fragments, outtakes, and audio marginalia left behind from the filming of her documentary collaboration with director Michelle Memran, 'The Rest I Make Up.' As I work to compile and cohere this material into a book, the class will be applying it, directly, to the conception and creation of their own performance works.

Students who are interested in writing/directing/devising live works of performance are best suited to this class. No former experience necessary, but a willingness to create and share live work and writing on a weekly basis is required. Our work will be contextualized by assigned research and writing

into Fornés as a key figure of the American theater, and will culminate in the presentation of our creative projects.

**THEA354 Improvisation: Diasporic Modalities**

Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/music, the environment, and our community? How do we honor the self in collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.

Identical With: **DANC354**

Prereq: **None**

**THEA357 Space and Materiality: Performing Place**

Scenography explores and shapes the material world in and through the performative event. In site-specific performances, scenography transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and hands-on understanding of the material potential and limitations of the four key elements involved in the scenographic project—artistic design, the actor's body, local architecture, and time.

This course is divided in four units: site-specific interventions; street performance; immersive theater; and theatrical apparatus. Each unit includes scholarly readings, assignments in performance and scenography, and a response paper. The final project for the course is a performance intervention devised for a particular site on campus that demonstrates the student's cumulative grasp of site specificity, scenography, and materiality.

**THEA359 Space Design for Performance**

In this course, students will study, construct, and deconstruct the performative space, whether theatrical or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the

design process, including concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software, utilizing design-technology tools, such as laser cutters and 3D printing, to develop and enhance their work.

#### **THEA360 Media for Performance**

This course examines the use of technology in performance, from the creation of mechanical moving scenery to 3D scenography. We will look into the development of the theatrical technology from the Renaissance to today's conception of the digital theater, virtual reality, and online performances. The class format will be divided into lectures and studio class, where students will develop practical work creating their own digital performances.

#### **THEA364 Friendship and Collaboration: In Theory, In Practice**

How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to 'invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure.' This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, black thought, and indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

#### **THEA365 Greek Tragedy: Euripides**

Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection

of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

#### **THEA366 The Sounds of Black and Brown Performance**

This course organizes itself as a scene of listening with care to black and brown sounds, where listening is conceived as a mode of audience engagement of performances informed by avant-garde, queer, and critical race theories.

Listening, then, is part of the artistic-theoretical practices that students will both read about and act out in this course. Here, we will engage theater, dance, and performance with the demand of listening in brown for the distinct sounds made in different performances, whether by identifiably racialized artist-subjects or not, and how they compel us to think of embodiment. If to say black is to say abjection, prison, AIDS, as well as the generative, the contra-rationally beautiful (Moten), and if to say 'gender-y' is to say threatening, off-kilter, violatable, as well playful, and transformative (Sedgwick, Doyle), then what happens when we listen in brown, that is, with the headphones of melancholia, depression, as well as wildness, the excessive, the 'hot and spicy' as critiques of the violence of the whitened norm (Muñoz)?

#### **THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora**

This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

#### **THEA390 Performance Ensemble**

Since theater is an art of collaboration, this course will offer advanced acting, directing, and playwriting students an opportunity to develop their skills in an ensemble environment and to collaborate on creative practice. Students will explore creating text, embodying performance, and developing an understanding of dynamic space with the goal of engaging collaborative processes. Techniques of storytelling, negotiation of differences in communication, and developing a coherent and cohesive theatrical event will be explored. Students will go through all stages of research, improvisation, rehearsal, and analysis of preparing a theatrical performance for an invited audience in a workshop structure.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.

# WRITING (WRCT)

**WRCT110F Academic Writing in the US for International Students (FYS)**

This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Reginald Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

**WRCT112F The Logistics of Climate Change (FYS)**

According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can't be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

**WRCT114F Why You Can't Write (FYS)**

Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course

center the practice of writing. As such, students can expect to write, revise, and comment on classmates' writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

#### **WRCT116F The Literature of Travel (FYS)**

Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of 'travel literature,' including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

#### **WRCT120F Uncertainty and the Future (FYS)**

The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the 'negative' side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

#### **WRCT121F Are You a Feminist? (FYS)**

Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

#### **WRCT130F Living within the Bio-Logical (FYS)**

How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

#### **WRCT133F Race and Representation (FYS)**

This first-year seminar will introduce students to theories and understandings of race, racism, and racial inequality as debated in the academy and the public (US) sphere. So, too, will the course consider race as it is lived and represented in cultural objects such as film, literature, law, television, and music. Reading and writing will be heavily emphasized. Through regular writing activities, students will find comfort with and a voice for discussing a range of cultural texts, preparing them for everyday discussions about race in US culture.

#### **WRCT135 Writing about Research: U.S. Style**

This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

#### **WRCT135F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)**

This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and

anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.

#### **WRCT140L Teaching English to Speakers of Other Languages**

This course explores theories and teaching methods related to learning English as a second language (ESL). Students will critically examine current and past 'best practices' for teaching English to speakers of other languages (TESOL) and the seminal theories they are based on. In addition, we will discuss the various needs of English language learners, including both children and adults, and students coming from a variety of social and cultural backgrounds. Students will be asked to apply what they've learned by creating their own lesson plans and activities, critiquing ESL textbooks, and giving teaching demonstrations. If you choose to work with a student (or tutor in an organization), you may be able to use this class to fulfill a Category 5 requirement in Education Studies.

#### **WRCT150 The Science Behind Popular Scientific Literature**

The Science Behind Popular Scientific Literature. This course focuses on academic STEM writing and is an exploration of the scientific literature in the reference list of Elizabeth Kolbert's 'The Sixth Extinction.' Assignments will consist of numerous low-stakes writing prompts with extensive peer and instructor feedback, and a term project paper constructed along the lines of a STEM review paper. This course fulfills a key need in developing science literacy and teaching students how to find and use reliable sources to critically evaluate popular science writing.

#### **WRCT200 Integrative Learning Project 1: Reflecting About the Liberal Arts**

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and

non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

All sophomores, juniors and seniors are welcome in this course. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can take this course more than once, but only once per academic year.

#### **WRCT202 Pedagogy for Teaching English to Speakers of Other Languages Tutors**

This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the U.S. every year. Students enrolled in this course will gain practical experience by committing to volunteering at Middletown public schools while taking this course and are encouraged to continue their service afterward. There is a volunteering commitment of 2 hours/week minimum during the semester.

#### **WRCT204 Extreme Landscapes of the Anthropocene**

The 'Anthropocene,' a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term 'Anthropocene,' questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from 'capitalist ruins' to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of 'non-judgmental attention' to their critical engagement with the Anthropocene.

#### **WRCT205 English Language Learners and US Language Policy**

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the U.S. legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

#### **WRCT223 Translating a Story**

This course aims to survey the process of 'translating' an experience into a creative written work. With an emphasis on creative nonfiction, students will consider how a real-life event becomes most alive on the page. What parts are best transformed into scene? How do we choose the right language for dialogue, time period, or a work's mood or tone? What should, or can, we omit? In reading writers who have used both fiction and nonfiction to present a given autobiographical experience, and practicing writing an experience for different audiences, students will compare the craft tools that make a story work within its given form. Concurrently, the class will pursue exercises in translation from other languages into English to assess these same language and narrative choices in microcosm.

#### **WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)**

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence—from the archive, primary sources, secondary sources, and written shreds of a life—to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While

reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

#### **WRCT226 Ethnographies in Medicine**

Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

#### **WRCT227 Life Writing: Writing About the Self and from Experience**

This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.

#### **WRCT228 The Art of the Personal Essay**

The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays—what author and critic Philip Lopate calls 'the self-interrogative genre'—helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others' writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

#### **WRCT250 An Introduction to Data Journalism**

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

#### **WRCT250D Topics in Journalism: Writing (and Arguing) About Inequality: How to Make Your Case**

In this nonfiction seminar, students will explore how to write about social issues by identifying inequity, understanding the logic and rhetoric used to both defend and criticize it, and developing their own skills to effectively communicate their opinion. Modeled after journalistic work, the course will also develop students' abilities to conduct first-person research and observation and then translate them into written form for use in nonfiction. We will also explore questions of authenticity, voice, and dominant narrative, allowing students to examine what it means to write about communities other than their own--and the issues implicit in doing that work. Work from across the political spectrum will be addressed.

#### **WRCT250G Topics in Journalism: Literary Journalism**

In this course, we will explore the art and craft of magazine-length journalism that strives to do something different than reporting the news--it aspires to achieve the goals of literature. While this kind of writing tends to be timely, as almost all journalism must be when it's first published, at its best, it ought to

be worth reading for decades to come. Truman Capote, for example, conceived of *IN COLD BLOOD*, which he first published as a series of articles in *THE NEW YORKER* in 1965, as a 'non-fiction novel': a work of journalism that employed the techniques and artistry of fiction. We will study the writing of new journalists such as Joan Didion, Tom Wolfe, Nora Ephron, and Gay Talese, who pioneered the idea that there is no such thing as unbiased reporting: The writer can't help but bring a point of view to his or her storytelling, so why not admit it? These writers broke with journalistic convention and admitted that there was an 'I' behind the typewriter, a mediator between the 'true' story and the reader. We will focus on reading and writing two forms in particular, the profile and the essay. While an excellent profile can be a straightforward examination of another person and his or her place in the world, in the hands of a master like Janet Malcolm or George Trow, it can become an eruption of invention. Essays ask a question or argue a point--but how? There are as many ways as there are writers who explore the form, and in this course we will seek to join them.

#### **WRCT250H Topics in Journalism: Writing Op-Ed Pieces and Political Essays**

This course offers practice in writing op-eds and political essays in short and long forms. This class may be of interest not only to writers but also to students studying political science, history, economics, ethics, sociology, or an interdisciplinary field, such as American studies. The main goal of this class is teaching students how to engage in debate in the public sphere over the major themes and issues of our time. Other than an intense reading schedule and a writing workshop, the other major component will be guest speakers. They include journalist, essayists, and scholars working in their fields but with an authoritative presence in the public sphere.

#### **WRCT250K Topics in Journalism: Writing, Wit, and the Natural World**

This course will engage students as readers and writers of essays, opinion pieces, and long-form articles about the natural world. We live in the shadow of climate change and the sixth great extinction event. So when is outrage effective, and when does wit or irony allow a writer to find a more persuasive voice? What's the role of objectivity in a world where everybody seems to be shouting? We will consider the work of such writers as Gerald Durrell, David Quammen, Elizabeth Kolbert, and Peter Matthiessen. Students will also write regularly and collaborate together in class to critique and improve one another's work.

#### **WRCT250M Topics in Journalism: Storytelling and Social Change**

How did a TV show help reduce the rate of teen pregnancy to the lowest point in recorded history? Why did a new narrative approach to gay marriage enable the movement to go from losing 31 state referendums to suddenly winning? Storytelling, across mediums and social platforms, has the power to change behavior and shift the cultural narrative. This class will explore the nature of 'effective' stories, across a wide variety of issues, that engage audiences and often prompt action. We will discuss how this process works and ways to develop social impact campaigns. Students will have the chance to question some of the leading creators/practitioners who will join as guest speakers.

#### **WRCT250P 'It's a Mess': An Academic and Practical Look at Digital Media in the Late 2010s**

Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than

in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and 'Fake News'--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

#### **WRCT250R First Person Singular**

This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebald, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koepfel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: <https://petergodwin.com/about/>

**WRCT250V The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn**

In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated--'the media has been democratized'--and reviled--'the media is too fractured and people are living in information bubbles.' The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism. The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise. This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, both on their own and in collaboration with other students.

**WRCT264 Creating Children's Books I**

In this course each student will create and illustrate a children's book, at the picture book or illustrated chapter book level. Assignments include examining a variety of children's books (from 1930 to the present) and emulating specific authors and illustrative techniques as we develop original work. We will

discuss both text and illustration in published picture books, and the creative assignments and workshop discussions will focus on both components, and their interaction. We will look at a range of questions: What is this book for? Who is it for? Does it appeal to children and adults in different ways? What assumptions does it make about the world of childhood and the relationships children have? How does it obscure, reveal, comment on, or attempt to change the truths of life--things like love, desire, satisfaction, hurt, difference, sickness, and death? What values or norms does it establish--or subvert? What do the words and pictures do to each other? What values or expectations are at stake as the story or pattern unfolds? We will use questions like these to help drive our experiments and revisions as we workshop all stages of our books.

**WRCT300 Integrative Learning Project 2: Senior Capstone**

The Integrative Learning Project is a .50 credit course that allows students to learn to describe in a coherent and engaging narrative the various academic and non-academic activities, projects, and experiences that have been important for them while in college and to practice doing so for a variety of audiences (e.g. employers, graduate schools, etc.). Participants should be students who are interested in crafting a narrative about their personal and intellectual development, and who want to be able to talk about what skills they have cultivated during their time at Wesleyan and what they still want to learn.

This course is intended for seniors who wish to document and reflect about their work in a single 'capstone' experience. This course requires a willingness to discuss one's strengths, achievements, weaknesses, and failures. Students will not only engage in reflection about their skills and experiences, but will also have the opportunity to design an online portfolio in WordPress, the world's most popular content management software, and test the portfolio with different audiences by employing user experience design (UX) principles and research methodologies. Students can only take this course once.

**WRCT302 All the Feels: Affect Theory and Cultural Studies**

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we witness and manage sensorial experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the seemingly individualized experience of feeling and the social world of power by introducing students to the vibrant field of affect studies. A recent 'turn' in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to ultimately contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

**WRCT303 Artifacts of US Empire: Post-Cold War Narratives of Migration and Multiethnic Literature**

This course focuses on post-cold war literature about migrating to the US. By reading diasporic fiction coming out of and about Indian, Iranian, Cuban, Dominican, Filipino, Vietnamese, and Korean diasporas, students will examine how stories of migrating to the US are noteworthy artifacts of US empire. Importantly, we will question the ways in which these texts are tasked with the work of representing empire, imperialism, trauma, violence, and, for that matter, assimilation, meritocracy, and the US as benevolent nation-state. How do they challenge these expectations? Rescript them? Fall into their alluring traps?

**WRCT317 Special Topics: Plot**

In this special topics course, we will study classic and contemporary novels, stories, and television dramatic series that immerse the reader and viewer in an absorbing fictional plot. Our priorities will be close reading and watching for the pleasure and enlightenment of the works as wholes, as well as an examination of the choices storytellers make to snag our imaginations, drag them into a fictional world, and keep them there. The study will culminate in new creative work: short stories you will write and the class will critique in a workshop setting.

**WRCT347 Special Topics: Day Books, Diaries, Notebooks, Etc.**

This class will take as its focus both creatively and critically the daily and episodic tracking of our own and others' insights, observations, inspirations, motivations; incidents and encounters that seem worthy of (personal) note, whether this be for instant gratification, imprint, or later expansion, simple records as well as flights of writing. We will read and keep journals of various kinds. Very little will be out of bounds.

**WRCT350 Writing Certificate Senior Seminar: Writing and Publishing**

This is the required capstone for the Writing Certificate Program. This new version of the course offers you an opportunity to develop your writing, work closely with other certificate seniors, and receive advice from professionals about editing and compiling work for publication. Visiting writers and editors will speak in class and the schedule includes several social occasions--receptions, talks, and dinners. Guest speakers from the world of writing and publishing will talk about their experiences with new media.

**WRCT500 Writing as a Multilingual Graduate Student**

This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

# PRIZES

**George H. Acheson and Grass Foundation Prize in Neuroscience** • Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

**Alumni Prize in the History of Art** • Established by Wesleyan alumni and awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

**American Chemical Society Connecticut Valley Section Award** • Awarded for outstanding achievement to a graduating chemistry major.

**American Chemical Society Undergraduate Award in Analytical Chemistry** • Awarded for excellence in analytical chemistry.

**American Chemical Society Undergraduate Award in Inorganic Chemistry** • Awarded to an undergraduate student in inorganic chemistry to recognize achievement and encourage further study in the field.

**American Chemical Society Undergraduate Award in Organic Chemistry** • Awarded to a senior who has displayed a significant aptitude for organic chemistry.

**American Chemical Society Undergraduate Award in Physical Chemistry** • Awarded in recognition of outstanding achievement by undergraduate students in physical chemistry, and to encourage further pursuits in the field.

**American Institute of Chemists Award** • Awarded for outstanding achievement to a graduating chemistry major.

**American Society for Biochemistry and Molecular Biochemistry Honor Society** • The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

**Ayres Prize** • The gift of Daniel Ayres, Class of 1842, to the first-year student who attains the highest academic standing in the first semester.

**Baden-Württemberg—Connecticut Sister State Exchange** • A grant for one academic year's study at a university in the German state of Baden-Württemberg, administered by the Connecticut Department of Higher Education.

**Baldwin Fellowship** • Established in 1952 by family and friends of Horace Reed Baldwin, Class of 1947, and awarded annually for study at law school to the member of the senior class who, in the opinion of the committee, shows the most promise of becoming an outstanding lawyer and public-spirited citizen.

**Beinecke Scholarship** • Awarded by the Sperry Fund for graduate study in the arts, humanities, and social sciences.

**Bertman Prize** • Established in memory of Bernard T. Bertman, associate professor of physics, by gifts from his colleagues, family, and friends, in 1970. Awarded to a senior majoring in physics who displays a particularly resourceful and creative approach to physics research.

**Best Honors Thesis in Sociology Award** • Established by the Department of Sociology to honor Herbert H. Hyman, distinguished scholar, pioneer in survey research methodology, and Professor Emeritus in the Department of Sociology.

Awarded annually to students, whether sociology majors or not, who in the opinion of the faculty have written outstanding theses on a sociological topic.

**Best Paper Prize in Sociology** • Awarded annually to students who have written the best scholarly papers in sociology in the previous year.

**Blankenagel Prize** • Income from the John C. Blankenagel Fund, established in 1970, awarded at the discretion of the Department of German Studies to enrich educational offerings in the area of humanistic studies, or to assist a superior student in completing a project in German studies.

**Boylan Award** • Given by Jennifer Boylan in honor of her classmate, Annie Sonnenblick, the award recognizes an outstanding piece of creative nonfiction, journalistic work, or writing for general readers.

**Bradley Prize** • The gift of Stanley David Wilson, Class of 1909, in memory of Professor Walker Parke Bradley, to the senior or junior who excels in chemistry and particularly in special original work.

**Bridge Builder Award** • Awarded to a student and student group who have succeeded in strengthening the relationship between Wesleyan and the greater Middletown community.

**Briggs Prize** • Established in 1900 by the gift of James E. Briggs, to the student who has done the most effective work in intercollegiate debating.

**Professor Samuel Hugh Brockunier Prize** • Awarded for the best final essay on a social studies topic by a student in the Graduate Liberal Studies program.

**Christopher Brodigan Fund Award** • Established in memory of Christopher Brodigan, a Wesleyan student who died in an accident in his freshman year. The fund pays tribute to Christopher's deep interest in Africa and to the public service he provided through teaching in Botswana prior to entering Wesleyan. Awarded to graduating seniors and recent graduates who plan to pursue public service or research in Africa.

**Erness Brody Prize** • Established in 2002 by Ann duCille in honor of Professor Erness Bright Brody, former chair of the African American Studies Program. Awarded annually to a senior African American Studies Program major for excellence in written expression.

**Bruner Freshman Improvement Prize** • The gift of William Evans Bruner, Class of 1888, to the student whose second-semester first-year record shows the greatest relative improvement over that of the first semester.

**Butler Prize** • The Butler Prize, established in 1991 in honor of retiring colleague Jeffrey D. Butler, is awarded for the best Honors thesis in African, Asian, or Latin American history.

**Butterfield Prize** • Established by the Class of 1967 and awarded to the graduating senior who has exemplified those qualities of character, leadership, intellectual commitment, and concern for the Wesleyan community shown by Victor Lloyd Butterfield, eleventh president of the University.

**Camp Prize** • Established in 1905 by the Board of Trustees in memory of Samuel T. Camp, trustee 1880–1903. Awarded for excellence in English literature.

**Nancy Campbell/National Trust for Historic Preservation Summer Internship Program** • Established by friends and admirers in honor of Nancy Campbell, wife of former Wesleyan University President Colin Campbell, in recognition of her national leadership in historic preservation, and awarded to rising juniors or rising seniors.

**Frank Capra Prize** • Established in 1983 to honor Frank Capra, Hon. 1981, the great American film director whose collected papers are in the Wesleyan Cinema

Archives. Best film to exemplify Capra's skill in telling a human story that contains both humor and pathos.

**Cardinal Crest Award** • Awarded to the member of the WSA who has given honor to his/her post on the WSA or one of its committees through his/her leadership, and has selflessly served the greater interest of the Wesleyan student body.

**Chadbourn Prize** • The gift of George Storrs Chadbourn, Class of 1858, to that member of the first-year class outstanding in character, conduct, and scholarship.

**Citation of Citizenship in the Department of Mathematics and Computer Science** • Recognizes those students studying mathematics or computer science, whose contributions both aid the educational mission of the department and foster a sense of community that encourages and supports all members of the department.

**Clark Fellowship** • Established in memory of John Blanchard Clark by his parents, Mr. and Mrs. Donald L. Clark of Pittsford, New York; his sister, Catherine; relatives; and friends. Awarded annually to a qualified graduating senior of Wesleyan University for graduate study in a school of medicine. Recipients are judged by members of the Health Professions Panel on their potential for outstanding achievement, their promise of community leadership and public-spirited citizenship, and their scholastic record at Wesleyan.

**Clee Scholarship** • Established by friends and associates of Gilbert Harrison Clee, Class of 1935, late president of the Board of Trustees. Awarded annually to a member of the junior class, who will remain a Clee Scholar throughout his or her junior and senior years, who will have demonstrated high standards of leadership, a deep commitment to Wesleyan University, an interest in the broad implications of multinational business enterprises, a sensitivity to the need for a creative balance between the public and private sectors, and an intention to pursue a career in business. A specific objective will be to select individuals who exemplify the qualities that characterized Gilbert Harrison Clee as a humane person and as a leader.

**Dr. Neil Clendeninn Prize** • Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed his or her sophomore year and in that time have exemplified those qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

**Cole Prize** • Established through the gift of George Henry Walker, Class of 1881, in the memory of Charles Edward Cole. Awarded to the first-year student who shows the greatest ability in fiction or nonfiction writing.

**Connecticut Higher Education Community Service Award** • Established in 1993 by the Connecticut Department of Higher Education to promote community service leadership and activities by students at Connecticut's institutions of higher education. This award recognizes outstanding student contributions to the promotion of community service through projects that increase student participation in their college community and projects that develop a unique approach to effective community service.

**Herbert Lee Connelly Prize** • Given in 1980 by Mabel Wells Connelly in the name of her husband, a member of the Class of 1909 and alumni secretary, 1924–56. Supplemented by friends, relatives, and sons Hugh Wells and Theodore Sample '48, the fund provides income to be awarded annually to a deserving undergraduate who demonstrates an interest in English literature and an unusual ability in nonfiction writing.

**CRC Award for Outstanding First-Year Chemistry Students** • Awarded to an outstanding first-year chemistry student, based on grades in organic chemistry over the interval of the current academic year.

**Davenport Prize** • Established in 1948 by the gift of Ernest W. Davenport in honor of his brother, Frederick Morgan Davenport, Class of 1889, for excellence shown by seniors in the field of government and politics.

**Dorchester Prize** • Established through the gift of Daniel Dorchester IV, Class of 1874. Awarded for the best thesis submitted to the English department.

**W. E. B. Du Bois Prize** • Awarded annually for academic excellence to a student majoring in African American studies.

**Dutcher Prize** • Established by gift of Arthur A. Vanderbilt, Class of 1910, in honor of Professor George Matthew Dutcher, for highest excellence in the history department.

**Kevin Echart Memorial Book Prize** • Awarded to the graduating College of Letters senior who best exemplifies the intellectual curiosity and range, the pleasure in colloquy, the capacity for admiration and skepticism, and the moral seriousness and love of books that we honored in our late colleague Kevin Echart and seek to foster in the students of the College of Letters.

**Exceptional Program of the Year Award** • Awarded to the coordinator(s) of an exceptional program, cultural event, speaker, or production that has had positive campus-wide impact.

**William Firshein Prize** • Awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry Department.

**First-Year Leadership Award** • Awarded to a first-year student who has demonstrated outstanding leadership or involvement in the Wesleyan community.

**Susan Frazer Prize** • Awarded annually to the student (or students) who has done the most distinguished work in the elementary and intermediate French language sequence.

**Freeman Prize** • Established in 1975 by Mansfield Freeman, Class of 1916. Awarded annually to a senior for excellence in East Asian studies.

**French Government Teaching Assistantship** • One-year assistantship for teaching English at a *lycée* in France, administered by the Institute for International Education (New York).

**Beulah Friedman Prize** • This prize recognizes work of outstanding achievement by a student in the history of art. The prize is awarded to a member of the senior class.

**Friends of the Wesleyan Library Undergraduate Research Prize** • Established in 2017 to recognize research projects in any field (besides honors theses) in any field that demonstrate outstanding and creative use of Wesleyan's library collections and resources.

**Fulbright Fellowship** • These grants are funded by the United States government under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act) and by many foreign countries. The grants, administered by the Institute for International Education, provide for one year of study at a university abroad.

**Fulbright-Hays Doctoral Dissertation Research Abroad Grant** • Awarded by the United States Department of Education to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of six to twelve months.

**Fulbright Teaching Assistantship** • Placement abroad providing classroom assistance to English-language teachers who also serve as cultural ambassadors for the United States.

**Gay, Lesbian, and Sexuality Studies Prize** • Donated by the Wesleyan Gay and Lesbian Alumni Association (GALA), this prize is awarded annually to the undergraduate who has done the best research and writing on a subject in gay, lesbian, and sexuality studies.

**German Academic Exchange Service Fellowship** • At least one fellowship per year for study at a German university. The German Academic Exchange Service is a private, self-governing organization of German universities, which promotes international exchange among institutions of higher learning.

**German Pedagogical Exchange Service Assistantship/Fulbright Grant** • A one year teaching apprenticeship in Germany.

**Giffin Prize** • Established in 1912 by a gift of Mrs. Charles Mortimer Giffin, in memory of her husband, an honorary graduate of the Class of 1875. Awarded for excellence in the Department of Religion.

**Akiva Goldsman Prize in Screenwriting** • Awarded to the graduating film studies major who has written the best full-length screenplay in the Department of Film Studies.

**Barry M. Goldwater Scholarship** • Awarded by the Barry M. Goldwater Scholarship and Excellence in Education Foundation to a college student who has outstanding potential and intends to pursue a career in mathematics, the natural sciences, or engineering.

**Graduate Student of the Year Award** • Awarded to a graduate student who has proven to be a vital and dynamic member of the Wesleyan community through taking on an active leadership role in campus life.

**Graham Prize** • The gift of James Chandler Graham, Class of 1890, awarded to a member of the graduating class for excellence in natural science.

**Grant/Wilcox Prize** • Awarded in honor of Connecticut filmmakers Ellsworth Grant and Roy Wilcox to the senior whose work in film and video best addresses significant environmental, social, or artistic issues.

**James T. Gutmann Field Studies Scholarship** • Established in 2007 by Lisette Cooper '81, to honor her former professor and mentor, James T. Gutmann. Awarded to an especially promising major in earth and environmental sciences to support geologic field research expected to lead to a senior honors thesis.

**Hallowell Prize** • Established by friends and associates of Burton C. Hallowell, Class of 1936, former professor of economics and executive vice president of the University. Awarded annually to an outstanding senior in the study of social science, as determined by the governing board of the Public Affairs Center.

**Sarah Hannah Prize** • Offered in memory of Sarah Hannah '88, in association with the Academy of American Poets, and awarded for an outstanding poem.

**Hawk Prize** • The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

**Health Education Prize** • Awarded annually to the graduating senior who best exemplifies the goals of Wesleyan's Health Education Program, which are the promotion of healthy lifestyles and disease prevention. The student who is chosen for this prize has demonstrated commitment not only to his or her personal well-being but has also served as a role model to peers in the Wesleyan community and beyond.

**Heideman Award** • Established in 1972, in honor of Enid and Walter Heideman. Awarded annually to an undergraduate who has helped others in the Wesleyan community, in the tradition of the Heidemans.

**Rachel Henderson Theater Prize** • Awarded annually to that student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of his or her undergraduate career.

**Holzberg Fellowship** • Established in memory of Jules D. Holzberg, professor of psychology, by gifts of his colleagues and friends. Awarded to a senior who intends to pursue graduate study in clinical or community psychology in recognition of the commitment to research and applied work on the resolution of social problems on the individual and collective level that is consistent with Professor Holzberg's lifelong professional interests and humanitarian concerns.

**Horgan Prize** • Established by the Department of English in honor of Paul Horgan, professor emeritus and writer-in-residence. Awarded to the student who has written the best short story of the year.

**Ingraham Prize** • The gift of Robert Seney Ingraham, Class of 1888, and his wife, for excellence in New Testament Greek or, in years when a course in that subject is not given, for excellence in a course in Greek elective for juniors and seniors.

**Jessup Prize** • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

**Johnston Prize** • The gift of David George Downey, Class of 1884, in memory of Professor John Johnston. Awarded to those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

**Keasbey Memorial Scholarship** • Awarded by the Keasbey Memorial Foundation on the basis of academic excellence and a strong record of extracurricular participation for two years of graduate study in England.

**P. L. Kellam Prize** • Established in memory of Priscilla L. Kellam '83, by her husband. Awarded annually to a senior woman, under the age of 25, who has majored in East Asian studies and has traveled or plans to travel to China to further her studies.

**Barry Kiefer Prize** • In memory of Barry I. Kiefer to celebrate outstanding graduating PhD students in biology and molecular biology and biochemistry.

**Leavell Memorial Prize—Film** • Awarded annually to a senior film student who has done outstanding work in the major, and who best reflects the departmental goals of citizenship, scholarship, and the wedding of theory and practice.

**Leavell Memorial Prize—Music** • Awarded annually to a senior who has done outstanding work in music, and whose work manifests the ideals of the World Music Program in the Department of Music.

**Lebergott-Lovell Prize** • In honor of Professors Emeritus of Economics Stanley Lebergott and Michael Lovell. To be awarded to the best paper written in the current academic year that uses econometric techniques to analyze an economic problem. Established in 2011 by Bruce Greenwald; first awarded in 2012.

**Leonard Prize** • Given in 1917 in memory of William Day Leonard, Class of 1878, by his friends. Awarded annually to the member of the WSA who has given honor to his or her post on the WSA or one of its committees through his or her

leadership, and has selflessly served the greater interest of the Wesleyan student body.

**Levy-Spira Prize** • Awarded for distinction in Latin American studies. Established in 1992 in memory of Eduardo Levy-Spira '82, by his family and friends.

**Limbach Prize** • Established in 1966 by Russell T. Limbach, professor of art, in memory of his wife, Edna Limbach. Awarded annually to the student who has contributed the most imaginative, generous, thoughtful, and understanding social service to the people of the city of Middletown and/or the Wesleyan community.

**Lipsky Prize** • The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unfailing kindness, quiet dignity, and brilliant scholarship.

**Littell Prize** • The gift of Franklin Bowers Littell, Class of 1891, for excellence in one or more advanced courses in astronomy.

**Luce Scholarship** • The Henry Luce Foundation selects 18 graduates to spend a year in an Asian country and provides an experience that will broaden the participant's perspective on his or her chosen career field.

**Macmillan Scholar of Saint Andrew's Society of the State of New York** • Awarded by the Saint Andrew's Society of the State of New York, this scholarship enables outstanding college graduates of Scottish descent to engage in a year of graduate study in Scotland.

**John W. Macy Summer Internship in Public Administration** • Established by friends and colleagues of John W. Macy, Class of 1938. Awarded to the junior who most clearly exemplifies, in the decision of the selection committee, the characteristics associated with John Macy: high intellectual ability, a capacity for sustained effort in difficult tasks, strong ethical standards, an ingrained sense of duty, and a commitment to public service as a worthy career.

**Mann Prize** • Established in memory of Albert Mann, Class of 1906, devoted alumnus and faculty member, by his daughters and their families. Awarded annually to the senior(s) showing the most outstanding achievements in the Romance languages.

**George C. Marshall Scholarship** • Awarded annually for two years of study at any university in the United Kingdom, on the basis of distinction of intellect and character as evidenced by both scholastic attainments and other activities and achievements; strong motivation and seriousness of purpose; and the potential to make a significant contribution to one's own society.

**Martius Yellow Award** • Awarded for excellence in organic synthesis.

**Roger Maynard Award** • A memorial award to that senior scholar-athlete who best exemplifies the spirit, accomplishments, and humility of Roger Maynard, Class of 1937, former trustee.

**James L. McConaughy Writing Prize** • Awarded for a piece of nonfiction writing, on a topic in the social sciences or sciences, that is designed to interest general readers. Funds for this award were given originally by members of the Class of 1936 in honor of their classmate, James L. McConaughy, a former governor of Connecticut and president of Wesleyan University.

**Richard McLellan Prize** • Awarded annually to a junior who exemplifies those qualities that characterize the late Richard McLellan, director of the Career Planning Center and associate dean of the college: character, leadership, commitment to public service and diversity, wide cultural interests, and a sense of humor.

**Priscilla Meyer Fund** • Established in honor of Professor Priscilla Meyer's teaching career at Wesleyan. Awarded to Wesleyan students who are the most dedicated to the study of topics related to Russia, Eastern Europe, or Eurasia.

**Meyer Prize** • Established in 1991 in honor of retiring colleague Donald A. Meyer, and awarded for the best honors thesis in American History.

**Joan W. Miller Prize** • Established by Professor Miller in 2008. It is awarded for the outstanding honors thesis in the College of Social Studies.

**Richard A. Miller Summer Internship Grant** • Awarded in honor of Woodhouse/Sysco Professor of Economics Richard A. Miller to students pursuing summer internships related to potential business careers.

**George J. Mitchell Scholarship** • Awarded annually for one year of graduate study in any discipline offered by an institution of higher learning in Ireland or Northern Ireland on the basis of superior records of academic excellence, leadership, and public service.

**Monroe Prize** • Established in 1985 by the Center for African American Studies in memory of John G. Monroe, director, scholar, and teacher in the Center for African American Studies and in the Theater Department. This prize is to be awarded annually to the Wesleyan sophomore or junior who, in the opinion of the review committee, submits the best scholarly essay in the field of African American studies.

**Janina Montero Prize** • Awarded annually to a Latino student who has promoted the health, visibility, and participation of the Latino community at Wesleyan. The individual should best exemplify personal integrity, leadership, and motivation; a strong interest in and knowledge of his or her background; and have maintained a high level of commitment to Wesleyan's academic and intellectual enterprise.

**David Morgan Prize** • To be awarded annually to the senior major or majors in the College of Social Studies (CSS) and/or the history department who best demonstrated the integrity and commitment to community that characterized David's 37 years of service to the CSS, his department, and to the University.

**Peter Morgenstern-Clarren Social Justice Award** • Awarded to a sophomore or junior with a demonstrated commitment to social justice issues.

**Mosaic Award** • This award recognizes the contribution(s) of a person or organization that has brought about cultural awareness and education on one or more of the following issues: race, ethnicity, culture, and/or sexual orientation.

**Geraldine J. Murphy Prize** • Established in memory of Geraldine J. Murphy, who was the first woman hired as a full-time instructor at Wesleyan (1957), the first woman promoted to a tenured position, and the first woman promoted to the rank of full professor. The prize is endowed by alumni of the Wesleyan Master of Arts in Teaching program. Awarded to a student who has written an outstanding critical essay that focuses on short fiction or novels.

**Needler Prize** • Established by Sophie Needler, in memory of her husband, Bennett Needler. Awarded annually to one or two graduating seniors who have demonstrated excellence in Hebrew or Jewish studies.

**NNK Award** • Awarded for the best screenplay for an undergraduate film.

**Carol B. Ohmann Memorial Prize** • Awarded for excellence in feminist, gender, and sexuality studies.

**Olin Fellowship** • Founded in 1854 by the wife of Stephen Olin, president, 1839–41 and 1842–51. Later increased by gifts of their son, Stephen Henry Olin, Class of 1866 and acting president, 1922–23, and his wife, Emeline. Awarded in recognition of achievement in English. The fellowship supports supervised work in English outside of the Wesleyan course structure.

**Outreach and Community Service Award** • Awarded to the senior theater major who, through his or her work in the Theater Department, has done a significant service in the community.

**Outstanding Collaboration Award** • Awarded for a program that was successfully planned in the spirit of partnership and teamwork.

**Parker Prize** • Established in 1870 by the Reverend John Parker, trustee 1859–71. Awarded to a sophomore or junior who excels in public speaking.

**Peirce Prize** • Awarded in successive years for excellence in biology, chemistry, and geology.

**Emily White Pendleton Scholarship** • Established in 1979 by Ralph Darling Pendleton, founder of the Theater Department, in memory of his wife. Awarded annually to a dance major or to a student who is significantly involved in dance and who shows outstanding promise in the field.

**Peterson Fellowship** • Established in 1963 by bequest of William Harold Peterson, Class of 1907, for graduate study in biochemistry at Wesleyan.

**Plukas Prize** • Established in 1986 by John Plukas, Class of 1966, this prize is awarded to graduating economics seniors to be applied toward summer expenses, during which period each student will work under the supervision of a faculty advisor to convert an honors project into a publishable article.

**Plukas Teaching Apprentice Award** • Established in 1986 by John Plukas, Class of 1966, this prize is awarded for excellent service to the economics department as a teaching apprentice.

**Gwen Livingston Pokora Prize** • Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

**Prentice Prize** • The gift of Mrs. Elizabeth Brooks Prentice in memory of Professor George Prentice to that junior or senior who excels in German. This prize is given in alternate years.

**The Wallace C. Pringle Prize for Research in Chemistry** • Gift of Eleanor and Wallace Pringle and their family and friends. This prize is to be awarded annually by the chemistry department to a student for excellence in research.

**Sophie and Anne Reed Prize** • Established in 1968 by Leon Reed and his sons, S. Chadwick '41 and Dr. Victor Reed, in memory of Mrs. Sophie Reed, for the best poem or group of poems.

**Damain Garth Reeves Memorial Book Prize** • Awarded to the first-year student who best embodies the personal and intellectual qualities of Damain Reeves, Class of 2000.

**Rhodes Scholarship** • Two years of study at Oxford University, awarded on the basis of high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership, and physical vigor.

**Rice Prize** • Awarded for excellence in mathematics to a senior.

**Michael Rice Prize in Computer Science** • Endowed in 2008 by the Fernando and Appapillai families in honor of Dr. Michael D. Rice and awarded to a senior for excellence in computer science.

**Rich Prize** • The gift of Isaac Rich, trustee 1849–72, in memory of his wife, and later supplemented by appropriations from the Board of Trustees. Awarded to those seniors whose orations are judged best in composition and delivery.

**Robertson Prize** • Awarded to a sophomore for excellence in mathematics.

**Robins Memorial Prize** • Established in 1969, in memory of George D. Robins (Class of 1898), by Frank D. Robins '34 and Douglas H. Robins '66, for excellence in history.

**Steven J. Ross Prize** • Established in 1979 as a gift of Steven J. Ross of Warner Communications. Awarded annually for the best undergraduate film, digital and/or virtual, made in the Film Studies Department.

**Juan Roura-Parella Prize** • Established in 1984 to be awarded annually to an undergraduate whose work represents the kind of catholic curiosity and general learning that Professor Juan Roura-Parella exemplified.

**Rulewater Prize** • Awarded for outstanding reflection and writing on an interdisciplinary topic in the Graduate Liberal Studies program.

**Robert Schumann Distinguished Student Award** • Established in 2007 by a gift from the Robert Schumann Foundation. Awarded to an outstanding student who demonstrates academic accomplishment and excellence in environmental stewardship through work at Wesleyan or the greater Middletown community.

**Scott Biomedical Prize** • Awarded to a member(s) of the molecular biology and biochemistry senior class who has demonstrated excellence and interest in commencing a career in academic or applied medicine.

**Scott Prize** • Established by Charles Scott Jr., MA, Class of 1886, and trustee 1905–22, in memory of John Bell Scott, Class of 1881, for excellence in modern languages.

**Mary and John Sease Prize** • Awarded for outstanding work in environmental science.

**Sehlinger Prize** • Established by the Class of 1965 in memory of Charles Edward Sehlinger III, who died in 1964. The award of a medical dictionary is given to a premedical student for excellence of character, community spirit, and academic achievement.

**Senior Legacy Award** • Awarded to a senior who has consistently demonstrated outstanding leadership throughout his or her four years in the Wesleyan community.

**Frances M. Sheng Prize** • Awarded for excellence in Chinese language and excellence in Japanese language.

**Sherman Prize—Classical Studies** • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

**Sherman Prize—Math** • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

**Rae Shortt Prize** • Established in memory of Rae M. Shortt. Awarded to a junior for excellence in mathematics.

**Samuel C. Silipo Prize** • Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

**Silverman Prize** • Established by gift of Elisha Adelbert Silverman, Class of 1922, and awarded to a member of the junior or senior class for excellence in chemistry.

**Skirm Prize** • Established by members of the Class of 1931 in memory of their classmate, Thomas H. Skirm, this prize is awarded to a government major early in his or her senior year, to recognize the best research or writing project done during the junior year.

**Social Activist Award** • Awarded to the individual or student group who best exemplifies the spirit of social activism and through whose efforts constructive social change ensued.

**Annie Sonnenblick Writing Award** • Established by the family of the late Annie Sonnenblick, Class of 1980, in 1992 as a complement to the annual Annie Sonnenblick Lecture. The prize provides financial support for a student who wishes to undertake an independent writing project during the summer between his or her junior and senior years.

**Spinney Prize** • The gift of Joseph S. Spinney, trustee 1875–82 and 1888–93, for excellence in Greek. Awarded for the best original essay on some aspect of Greek or Roman civilization.

**Spurrier Award** • The William A. Spurrier Ethics Award, established by Dr. James Case, given to the student who demonstrates in the field of ethics: sensitivity, insight, depth, and humor. Given in memory of William Spurrier III, chaplain and Hedding Professor of Moral Science and Religion.

**Student Organization of the Year** • Awarded to a student organization that has excelled in sustaining leadership, an active membership, and programmatic efforts that contribute to the larger Wesleyan community.

**Studio Art Program Prize** • Awarded to one or more students who show particular promise for success as demonstrated through performance in classes and general contributions to the department.

**Taylor Scholarship** • Awarded to a history major based on outstanding academic achievement and other qualities such as fine character, good fellowship, leadership, and service to the Wesleyan community.

**Thorndike Prize** • Established by a gift of Elizabeth Moulton Thorndike in memory of her husband, Edward Lee Thorndike, Class of 1895, for excellence in psychology.

**Tishler Teaching Award** • Established by the family and friends of Dr. Max Tishler, professor emeritus of chemistry and University Professor of the Sciences, emeritus. Awarded annually in his memory to the best graduate teaching assistant in chemistry.

**Elizabeth Verveer Tishler Prize—Art** • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

**Elizabeth Verveer Tishler Prize—Music** • Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance. Two prizes are given annually: one for Western classical piano performance and the other for jazz piano performance.

**David A. Titus Memorial Prize** • Established by family, friends, and students in memory of Professor David Titus to support the summer studies of a deserving Wesleyan junior majoring in government, East Asian studies, or the College of Social Studies.

**Shu Tokita Prize** • Established by friends and relatives of Shu Tokita, Class of 1984, and awarded to students of color studying literature and in area studies with a focus on literature. The recipient will be selected on the basis of his or her application essay and commitment to the study of literature.

**Tölölyan Fund for the Study of Diasporas and Transnationalism** • Established in 2008 by Bruce Greenwald, professor of economics at Columbia Business School, in honor of Wesleyan Professor Khachig Tölölyan. The award funds the summer research of a junior with the best proposal for a thesis on the study of diasporic or transnational issues.

**Trench Prize** • The gift of Miss Grace A. Smith, in memory of William James Trench, trustee 1835–67, for excellence in the Department of Religion.

**Truman Scholarship** • A national competition funded by the United States government that provides scholarships for graduate study to juniors who have outstanding leadership potential and intend to pursue careers in public service.

**Kenneth W. Underwood Prize in Social Ethics** • Awarded to the College of Social Studies (CSS) student selected to discuss a paper on the subject of social ethics delivered by a guest scholar at one of the two annual CSS banquets.

**United States Teaching Assistantship in Austria** • One-year assistantship for teaching English in Austria, funded by the Austrian government.

**Karl Van Dyke Prize** • Awarded each year to one or more students majoring in physical science or having a predominant interest in physical science and technology and who show outstanding achievement in academic work and a promise of productivity in a professional career.

**Vanguard Prize** • Established by black alumni in tribute to the black members of the Class of 1969, whose perseverance and pioneering leadership earned them designation as the Vanguard Class. The prize is awarded annually to a graduating senior who has achieved academic excellence and contributed significantly to maintaining Wesleyan's racial diversity.

**Walkley Prize** • Two prizes, the gift of Webster Rogers Walkley, Class of 1860, in memory of David Hart Walkley, Class of 1878, for excellence in psychology. Awarded to those juniors and seniors who present the best reports or work embodying original research.

**Watson Fellowship** • Awarded by the Thomas J. Watson Foundation, to enable college graduates of unusual promise to engage in an initial postgraduate year of independent study and travel abroad.

**Weidenfeld Scholarship** • The Weidenfeld Scholarship supports all tuition fees and living costs associated with graduate study at Oxford University. It fosters European networks and promotes the post-university careers of its scholars through work placements, long-term mentoring, and engagement in leadership and conferences.

**Weller Prize** • The gift of Mrs. LeRoy Weller, in memory of her husband, LeRoy Weller, Class of 1899, to the student having the highest academic average for the sophomore year.

**Wesleyan Animal Studies Prize** • Awarded for the best thesis or senior essay on a subject in animal studies.

**Wesleyan Black Alumni Council Memorial Prize** • Established in 1986 by the Wesleyan Black Alumni Council in memory of deceased black alumni. The prize provides a summer stipend to support a deserving student engaged in independent study or community service related to the concerns of black people.

**Wesleyan Fiction Award** • A gift from Norman Mailer to the Wesleyan Writing Program, this award recognizes an outstanding piece of fiction written by a Wesleyan student.

**Wesleyan Memorial Prize** • The gift of undergraduates in the Class of 1943 in memory of fellow students who made the supreme sacrifice in the Second World War, to the members of the junior class outstanding in qualities of character, leadership, and scholarship.

**White Fellowship—Government** • Awarded for excellence in government to a graduate or an advanced undergraduate in government.

**White Fellowship—History** • Awarded for excellence in history.

**White Prize** • Established in 1942 by Horace Glenn White Jr., Class of 1933, and increased in 1943 by friends in his memory. Awarded for advanced undergraduate study in economics.

**M. G. White Prize** • Awarded annually for the best thesis submitted in American studies.

**Wilde Prize** • Established in 1963 by Frazer B. Wilde, LLD, Class of 1958, awarded to a junior or senior for excellence in economics.

**Winchester ENGL 201 Essay Prize** • In honor of Caleb Thomas Winchester, this prize is awarded to the best essay written in a section of ENGL 201 in the preceding calendar year.

**Winchester Fellowship** • Established in 1938, in memory of Professor Caleb Thomas Winchester, by his widow. Awarded to Wesleyan graduates for postgraduate work in English.

**Winchester First-Year Essay Prize** • In honor of Caleb Thomas Winchester, this prize is awarded to the best scholarly essay written by a first-year student in any English department course in the preceding calendar year.

**Wise Prize** • The gift of Daniel Wise, DD, Class of 1859, for excellence in the philosophy department; for the best essay on moral science or on some subject in the field or values.

# THE FACULTY

---

## A

### Scott W. Aalgaard

BA, University of Victoria; MA, University of Victoria; MA, University of Chicago;  
PHD, University of Chicago  
Assistant Professor of East Asian Studies

### Gloster B. Aaron

BA, Oberlin College; PHD, University of Pennsylvania  
Associate Professor of Biology; Director, WesMASS; Associate Professor,  
Neuroscience and Behavior; Associate Professor, Integrative Sciences

### Carla Abdo-Katsipis

BA, Lebanese American University; MA, American University of Beirut; MA,  
University of Maryland College Park; PHD, University of Maryland College Park  
Visiting Assistant Professor of Public Policy; Visiting Assistant Professor of  
Government

### Henry Abelow

AB, Harvard University; MAA, Wesleyan University; MPHIL, Yale University; PHD,  
Yale University  
Willbur Fisk Osborne Professor of English, Emeritus

### Joseph Salvatore Ackley

AB, Dartmouth College; MA, New York University; PHD, New York University  
Assistant Professor of Art History; Assistant Professor, Medieval Studies

### David B. Adams

AB, Columbia University; PHD, Yale University  
Professor of Psychology, Emeritus

### Ilesanmi Adeboye

PHD, University of Michigan  
Associate Professor of Mathematics

### Richard P. Adelstein

BS, Massachusetts Institute of Technology; JD, University of Pennsylvania; MAA,  
Wesleyan University; MAT, Harvard University; PHD, University of Pennsylvania  
Woodhouse/Sysco Professor of Economics, Emeritus

### Abraham C. Adzenyah

BA, Goddard College; MA, Wesleyan University  
Adjunct Professor of Music, Emeritus

### Abderrahman Aissa

BA, University of Colorado Boulder; MA, University of Colorado Boulder  
Adjunct Assistant Professor in Arabic

### Pheeroan Aklaff

Private Lessons Teacher; Private Lessons Teacher/Drums

### Nadja Aksamija

BA, Beloit College; MA, Princeton University; PHD, Princeton University  
Associate Professor of Art History; Associate Professor, Romance Languages and  
Literatures

### Jane Alden

BMU, Manchester University; MMU, King's College; PHD, University of North  
Carolina at Chapel Hill  
Associate Professor of Music; Associate Professor, Medieval Studies

### Pedro Alejandro

BS, Cornell University; MFA, Ohio State University  
Associate Professor of Dance

### Irina Aleshkovsky

MA, Vilnius State University  
Adjunct Professor of Russian Language Literature, Emerita

### Daniel Alvey

BS, US Military Academy  
Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

### Cori Anderson

BS, Wheaton College; PHD, Dartmouth College  
Assistant Professor of the Practice in Molecular Biology and Biochemistry

### Talia Johanna Andrei

BA, Rutgers University; MA, Columbia University; MPHIL, Columbia University;  
PHD, Columbia University  
Assistant Professor of Art History; Assistant Professor, East Asian Studies

### Stephen Angle

BA, Yale University; PHD, University of Michigan  
Mansfield Freeman Professor of East Asian Studies; Professor of Philosophy;  
Director, Center for Global Studies; Professor, East Asian Studies

### Francesco Marco Aresu

MA, Indiana University Bloomington; MA, Stanford University; PHD, Harvard  
University  
Assistant Professor of Italian; Assistant Professor, Medieval Studies

### Michael Armstrong Roche

BA, Harvard University; MA, Harvard University; PHD, Harvard University  
Associate Professor of Spanish; Spanish Section Head; Associate Professor,  
Medieval Studies; Associate Professor, Latin American Studies

### Annemarie Arnold

Adjunct Professor of German Studies, Emerita

### Herbert A. Arnold

MAA, Wesleyan University; PHD, University of Wurzburg  
Professor of German and Letters, Emeritus

### Robyn Kimberley Autry

BS, University of Colorado Boulder; MS, Univ of Wisconsin Madison; PHD, Univ of  
Wisconsin Madison  
Associate Professor of Sociology

## B

### Sally Bachner

BA, Reed College; MA, Princeton University; PHD, Princeton University  
Associate Professor of English

### Hyejoo Back

BS, Busan National University; MED, Busan National University; PHD, SUNY at  
Albany  
Associate Professor of the Practice in East Asian Studies

### Noah Baerman

BM, Rutgers U School Arts; MM, Rutgers U School Arts  
Director, Jazz Ensemble

### Martin Baeumel

MA, University of Alabama; MA, Ludwig Maximilians University; PHD, University of Chicago

Assistant Professor of German Studies

**Ralph F. Baierlein**

BA, Harvard University; MAA, Wesleyan University; PHD, Princeton University  
Charlotte Ayres Professor of Physics, Emeritus

**B. Balasubrahmanian**

BA, University of Madras; MA, University of Madras; MPHIL, University of Madras; PHD, University of Madras  
Adjunct Associate Professor of Music

**Charles Barber**

BA, Harvard University; MFA, Columbia University  
Associate Professor of the Practice in Letters

**Rachael Barlow**

MA, Indiana University Bloomington; PHD, Indiana University Bloomington  
Associate Director for Assessment; Adjunct Assistant Professor of Academic Writing

**Joslyn Barnhart Trager**

BA, Reed College; MA, Claremont Mckenna; PHD, University of California, Los Angeles  
Associate Professor of Government

**Hilary C. Barth**

BA, Bryn Mawr College; PHD, Massachusetts Institute of Technology  
Professor of Psychology

**Joseph M. Basile**

BA, University of Connecticut; MA, New York University  
Visiting Instructor in American Sign Language

**Jeanine D. Basinger**

BS, South Dakota St University; MS, South Dakota St University  
Corwin-Fuller Professor of Film Studies, Emerita

**Robert Baumgartner**

BM, The Catholic University of America; MFA, New York University  
Visiting Artist-in-Residence in Theater

**Patricia L. Beaman**

BFA, University of Michigan; MA, New York University  
Artist-in-Residence, Dance

**Damian Bebell**

BA, Edinboro University; MED, Boston College; PHD, Boston College  
Visiting Scholar in Education Studies

**Marion Belanger**

Visiting Assistant Professor in Liberal Studies

**Chris Bell**

BA, Brown University; MA, University of West Georgia; PHD, University of West Georgia  
Visiting Assistant Professor of Psychology

**Garrett Bennett**

Private Lessons Teacher; Private Lessons Teacher/Bassoon/Saxophone

**John R. Bergeron**

Private Lessons Teacher; Private Lesson Teacher/Recording Production

**Allan Berlind**

BA, Swarthmore College; MA, Harvard University; PHD, Harvard University  
Professor of Biology, Emeritus

**Garry Bertholf**

BA, Colby College; MA, University of Pennsylvania; PHD, University of Pennsylvania  
Assistant Professor of African American Studies

**Jonathan W. Best**

BA, Earlham College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of Art History, Emeritus

**David L. Beveridge**

BA, College of Wooster; MAA, Wesleyan University; PHD, University of Cincinnati  
Joshua Boger University Professor of the Sciences and Mathematics, Emeritus;  
Co-Coordinator, Molecular Biophysics

**John E. Biatowas**

BA, Colgate University; MA, University of Connecticut  
Director, Chamber Music Ensemble

**John S. Biddiscombe**

BS, Springfield College Illinois; MED, Slippery Rock University  
Adjunct Professor of Physical Education, Emeritus

**Marina Bilbija**

BA, University of Sarajevo; MA, University of Pennsylvania; PHD, University of Pennsylvania  
Assistant Professor of English; Assistant Professor, African American Studies

**Kate Birney**

BA, Yale University; MT, Harvard University; PHD, Harvard University  
Associate Professor of Classical Studies; Chair, Archaeology; Associate Professor, Archaeology; Associate Professor, Art History

**Drew Black**

BS, Syracuse University; MA, Kent State University  
Adjunct Professor of Physical Education; Head Coach of Wrestling/Strength and Fitness Coach

**Amy B. Bloom**

BA, Wesleyan University; MSW, Smith College  
Shapiro-Silverberg Professor of Creative Writing; Professor of the Practice in Creative Writing; Professor of the Practice, English

**Reinhold Blümel**

PHD, Technical University Munich  
Charlotte Augusta Ayres Professor of Physics; Professor of Physics; Co-Coordinator, Informatics and Modeling

**Elizabeth A. Bobrick**

BA, Marlboro College; MA, Johns Hopkins University; PHD, Johns Hopkins University  
Writing Consultant; Visiting Scholar in Classical Studies

**David Bodznick**

BS, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Washington  
Professor of Biology, Emeritus

**Abigail Huston Boggs**

BA, Wesleyan University; PHD, University Calif Davis  
Assistant Professor of Sociology; Assistant Professor, Education Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Philip H. Bolton**

BS, Michigan State University; MAA, Wesleyan University; PHD, University of California, San Diego  
Professor of Chemistry, Emeritus

**John P. Bonin**

BA, Boston College; MA, University of Rochester; PHD, University of Rochester  
Chester D. Hubbard Professor of Economics and Social Science; Professor of Economics; Co-Chair, College of Social Studies; Tutor, College of Social Studies; Professor, Russian, East European, and Eurasian Studies

**Jeanne M. Bonner**

BA, Wesleyan University; MFA, Bennington College  
Visiting Assistant Professor in Liberal Studies

**Esam Boraey**

MA, Cairo University  
Visiting Instructor of Public Policy

**Iris Bork-Goldfield**

MA, Ludwig Maximilians University; PHD, Ludwig Maximilians University  
Adjunct Professor of German Studies; Chair, German Studies

**Karl David Boulware**

BBA, Baruch College; MA, Duke University; PHD, University Of Alabama  
Assistant Professor of Economics

**Richard W. Boyd**

BA, University of Texas Austin; MAA, Wesleyan University; PHD, Indiana University Bloomington  
Professor of Government, Emeritus

**William S. Boyd Jr**

BA, Rhodes College; MA, The University of Memphis; PHD, University Tennessee  
Memph  
Visiting Scholar in the Quantitative Analysis Center

**Eugene Bozzi**

Private Lessons Teacher; Private Lessons Teacher/Percussion/Drums

**Anthony Delano Braxton**

John Spencer Camp Professor of Music, Emeritus

**Katherine Brewer Ball**

BA, Occidental College; MA, New York University; PHD, New York University  
Assistant Professor of Theater; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, African American Studies

**Nathan Brody**

BA, University Of New Hampshire; MA, University of Michigan; MAA, Wesleyan University; PHD, University of Michigan  
Professor of Psychology, Emeritus

**Judith C. Brown**

BA, University of California, Berkeley; MA, University of California, Berkeley; PHD, Johns Hopkins University  
Professor of History, Emerita

**Nancy Brown**

Private Lessons Teacher; Private Lessons Teacher/Trumpet

**Neely Bruce**

BMU, University of Alabama; DMU, University of Illinois Urbana; MAA, Wesleyan University; MMU, University of Illinois Urbana  
John Spencer Camp Professor of Music; Professor of Music

**Gillian Brunet**

BA, Smith College; PHD, University of California, Berkeley  
Assistant Professor of Economics

**Joseph W. Bruno**

BA, Augustana College; MAA, Wesleyan University; PHD, Northwestern University  
Professor of Chemistry, Emeritus

**Katherine Brunson**

BA, Harvard University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles  
Assistant Prof of Archaeology; Assistant Professor, East Asian Studies

**Justin Bryant**

BS, Seattle University  
Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

**Alessandra Buccella**

BA, Universitagrave; degli Studi di Milano; MA, Universitagrave; degli Studi di Milano; MA, Universidad de Barcelona; PHD, University of Pittsburgh  
Visiting Assistant Professor of Philosophy

**Richard V. Buel**

BA, Amherst College; MA, Harvard University; PHD, Harvard University  
Professor of History, Emeritus

**Ann Campbell Burke**

AB, New York University; MA, Harvard University; PHD, Harvard University  
Professor of Biology

**Stephen Busemeyer**

BA, University of Hartford  
Koeppe Journalism Fellow

**Scott Bushey**

Athletic Operations and Fitness Coordinator; Interim Coach of Cross Country

**C****Joe Cacaci**

BA, Manhattan College; MA, Emerson College  
Visiting Associate Professor of Film Studies

**Michael A. Calter**

BS, University of Vermont; PHD, Harvard University  
Professor of Chemistry; Professor, Integrative Sciences

**Ron Cameron**

BA, Western Kentucky Uni; MAA, Wesleyan University; PHD, Harvard University  
Professor of Religion

**Peggy Carey Best**

AB, Earlham College; PHD, Union Institute Grad School  
Director, Service Learning; Visiting Assistant Professor of Sociology; Coordinator, Service Learning

**Philip D. Carney**

BA, Trinity College  
Adjunct Professor of Physical Education; Head Coach of Men's Crew

**Sarah Kristin Carney**

BA, Connecticut College; MA, Wesleyan University; PHD, CUNY The Graduate Center

Assistant Professor of the Practice in Psychology

**John F. Carr**

BA, St. Michaels College; MAA, Wesleyan University; MFA, The Catholic University of America  
Professor of Theater, Emeritus

**Robert Cassidy**

BA, Fitchburg State; MA, Boston University; MA, Tufts University; MA, U.S. Naval War College; MA, French War College; PHD, Tufts University  
Andersen Fellow in Defense and Foreign Policy

**Jim Cavallaro**

BA, Harvard University; JD, University of California, Berkeley; MA, University of California, Berkeley; PHD, Universidad Pablo de Olavide  
Visiting Professor of Public Policy

**Benjamin Chaffee**

Associate Director of Visual Arts; Adjunct Instructor in Art

**Sonali Chakravarti**

BA, Swarthmore College; MA, Yale University; MPHIL, Yale University; PHD, Yale University  
Associate Professor of Government; Associate Professor, Education Studies; Tutor, College of Social Studies

**Wai Kiu Chan**

BS, University of Hong Kong; MPHIL, University of Hong Kong; PHD, The Ohio State University  
Professor of Mathematics

**Douglas K. Charles**

BA, University of Chicago; MA, Northwestern University; PHD, Northwestern University  
Professor of Anthropology, Emeritus

**Eric Charry**

BMU, New England Conservatory of Mu; MFA, Princeton University; MMU, New England Conservatory of Mu; PHD, Princeton University  
Professor of Music

**Christopher James Chenier**

BA, Bard College; MA, University of Delaware  
Digital Design Technologist; Adjunct Assistant Professor, Integrative Sciences; Adjunct Assistant Professor of Art

**Barry Chernoff**

BS, SUNY at Stony Brook; MS, Adelphi University; PHD, University of Michigan  
Robert Schumann Professor of Environmental Studies; Professor of Earth and Environmental Sciences; Professor of Biology; Chair, Environmental Studies Program; Director, College of the Environment; Professor, Environmental Studies

**Joan Cho**

BA, University of Rochester; MA, Harvard University; PHD, Harvard University  
Assistant Professor of East Asian Studies; Assistant Professor, Government

**Alcee Chriss**

BM, Oberlin College; MM, Oberlin College  
Artist-in-Residence, Music; University Organist

**Mary Ann Clawson**

BA, Carleton College; MA, SUNY at Stony Brook; PHD, SUNY at Stony Brook  
Professor of Sociology, Emerita

**Frederick M. Cohan**

BS, Stanford University; PHD, Harvard University

Huffington Foundation Professor in the College of the Environment; Professor of Biology; Chair, Environmental Studies Program; Professor, Environmental Studies; Professor, Integrative Sciences

**Lisa Cohen**

BA, Brown University; MPHIL, Yale University; PHD, Yale University  
Associate Professor of English; Associate Professor, Feminist, Gender, and Sexuality Studies

**Karen L. Collins**

BA, Smith College; PHD, Massachusetts Institute of Technology  
Edward Burr Van Vleck Professor of Mathematics; Professor of Mathematics; Chair, Mathematics and Computer Science; Professor, Integrative Sciences

**Stephen Edward Collins**

BA, Wesleyan University; MFA, University of Texas Austin  
Associate Professor of Film Studies

**Demetrius James Colvin**

Director, Resource Center; Adjunct Instructor of Education Studies

**Robert T. Conn**

BA, Dartmouth College; PHD, Princeton University  
Professor of Spanish; Chair, Romance Languages and Literatures; Professor, Latin American Studies

**John Anthony Connor**

MA, Manchester University; MAA, Wesleyan University  
Professor of English, Emeritus

**David Constantine**

BS, Eastern Nazarene College; PHD, University of Michigan  
Associate Professor of Mathematics

**Stephen Anthony Cooke**

Visiting Scholar in Chemistry

**Joseph David Coolon**

BS, Kansas State University; PHD, Kansas State University  
Assistant Professor of Biology; Assistant Professor, Integrative Sciences

**Ethan M. Coven**

BA, University of Rochester; MA, Yale University; MAA, Wesleyan University; PHD, Yale University  
Professor of Mathematics, Emeritus

**Breanna Craft**

Visiting Scholar in Chemistry

**Barbara H. Craig**

BA, The University of Maine; MAA, Wesleyan University; MPA, University of Connecticut; PHD, University of Connecticut  
Professor of Government, Emerita

**Martha Crenshaw**

BA, Newcomb College Tulane U; MA, University of Virginia; MAA, Wesleyan University; PHD, University of Virginia  
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought, Emerita

**Christina Crosby**

BA, Swarthmore College; MAA, Wesleyan University; PHD, Brown University  
Professor of English; Professor, Feminist, Gender, and Sexuality Studies

**Andrew S. Curran**

BA, Hamilton College; MA, New York University; PHD, New York University

William Armstrong Professor of the Humanities; Professor of French

**Walter Jr. Curry**

BA, Iowa State University  
Adjunct Associate Professor of Physical Education; Head Coach of Track Field (Men's Women's)

**Jonathan Cutler**

BA, Tufts University; MA, Union Theological Seminary; PHD, CUNY The Graduate Center  
Associate Professor of Sociology

## D

**Jennifer D'Andrea**

Visiting Assistant Professor in Liberal Studies; Director of Counseling and Psychological Services

**Nathan Dame**

BA, Weber State University  
Visiting Artist-in-Residence in Theater

**Catherine Damman**

BA, Loyola Marymount University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Visiting Assistant Professor of Curatorial Practice in Performance; Visiting Assistant Professor of Art History

**Logan M. Dancey**

BA, University Puget Sound; PHD, Univ. of Minnesota Twin Cities  
Associate Professor of Government

**John Wesley Dankwa**

BA, University of Cape Coast; MA, University of Cape Coast; PHD, Wesleyan University  
Assistant Professor of Music

**Norman Danner**

BA, University of California, Berkeley; PHD, Indiana University Bloomington  
Associate Professor of Computer Science; Vice-Chair, Mathematics and Computer Science

**Saida Daukeyeva**

BMU, Moscow State Tchaikovsky Conservatory; PHD, Moscow State Tchaikovsky Conservatory; PHD, School of Oriental and African Studies, University of London  
Assistant Professor of Music; Assistant Professor, Russian, East European, and Eurasian Studies

**Anthony P. Davis**

BS, U.S. Coast Guard Academy; MS, Ohio State University; PHD, Wesleyan University  
Associate Professor of the Practice in Chemistry

**Nihal C. de Lanerolle**

BA, Cambridge University; DS, University of Sussex; MA, Cambridge University; PHD, University of Sussex  
Adjunct Professor of Neuroscience and Biology

**Stephen H. Devoto**

BA, Haverford College; PHD, Rockefeller University  
Professor of Biology; Professor, Neuroscience and Behavior

**Carolina Diaz**

Visiting Assistant Professor of Spanish

**Daniel A DiCenzo**

BA, Williams College  
Adjunct Professor of Physical Education; Head Coach of Football

**Lisa C. Dierker**

BA, Ohio State University; MA, University of Connecticut; PHD, University of Connecticut  
Walter Crowell University Professor of Social Sciences; Professor of Psychology; Professor, Education Studies

**Kim Diver**

BA, Carthage College; MA, Syracuse University; PHD, Syracuse University  
Associate Professor of the Practice in Earth and Environmental Sciences

**Milka Djordjevic**

MFA, Sarah Lawrence College  
Visiting Assistant Professor of Dance

**Lindsay R Dolan**

BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Assistant Professor of Government

**Lisa A. Dombrowski**

BA, Wesleyan University; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison  
Associate Professor of Film Studies; Associate Professor, East Asian Studies

**J. James Donady**

BS, SUNY at Stony Brook; PHD, University of Iowa  
Professor of Biology, Emeritus

**Royette Tavernier Dubar**

MS, Brock University; PHD, Brock University  
Assistant Professor of Psychology

**Ann duCille**

BA, Bridgewater State College; MA, Brown University; MA, Brown University; PHD, Brown University  
Professor of English, Emerita

**Peter N. Dunn**

BA, University College, University of London; MA, University College, University of London; MAA, Wesleyan University  
Hollis Professor of Romance Languages and Literatures, Emeritus

**Stephanie E. Dunson**

Visiting Assistant Professor in Liberal Studies

**Alex Dupuy**

BA, University of Connecticut; MA, Brandeis University; MAA, Wesleyan University; PHD, SUNY at Binghamton  
John E. Andrus Professor of Sociology, Emeritus

**Cem Duruo**

Private Lessons Teacher; Private Lessons Teacher/Guitar

## E

**Robert Earhart**

Private Lessons Teacher; Private Lessons Teacher/Trombone

**Ronald Ebrecht**

BM, Southern Methodist University; MM, Yale University  
University Organist, Emeritus

**Peter Craig Edwards**

Private Lessons Teacher; Private Lessons Instructor/Fiddle

**Sierra Eisen**

BA, University of California, Berkeley; MA, University of Virginia; PHD, University of Virginia  
Postdoctoral Fellow in Psychology

**Marc A. Eisner**

BA, University of Wisconsin at Madison; MA, Marquette University; MBA, University of Connecticut; PHD, University of Wisconsin at Madison  
Henry Merritt Wriston Chair in Public Policy; Professor of Government; Professor, Environmental Studies

**Rayya El Zein**

BA, Kenyon College; MA, New York University; PHD, CUNY The Graduate Center  
Visiting Assistant Professor of Anthropology

**Douglas Elkins**

Visiting Associate Professor of Dance

**Perry C. Elliot**

Private Lessons Teacher; Private Lessons Teacher/Violin

**Fred M. Ellis**

BS, University of Massachusetts Amherst; MAA, Wesleyan University; PHD, University of Massachusetts Amherst  
Professor of Physics; Chair, Physics

**Ren Ellis Neyra**

BA, Freed Hardeman College; PHD, SUNY at Stony Brook  
Associate Professor of English; Associate Professor, African American Studies

**Richard H. Elphick**

BA, University of Toronto; MA, University of California, Los Angeles; PHD, Yale University  
Professor of History, Emeritus; Professor of History, Emeritus

**Paul Hilding Erickson**

BA, Harvard University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison  
Associate Professor of History; Associate Professor, Environmental Studies; Associate Professor, Science in Society

**Kaisha Esty**

BA, University of Nottingham; MA, University of Nottingham; PHD, Rutgers University  
Assistant Professor of African American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Candice M Etson**

BA, New York University; BFA, New York University; PHD, Harvard University  
Assistant Professor of Physics; Assistant Professor, Chemistry; Assistant Professor, Integrative Sciences; Assistant Professor, Molecular Biology and Biochemistry

**Demetrius L. Eudell**

BA, Dartmouth College; PHD, Stanford University  
Dean of the Social Sciences; Professor of History; Faculty Director, Mellon Mays Undergraduate Fellowship

**Youssef Ezzyat**

BSE, Princeton University; PHD, New York University  
Assistant Professor of Psychology; Assistant Professor, Neuroscience and Behavior

**F****Brian C. Fay**

BA, Loyola Marymount University; DPHIL, Oxford University; MA, Oxford University; MAA, Wesleyan University  
William Griffin Professor of Philosophy, Emeritus

**H.M FazaleHag**

MA, University Of New Mexico; PHD, University Of New Mexico  
Assistant Professor of the Practice in Hindi/Urdu

**Yaniv Feller**

BA, Hebrew University; MA, Hebrew University; PHD, University of Toronto  
Jeremy Zwelling Assistant Professor of Jewish Studies; Assistant Professor of Religion

**Javier Fernandez Galeano**

BA, Universidad Complutense de Madrid; MA, New School for Social Research; MA, Brown University; PHD, Brown University  
Andrew W. Mellon Postdoctoral Fellow

**Ryan Fics**

BA, University of Manitoba; MA, University of Manitoba; PHD, Emory University  
Visiting Assistant Professor of Letters

**Adam Fieldsteel**

BA, Brown University; MAA, Wesleyan University; PHD, University of California, Berkeley  
Professor of Mathematics

**Tom Filburn**

BS, University of Connecticut; MS, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut  
Visiting Professor of Earth and Environmental Sciences

**John E. Finn**

BA, Nasson College; JD, Georgetown University; PHD, Princeton University  
Professor of Government, Emeritus

**Sue C. Fisher**

BA, California State Univ - Northridge; MA, University of California, San Diego; MAA, Wesleyan University; PHD, University of California, San Diego  
Professor of Sociology, Emerita

**Joseph J. Fitzpatrick**

BA, Harvard University; PHD, Duke University  
Assistant Professor of the Practice in Letters; Assistant Professor of the Practice, Russian, East European, and Eurasian Studies

**Octavio Flores-Cuadra**

BA, Universidad Americas; MA, Universidad Americas; PHD, University of Pittsburgh  
Adjunct Professor of Spanish

**Douglas C. Foyle**

AB, Stanford University; MA, Duke University; PHD, Duke University  
Associate Professor of Government; Tutor, College of Social Studies

**Erika Franklin Fowler**

BA, St Olaf College; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison  
Professor of Government; Director, Wesleyan Media Project

**Michael A Fried**

BA, Brown University  
Adjunct Professor of Physical Education; Head Coach of Tennis (Men's Women's)

**Harris A. Friedberg**

BA, Harvard University; PHD, Yale University  
Associate Professor of English

**Michael J. Frisch**

Research Professor in Chemistry

**Richard John Friswell**

Associate Director of the Wesleyan Institute for Lifelong Learning

**Albert J. Fry**

BS, University of Michigan; MAA, Wesleyan University; PHD, University of Wisconsin at Madison  
E. B. Nye Professor of Chemistry, Emeritus

**Courtney Fullilove**

BA, Columbia University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Associate Professor of History; Associate Professor, Environmental Studies; Associate Professor, Science in Society

**Susanne Grace Fusso**

BA, Lawrence University; MA, Yale University; PHD, Yale University  
Marcus L. Taft Professor of Modern Languages; Professor of Russian, East European, and Eurasian Studies; Chair, Russian, East European, and Eurasian Studies

## G

**Leslie Gabel-Brett**

BA, Wesleyan University; PHD, City College  
Adjunct Assistant Professor of Public Policy

**Amity Gaige**

BA, Brown University; MFA, University of Iowa  
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

**Priscilla E. Gale**

Private Lessons Teacher; Private Lessons Teacher/Jazz Voice

**Giulio Gallarotti**

BA, Hunter College; PHD, Columbia University  
Professor of Government; Tutor, College of Social Studies; Professor, Environmental Studies

**Daniella Gandolfo**

BA, Pontificia Universidad Católica del Perú; MA, University of Texas Austin; PHD, Columbia University  
Associate Professor of Anthropology; Chair, Anthropology; Co-Coordinator, Urban Studies

**Matthew Carl Garrett**

BA, Bard College; MA, Stanford University; MPHIL, Cambridge University; PHD, Stanford University

Associate Professor of English; Associate Professor, American Studies; Coordinator, Social, Cultural, and Critical Theory

**Courtney Gaston**

BA, Centenary College La; MFA, University of Iowa  
Assistant Professor of the Practice in Theater

**Caroline Gates**

BA, University of Arizona; MA, University of Virginia; PHD, University of Virginia  
Visiting Assistant Professor of French

**Giacomo Gates**

Private Lessons Teacher; Private Lessons Teacher/Jazz Voice

**Jeffrey Joseph Giarde**

MALS, Wesleyan University  
Director of Scientific Imaging; Head Coach of Golf

**C. Stewart Gillmor**

BS, Stanford University; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University  
Professor of History and Science, Emeritus

**Martha S. Gilmore**

BA, Franklin & Marshall; MSC, Brown University; PHD, Brown University  
George I. Seney Professor of Geology; Professor of Earth and Environmental Sciences; Co-Coordinator, Planetary Science

**Megan H. Glick**

BA, Northwestern University; MA, Yale University; MPHIL, Yale University; PHD, Yale University  
Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science in Society; Coordinator, Disability Studies

**Greg Goldberg**

BA, New York University; PHD, CUNY The Graduate Center  
Associate Professor of Sociology; Chair, Sociology

**Wei Gong**

BA, Beijing Language and Culture U; MA, The University of Hong Kong  
Associate Professor of the Practice in East Asian Studies

**Bernardo Antonio Gonzalez**

BA, University of California, Berkeley; MA, University of California, Berkeley; MAA, Wesleyan University; PHD, University of California, Berkeley  
Professor of Spanish

**Anthony Goodwin**

BA, Arizona State University; MA, University of Connecticut; PHD, University of Connecticut  
Visiting Assistant Professor of Psychology

**Winfield Goodwin**

BA, Wesleyan University; MA, Drew University  
Temporary Employee - Religion; Visiting Instructor in Religion

**Martin Gosman**

BBA, University of Wisconsin at Madison; MBA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison  
Adjunct Professor of Economics

**Peter S. Gottschalk**

BA, College of the Holy Cross; MA, Univ of Wisconsin Fond Du Lac; PHD, University of Chicago

Professor of Religion; Professor, Education Studies; Professor, Science in Society; Coordinator, Muslim Studies

**Laura B. Grabel**

BA, Brandeis University; MAA, Wesleyan University; PHD, University of California, San Diego  
Professor of Biology, Emerita

**Claire Grace**

BA, Brown University; MA, Middlebury College; PHD, Harvard University  
Assistant Professor of Art History; Assistant Professor, American Studies

**Roger Mathew Grant**

BM, Ithaca College; PHD, University of Pennsylvania  
Dean of the Arts and Humanities; Associate Professor of Music

**Vera K.B. Grant**

CER, University of Freiburg  
Adjunct Professor of German Studies, Emerita

**Laura Grappo**

BA, Wesleyan University; MA, Yale University; MPHIL, Yale University; PHD, Yale University  
Assistant Professor of American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Anne F. Greene**

BA, Radcliffe College; MA, Brandeis University  
University Professor of English; Coordinator, Writing Certificate

**Nathanael Greene**

BA, Brown University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of History

**James P. Greenwood**

BS, SUNY at Binghamton; MS, Brown University; PHD, Brown University  
Associate Professor of Earth and Environmental Sciences

**Graham Whitney Griffith**

BA, Wesleyan University  
Koepfel Journalism Fellow

**Amy Grillo**

AB, Brown University; EDD, Harvard University; EDM, Harvard University  
Associate Professor of the Practice in Education Studies; Associate Professor of the Practice, Education Studies

**Erik Grimmer-Solem**

BA, Brigham Young University; DPHIL, Oxford University; MPHIL, Cambridge University; MSC, London School of Economics and Political Science  
Professor of History; Tutor, College of Social Studies; Professor, German Studies

**David Grinspoon**

BA, Brown University; BS, Brown University; PHD, University of Arizona  
Menakka and Essel Bailey '66 Distinguished Visiting Scholar in the College of the Environment

**Richard S. Grossman**

AB, Harvard University; MA, Harvard University; MSC, London School of Economics and Political Science; PHD, Harvard University  
Professor of Economics

**Lori Gruen**

BA, University of Colorado Boulder; PHD, University of Colorado Boulder

William Griffin Professor of Philosophy; Professor of Philosophy; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Animal Studies

**Anisha Gupta**

BS, Punjabi University; MS, Punjabi University; PHD, Carnegie Mellon University  
Visiting Assistant Professor of Chemistry

**James T. Gutmann**

BA, Amherst College; MAA, Wesleyan University; PHD, Stanford University  
Professor of Earth and Environmental Sciences, Emeritus

**Bar Guzi**

Visiting Instructor in Religion

## H

**Benjamin Haber**

BA, New College of Florida; MPHIL, CUNY The Graduate Center; PHD, CUNY The Graduate Center  
Visiting Assistant Professor of Sociology

**Mary Alice Haddad**

BA, Amherst College; MA, University of Washington; PHD, University of Washington  
John E. Andrus Professor of Government; Professor of Government; Chair, College of East Asian Studies; Director, Office of Faculty Career Development; Professor, Environmental Studies; Professor, East Asian Studies

**Nina Hagel**

BA, Johns Hopkins University; MA, University of California, Berkeley; PHD, University of California, Berkeley  
Assistant Professor of Government; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Anthony W. Hager**

BS, Pennsylvania State University; PHD, Pennsylvania State University  
Professor of Mathematics, Emeritus

**Carolyn Frances Halsted**

Private Lessons Teacher; Private Lessons Teacher/Piano

**I. Harjito**

MA, Akademi Seni Karavitan  
University Professor of Music

**Miyuki Hatano-Cohen**

BA, Tohoku Gakuin University  
Visiting Assistant Professor of East Asian Studies

**Anthony Ryan Hatch**

AB, Dartmouth College; MA, University of Maryland College Park; PHD, University of Maryland College Park  
Associate Professor of Science in Society; Chair, Science in Society; Associate Professor, African American Studies; Associate Professor, College of the Environment; Associate Professor, Sociology; Associate Professor, Environmental Studies; Coordinator, Sustainability and Environmental Justice

**Jun He**

BA, Beijing Technology and Business University; MA, University of Connecticut  
Visiting Instructor in Economics

**Elizabeth Ann Hepford**

BA, University Of Kansas; MA, Arizona State University; PHD, Temple University

Assistant Professor of the Practice in TESOL; Assistant Professor of the Practice, Education Studies; Assistant Professor of the Practice, English

**William Herbst**

BA, Princeton University; MAA, Wesleyan University; MSC, University of Toronto; PHD, University of Toronto  
John Monroe Van Vleck Professor of Astronomy; Professor of Astronomy;  
Professor, Integrative Sciences

**Scott Higgins**

BA, Oakland University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison  
Charles W. Fries Professor of Film Studies; Professor of Film Studies; Director, College of Film and the Moving Image; Chair, Film Studies; Curator of the Wesleyan Cinema Archives

**Cameron Donnay Hill**

BA, Yale University; PHD, University of California, Berkeley  
Associate Professor of Mathematics; Associate Professor, Integrative Sciences

**Patricia R. Hill**

BA, College of Wooster; PHD, Harvard University  
Professor of American Studies, Emerita

**Manju Hingorani**

BS, University of Bombay; PHD, Ohio State University  
Visiting Scholar in Molecular Biology Biochemistry

**Christiaan Hogendorn**

BA, Swarthmore College; PHD, University of Pennsylvania  
Associate Professor of Economics

**Jay Clinton Hoggard**

BA, Wesleyan University; MA, Wesleyan University  
Professor of Music; Chair, Music; Professor, African American Studies

**Andrew Holland**

BA, Indiana University So Bend; MFA, Yale University  
Visiting Assistant Professor of Theater

**Oliver W. Holmes**

BA, City College; MA, University of Chicago; MAA, Wesleyan University; PHD, University of Chicago  
Professor of History

**Scott G. Holmes**

BS, College of William and Mary; PHD, University of Virginia  
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

**Kevin Holt**

BA, Oberlin College; BM, Oberlin College; MA, Columbia University; PHD, Columbia University  
Mellon Postdoctoral Fellow in African American Studies

**Abigail S. Hornstein**

AB, Bryn Mawr College; MPHIL, New York University; PHD, New York University  
Associate Professor of Economics

**Steven W. Horst**

BA, Boston University; PHD, University of Notre Dame  
Professor of Philosophy; Chair, Philosophy; Professor, Science in Society;  
Coordinator, Christianity Studies

**Mark A. Hovey**

BS, Ohio State University; PHD, Massachusetts Institute of Technology

Associate Provost; Professor of Mathematics; Professor, Integrative Sciences

**Robert J. Hoyle**

Private Lessons Teacher; Private Lessons Teacher/French Horn

**Yu-ting Huang**

BA, National Taiwan University; MA, National Taiwan University; PHD, University of California, Los Angeles  
Assistant Professor of East Asian Studies

**Elijah Huge**

BA, Yale University; MAR, Yale University  
Associate Professor of Art; Associate Professor, Environmental Studies

**Gertrude Reif Hughes**

BA, Mount Holyoke College; MAA, Wesleyan University; MAT, Wesleyan University; PHD, Yale University  
Professor of English, Emerita

**Meredith Hughes**

BS, Yale University; PHD, Harvard University  
Associate Professor of Astronomy; Associate Professor, Integrative Sciences

**John Hulsey**

AB, Harvard University; MA, Universite Paris III; MFA, University of California, Los Angeles  
Andrew W. Mellon Postgraduate Research Fellow in Interdisciplinary Arts Practices; Andrew W. Mellon Postgraduate Research Fellow in Interdisciplinary Arts Practices

**Judy Hussie-Taylor**

BA, Maharishi Intl University; MA, Maharishi Intl University  
Visiting Instructor in Curatorial Practice in Performance

**Lutz Hüwel**

PHD, University of Gottingen  
Professor of Physics

**I**

**Masami Imai**

BA, U. of Wisconsin Eau Claire; PHD, University Calif Davis  
Professor of Economics; Professor, East Asian Studies

**Anthony A. Infante**

BA, Temple University; MAA, Wesleyan University; PHD, University of Pennsylvania  
Professor of Molecular Biology and Biochemistry, Emeritus

**Tushar Irani**

BA, Colgate University; PHD, Northwestern University  
Associate Professor of Letters; Associate Professor of Philosophy

**Maho Amy Ishiguro**

Visiting Assistant Professor of Dance

**Ryuichiro Izumi**

BA, Keio University; PHD, Rutgers University  
Assistant Professor of Economics

**J**

**Albert Terry Jackson**

BS, Springfield College Illinois; MED, Springfield College Illinois  
Adjunct Professor of Physical Education, Emeritus

**Elizabeth Anne Jackson**

BA, Rutgers University; MA, University of Texas Austin; PHD, University of Texas Austin  
Adjunct Associate Professor of Portuguese

**Joyce Jacobsen**

BA, Harvard University; MSC, London School of Economics and Political Science; PHD, Stanford University  
Andrews Professor of Economics; Professor of Economics

**Anuja Jain**

BA, University of Delhi; MA, University of Delhi; PHD, New York University  
Assistant Professor of Film Studies

**Ronald S. Jenkins**

BA, Haverford College; EDD, Harvard University  
Professor of Theater; Chair, Theater

**Carlos Alberto Jimenez Hoyos**

MA, Rice University; PHD, Rice University  
Assistant Professor of Chemistry

**Khalil Anthony Johnson**

BA, University of Georgia Athens; MPHIL, Yale University; PHD, Yale University  
Assistant Professor of African American Studies

**Ruth Ineke Johnson**

BS, University of Witwatersrand; PHD, Cambridge University  
Associate Professor of Biology; Associate Professor, Integrative Sciences

**Renee Johnson Thornton**

BA, SUNY at Binghamton; MALS, Wesleyan University; PHD, University of Rhode Island  
Dean for the Class of 2022; Research Affiliate, African American Studies

**William D. Johnston**

BA, Elmira College; MA, Harvard University; PHD, Harvard University  
John E. Andrus Professor of History; Professor of History; Professor, Science in Society; Professor, Environmental Studies; Professor, East Asian Studies

**Robyn Joyce**

Manager 92' Theater; Adjunct Instructor in Theater

**Barbara Jean Juhasz**

BA, Binghamton University; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst  
Jeffrey L. Shames Professor of Civic Engagement; Professor of Psychology; Chair, Neuroscience and Behavior; Professor, Education Studies; Professor, Neuroscience and Behavior; Professor, Integrative Sciences; Coordinator, Civic Engagement

**Eun Ju Jung**

Visiting Scholar in Psychology

## K

**Robert Ira Kabacoff**

BA, University of Connecticut; PHD, University of Missouri, St. Louis  
Professor of the Practice in Quantitative Analysis

**Sara Kalisnik Verovsek**

PHD, Stanford University  
Assistant Professor of Mathematics

**Sharisse Leigh Kanet**

BA, Wesleyan University; MA, CUNY Queens College; PHD, CUNY The Graduate Center  
Visiting Assistant Professor of Philosophy

**Emmanuel I. Kaparakis**

Director of Centers for Advanced Computing; Director, Center of Quantitative Analysis; Adjunct Assistant Professor of Quantitative Analysis

**Natasha Karageorgos**

MA, Tomsk State University; PHD, CUNY The Graduate Center  
Assistant Professor of the Practice in Russian, East European, and Eurasian Studies

**Indira Karamcheti**

BA, University Calif Santa Bar; MA, University Calif Santa Bar; PHD, University Calif Santa Bar  
Associate Professor of American Studies; Chair, American Studies; Associate Professor, Education Studies; Coordinator, Caribbean Studies

**Dalit Katz**

BA, Hebrew University; MA, Hebrew University  
Adjunct Associate Professor of Religion; Director, Center for Jewish Studies

**Marilyn A. Katz**

BS, Columbia University; MA, Yale University; MAA, Wesleyan University; PHD, Yale University  
Professor of Classical Studies, Emerita

**J. Kehaulani Kauanui**

BA, University of California, Berkeley; PHD, University Calif Santa Crz  
Professor of American Studies; Professor, Anthropology

**Kerwin Kaye**

BA, University of Colorado Boulder; MA, University San Francisco; PHD, New York University  
Associate Professor of Sociology; Associate Professor, Feminist, Gender, and Sexuality Studies; Tutor, College of Social Studies; Associate Professor, American Studies

**Michael S. Keane**

BA, University of Texas Austin; MS, University of Gottingen; PHD, University of Erlangen-Nurnber  
Professor of Mathematics, Emeritus

**Anthony Bruno Keats**

BA, Macalester College; MA, Tufts University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles  
Associate Professor of Economics

**R. Lincoln Keiser**

BA, Lawrence University; MA, Northwestern University; MAA, Wesleyan University; PHD, University of Rochester  
Professor of Anthropology, Emeritus

**Christine Kemp**

BA, Skidmore College; MA, Bridgewater State College  
Adjunct Assistant Professor of Physical Education; Head Coach of Field Hockey

**Shona Kerr**

BMU, Cardiff University  
Adjunct Professor of Physical Education; Head Coach of Squash (Men's Women's)

**Scott M. Kessel**

BA, Wesleyan University; MALS, Wesleyan University  
Visiting Assistant Professor of Art

**Melanie Khamis**

BS, London School of Economics and Political Science; MS, University of Warwick;  
PHD, London School of Economics and Political Science  
Associate Professor of Economics; Chair, Latin American Studies; Associate  
Professor, Latin American Studies

**Roy E. Kilgard**

BA, Valdosta St University; PHD, University of Leicester  
Associate Professor of the Practice in Astronomy; Associate Professor of the  
Practice, Integrative Sciences

**Adam Yoon Jae Kim**

BS, University of Wisconsin at Madison; MA, The University of Minnesota, Twin  
Cities  
Visiting Assistant Professor of Psychology

**Jin Hi Kim**

BA, Seoul National University; MFA, Mills College  
Adjunct Assistant Professor of Music

**Kyungmi Kim**

MA, Yonsei University; MPHIL, Yale University; MS, Yale University; PHD, Yale  
University  
Assistant Professor of Psychology

**Makaela Jane Kingsley**

BA, Wesleyan University; MA, Wesleyan University  
Director, Patricelli Center for Social Entrepreneurship; Adjunct Instructor in  
Public Policy

**Patricia Klecha-Porter**

BS, Ithaca College; MS, Springfield College Illinois  
Adjunct Professor of Physical Education, Emerita

**Ethan Kleinberg**

BA, University of California, Berkeley; MA, University of California, Los Angeles;  
PHD, University of California, Los Angeles  
Class of 1958 Distinguished Professor; Professor of History; Professor of Letters;  
Editor-in-Chief, History and Theory

**Joseph L. Knee**

BA, SUNY at Binghamton; PHD, SUNY at Stony Brook  
Beach Professor of Chemistry; Professor of Chemistry

**Katja P. Kolcio**

MA, University of Georgia Athens; MA, Ohio State University; PHD, Ohio State  
University  
Associate Professor of Dance; Director, Allbritton Center for the Study of Public  
Life; Associate Professor, Environmental Studies; Associate Professor, Education  
Studies; Associate Professor, Russian, East European, and Eurasian Studies

**Natasha Korda**

BA, Columbia University; PHD, Johns Hopkins University  
Professor of English; Director, Center for the Humanities; Professor, Feminist,  
Gender, and Sexuality Studies

**Tsampakos Kottos**

BA, University of Crete; MS, University of Crete; PHD, University of Crete  
Lauren B. Dachs Professor of Science and Society; Professor of Physics; Professor,  
Integrative Sciences; Professor, Mathematics

**Hari Krishnan**

BA, University of Manitoba; MFA, York University; PHD, Texas Womans  
University  
Professor of Dance; Chair, Dance; Professor, Feminist, Gender, and Sexuality  
Studies

**Daniel Krizanc**

BS, University of Toronto; PHD, Harvard University  
Edward Burr Van Vleck Professor of Computer Science; Professor of Computer  
Science; Professor, Integrative Sciences; Professor, Environmental Studies; Co-  
Coordinator, Informatics and Modeling

**Alex Kruckman**

PHD, University of California, Berkeley; SB, Brown University  
Assistant Professor of Mathematics

**Timothy C.W. Ku**

BS, University of Rochester; MS, University of Michigan; PHD, University of  
Michigan  
Associate Professor of Earth and Environmental Sciences; Chair, Earth and  
Environmental Sciences; Associate Professor, Integrative Sciences

**David J. Kuenzel**

DIP, University of Tubingen; MA, University of Washington; PHD, University of  
Washington  
Assistant Professor of Economics

**Katherine M. Kuenzli**

BA, Yale University; MA, University of California, Berkeley; PHD, University of  
California, Berkeley  
Professor of Art History; Program Director; Professor, German Studies

**Ronald J. Kuivila**

BA, Wesleyan University; MFA, Mills College  
Professor of Music; Director, Electronic Music and Recording Studios

**Matthew M. Kurtz**

BA, Reed College; MA, Princeton University; PHD, Princeton University  
Professor of Psychology; Professor, Neuroscience and Behavior

**Basak Kus**

BA, Bogazici University; MA, SUNY at Stony Brook; PHD, University of California,  
Berkeley  
Associate Professor of Government

**L****Gale Lackey**

BS, West Chester University; MED, West Chester University  
Adjunct Professor of Physical Education, Emerita

**Jennifer Shea Lane**

BA, Amherst College; MS, Smith College  
Adjunct Professor of Physical Education; Head Coach of Softball

**Robert P. Lane**

BA, Colgate University; PHD, California Institute Tech  
Associate Professor of Molecular Biology and Biochemistry; Chair, Molecular  
Biology and Biochemistry; Associate Professor, Integrative Sciences

**David Ray Langley**

Tishler Professor of Chemistry

**Salvatore LaRusso**

BMU, Eastman School Of Music; MS, Fairfield University  
Director, Wesleyan Wind Ensemble

**Allison Lazur**

Private Lessons Teacher; Private Lessons Teacher/Tuba

**Yunjeong Lee**

BA, Sun Moon University; MS, Central Connecticut State University  
Visiting Instructor in East Asian Studies

**Constance Leidy**

BS, Tulane University; PHD, Rice University  
Associate Professor of Mathematics

**Charles C. Lemert**

BA, Miami University Middletown; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
John E. Andrus Professor of Social Theory, Emeritus

**Jeffers Lennox**

BA, University of Toronto; MA, Dalhousie University; PHD, Dalhousie University  
Associate Professor of History

**Leo A. Lensing**

BA, University of Notre Dame; MA, Cornell University; MAA, Wesleyan University; PHD, Cornell University  
Professor of Film Studies, Emeritus

**Typhaine Leservot**

BA, University of Caen; MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill  
Associate Professor of French; Associate Professor of Letters; Co-Coordinator, African Studies

**Peter M. LeTourneau**

BA, Ricker College; MA, Wesleyan University; PHD, Columbia University  
Visiting Scholar in Earth Environmental Sciences

**Ariel Victoria Levy**

BA, Wesleyan University  
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

**Han Li**

BS, Nankai University; PHD, Yale University  
Assistant Professor of Mathematics

**Dan Licata**

BS, Brown University; PHD, Carnegie Mellon University  
Associate Professor of Computer Science

**Richard W. Lindquist**

BS, Worcester Poly Institute; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University  
Professor of Physics, Emeritus

**James Lipton**

BS, U Nebraska Lincoln; MSC, Cornell University; PHD, Cornell University  
Professor of Computer Science; Professor, Integrative Sciences

**Mengjun Liu**

BA, Beijing Normal University; MA, Nanjing Normal University  
Assistant Professor of the Practice in Chinese

**Lisa Alana Locascio**

BA, New York University; MA, University Southern Calif; MFA, New York University; PHD, University Southern Calif

Visiting Adjunct Professor in Liberal Studies

**Tom Lock**

BA, Columbia University; MBA, New York University; MFA, Columbia University  
Visiting Assistant Professor of Film Studies

**Tony Lombardozzi**

Private Lessons Teacher/Jazz Guitar

**Donald E. Long**

BS, Springfield College MA  
Adjunct Professor of Physical Education, Emeritus

**Jerome H. Long**

BD, University of Chicago; MA, University of Chicago; PHD, University of Chicago  
Associate Professor of Religion, Emeritus

**Marc Robert Longenecker**

BA, Wesleyan University; MA, Wesleyan University  
Assistant Professor of the Practice in Film Studies

**Valeria López Fadul**

BA, Yale University; MA, Princeton University; PHD, Princeton University  
Assistant Professor of History; Assistant Professor, Latin American Studies

**Susan F. Lourie**

BA, Temple University; MALS, Wesleyan University  
Adjunct Professor of Dance, Emerita

**Rachel D. Lowe**

Visiting Scholar in Chemistry

**Joyce O. Lowrie**

BA, Baylor University; MAA, Wesleyan University; PHD, Yale University  
Professor of Romance Languages and Literatures, Emerita

**Chia-Yu Joy Lu**

BFA, National Taiwan Normal Univ.; MA, University of Sheffield  
Graduate Student, ETHN-PHD; Director, Chinese Music Ensemble

**Joshua Daniel Lubin-Levy**

BA, Wesleyan University; MA, New York University  
Visiting Instructor in Curatorial Practice in Performance

**Alvin A. Lucier**

BA, Yale University; MAA, Wesleyan University; MFA, Brandeis University  
John Spencer Camp Professor of Music, Emeritus

## M

**Antonio Machado-Allison**

MS, Central University of Venezuela; PHD, George Washington University  
Research Fellow in the College of the Environment

**Randall M. MacLowry**

BA, Wesleyan University  
Assistant Professor of the Practice in Film Studies and Co-Director of the Wesleyan Documentary Project

**Amy MacQueen**

BA, Columbia University; PHD, Stanford University  
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

**Urip Sri Maeny**

DIPL, Indonesian Conservatory of Mus  
Retired Artist-in-Residence, Dance

#### **Clark Maines**

BA, Bucknell University; MA, Pennsylvania State University; MAA, Wesleyan University; PHD, Pennsylvania State University  
Professor of Art History, Emeritus

#### **Victoria Ursula Manfredi**

BA, Smith College; MS, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst  
Assistant Professor of Computer Science

#### **Alyx Mark**

BA, Southern Illinois Univer; MA, George Washington University; PHD, George Washington University  
Assistant Professor of Government

#### **Peter A. Mark**

BA, Harvard University; MA, Syracuse University; MAA, Wesleyan University; PHD, Yale University  
Professor of Art History, Emeritus

#### **Douglas Arthur Martin**

BA, University of Georgia Athens; MFA, The New School; PHD, CUNY The Graduate Center  
Assistant Professor of the Practice in Creative Writing; Assistant Director, Creative Writing; Assistant Professor of the Practice, English

#### **Naho Maruta**

MA, University of Wisconsin at Madison  
Associate Professor of the Practice in East Asian Studies; Associate Professor of the Practice, Fries Center for Global Studies

#### **Bruce A. Masters**

BS, Georgetown University; MAA, Wesleyan University; PHD, University of Chicago  
John E. Andrus Professor of History, Emeritus

#### **Ioana Emy Matesan**

MA, Arizona State University; PHD, Syracuse University  
Assistant Professor of Government; Tutor, College of Social Studies

#### **Cynthia Matthew**

Visiting Scholar in Psychology

#### **Paula Matthusen**

BM, University of Wisconsin at Madison; MA, New York University; PHD, New York University  
Associate Professor of Music

#### **Alexis May**

BA, Wesleyan University; MA, University British Columbia; PHD, University British Columbia  
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

#### **Robin Mazzola**

BFA, Paier College Of Art  
Costume Shop Manager; Adjunct Assistant Professor of Theater

#### **Michael A. McAlear**

BS, McGill University; PHD, McGill University  
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

#### **Elizabeth McAlister**

BA, Vassar College; MA, Yale University; MA, Yale University; MPHIL, Yale University; PHD, Yale University  
Professor of Religion; Professor, African American Studies; Professor, American Studies; Professor, Feminist, Gender, and Sexuality Studies

#### **Sean McCann**

BA, Georgetown University; PHD, CUNY The Graduate Center  
Kenan Professor of the Humanities; Professor of English

#### **James W. McGuire**

BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley  
Professor of Government; Professor, Latin American Studies

#### **Jodi McKenna**

BA, Brown University; MED, St. Lawrence University  
Adjunct Professor of Physical Education; Head Coach of Women's Ice Hockey

#### **Rashida Z. Shaw McMahon**

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University  
Associate Professor of English; Associate Professor, Theater; Associate Professor, African American Studies

#### **Chelsie McPhilimy**

BA, University of Wisconsin at Madison; MFA, Ohio State University  
Technical Director, Dance Department; Adjunct Assistant Professor of Dance

#### **MICHAEL MEERE**

BA, Northwestern University; MA, University of Virginia; PHD, University of Virginia  
Assistant Professor of French; Assistant Professor, Medieval Studies

#### **Laverne Melon**

BA, Middlebury College; MS, SUNY at Binghamton University; PHD, Purdue University W Lafayette  
Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences; Assistant Professor, Feminist, Gender, and Sexuality Studies

#### **Eva Bergsten Meredith**

BA, Franklin Pierce College  
Adjunct Professor of Physical Education; Head Coach of Women's Soccer

#### **Priscilla Meyer**

BA, University of California, Berkeley; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University  
Professor of Russian Language and Literature, Emerita

#### **Cecilia Miller**

BA, LeTourneau College; DPHIL, Oxford University; MPHIL, University of St Andrews  
Professor of History; Professor, Medieval Studies; Tutor, College of Social Studies

#### **Richard A. Miller**

BA, Oberlin College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University  
Woodhouse/Sysco Professor of Economics, Emeritus; Woodhouse/Sysco Professor of Economics, Emeritus

#### **Elizabeth Milroy**

BA, Queens University; MA, Williams College; PHD, University of Pennsylvania  
Professor of Art History, Emerita

#### **Daniel Moller**

MS, Louisiana Technical University; PHD, Louisiana Technical University  
Assistant Professor of the Practice in Integrative Sciences

#### **Tina Montenegro**

MA, Universiteacut; Paris 1 Pantheacut;on-Sorbonne; MA, New York University; MPHIL, Universidade de Satilde;o Paulo; PHD, New York University  
Visiting Assistant Professor of French

#### **Marichal B Monts**

BA, Wesleyan University  
Conductor, Ebony Singers

#### **J. Donald Moon**

BA, University Minnesota Mpls; MA, University of California, Berkeley; PHD, University Minnesota Mpls  
Ezra and Cecile Zilkha Professor in the College of Social Studies; Professor of Government; Co-Chair, College of Social Studies; Chair, Government; Professor, Environmental Studies; Tutor, College of Social Studies

#### **Steven T. Moore**

BA, University of South Carolina; PHD, University of Michigan  
Assistant Professor of Government

#### **Edward C. Moran**

BS, Pennsylvania State University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Professor of Astronomy; Chair, Astronomy Department; Director, Graduate Studies; Director, Van Vleck Observatory; Professor, Integrative Sciences; Co-Coordinator, Planetary Science

#### **Jill G. Morawski**

BA, Mount Holyoke College; MA, Carleton University; MAA, Wesleyan University; PHD, Carleton University  
Willbur Fisk Osborne Professor of Natural Science; Professor of Psychology; Chair, Psychology; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies

#### **Melisa Moreno Garcia**

Visiting Scholar in Chemistry

#### **David W. Morgan**

BA, Haverford College; DPHIL, Oxford University  
Professor of History, Emeritus

#### **Thomas J. Morgan**

BA, Montana State University; BS, Montana State University; MAA, Wesleyan University; MSC, University of California, Berkeley; PHD, University of California, Berkeley  
Foss Professor of Physics; Professor of Physics

#### **Ishita Mukerji**

AB, Bryn Mawr College; PHD, University of California, Berkeley  
Fisk Professor of Natural Science; Professor of Molecular Biology and Biochemistry; Director, College of Integrative Sciences; Professor, Integrative Sciences; Professor, Environmental Studies; Co-Coordinator, Molecular Biophysics; Coordinator, Health Studies

#### **Kate Mullen**

BS, Central Connecticut State University; MA, Springfield College Illinois; MED, Springfield College Illinois  
Senior Woman Administrator; Adjunct Professor of Physical Education; Head Coach of Women's Basketball

#### **James Paul Mulrooney**

PHD, Wesleyan University

Visiting Assistant Professor of Biology

#### **John Murillo**

BA, Howard University; MFA, New York University  
Assistant Professor of English; Director, Creative Writing; Assistant Professor, African American Studies

#### **Michelle Aaron Murolo**

BS, Clarion University of Pennsylvania; PHD, Yale University  
Associate Professor of the Practice in Molecular Biology and Biochemistry

#### **Russell D. Murphy**

BA, St Johns College; MA, Boston College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University  
Professor of Government, Emeritus

#### **Wendi Field Murray**

BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona  
Archaeology Collections Manager; Adjunct Assistant Professor of East Asian Studies

## **N**

#### **Janice R. Naegele**

BA, Mount Holyoke College; PHD, Massachusetts Institute of Technology  
Dean of the Natural Sciences and Mathematics; Alan M. Dachs Professor of Science; Professor of Biology; Professor, Neuroscience and Behavior; Professor, Integrative Sciences

#### **Jesse Nasta**

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University  
Visiting Assistant Professor of African American Studies

#### **Valerie L. Nazzaro**

BA, University of Connecticut; MA, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut  
Assistant Professor of the Practice in Quantitative Analysis

#### **Louise C. Neary**

BA, Boston College; MA, Boston College; PHD, University of Illinois Urbana  
Adjunct Associate Professor of Spanish; Adjunct Associate Professor, Education Studies

#### **Howard I. Needler**

BA, Oxford University; BS, Yale University; MA, Oxford University; PHD, Columbia University  
Professor of Letters, Emeritus

#### **David Paul Nelson**

BA, Kalamazoo College; MFA, California Institute of Arts; PHD, Wesleyan University  
Adjunct Associate Professor of Music

#### **Ellen Nerenberg**

AB, Stanford University; PHD, University of Chicago  
Hollis Professor of Romance Languages and Literatures; Professor of Italian

#### **Markus Neumann**

BA, University of Mannheim; MA, University of Mannheim  
Postdoctoral Research Fellow, Wesleyan Media Project

#### **Marguerite Nguyen**

BA, Duke University; PHD, University of California, Berkeley  
Associate Professor of English; Associate Professor, Environmental Studies;  
Associate Professor, East Asian Studies

#### **Tammy Vo Nguyen**

BFA, The Cooper Union; MFA, Yale University  
Assistant Professor of Art

#### **Ruth Nisse**

BA, Columbia University; PHD, University of California, Berkeley  
Professor of English; Chair, English; Professor, Medieval Studies

#### **Brian Hale Northrop**

BA, Middlebury College; PHD, University of California, Los Angeles  
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

#### **Stewart E. Novick**

BS, SUNY at Stony Brook; MA, Harvard University; MAA, Wesleyan University;  
PHD, Harvard University  
Joshua Boger University Professor of the Sciences and Mathematics; Professor of  
Chemistry; Professor, Integrative Sciences

#### **Laurie Nussdorfer**

BA, Yale University; MA, Princeton University; MSC, London School of Economics  
and Political Science; PHD, Princeton University  
William Armstrong Professor of History, Emerita; Professor of Letters, Emerita

## **O**

#### **Suzanne B. O'Connell**

BA, Oberlin College; MS, SUNY at Albany; PHD, Columbia University  
Professor of Earth and Environmental Sciences; Professor, Integrative Sciences

#### **Miguel O'Malley**

Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

#### **Alison L. O'Neil**

BS, Binghamton University; PHD, Montana State University  
Assistant Professor of Chemistry; Assistant Professor, Neuroscience and  
Behavior; Assistant Professor, Integrative Sciences

#### **Richard M. Ohmann**

BA, Oberlin College; MA, Harvard University; MAA, Wesleyan University; PHD,  
Harvard University  
Benjamin Waite Professor of the English Language, Emeritus

#### **Pavel V Oleinikov**

Associate Director, Quantitative Analysis Center; Adjunct Assistant Professor of  
Quantitative Analysis

#### **Donald B. Oliver**

BS, Brandeis University; MAA, Wesleyan University; PHD, Tufts University  
Daniel Ayres Professor of Biology; Professor of Molecular Biology and  
Biochemistry; Professor, Integrative Sciences

#### **Maria-Christina Oliveras**

BA, Yale University; MFA, National Theatre Conservatory  
Assistant Professor of Theater

#### **Rich Olson**

BA, Cornell University; PHD, Columbia University  
Associate Professor of Molecular Biology and Biochemistry; Associate Professor,  
Integrative Sciences

#### **Chinwe Ezinna Oriji**

BS, Rutgers University; MPHIL, University of Cambridge; PHD, University of Texas  
Austin  
Assistant Professor of Sociology

#### **Allison Diane Orr**

BA, Wake Forest University; MFA, Mills College  
Distinguished Fellow in the College of the Environment

#### **Maria Ospina**

BA, Brown University; MA, Harvard University; PHD, Harvard University  
Associate Professor of Spanish; Associate Professor, Latin American Studies

#### **Rosemary Elizabeth Ostfeld**

BA, Wesleyan University; MA, Wesleyan University; MPHIL, University of  
Cambridge; PHD, University of Cambridge  
Visiting Assistant Professor, Public Policy; Visiting Assistant Professor of  
Environmental Studies

#### **Ákos A. Östör**

BA, University of Melbourne; MA, University of Melbourne; PHD, University of  
Chicago  
Professor of Anthropology, Emeritus

#### **Eiko Otake**

BA, SUNY Empire St College  
Visiting Artist-in-Residence, Dance

#### **Marcela Oteíza**

BFA, University of Chile; MFA, California Institute of Arts  
Associate Professor of Theater; Associate Professor, Theater; Associate  
Professor, College of the Environment

#### **Ning Ouyang**

BS, Tianjin Univ. of Science & Technology; MS, University of Massachusetts  
Amherst; PHD, University of Massachusetts Amherst  
Visiting Assistant Professor of Quantitative Analysis

## **P**

#### **Teresita Padilla-Benavides**

BS, Escuela Nacional de Ciencias B; MS, Centro de Investigacion y Estu; PHD,  
Centro de Investigacion y Estu  
Assistant Professor of Molecular Biology Biochemistry

#### **Paula Paige**

BA, Mount Holyoke College; MA, Middlebury College  
Adjunct Professor of Romance Languages and Literatures, Emerita

#### **George Mathew Paily**

MSC, Indian Institute of Technology; PHD, Pennsylvania State University  
Assistant Professor of the Practice in Physics

#### **John T. Paoletti**

BA, Yale University; MA, Yale University; MAA, Wesleyan University; PHD, Yale  
University  
Professor of Art History, Emeritus

#### **Gregory Pardlo**

Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

#### **William Paris**

BA, Susquehanna University; MA, New York University; PHD, Pennsylvania State  
University

Frank B. Weeks Visiting Assistant Professor of Philosophy

**Emmanuel Paris-Bouvret**

Director, Language Resources and Technology; Director of Language Resources and Technology; Coordinator, Less Commonly Taught Languages; Adjunct Instructor in Romance Languages and Literatures

**Hyun Hee Park**

BA, Dankook University; BA, Yonsei University; MA, Korean National Univ of Arts; PHD, University of Chicago  
Visiting Assistant Professor of East Asian Studies

**Paula C. Park**

BA, Rutgers, the State University; MA, University of Texas Austin; PHD, University of Texas Austin  
Assistant Professor of Spanish; Assistant Professor, Latin American Studies

**Richard Parkin**

BA, University of California, Berkeley; MFA, University of California, Los Angeles  
Assistant Professor of the Practice in Film Studies

**Christopher Parslow**

BA, Grinnell College; MA, University of Iowa; PHD, Duke University  
Robert Rich Professor of Latin; Professor of Classical Studies; Professor, Archaeology; Professor, Art History

**Andrea L. Patalano**

BA, Brown University; MA, University of Michigan; PHD, University of Michigan  
Professor of Psychology; Professor, Neuroscience and Behavior

**Courtney Patterson-Faye**

BA, University of Pennsylvania; MA, Northwestern University; PHD, Northwestern University  
Assistant Professor of Sociology

**Peter C. Patton**

BA, Franklin & Marshall; MAA, Wesleyan University; MS, Colorado St University; PHD, University of Texas Austin  
Alan M. Dachs Professor of Science, Emeritus

**Mary Paul**

BFA, University of Connecticut  
Assistant Professor of the Practice in Theater

**Katie Pearl**

BA, University of Washington; MFA, Brown University  
Assistant Professor of Theater

**Justin Craig Peck**

BA, Brandeis University; MA, University of Virginia; PHD, University of Virginia  
Assistant Professor of Government

**Gayle Pemberton**

BA, University of Michigan; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of English, Emerita; Professor of African American Studies, Emerita

**Ana M. Perez-Girones**

BA, University of Seville; MA, Cornell University  
Adjunct Professor of Spanish; Adjunct Professor, Education Studies

**Michelle Louise Personick**

BA, Middlebury College; PHD, Northwestern University  
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences

**George A. Petersson**

BS, City College; PHD, California Institute Tech  
Fisk Professor of Natural Science, Emeritus

**Joel Pfister**

BA, Columbia University; MA, University of Sussex; MA, University College, University of London; PHD, Yale University  
Olin Professor of English; Professor of English; Professor, American Studies

**Earl W. Phillips**

BA, Wesleyan University; JD, The Catholic University of America  
Adjunct Instructor in Environmental Sciences; Visiting Scholar in the College of the Environment

**William R. Pinch**

BA, University of Virginia; MA, University of Virginia; PHD, University of Virginia  
Professor of History; Chair, History; Associate Editor, History and Theory; Professor, Environmental Studies

**Shamel Pitts**

Visiting Instructor in Dance

**Victoria Pitts-Taylor**

BA, Ohio University; PHD, Brandeis University  
Professor of Feminist, Gender, and Sexuality Studies; Chair, Feminist, Gender, and Sexuality Studies; Professor, Science in Society; Professor, Sociology

**Ulrich Plass**

MA, University of Michigan; PHD, New York University  
Professor of German Studies; Chair, College of Letters; Professor, Letters

**Scott L. Plous**

BA, University Minnesota Mpls; PHD, Stanford University  
Professor of Psychology

**Catherine Poisson**

BA, Sorbonne; MA, New York University; PHD, New York University  
Associate Professor of French; French Section Head; Associate Professor, Feminist, Gender, and Sexuality Studies

**David Pollack**

MA, Harvard University; PHD, Harvard University; SB, University of Chicago  
Associate Professor of Mathematics

**Philip Pomper**

BA, University of Chicago; MA, University of Chicago; MAA, Wesleyan University; PHD, University of Chicago  
William Armstrong Professor of History, Emeritus

**Gabrielle Piedad Ponce-Hegenauer**

BA, University of Illinois Urbana; MFA, Johns Hopkins University; PHD, Johns Hopkins University  
Assistant Professor of Letters; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Stéphanie Ponsavady**

MA, University of Provence; MA, New York University; MPHIL, New York University; PHD, New York University  
Associate Professor of French

**Nadya Potemkina**

DMA, The University of Memphis; MM, University Nthrn Iowa; MM, Ball State University  
Adjunct Associate Professor of Music; Adjunct Associate Professor, Russian, East European, and Eurasian Studies

**Christopher J. Potter**

BA, University of Connecticut; MA, University of Connecticut  
Adjunct Professor of Physical Education; Head Coach of Men's Ice Hockey

#### **Helen Mills Poulos**

BS, Pepperdine University; MPHIL, Yale University; MS, Pennsylvania State University; PHD, Yale University  
Adjunct Assistant Professor of Environmental Studies

#### **Joya Powell**

BA, Columbia University; MA, New York University  
Visiting Assistant Professor, African American Studies; Visiting Assistant Professor of Dance

#### **Joyce Ann Powzyk**

BS, Principia College; PHD, Duke University  
Associate Professor of the Practice in Biology

#### **Rex F. Pratt**

BS, University of Melbourne; MAA, Wesleyan University; PHD, University of Melbourne  
Beach Professor of Chemistry, Emeritus

#### **Michelle Pretorius**

BA, University of the Free State; MA, Columbia College Chicago; PHD, Ohio University  
Visiting Assistant Professor of English, Creative Writing

#### **Wallace C. Pringle**

BA, Middlebury College; MAA, Wesleyan University; PHD, Massachusetts Institute of Technology  
Professor of Chemistry, Emeritus

## **Q**

#### **Justine Quijada**

BA, University of Chicago; MA, Columbia University; PHD, University of Chicago  
Associate Professor of Religion; Chair, Religion; Associate Professor, College of the Environment; Associate Professor, Russian, East European, and Eurasian Studies

#### **Andrew H Quintman**

BA, Hampshire College; MA, University of Michigan; PHD, University of Michigan  
Associate Professor of Religion; Associate Professor, East Asian Studies

## **R**

#### **John G. Raba**

BS, University of New Haven; MED, University of New Haven  
Adjunct Professor of Physical Education; Head Coach of Men's Lacrosse

#### **Felipe A. Ramírez**

BS, Colorado St University; PHD, University of Michigan  
Assistant Professor of Mathematics

#### **Julia A. Randall**

BFA, Washington University; MFA, Rutgers University  
Associate Professor of Art

#### **Anurag Rao**

BS, St. Xavier's College; MS, Indian Statistical Institute; PHD, Brandeis University  
Visiting Assistant Professor of Mathematics

#### **Christopher Rasmussen**

BA, University of Virginia; MS, University of Virginia; PHD, University of Arizona  
Associate Professor of Mathematics

#### **Wendy Rayack**

BA, Oberlin College; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison  
Associate Professor of Economics; Tutor, College of Social Studies

#### **Jennifer Raynor**

BA, Lemoyne College; MA, Johns Hopkins University SAIS; MS, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison  
Assistant Professor of Economics

#### **Seth Redfield**

BM, New Eng Conserv Music; BS, Tufts University; MS, University of Colorado Boulder; PHD, University of Colorado Boulder  
Associate Professor of Astronomy; Associate Professor, Integrative Sciences; Co-Coordinator, Planetary Science

#### **Joseph P. Reilly**

BA, Trinity College; MBA, University of Rhode Island  
Adjunct Professor of Physical Education; Head Coach of Men's Basketball

#### **Phillip G. Resor**

AB, Dartmouth College; MS, University of Wyoming; PHD, Stanford University  
Professor of Earth and Environmental Sciences; Professor, Education Studies

#### **Julie Ann Ribchinsky**

Private Lessons Teacher; Private Lessons Teacher/Cello

#### **Michael D. Rice**

BS, Western Mich University; MS, Western Mich University; PHD, Wesleyan University  
Professor of Computer Science, Emeritus

#### **Jeff Rider**

BA, Yale University; MA, University of Chicago; PHD, University of Chicago  
Professor of French; Chair, Medieval Studies; Professor, Medieval Studies

#### **Robyn E. Ridley**

BS, Columbia University; MS, University of California, San Diego; PHD, University of California, San Diego  
Assistant Professor of the Practice in Integrative Sciences

#### **Andrea Roberts**

BS, Cornell University; MS, Polytechnic University; PHD, Wesleyan University  
Associate Professor of the Practice in Chemistry

#### **Michael J. Roberts**

BA, Cambridge University; MA, Cambridge University; MA, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Illinois Urbana  
Robert Rich Professor of Latin, Emeritus

#### **Patricia M Rodriguez Mosquera**

BA, Autonoma University of Madrid; MA, Autonoma University of Madrid; PHD, University of Amsterdam  
Professor of Psychology; Professor, Feminist, Gender, and Sexuality Studies

#### **Robert J. Rollefson**

BA, University of Wisconsin at Madison; MAA, Wesleyan University; PHD, Cornell University  
Professor of Physics, Emeritus

#### **Natalia Roman Alicea**

Assistant Director of Intercultural and Language Learning; Visiting Instructor,  
Center for Global Studies

**Jennifer S. Rose**

BA, University of Rhode Island; MA, University of Rhode Island; PHD, University  
of Rhode Island

Professor of the Practice in the Center for Pedagogical Innovation; Director,  
Center for Pedagogical Innovation; Director, Institutional Review Board;  
Professor of the Practice, Quantitative Analysis Center

**Phyllis Rose**

BA, Radcliffe College; MA, Yale University; MAA, Wesleyan University; PHD,  
Harvard University  
Professor of English, Emerita

**Robert Rose**

BA, Lamar University; MA, Louisiana State University; PHD, Indiana University  
Bloomington  
Postdoctoral Fellow in Computer Science

**Rob Rosenthal**

BA, Rutgers University; MA, University Calif Santa Bar; PHD, University of  
California, Santa Barbara  
John E. Andrus Professor of Sociology, Emeritus

**Michael S. Roth**

BA, Wesleyan University; MA, Princeton University; PHD, Princeton University  
President; University Professor

**Joseph T. Rouse**

BA, Oberlin College; MA, Northwestern University; MAA, Wesleyan University;  
PHD, Northwestern University  
Hedding Professor of Moral Science; Professor of Philosophy; Professor of  
Science in Society; Professor, Environmental Studies

**Dana Royer**

BA, University of Pennsylvania; PHD, Yale University  
Professor of Earth and Environmental Sciences; Professor, Environmental Studies

**Mary-Jane Victoria Rubenstein**

BA, Williams College; MA, Columbia University; MPHIL, Cambridge University;  
MPHIL, Columbia University; PHD, Columbia University  
Professor of Religion; Professor, Science in Society; Professor, Feminist, Gender,  
and Sexuality Studies

**Mirko Rucnov**

BA, University Nevada Lasvegas; MFA, Columbia University  
Assistant Professor of the Practice in Film Studies

**Sasha Rudensky**

BA, Wesleyan University; MFA, Yale University  
Associate Professor of Art; Program Director; Associate Professor, Russian, East  
European, and Eurasian Studies

**Ashraf H.A. Rushdy**

BA, University of Alberta; MA, University of Alberta; PHD, Cambridge University  
Benjamin Waite Professor of the English Language; Professor of English;  
Professor of African American Studies; Chair, African American Studies; Academic  
Secretary; Professor, Feminist, Gender, and Sexuality Studies

**Donald M. Russell**

Professor of Physical Education, Emeritus

**Joseph Russo**

BA, SUNY at Albany; MA, Brooklyn College; MPHIL, Goldsmith's, University of  
London; PHD, University of Texas Austin  
Visiting Assistant Professor of Anthropology

**Matthew Francis Russo**

Private Lessons Teacher

**Irina M. Russu**

BS, University of Bucharest; MAA, Wesleyan University; PHD, University of  
Pittsburgh  
E. B. Nye Professor of Chemistry; Professor of Chemistry; Professor, Integrative  
Sciences

**Peter Rutland**

BA, Oxford University; DPHIL, York University  
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought;  
Professor of Government; Tutor, College of Social Studies; Professor, Russian,  
East European, and Eurasian Studies

**Sarah Ryan**

BA, Capital University; JD, Quinnipiac University; MLS, Texas Womans University;  
PHD, Ohio University  
Associate Professor of the Practice in Oral Communication

## S

**Iddrisu Saaka**

DIPL, University of Ghana; MFA, University of California, Los Angeles  
Assistant Professor of Dance

**Roberto Saba**

BA, University of Satilde;o Paulo; MA, University of Satilde;o Paulo; PHD,  
University of Pennsylvania  
Assistant Professor of American Studies

**Lily Leopold Saint**

BA, University of Pennsylvania; PHD, CUNY The Graduate Center  
Associate Professor of English; Coordinator, African Studies

**Yoshiko Yokochi Samuel**

BA, Aichi Prefectural Women's Coll; MA, Michigan State University; MA, Indiana  
University Bloomington; PHD, Indiana University Bloomington  
Professor of Asian Languages and Literatures, Emerita

**Edwin Sanchez**

CER, Yale University  
Assistant Professor of the Practice in Theater

**Charles A. Sanislow**

BS, Northrn Michigan Univ; MA, Ball State University; PHD, Duke University  
Professor of Psychology; Professor, Neuroscience and Behavior

**Hirsh Sawhney**

BA, University of Michigan; MFA, Rutgers University  
Assistant Professor of English; Coordinator, South Asian Studies

**Said Sayrafiezadeh**

Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

**Ronald W. Schatz**

BA, University of Wisconsin at Madison; MAA, Wesleyan University; MAT,  
Harvard University; PHD, University of Pittsburgh  
Professor of History

**Karl E. Scheibe**

BS, Trinity College; MAA, Wesleyan University; PHD, University of California, Berkeley  
Professor of Psychology, Emeritus

**Jeffrey Schiff**

BA, Brown University; MFA, University of Massachusetts Amherst  
Professor of Art

**Paul Schwaber**

BA, Wesleyan University; MA, University of California, Berkeley; PHD, Columbia University  
Professor of Letters, Emeritus

**Vera Schwarcz**

BA, Vassar College; MA, Yale University; MAA, Wesleyan University; PHD, Stanford University  
Mansfield Freeman Professor of East Asian Studies, Emerita

**Nancy L. Schwartz**

BA, Oberlin College; MAA, Wesleyan University; PHD, Yale University  
Professor of Government, Emerita; Professor of Government, Emerita

**Salvatore Scibona**

BA, St. John's College; MFA, University of Iowa  
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

**Anthony O. Scott**

BA, Harvard University; MA, Johns Hopkins University  
Distinguished Professor of Film Criticism

**Briele Scott**

MM, University of Delaware  
Graduate Student, MUSC-MA; Visiting Instructor in Music

**Stanley A. Scott**

Private Lessons Teacher; Private Lessons Teacher/Banjo/Mandolin/Guitar

**Philip H. Scowcroft**

BA, Harvard University; MA, Cornell University; PHD, Cornell University  
Edward Burr Van Vleck Professor of Mathematics, Emeritus

**John G. Seamon**

BS, Columbia University; PHD, University of Massachusetts Amherst  
Professor of Psychology, Emeritus

**Cecilia Sebastian**

BA, Johns Hopkins University; MA, Goethe University Frankfurt; MA, Yale University  
Visiting Instructor in German Studies

**Olga Sendra Ferrer**

BA, Universidad de Barcelona; MA, North Carolina State University; MA, Princeton University; PHD, Princeton University  
Assistant Professor of Spanish

**Megan Sesma**

Private Lessons Teacher; Private Lessons Teacher/Harp

**Saray Shai**

BS, Israel Institute of Technology; PHD, University of St Andrews  
Assistant Professor of Computer Science

**Anu (Aradhana) Sharma**

BA, Eugene Lang College; MA, Columbia University; MA, Stanford University; PHD, Stanford University

Associate Professor of Anthropology; Associate Professor, Feminist, Gender, and Sexuality Studies

**Gary Shaw**

BA, McGill University; DPHIL, Oxford University  
Professor of History; Associate Editor, History and Theory; Professor, Medieval Studies

**Damien Francis Sheehan-Connor**

BA, Amherst College; MD, Tufts University; PHD, University of California Santa Bar  
Associate Professor of Economics; Tutor, College of Social Studies

**Sadia Quraeshi Shepard**

BA, Wesleyan University; MA, Stanford University; MFA, Hunter College  
Assistant Professor of Film Studies

**Meng-ju Renee Sher**

BA, Wesleyan University; MA, Harvard University; PHD, Harvard University  
Assistant Professor of Physics; Assistant Professor, Environmental Studies; Assistant Professor, Integrative Sciences

**Natalie Shibley**

BA, Columbia University; MA, University of Pennsylvania; PHD, University of Pennsylvania  
Visiting Assistant Professor of Science and Society

**Sanford Shieh**

AB, Cornell University; BA, Cornell University; BA, Oxford University; PHD, Harvard University  
Professor of Philosophy

**Keiji Shinohara**

Artist-in-Residence, Art; Artist-in-Residence, East Asian Studies

**Sunrose Shrestha**

BA, Hamilton College; MS, Tufts University; PHD, Tufts University  
Postdoctoral Fellow in Mathematics and Computer Science

**Anna Shusterman**

PHD, Harvard University; SB, Brown University  
Associate Professor of Psychology; Co-Chair, College of Education Studies

**Lauren Silber**

BA, University of Connecticut; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst  
Assistant Professor of the Practice in Academic Writing; Assistant Professor of the Practice, English

**Fred Simmons**

Private Lessons Teacher; Private Lessons Teacher/Jazz Piano

**Michael Singer**

BS, University of Southern California; PHD, University of Arizona  
Professor of Biology; Chair, Biology; Professor, Environmental Studies

**Harry M. Sinnamon**

BA, La Salle University; MAA, Wesleyan University; MS, Villanova University; PHD, University of Rochester  
Professor of Psychology, Emeritus

**Joseph M. Siry**

BA, Princeton University; MAA, Wesleyan University; MAR, University of Pennsylvania; PHD, Massachusetts Institute of Technology  
Kenan Professor of the Humanities; Professor of Art History; Co-Coordinator, Urban Studies

**Gilbert L. Skillman**

BA, University Kentucky Lexngt; MA, University of Michigan; PHD, University of Michigan  
Professor of Economics; Chair, Economics; Tutor, College of Social Studies

**Brando Skyhorse**

BA, Stanford University; MFA, University of California, Irvine  
Visiting Scholar in the Shapiro Center for Writing at Wesleyan University

**Joseph P. Slaughter**

BS, U.S. Naval Academy; MA, University of Maryland College Park; MA, U.S. Naval War College; PHD, University of Maryland College Park  
Visiting Assistant Professor, History; Chamberlain Project Fellow in the Center for the Study of Public Life

**Mark Slobin**

BA, University of Michigan; MA, University of Michigan; PHD, University of Michigan  
Winslow-Kaplan Professor of Music, Emeritus

**Richard S. Slotkin**

BA, Brooklyn College; MAA, Wesleyan University; PHD, Brown University  
Olin Professor of English, Emeritus

**Michael James Slowik**

BA, Wesleyan University; MA, University of Chicago; MA, University of Iowa; PHD, University of Iowa  
Associate Professor of Film Studies

**Colin A. Smith**

BA, New York University; PHD, University of California, San Francisco  
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences; Assistant Professor, Molecular Biology and Biochemistry

**Courtney Weiss Smith**

BA, University Of Dayton; MA, Washington University; PHD, Washington University  
Associate Professor of English; Associate Professor, Science in Society

**Gay Smith**

BA, University of Hawaii; MA, University of Hawaii; MAA, Wesleyan University; PHD, University of California, Los Angeles  
Professor of Theater, Emerita

**Victoria Smolkin**

BA, Sarah Lawrence College; PHD, University of California, Berkeley  
Associate Professor of History; Tutor, College of Social Studies; Associate Professor, Russian, Eastern European, and Eurasian Studies

**Daniel Smyth**

BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago  
Assistant Professor of Letters; Assistant Professor, German Studies; Assistant Professor, Philosophy

**David F. Snyder**

BS, St. Lawrence University  
Adjunct Professor of Physical Education, Emeritus

**Noemie B. Solomon**

PHD, New York University  
Visiting Assistant Professor of Curatorial Practice in Performance

**Peter Gordon Solomon**

BS, North Carolina State University; MA, University of Connecticut

Adjunct Professor of Physical Education; Head Coach of Swimming/Diving (Men's Women's)

**Ben Somera**

BA, University Southern Calif  
Adjunct Associate Professor of Physical Education; Head Coach of Volleyball

**Elise Springer**

BA, Wesleyan University; MA, University of Connecticut; PHD, University of Connecticut  
Associate Professor of Philosophy; Associate Professor, Feminist, Gender, and Sexuality Studies

**Nicole Lynn Stanton**

BA, Antioch College; MFA, Ohio State University  
Provost and Senior Vice President for Academic Affairs; Professor of Dance; Professor, Environmental Studies; Professor, African American Studies

**Emily R Stark**

BA, Pomona College; MA, Tufts University; PHD, Tufts University  
Assistant Professor of Mathematics

**Francis W. Starr**

BS, Carnegie Mellon University; MS, Boston University; PHD, Boston University  
Professor of Physics; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Director, Integrated Design, Engineering and Applied Science

**Robert S. Steele**

BA, Whitman College; MAA, Wesleyan University; PHD, Harvard University  
Professor of Psychology, Emeritus

**Steven E. Stemler**

BS, University of Washington; MED, Boston College; PHD, Boston College  
Associate Professor of Psychology; Co-Chair, College of Education Studies

**Brian A. Stewart**

BS, Stanford University; PHD, Massachusetts Institute of Technology  
Professor of Physics; Professor, Environmental Studies; Professor, Integrative Sciences

**John Stoehr**

BA, SUNY College Potsdam; MA, University of Cincinnati  
Visiting Assistant Professor in Liberal Studies; Visiting Assistant Professor of Public Policy

**William W. Stowe**

BA, Princeton University; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University  
Benjamin Waite Professor of the English Language, Emeritus

**Tracy Heather Strain**

AB, Wellesley College; EDM, Harvard University  
Professor of the Practice in Film Studies and Co-Director of the Wesleyan Documentary Project

**Sonia Sultan**

BA, Princeton University; MA, Harvard University; PHD, Harvard University  
Professor of Biology; Professor, Environmental Studies

**Prof. Sumarsam**

BA, Akademi Seni Karavitan; MA, Wesleyan University; PHD, Cornell University  
Winslow-Kaplan Professor of Music; Professor of Music

**Charlie Suriyakham**

Private Lessons Teacher; Private Lessons Instructor/Clarinet

**Michael H Sussman**

Visiting Assistant Professor of Public Policy

**Andrew Szegedy-Maszak**

BA, University of Michigan; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University

Jane A. Seney Professor of Greek; Professor of Classical Studies; Professor, Environmental Studies

# T

**Ying Jia Tan**

BA, University of California, Berkeley; MA, Stanford University; MPHIL, Yale University; PHD, Yale University

Assistant Professor of History; Assistant Professor, East Asian Studies

**Fumi Tanakadate**

Visiting Instructor in Music

**Amy Cynthia Tang**

BA, Harvard University; PHD, Stanford University

Douglas J. and Midge Bowen Bennet Associate Professor of English and American Studies; Associate Professor of American Studies; Associate Professor of English

**Erika A. Taylor**

BS, University of Michigan; PHD, University of Illinois Urbana

Associate Professor of Chemistry; Faculty Director, McNair Program; Associate Professor, Environmental Studies; Associate Professor, Integrative Sciences

**Steven Taylor**

BA, Glassboro St College; MA, Brown University; PHD, Brown University

Visiting Assistant Professor of Curatorial Practice in Performance

**Tula Telfair**

BFA, Moore College Of Art; MFA, Syracuse University

Professor of Art; Chair, Art and Art History; Professor, Environmental Studies

**Kate TenEyck**

BFA, Rhode Island School of Design; MFA, University of Hartford

Art Studio Technician; Adjunct Assistant Professor of Art

**Mitali Thakor**

BA, Stanford University; PHD, Massachusetts Institute of Technology

Assistant Professor of Science in Society; Assistant Professor, Feminist, Gender, and Sexuality Studies

**Kelly M. Thayer**

BA, Regis College; PHD, Wesleyan University

Assistant Professor of the Practice in Integrative Sciences

**Ellen Thomas**

BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht

Harold T. Stearns Professor of Integrative Sciences; Smith Curator of Paleontology of the Joe Webb Peoples Museum of Natural History; University Professor in the College of Integrative Sciences; Research Professor, Earth and Environmental Sciences

**Meltem Toksoz**

BA, Ankara University; MA, University of Virginia; PHD, SUNY at Binghamton University

Visiting Associate Professor of History

**Khachig Tölölyan**

BA, Harvard University; MA, University of Rhode Island; MAA, Wesleyan

University; PHD, Brown University

Professor of English; Professor of Letters; Editor, Diaspora; Professor, German Studies

**Jesse Wayne Torgerson**

BA, Biola University; MA, University of California, Berkeley; PHD, University of California, Berkeley

Assistant Professor of Letters; Assistant Professor, Medieval Studies; Assistant Professor, History

**Edward Torres**

BA, Roosevelt University

Assistant Professor of the Practice in Theater

**Elizabeth G. Traube**

BA, Radcliffe College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University

Professor of Anthropology; Professor, Feminist, Gender, and Sexuality Studies

**Helen B. Treloar**

BS, University of Melbourne; PHD, University of Melbourne

Associate Professor of the Practice in Neuroscience and Behavior

**William L. Trousdale**

Associate Professor of Physics, Emeritus

**Min-Feng Tu**

BS, National Tsing Hua University; MS, California Institute Tech; PHD, California Institute Tech

Assistant Professor of the Practice in Physics

**Jennifer Tucker**

BA, Stanford University; MPHIL, Cambridge University; PHD, Johns Hopkins University

Associate Professor of History; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Environmental Studies; Associate Professor, Science in Society

**Alfred Turco**

BA, Brown University; MA, Harvard University; PHD, Harvard University

Professor of English, Emeritus

**Laura Ann Twagira**

BA, Wellesley College; MA, Sarah Lawrence College; PHD, Rutgers University

Associate Professor of History; Associate Professor, Feminist, Gender, and Sexuality Studies

**Patrick Tynan**

BS, University of Massachusetts Amherst

Adjunct Professor of Physical Education; Head Coach of Women's Crew

# U

**Roman Utkin**

MA, Kazan State University; MPHIL, Yale University; PHD, Yale University

Assistant Professor of Russian, East European, and Eurasian Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

## V

### **Libby Van Cleve**

Private Lessons Teacher; Private Lessons Teacher/Oboe

### **Richard T. Vann**

BA, Southern Methodist C; BA, Oxford University; MA, Oxford University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of History and Letters, Emeritus

### **Johan C. Varekamp**

BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht  
Smith Curator of Mineralogy and Petrology of the Joe Webb Peoples Museum of Natural History; Harold T. Stearns Professor of Earth Science; Professor of Earth and Environmental Sciences; Professor, Environmental Studies; Professor, Latin American Studies

### **Heather Vermeulen**

BA, University of Richmond; MA, Yale University; MA, Yale Divinity School; MPHIL, Yale University; PHD, Yale University  
Visiting Assistant Professor of Feminist, Gender, and Sexuality Studies

### **Keith Vinci**

BS, University of Connecticut; MA, Southern Connecticut State University  
Visiting Instructor in American Sign Language

### **Eirene Visvardi**

BA, University of Crete; MPHIL, Cambridge University; PHD, Stanford University  
Associate Professor of Classical Studies; Chair, Classical Studies

### **Danielle Vogel**

BA, Dowling College; MA, Naropa University; PHD, University of Denver  
Assistant Professor of English, Creative Writing

### **Greg A. Voth**

BS, Wheaton College; MS, Cornell University; PHD, Cornell University  
Professor of Physics; Professor, Integrative Sciences

### **Kevin Vrevich**

BA, University of Wisconsin at Madison; MA, SUNY at Binghamton University; PHD, Ohio State University  
Visiting Assistant Professor of History

## W

### **Phillip B. Wagoner**

BA, Kenyon College; PHD, University of Wisconsin at Madison  
Professor of Art History; Professor, Archaeology

### **Ao Wang**

BA, Beijing University; MA, Washington University; PHD, Yale University  
Associate Professor of East Asian Studies

### **Leslie A. Warren**

BA, University of Vermont  
Visiting Instructor in American Sign Language

### **Marvin D. Warshaw**

Private Lessons Teacher; Private Lessons Teacher/Viola

### **Takeshi Watanabe**

BA, Yale University; PHD, Yale University

Associate Professor of East Asian Studies

### **Nicole K Watkins**

BS, Wright State University; MSE, Indiana University Bloomington; PHD, Indiana University Bloomington  
Postdoctoral Fellow in Psychology

### **Clifton Nathaniel Watson**

BA, University of Connecticut; MA, North Carolina Central Univ; PHD, Fordham University  
Director, Jewett Center for Community Partnerships; Adjunct Assistant Professor of Public Policy

### **Christopher S. Weaver**

BS, Hobart and William Smith Colleges; CAS, Wesleyan University; MALS, Wesleyan University; SM, Massachusetts Institute of Technology  
Distinguished Professor of Computational Media in the College of Integrative Sciences

### **Qur-an Webb**

Visiting Instructor in African American Studies

### **Kari Weil**

BA, Cornell University; MA, Princeton University; PHD, Princeton University  
University Professor of Letters; University Professor, College of the Environment; University Professor, Environmental Studies; University Professor, Feminist, Gender, and Sexuality Studies; Co-Coordinator, Animal Studies

### **Leslie A. Weinberg**

BA, Case Western Reserve Univ; MFA, University of Connecticut  
Retired Artist-in-Residence, Theater

### **Stephanie Kuduk Weiner**

BA, University Minnesota Mpls; PHD, Stanford University  
Professor of English; Director, Shapiro Writing Center; Director, Academic Writing

### **Michael P. Weir**

BS, University of Sussex; PHD, University of Pennsylvania  
Professor of Biology; Professor, Integrative Sciences; Co-Coordinator, Informatics and Modeling

### **Joseph Weiss**

BA, University British Columbia; MA, University of Chicago; PHD, University of Chicago  
Assistant Professor of Anthropology

### **Margot Weiss**

BA, University of Chicago; MA, Duke University; PHD, Duke University  
Associate Professor of Anthropology; Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Queer Studies

### **Ruth Striegel Weissman**

DIP, University of Tubingen; MAA, Wesleyan University; PHD, University of South Carolina  
Walter Crowell University Professor of Social Sciences, Emerita

### **Arthur S. Wensinger**

MAA, Wesleyan University  
Marcus L. Taft Professor of German Language and Literature and Professor of the Humanities, Emeritus

### **T. David Westmoreland**

BS, Massachusetts Institute of Technology; PHD, University of North Carolina at Chapel Hill

Associate Professor of Chemistry; Chair, Chemistry; Associate Professor, Integrative Sciences

**Michael F. Whalen**

BA, Wesleyan University; MS, Springfield College Ma  
Frank V. Sica Director of Athletics and Chair, Physical Education; Adjunct Professor of Physical Education

**Geoffrey H. Wheeler**

BA, Dartmouth College  
Adjunct Professor of Physical Education; Head Coach of Men's Soccer

**Duffield White**

BA, Wesleyan University; PHD, University of Michigan  
Associate Professor of Russian Language and Literature, Emeritus

**Ellen B. Widmer**

BA, Wellesley College; MA, Tufts University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of Asian Languages and Literatures, Emerita

**Ann M. Wightman**

BA, Duke University; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University  
Professor of History, Emerita

**Sarah Wilbur**

BFA, University of Wisconsin-Milwaukee; MFA, University of California, Los Angeles; PHD, University of California, Los Angeles  
Visiting Assistant Professor of Curatorial Practice in Performance

**Thorsten Wilhelm**

MA, Universitaet Heidelberg; PHD, Universitaet Heidelberg  
Visiting Assistant Professor of German Studies

**Sarah E. Wiliarty**

BA, Harvard University; MA, University of California, Berkeley; PHD, University of California, Berkeley  
Associate Professor of Government; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, German Studies

**Kim Williams**

BA, C.W. Post Campus, LIU  
Adjunct Professor of Physical Education; Head Coach of Women's Lacrosse

**Janice D. Willis**

BA, Cornell University; MA, Columbia University; PHD, Columbia University  
Professor of Religion, Emerita

**Jon C. Wilson**

Head Coach of Women's Golf

**Krishna R. Winston**

BA, Smith College; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University  
Marcus L. Taft Professor of German Language and Literature, Emerita; Director, Susan B. and William K. Wasch Center for Retired Faculty; Professor, College of the Environment, Emerita

**Robert Wintsch**

BA, Beloit College; PHD, Brown University  
Visiting Researcher in Earth and Environmental Sciences

**Roy H. Wiseman**

Private Lessons Teacher; Private Lessons Teacher/Bass

**Serena S. Witzke**

BA, McMaster University; MA, McMaster University; PHD, University of North Carolina at Chapel Hill  
Visiting Assistant Professor of Classical Studies

**Pippin Wolfe**

BA, Brown University; BS, Brown University; PHD, University of Massachusetts Amherst  
Postdoctoral Fellow in Computer Science

**Carol S. Wood**

AB, Randolph Macon W College; MAA, Wesleyan University; PHD, Yale University  
Edward Burr Van Vleck Professor of Mathematics, Emerita

**Mark A. Woodworth**

BA, Wesleyan University; MALS, Wesleyan University  
Adjunct Professor of Physical Education; Head Coach of Baseball

## Y

**Jielu Yao**

BS, Fudan University; MSC, National University of Singapore  
Research Fellow, Wesleyan Media Project; Research Fellow, Wesleyan Media Project

**Gary W. Yohe**

BA, University of Pennsylvania; MA, SUNY at Stony Brook; MPHIL, Yale University; PHD, Yale University  
Huffington Foundation Professor of Economics and Environmental Studies, Emeritus

**Susan Youssef**

MFA, University of Texas Austin  
Visiting Assistant Professor of Film

## Z

**Camilla Zamboni**

MA, Ohio State University  
Adjunct Assistant Professor in Italian; Italian Section Head; Assistant Professor of the Practice in Italian; Assistant Professor of the Practice, Education Studies; Assistant Professor of the Practice, Fries Center for Global Studies

**Balazs Zelity**

BA, Budapest Business School; MA, Universite Catholique de Louvain; PHD, Brown University  
Assistant Professor of Economics

**Xiaoxue Zhao**

BA, Yale University; PHD, Yale University  
Visiting Assistant Professor of Economics

**Su Zheng**

BA, Central Conservatory of Music; MA, New York University; PHD, Wesleyan University  
Associate Professor of Music; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, East Asian Studies

**Xiaomiao Zhu**

MA, Wesleyan University

Adjunct Professor of Asian Languages and Literatures, Emerita

**Sebastian Zimmeck**

LLM, University of California, Berkeley; MS, Columbia University; PHD, University of Kiel; PHD, Columbia University

Assistant Professor of Computer Science

**Dan Zimmer**

BA, The New School; MA, University of Chicago; MA, Cornell University

Guest Lecturer, College of Film and the Moving Image

**Mlondi Zondi**

BA, University of KwaZulu-Natal; MA, Northwestern University; MFA, University of California, Irvine

Andrew W. Mellon Predoctoral Fellow

**Jeremy Zwelling**

BA, Columbia University; MA, Brandeis University; PHD, Brandeis University

Associate Professor of Religion, Emeritus

# WESLEYAN UNIVERSITY CATALOG DISCLAIMERS

---

A copy of the lists of officers and faculty, as well as academic regulations, for the 2020-2021 issue of the Wesleyan University Catalog was prepared as of September, 2020. Information about fees and expenses, financial aid, and scholarships applies to the academic year 2020-2021. However, plans of study, course titles, fees, expenses, and other matters described herein are subject to change at the discretion of the University. Such changes may apply to matriculated students. University policies and guidelines for their implementation are published online at [wesleyan.edu](https://wesleyan.edu) (<https://wesleyan.edu>).

As required by law, a copy of the Wesleyan University security report is available upon request. This report includes statistics for three previous years on specific reported crimes that occurred on campus, on property that is owned or controlled by the University, and public property within a reasonably contiguous geographic area to campus. The report also includes institutional policies concerning campus security, crime prevention, the reporting of crimes, University policy on alcohol and drugs, and many other related matters. A copy of this report is available at the Office of Admission, the Office of Public Safety, or the Public Safety website located at [wesleyan.edu/publicsafety](http://wesleyan.edu/publicsafety) (<http://wesleyan.edu/publicsafety>).

## STATEMENT OF NONDISCRIMINATION

Wesleyan University admits students without regard to race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression, to all rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression in admission to, access to, employment in, or treatment in its programs and activities.
