2026-2027 CALENDAR

July	7	Tuesday	Departments are notified to export & review Fall 2026 curriculum
July	7	Tuesday	FYS Summer session begins
July	13	Monday	Deadline to submit GLS Fall 2026 tutorial, capstone & thesis proposals
July	14	Tuesday	Deadline to Drop Summer FYS course
July	20	Monday	GLS Fall registration opens (non-HR benefit recipients)
July	23	Thursday	GLS Fall registration opens (HR benefit recipients)
July	29	Wednesday	Grading mode change deadline for Summer FYS courses
July	30	Thursday	Planning period begins for new or returning BA students who were not eligible to participate in April Pre-Reg. Students create plans for consideration in scheduling. Ends on 8/15/26 at 12PM
July	30	Thursday	Revisions to Fall 2026 curriculum are due to Registrar's Office
August	5	Wednesday	Withdrawal deadline for Summer FYS courses 5pm
August	11	Tuesday	Grade entry opens for Summer FYS courses
August	12	Wednesday	Summer FYS courses end
August	12	Wednesday	Departments should review Fall 2026 room assignments & submit room change requests through Courseleaf: CLSS
August	23	Sunday	GLS Fall orientation for new students
August	25	Tuesday	BLS Fall orientation for new students
September	3	Thursday	GLS Fall registration closes
September	7	Monday	Undergraduate, graduate, and GLS classes begin
September	18	Friday	Add/Drop period ends
September	18	Friday	Last day to drop a GLS fall course with no record on the transcript
October	9	Friday	1st quarter grading mode deadline. For courses in which students have a choice of grading mode, the final choice must be made by 5PM.
October	16	Friday	Last day to withdraw from 1st quarter classes
October	23	Friday	1st quarter classes end
October	28	Wednesday	2nd quarter classes begin. *2nd quarter classes may be added or dropped during the five working days following the first class or meeting.
November	3	Tuesday	Planning period for eligible undergraduate students. Students create plans for consideration in scheduling.
November	9	Monday	Winter Session registration opens
November	16	Monday	Planning period ends for eligible undergraduate students.
November	16	Monday	GLS Spring proposal deadline for theses, capstones and tutorials
November	17	Tuesday	Scheduling period. Eligible undergraduate students review courses scheduled.
November	18	Wednesday	Adjustment period begins for all students eligible for pre-registration. Students can create or make adjustments to their class schedules in real time. Staggered openings.
November	24	Tuesday	For courses in which students have a choice of grading mode, the final choice must be made by 5PM
November	25	Wednesday	Thanksgiving Recess begins
November	29	Sunday	Thanksgiving Recess ends
November	30	Monday	GLS Spring Registration opens (non-HR benefit recipients)
December	3	Thursday	GLS Spring Registration opens (HR benefit recipients)
December	4	Friday	Last day to withdraw from full semester, 2nd quarter & GLS classes and recieve a grade of "W"
December	11	Friday	Winter Session registration closes
December	11	Friday	Undergraduate, Graduate and GLS classes end
December	11	Friday	Undergraduate, Graduate and GLS classes end
December	14 -19	Monday - Saturday	GLS make-up classes, final presentations and examinations.
January	5	Tuesday	All Fall 2026 grades submitted to the Registrar's Office. Grade entry system closes at 11:59PM
January	4	Monday	Last day to drop a course and have no record on the transcript for Winter session
January	5	Tuesday	Winter session classes begin
January	14	Thursday	Deadline to change Winter Session course grading mode (due by 5PM)
January	15	Friday	GLS Spring registration closes
January	15	Friday	Last day to withdraw from Winter Session classes
January	17	Sunday	GLS Spring orientation for new students
January	18	Monday	Most University offices closed in observance of Dr. Martin Luther King, Jr. Day. Winter Session courses will be held as scheduled.
January	18	Monday	Winter Session classes end
January	19	Tuesday	Winter Session reading day
January	20	Wednesday	Adjustment period begins for graduate and BA students who were eligible for planning including newly admitted students and those returning from study abroad or leave who were not eligible to participate in November Pre-Reg. Students can create a schedule in real time.
January	20	Wednesday	Winter Session examinations

January	21	Thursday	Add/Drop period begins
January	21	Thursday	Undergraduate, graduate and GLS classes begin
February	3	Wednesday	Last day to drop a GLS course with no record on transcript
February	3	Wednesday	Add/Drop period ends
February	3	Wednesday	Winter Session grades due
February	19	Friday	3rd quarter grading mode deadline. For courses in which students have a choice of grading mode, the final choice must be made by 5PM.
February	26	Friday	Last day to withdraw from 3rd quarter classes
March	5	Friday	3rd quarter classes end
March	14	Sunday	GLS Summer proposal deadline for theses, capstones, and tutorials.
March	22	Monday	4th quarter classes begin. 4th quarter classes may be added or dropped during the five working days following the first class meeting.
March	24	Wednesday	Summer session registration opens
March	30	Tuesday	Planning period begins for BA students only and those returning from study abroad or a leave. Students create plans for consideration in scheduling.
April	5	Monday	GLS summer registration opens (non-HR benefit recipients)
April	8	Thursday	GLS summer registration opens (HR benefit recipients)
April	12	Monday	Planning period ends for eligible undergraduate students
April	13	Tuesday	Scheduling period. Students review courses scheduled
April	14	Wednesday	Adjustment period begins for all students eligible for pre-registration. Students can create or make adjustments to their class schedules in real time. Staggered openings.
April	20	Tuesday	Adjustment period ends for all students eligible for pre-registration.
April	21	Wednesday	For courses in which students have a choice of grading mode, the final choice must be made by 5PM
April	28	Wednesday	Last day to withdraw from full semester, 4th quarter and GLS classes and revieve a grade of W
May	5	Wednesday	Undergraduate, graduate and GLS classes end
May	6 - 14	Thursday - Friday	GLS make-up classes, final presentations, and exams
May	16	Sunday	GLS summer orientation
May	17	Monday	Spring 2027 grades for all degree candidates submitted to the Registar's Office by noon
May	21	Friday	Summer session 1 registration closes at noon
May	21	Friday	GLS Summer early term registration closes
May	23	Sunday	195th Commencement
May	25	Tuesday	All remaining Spring semester grades submitted to the Registrar's Office. Grade entry system closes at 11:59PM
May	25	Tuesday	Summer session 1 housing opens
May	25	Tuesday	Last day to withdraw from a Summer session 1 or GLS course with no record on transcript
May	26	Wednesday	Summer session 1 and GLS early term classes begin
May	31	Monday	Memorial Day. Most administrative offices closed. Classes will be held as scheduled.
June	16	Wednesday	Summer session 1 for courses in which students have a choice of grading mode, the final choice must be made by 5:00PM
June	18	Friday	Last day to submit requests to withdraw from summer session 1 and GLS early term classes and earn a grade of W
June	22	Tuesday	Summer session 1 and GLS early term classes end
June	23	Wednesday	GLS summer registration closes
June	23	Wednesday	Summer session 2 registration closes at noon
June	23-24	Wednesday-Thursday	Summer session 1 and GLS early term examinations
June	25	Friday	Summer session 1 housing closes
June	27	Sunday	Summer session 2 undergraduate housing opens
June	27	Sunday	Last day to withdraw from session 2 and GLS standard term classes with no record on transcript
June	28	Monday	Summer session 2 and GLS standard term classes begin
July	8	Thursday	Summer session 1 grades due
July	14	Wednesday	Deadline to submit GLS fall 2027 tutorial, capstone and thesis proposals
July	19	Monday	For summer session 2 courses in which students have a choice of grading mode, the final choice must be made by 5:00PM
July	21	Wednesday	Last day to withdraw from summer session 2 and GLS standard term classes and earn a grade of W
July	23	Friday	Summer session 2 and GLS standard term classes end
July	26-27	Monday-Tuesday	Summer session 2 and GLS standard term examinations
July	26	Monday	GLS fall 2027 registration opens (non-HR benefit recipients)
July	28	Wednesday	Summer session 2 University housing closes

July	29	Thursday	GLS fall 2027 registration opens (HR benefit recipients)
August	10	Tuesday	Summer session 2 grades due
August	23	Monday	All GLS grades due

A BRIEF HISTORY

Wesleyan University was founded in 1831 by Methodist leaders and Middletown citizens. Instruction began with 48 students of varying ages, the president, three professors, and one tutor; tuition was $36 per year.

Today Wesleyan offers instruction in 46 departments and 45 major fields of study and awards bachelor of arts and graduate degrees. The master of arts degree and the doctor of philosophy are regularly awarded in 11 fields of study. Students may choose from more than 900 courses each year and may be counted upon to devise, with the faculty, some 900 individual tutorials and lessons.

The student body is made up of approximately 2,900 full-time undergraduates and 140 graduate students, as well as 100 part-time students in Graduate Liberal Studies. A full-time faculty of about 300 is joined each semester by a distinguished group of visiting artists and professors. But despite Wesleyan's growth, today's student/instructor ratio remains at 8 to 1, and about three-quarters of all courses enroll fewer than 20 students.

Named for John Wesley, the founder of Methodism, Wesleyan is among the oldest of the originally Methodist institutions of higher education in the United States. The Methodist movement was particularly important for its early emphasis on social service and education, and from its inception Wesleyan offered a liberal arts program rather than theological training. Wesleyan's first president, Willbur Fisk, a prominent Methodist educator, set out an enduring theme at his inaugural address in September 1831. President Fisk stated that education serves two purposes: "the good of the individual educated and the good of the world." Student and faculty involvement in a wide range of community-service activities reflected President Fisk's goals in the 19th century and continues to do so today.

Wesleyan has been known for curricular innovations since its founding. At a time when classical studies dominated the American college curriculum, emulating the European model, President Fisk sought to put modern languages, literature, and natural sciences on an equal footing with the classics. When Judd Hall, now home to the Psychology Department, was built in 1870, it was one of the first American college buildings designed to be dedicated wholly to scientific study. Since the 1860s, Wesleyan's faculty has focused on original research and publication in addition to teaching.

The earliest Wesleyan students were all male, primarily Methodist, and almost exclusively white. From 1872 to 1912, Wesleyan was a pioneer in the field of coeducation, admitting a limited number of women to study and earn degrees alongside the male students. Coeducation succumbed to the pressure of male alumni, some of whom believed that it diminished Wesleyan's standing in comparison with its academic peers. In 1911, some of Wesleyan's alumnae helped to found the Connecticut College for Women in New London to help fill the void left when Wesleyan closed its doors to women.

Ties to the Methodist church, which were particularly strong in the earliest years and from the 1870s to the 1890s, waned in the 20th century. Wesleyan became fully independent of the Methodist church in 1937. Under the leadership of Victor L. Butterfield, who served as president from 1943 to 1967, interdisciplinary study flourished. The Center for Advanced Studies (now the Center for the Humanities) brought to campus outstanding scholars and public figures who worked closely with both faculty and students. Graduate Liberal Studies, founded in 1953, is the oldest program of its kind and grants the master of arts in liberal studies (MALS) and the master of philosophy in liberal arts (MPhil) degrees. During this same period, the undergraduate interdisciplinary programs, the College of Letters, the College of Social Studies, and the now-defunct College of Quantitative Studies, were inaugurated. Wesleyan's model program in world music, or ethnomusicology, also dates from this period. Doctoral programs in the sciences and ethnomusicology were instituted in the early 1960s.

During the 1960s, Wesleyan began actively recruiting students of color. A number of Wesleyan faculty, students, and staff were active in the Civil Rights Movement, and the Reverend Martin Luther King Jr. visited campus several times. By 1968, women were again admitted as exchange or transfer students. In 1970, the first female students were admitted to Wesleyan's freshman class since 1909. The return of coeducation heralded a dramatic expansion in the size of the student body, and gender parity was achieved within several years.

Wesleyan's programs and facilities expanded as well, and new interdisciplinary centers were developed. The Center for African American Studies, which grew out of the African American Institute (founded in 1969), was established in 1974. The Center for the Arts, home of the University's visual and performance arts departments and performance series, was designed by prominent architects Kevin Roche and John Dinkeloo and opened in the fall of 1973. The Mansfield Freeman Center for East Asian Studies was established in 1987. The Center for the Americas, which combines American studies and Latin American studies, was inaugurated in 1998. The Center for Film Studies, with state-of-the-art projection and production facilities, opened in 2004.

An addition to the Freeman Athletic Center opened in 2005 with the 1,200#seat Silloway Gymnasium for basketball and volleyball, the 7,500#square-foot Andersen Fitness Center, and the Rosenbaum Squash Center with eight courts.

Fall 2007 marked the opening of the Suzanne Lemberg Usdan University Center and the adjacent renovated Fayerweather building, which retains the towers of the original Fayerweather structure as part of its facade. The Usdan Center overlooks Andrus Field (home of Corwin Stadium and Dresser Diamond), College Row, and Olin Library, and houses dining facilities for students and faculty, seminar and meeting spaces, the Wesleyan Student Assembly, the post office, the box office, and retail space. Fayerweather provides common areas for lectures, recitals, performances, and other events; it contains a large space on the second floor, Beckham Hall, named for the late Edgar Beckham, who was dean of the college from 1973 to 1990. In winter 2012, the historic squash courts building (41 Wyllys Avenue) on College Row was renovated; now renamed Boger Hall, it is the state-of-the-art home for the Gordon Career Center, the Paoletti Art History Wing, and the College of Letters.

Michael S. Roth '78 became Wesleyan's 16th president at the beginning of the 2007–08 academic year. He has undertaken a number of initiatives that have energized the curriculum and helped to make a Wesleyan education more affordable for many. He has emphasized a three-year degree program that can save families as much as $50,000; eliminated loans for most students with a family income below $60,000, replacing them with grants; and ensured that other students receiving financial aid are able to graduate without a heavy burden of debt. Allbritton Hall, opened in 2012, has become a hub of civic engagement—encompassing the Patricelli Center for Social Entrepreneurship, the Allbritton Center for the Study of Public Life, and the Jewett Center for Community Partnerships. Four new interdisciplinary colleges also have been launched: the College of the Environment, the College of Film and the Moving Image, the College of East Asian Studies, and the College of Integrative Sciences. Another new initiative, the Shapiro Creative Writing Center, brings together students, faculty, and visiting writers seriously engaged in writing. Since 2011, applications for admission have increased substantially to record levels. During this time Roth oversaw the most successful campaign in Wesleyan's history. The campaign raised a total of $482 million, including more than $270 million in support of one of Wesleyan's highest priorities: new endowment and annual funding for financial aid.

CURRICULUM

Wesleyan University is dedicated to providing an education in the liberal arts that is characterized by boldness, rigor, and practical idealism. At Wesleyan, students have the opportunity to work at the highest levels, discover what they love to do, and apply their knowledge in ways the world finds meaningful. While Wesleyan has no core requirements, the University has established General Education Expectations that are designed to encourage breadth within the student educational experience. Students select courses in consultation with advisors, creating customized itineraries of study in three intellectual spheres: the arts and humanities (HA), the social and behavioral sciences (SBS), and the natural sciences and mathematics (NSM).

OPEN CURRICULUM

When students direct their own education in consultation with intensively engaged faculty advisors, they learn to think independently, explore questions from multiple points of view, and develop habits of critical thinking that are hallmarks of a liberal education. Wesleyan upholds the principle that student choice fosters the drive to explore freely and seek connections across courses, generating the intellectual excitement that can fuel liberal education as a lifelong pursuit. With the freedom to sample liberally from across the curriculum, students are able to experience the surprise of unexpected ability in fields new to them and to make fruitful connections across subject areas that do not traditionally intersect. This can generate innovative depth of study and new ways of seeing—with students posing questions from one discipline to the assumptions of another.

MAJORS, MINORS, AND CERTIFICATES AT WESLEYAN — AREAS OF STUDY

With a large variety of majors, minors, and certificates (http://www.wesleyan.edu/academics/), Wesleyan students have the opportunity to work at the highest level, discover what they love to do, and apply their knowledge in meaningful ways.

MAJORS

A degree of disciplined mastery in a major field of learning is an important dimension of a liberal arts education. The major may help a student prepare for a specific profession or may be necessary for a more specialized education in graduate school or another postbaccalaureate educational institution. Majors can take several forms—a departmental or interdepartmental major or a college program (College of Letters or College of Social Studies). Generally, students declare a major in the second semester of their sophomore year—when they have sampled widely from different areas of the curriculum, have completed the first stage of their General Education Expectations, and are ready to develop deeper knowledge in a particular area of study.

LINKED MAJORS, MINORS, AND CERTIFICATES

Some majors (College of Integrative Sciences, environmental studies) may only be declared as linked majors in conjunction with another major. In addition to major fields of study, Wesleyan also offers optional minor fields of study and certificates (similar to interdisciplinary minors). Students may not declare more than a combined total of three majors, certificates, and minors.

GENERAL EDUCATION EXPECTATIONS

Wesleyan's open curriculum challenges students to create their own plan for general education. Academic coherence here does not rely on a core curriculum or a set of required courses; instead, students propose their academic plan to their faculty advisors and recalibrate it with their advisors each semester as their discoveries lead them to pursue new areas or deepen existing strengths. By the end of the first two years, students are expected to have earned at least two course credits in each of the three areas (HA, SBS, NSM), all from different departments or programs. In the last two years, students are expected to take one additional course credit in each of the three areas. A student who does not meet the expectation of a total of nine general education course credits by the time of graduation will not be eligible for University Honors, Phi Beta Kappa, honors in general, and honors in certain departments, and may not declare more than a combined total of two majors, certificates, and minors.

COMPETENCIES

To help students identify and describe the skills they gain on their journey through Wesleyan's open curriculum, we've developed a flexible framework of four competencies to reflect on and consider as students build—and share—their own personal narrative about their Wesleyan experience. The four competencies are: **Mapping:** Navigating Complex Environments; **Expressing:** Writing and Communication; **Mining:** Empirical Analysis and Interpretation; and **Engaging:** Negotiating Cultural Contexts.

Mapping is defined as the ability to examine the relationship of objects, concepts, spaces, and environments in the material and imagined worlds. It involves developing tools to create, manipulate, and navigate constructed and natural environments and charting movement through and interactions with space and its consequences. *Expressing* is defined as the ability to express thoughts, ideas, and emotions to others effectively and concisely through a variety of mediums and modalities. *Mining* is defined as the ability to use logical and empirical reasoning and methods to explicate, analyze, and quantify one's material and social realities. It involves learning about the measurement, analysis, summary, and presentation of information, including about the natural world, as well as answering questions, solving problems, making predictions, and testing and constructing theories by employing mathematical, statistical, logical, and scientific reasoning. *Engaging* is defined as the ability to comprehend, appreciate, and negotiate human and cultural differences as well as the complexity of one's own relation and accountability to wider sociohistorical dynamics. It involves reading, speaking, or understanding a second or third language (contemporary or classical); gaining experience working, studying, or traveling abroad, or in other unfamiliar cultural contexts; and participating in the political and social life of local and global communities.

ACADEMIC ADVISING

An academic advisor is assigned to each first-year student from faculty who teach in a field in which the student has expressed interest. Once a student declares a major, the advisor is assigned from that department or program. Students, with the help of faculty advisors, typically put together an academic itinerary that includes lecture-style courses, smaller seminars, laboratories, and performance courses. Every student is given the opportunity to take a seminar course specially designed for first-year students. These first-year seminars (FYS) vary dramatically—from presenting the work of a specific thinker to introducing

an unfamiliar area of study—but all tend to emphasize the importance of writing at the university level and the methods used to collect, interpret, analyze, and present evidence as part of a scholarly argument. Faculty teaching these classes highlight the type of writing associated with their respective disciplines and help students improve how they develop, compose, organize, and revise their written work.

WESMAPS AND WESPORTAL

WesMaps (http://www.wesleyan.edu/wesmaps) is the indispensable online guide to the curriculum used by students to map their academic schedule each semester. WesPortal contains both personal information added by students and official information that helps track their progress toward fulfilling General Education Expectations, majors, and University requirements. WesPortal is an important advising tool for students and their faculty advisors. WesPortal applications provide students with online access to their course schedule, grades, academic history, Moodle, course registration, student accounts, campus events, and more. Using these applications, students and their advisors are able to make informed decisions leading to a thoughtful academic experience.

STUDENT ACADEMIC RESOURCES

Wesleyan provides a range of academic services to students in support of learning both inside and outside the classroom. The Writing Workshop and Math Workshop are important resources available to all students. Student Academic Resources (SAR) includes programs for intellectual enrichment and academic support. One key element of SAR is the work of Academic Peer Advisors (APAs). APAs are upperclass students who work during new student orientation and throughout the academic year to support Wesleyan's faculty advising program, enhance student access to academic resources, and strengthen students' academic skills. In addition, the Deans' Peer Tutoring program provides content-based tutoring services for most courses and is available to all students.

The goals of SAR are to foster a community culture that recognizes the relationship between intellectual growth and personal development; to ensure that students know about and are encouraged to seek out appropriate services; and to share information among programs and constituents to ensure the provision of high-quality and accessible services that facilitate academic achievement for all students. More information is available on the academic resources (http://www.wesleyan.edu/sar) website.

CAREER ADVISING

Employers and graduate schools look for applicants who can write well, think critically, and solve problems independently. Because of their liberal arts training, Wesleyan students attain these skills in the context of a wider knowledge of human experiences. While students need not prepare narrowly for their careers, Wesleyan encourages them to give careful thought to their lives after graduation.

The Gordon Career Center works with students of all class years to:

- Translate their liberal education, and campus and community experiences, into a lifetime of meaningful work
- Explore their interests, personality, skills, and experiences to identify potential career options that fit their unique profile
- Write professional resumes, CVs, cover letters, and personal statements for job, internship, fellowship, and graduate/professional school applications
- Find meaningful summer opportunities to bolster and build professional skills and experiences related to their career aspirations
- Conduct successful job and internship searches, prepare and practice for interviews, and build strong relationships with employers and Wesleyan alumni
- Research and connect with professional schools, graduate schools, and degree programs; craft competitive applications; and navigate the school decision-making process
- Transition to life after Wesleyan, whether through employment, a fellowship, graduate or professional school, a service program, volunteer opportunity, or personal adventure

The Gordon Career Center uses an intuitive and modern career management platform, Handshake (http://wesleyan.joinhandshake.com/). This mobile-ready recruiting application is designed to help students discover and explore jobs, internships, organizations, and events all personalized to their specific career interests.

HEALTH PROFESSIONS AND PREMEDICAL ADVISING

Health professions graduate schools welcome students with a liberal arts background. A liberal arts education does not exclude the scientific and quantitative knowledge required to become an outstanding health professional; rather, it includes courses from these disciplines within a larger intellectual context.

Please note that health professional schools (medical, dental, veterinary medicine, nursing, optometry, etc.) do not require a specific major, readily accepting applicants from diverse academic backgrounds. However, they do require that applicants take specific courses (mostly in the sciences) in order to apply. Therefore, your choice of major should be based on a variety of factors—ideally your preferred area of study, and what you do well in, rather than what you think health professional schools want to see. As a health provider, you may want to work in a Spanish-speaking community; if so, a Hispanic Literature and Cultures or Latin American Studies major would be a great advantage. Perhaps you will want to prepare yourself for some of the tougher ethical questions that physicians face, and therefore choose Philosophy, Religion, or Science in Society as your major. An Economics major can help you when you confront the variety of market forces that affect health care practice and research. You should choose some of your courses with these types of considerations in mind, as well as giving yourself the opportunity to develop as a whole person, thereby taking courses for no other reason than the fact that they intrinsically appeal to you.

Students are encouraged to explore and test their interest in a given health profession through internships, summer employment, volunteer positions in a clinical setting, and shadowing health professionals before applying to graduate school. The Gordon Career Center (https://wesleyan.edu/careercenter) and the Office of Community Service (http://www.wesleyan.edu/jccp/) provide information about volunteer opportunities on campus and in the local community for students considering the health professions. Experience in conducting research may also be very useful in learning about a field and developing the skills needed to contribute to the field and to evaluate the work of others. Students with a particular interest in the natural sciences have the opportunity to participate in laboratory research projects under the supervision of Wesleyan faculty who are principal investigators with on-campus research groups that may also include graduate students. In recent years, undergraduates have also participated in public health and clinical research both on and off campus. Some student researchers have been coauthors of papers published in scientific journals or have presented the results of their research at scholarly meetings. Beginning with the first week of the first year and continuing beyond graduation, a specialized health professions advisor is available to assist students and graduates interested in any of the health professions with academic planning, identification of summer opportunities and meaningful post-graduation employment, and preparation for and navigation of the application process to health professions graduate schools. The Wesleyan Health Professions Panel offers current students and those within five years of graduation a letter of institutional sponsorship at the time of application to medical, dental, or veterinary school. The success of Wesleyan's alumni in various health fields attests to the quality of our undergraduate curriculum and our health professions advising. For more information go to our health professions site (https://www.wesleyan.edu/careercenter/students/health/).

PREBUSINESS

Wesleyan alumni are sought after in the business world. A significant number of the organizations that recruit Wesleyan students are business concerns. Recent top employers have included Amazon, Bloomberg, BlackRock, Booz Allen Hamilton, Citi, Facebook, Google, IBM, JPMorgan Chase, and Venture for America. Wesleyan has a reputation among employers for producing students who have well-developed organizational and leadership skills. A Wesleyan

student in almost any major who does well and plans his or her courses with an eye toward meeting entrance requirements for professional study will be well prepared for business school. It is rare for undergraduates to go directly to a top-tier business school without work experience. In fact, many of the top-tier business schools require two to four years of work experience for competitive candidates. Students interested in fields such as banking and consulting should plan to take quantitative courses offered by a number of academic departments to seek an internship in their field of interest as early as sophomore year.

PRELAW

Law schools have long recognized that liberal arts institutions provide the best possible preparation for future attorneys. They look for students who possess particular intellectual skills: the ability to think critically, analyze a situation, extract pertinent information, and communicate effectively, both orally and in writing. Any academic major is acceptable to a law school. Wesleyan students who major in the traditionally popular subjects of study for prelaw: History, Government, Economics, English, American Studies, and Philosophy; and now the less traditional, in the sciences and the arts; are admitted each year to the top law schools in the country. Outside the classroom, Wesleyan students participate in a variety of activities that develop the character and leadership skills they will need to succeed in law school, including political and social activism and community service. Over the summer, students intern at such organizations as the Northern Virginia Capital Defender Office, the Bronx Defenders Office, the Center for Court Innovation, Ungvarsky Law LLC (a capital defense firm), and the CT Commission on Human Rights and Opportunities. The Gordon Career Center (http://www.wesleyan.edu/careercenter/)has a designated prelaw advisor who provides resources and information for students considering careers in and related to law. Students and graduates are encouraged to meet with the advisor individually, attend informational workshops and guest speaker events (e.g., human rights law, careers in law and policy, careers in “Big Law”), and seek faculty assistance to navigate the law school selection and application process.

ACADEMIC REGULATIONS

- Degree Requirements (p. 14)
- Major (p. 14)
- GenEd Expectations (p. 15)
- Academic Standing (p. 16)
- Honors (p. 16)
- Academic Review and Promotion (p. 17)
- Prematriculation Credit (p. 18)
- Acceleration (p. 19)
- Nondegree Undergraduate Students (p. 19)
- Transfer Students (p. 20)
- Study Abroad (p. 20)
- Internal Special Study Programs (p. 21)
- External Special Study Programs (p. 22)
- Advanced Degrees (p. 24)
- General Regulations (p. 24)

DEGREE REQUIREMENTS

Degrees are awarded once a year at Commencement. Students who complete the requirements for the degree at other times during the year will be recommended to receive the degree at the next Commencement. A student is expected to satisfy the requirements for the degree of bachelor of arts within eight semesters. Based on a modification voted by the faculty, the requirements for this degree specified below are for students entering Wesleyan in and after the fall of 2000. Students who entered Wesleyan prior to the fall of 2000 must refer to the appropriate section of the degree requirements and academic regulations at wesleyan.edu/registrar/academic_regulations/prior_2000.html (https://wesleyan.edu/registrar/academic_regulations/prior_2000.html).

GRADUATION REQUIREMENTS

The requirements are (1) satisfaction of requirements for a major; (2) satisfactory completion of 32 course credits, no fewer than 16 of which must be earned at Wesleyan or in Wesleyan-sponsored programs; (3) a cumulative average of 74 percent or work of equivalent quality; and (4) for bachelor of arts students, at least six semesters in residence at Wesleyan as full-time students for students entering in their first year (for students entering as sophomore transfers, at least five semesters in residence at Wesleyan as full-time students; for students entering as midyear sophomores or junior transfers, at least four semesters in residence at Wesleyan as full-time students; Approved participation in one semester of study abroad will count as a semester in residence). A semester in residence is defined as any semester in which a student attends classes on the Wesleyan campus*, has attempted at least three credits, and received at least one grade. If a conversion to semester hours is required, each Wesleyan credit may be assigned a value of four semester hours.

*or via online classes offered by Wesleyan as a response to the COVID-19 pandemic.

All courses taken at Wesleyan will be listed on the student's transcript. However, there are limits on the number of credits students can count toward the total of 32 course credits required for the bachelor of arts. No more than 16 credits in any one subject (i.e., course code) can be counted toward the degree requirements. All course credits posted to a student's academic records will be considered for oversubscription including prematriculant, study-abroad, and/or transfer credits. A course offered in more than one subject designation (i.e., cross-listed) will count in all subjects in which it is offered. A student who exceeds these limits will be considered oversubscribed, and the additional course credits may not count toward the 32 required for the bachelor of arts.

In addition, the student may count toward the 32 credits a maximum of the following credits:

- A maximum of four credits in any combination of the following:
  - maximum of one credit in physical education (PHED)
  - maximum of one credit in self-paced language courses
  - (LANG 104), and no more than one-half credit in any one language
  - maximum of two student forum credits (419, 420)
  - maximum of four independent study and education-in-the-field credits (any combination of 467, 468, 469, 470)
  - maximum of one-half internship credit (CSPL493, CSPL493Z)
  - maximum of two teaching apprentice credits (491, 492)
- A maximum of four individual and group tutorial credits (401,402, 403, 404, 411, 412, 421, 422, CSPL480)
- A maximum of four times each of repeatable courses

All prematriculation credits that may be counted toward the 32 credits required for graduation will be listed on the student's transcript. However, the number of prematriculation credits that actually count toward the degree is limited by the policy on Prematriculation Credit (https://catalog.wesleyan.edu/academic-regulations/ap-ib-prematric-credit/).

MAJOR

To satisfy the major requirement, a bachelor of arts student must complete a departmental major, an interdepartmental major, or a collegiate program (College of East Asian Studies (p. 270), College of Education Studies (p. 301), College of Integrative Sciences (p. 335), College of Letters (p. 358) or College of Social Studies (p. 394)). A bachelor of liberal studies student must complete a standard concentration or approved self-designed concentration. A student will graduate if the requirements of one major are fulfilled in conjunction with the completion of other degree requirements.

Students may apply for a major any time after the drop/add period in the semester in which they have reached second semester sophomore standing. However, application for admission to the College of East Asian Studies, the College of Letters or the College of Social Studies should be submitted by first-year students during their second semester. Eligibility requirements are set by the department, program, or college, which may deny access or the privilege of continuation to any student whose performance is unsatisfactory. Students who have not been accepted into a major by the beginning of their junior year have a hold placed on their enrollment. Students may not declare more than a combined total of three majors, certificates, and minors.

DEPARTMENTAL MAJOR PROGRAMS

The departmental major is an integrated program of advanced study approved by the major department. It consists of a minimum of eight course credits

numbered **201** or higher. No more than four course credits in the departmental major may be elected from other than the major department. Please see Graduation Requirements for the number of credits that may be counted toward the bachelor of arts degree and oversubscription.

COMPREHENSIVE EXAMINATION

In those departments in which a comprehensive examination is required, passing the examination is a condition of graduation. The major departments determine the nature and scope of the examinations, the amount of supervision to be given to the student in preparation for them, and the time and place of their administration. Both oral and written examinations may be required.

A student who passes the comprehensive examination with a grade deemed creditable by the major department may be excused by the department from the final examination of the last semester in any course in that department and in any other departmental course included in the major program. The student may substitute the grade attained in the comprehensive examination for the final examination grade in each of the designated courses. In all such cases, permission of the course instructor is required to substitute the final examination grade.

If a student fails to qualify for the degree in the senior year solely through failure to attain a satisfactory grade in the comprehensive examination but has satisfied all other requirements for graduation, the student may be permitted to take a second comprehensive examination.

INTERDEPARTMENTAL MAJOR PROGRAMS

The University offers two kinds of interdepartmental majors:

- **Interdepartmental majors**. These are archaeological studies; environmental studies; feminist, gender, and sexuality studies; Latin American studies; medieval studies; Russian, East European, and Eurasian studies; and science in society. The list may change from time to time.
- **University majors**. A student may propose a university major program involving two or more departments, provided that an ad hoc group of at least three members of the faculty approves and supervises the program. Students contemplating a university major should be accepted for admission to a regular departmental major, since the proposal for a university major must be approved by the Committee on University Majors. Deadlines for application are November 1 for the fall semester and April 1 for the spring semester. Additional information about the application procedure may be obtained from the Office of the Deans.

All interdepartmental major programs, like departmental major programs, must include at least eight course credits numbered **201** or higher. Other conditions, including additional courses, may be imposed.

COLLEGIATE PROGRAMS

In the spring of the first year, an undergraduate may apply for admission to the College of Letters, the College of Social Studies, or the College of East Asian Studies. All of these programs offer an organized course of study continuing through the sophomore, junior, and senior years that leads to the degree of bachelor of arts.

GENERAL EDUCATION EXPECTATIONS

The inclusion of courses that fulfill Wesleyan's general education expectations is vital to the student's educational experience at Wesleyan. To assist in the experience, the faculty has divided the curriculum into three areas: natural sciences and mathematics (NSM), the social and behavioral sciences (SBS), and the humanities and the arts (HA). The faculty has assigned a general education designation to a course when appropriate, as well as established a distributional expectation for each general education area. In consultation with their advisors, first-year and sophomore students are encouraged to select courses from all three areas to experience the full dimension of intellectual breadth vital to a liberal education.

General education courses in the natural sciences and mathematics introduce students to key methods of thought and language that are indispensable to a liberal education as well as to our scientifically and technologically complex culture. They are intended to provide scientific skills necessary for critically evaluating contemporary problems. These courses apply scientific method, utilize quantitative reasoning, and enhance scientific literacy. They also provide a means of comparison to other modes of inquiry by including historical, epistemological, and ethical perspectives. The natural science and mathematics division has made special efforts to design and present a variety of courses that meet these objectives and are appropriate for future majors in the humanities, arts, and social sciences, as well as those interested in majoring in one of the natural sciences or mathematics.

General education courses in the social and behavioral sciences introduce students to the systematic study of human behavior, both social and individual. They survey the historical processes that have shaped the modern world, examine political institutions and economic practices, scrutinize the principal theories and ideologies that form and interpret these institutions, and present methods for analyzing the workings of the psyche and society.

General education courses in the humanities and the arts introduce students to languages and literature, to the arts and the mass media, and to philosophy and aesthetics—in short, to the works of the creative imagination as well as to systems of thought, belief, and communication. These courses provide both historical perspectives on and critical approaches to a diverse body of literary, artistic, and cultural materials.

The General Education Expectations are divided into Stages 1 and 2. The expectation for Stage 1 is that all students will distribute their course work in such a way that they will have earned at least two course credits in each of the three areas, all from different departments or programs. To meet the expectation of Stage 2, students must also take one additional course credit in each of the three areas prior to graduation, for a total of nine general education course credits. Credits earned prior to matriculating at Wesleyan as a first-year student cannot be used to fulfill Wesleyan's General Education Expectations. However, courses taken prior to matriculating at Wesleyan may be considered for general education equivalency credit for transfer students. Students may also request in advance that individual courses taken on an approved study-abroad program or a sponsored domestic study-away program be considered for equivalency. Courses taken on Wesleyan-administered study-abroad programs or through the Twelve-College Exchange are coded for equivalency.

There may be some instances in which a student must be Stage 1 compliant by the end of their fourth semester (for example, certain majors

(https://www.wesleyan.edu/registrar/majors_information/general-education.html#:~:text=860%2D685%2D2810-,General%20Education,all%20in%20different%20departments%2C%20by%20the%20end%20of%20the%204th%20semester,-Stage%202%C2%A0requires) require this timeframe, e.g. Psychology). Additionally, if they are seeking any form of honors (University Honors (https://www.wesleyan.edu/registrar/honors/university_honors.html), Phi Beta Kappa (https://catalog.wesleyan.edu/academic-regulations/honors/#:~:text=the%20Honors%20Committee-,Phi%20Beta%20Kappa,-The%20oldest%20national), honors in general scholarship, etc.) they should ensure they follow timelines listed for those accolades. Students seeking three programs (majors/minors/certificates), must complete Stage 1 and Stage 2 by their last semester.

When a course has multiple general educational area assignments (NSM, SBS, HA), a student must select one general education area assignment by the end of the drop/add period. Student forums and individual and group tutorials never carry a general education designation.

ACADEMIC STANDING

SEMESTER CREDITS AND COURSE LOAD

Bachelor of Arts students are expected to satisfy the requirements for the bachelor of arts degree within eight semesters and they are expected to earn four credits in each semester. Students who plan a course schedule with fewer than four credits must have the approval of their class dean and faculty advisor. Students who enroll in fewer than three credits may have their enrollment in the University revoked. A student who plans a course schedule with five or more credits must have the approval of the faculty advisor. Candidates for the bachelor of arts degree may not enroll as part-time students (fewer than three credits). A three-credit program is the minimum required to be considered a full-time student and for which full tuition will be charged. The exception is for seniors completing the second half of their senior thesis who need only this credit to fulfill all degree requirements. They may enroll for only the one thesis credit in their last semester, which will not count as a semester in residence.

GRADING SYSTEM

A student's academic performance in individual courses taken at Wesleyan will be evaluated either by letter grades (A-F) or by the designations credit (CR) or unsatisfactory (U). At the discretion of the instructor, all the students in a course may be restricted to a single grading mode, or each student may be allowed to choose between the two modes, also referred to as student option (OPT). Instructors announce the grading options in WesMaps. In courses in which students have a choice of grading mode, the final choice must be made no later than 14 days after the drop/add period ends.

Whenever the credit/unsatisfactory mode is used, the faculty member is expected to submit to the Office of the Registrar a written evaluation of the student's work in the course.

A student's work in courses using letter grades is evaluated as follows: A, excellent; B, good; C, fair; D, passing but unsatisfactory; E, failure; and F, bad failure. These letter grades (with the exception of the grade of F) may be modified by the use of plus and minus signs.

The numerical equivalents of the letter grades are

A+	98.3
A	95.0
A-	91.7
B+	88.3
B	85
B-	81.7
C+	78.3
C	75.0
C-	71.7
D+	68.3
D	65.0
D-	61.7
E+	58.3
E	55.0
E-	51.7
F	45.0

SEQUENCE COURSES

The granting of credit in two-semester courses (indicated by the "Required Course Sequence" notation in WesMaps) is contingent upon successful completion of both semesters. A student who has failed the first semester of a required course sequence may not continue in the second semester without the permission of the instructor and the class dean. A student who receives the grade of E (but not F) at midyear in a course running through the year and who is permitted by the instructor to continue the course in the second semester may receive credit for the first semester at the completion of the course upon the recommendation of the instructor to the class dean. At that time, the instructor may also recommend a revision of the first-semester grade. If this is not done, the grade for the first semester will remain recorded as E, but credit will be given for the first semester's work. A student who fails the second semester of a two-semester course loses credit for both semesters.

HONORS

DEAN'S LIST

Wesleyan acknowledges high academic achievement at the end of each semester. Students who earn a semester GPA of 93.350 or better will be named to the Dean's List and will have a permanent transcript notation of this achievement. To be eligible, a student must have earned the GPA on at least three letter-graded credits at Wesleyan during the semester and have no unsatisfactory or failing grades. Students with incomplete grades or outstanding credit will be evaluated after the grade and/or credit is posted to the Wesleyan transcript and, if eligible then, they will be added retroactively to the appropriate semester's list. The Dean's List is only applicable to current undergraduate Wesleyan Students and does not include visiting students who's host institution is not Wesleyan.

HONORS PROGRAM

A degree with honors can be earned two ways: (1) departmental honors will be awarded to the student who has done outstanding work in the major field of study and has met the standards for honors or high honors set by the respective department or program; (2) honors in general scholarship will be awarded to the student who is a university major or whose thesis topic or methodology is outside of the domain appropriate for the award of honors in the student's major department(s) or program(s). The candidate for honors in general scholarship must have a minimum grade point average of 90.00, fulfill general education expectations, and submit a senior thesis that meets the standard for honors or high honors set by the Honors Committee.

Honors recognizes a bachelor's degree attained with distinction, either in the major or in general scholarship. Honors recognizes the successful completion of a mentored, independent honors capstone project that has been evaluated by qualified examiners and that meets the standards for excellence in the major or those of the Honors Committee when completed in general scholarship. A student may receive no more than 2.0 credits for any one thesis. Students who major in more than one department, program, or college may submit a thesis in one of their majors or separate theses in more than one major. With the agreement of each of their departments, programs, or colleges, students may submit the same thesis for honors in more than one major.

In the fall semester of the senior year, all candidates for honors must either enroll in a senior thesis tutorial or, if they are pursuing an alternate route to honors, must ask their department to forward their names to the Honors Committee as candidates. Students who wish to pursue Honors in General Scholarship must follow the established guidelines and apply to the Honors Committee, normally in the second semester of the junior year. Thesis registration normally takes place in April. Beginning with the Class of 2018, honors candidates who complete their graduation requirements in December and who are not registering for classes or for a thesis tutorial in the spring are required to submit and register their thesis with the University on the first day of classes of the following spring semester.

University Honors is the highest award Wesleyan bestows. To be eligible, a student must fulfill General Education Expectations, earn high honors (either departmental or in general scholarship), be recommended for University Honors, and qualify in an oral examination administered by the Honors Committee.

PHI BETA KAPPA

The oldest national scholastic honor society, Phi Beta Kappa at Wesleyan is limited to 12 percent of the graduating class each year. Election to the society is based on grades and fulfillment of the eligibility requirements described below.

Fall election is based on grades through the end of a student's junior year and fulfillment of the General Education Expectations (stages I and II). Normally, between 10 and 15 students are elected in the fall; Bachelor of Liberal Studies and transfer students are not eligible for consideration in the fall.

Spring election is based on grades through the end of a student's first semester of the senior year and fulfillment of the General Education Expectations (stages I and II). Bachelor of Liberal Studies and Transfer students are eligible for consideration in the spring. It is preferred that students complete their General Education Expectations in their first semester senior year. However, a rationale for second-semester completion is not required, provided that the secretary of the Gamma Chapter continuously monitors those students to guarantee completion of stage II of the General Education Expectations.

In addition to fulfilling the General Education Expectations, students are expected to have a grade point average of 92 or above to be considered for election in the spring. The minimum grade point average for the fall election is 93. Students are nominated by their major departments. Bachelor of Liberal Studies student and University majors can be nominated by their class dean.

ACADEMIC REVIEW AND PROMOTION

The University expects students to make good use of Wesleyan's educational resources. A student is expected to satisfy the requirements for the degree of bachelor of arts within eight semesters. To remain in academic good standing, an undergraduate is expected to maintain a cumulative average of 74 percent and to satisfy the following earned-credit requirements. Pending credit for an incomplete or absent-from-final-examination with a provisional failing grade may not be considered credit earned. Students who are provisionally required to resign over the summer due to a credit deficiency or who are at risk for required resignation due to failing provisional grades on incompletes must submit earned credit or completed work two to three weeks prior to the start of fall semester classes. Upon submission of a grade for an incomplete or absent-from-final grade, a student's academic status will be reviewed. Promotions in class standing are made at the end of each semester.

REQUIREMENTS FOR ACADEMIC GOOD STANDING

Semester Completed	Expected Credits Earned	Minimum Credits Earned
First	4	2
Second	8	6
Third	12	10
Fourth	16	14
Fifth	20	18
Sixth	24	22
Seventh	28	26

REQUIREMENTS FOR PROMOTION

- **To be promoted to sophomore standing**, a student must have satisfactorily completed at least six credits.
- **To be promoted to junior standing**, a student must have satisfactorily completed at least 14 credits and been accepted into a department/program major.
- **To be promoted to senior standing**, a student must have satisfactorily completed at least 22 credits and made acceptable progress toward the completion of the major.

ACADEMIC DISCIPLINES

Students whose academic performance is deficient will be subject to the following forms of academic discipline, according to the seriousness of the deficiencies. For purposes of academic review, one course is the equivalent of .75 to 1.50 credits. Failing grades on partial-credit courses (.25 and .50) are treated as the equivalent of a D.

Warnings. The mildest form of academic discipline, applied to students whose academic work in one course is passing but unsatisfactory (below C-) or bachelor of arts students who have earned fewer than three but more than two credits in a single semester.

Probation. The category of academic discipline used when the academic deficiency is serious, usually involving failure to achieve the requisite cumulative average of 74 percent, failure in one course, or passing but unsatisfactory work in two. One passing but unsatisfactory grade continues a student on probation. A student on probation is required to meet regularly with the class dean and perform at a satisfactory level in all courses. Failure to do so usually results in more serious discipline. A student who receives more than two incompletes without the class dean's permission may also be placed on probation.

Strict probation. The category of discipline used in very serious cases of academic deficiency, usually involving at least one of the following conditions:

- Failure in one course and passing but unsatisfactory work in another
- Passing but unsatisfactory work in three or four courses
- One failing grade or passing but unsatisfactory work in two courses while on probation
- Credit deficiency for promotion
- Earning two or fewer credits in a single semester for bachelor of arts students

Students on strict probation are required to attend all classes, to complete all work on time, and to meet regularly with their class dean. They may not receive an incomplete without the class dean's approval. One passing but unsatisfactory grade continues a student on strict probation.

Required resignation. The category of discipline used when the student's academic performance is so deficient as to warrant the student's departure from the University for the purpose of correcting the deficiencies. The notation "resigned" will be entered on the student's official transcript. The performance of students who are required to resign will usually involve at least one of the following deficiencies:

- **For all students:**
  - Failure to earn the required number of credits for promotion
- **If a student is in good standing:**
  - Failure in two or more courses, or
  - Failure in one course and passing but unsatisfactory work in two others
- **If a student is on probation:**
  - Failure in one course and passing but unsatisfactory work in one other, or
  - Passing but unsatisfactory work in three or more courses
- **If a student is on strict probation:**
  - Failure in one or more courses
  - Passing but unsatisfactory work in two or more courses

Students who are required to resign may not be on campus or in university housing, nor may they participate in student activities or the life of the university community while on this status. Students who are required to resign may apply for readmission through their class dean after an absence of at least two semesters. The process of application for readmission requires a demonstration of academic preparedness and fulfillment of all the specified requirements for return. Students readmitted after being required to resign will be placed on strict probation.

Separation. The category of discipline used when the student's academic deficiencies are so serious as to warrant the student's departure from the University without eligibility for readmission. The notation "separated" will be entered on the student's official transcript. Separation is imposed if a student's academic performance warrants required resignation for a second time.

Appeals. Students who are required to resign or are separated from the University may appeal their status to the Academic Review Committee, a subcommittee of the Educational Policy Committee. A student who wishes to appeal must notify his or her class dean two days prior to the scheduled date on which appeals will be reviewed. Information about the appeals procedure will be provided by the student's class dean. Appeals are reviewed by members of the subcommittee of the Educational Policy Committee with attendance by the class deans and the vice president for student affairs. A student may elect to attend his or her review or participate via telephone. The committee's decisions are final.

PREMATRICULATION CREDIT

At most 4.0 prematriculation credits from college level courses (including dual enrollment courses) and prematriculation tests such as AP and IB tests may be counted toward graduation, and at most 2.0 such credits may be on the basis of prematriculation tests. Prematriculation credit can only be posted before graduating from Wesleyan University.

COLLEGE-LEVEL COURSES

Up to 4.0 credits total from courses that appear on a college transcript prior to matriculation may be counted toward the BA and BLS degrees. Examples of such courses are

- Courses taken at an accredited U.S. or international institution that are not used toward high school graduation.
- Courses taken through "dual enrollment" programs that are used toward high school graduation requirements, such as Wesleyan's High School Scholar program and National Education Equity Lab courses.

Any such course must meet the requirements in the Transfer of Credit section in External Special Study Programs.

There is no limit to the number of prematriculation course credits that a student can post to their academic history. However, at most 4.0 prematriculation course credits total may count toward graduation requirements, and at most 4.0 prematriculation course credits may be used for the purpose of class promotion. Students are not permitted to use this credit to reduce the course load below full-time, to replace failing or unsatisfactory grades in classes, or to count toward fulfillment of the general education expectations. No course that is listed for credit on a student's high school transcript may be used for Wesleyan credit, except in the case of approved college-level courses such as dual enrollment credits.

Use of prematriculation course credits to satisfy course prerequisites or major declaration or completion requirements is at the discretion of the appropriate department.

ADVANCED PLACEMENT CREDIT, INTERNATIONAL BACCALAUREATE CREDIT, AND OTHER TEST CREDIT

A student who has completed an Advanced Placement (AP) course or its equivalent while in secondary school and has received a score of 4 or 5 in the corresponding AP examination for which there is an equivalent subject area at Wesleyan may be granted one credit per exam toward the Wesleyan BA degree.
A student who has completed the International Baccalaureate (IB) course of study and has received a score of 5, 6, or 7 on a corresponding higher-level IB examination for which there is an equivalent subject area at Wesleyan may be granted one credit per exam toward the Wesleyan BA degree. Students wanting to post any other prematriculation test credit (e.g., A-level, Cambridge International, CAPE, etc.) must consult their class dean. The awarding of these prematriculation test credits is determined in consultation with the relevant department.

There is no limit to the number of prematriculation test credits that a student can post to their academic history. However, at most 2.0 prematriculation test credits total may count toward graduation requirements, and at most 2.0 prematriculation test credits may be used for the purpose of class promotion. Students are not permitted to use this credit to reduce the course load below full-time, to replace failing or unsatisfactory grades in classes, or to count toward fulfillment of the general education expectations.

Use of prematriculation test credits to satisfy course prerequisites or major declaration or completion requirements is at the discretion of the appropriate department.

ACCELERATION

A student may complete work for the bachelor of arts degree in fewer than the expected eight semesters, but in no less than the required semesters in residence. Please see Degree Requirements for semester-in-residence requirement. Requests for acceleration should be made in writing to the student's class dean. This may be accomplished by (1) applying up to two prematriculation credits, such as approved transfer credits, Advanced Placement credits, A-level or Cambridge Pre-U credits, or International Baccalaureate credits; (2) transferring preapproved summer credit at Wesleyan or another institution; (3) completing independent study or education-in-the-field projects during a summer or an authorized leave of absence; (4) transferring preapproved credit taken at another institution while on an approved leave of absence; or (5) completing additional Wesleyan credits (beyond the expected course load per semester) during the academic year.

NONDEGREE UNDERGRADUATE STUDENTS

Wesleyan offers the following opportunities to take undergraduate courses on a nondegree basis. All nondegree students are subject to the following policies:

- An application is required; students must have a high school diploma or the equivalent (with the exception of High School Scholars) and must be approved for admission by one of the programs below.
- Admission to nondegree status does not constitute admission to Wesleyan University. Nondegree students who wish to apply for admission to Bachelor of Arts degree candidacy may do so through the Office of Admission (http://www.wesleyan.edu/admission/) and those who wish to apply for admission to Bachelor of Liberal Studies degree candidacy may do so through Continuing Studies. Their applications will be reviewed according to the same rigorous standards as those of other candidates for admission. Nondegree undergraduates who become admitted to degree candidacy will be expected to satisfy normal degree requirements. Please note that candidates admitted as first-year students may only count two non-Wesleyan credits taken prior to matriculation (admission to degree candidacy) toward the degree.

Auditor. Subject to any conditions set by the instructor, permission to audit does not include permission to have tests, examinations, or papers read or graded. Wesleyan alumni and members of the community who are not registered students are permitted to audit undergraduate courses, subject to the following conditions:

- That the auditor register their contact information with the registrar's office;
- That the presence of an auditor not compromise undergraduates' access to the course;
- That the auditor receive permission of the instructor;
- That the terms of the auditor's participation in the work of the course be mutually agreed upon in advance with the instructor;
- That no academic credit be awarded to an auditor and no transcript issued.

Center for Prison Education. Wesleyan offers the Center for Prison Education (http://www.wesleyan.edu/cpe/), awarding undergraduate credit to incarcerated students who are admitted to and complete courses in the center. All students in the center are subject to Wesleyan academic and nonacademic policies as well as center policies. Center courses are offered on-site at the correctional institution.

Community Scholars. Admissions will be handled by Continuing Studies (http://www.wesleyan.edu/nondegree/); admissions of international students will be reviewed by the director of the Office of Study Abroad (http://www.wesleyan.edu/cgs/osa/). Individuals accepted for this category may enroll in up to four courses per semester with the instructors' approval as long as their enrollment does not displace a degree-seeking student. The tuition is a per-credit charge, based on Wesleyan's full-time tuition. Housing and financial aid are not available. For information about becoming a Community Scholar, please visit wesleyan.edu/nondegree/ (https://wesleyan.edu/nondegree/).

Residential Scholars. Admission will be handled by Continuing Studies (http://www.wesleyan.edu/nondegree/); admission of international students will be reviewed by the director of the Office of Study Abroad (http://www.wesleyan.edu/cgs/osa/). Individuals accepted for this category must

enroll full-time, pay full tuition, and live in university housing. Financial aid is not available. For information about becoming a Residential Scholar, please visit wesleyan.edu/nondegree/ (https://wesleyan.edu/nondegree/).

High School Scholars. Wesleyan permits outstanding juniors and seniors from selected area high schools to take one course in the fall semester and one course in the spring semester at Wesleyan. Application is made through the guidance counselor at each high school. The completed application should be submitted to the Office of Admission (http://www.wesleyan.edu/admission). Permission is granted by the course instructor.

TRANSFER STUDENTS

Students wishing to apply to Wesleyan as transfer students must have been enrolled for at least one full academic year at another postsecondary academic institution and must have obtained the equivalent of at least six Wesleyan credits. Students who do not meet these conditions must apply for admission as a first-year student.

It is expected that transfer students will keep pace with the class to which they are officially assigned by the Office of the Deans; that is, the number of Wesleyan semesters available to transfer students to earn the Wesleyan degree will be determined by their class standing on entry. For certain exceptional cases and upon petition to the class dean, students may be granted an additional semester to complete requirements for the bachelor's degree. Please see Degree Requirements (p. 14) for semester-in-residence requirement.

Transfer students entering as first-semester sophomores are expected to apply for acceptance into a major after the drop/add period of their second semester at Wesleyan. Transfer students entering as second-semester sophomores are expected to apply for acceptance into a major after the drop/add period of their first semester at Wesleyan. Transfer students who enter as juniors must apply for acceptance into a major program as soon as possible, but no later than the end of their first semester at Wesleyan.

Credits approved for transfer from other institutions may be considered by the student's major department for inclusion in the major.

Wesleyan's partnership with Middlesex Community College provides an articulation agreement for the Center for Prison Education Program. Students in this program who complete the associate degree at Middlesex Community College and are admitted to the Bachelor of Liberal Studies program will receive a minimum of 16 Wesleyan credits upon transfer into the BLS program; contingent upon having earned a minimum of 16 (3.00 or 4.00 semester hour) courses with a grade of C- or better.

Transfer students are encouraged to comply with Wesleyan's general education expectations. Transfer credits earned prior to matriculation at Wesleyan may be evaluated for general education equivalency. Please note that grades in courses must be a C- or better to be eligible for transfer of credit. No more than two credits may be transferred from one summer.

STUDY ABROAD

Bachelor of arts students may earn Wesleyan credits by enrolling for nonresident study in either of the following types of programs abroad:

- Wesleyan-administered programs
- Wesleyan-approved programs

The only way in which courses taken abroad during the academic year can be credited toward a Wesleyan bachelor of arts degree is by prior approval from the Office of Study Abroad (OSA). Details regarding the application process are available in the OSA, on the OSA website (wesleyan.edu/cgs/osa), and through a student's electronic portfolio.

WESLEYAN-ADMINISTERED PROGRAMS

The Wesleyan-administered programs are:

- **France:**#Vassar-Wesleyan Program in Paris
- **Italy:**Eastern College Consortium (ECCO) Program in Bologna
- **Spain:**Vassar-Wesleyan Program in Madrid

One semester of study on these programs does count toward the semester-in-residence requirement.

WESLEYAN-APPROVED PROGRAMS

The Office of Study Abroad maintains a list of programs preapproved for Wesleyan credit in a wide range of countries in Africa, Asia, Europe, the Middle East, Oceania, and the Americas. In certain circumstances, the Office of Study Abroad may grant ad hoc approval for a program not included on the preapproved list. See the OSA website for details (wesleyan.edu/cgs/osa), including the preapproved program list.

STUDY ABROAD REGULATIONS, GUIDELINES, AND FINANCIAL PROCEDURES

Copies of the regulations, guidelines, and financial procedures are available on the OSA website and through a student's electronic portfolio.

Up to four Wesleyan credits are normally allowed for each of two semesters. Permission for up to a fifth credit in any given semester may be granted by the program director in the case of Wesleyan-administered programs and by the Director of Study Abroad for Wesleyan-approved programs. Grades earned will be reported on the Wesleyan transcript and will be counted in GPA calculations. Students have the option of selecting CR/U grading mode for one course per semester for transfer credit. The deadline for this varies by program.

Credit toward graduation is approved by the Office of Study Abroad. For credit toward completion of a major, certificate, or minor, students must consult with the relevant chair or advisor when applying for study abroad. Students must have courses for major, certificate, or minor credit preapproved before departure or, in the event that course information is not available before the program begins, at the point of course registration. Such credit is not granted

retroactively, and students who need to change course selections on arrival abroad must seek approval at the time of registration through their advisor and the Office of Study Abroad. It is the responsibility of the student to check with the class dean concerning progress toward graduation and the possibility of oversubscription. Each course taken abroad and approved will carry the appropriate General Education designation if one can be determined from the available information about the course.

Students placed on strict probation at the end of the semester and students on medical leave are not eligible to study abroad the following semester; exceptions may be made with the approval of the Deans and the Office of Study Abroad. Any grade of incomplete (IN), deferred grade (X), or absent from final exam (AB) must be resolved two weeks prior to the student's departure date, and students with such grades on their transcript should consult with their class dean about the resolution process.

All university academic regulations apply to students studying for Wesleyan credit abroad, and withdrawal from a study-abroad program will be treated in the same way as withdrawal from the University. Wesleyan may withdraw a student from a program abroad or place a student on medical leave, should it be deemed advisable to do so.

Fees. Students are considered to be enrolled at Wesleyan while abroad. They are therefore charged Wesleyan tuition and are eligible for financial aid. Application for financial assistance should be made to the Financial Aid Office. Tuition charges cover the academic and administrative portions of the program expense. Expenses such as room and board, transportation, and cultural activities will be paid by students either through Wesleyan or directly, depending on the program. This financial arrangement applies to all study abroad for credit during the academic year.

- **Wesleyan-administered programs.**For information and application, students should contact the Office of Study Abroad.
- **Wesleyan-approved programs.**Besides applying directly to the sponsoring institution, students must fill out and submit to the Office of Study Abroad a Wesleyan application for permission to study abroad.

INTERNAL SPECIAL STUDY PROGRAMS

WESLEYAN INTERSESSIONS: SUMMER AND WINTER SESSIONS

The University offers two intersessions: Summer Session and Winter Session. Course credit earned through intersessions is eligible to count toward the graduation requirement. Participation in intersessions does not count as a semester in residence. An intersession does not constitute an academic semester at Wesleyan. All students in intersessions are subject to Wesleyan academic and nonacademic policy and are also subject to intersession policies. Courses taken during intersessions are subject to the same academic regulations as courses taken during the regular academic year. Students should consult their class dean about how intersession performance may affect their academic standing or check the Deans' Office website for clarification. Students are not eligible to do independent study or education in the field and take an intersession course simultaneously. (For summer transfer credit, please see External Special Study Programs - Transfer Credit)

Graduate Liberal Studies (GLS). Wesleyan undergraduates, normally rising juniors and seniors, may take courses in the Graduate Liberal Studies program subject to approval by the instructor of the course, their class dean, faculty advisor or major department chair, and the GLS director. Participation in this program does not count as a semester in residence. Wesleyan undergraduates attending GLS are subject to its academic rules and regulations. All grades and course work attempted by Wesleyan undergraduates in GLS courses will be recorded on the student's undergraduate record and transcript. For more information, visit wesleyan.edu/masters (https://wesleyan.edu/masters), e-mail masters@wesleyan.edu, or visit the office at 74 Wyllys Avenue.

Independent Study. A student may obtain academic credit for certain forms of independent study during a summer or an authorized leave of absence. Activities such as independent reading, special work under supervision, and educational tours may earn credit provided that (1) these plans have been approved in advance by the relevant Wesleyan department and the class dean, and (2) all requirements specified by the approving department in the form of an examination, paper, or equivalent assignment have been satisfied. Please note that senior theses or senior projects may be undertaken only as senior thesis tutorials or projects and not as independent study. No more than two credits may be earned in a semester or summer for such special work. See "Fees," below. Forms for independent study, along with other useful resources, are available in the Office of the Deans or online at wesleyan.edu/studentaffairs/forms.html (https://wesleyan.edu/studentaffairs/forms.html).

Education in the Field. Approved education-in-the-field programs are listed under the sponsoring departments or colleges. They may be taken during the summer, during an authorized leave of absence, or during an academic term. At the discretion of the department involved, up to two course credits per semester may be granted for education in the field. Students must consult with the department in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation. Credit and a grade for education in the field will be posted to the student's transcript once a grade report has been submitted by the faculty sponsor.

Students pursuing an education in the field during the summer or while on an authorized leave of absence during the academic year are not eligible for financial aid and will be charged a special tuition rate (see below). Students enrolled full time may also pursue an education in the field in conjunction with regular courses (for a combined total of at least three credits) and will be charged the full tuition rate. In no case will financial aid to a student in this category exceed the amount of aid the student would have received as a regular full-time student at the University.

Education-in-the-field programs are under the general supervision of the Educational Policy Committee. Information concerning specific procedures for the supervision and evaluation of education-in-the-field programs may be obtained from the sponsoring department or college. Forms for education in the field are available at the Office of the Deans or on the Office of the Deans' website.

No more than four credits earned through independent study and education in the field combined can be counted toward the graduation requirements.

FEES FOR INDEPENDENT STUDY AND EDUCATION IN THE FIELD AND CREDIT FROM UNACCREDITED INSTITUTIONS

Students should contact the Student Accounts Office (237 High Street; wesleyan.edu/studentaccounts/tuition.html (https://wesleyan.edu/studentaccounts/tuition.html)) for information about fees for pursuing an independent study, enrolling only in an education in the field, or taking a course at an unaccredited institution.

TEACHING APPRENTICE PROGRAM

The Teaching Apprentice Program offers undergraduate students the opportunity to participate with a faculty member (who serves as a master teacher) in the teaching of one of the faculty member's courses. The apprentice is enrolled in an apprenticeship tutorial conducted by the master teacher. The tutorials focus in varying degrees on the subject matter of the course and on the teaching activity itself. Apprentices are awarded one course credit for successful completion of the semester tutorial.

The Teaching Apprentice Program has two main objectives:

- To provide an opportunity for advanced students to deepen their understanding of a subject while gaining insight into the teaching process; and
- To improve the learning environment in courses designed primarily for first-year and sophomore students by adding a student teacher who can bridge the intellectual gap between instructors and beginning students. The apprentice is viewed as a member of a teaching team rather than as a teaching assistant. While the interaction between the apprentice and the master teacher can take many forms, faculty are urged to design the role of the apprentice to stimulate greater participation in the learning activity by students in the course. Normally, the apprentice and master teacher have, in some prior activity, established the sort of intellectual rapport that will promote an effective team relationship.

Apprentice proposals should be developed by the master teacher with input, when possible, from the prospective apprentice. Applications should describe the teaching role to be played by the apprentice, the academic course work to be done in the apprenticeship tutorial, and the basis on which the apprentice will be evaluated. Applications must also meet the guidelines for apprenticeships established by the department or program and approved by the Educational Policy Committee. Faculty members must submit applications to the Office of Academic Affairs in October to apply for a spring semester apprentice and in April to apply for a fall semester apprentice. The following policies apply to teaching apprentices and teaching apprenticeships:

- If a student serves as an apprentice in the same course more than once, the student may receive no more than a total of one credit for teaching in that course.
- Teaching apprentices may not teach in group tutorials or student-forum courses.
- A student may not count more than two course credits earned in apprenticeship tutorials toward degree requirements.

TUTORIALS

Individual tutorials, numbered **401-402** and **421-422**, are available only to sophomores, juniors, and seniors. A tutorial may not be given when a comparable course is available in the same academic year. Students may not count more than four course credits combined of individual and group tutorials toward degree requirements. Tutorial forms must be approved by the chair of the department or program in which the tutorial is given.

Tutorial applications should include a concise description of the work to be done, including the number of hours to be devoted to the tutorial, the number of meetings with the tutor, a reading list, and a description of the work on which the student's performance will be evaluated. Tutorials should be submitted through the drop/add system.

Tutorials for one credit should be added during the drop/add period. Partial-credit tutorials beginning after the drop/add period must be added to a student's schedule within five days of the start of the academic exercise. The minimum credit amount for any tutorial is .25 credit.

Group tutorials, numbered **411-412**, are proposed and taught by a faculty member. Tutorials should be submitted through the drop/add system. For information about tutorials during the summer term, please contact the Summer Session office.

STUDENT FORUMS

Student-run group tutorials, numbered **419-420**, must be sponsored by a faculty member and approved by the chair of a department or program and by the relevant academic dean. Proposals for a student forum must be submitted by the department or program chair to the Office of Academic Affairs by the end of exams prior to the semester in which the course will be offered. Application forms and instructions are available at the Office of the Registrar. A student may count two student forum course credits toward degree requirements but is limited to a combined maximum of two credits in physical education and student forum courses.

EXTERNAL SPECIAL STUDY PROGRAMS

TRANSFER OF CREDIT

A student may obtain credit toward the Wesleyan degree for courses taken during the academic year at another accredited U.S. institution or in the summer session of another accredited U.S. or international institution if (1) the courses have been approved in advance by the relevant Wesleyan department, program, or college, and (2) the grades in the courses are C- or better. (Courses taken prior to matriculation do not require preapproval and may include courses taken at an accredited international institution during the academic year.) Departments, programs, or colleges may impose other conditions for the transfer of credit, such as a higher minimum grade, review of coursework, passing a departmentally administered exam, etc. The Wesleyan academic record will not reflect grades earned at another institution; only credits may be transferred. The final amount of credit transferred to the Wesleyan transcript will be determined

in accordance with Wesleyan's policy on transfer credit and the evaluation of the appropriate department. (As a guideline, it should be noted that one Wesleyan unit is equivalent to four semester hours, or six quarter-hours.) A bachelor of arts student may post a maximum of two non-Wesleyan credits (2.5 credits with a course that offers a lab) in any given summer. Study-abroad credits earned by students who currently are withdrawn or required to resign will not be accepted. Forms for permission to transfer credit are available at the Office of the Deans or on the Office of the Deans' website.

A student who wishes to receive Wesleyan credit for work done at an unaccredited institution must secure the sponsorship of a Wesleyan faculty member, the approval of the chair of the corresponding Wesleyan department, and the approval of the class dean prior to undertaking the work. (Courses taken prior to matriculation do not require preapproval.) To apply for credit, a student should write a statement that describes the work to be done and indicates the amount of academic credit sought. The statement should be endorsed by the faculty sponsor and the department chair and submitted to the class dean. The faculty sponsor will be responsible for evaluating the completed work and reporting the amount of credit earned to the class dean. For fees please see wesleyan.edu/studentaccounts/tuition.html (https://wesleyan.edu/studentaccounts/tuition.html).

TWELVE-COLLEGE EXCHANGE PROGRAM

The Twelve-College Exchange Program is a cooperative program for residential student exchange between Wesleyan and the following colleges: Amherst, Bowdoin, Connecticut, Dartmouth, Mount Holyoke, Smith, Trinity, Vassar, Wellesley, and Wheaton. Two special programs associated with the Twelve-College Exchange Program are the Williams-Mystic Seaport Program in American Maritime Studies in Mystic, Connecticut, sponsored by Williams College, and the National Theater Institute, in Waterford, Connecticut, sponsored by Connecticut College. Wesleyan sophomores, juniors, and seniors in good standing are eligible to apply to any of the participating institutions for either one semester or the full year. Participation in the Twelve-College Exchange Program by Wesleyan students does not count toward Wesleyan's residence requirement, but courses are coded for general education equivalency. Catalogs of participating colleges and information about the programs are available in the Office of Study Abroad (http://wesleyan.edu/cgs/osa/). All courses taken on a Twelve-College Exchange Program will post to the student's Wesleyan transcript with grades and count toward the Wesleyan GPA.

Tuition and fees are paid to the host colleges; no fees are paid to Wesleyan. Financial-aid students may apply their Wesleyan assistance, with the exception of work/study benefits, toward expenses at the host college. It is the student's responsibility to complete any loan negotiations before leaving the Wesleyan campus. A Wesleyan student who participates in the exchange program is expected to abide by the rules and regulations of the host institution.

Students who wish to participate in the Twelve-College Exchange Program must apply through the Office of Study Abroad (http://wesleyan.edu/cgs/osa/). Students may apply to only one college at a time. The deadline for submission of completed applications is February 1 for either one or both semesters of the subsequent academic year. However, applications will be considered as long as space is available at the desired institution. Completed and approved applications are sent by Wesleyan to the respective colleges. If rejected by the college of their first choice, students may apply to a second college.

OTHER NONRESIDENT PROGRAMS

A small number of programs considered by the faculty to be of importance in supplementing the Wesleyan curriculum for bachelor of arts students with certain academic interests are treated as approved nonresident study programs. Participants continue to be Wesleyan students, pay regular tuition to the University, and are not placed on leave of absence. Information about these programs can be obtained from the Office of Study Abroad or the faculty member or office listed below. Students planning to participate in these programs should check with their faculty advisor and class dean concerning their progress toward completion of the major and graduation requirements. Participation in these programs does not count as a semester in residence.

The Woods Hole SEA Semester. Through this 12-week program, students spend six weeks at the Woods Hole Center for Oceanographic Research studying the chemistry, biology, physics, and geology of the oceans; marine history and literature; and maritime policy; and designing an independent research project. The second six weeks of the program entail lab research and sailing, navigating, and maintenance aboard a 135-foot vessel. See the chair of the Department of Earth and Environmental Sciences for information about the curriculum and application process.

Semester in Environmental Science (SES) at the Marine Biological Laboratory, Woods Hole. The purpose of this program is to instruct students in the basic methods and principles of ecosystems science in a manner that enhances and supplements existing curricula in natural and environmental sciences at the colleges participating in the SES consortium. The program is interdisciplinary and offers a core curriculum, stressing team research and team study. See the chair of the Department of Earth and Environmental Sciences for information about the curriculum and application process.

Wesleyan-Trinity-Connecticut College Consortium. By special arrangement with Connecticut College and Trinity College, Wesleyan students may enroll, without additional cost, in courses given at these institutions. Normally, students will be permitted to take only courses not offered at Wesleyan. Enrollment is limited to one course per semester. Arrangements for enrollment may be made through the Office of the Registrar (http://www.wesleyan.edu/registrar/).

Dual-Degree Programs–Engineering. Wesleyan maintains dual-degree programs with Columbia University, Dartmouth College, and the California Institute of Technology. These programs allow students to earn two degrees in five years combined (three years at Wesleyan, two at the engineering school). While all three partners participate in the sequential 3-2 version, Dartmouth also makes a 2-1-1-1 track available in which students spend the first two years and their senior year at Wesleyan. In addition, Columbia University offers the so-called "4-2 option" in which students complete four years at Wesleyan before pursuing the BS engineering degree at Columbia. Provided that the necessary math and science courses are taken, this option allows students to pursue a wide range majors at Wesleyan before entering the engineering school.

AFROTC. Qualified Wesleyan students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program hosted by Yale University's AFROTC detachment. Students who wish to transfer credits for courses they successfully complete through this program may do so if (1) the courses have been approved in advance by the relevant Wesleyan department, and (2) the grades in the courses are C- or better. Students who wish to request the transfer of credit to their Wesleyan degree must do so through the same process and under the same guidelines as transfer credit from any other accredited institution. For details on how to transfer credit, please refer to Transfer of Credit from Other Institutions. For general information or assistance with Wesleyan AFROTC participation, please contact your class dean. For more information about Yale's

AFROTC program, please contact Yale AFROTC Detachment 009, 203-432-9431 or airforce@yale.edu.

ADVANCED DEGREES

BA/MA PROGRAM IN THE NATURAL SCIENCES, MATHEMATICS, AND PSYCHOLOGY

Wesleyan offers a BA/MA program as a formal curricular option for students who are interested in an intensive research experience. The program has a research orientation and includes course work, seminars, and, in some cases, teaching. The program provides a strong professional background for either further advanced study or employment in industry. The expected period for completion of the program is 10 semesters for those students who complete the BA in eight semesters. Students who finish the BA degree in less than eight semesters are eligible to apply. Departments and faculty advisors will pay careful attention to the course work and research backgrounds of students completing the BA in less than eight semesters to be sure they are able to meet all the expectations of the program in less than 10 full semesters of study and research. Further information on the BA/MA program is available at wesleyan.edu/grad/degree-programs/bama.html (http://www.wesleyan.edu/grad/degree-programs/bama.html).

MA AND PHD PROGRAMS IN PHYSICAL SCIENCES, MATHEMATICS, AND MUSIC

The University offers work leading to the MA degree in astronomy, computer science, earth and environmental sciences, mathematics, and music, and to the PhD in biology, chemistry, ethnomusicology, mathematics, molecular biology and biochemistry, and physics. Theses and dissertations are required for these degrees. An interdepartmental program leading to the PhD is offered jointly by the chemistry and physics departments. An interdepartmental program in molecular biophysics leading to the PhD is offered by the departments of molecular biology and biochemistry and chemistry.

Graduate instruction is scheduled within an academic year consisting of two academic semesters from September to June. Summer work consisting of independent study or research is expected. No evening courses or summer school courses are available. Tuition remission and service as a teaching assistant are parts of the financial aid package offered to MA and PhD students. Information on the graduate programs is available at wesleyan.edu/grad/ (https://wesleyan.edu/grad/).

MA IN CURATORIAL PRACTICE

This program is designed to enhance the professional student's skills as a performing arts presenter, manager, producer, and curator, allowing each participant to advance in the field or, if the student is new to the field, enable him/her to pursue a position at a presenting institution or as an independent curator. Students gain an understanding of performance and movement-based artistic and curatorial practice; the social, cultural and historical context of these practices; and the ability to write and speak about this work in a variety of contexts. For more information, visit wesleyan.edu/icpp (https://wesleyan.edu/icpp).

THE MALS AND MPHIL IN GRADUATE LIBERAL STUDIES

Graduate Liberal Studies offers courses in the arts, humanities, mathematics, sciences, and social sciences leading to the master of arts in liberal studies (MALS) or the master of philosophy in liberal arts (MPhil). Courses meet on campus or in various combinations of online teaching modes, featuring schedules designed for professionals who are part-time students. Students are expected to complete all graduation requirements within six years. For more information, visit wesleyan.edu/masters (https://wesleyan.edu/masters), e-mail masters@wesleyan.edu, or visit the office at 74 Wyllys Avenue.

GENERAL REGULATIONS

The University expects all students to fulfill faithfully and effectively their responsibilities as members of the Wesleyan community. A student may be suspended or be required to withdraw from the University or from any course at any time when, in the judgment of the class dean or the faculty, respectively, the student fails to meet this obligation satisfactorily.

UNIT OF CREDIT

One unit of Wesleyan credit requires 120 to 160 hours of academic work. This work typically consists of 40 hours of scheduled class time, which is made up of 39 hours of class meeting time,[1] and one scheduled final exam or the equivalent of at least one hour of additional work. In addition, 80 to 120 hours of out-of-class work are expected. A one-credit course that does not conform to a standard meeting pattern of at least 40 hours must still require 120 to 160 hours of academic work. For courses that award more or less than one unit of credit, the required hours of academic work are normally prorated to conform to the above formula.

[1] The established standard meeting times allow up to 10 minutes for transition to and from other classes.

ENROLLMENT

Students must comply with the regulations for matriculation with the University as announced by the registrar. A student who does not enroll in the University by the announced deadline will be considered administratively withdrawn from the University. Bachelor of Arts students who enroll in fewer than three credits may be subjected to disenrollment.

MEDICAL REPORT

Every student entering the University for the first time must submit health information as requested by the Director of University Health Center.

PAYMENT OF BILLS

It is the student's responsibility to see that payment deadlines are met. Failure to do so prevents the student from enrolling, participating in course preregistration, and participating in the housing selection process. Diplomas, grades, and transcripts also will be withheld until university bills have been paid.

SELECTION OF COURSES

Detailed information concerning course offerings is given in the Wesleyan University Course Catalog; WesMaps (http://www.wesleyan.edu/wesmaps), Wesleyan's online curriculum home page; and the Course Supplement, a condensed listing of all course offerings for each semester. These publications should be consulted for information concerning time and place of class meetings, additions or changes, and cancellations.

CHANGES IN AND WITHDRAWAL FROM COURSES

Students may not add courses (including tutorials) to their schedules after the drop/add period. Exceptions will be made for courses that start after the beginning of the semester, provided that the required drop/add or tutorial forms are submitted to the Office of the Registrar (https://www.wesleyan.edu/registrar/information/incorrect_schedule.html) within five class days after the start of the course.

A student who withdraws from a course, the only option after the drop/add period, will receive a notation of "W" and the course will remain on the student's transcript. The deadline for withdrawal by choice and without penalty from a full-semester course is one week before the end of classes. A student may withdraw from a first- and third-quarter course one week before the end of the corresponding quarter. For second- and fourth-quarter courses, the deadline for withdrawal corresponds to the withdrawal deadline for full-semester courses. To withdraw the student must submit to the Office of the Registrar (https://www.wesleyan.edu/registrar/information/incorrect_schedule.html) by the stated deadline a withdrawal request for review by the instructor, the faculty advisor, and the class dean.

An instructor may require a student to withdraw from a course if the student fails to meet the announced conditions of enrollment. The student will be required to submit a withdrawal request to the Office of the Registrar (https://www.wesleyan.edu/registrar/information/incorrect_schedule.html) to make the withdrawal from the course official.

Students who withdraw from the University before the stated withdrawal deadline will also be withdrawn from their courses. For a student withdrawing after the stated withdrawal deadline, the courses will remain on the transcript and they will be graded accordingly.

AUDITING

Subject to any conditions set by the instructor, a registered Wesleyan student may be permitted to audit a course without charge. The instructor may add to the grade roster the name of any student who has attended with sufficient regularity to have the course listed in the academic record as audited, without credit. Permission to audit does not include permission to have tests, examinations, or papers read or graded. Wesleyan alumni and members of the community, please see Nondegree Undergraduate Students (p. 19).

CLASS ATTENDANCE

A student is expected to attend class meetings regularly. Since the faculty intends that class attendance be primarily the student's responsibility, no precise limitation of absences has been prescribed for all students. It is understood, however, that absence from class is regarded as the exception, not the rule. An instructor should notify the class dean of any student who is absent from class for one week or three consecutive classes, whichever comes first. Students on strict probation must attend all classes in which they are enrolled.

Instructors are entitled to establish definite and precise rules governing attendance. Any student who is repeatedly absent without excuse from scheduled academic exercises at which attendance is mandatory may be required to withdraw from the course.

UNSATISFACTORY PROGRESS REPORTS

It is expected that faculty will submit in a timely manner an Unsatisfactory Progress Report (UPR) to the class dean for any student who is doing unsatisfactory work. UPRs help the class deans identify students who are having academic difficulties and allow the deans to work with instructors to reach out and work with these students. Early intervention proves to be the most effective method for helping students experiencing academic difficulties. UPRs should be submitted for:

- Students who are doing unsatisfactory work (lower than C-) or experiencing difficulties that will result in unsatisfactory work;
- Students who are experiencing substantial difficulty with the course even though they may have a satisfactory grade of C or better;
- Students who are on strict probation. The Deans' Office notifies instructors if such a student is in their course.

SUBMISSION OF GRADES

Under normal circumstances, only the instructor of record can submit a course grade. However, in cases where the instructor is no longer employed by the University or has become unavailable, the department chair, or a faculty member designated by the chair, may, upon review of the student's work, submit a grade. Grades can only be given for work assigned and submitted during the academic term, except in the case where a student has requested an incomplete (please see Incompletes/Completion of Work in Courses).

CHANGE OF SUBMITTED GRADE BY THE INSTRUCTOR

A change of a submitted grade may be made by the instructor on the following grounds:

- Administrative error
- Error in calculation of grade
- Lost work submitted during the academic term was found
- Submission of outstanding work from an incomplete whereby the final grade is not lower than the provisional grade

STUDENT GRIEVANCE PROCEDURE INCLUDING APPEAL FOR A GRADE CHANGE

The process for appealing a grade or contesting any aspect of a course (including the scheduling of classes and examinations) is:

- The student discusses the grade or the contested issue with the instructor of the course; if the student is not satisfied that a reasonable explanation has been provided, or if the student wants to address an issue in confidence, then
- The student appeals to the department/program chair; if not satisfied, then
- The student appeals to the academic dean of the department or program's division (Arts and Humanities, Social Sciences, or Natural Science and Mathematics); if not satisfied, then
- The student appeals to the provost.

All appeals of grades received in the fall or winter term must be initiated by the student before the end of the following spring term; all appeals of grades received in the spring or summer term must be initiated by the student before the end of the following fall term.

Under normal circumstances, a grade appeal beyond the instructor will only be granted with the consent of the instructor. In cases where the instructor has become unavailable or an official investigative proceeding has determined that the instructor behaved discriminatorily toward the student, however, the department chair, or a faculty member designated by the chair, may determine the result of a grade appeal.

INCOMPLETES/COMPLETION OF WORK IN COURSES

All the work of a course must be completed and submitted to the instructor by the last day of classes. The only exceptions to this are final examinations and, in courses without a registrar-scheduled final examination, significant assignments such as final take-home exams, semester-long projects, and term papers, which must be due no sooner than the first day, and no later than the last day, of the exam period, and preferably at the time slot reserved for the registrar-scheduled examination. A student who is unable to meet these deadlines, for the reasons listed below, may request the permission of the instructor to meet the requirement no later than 30 days after the last day of exams. If the instructor grants the extension, a grade of Incomplete (IN) must be submitted to the registrar at the time grades are due. Grades of Incomplete must be accompanied by a provisional grade. If the student does not submit the outstanding work in the course by the deadline, the provisional grade will become the final grade.

All work is due by 5 p.m., 30 days after the last day of exams, unless an earlier date is stipulated by the instructor or if student is planning to participate in winter/summer session. Students must submit all outstanding work for a fall/spring incomplete in order to participate in winter/summer sessions. The work must be submitted before the first day of the session.

Any provisional incomplete grades remaining by the end of the drop/add period of the subsequent semester will automatically be converted to the provisional final grade by the Office of the Registrar (http://www.wesleyan.edu/registrar).

A student may receive up to two incompletes per semester by this method. To receive incompletes in more than two courses, the student must petition his or her class dean. The petition can be granted only on grounds of illness, family crisis, or other extraordinary circumstances. To petition for a brief extension of the Incomplete deadline, based on these same criteria, students must make a request to their class dean. The class dean will make the decision about whether the petition will be granted in consultation with the Vice President for Student Affairs and the course instructor.

Incompletes will not be granted for summer or winter sessions. Rare exceptions to this policy may be made in the case of serious emergencies, by petitioning the class dean. For the impact of incompletes on students' records for the purposes of academic review, students should consult their class dean. Students on strict probation will not be allowed to receive incompletes without the prior approval of their class dean.

Students who started at Wesleyan prior to Fall 2018 can petition for an extension of the incomplete deadline based on the policy that was in place in 2017.

REPEATABLE COURSES

Courses that may be repeated receive a designation in WesMaps and may be taken twice at most for a letter grade (AF). Please see Graduation Requirements (p. 14) for additional regulations governing repeatable courses.

COURSES RETAKEN FOR LOW GRADE

A student who receives a C- or below in a non-repeatable course may repeat the course once. The original grade remains on the transcript and both grades are calculated in the grade point average. The course may count only once toward general education expectations and the 32 graduation credits.

Failed Courses (below D-): Students who fail a course may add this course to their plans during pre-registration or drop/add.

Low Grades (C- to D-): A student who wants to retake a course due to a low grade may submit an enrollment request for the class only during the drop/add period. The registrar will flag the enrollment request to indicate that the course is being repeated due to low grade.

REGULATIONS GOVERNING THE SCHEDULING OF CLASSES

Classes will meet each week for three class periods of 50 minutes each, for two class periods of 80 minutes each, or for one class period that corresponds as closely as possible to the standard time periods described below.

MEETING PATTERNS

Classes that meet three times weekly may meet only on Monday, Wednesday, and Friday. Classes that meet twice weekly may meet within regulated times on Tuesday and Thursday or Monday and Wednesday afternoons, or on any two mornings combining Monday, Wednesday, or Friday (MW, MF, or WF). Courses that meet once weekly may meet in the afternoon or evening on any day. Classes and laboratory sessions should be scheduled between 8 a.m. and 4:10 p.m. and in the evenings after 7:10 p.m.

MORNING CLASSES

On Monday, Wednesday, and Friday, classes are scheduled for three periods of 50 minutes each beginning at 8:50 a.m., 9:50 a.m., or 10:50 a.m. On Tuesday and Thursday, classes are scheduled for two 80-minute periods beginning at 8:50

a.m. and 10:20 a.m.; any combination of two on Monday, Wednesday, or Friday (MW, MF, or WF) may be scheduled at 8:20 a.m. or 10:50 a.m.

AFTERNOON CLASSES

On Monday, Wednesday, and Friday, classes are scheduled for three periods of 50 minutes each. Monday and Wednesday or Tuesday and Thursday classes are scheduled for two periods of 80 minutes each. All afternoon classes should begin at 1:20 p.m. or 2:50 p.m.

Exceptions to these rules require approval by the Educational Policy Committee. Ordinarily, classes should not overlap more than one standard period between 8 a.m. and 3 p.m. Saturday classes may be scheduled as desired by departments.

All additional required components of class schedules beyond the regular meetings should be announced, with dates and times if possible, on the online course catalog listing before the preregistration period begins. All dates and times should be announced no later than the first class meeting. Thereafter, additional components may only be required if alternatives are available for students who have academic or required varsity athletic schedule conflicts.

READING PERIOD

This period is designated for students to prepare for examinations and complete assignments due at the end of the semester. To protect the integrity of that period, the faculty have established the following regulations:

- Final exams, comprehensive examinations covering materials from the course of the entire semester, are to be given only during the formal exam period established by the faculty.
- Classes can be held only during the class period established by the faculty; make-up classes should be held during that established class period.
- In courses without a registrar-scheduled final examination, significant assignments such as final take-home exams, semester-long projects, and term papers must be due no sooner than the first day, and no later than the last day, of the exam period, and preferably at the time slot reserved for the registrar-scheduled examination.
- Student organizations should not schedule retreats, programs, or meetings that require student attendance during Reading Period.
- Departmental, program, and college activities that require student participation should not be held during Reading Period, with the exception of oral and written examinations covered by alternative exam calendars.
- Sessions or information programs that require student attendance should not be held during Reading Period.
- No required assignments should be due during the Reading Period.

SCHEDULED FINAL EXAMINATIONS

The schedule of final examinations will be issued in advance. The time of any examination may be changed by unanimous request of the class and with the approval of the instructor, but it must be set within the period designated by the faculty for examinations, and the change must be reported promptly to the registrar. The faculty has voted to comply with the following guidelines:

- That “hour exams” be limited to 50 minutes so that students who are scheduled to leave for other classes may not be placed at a disadvantage
- That final examinations be limited to three hours unless otherwise announced before the examination

If a student has three or more final examinations on one day or four in two days, the student may request a rescheduled examination from one instructor.

LEAVE, WITHDRAWAL, READMISSION, AND REFUND POLICY

The following categories indicate the conditions under which a student’s registration at Wesleyan may be interrupted. These designations are recorded on the student’s permanent record.

Leave of Absence – Undergraduate

Wesleyan permits students to interrupt their college careers for a semester or year to pursue other experiences. A Leave of Absence is limited to one year but may be extended upon request to the faculty advisor and class dean. Students will be reclassified to the appropriate class year at the end of the semester in which they file their leave. Students who have obtained prior approval may earn academic credit while on leave and will be reclassified, if appropriate, once these credits are posted to their transcript. *Students may not go on a leave to study abroad.*

Credits earned while on leave must be processed two weeks prior to the semester in which a student returns for purposes of class-year classification. Students who interrupt their enrollment at Wesleyan by taking a leave for more than four consecutive semesters must apply for readmission.

A leave of absence will not be granted after the drop/add period at the beginning of each semester. Students who do not enroll or renew their leave by the end of the drop/add period in the expected semester of return will be administratively withdrawn from the University. Application for readmission is available online and will be considered by the Office of the Deans.

Leave of Absence – Graduate Studies

Students in a Graduate Studies program may temporarily interrupt study due to personal exigencies or for medical reasons. There are two types of graduate leave: Graduate Leave of Absence and Graduate Medical Leave.

Guidelines for Graduate Leave of Absence and Graduate Medical Leave may be found in the Graduate Studies Handbook (https://www.wesleyan.edu/grad/academics/Graduate%20Handbook.html).

Medical Leave

A medical leave is authorized by the vice president for student affairs on the basis of a recommendation from the medical director of University Health Services (UHS) or the director of Counseling and Psychological Services (CAPS). Students on a medical leave must leave campus and focus on the evaluation of, treatment for, and management of the illness or condition that necessitates the leave. The appropriate class dean will communicate the terms of the leave as well as the conditions and procedures for returning to Wesleyan. When a medical leave is authorized, students are withdrawn from the courses in which they are enrolled. In exceptional cases, some incomplete grades may be granted, depending on course content and the date of the leave. (Note that any semester in which a student takes a leave and receives at least one grade is counted as a semester in residence for purposes of graduation.)

Full policy and additional information are available at: wesleyan.edu/studentaffairs/wellbeing/medicalleave.html (https://wesleyan.edu/studentaffairs/wellbeing/medicalleave.html).

WITHDRAWAL

The five forms of withdrawal fall into three main categories: voluntary, involuntary for academic reasons, and involuntary for nonacademic reasons. Withdrawal from the University does not include withdrawal from courses if it occurs after the course withdrawal deadline.

VOLUNTARY

Withdrew. A student has voluntarily left Wesleyan.

INVOLUNTARY FOR ACADEMIC REASONS

- *Required resignation.* A student has been asked to leave the University for academic reasons, with the privilege of applying for readmission after the recommended period of absence.
- *Separation.* A student has been asked to leave the University for the second time for academic reasons and does not have the privilege of applying for readmission.

INVOLUNTARY FOR NONACADEMIC REASONS

- *Suspension.* A student has been asked to leave the University for other than academic reasons for a specified period.
- *Dismissal.* A student has been asked to leave the University for other than academic reasons without the privilege of applying for readmission.

READMISSION

Students who have withdrawn or have been required to resign may apply to the Office of the Deans (http://www.wesleyan.edu/studentaffairs/forms.html) for readmission. The readmission application requires a $50 fee and other accompanying materials specified at the time of departure. Students wishing to enter the University for the fall semester must notify the Office of the Deans (http://www.wesleyan.edu/studentaffairs/about) of their intent by May 1 and submit readmission materials by June 1; for the spring semester, notification must by made by November 1 with materials submitted by December 1. Candidates are strongly urged to meet all requirements well in advance of deadlines, since housing assignments and financial aid awards cannot be made until readmission is granted. Credits earned while away are subject to the conditions described in Transfer of Credit (p. 22). Bachelor of arts students who wish to be admitted to the bachelor of liberal studies program upon readmission to the University must have been away from the University for at least three years before they would be allowed to switch degree programs in this manner. Bachelor of liberal studies students who wish to be admitted to the Bachelor of arts program at any point must apply as transfer students to the Admissions Office.

REFUNDS

For guidelines governing refunds to students who terminate enrollment, please visit https://www.wesleyan.edu/studentaccounts/refunds.html.
For guidelines governing VA Pending Payment Compliance, please visit https://www.wesleyan.edu/registrar/enrollment/veteran_certification.html.

STUDENT RECORDS

Wesleyan University maintains strict confidentiality of student records, sharing information internally for legitimate educational purposes only. Legitimate purposes include matters related to the institution's operations, individual student welfare, or the welfare of other students.

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their educational records. These rights include:

1. The right to inspect and review the student's educational records within 45 days of the day Wesleyan University receives a request for access. Students should submit to the registrar written requests that identify the record(s) they wish to inspect. A registrar's office official will make arrangements for access and notify the student of the time and place where the records may be inspected.
2. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA. A student who wishes to ask the university to amend a record should write to the Wesleyan official responsible for the record, clearly identify the part of the record the student wants changed and specify why it should be changed. If Wesleyan decides not to amend the record as requested by the student, the university will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when they are notified of the right to a hearing.
3. The right to provide or not provide written consent before Wesleyan discloses personally identifiable information contained in the student's educational records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Wesleyan University to comply with the requirements of FERPA. The name and address of the office that administers FERPA are:

   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington, DC 20202-5920

Public Notice Designating Directory Information:

Wesleyan University designates the following information as public or "Directory Information" under FERPA, that is, information that can be made available to the general public by Wesleyan without the student's prior consent:

- Name
- Local and home addresses
- Local and home telephone number
- Email address
- Major field of study
- Degree sought
- Weight and height of athletic team members
- Expected date of completion of degree requirements and graduation
- Degrees and awards received
- Honor societies
- Dates of attendance
- Full- or part-time enrollment status
- Participation in officially recognized activities and sports

Parent/Family Notification Practices

FERPA regulations assign students the right to release information contained in their education records even when they are under the age of 18. Consistent with Wesleyan's efforts to promote each student's personal growth and autonomy, the University will not release information about a student's education record to parents/guardians without the student's consent, except as described in this policy.

Students wishing to grant access to certain individuals in accordance with FERPA and University Policy may complete and sign the Consent to Release Student Information form:

https://www.wesleyan.edu/generalcounsel/documents/FERPA%20Consent%20Wesleyan%20University1-fillable.pdf

In all cases, any release of student information remains at the discretion of the University.

Wesleyan may notify parents/guardians of their student's status in situations not specifically listed below if the circumstances warrant and with the approval of the vice president for student affairs.

Common examples of when Wesleyan will notify parents/guardians include:

Notice of a Student's Enrollment and Academic Standing

Wesleyan communicates only with students regarding their academic progress and performance unless a student specifically requests in writing to their class dean that such information be released to their parents/guardians. Students are encouraged to share information regarding their academic progress with their parents/guardians but are not mandated to do so.

However, a change of student status (e.g., when a student withdraws or is placed on academic probation, required resignation, academic separation, or a leave) constitutes a change in enrollment status and the class dean will typically notify parents/guardians with or without the student's consent.

Notice of a Student's Disciplinary/Conduct Standing

Wesleyan expects each student to take responsibility for their actions. Each student must agree to abide by the Honor Code and Code of Non-Academic Conduct when they enroll in the University.

Wesleyan will communicate about disciplinary matters directly with the student, and parents/guardians will not be notified unless the student chooses to inform them. However, if a serious disciplinary case results in a change in the student's enrollment status (e.g., probation, suspension, or dismissal), the dean of students office will typically ensure that communication has been made with the student's parents or guardians. Consistent with Federal law, Wesleyan reserves the right to inform parents/guardians of all violations of campus regulations regarding the use or possession of alcohol or illegal drugs.

Notice of a Student's Health/Welfare Standing

Information regarding a student's health and/or psychological welfare is protected by strict policies that protect the student's confidentiality. Students are encouraged to share information regarding their health and/or psychological welfare with their parents/ guardians but the University cannot share this type of information without the student's informed consent (typically in writing).

Situations may arise in which a student is unable to give informed consent. If a student is transported to the hospital for a life or health emergency, the parents/

guardians of the student may be notified by the class dean (or on-call dean if after hours).

If a student is deemed to present a direct threat of harm, Wesleyan may notify parents/guardians without the consent of the student. Wesleyan may also share information with parents/guardians where there is a pressing personal health or public health emergency

DEGREE CONFERRAL & STUDENT RECORDS

The University maintains a single degree conferral date. An academic record is permanently frozen after the final degree conferral, and all subsequent grade change requests or changes to the student record are not permitted.

KEY TO SYMBOLS AND ABBREVIATIONS

The number of the course indicates the general character and level of the course.

101–200	Elective for all classes; not credited in the major program of the department
201–400	Intermediate and advanced courses and seminars that may be credited in the major program of the department
401–402	Individual tutorials. Permission of the tutor and the department chair is required.
403–404	Department/program project or essay
407–408	Senior tutorial (only enroll through Honors Coordinator)
409–410	Senior thesis tutorial. Permission of the tutor and the department chair is required.
411–412	Group tutorials. Permission of the tutor and the department chair is required.
419–420	Student forum
421–422	Undergraduate research in the sciences. Permission of the tutor and the department chair is required.
423–424	Advanced Research Seminar, Undergraduate
431–460	Studio work, by individual or group
461–464	Research projects done off campus
465–466	Education in the field
467–468	Independent study project
469–470	Education in the field/independent study project—summer
471–500	Nonrepeating courses, seminars, group tutorials, and colloquia
491–492	Courses credited to teaching apprentices and undergraduate teaching assistants
495–496	Research apprenticeship. Permission of faculty research mentor and the department chair is required.
501–600	Graduate-level courses, undergraduates by permission

AFRICAN AMERICAN STUDIES

The African American Studies major and minor offer a substantial interdisciplinary, comparative, and cross-cultural approach to the study of the experiences of people of African descent in the black Atlantic world, especially in the United States and the Caribbean. The major and minor, which feature courses in the humanities, social sciences, and the arts, enables students to apply, critique, and reimagine the methodologies and insights of many disciplines to their understanding of the cultural, historical, political, and social development of people of African descent. The curriculum enables students to better understand the social structures and cultural traditions created by Africans in the diaspora and to better understand Western conceptualizations of race, the relationship between issues of race and identity, and the histories and influences of people of African descent.

Students who graduate with a major in African American Studies go on to pursue advanced degrees and careers in fields such as law, medicine, literature, education, business, public policy, African American studies, and the sciences.

The intellectual work of the African American Studies Department is enriched further by the programming of the Center for African American Studies. The center's offerings deepen classroom and campus wide conversations about contemporary and historic matters relating to African American Studies and to the African diaspora.

AFFILIATED FACULTY

Marina Bilbija
BA, University of Sarajevo; MA, University of Pennsylvania; PHD, University of Pennsylvania
Assistant Professor of English; Assistant Professor, African American Studies

Ren Ellis Neyra
BA, Freed Hardeman College; PHD, SUNY at Stony Brook
Co-Coordinator, Caribbean Studies; Coordinator, Social, Cultural, and Critical Theory; Associate Professor of English; Associate Professor, African American Studies

DEPARTMENTAL ADVISING EXPERTS

Professor Ashraf Rushdy, Chair

- Undergraduate African American Studies Major (p. 1031)

AFAM101 Introduction to Africana Studies: Black Radical Thought and Praxis
This course will introduce students to the intellectual history and political economy of Africa and the African diaspora. It will take up important historical issues and questions that continue to animate, even haunt the modern world: race, race relations, and anti-Black racism; the universality of whiteness and white supremacy; the fungibility of the Black body; the vulnerability and precarity of Black life; and the complex and "unthinkable" histories and afterlives of chattel slavery, racial capitalism, settler colonialism, and the Middle Passage.

Prereq: **None**

AFAM112F Reading Black Culture (FYS)
Blackness is the lifeblood of the culture industry. U.S. popular culture--which traverses national boundaries due to the workings of imperialism and global capital--has a predominantly Black face, at the same time that Black people, in the United States and across the globe, are made to live in unrelenting proximity to death and destitution. This introductory course aims to tackle this seemingly contradictory state of things by considering the manifold ways Blackness circulates in the global cultural landscape. With the ultimate aim of increasing cultural literacy, we will engage with key questions such as: What makes a Black text? What, if any, political duty does the Black cultural worker have to the larger "Black community"? How does a critique of capital figure into Black culture? How might we conceptualize intellectual work as central to Black cultural traditions? This course traces these questions through the analytic of "reading"--as a mode of critical engagement that exceeds the textual. We will contend with Blackness in its varying permutations and figurations across the domains of literature, music, film, sport, visual art, and performance.

Prereq: **None**

AFAM115F Freedom School (FYS)
From the point of view of the U.S. nation-state, education has always been a hegemonic means to control knowledge, to calibrate unequal forms of citizenship, and to promote the social reproduction of power. Yet as W.E.B. Du Bois wrote in 1903, "education among all kinds of men [sic] always has had, and always will have, an element of danger and revolution, of dissatisfaction and discontent. Nevertheless, men [sic] strive to know." Drawing inspiration from the 1964 Freedom School Curriculum and spanning from enslavement to emancipation to the long civil rights movement, this course explores how people of African descent in the United States, and black women in particular, have used education to empower themselves, produce social change, and redefine the terms under which change may occur.

Prereq: **None**

AFAM116F The Black Radical Tradition (or Black Radicalism) (FYS)
In a nation that was founded on the liberty of white men and women, and the enslavement of people of African descent, black radical action and movements have steered the history of struggles for freedom, citizenship, equal treatment, social and economic justice, and protection from the state. Figures such as Maria Stewart, Frederick Douglass, W. E. B. Du Bois, Marcus Garvey, Paul Robeson, and Angela Davis constitute part of a long tradition of black radicals. Even as the meaning of "radical" has shifted historically, black radicals are joined by their visions of dismantling existing systems and institutions for a freer and more equitable society. Spanning the periods of black radical abolitionism, black nationalism, Black Power, and the Black Lives Matter movement, this course explores key radical thinkers, activists, and texts in historical perspective.

AFAM141F The Revolutionary Rupture: Slavery, Latifundio & Rev. in Caribbean & Lat. Amer. Lit. & Cinema (FYS)
The word "Revolution" often evokes a vertical and/or eruptive image: a standing militant who was once a "premodern," non-European figure; a bottom-to-top explosion of imperial and colonial disorder and normative violence; a rising and world-overturning wind or "natural event." Does the eruption of an "event" worthy of the name "Revolution" begin on the imagined x-axis, say, of the earth's surface? Or does it point beyond that plane of seemingly commonly shared life? Or to that notion itself--i.e., commonly shared life--as a question? How do configurations of hell, heaven, God, Satan, the dead--what's below, what's above--come to bear in representations of "Revolutions"?

In this course, we will slow down, read, and work through these and other questions and figurations on the verge, in the midst, and/or seemingly on the other side of revolutionary ruptures--ruptures which are also returns. We will read select literatures and cinemas of Haiti, The Dominican Republic, Mexico, Guatemala, Puerto Rico, and Cuba that convey refusals of "given" life and death and that render different imperial, colonial, and neo-liberal systems of oppression and their attendant philosophies of the human, non-human, animal, native, enslaved, and blackened. The Haitian Revolution of the late 18th and early 19th century, insurrections in Chiapas before and after the Mexican Revolution of 1910, and 20th-21st century armed movements against U.S. economic and military invasions of the Caribbean and Central American regions would be the historical "flashpoints" of the course. While de-romanticizing the commercialized Che-t-shirt notion of "Revolution" in the U.S., we will, more importantly, encounter and deconstruct discourses of hetero-masculinity, modernization, mestizaje, whitening, and "development" that sometimes appear radical and/or revolutionary.

AFAM152F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.
Offering: **Crosslisting**
Grading: **A-F**

Prereq: **None**

AFAM171F The Prison State: Race, Law, and Mass Incarceration in U.S. History (FYS)
This first-year seminar course explores the history and effects of the United States' mass incarceration crisis. The U.S. incarcerates more people than any other country in the world. And people of color make up a highly disproportionate number of the over 2 million individuals incarcerated in the U.S. today. Beginning with slavery and continuing through the rise of prisons, debt peonage, Jim Crow, and the Black Lives Matter movement, the course will explore how efforts to police, detain, and control black bodies have been at the center of U.S. law and legal practice since the nation's founding. At the same time, we will compare and contrast how race, gender, and sexual orientation have been policed, controlled, and shaped through incarceration practices throughout U.S. history.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM175F The Black Atlantic, A Religious Interpretation (FYS)
The world as we know it is shaped by The Black Atlantic. This phrase centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. But Africans were not solely objects of dehumanizing subjugation and property. Africans co-created this world through material practices, traditions of knowledge, and meaning making summed up in the word religion. This course will both introduce students to the themes of Black religions formed in and through the Black Atlantic, and specific communities, for example, Rastafarianism, Islam, Buddhism, and Pentecostalism. Students will read scholarly articles and engage multi-sensory sources and first-person accounts

of both themes and communities. All resources will be provided in class or via Moodle.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI177F**
Prereq: **None**

AFAM177 Introduction to Black Religions in the Americas
This course will both introduce students to the themes of Black religions formed in and through the Americas, and specific traditions, for example Santería, Islam, Christianity, and Buddhism. The Americas are formed in and through Black Atlantic. The phrase the Black Atlantic centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. The term aptly captures the shifting geographies we call the Americas. Africans were not solely objects of dehumanizing subjugation and property. Africans co-created the new world of the Americas through material practices, traditions of knowledge, and meaning making summed up in religion. Students will read scholarly articles and engage multi-sensory sources and first-person accounts of both themes and traditions. All resources will be provided in class or via Moodle. Books for purchase are not required.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **RELI177**
Prereq: **None**

AFAM177F August Wilson (FYS)
During his lifetime, the world-renowned African American playwright August Wilson graced stages with award-winning plays from his "Century Cycle." This course examines the cycle's 10 plays in the order in which the playwright wrote them, from Jitney (1982) to Radio Golf (2005). In all cases, we pay special attention to the playwright's presentation of language, history, memory, religion, visual art, and music within his oeuvre.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL176F, THEA175F**
Prereq: **None**

AFAM179F Not Like Us: Religion, Race, Pop Culture (FYS)
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What is this 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr. to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity, and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI179F**
Prereq: **None**

AFAM189F LGBTQ, or LGBT Who? Race, Sexuality, and Community in 20th-century U.S. History (FYS)
Beginning with the early-20th-century construction of the "homosexual" as a distinct identity, this course will explore the evolving, complex, and contested history of the queer community over the past century. The course will especially explore how race and gender frequently shaped marginalized yet resilient social movements for the lives, dignity, and rights of trans and other queer people of color, from the drag balls of a century ago through the Black Lives Matter movement.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM202 Introduction to African American Literature
This course will introduce students to African American literature. It will be divided into two parts. The first will pay particular attention to the experience of enslavement by focusing on several unique primary and secondary textual couplings, including (but not limited to): Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) and Saidiya Hartman's "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (1997); and Harriet Jacobs's "Incidents in the Life of a Slave Girl" (1861) together with Hortense Spillers's "Mama's Baby, Papa's Maybe: An American Grammar Book" (1987). In addition to these classic 19th-century slave narratives and contemporary sources, then, the first part will also include supplementary readings by Kenneth Warren, David Blight, Angela Davis, Alexander Weheliye, Spillers, Hartman, Farah Jasmine Griffin, Shelly Eversley, Jennifer Morgan, and Frank Wilderson. The second part will focus on 20th- and 21st-century African American literature and literary criticism. It will bring together a wide range of readings from across genres and disciplines, attempting to sketch out the major aesthetic and political features of the black literary project. Authors here will include W. E. B. Du Bois, Booker T. Washington, Michael Rudolph West, Hazel Carby, Cheryl Townsend Gilkes, Alain Locke, Shane Vogel, Alice Walker, Zora Neale Hurston, Richard Wright, Ralph Ellison, Asia Leeds, Roderick Ferguson, Claude McKay, Amiri Baraka, James Baldwin, Toni Morrison, Samuel Delany, Octavia Butler, Teju Cole, Ta-Nehisi Coates, Cornel West, Claudia Rankine, Warren, and Fred Moten.

AFAM203 African American History, 1444-1877
This course examines the historical interactions between peoples on three continents--Africa, Europe, and the Americas--and the consequences of European colonization, trans-Atlantic slavery, and racial capitalism. Focusing on a period from the Antiquity to the late 19th centuries, we will explore how European notions concerning Africa its peoples evolved over millennia in response to shifting political, economic, and demographic circumstances. We will chart how Africans and their descendants in the Americas experienced and responded to colonialism. And we will analyze how debates concerning enslavement and freedom, indigeneity and civilization, and pan-Africanism and national citizenship played out across the African Diaspora and in the United States.

AFAM204 Introduction to Modern African American History
This course explores the African American struggle for equality, liberation, and justice from Reconstruction through to the present. We will examine how gender, class, sexuality, and ideology, among other factors, have shaped the history of black protest and community. We will visit key periods and themes including Jim Crow/segregation, The Great Migration, World War II, Civil Rights, Black Power, and Black Lives Matter, to understand the intersection of the African American lives and American history. Central to this course are the ways that African Americans have exposed American hypocrisy; have shown their historical patriotism; and have challenged American institutions to live up to their professed ideals.

AFAM208 History of African American Art
This course will introduce students to a history of African American artistic production from the late 18th century to the present, in a range of media and styles. While we will focus primarily on the visual arts--looking at sculpture, painting, photography, collage, film, performance, and installation--we will also consider the deeply interdisciplinary nature of Black cultural production, highlighting the important role of music, poetry, dance, and theater.

We will explore how African American artists, both individually and collectively, have negotiated the terms made available to them by cultural institutions, whether by struggling for inclusion, acknowledgement, and validation; actively protesting racist and exclusionary policies; or by forming alternative institutions, communities, and spaces in which to work and share support. From the Harlem Renaissance to the Black Arts Movement and "post-Black" exhibitions, art works will serve as a primary source to ask, is there such a thing as a "Black aesthetic" and if so, how would one define it? Why might an African American artist reject such an idea? Other key questions will include: What is the role of visual representation in political struggle? How have artists mobilized portraiture as a tool of liberation? What does it mean to turn away from figuration, toward abstraction or opacity? How have artists grappled with questions of nationhood, belonging, and diaspora?

Together, we will trace how artistic forms, techniques, and motifs have served both as sites of collective history and as speculative propositions to envision new futures, articulating what Robin D.G. Kelley calls "freedom dreams."

AFAM209 Digital and Visual Storytelling
During this seminar, we will develop a digital group project that addresses the question of remembering and denying pasts through the historical and critical relationship between carcerality, race, and storytelling in Connecticut. By engaging with contemporary forms of digital and visual storytelling (ArcGIS StoryMaps), this group project will work with the modalities of archival studies and digital humanities, accompanied by readings in critical race studies, visual and literary theory, and decolonial theory. We will first explore "remembering the past" through two post-Civil War Connecticut landmarks: The Church of the Good Shepherd (1867-69), dedicated to Samuel Colt, and the Mark Twain House (1874), now a museum. Both architectures exist as pivotal markers for a new modern American narrative intertwined with legacies of slavery, manufacturing, firearms, and storytelling. We will then consider how to make visible denied "pasts" by conducting archival research on the formative period of the 1860s and 1870s and in respect of the Connecticut context. Centrally, valuable insights for the project development will be provided by the in-class meetings with scholars, artists, and archivists, whose work rethinks and challenges the bond between carcerality, race, and storytelling.

AFAM210 Black Women and the Sacred
This course examines how Black women engage spiritual practices, in and beyond religious traditions to remake an anti-Black world. Black women have famously been called the "mule of the world." In this role, the Black woman is beast of burden, property, ungendered, enslaved. As such the Black woman constitutes a limit for the normal, the human, and thus the religious. In the study and practice of religions in the modern, western world, Black women are included through exclusion as heretics, demons, and witches. Nevertheless, Black women and their practices across normative formations of nation, race, and religion have cultivated social practices, ideas, and communities which form a counter-poetics, a counter-mythology, and an otherwise possibility of what religion, unbounded and non-normative might be. This course examines typical accounts of Black women in different religious traditions, but more importantly, the course examines how Black women's practices upset normal accounts of nation, race, gender, sexuality, and religion. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM211 Critical Philosophy of Race
What is race? Can philosophy account for it or describe it? This class will serve as an introduction to the field of philosophy of race, and examine the general crises or problems that race and racism raise for philosophical projects and methods. We will explore topics such as the ontology of race, its relationship to other social formations like class and gender, its foundations in violence, and its fugitive possibilities. We will read work from classical philosophers of race--like Charles Mills, Linda Alcoff, and David Haekwon Kim--and from scholars at the margins of philosophy--like Gloria Anzaldua, Adrian Piper, and Fred Moten.

AFAM212 Modern Africa
What is African Modernity? We will examine this question as we survey the major historical transformations in Africa since approximately 1800. Important themes include: African political innovations, the abolition of the slave trade and its effects, European colonialism, African adaptation and resistance, nationalism and decolonization, and Africa's role in shaping major global events. We will also study the impacts of religious and social transformations amid rapid economic

and political change. Finally, we will examine African visions for post-colonial development and how to shape the future of the continent.

During the semester we will also cover some of the issues surrounding African history as a discipline. No single course can cover more than a sliver of the complexity and variety in the continent. For this reason, we approach the study of Modern Africa as comparative history. However, students satisfactorily completing this course will be able to write knowledgeably about African history and will have the foundation necessary to undertake further study about Africa with sensitivity to the complexity of its recent past.

AFAM213 Abolition Geographies
"Space always matters, and what we make of it in thought and practice determines, and it is determined by, how we mix our creativity with the external word to change it and ourselves in the process. In other words, one need not be a nationalist nor imagine self-determination to be fixed in modern definitions of states and sovereignty, to conclude that at the end of the day, freedom is a place. How do we find the place of freedom? More precisely, how do we make such a place over and over again?" --Ruth Wilson Gilmore, "Abolition Geographies" This course is not only an introduction to the burgeoning field of abolition geographies, introduced through the work of Ruth Wilson Gilmore, but invites students to engage with abolition geography as an intellectual and political practice. In this seminar, we will consider the relationship between freedom and place-making (the production of places) by examining Ruth Wilson Gilmore's analytics and by also engaging in a range of geographic struggles. For example, students will consider the extent to which enslaved rebellions, not limited to the Haitian Revolution, remade what we envision today as the Atlantic. Students will also have the opportunity to apply an abolitionist framework to their own research.

AFAM214 Postcolonial Religion: Pentecostalism and the Global South
This course examines the concepts and structures of the city and religion throughout the postcolonial global south through traditions and practices of Pentecostalism. The postcolonial marks both a theoretical and a historical break with the structured violence and domination imposed on most of the world through European expansion, land expropriation, indigenous extermination, African enslavement and Christian evangelization. Postcolonial religion, thus marks a reworking of the past, reforging of the present, and otherwise possibilities for communities and their sacred traditions in the future. This seminar will stretch and test this thesis through an examination of global Pentecostalism, a religion, which both marks the colonial, especially Christian evangelization, even as its rapid expansion in the global south among Latin American, sub-Sahara African and Black-descended people in the US and Europe expresses creolization, indigenization and urbanization. Perhaps, rather than a clean break, postcolonial religion, in the form of Pentecostalism indicates ongoing refusals, ruptures and relations between the metropole, and a history of subjugation and imagined utopian cities and futures of abolition. Seminar focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM216 A Small Place
Inspired by both Jamaica Kincaid and Paule Marshall's notion of a "small place," this seminar examines colonial and imperialist binaries of "large" versus "small" that render the Caribbean, the Pacific, and many other archipelagos as existing outside of the "world." How do islands become microsomes of a shared but contested global reality? This one of many questions students will be asked to consider throughout the seminar.

AFAM217 Empires, Slavery, and Revolution: Africa to 1800
In this course we will examine the dynamic political and social histories of precolonial Africa. We will study the rise of kingdoms and empires such as Mali and Kongo, as well as revolutions in society from the technological development of iron production, to the emergence of trade networks, the development of ancient cities, the spread of religious healing and reform movements such as Cwezi spirit possession, and the role of gender in early African societies. Over the course of the semester we will also consider the impact of slavery and the first African encounters with Europeans. The methods for studying the early African past are interdisciplinary. You will have the opportunity to explore how ancient Africa has been imagined in the past by Africans and early Arabic and European observers, and how contemporary scholars write these histories. As we trace a history of early Africa in the world, we will consider several methods: the study of myths and oral traditions, linguistic and archaeological data, as well as ecological and archival records.

AFAM218 Literary Genres of Black History
This class proposes that literature has long been integral to the historical record of African American life. Black people have been denied the ability and means to create institutions for archiving, preserving, and memorializing their pasts -- from the days of chattel slavery when literacy was illegal, to the Dunning School of history that undergirded Jim Crow, up to the recent attacks on the teaching of African American history in primary education. Despite this deeply entrenched suppression, Black writers have found ways to ensure their lives were part of the written record. How do we write history when doing so is prohibited? What creative forms arise to tell the stories of Black life when the written word is so heavily policed? Through poetry, fiction, and drama, Black writers have done the deep archeological work to recover their own history and create counternarratives. Our class will develop a vocabulary for the written works of this counter-narrative tradition. We will read texts by Martin Delany, Harriet Jacobs, William Wells Brown, Zora Neale Hurston, Margaret Walker, Gwendolyn Brooks, Melvin Tolson, Robert Hayden, Toni Morrison, Claudia Rankine, M. NourbeSe Philip, and Tyehimba Jess. We will trace the aesthetic practices of writing history at various moments of its making, from the antebellum era to the present day. Along the way, we will read occasional examples of Black history writing that share methods with Black literature, such as works by Harriet Jacobs, Ida B. Wells, C.L.R. James, and Saidiya Hartman. Throughout, we will ask what

these literary experiments with history allow us to envision for a more just future.

AFAM219 "The History that Hurts": Reading Saidiya Hartman
This course will introduce students to the major works of the Black literary theorist and cultural historian Saidiya Valarie Hartman (b. June 25, 1961), who was named a 2019 MacArthur "Genius" Fellow in Literary History and Criticism and American History. After graduating from Wesleyan in 1984, Hartman earned her PhD in American Studies from Yale in 1992; she is currently a professor in the Department of English and Comparative Literature at Columbia University. Students enrolled in this course will read and write about Hartman's trilogy of scholarly monographs: "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (Oxford University Press, 1997); "Lose Your Mother: A Journey Along the Atlantic Slave Route" (Farrar, Straus and Giroux, 2007); and "Wayward Lives, Beautiful Experiments: Intimate Histories of Riotous Black Girls, Troublesome Women, and Queer Radicals" (W. W. Norton, 2019). Finally, if her new book project is published before the syllabus is finalized, then students enrolled in this course will also read and write about Hartman's fourth scholarly monograph (tentatively titled "N Folio: An Essay on Slavery and the Archive"").

AFAM220 Poetics of Blackness
This course brings together Black critical theory and contemporary Black poetry in order to think through key sites of conflict in the theorization of Blackness. Rather than offer a literary history of Black poetry, this course is interested in approaching poetry as a crucial node of Black critical thought. Throughout this course we will pay particular attention to questions of form, genre, archive, queerness, gender, affect, visuality, ontology, and temporality as they approach and are undone by Blackness.

AFAM221 The African Novel
This class considers several canonical novels from sub-Saharan Africa. Our focus will be on their aesthetic and thematic properties; the novels are not meant as introductions to African histories, cultures, peoples, or practices. We will explore instead the specific subjects and styles of each work in the context of wider debates about orality, language, colonialism, gender, and the novel. To fathom the political and aesthetic stakes of African literary canon formation, we will also attempt to identify what makes a work canonical.

AFAM222 Literature and Black Feminism: The Dramas of Black Capital
This class explores Black women's fiction as a mode of critique and intervention into Black Americans' complicated relationships with social and economic capital in the wake of US chattel slavery. How do Black people negotiate the transition from being to owning property? How does the persistence of capital, even in the absence of the system of racial slavery that ushered it into being, continue to shape Black institutional access and Black intramural relations? How are white, Western regimes of value--constructed as they are through the production of racial-sexual difference in dominant habits of thought and representation--contested and, at times, recapitulated in Black social life? How does Black women's literature take up these questions, and what about Black women's literature uniquely equips it to meet this challenge? Ultimately, the course takes seriously Black women's literature as Black feminist thought, exploring how it indicts and imagines beyond the violence of modern racial capitalism.

AFAM223 Anthropology and (Anti)-Blackness
This course considers the intellectual and institutional developments of psychoanalysis and anthropology in the 19th and 20th centuries and the ways in which these disciplines defined a figure of the human that excluded the "African," the "Black," "the Negro" from the capacity to signify the universal. By examining these constitutive occlusions of race, the course considers the ways in which the "unthought" status of racial blackness, in particular, animates and aggravates the discipline of anthropology. The course will move from introductory readings in classical anthropology and psychoanalysis and a selection of works in Black critical thought towards contemporary scholarship that reappraises these fraught questions.

AFAM228Z Thinking with Octavia Butler's "Wild Seed"
Blend: Monday and Thursday class time synchronous; additional class hours asynchronous.

Black speculative fiction writer Octavia Butler's novel "Wild Seed" (1980) begins on the African continent in the 17th century amid the rise of transatlantic slavery and concludes on a plantation in Louisiana on the eve of the 19th-century American Civil War. "Wild Seed" was the last published book in Butler's Patternist series, but it relates the earliest segment of that epic story, which follows a shape-shifter named Anyanwu and a body-jumper named Doro across geographies, centuries, classes, corporealities, genders, races, and even, in Anyanwu's case, across species. To quote one student: "It's the weirdest novel I've ever read." This seminar takes up the myriad and interwoven provocations Butler offers in "Wild Seed" by reading her novel alongside a wide range of scholarly literature in the fields of African and African diaspora studies, Indigenous studies, gender & sexuality studies, animal studies, history, disability studies, religious studies, and cultural studies, as well as visual arts. Rather than "apply" the syllabus texts directly to Butler's novel, we will attend to how her novel not only reflects--indeed, anticipates--such scholarly and artistic production, but also produces its own aesthetics and epistemologies.

The seminar unfolds part-synchronously (via Zoom) and part-asynchronously (via writing assignments, screenings, and research project check-ins). Twice-weekly virtual meetings will be centered on presentations of research projects that students will develop over the course of the month, engaging a particular theme or question that they will identify in Butler's work. As such, the syllabus texts are subject to change. Students will be expected to read "Wild Seed" in its entirety in advance of the first class and to have begun thinking about topics they might explore for their presentation and research project (the former being preparation for the latter). The seminar's asynchronous component will consist primarily of weekly writing exercises asking students to reflect on how the assigned texts converse with Butler's novel and vice versa and to comment on one another's analyses. Shared annotatable pdfs will be used to generate conversations about the readings outside of class and to identify questions and topics for discussion. The professor will consider proposals for a creative final project, but it, too, will require substantive research.

AFAM229 Reading Toni Morrison: Blackness and the Literary Imagination
This course will introduce students to the major works of the late Nobel laureate Toni Morrison (1931-2019). In addition to the trilogy--"Beloved" (1987), "Jazz" (1992), and "Paradise" (1997)--and "Playing in the Dark: Whiteness and the Literary Imagination" (1992; originally delivered as the William E. Massey, Sr. Lectures in the History of American Civilization at Harvard University in 1990), readings may also include the following novels (in chronological order): "The Bluest Eye" (1970); "Sula" (1973); "Song of Solomon" (1977); "Tar Baby" (1981); "Love" (2003); "A Mercy" (2008); "Home" (2012); and "God Help the Child" (2015).

AFAM230F Marxism and Abolitionism (FYS)
This course explores the historical encounter of Marxist revolutionary theory, with its roots in German idealism (Kant, Schiller, Fichte, Hegel), and abolitionist causes. How have abolitionist movements historically informed, expanded, and challenged Marxist theory and its tactical playbook? What made Marx a touchstone for so many black revolutionary thinkers, including W.E.B. du Bois, Franz Fanon, C.L.R. James, and Angela Davis? How have anticommunist, racist, security-statist ideologies been mobilized to undermine and defeat transformative social movements? We will begin with the Haitian Revolution and work our way through the abolition of slavery in the US and the anticolonial and civil rights struggles of the mid-20th century to the prison abolition movement today. In addition to the above mentioned authors, readings will include Toussaint L'Ouverture, Frederick Douglass, Ottilie Assing, V.I. Lenin, Rosa Luxemburg, Georg Lukács, Max Weber, Martin Luther King, Jr., Herbert Marcuse, and the Combahee River Collective.

AFAM233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

AFAM234 Black Labor and Working-Class History
This course examines the history of Black people's work experiences, labor activism, and working-class life in the United States. Topics will include wage labor in the emerging market economy of the late 18th century; the many forms of enslaved labor; labor activism and radicalism in the late 19th and early 20th centuries; racial exclusion from the New Deal order; Black socialist and communist politics; changes and continuities in Black women's labor during the 20th century; the "surplus labor" to prisoner pipeline in the late 20th century; and the rise of gig labor and new worker movements (particularly in health care and e-commerce) during the 21st century. Using historical scholarship, novels, films, theory, and music, alongside a wide variety of primary sources, we will consider the changing ideas and practices of workers, their families and communities, and employers. We will highlight persistent themes that challenge the typical (white-centric) narrative of working-class history in the United States, such as the ways in which anti-Black racism has shaped labor politics. We will also discuss the flourishing of creative thought and practice that often happens alongside, or in response to, the seemingly endless demand for Black labor in American society.

AFAM235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types

of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.

AFAM236 Introduction to Postcolonial Theory
The 1978 publication of Edward Said's Orientalism signaled the presence of postcolonial studies, a field of intellectual inquiry that proved influential in the humanities and social sciences. How, from our vantage point, do we understand both the age of imperialism/colonialism, and what happens afterwards? What are the conditions of decolonization and national independences? How do the cultures of the formerly colonized countries use and modify imperial vestiges, and invent themselves anew? Central to our course will be the work of three major theorists in the field of postcolonial studies: Edward Said, Gayatri Spivak, and Homi Bhabha. Among other important ideas, we will discuss Orientalism, subalternity, and mimicry.

AFAM237 Technologies of the Self
Where does the idea of an authentic self come from? The desire to represent the authentic self informs the narrative genres of the confession and memoir and visual ones of the selfie and self-portrait alike. Yet both the memoir and the selfie "self" are mediated, first, via the technologies of print and screen, and second, via the conventions of particular genres that make these legible as a memoir and selfie, as opposed to, for example, an interview or a portrait. In this course, we will examine how different technologies not only represent but produce the self. These technologies include "writing" technologies: print and digital; genre and medium (autobiography, the slave narrative, memoir, self-portraits, and selfies); and technologies of the state, which produce citizens, subjects, and humans.

AFAM238 Imperial Education: Colonial Template
Where, how, and for what reasons did our modern structures of education originate? Beginning with the sketching out of an educational model in the British Raj, we will examine the dissemination of that model globally, in the British and French colonies of Asia, Africa, the Americas, and among immigrants and the proletariat. How and where does that model change, and to what effect? History will provide the context for our major subject matter: literature focussing on the educational experience. Among our historical and theoretical readings will be Macaulay's Minute on Indian Education, Viswanathan's The Beginnings of English literary study in British India, Wa Thiong'o's Decolonizing the Mind, Freire's Pedagogy of the Oppressed, and José Marti's On Education. We will also analyze literary texts and films, including Narayan's The English Teacher, Beti's Mission to Kala, Dangarembga's Nervous Conditions, Adichie's Purple Hibiscus, the film Sugar Cane Alley, and others.

AFAM240 From the Banjo to Dembow: Afro-Caribbean Music in Motion
This course analyzes the global circulation of Afro-Caribbean musicians, dancers, audiences, musical styles, and even musical instruments from the beginning of European colonialism to the present day. We will seek to understand the political interconnections between the Caribbean and the wider world by focusing our attention on specific "musical itineraries." These will include, among others, the creation of the banjo by enslaved people in the Caribbean and the instrument's role in black resistance in North and South America, the musical aftershocks of the Haitian Revolution in Cuba and Louisiana, the production of black internationalist politics at weekly "regge" dances led by Jamaicans in early 20th-century Costa Rica, and the rise of reggaetón between Panama, Puerto Rico, Cuba, the Dominican Republic, and the United States.

We will question how these musical itineraries propelled black political movements and shaped larger ideas about race, nation, diaspora, and the meaning of "the Caribbean" itself. No prior musical knowledge is required for this course.

AFAM241 Ebony Singers: Gospel Music
This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

AFAM242 Intimate Histories: Black Women's Sexuality
Black feminist theory teaches us that African American women have historically confronted racism and sexism in addition to other forms of oppression. How has this experience shaped the sexual lives of everyday black women and famous figures? This course places the sexual at the center of African American women's history. It will examine how regimes of violence have intervened in

black women's sexual freedom, from intimate bonds to reproduction to same-sex desire. It will cover black women's resistance to these regimes; to their sexual agency in diverse spaces from the plantation to the porn industry. This course will also tackle the enduring impact of the Jezebel stereotype in the history of black women's sexuality. Using primary and secondary sources, this class will fundamentally investigate the significance of African American women's sexual history in the histories of American sexual, racial, gender, and class politics.

AFAM243 Caribbean Writers in the U.S. Diaspora
The Caribbean cloaks a complex history in a Club Med exterior. While white sands and palm trees proclaim it the "antidote to civilization," Caribbean writers undertake to represent a fuller picture of the individual in a world shaped by colonialism, slavery, nationalism, and cultural striving. This course will examine selected literary texts as part of an ongoing dialogue among the region's history, mythology, and aesthetics.

AFAM244 Girlfriend, Sister, Self: 20th-c. Black Women's Writing
This course will examine textual and visual constructions of the girlfriend, sister, cousin, and daughter in 20th-century black women's writing. We will read works by Toni Morrison, Alice Walker, Veronica Chambers, and Marita Golden as narratives of women loving women (sexually and not) and as sites through which to engage black women's subjectivity more generally. In this course we will attend to the interior landscapes of individual black female subjects as well as the social landscapes that produce and/or complicate notions of love, kinship, friendship, and self. We will draw on African American literary theory, queer and affect theory, and black cultural memory as well as turn to influential works by bell hooks, Deborah McDowell, Kevin Quashie, and Valerie Smith, among others. How do writers of the period imagine and articulate the relationship between black women and their others?

AFAM248 Race, Ethnicity, and Popular Music
This course explores race and ethnicity in the United States through sound and song. By studying diverse topics--from the Boston Tea Party, blackface minstrelsy, and the rise of Jim Crow, to Native Hawaiian influences on the Mississippi Delta blues, to the unexpected connection between elevator music and the Spanish American War--we will learn about the history of settler colonialism, anti-black racism, U.S. imperialism, global capitalism, and hetero-patriarchy. We will also remain attentive to music as a transgressive and revolutionary force, one that facilitates hybrid identities and movements that celebrate difference, offering alternate visions for what it means to be and sound free. Investigating primary sources will demonstrate how musical genres may act as reservoirs of shared history and collective identity. As Ronald Radano has argued, discussions about music can have tangible influences because debates about music are a proxy for larger social issues with real-life consequences. Can music make (or unmake) race? Can a song change the world?

AFAM250 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

AFAM252 Not Like Us: Religion, Race, Pop Culture
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What Is This 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM254 The History of Race and Sex in America
Everything in our contemporary moment has a historical precedent. This course explores the ways that race, class, gender, ethnicity, and sexual orientation have intersected to shape American lives and group identities. Focusing on the concept of intersectionality, this course looks at the relationship between power, rights, and citizenship; namely who is included and who is excluded at a given time and why. Thinking about how sex has factored into these dynamics, we'll be covering topics such as sexual coercion and consent, interracial marriage, and civil rights in historical perspective. Spanning the early American period through to the present, we will focus specifically on how the understanding of blackness and whiteness, manhood and womanhood, and heterosexuality and homosexuality changed over time.

AFAM255 The Black Feminist Fantastic: Afrofuturism, Afro-Gothicism, and Afro-Speculative Fiction
This course looks at the specifically feminist literature of the Black cultural tradition that, variously, has been called Afrofuturism, Afro-Gothicism, and Afro-Speculative Fiction. This tradition combines science-fiction, history, fantasy, and horror in order emphasize processes of racialization, legacies of colonialism, theories of science and technology, and the general makings of the modern world. In helping to make this world, central Enlightenment thinkers (e.g., Burke and Kant) posited that the figure of the Black female induced a sublime terror that justified aesthetic and scientific racial hierarchies. In this class, we will examine how Black feminist fantastic literature does not simply rebuke this modern world order; it imagines a world otherwise. We will read Black female authors to study how their aesthetics accrued a Black feminist politics. We will trace the relationships of power that inhere in this tradition's tropes and formal conventions, and we will explore how authorial manipulations of such tropes and conventions seek to dismantle gendered and racialized power structures. While our course will predominantly focus on literature, we will also develop our understanding of this tradition's aesthetics through music, Black feminist theory, and visual art. Texts will include Pauline Hopkins's Of One Blood, Octavia Butler's Kindred, Toni Morrison's Beloved, Chimamanda Ngozi Adichie's Purple Hibiscus, and Tracy K. Smith's Life on Mars. We will interpret and build on Janelle Monae's Dirty Computer, Erykah Badu's Baduzim, Jennifer Nash's assertion of Black feminist theory's "visionary world-making abilities," Hortense Spiller's grammars of "ungendering," Jackie Ormes's comics, and Wangechi Mutu's mixed-media collage and film.

AFAM256 A Celebration of Women in Jazz: A Critical Analysis of Gender
How can we take the lessons of Jazz with us into other spaces? In this course, students will study Women in Jazz and examine the broad impact of our social structures and power systems to consider how the lessons of Jazz can help us navigate our future. How can we take the values of Jazz, such as improvisation, listening skills, democracy, a celebration of diversity, and equity work, and use our agency to effect change for the better in our communities? This course will examine the traditionally male-dominated nature of Jazz, its history of misogyny, and underrepresentation of women and other gender expressions. Students will learn in general about the musical art form of Jazz, its history as Black American music, and its unique qualities including improvisation, the blues, and swing. There will be a strong focus on listening to music from women musicians, and students will learn how to actively listen to jazz and all music. Together, we will look at case studies of successful women musicians and composers from the history of Jazz through the present, reading biographical information and reviewing their performance and compositional contributions. Musicians may include Mary Lou Williams, Carla Bley, Terri Lynn Carrington, esperanza spalding, Nina Simone, Billie Holiday, Ella Fitzgerald, Melba Liston, Lil' Hardin Armstrong, Dinah Washington, Abbey Lincoln, Toshiko Akiyoshi, and Marian McPartland.

AFAM257 System Mapping for Social and Environmental Impact
In recent years, growing interest in social entrepreneurship has pushed students to "solve" complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, half-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a "systems map" that documents the economic, political, and cultural factors behind their problem, as well as the current "solutions landscape."

AFAM258 The Literature of Black History
This class proposes that literature has long been integral to the historical record of African American life. Black people have been denied the ability and means to create institutions for archiving, preserving, and memorializing their pasts -- from the days of chattel slavery when literacy was illegal, to the Dunning School of history that undergirded Jim Crow, up to the recent attacks on the teaching of African American history in primary education. Despite this deeply entrenched suppression, Black writers have found ways to ensure their lives were part of the written record. How do we write history when doing so is prohibited? What creative forms arise to tell the stories of Black life when the written word is so heavily policed? Through poetry, fiction, and drama, Black writers have done the deep archeological work to recover their own history and create counter-narratives. Our class will develop a vocabulary for the written works of this tradition. We will read texts by Martin Delany, William Wells Brown, Harriet Wilson, Charles Chestnutt, Zora Neale Hurston, Margaret Walker, Gwendolyn Brooks, Melvin Tolson, Robert Hayden, Toni Morrison, M. NourbeSe Philip, and Tyehimba Jess. We will trace the aesthetic practices of writing history at various moments of its making, from the antebellum era to the present day. Along the way, we will read occasional examples of Black history writing that share methods with Black literature, such as works by Harriet Jacobs, Ida B. Wells, C.L.R. James, and Saidiya Hartman. Throughout, we will ask what these literary experiments with history allow us to envision for a more just future.

AFAM259 Queer of Color Critique
This course will serve as an introduction to the debates, theoretical interventions, and methodological concerns that frame and inform a "queer of color critique." In this course we will observe how the scholarly contributions of LGBTQ people of color complicate, revise and/or reimagine the fundamental presumptions of queer theory. We will be exploring the emergence and development of "queer of color" knowledge production and activism in relation to the field(s) of black studies, film studies, queer theory, and African American literary production. This course will cover specific topics like gender, sexuality, culture, diaspora, and mutuality, paying special attention to the politics, ethics, and aesthetics of race and racial difference.

AFAM260 On Evidence: Archives, Museums, and Prisons
This course introduces an interdisciplinary study of the idea of evidence in connection to the modern development of archives, museums, and prisons, by setting this in a contemporary dialog with the discourses on state violence, incarceration, and refugeetude. This course will firstly establish historical and theoretical connections between carcerality, Western archival record-keeping practices (e.g., scientific grids, mugshots, taxonomies, and forms of surveillance), and museological frameworks developed during the transition from the 19th to the 20th century.

Furthermore, it considers how records, artifacts, digital data, bones, sites of "memories," oral traditions, embodied knowledge, or intergenerational trauma can become evidentiary material. Such inquiries are central to decolonial archival studies as they are critical for historically marginalized, racialized, and gendered subjects, whose claims to social justice, human rights, and cultural heritage are tied to the aftermaths of slavery, genocides, and colonialism. Our readings and discussions will specifically draw upon decolonial archival studies, digital humanities, visual studies, human rights discourse, Asian American studies, Black studies, and Indigenous studies, which have continuously challenged what constitutes evidence.

AFAM261 Beyond the Talking Book: Reading African American Literature in the Newspapers
The majority of late-nineteenth and early twentieth century African American writers, such as Frances Harper, Martin Delany, Pauline Hopkins, W.E.B. Du Bois, and Langston Hughes, published their work in African American periodicals. In this course, we will examine the works of these canonical authors (as well as some lesser known ones) in their original publication context, the magazine archives of The Christian Recorder; The Anglo-African Magazine; The Colored American Magazine; The Crisis; Opportunity; and Fire!! The guiding question in our readings is this: how does our understanding of African American Literary History change when we spotlight the original magazine and newspaper contexts of its key texts? We will thus examine the serial installments of novels like Blake and Hagar's Daughter in relation to the various texts and images alongside which they were published and read. In addition to honing students' literary close-readings skills, this course aims to teach students how to do original research and critically engage with multi-genre, mixed forms like the magazine. Learning how to read a newspaper as both a historical document and a literary one will require you to navigate between multiple different texts on the same page, in the process of which you will acquire a new reading practice. Students will write five (5) 200-250-word blog posts and four (4) short papers, including a creative assignment, a paper on reading literature in newspaper formats, an essay on illustrations and visual culture in African American Magazines, and an essay that tells the story a literary text's significance through a discussion of its different reprints and editions.

AFAM263 Critical Race and Art History: Theories and Methods
How does the study of art shift if we begin with questions of race, power, and colonialism, rather than treating them as secondary? Concepts such as mastery, familiarity, strangeness, taste, and beauty are formed by conditions of domination and subjugation. Moreover, the histories of material production and cultural expression are fundamentally entwined with the circuits of enslavement, forced migration, and the extraction of resources, people, goods, and "styles."

For the bulk of the semester, we will focus on a series of case studies drawn from the 15th to 20th centuries, a period of intense European contact and conquest in Africa, Asia, the Caribbean, and the Americas. Topics will include: representations of Africans in Renaissance Germany; African depictions of the Portuguese circa 1492; the appearance of parrots, kraak (Chinese) porcelain, and other goods from "exotic" locales in 17th-century Dutch still lifes; the taxonomies of racial difference in Spanish casta paintings; debates about sculptural polychromy and the "whiteness" of marble; the relationship between expansionism, empire, and the genre of landscape; "primitivism" and European artists' "discovery" of African artistic forms; the critical interest in "racial art" in the interwar U.S.; and contemporary conversations about museums and restitution, among others.

Throughout, works of art are primary sources with which to study the specificities of periods, places, and their social arrangements. While we will emphasize difference and historical contingency, our longue durée approach

will enable us to draw connections about art's role in processes of primitive accumulation, dispossession, and racial capitalism.

AFAM264 "Before the 'Body' there is the 'Flesh'": Reading Hortense Spillers
This course will introduce students to the major works of the black feminist theorist and literary critic Hortense J. Spillers (b. April 24, 1942), one of the greatest essayists and most gifted intellectuals of our times. While her published writings are legion, Spillers is perhaps best known for her scholarly article titled "Mama's Baby, Papa's Maybe: An American Grammar Book" (originally published by Diacritics in 1987). In addition to "Mama's Baby," then, together we will read and engage at close range with the essays collected in "Black, White, and in Color" (published by the University of Chicago Press in 2003) in order to reveal the extraordinary complexity and clarity of her thought.

AFAM265 Music and Downtown New York
This course will explore the history and flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of major cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of U.S. history. We will uncover their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and politics, and avant-garde aesthetics. Drawing from primary sources, we will read about and discuss recordings of a wide variety of musicians, view a broad cross-section of film, identify aesthetic and cultural trends, and study the local industry that supported them. A key theme will be the importance of a place. Projects throughout the semester can include written papers, recordings, artwork, culture mapping, or other creative endeavors somehow related to each of the four topics.

AFAM266 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

AFAM267 The Caribbean in Relation
"For through this experience made you, original victim floating toward the sea's abysses, an exception, it became something shared and made us, the descendants, one people among others. Peoples do not live on exception. Relation is not made up of things that are foreign but of shared knowledge. This experience of the abyss can now be said to be the best element of exchange." --Glissant, 1997

In this seminar, we will think with Glissant as well as others on how the Caribbean is a space of "relation." One of the main questions that we will address throughout the course is what are the historical, social, and physical mechanisms that define the Caribbean and its relationship to other geographies produced through slavery and colonialism? To answer this question we will engage the work of geographers, historians, and anthropologists, interested in the formation of political, cultural, and economic life in the Caribbean.
Offering: **Host**
Grading: **A-F**

AFAM269 Pessimism, Nihilism, and Black Literature
This course considers Black literature's interventions into philosophical discourses of pessimism and nihilism. In contrast to the pathologization and dismissal with which they are often met, we will take both seriously as schools of thought. How are pessimism and nihilism distinct from each other? What do they offer as interpretative lenses for and approaches to Black art and Black existence? How are they reflected in literary form? We will closely consider these, and related, questions, looking to the work of authors such as Percival Everett, Jesmyn Ward, Dambudzo Marechera, Frank B. Wilderson III, and Gayl Jones.

AFAM270 Carceral Connecticut: Policing Race, Gender, and Sexuality in the "Land of Steady Habits"
Often considered a progressive bastion, Connecticut in fact has been at the forefront of carceral practices since the eighteenth century. In 1773, the colony converted a copper mine into the below-ground Newgate Prison. Half a century later, the state constructed one of the nation's first penitentiaries, in operation in Wethersfield, Connecticut, until its demolition in the 1960s. In each of its iterations, Connecticut's carceral system has policed, shaped, and disciplined its subjects along lines of race, class, and gender, constructing the normative and punishing deviation. Through engagement with rich state and local archives, this course will use several case studies to examine how Connecticut's carceral practices have made and re-made the state's legacy of slavery and policed the borders of accepted gender and sexuality in this place nicknamed "the land of steady habits."

The Middlesex County Historical Society's rich collection of late-19th and early-20th-century Middletown police logs, county jail records, and police court proceedings will enable students to analyze on-the-ground carceral practices in Connecticut. The Connecticut State Archives's extensive state penitentiary records, pardon petitions, and other state-level records will enrich and contextualize the local picture in Middletown. In this service learning course, students will share their research with the community through public presentations, online, and by planning exhibits at the historical society and on campus. This course, and students' public-facing research in this course, is part of the Carceral Connecticut Project based at Wesleyan University. See: https://carceralconnecticut.com

AFAM271 The Prison State: Race, Law, and Mass Incarceration in U.S. History
This course explores the history and effects of the United States' mass incarceration crisis. The U.S. incarcerates more people than any other country in the world. And people of color make up a highly disproportionate number of the over 2 million individuals incarcerated in the U.S. today. Beginning with slavery and continuing through the rise of prisons, debt peonage, Jim Crow, and the Black Lives Matter movement, the course will explore how efforts to police, detain, and control black bodies have been at the center of U.S. law and legal practice since the nation's founding. At the same time, we will compare and contrast how race, gender, and sexual orientation have been policed, controlled, and shaped through incarceration practices throughout U.S. history.

AFAM272 History of Jazz in American Culture
Jazz, has been a staging ground for working out some of the most defining issues and aspects of American culture. These include the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s-40s, until it was displaced and pushed to the margins by R&B and rock in the 1950s. But it has remained an inspiration for many artists up to the present day, including Kendrick Lamar's jazz-drenched To Pimp A Butterfly and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

This course will provide students with a broad-based literacy in the history of jazz, while examining its significance and impact within American culture. We will explore its early 20th-century origins in New Orleans, its rise as America's popular dance music in the 1920-30s, a shift to a more concert art-oriented form in the 1940s-50 (representing the epitome of cool and hipness), avant garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, as well as new directions from recent generations. We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados, and those interested in the social and cultural dynamics as well as the musical materials.

AFAM275 Feeling Black Feminism
In this course we will explore the connected histories of the "felt life of [B]lack feminism" (Nash 2019) and Black feminist contributions to empowerment movements both inside and outside of the academy. Our class proceeds by reading some of the seminal texts that circulate as theory in US academic Black feminism alongside 20th and 21st century memoirs and poetry to explore how Black feminists articulate the relationship between their politics and the everyday psychic negotiations that comprise moments of rage, anxiety, melancholy, tenderness, joy, etc. This course engages in the study of collective minoritarian affect, feelings, and emotions as well as outlines their relationship to Black women's liberation movements.

AFAM277 Defining Black Repair
Black Reparations is a concept that refers to claims for reparations made by African descendants in the United States as defined in Boris Bittker's (1973) "The Case for Black Reparations." However, the term is not exclusive to the experiences of slavery and other forms of racial violence in the U.S. As demonstrated by reparation activists of the African diaspora, the concept unifies the experiences of all African descendants. In this seminar students will explore both national and regional movements for reparations, primarily in the context of the Caribbean and the U.S. Students will compare the formation of reparatory struggles in both geographies, from post-emancipation to the present, which is instrumental to understanding the concept of Black Reparations. What constitutes Black Reparations? What are the frictions and connections between reparative struggles in the Caribbean and the U.S.? These are the questions that students will be asked to consider throughout the course. Building on scholarship on Black Reparations and reparation policies, students will be asked to design their own proposals for how Middlesex County could implement practices of Black repair.

AFAM278 Race & Slavery in New England
This course examines struggles over black and Native American slavery, freedom, and community formation in New England. We will explore the lived experiences and freedom struggles of people of color from the beginning of European colonization through the national abolition of slavery in 1865. The course, which satisfies the Early AFAM History requirement for the major, will particularly grapple with Wesleyan's and Middletown's complex relationships to slavery and emancipation. As we will learn, slavery and the slave trade played central roles in New England's culture and economy, especially here in Middletown. Like in other New England ports, Middletown merchants made a fortune from the trans-Atlantic slave trade and the plantation economy that supported it, even selling enslaved people of African and Native American descent on Middletown's Main Street. And southern slaveholders were among the first Wesleyan students in the 1830s. At the same time, free African Americans and their allies made Middletown a stop on the Underground Railroad and a center of the antislavery movement, laying the groundwork for Connecticut's eventual abolition of slavery and for high-profile court cases like the Amistad trial. Complicating popular images of the "free North," this course will examine the central roles of slavery and settler colonialism in New England history, while also exploring how the Connecticut River tied Connecticut to regional and even global currents of slavery and antislavery movements.

AFAM279 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

AFAM280 Religion and the Social Construction of Race
In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (a) the intersections of race and religion as a process in which power plays a pivotal role; and (b) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Father Divine, the Nation of Islam, Rastafari, Haitian Vodou, Jonestown, the Christian

White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

AFAM281 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

AFAM282 Mixed in America: Race, Religion, and Memoir
This course examines the history of mixed-race and interfaith identities in America. Using the genre of the memoir as a focusing lens, we will look at the various ways that Americans of mixed heritage have found a place, crafted an identity, and made meaning out of being considered "mixed." How has being multiracial or bi-religious changed in the course of history in this country? What has occasioned these changes, and what patterns can we observe? We will explore questions of racial construction; religious boundary-making; rites of passage; gender, sexuality, and marriage; and some literary and media representations of mixed-heritage people.

AFAM283 Reading Against "The Propaganda of History": Reading W. E. B. Du Bois
This course will introduce students to the major works of the Black intellectual W. E. B. Du Bois (1868-1963), one of the most profound thinkers and prolific writers in American history. While his published writings are legion, Du Bois is perhaps best known for his early collection of essays titled The Souls of Black Folk (originally published by A. C. McClurg and Company of Chicago in 1903). In addition to Souls, we will read across Du Bois's oeuvre in order to reveal the extraordinary profundity and historical evolution of his thought. Readings will include (in order): (i) The Philadelphia Negro (1899); (ii) The Souls of Black Folk (1903); (iii) Black Reconstruction (1935); (iv) Color and Democracy (1945); and (v) The World and Africa (1947).

AFAM284 The Sociology of Reality TV: Race, Colorism, and Xenophobia
The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether responsibility exists on the networks who help create these shows.

AFAM285 Gender and Slavery in the Atlantic World
For most of the 20th century, historians of slavery in the Atlantic world overlooked the critical role of gender in shaping the marketplace, culture, and experience of the institution. Slaveholding and its attendant violence were presumed to be the domain of men. With a tragically limited archive, the popularity of slave narratives such as Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) reveal how the voices and perspectives of men have dominated our understanding of the enslaved experience. Since the 1980s, the work of black feminist historians such as Deborah Gray White's, "Ar'n't I a Woman?: Female Slaves in the Plantation South" (1985) have unpacked the profoundly gendered nature of slavery in colonial America, the United States, and the Caribbean. This course embarks on an exploration of this important intervention. We will engage primary sources to illuminate the voices of enslaved women and debunk some of the historical myths of slavery and slaveholding. We will also visit classic and fresh secondary literature to understand the evolution of the field. Major themes include but are not limited to the Middle Passage experience, gendered violence, fertility, reproduction and motherhood, the Southern Belle archetype and slaveholding mistresses, notions of beauty and purity in black and white, and fugitivity.

AFAM286 Harlem Renaissance Literature
During this course, students will read canonical and popular literary works by early 20th-century African American authors in tandem with the vibrant body of literary criticism that emerged from this cultural moment in order to arrive at a richer understanding of how the early 20th-century African American canon was curated and proliferated. To this end, we will pay special attention to the role of anthologies and literary magazines (such as "The Crisis," "Opportunity," and "Fire!!") in collating an emergent modern African American literary tradition. At the end of this course, students will be familiar with not only the key authors and works of the Harlem Renaissance, but also with the central debates about the direction and uses of African American literature in the early 20th century. These discussions of the uses and selection criteria of the book-form anthology on the one hand, and the serial literary magazine on the other will prepare students for one of the main assignments: curating a new syllabus entry for future versions of this course. The aim of this assignment is to alert students to the politics of knowledge production that determine which texts get taught, anthologized, and studied. Finally, the differing lengths and types of course assignments will require students to learn how to present their ideas across a variety of genres (syllabus proposal, annotated bibliography, research paper, short close-reading paper).

AFAM287 Psychology and the Law
This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature. This course counts as an elective or column 3 breadth course towards the psychology major.

AFAM288Z "Writing Should Do Something": The Essays of James Baldwin
Baldwin's essays, both deeply personal and political, speak of a divided self in a divided country. As a Black man, he saw himself as a problem for America; as a gay man, he was a problem for many; and as a self-described "maverick," he resisted any identification other than "writer." He wrote frankly of hating, and being hated, while insisting that without love and compassion, even for those who hated him, a decent life was unattainable. In this course, we will consider Baldwin as one of the greatest essayists of his century, a social critic who believed that "writing should do something," in the words of a letter he wrote to his brother.

Baldwin began publishing to acclaim in the 1950s; he was a celebrated public figure in the fight for racial equality in the 1960s. By the mid-1970s, however, his complicated relationship both with white liberals and leaders of the Black Power movement diminished his political stature. With the Obama presidency and the emergence of the Black Lives Matter movement, his work experienced a renaissance: almost 30 years after Baldwin's death, Ta-Nehisi Coates acknowledged "The Fire Next Time," published in 1962, as the inspiration for "Between the World and Me."

This is not a theory course, either social or literary. While our supplementary material will place Baldwin's essays within their historical and social context, our focus will be on the narrative nonfiction techniques Baldwin used to such startling and timeless effect. We will read Baldwin's most famous essays, and some that are less well known. Our supplementary readings and viewings will explore his continuing influence, and the influence of Black music on Baldwin.

AFAM289 Eating the Other: Critical Perspectives on Difference and Desire
How does difference (race, class, sex) engender or attenuate desire? How does desire manifest as a wish to commodify, enjoy, or transcend racial difference? In this course we will study difference and desire as terms which inform one another and as sites through which discourses on race, sexuality, and power converge. We will explore these terms in relation to African American literary production, gender and sexuality studies, and film and queer theory. We will also take them up as they emerge as themes in the narrative fiction of James Baldwin and Marci Blackman as well as in essays by bell hooks, Jennifer Nash, Hortense Spillers, Aliyyah Abdur-Rahman, and Audre Lorde, among others. How do these key terms, alone and together, elucidate the contours of Black social and psychic life?

AFAM291 Afro-Asian Intersections in the Americas
This course explores a range of historical, cultural, and political intersections between African and Asian diasporic people in the Americas from the late 19th century to the present. Taking an interdisciplinary approach, we will examine key moments in the history of Afro-Asian encounters in the Americas, including the importation of slave and coolie labor in the 19th century, the formation of anticolonial and antiracist "Third World" movements in the United States and abroad, and the 1992 Los Angeles uprising. We will also study forms of cultural interracialism, from African Americans' mania for kung fu in the 1970s, to interracial buddy films like Rush Hour (1998), to the contemporary fiction of writers such as Patricia Powell and Charles Johnson.

AFAM299 Medicine and Healing in the Black Atlantic
This course examines the ways in which Black people have conceived of health, healing, and the body since 1500. Readings, lectures, and documentary films will focus on historical case studies in Western Africa, South America, the Caribbean, and North America. We will cover topics such as herbal and environmental medicine; the intersections of religion and healing; gendered medical knowledge and labor; medical racism and exploitation; health disparities; and health activism. To help us situate these topics in the lived experiences of historical actors, we will use a variety of primary sources, including narratives of formerly enslaved people, court cases, correspondence, interviews, and print culture. The goal of this course is not simply to show how Black people have used healing practices to endure racism, slavery, imperialism, and racial capitalism: We will also emphasize how medicine and healing have been sources of joy, conflict, knowledge production, and entrepreneurship within Black communities. Lastly, we will consider the present and future of Black health and think about what it would take to make medicine and health care for all.

AFAM300 Black Phoenix Rising: Death and Resurrection of Black Lives
The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racisms and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

AFAM301 Junior Colloquium: Defining African American Studies
Between 1896 and 1914, W.E.B. Du Bois organized an annual conference at Atlanta University devoted to documenting and analyzing the oppressive structural conditions shaping Black life in the United States. Though arguably the genesis of African American studies as a systematic academic endeavor, these sociological conferences also joined a long intellectual tradition that has always exceeded and often resisted the Western academy. This colloquium examines how the African diaspora has generated knowledge both within and beyond the ivory tower -- from cargo holds to quilombos, prisons to abortion clinics, newsrooms to classrooms, from music studios to dancehalls and soundstages. Students will engage closely with several defining texts, methods, movements, and moments concerning Black life in the Americas. Ultimately, we seek possibilities toward defining an African American studies program and praxis that addresses the political, social, intellectual, and epistemic needs of the 21st century.

AFAM303 1492: States of War
This course approaches 1492 as a signifier and time-stamp of modernity. It signifies an ongoing "war" against people of African descent -- one that goes beyond the terrestrial plane. It anchors systems of representation, racialization, colonization, and religion with which we must reckon -- ones that preceded it and that we continue to inherit. The course uses the specific historical frame of 1440 into the late 18th century. This frame holds with reference to Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically" and Sara E. Johnson's notion of "slavery in the plantation Americas as a 'veritable state of war.'" Thus, we will read symptomatic, primary historical documents and fiction about "blood," race, African slavery, and geography and being (including 15th and 16th century Castilian law, sundry genres that represent early Spanish colonial Mexico, Santo Domingo (contemporary Dominican Republic), Cuba, and French Saint Domingue (contemporary Haiti)), as well as contemporary fiction, cinema, and theory that configure historicity via the Caribbean. We will read sometimes for imperial notions of sovereignty, selfhood, force, indigeneity, (anti)blackness, property, labor, and the relation between conceptions of the heavens and "just wars" on earth, and other times for Caribbean notions and narratives that are at war with said Western theological and onto-epistemological schemata. Conceptually, the course thinks from and/or about Caribbean literary studies, black critical theory, demonology, scholasticism, mysticism, the functions and tropes of (anti)blackness in the discursive formation of the New World, Vodou(n) in the Haitian Revolution, colonialism and international law, and deconstruction.

AFAM304 Black Feminist and Trans Theories of the Hu/Man
This seminar provides an introduction to Black feminist and trans theories' interventions into the modern Western category of the human and its violent exclusions. Since their inception, Black feminist and trans theories have brought attention to the violence of what Sylvia Wynter has called our "genres of the human," and in so doing, have laid bare the very preoccupations of power that condemn the non-white, non-cisgender being to sub-Human status and death in the material and discursive economies of racial capitalism. Students will develop broad knowledge of Black feminist and trans theories' provocations regarding the intersecting identity categories that organize our world, and will be encouraged

to develop their own critical approaches that are attentive to the hegemony of racialized gender and its attendant violences.

AFAM305 Lyric Poetry and Music: The Color and Politics of Cry, Sound, and Voice
Lyric poetry may be the most musical of literary forms. In one of its basic definitions, the lyric poem begins after the overhearing of a sound. This sound may be familiar and pleasant, like the timbre and cadence of a lover's voice. Or it may be unrecognizable and terrifying. It may be imbricated with other senses and feelings, provoking a memory that stimulates a sense of touch or smell. Or it may stimulate a sense of horror at the inevitability of death. In any of these cases, sound is thought to reveal an attachment, a memory, and to give rise to composition in the poet's effort to reshape memory and feeling in lyric form. But such articulations do not always come out as evenly as this description may imply. Indeed, moans, screams, stutters, cries, and the madness of possession by the Muses are part of lyric's history and practice. In this course, we will read from African American, African diasporic, Caribbean, Latina/o/x, and Indigenous poetics, and we will consider their relation to myth and musical forms, such as the blues, son, bomba, biguine, jazz, reggae, hip-hop, salsa, among others. The dynamics between lyric speakers and musicians, sound and story, seen and voiced language will play out.

AFAM307 Black Middletown Lives: The Future of Middletown's African American Past
In this service learning course, students will do hands-on history by uncovering, preserving, and sharing Middletown's rich African American past. We will focus on the history of the Beman Triangle. This African American neighborhood, now part of Wesleyan's campus, served as a regional and national antislavery and Underground Railroad center and home to one of the nation's first handful of independent Black churches. Students will partner with local archives, libraries, and museums to help preserve and share this neighborhood's remarkable history. Our projects will include building a website and an exhibit to share this history with the Wesleyan and Middletown communities.

AFAM309 Indentured Spatialities
Inspired by many political and intellectual traditions, such as Caribbean Studies and Black Feminism, Indo-Caribbean scholars, activists, and artists have long grappled with the spatial entanglements of indentureship, slavery, and colonialism both in and beyond the Caribbean (Persadie, 2022; Hosein, 2016; Goesine, 2016). However, this canon of thought and practice needs more visibility. So, in this course, students will explore the spatial identities and experiences of "Indo-Caribbeans," descendants of "Coolie" indentureship, but IN RELATION to Black and Indigenous spatial realities that constitute the Indo-Caribbean. Through guest lectures and formal and informal written assignments, students will engage intellectually and creatively, fostering a deeper understanding of indentured spatialities. This course will require students to ground their contributions in the work of Indo-Caribbean thinkers like Patricia Mohammed and Andil Gosine and the activism of organizations such as the Caribbean Equality Project.

AFAM311 Vitalism and Black Aesthetics
What is the relationship between Black art and Black life? Does Black art, broadly construed, serve a mimetic function-merely re-presenting reality-or is it a vital expression of the essence of Blackness? These questions are at the root of Black Cultural Studies' engagements with the problem of the aesthetic. In the current conjuncture, reacting to the theorization of Black social death, many theorists have (re)turned to the aesthetic as "proof" of the mattering of Black life and "evidence" of a vibrant sociality. This course will consider the connection between (the theorization of) Black aesthetics and (the affirmation of) Black life. In so doing, we will question the political stakes of Black aesthetics, as well as the value placed upon the concept of life as such, in and through the aesthetic encounter. Additionally, we will explore ways of thinking of the aesthetic that challenge presumptions of its innate liveliness. Readings will include canonical texts in aesthetic theory and vitalist philosophy, as well as more contemporary engagements with these questions from the perspective of Black performance theory, literary theory, and Afro-pessimism.

AFAM312 Black Speculative Fictions and the Anthropocene
The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.

AFAM314 The Black Charismatic
In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called "charismatic") black political leadership by attending to Tavis Smiley's yearly "State of the Black Union" address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley's annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley's yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

AFAM315 Black Literary Theory
This course will bring together readings both literary and critical/theoretical, beginning with Frantz Fanon's "Black Skin, White Masks" (1952). Taking Fanon as its point of departure, then, this course will necessarily turn to a discussion of the recent discourse on Afro-pessimism and Black optimism, attempting to introduce students to important issues and questions of race, race relations, anti-Black racism, Black sociality, the universality of whiteness and white supremacy, the fungibility of the Black body, and the vulnerability and precarity of Black life; and together we will think more closely about how the complex and "unthinkable" histories and afterlives of chattel slavery, racial capitalism, settler colonialism, and the Middle Passage, for examples, continue to challenge the representational limits and potentialities of traditional literary genres and modes of emplotment. In addition to Fanon, authors will include Orlando Patterson, Toni Morrison, Hortense Spillers, Saidiya Hartman, Achille Mbembe, Frank Wilderson, Jared Sexton, Fred Moten, and others.

AFAM316 Carceral Connecticut: Middletown Stories of Race and Redevelopment
In the 1970s, during nationwide "urban renewal" or Redevelopment, the city of Middletown demolished an entire African American neighborhood to make parking lots and Route 9 on-ramps. Called the South End, this neighborhood had been Middletown's Black business and community center for decades. Why did city officials see this neighborhood as disposable and its residents as displaceable? When, why, and how did this Black neighborhood form, and how did its residents experience, respond to, and navigate the displacement of urban renewal? What can this lost neighborhood--less than half a mile from Wesleyan University's campus--teach us about the history of race, inequality, housing, carcerality, segregation, and Black community and community resilience and resistance in the 20th century, and what lessons can this history teach us today?

In this Community-Engaged Learning course, you will not only read assigned primary and secondary sources. You will also conduct your own archival research and interview former South End residents to record, preserve, and share the largely undocumented history of this neighborhood and its legacies.

Although this course is entitled Carceral Connecticut and is one of the courses associated with the Carceral Connecticut Project (carceralconnecticut.com), of which Prof. Nasta is one of four Wesleyan faculty investigators, we will not focus primarily on prisons or incarceration. Rather, we will explore carcerality as a broader set of practices and policies that have structured the world--including 20th-century Middletown--in ways that reinforce racism and racial inequality, including policing, segregation, and displacement. At the same time, we will pay equal attention to how Middletown's Black community has created institutions and neighborhoods that have resisted and responded to displacement, containment, and other carceral practices.

AFAM317 Black Connecticut Revolutionaries: Making Freedom in Revolutionary-Era New England
What did the American Revolution mean to people of African descent, in Connecticut and throughout North America? More than you might think. Enslaved people seized upon the war to strike for freedom, some fighting with the colonists and others siding with the British in hopes of emancipation. Here in Connecticut, where several thousand people of African descent remained enslaved at the revolution's outbreak in 1775, hundreds fought for freedom by joining the Continental Army, escaping, or purchasing their freedom. In the aftermath, they forged New England's first free Black churches, antislavery movements, and communities, including the Beman Triangle here in Middletown. In this course, you will read a range of primary and secondary sources by and about Connecticut's earliest enslaved and free Black communities. As the nation marks the 250th anniversary of the American Revolution this year, we will reflect on the meanings of freedom in a nation built on slavery, and the role of Black Americans as freedom and democracy's champions since the nation's founding. For your final project, you will use local archival and secondary sources to reconstruct and share the life stories of early enslaved and free Black Middletown residents, drawing on sources at the Middlesex County Historical Society, Wesleyan University's Special Collections & Archives, and digitized documents. The ability to read 18th-century handwriting is helpful but not required, but an interest in "doing history" through archival exploration and discovery is important.

AFAM320 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

AFAM322 Black Girl Magic?: Survival and Speculative Fiction in the Social World
"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag -- cisgender, well-to-do, fit/thin, non-disabled, and/or famous -- and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/quare studies, popular culture, political science, speculative fiction, and cultural sociology.

AFAM323 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.

AFAM324 Black Power and the Modern Narrative of Slavery
The historical moment immediately after the Civil Rights and Black Power movements saw an explosion of African American writing about slavery. In the past half-century, black writers wrote award-winning novels that gave unprecedented attention to the intricacies of the life of people who are enslaved and to slavery as a system that they suggested could help us better understand late-20th-century American culture. We will read some of the most important works written by contemporary African American writers to see how and why they transformed the first autobiographical form for black writers--the slave narrative--into a fictional form that has served them as they dissect their own cultural moment.

AFAM325 Blackness and Affect
Critical theory and the humanities are in the throes of what has been termed "the affective turn," wherein scholars theorize affect--broadly construed as social feeling or bodily intensity--as central to understanding (post/human) relationality, the social, ethics, and the political. Haunting this field of inquiry is a series of questions: Can a turn to affect account for the figure of the Slave? Can an embrace of affectivity, as potential, bring Blackness into the realm of our understanding "without trying to fill in the void" (Hartman)? Rather than conceptualizing affect as the connective thread between bodies and worlds, or as a purely relational force, how might we think about affect and non-relationality; affect outside of and against the world; affect without the body? This seminar will engage these, and related, questions through extended explorations of the relationship between affect theory and Blackness. Readings will include: Frantz Fanon, Lauren Berlant, Brian Massumi, Sarah Ahmed, Rizvana Bradley, Xine Yao, Sianne Ngai, and Darieck Scott, among others.

AFAM326 Litanies for Survival, Plots for Revolution
This seminar centers black-feminist and queer-of-color theory, literature, and art from the 1970s to the present in order to interrogate and reimagine revolution and revolutionary praxes. We will examine the interrelatedness of art and activism, hope and despair, collaboration and erotics. Key questions include: How does "survival" put pressure on "revolution," and vice versa, particularly

in light of contemporary and imminent catastrophes, local and planetary? How does a joint consideration of survival and revolution affect interpretations of the past, understandings of the present, and imaginings of the future? What political work might intellectual and creative labor perform? Is revolution an event, a practice, or both? A useful term or a ruse?

This seminar is offered in conjunction with the Center for the Humanities' Fall 2018-Spring 2019 theme, "Revolutions: Material Forms, Mobile Futures." Assigned readings will include the work of scholars participating in the Center's Monday night lecture series, and students will be required to attend several lectures over the course of the semester.

AFAM327 Biopolitics, Blackness and Spirit Baptism: The Birth of American Pentecostalism
American Pentecostalism is a conservative, Protestant, Evangelical revival movement that emerges in and through Black practices that constitute an exclusion in the racialized religious, social, cultural, and political formations of early 20th-century United States. Rather than examining Pentecostalism through a single lens called "religion," this course will use the themes of Biopolitics and Blackness to examine Pentecostalism through its most commonly known feature--an experience called the baptism of the Holy Spirit. Pentecostals were narrated in popular and critical accounts in the late 19th and early 20th century as exhibiting criminality, insanity, and raced, gendered, and sexed Black pathology. These marks of abnormality were all part of a formation of power in America known as biopolitics. As an idea, biopolitics is popularized by French historian/philosopher Michel Foucault. Foucault's concept attempts to explain how different intellectual and professional disciplines emerge in nations during the late 19th and early 20th centuries to best create a thriving population, which could be made to live. The power of the nation-state had traditionally been expressed in and through the power to kill. As a revival movement, Pentecostalism rehearses these themes, as early adherents fight over what it means to be made alive when racial Blackness is almost often seen as a mark of and for death. The course will study original accounts and sources from the historical period, read critical, interpretive accounts, and use a variety of media. All resources will be provided in class or via Moodle.

AFAM328 The Black Soul: DuBois and the Practice and Grammar of Religion
W.E.B. DuBois is a foreparent in modern sociology, history, poetics, and aesthetics. DuBois was no less formidable and foundational for understanding religion in general, and Black religions in particular. This course seeks to read several of the great works of DuBois, interpreting them in light of their relevance for the study of religion. The course will also give extensive consideration to how DuBois both studied and used religious grammar and practices to build his intellectual program. The course will examine DuBois's impact on the study of religion globally in the aftermath of his work. DuBois's works will be considered, along with interpretations from Edward Blum, Hazel Carby, David Chidester, Gary Dorrien, Cheryl Sanders, Theodore Vial, Stephanie Shaw, Victor Anderson, and Rebecka Rutledge Fisher.

AFAM329 Race and Reproduction
This interdisciplinary course explores the intimacy of race and reproduction against the backdrop of capitalist modernity. We scrutinize the policies, priorities, and perversions of slave owners, the racially differentiated family planning programs under apartheid, the eugenicist movements and the criminalization of poverty in the United States to interrogate what is generated by the incapacitation of blackness across scales of time and space. We examine the Marxist feminist elaboration of the concept of social reproduction and then consider black feminist rejoinders that center the reproductive labor of black women -- as slaves, as domestic workers -- that implicate violence and ownership in the mediation of biological and social reproduction as a set of racializing practices in which value is generated, accumulated, and expropriated. Finally, the course considers the proliferation of assisted reproductive technology (ART) in the 20th century, the recourse to surrogacy, and family abolition to interrogate the extent to which the "race-reproduction bind" is disaggregated or reanimated in the present.

AFAM331 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

AFAM335 Fugitives and Freedman: The Politics of Slavery in the Civil War Era
The actions of fugitive slaves and newly-freed people turned the crisis of American union into a war for emancipation. Questions of slavery's expansion, permanence, and end dominated the political discourse of the United States from 1848 through 1877. This course will examine the ways in which political actors, especially African Americans, kept the twin issues of slavery and emancipation in the public sphere to restructure American society in the middle of the 19th century.

AFAM336 Black Texts, Lost and Found
This course examines histories of loss and recovery of black texts in the US and the Atlantic world more broadly. We will bring a three-pronged approach to our subject matter. We will analyze first the constitutive silences of the archive: epistemic and material neglect, or what Michel Trouillot has termed the "silencing of the past"; second, the preservation efforts of black newspaper editors, librarians, and bibliophiles; and third, the "counter-archiving" work of Afro-diasporic historical and speculative fiction. As we traverse different periods and empires we will consider what the concepts of the "black archive" and "black ephemera" mean to different disciplines. We will study the repressions of black Arabic writing practices in the US South and our fragmentary recovery of them in the late 20th century, unfinished novels about Black Atlantic revolutions such as Martin Delany's "Blake," incomplete runs of historic black newspapers, debates about the illusions and desires of "recovery," and the criteria that determine what counts as ephemeral and when.

We will move across different media, from print--"I, Tituba," "M Archive," "Blake," "(Dis)forming the American Canon: African-Arabic Slave Narratives and the Vernacular"--to films--"The Watermelon Woman," "Looking for Langston," "The Last Angel of History"--and from digitized databases of photographs at the ongoing archiving project The Missing Chapter: Black Chronicles to digitized newspaper archives.

AFAM343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations
The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

AFAM344 The Haitian Revolution Beyond Borders
In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti's neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti's founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti's long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

AFAM346 America's First Civil Rights Movement: Black Activism in the U.S. from the Founding to Reconstructio
Historians long described free African Americans in the early United States as occupying an "in-between" legal status, neither enslaved property nor entirely legal persons. This class would explore how free Black people rejected that status, seeking liberation, protection, and equality in the early United States. In so doing, they participated in, and meaningfully shaped, debates over the contours and privileges of American citizenship. Through this subject lens, students will be introduced to the methods of political, social, and legal history, and will have the chance to use contemporary social theories on activism, inclusion, and liberation as a critical lens.

AFAM347 Black Grammars
In her text In the Wake: On Blackness and Being, Christina Sharpe argues that Blackness, due its rearrangement of and resistance to hegemonic modes of meaning making, is "anagrammatical." As a concept, anagrammatical Blackness points to "the failure of words and concepts to hold in and on Black flesh." Taking this provocation as a point of departure, this course will consider the relationship between Blackness and the grammatical, with a particular focus on rhetoric and poetics. Each week will focus on a particular rhetorical figure or grammatical concept: subject, metaphor, metonymy, apostrophe, tense, irony, catachresis, parataxis, etc., considering how Blackness shifts our understandings of their operations. Readings will include Ronald Judy, Barbara Johnson, Jacques Derrida, Zakiyyah Iman Jackson, Fred Moten, and Paul de Man, among others.

AFAM348 The Problem of the Negro as a Problem for Thought
Philosophical inquiries into the "the Negro problem" -- the question of what blackness is and how we socially reckon with its existence -- have historically flourished outside of the academic mainstream, weaving through a myriad of forms -- art, criticism, sociology, autobiography, oral traditions, etc. -- that are typically not counted as philosophy. This class will challenge our assumptions about where good and rigorous philosophy happens by attempting to track the metaphilosophical challenges that the study of blackness produces. We will read a survey of black studies texts from writers including Nahum Chandler, Marquis Bey, Christina Sharpe, and Fred Moten.

AFAM350 The Law, the Citizen, and the Literary and Cinematic Imaginations
What gives the law its authority? (Can it remember?) Does it have rational or mystical foundations? What are the functions of the categories of slave, savage, scapegoat, stranger, other, family, and citizen in and for the law? How do we apprehend the relationship between the extensively legalized violations of the earth, the black, and the feminine? What gives the ongoing event of the Middle Passage so much force, and on a planetary scale? If laws of hospitality are sacred, then what are the implications of their prolific sacrilege? And what, for we can trace it, do such laws' selective "application" have buried within them? This course will attune us to who/what may be incorporated into the body politic and who/what cannot be borne in the letter, by design, and on safeguarded, terrorizing terms -- legal, historical, and metaphysical, yes, and harboring those, ontological. We will read and analyze how literary and cinematic texts represent, critique, as well as reproduce the rhetorical and psychic effects of the law.
To echo Calvin Warren, "[Our] concern is not a particular law, but that all the laws are subordinate to a Law." Thus, while we will look at the language and aesthetic configurations of specific legal events and echoes -- the Zong Case, partus sequitir ventrem, Jim Crow, Nuremberg Laws, The Code of Native Status (in French-occupied Algeria), and so on -- we will not do so "comparatively" nor to inadvertently idolize encoded violence, but to apprehend what is buried and stirs beneath the law's foundations.

AFAM351 Queer of Color Critique
This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

AFAM352 Black Thought and Critical Theory
This course follows Stuart Hall's insistence in "What is this 'Black' in Black Popular Culture?" that the theoretical articulations of "blackness" are always "conjunctural." We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of "blackness" at specific historical and theoretical conjunctions. How is "blackness" useful for social theory? Must we assume there is a transhistorical identity to "blackness"? In what ways does "blackness" conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

AFAM353 Blackness in the Anthropocene
To deny the "unprecedented" geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this "new era" has afforded us in terms of critical potential. From accusations that what we now call the "Anthropocene" has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the "Anthropocene" are still contested terrains. The aim of this course is to investigate the Anthropecene's many forms of socio-political erasures and theoretical "blind-sights." We will examine the ways in which Anthropocenean discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocenean times. We will explore questions like "who are 'recognizable/legitimate' victims in environmental disasters," "do events like hurricane Katrina or the migration crisis teach us anything about our human condition," and "what is the 'post' in post-humanism." We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

AFAM354 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments
This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from

empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Truillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

AFAM355 Slavery and the American Legal System
This class will uncover the deep, foundational relationships between American slavery and the nation's legal, constitutional, and judicial traditions. It will, in turn, consider the historical and structural tensions between democratic state-building and the social, economic, and security imperatives of a slave society. It will begin with a historical analysis of how, starting in the seventeenth-century British empire, slaveholder sought to shape the construction of what would become the foundations of American law. After considering the historical foundations of American slavery, the class will turn toward an examination of how slavery's legal foundations shaped American legal, constitutional, and jurisprudential practices after its abolition. Students will complete final projects that work to uncover the extent of slavery's continued presence in the precedents and traditions that shape the modern American judiciary.

AFAM358 Fugitive Perspectives on Education and Civil Society
In 1946, the African American novelist Ann Petry imagined what a white schoolteacher might think about working with black students in Harlem, New York: "Working in this school was like being in a jungle. It was filled with the smell of the jungle, she thought: tainted food, rank, unwashed bodies." Petry had herself worked in Harlem schools. She also held credentials from well-heeled white schools in Connecticut. Despite her own academic success, she questioned the inherent value of schools that regarded black children as if they were untamed savages. Challenging prevailing narratives of excellence and achievement, this course examines fugitive perspectives of black, Indigenous, LBGTQ, and poor folks who resisted compulsory schooling and avoided conscription into so-called civilized society. If, as historian Michael B. Katz has argued, US schools "are imperial institutions designed to civilize the natives; they exist to do something to poor children, especially, now, children who are black or brown," then why should any self-respecting black or brown child endure such schooling? What might so-called truants, illiterates, failures, burnouts, dropouts, and delinquents teach us about education and civil society? The history of education, however, has largely been interpreted from a biased perspective--namely, those who have been successfully schooled. We will therefore search for contrary voices in fragments of oral culture, ranging from slave narratives to folktales and recorded music. Contemporary scholarship will inform our analysis. Interdisciplinary scholars such as James Scott, Eric Hobsbawm, Tera Hunter, Saidiya Hartman, Lisa Brooks, and Audra Simpson will illustrate how to read against the grain and unearth hidden transcripts from classic authors such as W.E.B. Du Bois, Carter G. Woodson, Anna Julia Cooper, and Gertrude Simmons Bonin.

AFAM369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire's A Tempest (1969), a bold postcolonial adaptation of Shakespeare's Tempest, to Winsome Pinnock's Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

AFAM371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

AFAM372 Negativity in Black Critical Thought
Lack, nothingness, negation, the void, the abyssal, absence, wretchedness these and other corollary terms are omnipresent grammars within Black critical thought's attempts to explicate the singularity of Blackness. Conversant with philosophical genealogies of pessimism, nihilism, and negativity, this course will examine various theorizations of the relationship between Blackness and the negative. Rather than framing negativity as essentially apolitical or unproductive, this course will consider what a fidelity to the negative portends for questions of Black politics, Black theorizing, and revolutionary action. In so doing we will pay particular attention to questions of affect, gender, sexuality, aesthetics, and psycho-politics.

AFAM375 Black Global Cities
In this course, we will analyze representations of cities and Black urban modernity in Afro- diasporic literature of the twentieth and twenty-first century. Placing special emphasis on the global hubs of London, Cape Town, Kinshasa Lagos, New York, Marseilles, and Kingston, we will ask what makes these former imperial sites Black global cities? We will read literary works on and from Black Global Cities alongside sociological texts on urbanization, globalization and discuss the extent to which literary representations either collude with or challenge dominant national and transnational narratives about Black urban modernity. Although each week's readings will focus on a different location, we will approach these locales as nodes in larger global networks of people, texts, and goods rather than as discreet, bounded places. To this end, we will trace how histories of racial formation move across borders and are transposed onto different spaces, and to what effect. Authors we will read include: Claude McKay, James Baldwin, Gabeba Baderoon, Petina Gappah, Kei Miller, and Teju Cole. We will also watch films such as Girlhood (2014), Black Panther (2018), The Harder They Come (1972), Bad Friday: Rastafari After Coral Gardens (2011), Welcome to Nollywood (2007).

AFAM379 The Fire Next Time: The Modern Black Freedom Struggle
The Fire Next Time explores the spectrum of African American politics in the mid-20th century United States. It will examine not only the nonviolent social movement against the Jim Crow South but will scrutinize expanding notions of black militancy against racial oppression in modern America. We will complete and discuss readings on the "short" and "long" civil rights movements; the position of women in movements for black equality; the leadership of Martin Luther King, Jr. and Malcolm X; the work of civil rights activists in the urban North; and the movement for Black Power. This course seeks to provide students with an understanding of the major themes and contexts of the most important social movement of the 20th-century United States.

AFAM387 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

AFAM391 Unsovereign Elements, Caribbean Poetics
This course aims to study and question sovereignty, begin to theorize "unsovereignty," and stake out what may be meant by "anticolonial imagination" in literary and other aesthetic forms, as well in the theories of history that it arranges under its name, "Unsovereign, Caribbean." Unsovereignty and the anticolonial will not be imagined as exact and liberated opposites of sovereignty and colonialism, but rather as epistemically and linguistically entangled therewith, and inviting further thought from Afro-Caribbean historical and deconstructive vantages. By reading richly symptomatic, primary, historical documents about race, geography, and slavery in San Domingue/Santo Domingo, as well as contemporary fiction, art, and criticism that re-narrate and theorize Caribbean history, we will focus on the historical frame of ~1492 into the 19th century. This frame holds with specific reference to Sara E. Johnson's notion of a foundational "state of war" against black people in the Americas and Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically." The 19th century will be studied comparatively, and not as the era of heralded "emancipation," but of abduction, re-enslavement, "travestied freedom" (Hartman), anti-emancipation (Eller), and white psychosis. We will read sometimes for imperial notions of sovereignty, force, race, property, and labor, and other times for Caribbean notions and narratives that are sometimes at war with and sometimes in bed with said

imperial schema and this episteme. In the face of some contemporary critical theoretical tendencies to use terms like "fugitivity," "resistance," "freedom," "abolition," "the commons," etc., as ones that are equally at stake for all, or that signify one shared known, fixed, and agreed-upon meaning, we will, rather (and especially), attend to the historical specificity and signifying work of marronage in the Caribbean region and the complex tropology of unsovereignty and "unruliness" in the Caribbean. Conceptually, the course thinks from and about Caribbean studies, Black critical theory, Black studies, Enlightenment thought, and Deconstruction. Students who want to nerd-out on critical theory, history, and Caribbean aesthetics are encouraged to apply.

We will study digitized versions of imperial naval and commercial maps held at the John Carter Brown Library, Archivo de Indias, and in other archives, as well as primary texts of different genres (e.g., pilotes, ledgers, letters, legal documents), including the writing and thinking of Christopher Columbus, Moreau de Saint Mery, Baudry des Lozieres, María de las Mercedes Santa Cruz, Immanuel Kant, and G.W.F. Hegel. We will also read selections from some of the following scholars, artists, writers: Colin Dayan, Sara E. Johnson, Evelynne Trouillot, Jacques Derrida, Robin Derby, Maryse Conde, Alejo Carpentier, Demetrius Eudell, Anne Eller, Dixa Ramírez D'Oleo, Ronald Mendoza de Jesús, Frank Wilderson III, Walter Benjamin, Gayatri Spivak, Aimé Césaire, Beatriz Santiago Munoz, Joiri Minaya, Jean Rhys, and others.

AFAM392 Black Grief Geographies
This course introduces students to literature and practices centered on post-slavery and post-colonial bereavement. Employing an interdisciplinary framework of Black Geography, Feminist geography, and post-colonial thought, students will examine the spatial orientations of Black grief and mourning. Here students will also evaluate the connections and frictions between queries on emotional geographies and Black grief. What are the affective and material forces of Black grief and mourning, and do they vary by place? How can we read Black grief and mourning beyond narratives of dispossession? What are the human and non-human assemblages that constitute Black grief and mourning? Is it possible to repair infrastructures that mark Black death? This course invites students to meditate on the above questions as well as to apply Black framings on grief to their own research by developing a 15-page visual essay or a 30-minute in-class lecture that draws on any of these questions.

AFAM393 The Library: Its Past, Present, and Future
The library is both a repository and a site for disciplining information. It is, at once, a space for democratizing knowledge and a locus of exclusion. A lifeline and a tomb. A place of radicalization and community, but also the handmaiden of state power. Indeed, the library's vexed role in the history of Western colonization has prompted scholars of African and postcolonial literature like Simon Gikandi to ask whether one can be a revolutionary in the library. This question has shaped the archiving sensibilities of African American collectors and librarians like Arthur Schomburg and Dorothy Porter Wesley as well as those of contemporary Black librarians and artists. This will be one of the central questions we explore in this course, too. We will examine artistic and literary representations of libraries, archives, and museums ("The Library of Babel," The Shadow Book, Lote, The Name of the Rose, Voyage of the Sable Venus, Yinka Shonibare's "The British Museum"), paying special attention to the fantasies, nightmares, and cultural narratives that cohere around the idea of the library. We will pay special attention to the place of the library in the Black literary imagination and to the theoretical and political interventions that Black librarians and bibliophiles brought into systems for categorizing and recovering knowledge.

AFAM394 Afrofuturist Cinema
In Space is the Place, jazz musician and cosmic philosopher Sun Ra states that "the first thing to do is to consider time as officially ended. We work on the other side of time." Afrofuturist narratives tend to unfold in this inverted time, or "after the end of the world." In this class, we will begin our research in the loop of Sun Ra's speculative refrain. We will examine cinematic depictions of hauntings, dystopias, aliens, the surreal, and space travel. We will discuss works by Anisia Uzeyman, Ryan Coogler, Wanuri Kahui, Ngozi Onwurah, Terrance Nance, Jordan Peele, Mati Diop and more.
Offering: **Crosslisting**

Prereq: **FILM304 OR FILM307**

AFAM395 Black American Cinema
What is Black Cinema? Is it, as Tommy Lott has claimed, a critical form of filmmaking that resists the "Hollywood master narrative"? Or, as Michael Gillespie claims, does it elaborate Black visual and expressive culture without any pressuposed commitment to a "real" Black lifeworld? While these are critical questions that we will encounter in this class, we will not attempt to answer them. The class surveys a wide range of films to tell a conceptual story about the complex relationship between Blackness and cinema. We will discuss works by filmmakers such as Melvin Van Peebles, Oscar Micheaux, Spencer Williams, Kathleen Collins, Charles Burnett, Julie Dash, Ayoka Chenzira, and more.

AFAM396 Jazz Orchestra I
This course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.

ALLBRITTON CENTER FOR THE STUDY OF PUBLIC LIFE

The Allbritton Center for the Study of Public Life continues Wesleyan's commitment to preparing students for lives as active citizens and for leadership. It seeks to support Wesleyan's tradition of the scholar-teacher by encouraging faculty research in a manner that directly benefits and enhances student learning. The center reflects changes that have transpired across the social-scientific disciplines. These include the creation of new multidisciplinary ventures, the growing number of studies employing multiple methodologies, and the rethinking of the idea of the public in a variety of intellectual and social movements. In addition, university-based intellectuals have been rethinking their connection to the greater public and, consequently, are forging knowledge-seeking alliances with innovators and leaders in government and the corporate world. Social scientists are developing innovative and productive relationships with other sectors of the public, including artists, grassroots activists, and independent scholars. Our students are energized and excited by these developments. The center enables Wesleyan to focus resources; encourage curricular innovation, new research, and scholarship; and foster greater public understanding and responsibility.

CSPL115F Diffusion of Innovation (FYS)
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

CSPL116F Good Books on Bad Wars (FYS)
This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

CSPL120 Civic and Community Engagement Practice
Wesleyan has a long tradition of supporting student civic engagement. CSPL 120 plays a critical role in helping continue this tradition. This quarter credit experience provides space for students to build community with peers, faculty, staff, and community partners while bolstering their civic and content knowledge (around issues related to education, mass incarceration, sustainability, and the arts), and skill development. (more about the course's learning objectives here: https://engageduniversity.blogs.wesleyan.edu/2023/02/06/cspl-120-quarter-credit-course/). All student interested in enrolling in CSPL 120 must request permission of instruction to and complete the CSPL 120 Enrollment form found here: https://forms.gle/PdJHmh3sFV45owvK8 This course may be repeated for credit.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL123 Organizations in Society: Case Studies
Organizations in Society (OIS) examines organizational forms designed to produce and deliver goods and services, commonly called "businesses." OIS will examine all types of such institutions including for-profits, nonprofits, civic associations, membership organizations, and others, and examine their relationship to the world at large.

This case study course aims to introduce students to how alumni practitioners, in a range of industries, deal with common business issues revolving around the current semester's theme. The fall 2023 theme is expected to be "Beauty," and the spring 2024 theme will likely be "Transformation." Future semester themes will be chosen and announced later.

The objective is to eliminate the artificial divide between academic and professional practices, and enable students to better understand how liberal arts is the foundation of all business careers. Students will have weekly readings that draw on multiple divisions spanning all three academic divisions. Note: this course may be repeated for credit one time (i.e., total of two enrollments).

CSPL127 Introduction to Financial Accounting
In this course, no prior accounting knowledge is required or assumed. Students learn how accountants define assets, liabilities, revenues, and expenses and

where those items appear in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting choices allowed to firms for reporting to stockholders and creditors and learn how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Later assignments focus on ratio analysis of actual firms' financial statements, including techniques to identify firms in financial trouble.
Offering: **Crosslisting**
Grading: **A-F**

CSPL128 Introduction to Human Rights Standards
The course provides an introduction to the philosophical, legal and practice bases of human rights. Sessions will consider the norms, treaties, and other international instruments, oversight institutions, and political dimensions of human rights. This course serves as a mandatory pre-requisite for both the Human Rights Advocacy Seminar and the Human Rights Advocacy Minor, and is open to all Wesleyan students.

CSPL130 Frontiers of Leadership
Frontiers of Leadership will focus on the basic principles of personal and interpersonal leadership that can be used in any life arena. The course will explore variables that affect productivity, effectiveness, and efficiency, and a variety of interpersonal skill sets. Emphasis will be placed on vision, decision-making, time management, career development, team building, conflict, ethics, identity, communication skills, and diversity issues. In addition, we will explore a variety of other topics including developing students' personal leadership styles. Classroom teaching methods will include class discussion, group exercises, videos, oral presentations, written assignments, and a group project. By the end of the course, students will have increased their personal and interpersonal awareness, sharpened their analytical skills, and gained a greater understanding of the complex issues facing today's leaders. This quarter-credit course will take place over eight weeks and will meet on a weekly basis.

Prereq: **None**

CSPL135 Mindfulness
During this course, students will be introduced to various techniques of mindfulness practice and awareness, including sitting meditation and yoga. These modalities are designed to aid in stress and anxiety reduction and, when practiced diligently, may also offer opportunities for greater self-awareness and personal development. The goal is to give students not only a peer community but also a contemplative and metacognative toolbox that is portable, replicable, and sustainable. Students will gain an understanding of the roles these practices can play in leading a happier, healthier, and more fulfilling life.

CSPL140F Thinking with Things (FYS)
This course explores the ways in which we think and act in relation to things. At times provocations for thought, at times emotional companions or functional collaborators, things are not only symbolic carriers of the values and meanings that we assign, but are also actors with agency and subjectivity. We critically consider the implications of this and the role of things in a variety of contexts from the historical to the emotional to the sociocultural to the sacred. The course considers how we make, use, and consume things and how, in turn, things make, use, and consume us. Transdisciplinary in its orientation, this course draws insight from anthropology, cultural studies, philosophy, material studies, art, and design. We will examine a number of projects dealing with objects and these will serve as inspirational, theoretical, and methodological models for the projects students will develop over the course of the semester.

CSPL150 Demystifying Finance
Finance is a widely spoken language, be it in newspapers, nonprofit boardrooms, investment banking, or personal finance. It sounds complicated, but many of the concepts are easily graspable. In this class, we will be exploring the following questions: What is finance? How do companies make money? What do "equity" and "debt" mean, and how do companies use them? What do investment banks actually do? What makes companies increase or decrease in value, and what determines the price of stocks? This course is designed to be a basic introductory course, and no prior knowledge of financial concepts is required. Guest lecturers will help bring financial concepts to life. Please submit a short (max two paragraphs) email to amartin@wesleyan.edu describing any

background you may have (none required) in finance and stating your reasons for wanting to take the course. Please note that priority is given to first years and sophomores.

CSPL184 Let's Talk: Civil Disagreement and Dialogue
This class is designed to help students improve their communication and dialogue skills through character development. We will consider ways to build community and trust in order to productively engage in and facilitate difficult conversations across political and social differences. Rooted in a philosophical framework for the study of values and virtue, we will reflect upon and incorporate the moral and intellectual features of good dialogues into our everyday lives. Our goal is to become the sort of people who can communicate effectively across differences in careful, constructive, open dialogues aimed at truth and justice.

CSPL185F Reasonable Disagreements: Science, Philosophy, Magic, & Society (FYS)
Much of contemporary social and political discourse revolves around science--with many assuming that science is rational, objective, true, and the ultimate source of knowledge. As a result, it would seem unreasonable to believe in things like astrology, magic, alchemy, and other non-scientific ideals, or even to suggest that science might not be as objective, rational, or true as we might think. In this class we will explore different historical and philosophical approaches to distinguishing "legitimate" forms of inquiry and knowledge, considering the ways that our contemporary perspectives on science have been shaped by a long history of philosophy, "natural" philosophy, magic, theology, and "pseudosciences." We will investigate issues and concepts within and about science, including topics such as the nature of theories, the nature of scientific progress, and the relations among science, values, and society.

CSPL187 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.

CSPL200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

CSPL202 Introduction to Design Thinking: Liberal Arts to Epic Challenges
Human-centered design or design thinking taps the creativity and diversity of a team to develop solutions to complex problems, following careful observation to gain the human perspective of a problem. Increasingly, this methodology is at the center of innovative practices in business, nonprofits, and governments. It can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. Many of the disciplines that comprise the liberal arts education are valued sources of perspective and ideas contributing to solutions.

The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then encouraging diverse imaginations to create rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. Although the methodology is called "design thinking," the approach is used in designing experiences, services, and organizations, as well as objects. No design background is required.

The class sessions will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with faculty members from other disciplines and designers who have worked on significant engagements for social change. Design thinking can be a purposeful link to the application of other disciplines to real-world problems, including anthropology, and behavioral economics.

An optional field trip is planned to work through a problem in the IBM Design Studio in New York City.

CSPL205F Success and Failure (FYS)
Students who get into colleges like Wesleyan are typically high achievers who are planning for successful futures. But success and failure are highly subjective concepts and often reflect unconscious beliefs about personal identities, what is expected of us by families, peers, and cultures, and our perceptions, right or wrong, of different occupations. Some of our most firmly rooted concepts of success and failure are based on where we come from, what our parents do, their level of education, and what our peers choose to pursue. Society also sends us strong messages about our identities, including gender, race, religion, and socioeconomic status. What is particularly tricky is understanding what identities and cultural influences may motivate us at any given time. While rooted in developmental psychology, this course will take an interdisciplinary approach to help students define success and failure for themselves, drawing from organizational behavior, sociology, American studies, education studies, film and more. We will ask: What does American culture tell us about the definitions of success and failure? Are those definitions changing in today's dynamic economic environment? Is it inevitable to feel anxious and overwhelmed? What is the role of luck and merit in success and failure? How important is it to find meaning and purpose in work? Can you flourish in life if you don't? What is the role of work in a life worth living?

CSPL206 Group Psychology in Politics: Local, State, and National Perspectives
This course is an introduction to the use of group dynamics to understand the deep personal and systems-level issues at play in the body politic. This framework is applicable at the local, state, national, and international levels. Often, if not most of the time, these issues play an outsized role in any public policy initiative, debate, vote, action, deliberation, and discourse--though they are rarely acknowledged. This class will examine group dynamics as it is practiced in the field of organizational development (OD), a branch of organizational psychology used to implement cultural changes across social systems. The application of OD to politics is not widespread, but its tools are useful in understanding the dynamics in political situations and in the understanding of how power is exercised. The course will introduce concepts in open systems theory and will introduce three models to "hold the data" in our case studies: the Burke-Litwin Model, BART, and GRPI.

CSPL208 Experiments in Public Life: Creating and Presenting Socially Conscious Music
This course will revolve around examining and participating in this realm of music-making through different lenses. We will examine varied relationships a creator can have to the issue/stance to which the art relates, varied ways the art can be presented, varied ways of identifying and reaching different target audiences, and varied potential outcomes. Students will create work in response to a diverse set of prompts designed both to refine their individual goals of artistic and community engagement and to challenge them to create outside of those zones. In addition to individual and collaborative creative work, there will be readings and listening assignments encompassing a genre-diverse array of music (ranging from Olivier Messiaen to Charles Mingus to Nina Simone to Public Enemy, to name just a few) accompanied by some brief reflective writing assignments. Work created in the course will be shared with the community (defined multifacetedly) in a variety of ways online and in person, with the students bearing much of that organizational and curatorial responsibility.

CSPL209 Experiments in Public Life: Introduction to Effective Local Political Action
This course serves as an introduction to local political engagement. With a focus on the City of Middletown as a key case study, students will learn how they can "think global, act local" on political issues that they care about. The course will begin by studying theories about how political power is organized and exercised, and we will learn how well these theories explain how policy is made and implemented in local communities. We will study how local government works and how non-governmental actors, such as grassroots organizations and the business community, are involved in making change.

Members of this class will not just study how politics works in theory, we will learn how it operates in real life in our city. We will participate in city meetings, meet with local officials and advocates, and learn how regular citizens -- even university students -- can become effective political actors in their communities. Throughout the semester each student will research a local political issue that they care about, and by the end of the semester they will contribute a positive case study to a public-facing "Positive Local Action" website that we will be developing as a class.

CSPL210 Money and Social Change: Innovative Paradigms and Strategies
How do people make decisions about using their money for social change? Where will it have the most impact? When do shifts in the rules or the use of capital create systemic change and address structural inequities? This course will explore the role of capital in social change. If we rethink how social change happens--analyzing the nonprofit and public sectors, but also new sector-blending approaches and concepts like collective impact--how does our perspective on capital shift? As a part of this unique course, students will work through an active process of selecting a set of nonprofits in and around Middletown to which, as a class, they will actually grant a total of $10,000.

CSPL211 Calderwood Seminar in Public Writing: Legal Advocacy for Disabled Veterans
The public rarely understands what it takes to fight for one's legal rights or benefits. Good writers can translate those battles in ways that teach, empower, and (re)build community support for struggling individuals. This course is a study in the translation of legal challenges into civic advocacy.

In this course, students will write about real plaintiffs and legal cases for public audiences. As part of their journey, students will delve into the military and medical files of a disabled veteran applying for a discharge upgrade from the military. Most discharge upgrade applicants suffer from addiction and/or mental health issues, the same issues that cut short the veterans' military careers. Using academic legal writing, news sources, and confidential personnel and medical files, students will describe issues facing veterans in general, and our veteran client specifically. Students will write for a disability blog, a legal services organization (LSO) website, a middle school social studies magazine, a podcast, and a newspaper. Students' writings will inform the instructor's writing--as the veteran's pro bono legal counsel--of a discharge upgrade brief.

CSPL212 Language and Politics: Making and Unmaking of Nations
This course explores the key topics at the intersection of language and politics, including language choice; linguistic correctness; (self-)censorship and hate speech; the performance of ethnic and national identity in language; gender politics and "powerful" language; rhetoric and propaganda; and changing conceptions of written language, driven in part by technological advances. One of the examples of such topics is Tweet politics or incivility on the web around the globe. This course consists of three modules. In the first two modules the above-mentioned topics will be discussed in general, while in the last module we will see how preferences in language policies and politics played a significant role in making and unmaking of nations in different parts of the world, from South Asia to East Asia to North America.

CSPL215 Human-Centered Design for Social Change
Design thinking is the way the creative mind approaches complex problem solving. Increasingly, it is at the center of innovative practices in business. Yet it can be particularly effective in addressing the human needs that are the focus of social enterprise and policy. This course will introduce a number of ways to understand how to use this method and will apply it to a number of real-world examples as team work in class. Invited designers who have worked in the field in the United States and in other countries will lead several sessions. An individual project will require fieldwork and will constitute the demonstration of mastery.

This course explores the techniques of human-centered design and design thinking for approaching social challenges ranging from election processes to subsistence challenges in impoverished rural populations. The most progressive and effective solutions to many problems are those that emerge from closely observing human patterns and then using creativity to make rapid prototypes of solutions that can be tested and refined. The result is human-centered, rather than high-level policy influences for social change. The class session will consist of (1) the presentation of methods and theories, (2) case studies to be worked on in teams either in the session or between sessions, and (3) discussions with designers who have worked on significant engagements for social change.

CSPL218 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers

engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

CSPL220 Participatory Design: From Helping to Solidarity
As artists and designers increasingly turn their efforts to altering conditions for the vulnerable and oppressed, stubborn questions arise around the ethics of engagement. Socially engaged projects seek meaningful change, yet often discourage dissent, reify privilege, remain agnostic about outcomes, and do little to alter larger, structural inequalities. Artists and designers can easily exit projects deemed failures and write these off as learning experiences. Moving from one social injustice to the next, crises and suffering become "sites" from which to develop serialized projects. Armed with empathy and expertise, but with little local knowledge, these practitioners struggle to form equitable relationships with partners and collaborators. This course will examine a range of projects initiated by artists and designers and will challenge the idea that helping is beyond reproach. The course asks how artists and designers might better situate themselves as allies through developing practices that foster solidarity, exercise humility, and distribute agency.

CSPL222 Disability Advocacy: Communicating the Legal Challenges of Disabled Plaintiffs to the Public
The public rarely understands what it takes to fight for one's legal rights or benefits. Good writers can translate those battles in ways that teach, empower, and (re)build community support for struggling individuals. This course is a study in the translation of legal challenges into civic advocacy.

In this course, students will write about real plaintiffs and legal cases for public audiences. In the first half of the course, students will read the military and medical files of a disabled veteran applying for a discharge upgrade from the military. Most discharge upgrade applicants suffer from addiction and/or mental health issues, the same issues that cut short the veterans' military careers. Using academic legal writing, news sources, and confidential personnel and medical files, students will describe issues facing veterans in general, and our veteran client, specifically. Students will write for a nonprofit website, a print newspaper, and a podcast, which the class will produce. These writings will inform the instructor's writing--as the veteran's pro bono legal counsel--of our client's discharge upgrade brief.

In the second half of the course, students will digest and synthesize legal pleadings from transgender disability suits (e.g., employment/Title VII, prison abuse). From these case files, students will write short pieces that educate the public about the lives and legal issues of transgender plaintiffs. Students will write for a nonprofit website, the six o'clock news, and a local online news or social media outlet.

CSPL224 Public Health, Migration, and Human Rights
How do human rights principles apply to the public health challenges faced by migrant populations? What is the situation of migrants arriving at the southern border of the United States? Crossing the Mediterranean Sea or the Darien Gap? What does human rights as a frame have to say about immigrants who are fleeing extreme poverty or are forcibly displaced by the climate crisis? This course seeks to address these and other related questions by examining the intersection of public health, migration policy, and human rights standards. We do so by examining a series of case studies that consider the underlying issues from a variety of disciplines including economics, sociology, law, policy analysis, public health, and political science. Through this course, students will develop a critical understanding of the contemporary landscape and potential policy responses to promote public health and human rights in the international migration space.

Prereq: **None**

CSPL225 Critical Design Fictions
Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to live--expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.

CSPL235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.

CSPL237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change
The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantel of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

CSPL239 Startup Incubator: The Art and Science of Launching Your Idea
The Startup Incubator is a one-semester, experiential learning program designed to teach and enable student entrepreneurs to develop sustainable business models from their ideas. The program will bring together an ambitious, committed, and diverse group of individuals from all classes and majors who are passionate about developing successful solutions to challenges; identify as entrepreneurs, disruptors, and thought leaders; and have the tenacity, work ethic, and ability to succeed. All participating students should have a promising business idea and take the course with the intention of launching or running their own venture. Student Incubator students actively participate in one cohort meeting a week: most are "classes" that take the form of lectures or workshops, and some are "practice days" that provide time to practice theories and methods necessary for success. Students also dedicate at least 10 additional hours per week to assignments, self-directed work, customer discovery, networking, and mentoring sessions. This course will feel like a combination of a college class and a rigorous startup incubator program. Success is a student using theories learned in class to validate their ideas by developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model. By enrolling, students make a commitment to themselves, the instructor, and the other members of the class. Note: This course is offered by the Patricelli Center for Social Entrepreneurship (wesleyan.edu/patricelli/) in partnership with the MEWS+ (themewsplus.co/).

CSPL240 Nonprofits and Social Change
This course explores the world of nonprofits and how they help (or don't help) the process of social change. As nonprofits increasingly address issues and concerns that governments have previously addressed, a critical analysis of how and why they carry out their work is central to the Allbritton Center's concern with public life. Each class session will include (1) background on a particular social issue (including global health, inner-city education, clean water, hunger, refugees, and national borders); (2) a case study of a nonprofit addressing that issue; and (3) discussion with leaders of that nonprofit.

CSPL242 The Sociological Imagination: Poverty, Inequality, and Ethnography
In this course, we will examine the history of poverty, incarceration, racial and economic inequality, and other issues in the United States through critical works of ethnography and narrative journalism. Drawing on readings from Charles Wright Mills, Alex Kotlowitz, Katherine Boo, Alice Goffman, Matthew Desmond, Victor Rios, and other scholars and journalists, we will examine sociological concepts, public policies, and ethnographic methodologies and understand how social structure shapes agency and the dramas of everyday life.

Identical With: **WRCT242**
Prereq: **None**

CSPL244 From Litigation to Restorative Justice: Conflict Resolution in Practice
Litigation, mediation, reconciliation, and consciousness-raising. These and other techniques can help us solve seemingly intractable conflicts. But how does a litigator, mediator, reconciler, or consciousness-raiser select an appropriate strategy for a given conflict? And once a strategy is selected, how does a conflict resolution specialist lead the parties to resolution? This course will show you the way...

In the first part of this course, we will study and practice traditional dispute resolution techniques. Each student will participate in two-person and multi-party quasi-judicial role-playing exercises and arbitrations. In the second part of the course, we will study and practice mediation, reconciliation, feminist consciousness-raising, and community-building.

We will then draw upon theory and practice readings, and our experiences, to answer questions such as: Should we match dispute resolution strategies to parties' personalities or desired outcomes? Whose conception of fairness and social good should guide our negotiation practices? Are dispute resolution techniques gendered, raced, aged, abled, etc.? We will answer some of these questions with the help of other Wesleyan students at a conflict resolution teach-in led by members of the class.

Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL245 Ethnography and Design
Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

CSPL246 Organizations in Society: Capitalism & Its Criticisms
In this course we will explore the concept of capitalism and how it carries variegated meanings, which spans a wide range of societies and differing relationships between economic, political, and civic institutions within them. Students will have the opportunity to examine various forms and perspectives of capitalism which include contraband capitalism, racial capitalism, gendered capitalism, and scientific capitalism. We will also track how conceptions of capitalism have changed over time and globally. Primary and secondary works from the field of history, law, economics, philosophy, religion, and sociology will be incorporated to carry out the goal of the course which is to provide tools and perspectives that help students engage thoughtfully in these debates and to extend them into application in their own roles as engaged citizen, corporate, nonprofit, public, and entrepreneurial leaders.

CSPL247 Organizations in Society: Big Business, Big Data, & Big Obligations
In this course we will examine the cultural, economic, ethical, and legal implications of analytics, big data, and computation. Drawing on various disciplines in the humanities and the social sciences, students will read works relating to the science of data collection, aggregation, and analysis. Students will learn that with opportunities for both financial gain and social good (which big data brings) come various perils, including privacy violations, disability/gender/racial discrimination, economic disruption, negative environmental spillovers, and political destabilization.

CSPL248 Organizations in Society: Business Ethics
Capitalism and competitive markets are often considered the most efficient system of simultaneously maximizing private wealth and public good. In the real world, however, truly competitive markets do not exist. Imperfect markets have been made to work efficiently while protecting public good through systems of public intervention, i.e., laws and regulations, and voluntary self-restraint by business organizations in response to societal expectations. In this class we will consider the role of ethics in business, with students analyzing the process by which ethical norms and strongly held moral beliefs guide the conduct of economically driven business organizations. Students will reflect on business managers' responsibility to their owners, i.e., shareholders, other stakeholders, and society at large.

CSPL250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people

and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

CSPL250N Writing Reality: Journalism in an Era of Polarization and "Fake News"
How should the news media cover Donald Trump? How did the Internet, the 24-hour news cycle, and rising polarization help change the nature of journalism itself, but also lead to an era of "Fake News" accusations in which Americans exposed to different sources of information come away with completely different sets of facts? This class will explore our new digital and highly partisan media landscape, grounded in a close study of current events. We will study the impact and consequences of today's media -- both how to consume it, and how to write for it.

CSPL250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and "Fake News"--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

CSPL250R First Person Singular
This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebold, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koeppel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: https://petergodwin.com/about/

CSPL250W Topics in Journalism: The Art and Craft of Journalistic Nonfiction
Journalistic nonfiction uses the tools of the newsroom to create long-form stories that read like novels. Students will learn the skills to ensnare readers in any medium of narrative nonfiction writing, from articles and books to screenplays and teleplays. Journalists excel in conducting interviews and marshaling facts. But few journos ever master the art of narrative storytelling. Nonfiction book writers can wield a narrative arc to tell a story. But many book writers are weak on basic reporting. We will read the work of newspaper reporters who learned to write long-form narratives, and magazine writers who learned the skills of the newsroom. By semester's end, students will know tools of both trades. We will hear from some of the writers about their work. To keep the focus on journalism, we will mostly skirt the genres of history and memoir. Students will write mostly in the third person, and primarily about events in living memory.

CSPL252 Leadership & Social Innovation: Patricelli Center Impact Fellowship
In this cohort-style class, student Fellows will be introduced to a select, intergenerational group of global leaders working at various levels of government, academia, media, and the arts--and across subject areas like storytelling, climate action, social justice, youth representation, museums, and more. Fellows will engage with leading CEOs, journalists, diplomats, and artists, and directly explore their work and lived experiences across scales of impact, personal growth, and institutional transformation. Course content will

be delivered via the case-method and will feature facilitated conversations, live simulations, and direct engagement between global leaders and student Fellows. Assessment will be via discussion/case preparation (reviewing background content and drafting 3-5 questions per week), in-class contribution (engaging with guests and peers), attendance (all sessions are mandatory), weekly reflections (350 words, or audio/video recording), and a final 10-15-page Personal Social Impact Plan.

Prereq: **None**

CSPL257 System Mapping for Social and Environmental Impact
In recent years, growing interest in social entrepreneurship has pushed students to "solve" complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, half-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a "systems map" that documents the economic, political, and cultural factors behind their problem, as well as the current "solutions landscape."
Offering: **Host**
Grading: **Cr/U**

Identical With: **AFAM257, ENVS208**
Prereq: **None**

CSPL262 Patricelli Center for Social Entrepreneurship Fellowship
In this project-based, cohort-style class, students will learn strategies for understanding social and environmental problems, and they will design interventions to create impact. Each student will select a topic to work on individually or as part of a team throughout the semester. Course material will include root cause analysis, ecosystem mapping, theory of change, human-centered design, business models, leadership and teamwork, impact metrics, storytelling, and more. Some students will develop entrepreneurial projects and ventures while others will find pathways to impact as activists, community organizers, coalition builders, artists, policy-makers, or researchers.

Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL263 Refugees in World Politics
The primary objective of this course is to provide students with i) an introductory overview of the political, economic, social, and security determinants of refugee flows; and ii) the political and social responses of receiving governments and societies to them. Using both historical and contemporary case studies, this course will highlight security concerns engendered by internal displacement and transnational migration. These include armed conflict, smuggling, trafficking, and terrorism. This course will also highlight the concepts of citizenship in receiving states, and the roles played by the international institutions in influencing state policies towards refugees.

CSPL264 Patricelli Center Fellowship I
The Patricelli Center Fellowship is a one-year, project-based, cohort-style learning experience. Fellows are a self-selected, committed, and diverse cohort of individuals or teams from all classes and majors who are passionate about innovation, creativity, and problem-solving; identify as entrepreneurs, intrapreneurs, changemakers, activists, disruptors, designers, inventors, and/or thought leaders; and have tenacity, empathy, interdisciplinary thinking, strong work ethic, and the ability to work independently. Some Fellows will launch or run their own project or venture, while others will not.

Patricelli Center Fellows actively participate in two cohort meetings per week: some are "classes" that take the form of lectures or workshops, and some are "labs" that serve as working or discussion sessions. Fellows also dedicate 10+ additional hours per week to assignments, self-directed work, portfolio-building, and engaging other members of the Wesleyan community.

This course will feel like a combination of a Wesleyan class, a C-level position on a startup team, and an extra-curricular leadership activity. By enrolling, Fellows make a commitment to themselves, the instructor, and the other members of their cohort.

CSPL266 Youth, Power, and Social Change
While young people have been at the helm of movements for social and racial justice throughout history, the 1990s saw the rise of youth organizing as an intentional strategy for transforming youth, communities, and the broader social and political structures and institutions that shape their lives. This course will examine the evolution of youth organizing and the ways in which it has disrupted the dominant narratives and traditional methods of youth learning and engagement at play in schools and youth service organizations. The course will explore the politics of power and identity in youth work, and the role and impact of current youth-led social change movements - from #blacklivesmatter to the work of Dreamers - in today's political climate. Please note that this course will require students to reflect on and contextualize readings and class discussion with their own lived experience and is therefore especially relevant for students that are engaged in community service, organizing and/or youth work.

Prereq: **None**

CSPL267 Project-Based Learning Lab
In this course, students will bring ideas to life through project-based learning, translating theory to practice and developing a more sophisticated understanding of subjects they are studying in their other courses.

Students will enroll in the Project-Based Learning Lab with a problem they want to address or an idea they want to build. Throughout the semester, we will build a toolbox for studying problems and designing solutions. Themes will include systems thinking, root cause analysis, ethical community research, human-centered design, lean prototyping, and data-driven evaluation. There will be an emphasis on humility, teamwork, oral communication, responsible partnership, and lean experimentation. Most students will complete the semester having launched a basic MVP (minimum viable product) and a road map for continuing to pursue their idea after the conclusion of the semester.
Offering: **Host**
Grading: **Cr/U**

Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL268 Reporting on Global Issues: International Journalism in Action
This course is designed to introduce students to various mediums of international reporting beyond the traditional print format, like video and podcasting. Visual and auditory formats have gained widespread prominence, making journalism more accessible to diverse audiences. After delving into sourcing, research, and reporting techniques, students will engage in discussions with accomplished innovative journalists, hosts, and reporters who possess extensive experience in covering international issues. Throughout the semester, students will gain valuable insights from these conversations and collaborate in teams to produce a podcast episode for a class series focused on migration.

Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Identical With: **CGST261, WRCT267**
Prereq: **None**

CSPL275 Action: Art, Politics, Counterpublics
In this interdisciplinary studio course, we explore action as a category of art practice. What does it mean to take action, either individually or collectively? What does it mean to refuse to take action? Through a series of projects, assignments, and discussions, we work through various possibilities, drawing on methods from public interventions, performance, institutional critique, social practice, experimental film, and work by non-art practitioners. The course is organized around the production of student projects and research, culminating in a self-directed capstone work. In the initial stages, students will be asked to work through three distinct modalities (performance, site-specific intervention, and collaborative practice) while developing their ideas. Time will be devoted to discussion of historic and contemporary examples, including European avant-gardes (Dada, Productivism), feminist film and performance, Happenings, Indigenous performance art, and work connected to political organizing, such as the Black Panther Party, United Farm Workers, Young Lords, ACT-UP, Art Workers' Coalition, and EZLN, among others. Students will be exposed to a variety of techniques and will gain access a range of facilities, including the woodshop, digital technologies through the Digital Design Studio, etc. Depending on Covid restrictions, trips to contemporary exhibitions will provide a theoretical framework. Work in this class can be created individually or collaboratively. Depending on interest, we may also organize an end-of-semester exhibit.

Identical With: **ARST265**
Prereq: **None**

CSPL277 Community Impact: Building Capacity to Support Educational Enrichment and Socioemotional Development
In this half-credit course, students will build an intellectual and practical framework to guide their work in volunteer settings in the local community. What does it mean to "help?" How do we assess the needs of community partners and build the knowledge and skills that will allow us to address those needs? What do we need to know and understand about the people with whom we work? What does research have to say about effective tutoring techniques and practices? How can we design meaningful learning experiences? How can we maximize not only our impact in the community, but our own growth and learning?

Note: students taking this course must be engaged in at least 80 minutes per week of community service in an educational setting throughout the semester and must complete this questionnaire (https://forms.gle/ay9xaXGn1wbxriHJ7) before enrolling

CSPL285 The Sociology of Reality TV: Race, Colorism, and Xenophobia
The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether responsibility exists on the networks who help create these shows.

CSPL288 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations: 200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

CSPL289 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.

CSPL290 Community Impact Residency I
The Community Impact Residency brings together Wesleyan students interested in the practice of civic engagement and a cross-section of community stakeholders -- local leaders, resident-led groups, nonprofits, and municipal government -- committed to creating just, equitable, and sustainable communities. Student participants of this program enroll in two 1.0 credit courses (CSPL290 and CSPL291) and are assigned a project which they support for the duration of the academic year. Students must commit to the entire year. Interested students must complete an application to be considered for the course which can be found here: https://forms.gle/T26LkbDQKeFtb9TG7

Prereq: **None**

CSPL291 Community Impact Residency II
The Community Impact Residency brings together Wesleyan students interested in the practice of civic and community engagement. Enrollees engage a cross-section of community stakeholders -- local and nonprofit leaders, resident-led groups, and municipal governments -- as they support work that engages communities around the Jewett Center's focus areas and enlist student volunteers on behalf of this work. Enrollees must be hosted by a preapproved community partner, attend bi-weekly check-in with a JCCP advisory, attend monthly resident meetings, and submit reporting data at the end of the semester.

CSPL297 Environmental Art: Research through Art/Art through Research
How can communities understand the conditions wrought by fossil fuel infrastructure and anthropogenic climate change? How should they confront environmental crisis and imagine ecological futures? What can we know about our environment, and what eludes us? Co-taught with visiting artist-composer Ari Benjamin Meyers, this class is a practical experiment in "Research through Art," and "Art through Research" (Dombois, 2009) focusing on the site of coal and oil-fired power plant shuttered amid heavy flooding during Hurricane Sandy. The landscapes of Manresa Island (South Norwalk, CT) include an abandoned turbine hall, a birch forest on a coal ash dump, and an array of wetland and

coastal habitats. Participants will use practice-based research methods to develop works of art engaging with the site in its past, present, and future conditions. The course models artistic research methods with reference to a specific site and set of environmental conditions, bringing together students from arts/performance, sciences, humanities, and social sciences to produce site-specific works in a coastal ecosystem transformed by fossil fuel infrastructure.

At the heart of this course is a concern with what it means to be uncertain. The sciences provide tools to address problems of uncertainty. Practices of research, within and beyond the sciences, gather varied approaches to not knowing. Artists employ methods drawn from multiple academic disciplines (ethnography, sociology, history, the sciences), media (technoscience, video, audio, installation, multimedia), and sites of research (archive, laboratory, biome, habitat). While artists may engage many of the same practices as academic researchers, their works break the analytic frame. Art may be prescriptive or descriptive, didactic or agnostic, pointed or indeterminate; it may delight, frustrate, provoke, agitate, or inspire. Art may be curious or inquire; it may also make space for the experience of uncertainty. How does uncertainty make us feel? How should we respond?

Students across disciplines -- performance, visual arts, music, ecology, biology, geochemistry, history, religion, sociology, psychology, anthropology, economics, government, etc. -- are encouraged to submit a statement of interest for permission of instructor (POI). The purpose of the POI is to secure a collaborative balance of students across disciplines, toward the production of environmental art that engages a broad public.

This course will require 4-6 scheduled site visits to Manresa Island in South Norwalk, CT, requiring students to leave campus by 12 p.m. Friday and return by 5 p.m. Transportation will be provided.

CSPL299 The Rest of the Story: Techniques for Investigative Reporting
Students will learn how to find out what public records exist on various topics, how to get their hands on those records, and how to use those records while reporting. Students will also learn key techniques to source development and how to engage communities that you are reporting about. Students will be teamed up to investigate a topic themselves during this semester. Students will also learn the fundamentals of journalism and the legal history of key cases. Each class will focus on a specific area of investigative journalism, including the history, the law, accessing public documents, research, narrative writing, and more.

CSPL300 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

CSPL302 Senior Seminar for Civic Engagement Minor
In this partial-credit seminar, the candidates for the Civic Engagement Minor will acquaint each other with their particular interests in and commitments to civic engagement. Under close faculty supervision, the participants will organize the course as a collaborative undertaking. Meeting biweekly, they will revisit the readings from their Practice of Democracy course, discussing them in light of their subsequent course work and practical experiences in engagement. At the end of the semester, each student will make a capstone presentation to the group.

CSPL305 Teaching Fellowship for National Education Leaders
This course is for students to serve as Teaching Fellows for a course with the National Education Opportunity Network (neonopportunity.org), which provides college courses to Title I and Title I-eligible high schools nationwide. Please inquire with the instructor for information on course topics available this semester. Students will: -Host weekly 45-minute synchronous discussion sessions with 15-25 high school scholars via Zoom to enhance their engagement with course content, expose them to college-level seminar-style discussions, and help improve their analytical and metacognitive skills. -Evaluate and provide feedback on student work. Specific time assignments for sessions with high school students and required Teaching Fellow group meetings will be scheduled at the same time every week based on availability. This course counts for 10 hours toward the 20-hour practicum requirement in the EDST major or minor. The other 10 hours can be completed by repeating this class or through an independent practicum.

CSPL306 Community-Engaged Qualitative Research: Teacher Voices
This course will focus on context-specific community based participatory research methods. The research project undertaken in fall 2025 will be investigating the experiences of local public school teachers. The goal of the project is to elevate the voices of public school teachers as they navigate the changing educational landscape and to explore the space between public perceptions/depictions of teachers and the reality of their work by creating textured portraits of individual teachers and their classrooms. Students will learn theories and methods of community-engaged research through scholarly study and hands-on experience gathering and analyzing qualitative and ethnographic

data, primarily interviews and observations, with a focus on Lightfoot's methods of Portraiture in social science research. Students should be prepared to engage deeply with community members. Some travel within Connecticut will be required. Previous coursework in Education Studies preferred.

CSPL307 Religious Subjects to Ethnic Minorities: Armenians in Turkey Between Empire and Republic
After World War I, Woodrow Wilson's Fourteen Points articulated a new vision for an international order based not on imperial ambition but on the self-determination of nations. Though empire persisted as a viable political form through the Second World War, the interwar years saw the breakup of some of the world's oldest dynastic empires into the much newer nation-state: the Austro-Hungarian Hapsburg Empire, the Ottoman Empire, and Imperial Russia all gave way to new political entities. At the same time, a transformation in the idea of political belonging occurred: citizenship now dominated the older concept of imperial subjects, and an idea of a national minority protected by an international regime of minority rights emerged. These ideas profoundly reshaped national and international politics.

This course focuses on the Armenians of Turkey across the transition from the Ottoman Empire to the Republic of Turkey, established in 1923. It uses the Armenians of Turkey as a case study in the emergence of secular nationalism as the dominant political ideal of the 20th century. Students will not only learn the history of the late Ottoman Empire, the Republic of Turkey, and the history of the Armenian minority in the Middle East, but will explore the transition from empire to republic at the end of the 19th century through the twin lenses of secularism and nationalism. Drawing on Ottoman and Turkish history, Armenian history, political science, and anthropology, the course introduces debates about nationalism, secularism, minority rights, and political belonging through the emphasis on Armenians in Turkey.

CSPL308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America
This course examines the history of American evangelicalism and fundamentalism, beginning with a brief overview of Protestantism in the colonial and revolutionary eras. Then, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and subcultures (such as Christian music). The course concludes by investigating the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped fundamentalism and evangelicalism, and reflect on how these movements' views of American history contribute to their own sense of identity and purpose.

CSPL309Z Environmental Justice Advocacy: Assessing Law, Community-Based Engagement, and More
ONLINE COURSE: Synchronous class meetings via Zoom,10am-noon and 2-5pm. Classes held Jan 4, 6, 8, 10, 12, 14, 16, 18. (Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings.) The concept of "environmental justice" focuses on the equitable distribution of pollution and health burdens--such as the siting of fossil fuel infrastructure and pollution-emitting facilities--as well as benefits such as clean air and clean water. Procedural justice and restorative justice are also key demands of the environmental justice movement. In addition, as communities of color and low-income communities disproportionately bear the burdens of climate change and resulting "climate gentrification," the overlap between environmental injustice and climate change is becoming increasingly apparent. After a brief introduction to the concept of environmental justice, this course will focus on advocacy efforts to promote environmental justice and, in particular, the benefits and limitations of various tools including the law, grassroots organizing, and policy work. For their final project, students will use what they learn in the course to design and propose their own environmental justice intervention. By the end of the course, students will understand the history, foundational theory, and key case studies of environmental justice as well as the tools and strategies that environmental justice advocates use. Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

CSPL310 Community-Engaged Philosophy: Teaching the Search for a Good Life
In this half-credit course, students who have successfully served as discussion facilitators for PHIL210: Living a Good Life will learn how to teach an abbreviated version of the course to local high school students in a nine-week voluntary after-school program. Having been trained in this special approach to discussion facilitation for their fall semester work in PHIL210, students will be able to deepen their knowledge of both course content (philosophy) and their facilitation skills through guided experiential learning. Course topics will focus on the skills of learning through close observation and reflection on one's teaching (reflective practice), understanding one's students (adolescent development, cultural consciousness), and pedagogical knowledge regarding lesson planning, student engagement, developing productive classroom climate, promoting self-directed learning, and authentic assessment. Students must have served as discussion facilitators/leaders for PHIL210.

CSPL311 Community Impact Practicum: Building Capacity to Support Educational Enrichment
In this practicum course, students will build an intellectual and practical framework to guide their volunteer work in educational settings in the local community. What does it mean to "help"? How do we assess the needs of community partners and build the knowledge and skills that will allow us to address those needs? What do we need to know and understand about the people with whom we work? What does research have to say about effective tutoring techniques and practices? How can we design meaningful learning experiences? How can we maximize not only our impact in the community, but also our own growth and learning? Through reflection on experiential learning and the study of scholarship addressing these questions, students

will develop knowledge and skills to improve their effectiveness in supporting educational enrichment. Students taking this course must be engaged in at least 90 minutes per week of community service in an educational setting throughout the semester. Please note: If you are looking for a practicum that is more focused on the K-12 classroom experience, please see EDST310: Practicum in Education Studies. In that practicum seminar, students carry out their own independent study related to their classroom placement.

CSPL312 The United Nations and Human Rights: Advocacy, Institutional Reforms, and Change in Turbulent Times
Human rights advocacy efforts frequently involve the United Nations in some capacity. Human rights activists frequently seek to raise awareness about a human rights issue before one of several UN institutions, or they might draw on norms or concepts that emerged from the United Nations. They might also wish to contribute to ongoing discussions at the international level, harnessing the perspectives of their constituencies and their field experience to influence the shape of normative development at the global level. Despite the importance of the UN for human rights as a field, only a small circle of UN-specialists, insiders, and scholars understand and know to maneuver the institutional human rights machinery of the UN. This "black box" phenomenon is even more daunting for many of the communities and social activists meant to benefit most from the UN's human rights mechanisms. This course is an attempt to pierce that "black box," and to allow at least the graduates of this course to serve as effective "interpreters" of the UN human rights institutional landscape for the benefit of vulnerable individuals and communities. Students will contribute directly to human rights initiatives targeting the UN (or UN-adjacent institutions) as part of their human rights as part of their advocacy agenda. These projects will focus on a range of human rights issues (ex: climate change & migration, transitional justice, and the development of a human rights based governance approach to new and emerging technologies). Students will be active participants in the design of the course curriculum, directing their (our) collective learning around those issues most relevant to our advocacy projects.

CSPL314 The Health of Communities
Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown's Community Health Center (CHC) & Moses Weitzman Research Institute.

CSPL315 Policy and War through Film
This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

CSPL316 Intro to Human Rights Advocacy Seminar
This course is limited to students already admitted into the Human Rights Advocacy Minor (HRAD-MN).

Fresh from having completed the Human Rights Standards Course (CSPL-228), you will already have a good understanding of how global and domestic human rights institutions should (in principle) function to respect, protect, and fulfill human rights norms. In this 1.5 credit seminar we turn our attention towards the specific methods of human rights activism. The seminar is structured as an intensive workshop where we practice and refine skills, challenge ourselves and our classmates to reflect deeply about our emerging identities as aspiring human rights activists, eat lunch together, and prepare actively for our human rights fact-finding practicum (which will take place during the summer break).

The course continues some of the themes raised during the Human Rights Standards course. We will discuss what others have written about the ethics of "doing" human rights, but we will also develop our own personal ethical framework in anticipation of our own field research. Likewise, we will read what others have written about the process of effectuating attitudinal change about human rights, but we will also refine our own theories of change in the real-world contexts in which we will soon be working. Much of our learning will come about experientially and through thoughtful discussion, so please come to class prepared to engage.

CSPL317 Social and Political Perspectives on Digital Media
This course examines the intersection between social media, politics, and society, analyzing platforms like Facebook, Twitter, YouTube, and Instagram to understand their role in our lives, in our political discourse and in shaping our culture. We examine the positives of social media including social activism,

the democratization of news, and heightened capacities for community, communication, and connectivity. We also delve into the darker side of these platforms, exploring the proliferation of fake news, hate speech, terrorist networks, and gendered issues including trolling and cyber harassment. This is an interdisciplinary course and in it we will draw upon a broad range of social theories including science and technology studies, communication theory, linguistics, cultural studies, and media studies to understand the complex role of digital media in contemporary society.

CSPL318 Global Populism and the US Election. Are we witnessing a populism uprising?
In this course, we will unpack the factors pushing communities worldwide toward these political ideologies as well as the impact it has on global politics and international relations. We'll take a deep dive into the 2020 campaign cycle in the age of digital campaigning and online voting and analyze how Donald Trump and Senator Bernie Sanders are shaping our political discourse and how they fit into the global trend of populism. We'll study the defeat of democratic movements like the Arab Spring and the rise of authoritarian regimes in the region. Additionally, we'll break down how the failure of democratic movements in the MENA region led to the refugee crisis, which in turn inspired right-wing radicalization within Europe and the United States. This course provides an overview of the political landscape of the populism movements in the U.S. and around the world, focusing on the collapse of democratic movements and the rise of populist leaders like Donald Trump, Boris Johnson, Narendra Modi, Jair Bolsonaro, and Marine Le Pen, among others. We'll begin with a brief overview of the history of populism and the theory behind it, before breaking down modern applications.

CSPL319 The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn
In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated--"the media has been democratized"--and reviled--"the media is too fractured and people are living in information bubbles." The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism. The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise. This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, working on an individual project, and in collaboration with other students.

CSPL322 Methods and Frameworks for Understanding and Overcoming Health Disparities
In recent years especially, the need for both interdisciplinary and mixed approaches to inquiries in public health research has become apparent in health promotion, policy formation and evaluation, service needs assessment, the social determinants of health, and program evaluation and outcomes measurement more generally. This course is intended to provide an overview of methodologies and frameworks used to examine and overcome disparities in health through research. A range of quantitative and qualitative research designs and methods will be introduced, and strategies to address challenges in real world program settings will be emphasized. This course will discuss approaches commonly used in public health and health services research, such as mixed methods, implementation science, community-based participatory research, and their strengths and limitations. Additionally, this course will examine how critical race theory and intersectionality, and additional theories and frameworks from ethnic studies, psychology, and sociology, can further advance public health's capacity and effectiveness in promoting health equity. The course will incorporate examples of applied research and opportunities to learn from the direct experiences of the instructor. There will be a mixture of discussion and lecture depending on the topic, with student participation and questions strongly encouraged. Preference will be given to students who have taken SOC/SISP 315 Health of Communities or SISP 262/SOC 259 Cultural Studies of Health.

CSPL329 Wars of Resistance in Scholarship and Film
This course explores the theory, practice, and interpretation of wars that see ostensibly stronger powers wage wars against relatively weaker resistance movements. It combines scholarly readings and interpretive films to gain a deeper understanding of how and why resistance and insurgency can prevail when confronting adversaries who are numerically superior. Students will analyze the inescapable paradoxes that can make wars of asymmetry difficult for stronger states. The seminar discussions will develop a keener grasp of the logic that permeates wars where the weak resist invasion and occupation. This course intersects international security studies, history, and conflict studies. This course will improve knowledge about asymmetric wars and for critical analysis. Though there are no prerequisites, it is desirable that students have previously taken a course in conflict studies or war.

CSPL330 Policy and Strategy in War and Peace
This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.
Offering: **Host**

CSPL332 Just Cities: Architectures of Public Encounter
What is "the public," and how has it been conceived, relative to notions of the urban--to the web of ideas, forms, and fantasies constituting "the city"? Can art and architecture play a role in defining the public, or does the public's political and social construction place it outside the scope of specifically aesthetic concerns? This course addresses these and other related questions, positioning art and architecture in their broader cultural and historical contexts. It explores a range of socially charged, experiential, and participatory aesthetic and political practices, characterized by their distinctly public character and decidedly architectural and urban settings. At its core, it is concerned with issues of social justice as they relate to the material spaces of the modern city, and the manner in which those spaces are identified, codified, and made operative in the service of aesthetic, social, and political experience.

This course will be taught by M. Surry Schlabs, Yale School of Architecture.

CSPL333 Music Movements in a Capitalist Democracy
This course will focus on music movements that have used the presentation, expression, and production of music and music events to facilitate sociopolitico transitions. The vital context of these movements is the United States in particular, where the speed and power of commerce, as well as the concentration of capital, present unique opportunities for progressive values and goals in music.

We will look at huge events such as the Newport festivals, Woodstock, Michigan Womyn's Music Festival, Lillith Fair, and Bonaroo, and examine how these movements have both evolved and spread their tendrils into the world (if they have). We will also spend some time on smaller, grassroots venues and music series in Chicago, Boston, San Francisco, and New York and see how blues, folk, punk, and "Americana" venues have affected and interacted with their communities. We will look at how music scenes evolved and grew and sometimes became institutions, like the Chicago Old Town School of Music.

Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL337 Practicing Democracy
Organizing can make a difference in addressing major public challenges that require civic action, especially by those whose voices will lead, by identifying, recruiting, and developing more leadership; building community around that leadership; and building power from the resources of that community. In this course, each student accepts responsibility for organizing constituents to achieve an outcome by the end of the semester. As reflective practitioners, students learn from critical analysis of their leadership of this campaign. We focus on five key practices: turning values into motivated action through narrative; building relationships committed to common purpose; structuring leadership collaboratively; strategizing to turn resources into the power to achieve outcomes; and turning commitments into measurable action enabling learning, accountability, and adaption.

Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **SBS-CSPL**
Prereq: **None**

CSPL338 Writing for Advocacy
This course will provide practical and conceptual training in writing that advances human rights. Students will read and create advocacy in a variety of forms, including op-eds and investigative journalism, legal briefs, historical essays, public letters, screenplays, poems, and social-media campaigns. They will examine the role writing can play in advancing human rights as well as its unintended consequences; debate the ethics of bearing witness, especially in the Global South; and analyze what makes written advocacy successful, or not, and why. Students will also consider advocacy strategies in an age of social media, disinformation, and the rise of AI. The course includes a two-week case study on Haiti-related advocacy. Throughout, students will practice elements of written advocacy, including citation, analysis, and evidence-based argument. Once students receive their UNHR project assignments, they will apply the skills learned in the class to create project-based advocacy packages.
Offering: **Host**

CSPL341 Topics in Education, Innovation, and Entrepreneurship: Transformative Practices in School Reforms
This seminar provides students the opportunity to explore critical topics within the school reform movement; be introduced to perspectives from a diverse group of stakeholders (e.g., CEOs, administrators, lawyers, parents, students, authors, scholars); work closely with the professor to further investigate one of the course topics in-depth, and present/disseminate their own conclusions and recommendations to an external audience.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Prereq: **None**

CSPL341B Topics in Education, Innovation, and Entrepreneurship: Social Entreprenurship in Education
This seminar focuses upon educational innovation and entrepreneurship as a form of social entrepreneurship, some of society's greatest challenges in education. Students will survey critical issues in contemporary education and explore innovative and entrepreneurial efforts to address these issues. Learners will explore how diverse education startups, non-profit organizations, and non-governmental organizations, individuals and grassroots groups, K-12 schools, universities, foundations, professional associations and others are responding to these issues in innovative ways. As the course progresses, students will explore the roles of foundations, corporations, and government policies and regulations upon educational innovation and entrepreneurship. As part of this course, learners will work individually or in groups to research solutions to a pressing contemporary educational challenge and propose or pitch a means of addressing that challenge through social entrepreneurship.
Offering: **Host**

CSPL341C Entrepreneurship in Education: Past, Present, and Future
Entrepreneurship plays an increasingly important role in the American public education system. This course examines the historic roots of entrepreneurship in education, looking at both the business side of entrepreneurism and the more recent emergence of social entrepreneurship. Furthermore, the course examines the current debates in the United States about the engagement of business with education, addressing such concerns as the proper role of risk, profit motives, privatization, and neoliberalism. The New Orleans public school system will serve as a case study for investigation in this discussion. Students will better understand the entrepreneurial personality, the sources of innovation, and the promise and pitfalls of entrepreneurism in public K-12 schooling.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Prereq: **None**

CSPL341D Topics in Education, Innovation, and Entrepreneurship: A Law and Policy Perspective
Entrepreneurial ideas in education invariably raise rich questions of policy and law. Innovations in the public schools, such as charter schools, the use of student test scores (e.g., value added modeling) to evaluate teachers, and alternative pathways to the profession (e.g., Teach for America) engender deep debate and discussion in policy and legal circles. This course will explore (from both a law and policy lens) the various education reform ideas that have been instituted or debated and characterized as innovative or entrepreneurial. The course material will be framed in a way to be accessible to those with a general interest in the area of education but without a background in law and policy per se. The course will draw heavily from guest lecturers and entrepreneurs working in the field.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Prereq: **None**

CSPL341E Topics in Education: Introduction to Educational Law, Policy, and Educational Reform
This seminar examines how constitutions, statutes, and court cases impact the rights of students and faculty in K-12 education. It also examines how parents and students have used the law to advocate for equal educational opportunity. Finally, this seminar discusses the legal dimension of education reform measures, such as charter schools and school vouchers.

CSPL341G Applied Entrepreneurship: From Idea to Exit
Applied Entrepreneurship: From Idea to Exit provides students with a practical, hands-on introduction to the entrepreneurial journey. Drawing on the perspective of a female founder and CEO with experience building and leading a digital health company through to acquisition, students will explore the full venture lifecycle -- from identifying opportunities and shaping ideas, to launching, scaling, and ultimately exiting a business. The course emphasizes entrepreneurial thinking, problem-solving, and resilience while equipping students with real-world tools such as customer discovery, business model design, fundraising, growth strategies, and exit planning. Combining interactive discussions, case studies, and experiential projects, this course offers students both the mindset and skillset not only to build ventures, but also to bring entrepreneurial approaches to established businesses, nonprofits, and beyond.

Prereq: **None**

CSPL357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

CSPL360 Community-Engaged Qualitative Research: Teacher Voices
This course will focus on context-specific community based participatory research methods. The research project undertaken in fall 2025 will be investigating the experiences of local public school teachers. The goal of the project is to elevate the voices of public school teachers as they navigate the changing educational landscape and to explore the space between public perceptions/depictions of teachers and the reality of their work by creating textured portraits of individual teachers and their classrooms. Students will learn theories and methods of community-engaged research through scholarly study and hands-on experience gathering and analyzing qualitative and ethnographic data, primarily interviews and observations, with a focus on Lightfoot's methods of Portraiture in social science research. Students should be prepared to engage deeply with community members. Some travel within Connecticut will be required. Previous coursework in Education Studies preferred.

CSPL366 A History of Incarceration in the United States
This course examines the history of incarceration in the United States from the 18th century to the late 20th century. It begins with history of indentured servitude in the colonial era and then considers the intensification of the enslavement of blacks in the 19th century as well as the expansion of prisons in the 20th century. The course seeks to engage how systems of confinement accompanied the development of a political system based on the languages of liberty.

CSPL374 Censorship, Culture Wars, and Controversy in Art
Art history is marked by various forms of state, community, or institutional censorship. Such events can be flash points in culture wars, as in the United States in 1989, when four artists--most of them queer--were denied funding from the National Endowment for the Arts after their work was deemed "obscene." Sometimes art that unearths sensitive cultural histories can lead to calls for destruction, as in Sam Durant's 2012 work Scaffold, which referenced state violence against the Dakota people, leading tribe members to protest what they felt was Durant's insensitive handling of the subject. Events like these raise key questions within art and broader society: Who should have the authority to decide which art should be exhibited, and to what audiences? What constitutes censorship? When might censorship, or the curtailing of speech, be justified?

This course will examine these questions focusing on the 20th and 21st centuries in the United States, but also global contemporary art. We will consider such issues in the wake of a recent spate of museum exhibitions canceled due to controversial content, the dismantling of monuments to colonialism and the transatlantic slave trade, as well as today's culture wars as conservative book bans make headlines and hate speech abounds. We will also explore new channels for arts funding, exhibition, and publishing that emerge in response to censorship. In addition to important texts by art historians including Sarah Parsons, Aruna D'Souza, and Rosalyn Deutsche, among others, we will also read interdisciplinary legal scholars like Sonya Katyal and Amy Adler who write from the perspective of law and policy. We will also read the landmark Supreme Court case NEA v. Finley. Assignments include an in-depth case study of a canceled exhibition.

CSPL381 Intermediate Public Practice
What are the possibilities and challenges of making work in the public domain? This intermediate studio course provides students with the framework, conceptual language, and technical means to develop ambitious projects in public space. Over the course of the semester, students will be introduced to a range of working methods, including new genre public art, research-based practices, site-specific projects, and collaborative practices. While the course focuses on contemporary issues and debates, it situates these topics within a set of broader global and historical traditions. Through group discussions, critiques, site visits, and presentations, the course will assist students in developing a series of works that build towards a self-directed final project. We look thematically at a range of sites as spaces of memory and belonging, sociality and resistance. We explore the manifold ways in which people have engaged with place through a range of forms, including roadside monuments, site-specific sculptures, landscape films, community-based performances, architectural interventions, collective rituals, and political protests. Attention will be placed on sites around Middletown in order to situate our research and practice. These may include Harbor Park, Middlesex Historical Society, Beman Triangle, Connecticut Valley Hospital, Colt Armory, Portland Brownstone Quarries, among others. Support will be provided to students along the way in negotiating relationships with local institutions and stakeholders. Supplementary readings will introduce students to questions related to spatial theory and practice, agonism and democracy, monuments and counter-monuments. Successful completion of the course will prepare students for advanced work in the public domain. Course is open to all students. Preference given to students who have taken ARST131 and ARST235 or ARST238 or ARST239 or ARST245 or ARST 251 or ARST286 or other course in a related discipline.

CSPL390Z Connecticut's Industrial Heritage
The aim of this course is to give students a better understanding of the historical industrial merits and legacy of Connecticut while considering the value and challenges of its physical and interpretive remains. While focusing on New Haven, students will be challenged to discover and synthesize Middletown's historically chief industries, industrialists, inventions, workforce, and remaining factory sites. Professor Caplan brings his experience as a historical architect, historian, genealogist, author, National Register consultant, and tour operator to provide students with a well-rounded understanding of how history, preservation, architecture, social science, and environmental justice come together in actual projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL397 Human Rights and the 2020 Elections
This seminar will examine the principal candidates for the presidency (and selected candidates for other major electoral positions) from the perspective of human rights. To begin, we will spend the first several weeks studying basic human rights standards, as well as the challenges to the promotion of international human rights standards in the United States. We will then turn to particular rights and clusters of rights, considering the policies proposed by various candidates and their implications for human rights. After review of the particular right or cluster of rights, students will work in small groups to research and present the proposals of the various candidates to the class. In addition, representatives of the candidates will be invited to engage with the class (as well as in broader fora on campus).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Prereq: **None**

CSPL399 Understanding the 2020 Presidential Election
In understanding the 2020 Presidential Election, students will learn how to read skeptically the political press and how to write critically about presidential campaign politics. Along the way, the course will touch on electoral history, political and social thought, public policy, media criticism, and much more. Students will read past examples of thought-provoking and influential commentary. They will read current coverage in the legacy press of the 2020 presidential election and come to class prepared to discuss the most important stories and issues of the week. Students will have the opportunity to learn about electoral politics and political writing alongside a veteran journalist. Students who have experience working for political campaigns will have a chance to share their knowledge and help the class incorporate their experience in a larger historical framework. They will have a chance to see their work published in the Editorial Board, the lecturer's daily politics newsletter. Students will attempt to do what political writers do in real-time: explain what's happening from a unique, particular, and informed point of view for the benefit of like-minded citizens seeking to achieve the ideal of self-government. In the end, the hope is that students see that campaign politics is simpler and more complex than it appears, but that neither is obvious without study, focus, and understanding.

CSPL405 Ideals into Practice
Through this course, students gain access to an e-portfolio to make connections between their academic curriculum and the practical experience they gain through campus employment, off-campus internships, community service, and extracurricular activities. By engaging in deep reflection about the skills they are gaining throughout their time at Wesleyan, students will be able to understand and explain to others how their liberal education prepares them for life after college. Permission of the instructor is required. Students must also obtain permission from their campus employer; when enrolling, students should register for the course and ask their supervisors to e-mail the instructor with their permission. Information for supervisors may be found on the Ideals into Practice website (idealsintopractice.site.wesleyan.edu). This course may be repeated for credit, but you may only count one full credit toward your degree.

CSPL480 Engaged Projects
Engaged Projects (EPs) are rigorous, self-designed endeavors in which a student studies a topic of their choice and completes a final project intended for a non-academic audience. Students are encouraged but not required to select a topic that is connected to another class or their major. Final projects can take the form of blogs, videos, a website, or other media; a work of art, an event, a workshop, a presentation, or panel; a policy proposal or analysis; a white paper or op-ed series; a business plan; and/or any other piece(s) thoughtfully designed for the public.

EP students will develop a self-directed research and project plan. They must enlist an EP Sponsor who will serve in an advisory/mentor role; Sponsors can be Wesleyan faculty, staff, alumni, or community partners; family members or friends; or other experts or professionals willing to play this role. Seeking and enlisting an appropriate Sponsor is a component of the EP learning experience.

In addition to conducting their own extensive research and producing a summative project by the end of the semester, students will write a series of reflections to document their progress and their learning.

For more information, visit https://www.wesleyan.edu/patricelli/engaged-projects.html.

CSPL493 Internship
This course may be taken up to two times for credit. Wesleyan has established a credit/uncredit internship course, CSPL 493, for students to receive 0.25 credits upon successful completion of an internship (paid or unpaid) and reflective coursework and documentation. The internship must include at least 40 total hours of work during the semester in which the student is taking this course. Credit cannot be awarded for past internships. Students must apply for enrollment via Handshake. Access the CSPL 493 information page on the Gordon Career Center website for application instructions and comprehensive course details: https://careercenter.wesleyan.edu/channels/internship-for-credit/

AMERICAN STUDIES

American Studies is a dynamic, interdisciplinary field dedicated to the rigorous examination of the United States' culture, history, and society through a synthesis of methodologies from history, literature, sociology, anthropology, cultural studies, and other disciplines. It explores the complexities of American experience, focusing on themes like national identity, race, ethnicity, gender, sexuality, class, and power dynamics. The field engages with diverse voices, cultural artifacts, and historical narratives, situating the U.S. within broader hemispheric and global contexts. By challenging simplistic or monolithic narratives, American Studies interrogates the nation's central myths, values, and contradictions, fostering scholarship that is both inclusive and critically balanced. The field's scope is expansive, encompassing the study of texts, media, social movements, institutions, material and visual culture, and more, exploring how U.S. identities are constructed, contested, and represented over time.

AMST115F Reproductive Politics (FYS)
This course explores the history and current status of reproductive politics in the United States. Particular attention will be given to the intersection of scientific and bioethical concerns with matters of social difference and cultural meaning. Issues covered will include: the history and legacy of the birth control movement; the ideological construction of "infancy" and "childhood"; changing attitudes towards pregnancy and childbirth; conceptions of parenthood; abortion rights; the fetal personhood debates; the regulation of pregnancy within institutionalized settings; disability, selective abortion, and genetic engineering; race, gender, and reproductive justice; and more.

AMST117F Social Norms / Social Power: Queer Readings of "Difference" in America (FYS)
This American Studies First Year Seminar is an interdisciplinary exploration of the privileges and penalties associated with "the normal" in the United States. We'll be centrally concerned with the ways bodily difference and social identity interarticulate with "normalness," locating individuals within hierarchical power structures. What is "normativity," if not a statistical norm? How are regimes of normativity produced, reproduced, and challenged?

Our focus is on queer studies, which we will approach through an intersectional lens, paying careful attention to the ways race, ethnicity, indigeneity, class, disability, gender, and sexuality intersect in social terrains of power. We will unpack and explore key concepts in American studies, including settler colonialism, compulsory ablebodiness, heteronormativity, biopolitics, neoliberalism, and ideology, drawing on a range of genres and disciplines, including memoir, ethnography, film, and theory in disability studies, queer theory, critical race studies, Marxist feminism, Native American studies, and trans studies. Along the way, we will encounter problematics ranging from disability and the "normal" to the American Dream, the "wedding-industrial complex," sexual "deviance" and desire, racialized state violence, the privatization of the public space, and the politics of queer/LGBT activism.

As a First Year Seminar, this course is writing-intensive and is structured to give you ample practice in core writing, reading, and presentation skills needed at Wesleyan.

AMST125F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

AMST130F Wilderness or Paradise? The Colonial World in the Western Imagination (FYS)
What do William Shakespeare's Tempest, Karl Marx's Capital, Georgia O'Keefe's Ram's Head, Bob Marley's Redemption Song, and Sterlin Harjo's Reservation Dogs have in common? What about Jean Jacques Rousseau's Discourse on Inequality, Mary Shelley's Frankenstein, Frida Kahlo's Two Fridas, Nina Simone's Mississippi Goddam, and George Lucas's Star Wars? All these works offer critical reflections on the process of European colonialization of the Americas that started in the late fifteenth century and extends to our days. They all grapple with the question of whether the New World was (and still is) an Edenic utopia or a hellish dystopia. And they all offer provocative answers and difficult new questions.

This first year seminar will explore how different thinkers and artists have imagined and reimagined colonialism in the Americas, from Alaska to Tierra del Fuego. We will also investigate how the representations they created have contributed to reinforcing or upending colonial relations. We will study cultural creators belonging to different groups, including indigenous peoples, enslaved and free Africans and African Americans, metropolitan and colonial elites, and Asian and European immigrants.

This course will introduce students to different forms of intellectual expression in the Western world--from philosophical treatises to movie series, passing through novels, paintings, and songs. To better understand these works, we will read academic texts and address the practical and theoretical foundations

of academic thinking. As we engage with primary and secondary sources on colonialism, the students will also learn practical skills ranging from formatting texts and citations to finding books in the library and articles on the internet to making a compelling argument in an essay or a research paper.

AMST170 Solidarity Forever: An Introduction to American Studies
This course is an introduction to the interdisciplinary field of American Studies. We will explore how American Studies scholarship engages "solidarity" as a subject of study and as a practice. We will consider how conversations in the field relate to resistance and activist movements across time and space, from the US/Indian Country to the transnational and the global. By covering vast topics and themes such as settler colonialism, carceral politics, labor organizing, the war on terror, and more, we will examine the questions, methods, and frameworks that animate and shape American Studies. We will reflect on the role of knowledge production in movements and struggles for justice.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST174 Popular Culture and Social Justice: An Introduction to American Studies
This course explores the interlocking histories of popular culture and social justice in the 20th- and 21st-century United States, with particular focus from mid-century to the current moment. By focusing on the ways in which social justice movements and ideologies have utilized and been informed by trends in art, film, television, music, and commercialism, we will interrogate critical concepts in the field of American studies, such as citizenship, belonging, difference, and equality. Topics covered will include feminism(s), antilynching, civil rights, labor and poverty, pro-choice, disability rights, queer liberation, leftism and countercultures, environmentalism, and animal rights.

Questions addressed will include, How has popular culture both advanced and hindered the progress of social justice movements? How has the idea of "social justice" changed over time? Which groups are included? What aims are articulated? How has the media portrayed and influenced social and political problems, and how has the rise of new media (from radio to television to the Internet and beyond) created new spaces for debating power and inequality?

Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST177 American Movies as American Studies: An Introduction to American Studies
Our aim is to see how movies from the 1930s to the present can help us grow as critical (and self-critical) American studies thinkers (and have fun--even as we question the effects and implications of this fun--doing it). Talkies appeared as a complex mass-cultural form of American studies, exported all over the world, precisely when the academic field of American studies emerged in the early 1930s. From the get-go, movies involved in mass-disseminating America's inventions of power have made available, in very entertaining ways, critical insight that can blow the whistle on how the reproduction of Americans and American ideologies are pulled off. Together we will explore the modern Americanization of power (hard power, soft power) and focus our exchanges on four intersecting concerns that movies can be particularly good at illuminating: (1) how culture industries (including movies) shape consciousness, needs, desires, incentives, values, and sense of belonging, and frame--limit--our vision of what constitutes problems and solutions; (2) how social critique (even movie critiques of movies) can be mass-popularized; (3) how America makes Americans, especially, into workers (even if they hate what they do and wonder about what and who they are working for) and weapons of various sorts (even if they are frightened and wonder about what and who they are fighting for and against); and (4) how and why America constructs difference (e.g., class, gender, race, individuality, national identity). This lecture/discussion course is a thinking-intensive and imagination-intensive critical project designed to engage compelling big-picture concerns--systemic matters--vital to American studies critiques.

Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST180 Entertaining the Masses: An Introduction to American Studies
This course will explore the ways in which people living in the United States entertained themselves from colonial times to the present. From the circus to movie theaters, from pubs to video games, from hunting expeditions to football matches, from church choirs to hip hop battles, we will use mass entertainment as a window into American culture. We will question what American society has considered fun, how leisure became separate from labor, how capitalists have commodified and authorities have disciplined entertainment, how different groups created and/or appropriated different forms of entertainment. Through these questions, we will study classic and new topics of and approaches to American Studies.

Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST200 Colonialism and Resistance
Why does colonialism matter to the fields of American Studies, Latin American Studies, and Caribbean Studies? What have been the consequences of colonialism for peoples of the Western Hemisphere? This course offers a transnational approach to the study of colonial modernity through a comparative analysis of colonial ventures and their far-reaching consequences. With a focus on the interactions of Indigenous, European, and African peoples, the course introduces a diverse range of issues and topics, such as the organization of production, including chattel slavery, indenture, and free labor; imperial competition and state formation; emancipation struggles; and Indigenous sovereignty.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**

Prereq: **None**

AMST201 Queer Theories
This seminar will give you a solid foundation in queer studies. Although "queer" is a contested term, it describes -- at least potentially -- sexualities and genders that fall outside normative constellations. This theory-based, reading-intensive seminar considers multiple genealogies of queer theory, from foundational texts and authors in queer theory, queer of color critique, trans theory, and crip theory, to lesser-known but critically important interventions. Structured as a series of conversations, we explore multiple locations of theory and notions of "queer." Rather than understanding queer studies as a singular school of thought, we will continuously problematize queer studies as a mode of analysis, asking: What kinds of bodies or desires does queer describe? What are the politics of queer? What are the promises of queer theory, and what are its failures? What is the future of queer? This course is excellent preparation for a queer studies concentration in American studies. Students should expect to end the semester confident of their ability to read and draw on a range of queer theories.

Identical With: **FGSS201**
Prereq: **None**

AMST203 Biopolitics, Animality, and Posthumanism: Junior Colloquium
This course asks what it would mean for the field of cultural studies to begin to include the category of the "human" within investigations of more traditional categories of social difference (including race, gender, sexuality, and so on). Historically, the category of the human has been taken for granted, as a biological marker imbued with particular intellectual and physical capabilities. Relatedly, the discourse of the human is often invoked in movements for political equality, inclusion, and enfranchisement (i.e., the call to "human rights"). Yet recent literature within the field of American studies broadly, and, more specifically, within the area of critical animal studies, has called these assumptions into question. In this junior colloquium, we will explore these critical turns in the field by considering the boundaries between the animal, human, and technological realms.

Important concepts addressed will include the utilization of animals as research subjects, food, and labor; the "nonhuman personhood" movement; intersectionalities between ideas of social difference and the posthuman; concepts of disability, debility, and capacity; technological enhancements of the human body; and cybercultural identities. Students will have the opportunity to engage with a wide variety of materials, including writing from the areas of critical race studies, feminist theory, and postcolonial theory. (Note: Students need not have familiarity with biopolitical theory; rather, the course will provide a primer in this area during the beginning weeks of the semester.)

AMST204 Saving America from Itself? Movie Interventions (Moore, Lee, DuVernay, Kopple): Junior Colloquium
We will convene four interventionist filmmakers--Michael Moore, Spike Lee, Ava DuVernay, Barbara Kopple--in a strategic dialogue to consider the American studies whistleblowing and anti-bamboozling potential of movies. Their movies have tried to sway elections, empower social movements, inspire protest, popularize national self-critique, study the tactics of top-down power (including scapegoating) and bottom-up resistance, and, perhaps, save America from itself. The many cultural-theoretical payoffs of their movies include moving us beyond any oversimple checklist tendency simply to observe representations of gender, race, and class. They help us question why these categories were produced in particular ways and help us interrogate (intersectionally and dialectically) how they interact with, rely on, and sometimes mask one another. Our four independent filmmakers--in trying to be changemakers--dare us not only to take a hard look at what kind of an America we have had and now have, but prod us, at times seduce us, to imagine more expansively what kind of America we might want to create. We will also put their movies in dialogue with related movies by D. W. Griffith, Boots Riley, Robert Reich, and others. And to establish a longue durée historical perspective, we will read Howard Zinn's epic classic A People's History of the United States. In terms of fields, our colloquium integrates movie studies, cultural studies, premises studies, resistance studies, and social transformation studies.

AMST205 Interdisciplinary Research Methods: Jr. Colloquium
This course will introduce students to interdisciplinary research methodologies and practices, with particular attention to critical themes within the field of American studies, including race, gender, and sexuality. Methods and practices covered will include (but are not limited to): close textual analysis, archival research, quantitative data procurement, interviewing tactics, ethnographic observation, the application of diverse theoretical frameworks, the Institutional Review Board, research ethics, and so on. Students will complete a variety of short assignments throughout the course of the term that will culminate in a final research paper. The class will be held in a seminar format that requires weekly reading, writing, and discussion.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST207 Primitive Accumulation: The Beginnings of Capitalism
Karl Marx wrote in Capital, Volume I, "The discovery of gold and silver in America, the extirpation, enslavement and entombment in mines of the aboriginal population, the beginning of the conquest and looting of the East Indies, the turning of Africa into a warren for the commercial hunting of black-skins, signaled the rosy dawn of the era of capitalist production." This course will address the violent beginnings of capitalism from the perspective of the Americas and their connections to other parts of the world. By addressing class struggle, imperial expansion, and environmental degradation, we will analyze the emergence of an unprecedented mode of production that now dominates the world and threatens human existence. But this will not be a simplistic history of good and evil, a moralizing tale. We will unpack the complex historical process and the overwhelming historical forces that go beyond the moral choices of individual human beings. We will look into the interactions between society and nature to reflect on how capital has made an indelible mark in human lives and the rest of living beings on our planet. We will study primary and secondary sources to reconstruct the history of extraction and exploitation that gave birth to the modern era.

Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST208 Visual Culture Studies and Violence
In this course, students will gain important foundational knowledge of the field of visual cultural studies. We will cover theories of the gaze, photographic sight, film and media, spectatorship and witnessing, museums and exhibitions, and trauma and memory, among others. Particular attention will be paid to issues of power, complicity, and resistance as we consider what it means to be "visual subjects" in historical and contemporary contexts. We will address how different media -- from photography, to television, to film, to the Internet -- transform our understanding of images and what it means to both "look" and "be seen." As a primary case study, this course will interrogate the politics of violence, focusing on the relationship between the production of visual culture(s) and acts of individual, collective, and state aggression. We will ask: How have images served to propagate climates of violence against marginalized persons? What are the ethics of looking at pain, torture, and exploitation? Do such images help us to work toward social change or create attitudes of indifference? How do images of war, prisons, pornography, death, crime, famine, and disease shape our understandings of citizenship, nationality, and identity? Finally, how do representations of social difference inform conceptions of violence and their place in the visual field?

AMST209 Cultural Theory and Analysis: Junior Colloquium
In this course, we will interrogate the ways in which we come to understand cultural representation and theories of social and political power within the field of American studies. We will analyze forms of representation using an array of theoretical and textual methods, from economic and class theories, to visual theory to feminist studies and critical race analysis, to theories of virtuality and freakery. We will engage with highly dense theoretical pieces as well as more popular cultural texts, such as film, documentaries, and websites.

Prereq: **None**

AMST217 Carceral Landscapes: From Colonial Invasion to the Prison Economy
This course explores the expansive history of surveillance, policing, and incarceration in the territory now known as California. Engaging Indigenous critiques of settler colonial power, we begin in the late 18th century when Spanish Franciscan priests and imperial soldiers enslaved Native people in missions along the Alta California coast. We will move through crucial sites, such as the first California legislature's 1850 Act for the Government and Protection of Indians, to the establishment of the US border patrol in the early 20th century, and the criminalization of mobility of Indigenous, Latinx, and mixed-race people from both sides of the US-Mexican border, considering how these cases illuminate Kelly Lytle-Hernández's insight that "mass incarceration is mass elimination." Reading across scholarship, archival sources, activism, and news coverage, we will discuss the relationship between militarization and carcerality locally and globally, from the American occupation of California during the Gold Rush (1849), to post-WWII racialized urban policing, to the current construction of the "security fence" along the US-Mexico border that cuts through Kumeyaay lands.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST218 Introduction to Queer Studies
This course will examine major ideas in the field of queer studies. Relying upon theoretical, historical, and cultural studies texts, we will consider the representation and constructions of sexuality-based identities as they have been formed within the contemporary United States. We will explore the idea of sexuality as a category of social identity, probing the identities of lesbian, gay, bisexual, and transgender to try to understand what they really mean in various cultural, social, legal, and political milieus. In doing so, we will ask, What does it mean to study queerness? What do we mean by "queer studies"? How do institutions--religious, legal, and scientific--shape our understandings of queer identities? In what ways do sexuality and gender interact, and how does this interaction inform the meanings of each of these identity categories? How do other social categories of identification--race, ethnicity, and class--affect the ways in which we understand expressions of queerness? Moreover, what does studying queerness tell us about the workings of contemporary political, cultural, and social life?

AMST221 Nationalism and National Identity in the United States: Jr. Colloquium
After decades of (seemingly) hegemonic globalization, recent events brought the issues of nationalism and national identity to the fore again. In this course, we will explore classic and new approaches to the nation state and the cultural phenomena associated with it. We will study the institutions, symbols, rituals, myths, and other elements that make up nationalism and national identity in the United States. We will investigate how different groups and communities in North America reinvent national culture, often creating clashing ideas of what the nation should be. From sports to literature, from holiday celebrations to federal legislation, from culinary to military operations, we will use a wide array of case studies to survey national culture. Our goal is to develop intellectual tools that will allow us to understand nationalism and national identity as contested, ever-shifting, and highly consequential parts of reality.

This course will take transnational and comparative approaches. We will investigate American national culture from the perspective of outsiders such as immigrants and colonized populations. We will also compare American nationalism with other nationalisms, including those of Western empires, non-Western nations, and even peoples without a nation state. These perspectives will help us better understand how global forces such as capitalism and imperialism shape national culture in the United States.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST225 Latinidad: Introduction to Latina/o Studies
This course will introduce major themes within the field of Latinx studies, using an interdisciplinary approach to analyze the experiences of Latinx people within the United States and throughout the Americas. Employing a range of historical, theoretical, political, and cultural texts, this class will ask students to think about a number of issues central to the field of Latinx studies, including migration, language, nationalism, indigeneity, education, labor, assimilation, and cultural imperialism. This course will also look at the ways in which intersectional identifications, including race, sexuality, and gender, operate within frameworks of Latinidad.

Methodologically, this course will draw from such diverse fields as ethnic studies, history, political science, border studies, gender theory, sexuality studies, critical race theory, and urban studies. As we utilize a broad range of texts and synthesize diverse perspectives and ideas, students will be asked to interrogate formative concepts, such as the border, America(s), and the nation. Central class queries will probe the boundaries of Latina/o identity, the working of intersectional identities, patterns of migration, and the ways in which institutional power shapes the contemporary Latinx experience.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST226 High-Tech Imperialists: Technology and America's Rise to World Power
How did Americans use technologies such as the railroad, photography, the machine gun, and electricity to advance their interests abroad? In this course, we will study the interconnected histories of technology and empire from the American Civil War to the First World War, the period encompassing a techno-scientific revolution that transformed human lives and power relations all over the world. This course adopts a broad definition of imperialism, reflecting on formal and informal strategies of expansion. It goes beyond US colonies and territories to inquire into how Americans engaged with other imperial powers and their colonial populations, advancing profitable -- and often destructive -- enterprises. It further asks how processes of internal colonialism influenced US power abroad and vice versa. Attentive to material reality, it examines the environmental impact of new technologies in colonial settings and how environmental changes disrupted local communities.
Offering: **Host**

Prereq: **None**

AMST228 Cancelled, Blocked, Banned
This seminar focuses on ideas, texts, and debates that have come to be considered politically and culturally provocative, perilous, or particularly acrimonious. We will read, think about, and discuss a host of issues that inspire discord, passionate debates, and a range of complex perspectives. Students will be asked to consider multiple -- often conflicting -- arguments and come to class ready to engage in good faith discussion. The class focuses on diverse topics and examines multiple perspectives surrounding each issue. Course discussions will include debates over reproductive healthcare, the legalization or prohibition of sex work, carceral politics and the drug war, nature versus nurture narratives and sex differentiation, challenges to free speech, diverse perspectives on best practice education policies (including affirmative action and standardized testing), as well as arguments as how to best achieve racial equity, equality, and justice.

Prereq: **None**

AMST233 Global Queer Studies
This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives. Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and and the transnational lives of Filipino gay men in New York. Our aim is to challenge and expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative) and to center the ways sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.

AMST235 American Literature, 1865-1945: The Americanization of Power
Together we'll explore not only the complexities of American literature from the 1860s to 1940s, but also how this literature is usable today and excels as critical equipment that can advance our understanding of the modern Americanization of power (put narrowly, we'll develop insights into a "democratic" capitalism, what some called a "Robber Baron" plutocracy, that pulled off and contrived to maintain systemic class, gender, and ethnoracial hierarchies to reproduce its power). As we unpack the relationship of literary form and social form, we'll trace connections between historical developments such as the gothic genre and gender ideologies, domestic romance and the social reproduction of labor, realism and mass-urbanism, naturalism and immigration, modernism and imperialism, and narrative experimentation and anti-racism. The creative works of Emily Dickinson, Mark Twain, Stephen Crane, Henry James, Charlotte Perkins Gilman, Charles Chesnutt, F. Scott Fitzgerald, Langston Hughes, Ernest Hemingway, Eugene O'Neill, Nathanael West, William Faulkner, Richard Wright, and Zora Neale Hurston will help teach us to be more imaginative readers of literature, ourselves, and what America was, is, and might be. While pooling ideas about this, we'll savor the pleasures of reading inspiring and transformative writing. This is very much a thinking-intensive course.

AMST240 Work to Rule: American Labor between Emancipation and Empire
Why have workers in the US fought to join labor unions and participate in collective workplace action when the boss invariably responds with intimidation, repression, and even violence? And how has collective worker power been leveraged both for and against American colonialism and imperialism? In this course we will explore the conflict between capital and labor in the US across diverse sites of struggle, including Southern slaves' "General Strike" during the Civil War, autoworkers' shop floor militancy during the Great Depression, challenges to organizing agricultural, domestic, and service labor, and recent union campaigns of athletes and academics. What does American labor's victories and defeats reveal about the relationship between capitalism, settler colonialism, neoliberalism, and empire? Considering the divisions of race, gender, and class, how have workers in the US enacted or failed to enact the famous International Workers of the World slogan "an injury to one is an injury to all"?

Prereq: **None**

AMST243 American Literature to 1865
This lecture course charts a selective path through the English-language literatures of conflict in North America. Our optic will be double: one eye on history, the other on literary form, and we will experiment with ways of dialectically combining these two lines of vision. The scope of the course is wide, but we will proceed in the style of an anti-survey. Rather than unifying America through a gathering of textual parts, we will attempt to understand how literary forms supply an important index of historical evidence even as their pleasures and contradictions refuse the stabilities of the evidentiary.

AMST243A American Literature on Fire: Conquest, Capitalism, Resistance: 1492-1865
We begin with a 1938 Langston Hughes poem, a north star shining light on American unexceptionalism and then move back in time: from Columbus's dismemberment and enslavement of the Arawaks when demanding gold; to Cabeza de Vaca's feel-good handbook for the conquest of indigenous peoples; to Puritan inventions of a "God" that pulls the trigger; to Franklin's blowing the whistle on a mercantile capitalism he supercharged with a secular work ethic; to a Declaration of "Independence" in 1776 that provoked alternative declarations written by workers, women, and formerly enslaved persons in the 19th century; to Poe's readings of a Divided States of America (race, gender, domesticity) as gothic; to Douglass's representations of the tactical artfulness and subversions of "slave" culture; to Hawthorne's deconstruction of the Americanization of power; to Thoreau's entwining of collective protest and what he hoped would be an individualized escape route; to Melville's attacks on imperialism, racism, and class domination; to Elizabeth Stuart Phelps's critique of domestic slavery; to Stowe's socially transformative antislavery novel (whose sentimentalization recirculated stereotypes). Along the way, we will draw on Howard Zinn's classic A PEOPLE'S HISTORY OF THE UNITED STATES to help historicize the Americanization of inequality. During our literary-intellectual time travel, we will engage some of America's most "on fire" writers who make possible insights into the ideological foundations of American cultures, identities, and hegemonies that provocatively illuminate America's situation today (and offer some lessons for how to change it). And, not least of all, we will have critical fun throughout.

AMST244Z Imagining the End: Neoliberalism and the Arts
Many of us now like to paraphrase the philosopher Frederic Jameson when he argued that it has become "easier to imagine the end of the world than the end of capitalism." As the recent deluge of post-apocalyptic movies and documentaries about melting glaciers makes clear, this is an accurate statement. Yet while most of us imagine how neoliberal capitalism will bring about the end of the world, others try to imagine the end of the status quo. Since neoliberalism became the global hegemonic system, artists of all kinds have been imagining ways we can survive and (perhaps) overcome it: think about the songs of Tracy Chapman or Residente, the street art of Keith Haring or Lady Pink, the movies of Chloe Zhao or Alejandro González Iñárritu, or the writings of Ursula Le Guin or Roberto Bolaño. This course explores how engaged art from the 1970s to the present has responded to -- and fought against -- neoliberal hegemony in the United States, Latin America, and beyond. Through the arts, we will explore the nightmares of global collapse and the dreams of a new egalitarian and sustainable society. In addition to analyzing movies, poems, short stories, songs, and street art, we will read theoretical and historical studies that help us understand how neoliberalism shapes contemporary culture and makes art into one of the few areas in which dissent can be expressed.

AMST250 Incorporation of America: Corporate Capitalism and the American Way of Life
This course will examine how corporations have shaped and continue to shape American society and culture. Moreover, we will investigate how corporate capitalism has influenced U.S. relations with other countries. The course will extend from the mid-nineteenth century, when corporate capitalism clashed with alternative ways to organize the economy, to the present, when the neoliberal project faces a major crisis. We will read academic and fictional works, watch movies and TV shows, and analyze works of art that illuminate the history of corporate capitalism. We will explore how corporations have fostered class conflict, imperial expansion, technological change, structural racism, environmental degradation, ideological fundamentalism, among other things. In addition to writing individual papers, we will engage in collaborative and creative works to reflect on how corporations impact our lives.

AMST256 Race and Medicine in America
This course will trace ideas of race in American medical science and its cultural contexts, from the late 19th century to the present. We will explore how configurations of racial difference have changed over time and how medical knowledge about the body has both influenced and helped to shape social, political, and popular cultural forces. We will interrogate the idea of medical knowledge as a "naturalizing" discourse that produces racial classifications as essential, and biologically based.

We will treat medical sources as primary documents, imagining them as but one interpretation of the meaning of racial difference, alongside alternate sources that will include political tracts, advertisements, photographs, and newspaper articles. Key concepts explored will include slavery's medical legacy, theories of racial hierarchy and evolution, the eugenics movement, "race-specific" medications and diseases, public health politics and movements, genetics and modern "roots" projects, immigration and new technologies of identification, and intersections of race and disability.

AMST260 Bioethics and the Animal/Human Boundary
In this course, we will explore the construction of the animal/human boundary through the lens of bioethics. We will define bioethics as the study of the ethical consideration of medical, scientific, and technological advances and their effects on living beings. At the same time, we will pay close attention to the cultural contexts in which these advances emerge, imagining the realms of scientific

progress and popular culture as mutually constitutive. We will consider topics such as cloning, organ transplantation, pharmaceutical testing, and gestational surrogacy, with a focus on the late 20th and early 21st centuries. We will begin by interrogating how ideas of the "animal" and the "human" are constructed through biomedical and cultural discourses. We will ask, How is the human defined? By intelligence or consciousness levels? By physical capabilities or esoteric qualities? Similarly, how has the human been defined against ideas of the animal? Or, what ethical justifications have been cited in the use of animals in biomedicine? What makes certain species "proper" research subjects and others not? What do these formulations tell us about our valuation of animal and human life, and what kinds of relationships exist between the two? To answer these questions, we will consult a wide range of interdisciplinary scholarship, from authors in the fields of animal/ity studies, bioethics and medicine/science history, sociology, anthropology, and philosophy. Students will also be exposed to the basics of biopolitical theory.

AMST269 New World Poetics
God and money, love and beauty, slavery and freedom, war and death, nation and empire: The themes of early American poetry will carry us from London coffeehouses to Quaker meetinghouses, from Philadelphia drawing rooms to Caribbean plantation fields. Our texts will range from pristine salon couplets to mud-bespattered street ballads, from sweetest love poems to bitterest satire. Digging deeply into the English-language poetry written, read, and circulated after the first English settlement in North America, we will trace the sometimes secret connections between history and poetic form, and we will listen to what these links can tell us about poetry and politics, life and literature in our own time. Our poets ignored false divisions between art and society, and so will we.

AMST270 Criminalization, Regulation, and Resistance: Introduction to Native North American History
This course explores Indigenous politics and US settler colonialism across the long 19th century, from the Constitution's Commerce Clause to the 1924 Indian Citizenship Act. We will examine how the US state relied on both criminalization and regulation of Native peoples' gender, sexuality, religion, social relations, and cultural and economic practices to expand and consolidate power on the continent. Readings will address how Native nations sustained their sovereignty and negotiated settler encroachment, covering conflicts around the liquor trade, allotment policy, the Ghost Dance, conservation's consequences, salvage anthropology, Progressive-era activism, and American citizenship.

AMST286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice
This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activisms, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

AMST290 Color Lines: The U.S. South and the Colonial World
The American South has always been a unique society. But it has never been exceptional or isolated from the world. Although located north of the equator, it shares many features with the Global South. Its history of conquest, slavery, patriarchy, rebellion, and white supremacy makes it similar to many tropical and semitropical countries that have been colonized by Western powers in modern times. In this course we will study the American South from the times of European colonization through the Civil Rights era. We will establish comparisons between the history of the American South and the histories of the Global South. How did the displacement of Native Americans in Georgia compare to the treatment of Indigenous populations in Australia? How did slavery in Virginia compare to slavery in Brazil? How did the emergence of the oil industry in Texas compare to that of Iran? How did Jim Crow in Mississippi compare to apartheid in South Africa? How did the struggle for civil rights in Alabama compare to struggles for decolonization in Vietnam?

In addition to a comparative approach, we will look into how Southerners engaged with people from the Global South. We will study primary and secondary sources that illuminate encounters between Southerners and foreigners. International trade, religious missions, infrastructural enterprises, political activism, and military operations, among many other events, put the American South in touch with the Global South. These encounters remade modernity, placing questions of racism, regionalism, and colonialism at the forefront of political and intellectual debates.

AMST298 From Seduction to Civil War: The Early U.S. Novel
This course examines the relationship between nation and narrative: the collective fantasies that incited reading and writing into the 19th century. We will study the novel as a field of literary production both in dialogue with European models and expressive of changes in national culture, a form that both undermined and reinforced dominant ideologies of racial, gender, and class inequality during this turbulent period of national formation and imperial expansion. We will consider the ways the pleasure of novel-reading depends upon, even as it often disavows, the world outside the story. Throughout our reading, we will trace the ways these novels both reflect and participate in the historical development of the United States during a period that spans national founding, the consolidation of northern capitalism and an exacerbated North/South division, expansion into Mexico and the Pacific, and civil war. Through close attention to literary form, we will continually pose the question, What is the relationship between literary culture and historical change? We will examine who was writing, for whom they wrote, and the situation--political, commercial--in which the American novel was produced and consumed. We will begin with

the novel of sentiment and seduction and conclude with reflections on slavery and racial revolution on the eve of the Civil War, all the time asking about the ways the novel might seduce us into either tolerating or resisting the way of the world.

AMST300 The American West in the Age of Capitalist Transformation
This course examines the transregional and transnational forces that converged into the locations that, throughout history, American society has called "the West." It also explores how the occupation and development of the American West inspired similar expansionist projects in other parts of world. We will investigate the transformation of vast territories previously inhabited by Native groups into a booming agro-industrial empire controlled by white men. Within this context, we will study the cultures that developed and clashed in the West. We will use academic texts and primary-source material such as travel narratives, letters, ethnographies, novels, drawings, photographs, and film. We will delve into the lived experience in the West and the images, myths, and visions that different groups produced about it. During the semester, students will write a research paper on a topic of their choice related to the American West in global perspective.

AMST301 Immigration and the Politics of Fear
This course will examine the role of fear in shaping ideas about immigrants. We start from the notion that emotions are social formations with particular histories and political significance. Therefore, we will refrain from assuming that fear is nothing more than a feeling or an automatic response and instead take it as a site that allows us to examine how psychological and legal discourses together define and dispute what is normal, reasonable, credible, plausible, real, appropriate, and timely. The seminar will cover themes such as risk and threat, race and origin, pain and injury, confession and testimony, fiction and figuration, and personhood and representation. We will look at newspaper articles, social media content, legal opinions, case law, court transcripts, and psychological evaluations, as well as texts in politics, anthropology, sociology, philosophy, literature, comics, and films. Students will write a short essay on the politics of fear. Throughout the course, they will develop their toolkit to critically reflect on an emotion of their choice.

AMST305 On Monsters: Race, Sex, Gender and the Other
The class will consider the category of the monster as a cultural site of meaning. We will explore narratives of the monstrous both literally and metaphorically, working from Jeffery Jerome Cohen's understanding of a monster as "as an embodiment of a certain cultural moment--of a time, a feeling, and a place." In situating the monstrous, we will consider Derrida's reminder that monstrosity is, at its heart, concerned with hybridity, border crossing, and miscegenation. In resisting clear categorization, the monstrous becomes terrifying, improper, and disorienting. As such, we will look at contested sites of American life, such as migration and the US/Mexican border, forms of racial hierarchy and social control, manifestations of postcolonial despair, the violence surrounding gender and sexual difference, as well as biopolitical and technological fears regarding the almost-human. The course will ask students to consider monstrosity as always already interwoven with cultural notions of racial and sexual deviance, which then contend with otherness through the guise of the supernatural. The course will also explore more literal manifestations of the monstrous, including the zombie, the doppleganger, the vampire, and the witch. In doing so, the monstrous takes shape as a way of facing what Cedric Robinson calls the "recovery of human life from the spoilage of degradation," or the idea that monstrosity centers on a politics of purity, a mode of analysis that thinks through the vulnerability of the corporeal self, the ravages of contamination, and the horror of existence despite, and in defiance of, necropolitical state praxis. This course requires students to watch weekly films in the horror/monster genre.

AMST306 The Politics of Emotions
This course treats emotions as social expressions that both shape and are shaped by the world. Drawing on ethnographic case studies, we examine the social life of sentiments and trace how emotions function as a medium through which narratives of American citizenship are formed. We begin with interdisciplinary scholarship on affect, emotions, feelings, and moods to establish a shared analytical framework for our case studies. Each week, we focus on the social formation of a specific emotion, including hate, anger, horror, terror, love, shame, resentment, and compassion. The course will be grounded in a critique of liberal concepts such as freedom, rights, autonomy, and human rights.
Offering: **Host**
Grading: **A-F**

AMST312 Americans Abroad: Mapping Nineteenth-Century Travel Narratives
In this course, we will explore international travel in the long 19th century. We will focus on narratives published by Americans who had the opportunity to travel beyond the United States. Through individual and collective activities, we will survey the trajectories of activists, diplomats, doctors, entertainers, entrepreneurs, journalists, missionaries, sailors, scientists, soldiers, students, teachers, tourists, and many others who engaged with foreign societies.

By analyzing travel narratives, we will delve into a globalizing new order of expanding empires and integrating capitalist economies.

The main product of this course will be digital humanities projects. Throughout the semester, we will conceptualize, design, build, and improve StoryMaps. Each student will develop their own individual project focusing on a set of travel narratives. Classes will alternate between historical and conceptual discussions about travel in the 19th century and technical matters related to digital humanities. Our goal is to reflect on the broad history of American foreign relations and the use of new technology to produce and communicate knowledge about the past.

AMST315 Entertaining Social Change
"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially true of "entertainment." Power that may not seem like power -- only, say, like "fun" or "amusement" -- can be especially powerful. A thread that connects all of our texts will be: how has the systemic critique of social contradictions been popularized as compelling and fascinating in modern times? A related concern: what are the seductions and violence built into "enjoyment" -- "enjoyment" that reproduces "Americans"? We will "entertain" the diverse strategies that progressive moviemakers have developed to entertain Americans -- to teach, persuade, seduce, provoke, upset, anger, and move them through laughter, tears, and, not least of all, ideas -- so that Americans will be more inclined to "entertain" social critique that inspires and envisions social change. Our critical focus will be on the popularizing (and sometimes the selling) of social critique in movies including Straight Outta Compton, Malcolm X, Medium Cool, Network, El Norte, Smoke Signals, Before the Flood, The Black Panthers: Vanguard of the Revolution, Salt of the Earth, Matewan, and The Big Short. We will place special emphasis on self-reflexive movies about "entertainment" and about labor/social movement organizing. Entertainment, we will see, plays a key role in organizing and reorganizing Americans. In doing so, it can place limits on our vision of what -- and who -- needs to be changed. By putting our movies in conceptual dialogue and making these limits more visible, we will help one another think, see, and feel beyond these limits. As we are "entertained" (and we will be) we will consider the stakes of being "entertained."

AMST321 Migrant Personhood: Against Tales of Witches, Aliens, Beasts, and Pests
The contagious animal, the irrational woman, the foreign threat, the mentally incompetent -- this course follows the circulation of these portrayals of immigrants beyond rhetorical injury. Drawing on what Colin Dayan calls "negative personhood," we will focus on the symbolic, narrative, and representational violence of immigration law. We start with readings and films that look into the history of the idea of the "reasonable man" in immigration policy, the truth-making effect of courtroom hearings, and the figures of speech that give shape to stories about what it is to be an American in the eyes of the law. We then explore forms of alternative representation that elude legal containment and instead seek cultural membership and political participation. We finish the course by examining poetic testimonials, psychotic narrations, dirty protests, escapes from ideological frames of address, collective autobiography, imaginative refusals, and radical Latinx utopias. We will draw from interdisciplinary material in anthropology, literary theory, performance studies, philosophy, legal theory, and feminist studies, among other fields.

AMST322 Visions of the Future: Capitalism and Colonialism in the World's Fairs
This course will explore the history of the world's fairs from the 1851 Great Exhibition in London to the 1939 New York World's Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world's fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

AMST347 Absences, Archives, and Adjudicating Criminalities in Settler Colonial States
Absence can refer to either distance or nonexistence. Archival inquiry embodies the former and can yield the latter. Both positions pose ethical, interpretive, and political problems. In this course, we will critically approach the archive to ask questions about how its evidentiary forms are used to narrate social relations of power, territorial claims, criminality, and adjudicate past wrongs. What genres of proof do archives produce and naturalize, and how do historical claims corroborate, refuse, or reinterpret "truth" and "knowing"? Readings span Native and Indigenous Studies, American Studies, History, Anthropology, and Postcolonial and Literary Studies, exploring how these approaches address the adjudication of individual and state crimes. The course focuses on settler colonialism and Indigenous politics in North America but engages other global examples.

AMST351 Queer of Color Critique
This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

AMST352 Settler and Native Ecologies of Power in North America
This course examines how settler colonial dis/possession, resource extraction, and spatial domination have generated ecological catastrophes in North America while at the same time shaping discourses of environmental "protection" and "preservation." Reading the work of historians, anthropologists, critical theorists, knowledge-keepers, and activists and examining sites such as national parks and infrastructure projects in the 19th, 20th, and 21st centuries, we will learn how efforts to define, manage, regulate, and exploit "natural" resources occur/red simultaneously with assaults on Native nations' sovereignty. We will explore how Indigenous people(s), in spite of continuous settler state violence and violations, have cared for and defended their lands and human and nonhuman relatives, drawing from a wealth of traditional knowledges and tribal political practices. We will end the course by bringing these critiques to current "environmental issues" such as wildfires, toxic contamination, and pipelines.

AMST353 Health, Illness, and Power in America
In this class, we will explore the interlocking histories of health, illness, and power in America. Special attention will be paid to the ways in which discourses of the healthy body have undergirded notions of citizenship and belonging in the nation. We will consider how processes of disease, disability, and contagion have been imagined through the lenses of social difference, including race, gender, sexuality, and class. We will address civil institutions designed to manage individual and population health, and we will consider theories of political power in the making of the "modern" body. Sample topics covered will include immigration policies and contagious disease scares; STDs and the politics of public health campaigns; physical fitness and the value of bodily labor under capitalism; the management of diseases that are symptomatic and those that are not; individualized approaches to medicine and medical difference; clinical trials and the ethics of human experimentation; pregnancy and childbirth; regulations surrounding blood and organ donation; changing rituals of bodily hygiene; preventative medicine and the call to personal responsibility; mental health policies and institutions; and pride movements surrounding the "unhealthy" body.

ANTHROPOLOGY

Anthropology is the study of the complexity and diversity of human and nonhuman life in an interconnected world. The Anthropology Department at Wesleyan offers courses on anthropological theories and methods, and topics including urban anthropology, globalization, media studies, consumer culture, social movements and activism, development and humanitarianism, and race, gender, and sexuality. Anthropology provides excellent preparation for a variety of careers that require an understanding of cultural difference in a transnational world. Social justice and ethical concerns have always been central to the discipline of anthropology.

- Undergraduate Anthropology Major (p. 1034)

ANTH101 Introduction to Cultural Anthropology
This course introduces students to concepts, theories, and methods of cultural anthropology. Lectures, readings, and audiovisual materials invite critical analysis of broader themes in contemporary anthropology, such as the nature of culture, the problematic notions of social evolution and progress, and the negotiation of power within and among diverse peoples.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH101Z Introduction to Cultural Anthropology
This course introduces students to concepts, theories, and methods of cultural anthropology. Lectures, readings, and audiovisual materials invite critical analysis of broader themes in contemporary anthropology, such as the nature of culture, the problematic notions of social evolution and progress, and the negotiation of power within and among diverse peoples.

Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH103F Anthropology of Gifts and Giving (FYS)
What is a gift? A commonplace understanding is that a gift is something given gratuitously, selflessly, and without the expectation of a return (just look the word up in any dictionary). Why, then, upon receiving a gift, do we feel indebted to the giver? And rather than free and gratuitous, isn't most gift giving compelled by socially significant events and regulated by relatively rigid rules? This FYS is an in-depth examination of gift giving as one of the most powerful forces binding individuals and groups in society into relationships of reciprocity. Students become familiar with critical anthropological and philosophical debates about the gift and consider their application to contemporary forms of giving, including traditional gift-giving events, sacrifice, philanthropy, volunteering and voluntourism, international aid, and types of giving made possible by advances in technology, such as organ donation and surrogacy. We attend to the economic, political, ethical, cultural, gender, and personal dimensions of gift giving in their remarkable power to make and break social bonds and undo or reinforce hierarchical relations at all levels of local and global society. Students draw a deeper understanding of the connection between generosity and power to inform their own ethics of gift giving, sharing of wealth, and sense of responsibility, wellbeing, and place in the world.

Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH111F Anthropology of Conspiracy (FYS)
This first year seminar explores the relationship between conspiracy theory and contemporary life through the discipline of anthropology. We learn how to read, discuss, and write about anthropological texts using conspiracy as a starting point. We trace the history of conspiracy theory, read ethnographies of conspiracy, and extend the concept of what counts as conspiracy to anthropological topics such as culture, class, ideology, myth, virtuality, race, affect, gender, and sexuality. We ask what the utility of conspiracy is in world-building, ritual, and belief structure inherent in both cultural cohesion and conflict.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH112F The Anthropology of Godzilla: Unconventional and Monstruous Perspectives on the Anthropocene (FYS)
In this First Year Seminar, we will use anthropology--the study of how humans make cultural, social, and political meaning in the world--in order to better understand contemporary global, ecological conditions through the lens of giant monster movies. It begins from the argument that "monstruous media" reflects our cultural worlds back at us in productive and insightful ways, and that Godzilla, in particular, helps us better understand the ways the Anthropocene is at once a product of human action and seems at the same time to totally exceed human capacities. We will combine some traditional readings with extensive film viewing in order to help students develop their academic writing and analytical skills.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **STS112**
Prereq: **None**

ANTH113F Anthropology of Gender & Sexuality (FYS)
This first year seminar explores the concepts of gender and sexuality through an anthropological lens, engaging with both theoretical and ethnographic material in order to fully immerse students in the experiences of the cultures being analyzed.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH120F Indigenous Environmental Justice (FYS)
Environmental justice--as both a social movement and an area of scholarship--emphasizes the disproportionate impact of environmental harm on human communities already marginalized because of factors like race, class, and indigeneity. While Indigenous activists and scholars have strategically mobilized under the banner of environmental justice, conventional U.S. environmental justice frameworks have not always acknowledged the status of Indigenous nations as sovereign political and legal entities or their distinctive articulations of justice and environment. Focusing primarily on North America, this First Year Seminar will explore how Indigenous land and water protectors have long put forward visions for collective futures that diverge from intertwined histories of social and ecological violence, including through multiracial collaborations and campaigns. We will engage texts from a wide range of disciplines, as well as non-academic materials and films.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH201 Key Issues in Black Feminism (FGSS Gateway)
This course surveys key issues in the historical development of black feminist thoughts and practices through readings of canonical works especially from the 1980s and '90s that contribute to this extensive body of knowledge. Our aim is to engage black feminist and womanist theorists, activists and artists from the diaspora who are exploring intersections of race, class, sexuality, religion, and other indices of identity affecting their daily lives. To that end, we will take an interdisciplinary approach to unpacking the historical tensions and politics and poetics in theory/practice, representation/self-making and expression/performance. We will also examine more recent turns in #BlackLivesMatter, #SayHerName and #BlackGirlMagic and conclude with Post-Zora Interventions--feminist interrogations on the borders anthropology, art, and activism.

Gen Ed Area: **SBS-AFAM**
Identical With: **FGSS217**
Prereq: **None**

ANTH202 Anthropology and/of Islam
This course examines the relationship between the discipline of Anthropology and Islam while also surveying the development of the Anthropology of Islam. Until the middle of the 20th century, Western study of Islam was dominated by Orientalists and colonial social scientists. As the study of Islam and its social worlds entered into the field of modern anthropology alongside decolonizing processes worldwide, the anthropological study of Islam was caught up in, and crucial to, the various critical turns in the discipline that faced as it attempted to decoupled itself from colonialism. With this as the backdrop, "Anthropology and/of Islam" takes on the rich and varied, often complicated, canon of the "Anthropology of Islam" with a particular focus on the Middle East and North Africa primarily between 1975 and 2025 but with an eye to the field globally. It also also attends to the ways in which this field has been responsible for paradigmatic shifts in the Anthropology itself.

Prereq: **None**

ANTH203 Sex, Money, and Power: Anthropology of Intimacy and Exchange
Sex and money--intimacy and economy--are often imagined to occupy distinct and separate spheres. Sex and intimacy are located in the private or domestic realm, in spaces of leisure, feelings, care, and personal connections. Money and economy, on the other hand, are purportedly public, located in the market and tied to labor, rationality, and impersonal (non)-relations. This course brings these spheres together, focusing on the links, exchanges, and circuits between the intimate and the economic in diverse cultural contexts.

Drawing on anthropological, feminist, Marxist, queer, and critical race theory, we will build

working definitions of key concepts: intimacy, division of labor, domestic labor, sexual labor, exchange, commodity, value, neoliberalism, consumer culture, and more. We'll test, apply, critique, and expand these concepts as we work through ethnographic case studies on contemporary sex work and tourism, marketing and pornography, reproduction and domestic labor, marriage, class and sexual lifestyle, labor and care work, and sex stores and commodities. We will connect economic, cultural, and political formations with race, ethnicity, nation, sexuality, class, and gender, scaling up to consider global and transnational exchanges and down to consider how these circuits impact families and communities. Throughout, we will ask: Whose labor is valued and recognized, and why? How do bodies accrue value, and in what kinds of marketplaces? When are intimacies--sexual and social--commoditized? How is race, gender, and sexuality central to these exchanges? How do new transnational circuits constrain and/or empower people? And finally, who benefits from these relations, and who does not?

Gen Ed Area: **SBS-ANTH**
Identical With: **FGSS223**
Prereq: **None**

ANTH205 Borderlands in the African Mediterranean and Beyond
The past decade has seen one of the largest mobilizations of human migration in recent history. This migratory flow is usually discussed within spatial frames such as movement across borders, between countries, and across the sea. This course departs from those narratives by bringing into focus the routes, social worlds, and systems of exchange that emerge during time spent between borders, a time often eclipsed as "just waiting." The beginning of the course sets the theoretical tone for our readings and discussions by revisiting how anthropology has questioned the stability of the linkage between culture and space, and placing this into the context of scholarship on liminality and borderlands. Subsequently, we will examine ethnographic studies, as well as some literary texts, that focus on migration and immigration primarily across the African Mediterranean, with comparative examples drawn from South and North America and Western Asia. The course's goal is to trace the communal sentiments enmeshed in these routes and worlds and to inquire what they may imply for political and subjective belonging, beyond narratives centered on the anxieties that emerge once "migrants" enter into European and North American territories.
Offering: **Host**

Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH206 Ethnography of the American Rural
The rural stands as a fraught American symbol, positioned in stark contrast to its corollary: the urban and its cosmopolitan subjects. The American rural is variously represented as vulnerable, disappearing, backwards, regressive, slow. In this course, we elucidate the texture of the American Rural by engaging with ethnographic writing from the early 20th century into the contemporary. In exploring the rural as a meeting place of working-class expressive cultures, an atmosphere of slow or strange time, a dramatic history of industry and agriculture, a notoriously tense racial zone, an icon of severity, and a place of exuberant stories and poetics, we uncover the vital ideological function of the rural as the urban's dark twin in American myth throughout history and today.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH208 Crafting Ethnography
This course is an introduction to the craft of ethnographic research and writing. In the first half, we will explore some of the research methodologies anthropologists use to understand, interpret, and analyze culture. Each student will choose an ethnographic field project for the semester and practice ethnographic methods (participant observation, interviewing, virtual ethnography, auto-ethnography, visual representation, and more). In the second half of the course, students will begin to write their ethnography, practicing writing in a variety of styles and genres (including realist, reflexive, dialogic, engaged, and experimental). Guided, weekly peer workshops throughout the semester will give students a chance to hash out and talk through questions of ethics, positionality, representational politics, and the improvisational felicities and challenges that arise during fieldwork and writing. This course will give students a solid grasp of ethnographic methods and how anthropologists construct ethnographies. It is ideal preparation for ethnographic theses and essays during senior year.
Offering: **Host**
Grading: **Cr/U**

Gen Ed Area: **SBS-ANTH**
Prereq: **ANTH101**

ANTH209 Tradition & Testimony: Protecting Native American Sacred Lands, Ancestral Remains, & Cultural Items
This course will explore the historic genesis of present-day U.S. and international policies toward Native American peoples and other indigenous communities. In addition, studies will include traditional indigenous and tribal perspectives, investigate indigenous-specific origin stories and the connections these stories have with historic events and places, and take a hard look at repatriation policies. Students will investigate several case studies involving current issues Native American communities are facing in repatriation and protecting sacred places, both local and national.

Gen Ed Area: **SBS-ANTH**
Identical With: **ARCP209**
Prereq: **None**

ANTH210 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary

history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP210, IDEA205, STS211**
Prereq: **None**

ANTH211 The Politics of Place
How do we come to a know a place? How are senses of place enacted and with what consequences? This course will focus on "place-making" as a historical, emergent, and contested process. Through course texts, films, and ethnographic exercises, we will explore places as sites of individual and collective self-making, power consolidation, not-only-human-collaboration, and the provisioning of specific futures. While anthropologists will be our primary guides, we will also engage scholarship from Black studies, Indigenous studies, history, and ecology. Although we will consider examples of place-making from around the world, our primary focus will be on the U.S. with a particular focus on Middletown/ Mattabesset. Taking settler colonialism and racial slavery to be foundational to local and national projects of place-making in the U.S., we will explore how memory, landscape, affect, political economy, and history interact in more-than-human social worlds.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH212 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.

Identical With: **ARCP203, ENVS203, STS203, IDEA203**
Prereq: **None**

ANTH213 Indigenous Anthropology
In this course, we will explore what anthropology looks like from an indigenous perspective. Focusing on four significant texts by indigenous anthropologists, we will explore concepts of indigeneity, mobility, gender, DNA, and indigenous rights and sovereignty as they are articulated between anthropology and indigenous studies. At the same time, we will examine how anthropological research and writing can be conducted from the perspective of the historically colonized as opposed to the colonizers, navigating the ambiguities of anthropology's own legacy as it is rearticulated by scholars from diverse positionalities and perspectives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH214 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP204, ENVS207, IDEA204**
Prereq: **None**

ANTH215 Nature/Culture
In this course, we are going to explore--and problematize--the boundary between the so-called "natural" world and human social and cultural life. Rather than assuming that "nature" is something that already exists in the world that humans have systematically excoriated and transformed, we consider instead the idea that nature and culture are fundamentally co-constitutive concepts--that is to say, that one cannot exist without the other. As we go, we will explore pressing concerns such as the boundaries between human and non-human, the nature of the Anthropocene, the question of what it means to be "modern," and the power of ecological politics in our contemporary orders of global capitalism.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **ENVS218, STS255**
Prereq: **None**

ANTH217 Anthropology of Science
What are scientific facts? How do we know what we know? In this course, students will gain an introduction to thinking about science and technology as cultural practices shaped by power, politics, race, indigeneity, gender, and sexuality. Students will explore how anthropologists, long interested in how "culture" works, have recently turned their gaze toward critically examining the cultures of people in positions of technoscientific power, including nuclear scientists, Wall Street analysts, drone weapon designers, climate scientists, molecular biologists, and more. Students will also be trained in conducting ethnographic fieldwork on a group of experts in their own communities in order to ask questions about scientific rituals, truth-making, and distributions of power and privilege. Students who received credit for SISP 265---Introduction to Science as Culture may NOT enroll in this course for credit
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**

Identical With: **STS265**
Prereq: **None**

ANTH220 Anthropology and (Anti)-Blackness
This course considers the intellectual and institutional developments of psychoanalysis and anthropology in the 19th and 20th centuries and the ways in which these disciplines defined a figure of the human that excluded the "African," the "Black," "the Negro" from the capacity to signify the universal. By examining these constitutive occlusions of race, the course considers the ways in which the "unthought" status of racial blackness, in particular, animates and aggravates the discipline of anthropology. The course will move from introductory readings in classical anthropology and psychoanalysis and a selection of works in Black critical thought towards contemporary scholarship that reappraises these fraught questions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **AFAM223**
Prereq: **None**

ANTH221 Multispecies Ethnography
Human life is forged through constitutive relationships with a vast array of nonhuman actors. While anthropologists have always recognized this, escalating concerns about the nature of these relationships in a moment of great ecological precarity has led to a profusion of ethnographic attention to the human/nonhuman interface. In this course, we will engage multispecies ethnographies from around the world and consider how multispecies approaches connect to the analysis of subjects like race, gender, and nationality. We will also explore how grappling with the representational challenges posed by species difference can sharpen ethnographic attunement in all research contexts.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **STS228**
Prereq: **None**

ANTH222 Magic of Despair: Terror, Colonialism and Healing
This course proceeds through the haunted lens of colonial medicine and its afterlives. The course investigates both the ways in which madness, sorcery, and healing became entangled in the racial logics of empire. Drawing on anthropological theory, historical texts, and critical insights from black critical thought, the course investigates the production of subjectivities that emerge from encounters between colonizer and colonize, doctor and patient, body and world. Tracking the appearance of ancestors, witchcraft, possession, and cults of affliction across colonial and contemporary ethnographies, we consider how constructions of health and pathology were means of colonial governmentality and came to constitute the ethical terrain of colonial capitalist modernity. The course concludes with reflections that trace connections between the concepts of neurodiversity, disability and decolonization. The course is especially focused on Africa and its diaspora.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH227 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT226**
Prereq: **None**

ANTH230 Anthropology of Cities
This course is an introduction to the practice of urban anthropology. Attention is placed on the intellectual challenges recent local and global urbanization trends present to us in our attempts to think and write about cities today. We will reflect upon the production of space and place, the creation of "other spaces" through borders and limits, and the making of meaning through everyday practices and experiences in the city. We will consider how cities become foremost spaces for the exercise and contestation of power, for social cohabitation and conflict, and for cultural creation and repression. Class discussions will also focus on fieldwork methods and problems of ethnographic representation and writing in preparation for a research project that will culminate in an urban mini-ethnography.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH233 Global Queer Studies
This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives.

Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and and the transnational lives of Filipino gay men in New York. Our aim is to challenge and expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative) and to center the ways sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.
Offering: **Crosslisting**

Prereq: **None**

ANTH241 Critical Interculturality and the Pedagogy of Unlearning
This course is offered by our study abroad partner, Pachaysana, online from their site in Ecuador, with local educators.

An ever-growing number of students, scholars, and activists criticize our educational institutions for upholding colonial structures, and via numerous movements are calling for "decolonization." Any effort to decolonize our education must go well beyond the content of what we teach in the classroom. In addition to what we are learning, we must explore how we learn, where we learn, and with whom we learn. We also must think about what "decolonization" means, taking into consideration the lands on which our campuses and communities are located. This course addresses decolonization through the lens of critical interculturality, referring to Catherine Walsh's critique of multiculturalism as functional or relational interculturality. Bringing in readings from Indigenous and Latin American scholars and taking part in workshops facilitated by local Ecuadorian community members, we will use interactive methods to explore some of the most challenging concepts related to decolonization, including "decolonization is not a metaphor," epistemic justice, border thinking, and embodied methodologies. Those concepts will then be examined with regards to the realities on our college campuses and our communities, and we will begin to dream about moving from the "functional" to the "critical." By the end of the course, informed by the readings and interactions with community-based educators in Ecuador, students will formulate clear questions and identify potential strategies for applying critical interculturality at their college campuses.

ANTH242 Other Worlds Are Possible: Life Against and Beyond Neoliberal Logics
This four-week intensive course examines radical challenges, in theory and on the ground, to mainstream neoliberal capitalism and development strategies promoted by international organizations such as World Bank and the IMF. After the 1980s, considered by many as "the lost decade" of development, some scholars and practitioners declared the development enterprise as fundamentally wrong: It was a misguided and violent neocolonial project that could never provide the answer to inequality and poverty. These radical critics argued for building a "post-development" era. In this course, we look at the conceptual history of the term "post-development" and also examine what post-development life looks like on the ground, among dispossessed communities. We will focus on lived and imagined challenges to neoliberal capitalism. We spend the first week at Wesleyan, brushing up on the critical ideas and movements that have emerged out of Mexico (and Latin America, broadly) over the past four decades in reaction to mainstream development discourse. We will then explore these ideas and lived alternatives in Oaxaca, Mexico. We will spend three weeks learning about and working with marginalized communities that are rejecting capitalist development and building and experimenting with living a "good life" (buen vivir) on their own terms.

ANTH243 Medical Anthropology
Situated at the intersection of the clinical and social sciences, medical anthropology seeks to understand bodies, afflictions, healing, and care in cross-cultural contexts. This course serves as an introduction to the exciting field of medical anthropology. Students will begin by mastering dominant approaches within medical anthropology for studying the body as a site of meaning, a moral battleground, a biosocial entity, an object of regulation and control, and a tool of resistance and change. We will then turn our attention to different kinds of bodies in distress and to the therapeutic responses they invoke (or fail to invoke) from healers, doctors, kin groups, aid workers, and state actors. Of particular concern will be those aspects of healing that challenge commonsense notions of how therapies work and where they may fall short. Specific concepts and topics to be covered include illness narratives, idioms of distress, structural and symbolic violence, culture-bound syndromes, nature/nurture debates, ritual healing, high-tech medicine, and humanitarianism.

ANTH244 Television: The Domestic Medium
Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

ANTH249 From Metropolis to Megalopolis
What is the urban experience today? Are the old European metropolises, the global cities of New York or Tokyo, and the new megalopolises of the Global South commensurate entities? What are the theoretical and methodological challenges we face in thinking about "the urban" today, given the vastly different histories, trajectories, and physical and social realities of cities around the world? This course is an introductory and interdisciplinary survey of urban theory. We will critically examine "the city" as a transhistorical category of analysis and focus on issues of anthropological concern regarding the experience and epistemology of urbanization and urban life. No prior background in urban studies is expected, but an interest in theory is a must.

ANTH250 Identity and "Pacha" (Land-Based Knowledge and Re-imagining Community) - Taught from Ecuador
This course is taught from Ecuador by our study abroad partner, Pachaysana.

According to indigenous Andean scholars, Pacha refers to the time-space continuum, or as the "everything around and inside us." This course asks students to challenge their identities by broadening their epistemological and ontological lenses to see their individual and collective lives as they relate to

Pacha. To synthesize this complicated process, we ask participants to examine who they are as related to the ever-changing ecology in which they live. For this course, ecology is approached broadly, referring to the Greek origin on the word oikos, meaning home. We take advantage of our virtual exchange and examine home as an interconnection of how we relate to "place and space," exploring our ecology as the triad of our immediate territory (llakta in Kichwa), our surrounding natural environment (allpa in Kichwa), and our global and pluriversal space (pacha). Throughout the course, we use an interdisciplinary lens to examine "who we are" as related to this diverse understanding of ecology, taking into consideration that our ever-changing environment includes an ever-changing human story. Readings are transdisciplinary, coming from the fields of anthropology, sociology, human geography, gender studies, ethnic studies, history, the arts, and development studies. Toward the end of the course, after examining certain theories and case studies, we will imagine the reconstruction of our identities contextualized to pacha, space, place, ecology, oikos, and home.

ANTH254 Self and Other in Cross-Cultural Encounters (CLAC.50)
This course is open to students currently enrolled in ANTH101: Introduction to Cultural Anthropology or in ANTH103: Gifts and Giving. It is intended for students with an interest in improving their spoken and written Spanish through an exploration of the problems and possibilities of cultural anthropological practice. This exploration will happen via class discussion and short ethnographic research assignments. The course will be conducted in Spanish and is open to students with some level of proficiency: from intermediate to advanced and to heritage speakers of the language. Students are expected to be currently enrolled in, or to have previously taken, ANTH101 or ANTH103. Email the instructor for information about alternatives to this requirement.

ANTH256 Anthropology of the Senses
How do we know what we know? Is seeing really believing? And what about hearing, smelling, tasting, and feeling? This course explores Anna Tsing's provocation to "look around instead of ahead," asking: what kinds of participatory observation of the senses help us identify what we know about the world? Through readings, lectures, short form writing, and field trips, we examine the role of the senses in forming what we know about ourselves and others. Writing and research assignments develop tools for documenting, analyzing, and communicating our senses and work towards a critical acknowledgment of sensory hierarchies. Our course readings consist of selections from theories of affect, sound studies, and food studies, as well as key texts in cultural anthropology in order to build an appreciation of the range of sensory information available to us and the strategies we use to communicate our sensory worlds. Our goal is to probe how ethnographic work sensitive to the multidimensionality of the human sensorium can discover and propose real strategies for human vitality.

ANTH257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.

ANTH259 Development, Disasters, and Beyond: The Global Politics of Aid
Development is one of the most important ideas of our times. It is a powerful way of reorganizing the world into the Global South and the Global North (or the Third and First Worlds) and promising modernity to "backward" places and people. It is an equally powerful way of intervening in "underdeveloped" regions in the name of progress and beneficence through aid programs. Our purpose in this course is to use the spy lens of anthropology to critically examine the global politics of development aid, whether given for poverty alleviation, infrastructure projects, disease and healthcare, or disaster relief. While development aid is certainly a potent way to exert power over and regulate Third World Others, it is also a fiercely contested space of struggle. This course approaches it as a "problematic"--an unsettled, contentious, and unpredictable formation.

ANTH260 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH267 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

ANTH274 Self & Social Transformation
Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault's later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood's dawa movement from Egypt, Weight Watchers, and finally "ballroom" culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

ANTH275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.

ANTH276 Museum Collections: Ethical Considerations and Practical Applications
Serving as a broad overview of museology, this course introduces students to the principles underlying the foundations of museum work and collections stewardship. Topics covered will include the origins of museums and collecting, the rationale behind museum policies, and the legal frameworks and professional standards that guide collections management. Ethical considerations surrounding issues such as NAGPRA/repatriation, decolonization, accessibility, looted artifacts, and cultural patrimony will also be covered. Finally, students will explore the practical aspects of preventive conservation, museum documentation, and exhibition development. Although topics covered in this course will apply to a variety of museums, the primary focus will be on cultural heritage collections. Readings and class discussions will be supplemented with hands-on exercises using the Wesleyan University Archaeology & Anthropology Collection.

ANTH279 Eating Others: Histories and Cultures of Animal Edibility
For many people, animals form a significant and cherished part of their diet. Indeed, humans have used other animals as sources of nutrients for hundreds of thousands of years. What can these animal-based dietary practices tell us about humans and their relationships with other animals? Of course, these inter-species relationships have varied as radically across time and cultures as the dietary practices that have shaped them. To better understand some of these practices and the relationships they generate, this course will explore the following questions: How did animal-based food practices develop from pre-domestication to the contemporary era of industrialized animal agriculture? How have cultural categories of "edibility" developed in different cultural contexts? What is meat, and how does it differ from inedible flesh? How have gender, class, race, sexuality, and other categories of difference intersected with and shaped animal consumption practices in different times and contexts? How has animal consumption shaped and been shaped by animal ethics, philosophy, and scientific knowledge production? How has large-scale animal consumption contributed to the ecological crises of the Anthropocene, and how have these in turn affected animal consumption practices? What is the future of animal-based food? This course will use ethnographies, historical and legal analyses, and philosophical inquiries to examine the histories and cultures of animal edibility. Specifically, it will focus on topics including human evolution, animal domestication, slaughter practices, industrialized animal agriculture, indigenous ecological ontologies, hunting, dairy and egg consumption, cannibalism, cultural conflicts over the edibility of specific species, and recent technological innovations that can produce animal products without animals.

ANTH285 Film and Anthropology
Film & Anthropology is an exploration of the cross-pollinating relationship between ethnographic and filmmaking methods and styles. This is, in part, an effort to understand the contributions of both to the observed and documented experience of cultural life. We will watch films weekly and discuss them, as well as respond to them individually in weekly critical précis. We will, in the course of these viewings, come to some consensus as to what we mean by ethnographic and cinematic elements. The films themselves will cross genre boundaries, running the gamut from "traditional" ethnographic films to various

forms of documentary and experimental film that in some way address or explore what I consider ethnographic elements. We will cover canonical early ethnographic work (Gardner, Asch, Marshall), feminist experimental interventions in ethnographic film (Minh-Ha, Varda, Deren), and contemporary work that experiments with ethnographic elements, and we will synthesize various genres into new forms of long-form documentary, ethnofiction, and trance film (Marker, Oppenheimer, Sensory Ethnography Lab, Gonzalez, Rosi, Minervini, Kuchar). We will observe the progression of style through the 20th century into the 21st, with the various intellectual threads of post-structuralism, creating modifications of centering the experience and voice of the oppressed, narrative reflexivity/abstraction/unreliability, formal experimental editing styles, the decolonial method as filmmaking practice, and the historicization and interrogation of anthropology as a fraught discipline.

ANTH286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice
This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activisms, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

ANTH290 Style and Identity in Youth Cultures
This course focuses on young people's engagements with commercially provided culture and their implications for identity formation. We begin in the postwar United States, when producers of symbolic goods, such as movies, music, and clothes, began aggressively tailoring products for young people; over the rest of the 20th century and into the 21st, new youth-oriented cultural commodities and sites of consumption have been used by young people in diverse ways to define themselves in relationships to adult society and to other young people. We will examine young people's intensifying involvement with the cultural market, with attention to both the diversity of youth-cultural formations that have emerged within the United States and to the global circulation of Euro-American youth culture. Using case studies, we will consider the ways in which young people's consumption practices have both reinforced and transgressed intersecting boundaries of class, race, gender, and nationality. An overarching concern in the course will be to assess whether or to what extent particular cultural practices may help prepare young people for positions of privilege, reconcile them to structural disadvantages, or provide them with resources to challenge the dominant society.

ANTH295A Theory in Anthropology: Anthropology and the Experience of Limits
Theory in Anthropology courses are core courses for the major, designed to elucidate historical influences on contemporary anthropological theory. While precise topics may vary from year to year, the overall goal of the courses remains the same: to familiarize students with the main traditions from which the discipline of anthropology emerged and to explore the diverse ways in which contemporary anthropological practice defines itself both with and against them.

This course considers the possibilities of an anthropology of transgression, excess, and unreason. This is an anthropology of all things cultural that work outside the logic of function and utility--that is, of actions and events that, while being eminently social, exceed reason and rational explanation. We will take as our point of departure an understanding of political economy that no longer has production and rationality as its core principles but rather consumption and waste. For this "general economy," as Georges Bataille called it in opposition to a "restricted economy" focused on utility, he drew from the anthropology of his

time and its study of societies organized around complex systems of gift-giving, collective ritual, and periods of wasteful consumption (through festivals, for example). Ultimately, Bataille sought to formulate a critique of the early-20th-century European political and economic order, which emphasized individualism, rationality, and profit and which, he believed, fostered disenchantment with liberal democracy, totalitarian impulses, and war and calamity.

Class readings and discussions will be organized around topics such as profitless expenditure and the festival; gift-giving and sacrifice; taboo and transgression; formlessness and abjection; sex and erotism; and subjectivity, excess, and the experience of limits. Students will develop research projects on these and other topics of their interest, which could include theoretical and ethnographic explorations of, for example, particular festivals, games of chance, religious experience, the writing of poetry, nonreciprocal giving (organ donation, surrogate motherhood), and the experience of extreme sports and high-risk tourism.

ANTH295B Theory in Anthropology: Anthropology of Affect
Theory in Anthropology courses are core courses for the major, designed to elucidate historical influences on contemporary anthropological theory. While precise topics may vary from year to year, the overall goal of the courses remains the same: to familiarize students with the main traditions from which the discipline of anthropology emerged and to explore the diverse ways in which contemporary anthropological practice defines itself both with and against them.

This semester, our topic is the anthropology of affect. Affect: to affect and be affected. Anthropologists and other social theorists from Durkheim onward have considered questions of bodies, sensation, emotion, and social change. In recent years, the "affective turn" in the humanities and humanistic social sciences has brought renewed attention to these dynamics. For some, affect is contrasted with emotion; it is potential or capacity, not set cultural meaning. For others, affect is contrasted with structure or form; it is bodily sensation or intensity--dynamic, energetic, mobile. And for others still, affect might enable us to grasp how it feels to inhabit a life world, a particular atmosphere, texture, sensuality, the feel of things.

This course explores the genealogy and range of theories of affect, foregrounding anthropology's distinctive contributions to and critiques of the study of affect. We'll discuss ways that centralizing affect might disrupt dichotomies of structure/agency, opening up modes of analysis that are not centered on cultural meaning-making, and enabling us to explore forms of life that exceed human subjects and socialities. Readings will tack between more theoretical essays and ethnographic representations of affect, sensuality, mobility, and emotion. Weekly experimental sensoriums, designed to attune us to the world, are a central component of the course.

Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **ANTH101**

ANTH295D Theory in Anthropology: Anthropology and the Modern Media
This course considers the relations among symbolic representations, modern media, and social practices of imagination. Taking the Durkheimian theory of collective representation as a point of departure, we will first look at the role of rituals and myths in oral cultures, with emphasis on the notion that human beings add to the world through representation and inhabit the worlds they imagine. We will go on to interrogate the ways in which the formation of media industries in capitalist societies has transformed the role of imagination in social life, both within and beyond the societies where those industries emerged. Cultural forms may have always had extrinsic as well as intrinsic origins, but in a world where the products of large, centralized media industries circulate nationally and globally, the resources of imagination increasingly come from outside of local communities, from urban centers and other nations. The consequences of such national and global flows, however, are neither uniform nor predictable, as images and narratives are locally received and negotiated. In exploring the relations between media production and reception, we will look at critical theories of media in Euro-American societies, as well as ethnographic studies of the reception of Western media forms in other parts of the world, the role of media from both the host country and the home country in immigration, and the production of indigenous media. Methodologically, we will consider the relationship between anthropology and the interdisciplinary fields of cultural and media studies. Class readings and discussions will be organized around topics such as media technologies and modern societies, the role of the media in the transformation of time and space, media and modern subjectivities, broadcasting and national identities, the organization of particular mediascapes, taste, identity, and popular media, mediated citizenship, media and cosmopolitanism, movie-going as public experience, the formation of hybrid identities through media consumption, soap opera, melodrama, and gendered subjects. Readings by Emile Durkheim, Claude Lévi-Strauss, Jean-Pierre Vernant, Pierre Bourdieu, Marshall Sahlins, Raymond Williams, Stuart Hall, John Thompson, John Frow, Arjun Appadurai; as well as ethnographic studies of media consumption and production by Brian Larkin, Lila Abu-Lughod, Faye Ginsberg, Sunaina Maira, Purnima Mankekar, and others.

ANTH295E Theory in Anthropology: Anthropology of Time
In this course, we will examine anthropology's integral (and often fraught) relationship with time. The course is divided into two major segments. In our first half, we explore the philosophical backstory as a particular--and, perhaps, foundational--category of human perception and experience. We will then trace how classic anthropology attempted to pick up these debates via core anthropological concerns with relativism, with cultural particularity, and with the social origins of perception.

With these canonical foundations in place, we will turn in our second segment to the myriad ways in which the concern with time infuses contemporary anthropology. Here we will move from questions of anthropological representation--especially the notorious critique of the "ethnographic present"--to recent anthropological attempts to discuss the cultural, social, and political work inherent in the production of different pasts, presents, and futures. As we will explore, though it may seem intimate and inherent, the production of time cannot be separated from ongoing histories of colonial domination, violence, resilience, innovation, and transformation.

ANTH295G Theory in Anthropology: Anthropology of Semiosis
This course inquiries into the process of semiosis and traces the parallel developments of anthropology and the study of signs, symbols, and how we use language--or language uses us--to make sense of the world. As we move through the foundations of North American anthropology and the then-nascent interest in languages of Turtle Island, and the problematic invention of the category of the primitive, we will also begin to understand the development of structural linguistics around the same time and what led to the differential emergence of social and eventually symbolic and structural anthropology across the Atlantic. As anthropology began to take an interest in the language of the unconscious, social and otherwise, we will look toward how a post-structural approach to anthropology offered a radical new turn in the discipline. We will conclude by questioning if semiosis still poses a radical horizon here not there, now not then.

ANTH295H Theory in Anthropology: The Anthropology of Capitalist Life/Worlds
This course charts a genealogy of anthropology's long and critical engagement with capitalism as a transnational political, cultural, and economic force. We begin with classic theories and debates about capitalism, social change, and globalization. We then turn to how anthropologists have built on, extended, and tweaked these insights to illuminate capitalist world making and lifeworlds. Reading ethnographies that take us from factory floors to gig work; from logos to brands and knock offs; from wall street to occupy wall street; from extractivism to regeneration of life in devastated landscapes, and more, we delve into fundamental questions about power and resistance, human nature and sociality, production and labor, consumption and taste, struggle and justice, and radical reimaginations of life under and beyond capitalism.

ANTH301 Immigration and the Politics of Fear
This course will examine the role of fear in shaping ideas about immigrants. We start from the notion that emotions are social formations with particular histories and political significance. Therefore, we will refrain from assuming that fear is nothing more than a feeling or an automatic response and instead take it as a site that allows us to examine how psychological and legal discourses together define and dispute what is normal, reasonable, credible, plausible, real, appropriate, and timely. The seminar will cover themes such as risk and threat, race and origin, pain and injury, confession and testimony, fiction and figuration, and personhood and representation. We will look at newspaper articles, social media content, legal opinions, case law, court transcripts, and psychological evaluations, as well as texts in politics, anthropology, sociology, philosophy, literature, comics, and films. Students will write a short essay on the politics of fear. Throughout the course, they will develop their toolkit to critically reflect on an emotion of their choice.

ANTH302 Critical Perspectives on the State
This course builds on Marxist, poststrucuturalist, feminist, anarchist, and cultural analyses to take a critical approach to the state--what it is and what it does. We will examine how the state is imagined by those who write about it and struggle against it. Where does the state begin? How do states act, and what are the consequences of these acts? How is rule consolidated and how are individuals and communities annexed to the project of rule? How do people engage with state acts and ideologies? We will read texts drawn from a variety of disciplines, including anthropology, feminist theory, political theory, philosophy, sociology, and geography, that examine the nature, everyday workings, and effects of state power. Drawing upon ethnographic examples from around the world, we will analyze how states are cultural artifacts that produce and regulate people's identities and bodies, reproduce social inequalities, and engender resistances of all sorts. Some of the topics we will discuss include bureaucracy, governmentality, the security state, the prison industrial complex, terror and militarism, law and justice, citizenship, democracy, refugees, anti-state movements, the "man" in the state, and welfare and post-welfare politics.

ANTH303 Ritual
Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion, and not all rituals are religious. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual

behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

ANTH304 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH305 Semiotics of al-Barzakh: The Grammars of the End of Days and Horizons of Possibility
This course builds from the Islamic eschatological concept of "al-Barzakh" as it has been taken up in anthropological theories, as well as in Islamic thought more generally, with careful attention to the term's semiotic transformations and significations. It does so in order to explore both how the term describes an earthly place and an eschatological hereafter as well as a theoretical and practical alternative to the notion of the liminal personhood.

Since at least the 12th century, thinkers have explored the Islamic concept of al-Barzakh to explore the connection between the earthly present and the heavenly hereafter and the scales of judgment in between. This term, somewhat akin to Christian notion of purgatory or limbo, appears only three times in the Qur'an. It is explained as being like the productive firmament that separates salt and sweet water. In places like Morocco, this is commonly interpreted as referring to the Strait of Gibraltar and the underwater isthmus that separates and produces the waters of the Atlantic Ocean and the Strait of Gibraltar.

We will read both contemporary scholarly apprehensions of this term and its various applications in Muslim-majority contexts such as Morocco, Egypt, Sudan, and Iran--often ethnographic--as well as Islamic philosophy that attempts to bring the concept into relation with earthly personhood. In our approach, we will move through a variety of scholarly genres and epochs in order to trace the genealogies of present-day popular invocations of the term as we contrast it with other apprehensions of the eschatological and the liminal.

We will work to understand how this term contains space for both an imagination of everyday life as well as the boundary-generating difference marking here and there, then and now, by looking at how the term is evoked by artists, scholars, religious adherents, psychoanalysts, and border crossers. As we go along, we will pay special attention to the languages of belonging and difference evoked by this term and attend to how an anthropological approach to semiotics might elucidate new grammars of community and horizons of possibility that exist alongside notions of the liminal, uncanny, dreaming, the hereafter, and the imagination of the end of days.

ANTH306 Mobilizing Dance: Cinema, the Body, and Culture in South Asia
This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

ANTH308 Television Storytelling: The Conditions of Narrative Complexity
This course examines the industrial and cultural conditions for the development of relatively complex forms of storytelling in commercial U.S. television. Narrative complexity is a cross-generic phenomenon that emerged over the 1980s and has proliferated within an increasingly fragmented media environment. In class discussions and individual research projects, students will analyze particular programs in-depth, with attention to their industrial and social conditions of production, their aesthetic and ideological appeals, and the cultural tastes and viewing practices they reflect and promote. We will also consider how television studies has responded and contributed to the increased prestige of certain types of programs.

ANTH309 Reading Ethnography: Toward an Otherwise Anthropology
In this reading-centered seminar, we will consider the potential of ethnography as a way of knowing, form of argument, and genre of writing. We will take up contemporary interventions and critical turns including decolonizing and abolitionist anthropology, the politics of witnessing and ethnographic refusal, approaches to more-than-human anthropologies, queer/ing anthropology, and the craft of ethnographic storytelling and experiments in ethnographic poetry, prose, and fiction. Our seminar emphasizes collaborative close reading and discussion of a range of cutting-edge ethnographies that challenge the boundaries of disciplinary practice and seek to open up an anthropology that might enable us to think and know otherwise.

ANTH310 Un/Settled: The Anthropology of Displacement, Migration, Borders, and Refuge
How does one account for the ever-present and growing phenomenon of displaced people on the move in a world of bounded nation-states and citizens? How does one make sense of temporary encampments and refuge in a world of stable home/lands, and exile and fugitivity in a world of legal belonging?

As key political figures, refugees and migrants contest and transect our normative ideas about the national and the global. They force us to reckon with the hardened and profoundly consequential legal categories of borders and citizenship around which our world is organized. This course takes a deep dive into the modern experience of displaced people to understand their predicament and how it unsettles our fundamental notions of the political, nation-states, freedom, home, crises, violence, human rights, and humanitarian care.

Texts: Hannah Arendt, Zora Neale Hurston, Lori Allen, Julie Peteet, Urvashi Butalia, Giorgio Agamben, Amitav Ghosh, Saida Hodzic, Miriam Ticktin, Liisa Malkki, Judith Butler, Justin Hoseby, Simone Browne, Neil Roberts, and others.

ANTH311 Migration and Movement in/between Muslim Worlds
The spectacular migrant crisis across the Mediterranean Sea since 2014 has frozen a particular racialized understanding of migration and flight out of the Middle East and North Africa. This course looks to trouble this singular narrative of movement out of the Middle East and Africa by looking at the multiethnic and transnational flows of workers, capital, fighters, and aid workers in and out of the region since the late 1990s. We read ethnographies of development, war, exile, investment, and activism in order to better understand exchange, change, and fluid continuities in overlapping theaters between Africa, Europe, Asia, and the Middle East.

ANTH312 Eat, Grow, Heal: The Anthropology of Food and Justice
This course uses the lens of justice to examine the politics of food. We will look at the cultural and political-economic dynamics of food production and consumption, considering questions of taste, class, labor, marketing, and food sovereignty. We will also examine the environmental and social impact of food production and the consumption choices we make, from organic, to vegan, to animal proteins, to foraging and hunting. We will use a range of texts, including ethnographies, theory, film/documentary/TV shows, creative nonfiction, fiction, cookbooks, blogs, and magazine articles.

ANTH313 Producing and Performing Anthropology
This course examines the various modes through which anthropology can and has been performed and produced. Partially exploring the historical relationship between film, museum curation, and ethnography, while also looking toward how anthropology has verged into other media such as the audiovisual and digital, this class pairs reading ethnographies with practical projects, which could take performance, written, audiovisual, or even web forms. What does it mean to make an ethnographic website, for instance, or write a performative ethnographic text? How does this differ from a museum, and how are the history and practices of curation related to anthropology? This course draws from theoretical positions in the discipline as well as performance and artistic production, and includes in-class/virtual visits from figures in this field across the U.S., Europe, North Africa, and the Middle East, aimed at fostering opportunities for more long-term mentorship and collaborations.

ANTH314 Curating Religion: Museums, Monuments, and Memorials
Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they represent present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan's collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a

glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

ANTH315 Cultural Politics of the Body
In this course, we will consider 'the body' as both material and symbolic, imbued with meaning, politicized and expansive. We will ask ourselves: what is a body, where does it begin and end, what does it do? Recognizing the ongoing relations of power that seek to control and exploit different types of bodies (both human and nonhuman), it is critical that we ask ourselves how the body comes into being and how it subverts colonial domination. Accordingly, we will read and discuss texts that examine these themes through many different lenses, including science and technology studies, medical anthropology, environmental studies, disability studies, posthumanism and multispecies ethnography, queer studies, and Black studies.

ANTH316 Critical Global Health
What does it mean to approach global health as not an applied science but an ethnographic object? This course will explore this question by bringing critical, social science perspectives to bear on global health issues and interventions. This course covers three areas of scholarship. First, we will examine the processes by which social inequalities produce patterns of health and disease in globalizing contexts. This will be followed by an interrogation of the term "global health," in which we will trace its emergence as a discourse and enterprise and unpack its contested meanings. While some view global health as a clinical practice, others conceptualize it as a business, security concern, charitable duty, or human right; yet another camp probes the term's ideological construction. We will consider how such vantage points are underpinned by cultural assumptions and ethical agendas that, in turn, can determine how, and to whom, care is delivered. As a third area of inquiry, we will investigate the implications and unintended effects of doing global health by probing such questions as, When are good intentions not good enough? How useful is biomedicine for alleviating locally defined problems? Under what conditions does global health exacerbate the social inequalities it seeks to overcome?

ANTH317 Culture and Consumption
This seminar examines the formation, development, and contemporary forms of cultures of consumption in EuroAmerican societies and their gobal exportation and adaptation to diverse local situations. The course is premised on the idea that the spectacular and continuous rise of commodity consumption that began in the late 17th century is as much a cultural as an economic process, one that both shaped and was shaped by shifts in ideas about personal and social development. Once associated with negative meanings of waste, excess, and depletion, consuming, especially of clothes, domestic goods, new foods and beverages, and artistic forms, came to be seen as a critical dimension of self-fashioning and sociability. While the course situates these developments in the context of expanding markets and new modes of distribution, it will emphasize the post-purchase moments of consumption, that is, the ways in which consumers incorporate goods into their everyday lives. Among the themes we will consider are the gendering of consumption, the social dynamics of taste, commodity consumption and ideologies of authenticity, consumption and social inequality, the consequences of consumption, and the emergence of the ethical consumer.

ANTH318 Global Indigeneities
This course focuses on theories of indigeneity in examining indigenous peoples' lives, cultural practices, resistance and activism. The term "indigenous" has had varied and contested genealogies across time, geography, political contexts, and fields of study. Although dominant societies tend to claim that indigenous peoples are either entirely extinct due to genocide or diluted due to racial and cultural mixing, indigenous refers to the wide range of relations to region and nation of the more than 370 million indigenous people who are spread across 70 countries worldwide. Some indigenous peoples define themselves by their historical continuity with precolonial and presettler societies; others by ties to territories and surrounding natural resources; others in relation to distinct social, economic, or political systems; and still others by their distinct languages, cultures, and beliefs. Attempts at the historical erasure and subsequent memorialization of indigenous peoples serve the colonial goals of refuting indigenous claims to land and rights and have been the primary means by which dominant populations asserted their own modernity while denying it to putatively "primitive" indigenous peoples. Today, nation-states continue to impose this notion of the "pre-modern" savage as a mechanism of control in their negotiations with indigenous peoples' legal status and land rights. This course will focus on a range of cases studies including indigenous peoples in North America contending with the states of Canada, the United States, and Mexico; Indigenas encompassed by select countries in South America; Aboriginal peoples in Australia, the Sami (across various countries in Scandinavia), the Ainu (Japan), the Maori (New Zealand), and Palestinians (Israel-Palestine). Topics will include indigenous peoples' struggles for autonomy and survival; self-determination and political status under international law; the UN Declaration on the Rights of Indigenous Peoples; the UN Permanent Forum on Indigenous Issues; land struggles and the protection of natural resources; cultural resurgence and revival of select traditions; and varied forms of political resistance and decolonization.

ANTH319 Toxic Sovereignties: Life after Environmental Collapse
What politics emerge at the borders of life and nonlife? Representations of the human species as being on the brink of environmental collapse have become increasingly common, as the specters of climate change and cataclysmic environmental disaster seem to bear down ever more heavily upon us. At the same time, the increasing entanglement of human bodies with various forms of chemical and otherwise man-made pollutants presage a slightly different future, one in which, if the human species does not outright disappear, it will be fundamentally transformed. This course explores different forms of political and social action that have emerged in response to these seemingly epochal shifts with a particular emphasis on the ever-mutating concept of sovereignty. Our goal is to explore the ways in which the shifting borders between human life and its artificially produced absence can serve as productive sites of new political forms and transformations of older ones, even as they also generate tremendous social and cultural anxiety.

ANTH320 The Idea of Palestine
This course traces contestations over the idea of Palestine, beginning in the late 19th century. In its approach to an archaeology of the idea of Palestine and its discursive circulation, it draws from the disciplines of history and anthropology while also incorporating primary texts. Its goal is to provide a rigorous foundation in the origins of the debates that shape discussions of Palestine today while also outlining the history of the land and its peoples, from before the imposition of the Sykes-Picot partition plan and the violence that followed it through today. Permission of instructor required.

ANTH321 Migrant Personhood: Against Tales of Witches, Aliens, Beasts, and Pests
The contagious animal, the irrational woman, the foreign threat, the mentally incompetent -- this course follows the circulation of these portrayals of immigrants beyond rhetorical injury. Drawing on what Colin Dayan calls "negative personhood," we will focus on the symbolic, narrative, and representational violence of immigration law. We start with readings and films that look into the history of the idea of the "reasonable man" in immigration policy, the truth-making effect of courtroom hearings, and the figures of speech that give shape to stories about what it is to be an American in the eyes of the law. We then explore forms of alternative representation that elude legal containment and instead seek cultural membership and political participation. We finish the course by examining poetic testimonials, psychotic narrations, dirty protests, escapes from ideological frames of address, collective autobiography, imaginative refusals, and radical Latinx utopias. We will draw from interdisciplinary material in anthropology, literary theory, performance studies, philosophy, legal theory, and feminist studies, among other fields.

ANTH322 The Agent
A curious feature of contemporary North Atlantic culture is its concern to discover, describe, obtain, and distribute something called "agency." In tandem with with CHUM's Spring 2026 theme, Doing Nothing / Nothing Doing, this course critically re-examines the cultural metaphysics of agency and action that captivates modernity in general and liberalism in particular. Reading widely across anthropology, STS, philosophy, literary studies, political theory, religious studies, and aesthetics, we will critically explore the peculiar form of life whose protagonists and critics alike are transfixed by the figure of the Agent.

ANTH323 Biocapital and the Commodification of Life
Karl Marx described capital as "dead labour, that, vampire-like, only lives by sucking living labour." But what happens when capital itself is alive? Biotechnological and scientific advancements have enabled the commodification and exploitation of living organisms and tissue at a scale barely imaginable in Marx's time, opening new global markets for the circulation of "biocapital." What is biocapital, and how might it transform our understandings of labor, value, property, and even life itself? Drawing on a variety of course material -- including critical theory, ethnography, literature, and films -- the seminar seeks to answer these questions by exploring the historical, socio-cultural, and political-economic dimensions of biocapital and the technoscientific processes employed to extract value from living things.

ANTH325 Race and Reproduction
This interdisciplinary course explores the intimacy of race and reproduction against the backdrop of capitalist modernity. We scrutinize the policies, priorities, and perversions of slave owners, the racially differentiated family planning programs under apartheid, the eugenicist movements and the criminalization of poverty in the United States to interrogate what is generated by the incapacitation of blackness across scales of time and space. We examine the Marxist feminist elaboration of the concept of social reproduction and then consider black feminist rejoinders that center the reproductive labor of black women -- as slaves, as domestic workers -- that implicate violence and ownership in the mediation of biological and social reproduction as a set of racializing practices in which value is generated, accumulated, and expropriated. Finally, the course considers the proliferation of assisted reproductive technology (ART) in the 20th century, the recourse to surrogacy, and family abolition to interrogate the extent to which the "race-reproduction bind" is disaggregated or reanimated in the present.

ANTH330 Economies of Erasure: Exploring the Violence Concealed by the Liberal Promise of Care
This course will aid students in understanding and recognizing the processes of erasure that maintain ongoing regimes of domination. In particular, we will attempt to understand how the twinned promises of equity and tolerance made by seemingly liberal, multicultural democracies work to conceal the ongoing -- and specifically targeted -- violence that in fact constitute and continue to subtend these nation-states. How, we will ask, do these regimes make violence disappear through the promise to "care" for their citizens, even as they wield

spectacular violence to maintain domination? How are we as subjects of these regimes conditioned to pay attention to certain events, ideas, and systems, and what is made to disappear through such selective forms of attention? What communities, bodies, and individuals are sacrificed by the liberal promise of care? To answer these questions, the course will juxtapose readings in philosophy and social theory with ethnographic and historical case studies, giving students both the conceptual tools to analyze erasure and a set of examples through which to understand how these forms of erasure operate in the world.
Offering: **Host**

ANTH332 The Native Northeast
The Indigenous peoples of northeastern North America have been on the frontlines of settler colonialism for over four hundred years. Nevertheless, numerous sovereign Indigenous nations resolutely persist in their homelands despite conditions of intense constraint, their members enacting trajectories for regional thriving that often diverge from those of the colonial mainstream. Guided by materials from Indigenous studies, anthropology, and history, this course will foreground the work of Indigenous scholars, activists, and artists who engage the northeast as a decidedly -- although not exclusively -- Indigenous space. Focusing primarily on Indigenous peoples living south of the U.S.-Canada border in the present and recent past, the course will center topics including the politics of Indigenous sovereignty, enduring relations with the more-than-human world, land return, and the contestation of regional Indigenous erasure.

ANTH333 The Problems of the Fetish
This course traces the vicissitudes of the concept of the fetish, a term foundational to the theorization of value, desire, and belief across multiple intellectual traditions. The course begins with the term's first systematic formulation in Charles de Brosses's 1760 publication On the Worship of Fetish Gods, which introduced fetishism to describe forms of "direct worship, rendered without figuration." The concept brought into focus a set of pressing questions concerning representationalism, materiality, mediation, and magical thinking that troubled Enlightenment rationality. Spanning geographies, histories, and disciplines, the course examines fetishism in relation to the anthropological study of religion, Portuguese colonization in West Africa, and the rise of mercantile capitalism. We then track the term's uptake and transformation in philosophy, political economy, and psychoanalysis, focusing on key figures including Kant, Hegel, Marx, Freud, and Lacan. The course concludes by examining contemporary engagements with fetishism in film theory, new materialism, Women's, Gender, and Gexuality Studies, and Black studies to trace connections between power and embodiment.

ANTH337 Missionary Mysteries: the Objects and Archives of Wesleyan's Missionary Past
This course examines the history of Wesleyan University's connections to missionary work in the nineteenth and early twentieth centuries, as seen through the university's archival and object collections. Students will spend the bulk of classroom time in hands-on learning as they engage with the archives of the Wesleyan Missionary Lyceum and cultural heritage collections obtained by missionaries and brought back to the University. Beginning with an overview of historical, archival, and museum methods, the course then will examine objects and written records from the Americas, West Africa, East Asia and the South Pacific. Students will be challenged to consider the ways in which Wesleyan has been engaged in colonialism, imperialism, and global evangelism. Topics of investigation will include: gender, linguistics, museum ethics and repatriation, the use of objects as educational tools.

ANTH355 Social Movements Lab
What can we learn from social justice activists about the economic, political, and environmental struggles facing us today, including mass incarceration, immigration, economic precarity, and the violence of the state? Where are the critical sites of queer, trans, left, feminist, black, indigenous, disability, and environmental struggle? How do these movements converge, and where do they diverge? This participatory, interdisciplinary research seminar enables you to embark on an independent, semester-long research project on the social movement or activism of your choice. We'll start with some foundational reading on multidisciplinary social movement research; archival, ethnographic, and participatory methodologies; and histories of social justice struggles in the U.S. The remainder and majority of the seminar is laboratory style, taking shape around your particular projects. Each week, we will collaboratively analyze one or two projects, mapping out and comparing methods, goals, visions, struggles, and contexts of the movements under study. Our goal is to understand a range of social justice activisms in their economic, political, and historical context, with an eye toward integrating activist scholarship and social change. The activism you research can be contemporary or historical; local, national, or global; and can take any shape: direct action, community organizing, activist philanthropy, art as activism, etc. You do not need previous experience or activist contacts for this course--just passion and the desire to learn collaboratively!

ANTH356 Decoding the Stone Age: Analysis of Lithic Technology
Lithic (stone) tools are the oldest known type of human technology. They represent the most abundant and by extension one of the most informative components of the archaeological record for reconstructing ancient human behavior over the last 3.3 million years. In this course, students will learn the

methodological and theoretical basics used by archaeologists working on the Stone Age. The course includes hands-on training in how to identify and analyze stone tools, qualitative and quantitative approaches, and interpretive frameworks that allow archaeologists to use stone tools to understand broader anthropological questions about the evolution and diversity of human behavior. Students will analyze actual archaeological assemblages from important Stone Age sites stored in the Wesleyan University Archaeology and Anthropology Collections. Through this, students will be exposed to elements of data collection protocols and research design in a collections setting. Further, students will design exhibits for the campus community that incorporate the collections and the data they produce.

ANTH360 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.

ANTH361 Calderwood Seminar in Public Writing: The Dark Turn in Television Storytelling
This course, offered in association with the Calderwood Seminars in Public Writing, examines a certain tendency in contemporary television storytelling. Taking the debut of "The Sopranos" in 1999 as a benchmark, we will explore the emergence in dramas and comedies of a dark, uncertain, pessimistic, or disillusioned address within a medium long known for its reassuring tone. We will consider the industrial and social conditions for this tonal shift, as well as the role it has played in elevating public perceptions of television's cultural value.

ANTH392 Sacrifice
Sacrifice entails the surrender, destruction, or self-denial of something precious or desired in exchange for peace, power, prosperity, freedom, or edification. Destruction by sacrifice, says anthropologist E. E. Evans-Pritchard, is an act of giving of the self that must be costly and "necessarily reciprocated." In sacrifice, humans come face-to-face with death without dying. Through a collection of interdisciplinary readings, this seminar examines the implications of this ruse through the themes of war, animal and human sacrifice, asceticism, acts of political immolation, big-game hunting, high-altitude mountaineering and extreme sports, and the experience of excess in festivals such as Burning Man.

ANTH395 The Anthropology of Religion
What do we study when we study religion? We can observe practices, record speech, examine objects and actions--but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of "explaining away" the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

ANTH397 Difficult Women: Post/Feminism in Television Comedies and Dramedies
Although postwar family sitcoms represented women as homemakers, one of the first and most popular sitcom wives also articulated discontent with domestic femininity. Lucy Ricardo became the prototype of the "unruly woman," a figure with feminist potential whose desires exceed and disrupt dominant gender norms. As those norms have shifted, so have TV's unruly women. Second-wave feminism, anticipated in I Love Lucy, was incorporated into a 1970s cycle of comedies centered on single working women whose career aspirations were rewarded. Over the following decades, a postfeminist sensibility dominated television comedies and dramas and became central to a gendered neoliberalism in which energetic individuals "empower" themselves. In recent years, a new type of female protagonist has emerged. Alongside the can-do optimism of single-women comedies from The Mary Tyler Moore Show to Sex and the City to 30 Rock and Parks and Rec, a stream of comedies and dramedies, made largely by and for women, have depicted a variety of flawed, difficult, unruly women coming of age under conditions of socioeconomic precarity, whose less focused energies seem to articulate a more uncertain, downbeat, post-recessional mood. In this course we will situate the latter cycle in relation to both the longer history of televisual representations of women and to the current state of feminist politics. Among the shows we will look at are: I Love Lucy, Bewitched, The Mary Tyler Moore Show, Sex and the City, Ally McBeal, Girlfriends, The Mindy Project, 30 Rock, Parks and Rec, Girls, Insecure, Broad City, Better Things, Two Broke Girls, New Girl, Crazy Ex-Girlfriend, Jane the Virgin, Unreal, Abbott Elementary, Fleabag, Dear White People, and Somebody Somewhere.

ANTH398 Queer/Anthropology: Ethnographic Approaches to Queer Studies
What are the many ways in which queerness obtains meaning across cultures? What does it mean to have a queer relationship to one's world? Queer/Anthropology traces the history and present state of ethnographic studies of queerness, defined here as non-heteronormative sexualities and gender embodiments. We examine the way in which heteronormativity is established as integral to hegemonic order and the manner in which it functions within Western armchair ethnographic studies and sexology of the early 20th century. We look at the binary system as a mode of organization and the way in which anthropological studies of sexuality and gender have nearly always challenged the presumed universality of these modes. We read contemporary ethnographic work in order to compare and contrast different cultures' usage of sexuality and gendered categories in relation to various contexts, such as colonialism, race/racism, capitalist and non-capitalist economic and political systems, cosmology/religion, and regionality/place.

ANTH400 Cultural Analysis: Senior Capstone Seminar
This seminar is for all senior anthropology majors who intend to write honors theses or senior essays. It is designed to enable students to pursue individual research projects in a group context, with attention to debates on the nature of anthropological interpretation. The seminar is structured as a workshop: each student gives a series of presentations on their own research project to the group; equally important is engaging with and offering constructive criticism of the projects presented by others.

ARCHAEOLOGY PROGRAM

Archaeology is the discipline most directly concerned with the understanding and explanation of past societies through the study of their material remains. The reconstruction of these societies through the interpretation of material culture permits archaeology to span both the prehistoric and the historic periods. While certain archaeology courses originate within the program, others are cross-listed from the departments of Anthropology, Art and Art History, and Classical Studies. Majors design their own curriculum in close consultation with their advisor according to the specific area of concentration within the discipline.

AFFILIATED FACULTY

Kate Birney
BA, Yale University; MT, Harvard University; PHD, Harvard University
Chair, Classical Studies; Associate Professor of Classical Studies; Associate Professor, Art History; Associate Professor, Archaeology

Wendi Field Murray
BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona
Adjunct Assistant Professor of East Asian Studies; Visiting Professor of History; Adjunct Assistant Professor, Archaeology; Archaeology Collections Manager

CHAIR

ARCP135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ARCP150F Myths, Martians, and Monsters: Archaeology and Pseudoscience (FYS)
This FYS will explore fantastic claims about the human past by critically examining pseudoarchaeological claims and comparing them with the actual archaeological record. Emphasis will be placed on the scientific method, critical thinking, and media literacy. We will discuss well known myths, frauds, and misinformation, both past and present, including Atlantis, Ancient Aliens, Piltdown Man, Ancient Apocalypse, the Moundbuilder Myth, and their use and misuse. By the end of the course, students will be able to differentiate reproducible scientific data from the fictitious and fabricated. Additionally, we will discuss the motivations, ethics, and consequences of sensationalized accounts of the human past.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Prereq: **None**

ARCP153F Single Combat in the Ancient World (FYS)
This course celebrates the clash of warriors in warfare, sport, and spectacle in the classical world. Using primary sources and archaeological evidence, the class will survey traditions of combat in ancient art, literature, and society, beginning with Greek and Near Eastern epic; the modes of warfare in Greek society; ancient Olympic combat sports; and, finally, Roman gladiator spectacle. We will examine the role of violent sport in Greek and Roman society, the reception of the competitors, and the use of these events for political or nationalistic ends. Throughout the course we will explore the flexibility of concepts such as military ethics, "western" warfare, violence, honor, and excellence, both in the classical world and in our modern lives.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST153F**
Prereq: **None**

ARCP201 Art and Archaeology of the Bronze Age Mediterranean
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST, SBS-CLST**
Identical With: **CLST201, ARHA202**
Prereq: **None**

ARCP203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Identical With: **ENVS203, ANTH212, STS203, IDEA203**
Prereq: **None**

ARCP204 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**

Identical With: **ANTH214, ENVS207, IDEA204**
Prereq: **None**

ARCP209 Tradition & Testimony: Protecting Native American Sacred Lands, Ancestral Remains, & Cultural Items
This course will explore the historic genesis of present-day U.S. and international policies toward Native American peoples and other indigenous communities. In addition, studies will include traditional indigenous and tribal perspectives, investigate indigenous-specific origin stories and the connections these stories have with historic events and places, and take a hard look at repatriation policies. Students will investigate several case studies involving current issues Native American communities are facing in repatriation and protecting sacred places, both local and national.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **ANTH209**
Prereq: **None**

ARCP210 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **IDEA205, STS211, ANTH210**
Prereq: **None**

ARCP214 Survey of Greek Archaeology and Art
This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda!) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-ART**
Identical With: **CLST223, ARHA207**
Prereq: **None**

ARCP233 History and Archaeology of Industrial Connecticut
Despite the fact that Middletown is a UNESCO Site of Memory and is home to many preserved historical sites, there has been little archaeological excavation, documentation, and storytelling specifically focused on extant industrialization, weaponry, and carceral artifacts dating to the Revolutionary War and early industrial eras. This course will explore the rich history of industrial sites in Middletown and surrounding regions of Connecticut. Students will learn about historical and archaeological methods for the study of past material culture, landscapes, and environments, focusing on how objects and sites can reveal hidden traces of Middletown's ties to agricultural, textile, munitions, and other forms of industrial production over the last few hundred years. Students in the course will have opportunities to work with archaeologists and museum professionals as they research local historic and archaeological objects. Students will also take part in archaeological investigations of local sites near Wesleyan's campus. As a final project, students will produce a public-facing online exhibit, physical exhibit, or public outreach activity based on their research. Students enrolling in the course must be available for a weekend fieldwork activity in April involving survey and/or excavation of a local archaeological site. This course is supported by a Mellon Foundation grant.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Identical With: **HIST233**
Prereq: **None**

ARCP234 Art and Society in Ancient Pompeii
This seminar surveys the art, architecture, and material remains of the cities buried by the eruption of Mt. Vesuvius in 79 CE. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the social and political life of a small Roman city and examine the unique evidence for reconstructing the private life of Roman citizens, from their participation in local politics and government, to their religious beliefs and lives, to the interior decoration of their homes and their burial customs.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST234, ARHA206**
Prereq: **None**

ARCP242 Tablets, Temples, and Cities: Near Eastern Art and Archaeology
History starts in the Near East with many firsts in human culture: domestication, writing, cities... Throughout its long history, the ancient Near East has produced a unique corpus of material culture, architecture, and textual records. In this course, we will survey the art and archaeology of the ancient Near Eastern civilizations with contextual information about the cultures that created them.

Every week we will progress chronologically and will explore broader socioeconomic, political, and cultural changes by discussing art historical, archaeological, and textual evidence. We will look at examples from Anatolia, Mesopotamia, and the Levant, and compare these to one another. Students will gain a larger understanding of commonalities and differences in the cultural expressions of these cultures. The last section of this course will be dedicated to current issues concerning the archaeology and cultural heritage of the Middle East.

This course will also have various hands-on components: We will learn about textile production by using spindle whorls, learn about cuneiform writing by making clay tablets, and create our own seals based on ancient Near Eastern imagery and mythology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Prereq: **None**

ARCP244 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt
This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house floors. Drawing upon a blend of archaeological, art historical, and mythological evidence, we will examine how the funerary practices and the very notions of the soul, the body, and the afterlife compare in these two societies. We will also explore how social class, gender, and ethnicity influenced those ideas. The course will also provide an introduction to archaeological theory and the interpretive strategies employed by archaeologists, art historians, and historians in the reconstruction of ancient societies.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST244, ARHA201**
Prereq: **None**

ARCP245 The Archaeology of Ancient Foodways
Bread, wine, olive oil, fish sauce -- what did it mean to eat in the ancient Mediterranean world? In this course, we explore the archaeology of food in ancient Greece and Rome, from farms and vineyards to markets and banquets. Using archaeological evidence, primary literature, and theoretical approaches, we examine how food production, trade networks, and dining practices reflected and reinforced social hierarchies and cultural values. The course will also employ digital mapping tools to trace the movement of ingredients around the Mediterranean and help us reflect on how global food systems shape our own consumption habits.

This course satisfies the Archaeology and Archaeological Science requirements for the Classical Studies major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **CLST245**
Prereq: **None**

ARCP248 Who Owns the Past? Cultural Heritage, Archaeology, and Politics
Cultural heritage is defined by UNESCO as the tangible and intangible attributes of a group or society that are inherited from past generations, which should be preserved and maintained for future generations. In practice, this is maintained through the archaeological, historical, and legal practice of cultural resource management (CRM). While many think of archaeology as a purely academic field, archaeologists are largely employed outside of the "Ivory Tower" in this rapidly growing industry. This course will explore how this industry is practiced in the United States and abroad, and its role in preserving heritage. This course will also introduce students to the wider world of cultural heritage studies. Along with the practice of protecting cultural resources, we will explore the ethics of managing the past and the legal frameworks that govern cultural heritage. Students will also consider the effects of colonialism, nationalism, armed conflict, climate change, uncontrolled development, and illicit trade on cultural heritage and group identity. Further, students will engage with current debates about ownership of cultural heritage and responsibility around its management.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

ARCP255 The Archaeology of Identities in the Ancient Mediterranean and Beyond
Human beings all hold a wide range of socially constructed and physically lived identities, expressed and experienced sometimes continuously and simultaneously, and sometimes only occasionally under specific circumstances. These identities might include, but are not limited to, race, ethnicity, gender, sexuality, social status, occupation, and health. Many of these identities, expressed and experienced in various tangible and intangible ways in our lived reality, can only be accessed indirectly through the physical proxy of the archaeological record when it comes to people living in the past. This course will explore a variety of archaeological methodologies for accessing the social identities of past lives, as well as the sometimes problematic role that archaeology has played in this type of research over the course of the 20th and 21st centuries (is ancient DNA bringing us back full circle to scientific racism?). The primary focus of the course will be on the ancient Mediterranean, with additional case studies drawn from other parts of the world serving to illustrate the cross-regional applicability of approaches to past identities.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **CLST260**
Prereq: **None**

ARCP257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.
Offering: **Host**

ARCP260 Art and Archaeology of Ancient India
This course is an introduction to the art and material culture of ancient India, from prehistory through the formation of the classical tradition in the fourth century CE. The broad swath of human experience covered necessitates a thematic approach, focusing on key moments, cultures, object types, and methodological approaches, arranged in a roughly chronological fashion. Thematic units may vary somewhat from year to year, but are likely to include: the meaning and use of the carved stone seals of the Indus Valley civilization; the impact of the Vedic Aryas on the development of Indian ritual and imagery; how to read the iconographic language of the "plant and animal style" in decorative sculpture; the meaning and significance of the Asokan pillars; and the architecture and ritual of Buddhist monastic life in the cave monasteries of western India.

ARCP267 Museum Collections: Ethical Considerations and Practical Applications
Serving as a broad overview of museology, this course introduces students to the principles underlying the foundations of museum work and collections stewardship. Topics covered will include the origins of museums and collecting, the rationale behind museum policies, and the legal frameworks and professional standards that guide collections management. Ethical considerations surrounding issues such as NAGPRA/repatriation, decolonization, accessibility, looted artifacts, and cultural patrimony will also be covered. Finally, students will explore the practical aspects of preventive conservation, museum documentation, and exhibition development. Although topics covered in this course will apply to a variety of museums, the primary focus will be on cultural heritage collections. Readings and class discussions will be supplemented with hands-on exercises using the Wesleyan University Archaeology & Anthropology Collection.

Identical With: **ANTH276**
Prereq: **None**

ARCP268 Disaster, Destruction, and Resilience in the Ancient World
How did ancient societies confront catastrophe, and what can we learn from their responses? This course explores themes related to natural and human-caused disasters in the ancient Mediterranean world, including earthquakes, volcanic eruptions, fires, floods, plagues, droughts, and famines. Drawing on archaeological and literary evidence, we will examine the causes and aftermaths of events like the eruption of Vesuvius, the floods and fires of Rome, the Antonine Plague, and more. Through these case studies we will deepen our understanding of ancient experiences of risk, vulnerability, and resilience, and inform our own attitudes toward disasters in our modern world.

Gen Ed Area: **HA-CLST**
Identical With: **CLST267**
Prereq: **None**

ARCP270 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.
Offering: **Crosslisting**

Identical With: **MUSC260, ANTH260, COL255, MDST260, REES206**
Prereq: **None**

ARCP275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.

Prereq: **None**

ARCP285 Off with its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase--as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating!) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

The course falls under the Archaeology/Archaeological Science track of the Classics/CCIV Major requirements.
Offering: **Crosslisting**
Grading: **A-F**

Credits: **1.00**

Identical With: **CLST283, ARHA204**
Prereq: **None**

ARCP290 Unearthing Early China: Art and Archaeology
This course introduces early China by examining major archaeological discoveries from prehistory through the second century CE. We will analyze the formal and material features of early Chinese artifacts from important archaeological excavations at sites such as Liangzhu, Anyang, Zhouyuan, and Mancheng. We will discuss the ways in which these artifacts and archaeological sites demonstrate early Chinese cosmological beliefs and ritual practices, especially notions related to heaven, afterlife, and the transition from ancestor worship to the pursuit of personal welfare in immortality. In addition, we will study the iconography and symbolism of objects found in these archaeological discoveries, which would serve as a foundation for the inception of visual arts in the later periods of Chinese history.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Identical With: **CEAS290**
Prereq: **None**

ARCP291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ANTH291, CEAS291, ENVS291, IDEA291**
Prereq: **None**

ARCP292 Archaeology of Food, Trade, and Power in South India
This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life--agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority--as well as historical events and processes that brought change to those patterns. The course capitalizes on South India's rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART, SBS-ART**
Identical With: **ARHA292, ENVS262**
Prereq: **None**

ARCP293 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds--also known as coin hoards--provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard, the numbers in which they occur, and the spatial patterning of their findspots: all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value.

In this hands-on course, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA293**
Prereq: **None**

ARCP310 Archaeological Theory in Action: Research Design and Analytical Frameworks
Archaeologists draw upon diverse data sets and approaches to reconstruct rich pictures of ancient ecologies, build environments, economies, cultural and cognitive practices. This 0.5 credit seminar explores, challenges, and evaluates the theoretical frameworks employed by archaeologists in research design and analyses of past societies. Topics will rotate depending upon student interests and current research projects but will be chosen from among anti-racist archaeology, gender and ethnicity studies, object and entanglement theory, frameworks for experimental archaeology, funerary analyses, typology and data management, landscape archaeology, conservation, or ethical approaches to archaeological science, among others. Foundational theoretical texts will be discussed alongside current publications in each topic area. The seminar is designed to prepare students for independent research in archaeology and related fields. This seminar is required for all Archaeology majors and strongly recommended for Archaeology minors, in addition to being open to all students in related disciplines
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ARCP**
Prereq: **None**

ARCP329 Roman Villa Life
This seminar will explore life in the Roman countryside, from the luxurious suburban villas near major urban centers to working estates in Italy and the Roman provinces. The course will begin with a general survey of Roman villa life and then move to a more focused inquiry into specific topics including art and architecture, production, slave life, and transportation. Readings will be drawn from ancient literary sources, inscriptions, and modern social and archaeological studies. The course is intended for students from a variety of disciplines and backgrounds, but some knowledge of the Roman world is recommended.

Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST329**
Prereq: **None**

ARCP335 Art and Society in Ancient Pompeii
Buried by the eruption of Mt. Vesuvius in 79 AD and rediscovered in the mid-18th century, the once ordinary city of Pompeii is now an extraordinary laboratory for the study of ancient Roman life. This seminar surveys the art, architecture, and material remains of Pompeii and other cities destroyed by the eruption. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the political, social, and commercial life of a small Roman city and examine the unique evidence for reconstructing the private lives of Roman citizens.

This course fulfills the Archaeology and Archaeology Science track of the Classical Studies major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST335, ARHA335**
Prereq: **None**

ARCP338 Economies of Ancient Port Cities: Trade, Mobility, and Identity
This course explores urban life in ancient Mediterranean port cities, where harbors facilitated connectivity and long-distance trade and created cities that were defined by multicultural exchange and constantly reshaping identities. Through case studies drawn from Greek and Roman sites, the class will examine the lives of residents and port workers, focusing on themes such as trade, urban development, art, religion, food, and spectacle. With an emphasis on the archaeological material left behind, the course also explores how narratives about the past are shaped by the nature of surviving evidence.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CLST**
Identical With: **CLST338, ARHA219**
Prereq: **None**

ARCP341 Visualizing the Classical
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen--through landscape, sound, light, functionality/monumentality, and spatial relationships--shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical mapping, modeling, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST341, ARHA205**
Prereq: **None**

ARCP350 Animals in Archaeology
This laboratory course will explore how zooarchaeological methods for analyzing animal bones and teeth excavated from archaeological sites allow us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and techniques, including hands-on sessions for the identification and quantification of faunal remains. By the end of the course, students will be able to identify every bone in the mammalian skeleton and distinguish between the bones of common non-mammalian taxa. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP, SBS-ARCP**
Identical With: **E&ES350, ENVS348**
Prereq: **None**

ARCP352 Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean
This course brings a blend of ethnographic, environmental, philological, and scientific frameworks to the study of ancient medicine. For the first half of the class, students will explore the theories and concepts of medicine and the body in classical antiquity from Hippocrates to Galen. Students will tackle case studies (e.g., treatment of war wounds, epilepsy, gynecological ailments) and suggest appropriate treatments. The second half of the course will focus on medicinal plants as discussed in Dioscorides, considering their ecology, archaeology, and phytochemistry, with hands-on lab modules in which students will learn how to extract and analyze bioactive compounds of medicinal plant species. In final group-based projects, students will present a "plant biography," tracking the arc of the medicinal and cultural uses of a particular species from the ancient Mediterranean to the present day.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST352**
Prereq: **None**

ARCP355 Decoding the Stone Age: Analysis of Lithic Technology
Lithic (stone) tools are the oldest known type of human technology. They represent the most abundant and by extension one of the most informative

components of the archaeological record for reconstructing ancient human behavior over the last 3.3 million years. In this course, students will learn the methodological and theoretical basics used by archaeologists working on the Stone Age. The course includes hands-on training in how to identify and analyze stone tools, qualitative and quantitative approaches, and interpretive frameworks that allow archaeologists to use stone tools to understand broader anthropological questions about the evolution and diversity of human behavior. Students will analyze actual archaeological assemblages from important Stone Age sites stored in the Wesleyan University Archaeology and Anthropology Collections. Through this, students will be exposed to elements of data collection protocols and research design in a collections setting. Further, students will design exhibits for the campus community that incorporate the collections and the data they produce.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ANTH356**
Prereq: **None**

ARCP360 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **IDEA206, ANTH360, STS363**
Prereq: **None**

ARCP380 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

ARCP385 The Indian Temple
The temple (devalaya, "house of god") was the unparalleled building type in South Asia from the fourth through fourteenth centuries, and it is still of great importance today. This seminar examines the type from an interdisciplinary perspective, considering theological and ritual dimensions, matters of design and style, programs of decorative sculpture and painting, and the economic and political functions these buildings and institutions carried. Sessions will be arranged thematically, but we will also be concerned with processes of temporal change. No prior knowledge of temple architecture or Indian history and religion is assumed.

ARCP390 Making Rome: Monuments of Life in Ancient Rome
The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

ARCP421 Undergraduate Research, Science
Advanced students in archaeology have an opportunity to work intensively with departmental faculty to contribute to a variety of ongoing faculty research projects. These collaborations offer the chance for students to refine their research skills, gain exposure to conservation and research methods outside the basic curriculum, and work towards tangible research outcomes. Such outcomes may include research posters, creation of online databases, contributions to published works, contributions to or solo exhibit designs, or senior essay/thesis projects. Faculty projects vary from year to year but currently include studies in Mediterranean palaeoclimate, lab-based scientific study and digital modeling of archaeological artifacts, organic residue or ceramic studies (Dr. Birney, the OpenARCHEM project), or museum research projects in the Wesleyan Collections (which comprise approximately 35,000 objects), cataloging and researching artifacts (Dr. Murray, Wesleyan Collections). Participation is POI only. Contact the Archaeology Program Chair for more information.

ART AND ART HISTORY

The Department of Art and Art History is the administrative umbrella for two distinct major programs: Art History (ARHA) and Art Studio (ARST). Students can major in either program, with a maximum of 16 departmental credits counting toward the 32 required for graduation. This includes up to 3 courses at the 100-level and 13 at the 200-level or higher, including 2 ARST Senior Thesis Tutorial credits for students pursuing honors, or for writing a senior thesis in Art History.

Students double majoring in Art Studio and Art History may take up to 20 departmental credits, provided 2 are ARST Senior Thesis Tutorial credits for students pursuing honors. Additional opportunities, such as tutorials, internships, and teaching apprenticeships, are also available. Transfer credits from other institutions require prior approval and faculty review upon completion.

ART HISTORY

ARHA109 Introduction to Western Art I: Ancient to Medieval
This course introduces the art and architecture of the Western world during the ancient and medieval periods. The artistic traditions of the Near East, Europe, and the wider Mediterranean will be surveyed from the prehistoric era to ca. 1400 CE. Questions of style, content, function, and cultural and historical context will be examined alongside such perennial concerns as religion, rulership, social class, luxury, and the definition of art within its ancient and medieval milieus.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **MDST131**
Prereq: **None**

ARHA110 Introduction to Western Art II: Renaissance to Modern
This course surveys the development of European art from the Renaissance through the modern period. We will examine art's changing status within specific social and artistic contexts: from the Church and court of the Renaissance, through the formation of art academies in the late 16th century, to the development of an increasingly individualized artistic practice that led to the formation of an avant-garde. Classes will be organized chronologically and touch upon the following themes and ideas: politics, religion, and patronage; perception and experience; artistic identity and originality; relationships between artistic media; and the rise of a public sphere for art.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA127 Venice and the Renaissance
Venice -- a city built almost impossibly on a forest of stilts sunk into the mud of the lagoon and buttressed by powerful myths of divine origins, permanence, and prosperity - produced some of the most spectacular works of Renaissance art and architecture. This introductory-level course on the art and culture of Venice's "golden age" considers the works of artists such as Carpaccio, Bellini, Giorgione, Titian, Veronese, and Tintoretto, and architects such as Codussi, Sansovino, and Palladio in the context of the city's unique setting, social and governmental structure, cultural and political milieu, and larger geopolitical significance. It also positions Venice's artistic production within the broader framework of early modern Europe, exploring its connections with Byzantium and the Islamic world. The course also introduces students to key issues and methods of art history.

ARHA140F Van Gogh and the Myth of Genius (FYS)
This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist's own account of his career in his paintings and prodigious correspondence. Van Gogh's extensive, insightful, and fascinating writing begs the question of how one should treat an artist's statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886--1890.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **RL&L140F**
Prereq: **None**

ARHA141 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of Impressionist, Neo-impressionist, and Symbolist painters before moving to the south of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

ARHA151 European Architecture and Urbanism to 1750
This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society's identity? What is the

relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

ARHA161 Objects of Authority: Arts of African Royal Courts
This course will focus on African arts produced in courtly contexts between the eleventh and twentieth centuries. We will study domestic art objects that were integral to the exercise of power and authority in several African court traditions such as Benin, Ife, Kuba, Ashanti, Igbo, and others. Students will learn about formal qualities and thematic concerns that locate certain artworks exclusively within the royal lineage and monarchy. They will also come to understand how such artworks were deployed within chieftaincy circles to wield great spiritual and mystical power. Class readings and discussions will help us navigate questions of hierarchy and authority to transcend elitist narratives of power regarding African arts.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA162 History of African Art and Material Culture
This course offers an introduction to the rich and varied visual arts of Africa. By examining certain visual practices that evoke a distorted understanding of the continent, the course confronts stereotypes about the African continent. There will be an examination of compelling objects that represent a variety of African visual cultures, both historical and contemporary. The course offers evidence of a continent with a history to counter the idea that Africa is "frozen in time" and that African "traditions" never change. Weekly readings aim to provide a comprehensive overview of the art of diverse ethnicities to counter the notion that "Africa is a country" and "a continent in isolation."
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA172 Memory Image: Introduction to Art (as) History
One premise of art history is that works of art necessarily register or encode the time and place of their making. Some art practices, though, operate historically in more than an artifactual sense, whether by revisiting the art historical past through citation, or by actively responding to the socioeconomic, technological, or cultural conditions of their present. Works that comprise the focus of this class engage directly in the project of historical representation and research, recasting these activities through painting, photography, installation, and performance. Spanning a series of case studies from the 1960s through the present, this course provides an introduction to the practice of art history by way of recent works of art that have made the resources (and limitations) of historical methodology a subject of investigation. What is the role of art as a form of historical memory in an increasingly image-soaked world?
Offering: **Host**

ARHA175 Japanese Narrative Painting
The narrative handscroll (emaki) has been a major form of Japanese pictorial art from its origins in the eighth century. Characterized by a long, horizontal format designed to be unrolled and viewed in shoulder-width sections, the narrative handscroll combines text and image in a linear progression of time and space. This course will cover the historical evolution of the handscroll format, its inter-relation with the written word, as well as its artistic roots and subsequent impact. Special attention will be paid to the translation of the handscroll's narrative modes and imagery to large-scale painting formats, such as six-panel folding screens (byobu) and hanging scrolls (kakejiku). Among the questions to be considered are: What are the representational and narrative strategies that painters of narrative scrolls employ to tell their stories? How do we define the relationships between written text and visual image, and what roles do they play? What were the viewing practices for narrative scrolls, and in what contexts were they viewed and read? Through an investigation of a dozen masterworks, including the "Illustrated Scrolls of the Tale of Genji," "Illustrated Legends of Mount Shigi," and "Life of Saint Ippen," the course will familiarize students with the major modes--literary, hagiographic, historical, didactic--of Japanese narrative painting from the 12th through 18th century, as well as the major interpretive methods used by art historians to search for "meaning" in the visual arts--authorship, connoisseurship, formalism, iconography/iconology, semiotics, feminism, and social art history.

ARHA181F Mughal India: Introduction to the Practice of Art History (FYS)
Founded in northern India in the early 1500s, the Mughal empire was one of the largest centralized states in the history of the early modern world. During the two centuries of their effective rule over most of the Indian subcontinent, the Mughal emperors and their subordinates were prolific patrons of the arts, overseeing the production of lavishly illustrated books and picture albums and commissioning such architectural masterpieces as the Taj Mahal. This course offers an introduction not only to the art and culture of Mughal India but also to the practice of art history itself, through a sequence of six thematic units exploring and applying different methods that are central to the discipline. Each unit begins with critical reading and discussion of one or two key theoretical or

methodological statements, then continues through application to case studies drawn from Mughal India. The units include (1) techniques of visual description and formal analysis, (2) the concept of style and stylistic analysis, (3) the analysis of meaning in visual images (iconography and iconology), (4) models of time and the historical explanation of change, (5) architectural and historical analysis of buildings and their sites, and (6) historiographic assessment of debates and changing interpretations within art history. Each unit culminates in a writing exercise designed to provide students with structured experience in some of the various modes of art historical writing. The course is appropriate as an introduction both to art history and to Mughal art.

ARHA201 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt
This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house floors. Drawing upon a blend of archaeological, art historical, and mythological evidence, we will examine how the funerary practices and the very notions of the soul, the body, and the afterlife compare in these two societies. We will also explore how social class, gender, and ethnicity influenced those ideas. The course will also provide an introduction to archaeological theory and the interpretive strategies employed by archaeologists, art historians, and historians in the reconstruction of ancient societies.

Prereq: **None**

ARHA202 Art and Archaeology of the Bronze Age Mediterranean
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST, SBS-CLST**
Identical With: **CLST201, ARCP201**
Prereq: **None**

ARHA203 Survey of Greek Archaeology and Art
This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda!) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST214, ARCP214**
Prereq: **None**

ARHA204 Off with its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase--as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating!) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

The course falls under the Archaeology/Archaeological Science track of the Classics/CCIV Major requirements.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST283, ARCP285**
Prereq: **None**

ARHA205 Visualizing the Classical
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen--through landscape, sound, light, functionality/monumentality, and spatial relationships--shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical mapping, modeling, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at

the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.
Offering: **Crosslisting**
Grading: **A-F**

ARHA206 Art and Society in Ancient Pompeii
This seminar surveys the art, architecture, and material remains of the cities buried by the eruption of Mt. Vesuvius in 79 CE. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the social and political life of a small Roman city and examine the unique evidence for reconstructing the private life of Roman citizens, from their participation in local politics and government, to their religious beliefs and lives, to the interior decoration of their homes and their burial customs.

Prereq: **None**

ARHA208 ¿Convivencia o conflicto?: Las tres culturas de la España medieval a través del arte (CLAC.50)
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual wellbeing. This Spanish-language section complements the ARHA 310 curriculum, by exploring the resonance between medieval experiences of identity, pluralism, appropriation, and exchange and our own uneasy attempts at building a multiethnic, multicultural society. This class will be conducted in Spanish. ARHA 208 is open to intermediate and advanced Spanish learners (SPAN 113 and above), bilingual students, and heritage speakers. Enrollment in ARHA 310 is optional but encouraged.

ARHA209 Mosque and Cathedral: Islam and the West, c. 600-1500
This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaic, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **MDST209**
Prereq: **None**

ARHA210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

ARHA213 Cross, Book, Bone: Early Medieval Art, ca. 300-1100
This class surveys the art and architecture of early medieval Europe, from the decline of the Roman Empire and the multiculturalism of Late Antiquity

through the glory of Byzantium, the rise of Islam, and the establishment of Germanic kingdoms in Northern Europe. Style, content, function, and historical context shall be examined across monuments of architecture, sculpture, mosaic, manuscripts, painting, and the luxury arts. Questions of religious practice, political messaging, and cross-cultural translation shall be threaded throughout, for example: How might one picture God? How might one build a house of worship or decorate a sacred text? How might one best picture a ruler? How were art and artistry defined in early medieval Europe? How might we see dialogue, overlap, and/or competition between the art and architecture of Islam and Christianity, among other religious traditions? The art historical periods considered will include Late Antique, Byzantine, Umayyad, Abbasid, Migration, Insular, Carolingian, Mozarabic, Ottonian, and Viking art.
Offering: **Host**

ARHA215 Art Criticism
As a young critic, the art historian Hal Foster wrote: "I do not demystify the work which I discuss so much as I am demystified by it." Beyond criticism's primary object -- the artwork to be judged, rejuvenated, revealed -- what does it let slip about its own function as a social and cultural practice? This course will introduce students to art criticism while also attempting to understand the rapidly changing economic conditions that make it possible (or not). Students will be invited to write pieces of criticism on a range of media -- sculpture, photography, painting, print, video, and performance -- with assignments modeled on different genres of art writing (e.g., the exhibition review, the "critic's pick," the single artwork study, and the "hybrid" review-essay). The course will give students a chance to work closely with the Davison Art Collection and the Zilkha Gallery.

ARHA217 Building Nothing: Design After Progress
The built environment is responsible for over 40% of humanity's greenhouse gas emissions, but despite attaching words like "sustainable" and "resilient" to their products, design and construction practices remain fundamentally unchanged. This seminar considers the possibility of a design philosophy that doesn't take the goal of creation as a given. Topics include the lifespan of buildings and products, their maintenance and care, the unintended consequences of making, relationships with and obligations to materials and resources, and strategies for degrowth found in indigenous and vernacular design precedents. We read and discuss a key text each week that examines the history of technology and critically evaluates shifting theoretical perspectives on nature and human development as they relate to design.

ARHA219 Economies of Ancient Port Cities: Trade, Mobility, and Identity
This course explores urban life in ancient Mediterranean port cities, where harbors facilitated connectivity and long-distance trade and created cities that were defined by multicultural exchange and constantly reshaping identities. Through case studies drawn from Greek and Roman sites, the class will examine the lives of residents and port workers, focusing on themes such as trade, urban development, art, religion, food, and spectacle. With an emphasis on the archaeological material left behind, the course also explores how narratives about the past are shaped by the nature of surviving evidence.

ARHA220 Northern Renaissance Art
The Northern Renaissance, roughly ca. 1400-1600, was a period of thrilling transition in Europe and profound change for the Western tradition of art and architecture. For art history, the period's many paradigm shifts include the rise of oil painting, the spread of the printing press and print media, the growth of middle-class patronage, the Protestant Reformation, radical developments in the practice of portraiture, an increasingly global worldview and mentality, the foundations of what might be referred to as an art market, and a fundamental revision of the purpose and definition of both art and the artist. This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England. We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourgs, Campin, van Eyck, van der Weyden, Fouquet, Riemenschneider, Lucas van Leyden, Bosch, Dürer, Grünewald, Altdorfer, Cranach, Holbein, and Bruegel. Such a narrative will be equally enriched with less familiar and less canonical works. Threaded throughout are questions of mimesis, realism, skill, medium, and the growing cult of genius, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe.

ARHA221 Early Renaissance Art and Architecture in Italy
This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

ARHA222 Art and Architecture of Renaissance Florence
How did Florence rebound from calamitous plague to become the self-styled locus of the Renaissance? This survey of the art and architecture of Florence evaluates its cultural achievements against the improbabilities of their success. The city had negligible Roman history but championed the revival of classical antiquity; it was repressive but pushed the boundaries of representing gender and sexuality; its government slid from a republic to an absolute monarchy but fostered creative latitude; it spawned one of Italy's most popular religious

zealots and popularized secular ideals; it had no empire but became a hub of global trade and knowledge transmission. To understand how this happened, we will study famous artists like Botticelli, Leonardo da Vinci, and Michelangelo alongside their lesser-known and even nameless contemporaries. Painting, sculpture, architecture, drawing, and printmaking will come alive in lectures and by discussing related texts in translation, recreating artistic techniques, and examining original Renaissance artworks in person.

ARHA223 Visual Worlds of Himalayan Religions
How do Tibetan Buddhists look at religious images? What do pilgrims in Nepal see when faced with sacred monuments? Why do devotees in Bhutan display erotic caricatures in public? This seminar will explore the ubiquitous role of images and imagining in the religious traditions of the Himalayan region. Readings and viewings will examine the painting, sculpture, architecture, and performing arts of the Himalaya (including Tibet, Nepal, north India, and Bhutan), placing them in the context of local religious beliefs, ritual practices, and literary canons. The seminar aims to understand how Himalayan cultures produce religious images and the ways of seeing that invest them with meaning. Classes will address specific modes of visual representation, the relationships between text and image, and the social lives of images, as well various theoretical and methodological approaches for their reading and interpretation. Particular attention will be paid to representations of Buddha Sakyamuni and visual expressions of his life.

ARHA224 Italian Art and Architecture of the 16th Century
In addition to key monuments of 16th-century Italian art and architecture, this course seeks to introduce students to some of the most important figures of the period: artists and architects--such as Leonardo, Michelangelo, Raphael, Bronzino, Titian, and Palladio; their princely and ecclesiastical patrons--such as Cosimo I de' Medici and Pope Julius II; and their critics and biographers--such as Giorgio Vasari and Ludovico Dolce. Our aim will be to understand the complex artistic and architectural landscape of the period against the backdrop of shifting intellectual and religious trends, including the Counter-Reformation. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

ARHA226 Global Rome: Art and Architecture in Early Modernity
Rome has long called itself the "head of the world," but in the early fifteenth century, it was a backwater. This course surveys the art and architecture of Rome as it reclaimed the papal seat, grew its population, witnessed their deaths amid an infamous sack, and then amassed singular power through the transoceanic expansion of Catholicism. The local particulars of Rome will be considered alongside its global history, situating the accomplishments of Raphael, Michelangelo, Caravaggio, Artemisia Gentileschi, Bernini, and others in relation to Rome's ties to Europe, Africa, the Americas, and Asia. Particular attention will be given to Rome's relationship to its ancient empire, as well as the roles of female artists and patrons in a city whose population skewed increasingly male. Students will study architecture, painting, sculpture, drawing, print, tapestry, arms and armor, jewelry, clothing, and ephemeral design, as well as period texts in translation.

ARHA228 Off with Its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase -- as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit. The course falls under the Archaeology/Archaeological Science track of the CLST Major requirements.

ARHA233 Art and Culture of the Italian Baroque
This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

ARHA239 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France,

where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

ARHA240 Revolutionary France and the Birth of Modern Art, 1789-1900
This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. Themes this class explores include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution in France and its colonies; the redefinition of history painting in light of the abolition of slavery and the Declaration of the Rights of Man; the expansion of France's colonial empire and the representation of racial difference; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the destabilization of classicism in light of scientific discoveries and ideas of "primitivism"; and the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience. Although these developments took place two centuries ago, they continue to define the field of modern art today.

ARHA241 Introduction to European Avant-Garde, 1880-1940
This course introduces students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

ARHA243 American Modernisms, 1900-1945
Focusing on three case studies -- the Stieglitz Circle, the Harlem Renaissance, and Mexican Muralism -- this course examines the specifically pluralistic and diverse contributions of American artists to the development of modernism from 1900 through the Second World War. During this period, the United States began to be a terrain on which artists with roots in Europe, Africa, and the Americas developed advanced language in the visual arts and experimented with new mediums and formats for art. Topics we will explore include the relationship between art and industry in painting, sculpture, film, and photography; relationships between cosmopolitan and indigenous cultures; primitivism and its legacies; interrelationships between the visual arts, music, and poetry; constructions of gender and the emergence of the female artist; racial pluralism; and the articulation of hybrid American (and Pan-American) modernisms.

ARHA244 European Architecture and Urbanism, 1750-1910
This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include Neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

ARHA246 American Architecture and Urbanism, 1770-1914
This course considers the development of architecture and urbanism in the United States from the late 18th through the early 20th century. Major themes include the relationship of American to European architectures; the varied symbolic functions of architecture in American political, social, and cultural history; and the emergence of American traditions in the design of landscapes and planning for modern cities, especially Boston, New York, Philadelphia, Washington, D.C., Chicago, Los Angeles, and San Francisco. The course considers houses for different sites and social classes, government buildings, churches and synagogues, colleges, and commercial architecture of different kinds includes the origins of the skyscraper. Urban environments include cemeteries, public parks, streets, and civic centers. Discussion will be informed by recent historiography on race and the American built environment. Movements studied include neoclassicism, the Gothic and Romanesque revivals, the Chicago School, the Arts and Crafts movement, and the City Beautiful movement. Major figures studied include Thomas Jefferson, Benjamin Latrobe, Frederick Law Olmsted, Frank Furness, Henry Hobson Richardson, Louis Sullivan, the early work of Frank Lloyd Wright, Greene and Greene, Bernard Maybeck, Julia Morgan, and McKim, Mead and White.

ARHA249 "Public Freehold": Collective Strategies and the Commons in Art Since 1960
Art since 1960 has forged a contradictory alliance between the legal field of intellectual property and the expanded tradition of poststructural thought. Taking its title from conceptual artist Lawrence Weiner, this course navigates

that contradiction via four units, each corresponding to a specific artistic strategy: appropriation, scoring, collaboration, and participation. Testing the limits of the signable, saleable, and stealable, such techniques have thrown traditional concepts of originality and possessive individualism into arrears while giving rise, quite paradoxically, to some of the most celebrated careers and widely reported lawsuits involving allegations of creative property theft. Do such maneuvers amount to specious self-aggrandizement? Or do they indicate a renewed search to locate, foment, and protect sources of creative invention? The ever-expanding horizon of collaborative media access and increased pressures to enclose this new electronic commons have made such questions all the more urgent today.

ARHA250 Unsettling American Art, 1600-1900
This course examines developments in American art from roughly 1600 to 1900. Core objects in this class will range widely: quilts; maps; baskets; paintings across genres of portraiture, landscape, and still life; engravings; public monuments; daguerreotypes; and more. We will seek to understand the particular concerns and traditions animating objects across this heterogeneous span of materials, forms, and techniques. In so doing, we will also ask how artists and makers--including those whose names were never recorded--variously internalized, articulated, or examined the historical contradictions of their time, including the consolidation of settler colonialism and racial capitalism; rebellion, revolution, abolition, and civil war; industrialization and its ever-expanding and often violently lopsided acceleration of communication networks, labor relations, travel, and exchange; and the contested aim of defining a distinctively American aesthetic tradition in a land born of migration, encounter, forcible displacement, and polyphonic hybridization. Visits to area museums and collections will complement in-class work.

Prereq: **None**

ARHA251 Artists Design Exhibitions
This course explores the history and theory of exhibition-making as an artistic form. We examine key episodes in the history of artist-designed exhibitions, focusing on major works since the 1960s with an eye to foundational case studies in the early- to mid-20th century. Our discussions will generate a working typology of the form's various modes and functions, tracking how artist-designed exhibitions have variously served as spaces of public debate and agitation, propaganda spectacles, didactic displays, activist interventions, and sites of aesthetic experimentation. Exhibition design's material supports and conditions have been just as disparate: room-scale interiors, polyform spatial sequences, distributed multiples, and outdoor installations on city streets. Across each of these divergent formats, exhibitions are distinguished by their shared potential to create what Walter Benjamin once described as "simultaneous collective reception." As Benjamin's phrase suggests, exhibitions constitute publics, and in this course special attention will be paid to the types of publics--and the types of subjects--that specific exhibitions and exhibition strategies presuppose.

What can the history of exhibition design show us about the new "curatorial condition" of everyday life, in which data specialists now curate information, an artisan cheese shop curates its merchandise, and anyone with a social media account curates a presentation of self? Artists central to this history, and to which this course attends, include: El Lissitzky, Marcel Duchamp, Charles and Ray Eames, the Rosario Group, the Independent Group, Hélio Oiticica, Marcel Broodthaers, Louise Lawler, Group Material, Fred Wilson, Philippe Parreno, Mark Leckey, and Camille Henrot.

ARHA252 Contemporary Art Since 1980
This historically rooted introduction to contemporary art sets an anchor around 1980 and moves through the major debates of the last 35 years. This period gave rise to a bracing range of historical transformations: a post-communist Europe; an economically prominent China; queer and antiracist activism; increasingly molecular degrees of technological mediation in everyday life; assymetrical consolidations of a globalized network of travel, communication, and capital; climate and refugee crises; and a state of seemingly perpetual war, to name only a few. This course attends to the changing vocabulary of approaches by which artists intervened in these conditions and positioned their work in relation to a longer view of the history of art. Far from a comprehensive survey, the course acknowledges the inherently recursive and unstable condition of contemporary art history, a field of research and inquiry defined as a work in progress. The course is nonetheless structured in a loosely chronological fashion, sequenced according to formal techniques that emerged as timely responses to specific historical moments (photographic appropriation, moving image projection, social practice, painting, institutional critique, web-based art, etc.). Our work throughout will attend to theoretical frameworks that have remained influential in recent practice (postcolonial, feminist, poststructural, etc.).

Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA253 Art After 1945
This course examines artistic production in the United States between 1945 and 1980, with a primary focus on the United States. The historical conflicts of that tumultuous period presented new challenges for artists as they attempted, in their work, to respond to the "caesura of civilization" brought about by the Holocaust and World War II, to contend with the consolidation of postwar consumer capitalism and mass culture, and to situate their work in relation to the far-reaching social upheavals of the 1960s and '70s. Practices linked to the historical avant-gardes (such as abstraction, the readymade, Dada, and surrealism) echoed in these years as attention shifted from the canvas and studio to greatly expanded contexts of reception and public experience. The boundaries of the art object transformed in turn as artists developed new models of spectatorship to confront a world that had placed enormous pressure on traditional concepts of humanist subjectivity. Topics include New York School painting, pop art, minimalism, process art, conceptual art, performance, institutional critique, and site-specificity.

ARHA254 Architecture of the 20th Century
The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-

aided design from the 1990s, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa. Major movements and architects considered include the Viennese Secession, the Bauhaus, Le Corbusier, Mies van der Rohe, Frank Lloyd Wright, Alvar Aalto, and Louis Kahn, among many others.

ARHA256 New York City: Architecture and Urbanism
This course considers the history of architecture and urban development in New York City from colonial times to the present. Emphasis is on major landmarks of each historic period, with attention to related planning, parks, land and water transportation, housing trends, and urban infrastructure. Conditions of settlement, growth, decline, and renewal will be examined from a political, economic, and social perspective in varied neighborhoods. Contemporary topics include neo-liberal policies for urban development, green buildings, gentrification, affordable housing, and planning for the city's future in the era of impending climate change. While the focus will be on architecture, every effort will be made to see built environs as points of intersection between competing ideals and interests that shape the city we see.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA257 Just Cities: Architectures of Public Encounter
What is "the public," and how has it been conceived, relative to notions of the urban--to the web of ideas, forms, and fantasies constituting "the city"? Can art and architecture play a role in defining the public, or does the public's political and social construction place it outside the scope of specifically aesthetic concerns? This course addresses these and other related questions, positioning art and architecture in their broader cultural and historical contexts. It explores a range of socially charged, experiential, and participatory aesthetic and political practices, characterized by their distinctly public character and decidedly architectural and urban settings. At its core, it is concerned with issues of social justice as they relate to the material spaces of the modern city, and the manner in which those spaces are identified, codified, and made operative in the service of aesthetic, social, and political experience.

This course will be taught by M. Surry Schlabs, Yale School of Architecture.

ARHA258 Contemporary World Architecture
This course is a study of architecture and urban design throughout the world from the 1990s to the present. American topics include public and private development in the "neoliberal" city in New York, Chicago, Los Angeles, and post-Katrina New Orleans; contemporary museum architecture; sprawl and New Urbanism; and affordable housing. Major American architects considered include Frank Gehry, Richard Meier, Daniel Libeskind, and Diller Scofidio + Renfro. In Europe, the focus is on contemporary public architecture in Berlin, London, Oslo, Hamburg, Paris, Valencia, Lisbon, Rome, and Athens, with attention to major works of Sir Norman Foster, Zaha Hadid, Jean Nouvel, Santiago Calatrava, Rem Koolhaas, and Renzo Piano, among others. In China we will study state monuments of the Communist Party in Beijing and issues of preservation and urban development there and in Shanghai. In Japan the recent work of Tadao Ando, Kengo Kuma, and Shigeru Ban is a focus, as are selected projects by other architects in Tokyo, Yokohama, and Osaka. Additional lectures will treat airport architecture in Asia, and sites in India, Jerusalem, Cairo, Abu Dhabi, Guinea, South Africa, Nigeria, Rio di Janeiro, Chile, and Quito, Ecuador. The last quarter of the course focuses on green or sustainable architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling and ventilation, timber and rammed-earth techniques, LEED certification, wind and geo-exchange energy, green skyscrapers, vertical farming, and zero-carbon cities.

ARHA259 Currents of Post/Minimalism, 1960-1979
This course examines visual production made in North America between the 1960s and the 1970s with attention to Minimalism and its antecedents. Since its inception, Minimalism has been a measure and benchmark for twentieth century artistic practice. A primary focus will be artistic interpretation of form and to the challenges posed to its political exigency during a period marked by global warfare, new technologies, fierce protest, and economic shift. Each lecture will be anchored by a discussion of an artist whose practice will be the basis for course themes--energy, distance, education for example. With artists as our guides, we will revisit the development of the aesthetic boundaries, (sculpture, film, performance, institutional critique) which were asserted as well as challenged by attuning to exhibition histories and interdisciplinary practices. As this moment of artistic contribution is actively under consideration by curators of contemporary art, this course will also feature practical insight into the methodology and concerns of contemporary exhibitions dedicated to this period.

ARHA262 Censorship, Culture Wars, and Controversy in Art
Art history is marked by various forms of state, community, or institutional censorship. Such events can be flash points in culture wars, as in the United States in 1989, when four artists--most of them queer--were denied funding from the National Endowment for the Arts after their work was deemed "obscene." Sometimes art that unearths sensitive cultural histories can lead to calls for destruction, as in Sam Durant's 2012 work Scaffold, which referenced state violence against the Dakota people, leading tribe members to protest what they felt was Durant's insensitive handling of the subject. Events like these raise key questions within art and broader society: Who should have the authority to decide which art should be exhibited, and to what audiences? What constitutes censorship? When might censorship, or the curtailing of speech, be justified?

This course will examine these questions focusing on the 20th and 21st centuries in the United States, but also global contemporary art. We will consider such issues in the wake of a recent spate of museum exhibitions canceled due to controversial content, the dismantling of monuments to colonialism and the transatlantic slave trade, as well as today's culture wars as conservative book bans make headlines and hate speech abounds. We will also explore new channels for arts funding, exhibition, and publishing that emerge in response to censorship. In addition to important texts by art historians including Sarah

Parsons, Aruna D'Souza, and Rosalyn Deutsche, among others, we will also read interdisciplinary legal scholars like Sonya Katyal and Amy Adler who write from the perspective of law and policy. We will also read the landmark Supreme Court case NEA v. Finley. Assignments include an in-depth case study of a canceled exhibition.

ARHA263 Curatorial Workshop: Images of the Floating World
This course will provide students with practical training in the design and development of a gallery installation in the Davison Art Center (DAC). The theme for this semester is Japanese woodblock prints. We will carry out the many and diverse components involved in creating a gallery installation, from conception to execution, including concept development, catalog and label entries, accessibility, layout, and design. The course will culminate with an installation at the DAC, which will include an accompanying publication as well as permanent online catalog entries for individual prints on the DAC's website.

Images of the floating world, or ukiyo-e, refers to a genre of Japanese art that emerged in the 17th century to depict the pleasures of life of that period--beautiful women, famous kabuki actors, views of famous places, and erotic pictures, among other subject matter. In most cases, these are woodblock prints, images produced by craftsmen from woodcuts based on originals painted by artists. Because they could be produced quickly, cheaply, and in large numbers, woodblock prints were exceptionally well-suited for the representation of the latest fashions or politics. Ukiyo-e prints made their way to Europe in the 19th century and remain the most popular form of East Asian art in the West. The Davison Art Center has around 600 Japanese woodblock prints in its collection, ranging in date from the 17th to 20th centuries and including works from all the major artists of the Edo period (1615-1868).

ARHA263B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870
This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

ARHA263C Curatorial Workshop: The Northern Renaissance Print
The flourishing of the print medium in Northern Europe during the later 15th and 16th centuries is one of the defining hallmarks of the Northern Renaissance, as well as one of the most significant turns in the Western tradition in general. The rise of this medium rested upon the ca. 1450 development and spread of the printing press, which helped spark numerous episodes of historical consequence, including the Protestant Reformation, the spread of Italian humanism, and the continued rise of an increasingly literate, and increasingly image-hungry, middle class. Many of the most influential artistic personalities of the era, including Schongauer, Dürer, van Leyden, Altdorfer, Holbein, Cranach, and Bruegel, pushed this exciting new technology in multiple directions, many of which altered and impacted fundamental concepts of art, the artist, authenticity, and value. Wesleyan is fortunate to possess one of the foremost collections of print media in the country in the collections of the Davison Art Center. This Curatorial Workshop is structured around the study and first-hand examination of the DAC collection, and it will include a class-generated exhibition of Northern Renaissance prints.

ARHA264 Photography and Law: Mugshots, Privacy and Publicity, Obscenity, Copyright, and Evidence
This seminar is designed as an introduction to the major developments in the legal history of photography in transatlantic (US-UK especially) society from the first law cases involving photography in 1840 through to contemporary legal debates about such topics as cameras in the courtroom, sexting, surveillance, photographing police, dash cam and body cam videos, admissibility of photographs as evidence, obscenity and moral boundaries of subject matter, and copyright. A range of secondary historical and theoretical writings will anchor the discussions, but the course will focus primarily on student analysis and interpretation of primary and archival sources (texts of legal cases, law reviews and dissertation, news articles, and documentary and video footage). Students will gain knowledge of how legal history has shaped the history of photography, and new perspectives on the historical origins of contemporary issues in photography and digital imaging. This course should be of interest especially to history majors and non-majors who are interested in law, photography, and culture and will also contribute to the "Visual and Material Studies" module in History.

ARHA266 History and Core Ideas in African Photography: 1850s to the Present
This course explores the history of photography on the African continent from the mid-nineteenth century to the present. It focuses on the colonial experience, anti-colonial struggles, decolonial imagination, the materiality of the medium, gender, and the nature of modernist expressions provoked by the medium since the twentieth century. These themes are explored through a study of specific photographers, archives, concepts, and exhibitions.

ARHA267 Memorials, African Art, and the Burden of Remembering
Throughout history, Africans have preserved the memory of their loved ones through words chanted in songs such as Yoruba Oriki; images rendered in wood, concrete, and metal; and other means. This course explores the multitude of ways in which Africans have memorialized their dead from the 9th century BCE to the present. In Western commemorative paradigms individuals have written poems, books, or essays, produced paintings and sculptures, taken photographs, and recorded videos. In Africa, comparable modes of preserving the memory of the dead have included sculpted ancestral figures, memorial effigies, and potent power objects. For instance, the memory of the 98th king of the Kuba people in the Democratic Republic of the Congo (who was believed to have reigned during the solar eclipse of 1680) was preserved in the sculpture of Shamba Bolongongo, while a mask named mwaash a mbooy memorialized the son of Woot, the iconic ancestor who married his sister, Ngaady a mwaash and founded the ruling Kuba dynasty. In Luba society, visual memory devices such as lukasa have been deployed to trigger memories of past heroes and their exploits during a ritual ceremony known as Mbudye. In Yoruba society, Ibeji figures have preserved the memory of the late twins, while Dogon sculptures have been used to embody the soul of the deceased. Through weekly readings and lectures, this course will examine these commemorative objects by focusing on their formal qualities and thematic usage in African art over the centuries. The course is divided into two segments. The first segment deals with pre-colonial modes of preserving the memory of the dead, such as sculpted ancestral figures, memorial effigies, masks and masquerades, and potent power objects. The second segment deals with contemporary forms of memorialization through museums, monuments, commemorative art, among others, in Africa from the 19th century to the present. Through weekly readings and lectures, the course will examine these commemorative objects by focusing on their formal and thematic qualities, as well as the larger political questions surrounding their production, usage, and survival in Africa over the centuries.

ARHA268 African Avant-Garde: Contemporary African Art in a Global Dialogue, 1900 to the Present
This course provides an introduction to modern and contemporary art produced by Africans on the continent and in the diaspora. Africa is famous for its dynamic wood and metal sculptures that played a vital role in launching the modern era in Western art. While Pablo Picasso, George Braque, and Henri Matisse were studying African masks and figurative sculpture, African artists such as Aina Onabolu, Gerard Sekoto, and Kofi Antubam, among others, were beginning to experiment with new idioms of visual expression introduced from Europe. Professional schools of fine art were established in urban centers across the continent as part of the colonial project. Thus, an African avant-garde was born. African artists have been contributing to global visual dialogues in contemporary art; they participate in major biennials, and some have become superstars in the international art world. The work of artists such as Julie Mehretu, Yinka Shonibare, Ibrahim Mahama, and El Anatsui is collected by museums all over the world. This course traces the development of African art during the twentieth and twenty-first centuries, exploring the lives of artists as well as the national and global contexts in which they have worked and in which their art circulates. Class meetings will include lectures and discussions organized around reading assignments and video screenings.

ARHA269 History of African American Art
This course will introduce students to a history of African American artistic production from the late 18th century to the present, in a range of media and styles. While we will focus primarily on the visual arts--looking at sculpture, painting, photography, collage, film, performance, and installation--we will also consider the deeply interdisciplinary nature of Black cultural production, highlighting the important role of music, poetry, dance, and theater.

We will explore how African American artists, both individually and collectively, have negotiated the terms made available to them by cultural institutions, whether by struggling for inclusion, acknowledgement, and validation; actively protesting racist and exclusionary policies; or by forming alternative institutions, communities, and spaces in which to work and share support. From the Harlem Renaissance to the Black Arts Movement and "post-Black" exhibitions, art works will serve as a primary source to ask, is there such a thing as a "Black aesthetic" and if so, how would one define it? Why might an African American artist reject such an idea? Other key questions will include: What is the role of visual representation in political struggle? How have artists mobilized portraiture as a tool of liberation? What does it mean to turn away from figuration, toward abstraction or opacity? How have artists grappled with questions of nationhood, belonging, and diaspora?

Together, we will trace how artistic forms, techniques, and motifs have served both as sites of collective history and as speculative propositions to envision new futures, articulating what Robin D.G. Kelley calls "freedom dreams."

ARHA276 Eccentricity, Gender, and Occidentalism in Edo-Period Art (1615-1868)
The course will explore the history and artistic production of Japan's Edo period (1615-1868). This was a time of unprecedented peace, a time of social, economic, and political change that brought new modes and manners of visual expression and a sharpened focus on the individual artist. New trends in artistic identity emerged during this period, particularly those related to eccentricity, gender, and Sinophilia (love of Chinese culture). We will study the major artists and artistic movements of the Edo period, considering how these new trends found expression in the works of art produced during this time. Formal examination of the material and expressive qualities of works of art will be followed by a consideration of how other factors such as location, social background, education, and the religious faith of the artist are visible in the works they produced. The interplay between historical and artistic movements will be examined through discussion of issues such as materiality and medium, patronage and individuality, and traditionalism and poetic expression. Students will become familiar with the various media employed by Japanese artists, the techniques of painting and printing, and the sources and theories that inspired the innovative objects under investigation. More broadly, this course aims to teach students how to "read" Japanese art, how to look at a work of Japanese art and understand what it is they are seeing.

ARHA279 Arts of China and Japan: From Shang Bronzes to Erotic Woodblock Prints
The course will introduce students to the visual arts of China and Japan, focusing on painting, sculpture, and the decorative arts from the Bronze Age through the early modern period. We will study key moments in the history of Chinese and Japanese art and the major works that distinguish these moments. The works will include Shang Dynasty bronze vessels, Buddhist art, early calligraphy and figure painting, narrative handscrolls, landscape painting, and popular art. We will apply different critical and analytical methodologies to our study and will pay close attention to social, political, religious, and cultural contexts of artistic production.

ARHA281 Modern Japanese Art
This class is an introduction to the history of Japanese art from the mid-nineteenth century to the present. In this chronological study we will encounter a range of forms--woodblock prints, painting, photography, sculpture, performance, and new media--and we will consider how Japanese artists responded to major societal, political, and economic changes over the last two centuries, including industrialization and modernization, major natural disasters, war, questions of cultural/national identity, and debates centering on what "tradition" meant to artistic practice in the modern and contemporary eras. Using visual analysis as our core skillset, this course will also rely on readings from secondary scholarship, as well as those by Japanese artists and art critics from each time period to help us better understand the historical contexts surrounding each artist, artwork, or art movement.

ARHA284 Buddhist Art and Architecture
Visual imagery plays a central role in the Buddhist faith. As the religion developed and spread throughout Asia it took many forms. This class will first examine the appearance of the earliest aniconic traditions in ancient India, the development of the Buddha image, and early monastic centers. It will then trace the dissemination and transformation of Buddhist art as the religion moved north and then east through Central Asia, China, Korea, and Japan. In each region indigenous cultural practices and artistic traditions influenced Buddhist art. The class will address topics including the nature of the Buddha image, the expansion of the Buddhist pantheon, the function and reception of Buddhist images, the political uses of Buddhist art, and the importance of pilgrimage, both in the past and the present. Over the course of our study, we will consider four important movements in Buddhist practice: Mahayana, Pure Land, Esoteric, and Zen.

ARHA285 Art and Archaeology of Ancient India
This course is an introduction to the art and material culture of ancient India, from prehistory through the formation of the classical tradition in the fourth century CE. The broad swath of human experience covered necessitates a thematic approach, focusing on key moments, cultures, object types, and methodological approaches, arranged in a roughly chronological fashion. Thematic units may vary somewhat from year to year, but are likely to include: the meaning and use of the carved stone seals of the Indus Valley civilization; the impact of the Vedic Aryas on the development of Indian ritual and imagery; how to read the iconographic language of the "plant and animal style" in decorative sculpture; the meaning and significance of the Asokan pillars; and the architecture and ritual of Buddhist monastic life in the cave monasteries of western India.

ARHA286 Empire and Erotica: Twenty-three Masterworks of Indian Painting
The history of later Indian painting (16th--19th centuries) is dominated by two distinct stylistic traditions, one flourishing at the court of the Mughal empire, the other at the courts of the various Rajput dynasties that held sway in regions along the periphery of the Mughal domain. The course introduces these two traditions through in-depth consideration of twenty-three representative masterworks, paintings that demand sustained close examination to fully unpack their content, their aesthetic dimensions, and the historical milieu in which they were produced and received. The first half of each session is devoted to a collective "close looking" at one of the key paintings (in the form of a high-resolution digital image), which then leads into broader discussion of related works and larger interpretive themes. Topics to be considered include the

historical connections between the Mughal and Rajput schools; the relationships between painting, poetry, and music; the concerns of natural history painting; and the manner in which both Mughal and Rajput artists appropriated formal conventions from 16th century European prints and paintings. No previous knowledge of Indian art or the methods of art history is assumed or needed to succeed in this course.

ARHA287 Islamic Art and Architecture
From merchant mosques in China to paintings of lovers exchanged in the urban squares of Iran, Islamic visual culture encompasses a vast geographic and cultural span. What holds this large and diverse corpus--elite and common, religious and secular--together in this class is an interest in how works of art interact with their communities. This course is an introduction to the art, architecture, and material culture of the Islamic world, from its beginnings in the seventh century, with an emphasis on the premodern periods. Our thematic approach will cover questions of interfaith exchange, race and slavery, and gender and sexuality. We will study manuscript paintings, calligraphy, mosques, palaces, pottery, lacquer, and metalwork.

Prereq: **None**

ARHA289 Art, Wit, and Might in Islamic Courts
How do artists, patrons, and audiences negotiate power and aesthetic pleasure? This course examines the art produced for courtly elites between 1300-1800 in the Islamic world. In recent years, scholars have increasingly relied on the term "Persianate culture" to describe a set of literary texts, bodily practices, and codes of conduct shared in courts across the Islamic world. Our focus will be this shared courtly culture, supplemented with comparative cases from other parts of the world. We will study luxury objects, poetry, architecture, illustrated manuscripts, customs of dining, princely collections, and objects of sensory pleasure to understand how courtiers fashioned identities, and how the arts shaped courtly societies. Readings include primary sources and influential secondary texts from art history, literature, and the social sciences.

ARHA290 Mahabharata and Ramayana: The Sanskrit Epics and Indian Visual Culture
This course explores the complex interface between literary texts, painted illustrations, and visual performance traditions in South Asia, taking as our primary focus the two great Sanskrit epics, Mahabharata and Ramayana. Both epics will be read in abridged translation to provide familiarity with the overall narrative structure and thematic concerns of the two texts, and a number of excerpts from unabridged translations will be studied in detail to arrive at a fuller understanding of the contents of key episodes and of the style and texture of the two works. The first part of the course addresses a series of questions pertaining to the literary versions of the two epics: What is epic as a genre, and what are its social roles? Do the Mahabharata and Ramayana manifest similarities that permit us to identify a distinctive Indian epic type? What are the connections between these epics and the early history of India? Why, and how, did the written texts we have today come to be redacted from bodies of oral tradition? In the second part of the course, we will consider the visual manifestations of the Sanskrit epics in the form of painted manuscript illustrations, classical Sanskrit plays (known literally as "visual poetry"), later performance traditions such as Kutiyattam, and, finally, selected films of the Hindi- and regional-language cinemas. This course requires no prior knowledge of Indian literature, history, or art and may serve as an effective introduction to the culture and civilization of South Asia.

ARHA292 Archaeology of Food, Trade, and Power in South India
This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life--agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority--as well as historical events and processes that brought change to those patterns. The course capitalizes on South India's rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.

ARHA293 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds--also known as coin hoards--provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard, the numbers in which they occur, and the spatial patterning of their findspots: all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value.

In this hands-on course, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

ARHA294 Art and Revolution in Modern and Contemporary Middle East
This course examines the intersection of art and politics in the Middle East from the late nineteenth century to present day. From the fall of empires to the rise of nation states, the modern period left a particular legacy in the Middle East. Artists in the Middle East have responded to the complex dynamics of Westernization and Orientalism, created avant-garde movements, and negotiated the tensions between the traditional and the new. For their part, governments -- whether democratic and authoritarian -- have sought to create or erase a national image, whether in the Republican Ankara, post-Islamic Revolution Tehran, or in the West Bank. Focusing on painting, sculpture, architecture, and mass media, this course offers students critical tools to analyze art's relationship to identity, war, gender, and museology.

ARHA295 Critical Race and Art History: Theories and Methods
How does the study of art shift if we begin with questions of race, power, and colonialism, rather than treating them as secondary? Concepts such as mastery, familiarity, strangeness, taste, and beauty are formed by conditions of domination and subjugation. Moreover, the histories of material production and cultural expression are fundamentally entwined with the circuits of enslavement, forced migration, and the extraction of resources, people, goods, and "styles."

For the bulk of the semester, we will focus on a series of case studies drawn from the 15th to 20th centuries, a period of intense European contact and conquest in Africa, Asia, the Caribbean, and the Americas. Topics will include: representations of Africans in Renaissance Germany; African depictions of the Portuguese circa 1492; the appearance of parrots, kraak (Chinese) porcelain, and other goods from "exotic" locales in 17th-century Dutch still lifes; the taxonomies of racial difference in Spanish casta paintings; debates about sculptural polychromy and the "whiteness" of marble; the relationship between expansionism, empire, and the genre of landscape; "primitivism" and European artists' "discovery" of African artistic forms; the critical interest in "racial art" in the interwar U.S.; and contemporary conversations about museums and restitution, among others.

Throughout, works of art are primary sources with which to study the specificities of periods, places, and their social arrangements. While we will emphasize difference and historical contingency, our longue durée approach will enable us to draw connections about art's role in processes of primitive accumulation, dispossession, and racial capitalism.

ARHA301 Making Rome: Monuments of Life in Ancient Rome
The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

ARHA310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why "convivencia" ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

ARHA311 The Body in Medieval Art
Medieval thinkers theorized the body in ways vastly different from how human bodies are conceptualized and defined today in the twenty-first-century West. Indeed, the "medieval body" was not at all a stable or monolithic entity, but rather a shifting constellation of ideas and practices that waxed, waned, and coexisted throughout the European Middle Ages, ca. 400-1400. The diversity of medieval attitudes toward the body helped inform its representation in art, which, simultaneously, was also dependent upon conventions of craft, medium, artistry, preciousness, and style. "Body" signals not only earthly bodies -- sexed, fleshly, corruptible, and soon to decay -- but also the soul (whose well-being was equally fragile), as well as heavenly, angelic, and divine bodies, including that of Christ. This course analyzes medieval strategies of representing these bodies while situating them in their respective intellectual and cultural environments. Primary-source materials will be contextualized by secondary literature, and our inquiries will remain cognizant of gender-, sexuality-, race-, and performance-critical methods. The bodies examined will include, and are not limited to, saintly, gendered, racialized, clerical, monstrous, virginal, heretical, sickly, healthy, courtly, resurrected, and uncircumscribable bodies.

ARHA312 Medieval Manuscripts
Medieval manuscripts were dense, considered gatherings of text and image, and they are among the richest of artifacts bequeathed to us by the Middle Ages. Manuscripts both crystallized and intervened in many of the key intellectual, religious, and aesthetic foundations of medieval Europe. To step into a luxurious medieval manuscript--into its script, its miniatures, its marginal decoration, its scribbles, its little monsters and unexpected grotesques, its tears and signs of use--is to probe a particular artform, distinct to pre-modernity, in which the definition of painted image and written word differed markedly from later centuries of the Western tradition. Throughout, basic questions of the relationship between text and image, and the linguistic and the pictorial, repeatedly beg attention. How were these books made, who used them (if they were used at all), how did the reading process unfold in the medieval period, and how did pictorial decoration assist in revealing--or, perhaps, obscuring--truth? These questions, and more, will inform this seminar's systematic inquiry of the making, function, and layout of the medieval book, from its Late Antique origins to the 15th century advent of printing.

ARHA325 Eloquent Forms: Topics in Italian Renaissance and Baroque Sculpture
Early modern Italy was a site of vibrant and far-reaching innovation in the plastic arts. Driven by intense artistic competition, sustained by lavish patronage, and produced for religious, commemorative, and decorative purposes in both public and private settings, sculpture reached an unprecedented peak of creative ambition, material experimentation, and theoretical reflection during this period. From monumental urban commissions such as fountains to small-scale precious objects prized by elite collectors, sculptural works profoundly shaped the visual and sensory worlds of early modern Italy. This seminar explores the making and meaning of sculpture in the Renaissance and Baroque periods through close engagement with the works and careers of key artists, including Lorenzo Ghiberti, Donatello, Andrea del Verrocchio, Niccolò dell'Arca, Francesco Laurana, Properzia de'Rossi, Michelangelo, Benvenuto Cellini, Giambologna, Leone Leoni, Gianlorenzo Bernini, and Alessandro Algardi, among others. Readings and discussions are organized around thematic issues such as the making and viewing of early modern sculpture; the rhetoric of sculptural materials; verisimilitude and animation; sculpture and the senses; fragmentation and the non finito; touch, desire, and the nude; representations of force and violence; antiquarianism and collecting; tombs and sculptural commemoration; and monsters and monstrosity in garden sculpture.

ARHA335 Art and Society in Ancient Pompeii
Buried by the eruption of Mt. Vesuvius in 79 AD and rediscovered in the mid-18th century, the once ordinary city of Pompeii is now an extraordinary laboratory for the study of ancient Roman life. This seminar surveys the art, architecture, and material remains of Pompeii and other cities destroyed by the eruption. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the political, social, and commercial life of a small Roman city and examine the unique evidence for reconstructing the private lives of Roman citizens. This course fulfills the Archaeology and Archaeology Science track of the Classical Studies major.

ARHA338 Bauhaus: Art, Craft, Design
This seminar examines the theory and practice of the Bauhaus, the most influential art school of the 20th century. The Bauhaus proposed a radical concept: to reconstruct the material world of war-torn Europe to reflect principles of unity in the arts and within all world cultures. In the 15 years of its existence, from 1919 until 1933, the Bauhaus underwent many changes, including moves from Weimar to Dessau and Dessau to Berlin, as well as the reorientation of its curriculum away from craft and towards industrial production. Throughout, its activity was defined by a series of tensions, between fine and applied arts and between form and function. Attracting men and women from Western and Eastern Europe, the Americas, and East Asia, the Bauhaus adopted an international and gender-inclusive orientation from the beginning, even as gender inequalities persisted. After the school's forced closure in 1933 by the National Socialists, many of its teachers and students left Germany to found art schools throughout the globe, and its core principles continue to shape art pedagogy and practice today, above all its a commitment to experimental learning in de-hierarchized workshops. This course will examine the origins, core products and theories, and afterlife of the Bauhaus.

ARHA339 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

ARHA352 Energy and Modern Architecture, 1850-2020
This seminar explores the evolution of mechanical systems for heating, ventilating, and cooling in modern architecture from the mid-19th century to the present. The aim is to show how architects, engineers, fabricators, and urban governments worked to develop modern systems of environmental controls, including lighting, as means of improving both the habitability of buildings and health of their occupants. The course will trace the adaptation of technical innovations in these fields to the built environment and how those responsible for it sought to manage energy and other resources, such as funds and labor, to create optimal solutions for different building types, such as factories, theaters, assembly halls, office buildings, laboratories, art museums, libraries, and housing of various kinds, including apartment buildings for higher- and lower-income residents. An important theme will be the relationship of energy systems for individual buildings and urban infrastructure, including water systems, electrical, and other utilities. The last part of the course focuses on contemporary green, or sustainable, architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling, LEED certification, wind and geo-exchange energy, green skyscrapers, net-zero energy buildings, vertical farming, and zero-carbon cities in the United States, Europe, and Asia.

ARHA355 Concepts in Contemporary Art
In this interdisciplinary seminar and studio course, we explore key concepts in contemporary discourse across a range of forms, genres, and disciplines. How do works of art respond to and reframe central debates in the wider culture? In what ways do the theory and practice of art supplement or contradict each other? How does research function within the context of art historical study and contemporary artistic practice?

To contend with these questions, students develop a series of projects over the course of the term in response to specific conceptual prompts. These investigations may take the form of studio-based work or written scholarship depending on student interest and will culminate either in a final research paper (for those registering for Art History credit) or a final project in any medium (for those registering for Art Studio credit). Along the way, we study artworks, literary texts, works of social theory, art historical scholarship, films, popular culture, and other objects to ground our research. Parallel activities may include conversations with artists and art historians, methodological workshops, site-visits, trips to museums, and archival research.

Since the course's aim is to cultivate unexpected collaborations, cross-disciplinary encounters, and new ways of conjugating the history, theory, and practice of art, the final portion of the semester will focus on the organization of a collective exhibition, event series, symposium, publication, or other expanded curatorial endeavor. The course meets Fridays 12:30 pm-5:30 pm, with a break during that interval. Class time may on occasion include individual meetings and independent work.

ARHA360 Art and Ecology, 1960s to the Present
This seminar examines the place of ecological thinking in modern and contemporary art since the 1960s. Through a series of case studies, we will explore a range of approaches, from works investigating systems of interconnecting flows binding the living and non-living, to interventions that more directly confront ecological destruction and climate emergency. Projects of activist immediacy will be considered alongside works of more distanced aesthetic experimentation, across a range of modalities including lens-based media, performance, painting, site-specificity, and sculpture.

ARHA364 Architecture: Historiography, Theory, Criticism; Traditional and Contemporary Approaches
This seminar -- intended primarily for majors in history of art and architecture, for studio majors concentrating in architecture, and students interested in urban studies -- surveys different methods of studying architecture and its history. Emphasis throughout is on comparison of general theories of interpretation in art history and other disciplines and their application to specific works of art and architecture. Topics include monumentality and collective memory, stylistic analysis, philosophical aesthetics, iconography and semiotics, patronage and ideological expression, structural technology and building process, material culture and consumption, vernacular architecture and cultural landscapes, spatial form, urban landscapes, sociology, and affordable housing. Along with colonial, postcolonial, and decolonial studies of architecture, the seminar incorporates feminist architectural history and theory, energy studies, race and histories of modern architecture, and questions of canon formation and canonicity.

ARHA367 African Modernism and the African American Diaspora
This seminar will examine the relationship between African art and the Black diaspora, especially in the United States. We will look at the crosscurrents of artistic ideas and the impact of artists' ongoing travels between Africa and the United States during the twentieth and twenty-first centuries. The seminar will investigate how these exchanges gave birth to a robust intellectual movement and artistic pan-Africanism in the United States and beyond. By juxtaposing the works of a range of artists such as Jacob Lawrence, Aaron Douglas, Ben Enwonwu, Skunder Boghossian, and others, the course will propose an alternative reading of the transnational, transatlantic aesthetic sensibilities that informed these artists' works during the post-WWII period and their wider impact on African modernism.

ARHA379 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage
This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity

of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel. Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

ARHA381 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

ARHA382 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds-also known as coin hoards-provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard; the numbers in which they occur, and the spatial patterning of their findspots all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value. In this seminar, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

ARHA385 The Indian Temple
The temple (devalaya, "house of god") was the unparalleled building type in South Asia from the fourth through fourteenth centuries, and it is still of great importance today. This seminar examines the type from an interdisciplinary perspective, considering theological and ritual dimensions, matters of design and style, programs of decorative sculpture and painting, and the economic and political functions these buildings and institutions carried. Sessions will be arranged thematically, but we will also be concerned with processes of temporal change. No prior knowledge of temple architecture or Indian history and religion is assumed.

ARHA387 The Persian Illustrated Book
From comic books to Magritte's "This is not a pipe," there are numerous ways texts and images connect. Do images and texts "speak" differently, or can they be in sync? In this seminar, we turn to fourteenth- to seventeenth-century illustrations of a body of Persian literary masterpieces, among them Ferdowsi's Book of Kings and Nizami's Quintet. Our discussions will focus on artistic media and translation: What can an artist's illustration choices tell us about their reading of the text? What happens when a literary work moves from book to picture, culture to culture, painting to vessel? Students will get hands-on experience with rare books.

ART STUDIO

ARST131 Drawing I
This introduction to drawing gives special attention to the articulation of line, shape, volume, light, gesture, and composition. A variety of media and subjects will be used, including the live model. This course is suitable for both beginners and students with some experience. Individual progress is an important factor in grading. The graded option is recommended. Full classroom attendance is expected.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST171 Design Lab
Design Lab is an introduction to design representation and production methods, focused on the integration of design software, model-making, and portfolio instruction with the introductory design studios. This course is to be taken concurrently with ARST 220, ARST235, or ARST270.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST190 Digital Foundations
This course introduces the foundations of digital art through contemporary artistic practice. Students will research the history of digital art and examine relationships of digital media and contemporary art. The class has a theoretical focus on machine use within the process of art making while building foundational digital skills. Projects will focus on four key areas including: Digital Imaging, 3D Modeling and Virtual Design, Time Based Media, and Digital Fabrication. Building on these four areas the course will culminate in an individualized research based final project and presentation. Through experimentation, critical analysis, critique and peer review; students will generate a unique portfolio of digital art works.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA190**
Prereq: **None**

ARST190Z Digital Foundations
This introduction to the digital studio engages software and electronic media as an expanded field of creative production in contemporary art and design. Through a sequence of workshops, exercises, and hands-on digital projects, students will develop their critical and creative toolkits and learn to conceive, refine, and present original work. Open to all skill levels, this course prioritizes sustained and rigorous engagement with digital practice as well as conceptual and formal problem-solving.

Workshops in image manipulation, compositing, motion graphics, and visual communication will be led synchronously online by the instructor. This will be complemented with weekly online studio sessions, discussions, screenings, and reviews. Students will be provided access to all course materials using Google Drive and other digital platforms. Access to Adobe Creative Cloud software will be provided by Wesleyan, but individual licensing is also encouraged. Course

assistants will offer peer mentoring and technical support in person through the DDS and online through Zoom.

ARST220 Ecological Design I: Being at Home in the World
Being at Home in the World is an introduction to the skills and thinking involved in the ecologically responsible creation of objects. This course is intended to provide a foundational understanding of the language of design, sources of materials, and energy systems. The studio encourages students to develop a rigorous, iterative working method to deeply analyze the nature of land and resources, explore options, and test ideas. This process of making is complemented and supported by an introduction to the history and theory of design, training with techniques and equipment, and active practice in keeping a sketchbook. Early exercises and projects in the course build familiarity and confidence with analytical drawing, making, and modeling techniques, which build toward the creation of a novel piece of design work presented at the final review.

Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ENVS232, IDEA120**
Prereq: **None**

ARST221 A Thousand Years of Iteration: Design for an Uncertain Future
The climate emergency is a product of design. Centuries worth of aesthetic and industrial innovation have created extractive infrastructure, efficient machines, and disposable products that make it increasingly easy to consume energy and resources on a global scale. As new conversations about just transitions, a circular economy, and a Green New Deal have begun to proliferate among designers, the discipline's troubled relationship to notions of "progress" remains largely unquestioned.

This reading- and research-intensive studio asks students to examine this history of technology and to critically evaluate shifting theoretical perspectives on nature and human development as they relate to design. Topics will include the lifespan of buildings and products, relationships with and obligations to materials and resources, and strategies for de-growth in indigenous and vernacular design precedents. These will be studied through assigned readings and in-class discussion, a series of design exercises, and the production of a final project from materials immediately at hand in Middletown.

ARST229 Community-Based Public Art: Mosaics on Main
In this course, students will have the opportunity to work directly with an ongoing major community art project in Middletown called "Mosaics on Main/ Tunnel Vision." The course will include an overview of this project as well as research into other public art installations. Technical skills introduced in the course will include mold making, mosaic tile setting, and design strategies for large scale works. There will be field trips to local public art installations as well as Middletown City Hall to meet with members of the Middletown Commission on the Arts. Students will learn about finding funding sources and will review existing grants and grant opportunities. This is a hands-on course that will involve working with members of the Middletown community.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST233 Studies in Computer-based Modelling and Digital Fabrication
This course operates at the intersection of design and production, introducing students to digital tools critical to contemporary architecture and design. Throughout the semester, students will develop a series of projects that fluidly transition between design, representation, and fabrication with an emphasis on understanding how conceptual design interfaces with material properties. The course will offer a platform for students to research, experiment, and, ultimately, leverage the potential of digital tools toward a wide array of fields and disciplines. Students will be expected to utilize the Digital Design Studio's resources, including 3D printers, laser cutter, and 4-Axis CNC mill, as well a selection of fabrication equipment housed in the school's metal and wood shops to represent, model, and realize a series of design projects.
Offering: **Host**

Identical With: **IDEA233**
Prereq: **None**

ARST234 Xerox Dreams
This course will explore the histories and methods of making zines, investigating the strategies of quantity and dispersion. Students will learn about the processes of making a democratic multiple through processes such as silkscreen and digital printing. To spark inspiration and develop artistic values, we will learn about contemporary and historical independent presses, artists, and communities who use zines as an essential mode of expression. We will examine the ways the form of the multiple has allowed artists and activists to share ideas with fewer overhead costs and without permission, bypassing institutional gatekeeping, surveillance, and censorship. Later in the semester, we will challenge our understanding of form, function, and artistic authorship by making wearables and working collaboratively.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST235 Architecture I
This course is a synthesis of fundamentals of design principles and introduction to design vocabulary, process methodologies, and craft. Emphasis is placed on developing students' ability to examine the relationship between production (the process of creating things) and expression (the conveying of ideas and meaning) involved in the making of architecture. The intent of the course is to develop students' awareness and understanding of the built environment as a result of the investigations, observations, and inquiries generated in the studio.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA234**
Prereq: **None**

ARST236 Fast & Furious
Fast and Furious is a class which explores the power of the multiple through the production of zines, posters, t-shirts, tote bags, pins and more. Beginning in the

1930s, the production of zines mainly in the sci-fi fan world became popular after the advent of the mimeograph--the first widely available duplicating machine. This way of making content was able to circumvent mainstream and institutional publishing models creating channels for more creatives to distribute their work. Today, there are even more technologies that can be used in the production of zeitgeist material. In this class, we will learn how to create with a Xerox machine, silkscreen, letterpress, polymer, and more. In each assignment we will contend with the power of quantity. What does it mean to make five of something? Ten? Fifty? One hundred? We will also experiment with format. How can a message be told through a wearable garment? How does the narrative change when it's a tote bag? And finally, we will explore the poetics of distribution. What are the artistic possibilities of a zine when it can be sent through the mail or left in a pile for the public?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA236**
Prereq: **None**

ARST237 Printmaking I
This course is an introduction to the practice and art of printmaking. Through technical instruction and personal exploration, students learn the rudiments of relief and intaglio printmaking media. Students learn to develop a print through a series of proofs with critical consideration as an important input in this progression from idea sketch to final edition.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST238 Print Culture 101
Print Culture 101 is an introductory course about the vast medium of printmaking: its techniques, its traditions, and its possibilities. Throughout the semester, students will learn how to use each area of the printshop, and the fundamentals of relief, recessed, planographic, stencil, and photographic processes of printmaking. Additionally, students will gain some elemental skills in working with paper, ink, and adhesives. These skills will also equip students with useful knowledge to experiment with unconventional materials.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST239 Painting I
This introductory-level course in painting (oils) emphasizes work from observation and stresses the fundamentals of formal structure: color, paint manipulation, composition, and scale towards artistic expression. Students will address conceptual problems that will allow them to begin developing an understanding of the power of visual images to convey ideas and expressions. The course will include lectures and individual and group critiques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST242 Typography
The fundamentals of fonts, letter forms, typographic design, elements of the book, and an introduction to contemporary graphic design are considered through a progression of theoretical exercises. Once working knowledge of the typeshop and InDesign (software for book design) is acquired, each student conceives, designs, and prints: first, a broadside, then a book. Use is made of the collection in the Davison Rare Book Room at Olin Library. While NOT a required sequence, this course is strongly recommended before taking ARST243.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST243 Introduction to Graphic Design
This course will open your mind to the world of graphic design, both past and present. You will learn how to analyze and critique design in addition to how to present your work and convey your ideas to others. You'll explore various tools available to a designer including hand skills and computer software. Computers will simply be a possible tool to help complete each project - this is not a software class.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA243**
Prereq: **None**

ARST245 Sculpture I
An introduction to seeing, thinking, and working in three dimensions, the class will examine three-dimensional space, form, materials, and the associations they elicit. Through the sculptural processes of casting, carving, and construction in a variety of media, students will develop and communicate a personal vision in response to class assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST246 Graphic Design: Website as Portfolio
Students will focus on the creation of an online portfolio of work as both an extension of their own practice and calling card for the world at large. Emphasis will be placed on the deployment of the site as a space for both interactive and graphic design and the development of writing about/documenting work and projects. Hard coding skills not necessary; focus will be on familiarization with user friendly sketching platforms, research organization systems, and out-of-the-box CMS for website development. Visiting artist talks will also be arranged.

Prereq: **None**

ARST251 Photography I
This is a comprehensive introductory course to the methods and aesthetics of film-based and digital photography. The topics of study will include evaluating negatives and darkroom prints, developing film, Lightroom and Photoshop software, inkjet printing, reading light, visualization, photographic design, and history of photography.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST252 Photography I
This class is only intended for first year students. This is an introductory course to the methods and aesthetics of film-based and digital photography. The class

is designed for students with no prior formal experience in photography, though it will still challenge those that are already versed in film and digital. The first few weeks of class will be devoted to comprehensive technical instruction including exposure, film processing, and darkroom enlargement. Subsequently, class time will be split between weekly critiques and lectures covering topics including visualization, reading and evaluating light, and photographic history. The shooting assignments are open ended and conceived to push each student to define their own visual interests as they continue to immerse themselves in the language of the medium. After fall break, we will switch to working digitally. Software instruction will include Lightroom and Photoshop, with significant time devoted to inkjet printing. The course will culminate in a final portfolio that will reflect the formal, technical, and conceptual experimentation that the students will engage in throughout the course.

***Please note that this is an intensive course with a significant work load. Students should expect to spend at least 15 hours outside of class on weekly shooting and production. Please feel free to reach out to the instructor at arudensky@wesleyan.edu if you have any questions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST253 Digital Photography I
This course is an extensive examination into the methods and aesthetics of digital photography. The topics of study will include DSLR camera operation, Adobe Photoshop, Adobe Bridge, and printing as well as, most importantly, a focus on photography as a fine art through both a historical and contemporary viewpoint.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST260 Introduction to Sumi-e Painting
We will learn basic technique and composition of traditional Japanese sumi-e painting. Sumi-e is a style of black-and-white calligraphic ink painting that originated in China and was introduced into Japan by Zen monks around 1333. We will concentrate on the four basic compositions of sumi-e: bamboo, chrysanthemum, orchid, and plum blossom. We will also study the works of the more famous schools, such as Kano. Students will create a portfolio of class exercises and their own creative pieces.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CEAS460**
Prereq: **None**

ARST261 Alternative Printmaking: Beginning Japanese Woodblock Technique
Students are taught traditional Japanese techniques for conceptualizing a design in terms of woodcut, carving the blocks, and printing them, first in trial proofs and editions. After understanding how both of these methods were originally used and then seeing how contemporary artists have adapted them to their own purposes, both for themselves and in collaboration with printers, students will use them to fulfill their own artistic vision. Considerable use is made of the Davison Art Center collection of traditional and contemporary Japanese prints as well as many European and American woodcuts.

Identical With: **CEAS461**
Prereq: **ARST131**

ARST265 Action: Art, Politics, Counterpublics
In this interdisciplinary studio course, we explore action as a category of art practice. What does it mean to take action, either individually or collectively? What does it mean to refuse to take action? Through a series of projects, assignments, and discussions, we work through various possibilities, drawing on methods from public interventions, performance, institutional critique, social practice, experimental film, and work by non-art practitioners. The course is organized around the production of student projects and research, culminating in a self-directed capstone work. In the initial stages, students will be asked to work through three distinct modalities (performance, site-specific intervention, and collaborative practice) while developing their ideas. Time will be devoted to discussion of historic and contemporary examples, including European avant-gardes (Dada, Productivism), feminist film and performance, Happenings, Indigenous performance art, and work connected to political organizing, such as the Black Panther Party, United Farm Workers, Young Lords, ACT-UP, Art Workers' Coalition, and EZLN, among others. Students will be exposed to a variety of techniques and will gain access a range of facilities, including the woodshop, digital technologies through the Digital Design Studio, etc. Depending on Covid restrictions, trips to contemporary exhibitions will provide a theoretical framework. Work in this class can be created individually or collaboratively. Depending on interest, we may also organize an end-of-semester exhibit.

Gen Ed Area: **HA-ART**
Identical With: **CSPL275**
Prereq: **None**

ARST270 Fundamentals of Design I
In this introductory product design course, students will experience basic design processes such as problem identification and possible resolutions; the use of design development and communication skills via design observation and research; iterative process and prototyping; and representation and presentation in two and three-dimensional forms. Students will explore how design can play a role in our community and how it can impact our society. Students will work both individually and collaboratively in a studio environment. Field trips to New York City fabricators, galleries, and workshops may be expected as part of this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA160**
Prereq: **None**

ARST271 Designing With Living Systems: Soft + Hairy
In this part seminar, part studio course, students will go on field trips and read extensively to develop an understanding of mycelium and how it is explored in design. We will explore temporality in design with particular focus on how biodegradable materials such as mycelium can form our experience of an object. We will study how mycelium can be utilized as a living material to form a built ecology. In particular, we will study how to design for impermanence -- sometimes using waste materials -- and develop an understanding for material recovery. Students will work both individually and collaboratively in a studio environment. Field trips to New York City museums, fabricators, and galleries, as well as around CT may be expected as part of this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **IDEA271, ENVS271**
Prereq: **ARST131 OR IDEA110 OR IDEA180**

ARST286 Introduction to Time-Based Media
This introductory course offers a comprehensive exploration of time-based media in the expanded field, providing a foundational skillset for students interested in fine arts and media practices, yet open to all majors eager to develop their creative and critical voice. A core focus of the course is the act of making, which will be coupled with an investigation into how video can transform our relationship with ourselves, others, and the material world. Through screenings of historical and contemporary video art, we'll investigate theoretical frameworks, asking critical questions such as: What sorts of videos do we consider "art," and how might we use video as a tool for empathy, accountability, and aesthetic inquiry?

Students will build essential practical skills through regular technical exercises and hands-on projects, including camera operation, sound recording and design, lighting techniques, and video and sound editing, utilizing industry-standard software and various capture devices. Each assignment will be contextualized through group discussions and readings, investigating established video art traditions as well as the medium's role in vernacular applications like live-streaming, and social media. By the end of the course, students will gain both technical facility and a sharp critical eye for time-based art and culture.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **DDC286, IDEA286**
Prereq: **None**

ARST287 Video Basics
This introductory course is for students of all majors eager to think critically and creatively about their relationship to video. How many videos do you have on your phone? How does the intimate, often humorous content we create relate to public space and artistic expression? Together, we'll explore the rich tradition of video art, which began in the mid-20th century when new technology was suddenly placed in the hands of everyday people. Artists quickly adopted, subverted, and transformed this specialized equipment beyond its initial commercial intent. Through hands-on projects, you'll learn to use affordable, widely available tools like CapCut and DaVinci Resolve to move beyond commercial aesthetics and create personal works of art. You will also be introduced to the specialized video equipment available on campus, focusing on the fundamental principles that can be applied to any camera you pick up. No prior experience is required: just a willingness to challenge and experiment with the videos you create every day.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **IDEA287, DDC208, IDEA287**
Prereq: **None**

ARST308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **MUSC308, THEA308**
Prereq: **None**

ARST320 Ecological Design II: Worn Out/Broken In
This course will function as a design studio that examines the afterlife of material production. While designers have traditionally focused their attention on the creation, distribution, and consumption of new products, this course asks students to carefully consider everything that follows those acts. By scrutinizing the use, care, maintenance, repair, and eventual demise of designed objects, students come to understand the intended and unintended consequences of making. Rigorous observation and research lead to the creation of analytic drawings and models for presentation at project reviews.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA320, ENVS321**
Prereq: **ARST270 OR ARST235 OR ARST220**

ARST321 Wood: Building with the Forest
This studio introduces students to full-scale design and construction through the production of a single, collaborative project over the course of the semester. Working from land-based research and precedent analysis, students develop a detailed design for a structure on a specific site in Middletown, then build it together in the field. Materials will be sourced from the northern hardwood forest and the design crafted to suit its ecosystem.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **ENVS324, IDEA321**
Prereq: **ARST270 OR ARST235 OR ARST220**

ARST323 Topics in Studio Art: Information
Artists in all media have historically responded to common, formal, and ideological motivations. These motivations encompass the very fabric of a liberal arts education. This course is intended to develop such a conversation among the various studio art disciplines as the foundation for making art. The course centers on a topic determined by the instructor. The class will function as a study group (of painters, sculptors, photographers, drawers, printmakers, architects and so on) that tackles the topic through the act of art-making. The topic will be introduced through readings and visual precedents, and through discussion we will determine means to respond as artists, each student in his or her own medium. These individual responses will then be analyzed in group critiques.

Later in the semester, students will expand their investigations to include studio disciplines other than their own.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**

ARST332 Drawing II
This class builds upon the course content covered in Drawing I (ARST131). As we continue to draw from observation, topics will include an in-depth exploration of the human figure, various approaches to pictorial space, and an introduction to color. This course also introduces a concept-based approach to drawing that explores narrative and content. Brainstorming exercises and ideation techniques widen the scope a of "what is a drawing," and we will experiment with various methodologies in pursuit of developing personal style and studio practice. Drawing II serves as an essential bridge between introductory-level courses and the individualized pursuit of the ARST senior thesis.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST336 Architecture II
This course is a second-level architecture studio whose focus will be a single, intensive research and design project. As the semester progresses, additional design, representation, and production tools will be introduced and used for developing work for the project, from graphics software to the laser cutter. Additional information about the architecture studio at Wesleyan and its past projects may be found at: http://www.facebook.com/wesnorthstudio
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-ART**
Identical With: **IDEA336**
Prereq: **ARST235**

ARST337 Codex Unbound
Codex Unbound is a course that investigates the art of the book. It asks: What is a book? And what are the expansive possibilities of this form? Students will explore these large questions through the process of making books in a variety of binding and printing techniques that range in cultural and historical origin. In learning such techniques, students will also be tasked with intervening with forms and creating their own innovations, which can incorporate their own intellectual interests.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST338 Printmaking II
This upper-level printmaking course focuses on the application of various printmaking methods in response to conceptual prompts. There will be instructional units on lithography, the Vandercook letterpress, and digital technologies. In addition to learning these new techniques, students are expected to build on previous printmaking experience to hone their skills and sharpen their creative vision. Routine print assignments and a final substantial project will task students with the development and presentation of professional, finished work.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST237 OR ARST261 OR ARST361**

ARST339 Surface Tension
Bumpy, smooth, fuzzy, and sharp. These are all surfaces we are familiar with through our experience of the world. In art, the surface of an object, whether it is a sculpture or painting or anything else, is a port of entry into the experience, subject, and appreciation of the work. Tension in visual art can be thought of as the push and pull form has to provoke and/or engage the viewer. These points of strain could appear at the intersection of opposing marks, contrasting color, disharmonious imagery and much, much more. "Surface tension" refers to qualities in visual art related to the superficial veneer of an art object which can support the expression of content more deeply. In printmaking, surface tension can be literally created or optically suggested through a variety of techniques. In this class, we will learn advanced methodologies in intaglio, lithography, relief, letterpress, digital printing and more. Each assignment will task students to combine these mediums in surprising ways that encourage contrast, opposition, and traction. We will explore the possibilities of mixing water and oil based printing techniques, utilize digital medium in tandem with analog processes, apply dry and wet techniques together, and learn to gild metals on a variety of substrates. This class is open to any advanced student of art who wants to experiment with their practice in the arena of printmaking.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST261 OR ARST337 OR ARST238 OR ARST361**

ARST340 Painting II
In this class, students will develop an artistic vision and studio practice while exploring open-ended prompts and engaging in conversations that unpack approaches and methods toward achieving artistic goals. Each individual will work uniquely in both approach and technique in order to become fluent and make conceptual and aesthetic choices that will best convey their singular creative concerns. All prompts and concerns addressed in this course allow for any formal, conceptual, or stylistic method of expression to solve them. The knowledge and skills gained in ARST239 will serve as the foundation for a deeper inquiry into how formal decisions about process inevitably impact expression and the reading of artworks. While analyzing differing approaches to solving the same problem, students will discover how their own practice can transform their relationship with others and the world. Lectures and discussions will provide information and feedback on historical and contemporary issues, project proposals, goals for the work with respect to identifying an ideal audience, and the development of an artist's vision and statement.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **(ARST131 AND ARST239)**

ARST341 Developing a Studio Practice Based in Painting
This course is intended for students with a solid foundation in painting or a related media concentration. In this class, students will develop an artistic vision and studio practice while exploring open-ended prompts and engaging in conversations that unpack approaches and methods toward achieving artistic goals. Each individual will work uniquely in both concept and technique in order to become more fluent in their media and make conceptual and aesthetic choices that best convey their singular creative concerns. The knowledge and skills gained in ARST239 and/or other studio art courses will serve as the foundation for a deeper inquiry into how formal decisions about process inevitably impact expression and the reading of artworks. While analyzing differing approaches to solving the same prompts, students will discover how

their own practice can transform their relationship with others and the world. Lectures and discussions will provide information and feedback on historical and contemporary issues, project proposals, goals for the work with respect to identifying an ideal audience, and the development of an artist's vision and statement. Prerequisite: You must have taken any second level Art Studio course in any concentration or Painting 1.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST345 FAN FICTIONS: Alternative Universes, Gender Swaps, Ship-ping
In the vernacular, a "fan fiction" is a type of writing that reimagines a piece of popular media such as a book, TV show, or movie. This happens without consent and is used to explore alternative narratives or taboos.

Artists such as Kara Walker have reimagined the Antebellum south as an erotic horror, Mike Kelly created installations based on the cities of Krypton from the comic book Superman.

In our class we will utilize printmaking methodologies to explore strategies of fan fiction, by creating artworks that reconfigure both historical and fictional canons that have historically been entrenched in ideas of authenticity and devotional labor. Students will create etchings, silk screens, and zines.

Students should have print media experience though the class is not strictly restricted to printmaking.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST346 Sculpture II
This is an intermediate-level course. Projects focus on the associative nature of three-dimensional form--how issues intrinsic to sculpture reflect concerns extrinsic to the art form. The class will emphasize the development of personal expressions of students' visions in response to class assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST245 OR [ARST235 or IDEA234]**

ARST349 Junior Studio
Junior Studio is an interdisciplinary, studio-based course designed for advanced Art Studio majors that centers on the idea of "Call and Response." Our work doesn't happen in isolation but through exchange. This course positions artmaking as conversation -- between artists, across disciplines, and through time. The class will be structured in repeating two-week segments. The first segment will focus on a "call": an in-depth engagement with a specific artist's practice, or a close analysis of a particular work or body of work (including, but not limited to, art, music, and film). Together we'll unpack each practice or work conceptually, contextually, and materially and identify the ideas central to our understanding of it as a class. This work will take place through reading, in-class discussion, student-led presentation, and class visitors. The second segment focuses on "response": students will develop their own work in whatever medium they choose as replies, riffs, or counterpoints to the "call" -- testing how response becomes creation and exploring how their artistic instincts shape their output. Student work will be shared and discussed in a group critique format that encourages both critical feedback and supportive dialogue. The goal of Junior Studio is not to produce technicians of any single medium, but to help students develop a deeper connection to their own creative processes. The course emphasizes ideas: how we arrive at them, how they take form, and how they communicate meaning. Ultimately, students will build intimacy with their artistic instincts, expand their understanding of interdisciplinary practice, and situate their work within the cultural and artistic contexts that inform and inspire them.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST350 Senior Seminar
This is an interdisciplinary critique-based course designed for advanced Art Studio majors. Our primary aim is to provide a structure for the development of each student's thesis work, research, and thinking as it evolves over the course of the semester. Through extensive in-class discussions and reviews, we devote a substantial portion of time to the presentation and discussion of student work. We devote time to the discussion of installation strategies, readings in contemporary criticism, visiting artist lectures and presentations, and, if possible, visits to contemporary exhibitions in the area. The course is also an interdisciplinary workshop, an opportunity to share your work with your fellow students, and to participate in a structured response to one another's work across different types of media. Participation in the class will include leading discussions of readings, attending visiting department lectures, sharing work in class, and responding to/giving feedback to classmates' work. The course is designed as a complement to the Art Studio Senior Thesis process and is an elective for Art Studio majors. This class will break for lunch from 12:30-1:15 p.m.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ARST352 Photography II
This is an intensive course intended for students with a solid foundation in photography. Students can choose to work in either film-based or digital media while developing their own unique voice. Topics will include medium-format film cameras, fiber paper, virtual drum scanning, large-format digital printing, and editing and sequencing images. The second part of the course will be devoted to developing a body of work that will result in a photo book project. Lectures and class discussions will provide a historical context, while presentations by visiting artists will introduce students to contemporary work in the medium. Emphasis will be placed on the weekly discussion of students' work.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST353 Photography III - Documentary Practices
This is an intensive course that will provide students with a historical, theoretical, and ethical overview associated with documentary photographic practice. It is intended for advanced students that have taken Photography I (ARST 251) or Photography II (ARST 352). Assignments, readings, and discussions will be geared toward the development of a cohesive body of work with focus on research and development of a concept, editing and sequencing of photographs, and fine

printing. This course will serve as preparation for thesis work undertaken during the senior year and is recommended for prospective or current majors.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST251 OR ARST352**

ARST355 Concepts in Contemporary Art
In this interdisciplinary seminar and studio course, we explore key concepts in contemporary discourse across a range of forms, genres, and disciplines. How do works of art respond to and reframe central debates in the wider culture? In what ways do the theory and practice of art supplement or contradict each other? How does research function within the context of art historical study and contemporary artistic practice?

To contend with these questions, students develop a series of projects over the course of the term in response to specific conceptual prompts. These investigations may take the form of studio-based work or written scholarship depending on student interest and will culminate either in a final research paper (for those registering for Art History credit) or a final project in any medium (for those registering for Art Studio credit). Along the way, we study artworks, literary texts, works of social theory, art historical scholarship, films, popular culture, and other objects to ground our research. Parallel activities may include conversations with artists and art historians, methodological workshops, site-visits, trips to museums, and archival research.

Since the course's aim is to cultivate unexpected collaborations, cross-disciplinary encounters, and new ways of conjugating the history, theory, and practice of art, the final portion of the semester will focus on the organization of a collective exhibition, event series, symposium, publication, or other expanded curatorial endeavor. The course meets Fridays 12:30 pm-5:30 pm, with a break during that interval. Class time may on occasion include individual meetings and independent work.
Offering: **Host**

ARST358 Video Installation
We live in a world where screens are often taken for granted. How has the omnipresence of video transformed visual perception? This course will focus on video installation and the ways video can shift our relationship to objects, space, and each other. Students will experiment with lighting and environment building, paying particular attention to how surfaces are transformed by the lens. We will explore projection mapping, live-streaming, installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly exercises and regular group critiques, we will begin to unpack how the videos we make contact with daily shift our relationship with both our own bodies and the material world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST361 Monotype Printmaking
The monotype print is a free form of printmaking more akin to painting or drawing than to traditional printmaking. It is also a process in which the artist encounters fewer technical difficulties than in other traditional printmaking methods. Students in this course will create images using various mediums and methods. We are going to use different material like wood, plexiglass, paper, and textiles. Also, we may use laser cutting or digital printing, to combine with drawing or painting.

The goal of this course is not perfection of technique, but rather students experimenting with material and technique, to produce their own visual images.
Offering: **Host**

ARST362 Sumi-e Painting II
Sumi-e Painting II is an advanced class for which Introduction to Sumi-e Painting (ARST 260) is a prerequisite. In this course, foundation techniques will be expanded upon. We will re-examine traditional techniques and composition, and there will be exploration of new contemporary techniques. There will also be experimentation with tools beyond the brush. This course will introduce a concept based approach to narrative and content. Students will be encouraged to develop a personal style and method.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CEAS362**
Prereq: **ARST260**

ARST370 Regenerative Design II
This course builds on the exploration and knowledge learned in Product Design I to discover opportunities for systems thinking in design. Students will study challenges and opportunities related to aging, education, food, and mobility to investigate potential opportunities through the lens of regenerative design. The course will support students in developing digital modeling skills as well as rapid prototyping and fabrication techniques. Students will work both individually and collaboratively in a studio environment. Field trips to New York City design ateliers, fabricators, and workshops may be expected as part of this course.

Prereq: **ARST270 OR ARST235 OR ARST220**

ARST380 Interdisciplinary Studio: Politics of Land and Place
Notions of "place" are particularly fraught in North America, where legacies of development and dispossession have etched enduring power relationships onto the land. Contemporary spatial experience is marked by what Mindy Fullilove has called root shock: the reverberating effects of losing one's place and the collective struggle to reclaim it. In this interdisciplinary studio course, we develop artistic responses to the ways in which power shapes the natural and built environment. We look at a range of sites--the home, the city, the border, the wilderness, the commons--as spaces of memory and belonging, sociality and resistance. We explore the ways in which people have engaged

with place through a range of forms, including roadside monuments, site-specific sculptures, landscape films, community-based performances, situationist dérives, plein air painting, collective rituals, and political protests. Over the course of the term, students will identify a site in the Lower Connecticut River Valley and develop their own aesthetic language in response to it. These works may take the shape of installations, performances, digital media, or texts, and will draw on our discussions of land art, institutional critique, social practice, and experimental film. While the course is geared primarily toward the development of student projects, our work will be informed by a series of site visits, readings, screenings, and discussions of contemporary land struggles, anticolonial movements, and feminist and indigenous geographies.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST381 Intermediate Public Practice
What are the possibilities and challenges of making work in the public domain? This intermediate studio course provides students with the framework, conceptual language, and technical means to develop ambitious projects in public space. Over the course of the semester, students will be introduced to a range of working methods, including new genre public art, research-based practices, site-specific projects, and collaborative practices. While the course focuses on contemporary issues and debates, it situates these topics within a set of broader global and historical traditions. Through group discussions, critiques, site visits, and presentations, the course will assist students in developing a series of works that build towards a self-directed final project. We look thematically at a range of sites as spaces of memory and belonging, sociality and resistance. We explore the manifold ways in which people have engaged with place through a range of forms, including roadside monuments, site-specific sculptures, landscape films, community-based performances, architectural interventions, collective rituals, and political protests. Attention will be placed on sites around Middletown in order to situate our research and practice. These may include Harbor Park, Middlesex Historical Society, Beman Triangle, Connecticut Valley Hospital, Colt Armory, Portland Brownstone Quarries, among others. Support will be provided to students along the way in negotiating relationships with local institutions and stakeholders. Supplementary readings will introduce students to questions related to spatial theory and practice, agonism and democracy, monuments and counter-monuments. Successful completion of the course will prepare students for advanced work in the public domain. Course is open to all students. Preference given to students who have taken ARST131 and ARST235 or ARST238 or ARST239 or ARST245 or ARST 251 or ARST286 or other course in a related discipline.

Identical With: **CSPL381**
Prereq: **None**

ARST382 Intermediate New Genres
In this interdisciplinary studio course, we make work that traverses traditional disciplinary boundaries in order to develop a methodology that prioritizes questions of context, material, and theme. Building on the history of experimental and avant-garde practices of the 20th and 21st centuries, work in this course may take the form of installations, performances, videos, texts, participatory and collaborative projects, site- and context-specific works, and other as-yet undefined forms.

Our work will not be defined by adherence to any specific discipline or genre. In this way, the course serves as a springboard for each student to develop a relationship to contemporary interdisciplinary practice as well as an opportunity to explore, collectively and individually, pivotal theoretical frameworks that have shaped the field. Successful completion of the course will provide students with a solid foundation for experimentation in the expanded field of contemporary artistic practice.

Prerequisite: Students must have successfully completed an Introductory- or Intermediate-level Studio Arts course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST384 Special Topic: Between Forms: Intermedia Arts Workshop
This advanced project-based workshop is for poets and artists interested in interdisciplinary practices crossing over between poetry, visual art, and performance. It is taught in conversation with the Fall 2021 exhibition, The Language in Common, in Zilkha Gallery including the work of Cecilia Vicuña, Tanya Lukin Linklater, Julien Creuzet, Jasper Marsalis, and Alice Notley.

Facilitated by Professors Benjamin Chaffee and Danielle Vogel, with modules taught by visiting artists from across the arts, this workshop is designed for students interested in working outside of--or between--their primary mediums. Professors will guide students as they choose "companion mediums" to work in for the semester while employing interdisciplinary approaches to writing and art-making in order to discover their own unique and hybrid forms.

We will divide our time between intensive laboratory-like spaces for composing work, conversations with visiting artists, student presentations and workshops, and studying the works of artists working between forms, all in an attempt to root ourselves more dynamically in our individual practices. The course will culminate in a reflective essay or artist statement, as well as an exhibit of poems, objects, installations, and performances created during our time together.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL384**
Prereq: **None**

ARST385 Introduction to Social Practice
This studio seminar will serve as an introduction to contemporary issues in socially engaged art practice, with the goal to familiarize students with the history, theory, and practice of socially and politically engaged art. This course is intended for students with significant prior experience in studio art or related coursework in other disciplines. Interviews for the course will be held during the first class meeting.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**

Prereq: **ARST131 OR ARST190 OR ARST237 OR ARST239 OR ARST242 OR ARST243 OR ARST245 OR ARST253 OR ARST260 OR ARST261 OR ARST285 OR ARST352 OR ARST353 OR ARST361**

ARST386 Intermediate Time-Based Media
In this interdisciplinary studio course, we make work that traverses traditional disciplinary boundaries in order to develop a methodology that prioritizes questions of context, material, and theme. Building on the history of experimental and avant-garde practices of the 20th and 21st centuries, work in this course may take the form of installations, performances, videos, texts, participatory and collaborative projects, site- and context-specific works, and other as-yet undefined forms. Our work will not be defined by adherence to any specific discipline or genre. In this way, the course serves as a springboard for each student to develop a relationship to contemporary interdisciplinary practice as well as an opportunity to explore, collectively and individually, pivotal theoretical frameworks that have shaped the field. Successful completion of the course will provide students with a solid foundation for experimentation in the expanded field of contemporary artistic practice. Prerequisite: Students must have successfully completed an Introductory or Intermediate level Studio Arts course.

Gen Ed Area: **HA-ART**
Prereq: **None**

ARST387 Virtual Production: The Music Video
This intensive studio course will explore the breadth and depth of the music video genre. Students will learn advanced post-production, motion capture, and video recording techniques. Class sessions will include technical demonstrations, group discussions, and conversations with practitioners in the field. Readings and screenings will examine the relationship between music videos, technology, contemporary art, and popular culture. Students will learn how to use the 3D motion capture studio and record live musical performances. Software will include Adobe AfterEffects, Blender, and DaVinci Resolve. Through weekly exercises and a final independent project, students will learn to work collaboratively and develop a distinct creative voice. The course will culminate with a final music video project, to be screened at the end of the semester. Previous experience in Adobe Premiere Pro software is required. Preference will be given to students who have successfully completed ARST 286, ARST 386, DDC 108, or DDC 448. All students must be concurrently enrolled in the virtual production lab which meets Fridays 1:20 p.m. - 3:20 p.m. in DDC.

ARST430 Architecture Senior Thesis Studio
This course fulfills the fall semester requirement of the Senior Thesis Project in Studio Art for Architecture majors. Structured as a Studio, the goal of this course is to develop a collaborative intellectual environment (studio culture) for senior majors to work through the theoretical, methodological, and practical concerns connected with their individual thesis projects under the guidance of an Art Studio faculty advisor. Topics to be examined will be based on students' research and studio practice, and participants are expected to engage critically, yet generously, with the projects of their peers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST465 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

ARST466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

ARST467 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**

ARST468 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.

Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ARST484 Data, Art, and Visual Communication
This course looks at the ways the digital arts--broadly defined--can be used to explore the intersections of research, data, design, and art. Following a creative software "bootcamp," students will execute projects intended to help them generate, manipulate, and remix data for the purposes of visual communication and art. Students will use Adobe Creative Suite and Processing, an open source programming language, and integrated development environment (IDE) built for electronic arts, new media, and visual design. In addition to working in the studio, seminars, readings, and student presentations will explore the role of data visualization, "big data," and the web in culture and society today. No prior software knowledge or coding skills are required. Students working in STEM, humanities, and social sciences are encouraged to enroll.
Offering: **Host**

ASTRONOMY

The Wesleyan Astronomy Department provides outstanding opportunities for undergraduates who wish to major in this fascinating subject, either in preparation for graduate school or as an end in itself. Our unique program blends coursework with research opportunity and provides students access to professional-quality telescopes, instrumentation, and computers. A principal strength is our active research faculty who will work one-on-one with undergraduates employing state-of-the-art instrumentation and computers to investigate areas of current astronomical interest.

Our students go on to graduate programs, including the best in the country, or to a variety of rewarding careers in and out of science. Many of our students are co-authors on research papers based on work performed during their undergraduate careers. In addition, we offer a comprehensive range of coursework that will prepare students for a variety of directions in life, including graduate study.

ASTR102F Planets Near and Far: The Diversity of Worlds in the Solar System and Beyond (FYS)
For the past 4,000 years, ancient and modern astronomers have tracked the motion of the solar system planets across the sky. Thanks to some very recent discoveries and technological innovations, we now know of thousands of additional planets orbiting other stars. With the cumulative knowledge of millennia of solar system research and recent extrasolar breakthroughs, what planetary science questions can we now answer? How do planets form and evolve? Does the solar system look like a typical planetary system? How many planets are similar to Earth and can any support life? Students in this course will explore these questions and more while developing skills vital to scientific inquiry, writing, and communication.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ASTR103 The Planets
More than 100 planets are now known in the universe, eight of which circle the sun. NASA missions and improved telescopes and techniques have greatly increased our knowledge of them and our understanding of their structure and evolution. In this course, we study those eight planets, beginning with the pivotal role that they played in the Copernican revolution, during which the true nature of the Earth as a planet was first recognized. We will study the geology of the Earth in some detail and apply this knowledge to our closest planetary neighbors--the moon, Venus, and Mars. This is followed by a discussion of the giant planets and their moons and rings. We will finish the discussion of the solar system with an examination of planetary building blocks--the meteorites, comets, and asteroids. Additional topics covered in the course include spacecraft exploration, extrasolar planetary systems, the formation of planets, life in the universe, and the search for extraterrestrial intelligence.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES151**
Prereq: **None**

ASTR105 Exploring the Cosmos
This introductory course for non-science majors unveils the universe and how we have come to understand our place in it. We will touch on a full range of astronomical topics, including the mechanics of our solar system, the discovery of planets around other stars, the stellar life cycle, the formation and evolution of galaxies, the big bang, and the ultimate fate of the universe. Occasional evening sessions will provide the opportunity to observe celestial objects through Wesleyan's telescopes.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR106 History of Astronomy from Copernicus to the Modern Age
Since the dawn of human consciousness, we have gazed at the sky with wonder and pondered our place amongst the heavens. In this class, we will discuss the key discoveries of astronomy and the people who made them, placing these discoveries in historical context: what was the world like when humans first discovered the size of the Earth or determined the distances to the stars? How did society influence discovery, and how did achievements in astronomy impact society?

Through discussion, telescopic observation, and demonstration of techniques, we will examine the major astronomical achievements from antiquity to the present day, with an emphasis on the past 500 years. We will discuss astronomy's changing role over time, from mystical (astrology and mythology), to practical (time keeping and navigation), to physical (the nature of stars and planets). Finally, we will gaze to the future and discuss the biggest unsolved mysteries in astronomy, and what we will need to achieve to solve them.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR107 The Universe
This course focuses on the modern scientific conception of the universe, including its composition, size, age, and evolution. We begin with the history of astronomy, tracing the development of thought that led ultimately to the big

bang theory. This is followed by a closer look at the primary constituent of the universe--galaxies. We end with consideration of the origin and ultimate fate of the universe.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR108 Conceptual Astronomy: Science Fact vs. Science Fiction
Our conceptual understanding of the world around us is shaped by our experiences, often in subtle ways. In this media-dominated world, the public's predominant exposure to science comes from science fiction in popular culture, especially TV and movies. In this course, we will examine the ways in which popular culture has influenced our collective knowledge about astronomy: the good, the bad, and the really bad. Wide-ranging topics will include asteroids and comets threatening the earth, travel through space and time, and life in the universe. Through lecture, discussion, and laboratory exercises, we will examine these topics through the lens of science to expose the reality of the universe that is our home.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR109 Worlds Beyond: The Search for Life in the Universe
We are living through a unique time with the recent discovery of other worlds, planets orbiting nearby stars, and the capability to obtain detailed observations of those planets in the coming decades. This makes tangible the age-old question of whether we are alone in the universe, as the only known life-bearing planet. This introductory course for non-science majors will explore the fundamental concepts that are needed to place life into a cosmic context. We will discuss planetary systems near and far, stars as the integral hosts of planets, and prospects for finding and identifying life elsewhere in the universe. Occasional evening sessions will provide the opportunity to observe celestial objects through Wesleyan's telescopes.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR111 The Dark Side of the Universe
The physical world we experience is one of normal matter, energy, and--if one looks up at night--stars. But on larger scales, the universe has an exotic and much-less-well-understood side dominated by things we call dark matter, dark energy, and black holes. What are these mysterious components, and what is the relationship between them and the world that is familiar to us? The answers lie at the frontier of modern astrophysics. In this course, we explore the evidence for the existence of these dark components and the current debates regarding their nature and origin. In different ways, each of them has a vital role in the evolution of the universe and its ultimate fate.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR111Z The Dark Side of the Universe
The physical world we experience is one of normal matter, energy, and -- if one looks up at night -- stars. But on larger scales, the universe has an exotic and much-less-well-understood side dominated by things we call dark matter, dark energy, and black holes. What are these mysterious components, and what is the relationship between them and the world that is familiar to us? The answers lie at the frontier of modern astrophysics. In this course, we explore the evidence for the existence of these dark components and the current debates regarding their nature and origin. In different ways, each of them has a vital role in the evolution of the universe and its ultimate fate.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR155 Introduction to Astrophysics
The fundamentals of astronomy will be covered. This course serves as an introduction to the subject for potential majors and as a survey for non-majors who have a good high school preparation in math and science. We will cover selected topics within the solar system, galaxy, local universe, and cosmology, including the Big Bang Theory of the origin of the universe and the discovery of planets around other stars.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR210 Fundamentals of Scientific Computing in Astronomy
Computing is essential to the practice of modern astrophysics, from the visualization and analysis of large observational datasets to the numerical simulation of complex physical processes. This course develops the computational skills necessary for astronomical research and prepares students for advanced coursework. Through hands-on tutorials and exercises, students will learn to read, manipulate, and visualize astronomical datasets using basic UNIX and Python programming. The course will also include an introduction to data analysis using statistical techniques.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR211 Observational Astronomy
This course introduces the techniques of observational astronomy. Students will acquire a basic knowledge of the sky and become familiar with the use of Van Vleck Observatory's telescopes and instruments. Acquisition and analysis of astronomical data via modern techniques are stressed. Topics include celestial coordinates, time, telescopes and optics, astronomical imaging, and photometry. Some basic computer and statistical analysis skills are developed as well. The concepts discussed in lecture are illustrated through observing projects and computer exercises.
Offering: **Host**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-ASTR**
Prereq: **ASTR108 OR ASTR111 OR ASTR105 OR ASTR107 OR E&ES151 OR ASTR155 OR ASTR210**

ASTR221 Galactic Structure and Formation
The fundamentals of astrophysics are applied to galaxies and the objects contained therein. Topics include galaxy formation and evolution, the Milky Way, galaxy scaling relations, stellar populations, morphology and kinematics, clusters and dark matter halos, and the interstellar and circumgalactic media. In addition, we cover some of the basic numerical methods commonly used in astronomy, such as interpolation, numerical integration, and curve-fitting, and apply them to observational and theoretical problems.
Offering: **Host**

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR521**
Prereq: **(ASTR155 AND ASTR211)**

ASTR222 Modern Observational Techniques
This course reviews the practices of modern observational astronomy, focusing primarily on techniques employed in the optical and x-ray bands. Topics will include a description of the use of digital detectors for imaging, photometry, and spectroscopy in a wide variety of applications. Data acquisition, image processing, and data analysis methods will be discussed. In particular, students will gain hands-on experience with the analysis of data obtained from both ground- and satellite-based observatories. An introduction to relevant error analysis methods is included. Students will also become familiar with the fundamental techniques that will be necessary when "big data" projects like LSST come online in the near future: database querying, metadata handling, and modern programming techniques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR522**
Prereq: **ASTR211**

ASTR224 Exoplanets: Formation, Detection, and Characterization
Our ability to place the earth into a cosmic context has dramatically improved in recent decades with the discovery of planets around other stars (exoplanets). The study of exoplanets has quickly become a dominant field in astronomy. This course will focus on the fundamentals of exoplanet formation, detection, and characterization (interiors and atmospheres) based on astronomical observables. We will also discuss the assessment of habitability for Earth-like exoplanets and the prospects for the detection of biosignatures.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR524**
Prereq: **(ASTR155 AND ASTR211)**

ASTR231 Stellar Structure and Evolution
As the principal source of light in galaxies today and as drivers of chemical evolution, stars play a critical role in the universe. It is important to understand their structure and evolution. Fortunately, we have a fairly well-developed and tested theory of stellar structure covering both their interiors and atmospheres. In this course, we will provide an introduction to that theory and examine its key results, including a basic description of how stars evolve.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR531**
Prereq: **(PHYS213 AND PHYS214 AND ASTR155 AND ASTR211)**

ASTR232 Galaxies, Quasars, and Cosmology
This course introduces modern extragalactic astronomy, blending established practices in the field and important recent discoveries. Three major themes will be developed. First, the basics of Newtonian and relativistic cosmologies will be discussed, including modern determinations of the Hubble Law and the observations that have led to the currently favored cosmological model. Next, the universe of galaxies will be investigated: their constituents, structure and kinematics, and multiwavelength properties. Finally, the nature of galactic nuclei will be explored, including the observational consequences of black-hole accretion and the coordinated growth of galaxies and their central black holes. Outstanding research questions related to the topics covered will be highlighted throughout the course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR532**
Prereq: **(ASTR155 AND ASTR211)**

ASTR240 Radio Astronomy
This course will introduce students to the origins, theory, and practice of radio astronomy. It will cover theory of antennas and interferometers, as well as signal detection and measurement techniques. Particular emphasis will be placed on the theory and applications of Fourier transforms. A practical laboratory component will provide experience working with single-dish and interferometric data.
Offering: **Host**

Gen Ed Area: **NSM-ASTR**
Prereq: **ASTR155 OR ASTR211**

ASTR491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

ASTR492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

ASTR500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.
Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **CHEM500, BIOL500, E&ES500, MB&B500, MUSC500, PHYS500, PSYC500, MATH500**
Prereq: **None**

ASTR501 Individual Tutorial for Graduates
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

ASTR502 Individual Tutorial for Graduates
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

ASTR503 Selected Topics, Graduate Sciences
Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.
Offering: **Host**
Grading: **OPT**

ASTR504 Selected Topics, Graduate Sciences
Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.
Offering: **Host**
Grading: **OPT**

ASTR512 Group Tutorial, Graduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

ASTR521 Galactic Structure and Formation
The fundamentals of astrophysics are applied to galaxies and the objects contained therein. Topics include galaxy formation and evolution, the Milky Way, galaxy scaling relations, stellar populations, morphology and kinematics, clusters and dark matter halos, and the interstellar and circumgalactic media. In addition, we cover some of the basic numerical methods commonly used in astronomy, such as interpolation, numerical integration, and curve-fitting, and apply them to observational and theoretical problems.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR221**
Prereq: **(ASTR155 AND ASTR211)**

ASTR522 Modern Observational Techniques
This course reviews the practices of modern observational astronomy, focusing primarily on techniques employed in the optical and x-ray bands. Topics will include a description of the use of digital detectors for imaging, photometry, and spectroscopy in a wide variety of applications. Data acquisition, image processing, and data analysis methods will be discussed. In particular, students will gain hands-on experience with the analysis of data obtained from both ground- and satellite-based observatories. An introduction to relevant error analysis methods is included. Students will also become familiar with the fundamental techniques that will be necessary when "big data" projects like

LSST come online in the near future: database querying, metadata handling, and modern programming techniques.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR222**
Prereq: **ASTR211**

ASTR524 Exoplanets: Formation, Detection, and Characterization
Our ability to place the earth into a cosmic context has dramatically improved in recent decades with the discovery of planets around other stars (exoplanets). The study of exoplanets has quickly become a dominant field in astronomy. This course will focus on the fundamentals of exoplanet formation, detection, and characterization (interiors and atmospheres) based on astronomical observables. We will also discuss the assessment of habitability for Earth-like exoplanets and the prospects for the detection of biosignatures.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR224**
Prereq: **(ASTR155 AND ASTR211)**

ASTR531 Stellar Structure and Evolution
As the principal source of light in galaxies today and as drivers of chemical evolution, stars play a critical role in the universe. It is important to understand their structure and evolution. Fortunately, we have a fairly well-developed and tested theory of stellar structure covering both their interiors and atmospheres. In this course, we will provide an introduction to that theory and examine its key results, including a basic description of how stars evolve.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR231**
Prereq: **(PHYS213 AND PHYS214 AND ASTR155 AND ASTR211)**

ASTR532 Galaxies, Quasars, and Cosmology
This course introduces modern extragalactic astronomy, blending established practices in the field and important recent discoveries. Three major themes will be developed. First, the basics of Newtonian and relativistic cosmologies will be discussed, including modern determinations of the Hubble Law and the observations that have led to the currently favored cosmological model. Next, the universe of galaxies will be investigated: their constituents, structure and kinematics, and multiwavelength properties. Finally, the nature of galactic nuclei will be explored, including the observational consequences of black-hole accretion and the coordinated growth of galaxies and their central black holes. Outstanding research questions related to the topics covered will be highlighted throughout the course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR232**
Prereq: **(ASTR155 AND ASTR211)**

ASTR540 Radio Astronomy
This course will introduce students to the origins, theory, and practice of radio astronomy. It will cover theory of antennas and interferometers, as well as signal detection and measurement techniques. Particular emphasis will be placed on the theory and applications of Fourier transforms. A practical laboratory component will provide experience working with single-dish and interferometric data.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR240**
Prereq: **ASTR155 AND ASTR211 AND ASTR210**

ASTR549 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

ASTR550 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

ASTR555 Planetary Science Seminar
This course will examine topics and methods in the interdisciplinary field of planetary science. Students will join several faculty members in the planetary science group to discuss the origin, evolution, and habitability of planets in this and other solar systems. This class is intended for graduate students who are pursuing or who intend to pursue the planetary science concentration. Other graduate and undergraduate students may request admission to the course.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES555**
Prereq: **None**

ASTRONOMY MAJOR

MAJOR DESCRIPTION

The Major in Astronomy (ASTR) enables students to explore the foundational concepts and recent discoveries that have shaped the modern study of celestial objects, space, the phenomena of the cosmos, and the universe. Students develop advanced proficiency with the theoretical concepts and observational tools employed in distinct subfields of astrophysics. The program blends coursework with research opportunities and provides students with access to professional-quality telescopes, instrumentation, and computers. All majors complete an in-depth senior capstone project and present their research in a public forum, e.g., by speaking in the research seminar, presenting a poster at the Wesleyan summer research program, or presenting at a professional conference.

The Astronomy program attracts students who have a passionate interest and curiosity about space, celestial objects, and the universe, along with an aptitude for mathematics and physics, the ability to work with complex data and technology, and the patience for long-term research projects.

Astronomy graduates may continue their studies in a graduate program or pursue a variety of careers in fields such as astronomy, astrophysics, data

science, planetary science, aerospace engineering, space missions, science communications, education, and public outreach.

ADMISSION TO THE MAJOR

The standard introductory course for potential majors and other science-oriented students is ASTR155. It may be taken in the first or sophomore year. It assumes a good high school preparation in physics and some knowledge of calculus. ASTR211 is a sophomore-level course appropriate for interested non-majors as well as a gateway course to the major. Coding skills are required for ASTR211 and all upper-level astronomy courses. Prospective majors should take ASTR210 prior to ASTR211 or demonstrate their proficiency in coding to the ASTR211 instructor prior to taking that course. View courses in our Academic Catalog (https://catalog.wesleyan.edu/departments/astr/ugrd-astr/).

MAJOR REQUIREMENTS

The astronomy major is constructed to accommodate both students who are preparing for graduate study and those who are not.

The basic requirement for the major is the successful completion of the required courses as well as four upper-level astronomy courses. The required upper-level courses are taken one each semester in the junior and senior years.

Code	Title	Hours
Required Courses:		
ASTR155	Introduction to Astrophysics	
ASTR210	Fundamentals of Scientific Computing in Astronomy	
ASTR211	Observational Astronomy	
MATH121	Calculus I	
MATH122	Calculus II	
MATH221	Vectors and Matrices	
PHYS113	General Physics I	
PHYS116	General Physics II	
PHYS213	Waves and Oscillations	
PHYS214	Quantum Mechanics I	
PHYS215	Special Relativity	
Four Upper-Level Astronomy Courses*:		
ASTR221	Galactic Structure and Formation	
ASTR222	Modern Observational Techniques	
ASTR224	Exoplanets: Formation, Detection, and Characterization	
ASTR231	Stellar Structure and Evolution	
ASTR232	Galaxies, Quasars, and Cosmology	
ASTR240	Radio Astronomy	
*Upper-level Astronomy course offerings may vary year-to-year.		

Code	Title	Hours
Strongly Recommended Courses:		
MATH222	Multivariable Calculus	
PHYS324	Electricity and Magnetism	
PHYS219	Introduction to Contemporary Physics (if PHYS215 is not offered)	

Additional upper-level physics courses are also recommended but are not required. Prospective majors with graduate school aspirations should complete or place out of the basic physics and mathematics courses listed above, preferably by the end of their sophomore year, and should also take ASTR155, ASTR210, and ASTR211 during their first two years.

Since physics preparation is an important admission criterion at most astronomy graduate schools, those planning to go on for a PhD should consider a double major in physics. This can be accomplished by taking several of the following additional courses, normally in the junior and senior years: PHYS324, PHYS313, PHYS315, and PHYS316. Check the published requirements for the physics major for more details and speak to your advisor.

Additional mathematics courses, such as MATH229, may also be chosen.

Click here (https://www.wesleyan.edu/academics/journey/Astronomy_Advising_Information.pdf) for more detailed information about the astronomy major, including a sample eight-semester course plan.

STUDENT LEARNING GOALS

In this major, students are expected to acquire or develop:

- a broad understanding at an introductory level of the foundational concepts and recent discoveries that have shaped modern astronomy and astrophysics
- proficiency at an advanced level with the theoretical concepts and observational tools employed in four or more distinct subfields of astrophysics
- firsthand experience with the process of science through participation in research
- the technical and research skills needed to pursue graduate study in astronomy
- analytical abilities and computing skills useful for careers outside of professional astronomy

BA/MA PROGRAM

[wesleyan.edu/grad/degree-programs/bama.html (https://www.wesleyan.edu/grad/graduate-programs/bama_program.html)]

This program provides an attractive option for science majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience.

ADDITIONAL INFORMATION

All astronomy majors are to enroll each year in the .25-credit courses ASTR430 and ASTR431. These discussion courses provide a broad exposure and introduction to research and education topics of current interest to the astronomical community. Majors are also encouraged to serve as teaching apprentices in a general education course at least once during their junior or senior year, to take part in the observing program with the department's 24-inch telescope, and to participate in the department's public outreach activities.

HONORS

Students considering graduate school are strongly urged to do a senior thesis project (ASTR409/ASTR410); honors in astronomy requires completion of a senior thesis. Students with an interest in planetary science are advised to look at the course cluster information on that topic.

CAPSTONE EXPERIENCE

Research is an integral part of an undergraduate education in astronomy, and all majors are required to complete a senior research capstone that provides experiences beyond those obtained as part of their academic coursework. The capstone, to be completed during the twelve months prior to graduation, can take several forms:

- completion of a senior thesis project
- non-thesis related astronomy research
- in-depth investigation of a current research topic, including a short written report

In all cases, students must present some aspect of their experience in a public forum, e.g., by speaking in the ASTR 431 research seminar, presenting a poster at the Wesleyan summer research program poster session, or making a presentation at a professional conference.

MASTER OF ARTS IN ASTRONOMY

The Astronomy program blends coursework with research opportunities, providing students access to state-of-the-art instrumentation and computers to investigate areas of current astronomical interest. Primary research activities in the Astronomy department include mapping the local interstellar medium, probing the atmospheres of extrasolar planets, observations of young stars and circumstellar disks, investigations of x-ray binary star systems, and studies of the massive black holes that reside at the centers of galaxies. Facilities include a network of MacOS X workstations, a CCD attached to a 24-inch reflector, a 20-inch refractor equipped for observational work, and the substantial astronomical library of the Van Vleck Observatory. Faculty members are frequently awarded observing time on world-class telescopes, including the Hubble Space Telescope, Chandra X-ray Observatory, and dozens of ground-based telescopes.

The Astronomy Department offers graduate work leading to the degree of Master of Arts. Two years are usually necessary to complete the requirements for the MA degree. Alternatively, the department offers the 5-year combined BA/MA program for Wesleyan students. Wesleyan also offers an MA Concentration in Planetary Science, an emerging interdisciplinary field at the intersection of geology and astronomy with substantial contributions from physics, chemistry, and biology.

Six to ten non-seminar credits—including two credits for research leading to the thesis—are required for the MA degree. Master's candidates are expected to become involved in the department's research programs early in their graduate careers and to select courses offered in observational and theoretical astronomy and astrophysics. Additional courses in physics, mathematics, computer science, or planetary science are recommended according to individual student needs. The small size of the department permits individualized instruction and a close working relationship between students and faculty.

BA/MA students are not required to be teaching assistants; however, graduate students are expected to improve their communication skills through classroom teaching, formal interaction with undergraduate students, and presentations to the observatory staff and the community. MA students work as teaching assistants for one class each semester.

Each MA candidate must write a thesis on a piece of original research. Many thesis projects are ultimately submitted to a journal for publication.

COURSES

All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled in the university. Students will normally enroll in at least one 500-level course in astronomy each semester. Depending on the year, the courses are ASTR521, ASTR522, ASTR524, ASTR531, ASTR532, or ASTR555. These courses are similar in content to the 200-level courses of the same name but with some supplementary materials and special assignments. These supplements are designed especially for graduate students. In order to show proficiency in astronomy, physics, and mathematics, a minimum of 6-10 non-seminar credits, with grades of B- or better, is required for the MA degree. These include two credits for research leading to the thesis, which is also required. The student may expect to take two to four courses in physics, mathematics, or other sciences after consultation with the faculty of the department. In each semester of the first year of a 2-year MA program, students typically take three courses: one 500-level astronomy course and two courses in physics or math to match the level of proficiency expected in the Department's BA in astronomy. In each semester of the final year of the MA program, students typically take one 500-level astronomy course and one credit of thesis research. In addition, students are required to participate in the department's seminars on research and pedagogy in astronomy, which are offered each semester.

PROGRESS AND QUALIFYING EXAMS

To be admitted to candidacy, an MA student must take a written and oral qualifying examination demonstrating satisfactory understanding of several areas of astronomy, fundamental physics, and mathematics. This examination should be taken prior to the last year of study. If performance in this examination is not satisfactory, the student will either be asked not to continue or to repeat the examination. BA/MA students do not take a written or oral qualifying examination if ASTR155 has been successfully completed.

TEACHING

The emphasis in the program is on research and scholarly achievement, but graduate students are expected to improve communication skills by classroom teaching, formal interaction with undergraduate students, and presenting talks to the observatory staff and to the community. BA/MA students are not required to be teaching assistants.

RESEARCH

The research interests of the current faculty are:

- Dr. Ed Moran—extragalactic X-ray sources and supermassive black holes
- Dr. Seth Redfield—exoplanets and the interstellar medium
- Dr. Roy Kilgard—high-mass X-ray binary populations and statistical challenges in high energy astrophysics
- Dr. Meredith Hughes—planet formation
- Dr. Sarah Wellons—galaxy formation theory

The department is well-equipped for instruction and research. Facilities include a network of MacOS X workstations, a CCD attached to a 24-inch reflector, a 20-inch refractor equipped for observational work, and the substantial astronomical library of the Van Vleck Observatory. Members of our faculty are frequently awarded observing time on world-class telescopes, including the Hubble Space Telescope, Chandra X-ray Observatory, and dozens of ground-based telescopes.

THESIS AND DEFENSE

Each candidate is required to write a thesis on a piece of original and publishable research carried out under the supervision of a faculty member. A thesis plan, stating the purpose and goals of the research, observational and other materials required, and uncertainties and difficulties that may be encountered, must be submitted to the department for approval after admission to candidacy. The thesis, in near-final form, must be submitted to the faculty at least one week prior to the scheduled oral examination. In this examination, the student must defend his or her work and must demonstrate a high level of understanding in the research area. The oral examination may touch on any aspect of the student's preparation. It is expected that the student will submit the results of his or her work to a research journal for publication.

CONCENTRATIONS

Wesleyan offers an MA Concentration in Planetary Science. Planetary science is an emerging interdisciplinary field at the intersection of geology and astronomy with substantial contributions from physics, chemistry, and biology. The subject matter is planets, including those around other stars (exo-solar systems). The science questions include the most important of our times: How do planets (including Earth) form? How common are they in the universe? What is their range of properties and how do they evolve? Is there or was there ever life on other planets? The discovery of even microbial life beyond Earth would rank as one of the greatest human achievements of all time, and this quest lies squarely within the purview of planetary science. For more information and course requirements see https://www.wesleyan.edu/planetary/Graduate.html.

ADDITIONAL INFORMATION

For additional information about the Master of Arts program at Wesleyan, please visit

https://www.wesleyan.edu/grad/graduate-programs/masters.html.

BIOLOGY

These are thrilling times to study biology. Advances in molecular biology, epigenetics, and bioinformatics are leading to extraordinary new insights in every field, from evolution and ecology to development, cell biology, genetics/genomics, and neuroscience. These research areas are providing essential information as we address the urgent challenges of biodiversity conservation, global climate change, epidemiology, and human health and well-being. Biology is also at the heart of new ways of understanding ourselves as human beings in relation to other living things. Connections between biological disciplines are raising key questions in new ways, while biological knowledge has become fundamentally integrated with social and medical ethics, public policy, and journalism.

The Biology Department offers a broad range of courses that emphasize the process of scientific inquiry and current experimental approaches. Our courses also consider real-world implications of biological issues: the ethics of embryonic stem cell research, gender issues and reproductive technologies, the AIDS epidemic, and the impact of human activity on natural communities. Biology courses can be the start of a dedicated career in research, medicine, conservation, public health, bioethics, sustainable resource use, and many other areas. They can also bring the intellectual excitement of these investigations to students whose major focus is in the arts, humanities, or social sciences. We welcome students of all backgrounds and interests to join us.

- Master of Arts in Biology (https://catalog.wesleyan.edu/departments/biol/grad-biol-ma/)

BIOL106 The Biology of Sex
This course is featured as a general education course within the Department of Biology. Serving to complement courses currently offered within biology that only touch upon the subject of sex, this course will dive into specifics regarding sexual behavior and will serve to highlight new discoveries that have been facilitated by novel scientific techniques and approaches. As we study the biology of sex in the animal world, it becomes apparent that sex is achieved in a multitude of ways, many appearing rather bizarre and flamboyant. Yet under these guises, animals are still able to mate and reproduce. Sex is often defined according to sexual reproduction, whereby an egg is fertilized by a sperm, and offspring arise. However, many organisms engage in asexual reproduction and/or a combination of the two reproductive strategies. Reproductive anatomy and behavior will be addressed as we explore a variety of organisms, ranging from marine clown fish and their ability to produce both sperm and eggs along with the male chimeric marmoset (monkey) that mates with his brother's sperm. As an organism pursues reproduction, what are the mating strategies? What are the chemicals of sex (pheromones and hormones)? By examining the biology of reproduction, we will debate the competing strategies of males and females, and whether human cultural displays are yet another way to decipher quality in a potential mate.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**

Prereq: **None**

BIOL118 Reproduction in the 21st Century
This course will cover basic human reproductive biology, new and future reproductive and contraceptive technologies, and the ethics raised by reproductive issues.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **FGSS118, PHIL118, STS118**
Prereq: **None**

BIOL137 Writing About Evolution
This class will explore various interesting problems in natural history, using short writing assignments to build familiarity with concepts of organismic evolution.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL140 Classic Studies in Animal Behavior
This course will focus on the major concepts in the field of animal behavior. We will discuss the major selection pressures that shape animal behavior as individuals avoid predators, find mates, and produce offspring in their preferred habitats. What are the limiting resources for male and female animals, and why are some species sexually dimorphic? We will commence with the early pioneers in the field of ethology and highlight comparative studies in understanding territorial behavior, alarm calling, kinship, and the role of hormones/pheromones in reproduction. Both instinctual and learned behaviors are important components in an animal's behavioral repertoire and will be explored in field experiments. This course is designed for students to gain a clearer understanding of the mechanisms that drive the natural world around them. All biological jargon will be defined as original research is discussed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL140F Classic Studies in Animal Behavior (FYS)
This course will focus on the major concepts in the field of animal behavior. We will discuss the selection pressures that shape animal behavior and whether the study of primate social and mating systems can provide insight into human behavior. Other questions include, Why do certain animal species exhibit altruistic behavior and others do not? What are the limiting resources for male and female animals, and why do they behave so differently? This is but a sampling of the subjects to be covered in a course that is specifically designed for students to gain a clearer understanding of the mechanisms that drive the natural world around them. We will commence with the early pioneers in ethology who were the first to describe the behavioral repertoire of a single species and progress onto the more current, comparative approach, in which two animals are compared for a more fine-tuned analysis. Biological jargon will be defined as original research is discussed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL145F Primate Behavior: The Real Monkey Business (FYS)
This course will examine the full spectrum of the primate order. How has evolution shaped these different primate species, and what underlying mechanisms have fueled their development? We will discuss primate ancestry, primate environments, and primate competition, all factors that mediate primate behavior. In addition, we will take the lessons learned from primate studies to determine how humans might use this knowledge toward the preservation and conservation of their nonhuman relatives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL146 Primate Behavior: The Real Monkey Business
This course will explore primate behavior starting with an overview of primate ancestry as gleaned from the fossil record. How has evolution shaped these different primate species, and what underlying mechanisms have fueled their behavioral repertoires? The major selection pressures on primates will be investigated together with parental care, self-medication, and Machiavellian intelligence. The class will also examine theoretical models explaining the evolution of the oversized human brain by Geoffrey Miller and how the advent of cooked foods supported a large brain mutation (Richard Wrangham). In addition, we will take the lessons learned from these aforementioned primate studies to determine how this knowledge can work toward the preservation and conservation of our nonhuman primate relatives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL149 Neuroethology: Sensory Basis of Animal Orientation and Navigation
This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B149**
Prereq: **None**

BIOL153F Stress: The Good, The Bad, The Ugly, The Resilient (FYS)
Stress, what is it and what is it good for? This course will introduce students to the neurobiology of stress. We will read the foundational works that helped us understand that stress can have real, measurable, and lasting effects on the entire body and across generations. Next, we will break down major concepts in the field (including allostasis, fight or flight, tend and befriend and hyperkatifeia) that describe how the body handles acute and chronic stress. Finally, we will end the course with a focus on stress resilience. We will discuss how social interaction, exercise, nutrition, and mindfulness approaches work to contribute to the remarkable resilience that has defined the success of our species. Our major sources of information will include original scientific reports, essays, magazine articles, podcasts, films, lectures and guest appearances by neuroscientists in the field. Throughout the course, students will maintain a journal with daily entries that document their understanding of the material and its relevance to their lives. As a final project, students will be asked to work in pairs to build a digital zine for distribution to other incoming frosh to help develop their appreciation for how stress can impair cognition and emotional regulation, how stress can aid learning and memory and what tools of resilience

students can lean on throughout their time at Wesleyan to temper the former and facilitate the latter.

BIOL155 Tiny Organisms with a Big Effect: The Microbiome
With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multicellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual's health. This course will look at the true nature of the microbiome, to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.

BIOL160 Life in the Oceans in the Anthropocene and Beyond
Little is known about life in the deep sea, the largest habitat on Earth, even about the largest animals living there, such as the giant squid. Humans, however, are severely affecting even these most remote areas of our planet, and wildlife populations in the oceans have been badly damaged by human activity. We will look at the amazing diversity of ocean life and the disparate building plans of its animals, and see how oceanic ecosystems are fundamentally different from land ecosystems. Then we will explore how human actions are affecting oceanic ecosystems directly, for instance by overfishing (especially of large predators and filter feeders), addition of nutrients (eutrophication) and pollutants, and the spread of invasive species, as well as indirectly, through emission of carbon compounds into the atmosphere. Rising atmospheric CO2 levels lead to ocean acidification and global warming, affecting the all-important metabolic rates of ocean life, as well as oceanic oxygen levels and stratification, thus productivity. We will try to predict the composition of future ecosystems by looking at ecosystem changes during periods of rapid warming in the geological past and see whether future ecosystems will become dominated by jellyfish, as they were 600 million years ago.

BIOL161 Science Materials For a Malagasy Classroom
Students will design and produce a variety of educational science materials to be used in a fifth grade classroom in Madagascar. These items include a science logo, bookmarks, educational science games, posters, and a comic book with conservation themes for children. Students who are interested in design and natural history as a means through which to communicate science themes on wildlife endemism, evolution, and climate change would be appropriate for this course. All students will need to conduct independent research into science topics, distill down the salient features, and use that information to design elementary school materials. Working both individually and in teams, students will conceive, design, critique, and move into product production (MakerSpace). In addition, prototypes of the materials will be reviewed and rated by fifth graders in a Middletown elementary school for feedback.

Identical With: **ENVS261, IDEA261**
Prereq: **None**

BIOL173 Global Change and Infectious Disease
This course will cover how human demands upon the environment have come back to bite us through infectious diseases. The most devastating infections, now and in the past, have spilled into humanity from other animals through our quest for food, either through hunting and trade of wild animals (COVID-19 and HIV) or through agriculture (smallpox and measles). Additionally, taking over huge swaths of land has fragmented natural habitats, with the result that some pathogens have increased in abundance (Lyme disease) and some pathogens have moved closer to humanity when humans have encroached on natural lands (Ebola). Living at high density in interconnected cities has sustained the severe infections that became humanity's childhood diseases (mumps, measles, smallpox); high densities have also brought us diseases brought by fecally contaminated water, as well as those diseases brought by the animals that cohabit our cities and suburbs (rats, robins). Our demand on energy has brought us global warming, which is transporting tropical diseases, such as malaria, poleward from the tropics; the extreme weather events of a changed world are leading to outbreaks of zoonotic diseases (hantaviruses). Moreover, our penchant for transporting wild animals and ourselves has had the potential to spread any local flare-up of any novel disease to the whole world (plague, COVID-19). We will discuss how, even if we mitigate every existing human infection, we should expect an unending stream of new pathogens. We will discuss technological solutions to infectious diseases, as well as how changes in our ethics might help contain existing pathogens and avoid future spillovers. Lectures will cover these and other topics. There will be two 65-minute lectures each week, with frequent opportunities for students to break out into smaller sections to figure out interesting biological challenges. There will also be a 30-minute discussion each week for each of 11 discussion sections (probably about 15 students each). These discussions will focus mostly on how

policy changes might best mitigate the environmental disturbances that are bringing us infections. The course has no formal prerequisites and will introduce material from ecology and microbiology, as needed, to allow students to read and interpret the recent literature on global change and infectious disease.

BIOL181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication, chromosome dynamics, transcription, translation, and gene regulation. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including transport across cell membranes, cellular energetics, protein sorting, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology. This course will require about 10 hours per week of engagement. Students should enroll separately in MB&B/BIOL191 Principles of Biology 1 - Laboratory.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B181**

Identical With: **MB&B181Z**
Prereq: **None**

BIOL182 Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

BIOL186 Introduction to the Biology of Nutrition and Impact on Human Health
This course will introduce students to the concepts of nutrition. It will cover the biology of the different food groups that make a balanced diet (carbohydrates, fats, proteins) and how our bodies obtain energy and important molecules, such a vitamins, from our food. The course will also cover the relevant anatomy involved in digestion and excretion. Other topics such as the effects of food production on the environment, fad diets, and disease states will also be studied, along with the latest hot topics in the news.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL191 Principles of Biology I--Laboratory
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B191**

Prereq: **None**

BIOL192 Principles of Biology II: Laboratory
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. A specific emphasis will be placed on science communication.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B192**
Prereq: **[MB&B191 or BIOL191]**

BIOL193 Principles of Biology I Laboratory (Online)
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Crosslisting**
Grading: **Cr/U**

Gen Ed Area: **NSM-MBB**
Identical With: **MB&B193, NS&B193**
Prereq: **None**

BIOL194 Principles of Biology II: Advanced Topics
This course provides an optional supplement to the introductory course in physiology, development, evolution, and ecology (BIOL182, which should be taken concurrently). It is designed for highly motivated biology students who seek to enrich their understanding by engaging with current research in an intensive seminar setting. Students in BIOL194 will read and discuss recent journal articles that probe in greater depth some of the subjects covered in BIOL182. Weekly meetings will consist of a short lecture by the professor followed by group discussion of the readings.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B194**
Prereq: **BIOL181 or MB&B181**

BIOL197 Introduction to Environmental Studies
This course explores the interdisciplinary field of environmental studies to better understand the characteristics of human interaction with and dependence on the environment, and the causes and consequences of environmental degradation at local and global scales. We will explore key processes, characteristics, and phenomena of the natural world, and relevant human system and social dynamics. We will apply this information to identifying important issues and trends of global climate change and sustainability. Projects facilitate synthesis and application, skill development, reflection, and independent exploration.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS197, E&ES197**
Prereq: **None**

BIOL198 Principles of Biology II Laboratory _ Online
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophysiology, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **MB&B198, NS&B198**
Prereq: **BIOL192**

BIOL208 Molecular Biology
This course is a comprehensive survey of the molecules and molecular mechanisms underlying biological processes. It will focus on the cornerstone biological processes of genome replication, gene expression, and protein function. The major biomacromolecules -- DNA, RNA, and proteins -- will be analyzed to emphasize the principles that define their structure and function. We will also consider how these components interact in larger networks within cells to permit processing of external and internal information during development and how these processes become perturbed in disease states.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B208**
Prereq: **MB&B181 OR MB&B181Z**

BIOL210 Genetics and Genomics
Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B210**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

BIOL212 Principles and Mechanisms of Cell Biology
The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and behavior of cells, because with this perspective one can begin to ask complex questions including: why does mutating a protein cause a cell to malfunction and how does this cause tissue malfunction or disease? We will examine the cell mainly in the context of the multicellular organism--where cells respond to as well as regulate their local environment. Hence, this course provides students with a firm foundation in cell biology as we examine eukaryotic cell structure, organelle function, cell adhesion and motility, signal transduction and cell differentiation, cell survival and apoptosis, and consider how these mechanisms integrate to generate coherent cell behaviors. Published research will be discussed throughout the course in order to build students' understanding of research in cell biology. Lectures, assignments and assessments include opportunities for students to develop a broad and deep knowledge of cell biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**

Identical With: **MB&B212**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

BIOL213 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B213, PSYC240**
Prereq: **None**

BIOL214 Evolution: Pattern and Process
Over the last 3.5 billion years, life has taken on a vast array of forms in a multitude of environments. In this class, we will use evolutionary analysis to reveal the key patterns and processes that produced this amazing diversity of life. Topics will include: the evidence for evolution, the nature of variation, adaptive and random evolutionary processes in natural populations, mechanisms of speciation, phylogenetic reconstruction with molecular and morphological data, and major events in the history of life on earth. Motivating examples will be drawn from across the domains of life.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B182 OR BIOL182 OR BIOL182Z**

BIOL215 Evolution in Human-Altered Environments
Human activities have altered natural environments and, indeed, have created entirely novel ecosystems such as cities and high-input farms. This course examines how these human alterations to the environment affect the evolution and coevolution of diverse organisms. Starting with an intensive overview of microevolutionary processes, we will consider a number of contemporary scenarios: evolutionary response to environmental contaminants, exploitation of natural populations, and global climate change; evolution in urban and agricultural ecosystems; and the evolutionary impact of nonnative, invasive, and genetically modified organisms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL515, ENVS210**
Prereq: **[BIOL182 or MB&B182]**

BIOL215Z Evolution in a Changing World
Human activities have dramatically altered natural environments, and have even created entirely novel ecosystems such as farms and cities. How do these changes affect the evolution of animal and plant populations? In contrast to the traditional view that evolution takes place over millions of years, 21st-century scientists have been astonished to observe that rapid, human-caused environmental changes can lead to evolution in just a few short generations. Can the process of adaptive evolution keep up with the rapid pace of human-caused environmental change and allow species to cope with new conditions? What factors can promote "evolutionary rescue," and what may constrain it in different types of organism?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS210Z**
Prereq: **MB&B182 OR BIOL182**

BIOL216 Ecology
Ecology is the scientific study of interactions between organisms and their environment, both biotic and abiotic. We will look at how these interactions shape fundamental characteristics of populations, communities, and ecosystems. Topics will include predation, competition, symbioses, and effects of stress and resource limitation in diverse environments. We will cover important consequences of interactions such as coevolution, population outbreaks, ecological coexistence, patterns of biodiversity, ecological succession, species invasions, food web dynamics, nutrient and energy cycling, variation in ecosystem goods and services, and global change.

This course emphasizes several learning goals in biology, including skill in formulating original ideas and experiments, using quantitative and graphical tools and interpreting quantitative information, and scientific writing.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS216**
Prereq: **[BIOL182 or MB&B182]**

BIOL217 Microbial Genomics and Evolution
In this course, students will learn the principles governing the structure, regulation, and evolution of bacterial and viral genomes. We will emphasize the experimental logic and conceptual models that researchers use to link genotype to phenotype. Specific topics will include operons, genetic networks, horizontal gene transfer, phylogenetics, and genome-wide association studies. Motivating examples will be drawn from both medical and environmental microbiology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B181 OR MB&B181Z AND MB&B182 MB&B182Z**

BIOL218 Developmental Biology
This is an extraordinary time for the field of Developmental Biology: advancements in imaging and experimental strategies, especially those that manipulate gene expression, have led to an explosion in the amount that we know about how an organism develops and how developmental programs are used also in the adult organism. Developmental Biology is a discipline that utilizes a variety of model organisms, and students will be introduced to some of these as we cover the mechanisms of development at the molecular, cellular, and organismal levels. Special attention will be paid to the process of scientific discovery -- the experiments -- and students will engage with original research data throughout the course. We will also cover recent work that aims to understand very early human embryo development, and consider ethical and medical considerations that this work raises. Lectures, class discussion, and assignments will include opportunities for students to develop a broad and deep knowledge of developmental biology, gain understanding of the scientific

process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL220 Conservation Biology
This course will focus on the biology of conservation rather than cultural aspects of conservation. However, conservation issues will be placed in the context of ethics, economics, and politics. We will cover the fundamental processes that threaten wild populations, structure ecological communities, and determine the functioning of ecosystems. From this basis, we will explore important conservation issues such as habitat loss and alteration, overharvesting, food web alteration, invasive species, and climate change. We will use readings from the primary literature and field projects to learn about current research methods used in conservation biology. This course emphasizes reading and interpreting primary scientific literature and quantitative information, thinking critically about morals and ethics in society, and includes some hands-on research methods.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS220**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL223 The Molecular Basis of Cancer
Cancer is a group of diseases characterized by unregulated cell growth and tissue invasion. This course will focus on the molecular events that lead to cancer. We will cover topics in both molecular and cellular biology and genetics that are relevant to understanding the differences between normal and cancer cells. Particular focus will be placed on oncogenes and tumor suppressor genes, DNA damage responses, the p53 signaling pathway, cell cycle regulation, and the molecular basis of cancer therapies. This course will utilize both the textbook and primary scientific literature in the study of cancer.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **MB&B223**
Prereq: **MB&B181**

BIOL224 Hormones, Brain, and Behavior
Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.
Offering: **Host**
Grading: **A-F**

Identical With: **NS&B224**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [BIOL182 or MB&B182]**

BIOL228 Medical Biochemistry
This introductory course will focus on the essential concepts of biochemistry important to students interested in the health professions, including the chemical and biological foundations of cellular metabolism and related disease states. Major topics will include the structure and function of biological molecules in the human body (proteins, carbohydrates, fats, nucleic acids, vitamins), enzyme catalysis, cellular signaling, and digestion, absorption, and processing of nutrients for energy and growth.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B228**
Prereq: **[MB&B181 or BIOL181] AND CHEM251**

BIOL229 Geobiology Laboratory
This laboratory course will explore more deeply some of the concepts introduced in E&ES234. Both the fundamental patterns and practical applications of the fossil record will be emphasized.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES235**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR EES199 OR [ENVS197 or BIOL197 or E&ES197]**

BIOL231 Microbiology
This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B231**
Prereq: **BIOL182 OR MB&B208**

BIOL232 Immunology
In this introduction to immunology, particular emphasis will be given to understanding both the innate immune response and its agents as well as the acquired immune response mediated by B and T cells. Cellular and antibody responses in health and disease will be addressed, along with mechanisms of immune evasion by pathogens, autoimmune disease, and cancer.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B232**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182]) OR [MB&B208 or BIOL208]**

BIOL233 Geobiology
Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology). Typically, this involves studying fossils within the context of their sedimentary setting. In this course, we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on the climate.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Gen Ed Area: **NSM-EES**
Identical With: **E&ES234, ENVS233**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR EES199 OR [ENVS197 or BIOL197 or E&ES197]**

BIOL235 Comparative Vertebrate Anatomy
This course will provide a comprehensive overview of the main organ systems in vertebrates, emphasizing phylogenetic relationships and anatomical features of major vertebrate groups. Using a comparative, systems-based approach students will explore the relationships between structure and function, evolutionary and developmental constraints on vertebrate anatomy, and the ways that a comparative anatomical approach informs our understanding of the human body. The course format will consist of two lectures and one lab per week, with lab sessions focusing on detailed dissection of several representative vertebrate species.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **NSM-BIOL**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182] AND [MB&B191 or BIOL191] AND [BIOL192 or MB&B192])**

BIOL236 Comparative Animal Physiology
This course studies the fundamental mechanisms that diverse animals (mostly vertebrates) have developed to deal with common functional problems posed by their environments, and the special mechanisms that some animals use to cope with extreme environments. Animal physiology focuses on the functions of tissues, organs, and organ systems, investigating the mechanisms that operate at all levels ranging from molecules to the whole organism. Animal physiology is thus an integrative science, attempting to bring together everything that is known about an animal's function to create an integrated picture of how that animal operates in its environment. The mechanisms of function and regulatory processes that will be covered include gas exchange, circulation, excretion, osmoregulation, sensing mechanisms, temperature regulation, muscle contraction/locomotion, and endocrine coordinating mechanisms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **(BIOL181 OR MB&B181) AND (BIOL182 OR MB&B182)**

BIOL237 Signal Transduction
Cells contain elaborate systems for sensing their environment and for communicating with neighbors across the membrane barrier. This class will explore molecular aspects of signal transduction in prokaryotic and eukaryotic cells. Topics will include membrane receptors, GPCRs, kinases, phosphorylation, ubiquitination, calcium signaling, nuclear receptors, quorum sensing, and human sensory systems. We will integrate biochemical functional approaches with structural and biophysical techniques.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B237**
Prereq: **[MB&B208 or BIOL208]**

BIOL239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B239, PSYC239**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL241 Cell-Cell Interactions in Development
This course is about the exploration of the cellular interactions during development. Students will examine interactions between cells in the specification of the overall body plan, tissues and organs; the role of adhesions and migration; and the intracellular and extracellular cues that regulate these processes.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **(BIOL182 AND BIOL212) OR BIOL218**

BIOL242 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL542, E&ES270, E&ES570, ENVS242**
Prereq: **None**

BIOL243 Neurohistology
The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B243**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [MB&B181 or BIOL181]**

BIOL244 Neuropharmacology
This course will introduce students to the physiological and molecular effects of drugs on neuronal activity and behavior. We will cover key concepts in neuropharmacology, including pharmacokinetics and pharmacodynamics, alongside techniques used in modern pharmacotherapeutic discovery as it relates to the treatment of neurological and neuropsychiatric disease. Student assessment will include in-class quizzes and exams.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B244, BIOL544**
Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

BIOL245 Cellular Neurophysiology
This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B245, BIOL599**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL247 Laboratory in Neurophysiology
The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems. Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (Aplysia), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B247**
Prereq: **([NS&B213 or BIOL213 or PSYC240] AND [BIOL182 or MB&B182])**

BIOL248 Introduction to Human Body Morphology
The human body is both complex and fascinating. This introductory course in human anatomy, explored across different scales, is designed to provide students with a precise and comprehensive understanding of the human body's morphological organization, using accurate and specialized terminology. The course will primarily focus on anatomy, constantly relating it to histology concepts to understand the relationship between structure and function within the body's systems and organs. The program is structured into three modules: Module 1 - Organization of the Human Body and Methods of Study, Module 2 - Integration of Functions, and Module 3 - Interaction with the External Environment. Each module will offer foundational knowledge in anatomy and histology, laying a solid foundation for further study in disciplines related to the human body and other mammals. The goal is for each student to master essential concepts and develop cognitive skills that will deepen their understanding of the body's functioning. Students will be encouraged to actively engage in class discussions, adopt a reflective approach to knowledge, and, most importantly, foster a lasting passion for learning.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **(BIOL181 OR MB&B181) AND (BIOL182 OR MB&B182)**

BIOL250 Laboratory in Cellular and Behavioral Neurobiology
The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B250, NS&B555**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL251 Laboratory in Basic Practices in Neuroscience
This course will provide students with the knowledge and some tools to solve problems in neurobiology. Topics covered include a fundamental review of neurobiology and approaches in neuroscience research methods, behavioral studies, tissue/cell preparation, and histology/microscopy.

Students will learn how the applications of advanced neuroscience techniques have answered fundamental questions in neurobiology and neurophysiology. Modern approaches and their applications will be discussed, including behavioral studies, tissue preparation and analysis, histology, and microscopy.

The learning outcomes will be assessed by a project, oral presentation of the project, written laboratory class reports (lab notebooks), and a lab practicum.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B251**
Prereq: **NS&B213 OR BIOL213 OR PSYC240**

BIOL252 Cell Biology of the Neuron
Understanding the cellular biology of neurons is critical for understanding neurological disorders as well as neuropharmacological methods for treating the nervous system. In this course, we will explore how neurons function, focusing on structure-function relationships of the molecular building blocks of neurons. We will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include cytoskeleton, cellular polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, neuronal plasticity, and regeneration. This course is designed to follow on from NS&B213 Behavioral Neurobiology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **NSM-NSB**
Identical With: **NS&B252**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL254 Comparative Animal Behavior
In this survey course, we explore a wide range of animal behaviors at the proximate and ultimate levels of analysis. Main topics include: the principles of communication, genetic regulation of behavior, neuroethology, biological rhythms, hormones and behavior, reproduction, and animal cognition. Students gain foundational knowledge by engaging with textbook readings and traditional lectures. Students practice self-directed inquiry, peer-assisted learning, and scientific communication through in-class work sheets, group discussions, take-home assignments, and presenting topics of their choosing. Finally, students will learn about research and the academic career path through scholar highlights, interacting with guest speakers, and reading primary literature.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B254**

BIOL256 Quantifying Evolution: The Genetics of Populations
How can we forecast the survival of an endangered species? How quickly can antibiotic resistance arise? Who is Lucy? Population genetics studies the genetic variation within and between populations that arise from several factors, including natural selection. Migration, mate choice, and habitat all influence the evolution of life. In this course, we will use mathematical modeling to describe how these fundamental forces change populations over time, and we will learn how these principles are used to breed our food supply, build our medicines, and manage our ecosystems. Class sessions will combine lectures with discussion and in-class problem-solving. Using these ideas, students will learn how evolutionary biologists reconstruct history using the principles of inheritance and variation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B181**

BIOL257 Neurogenetics
Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **NS&B257**
Prereq: **BIOL181 AND BIOL182**

BIOL263 Demystifying Data: Introductory Data Analysis and Modeling
How do scientists make sense of the data they collect, especially as datasets grow in size and complexity? In this course, students will learn fundamental concepts in data collection, statistics, and modeling through hands-on analysis of publicly available datasets from the COVID-19 pandemic. We will cover the effects of biases in data collection, models of epidemic growth and spread, and the principles of studying a rapidly evolving pathogen. While we will use motivating examples from the life sciences, students can expect to learn techniques and ways of thinking that will form a foundation for evaluating and analyzing data across scientific disciplines. Students will learn the basics of using the R programming language to visualize, analyze, and model data, so no previous programming experience is expected.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **CIS263**
Prereq: **None**

BIOL265 Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B265, COMP113, CIS265**
Prereq: **[MB&B181 or BIOL181]**

BIOL265Z Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics. MB&B/BIOL181 or POI: Those not meeting the prerequisite should contact the professor directly.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **CIS265Z, COMP113Z, MB&B265Z**
Prereq: **MB&B181 OR BIOL181**

BIOL266 Bioinformatics
This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **COMP266, MB&B266, CIS266**
Prereq: **[MB&B181 OR BIOL181]**

BIOL267 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding,

diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **IDEA267, BIOL567**
Prereq: **BIOL208 OR BIOL212 OR BIOL218 OR BIOL228 OR PHYS207**

BIOL270 Systems Biology with Programming
Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology. Students will spend the first part of the course learning how to program in Python in order to model, simulate, and visualize these systems. No previous programming experience is expected.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **CIS270**
Prereq: **BIOL181 OR BIOL181Z AND BIOL182 OR BIOL182Z**

BIOL271 Systems Biology with Programming
This course is similar to BIOL270, but only meets in the second half of the semester with BIOL270 and is designed for students with a solid background in programming in Python. Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**

Identical With: **CIS271**
Prereq: **BIOL181 OR BIOL181Z AND BIOL182 OR BIOL182Z**

BIOL290 Plant Form and Diversity
The course begins with an overview of plant evolutionary history, then covers the basic structure and function of the plant body, the plant life cycle in nature, including interactions with animals, and ecological diversity of plants in contrasting habitats. Special events include a field trip to the Smith College Botanic Garden, two hands-on days for working with living specimens, and a special guest lecture by a local plant biologist.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL590, ENVS286**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL295 Physiology and Cell Biology of Cancer
This course focuses on the cellular and physiological aspects of cancer, examining the major hallmarks of cancer. Recent advances in cancer treatment are also covered.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **(MB&B181 or BIOL181) AND (MB&B182 or BIOL182) AND (BIOL212 or BIOL218)**

BIOL299 Waves, Brains, and Music
Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B299**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL302 Neurobiology of Aging
This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to the study of aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should have a clear understanding of what aging is and what effects it has on normal brain function. In class, I will introduce the topic with slide presentation and after that, we will discuss the topic based on the scientific article discussion. After the last class, students will have extensive opportunities for feedback and will write a project and present it in class as an oral presentation. Student evaluation

will include weekly quizzes, project, a midterm and final exams, and class participation/attendance.

Course Objectives:

By the end of this course, students will:

1. Gain a Comprehensive Understanding: Develop a comprehensive understanding of the neurobiological processes associated with aging, including neurodegenerative diseases.

2. Explore Structural Changes: Examine structural changes in the aging brain, such as alterations in neuron density, synapse formation, and brain volume.

3. Analyze Functional Changes: Analyze functional changes in the aging nervous system, including changes in memory, cognition, sensory perception, and motor function.

4. Study Neurodegenerative Diseases: Investigate common neurodegenerative diseases associated with aging, such as Alzheimer's disease, Parkinson's disease, and age-related macular degeneration.

5. Explore Cellular and Molecular Mechanisms: Explore the cellular and molecular mechanisms underlying age-related changes in the nervous system, including oxidative stress, inflammation, and genetic factors.

6. Examine Potential Interventions: Review potential interventions and strategies to promote healthy aging and delay or mitigate age-related neurobiological changes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B302**
Prereq: **NS&B213**

BIOL302Z Neurobiology of Aging
This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to studying aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should clearly understand what aging is and its effects on normal brain function. In class, I will introduce the topic with slides presentation and after that, we will discuss the topic based on the scientific article discussion. After the classes, students will have extensive opportunities for feedback and will be requested to write a project for the last, oral presentation of the project in the class, and a final exam.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B302Z**
Prereq: **NS&B213**

BIOL304 Glia: Not just neuronal glue!
Historically, neuroglial cells (i.e., astrocytes, oligodendrocytes, and microglia) were considered the space-filling cells of the brain, simply the brain's "glue." Later, their primary role was considered metabolic support of neurons (e.g., buffer extracellular potassium, recycle neurotransmitters, myelination, etc.). However, the notion of glia as inert bystanders has recently been revised. It is now accepted that glial cells play critical physiological roles in normal nervous system development and function, including controlling brain wiring, modulation of synaptic transmission, regulating blood flow, and serving as the brain's lymphatic system just to name a few functions. Moreover, glia contributes to a variety of neurological disorders such as epilepsy, glioma, multiple sclerosis, neurodegenerative diseases, and psychiatric disorders like major depressive disorder and schizophrenia. Hence, these underappreciated cells are long overdue recognition. This is an interdisciplinary course in which students will engage in a focused, in-depth exploration of how glial cells contribute to neurological and psychiatric disorders. Lectures by both basic scientists and clinicians will highlight recent research on the molecular mechanisms by which glial cells contribute to the establishment and progression of neurological and psychiatric disorders.

This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes, students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include quizzes and assessments for a lay audience, a midterm and a final exam, class participation, and attendance.

Course Objectives:

1. Describe the development, histology, and normal physiological function of glial cells.

2. Describe the role inflammation plays in neurological and psychiatric conditions.

3. Describe the role traumatic brain injury plays in neurological and psychiatric conditions.

4. Describe the role genetics plays in neurological and psychiatric conditions.

5. Describe the physiology, pathology, and disease mechanisms of neurological and psychiatric conditions.

6. Demonstrate effective written communication skills to construct a succinct "News & Views" style summary of a primary research report for a lay audience.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B304**
Prereq: **NS&B213**

BIOL306 Ecology and Natural History of Freshwater Fishes of South America
South America has the highest diversity of freshwater fishes anywhere in the world. In fact, there are more than twice the number of mammals and about the same number of birds in the world. Why has this remarkable radiation occurred in a relatively short period of time? How can so many fishes coexist in the same rivers, utilizing the same resources? In this intensive course, we will travel to Colombia during spring break (March 7-21) in order to gain firsthand knowledge about the ecology and natural history of freshwater fishes in South America. We will learn about the ecological and environmental factors that contribute to perhaps the largest biological radiation on the planet.

Students will obtain firsthand experience with the South American tropics, freshwater fishes, and with doing experiments in the field. Each day there will be a combination of lectures and field or laboratory exercises. We will travel to and explore fish ecology in different types of rivers at different elevations. Students will gather and analyze data about biological, physical, and environmental issues that are covered in the lectures. The habitats that we explore will be both terrestrial and freshwater rivers. Our base will be at the Instituto Humboldt in Villa de Leyva, Colombia. We will interact with Colombian students who are studying ecology and biodiversity at the Institute in order to exchange ideas about current environmental issues.

All the costs of travel, lodging, and meals will be covered by the course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS306, E&ES306**
Prereq: **None**

BIOL308 Small Creatures, Big Impact: Vectors of Human Disease
This course will discuss the connection between public health and vector-borne disease (illness transmitted to humans through insects like mosquitoes, ticks, and flies). By understanding the role of entomology (study of insects) in global burden of these diseases, students will gain an understanding of why vector-borne disease account for more than 17% of all infectious diseases, causing over 700,000 deaths annually. Part 1 of this course will cover the biology and ecology of key vectors such as mosquitoes, ticks, snails, sandflies, kissing bugs, and flies, which are responsible for transmitting pathogens like malaria, dengue, Zika, West Nile, Lyme disease, anaplasmosis, Schistosomiasis, Leishmaniasis, Chagas disease, sleeping sickness, and many others. Students will learn about insect physiology, vector/parasite behavior, life cycles, and the environmental conditions that influence their populations. We will also explore vector control strategies and the impact of climate change on vector-borne disease transmission. In part 2 students will understand how limited access to healthcare, inadequate sanitation, and poor living conditions increase the risk of disease transmission by providing vectors the ability to thrive. Addressing these challenges requires a comprehensive approach that includes improving healthcare infrastructure, enhancing disease surveillance, and implementing sustainable vector control strategies. By the end of this course, students will have an understanding of the public health implications of vector-borne disease in developing countries and the entomological factors that contribute to disease burden worldwide, including epidemiology, prevention, and vector control methods. We will examine the socio-economic and environmental factors that contribute to the spread of these diseases and discuss strategies for effective intervention and policy-making. By understanding these unique challenges, students will gain insights into the global health disparities and the importance of tailored public health approaches.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **NSM-BIOL**
Prereq: **(BIOL181 OR MB&B181) AND (BIOL182 OR MB&B182)**

BIOL310 Genomics Analysis
This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.

BIOL312 Global Change Biogeography
On our home planet, Earth, the current geologic epoch is characterized by rapid changes to the environment due to human behavior. Biogeography examines the spatiotemporal distribution of life on Earth, from species to ecosystems and from landscapes to continents. How is anthropogenic climate change modifying the distribution and function of organisms and ecosystems? What can we learn from the evolutionary history of the life-planet system that can help us understand the possible impacts of future climates on the biosphere? To address these questions rigorously, we will explore primary literature from a wide range of theoretical and empirical studies. The course emphasizes inquiry, contact with primary literature, discussion, statistical and spatial coding, learning to obtain data, and visualization. The beginning of the semester provides an overview of physical geography and the Earth System, with field and data experiences that build remote sensing and spatial analysis skills. The second half of the semester is focused on the exploration of relevant scientific literature based on student interests and recent papers, as well as independent research projects.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **E&ES312, ENVS311**

Prereq: **None**

BIOL316 Plant-Animal Interactions
This course will explore the ecology and evolution of interactions between plants and animals, including mutualism (e.g., pollination, frugivory) and antagonism (e.g., herbivory, granivory), that are central to the functioning of ecosystems and the generation of biodiversity. The format will be seminar-style, involving reading, discussion, and student presentations of key papers on chosen topics. This course emphasizes reading and interpreting primary scientific literature and quantitative information, formulating original ideas in scientific inquiry, writing, and oral communication.

BIOL317 Genes and Mechanisms in Vertebrate Sex Determination
Sex determination in vertebrates is a highly plastic process that centers on the decision within a bipotential organ, the gonad, to differentiate into either an ovary or a testis. Interestingly, the "problem" of how to determine sex has been solved in many different ways across the animal kingdom. This course will explore the basic principles and molecular networks involved in sex determination across vertebrate species including fish, reptiles, birds, and mammals. The format will be primarily seminar-style, involving brief introductory lectures, reading, discussions, and individual and group presentations of key papers on chosen topics.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **BIOL212 OR BIOL218**

BIOL318 Nature and Nurture: The Interplay of Genes and Environment
Ever since Watson and Crick proposed the DNA molecule as a heritable genetic "code," biology has emphasized genes ("nature") rather than environmental influences ("nurture") as the primary agents of biological causation. This genetic determinism continues to shape perspectives beyond research, including such critical concerns as public health and human diversity. Recent insights to environmental and inherited epigenetic factors demand that we rethink this established view to build a more integrated understanding. In this advanced seminar, we consider how genetic and environmental factors jointly determine the development and behavior of organisms, including ourselves. After an initial series of lecture/discussion sessions on foundational concepts, this seminar course will consist of student-led discussions of scientific articles on genetic and environmental causes of specific diseases, capacities, and behaviors. Subject to class choice, possible topics will include: causes of lung cancer and of asthma; variation in IQ; the Human Genome Project; and "personalized medicine." Any 200-level course in genetics, development, or neuroscience can fulfill the required prereq; interested COE or other students without this background are encouraged to directly contact Prof Sultan to request a prerequisite override. Students gain understanding of scientific inquiry and interpretation, as well as specific knowledge of a range of human health issues and behavioral capacities. Through reading recent data papers, participating actively in small-class discussions, and giving short oral presentations, students will build their skills in critical thinking about biological and environmental questions and related ethical issues, scientific scholarship, and oral communication of scientific information.

BIOL320 Everything is Everywhere: Environmental Microbiomes
In 1934, the ubiquity and diversity of microbial life led Baas Becking to hypothesize that "everything is everywhere but the environment selects." Despite being proposed over 90 years ago, this hypothesis continues to motivate cutting-edge research elucidating the adaptations that microbes have evolved in environments all over the world. In this class, we will address this hypothesis by sampling, sequencing, and analyzing local microbial communities (i.e., environmental microbiomes). Students will gain hands-on experience formulating their own scientific questions, collecting samples from the environment, extracting DNA, and assembling novel metagenomes using bioinformatics methods. Key concepts in microbial genomics, evolution, and ecology will be covered through mini-lectures, primary literature, and group discussion. The class will culminate with students authoring a draft scientific manuscript. Students should have familiarity with advanced concepts in microbiology, evolution, or ecology as evidenced by completion of any one of the required prerequisite classes.

Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **BIOL210 OR BIOL214 OR BIOL215 OR BIOL216 OR BIOL217 OR MB&B231**

BIOL322 Cell Migration in Development and Disease
What do the formation of an embryo, the healing of a wound, the surveillance of the immune system, and the invasion of metastatic cancer all have in common? Each of these processes requires the coordinated movement of cells, alone or in groups. In this course, we will learn how and why cells move, and explore what happens when they stop moving properly. We will build up our knowledge from "small" to "large," spanning biological scales from molecules to tissues. Topics will include: (1) the biomolecules of migration: cytoskeleton, focal adhesions, molecular motors; (2) cellular locomotion: protrusion, adhesion, contraction, retraction; (3) cell mechanics and force generation; (4) collective motions during morphogenesis and repair; (5) mechanisms for steering migration: chemotaxis, haptotaxis, galvanotaxis, durotaxis, etc.; (6) cancer as a disease of aberrant cell migration. Throughout the course we will emphasize model systems, experimental design, and technology and measurement techniques. We will focus on seminal works, with attention paid to how these works rippled forward in time, along with cutting edge research.

Identical With: **NS&B325**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182])**

BIOL327 Evolutionary and Ecological Bioinformatics
Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct

the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.

BIOL328 Chemical Senses
The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B328**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL332 Genomics Era Cell and Development
Each decade, technological advances shape the kinds of research questions that can be asked and solved. This past decade, sequencing technologies have delivered rich data sets analyzing genomes and transcriptomes. In this functional genomics course, we'll discuss several cases where the starting point for research was a genetic change (or several genetic changes) found in a tissue, disease, or population. We'll look at the cell and molecular research that was then done and what was learned. For case studies that relate to disease we will also consider how research discoveries shaped treatment options.

This course will greatly expand students' foundational knowledge of cell and developmental biology. Students will also develop their data interpretation and communication skills. Since we all harbor genetic changes that modify our susceptibility to a disease or condition, we will also think critically about moral and ethical issues that arise from the case studies we discuss in class.

Prereq: **BIOL208 OR BIOL210 OR BIOL212 OR BIOL218**

BIOL333 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

Identical With: **MB&B533, MB&B333, BIOL533**
Prereq: **MB&B181 OR BIOL181**

BIOL334 Shaping the Organism
We are composed of tissues and organs of distinct shapes, but how are these shapes formed? To answer this question, biologists turn to the embryos and developing tissues of model organisms to study the mechanisms that build tissues with distinctive shapes and patterns. These mechanisms include changes in the cytoskeleton and cell adhesion, changes in cell shape, changes in the forces within a cell and across a tissue, and signals that determine whether cells live or die. It turns out that most of the processes required to correctly shape embryos and tissues have also been found to function incorrectly in a variety of human diseases!

This is a part-seminar, part-laboratory course that examines tissue and pattern generation in Drosophila (the fruit fly), an accessible model organism that has been extensively used to study the conserved processes and proteins that shape tissues. First, we will examine how the Drosophila embryo is shaped and patterned. Second, we examine how the Drosophila eye is assembled and patterned. Students will set up Drosophila crosses, use popular techniques to manipulate protein expression, and dissect and image fly tissues.

BIOL337 The Origins of Bacterial Diversity
Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of

bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

BIOL340 EvoDevo: Origins of Variation in the Phenotype
This advanced seminar explores the field of evolutionary developmental biology (EvoDevo). EvoDevo seeks to understand the developmental mechanisms underlying the origin of newness in the biological world, by exploring the origin of morphological novelty, understanding how development permits (or constrains) the types of bodies that can be produced, and describing how developmental mechanisms themselves evolve. In this course, we will explore central concepts in EvoDevo, consider the role of development in evolution writ large, and connect both to case studies from the primary literature. The course format will consist of a mixture of lecture, class discussion, guest lectures by visiting evolutionary developmental biologists, and assignments focusing on both oral and written scientific communication skills.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL540**
Prereq: **BIOL218 OR BIOL214**

BIOL343 Muscle and Nerve Development
This course will examine the structure and function of muscle cells, the development of muscle cell identity, the development of motor neurons, and the interactions between nerve and muscle that lead to a functioning neuromuscular system. The primary focus will be on vertebrate model systems such as chick, mouse, and fish. We will also examine human diseases, including muscular dystrophies and other neuromuscular disorders.

BIOL344 Developmental Biology of the Nervous System
Near the top of the list of unsolved mysteries in biology is the enigma of how the nervous system constructs itself. Here is a part of our body that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. We will also discuss some disorders and dysfunctions that may happen during the neurobiology of development, such as cerebral palsy, autism, and attention-deficit hyperactivity disorder (ADHD). We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a mid-term and a final exam, and class participation.

BIOL347 Mammalian Cortical Circuits
The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Most of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B347**
Prereq: **NS&B213**

BIOL351 Neurobiology of Learning and Memory
Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.
Offering: **Host**
Grading: **A-F**

BIOL357 Sex and Gender: From Synapse to Society
From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.

Identical With: **NS&B357, FGSS357**
Prereq: **BIOL182 AND NS&B213**

BIOL358 Neurobiology of Movement
This course is designed to take a comparative approach to understanding the major motor systems of the brain and will cover the basic elements of motor "control." However, the motor system does much more than contract muscles. Even the most basic movements such as walking require whole-body coordination that must be learned and adapted to our environment. During active sensation, motor systems even modulate our sensory perceptions. Much of what we have learned about motor systems comes from animals as diverse as crickets, electric fish, and birds. This course uses a comparative approach to understand the functions various brain regions contribute to our active lives.

BIOL360 Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits
This course will examine structural and functional neuroplasticity in the nervous system. The ability of the nervous system to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic

connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and discover how adult neurogenesis is altered by the aging process, physical exercise, stress, and neuropsychiatric disorders, such as epilepsy and Alzheimer's disease. We'll also learn about potential stem cell therapies for enhancing brain repair and plasticity after brain injuries. Students will prepare for class by reading scientific papers and reviews on the topic. In class, I will introduce the topic with slide presentations, and after that we will discuss the topic based on the scientific article discussion. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a final exam, and class participation.

BIOL365 Calderwood Seminar in Public Writing: 21st-Century Biology
Twenty years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the human genome was nearing release, a year ahead of schedule. Biologists envisioned an era of unparalleled progress leading in a straight line from DNA sequence data to the precise causes of human health and behavior, and to the development of genetically modified crops that would end global hunger. As to populations in natural habitats, any evolutionary impacts of climate change were thought to be far in the future. Instead, 21st-century biologists are scrambling to understand the human-caused evolutionary changes taking place in our lifetimes. Genetically modified crops have led to unforeseen threats to the survival of their wild relatives, while constructed ecosystems provide alternative farming approaches. Molecular insights have uncovered the unexpected roles of epigenetics and the microbiome in development and disease. Tools are available to not just decode genes but to edit them, at once raising new possibilities and urgent ethical questions. How can we approach this changed biological prospect? The course invites students to engage with these broadly resonant issues by framing them for general audiences rather than in specialized scientific terms. Drawing on common content from recent journal articles, guest research lectures/Q&A sessions, and a field trip to a local kelp-shellfish farm, students will unpack these contemporary themes by explaining the basic science in their own voices while considering them in larger contexts and exploring connections to their own knowledge and experience. The course will build strengths in communication and collaboration through individual writing and revising (in a variety of formats), active peer editing, and in-class workshopping of each piece, in a collective student-led format.

BIOL365Z Writing 21st Century Science
Twenty-five years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the Human Genome was nearly complete, a year ahead of schedule. Biomedical scientists envisioned an era of unparalleled progress, leading in a straight line from the new DNA sequence data to human health and behavior. At the same time, new technologies were expected to produce genetically modified crops that would end global hunger. Any evolutionary impacts of climate change on animals and plants in nature were thought to be far in the future. Instead, molecular insights have uncovered unexpected factors in development and disease including epigenetics and the microbiome. Genetically modified crops have led to unforeseen threats to their wild relatives, while constructed ecosystems are providing completely new ways of farming. For natural populations, twenty-first century biologists are scrambling to understand the human-caused evolutionary changes taking place within our lifetimes. Tools are available not just to decode genes but to edit them, at once raising new possibilities and urgent ethical questions.

This course invites students to grow as writers by engaging with these new areas of scientific investigation in an intensive workshop format. Drawing on common content from recent journal articles, Q&A sessions with guest researchers, and a virtual field trip to an innovative farm, students will unpack contemporary biology by explaining the basic science in their own voices, while considering the science in larger societal contexts through connections to their own knowledge and experience. Through science journalism pieces, blogposts, Powerpoint slideshows and researcher profiles, students will learn to communicate cutting-edge scientific findings in clear, non-specialist language. The course will build strengths in communication and collaboration through individual writing and revising, active peer editing, and in-class workshopping of each piece, in a collective student-led format. In place of a final exam, students submit a final essay reflecting on their experience in the course.

Identical With: **ENVS365Z, STS369Z, WRCT301Z**
Prereq: **None**

BIOL368 Ecological Resilience: The Good, the Bad, and the Mindful
This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.

Identical With: **ENVS369, E&ES342**
Prereq: **[E&ES197 or BIOL197] OR [BIOL182 or MB&B182]**

BIOL373 Exploring the Brain-Body Interface: The Neuroscience of Basic Survival
Basic survival depends on the brain's regulation of fundamental behaviors and physiological pathways, such as drinking, eating, digestion, thermoregulation, breathing, and cardiovascular function. How do the brain and body communicate with each other to achieve homeostasis under different physiological states, and what goes awry in disease? How have species adapted to thrive in challenging environments, such as extreme temperatures and resource scarcity? In this advanced seminar, students will take a deep dive into the exciting research taking place at the brain-body interface. We will explore the main components of the peripheral nervous system, such as the vagus nerve and the dorsal root ganglia, that act as gatekeepers into our internal and external sensory worlds. We will also explore pathways within the central nervous system that regulate our basic bodily functions. By reading primary literature and review papers and participating in in-class discussions, students will gain deep knowledge of this burgeoning field of neuroscience. Through short written assignments and oral presentations on topics of their choosing, students will gain practical skills in scientific scholarship and communication.

Offering: **Host**
Grading: **OPT**

BIOL515 Evolution in Human-Altered Environments
Human activities have altered natural environments and, indeed, have created entirely novel ecosystems such as cities and high-input farms. This course examines how these human alterations to the environment affect the evolution and coevolution of diverse organisms. Starting with an intensive overview of microevolutionary processes, we will consider a number of contemporary scenarios: evolutionary response to environmental contaminants, exploitation of natural populations, and global climate change; evolution in urban and agricultural ecosystems; and the evolutionary impact of nonnative, invasive, and genetically modified organisms.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL215, ENVS210**
Prereq: **[BIOL182 or MB&B182]**

BIOL516 Plant-Animal Interactions
This course will explore the ecology and evolution of interactions between plants and animals, including mutualism (e.g., pollination, frugivory) and antagonism (e.g., herbivory, granivory), that are central to the functioning of ecosystems and the generation of biodiversity. The format will be seminar-style, involving reading, discussion, and student presentations of key papers on chosen topics. This course emphasizes reading and interpreting primary scientific literature and quantitative information, formulating original ideas in scientific inquiry, writing, and oral communication.
Offering: **Crosslisting**
Grading: **A-F**

BIOL518 Nature and Nurture: The Interplay of Genes and Environment
Ever since Watson and Crick proposed the DNA molecule as a heritable genetic "code," biology has emphasized genes ("nature") rather than environmental influences ("nurture") as the primary agents of biological causation. This genetic determinism continues to shape perspectives beyond research, including such critical concerns as public health and human diversity. Recent insights to environmental and inherited epigenetic factors demand that we rethink this established view to build a more integrated understanding. In this advanced seminar, we consider how genetic and environmental factors jointly determine the development and behavior of organisms, including ourselves. After an initial series of lecture/discussion sessions on foundational concepts, this seminar course will consist of student-led discussions of scientific articles on genetic and environmental causes of specific diseases, capacities, and behaviors. Subject to class choice, possible topics will include: causes of lung cancer and of asthma; variation in IQ; the Human Genome Project; and "personalized medicine." Any 200-level course in genetics, development, or neuroscience can fulfill the required prereq; interested COE or other students without this background are encouraged to directly contact Prof Sultan to request a prerequisite override. Students gain understanding of scientific inquiry and interpretation, as well as specific knowledge of a range of human health issues and behavioral capacities. Through reading recent data papers, participating actively in small-class discussions, and giving short oral presentations, students will build their skills in critical thinking about biological and environmental questions and related ethical issues, scientific scholarship, and oral communication of scientific information.
Offering: **Crosslisting**

BIOL527 Evolutionary and Ecological Bioinformatics
Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.

BIOL533 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching

theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.
Offering: **Crosslisting**
Grading: **A-F**

Identical With: **MB&B533, MB&B333, BIOL333**
Prereq: **MB&B181 OR BIOL181**

BIOL537 The Origins of Bacterial Diversity
Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

BIOL540 EvoDevo: Origins of Variation in the Phenotype
This advanced seminar explores the field of evolutionary developmental biology (EvoDevo). EvoDevo seeks to understand the developmental mechanisms underlying the origin of newness in the biological world, by exploring the origin of morphological novelty, understanding how development permits (or constrains) the types of bodies that can be produced, and describing how developmental mechanisms themselves evolve. In this course, we will explore central concepts in EvoDevo, consider the role of development in evolution writ large, and connect both to case studies from the primary literature. The course format will consist of a mixture of lecture, class discussion, guest lectures by visiting evolutionary developmental biologists, and assignments focusing on both oral and written scientific communication skills.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL340**
Prereq: **BIOL218 OR BIOL214**

BIOL542 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL242, E&ES270, E&ES570, ENVS242**

Identical With: **BIOL244, NS&B244**
Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

BIOL545 Developmental Neurobiology
Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders

resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

BIOL557 Advanced Research Seminars in Biology
This course focuses on the specific research projects of individual graduate students in the Department of Biology, and it comprises student presentations and discussion including the department faculty, graduate students and post doctoral fellows. The course offers a forum for presenting new results and exploring new ideas, as well as for providing researchers with feedback and suggestions for solving methodological problems. It also provides an opportunity for students to become familiar with the wide range of biological research taking place in the department.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

BIOL567 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding, diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Crosslisting**

Gen Ed Area: **None**
Prereq: **None**

BIOL574 Concept Building and Pedagogical Development
The course will help course assistants and teaching assistants working with BIOL 182 (Principles of Biology II lecture) prepare to lead weekly problem-solving sessions. Students will review the content and core concepts of each problem-solving session, develop strategies to use in assisting students with the Friday problems, review the progress of the peer mentored study sessions, and discuss pedagogical best practices.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL590 Plant Form and Diversity
The course begins with an overview of plant evolutionary history, then covers the basic structure and function of the plant body, the plant life cycle in nature, including interactions with animals, and ecological diversity of plants in contrasting habitats. Special events include a field trip to the Smith College Botanic Garden, two hands-on days for working with living specimens, and a special guest lecture by a local plant biologist.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL290, ENVS286**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL599 Cellular Neurophysiology
This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL245, NS&B245**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOLOGY MAJOR

MAJOR DESCRIPTION

The major in Biology provides students with the skills to perform scientific inquiry using current experimental approaches as they pursue a deeper understanding of the interconnections among living things. We study how recent advances in the biological sciences are driving extraordinary new discoveries and innovations in areas such as evolution, ecology, cell biology, genetics/genomics, and neuroscience. Biological research provides essential information as we address urgent challenges of biodiversity conservation, global climate change, epidemiology, and human health and well-being. Increasingly, biological issues are playing a fundamental role in social and medical ethics, journalism, and public policy.

Biology students are curious, keen observers who seek answers about the natural world. Coursework requires analytical and critical thinking skills and a sense of imagination. Students are encouraged to nurture abilities to understand complex processes, follow detailed protocols, analyze data, and communicate about their research. As biology deals with living organisms and potentially sensitive research, the model biology student should possess strong ethics, respect for life, and a commitment to responsible practices.

A major in Biology can form the foundation of a career in research, medicine, conservation, public health, bioethics, sustainable resource use, and many other areas.

ADMISSION TO THE MAJOR

Students who begin the Biology Major their first year are able to take maximum advantage of upper-level biology courses and research opportunities in later years. The major can successfully be completed if begun during sophomore year. Biology students may consider taking a semester abroad.

The required introductory courses (BIOL181/BIOL191 and BIOL182/BIOL192) do not have prerequisites or corequisites, but it is recommended to have some chemistry background or to take General Chemistry (CHEM141/CHEM142 or CHEM145) concurrently.

MAJOR REQUIREMENTS

The Biology Major's required course of study includes:

- Two introductory courses with their associated labs:
  - BIOL181 with lab BIOL191 is offered every fall semester.
  - BIOL182 with lab BIOL192 is offered every spring.
- Six or more elective biology courses at the 200 and 300 levels, which must include:
  - One mid-level cell/molecular course: MB&B208, BIOL210, BIOL212, or BIOL218
  - One mid-level organismic/population course: NS&B213/BIOL213, BIOL214, BIOL215, BIOL216, or BIOL217
- Required chemistry courses from the options below:
  - For students of the Class of 2029 and later:
    - General Chemistry: CHEM141 and CHEM142 OR
    - Honors Chemistry: CHEM145 OR
    - One semester of Organic Chemistry: CHEM251 or CHEM252
  - For students of the Class of 2028 and earlier:
    - General Chemistry: CHEM141 and CHEM142 OR
    - Honors Chemistry: CHEM143 and CHEM144
- Required Science Outside of Biology: Any three additional credits of related courses from at least two different departments. These are courses that address approaches and methodologies applied in biology and include:
  - Organic Chemistry: CHEM251, CHEM252
  - Physics: PHYS111, PHYS112, PHYS113, or PHYS116 and PHYS207

- Mathematics: MATH117 or higher
- Statistics: MATH132, ECON300, PSYC200
- Quantitative Analysis Center: QAC201, QAC231
- Computer Science: BIOL265, BIOL266 (0.5 credit), BIOL271 (0.5 credit), COMP112, COMP114, COMP115, COMP211, or a course higher than COMP211
- Earth and Environmental Science: BIOL242/E&ES270, E&ES280, E&ES380
- Archaeology: ARCP350

- One capstone experience

Important Notes for All Majors:

- No more than three of the mid-level courses listed above may be counted towards the six advanced elective requirements.
- At least three elective courses (200-level and above) that are counted toward the Biology major cannot be simultaneously used to fulfill any other major.
- Organic Chemistry (CHEM251 and CHEM252) can only be used to complete one Biology requirement, and can't also count towards the "Required Science Outside of Biology" requirement if used to complete the required Chemistry courses.
- Biology majors are allowed to apply at most one elective course or one cognate course taken credit/unsatisfactory toward fulfilling the major requirements. However, this is discouraged because good performance in major courses is an important aspect of a student's transcript.
- A strong background in chemistry is recommended for students planning to enter graduate or medical school. Most medical and health-related graduate programs require two years of college-level chemistry, including laboratory components and a biochemistry course.
- Students planning to attend medical, dental, or other health professions graduate school should note that admission requires a year each of introductory biology, physics, and math (such as calculus or statistics) **and** two years of chemistry (general and organic), including any laboratory components.

Important Requirements for Double Majors:

- At least three elective courses (200-level and above) that are counted toward the Biology major cannot be simultaneously used to fulfill any other major.
- For double-major in Biology and Neuroscience and Behavior, NS&B213/BIOL213 cannot count toward the six electives required for the Biology major; however, NS&B213/BIOL213 will fulfill the Column 2 breadth requirement.
- Two Statistics courses, even from different departments, cannot both be counted as cognates.
- Students cannot use E&ES280 if they use QAC231 .

Electives may be chosen from among the following courses at the 200, 300, or 500 levels. See WesMaps for current course offerings as not all courses below are offered every year. The courses are grouped thematically for your convenience only.

CELL AND DEVELOPMENTAL BIOLOGY

Code	Title	Hours
BIOL/MB&B223	The Molecular Basis of Cancer	1
BIOL/MB&B228	Medical Biochemistry	1
BIOL/MB&B232	Immunology	1
BIOL/MB&B237	Signal Transduction	1
BIOL241	Cell-Cell Interactions in Development	1
BIOL/IDEA267	Engineering Biology: Cells and Tissues	1
BIOL295	Physiology and Cell Biology of Cancer	1
BIOL317	Genes and Mechanisms in Vertebrate Sex Determination	1
BIOL322	Cell Migration in Development and Disease	1
BIOL/NS&B325	Stem Cells: Basic Biology to Clinical Application	1
BIOL332	Genomics Era Cell and Development	1
BIOL334	Shaping the Organism	1
BIOL340	EvoDevo: Origins of Variation in the Phenotype	1
BIOL/NS&B343	Muscle and Nerve Development	1
BIOL/NS&B345	Developmental Neurobiology	1
MB&B375	The Cell-Division Cycle and Cancer	1

EVOLUTION, ECOLOGY, AND CONSERVATION BIOLOGY

Code	Title	Hours
BIOL/ENVS220	Conservation Biology	1
BIOL/ENVS226/ E&ES240	Invasive Species: Biology, Policy, and Management	1
BIOL/ENVS233/ E&ES234	Geobiology	1
BIOL235	Comparative Vertebrate Anatomy	1.5
BIOL236	Comparative Animal Physiology	1
BIOL290/ENVS286	Plant Form and Diversity	1
BIOL308	Small Creatures, Big Impact: Vectors of Human Disease	1
BIOL/E&ES312/ ENVS311	Global Change Biogeography	1
BIOL316	Plant-Animal Interactions	1
BIOL318	Nature and Nurture: The Interplay of Genes and Environment	1
BIOL320	Everything is Everywhere: Environmental Microbiomes	1
BIOL/COMP/CIS327	Evolutionary and Ecological Bioinformatics	1
BIOL/ENVS337	The Origins of Bacterial Diversity	0.5
BIOL346/E&ES238/ ENVS340	The Forest Ecosystem	1
BIOL365	Calderwood Seminar in Public Writing: 21st-Century Biology	1
ARCP/E&ES350/ ENVS348	Animals in Archaeology	1
BIOL368/ENVS369/ E&ES342	Ecological Resilience: The Good, the Bad, and the Mindful	1

GENETICS, GENOMICS, AND BIOINFORMATICS

Code	Title	Hours
MB&B/BIOL231	Microbiology	1
BIOL242	Quantitative Methods for the Biological and Environmental Sciences	1
BIOL/NS&B257	Neurogenetics	1
BIOL/CIS263	Demystifying Data: Introductory Data Analysis and Modeling	1
BIOL/MB&B/ CIS265/COMP113	Bioinformatics Programming	1
BIOL/CIS270	Systems Biology with Programming	1
MB&B306	Epigenetics	1
BIOL/CIS310/ MB&B311	Genomics Analysis	1
BIOL/CIS/COMP327	Evolutionary and Ecological Bioinformatics	1
MB&B/BIOL333	Gene Regulation	1
MB&B394	Advanced Laboratory in Molecular Biology and Genetics	1

NEUROBIOLOGY AND BEHAVIOR

Code	Title	Hours
BIOL/NS&B224	Hormones, Brain, and Behavior	1
BIOL/NS&B/ PSYC239	Functional Anatomy of the Human Brain	1
NS&B/BIOL243	Neurohistology	1
BIOL/NS&B244	Neuropharmacology	1
BIOL/NS&B245	Cellular Neurophysiology	1
BIOL/NS&B247	Laboratory in Neurophysiology	1
BIOL/NS&B250	Laboratory in Cellular and Behavioral Neurobiology	1
BIOL/NS&B251	Laboratory in Basic Practices in Neuroscience	1
BIOL/NS&B252	Cell Biology of the Neuron	1
BIOL/NS&B254	Comparative Animal Behavior	1
BIOL/NS&B299	Waves, Brains, and Music	1
NS&B302	Neurobiology of Aging	1
NS&B304	Glia: Not just neuronal glue!	1
NS&B/BIOL328	Chemical Senses	1
BIOL/NS&B345	Developmental Neurobiology	1
BIOL/NS&B347	Mammalian Cortical Circuits	1
BIOL/NS&B351	Neurobiology of Learning and Memory	1
NS&B/BIOL/ PSYC353	Neurobiology of Neurological Disorders	1
BIOL/NS&B/ PSYC356	Neurodevelopmental Disorders	1
BIOL/NS&B/ FGSS357	Sex and Gender: From Synapse to Society	1
BIOL/NS&B358	Neurobiology of Movement	1
NS&B/BIOL360	Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits	1
BIOL/NS&B373	Exploring the Brain-Body Interface: The Neuroscience of Basic Survival	1

ADDITIONAL COURSES THAT CAN BE CREDITED TO THE ELECTIVE REQUIREMENT

The following courses may be applied toward fulfilling the mid-level elective requirement for the Biology major:

Code	Title	Hours
ARCP/ENVS/SISP/ IDEA203/ANTH212	The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology	1
ARCP/ENVS/ANTH/ E&ES257	Environmental Archaeology	1
CHEM/NS&B323	Biochemistry of Neurodegenerative Disease	1
CHEM/MB&B325	Introduction to Biomolecular Structure	1
CHEM/MB&B383	Biochemistry	1

Additional notes on fulfilling the Biology major:

- Cross-listed courses that are included on the list above are automatically credited to the biology major.
- Courses in the BIOL 400 series (such as research tutorials) contribute toward graduation but do not count toward the major, although they can be used to fulfill the capstone requirement (see below).

COURSES FOR NON-MAJORS

The following courses do not have prerequisites and, as such, are appropriate for non-majors.

Code	Title	Hours
BIOL106	The Biology of Sex	1
BIOL140	Classic Studies in Animal Behavior	1
BIOL146	Primate Behavior: The Real Monkey Business	1
BIOL173	Global Change and Infectious Disease	1
BIOL/MB&B181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
BIOL/MB&B182	Principles of Biology II	1
BIOL/ENVS/ E&ES197	Introduction to Environmental Studies	1

STUDENT LEARNING GOALS

Biology majors acquire the following knowledge and competencies:

- A broad and integrative understanding of the theory and practice of biology
- Critical and quantitative thinking
- Creative problem solving
- Scientific reasoning
- Ethics of biological research
- Understanding of the role of biology in society and sustainability practices
- Designing and conducting original research
- Written and oral communication about scientific concepts and research findings
- Comprehension and critical interpretation of primary scientific literature

Students will use their biological knowledge and skills to become effective, scientifically-informed citizens and professionals.

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions and collaborative group work, and presentations. Written exams, peer review, and self-assessment will also evaluate their class performance.

ADVANCED PLACEMENT

While placing out of Intro Biology lecture courses is discouraged, students who scored a 4 or 5 on the AP Biology exam may be eligible to place out of either BIOL181 or BIOL182. If you are interested in placing out, you are required to consult with an instructor from the relevant course.

Students interested in placing out of MB&B181, which is offered every fall semester, contact Professor Cori Anderson (canderson05@wesleyan.edu). This place out exam must be taken during the first week of the student's first semester at Wesleyan.

Students interested in placing out of BIOL 182, which is offered every spring semester, contact Professor Fred Cohan (fcohan@wesleyan.edu) and Professor Laverne Melón (lmelon@wesleyan.edu).

There is no process to place out of BIOL191 and BIOL192, the Intro Biology lab courses. BIOL191 is offered every fall semester. BIOL192 is offered every spring semester. Students who place out of either BIOL181 or BIOL182 must still take the corresponding lab course, especially those who plan on majoring in Biology, MB&B, or NS&B or those who are intending to continue with a health professions graduate program (ex: medical school, dental school, etc.).

PRIZES

Dr. Neil Clendeninn Prize – Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed their sophomore year and should exemplify qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

The Peirce Prize – Awarded in successive years for excellence in biology, chemistry, and geology.

TRANSFER CREDIT

Up to two outside credits for biology courses may also be applied from another institution (during a study abroad program, for example). Prior permission must be obtained from the departmental liaison, Professor Michael Singer (msinger@wesleyan.edu), to ensure creditability of specific courses from other institutions.

RELATED PROGRAMS OR CERTIFICATES

Environmental Studies Minor

The Environmental Studies (ENVS) program is interdisciplinary and offers both a minor and a linked major. The ENVS-linked major is a secondary major and requires a student also to have a primary major in another department, program, or college. ENVS majors write a senior thesis or essay in environmental studies that is mentored by a professor in another department, program, or college (e.g., biology). There is also an opportunity to earn an ENVS minor, which does not require a senior thesis or essay.

Informatics and Modeling Minor

The Integrative Genomic Science pathway within this minor will be of particular interest for life science majors. See wesleyan.edu/imcp/igs.html.

Neuroscience and Behavior Program

Several faculty members in the Biology and Psychology Departments also participate in the Neuroscience and Behavior Program that, at the undergraduate level, constitutes a separate major. Information about that program can be found at wesleyan.edu/nsb.

BA/MA PROGRAM

The BA/MA program provides an attractive option for life science majors to gain graduate level research experience. Students are advised to begin research by their junior year if they intend to pursue the BA/MA in biology. Admission is competitive and based on GPA, faculty recommendations, and research experience.

ADDITIONAL INFORMATION

The BIOL/MB&B 338/339 seminar series features distinguished scientists from other institutions who present lectures on their research findings. These seminars aim to relate material studied in courses, tutorials, and research to current scientific activity. These seminars are usually held on Wednesday at noon and are open to all University community members. Undergraduates are especially welcome.

HONORS

To be considered for departmental honors, a student must:

- Be a biology major and be recommended by a faculty member.
- Have at least a B average (GPA of 85 or above) in courses credited to the major.
- Submit a thesis based on laboratory research, computational research, or mathematical modeling. The thesis is carried out under the supervision of a department faculty member.

CAPSTONE EXPERIENCE

The Capstone Experience is required for Biology majors and students must complete at least one of the following:

- One semester of a 300-level seminar, lab, or field course
  - One semester of BIOL338 or BIOL339 may be used to fulfill this requirement
- One semester of a 500-level journal club: BIOL505, BIOL506, BIOL507, BIOL508, BIOL509, BIOL510 , BIOL547 or BIOL548
- Two semesters of a Senior Thesis tutorial

- One semester of a 400-level research tutorial (BIOL423 or BIOL424)
- A summer research internship in biology or a related life sciences area

DOCTOR OF PHILOSOPHY IN BIOLOGY

The Biology Department offers a broad range of courses that emphasize scientific inquiry and current experimental approaches. These research areas provide essential information as we address the urgent challenges of biodiversity conservation, global climate change, epidemiology, and human health and well-being. Students consider real-world issues at the heart of how we understand ourselves as human beings in relation to other living things.

Students pursuing the Doctor of Philosophy in Biology are expected to study related biological fields through an individual program of courses, seminars, and readings, primarily emphasizing an intensive research experience culminating in a thesis. Graduate students design their own program of courses to complement and strengthen their previous background knowledge. The low student-faculty ratio ensures close collaboration between students and their dissertation advisors. Faculty and invited outside speakers offer regular research seminars, and graduate students present their work as it progresses at a biweekly departmental colloquium. All students are required to participate in one of the#journal clubs, which meet weekly to discuss Ecology/Evolution, Cell/Development/Genetics, Neuroscience/Behavior, or Environmental Biology. Additional courses and lectures of interest offered by other departments are also available to biology students.

All PhD students must teach for three semesters (two in the introductory series), under faculty training and supervision. Teaching assistants are involved in preparing materials for and assisting in laboratory courses and in evaluating student work. Some classroom teaching opportunities may be offered in the later years of the PhD program.

COURSES

The PhD is a research degree demanding rigorous scholarly training and creativity; the result is an original contribution to the candidate's field. The student and the Pre-Candidacy Committee will work out a program of study for the first two years at the time of matriculation. This program will take into account the student's proposed field of interest and prior background in biology and related sciences. No specific courses are required, but, rather, a subject-matter requirement is used to ensure a broad background. Before taking the qualifying examination, all students must have at least one substantive course above the introductory level (at Wesleyan or elsewhere) in each of five subject areas:

- Genetics/Genomics/Bioinformatics
- Evolution/Ecology
- Physiology/Neurobiology/Behavior
- Cell biology/Developmental Biology
- Biochemistry/Molecular Biology

The adequacy of courses that have been taken at other institutions will be evaluated by the Pre-Candidacy Committee through its meeting with the student. Students whose focus is bioinformatics may substitute two upper-level courses in computer science for one of these five areas.

All PhD students must take a minimum of two 1 credit advanced (**300** or **500**) lecture, lab, or seminar course approved by the First Year Advisory committee. At least one of these should be taken during the student's first year. Departmental and interdepartmental seminars and journal clubs are included in the program, and additional individual reading in particular areas may also be required. First-year students are exposed to research in the department through a combination of lab rotations and departmental research presentations. Toward the end of each semester of the first two years, each student will meet with the Pre-Candidacy Committee to review progress and to discuss any modification of the proposed program.

All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled in the university.

Working with the Pre-Candidacy Committee, graduate students design their own program of courses to complement and strengthen their previous background knowledge. All students are required to participate in one of the journal clubs, during which recent journal articles are presented and discussed. Four journal clubs meet once a week:

- Ecology/Evolution
- Cell/Development/Genetics
- Neuroscience/Behavior
- Environmental Biology

PROGRESS AND QUALIFYING EXAMS

A PhD student's career in the Department of Biology at Wesleyan University is divided into three phases:

1. Preparation, rotations, and qualifier exam

Students are encouraged to do at least one lab rotation outside of their thesis lab. After settling into a lab, students should complete their qualifying examination before beginning their fifth semester. The examination is designed to test the student's knowledge of biology and ability to think critically. It includes a written research proposal, followed by an oral examination to discuss the proposal and evaluate the student's breadth in biology. The examination will be administered by three faculty members of the department (or associated departments and including the advisor), chosen by the student and their research advisor. The examining committee will include the research advisor and should include one member whose research field is clearly outside the student's area of special interest.

2. Active PhD thesis research

Within a year of passing the qualifier examination the student should meet with a thesis committee selected in consultation with their advisor to discuss research progress and proposed research. The student should submit to the committee an updated thesis proposal. The thesis committee will include the thesis advisor and three additional members; at least two of the latter three must be a member of the biology department faculty. The third member may be from another Wesleyan department or another institution if appropriate. The committee will meet with the student twice a year thereafter, or more frequently if it is appropriate.

3. Preparation of the PhD thesis and defense

The thesis committee determines when sufficient experimental work has been completed and must approve the final written document. After the committees determination, a public thesis defense will be scheduled.

TEACHING

A minimum of three semesters as a teaching assistant is required.

RESEARCH

PhD students start their research experience in their first semester, often by completing a rotation outside of their thesis lab. Rotations are designed to provide complementing experiences to prepare students for their thesis research. Current research in the department includes:

- **Aaron Lab—**epilepsy, the hippocampus, and the cortex
- **Chernoff Lab—**conservation, evolution, and genetics of fish
- **Cohan Lab—**evolutionary genetics and speciation of bacteria
- **Coolon Lab—**ecological and evolutionary functional genomics
- **Feng Lab—**behavioral neurobiology of hibernation, with thirteen-lined ground squirrels as a model
- **Johnson Lab—**regulation of cell movement during development
- **Melón Lab—**Neurobiological mechanism that drive sex differences in the development of disorders associated with alcohol exposure
- **Mitchel Lab**—emergent phenomena in biological systems, mechanobiology, epithelial cell biology
- **O'Neil Lab** *(Biology Dept. Affiliate)*—protein aggregation in neurodegenerative disease
- **Singer Lab—**evolution and ecology of plant-animal interactions
- **Sultan Lab—**evolutionary ecology of phenotypic plasticity in plants
- **Tezak Lab—**Incubation environment influence of cell fate decisions and organ development; gonadal sex determination in reptiles
- **Weir Lab—**molecular genetics; bioinformatics

All PhD students present their research in bi-monthly seminars (BIOL557) attended by all members of the department, to encourage students to become fluent and comfortable with their presentation skills.

DISSERTATION AND DEFENSE

The most important requirement is a PhD thesis, an original contribution to biology that merits publication. The candidate will receive advice and guidance from the thesis director but must demonstrate both originality and scientific competence. Normally, the candidate will choose a thesis topic during the second year of graduate work in consultation with appropriate faculty. The thesis committee determines when sufficient experimental work has been completed and must approve the final written document. At this point a public defense will be scheduled after which the documents will be signed if the candidate has fulfilled all the requirements.

ADDITIONAL INFORMATION

BA/MA PROGRAM

This program provides an attractive option for life science majors to substantially enrich their research and course background and to earn an advanced degree while at Wesleyan. Students are encouraged to begin research by their sophomore year if they intend to pursue the BA/MA in biology. Admission is competitive and based on GPA, faculty recommendations, and research experience. For information about the BA/MA program: wesleyan.edu/grad/degree-programs/bama.html (http://www.wesleyan.edu/grad/degree-programs/bama.html)]

All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled in the University.

For additional information, please visit wesleyan.edu/bio/graduate (https://wesleyan.edu/bio/graduate).

CENTER FOR JEWISH STUDIES

The Center for Jewish Studies offers interdisciplinary courses in Jewish and Israel studies. All courses (required and elective) are counted toward the Minor in Jewish and Israel Studies. The Center for Jewish Studies courses and workshops are taught by its core and affiliated faculty, as well as by distinguished visitors and scholars including film directors and internationally acclaimed writers and artists. The Center for Jewish Studies offers an innovative Hebrew program based on a unique model of incorporating language skills with cultural events, and all Hebrew courses are counted toward the Minor. In addition, the Center for Jewish Studies offers Wesleyan and the general community rich and innovative events and series linked to other departments, programs, and colleges at the University. Among them, the annual *Contemporary Israeli Voices* series in the fall, the annual *Ring Family Wesleyan University Israeli Film Festival* in the spring, the annual Samuel and Dorothy Frankel Memorial Lecture, and the annual Jeremy Zwelling Lecture. To be engaged with the larger Wesleyan community, the Center for Jewish Studies sponsors WESeminars, presented by its faculty.

CENTER FOR JEWISH STUDIES

CJST114F Netflix and Shul: Jews on TV (FYS)
Jews have always been an inseparable part of the small screen--first, mainly (but not only) as writers and producers, and gradually as characters and protagonists. Today, American television is more Jewish than ever. Jews changed TV. But did it also change them? This course will study the long history of Jews and Jewishness in American Television. Each class will revolve around one episode of a show and discuss how it reflects on different aspects of Jewish life--Jewish humor, Jewish crime, Jewish Upward mobility, Jewish guilt, the Jewish mother, Jewishness and whiteness, antisemitism, and more. In keeping with the Jewish tradition, we will obviously ask many questions, including the most complex one: What does "Jewish" mean?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-CJST**
Prereq: **None**

CJST150F Four Bar Mitzvahs and a Funeral: Being Young and Jewish in America (FYS)
How is the American Jewish experience viewed from the perspective of Jewish children and young adults? This course will discuss depictions of Jewish coming-of-age in American popular culture. We will examine various age groups--from elementary school to college; and through various art forms--literature, film, and television ("Are You There God? It's Me Margaret," "The Plot Against

America," "An American Tail," "Wet Hot American Summer," "A Serious Man," "Superbad," "Booksmart," "Glee," "The O.C.," "Big Mouth," "Never Have I Ever," among others). Analyzing these works together will illuminate different facets of Jewish American life including immigration, assimilation, education, tradition, family, anti-Semitism, and more. They will also allow us to broach more universal questions surrounding representation, identity, and the complex relationship between popular culture and society.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-CJST**
Prereq: **None**

CJST151F What is Religion? JewBus, Museums, and the First Amendment (FYS)
Why did the FBI assault the Branch Davidians' compound near Waco, Texas, thinking it was a cult, while those inside viewed the government as serving the anti-Christ? Can one be Buddhist and Jewish at the same time? Are museums religious spaces? Does secularism protect religion from the government or the government from religion? This class will introduce you to the ways in which we study religions by reading critical case studies, including those about Muslims debating the hijab, the treatment of sacred objects in museums, and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI151F**
Prereq: **None**

CJST165F Anne Frank's Diary and its Legacy (FYS)
Since its publication, "The Diary of Anne Frank" has become one of the bestselling non-fiction books of all time. Moreover, it has inspired numerous adaptations in different forms: films, stage plays, TV series, graphic novels and more. In this course, we will closely read the original diary, and engage with various incarnations, asking: Why did the world iconize Anne Frank, and is it a lionization or an appropriation? What does this global phenomenon tell us about the legacy of the Holocaust and of that of Anne Frank, and, finally, what does Anne Frank's diary tell us about the world?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-CJST**
Prereq: **None**

CJST175F Constructing the Human: Humans and Animals in the Hebrew Bible (FYS)
How do we define "humanness" and what assumptions do we make about our own distinctions between "humans" and "animals" when we define humanness? This course will look at the process of constructing the human category in the ancient world and Hebrew Bible and then compare that process to our own modern conceptions of humanness. In what ways are they similar and in what ways are they different? How can ancient examples of the human category inform our own ethical understandings of what it means to be human?
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI175F**
Prereq: **None**

CJST202 Constructing the Human: Humans and Animals in the Hebrew Bible
How do we define "humanness" and what assumptions do we make about our own distinctions between "humans" and "animals" through this definition? This course will look at the process of constructing the human category in the ancient world and Hebrew Bible and then compare that process to our own modern conceptions of humanness. In what ways are they similar and in what ways are they different? How can ancient examples of the human category inform our own ethical understandings of what it means to be human?

CJST203 Jews & Judaism: Race, Religion, Culture
What is a Jew? Are Jews white? Must a Jew believe in God? What is at stake when defining someone as a Jew? Using sources ranging from the Hebrew Bible to contemporary films, this course examines various facets of Jewish life, paying special attention to contesting definitions of Jewishness as race, religion, and culture. Building on a chronological discussion of Jewish history, we will ask theoretical questions such as the relation between gender and biblical interpretation, the relevance of religious law in contemporary society, and the challenges of diasporic thinking to national sovereignty.

CJST214 Refugees & Exiles: Religion in the Diaspora
Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. What does it mean to be forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? In our search for answers, we will examine a variety of case studies including the contemporary refugee crises in the Middle East, the border between the United States and Mexico, the black transatlantic, and the destruction of the temple in the Hebrew Bible. This course is a project-based Service Learning in which all assignments are geared toward the final project, in which each student will produce a radio show based on an analysis of a refugee crisis of their choice. These shows will air on WESU 88.1 FM Middletown. To learn more and listen to previous seasons of last year's radio shows visit https://reli213.site.wesleyan.edu

CJST216 Jesus Through Jewish Eyes
In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

CJST217 The Cinema of Steven Spielberg
Last year, Steven Spielberg released his most personal film, The Fabelmans, cementing his position as the most prolific Jewish-American filmmaker of our time. This course will study Spielberg's illustrious career and how he changed American filmmaking and American society. In light of his new biographical film, it will also examine how his Jewishness informed his work: sometimes as a text, in films such as Schindler's List and Munich, and sometimes as subtext, in films such as E.T. and West Side Story. This rich body of work will allow us to explore the intersection of many different subjects: film and history, tradition and modernity, childhood and adulthood, Jewishness and otherness, and how a nice Jewish boy became a national treasure.

CJST218 Netflix and Shul: Jews on TV
Jews have always been an inseparable part of the small screen--first, mainly (but not only) as writers and producers, and gradually as characters and protagonists. Today, American television is more Jewish than ever. Jews changed TV. But did it also change them? This course will study the long history of Jews and Jewishness in American Television--from The Goldbergs in the 40's through Seinfeld and Mad Men in the 90's and 00's to The Marvelous Mrs. Maisel and Russian Doll today. Each class will revolve around one episode of a show and discuss how it reflects on different aspects of Jewish life--Jewish humor, Jewish crime, Jewish Upward mobility, Jewish guilt, the Jewish mother, Jewishness and whiteness, antisemitism and more. In keeping with the Jewish tradition, we will obviously ask many questions, including the most complex one--What does "Jewish" mean?

CJST219 The Environment, The Bible, and Moral Debate
The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular "biblical" view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

CJST221 Jewish Identity in the Ancient World
Jewish Identity is not monolithic but instead, wonderfully, varied, and diverse. The Hebrew Bible gives a multitude of accounts of how many different identities within the course of history came to be and through analyzing these accounts, this course will aim to answer the questions of: What did Jewish Identity look like in the time period of ancient Israel? What variety of identities can be seen in the Hebrew Bible itself? What key historical events aided in the development of different identities in the ancient world? What was the process of identity formation in the ancient world? Is that process of identity formation different than how one might construct identity today? Is it right to even speak of Jewish Identity in 600-700 years in which the Hebrew Bible was written?

CJST222 Identity and Jewish Literature: Sexuality, Race, and Gender
What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

CJST223 Israeli Women Filmmakers and the Israeli Society
Historically, women filmmakers account for only around seven percent of the films produced in Israel, reflecting the marginalization of the female voice in the local society, culture, and discourse. However, in the last decade, they have finally moved to the center stage to create some of our time's most successful and essential Israeli films. This course will discuss Israeli women's cinema from artistic and historical vantage points. Students will engage in critical thinking and use film theory and terminology to analyze the featured films, and to contextualize them in the broader context of Israeli history. This analysis will reveal recent shifts in Israeli society, including how women find their place in the army, how they fight the patriarchal religious institutions, and how they turn the Israeli His-tory into the Israeli Her-story. Furthermore, the course will touch on more universal questions on narrative structure, representation, and the male and the female gaze.

CJST224 The Holocaust in Contemporary Popular Culture
How to describe the indescribable and to speak the unspeakable? Long after the end of World War II, filmmakers still grapple with these questions, and their answers vary ethically and aesthetically. This course will discuss depictions of the Holocaust in contemporary popular culture. We will touch on graphic novels, TV sketches, and social media, but mainly focus on film. While the time frame will be limited to mainly the last two decades, we will explore a vast range of texts including: Hollywood fare and East European art-house movies; gritty dramas and dark comedies; reenactments of real-life events and alternative history. From Hipster Hitler to the Jojo Rabbit, from "Inglorious Basterds" to "Son of Saul," what all these examples share is an artistic and thematic audacity. We will examine how they try to propose new and unsettling answers to old but ever-vital questions: How did the Holocaust happen and might it happen again?

CJST225 Angels in America, Devils Wearing Prada - How Jews Became (Almost) Mainstream
For many years, the mantra in American showbiz was "write Yiddish, cast British." The writers were Jewish, as were the humor and sensibilities of their work, yet the characters were often depicted as WASPs. This dynamic began to shift between the late 1980s and early 2000s, marking a transformative period for Jewish representation in American media. Adam Sandler performed "The Chanukah Song" on SNL; Seinfeld became the first sitcom with a Jewish lead character to top the Nielsen ratings; the Jewish American epic Angels in America won a Tony Award before being adapted into an Emmy-winning limited series; and a Jewish scientist helped save the world in the blockbuster Independence Day. Jewish protagonists and themes became increasingly prominent in other iconic shows and films of the era. However, this transition was neither smooth nor absolute. For example, network executives pushed Seinfeld to minimize the Jewishness of all its characters except the lead; Friends obscured the Jewish identity of its protagonists; and the best-selling novel The Devil Wears Prada lost its Jewish elements when adapted for the screen. This course examines how and why Jews became mainstream, cool, and "sexy"--but only to a certain extent--while exploring the limits of Jewish acceptance in American culture. We will analyze how media representations grapple with themes such as assimilation, interfaith marriage, faith, and guilt. These discussions will also serve as a basis for addressing broader issues of representation and stereotyping. Most importantly, the course will center on two critical questions: What does it mean to be Jewish? And what does it mean to be Jewish in America?

CJST230 Antisemitism in Popular Culture
Antisemitism is a complex subject. This course employs popular culture to study it. We will explore a wide range of texts from different periods. Some promote Antisemitism, and some challenge or combat it. We will examine how bigots use the media to spread hate, how Jews and their peers use it to challenge jew hatred, and how popular culture sometimes subconsciously perpetuates harmful stereotypes. We will discuss how humor and satire are utilized to tackle serious issues. We will also see how popular culture views Antisemitism in the broader context of White supremacy and violence directed at other minority groups. Most importantly, we will ask -- what can we learn from the media on Antisemitism, and what can Antisemitism teach us about the media?

CJST231 The Holocaust in Art-House Cinema
Theodor Adorno famously wrote in 1949 that "writing poetry after Auschwitz is barbaric," but what about making movies? Some prominent filmmakers agreed with Adorno and refused to make films about the Holocaust on the grounds that it was an immoral and impossible task. Other directors turned the tragedy into commercial entertainment, didactic sermons, or action-filled blockbusters. This course will focus on the filmmakers who sought a middle ground. They argued that the Holocaust is a story that cannot but must be told, and they experimented with the medium of film to find ways to tell it without exploiting its horrors. Throughout the semester, we will watch classics like Night and Fog, recent films like Zone of Interest and The Brutalist, iconic epics like Shoah and Come and See, and lesser-known films. Through this challenging body of work, we will inquire if and how it is possible to describe the indescribable and speak the unspeakable. We will examine what films can teach us about the Holocaust and what the Holocaust can teach us about filmmaking. Finally, we will question whether these films are truly distinct from Hollywood's war and genocide narratives -- are they also not manipulative? Are they also not barbaric?

CJST232 Rereading the Bible After the Holocaust
The Holocaust profoundly challenged traditional Jewish theological and interpretive frameworks, compelling Jewish thinkers to revisit and reinterpret biblical texts. This course examines the reinterpretation of key Hebrew Bible passages in light of post-Holocaust Jewish thought, focusing on themes of suffering, justice, covenant, and the nature of God. We will explore biblical texts alongside the writings of seminal Jewish thinkers, including Emil Fackenheim, Elie Wiesel, and others, to understand how the Holocaust reshaped Jewish approaches to scripture and theology.

CJST233F Holocaust Remembrance in Germany: The Third Generation (FYS)
Remembering the Nazi past is a fundamental aspect of postwar German culture. In this course, we will trace the Holocaust's aftermath in contemporary German literature and thought. We will pay close attention to the socio-cultural and historical-political changes in attempts to glean new meanings from a past that is both omnipresent and highly evanescent. It will be our particular concern to encounter versions of Jewish identity and attempts to prescribe different narratives. We will focus especially on contrasting the creative works of the immediate postwar period and "the third generation." These contemporary writers explore a historical trauma that has become an integral part of specific Jewish-German identity. At the same time, their temporal and personal distance to the actual events necessitates new imaginative approaches to the past. Careful readings of literary, theoretical, journalistic, and historical texts, as well as personal discussions will enable us to critically think about the challenges and limits of how to write about the Holocaust 70 years after it occurred, and how the difficulties in doing so might inform other kinds of writing about historical and personal trauma. Students need to read Olga Grjasnowa's "All Russians

Love Birch Trees" prior to the start of the course. Students will have Zoom class discussions and intensive peer-feedback-driven writing practice.

CJST234 Israel in Therapy: Society Under the Influence of TV Series
The course deals with the prototypes of the Israeli character as they appear in the original Israeli TV series In Treatment, and other Israeli TV series, such as Florentine and A Touch Away. We will compare the structure and the characters of the series to other dramatic Israeli series, examine the appearance of the characters, and discuss the similarities and differences between the roles they perform. In addition, we will examine the role of television drama series as a tool to define and characterize our societies, and also look over the five characters that appear in the first season of In Treatment, define them, and examine the five prototypes of the Israeli character they represent.

The instructor is the co-creator and head screenwriter of the original version of the TV series In Treatment as well as the Center for Jewish Studies distinguished Visiting Professor.

CJST234F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

CJST235 Remembering the Holocaust
How should the Holocaust be remembered? How do we want it to be remembered, and how can we ensure that it will be? These questions preoccupied Jews even as the genocide was unfolding, and many documented their experiences in diaries, while a few were able to clandestinely photograph life and death in the camps. Today, these questions are more urgent than ever, as we are living through the final era in which it is still possible to engage personally with Holocaust survivors; soon, none will remain alive. In this course, we will explore the different ways, formats, and perspectives through which the Holocaust has been remembered: diaries, fiction, art-house and commercial films, limited series, graphic novels, art installations, recorded testimonies, still photography, social media projects, memorials and museums, televised trials, and more. We will ask what was and what is the "right" way to remember the Holocaust, and whether such a way even exists. We will also discuss the rise of Holocaust denial and examine how AI can be used both to promote it and to combat it. The course will include close readings, guest speakers, virtual visits, and creative projects.

CJST238 Zionism and America
"America has a love affair with Israel" -- so an Israeli tourism executive tells an American advertising agency in an early Mad Men episode, set in 1960. In reality, America's relationship with Israel has always been far more complicated than that, and consistently marked by heightened emotions -- by passion and inspiration, but also by disappointment and rejection. This course will explore that complex relationship. In the same Mad Men episode, a character defines Israel as both a place and an idea -- the idea, of course, being Zionism. We will trace how American thinkers, Jewish and non-Jewish alike, have reflected on the Zionist idea: how they shaped and transformed it, supported and encouraged it, but also challenged and rejected it. We will also analyze how American literature, television, and film have represented the Jewish state, and how these representations have shifted over time -- from hailing Israel as a miracle to subjecting it to intense criticism. Specifically, we will discuss differing views of Zionism among American Jews and Christian Zionists, and consider how Christian media has often supported Zionism, for example in recent Christian films such as David and Mary. The scope of this course will be wide-ranging. It will end with Netflix, but it will begin hundreds of years earlier, and will also examine America's role in imagining alternative possibilities for Jewish resettlement, including the long-forgotten plan to establish a Jewish homeland in Texas. We will discuss alternative pasts, as well as competing visions for the future.

CJST241 Anne Frank's Diary and its Legacy
Since its publication, "The Diary of Anne Frank" has become one of the bestselling non-fiction books of all time. Moreover, it has inspired numerous adaptations in different forms: films, stage plays, TV series, graphic novels, and more. In this course, we will closely read the original diary, and engage with various incarnations, asking: Why did the world iconize Anne Frank, and is it a lionization or an appropriation? What does this global phenomenon tell us about the legacy of the Holocaust and of Anne Frank, and, finally, what does Anne Frank's diary tell us about the world?

CJST244 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

CJST247 Jewish Americans: Gen X to Gen Z
What does it mean to be Jewish? What does it mean to be American? What does it mean to be young? This course explores these three questions, with a particular focus on where these identities intersect. We will examine how young Jewish Americans have been represented and how they have represented themselves over the past four decades. Through books, films, TV shows, comedy specials, social media, and more, we will trace how these representations have shifted from Generation X to Generation Z, and consider how they may continue to evolve in the future. We will also discuss the extent to which Jewish identity is essential or peripheral to how young Jews understand themselves, express their identities, and engage with the world. The course includes close readings of both canonical and lesser-known texts, alongside several creative projects. These may include analyzing a case study of a prominent contemporary Jewish celebrity, reimagining older Jewish media in a contemporary setting, writing a Jewish pop song, and more.

CJST248 Designing Reality in Israeli Documentary Film
In the last decade, Israeli documentary films have crossed borders not just geographically but also by their form and style. They are bold, courageous and provocative. They have been participating in prestigious international film festivals, receiving important awards and mostly bringing the Israeli audience back to the cinema, having a crowd power like fiction films. So what makes Israeli documentary films a "hot property"? In this class we will look for the answers by watching and discussing 14 Israeli documentary films (among them "Paper Doll," "In Satmar Custody," "Presenting Princess Shaw," "No.17"). The course will raise questions about reality and the construction of reality in Israeli documentary films.

CJST249 From Black and White to Colors: Israeli Cinema, a Melting Pot Fragmented
The course will focus on Israeli cinema as a reflection of a society that was founded as a melting pot for all Jews and became sectorial. Israeli cinema originated as a tool for establishing a unified national identity evolved over the years into a means of expression for ethnically defined subcultures within society. During the course, the students will explore past and contemporary films and will follow the shift they represent in the current Israeli experience turning away from the original Zionist core into several isolated groups distinguished by ethnicity, traditions, and language. We will examine Moroccan, Persian, Georgian, Russian, Yiddish, Ethiopian, Arab, etc. films produced in Israel by local filmmakers digging deep into the experience of immigration, seclusion, rediscovering their roots, and even expressing yearnings to the countries of origin.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

CJST250 Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema
The course will focus on contemporary Israeli cinema and how it reflects shifts in local society; mainly the ways in which a new national identity and culture are being forged at the expense of the Israeli-Palestinian conflict--which is marginalized, repressed, sublimated, or left out altogether. As this concerns mainly the Hebrew-speaking cinema, we will also discuss the emergence of an unprecedented wave of Arab-speaking Israeli-Palestinian cinema, which is thematically groundbreaking. This introduction to the new generation of Israeli filmmakers, who differ dramatically from their predecessors, will help us better understand the ever-changing Israeli society. Watching closely, we will discover that the conflict is always present in the Israeli experience, even when is it seemingly absent. An optional CLAC course, which is conducted in Hebrew and carries a full credit, is offered to students with advanced Hebrew skills. The course will include visits from scholars in the field, watching movies in Hebrew and/or with Hebrew subtitles and students' presentations.

CJST252 The Five Rachels: Jewish Women in Contemporary American Culture
The course will focus on five iconic contemporary female TV characters, actors, and creators; American, Jewish, and incidentally--or not--sharing the same name: Rachel. Rachel Green ("Friends"), Rachel Berry ("Glee"), Rachel Menken ("Mad Men"), and Rebecca Bunch ("Crazy Ex-Girlfriend"), played by Rachel Bloom, and Midge Maisel ("The Marvelous Mrs. Maisel"), played by Rachel Brosnahan. These five complement each other and offer us a panoramic view of the American Jewish female experience: discrimination, inclusion, the generational gap, and their relationship with Israel. In addition, they allow us to explore the three most common stereotypes associated with the Jewish woman: the Jewish nose, the Jewish mother, and the Jewish American princess. We will discuss the conflicts and the societal shifts these characters embody, and how they define themselves, their Jewishness, their femininity, their unique surroundings, and place in history.

CJST253 Jews and Therapy in Films, Books and Television
Popular culture features many depictions of therapy. More often than not, these representations have some kind of Jewish relation: the creators of the media are Jewish, the therapist is Jewish, the patient(s) are Jewish, or all of the above. From Freud's iconic psychoanalytic couch to potato couches watching shows

about his legacy, this course will examine the long-time connection between Jews and treatment. We will read books, watch romantic and horror films, binge on limited series, and ask: what can we learn from therapy about Jewish culture and history, and what can Jews teach us about therapy?
Offering: **Host**
Grading: **A-F**

CJST260 Ancient Jewish Mysticism
This course examines how ancient Israelite/Judahite communities (Bronze Age through the Iron Age) imagined, accessed, and managed the "invisible world": the dead, hostile spirits/demons, divine messages about the future, and the binding power of spoken formulas (oaths, blessings, curses). Rather than treating "mysticism" as later contemplative tradition, we use the term in a deliberately narrow, historical sense: ritual and textual techniques meant to cross or manipulate the boundary between human and nonhuman realms -- especially under conditions of threat, uncertainty, or political pressure. Working historically and comparatively, we read biblical texts alongside contemporary ancient Near Eastern ritual and inscriptional evidence (Akkadian, Aramaic, Sumerian, Ugaritic), asking: What practices do the texts presuppose? What do polemics against "illicit" rites reveal about what people actually did? How do treaties, curses, and apotropaic objects encode beliefs about divine enforcement? And how does material culture (amulets, inscriptions, ritual installations) complicate strictly "literary" reconstructions?

CJST272 Ethics After the Holocaust
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

CJST272F Ethics After the Holocaust (FYS)
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

CJST280 The Jewish Mother
What is a "Jewish Mother"? Is it a technical definition--a mother who is Jewish, a Jew who is a mother? Or is it a more abstract notion--a character trait, a mindset, an attitude? What are the qualifiers required to be crowned (or not) as a "Jewish Mother"? This course will examine how the "Jewish Mother" depiction evolved and became a stock character in American culture. We will engage with different forms of content, from different periods and perspectives: feature films, TV series, pop music, novels, and non-fiction books. Through these texts, we will discuss how daughters and sons view and confront their mothers, and how they reflect on the mother's presence or absence with anger, frustration, confusion, longing, admiration and gratitude. Finally, we will compare the depiction of the "Jewish Mother" to other non-Jewish matriarchs and ultimately ask: in current popular American culture, are all mothers actually "Jewish Mothers"?

CJST281 Political Fantasies of Zion
Palestine, Zion, Judah, the Promised Land. A small piece of land in the Middle East has a very long and contested history full of religious meaning for Judaism, Christianity, and Islam. Some imagine the State of Israel as an island--"the only democracy in the Middle East" or the only Western state in the region--surrounded by a hostile environment. The geographical area, by contrast, has often been portrayed as a crossroad, a place where cultures clashed, merged, and exchanged ideas.

In this class, we will examine this tension between a physical and imagined space, between political reality and idea, by recovering alternative Zionist, non-Zionist, and anti-Zionist visions of the Zion. Jewish statehood is a very recent phenomenon. Throughout the modern period, the vast majority of Jews lived under empires, whether Habsburg, French, Romanov, British, or Ottoman. How did the imperial experience shape Jewish religious and political views? What role does the imagination of Zion play in today's political context? Reading political pamphlets, poetry, maps, artworks, and utopian fiction, we will pay attention to the construction of the Zionist idea not just in political Zionism but also in contrasting visions including Canaanism, cultural Zionism, diaspora nationalism, a Jewish-Arab federation, a binational state, and the rejection of statehood as heresy. In the last part of the class, we will look at recent contemporary issues from the news, e.g., the agreements between the State of Israel and the United

Arab Emirates, or government corruption in Israel, in order to see how these ideas of Zion are still present in today's discourse.

CJST295 Religion in Dungeons and Dragons
As a fantasy roleplaying game, Dungeons & Dragons has been prevalent for over 40 years. In this game, players partake in fantastical journeys, slaying beasts, completing quests, and interacting with divine beings. Though not often discussed, religion has played an important role in Dungeons & Dragons since its creation: clerics pray to their gods and invoke physical changes in the world, strange cults organize and perform perverse rites, summoning ancient beings for evil. There have been many different editions of Dungeons & Dragons, and each treats these religious elements in a different way. This course answers the questions, "What role does religion play within Dungeons & Dragons and how does the presentation of religion within Dungeons & Dragons map onto scholarly trends within Religious Studies?"

CJST309 Medieval Monsters
In this course we will examine forms and modes of the monstrous in medieval literature. We will focus on how monstrosity emerges at the intersection of cultures, religions, races, languages, genders, and the nebulous space/time between the living and the dead. Some of our monstrous themes will be pollution, revenants, exoticism, translation, and extreme violence. Written by Christians, Muslims, and Jews in the 11th-14th centuries, texts will include romances, saints' lives, apocalypses, chronicles, and travelogues.

CJST311 Pain and Punishment in the Hebrew Bible
The Hebrew Bible has many graphic depictions of pain and punishment; some inflicted upon the Israelites and many inflicted by the Israelites themselves. Many of the laws of the Hebrew Bible describe the proper ways to inflict punishment and many of those same laws describe the ways in which someone might be absolved of punishment. This course aims to answer the questions of: What role did pain and punishment play in the ancient world? How was the physical experience of either connected to religious experience? In what ways was pain, and often disgust, utilized to either connect or separate someone from the divine? What is the relationship between divinity, power, physicality, and punishment? In asking these questions, this course will demonstrate that, much of the time, spirituality, devotion, and religiousness, need not be divorced from the physical world and need not be considered metaphysical qualities.

CJST312 Judaism in the Time of Jesus
This course is designed to help us understand the emergence of Judaism - its practices and beliefs, as a philosophy, a way of life, a religion -- from the formation of the Hebrew Bible (ca. 400 BCE) to the parallel development of rabbinic Judaism and early Christianity (ca. 100 CE). We will be concerned with the creation of community and its institutions, the rise of sectarianism and claims of normativity, the creation of the Bible as scripture and various modes of its interpretation, the relationship of early Judaism to ancient Israelite religion and society, and relations between Jews and Judaism to gentiles and gentile culture. Attention will be given to the creativity of Jewish literature, its common setting in times of oppression, and its place in the religious heritage of Judaism and Christianity.

CJST314 Curating Religion: Museums, Monuments, and Memorials
Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they represent present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan's collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

CJST315 Hebrew in the Media: From National Literature to International Films and TV Shows (CLAC 1.0)
This language course is offered as an enrichment opportunity to students with intermediate or advanced Hebrew skills who are interested in improving all their language skills and/or acquiring additional linguistic and cultural preparation for study abroad in Israel. Cultural activities including participating in the 24th Annual Contemporary Israeli Voices 2026 and Lunch and Learn meetings with native speakers are part of the course. In addition, special writing workshops with internationally renowned Israeli scholars will be integrated into the course curriculum. The course explores the changes in Israeli society as it moves from national ideological literature to the exploration of new multicultural media such as films and TV shows and thus gaining international fame and inspiring widespread emulation. The course may be repeated for credit. The course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. CJST319 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933
Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

CJST321 Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

CJST353 Race, Ethnicity, and Religion in Medieval Literature
Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question and related issues by considering the emergence of medieval ideas of race, ethnicity and religious difference. We will also think through the meaning of these categories and recent controversies about locating "race" in medieval studies. Our focus will be on a selection of texts dealing with encounters -- real and imaginary -- of Western European Christians with cultures ranging from the Mongol Empire to the Jewish communities in their own territories. The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts, and romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasies.

CJST413 Israeli Cinema (CLAC 1.0)
This Hebrew course will be linked to the film course, taught in English, entitled CJST 250: Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema. This course is targeted toward students with very advanced knowledge of the Hebrew language. Students will mostly view the same films as the parent class, with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in format and themes of Israeli films. Scholar visits will be part of the course, and students will attend a few cultural enrichment activities. This course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative; for more information, see https://www.wesleyan.edu/cgs/eventsprograms/clac/index.html.

CJST414 Israeli Cinema (CLAC 1.0)
This most advanced Hebrew course can be taken either as a language enrichment course to the parent course, CJS223: Israeli Women Filmmakers and Israeli Society, or taken by itself independently as an advanced Hebrew course. The focus of the course will be studying films made by female filmmakers. Students will analyze, discuss, and write on the films with special attention to mapping the cultural and social changes in Israeli society as well as changes in films' formats and themes. Conversing in Hebrew with Israeli film directors and scholars during Lunch and Learn Meetings as well as attending the screening of films in Hebrew in the 20th Annual Ring Family Wesleyan University Israeli Film Festival and writing reflective papers on films will provide a cultural and social framework for the course. In addition, the course will include special workshops delivered by renowned Israeli filmmakers and scholars. The course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. HEBREW

HEBR101 Beginning Hebrew I
In the beginning, there was an old Hebrew language that was dead in the 19th century and then revived into a modern language. In this course you will begin your journey into a fascinating language that is used to read ancient as well as modern texts. From reading with vowels, to reading without vowels, from handwriting in script to typing in Hebrew (so that you will be able to use social media), Hebrew has always had something special and unique to offer. Students will not only be introduced to all aspects of reading, writing, speaking, and understanding the language, but also will be exposed to the language as embedded in its cultural context. To meet that end, students will attend the series of 24th Annual Contemporary Israeli Voices 2026, which brings to campus the most diverse and contemporary cultural voices as well as converse with native speakers over Lunch and Learn meetings. Those extra cultural events account for the additional half credit (with a total of 1.5 credit for this course). This course counts toward the minor in Jewish and Israel Studies.
Offering: **Host**

HEBR102 Beginning Hebrew II
In the second part of the Beginning Hebrew course, students will continue their journey to studying the Hebrew language, an old language that was dead in the 19th century and then revived into a modern language. Students will be introduced to all aspects of reading, writing, speaking, and understanding along with an emphasis on enlarging vocabulary, learning new grammatical concepts, writing short compositions, and further developing all language skills. Multimedia resources will be used to enhance listening and comprehension. Exposure to cultural material will also be explored through participation in the 20th Annual Ring Family Wesleyan University Israeli Film Festival 2027, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Participation in cultural events account for the additional 0.5 credit with a total of 1.5 credits for this course. This course counts toward the minor in Jewish and Israel studies.

HEBR201 Intermediate Hebrew I
In this course, students will continue their journey, exploring Hebrew on a higher level, both linguistically and culturally. Linguistically, students will master new grammatical skills, work more intensively on their conversational skills, and type short papers in Hebrew. Culturally, students will be exposed to Israeli media and ongoing public discussions. This will include students participating in the 24th Annual Contemporary Israeli Voices 2026 series, which will feature renowned international scholars and writers. Students will attend lectures, converse with native speakers over Lunch and Learn meetings, and write a short paper on each event. The cultural events will account for the extra half credit with a total of 1.5 credits for this course. The course counts toward the Minor in Jewish and Israel Studies.

HEBR202 Intermediate Hebrew II
In this course, students will continue their journey, exploring Hebrew on a higher level both linguistically and culturally. Linguistically, students will master new grammatical concepts, read more complicated texts, and work more intensively on their conversational skills by presenting a subject of their choice as well as participating in students' debates, and typing short papers.

To meet the cultural component, students will participate in the 20th Annual Ring Family Wesleyan University Israeli Film Festival 2027, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse in Hebrew with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Students will reflect upon the films by typing in Hebrew a short response paper. Participation in cultural events accounts for the additional half credit, with a total of a credit and half for this course. The course counts towards the Minor in Jewish and Israel Studies.

CHUM141 Depicting Death in Literature
This course analyzes the theme of death primarily within French and francophone writing (in English translation), tracing the evolution of death imagery over time in literary texts. The curriculum will investigate various contexts related to the environment and language usage, offering a nuanced understanding of how the portrayal of death has changed in literature.

CHUM202F Deconstructing Democracy (FYS)
What role does democracy play in the narratives that political philosophers tell themselves about the moment human beings pass from the state of nature into civil society? Why is it that almost all political philosophies have almost nothing good to say about democracy? And how did it happen that democracy has come to be one of the most debated concepts straddling the borderline of the literary and the political, the real and the ideal? Seeking to answer these and other questions, this course will follow the concept of democracy through some canonical and non-canonical texts in or relating to political philosophy. We shall attempt to understand why democracy gives rise to the complications and paradoxes that are definitive of the conceptual space of political society.

CHUM204F Performance and Authenticity between Race and Gender (FYS)
This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. To deride a person or phenomenon as "all a performance" is to make an accusation of artificiality or inauthenticity. How do colloquial uses of language reflect long-standing cultural suppositions, and how do connotations of performance as fakery or fabrication intersect with the actual work of performers themselves? In this interdisciplinary seminar, we will explore questions of performance, affective labor, subjectivity and self-making (and re-making), both onstage and off. We study performances found equally in everyday life, popular entertainment, and avant-garde art, and center the contributions of Black, feminist, and queer studies.

Topics include illusion, ventriloquism, and sleight of hand, as well as mimetic acting and the manufacture of "emotion," dance technique and the concealment of effort, and musical improvisation and the politics of invention. We consider the potent complexities of drag, camp, and minstrelsy--and historicize their surrounding discourses of fraudulence and authenticity. Looking at a range of (predominantly U.S.-based) practices from the mid-nineteenth century to the late twentieth, this course is not a comprehensive survey, but rather, examines key episodes in the history of modern "performers."

Together, we will grapple with the ways that artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; the historically complex entwinement between ideas of race and authenticity; and how hiding, fabulation, exaggeration, and duplicity have been mobilized as strategies of freedom and resistance--from the spectacular escape act of Henry "Box" Brown to the sensational camp and hyperbolic glamour of the East Los Angeles art collective Asco.

CHUM206F Art and the Global Contemporary (FYS)
This course introduces students to a range of artistic practices from the mid-20th-century to the present. We will consider the work of artists from Argentina, Brazil, Chile, Japan, Yugoslavia, Serbia, Germany, Poland, Ghana, Senegal, Mali, Nigeria, China, Iran, Iraq, Egypt, Lebanon, Morocco, Haiti, Cuba, Mexico, Vietnam, Thailand, South Korea, India, the Indigenous U.S. and the African Diaspora, among others.

We will not take our central terms for granted. Rather, we will ask: When, precisely, is the contemporary? How do different nations and cultures have varying notions of the present and the past? How do questions of tradition and futurity resonate in artworks, particularly in non- Western and postcolonial contexts?

Together, we will consider the status of the global and the role of the local. In the context of late modernity, can the "global," only ever name the circuits of capitalist exchange? We will consider how artists are both deeply attentive to local contexts, as well as engaged in a practice of diaspora; and how artists engage the politics of land, borders, the nation-state, and the violence that upholds them. That is, we will orient ourselves via a notion of cultural identity that, in Stuart Hall's terms, is "not an essence but a positioning."

CHUM214 The Modern and the Postmodern
In this course we will examine how the idea of "the modern" develops at the end of the 18th century and how being modern (or progressive, or hip) became one of the crucial criteria for understanding and evaluating cultural change during the last 200 years. Our readings will be drawn from a variety of areas--philosophy, novels, music, painting, and photography--and we will be concerned with the relations between culture and historical change. Finally, we shall try to determine what it means to be modern today and whether it makes sense to go beyond the modern to the postmodern.

CHUM228 Virtue and Vice in History, Literature, and Philosophy
Examines the long, complex and sometimes contradictory associations of virtue with piety, salvation, righteousness, intensity, strength, and, more recently with vulnerability and suffering. Beginning with Confucius and Aristotle, and winding our way through Christianity, humanism, postmodernism until the present, we will explore the ethics, power, and politics of the ideas of virtue and vice.

CHUM233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

CHUM248 Shakespearean Revolutions
Shakespeare's works emerged during a period of revolutionary social, political, religious, economic, and cultural change, including the Protestant Reformation, the rise of print culture, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the emergence of the first, purpose-built, commercial playhouses. Innovations in dramatic form and genre, which Shakespeare helped craft, sought in varying ways to make sense of these momentous shifts for diverse theater publics. Revivals and adaptations of his works on stage and screen during times of revolutionary change have rendered the Shakespearean canon a site of subsequent social and cultural contestation. This class considers the "revolutionary" dimension of four Shakespeare plays both in their own time and place, and in later theatrical and filmic productions and adaptations. We will trace first-, second-, and third-wave feminist reimaginings of "The Taming of the Shrew"; Second World War- and Vietnam War-era renderings of "Henry V"; civil rights and anti-apartheid era restagings of "Othello"; and attempts to decolonize "The Tempest."

CHUM250 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

CHUM278 Visualizing Firearms History: An Applied Quantitative and Archival Approach for a Project-Based Expl

This project-based course provides a unique cross-disciplinary opportunity to study important historical questions surrounding firearms. Combining quantitative methodology in data science with qualitative research methods in history, students will answer questions they are passionate about based on existing datasets. Students will read, discuss, and write responses to the latest historical scholarship on the technological development of guns, firearms in media, gun violence statistics, and advertisements. Students will choose one of four datasets to research and analyze. These include data sets related to firearms patents since the 1820s, firearms in media (film, television, anime, games), firearms-related deaths, and advertisements of firearms. Students will develop skills in hypothesis testing and inferential statistical analysis alongside qualitative research methods used in history. The course offers one-on-one support and training in the skills required to complete a team-based final project. The final project will be hybrid between a research paper and also an exhibit (e.g., film, website, media, art installation). Students will present their work at the center's third annual undergraduate research conference (Spring 2025). Select students can apply to continue on as QAC summer apprentices and Baker Collabria Fellows in Data Analysis, and as CSGS NEH-funded summer history research fellows and as History thesis researchers.

CHUM281 Political Fantasies of Zion

Palestine, Zion, Judah, the Promised Land. A small piece of land in the Middle East has a very long and contested history full of religious meaning for Judaism, Christianity, and Islam. Some imagine the State of Israel as an island--"the only democracy in the Middle East" or the only Western state in the region--surrounded by a hostile environment. The geographical area, by contrast, has often been portrayed as a crossroad, a place where cultures clashed, merged, and exchanged ideas.

In this class, we will examine this tension between a physical and imagined space, between political reality and idea, by recovering alternative Zionist, non-Zionist, and anti-Zionist visions of the Zion. Jewish statehood is a very recent phenomenon. Throughout the modern period, the vast majority of Jews lived under empires, whether Habsburg, French, Romanov, British, or Ottoman. How did the imperial experience shape Jewish religious and political views? What role does the imagination of Zion play in today's political context? Reading political pamphlets, poetry, maps, artworks, and utopian fiction, we will pay attention to the construction of the Zionist idea not just in political Zionism but also in contrasting visions including Canaanism, cultural Zionism, diaspora nationalism, a Jewish-Arab federation, a binational state, and the rejection of statehood as heresy. In the last part of the class, we will look at recent contemporary issues from the news, e.g., the agreements between the State of Israel and the United Arab Emirates, or government corruption in Israel, in order to see how these ideas of Zion are still present in today's discourse.

CHUM288 Literary Perversions: Revolution, Democracy, Identity

The Federalist Papers wrote under the strong impression that the American Revolution was imperiled by an overwhelming debt and the lack of a national authority and identity to bind the States together. Public fear of moral degeneration via the replacement of the "Old World" symbolic order with a "New World" order under the aegis of "representative democracy" loomed over the republic.

Taking these concerns and the dissemination of The Federalist Papers as our point of departure, this course will examine how representations of "non-normative" identities in several major 19th-century works relate to the problems of representing democracy in the aftermath of the American Revolution. Many of the most famous canonical literary texts in the United States during the 19th century write about "non-normative" topics such as maternity, slavery, bestiality, and gender inequality in the context of narratives that attempt to rewrite the legacy of the American Revolution. By focusing on the literary treatment of these "perverse" topics, we shall attempt to understand whether the authors we will undertake close readings of in this course were successful in their endeavors to not only amend the shortcomings of the Revolution, but also to think more rigorously about the history of slavery and gender inequality.

CHUM302 Life and Death: Relations of Biopower and Necropower

The blunt truth of human suffering permeates people's lives and yet people attempt to push back in myriad ways against the certainties of death. What conceptual spaces do living humans occupy that do not equally place them under the specter of death? This seminar considers the social structures and cultural ideas that position ways of being and understanding humans as they traverse the spaces between life and death. It traces the conceptual foundations and empirical sites for two contrasting yet complementary theories of social power that aim to explain this shared conceptual space: biopower and necropower. As theories of power, biopower and necropower are not things that exist in the world, but rather ways of defining, thinking about, and resisting discursive and material relationships that do, in fact, exist in societies. Biopower is a theory of power that examines how and why social institutions target, intervene, and invest in the life processes of living beings in the name of improving population health. Necropower is a theory of power that examines how and why social institutions function to produce mass suffering towards the ends of death. This course asks what social, cultural, and ethical ideas help map the embodied, relational, and sociopolitical spaces between "alive" and "dead" humans?

CHUM304 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

CHUM309 Medieval Monsters
In this course we will examine forms and modes of the monstrous in medieval literature. We will focus on how monstrosity emerges at the intersection of cultures, religions, races, languages, genders, and the nebulous space/time between the living and the dead. Some of our monstrous themes will be pollution, revenants, exoticism, translation, and extreme violence. Written by Christians, Muslims, and Jews in the 11th-14th centuries, texts will include romances, saints' lives, apocalypses, chronicles, and travelogues.

CHUM310 The Agent
A curious feature of contemporary North Atlantic culture is its concern to discover, describe, obtain, and distribute something called "agency." In tandem with with CHUM's Spring 2026 theme, Doing Nothing / Nothing Doing, this course critically re-examines the cultural metaphysics of agency and action that captivates modernity in general and liberalism in particular. Reading widely across anthropology, STS, philosophy, literary studies, political theory, religious studies, and aesthetics, we will critically explore the peculiar form of life whose protagonists and critics alike are transfixed by the figure of the Agent.

CHUM313 Do We Truly Choose? Free Will in Philosophy and Theology
Free will has been a central pillar of philosophical inquiry throughout history. While contemporary debates often focus on issues of consciousness, mechanics, neurobiology, and physics, premodern discussions frequently revolved around the role of God in defining the boundaries of human freedom. This seminar will delve into diverse perspectives on free will, drawing from philosophical traditions across time and place -- both past and present, East and West -- with particular emphasis on the Islamic context. Through a close reading of key sources, the course examines how different thinkers have conceptualized human agency and the extent to which it determines action. Ultimately, the seminar will grapple with the vexed question: do human agents actually enable their acts, or, in the final analysis, truly "do nothing"?

CHUM314 The Corpse as Critique
From Ancient Greece to present-day Sri Lanka and Palestine, literary works have turned to the figure of the corpse in order to articulate critiques of domination and authority. In these texts, the dead human body, despite or perhaps because of its inertness, poses potent problems to the exercise of statist and racist violence, the depredations of plantation slavery and industrial capitalism, and the abuses of empire. What is this strange form of critique, rooted in mere matter that, itself, does nothing but decompose? And what might it teach us as we attempt to survive and thrive in a world defined by spiraling inequality, rising authoritarianism, and environmental catastrophe? In this course, we will begin to answer these questions by examining literary texts from authors including Sophocles, Nadine Gordimer, and Michael Ondaatje, as well as works of philosophy, history, anthropology, political theory, and literary theory from thinkers such as Walter Benjamin, Georges Bataille, and Katherine Verdery. In

tracking invocations of the corpse at various historical junctures and in various literary genres, we will investigate what makes the dead human body such a compelling figure with which to expose and subvert the exercise of coercive power and violence. At the same time, we will attend to the unique affordances and limitations of literature, drama, and film in expressing this critical potential.

CHUM316 Advanced Research Methods in Science Studies
This course exposes students to qualitative research methods in science and technology studies. Methodology describes a process for conceptualizing, collecting, and organizing evidence. Part of this new course will be a survey of methodological traditions in science and technology studies and associated fields (sociology, anthropology, cultural studies, feminist and critical race studies, performance and design studies, philosophy and history of science) that guide the collection and interpretation of evidence about scientific knowledge and practices, the relationships between users and technologies, and broader scientific institutions and technical infrastructures. Specific methodologies include ethnography, archival and discourse analysis, social worlds analysis, comparative historical and genealogical analysis, abductive analysis, and visual culture and media analysis. The other main part of the course will culminate in presentation-ready small-scale individual and group research projects utilizing qualitative research methods.

CHUM320 Staging the Real in Early Modern England
The stage in Shakespeare's time was by modern standards "relatively bare," lacking illusionistic sets that would later be relied upon to conjure the reality of a particular time and place onstage. What, then, defined the "real" prior to the emergence of modern theatrical realism and the illusionistic conventions associated with it? What representational strategies (of text, costume, props, sound, stage machinery, etc.) were used to convey "realness" onstage at the Globe and other early English theaters, which lacked the "fourth wall" of the proscenium arch that separated the realities of the play-world from those of everyday life?

This course explores the dramaturgy of the "real" in early modern England in conjunction with the Center for the Humanities Spring 2024 theme of "Get Real," in plays by Shakespeare and his contemporaries that experimented with new ways of bringing to life the realities of war, true crime, sex and gender "deviance," street life and lingo in London's underworld, serendipitous wealth gleaned from capitalistic enterprise, and other sensational news ripped from the headlines.

CHUM321 Secrets, Lies, and Fictions in the Americas
In 1964, historian Richard Hofstadter underlined the spread of a "paranoid style" in American politics. Although Hofstadter's description seems more appropriate today than ever, in an increasingly interconnected global order the role of misinformation, uncertainty, manipulation, and conspiratorial imaginaries in shaping and limiting democracies and public spheres cannot be exclusively assigned to any particular locale. From a continental standpoint, this course offers analytical tools to explore the political complexity of lies, secrets, and fictions in both the United States and Latin America since the mid-twentieth century to this day. By studying a series of cases--including the Guatemalan civil war, the assassination of John F. Kennedy, the Pentagon Papers, the U.S. intervention in the Middle East, the "dirty war" in Latin America, censorship in socialist Cuba, the arrest of Augusto Pinochet in London, Wikileaks, hacker practices in the early days of internet, or Cambridge Analytica--we will address the relations between surveillance, spectacle, and conspiracies (both factual and imagined) in the contemporary techno-political landscape. Moreover, the course emphasizes the speculative and theoretical potentials of art and literature when it comes to understanding socio-political phenomena. Beyond distinctions between truth and falsehood, fictional constructions are key to our collective capacity to imagine alternative worlds. By mapping out the ways in which fictions circulate as such or rather as truthful versions of reality, we will problematize the limits and uses of truth, lies, and official and alternative narratives, as well as the power of states, corporations, individuals, and collectives to direct attention and frame information.

CHUM322 Visions of the Future: Capitalism and Colonialism in the World's Fairs
This course will explore the history of the world's fairs from the 1851 Great Exhibition in London to the 1939 New York World's Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world's fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

CHUM324 Brownfield Herbarium: Documenting Anthropogenic Environments
Brownfield Herbarium: Documenting Anthropogenic Nature, asks students to devise multi-disciplinary approaches to capturing the history, ecology, and geography of toxic environments. The herbarium is prized as a collection of type specimens and native species. Extending this technology of European natural history of weedy and invasive species exposes the natures we treasure and deride. Narrowly, the herbarium project builds on the initial buds and bark collections of "Botanizing Worlds" in Spring 2026 at Manresa Island. Broadly, this class invites students to consider other technologies, forms, and genres to document feral landscapes.

CHUM325 The Work of Art Against Work: Art, Labor, Politics
Understandings of late 19th- and early 20th-century avant-gardes are tied inextricably to leftist theory, particularly that of the Frankfurt School. This advanced seminar will consider the legacies of that entwinement, while focusing more specifically on its transformations from the late 20th century to the present: We will examine how artists have engaged the "work" of art in relation to the rise of post-Fordism, a globalized economy, and new theories of work and anti-capitalism. We will pay special attention to gendered notions of work and the division of labor (including "craft," affective labor, domestic work, care work, sex work, and more), to debt and racial capitalism, and to the rise of speculative finance and its links to the art market and the patron class.

CHUM329 Using Drugs: Race, Drugs, and the Colonial Present
This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not. Ultimately, drug use is often framed as an issue of "lost productivity" and/or "lost reproductivity," with "rehabilitation" framed as a way of restoring productive activity and eugenic reproduction.

CHUM330 Eating Ourselves: Cannibalism and the Production of the Human
This upper-level seminar examines how cannibalism -- both as a biological act and as a powerful cultural imaginary -- has shaped understandings of humanity, morality, and civilization in the modern world. Drawing on work in anthropology, science and technology studies, critical food studies, speculative fiction, and posthumanist theory, the course explores how fears and fantasies of "eating ourselves" reveal cultural anxieties about difference, desire, and domination while surfacing in contexts ranging from colonial encounters and famine narratives to contemporary biotechnologies that promise "slaughter-free meat." Students will consider how cannibalism operates as a moral and political trope in discourses about the colonized other, resource scarcity, and the violence of capitalist consumption, as well as a lens for rethinking ethics in an era of ecological crisis and technological transformation. Engaging ethnographic, historical, and theoretical readings alongside visual and popular media, the course invites students to interrogate the shifting boundaries of the edible and the human while exploring what forms of life, relation, and care might emerge from confronting what we most fear to eat. Engaging directly with the Center for the Humanities theme of "Monstrosities," students will employ cannibalism as a critical lens for understanding the monstrous figures, landscapes, and technologies humans create through consumption, exploitation, and the exercise of power.

CHUM333 Tech Oligarchy: Power, Democracy, and the Rise of Global Techno-Economic Elites
This course examines the new relations of power emerging as techno-economic elites in the United States and elsewhere -- from Palantir's Peter Thiel to Tesla's Elon Musk and Microsoft's Bill Gates -- increasingly take up outsized roles of influence and even occupy unelected positions of governance in ostensibly democratic settings worldwide. Wielding epistemic, cultural, and ideological power through financial contributions to political campaigns, outsized philanthropy, and direct control over public platforms of communication and knowledge dissemination, these elites frequently and effectively promote tech-driven solutions and corporate logics as key to solving pressing social problems and to the future of our collectives. To unpack this confluence of culture, technoscience, finance, and power, students will investigate the impacts of this emerging tech oligarchy on our societies, polities, and economies via a lab-based approach in which each student will take on a semester-long case study of a specific tech elite of their choosing. Drawing on media, grey literature, company filings and other resources, and supplemented through a review of existing literature on this topic, students will collaboratively construct a repertoire of understanding of tech oligarchy in the making through ongoing in-class presentations, engaged critical discussion, and iterative writing assignments. Across our cases, we will ultimately consider how and why this form of power has taken root, how it might be challenged or regulated, and the particular significance of technoscience in this new era of governance and social order.

CHUM334 Native Matters: Materiality in Indigenous Literatures Across the Pacific
This seminar contemplates the function and representation of materiality in contemporary indigenous literatures. It highlights the centrality of embodied practices in indigenous cultural lives. The primary texts for the course will be literary texts (novels, short stories, essays, and poems) from different indigenous communities, including from North America, East Asia, Austrasia, and Oceania. We may also deal with non-textual materials such as artifacts, maps, clothes, video games, etc. Readings will also include theoretical or philosophical works from indigenous and non-indigenous thinkers on the subject of materials and materiality. The course will thematize materiality in two ways: the first is to understand materiality as a way for indigenous authors to represent or construct various understandings of indigeneity, either in traditional lifeways, modern indigenous realities, or indigenous futurisms, both within and between

specific indigenous communities. The second is to engage with thing theory and materiality as a method of literary analysis.

CHUM336 Black Texts, Lost and Found
This course examines histories of loss and recovery of black texts in the US and the Atlantic world more broadly. We will bring a three-pronged approach to our subject matter. We will analyze first the constitutive silences of the archive: epistemic and material neglect, or what Michel Trouillot has termed the "silencing of the past"; second, the preservation efforts of black newspaper editors, librarians, and bibliophiles; and third, the "counter-archiving" work of Afro-diasporic historical and speculative fiction. As we traverse different periods and empires we will consider what the concepts of the "black archive" and "black ephemera" mean to different disciplines. We will study the repressions of black Arabic writing practices in the US South and our fragmentary recovery of them in the late 20th century, unfinished novels about Black Atlantic revolutions such as Martin Delany's "Blake," incomplete runs of historic black newspapers, debates about the illusions and desires of "recovery," and the criteria that determine what counts as ephemeral and when.

We will move across different media, from print--"I, Tituba," "M Archive," "Blake," "(Dis)forming the American Canon: African-Arabic Slave Narratives and the Vernacular"--to films--"The Watermelon Woman," "Looking for Langston," "The Last Angel of History"--and from digitized databases of photographs at the ongoing archiving project The Missing Chapter: Black Chronicles to digitized newspaper archives.

CHUM337 Insubstantial Pageants: Late Shakespeare
This seminar examines the Center for the Humanities' Spring 2020 theme of "Ephemera" through the lens of four late plays by Shakespeare ("Hamlet," "King Lear," "The Winter's Tale," "The Tempest") and their preoccupation with the time, temporality, belatedness, and the ephemerality of theater (and the world-as-stage).

In addition to considering the mutability of the play-texts themselves (several of which exist in multiple versions), we will consider how they refashion their sources, and how they are themselves refashioned in later productions and adaptations.

CHUM338 Building Nothing: Design After Progress
The built environment is responsible for over 40% of humanity's greenhouse gas emissions, but despite attaching words like "sustainable" and "resilient" to their products, design and construction practices remain fundamentally unchanged. This seminar considers the possibility of a design philosophy that doesn't take the goal of creation as a given. Topics include the lifespan of buildings and products, their maintenance and care, the unintended consequences of making, relationships with and obligations to materials and resources, and strategies for degrowth found in indigenous and vernacular design precedents. We read and discuss a key text each week that examines the history of technology and critically evaluates shifting theoretical perspectives on nature and human development as they relate to design.

CHUM339 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

CHUM340 Action and Inaction in Social Movements
This is a class on contentious politics that examines how the action-inaction binary shapes our understanding of social movement strategies, life cycles, resilience, and success. We will examine activity and inactivity in the context of a variety of social movements, diaspora groups, and rebel organizations, at various stages of their lifecycle. When is inactivity a failure of mobilization or a sign of weakness, and when is it an intentional strategy? What does "doing nothing" look like? Can it ever be an effective strategy for a group? When is inactivity a form of organizational defeat? To address these questions, we will look at different forms of "nothing doing": social movements that choose disengagement or tactics such as hunger strikes, exiled movements that focus on internal bonding and capacity building rather than overt activism, and rebel groups that intentionally abstain from violence or mobilization for prolonged periods.

CHUM341 Global Histories: Problems in Scale, Scope, Depth, and Time
How big is too big? How far back in time can historians go? How best to understand the relationship between science and history? What counts as evidence? What accounts for the rise (or return, some would argue) of macro-history? What does it portend for the future of microhistory? This advanced seminar will examine the history and historiographical implications of macro-historical frameworks, including comparative history, world history, global history, deep history, and big history.

CHUM343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture
This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling. Topics examined will include: reproductive surrogacy; gender reassignment surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of "universality" and "particularity," where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimaging.

CHUM345 Historicizing Early Modern Sexualities
This course will examine recent historical and theoretical approaches to the history of sexuality in early modern English literature (ca. 1580-1680). Our focus will be the historical construction of sexuality in relation to categories of gender, race, religion, and social status in a variety of sources, both literary and nonliterary, verbal and visual, including poetry, plays, masques, medical treatises, travel narratives, and visual media. Topics covered include intersecting constructions of the sexed/gendered/racialized body; diverse sexual practices; sexual identities prior to the homo/hetero divide; and the histories of pornography and masturbation.

CHUM346 Absences, Archives, and Adjudicating Criminalities in Settler Colonial States
Absence can refer to either distance or nonexistence. Archival inquiry embodies the former and can yield the latter. Both positions pose ethical, interpretive, and political problems. In this course, we will critically approach the archive to ask questions about how its evidentiary forms are used to narrate social relations of power, territorial claims, criminality, and adjudicate past wrongs. What genres of proof do archives produce and naturalize, and how do historical claims corroborate, refuse, or reinterpret "truth" and "knowing"? Readings span Native and Indigenous Studies, American Studies, History, Anthropology, and Postcolonial and Literary Studies, exploring how these approaches address the adjudication of individual and state crimes. The course focuses on settler colonialism and Indigenous politics in North America but engages other global examples.

CHUM348 Plague and Care-Work in Shakespeare's England
Plague exerted an enormous influence on the plays of Shakespeare and his contemporaries, and indeed on theater as a commercial enterprise. Pandemic theater closures and quarantines were frequent throughout his career, and it is likely that his son Hamnet died of plague. This seminar examines four Shakespeare plays (Romeo and Juliet, Hamlet, King Lear, The Winter's Tale) and their preoccupations with time, temporality, belatedness, mortality and ephemerality (of theater and the world-as-stage) and with an ethics and recognition of the work of care, as these are shaped by the recurrence of plague- a perspective that will allow us to draw connections and discern differences between Shakespeare's time and our own.

CHUM350 Facts, Counterfactualisms, and the Historical Novel
The aim of this course is to explore "the fact" as the site of contradictory desires and investments in nineteenth-century fiction. Charting two paths through both foundational examples of historical novel and through early counterfactual work (Uchronie, Aristopia: A Romance History of the New World), this course will trace the versions of historical thinking made possible within these traditions. As part of the course, we will explore some of the ephemera materials novelist's working notebooks, research sources, and unpublished manuscripts. Seminar work will include both theoretical readings on historical fiction, philosophy of history, and critical archival studies. We will read novels and narrative fiction from the Brontë siblings, George Eliot, Walter Scott, Maria Edgeworth, Charles Renouvier, and Thomas Hardy, alongside critical work by Georg Lukács, Catherine Gallager,

Roland Barthes, Frederic Jameson, Michel Foucault, Saidiya Hartman, Hayden White, Dipesh Chakrabartky, Paul Ricouer, Carolyn Steedman, Natalie Zemon Davis, Kumkum Sangari, Elaine Freedgood, and Michel-Rolph Trouillot.

CHUM353 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s
This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

CHUM355 Social Movements Lab
What can we learn from social justice activists about the economic, political, and environmental struggles facing us today, including mass incarceration, immigration, economic precarity, and the violence of the state? Where are the critical sites of queer, trans, left, feminist, black, indigenous, disability, and environmental struggle? How do these movements converge, and where do they diverge? This participatory, interdisciplinary research seminar enables you to embark on an independent, semester-long research project on the social movement or activism of your choice. We'll start with some foundational reading on multidisciplinary social movement research; archival, ethnographic, and participatory methodologies; and histories of social justice struggles in the U.S. The remainder and majority of the seminar is laboratory style, taking shape around your particular projects. Each week, we will collaboratively analyze one or two projects, mapping out and comparing methods, goals, visions, struggles, and contexts of the movements under study. Our goal is to understand a range of social justice activisms in their economic, political, and historical context, with an eye toward integrating activist scholarship and social change. The activism you research can be contemporary or historical; local, national, or global; and can take any shape: direct action, community organizing, activist philanthropy, art as activism, etc. You do not need previous experience or activist contacts for this course--just passion and the desire to learn collaboratively!

CHUM364 Shakespeare's Islands
How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripherality and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.

CHUM366 Ecologies of Attention: Biosemiosis, Attunement, and Ethics
We consider variants on biosemiotic accounts of meaning, following one thread through Emerson to Nietzsche, another from Peirce and James to Bateson (Ecology of Mind, 1972) and Gibson (Ecological Approch to Visual Perception, 1979), and a third through contemporary indigenous thinkers and anthropologists attempting to bridge scientific ecology and animist panpsychism--Kimmerer, Whyte, Kohn, Ingold, Strathern. While most of the texts here focus on the nature of meaning as a living process, they are also in constant dialogue with normative concerns, being both motivated by subversive or non-humanist ecological values and inspiring distinctive insights about how to lead meaningfully connected lives.

CHUM369 Evidence: A History
What counts as evidence and proof has changed and varied over time. This class will introduce students to the changing nature of evidence and proof in history, science, law, medicine, and news media. Topics include histories of trial by ordeal, trial by jury, photography, the footnote, fact checkers, expert testimony, the polygraph, statistics, DNA, and AI. Students will read amicus briefs, watch films, write papers, create evidence for mock trials, and study the rise and political effects of "alternate facts" discourse.We will also explore the

ways that historical narratives, museums, and commemorations use evidence to tell stories through exhibits, monuments, plays, textbooks, and markers. The class will also discuss the history of landmark legal trials where new forms of evidence were central, and discuss the different ways that films handle evidence in genres such as true crime documentary. This is a discussion-based course that aligns with the Center for Humanities theme for Fall 2025: "Genres of Proof. Assignments include oral and written reports, a creative visual assignment, and a final research paper.

CHUM371 Afro-pessimism, Gender, and Performance
This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe's colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to "inanimate" things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer's body's disappearance/remains endow the Western art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars', artists', and activists' response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibits, and film screenings.

CHUM374 Abolition and Social Praxis
This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

CHUM375 Censorship, Culture Wars, and Controversy in Art
Art history is marked by various forms of state, community, or institutional censorship. Such events can be flash points in culture wars, as in the United States in 1989, when four artists--most of them queer--were denied funding from the National Endowment for the Arts after their work was deemed "obscene." Sometimes art that unearths sensitive cultural histories can lead to calls for destruction, as in Sam Durant's 2012 work Scaffold, which referenced state violence against the Dakota people, leading tribe members to protest what they felt was Durant's insensitive handling of the subject. Events like these raise key questions within art and broader society: Who should have the authority to decide which art should be exhibited, and to what audiences? What constitutes censorship? When might censorship, or the curtailing of speech, be justified?

This course will examine these questions focusing on the 20th and 21st centuries in the United States, but also global contemporary art. We will consider such issues in the wake of a recent spate of museum exhibitions canceled due to controversial content, the dismantling of monuments to colonialism and the transatlantic slave trade, as well as today's culture wars as conservative book bans make headlines and hate speech abounds. We will also explore new channels for arts funding, exhibition, and publishing that emerge in response to censorship. In addition to important texts by art historians including Sarah Parsons, Aruna D'Souza, and Rosalyn Deutsche, among others, we will also read interdisciplinary legal scholars like Sonya Katyal and Amy Adler who write from the perspective of law and policy. We will also read the landmark Supreme Court case NEA v. Finley. Assignments include an in-depth case study of a canceled exhibition.

CHUM378 Decolonizing Indigenous Gender and Sexuality
This seminar focuses on the politics of decolonization in Indigenous contexts with regard to gender and sexuality. The seminar examines a variety of settler colonial contexts in North America and Oceania. Beginning with an historical exploration of gender and colonialism, students will examine how colonial processes, along with other forms of domination that include racializing technologies, have transformed gender and sexuality through the imposition of definitions and models of normative (often binary) gender subjectivity and relations, "proper" sexual behavior, preoccupations with "sexual deviance," sexual expression as a territory to be conquered, legacies of control, legal codification, and commodification. We will then assess how diverse modes of self-determination struggles negotiate gender and sexual decolonization, including feminist interventions in nationalist productions that sustain masculinist and homophobic agendas. In relation to these dynamics, we will study the growing body of work on Native feminisms and decolonial feminisms, as well as Two-Spirit and queer Indigenous studies.

CHUM380 Exploring Personhood in the 20th and 21st Centuries (CLAC 1.0)
The goal of this course is to provide a thorough examination of the concept of personhood in the 20th century by studying how it has been portrayed and

understood in diverse cultural contexts across Arabic, English, and Francophone cultures. Through the use of comparative analysis and an interdisciplinary approach to cultural artifacts--such as works of literature, art, and religious texts as well as current debates around AI and personhood--students will explore how different cultures have approached the question of what it means to be a person and how this has evolved over time. By the end of the course, students will have a deeper comprehension of the various ways in which personhood has been created and perceived throughout different cultural and historical contexts.

The impact of historical occurrences and cultural movements on the construction of personhood, the influence of religion and politics or the fictional writing on conceptions of personhood, the representation of personhood in literature and art, and the emergence of AI as a new frontier in the investigation of personhood are some of the major topics covered in the course. This will open up new discussion topics about posthuman beings and persona status, particularly in science fiction.

CHUM382 Politics, Revolutions and Visual Culture in the Post-Revolutionary Arab Societies
The course "Politics, Revolutions, and Visual Culture in Post-Revolutionary Arab Societies" critically investigates the interaction of politics, social revolutions, and visual culture in the aftermath of the Arab Spring. This course examines the dynamic interaction between political transformation, revolutionary movements, and the various forms of artistic expression in Arab countries.

Students will delve into the complex interplay between politics and visual culture through a combination of theoretical discussions, case studies, and visual analysis, gaining a nuanced understanding of how images, art, photography, film, and other visual media have shaped and reflected sociopolitical changes in post-revolutionary Arab contexts.

CHUM383 Reading Between Freedom and Necessity
Mostly the culture of literacy has taken shape within a realm of freedom, seemingly distant from the needs of the body and the demands of sustenance. At the same time, the world represented within so much of the world's narratives, both truth and fiction, has been saturated in struggle and deprivation. In this seminar we will try to make some sense of this juxtaposition, freedom on one side and necessity on the other, to explore the flip side of the drama of revolution in modern times. For us, revolutions, those great upheavals that unite hope with practical action, will be the background against which we will try to understand the gravity and persistence of dispossession itself: the pull of past or residual forms of unfreedom in the sphere of cultural representation, within and against new or emerging expressions of emancipation, themselves accompanied or countered in modern times by ever-novel styles of exploitation.

CHUM385 Race, Capital, and Sexual Consent
Race, Capital, and Sexual Consent will focus on the early 19th century through to the Progressive Era. It will explore racialized sexual markets, from what Black feminist historian Adrienne Davis has called "The Sexual Economy of American Slavery," to the Victorian-era marriage market, to continuing and emerging sex work and pleasure economies. This course will focus on areas of overlap, tension, and reinforcement within and between these racialized sexual markets. Fundamental to this class will be the question of if/how sexual consent is configured within these markets, and what this means in the broader evolution of American liberalism in the 19th- and early 20th-century U.S.

CHUM386 Is History True?: The Genealogies and Genres of Facts
History, as both genre and discipline, has a complicated relationship with truth. As a genre, it is popularly understood to be factual -- a reflection of what really happened; as a discipline, it constructs the very reality that it claims to represent. History, in short, is based on the "facts" that it constitutes as real. This is not to say that our world is "post-truth" or unreal or that all "facts" are equally true. Rather, it is to suggest that to access historical reality we need to investigate the genealogies and genres of "facts," since facts (even "alternative facts") are the building blocks that make reality politically, socially, and culturally meaningful. So how does a "fact" become real? What genres of proof are used to constitute historical truth, and by whom? In this class, we will use historical approaches to understand how "facts" gain meaning and agency and analyze the (often porous) boundaries between history, memory, myth, rumor, and conspiracy. To do this, we will consider case studies -- political tropes like "Godless Communism" or "Judeo-Bolshevism"; legal categories such as "genocide" and "crimes against humanity"; and historical frameworks like "the Holocaust" and the "end of history" -- to consider how they structure our worldviews. The format of the course will combine discussion seminar with independent research projects.

CHUM388 Beyond Growth: Agrarian Visions
The era of endless growth has reached a point of crisis. In the face of climate catastrophe and widening inequality, of the proliferation of pointless work and spiraling burnout, it has become increasingly common to question the idea that human progress comprises ever-increasing levels of production and consumption. And yet in spite of a slew of attempts to transform the situation, from the Occupy movement to the recent mainstreaming of degrowth

economics, it seems that things are only intensifying. How did we come to inhabit this world in which labor and economic growth are seen as ends in themselves? And how might we begin not just to refuse such understandings of labor and growth, but to imagine different forms that they might take? In this course we will confront these questions, exploring the relationship between labor, production, and human flourishing. We will begin by studying foundational articulations of this relationship from thinkers like Max Weber, Karl Marx, and Hannah Arendt, looking as well at the unique place that agricultural production, cultivation, has been understood to occupy therein. We will then turn to the agrarian realm as a particularly potent site from which to trouble and extend our conceptions of labor and growth, examining visions of spiritual labor, anticolonial resistance, and more-than-human entanglement in theoretical and literary texts from Leo Tolstoy, M.K. Gandhi, Mahasweta Devi, J.M. Coetzee, and others. Through our readings and discussions, we will learn to identify and critique the normative claims on which our current energy-intensive, exhaustion-inducting circumstances are based. At the same time, we will cultivate the skills required to seek out and imagine alternative forms of work, community, and the good life.

CHUM396 Bored in the House: Work, Leisure, and the Domestic Mundane
At the beginning of the COVID epidemic, Detroit rapper Curtis Roach released an instant classic on TikTok, a fifteen second ditty capturing the zeitgeist of the coming wave of domestic isolation: "Okay I'm bored in the house, and I'm in the house bored." The recent waves of mass quarantine, both forced and quasi-voluntary, have crystallized our focus on the domestic, and its attendant crises. More than ever, we must confront the vanishing material and psychic separations between work and leisure, the badly needed reimagining of public and private not anchored in a spectral domestic privacy, and the foundational dynamics of class, race, sexuality, gender, capacity, and institutionalized violence that structure where we can live, work, and play. This course has a special focus on the exhausting digital, which sucks up ever more energy (both in terms electric power--see the astounding energy use to train and deploy generative AI--and human attention and engagement) while leaving us with sleeping problems, carpal tunnel, and phantom vibrations. This course seeks to be not just an academic study of the themes of this course, but an ongoing experiment in boredom praxis. We will think about what we do when we are bored, and why, and we will try to sit with and direct our boredom in gently investigational ways. This also extends to critically thinking about how we do work in this class, and our techniques and tactics of maintaining leisure time in academia.

Prereq: **None**

CHUM398 Marxism and Climate Crisis
Since the Communist Manifesto of 1848, the notion of "crisis" has played a prominent role in Marxist theorizing. Today's intensifying climate crisis is lending new theoretical and political weight to the Marxist critique of extractive, productive, and consumptive practices that transform nature into a means of production for ensuring ceaseless economic growth through the accumulation of capital. The consequences of this are not only the exhaustion of human labor-power and human sociality but also of non-human nature (fossilized carbon, wild animal biomass, topsoil, clean water, forests, etc.). Our perspective for studying and understanding this destructive transformation of nature will primarily be informed by a set of recent "eco Marxist" writings that oppose eco-modernist technocracy and instead reconceptualize capitalism as "a way of organizing nature" (J. Moore); extend the notion of social alienation to a "metabolic rift" between the labor process and the natural environment (Saito's "degrowth communism"); and explore the economic and ideological drivers behind the current expansion of fossil fuel extraction (Malm and the Zetkin collective).
In light of the Center's semester theme of Energy and Exhaustion, we will ask three kinds of questions: historical (about the origins of the "Capitalocene" and of "fossil capital"); theoretical (how is Marx's "general law of accumulation" also a law of environmental depletion and planetary limits?); and political (traditional "Promethean" Marxism envisioned revolution as the full actualization of productive forces -- what is the meaning of social revolution in our age of emerging fascism and overshooting climate limits?).
Offering: **Host**

Identical With: **COL398, STS398, GRST298**
Prereq: **None**

CHUM399 Burnout
Moderns have excelled at exhausting themselves, their others, and the planet. In this seminar we will explore the disposition toward depletion as a constitutive problem of life and thought in the twentieth and twenty-first centuries. Why do we wear the world out and who do we become in so doing? We will examine "burnout" as a condition connecting psychic, political, aesthetic, and ecological distress in the simultaneously listless and overexcited present. Convening resources from philosophy, history, anthropology, political theory, literary studies, and contemporary art, we will consider, among other things: fossil fuels, neoliberal economic thought, enervation and nervous over-animation, stimulants, thermodynamics, empty calories, extravagant gift-giving, geological science, secular finitude, the "End of History," the loss of utopias, and deficits of attention.

Grading: **OPT**

CHEMISTRY

Chemistry is the science of molecules: what they are, how they are made, and what they do. We are embedded in a world of naturally occurring and synthetic molecules. A familiarity with chemistry is not only fundamental to other sciences, but is relevant to government, art, economics, and archaeology.

Students and faculty in the Wesleyan Chemistry Department study important modern chemical problems in both the classroom and the research laboratory. Research in the department spans organic and inorganic nanomaterials, new recyclable polymers, the molecular basis of neurodegenerative diseases, understanding the structures and dynamics of proteins, the development of biofuels, the structures of molecules in the interstellar medium, the development of new therapeutic and diagnostic drugs, and computational approaches to complex chemical systems.

AFFILIATED FACULTY

David L. Beveridge
BA, College of Wooster; PHD, University of Cincinnati; MAA, Wesleyan University

Co-coordinator, Molecular Biophysics; Joshua Boger University Professor of the Sciences and Mathematics, Emeritus; Professor, Integrative Sciences, Emeritus; Research Professor of Chemistry; Visiting Researcher

Michael Jay Frisch
PHD, Carnegie Mellon University
Tishler Professor of Chemistry

Matthew Guberman-Pfeffer
PHD, University of Connecticut
Visiting Scholar in Chemistry

Camille Keeler
Research Affiliate in Chemistry; Manager of Scientific Facilities and Instrumentation

Rachel Lowe
Visiting Scholar in Chemistry

Aayatti Mallick Gupta
Visiting Scholar in Chemistry; Temporary Postdoctoral Research Associate

Stanley Daniel Menacherry
PhD, Emory University
Visiting Scholar in Chemistry

Melisa Moreno Garcia
Visiting Scholar in Chemistry

CHAIR

Erika A. Taylor

- Master of Arts in Chemistry (https://catalog.wesleyan.edu/departments/chem/grad-chem-ma/)

CHEM101Z Basic Principles of General Chemistry
CHEM 101Z is a compressed-schedule, summer-only, online course. This course will relate the fundamental concepts of general chemistry to the world around us, illustrating how the field of chemistry works to explain many aspects of everyday life. Intended for students generally interested in science who have little to no background in chemistry, this course would be appropriate as either a general-education science course or as a preparatory course for General Chemistry I. Topical coverage will include a broad survey of topics including

(but not limited to): measurement, atomic theory, the mole concept, bonding, chemical reactions, equilibrium, solutions, and acid-base chemistry.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM102Z Basic Principles of Organic Chemistry
CHEM 102Z is a compressed-schedule, summer-only, online course. This course will introduce the fundamental concepts of organic chemistry in order to better understand the myriad of organic compounds that we encounter in our everyday lives. This course would be appropriate as either a general-education science course or as a preparatory course for Organic Chemistry I. Topical coverage will include a broad survey of organic functional groups, including their nomenclature, physical properties, and general reactivity, as well as some exposure to how these functional groups are incorporated into biologically important molecules.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM101Z OR CHEM142 OR CHEM142Z OR CHEM144**

CHEM115 Chemistry in Your Life
This course will cover a wide range of topics of current interest that will show how chemistry is ever present in the world. In particular, the course will discuss the molecular basis of topics such as crime scene DNA testing, COVID-19 detection and vaccine development, the physical effects of drinking alcohol, and more.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM115F Chemistry in Your Life (FYS)
This course will cover a wide range of topics of current interest that will show how chemistry is ever present in the world. In particular, the course will discuss the molecular basis of topics such as crime scene DNA testing, COVID-19 detection and vaccine development, the physical effects of drinking alcohol, and more.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM118 DNA
This course provides an interdisciplinary view of the DNA molecule and its impact upon medicine, law, philosophy, agriculture, ethics, politics, and society at large. The course has two parts. In the first part, we will learn the chemistry and physics of DNA and the processes by which the information stored in DNA is expressed. In the second part of the course, we will discuss what DNA has done and still can do for us--for example, treat and prevent genetic diseases, improve our food through genetic engineering, achieve criminal justice through genetic fingerprinting, understand the evolutionary origin of humans, and enrich our idea of what it is to be human. The course assumes basic knowledge of chemistry and biology at the general high school level. Independent exploration and inquiry are encouraged.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM119 Biology and Chemistry in the Modern World: A Survey of Drugs and Disease
This course will cover a wide range of topics of current interest that are at the intersection of biology and chemistry. In particular, the molecular basis of issues related to drugs and disease will form a focus of the course. Topics to be discussed will include psychoactive and performance-enhancing drugs, mad cow, cancer, viral and bacterial diseases, and the chemistry of foods.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B119**
Prereq: **None**

CHEM121F Chemophobia: Precaution or Panic? (FYS)
Chemophobia is an aversion to or prejudice against chemistry and chemicals. There is abundant evidence of this across the mass media, and while some important issues have been brought to the forefront in this way, the hype and misunderstanding surrounding other issues has had adverse effects on our society. This course will look at both sides of the debate surrounding chemicals in our everyday lives--in our food, in our consumer products, and in our environment. We will begin with a discussion of how we arrived at our current perceptions of chemistry, and then we will delve into the facts and science behind some of the topical issues of concern to differentiate between what is merely hype and what we ought to be concerned about. This course is intended for anyone interested in the topic, regardless of their current knowledge of chemistry.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM127 Molecules on the Menu: From Classic Cuisine to Molecular Gastronomy
Cooking and baking are, at their core, chemistry in the kitchen. The taste, texture, structure, and appearance of our favorite foods result from the interactions--and reactions--of molecules. This course will explore the way that molecules interact with one another during the preparation of different recipes as well as how these molecules respond to external physical factors such as heat, cold, or stirring to give the final tasty result. By understanding what is happening when we follow a particular recipe, we will discover how to adapt recipes to our own tastes, troubleshoot recipes in different situations, and substitute ingredients.

The course will include a combination of lectures, cooking demonstrations, and weekly short experiments during which we will seek to answer questions such as: What is a cookie? How does one cook a "perfect" egg? Is it possible to cook without applying heat?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM137F The Self-Made Tapestry: Pattern Formation in Nature (FYS)
The natural world is filled with intricate patterns: for example, the characteristic stripes and spots of animals, the shifting landscapes of wind-blown desert sand dunes, the hexagonal forms of honeycombs, the near perfect six-fold symmetry of snowflakes, the branching patterns of arterial structures, convection patterns

in fluids, and the forms of soap films. Research suggests that many of these diverse patterns arise from a few relatively simple mechanisms that are independent of the fine details of each system. We will examine a wide range of these natural phenomena to develop insights into how complex morphologies may appear from a few simpler pattern-forming principles.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM141 General Chemistry I
CHEM 141 is the first half of a standard introductory course in general chemistry, intended for science majors and appropriate for premedical studies. Mathematical proficiency at the precalculus level is required. Prior completion of a high school chemistry course is typical, but not required. Students eligible for prematriculation credit in chemistry (from AP/IB-HL/A-Level CHEM, etc.) will not be granted credit if they enroll in this course and should instead enroll in CHEM 145 or take advanced placement to CHEM 251. The topics covered will include measurement, atomic and electronic structure, periodic trends, molecular structure and bonding, chemical reactions, stoichiometry, solutions, thermochemistry, and gases. The full-year curriculum may be completed with CHEM 142. Students considering CHEM 141 are strongly encouraged to consult https://www.wesleyan.edu/chem/undergraduate_program/chemistry-placement-information.html
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM141L General Chemistry Laboratory I
This course is the first half of a two-semester general chemistry laboratory sequence that fulfills general chemistry laboratory requirements for majors, minors, and premedical studies. Students learn and practice chemical safety and hygiene, foundational experimental techniques, and the collection, analysis, and communication of scientific data. The curriculum is designed to accompany CHEM 141, but Honors General Chemistry (CHEM 145) students should also complete the CHEM 141L/142L laboratory sequence to satisfy program requirements.

CHEM 141L must be taken concurrently with or after completion of general chemistry coursework.

Students who place directly into CHEM 251 through advanced placement should enroll in CHEM 257 instead.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM141R General Chemistry I Recitation
Recitation is a fourth-hour period designed for small group workshops and interactive learning. All students enrolled in CHEM141 must register for one section of CHEM141R.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM141Z General Chemistry I
CHEM 141Z is an intensive version of CHEM141. CHEM 141Z is the first half of a standard introductory course in general chemistry, intended for science majors and appropriate for pre-medical studies. Proficiency in algebra is required. Prior completion of a high school chemistry course is typical, but not required. The topics covered will include measurement and dimensional analysis; atomic structure; electronic structure; formula calculations and the mole; stoichiometry; solutions and aqueous reactions, part 1; heat and enthalpy; structure and bonding; and states of matter. The full general chemistry course curriculum can be completed by continuing to CHEM142/142Z.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM142 General Chemistry II
CHEM 142 is the second half of a standard introductory course in general chemistry, intended for science majors and appropriate for premedical studies. Proficiency in algebra is required. Prior completion of a high school chemistry course is typical, but not required. Topics covered will include solutions and aqueous reactions; kinetics; equilibrium; acids and bases; solubility equilibria; thermodynamics; electrochemistry; and nuclear chemistry.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM141 OR CHEM141Z**

CHEM142L General Chemistry Laboratory II
This course is a continuation of CHEM 141L and fulfills general chemistry laboratory requirements for majors, minors, and premedical studies. The curriculum is designed to accompany CHEM 142, but Honors General Chemistry (CHEM 145) students should also complete the CHEM 141L/142L laboratory sequence to satisfy program requirements.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM141L**

CHEM142R General Chemistry II Recitation
Recitation is a fourth-hour period designed for small group workshops and interactive learning. All students enrolled in CHEM142 must register for one section of CHEM142R.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM142Z General Chemistry II
CHEM 142Z is an intensive version of CHEM142. CHEM 142Z is the second half of a standard introductory course in general chemistry, intended for science majors and appropriate for pre-medical studies. Proficiency in algebra is required. Prior completion of a high school chemistry course is typical, but not required. The topics covered will include solutions and aqueous reactions, part 2; kinetics; equilibrium; acids and bases; solubility equilibria; thermodynamics; electrochemistry; and nuclear chemistry.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM141 OR CHEM141Z**

CHEM145 Honors General Chemistry
This accelerated, one-semester course in general chemistry is designed for science majors and pre-medical students who have advanced academic preparation, especially honors/AP/IB/A-Level chemistry courses. Eligible students interested in the CHEM, MB&B, and NS&B majors are strongly encouraged to choose this option as the best preparation for further study. The course provides a rigorous introduction to the fundamental principles of chemistry, including atomic and molecular structure, chemical bonding, stoichiometry, thermochemistry, states of matter, solutions, kinetics, equilibrium, acids and bases, thermodynamics, and electrochemistry. This one-semester honors course serves as an alternative to the CHEM 141/142 sequence for all course prerequisites, as well as major/minor and pre-medical/pre-health requirements.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM150 Introduction to Organic Chemistry
This course is designed as a "head start" to the organic chemistry sequence (CHEM 251/252), consisting of a weekly workshop designed to prepare students for the coming fall semester. Topics covered include structural formulas of organic compounds, organic chemical nomenclature and vocabulary, basic rules of writing organic reaction mechanisms, and how to use ChemDraw software.

Students who have completed CHEM 251 may not enroll in this course.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM141 OR CHEM143**

CHEM152 Introductory Chemistry Laboratory
This course introduces students to the application of chemical concepts in the laboratory. This one-semester course is the only laboratory course taken concurrently with general chemistry courses (CHEM 141/142 or 145), and it serves as the first course in a three-semester laboratory sequence designed to fulfill chemistry lab requirements for pre-medical/health studies. CHEM 152 is offered in both the fall and spring semesters. Students who place directly into CHEM 144 with advanced placement credit must take this laboratory course if they intend to take CHEM 257 in a future semester. Students who place directly into CHEM 251 with advanced placement credit do not take this laboratory course; these students should enroll directly into CHEM 257 instead.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM251 Organic Chemistry I
This course offers an introduction to the chemistry of carbon compounds with emphasis on the relationship between structure and reactivity. The laboratory course CHEM257 is normally elected concurrently but is not required. Students with advanced placement credit who wish to enroll in CHEM251 without having previously taken chemistry courses at Wesleyan are strongly encouraged to consult https://www.wesleyan.edu/chem/about_the_major/first_year_students.html
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM142 OR CHEM142Z OR CHEM144 or CHEM145**

CHEM252 Organic Chemistry II
This course is a continuation of the chemistry of carbon compounds with emphasis on the chemistry of important functional groups. The laboratory course CHEM258 is normally elected concurrently but is not required.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM251**

CHEM257 Intermediate Chemistry Laboratory
This course is a continuation of CHEM 152, and it is designed to prepare students for more advanced chemistry lab courses. This course is normally taken concurrently with CHEM 251, and it fulfills part of the chemistry lab requirement for pre-medical/health studies. Students who place directly into CHEM 251 with AP/IB credit should enroll in this course without taking CHEM 152.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144) AND (CHEM152 OR CHEM152Z)**

CHEM258 Organic Chemistry Laboratory
CHEM 258 is offered as an experience to reinforce the concepts learned in organic chemistry lecture courses and to provide hands-on experience to safely carry out basic organic synthesis laboratory techniques. This course will provide students with advanced experience in organic chemistry laboratory experiments. Students will learn to assemble laboratory apparatus for basic experimental techniques such as vacuum filtration, recrystallization, reflux reaction setup, simple distillation, melting point analysis, and thin layer chromatography.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Prereq: **(CHEM251 AND CHEM257)**

CHEM296 Braving the Elements: A Calderwood Seminar in Public Writing about Chemistry
Writing is hard. Writing about chemistry for a general audience is just a bit harder, but the ability to communicate technical information to the public and to policy makers has never been more important. Good chemistry writing requires a solid grasp of the science, the ability to identify the most essential concepts, and the talent to express them in non-technical, jargon-free language. All of these are learnable skills. Participants will produce pieces in a variety of short forms (e.g., essay, policy summary, annotated figure) to become better writers. In the Calderwood Seminar tradition, the course will be structured as a workshop with students serving as both writers and editors.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **CHEM252**

CHEM307 Molecular Biophysics Journal Club I
This course includes presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from journals including but not limited to the Biophysical Journal, Biopolymers, Current Opinion iIn Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.

Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B507, MB&B307, CHEM507, PHYS317, PHYS517**
Prereq: **None**

CHEM308 Molecular Biophysics Journal Club II
Presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from the Biophysical Journal, Biopolymers, Current Opinion in Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B508, MB&B308, CHEM508, PHYS318, PHYS518**
Prereq: **None**

CHEM309 Molecular and Cellular Biophysics
This course is an integration of the physical and chemical principles underlying biological systems from molecules to cells. The objectives are to develop an understanding of the underlying biological and physical principles that inform biophysical methods (e.g., protein-protein interaction studies, enzyme kinetics, spectroscopy, structural biology), how these concepts and techniques can be used to address open scientific questions, and how to critically evaluate their use in scientific literature. Particular emphasis will be placed on the biophysical concepts underlying studies of proteins, enzymes, and metalloproteins.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B309, CHEM509, MB&B509, PHYS339, PHYS539**
Prereq: **None**

CHEM314 Environmental Chemistry
This course is designed for students with college-level general and organic chemistry background. Examples of topics to be covered include energy production and consumption, chemical pollution and environmental clean-up, among others. Analysis and criticism of environmental literature are included.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM251 AND CHEM257**

CHEM317 Quantitative Chemical Analysis
Measurement and chemical analysis are at the very heart of the chemical sciences. Practicing chemists depend heavily on chemical analysis, as do medical professionals, environmental scientists, and many others. Quantitative chemical analysis is the science of determining "how much" -- as in, "how much toxic lead is in your drinking water?" In this course, you will first learn how to treat measured chemical data to extract meaningful information, and then we will proceed to study classical methods of chemical analysis, expanding upon your knowledge of general chemistry. A practical laboratory experience will reinforce the curriculum and build your skills as a chemist. This course is part of the required curriculum listed in the American Chemical Society Guidelines for Bachelor's Degree Programs, and this course is highly recommended for students who intend to pursue graduate studies and/or employment in a chemical discipline.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **E&ES395**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144 OR CHEM145) AND (CHEM152 OR CHEM152Z)**

CHEM317L Quantitative Chemical Analysis Laboratory
This laboratory course is designed to accompany Quantitative Chemical Analysis (CHEM 317) and provides hands-on experience with the techniques and principles covered in the lecture. This course is a required component of CHEM 317, and only students concurrently enrolled in CHEM 317 may register for this course.
Offering: **Host**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **E&ES395L**
Prereq: **CHEM152**

CHEM318 Instrumental Analysis
Chemical analysis has kept pace with the advent of modern technology through the development of instruments capable of ever-improving levels of detection for both qualitative and quantitative analysis. Many students are exposed to the use and interpretation of these modern methods of chemical analysis, but this experience typically comes with little understanding of how and why these instruments work. This course will investigate instrumentation across three broad categories of analysis: electrochemical, spectrochemical, and separations. The lecture course will be supplemented with a practical laboratory experience. Instrumental analysis is part of the required curriculum listed in the American Chemical Society Guidelines for Bachelor's Degree Programs, and this course is highly recommended for students who intend to pursue graduate studies and/or employment in a chemical discipline.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **E&ES396**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144) AND (CHEM152 OR CHEM152Z)**

CHEM321 Biomedicinal Chemistry
This course is designed to explore the molecular basis of disease and treatment options. Topics will reflect the importance of chemistry and biochemistry in the advancement of medicine today and will include treatment of metabolic disorders, rational drug design, and mode of drug action. A large portion of the course will be dedicated to learning computer programs used in computational drug design as part of a final drug design project.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B321**
Prereq: **(CHEM251 AND [CHEM383 or MB&B383])**

CHEM323 Biochemistry of Neurodegenerative Disease
Broadly defined, neurodegenerative disease occurs when a specific class of neuron dies and thus fails in its biological action. In this course, we will delve into the many different, intricate ways neuron death can occur and cause disease. From the chemistry of neurotransmitters, aggregation of proteins, and the collapse of neuromuscular junctions, many areas of the neurobiology can go awry. The focus of the course will be on understanding the complex interplay of small molecules and proteins that keep neurons healthy and functional. In this course, we will use current primary literature and lecture to understand the varied topics. This course aims to improve skills in reading and analysis

of primary literature as well as the written and oral presentation of scientific findings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **NS&B323**
Prereq: **BIOL181 AND CHEM252**

CHEM325 Introduction to Biomolecular Structure
This course aims to provide a framework for understanding three-dimensional structures of proteins, nucleic acids, and their complexes. The first half of the course emphasizes structural modules and topological patterns in major classes of proteins and nucleic acids. The second part of the course covers novel structural motifs, such as helix-turn-helix, zinc-finger, and leucine zipper, that are responsible for recognition of specific nucleotide sequences in nucleic acids by proteins. Analysis of structures using tools available on the Web and independent exploration of protein and nucleic acid databases are strongly encouraged.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B325**
Prereq: **None**

CHEM335 Protein Folding: From Misfolding to Disease
Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B535, MB&B335, CHEM535**
Prereq: **MB&B208 OR MB&B325**

CHEM337 Physical Chemistry I
A rigorous introduction to quantum mechanics, this course covers wave mechanics, operator methods, matrix mechanics, perturbation theory, angular momentum, molecular vibrations, atomic and molecular structure, symmetry, and spectroscopy.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144) AND MATH122**

CHEM338 Physical Chemistry II
This course investigates chemical aspects of statistical mechanics and the laws of thermodynamics including free energy, chemical potential and chemical equilibria, and rates of chemical reactions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM337**

CHEM340 Quantum Chemistry
This course is an introduction to modern molecular electronic structure calculations. Through in-class lectures and in-class exercises students will become familiar with some of the most popular methods for electronic structure calculations in molecules using the Gaussian computational chemistry package. The main emphasis of the course is to provide the students with the tools to devise their own computational chemistry calculations and to be able to assess whether any given calculation is likely to provide meaningful answers to chemical questions.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **CHEM540**
Prereq: **CHEM337 OR PHYS315 OR PHYS515**

CHEM345 Molecular Spectroscopy
This is a lecture/discussion course in various selected topics in modern high-resolution spectroscopy. Microwave spectroscopy, angular momentum theory, electronic spectroscopy of diatomic molecules and vibrational normal mode analysis, and other topics will be covered dependent upon class interest.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM358 Structure and Mechanism
This course will cover several important aspects of traditional and contemporary physical organic and mechanistic chemistry, including frontier molecular orbital theory and pericyclic reactions, organic photochemistry reactive intermediates (carbocations, carbanions, radicals, and carbenes), the thermodynamics and kinetics of organic reactions, and polymer chemistry.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM252**

CHEM359 Advanced Organic Synthesis
The control of reactivity and selectivity to achieve specific syntheses is one of the overarching goals of organic chemistry. This course is intended to provide advanced undergraduate and graduate students in chemistry with a sufficient foundation to comprehend and use research literature in organic chemistry. Concentrating on the most important reactions and efficient synthetic methods used for organic synthesis, this course presents the material by reaction type. The planning and execution of multistep synthesis will also be included.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM251 AND CHEM252**

CHEM361 Advanced Inorganic Chemistry
This course is a survey of the chemistry of the inorganic elements, focusing on the relationship between electronic structure, physical properties, and reactivity across the periodic table. Major emphases include chemical applications of group theory in electronic structure and spectroscopy and reaction mechanisms of inorganic transformations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM252**

CHEM369 Symmetry and Its Applications in Chemistry
Symmetry concepts pervade science and lead to fundamental new insights. In chemistry, symmetry is central to understanding spectroscopy, electronic structure, and reactivity. We will develop a relatively sophisticated group theoretical approach to molecular symmetry and its applications in understanding chemical systems. Specific topics will range from relatively simple predictions of chirality to implications for reaction mechanisms to understanding how orbital and spin angular momenta couple and influence molecular properties.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM337 OR CHEM361**

CHEM373 Polymer Chemistry
The commercialization of plastics in the 20th century revolutionized our materials economy. In this course, we will examine the foundational principles of macromolecular chemistry, including polymer properties, synthesis, and characterization. Not only will we study the founding of polymer science, we'll look to the future and examine how we can design more sustainable materials.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM252**

CHEM375 Integrated Chemistry Laboratory I
This advanced lab course in chemistry involves work from the major subdisciplines: organic, inorganic, biochemistry, physical, and instrumental. Emphasis will be placed on integrated aspects of chemical synthesis, spectroscopic characterization and determination of physical properties in each exercise. Students will practice safety, scientific literacy, and scientific writing skills and will develop strong laboratory, problem solving and analytical skills.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM252 AND CHEM258**

CHEM376 Integrated Chemistry Laboratory II
The Integrated Laboratory sequence is a capstone for the chemistry major and is designed to provide students with: 1) documented experience in a variety of standard laboratory techniques and the operation of a range of analytical instruments; 2) advanced skills in searching, reading, and critically assessing the primary literature; and 3) practice in communicating science effectively in written, visual, and oral formats. Students, in collaboration with the course staff, develop individualized courses of study to achieve these goals.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM375**

CHEM377 Chemistry of Materials and Nanomaterials
This course will provide an introduction to materials chemistry, with a special emphasis on nanomaterials. Topics covered will include colloidal metal nanomaterials; semiconductors and quantum dots; carbon nanotubes, fullerenes, and graphene; metal-organic frameworks; self-assembly and metamaterials; electron and scanning probe microscopies; and lithography. The course will also discuss applications of these materials and techniques in areas such as plasmonics and sensing, catalysis, energy generation, and medicine.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **PHYS377**
Prereq: **CHEM251**

CHEM379 Nanomaterials Lab
This course will be a combination of weekly lecture and laboratory exercises designed to introduce students to new developments in the chemistry of materials and nanomaterials. Concepts and theoretical background will be discussed during weekly lectures. Students will then apply those concepts to the preparation of materials/nanomaterials in weekly lab sections. Students will synthesize quantum dots, build solar cells, pattern surfaces using both photolithography and soft lithography, make conductive carbon nanofiber films, prepare high-temperature superconductors, and learn scanning probe microscopy techniques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **(CHEM257 AND CHEM258)**

CHEM381 Physical Chemistry for the Life Sciences
The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B381, MB&B581, ENVS382**
Prereq: **(CHEM251 AND MATH120) OR (CHEM251 AND MATH121)**

CHEM382 Practical and Theoretical NMR
Nuclear magnetic resonance (NMR) is an extremely powerful and flexible technique that can be used to analyze molecules sized from just a few atoms up to tens of thousands of atoms. This course will provide an introduction to how NMR spectroscopy works and background on the important theoretical aspects relevant for the most common NMR experiments. Time will be spent gaining practical experience in conducting NMR experiments both during and outside class. The ultimate goal of both the theoretical and hands on sections of this course is to enable you to correctly select and perform NMR experiments necessary to characterize molecules. In addition to learning how NMR hardware is used to produce spectra, we also cover important tasks like sample preparation and the finer points of data processing that will help you get better data. Beyond simple one-dimensional experiments, we will discuss a number of different multidimensional NMR experiments for determining the structures of small organic molecules, including COSY, HSQC, HMBC, and NOE. Furthermore, you will learn how protein structures are solved using 2D and 3D experiments, and how the motion of those proteins can be measured at the atomic level.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B382**
Prereq: **None**

CHEM383 Biochemistry
This rigorous introductory course to the principles and concepts of contemporary biochemistry presents both the biological and chemical perspectives. The major themes will be the structure and function of the major macromolecules (proteins, lipids, and carbohydrates), the basis and measurement of enzymatic activity, and general mammalian and plant cellular metabolism.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B383**
Prereq: **CHEM252 AND MB&B208**

CHEM385 NMR as a Tool for Structure Elucidation of Organic Compounds
Nuclear Magnetic Resonance (NMR) spectroscopy has emerged as such an extremely powerful tool for structure elucidation of organic compounds that its importance cannot be overstated. Automation of NMR data collection is becoming mainstream, and this course will focus on skills associated with spectral interpretation of organic compounds without involving complex mathematical equations. The course will take off with the basic principles and theory as applicable to 1H and 13C NMR, then walk you through the tips and tricks for the analysis of spectra to identify functional groups, atom connectivity, and assignment to the molecular structure in a step-by-step manner, leading to the capability of reading an NMR spectrum to reveal the structure the way a physician reads an ECG (electrocardiogram) to know your heart's rhythm and electrical activity. The fundamentals of several 1D and 2D NMR techniques--such as DEPT, COSY, HSQC, HMBC, and NOE--and their importance in problem solving strategies for structural elucidation will be highlighted. The problem solving and analysis skills obtained by performing structural elucidation will be useful in fields beyond chemistry.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM251 AND CHEM252**

CHEM386 Biological Thermodynamics
This course is addressed to undergraduate and graduate students interested in biological chemistry and structural biology. The course presents thermodynamic methods currently used to relate structure to function in biological molecules. Topics include binding curves, chemical ligand linkages, binding polynomial, cooperativity, site-specific binding processes, and allosteric effects. Several models for allosteric systems, such as the Monod-Wyman-Changeux model, the induced-fit model, and the Pauling model, are analyzed in detail. Applications of these models are illustrated for functional regulation of respiratory proteins and for protein-nucleic-acid complexes involved in control of gene expression.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B386**
Prereq: **(MATH121 AND MATH122)**

CHEM387 Enzyme Mechanisms
The chemical mechanisms involved in the action of a series of typical enzymes will be considered.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B387**
Prereq: **[CHEM383 or MB&B383]**

CHEM389 Pericyclic Reactions
Pericyclic reactions, which are also known by the name concerted organic reactions, are important topics in any chemistry postgraduate/undergraduate curriculum representing an important class of concerted processes involving pi-systems. Pericyclic reactions are governed by Woodward-Hoffmann rules. Concerted reorganization of bonding takes place throughout a cyclic array of continuously bonded atoms in these reactions. Cycloadditions, cheletropic reactions, electrocyclic reactions, sigmatropic rearrangements, and group transfer reactions are some of the major types of pericyclic reactions. Though initially considered as reactions aloof to solvent effects or the presence of catalysts, it has recently been shown that it is possible to influence pericyclic reactions using mechanical stress, catalysts, and notably enzymes. This course will uncover all the major topics in pericyclic reactions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM251 AND CHEM252**

CHEM390 Practical Methods in Biochemistry
This course centers on currently used techniques for protein separation, characterization, and purification, such as ultracentrifugation, gel electrophoresis, and chromatography. These topics will be introduced within the general context of the behavior of macromolecules in solution. The relative stability of proteins in different media, the forces stabilizing protein structure, and the interaction of proteins will be discussed. We will explicitly consider different techniques used to study proteins. Relatively novel techniques to be discussed include surface plasmon resonance, microarray methods and mass spectrometry, and single molecule microscopy. In the course, we will go through three or four different protein purification protocols and discuss the methods used in each one. We will also touch upon the commonly used spectroscopic techniques used to characterize proteins, including absorption, fluorescence, and circular dichroism. The course will focus on biochemical techniques and understanding the physical principles underlying these techniques and will also discuss tactics for optimizing established isolation and purification procedures and for isolating and characterizing an unknown protein.

The course content is appropriate for advanced undergraduates (juniors/seniors) and beginning graduate students from chemistry, biology, molecular biophysics or MB&B.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B340**
Prereq: **[MB&B208] OR [CHEM383 or MB&B383]**

CHEM395 Structural Biology Laboratory
One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by X-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, cryo-electron microscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, protein purification, and column chromatography. The course will provide hands-

on experience with spectroscopic and biophysical methods such as fluorescence, UV-Vis absorption, X-ray crystallography, isothermal titration calorimetry, and circular dichroism as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B395, PHYS395**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144) AND (CHEM325 OR MB&B208 OR PHYS207)**

CHEM396 Molecular Modeling and Design
This course will introduce students to the practical and theoretical aspects of computationally modeling and designing biological macromolecules, with a particular emphasis on protein structures. Students will run molecular dynamics simulations with Gromacs (http://www.gromacs.org) and do protein structure predication/design with Rosetta (https://www.rosettacommons.org). Over the course of the semester students will embark on a group research project, likely related to redesigning proteins that show potential for use as drugs. Both Gromacs and Rosetta use the Mac/Linux command-line, so having some familiarity with that prior to the course would be helpful but not required.

CHEM500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.
Offering: **Crosslisting**
Grading: **Cr/U**

Credits: **0.50**

Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

CHEM561 Graduate Field Research
Research in the field, normally on thesis project.
Offering: **Host**
Grading: **OPT**

CHEM565 Physical Methods in Chemistry
An introduction to the use of physical methods to characterize the structures and dynamics of chemical systems with a particular emphasis on applications in inorganic chemistry. Topics will include a variety of spectroscopies (e.g., optical absorption, circular dichroic techniques, infrared and Raman spectroscopies, NMR techniques), small molecule X-ray crystallography, and magnetic susceptibility measurements. Group theoretical techniques will be used extensively to develop selection rules.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Prereq: **CHEM361 OR CHEM337**

CHEM571 Graduate Seminar in Chemistry
This graduate-level seminar in chemistry will include weekly presentations and discussions based on current research. Speakers will present the details of their topic using specific examples and will place the research in a broader context with respect to the current literature while also providing adequate background information and drawing concepts together with critical concluding analysis.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CHEM**
Prereq: **None**

CHEM587 Seminar in Biological Chemistry
This course involves weekly presentations and discussions based on current research.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **MB&B587**
Prereq: **(CHEM383 or MB&B383 or CHEM325 or MB&B325 or MB&B208)**

CHEM588 Seminar in Biological Chemistry
This course involves weekly presentations and discussions based on current research.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **MB&B588**
Prereq: **(CHEM383 or MB&B383 or CHEM325 or MB&B325 or MB&B208)**

CHEM594 Braving the Elements: A Calderwood Seminar in Public Writing About Chemistry
Writing is hard. Writing about chemistry for a general audience is just a bit harder, but the ability to communicate technical information to the public and to policy makers has never been more important. Good chemistry writing requires a solid grasp of the science, the ability to identify the most essential concepts, and the talent to express them in non-technical, jargon-free language. All of these are learnable skills. Participants will produce pieces in a variety of short forms (e.g., essay, policy summary, annotated figure) to become better writers. In the Calderwood Seminar tradition, the course will be structured as a workshop with students serving as both writers and editors.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

CHEM596 Molecular Modeling and Design
This course will introduce students to the practical and theoretical aspects of computationally modeling and designing biological macromolecules, with a particular emphasis on protein structures. Students will run molecular dynamics simulations with Gromacs (http://www.gromacs.org) and do protein structure predication/design with Rosetta (https://www.rosettacommons.org). Over the course of the semester students will embark on a group research project, likely related to redesigning proteins that show potential for use as drugs. Both Gromacs and Rosetta use the Mac/Linux command-line, so having some familiarity with that prior to the course would be helpful but not required.
Offering: **Crosslisting**

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM396**
Prereq: **MB&B208 OR BIOL265 OR CHEM381 OR CHEM325 OR MB&B335 OR CHEM338 OR CHEM383 OR PHYS316 OR PHYS340 OR BIOL266**

CHEMISTRY MAJOR

MAJOR DESCRIPTION

The Chemistry major provides students with a strong foundation in the chemical sciences and extensive experience in practical laboratory techniques. Students learn to apply the scientific method to develop and test hypotheses, perform experiments, analyze data critically, and effectively communicate their findings.

The Chemistry Department offers two pathways to complete the major:

- The **Standard Chemistry Track (A-track)** is designed for students seeking the breadth and depth of a traditional chemistry education.
- The **Chemical Biology Track (B-track)** is ideal for students who wish to focus on using chemical tools and concepts to explore and manipulate biological systems.

This program is well suited for students who are curious about how matter behaves at the molecular scale, have strong quantitative and analytical skills, enjoy solving complex problems, and value precision and attention to detail.

Graduates of the Chemistry major often pursue advanced studies in doctoral or medical programs. Others go on to successful careers in fields such as scientific research, chemical engineering, pharmaceuticals, materials science, environmental science, patent law, technical writing, forensic science, and education.

ADMISSION TO THE MAJOR

To declare the chemistry major, students must have earned a grade of C or higher in all 100- and 200-level chemistry courses completed prior to declaration.

MAJOR REQUIREMENTS

The **Standard Chemistry (A-track)** major requires the following coursework:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
(may be fulfilled using CHEM145 and/or AP credit)		
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Introductory Labs		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Mathematics		
MATH121	Calculus I	1
MATH122	Calculus II	1
(may be fulfilled using AP credit or placement beyond MATH122)		
Physics		
PHYS113	General Physics I	1
PHYS116	General Physics II	1
(may be fulfilled using PHYS111/PHYS112)		
Inorganic Chemistry		
CHEM361	Advanced Inorganic Chemistry	1
(waived for students who completed CHEM144)		
Physical Chemistry		
CHEM337	Physical Chemistry I	1
CHEM338	Physical Chemistry II	1
(MATH221/MATH222 are recommended)		
Advanced Labs		
CHEM375	Integrated Chemistry Laboratory I	1
CHEM376	Integrated Chemistry Laboratory II	1
300-Level Electives		**2**
Select two 300-level chemistry courses		
• electives must be 1.0 credit or greater and graded (A-F)		
• 2.0 accumulated credits of CHEM research may replace one elective		
• students who use CHEM144 for the Inorganic requirement must choose a third elective		
Colloquium		
CHEM521	Chemistry Colloquium (two semesters required)	0.5
Senior Thesis (optional -- required for Departmental Honors)		
CHEM409	Senior Thesis Tutorial	1
CHEM410	Senior Thesis Tutorial	1

The **Chemical Biology (B-track)** major requires the following coursework:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
(may be fulfilled using CHEM145 and/or AP credit)		
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Introductory Labs		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Mathematics		
MATH121	Calculus I	1
MATH122	Calculus II	1
(may be fulfilled using AP credit or placement beyond MATH122)		
Biology		

BIOL181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
BIOL182	Principles of Biology II	1
Inorganic Chemistry		
CHEM361	Advanced Inorganic Chemistry	1
(waived for students who completed CHEM144)		
Physical Chemistry		
CHEM381	Physical Chemistry for the Life Sciences	1
Biochemistry		
MB&B208	Molecular Biology	1
CHEM383	Biochemistry	1
Advanced Labs (choose two)		
CHEM375	Integrated Chemistry Laboratory I	1
CHEM376	Integrated Chemistry Laboratory II	1
CHEM395	Structural Biology Laboratory	1
300-Level Electives		**1**
Select one 300-level chemistry courses		
• electives must be 1.0 credit or greater and graded (A-F)		
• 2.0 accumulated credits of CHEM research may replace one elective		
• students who use CHEM144 for the Inorganic requirement must choose a third elective		
Colloquium		
CHEM521	Chemistry Colloquium (two semesters required)	0.5
Senior Thesis (optional -- required for Departmental Honors)		
CHEM409	Senior Thesis Tutorial	1
CHEM410	Senior Thesis Tutorial	1

COURSES FOR NON-MAJORS

Students with little or no prior background in chemistry are encouraged to enroll in General Chemistry I and II (CHEM141 /CHEM142) , both of which fulfill NSM general education expectations and are appropriate for non-science majors. Students may also enroll in the Introductory Chemistry Laboratory (CHEM152) to supplement their coursework with hands-on experience.

Students with advanced preparation in chemistry are encouraged to enroll in Honors General Chemistry (CHEM145), a one-semester alternative to CHEM141/CHEM142. This course offers an enriched curriculum that explores the breadth of general chemistry topics in greater depth.

Students planning to apply to **medical, dental, or veterinary schools** are advised to complete the following prerequisite courses:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
or		
CHEM145	Honors General Chemistry	1
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Laboratories		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Biochemistry		
MB&B228	Medical Biochemistry	1

STUDENT LEARNING GOALS

Graduates with a BA in Chemistry should be able to:

- Apply the scientific method to develop and test hypotheses
- Understand, interpret, and apply chemical data
- Conduct standard laboratory procedures safely and effectively
- Use quantitative methods to solve chemical problems
- Locate and comprehend primary scientific literature
- Critically evaluate claims in chemical research
- Communicate findings clearly in written, oral, and visual forms
- Uphold ethical standards in scientific work
- Connect chemistry to other scientific disciplines

STUDY ABROAD

A semester abroad is possible with sufficient advance planning. Students are encouraged to consult with a chemistry faculty member early in the process to ensure appropriate course sequencing and progress toward the major.

ADVANCED PLACEMENT

Students who earn any of the following examination scores automatically receive 1.0 prematriculation credit in chemistry:

- **AP Chemistry**: score of 4 or 5
- **IB-HL Chemistry**: score of 5, 6, or 7
- **Cambridge A-Level Chemistry**: grade of A

This credit may be used in place of CHEM141, CHEM142, and CHEM152 to satisfy requirements for majors, minors, and course prerequisites. Students awarded prematriculation credit are not eligible to receive credit for CHEM141 or CHEM142, but may elect to enroll in **Honors General Chemistry** (CHEM145) for credit. Students who complete CHEM145 may also take **Introductory Chemistry Laboratory** (CHEM152) for credit.

LANGUAGE REQUIREMENT

The Chemistry major has no language requirement.

TRANSFER CREDIT

Transfer credit for chemistry courses taken at other institutions is subject to departmental approval and is not guaranteed. Requests are reviewed by the Chemistry Department Curriculum Committee and must be submitted in advance to confirm course eligibility prior to enrollment.

Submission Guidelines

Send all materials by email to **chemistry@wesleyan.edu before** enrolling in the course. Include the following:

- Completed *Permission to Transfer Credit* form (Office of Student Affairs)
- Detailed course syllabus, including schedule and topics covered
- Textbook title, author(s), edition, and chapters used
- Length of class meetings and total instructional hours (excluding exams)
- Instructor name and contact information

Additional Requirements

- Online lecture courses must have **synchronous** delivery. In-person courses are preferred.
- **Online laboratory courses will not be accepted**

ADDITIONAL INFORMATION

HONORS

Departmental honors are awarded by the faculty to graduating chemistry majors based on a thorough evaluation of the senior thesis, recognizing excellence in research, analysis, and scientific communication.

CAPSTONE EXPERIENCE

The recommended capstone experience for chemistry majors is a substantial research project conducted in collaboration with a faculty member, ideally culminating in a senior thesis. Research is a central component of the major for many students, and Wesleyan's small but distinguished graduate program provides unique opportunities for undergraduates to engage in advanced research alongside tenured and tenure-track faculty who are actively involved in significant investigations.

DOCTOR OF PHILOSOPHY IN CHEMISTRY

The Chemistry Department engages students in the science of the molecules—what they are, how they are made, and what they do—studying important chemical problems in both the classroom and the research laboratory. Research in the department spans organic and inorganic nanomaterials, new recyclable polymers, the molecular basis of neurodegenerative diseases, understanding the structures and dynamics of proteins, the development of biofuels, the development of new therapeutic and diagnostic drugs, and computational approaches to complex chemical systems.

The Department of Chemistry offers a graduate program leading to a Doctor of Philosophy in Chemistry. The program offers a breadth of research opportunities and course offerings, providing PhD students with exposure to many subfields of chemistry. Students develop close working relationships with faculty mentors, who help them design and follow their own customized program of study. PhD candidates acquire the skills to be independent chemical researchers and are qualified to design, carry out, interpret, and communicate the results of significant research projects.

Students pursuing the PhD in Chemistry are expected to write two research proposals, one during the second year related to the student's dissertation and a second in the fourth year, on a novel idea not directly related to the student's current work. PhD candidates may also choose a concentration in the interdisciplinary studies of either Chemical Physics or Molecular Biophysics. Students must complete at least two semesters as a teaching assistant as a means of developing communication and teaching skills. To earn their degree, the PhD candidate must complete a significant body of original research and defend their dissertation to their faculty advisory committee, the department, and the broader community.

COURSES

All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled at the University.

Course requirements are designed to achieve two basic goals:

1. **Acquisition of background knowledge.** A central common core of material is expected for all chemists. Graduate students take appropriate one-semester core courses in the areas of organic chemistry, inorganic chemistry, biochemistry, physical chemistry, and quantum chemistry. Students with previous equivalent coursework may be exempted from one core course not in their primary field of study by petition.
2. **Continued scholarly growth.** Graduate students are required to take at least one course every semester. This may be a regular advanced course in chemistry or a related discipline, a weekly seminar, or a research tutorial.

LANGUAGE REQUIREMENT

There is no language requirement associated with this program.

PROGRESS AND QUALIFYING EXAMS

Progress examinations are open-book, take-home exercises that are offered approximately monthly during the academic year. These examinations are based on articles in the current literature and are designed to assist graduate students in keeping up with recent developments in chemistry. They also provide valuable training in reading the chemical literature critically and for suggesting areas in which the student may benefit from additional study. PhD students are required to pass 15 elementary and seven advanced progress exams, which is typically completed by the end of the second or early in the third year of the program.

TEACHING

Completion of at least two semesters as a teaching assistant is generally required for the PhD degree. These assignments are provided as a means of developing communication and teaching skills. Graduate students may be given more advanced teaching responsibilities as appropriate.

RESEARCH

Writing research proposals is an important part of the PhD program in chemistry. Writing scientific proposals develops expertise in evaluating the scientific literature, integrating knowledge from several areas, formulating interesting scientific questions, designing a research project to answer those questions, writing clear scientific prose, and defending a project proposal. Two proposals are required: one during the second year related to the student's dissertation research plans and a second, in the fourth year, on a novel idea not directly related to the student's current work.

DISSERTATION AND DEFENSE

The successful completion of a significant body of original research and the defense of a dissertation is the single most important requirement for the PhD. The candidate will defend the dissertation to their faculty advisory committee, followed by a seminar open to the department and the broader community.

CONCENTRATIONS

CHEMICAL PHYSICS

Guiding Committee: Lutz Hüwel, *Physics*; Carlos Jimenez-Hoyos, *Chemistry*; Stewart E. Novick, *Chemistry*; Brian Stewart, *Physics*

Upon admission and while in their first year, students in the chemistry or physics graduate programs may petition their department for admission to the interdisciplinary program in chemical physics. The philosophy underlying the program is that the solution to contemporary problems must increasingly be sought not within a single traditional specialty but from the application of different disciplines to particular problems. Students in the program will pursue a course of study and research that will familiarize them with both the Physics and Chemistry Departments and, in particular, with those areas of overlapping interest that we broadly categorize as chemical physics.

Students entering the chemical physics program will be assigned an interdepartmental committee to oversee their progress toward the PhD degree. Chemistry graduate students will receive a PhD in chemistry and are expected to choose a research advisor in the Chemistry Department. Students in the Chemical Physics Program will be expected to enroll in courses from both departments and choose an advisor in the Chemistry Department. The core of the program of courses consists of quantum chemistry (offered by the Chemistry Department), quantum mechanics (offered by either department), electrodynamics (offered by the Physics Department), statistical mechanics (either department), and mathematical physics (Physics Department). For details of the course offerings, see the listings under the Chemistry and Physics Departments on WesMaps.

Seminars. Students will participate in the Chemical Physics Seminar series and will be expected to present at least one talk per year.

Examinations. Chemistry students in the Chemical Physics program will follow the requirements of the Chemistry Department, including two research proposals, oral defense of the second year proposal, and the submission and oral defense of the research dissertation. Students in the Chemical Physics program are expected to take all progress exams offered in the general area of physical chemistry and are required to pass 10 elementary and five advanced exams (in any area).

Research Rotations. Students in the Chemical Physics program complete three rotations in the first semester to choose a research advisor from among the participating faculty.

MOLECULAR BIOPHYSICS

The Chemistry Department participates in an interdisciplinary program of graduate study in molecular biophysics with the Departments of Molecular Biology and Biochemistry (MB&B), Biology, and Physics. The program provides a course of study and research that overlaps the disciplinary boundaries of chemistry, physics, biology, and molecular biology and is designed for students with an undergraduate background in any one of these areas. Students in the program are enrolled in one of the participating departments and fulfill canonical requirements of that department. In addition, they take advanced courses in molecular biophysics and pursue dissertation research with one of the faculty in the program. Centerpieces of the program are the weekly interdepartmental journal club in molecular biophysics and an annual off-campus research retreat. Both activities bring together students, research associates, and faculty from all participating departments and foster interdisciplinary collaborative projects.

Students interested in this program may indicate their interest on the application for admission to the Chemistry, MB&B, Physics, or Biology Departments. Application forms for these departments are available at: https://admission.wesleyan.edu/apply/.

CLASSICAL STUDIES

MAJOR DESCRIPTION

The Major in Classical Studies (CLST) offers a multidisciplinary approach to the diverse and extraordinary civilizations of ancient Greece, Rome, and the broader Mediterranean world. Students explore everything from politics and media, environment, religion, literature and reception, to art and material culture. They can participate in archaeological excavations, read inscriptions in Rome, study political drama in Athens, or use satellite imagery and Greek papyri to reconstruct the agricultural practices of ancient Egypt. Critical study of these ancient cultures in their original contexts - and the long shadows they cast

into our own time - enriches our understanding of the present and offers new perspectives on contemporary challenges.

Students choose from three concentrations: **Literature and Performance**, **History, Politics, and Social Justice**, and **Archaeology.** Each builds skills in integrative reasoning, writing, and competency in multi-disciplinary data analysis. All students develop proficiency in Latin or Greek and engage with original texts. The Department encourages study or fieldwork in the Mediterranean and offers funding for these opportunities.

Classical Studies students are drawn to the mysteries of the ancient past, but with a keen eye towards the problems of the present. They demonstrate curiosity and creativity, attention to detail, and strong abilities in language, research, writing, and critical thinking. They have an adventurous side.

The major prepares students for work in any field. Recent majors have built successful careers in law, politics, medicine, media and communications, cultural heritage institutions, and government, as well as finance and technology. The department collaborates with the Gordon Career Center (https://careercenter.wesleyan.edu/) and maintains an active alumni network to support students after Wesleyan.

AFFILIATED FACULTY

Elizabeth Bobrick
BA, Marlboro College; MA, Johns Hopkins University; PHD, Johns Hopkins University
Visiting Professor of Letters; Visiting Professor in Liberal Studies; Visiting Scholar in Classical Studies

CHAIR

Kate Birney
BA, Yale University; MT, Harvard University; PHD, Harvard University
Chair, Classical Studies; Associate Professor of Classical Studies; Associate Professor, Art History; Associate Professor, Archaeology

EMERITI

Marilyn A. Katz
BS, Columbia University; MA, Yale University; PHD, Yale University; MAA, Wesleyan University
Professor of Classical Studies, Emerita

Christopher Parslow
BA, Grinnell College; MA, University of Iowa; PHD, Duke University
Robert Rich Professor of Latin, Emeritus

Michael J. Roberts
BA, Cambridge University; MA, Cambridge University; MA, University of Illinois Urbana; PHD, University of Illinois Urbana; MAA, Wesleyan University
Robert Rich Professor of Latin, Emeritus

Provost's Distinguished Fellow of Classical Studies

Under Construction

Classical Studies Major (p. 252)

CLASSICAL STUDIES

CLST112F Three Great Myths: Prometheus, Persephone, and Dionysus (FYS)
This course is a detailed analysis of three important myths from classical antiquity: the stories of Prometheus, Persephone, and Dionysus. Students will examine literary and visual representations from antiquity and also consider how these myths live on in the Western tradition.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST115F Crafting (Un)Ideal States: Utopias and Games of the Mind, Past and Present (FYS)
Utopias are imaginary places that promise freedom, equality, and happiness. In this course, we will look at different visions of utopian living: What kinds of hope, longing, and impulses do these utopias fulfill? What kind of social critique do they imply? How can they offer freedom and happiness while built on strict programs of biological, psychological, and social engineering? When does one's utopia become another's dystopia?

We will start with ancient Greek poetry and philosophy--Homer, tragedy, Aristophanic comedy, and Plato--to trace the beginnings of utopian thinking and the promises that it makes. In the last part of the semester, we will look at how these early seeds of utopia are recast and developed in later and contemporary literature, theory, and television shows, including Thomas More's "Utopia" and Emily St. John Mandel's "Station Eleven"; selections from T. Adorno, E. Bloch, and F. Jameson; and select episodes from "Black Mirror."
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST120F From Democracy to Autocracy: Demagogues, Tyrants, and Popular Media in Ancient Greece and Rome (FYS)
Although different, the political systems of Greece and Rome, many of which serve as a model for our own government, were carefully designed to balance military, social, and political participation and empowerment, and to defend against the consolidation of power by any single citizen or group. Eventually, both Greek democracy and the Roman Republic failed. Why? This course examines in depth the political and legal structures of two ancient societies which began with participatory or representative governments and slid toward autocracy. Drawing on a range of sources in translation (historical, legal, poetic), we will explore the emergence and evolution of political systems, from the rise of democracy in Greece to its lapse into oligarchy, and from the Roman Republic to its subversion by charismatic leaders and the advent of empire. Along the way, we will discuss the rise of a celebrity culture and the impact of the increasing importance of public spectacles and entertainments as a vehicle for the demoralization of citizens and the slide into autocracy. Where did they go wrong?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST125F Greek History (FYS)
Using primary sources wherever possible, this course will examine the development of Greek civilization from Mycenaean times through the death of Alexander the Great. Special attention will be given to the connection between political events and cultural and intellectual trends. No prior acquaintance with ancient history is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST129F Ancient Monuments: Landscape, History, and Memory (FYS)
In this course, we will examine some of the most renowned sites from Greek and Roman antiquity, such as the Parthenon and the other monuments on and near the Athenian Acropolis, the Colosseum and Forum in Rome, and Pompeii. The aim is to get a broad understanding of their significance, and so the sources will include ancient texts, modern scholarship and travel narrative, and visual representations such as drawings and photographs. We will pay particular attention to the ways in which the ancient sites interact with their surroundings.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ENVS**
Prereq: **None**

CLST130F Looking Back, Moving Forward: Identities, Politics, and Truth-Making in Classical Antiquity (FYS)
The world of classical antiquity has been both celebrated and reviled for its role in shaping historical notions of who and what matters, and whose truths are passed into posterity. From politics and media to social identities and the creation of canon, this course will explore constructions of authority, power, and truth-making in the classical world and their echoes in modern life. How does democracy enfranchise some and marginalize others? Who has the "authority" to decide what is natural law, scientific truth, divine right? Is there a difference between truth-telling and truth-making in the stories we tell, the information we share, the art that we make?

This course will turn to a variety of materials from the ancient Greek and Roman world--including myth, literature, medicine, law, drama, archaeological sites, and monuments--to address these questions. Class, status, race, ethnicity, the marginalized "other," religion, civic identity, and the writing of history and science will emerge as central to ancient thinking and offer critical perspectives for reconsidering intersectional identities today. By looking systematically at different facets of the ancient world, we may come to a more nuanced understanding of injustices, inequities, and constructions of modernity through their ancient origins, and look critically at our current practices and perspectives.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST135F Humans and Other Animals
How have humans imagined the inner lives of other animals over time? What categories and roles have human societies assigned other animals, and how have we understood our responsibilities to them? This course presents readings from the earliest examples of world literature to contemporary theory and philosophy to explore human-animal relations across cultures and historical periods. How might these narratives and ideas inform our own relationships to other animals and our place in the planet's ecosystem? This co-taught course offers an interdisciplinary introduction to literature, animal studies, and environmental humanities, with a focus on close reading and effective academic writing.

Exemplary texts: the Sumerian epic Gilgamesh; selections from Homer's Odyssey and Vergil's Georgics; selections from the Sanskrit Ramayana; readings from Marie de France, Rilke, Kafka and J.M. Coetzee; readings on animal ethology, philosophy, and the legal status of non-human persons.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-COL**
Prereq: **None**

CLST150 Translating Love (CLAC)
This "lab" course will primarily focus on creative translation from Greek and Latin erotic poetry read in the parent course as an application of translation theory from the course, and as a direct encounter with Greek and Latin language. All levels of ancient language will be accommodated, and students do not need to know both or any ancient languages to participate--they may also choose to translate into their own native language, or another language with which they have familiarity. The course will be taught in English, and all students will be introduced to ancient languages as needed, and supported in their translation activities at all levels.

This CLAC will bring together traditional ancient language pedagogy and critical translation theory in creative literary translation. We will also invite practicing translators and scholars across Wesleyan's faculty to join our discussions on literature in translation as a practice and an object of study.
Offering: **Host**
Grading: **A-F**

Credits: **0.25**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST153F Single Combat in the Ancient World (FYS)
This course celebrates the clash of warriors in warfare, sport, and spectacle in the classical world. Using primary sources and archaeological evidence, the class will survey traditions of combat in ancient art, literature, and society, beginning with Greek and Near Eastern epic; the modes of warfare in Greek society; ancient Olympic combat sports; and, finally, Roman gladiator spectacle. We will examine the role of violent sport in Greek and Roman society, the reception of the competitors, and the use of these events for political or nationalistic ends. Throughout the course we will explore the flexibility of concepts such as military ethics, "western" warfare, violence, honor, and excellence, both in the classical world and in our modern lives.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **ARCP153F**
Prereq: **None**

CLST175F Hold My Wine: Drinking Culture in Ancient Greece (FYS)
Wine. Politics. Poetry. The potential for destructive behavior. All of these went hand-in-hand with the ancient Greek "symposium," or drinking party. In this course we will study this custom and the roles it played in Ancient Greek society and art, as an institution that regulated membership in elite society, a source of political and social unrest, a religious practice, an arena for the contestation of philosophical ideas, and a venue for the performance of music and poetry. In addition to the symposium itself, we will also consider related institutions, such as Spartan military feasting.

In this course, the symposium will be viewed through a variety of lenses. We will survey Greek literature from Homer down through Athenian drama and Plato. We will also study the archaeological record, with units on Greek vases and drinkware, and on the architecture of public and private drinking spaces. But the Greek symposium will itself be a lens through which we consider drinking culture in our own society, and its representation, for instance, in music and film.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST190F Beware the Ides, Beware the Hemlock: Roleplaying Crisis in Ancient Greece and Rome (FYS)
The Thirty Tyrants have at long last been expelled from Athens, and now it is up to you and your closest friends and enemies to determine the future of the greatest city-state in the Mediterranean. The conspiracy of Catiline has been uncovered, and the fate of the conspirators and of Rome rests in your hands. Two decades later, the dictator Julius Caesar has been assassinated, and it falls upon you to negotiate the Senate to decide what the People of Rome should do. Students will play in a number of "Reacting to the Past" scenarios set in ancient Greece and Rome--becoming stakeholders in these world-changing crises as they fight, speak, study, sweet-talk, and coerce their way to power over their classmates, be they allies or adversaries. This course is suitable for students of all interests and backgrounds and will offer opportunities to develop writing public-speaking, critical thinking, and persuasion skills.
Offering: **Host**
Grading: **A-F**

CLST201 Art and Archaeology of the Bronze Age Mediterranean
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.

CLST202 Greek Drama: Theater and Social Justice, Ancient and Modern
This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's Poetics and Plato's Republic. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy ¿ for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

CLST205 Gods, Heroes, and Chaos!: An Introduction to Greek and Roman Mythology
This class will dive into the wild and tumultuous world of ancient Greek and Roman mythology to begin to understand its impact on culture and identity in both the ancient and modern world, reading primary source literature, looking at iconography and material culture, and studying later examples of mythological reception. Primary sources span mythical stories of the creation of the universe and the gods themselves; the dramatic exploits, interrelationships, and depictions of the gods; the careers of major heroes and heroines; and the myth of the Trojan war and its long aftermath. While we read ancient works, we will discuss the impact of mythology on religious and cultural practices, history, cultural identity, art, politics, and day-to-day life. We will also discuss the enduring influence these myths have on modern culture -- for better and for worse -- in today's politics, culture and art. Students will acquire mythological literacy, to understand the language of myth itself in both the ancient and modern world, to be able to read the impact myth continues to have on the way we define the natural world, the divine, and humanity's place in the universe.

This course counts towards the Literature and Performance track of the Classics major.

CLST205Z Myths, Monsters, and Misogyny: An Introduction to Greek and Roman Mythology
In this class we will read literary versions of myths from Greece and Rome and look at representations in ancient and later art. Starting with myths of creation, we will move on to look at the individual gods and goddesses, their powers, and their place in ancient religion, then to the often perilous interactions of humans and gods. In the second half of the semester, we will concentrate on the heroes and heroines of mythology, ending with the Trojan War and its aftermath. The course aims to give a basic grounding in the stories and the images--creating mythologically literate students. As that analogy implies, we will also analyze myths as a system of communication and consider how these myths portray the world, the divine, and the place of men and women in relation to the gods, to nature, and to society.

CLST214 Survey of Greek Archaeology and Art
This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda!) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.

CLST215 Religion and Politics in Early Christianity
The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

CLST217 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

CLST220 Homer and the Epic
In this course we will read both the Iliad and the Odyssey (in English translation). These two great epics are recognized as the first major texts of the Western literary tradition, and they have had an incalculable influence on everything from literature, to history, to the visual arts. Through a close reading of both epics, we will consider issues such as Homeric composition and poetic practice, heroes and the heroic code, the relation between humans and gods, the role of fate, and the structure of Homeric society (e.g., the status of women; clan and community). We will also read a number of contemporary critical essays to help us frame our discussions.

CLST221 Law, Politics, and Order in the Ancient World
Legal texts -- law codes, decrees, and edicts, juristic discussions, law court cases -- help us understand the history of legal thinking and strategy, and the construction of constitutional frameworks. Yet Greek and Roman legal sources offer something more than a history: Although these texts in many ways served as the foundation for European legal systems, they nonetheless offer radically different ways of thinking about concepts such as private and public, rights versus responsibilities, and the possibility of freedom and happiness -- some more progressive than our own. In an era when many of our institutions and conventions appear open to challenge, the classical sources offer alternate legal and social ways of thinking, and new tools for understanding our own time.

This course will provide an introduction to legal thinking in classical antiquity and, drawing from a range of sources, will speak to the intersection of constitutional frameworks with political theory. Through narratives and case studies, we will examine Greek and Roman approaches to thorny legal issues that are still contested today: women's rights, wartime codes, the right to trial, torture, capital punishment, and immigration and citizenship, among others. The ancient sources will be brought into dialogue with current cases and debates. We will also explore the construction of constitutional frameworks and see how these are deployed alongside religious beliefs and collective mores to cultivate "civic thinking."

For CLST Major requirements and for Classics/CCIV Major requirements, this course falls under the History, Politics, and Social Justice track.

CLST225 Witches & Magic in Ancient Literature
This course will look at the role of magic and witchcraft in the culture and literature of the ancient world. What is "magic," who is a "witch," and how do these categories change through the centuries and fit into the cultures of ancient Greece and Rome? Using examples from material culture and different genres of literature (epic, philosophy, history, tragedy, elegy, satire, etc.), this course will examine the social function of magic, the complex relationship between magic/religion, the role of magic and the witch archetype in ancient literature, and how the witch relates to societal systems of gender, sexuality, and colonialism. Through understanding magic and witches' position in the ancient world, this course will provide critical insight into their reverberation through modern society.

CLST227 Humans and Other Animals
How have humans imagined the inner lives of other animals over time? What categories and roles have human societies assigned other animals, and how have we understood our responsibilities to them? This course presents readings from

the earliest examples of world literature to contemporary theory and philosophy to explore human-animal relations across cultures and historical periods.
How might these narratives and ideas inform our own relationships to other animals and our place in the planet's ecosystem? This co-taught course offers an interdisciplinary introduction to literature, animal studies, and environmental humanities, with a focus on close reading and effective academic writing.

Exemplary texts: the Sumerian epic Gilgamesh; selections from Homer's Odyssey and Vergil's Georgics; selections from the Sanskrit Ramayana; readings from Marie de France, Rilke, Kafka and J.M. Coetzee; readings on animal ethology, philosophy, and the legal status of non-human persons.

CLST228 Classical Allusions in Film
This course surveys the influence of classical antiquity on Western filmmaking from the late 1970s to the present day, with an emphasis on exploring the ways in which filmmakers allude to and encounter classical themes, settings, characters, history, and literature in their works. Classical mythology and history have been a source of fascination for filmmakers since the beginning of filmmaking itself. Ben Hur (1907), Quo Vadis (1913) and Cabiria (1914) were all silent but ambitious films depicting aspects of classical antiquity on an epic scale that would have a profound impact on the classical blockbusters of the 1950s and 1960s. Cecil B. DeMille reintroduced the classical model with Ten Commandments (1956), and the epic(ally expensive) Ben-Hur (1959), Spartacus (1960), and Cleopatra (1963) would follow under other directors. These films can be analyzed for their interpretation of ancient material; their contemporary political subtexts and attitudes towards race, ethnicity, and gender; and their influence on the way 20th century Western cultures viewed Greco-Roman antiquity. Other film classics depicted an ancient world that ranged from dreamlike (Fellini's Satyricon [1969]) to pornographic (Caligula [1979]), to fantastical (Clash of the Titans [1981]). We will briefly examine these films as a springboard for looking at late-20th and early-21st century adaptations of classical material.

Classical material in film regained popularity in the 2000s: Gladiator (2000), Troy (2004), Alexander (2004), 300 (2006), Clash of the Titans (2010), and Pompeii (2014), and the 2016 remake of Ben Hur. But beyond these obviously classically-inspired films, situated as they are in a version of classical antiquity, there are other modern films that draw less obviously on classical material. O Brother Where Art Thou? (2001) takes the Odyssey from Homer's Mediterranean world and drops it into Depression-era Southern America. Chi-raq resituates Aristophanes' Lysistrata in gang-ravaged Chicago. The Star Wars (1977-83) and Hunger Games (2012-15) trilogies use a reimagined Roman Empire to comment on spectacle and society in contemporary America.

We will study these films and others to analyze the trajectory of classical allusion in modern film: why do directors continue to revisit classical antiquity? What themes are pervasive? How do ancient archetypes like the seductive queen, evil sorceress, noble enslaved man, old philosopher, and debauched aristocrat help characterize modern film characters? What is the difference between adaptation and inspiration? How closely must modern interpretations cleave to the ancient material to be deemed "acceptable" by scholars and enthusiasts? How do these interpretations reshape our understanding of the ancient material? And why is classical antiquity still so compelling today?

CLST231 Greek History
This course explores the development of Greek civilization from the Bronze Age Mycenaeans to the death of Alexander the Great. We will ask big questions: What did democracy mean in the ancient world? How did war shape political life and cultural values? Why did Greek city-states rise, flourish, and sometimes go to war with one another? These questions will be explored through close engagement with primary literature as well as evidence from art and archaeology. Readings in translation include works by Homer, Herodotus, Thucydides, Aeschylus, Sophocles, and Euripides. No previous knowledge of ancient Greece or classical antiquity is required.

This course fulfills the requirement for an Ancient History Survey course.

CLST235 Greeks-Romans-Christians
Western civilization emerged, in part, out of the achievements of ancient Greeks, Romans, and Christians. Art, architecture, philosophy, and literature were all forged in a crucible of clashing cultures. This course will introduce students to the religious worlds of Greek, Roman, and Christian antiquity. Attention will be given to the mythologies of the gods and cultic practices of the people, including religious sanctuaries, festivals, and sacrifices; divination, magic, and the mysteries; philosophy, ethics, and theology. We will conclude with an assessment of the rise and eventual triumph of Christians, their appropriation and critique of Greco-Roman culture, and their obsession with martyrdom and the cult of the dead.

CLST244 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt
This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house floors. Drawing upon a blend of archaeological, art historical, and mythological evidence, we will examine how the funerary practices and the very notions of the soul, the body, and the afterlife compare in these two societies. We will also explore how social class, gender, and ethnicity influenced those ideas. The course will also provide an introduction to archaeological theory and the interpretive strategies employed by archaeologists, art historians, and historians in the reconstruction of ancient societies.

CLST245 The Archaeology of Ancient Foodways
Bread, wine, olive oil, fish sauce -- what did it mean to eat in the ancient Mediterranean world? In this course, we explore the archaeology of food in ancient Greece and Rome, from farms and vineyards to markets and banquets. Using archaeological evidence, primary literature, and theoretical approaches, we examine how food production, trade networks, and dining practices reflected and reinforced social hierarchies and cultural values. The course will also employ digital mapping tools to trace the movement of ingredients around the Mediterranean and help us reflect on how global food systems shape our own consumption habits.

This course satisfies the Archaeology and Archaeological Science requirements for the Classical Studies major.

CLST247 The Fall of Rome and Other Stories
The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with selections from a range of authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea, and many others--to connect the fall of Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

CLST248 Language Matters: Etymology and the Roots of Social Injustice
Etymology is a course designed to prepare students for disciplines outside what is traditionally considered "classics." The course will provide a strategic presentation of key Latin and Greek roots, constructions, and linguistic frameworks, which pervade the terminology of numerous fields and disciplines: law, medicine, biology, ecology, sociology, religion, and many more.

This course is a history of words: how they are formed, what they mean, and how they change and change us. In addition to teaching how to deconstruct terminology, the course will explore the origins and evolution of many of the commonly used modern terms in their original historical contexts, providing a glimpse into the rich background that gave rise to their use and meaning today.

Each week we will focus on a specific modern discipline, our "unit." Mondays and Wednesdays will be devoted to the workings of the language itself. We will examine how Greek and Latin roots make up the technical language of that discipline, so that students learn to identify, break down, and understand such terminology and its uses. 2020 is an important year: social justice and how we talk about it, language itself, is a political issue as we come to the presidential election. On Fridays we will explore a divisive issue confronting each discipline today and investigate the roots of the problem in antiquity. Topics include: biological race, abortion, debt slavery, climate crisis, extinction, deforestation, the First Amendment, and many others. By thinking about the roots and words that shaped and expressed Greek and Roman ideas, as well as how they negotiated important social, political, legal, medical, and environmental issues, we can understand better the crucial issues facing our own language and society.

CLST249 Classics Beyond Whiteness
This course offers a vision of "classics" that decenters the white, elite, and masculine in favor of a more egalitarian approach to the discipline. Students will interrogate misconceptions that ancient Greeks and Romans were white, race and ethnicity in Graeco-Roman societies, the role of classics in modern racial politics, the name of "classics" itself, and non-white approaches to classics. This course considers race as social construct; white supremacy, fragility, and privilege; and critical-race theoretical study of ancient cultures. For CLST Major requirements and for Classics/CCIV Major requirements, this course falls under the History, Politics, and Social Justice track

CLST250 Comedy in Translation
The American comic tradition starts here. Raunchy comedies like Bridesmaids or American Pie, melodramatic sitcoms like Modern Family, and super-"meta" shows like Parks and Rec ultimately find their roots in the raunchy comedy of Aristophanes, the melodramatic sitcoms of Menander, and the often-"meta" plays of Plautus and Terence. This class will involve the reading (in translation), discussion, and performance of some of these playwrights' weirdest and funniest plays, culminating in public presentation (by you!) of adaptations of plays.

CLST255 Democracy and its Discontents
Today we are confronting enormous questions about democracy: how it is defined, how it is practiced, and, in some places, whether it can survive. Such questions, however, are not new. From its inception in ancient Athens through centuries of political development, democracy has drawn both fervent support and intense criticism. In this class we will read a selection of ancient and modern sources as a basis for our discussion of fundamental issues such as participation vs. representation, citizenship and civic responsibility, and the tension between private and public interests.

Readings will include selections from ancient sources such as Herodotus, Thucydides, Plato and Aristotle and modern scholars such as Paul Cartledge, Melissa Lane, Josiah Ober and Kurt Raaflaub.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **HA-CLST**
Prereq: **None**

CLST256 Xenia, Xenophobia, Immigration, Empire
In Greek and Roman literature, as in modern society, social tension and xenophobia often go hand-in-hand. The importance of "Xenia," guest-friendship, permeates ancient Greek mythology and literature, stressing an imperative to treat foreigners (and foreign hosts) with kindness, care, and generosity, while on the flipside, a lack of respect or failure to observe xenia can have disastrous results. In historical texts and political messaging of ancient Rome, Xenophobia abounds, from Julius Caesar's commentaries that paint a portrait of a land and people that is at times wildly dangerous, at others compliant and seemingly grateful for Roman control, depending on which "spin" will make the best case for continuing his lengthy and expensive colonial warfare.

This type of political messaging surrounding foreign and immigrant populations continues to dominate campaigns, administrations, and news cycles today. In this class, students will read selections from different genres of Greek and Roman literature to look at how "othered" characters and depictions of foreign cultures reflect attitudes towards colonized populations, Greek and Roman cultural identity, and the concept of imperial expansion itself, among other sociopolitical issues. The course will also look at the historical context of the events and people represented -- symbolically, allegorically, or literally -- in contemporary primary sources.

This course satisfies the History, Politics, and Social Justice track.

CLST257 Plato's REPUBLIC
"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

CLST260 The Archaeology of Identities in the Ancient Mediterranean and Beyond
Human beings all hold a wide range of socially constructed and physically lived identities, expressed and experienced sometimes continuously and simultaneously, and sometimes only occasionally under specific circumstances. These identities might include, but are not limited to, race, ethnicity, gender, sexuality, social status, occupation, and health. Many of these identities, expressed and experienced in various tangible and intangible ways in our

lived reality, can only be accessed indirectly through the physical proxy of the archaeological record when it comes to people living in the past. This course will explore a variety of archaeological methodologies for accessing the social identities of past lives, as well as the sometimes problematic role that archaeology has played in this type of research over the course of the 20th and 21st centuries (is ancient DNA bringing us back full circle to scientific racism?). The primary focus of the course will be on the ancient Mediterranean, with additional case studies drawn from other parts of the world serving to illustrate the cross-regional applicability of approaches to past identities.

CLST267 Disaster, Destruction, and Resilience in the Ancient World
How did ancient societies confront catastrophe, and what can we learn from their responses? This course explores themes related to natural and human-caused disasters in the ancient Mediterranean world, including earthquakes, volcanic eruptions, fires, floods, plagues, droughts, and famines. Drawing on archaeological and literary evidence, we will examine the causes and aftermaths of events like the eruption of Vesuvius, the floods and fires of Rome, the Antonine Plague, and more. Through these case studies we will deepen our understanding of ancient experiences of risk, vulnerability, and resilience, and inform our own attitudes toward disasters in our modern world.

CLST270 Ancient Jewish Mysticism
This course examines how ancient Israelite/Judahite communities (Bronze Age through the Iron Age) imagined, accessed, and managed the "invisible world": the dead, hostile spirits/demons, divine messages about the future, and the binding power of spoken formulas (oaths, blessings, curses). Rather than treating "mysticism" as later contemplative tradition, we use the term in a deliberately narrow, historical sense: ritual and textual techniques meant to cross or manipulate the boundary between human and nonhuman realms -- especially under conditions of threat, uncertainty, or political pressure. Working historically and comparatively, we read biblical texts alongside contemporary ancient Near Eastern ritual and inscriptional evidence (Akkadian, Aramaic, Sumerian, Ugaritic), asking: What practices do the texts presuppose? What do polemics against "illicit" rites reveal about what people actually did? How do treaties, curses, and apotropaic objects encode beliefs about divine enforcement? And how does material culture (amulets, inscriptions, ritual installations) complicate strictly "literary" reconstructions?

CLST275 Horror in Ancient Greece, Rome, and the Movies
A question from the notorious slasher-killer of the Scream franchise, Ghostface, will elicit a different response from whoever picks up the phone: "what's your favorite scary movie?" We might just as well ask: why do you, why do any of us, actively seek out the discomfort of fear as entertainment in the first place? "Horror" as a genre is not the invention of 20th-century cinema. Ancient Greek tragedy, for example, employs horror to provoke catharsis in its audience, but it also applies the horrifying as allegory for contemporary sociopolitical problems; likewise, ancient Roman texts are filled with horror across different genres. The same themes that make horror effective in ancient Greece and Rome persist in modern horror films. This course will look at horror in ancient Greek and Roman texts as compared to modern horror cinema. How do the family dynamics in Stanley Kubrick's The Shining or Ari Aster's Hereditary reflect the intergenerational trauma in tragedies like Euripides' Heracles, Aeschylus' Agamemnon, or Seneca's Thyestes? What is the significance and allure behind "body horror" pervading so many horror films and ancient Greek and Roman texts? Why does so much horror surround a fear of the "other"? Different motifs and forms of horror manifest in ancient texts and modern films to communicate complex truths about their respective societies, and they also reflect broader existential questions about human existence. Applying theory from scholars such as Bergson, Deleuze, and Guattari, as well as secondary scholarship examining Greek and Roman examples of horror, this course will examine the effect that horror has on its audience, why we can't look away, and what our fear can tell us about society and our ourselves.

CLST280 Social Justice Warriors: Inequality, Injustice, and Activism from Antiquity to Today
We tend to think of social justice as a modern preoccupation, but many Greek and Roman politicians, thinkers, and activists identified and attempted to alleviate issues of inequality, unequal distribution of power, and access to resources. Each week we will explore a divisive issue confronting America today and investigate its roots in antiquity. Topics include political representation, land rights, biological race and slavery, abortion, debt, climate crisis, extinction, deforestation, free speech, and many others.

Through a mixture of historical research and academic roleplaying of moments of political crisis, we will explore the roots of these issues and how ancient societies attempted to navigate them.

CLST283 Off with its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase--as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating!) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

The course falls under the Archaeology/Archaeological Science track of the Classics/CCIV Major requirements.

CLST285 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

CLST315 Love in Antiquity: Eros in Translation
This course examines how Roman poets adapted and transformed Greek models such as Sappho. How did love elegy become the dominant new genre in Roman literary culture of the mid first century BCE? What does love poetry tell us about gender politics and sexual identities in the ancient world? Students will read Greek and Roman love elegy in translation and scholarship to understand the innovations of the Roman elegists in their social context. This course will also engage with the long translation tradition into English and theoretical discourses surrounding translation. There will be opportunities to explore creative translation and bring in other language traditions and new media interpretations through an associated .25 credit CLAC.

Aims and Learning Outcomes:

- Understand the literary historical context of Roman elegy and its models

- Analyze and appreciate Greek and Roman poetry and poetic conventions

- Understand principles and issues of literary translation

- Develop a clear and effective scholarly writing style

- Enhance independent research skills in literature

- Experiment with literary translation into other languages and across media

CLST321 Law, Personhood, and Democracy, Ancient & Modern
Legal texts -- law codes, decrees, and edicts, juristic discussions, law court cases -- help us understand the history of legal thinking and strategy, and the construction of constitutional frameworks. Yet Greek legal sources offer something more than a history: Although these texts in many ways served as the foundation for European legal systems, they nonetheless offer radically different ways of thinking about concepts such as private and public, personhood in law and ethics, rights versus responsibilities, and the possibility of freedom and happiness -- some more progressive than our own. In an era when many of our democratic institutions and conventions are challenged, the classical sources offer alternate legal and social ways of thinking, and new tools for rethinking our own time. This course will provide an introduction to legal thinking in classical antiquity and, drawing from a range of sources, will speak to the intersection of constitutional frameworks with political theory. Through narratives and case studies, we will examine Greek approaches to thorny legal issues that are still contested today: women's rights, freedom of gender and sexual expression, the right to trial, torture and coerced confession, immigration and the right to citizenship, foundational "myths" (and lies), and conspiracy theories, among others. The ancient sources will be brought into dialogue with US supreme court opinions and debates on these issues. We will also explore how constitutional frameworks are constructed and deployed alongside religious and moral beliefs -- whether that be overtly or covertly --0 to cultivate "civic thinking." For CLST Major requirements, this course falls under the History, Politics, and Social Justice track.

CLST324 Tales of Hope or States of Delusion? Utopias, Past and Present
Utopias are imaginary places that promise freedom, happiness, and justice. In this course, we will look at different visions of utopian living: What kinds of longing and impulses do different utopias fulfill? What kind of social critique do they imply? How can they offer freedom and happiness, while built on strict programs of biological, psychological, and social engineering? What makes for the distinction between utopia and dystopia?

We will start with ancient Greek poetry, drama, and philosophy--Homer, tragedy, Aristophanic comedy, and Plato--to trace the beginnings of utopian thinking, its promises and failures. In the last part of the semester, we will look at how these early seeds of utopia are recast and developed in later and contemporary literature, theory, and shows, including Thomas More's "Utopia," and Emily St. John Mandel "Station Eleven"; selections from T. Adorno, E. Bloch, J. Rawls, R. Nozick, and F. Jameson; and episodes from Black Mirror.

CLST327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern
The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to ¿train¿ citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grapple with demanding questions -- legal, social, and ethical: the ¿laws¿ of war; discrimination (based on gender,

class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional conditioning.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sara Uribe, and Luis Alfaro, and movie adaptations.

This course will fall under the Literature and Performance & and History/Social Justice tracks.

CLST329 Roman Villa Life
This seminar will explore life in the Roman countryside, from the luxurious suburban villas near major urban centers to working estates in Italy and the Roman provinces. The course will begin with a general survey of Roman villa life and then move to a more focused inquiry into specific topics including art and architecture, production, slave life, and transportation. Readings will be drawn from ancient literary sources, inscriptions, and modern social and archaeological studies. The course is intended for students from a variety of disciplines and backgrounds, but some knowledge of the Roman world is recommended.

CLST330 Classical Studies Today: Writing for a General Audience
This will be a seminar for junior and senior departmental majors, offered in association with the Calderwood Seminars in Public Writing. The purpose of the class is to have students write about scholarly issues in a way that makes them accessible to broad non-specialist audiences. This practice is what one scholar has called "responsible popularization." The course will concentrate on writing and public presentations, and each week the students will take alternating roles as writers and editors. The work load consists of reading scholarly articles or book chapters, on academic topics from Classical Studies, and re-work them in compact genres like personal essays, op-eds, blog posts,and reviews. For the final project, the students will form teams of two, each of which will interview an eminent Classical scholar of their choice and produce a brief profile.

CLST335 Art and Society in Ancient Pompeii
Buried by the eruption of Mt. Vesuvius in 79 AD and rediscovered in the mid-18th century, the once ordinary city of Pompeii is now an extraordinary laboratory for the study of ancient Roman life. This seminar surveys the art, architecture, and material remains of Pompeii and other cities destroyed by the eruption. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the political, social, and commercial life of a small Roman city and examine the unique evidence for reconstructing the private lives of Roman citizens.

This course fulfills the Archaeology and Archaeology Science track of the Classical Studies major.

CLST338 Economies of Ancient Port Cities: Trade, Mobility, and Identity
This course explores urban life in ancient Mediterranean port cities, where harbors facilitated connectivity and long-distance trade and created cities that were defined by multicultural exchange and constantly reshaping identities. Through case studies drawn from Greek and Roman sites, the class will examine the lives of residents and port workers, focusing on themes such as trade, urban development, art, religion, food, and spectacle. With an emphasis on the archaeological material left behind, the course also explores how narratives about the past are shaped by the nature of surviving evidence.

CLST340 Daemons, Enigmas, and the Cosmic Image: Classical and Modern Allegory
Allegories are everywhere--from novels, art, and philosophy to news, political rhetoric and the law. They confront us as something strange, as overly baroque or disappointingly simplistic, as a symbolic mystery that becomes blandly prosaic once the proper interpretive key has been found. Allegories can be abstract and ethereal (e.g. Dante traveling through the heavenly spheres), but they can also make abstract ideas concrete: the idea of justice becomes the Roman goddess Iustitia, blindfolded, holding a sword and a set of scales, a statue in front of a courthouse. They try to explain life's complexities, but the stories they tell are much stranger than the lives that we live: the insatiable longing for our significant other is really the search for our other true half, since once we were round creatures rolling happily around but were cut in half by Zeus for our transgressions. What are these allegorical texts doing for us, and why are they doing it in such bewildering ways?

This course looks at the persistence of allegory. We will inquire into its origins in the Classical world, and we will try to understand how it has been found (or made) useful by writers and literary theorists in the 20th and 21st centuries.

The texts that interest us will make simple things mysterious and mysterious things simple, transforming the imaginable into the visible and the visible into the imaginary. And we will try to find our way through this mode of writing and of reading that insistently brings opposites together, connecting different realms of experience, knowledge, and language in ways that both produce and defy sense.

CLST341 Visualizing the Classical
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen--through landscape, sound, light, functionality/monumentality, and spatial relationships--shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical mapping, modeling, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.

CLST345 Fighting Words: War in Ancient Greek and Roman Literature
War features in ancient Greek and Roman literature across genres, from historiography and political speeches to epic poetry and tragedy -- and beyond. Herodotus, history's first historian, begins his work The Persian Wars by claiming that he is writing "in order that the memory of the past may not be blotted out from among men by time, and that great and marvelous deeds done by Greeks and foreigners and especially the reason why they warred against each other may not lack renown" (I.i). But the mission, meaning, and impact of literary accounts of war is much more complex and multifaceted than simply preserving historical accounts. What does ancient literature about war, holistically and through different generic and narratological approaches, tell us about war's place in these cultures?

This course will look at how and why certain themes are expressed across different genres, including cultural identity, propaganda, figured speech, PTSD, and colonization. Employing the critical lens of narratology, post-structuralism, and postcolonialism, this course will aim to look at the subtle complexities of the representation of warfare in different ancient Greek and Roman works, working through the multifaceted cultural messaging expressed in different authors and genres. Using a diverse selection of texts, material culture, and students' independent juxtaposition of these works with modern war narratives, this course will examine the complex relationship in ancient Greek and Roman society between literature, warfare, colonization, cultural memory, and cultural identity.

CLST352 Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean
This course brings a blend of ethnographic, environmental, philological, and scientific frameworks to the study of ancient medicine. For the first half of the class, students will explore the theories and concepts of medicine and the body in classical antiquity from Hippocrates to Galen. Students will tackle case studies (e.g., treatment of war wounds, epilepsy, gynecological ailments) and suggest appropriate treatments. The second half of the course will focus on medicinal plants as discussed in Dioscorides, considering their ecology, archaeology, and phytochemistry, with hands-on lab modules in which students will learn how to extract and analyze bioactive compounds of medicinal plant species. In final group-based projects, students will present a "plant biography," tracking the arc of the medicinal and cultural uses of a particular species from the ancient Mediterranean to the present day.

CLST363 Body Politics: Desire, Sexualities, and Gender, Past and Present
Sexuality as a category to define, construct, and control the "self" has been seen as a product of the 18th and 19th century. This course turns to ancient Greek society to look at body politics before sexuality and to examine the different ways in which sex and gender are experienced and constructed.

We will approach sex and gender roles as organizing principles of private and public life. Using literary, scientific, historical, legal, and philosophical sources as well as material evidence, we will address issues including the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution, adultery); and ideas regarding desire, self-control, masculinity and femininity, and their cultivation in social and political contexts. How ancient approaches to gender and sexuality are in dialogue or have informed recent debates will be a question throughout the course by looking at theoretical approaches and contemporary movements and debates. We will end by looking at how ideas about sexuality in classical antiquity

were used in Romer v. Evans, otherwise known as the 1993 Colorado Gay Rights Case.

For CLST Major requirements, this course counts toward the concentrations of Literature and Performance and History, Politics, and Social Justice.

CLST390 Making Rome: Monuments of Life in Ancient Rome
The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

CLST425 Classics Lab: Research Internships
Students in Classical languages, culture, archaeology, or environmental science have an opportunity to work intensively with departmental faculty to contribute to a variety of ongoing faculty research projects. Faculty projects vary from year to year but currently include studies in Mediterranean palaeoclimate, sustainable agriculture in antiquity, lab-based scientific study and digital modeling of archaeological artifacts, ethnobotany, ancient medicine, or word-

study projects relating to LLMs. Lab students develop language and research skills, gain exposure to texts and research methods beyond basic curriculum and work towards tangible research outcomes for their professional portfolios: research posters, conference presentations, online content, or publications. Students who are accepted as research interns in the Classics Lab can receive lab credit in Greek, Latin, or CLST, depending upon their skill set and upon the nature of their research project. The commitment is 6 hours a week for half credit and 12 hours a week for full credit. Participation is POI only.

GREEK

GRK101 Introduction to Ancient Greek: Semester I
This course is an introduction to the rich and beautiful language of ancient Greek, the language of Homer, Plato, and Euripides. In the first semester students will begin to learn the grammar and syntax of the language and start developing the vocabulary necessary to appreciate and understand Greek with the goal of reading as soon as possible. Throughout the semester we will also explore some inscriptions and dip our toes into both Herodotus and biblical Greek.

This course is a prerequisite for GRK102.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK102 Introduction to Ancient Greek: Semester II
This course is a continuation of GRK101. We will complete the study of Greek grammar and continue to develop vocabulary and reading skills. We will read selections from Sophocles, Euripides, Lysias, Apollodorus, Demosthenes, Aristotle, and Plato, among others.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **GRK101**

GRK205 Reading Greek Prose: Court Room Dramas, Selections from Athenian Oratory
In classical Athens there were no public prosecutors and no lawyers. Citizens took it on themselves to prosecute their political enemies, their wives' lovers, and violent offenders against family, friends, and state. Court cases are fascinating for the laws, political dynamics, social beliefs, animosities and gossip they bring to light. In this course, we will focus on selections from two cases in Greek and will also read additional cases in translation.

This course will satisfy the History, Politics, and Social Justice concentration for the Classical Studies Major.

GRK225 Feminist Icons or Misogyny's Monsters? Women in Euripides
Judith Butler writes: "to be a woman is to have become a woman, to compel the body to conform to an historical idea of 'woman,' ...to materialize oneself in obedience to an historically delimited possibility, and to do this as a sustained and repeated corporeal project."

In his tragedies, Euripides's women are powerful, nonconformist, and independent; however, they are also agents of chaos who sow devastation and destruction of domestic space. The Medea follows an alienated foreign protagonist consumed by obsession with revenge that culminates in the murder of her own children; the Bacchae follows women celebrating a female-only

religious practice that ends in a frenzied, animalistic slaughter of one of their own sons. Exploring the corpus of Euripides's work through the lens of feminist theory, phenomenology, and postmodern critical theory, this course will ask whether the resistance of women in Euripidean tragedy to "[obey] a historically delimited possibility" is constitutive of a righteous proto-feminism, or rather a sensationalized stage device which reinforces Athenian society's strict gender roles. Over the course of the semester, we will translate Euripides's Medea from the original Greek. We will also read a number of tragedies in translation, focusing in particular on Euripides's Bacchae, while comparing Euripides's works to other tragedians' such as Aeschylus's Agamemnon and Sophocles's Antigone. Students will complete independent comparative projects examining similar themes and characters in modern works.

GRK250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC.50)
The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

GRK252 Dionysiac Transformations: Gender, Violence, and Justice in Euripides' Hecuba
Euripides' "Hecuba" dramatizes the immediate aftermath of the Trojan War, as the victorious Greeks are waiting for favorable winds in Thrace--a no-man's-land. At this liminal time and space, we witness the "civilized" victors' abuse of power and the law against their female captives and the brutal revenge of the oppressed, culminating in literal transformation and loss of human form. Working with the Greek and secondary readings, we will explore the rhetoric and morality of power, justice, and empathy, how these shift within the plot, and how the dramatic medium itself may affect the audience's sympathies.

GRK290 Truths and Other Fictions
What makes for a good story? What makes for a good argument? Is deception ever beneficial?

In this course we will read selections from ancient Greek works in the original, ranging from Homer, tragedy, love-poetry, law-court speeches, sophistic treatises, and Platonic philosophy to explore whose truth prevails, whose story moves, and who is better for it. The precise selection of sources will depend on the composition of the student-group and previous familiarity with Greek texts.

For CLST Major requirements, this course can be used for the Literature and Performance track and the History, Politics, and Social Justice track.

GRK291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)
The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of ta Aphrodisia (the things/matters related to Aphrodite) in a culture that has no one term/concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

GRK295 Must It Be Revenge? Punishment in Theory and Practice
Is legal punishment a sublimation of revenge? Should violent revenge ever be endorsed or morally justified? Are there (equal) rights to revenge or to protection from it? What might create empathy with acts and actors of unprecedented violence? In this course we will address these questions by moving across genres in the Classical period, from philosophy (prose) to tragedy (poetry): Plato's Crito has Socrates argue about civil (dis)obedience, even in cases of wrongful or unjust conviction; Euripides' Hecuba dramatizes institutional failures and post-war corruption that result in unparalleled dehumanizing cruelty. They both test assumptions and ideas about the power of democracies to cultivate lawfulness and collective welfare.

The course is suitable for students at the intermediate and advanced level of Greek.

GRK320 Lampooning Democracy ¿ Aristophanes
Aristophanes continues to make us laugh, but he is hardly ever "just kidding." The playwright lived through the Peloponnesian War-the nature and scale of which irreparably altered the political and cultural landscape of all of Greece-as well as the subsequent oligarchic revolutions and democratic restorations that followed in the tumultuous aftermath at Athens. All the while, he produced the only plays that substantiate for us the genre of "Old Comedy," replete with scathing political and cultural commentary. Often called the "father of comedy" itself, Aristophanes' political satire never shrinks from launching its barbs at the most powerful contemporary politicians running Athens. Cleon, one of the foremost political figures during the Peloponnesian War, is a routine object of derision and mockery in his plays (especially his Knights and Wasps). Consequently, Cleon was a constant plaintiff against the social impact of Aristophanes' work. But his targets are not merely the military/political elite: perhaps most controversial is Plato's claim that Aristophanes' work, particularly his comedy Clouds, led directly to the prosecution and execution of the philosopher Socrates. Despite the contemporary specificity of Aristophanes' works, his plays remain a persistent source of inspiration for modern reception-Spike Lee's 2015 Chi-Raq, for example, is just one of many instances of modern reception of Aristophanes' Lysistrata. In this course, we will read selections from several of Aristophanes' comedies in Greek and translation, along with contemporary works referencing the people and events central to his works, as well as commentary on Aristophanes himself. Students will continue to hone their skills in translation of Attic Greek while doing a deep dive into the meter, themes, and other generic conventions of Old Comedy. This course aims to use Aristophanes' work along with contemporary comparanda to begin to pick apart the complex and deliberately ambiguous nature of political satire, and to understand why pointed political commentary on specific moments and figures in Athenian history still resonate so strongly with modern audiences.

GRK355 Homer in Bronze Age Context
Although written down in the 6th century B.C., the Homeric epics offer a literary narrative that captures echoes of a Bronze Age world in transition, an era of globalization reshaped by collapse, migration, and war. Empires fell and pirates plundered. This course recontextualizes the original Greek texts of the "Iliad" and the "Odyssey" in this space.

Reading sections of the "Iliad" and the "Odyssey" in the original Greek, this course introduces students to the literary and linguistic structures of Homer and contemporary Mediterranean texts. We will examine Homeric language and scholarly approaches to structure, narrative, and cultural concepts (kinship, blood sacrifice, piracy, honor) in the context of Bronze Age Indo-European texts, from Hittite historical annals and poems, to Mycenaean Linear B tablets (the earliest-known form of Greek), as well as inscriptions from Archaic-period Greece.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

GRK365 Greek Tragedy: Euripides
Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

GRK367 The Great Greek Creation Myth: Hesiod's Theogony
In this seminar, we will read Hesiod's Theogony, the Greek creation myth, in the original ancient Greek and examine this fabulous work in light of other creation stories of the ancient Near East, Egyptian, and Hittite cultures by which it was influenced. Through examination of structural themes and motifs (how the universe was created and ordered, the role of violence, the origins of an application of justice, the creation of mankind, the shaping of women), we will discuss whether and how the Theogony diverges from other creation myths to establish or reflect values that can be said to be uniquely Greek. Discussion will be supplemented by passages from Hesiod's Works and Days, along with other creation myths and secondary scholarship.

This course satisfies a 300-level language requirement and falls under the Literature and Performance area concentration for CLST majors.

LATIN

LAT101 First-Year Latin: Semester I
Conquer Latin in two semesters! Acquire a basic vocabulary and build your skills with essential grammar as you develop your ability to read passages in Latin from the principal classical authors--including Cicero, Vergil, and Ovid. This first semester covers half the textbook. In the second semester (LAT 102), you will complete the textbook.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT102 First-Year Latin: Semester II
Continue your conquest of Latin by completing your acquisition of a basic vocabulary and essential grammar.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**

Prereq: **LAT101**

LAT104 Intensive Introductory Latin
Learn Latin in a semester with this intensive introduction to grammar and syntax. Readings in original authors help illustrate and reinforce the fundamental principles of the language in preparation for more advanced reading at the intermediate level. Recommended for students wanting accelerated Latin acquisition or those with some background wanting a quick review.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT201 Catullus and Cicero: Love and Life in Republican Rome
We will read portions of Cicero's "Pro Caelio" speech and a selection of the poems of Catullus, with a focus on the tangled social web linking the poet Catullus, the young Caelius, their shared love interest Lesbia/Clodia, and Cicero's long-standing feud with Clodia's brother. We'll get a glimpse behind the curtain of the private lives and public performances of Rome's elite during the late Republic -- complete with secret affairs, political scheming, and even an accusation of poisoning! We will also explore how these texts reflect social and cultural tensions of Rome in the 50s BCE, a period of growing instability not long before the Republic's dramatic fall. This course will fall under the Literature and Performance track.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT202 Latin Lyric Poetry
In this intermediate-level Latin course, students will continue to develop their facility with the Latin language and their understanding of Roman literary history through a reading of selections of Latin lyric and elegiac poetry, two corpora that are both heavily influenced by earlier Greek models and show a remarkable degree of Roman ingenuity. The work of Horace and Catullus will provide an entry point into this fascinating material. We will then turn to work by the elegists Propertius and Tibullus, as well as shorter poems by Ovid. Throughout the course, we will also be investigating a number of questions. What is lyric poetry, and to what extent must Latin lyric poetry be read as a continuation of the Greek lyric tradition? How do Roman authors take Greek models and rework them to address the interests of their contemporary audience? How and for whom were these poems performed, and how does this affect the way we read this corpus? To facilitate our discussion we will be reading translations of a number of Greek lyric songs and of Latin lyric poetry by Seneca and Statius, some examples of modern lyric, and scholarly literature. In addition to our daily reading in Latin, we will undertake a careful review of Latin grammar, as well as long-term translation and commentary assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT203 Latin Prose: Roman Letters
Whose voices could be heard in the politically turbulent first century CE, and what did it mean to write from within the orbit of power? Through letters of Seneca the Younger and Pliny the Younger, this course explores how elite Romans navigated questions of morality and meaning under the Roman Empire. Seneca, who spent years as an advisor to Nero, crafts letters to articulate a philosophy for ethical living. Pliny recounts episodes from his life, including an eyewitness account of the eruption of Vesuvius, and probes the values of his contemporary world. This course will include a review of Latin grammar and syntax while gradually acclimatizing students to the rhythms and stylistic patterns of Latin prose.

This course satisfies the Literature and Performance track & History, Politics and Social Justice track.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT221 Roman Comedy
It has long been recognized that Plautus and Terence displayed widely different comic styles: Terence was an artist; Plautus, an untutored genius. We shall examine this difference through a critical reading of selected plays in their divergent literary and historical contexts.

This course will fall under the Poetry & Performance and History/Social Justice tracks.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT230 Love and Suffering in Ancient Rome (CLAC.50)
In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

LAT251 The Age of Nero
Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus

in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

LAT254 Apuleius: THE GOLDEN ASS
Fast-paced, magical, sexy, and bizarre, Apuleius' GOLDEN ASS, or METAMORPHOSES, contains more than enough rowdy episodes to keep us entertained for a semester. The novel tells the story of the feckless Lucius, the man-turned-ass whose encounters with the residents of Thessaly range from the vulgar to the weird to the sublime. Our goals, in addition to reading and understanding the Latin, include tracing prominent themes and becoming acquainted with recent relevant scholarship.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT281 Roman Satire: Juvenal
Roman satire, as practiced by Lucilius, Horace, Persius, and Juvenal is a strange hybrid: it combines social criticism, literary parody, philosophical rumination, and obscene burlesque, a self-consciously "humble" genre set in the framework of dactylic hexameter, the meter of high-flown Homeric and Vergilian epic. It is among a small minority of ancient literature which directly addresses itself to the humbler aspects of the everyday lives of Roman citizens. This course on Roman satire will focus on Juvenal, the last practictioner of Roman verse satire. We will begin the course with a selection of short readings from each of the four Roman satirists in order to orient ourselves with standard topics of Roman satire (including dining, country vs. urban life, the body, sex, and gender roles) and differentiate the approaches. We will spend the rest of the semester exploring Juvena's seminal works: his first and second book of Satires, wherein he situates himself as a figure marginalized by a new order of foreign interlopers, powerful gender deviants, and tyrannical patrons and emperors, as well as Satire 10, his caustically philosophical take on the "Vanity of Human Wishes."

Gen Ed Area: **HA-CLAS**
Prereq: **None**

LAT325 Pseudointellectuals and Eccentric Millionaires: Petronius!
Follow the young, naïve, and curious Encolpius as he winds his way through Rome in the oldest surviving ancient Roman novel! Our hapless "hero" confronts the guile and treachery of Rome's shadiest denizens in this Menippean satire, running into thieves, impotence, sexual voracity, drunkenness, and general debauchery along the way. Join Encolpius at the absurdly wealthy Trimalchio's home for a bizarre and interminable dinner party full of questionable characters from every corner of Roman society. What enticing or disgusting delights will find him along the way? This notoriously absurd, funny, and occasionally horrifying work will allow us to explore issues of class, status, slavery, sexuality, and narratology. Petronius' work gives "novel" insight into the cultural phenomena of his day using Latin full of colloquialisms, misunderstandings, and eclectic vocabulary geared towards diverse social interaction.
Offering: **Host**

LAT340 Beastly Readings in Latin Poetry and Global Antiquity
Where and what is the animal in Roman literature? This advanced Latin course explores selections from Virgil's Georgics and Aeneid, and Ovid's Metamorphoses to understand how Roman poets utilize the category and reality of the animal in their literary worlds. What can intrusive animals and "beastly reading" tell us about Roman poetic agendas and conceptions of the human from antiquity to today? We will also experiment with comparative approaches by introducing Greek literary antecedents and Sanskrit literature in translation -- what might we learn from comparative reading across other ancient literary traditions? Readings and critical literature in Classical scholarship and Animal Studies will inform our analyses over the course of the semester. This course counts towards the Literature and Performance concentration in the Classical Studies Major. This course requires prerequisite LAT 200 level or permission of instructor to enroll.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT351 The Age of Nero
Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

For CLST Major requirements, this course can be used for the Literature and Performance track.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT353 Demagogues and Tyrants in the Roman Historians
Reading selections from Livy's ab Urbe Condita, Sallust's Bellum Catilinae, and Tacitus' Annales we will consider these historians' depictions of tyrants and demagogues (e.g., the Tarquins, Catiline, Tiberius, Nero) throughout Rome's political history, their views on the interactions between these controversial figures and the Senate and people of Rome, and their narratives describing the circumstances behind their rise and fall. At the same time, we will explore the role of fact vs. fiction, propaganda, and bias in the writing of Roman history through comparative analysis with contemporary sources and inscriptional evidence.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT360 Constructing Masculinity and Identity in Roman Elegy
This course will explore the ways in which Roman elegists used the genre of their poetry to construct a literary alternative to Roman masculinity and mores. Propertius, Tibullus, and Ovid each developed a masculine persona that rejected career politics and militarism in favor of the battlefields of love, creating a culture war between the status quo and a new Roman masculinity. The course will include weekly translation and secondary readings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT375 Set in Stone: Reading Roman Life through Inscriptions
Inscriptions are our tweets from the ancient Romans. From the alphabets scrawled by school children on wax tablets to the curse tablets of scorned lovers and the biographical epitaphs on funerary monuments lining the roads leading into Roman cities they provide an intimate view of daily life in the ancient world, while public inscriptions document the political, religious, and social workings of the Roman state. This course will survey a representative sampling of the Latin inscriptional record from the earliest period through the Empire, including examples of laws, decrees, and religious dedications, Augustus' Res Gestae, and the methods employed in inscribing objects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT401 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

LAT402 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

LAT407 Senior Tutorial (downgraded thesis)
Downgraded Senior Thesis Tutorial - Project to be arranged in consultation with the tutor. Only enrolled in through the Honors Coordinator.
Offering: **Host**
Grading: **A-F**

LAT408 Senior Tutorial (downgraded thesis)
Downgraded Senior Thesis Tutorial - Project to be arranged in consultation with the tutor. Only enrolled in through the Honors Coordinator.
Offering: **Host**
Grading: **A-F**

LAT409 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

LAT410 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.

LAT492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

CLASSICAL STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Classical Studies (CLST) offers a multidisciplinary approach to the diverse and extraordinary civilizations of ancient Greece, Rome, and the broader Mediterranean world. Students explore everything from politics and media, environment, religion, literature and reception, to art and material culture. They can participate in archaeological excavations, read inscriptions in Rome, study political drama in Athens, or use satellite imagery and Greek papyri to reconstruct the agricultural practices of ancient Egypt. Critical study of these ancient cultures in their original contexts - and the long shadows they cast into our own time - enriches our understanding of the present and offers new perspectives on contemporary challenges. Students choose from three concentrations: Literature and Performance; History, Politics, and Social Justice; and Archaeology. Each builds skills in integrative reasoning, writing, and competency in multi-disciplinary data analysis. All students develop proficiency in Latin or Greek and engage with original texts. The Department encourages study or fieldwork in the Mediterranean and offers funding for these opportunities.

Classical Studies students are drawn to the mysteries of the ancient past, but with a keen eye towards the problems of the present. They demonstrate curiosity and creativity, attention to detail, and strong abilities in language, research, writing, and critical thinking. They have an adventurous side.

The major prepares students for work in any field. Recent majors have built successful careers in law, politics, medicine, media and communications, cultural heritage institutions, and government, as well as finance and technology.
The department collaborates with the Gordon Career Center (https://careercenter.wesleyan.edu/) and maintains an active alumni network to support students after Wesleyan.

ADMISSION TO THE MAJOR

To declare the Major, students must complete a Major Declaration Form.
The form is non-binding –interests and circumstances may change – but this important initial outline helps them to plan their prospective curricular pathway through the Classical studies program, and to envision the ways in which their work in Classics can connect with their other courses and interests at Wesleyan.

Students must first select which area of concentration they intend to pursue when they complete the Major Declaration Form. If they intend to apply a course (previously taken or planned) outside of the department towards their elective credit, they should identify the course and explain how it will be combined with the major course selections to form a meaningful curricular whole.

After declaring, the student can ask a faculty member to be their major advisor or ask the Chair to make the assignment.

Students are not expected to have any background in Latin or Greek in high school to become Classical Studies majors. We recommend that potential majors start language study in their first year at Wesleyan. The elementary Latin sequence begins in the fall semester, and elementary Greek starts in the spring. If you have already taken some languages, you do not have to start over. We do not have a placement exam. Instead, you can talk with any of the Department

faculty to determine which course would be best for you. The same is true for transfer students who have done work in Classical Studies at another institution.

MAJOR REQUIREMENTS

The Classical Studies Major requires a total of ten credits, four of which must be within their selected area of concentration (see Course Lists, below).
All Majors must take:

- Four credits in Language Courses (Latin or Greek, level 102 or higher). One of these must be at the 300-level. Two half-credit language courses may be counted together as one credit.
- One credit in Ancient History Survey, to be completed by the end of junior year.
- One credit in Material Culture.
- Two, 300-level seminars.
- Two electives. Students can apply one course from outside the department toward their concentration. They must first demonstrate its specific application to that concentration and obtain permission from the advisor

AREA CONCENTRATION REQUIREMENTS

Majors choose from three concentrations: **Literature and Performance**, **History, Politics, and Social Justice**, and **Archaeology.** Each builds skills in integrative reasoning, writing, and competency in multi-disciplinary data analysis. All students develop proficiency in Latin or Greek and engage with original texts. The Department encourages study or fieldwork in the Mediterranean and offers funding for these opportunities.

The three tracks reflect the multidisciplinary nature of Classical Studies while foregrounding particular aspects of the ancient world that connect with our faculty's research and expertise. Students select a concentration upon declaration of the major, and map out a course of study within it together with their advisor.

Literature & Performance (LP)
Explores literature (drama, poetry, mythology, etc) as private and public expression, whether investigating its use as social (and often subversive) media, its role in intellectual and literary histories, its interactions with gender and identity constructions, and its reception and reimagining in the present. Students analyze a wide range of genres including epic, drama, poetry, legal texts, scientific treatises, and novels.
Some examples of LP senior capstones include: receptions of Medea (https://digitalcollections.wesleyan.edu/object/ir%3A2616) in Latin American literature, studies on the treatment of war wounds (https://digitalcollections.wesleyan.edu/object/ir%3A2936) in ancient medicine, or community translations (https://www.wesleyan.edu/classics/images/header_images/maggieuh.html) and stagings of Greek drama.

History, Politics, and Social Justice (HPSJ)
Examines the dynamics and strategies of communities and governments in antiquity as they adapted their institutions, legal structures, and media to serve diverse populations and strategies. It places ancient conceptions of democracy, constitutional design, and collective action from a variety of literary genres into conversation with modern challenges and case studies.
Some examples of HPSJ capstones include: works on transitional justice in Athens and Rwanda (https://digitalcollections.wesleyan.edu/islandora/judge-will-be-your-neighbor-transitional-justice-ancient-athens-and-post-genocide-rwanda), Athenian democracy's struggle against oligarchy (https://digitalcollections.wesleyan.edu/object/ir%3A1872), and the politics of memory and erasure (https://digitalcollections.wesleyan.edu/object/ir-431) in ancient Rome.

Archaeology or Archaeological Science (ARC) Focuses on sites, objects and material remains from the ancient Mediterranean. Students study not only the traditional corpus of art and monuments, but also gain exposure to anthropological frameworks and scientific tools (experimental archaeology, phytochemistry, geoscience) to interpret archaeological data and reconstruct everything from daily life, to urban and political shifts, to large scale environmental change. Courses are often hands-on; fieldwork experience is encouraged.

Examples of ARC capstones include: studies of newly-excavated Egyptian amulets and immigration (https://digitalcollections.wesleyan.edu/object/ir%3A277), loom technology and weaving metaphors (https://digitalcollections.wesleyan.edu/islandora/our-warp-bloodred-our-weft-corseblue-exploration-use-and-mythology-warp-weighted-loom) in Norse and Greek epic, and the reconstruction of trading networks on Crete (https://digitalcollections.wesleyan.edu/islandora/maritime-connectivity-and-mobility-southeastern-aegean-and-eastern-mediterranean-during) after the collapse of the Minoan palaces.

LITERATURE AND PERFORMANCE

Code	Title	Hours
CLST202	Greek Drama: Theater and Social Justice, Ancient and Modern	1
CLST220	Homer and the Epic	1
CLST327	Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern	1
CLST225	Witches & Magic in Ancient Literature	1
CLST227	Humans and Other Animals	1
GRK252	Dionysiac Transformations: Gender, Violence, and Justice in Euripides' Hecuba	1
CLST267	Disaster, Destruction, and Resilience in the Ancient World	1
CLST275	Horror in Ancient Greece, Rome, and the Movies	1
LAT201	Catullus and Cicero: Love and Life in Republican Rome	1
LAT230	Love and Suffering in Ancient Rome (CLAC.50)	.5
LAT331	Vergil: AENEID 2	1
LAT202	Latin Lyric Poetry	1
LAT325	Pseudointellectuals and Eccentric Millionaires: Petronius!	1
GRK365	Greek Tragedy: Euripides	1
GRK367	The Great Greek Creation Myth: Hesiod's Theogony	1

HISTORY, POLITICS, AND SOCIAL JUSTICE

Code	Title	Hours
CLST202	Greek Drama: Theater and Social Justice, Ancient and Modern	1
CLST221	Law, Politics, and Order in the Ancient World	1
CLST221Z	Whose Rights? Law, Personhood, and Democracy, Ancient & Modern	1

CLST248	Language Matters: Etymology and the Roots of Social Injustice	1
CLST324	Tales of Hope or States of Delusion? Utopias, Past and Present	1
CLST255	Democracy and its Discontents	1
CLST267	Disaster, Destruction, and Resilience in the Ancient World	1
CLST363	Body Politics: Desire, Sexualities, and Gender, Past and Present	1
CLST327	Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern	1
LAT353	Demagogues and Tyrants in the Roman Historians	1
GRK205	Reading Greek Prose: Court Room Dramas, Selections from Athenian Oratory	1
GRK291	"Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)	.5
GRK365	Greek Tragedy: Euripides	1

ARCHAEOLOGY AND ARCHAEOLOGICAL SCIENCE

Code	Title	Hours
CLST201	Art and Archaeology of the Bronze Age Mediterranean	1
CLST214	Survey of Greek Archaeology and Art	1
CLST223	Survey of Roman Archaeology and Art	1
CLST267	Disaster, Destruction, and Resilience in the Ancient World	1
CLST283	Off with its Pedestal! The Greek Vase as Art and Artifact	1
CLST329	Roman Villa Life	1
CLST341	Visualizing the Classical	1
CLST352	Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean	1
CLST390	Making Rome: Monuments of Life in Ancient Rome	1
LAT375	Set in Stone: Reading Roman Life through Inscriptions	1
GRK355	Homer in Bronze Age Context	1

The Major in Classical Studies (CLST) offers a multidisciplinary approach to the diverse and extraordinary civilizations of ancient Greece, Rome, and the broader Mediterranean world. Students explore everything from politics and media, environment, religion, literature and reception, to art and material culture. They can participate in archaeological excavations, read inscriptions in Rome, study political drama in Athens, or use satellite imagery and Greek papyri to reconstruct the agricultural practices of ancient Egypt. Critical study of these ancient cultures in their original contexts - and the long shadows they cast into our own time - enriches our understanding of the present and offers new perspectives on contemporary challenges.

Students choose from three concentrations: **Literature and Performance**, **History, Politics, and Social Justice**, and **Archaeology.** Each builds skills in integrative reasoning, writing, and competency in multi-disciplinary data analysis. All students develop proficiency in Latin or Greek and engage with original texts. The Department encourages study or fieldwork in the Mediterranean and offers funding for these opportunities.

Classical Studies students are drawn to the mysteries of the ancient past, but with a keen eye towards the problems of the present. They demonstrate curiosity and creativity, attention to detail, and strong abilities in language, research, writing, and critical thinking. They have an adventurous side.

The major prepares students for work in any field. Recent majors have built successful careers in law, politics, medicine, media and communications, cultural heritage institutions, and government, as well as finance and technology. The department collaborates with the Gordon Career Center (https://careercenter.wesleyan.edu/) and maintains an active alumni network to support students after Wesleyan.

STUDENT LEARNING GOALS

Classical Studies majors acquire the following skills: close reading and analysis of complicated evidence, both textual and material; the ability to identify and explain the most significant elements of such evidence; the ability to apply a variety of interpretive methods and to evaluate their effectiveness. Classical Studies majors also acquire an appreciation of linguistic registers and cultural differences, and a sense of perspective on urgent contemporary issues.

Students have the opportunity to develop and demonstrate their abilities through research and creative projects in the context of their courses, research tutorials, campus events, and presentations at conferences, among others.

LANGUAGE REQUIREMENT

Majors in Classical Studies acquire an intermediate level of proficiency with either Latin or Greek.

No experience in either language is required upon entry into the major, but, as noted above, students should plan to begin the language as soon as possible. Students with previous experience in either language should consult with the department chair for placement advice.

ADDITIONAL INFORMATION

HONORS

Students wishing to pursue Honors in the Major must complete a senior thesis or substantial essay. These are original research projects that deal directly with primary sources (in the form of archaeological data sets or texts in the original language), show knowledge of and critical engagement with current scholarship on the subject, and present an original argument developed in response to these sources. Both the thesis and the essay should be considered serious academic undertakings and students should plan to begin research and/or data collection in the semester or summer which precedes their senior year.

Students who intend to write a thesis should begin planning with their potential thesis advisor in the fall of their junior year, and must submit a thesis proposal to the Department by May 1 of their junior year. Students who wish to write a Senior Essay must submit their proposal to the Department by the end of the previous semester (May 1 for an essay to be written in the fall semester, November 15 for the spring). For details on the evaluation and awarding of Honors, consult the departmental website.

CAPSTONE EXPERIENCE

Upon completion of the major, students will complete a form where they will have the opportunity to explain changes in this initial trajectory and reflect briefly on their choices and development as a whole.

COLLEGE OF DESIGN AND ENGINEERING

TBD

Professor X

- Integrated Design, Engineering, Arts & Society Major (p. 268)
- Integrated Design, Engineering, Arts & Society Minor (p. 269)

IDEA110 Vectors to Volumes: The Fundamentals of Digital Fabrication
This project-based course will cover the fundamentals of digital fabrication in a hands-on introduction to software-driven object making. The central concern will be process rather than concept, with a firm focus on how instead of why, as well as best safety practices. Instruction will be given in four areas sequentially, each building on the last: Vector Design & Execution, 3D Modeling & Printing, CNC Wood Routing, and CNC Metal Milling. Machine setup and best practices will be taught alongside foundational knowledge of applications such as Adobe Illustrator, Adobe Photoshop, Vectric VCarve, Autodesk Fusion360, and Ultimaker Cura. Throughout the course, there will be a consistent emphasis on fabrication methods and finishing techniques.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-IDEA, NSM-IDEA**
Prereq: **None**

IDEA111Z Origami Mechanisms: The Science and Math of Folding
Explore the cutting edge of origami sciences! Origami as a research field is the science of folding materials - not just paper - and has applications in material sciences, space exploration, the biomedical field, protein folding, and many more! Anytime a material has to be transported in a closed state, transported, and then deployed, origami studies have a relevance. The course will involve folding, lectures, videos, guest video presenters, and time using the equipment of the IDEAS Lab to produce work. There will be one minor and one major project due that will use techniques learned during these class sessions. Course is 40 hours over two weeks (20 hrs/wk or 4 hours per day 5 days/week)
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **None**

IDEA116 Introduction to Programming and Machine Knitting
Knitting is a fabrication technique with a long history, producing items from everyday garments to e-textiles. Since the invention of the first knitting machine in 1589, knitting technology has evolved significantly, leading to the sophisticated computerized knitting machines we use today. This course serves as an introduction to programming, computer science, and machine knitting, especially for students interested in textile design and making. Students will learn imperative programming using a high-level programming language, covering topics such as data types, control structures, functions, and objects. We will also cover how to program and operate a knitting machine. No prior knowledge in programming or knitting is required. This course provides an equivalent introduction to programming to COMP 112/113/114/115 and will satisfy any requirements or prerequisites that those courses satisfy.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA, NSM-MATH**
Identical With: **COMP116**
Prereq: **None**

IDEA120 Ecological Design I: Being at Home in the World
Being at Home in the World is an introduction to the skills and thinking involved in the ecologically responsible creation of objects. This course is intended to provide a foundational understanding of the language of design, sources of materials, and energy systems. The studio encourages students to develop a rigorous, iterative working method to deeply analyze the nature of land and resources, explore options, and test ideas. This process of making is complemented and supported by an introduction to the history and theory of design, training with techniques and equipment, and active practice in keeping a sketchbook. Early exercises and projects in the course build familiarity and confidence with analytical drawing, making, and modeling techniques, which build toward the creation of a novel piece of design work presented at the final review.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST220, ENVS232**
Prereq: **None**

IDEA154 Working with MATLAB
The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC154, CIS154**
Prereq: **None**

IDEA160 Fundamentals of Design I
In this introductory product design course, students will experience basic design processes such as problem identification and possible resolutions; the use of design development and communication skills via design observation and research; iterative process and prototyping; and representation and presentation in two and three-dimensional forms. Students will explore how design can play a role in our community and how it can impact our society. Students will work both individually and collaboratively in a studio environment. Field trips to New York City fabricators, galleries, and workshops may be expected as part of this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**

Identical With: **ARST270**
Prereq: **None**

IDEA170 Introduction to Mechanical Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS170, PHYS205**
Prereq: **None**

IDEA170F Introduction to Mechanical Design and Engineering (FYS)
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

IDEA170Z Introduction to Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS170Z, PHYS170Z**
Prereq: **None**

IDEA173 Introduction to Sensors, Measurement, and Data Analysis
This course is an engineering fundamentals course supporting the Integrated Design, Engineering, and Applied Science (IDEAS) minor. It will involve a sequence of hands-on projects that introduce students to basic measurement devices and data analysis techniques using inexpensive modern sensors, a microprocessing platform (Arduino), and a computational software package (Matlab). The course will provide foundational knowledge of available resources and techniques that allow students to more confidently implement measurement systems in subsequent courses of the IDEAS minor and better understand experimental devices used in scientific research activities.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS173**
Prereq: **None**

IDEA175 Introduction to Electrical Design & Engineering
Students will learn about engineering mechanics, electronic control systems, and physical actuators (e.g., for movement) using a microprocessor platform, sensors and motors. The final project will require a student team to ideate, design, analyze, and optimize a mechatronic system. This course will allow students to better understand components, methods, and challenges in mechatronics systems commonly found in automation and robotics.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS175, PHYS206**
Prereq: **None**

IDEA180 Design Studies
This course examines the human dimensions of engineering and design by looking at the ways artifacts are designed, produced, circulated, and used in context. Rather than a comprehensive survey of movements or paradigms in the history of design, this course employs a thematic approach to understanding the ways objects can articulate and reflect social and cultural concerns. Through a series of readings, projects, lectures, and seminars, we will study the surprising ways everyday objects influence and articulate our identities, desires, biases, and experiences.

This course is intended to support students in developing a critical toolkit for use as designers, users, consumers, and citizens. Throughout the term we will seek to challenge our assumptions about the politics of design and interrogate the ways its products mediate and are changed through human activity. We will write about and visualize these relationships, thinking critically how objects are made, what makes them relevant, and whether things have the power to change our economic, environmental, and social realities.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-IDEA**
Prereq: **None**

IDEA185 Creative Coding
This course provides a practice-driven introduction to design and expression with code. Students will learn elemental procedural programming skills and gain experience with software design and interactive art by developing a portfolio of digital projects of increasing complexity and scale. It is designed to establish fundamental cross-disciplinary intuition and knowledge for future use in the CoDES program as well as to provide a vector of artistic fulfillment. The course uses Processing and the Java programming language to facilitate the creation of visual, interactive digital sketches.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **CIS185**
Prereq: **None**

IDEA185Z Form and Code
This introductory survey explores practices in design and digital media through a sequence of design exercises, workshops, and hands-on projects. Advancing

towards an independent final project, participants will hone their skills as makers and thinkers while developing a portfolio of original work for both print and web. While primarily concerned with visual experimentation and expression, this course exposes students to critical topics in media and design through readings, seminars, and student presentations. Techniques surveyed in this course include: digital graphics, creative coding, and digital fabrication (if taught in person).

Students will require access to a personal computer and Adobe Creative Cloud. If the course runs remotely, students are responsible for locating these resources individually.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS185Z**
Prereq: **None**

IDEA186 Text & Visual Imagination: Introduction to Eco Design for Performance
Eco-scenography is an introduction to design for performance. In this course, students will learn the core principles of design for performance while exploring sustainability and environmental practices with an emphasis on understanding of materials, such as production cycle and manufacturing process, as well as integrating environmental justice paradigms by analyzing specific case studies. Through three specific project-based assignments--1. object design, 2. garment design, and 3. environmental design--students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.

This course counts towards the Theater Arts category for the THEA major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA185**
Prereq: **None**

IDEA187 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Identical With: **CSPL187, FGSS187, SOC265**
Prereq: **None**

IDEA190 Digital Foundations
This course introduces the foundations of digital art through contemporary artistic practice. Students will research the history of digital art and examine relationships of digital media and contemporary art. The class has a theoretical focus on machine use within the process of art making while building foundational digital skills. Projects will focus on four key areas including: Digital Imaging, 3D Modeling and Virtual Design, Time Based Media, and Digital Fabrication. Building on these four areas the course will culminate in an individualized research based final project and presentation. Through experimentation, critical analysis, critique and peer review; students will generate a unique portfolio of digital art works.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST190**
Prereq: **None**

IDEA190Z Digital Foundations
This introduction to the digital studio engages software and electronic media as an expanded field of creative production in contemporary art and design. Through a sequence of workshops, exercises, and hands-on digital projects, students will develop their critical and creative toolkits and learn to conceive, refine, and present original work. Open to all skill levels, this course prioritizes sustained and rigorous engagement with digital practice as well as conceptual and formal problem-solving.

Workshops in image manipulation, compositing, motion graphics, and visual communication will be led synchronously online by the instructor. This will be complemented with weekly online studio sessions, discussions, screenings, and reviews. Students will be provided access to all course materials using Google Drive and other digital platforms. Access to Adobe Creative Cloud software will be provided by Wesleyan, but individual licensing is also encouraged. Course assistants will offer peer mentoring and technical support in person through the DDS and online through Zoom.

IDEA200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

Prereq: **None**

IDEA203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP203, ENVS203, ANTH212, STS203**
Prereq: **None**

IDEA204 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP204, ANTH214, ENVS207**
Prereq: **None**

IDEA205 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP210, STS211, ANTH210**
Prereq: **None**

IDEA206 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **ARCP360, ANTH360, STS363**
Prereq: **None**

IDEA208 Technologies of Time
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk. This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will research and design speculative timekeeping devices or time machines for worlds otherwise.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **STS208**
Prereq: **None**

IDEA209 Educational Gaming Lab: Project-Based, Game-Based Pedagogy Approaches
In the past two decades, crowdfunding and renewed interest in games--board games, role-playing games, digital games, and instructional games--have created an increased and diverse gaming production, which has become the subject of several studies, articles, and projects related to all areas of education, from hard sciences to language learning and the arts. In an effort to explore how a game-informed pedagogy can work in various types of courses and to highlight analog and/or digital gaming approaches that have worked inside and outside the language classroom, this course will explore the basics of game-based learning (GBL) and discuss how games of all kinds can inform pedagogical discussions and the creation of learning materials. Educational Gaming Lab is designed as a project-based gaming laboratory that will focus on why and how analog games can be effective tools for pedagogy. Examples will include board games, tabletop role-playing games, escape games, and puzzles. Participants will discuss the application of gaming principles to various subjects and types of classrooms; then, they will engage in a final project in which they will either adapt existing games for specific learning outcomes or create brand new educational games. The course will be conducted in English and games will be created in English.
Offering: **Crosslisting**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**

Prereq: **None**

IDEA210 How Things Fail: Mechanics and Materials
This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium, force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will entail design, implementation, and testing of an optimized model of a structure.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **CIS210, PHYS210**
Prereq: **IDEA170 AND (PHYS111 OR PHYS113)**

IDEA211 Materials and Design Concepts for Structures
This course explores innovations in materials and structural forms at the intersection of design, performance, and engineering. Students will connect the theory of structures with properties of materials to understand fundamental design principles in vaults, buildings, and bridges. Analyses of notable structures will illustrate the evolution of forms in response to natural forces and constraints of technology, economy, and time. Design exercises, discussion of readings, and laboratory experiments will introduce perspectives from ancient cultures to emerging techniques in contemporary works that are laser cut, 3-D printed, and robotically assembled. In course projects, students will pursue research in an area of interest and collaborate in teams to gain hands-on experience with building and testing scaled models of structures.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **None**

IDEA212 Metal Manufacturing Through the Ages: The Science Behind Metal and Impact of Metal in Society
Metal manufacturing has been key to societal change ever since humans first started using it, from the Bronze Age to the Iron Age to the Industrial Revolution to today. In this course, we will explore the science behind why metal is so important, from the molecular level on up. We will study heating and cooling of metals, learn how the structure of metals affects their material properties, and get hands-on experience shaping metal with a variety of processes. We will follow the lifecycle of metal from ore to raw material to finished parts, as well as how it gets recycled. Students will build engineering skills in reading phase diagrams, analyzing heat transfer setups, and understanding the material properties of a wide range of metals. Students will build machining skills both in shaping metal by hand and with modern metal shaping methods.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170**

IDEA213 Design for Scale: The Nuts and Bolts of Mass Manufacturing
This course builds on the design skills from IDEA170 to give students practice in building not just a prototype, but a repeatable and functional design. The increase in quantity between prototype and production forces us to prioritize reliability and repeatability in our designs, and adds design for assembly, design for manufacturing, and design for inspection considerations. With the increase in scale, communicating design intent precisely through engineering drawings becomes a critical skill. Students will explore these design principles through a semester-long hands-on project designing, manufacturing, and analyzing a multi-part mechanism (figurine, toy, tool, machine, etc) of their own design. Injection molding will be our primary manufacturing technique, with additional use of vacuum forming, 3D printing, waterjetting, and plastic shredding. In addition to the central project, there will be in-class activities and homework on analysis techniques for mass manufacturing and design best practices.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170**

IDEA215 Introduction to Sensors, Measurement, and Data Analysis
This course is an engineering fundamentals course supporting the Integrated Design, Engineering, Arts, and Society (IDEAS) minor. It will involve a sequence of hands-on projects that introduce students to basic measurement devices and data analysis techniques using sensors, a microprocessing platform, and computational software. The course will provide foundational knowledge of available resources and signal processing techniques that allow students to more confidently implement measurement systems in subsequent courses of the IDEAS minor and better understand experimental devices used in scientific research activities. Students will complete a final team project of their choice (with approval) exploring areas of interest in measurement, data analysis, machine learning or other avenues. Some previous programming experience is expected. Prior experience in IDEA175 or with Arduino, Raspberry Pi, or other physical computing platforms are preferred, but not required.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

IDEA221 A Thousand Years of Iteration: Design for an Uncertain Future
The climate emergency is a product of design. Centuries worth of aesthetic and industrial innovation have created extractive infrastructure, efficient machines, and disposable products that make it increasingly easy to consume energy and resources on a global scale. As new conversations about just transitions, a circular economy, and a Green New Deal have begun to proliferate among designers, the discipline's troubled relationship to notions of "progress" remains largely unquestioned.

This reading- and research-intensive studio asks students to examine this history of technology and to critically evaluate shifting theoretical perspectives on nature and human development as they relate to design. Topics will include the lifespan of buildings and products, relationships with and obligations to materials and resources, and strategies for de-growth in indigenous and vernacular design precedents. These will be studied through assigned readings and in-class discussion, a series of design exercises, and the production of a final project from materials immediately at hand in Middletown.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST221, ENVS227**
Prereq: **None**

IDEA222 Fluid Mechanics: Theory and Applications
This course focuses on the behavior of fluids under various conditions. Students will develop a framework to analyze situations involving stationary (fluid statics) or moving fluids (fluid dynamics), discover tools used to predict fluid behavior, and learn how to interpret aspects of this behavior. Homework problems and examples reviewed in-class will help students connect theory with real-world applications, particularly in the areas of mechanical, structural/civil, and aerospace engineering. At the end of this course, students should have the ability to solve simple fluid problems and apply those solutions in complex engineering situations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

IDEA228 The Evolution of Audio in Interactive Entertainment; Creating Music with Limiting Technology
In the creative world, introducing limitations demands incredible innovation from an artist. Nowhere has this been truer than in video game audio. An entire generation has grown to hear complex worlds in just a small combination of oscillators and noise generators, and the lengths composers and sound designers went to craft those worlds is nothing short of astounding. In this course we will examine and emulate compositions which used the iconic sound architectures present in home consoles, taking us all the way from the implementation of Beethoven's Sixth Symphony in "Smurfs: Rescue in Gargamel's Castle" (1982), through David Wise's implementation of octave displacement in the NES classic "RC Pro-Am" (1988), the string of composers who all had to create homogeneous yet individualized soundtracks for the "Rockman" game series (starting in 1987), and landing in the nostalgic implementation of these architectures in the practically polar opposite games of SUDA 51: "Killer 7" (2005), "No More Heroes" (2007), and Toby Fox's "Undertale" (2015). Along the way we will cover sound design and emotional impact outside of chiptunes, one big example being the work of Akira Yamaoka in the "Silent Hill" (1999) series. This course will both serve as a survey of these games as well as contain practical projects, where you will be using tools to create work in a similar vein and where you will be presenting and dissecting the sound design of interactive entertainment which carries a particular meaning to you.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**
Identical With: **DDC228**
Prereq: **None**

IDEA229 Creating Audio in Interactive Worlds
Video games have struggled with the issue of audio repetition since their inception. Human existence thrives on entropy: our experience in the world is not defined by easily repeatable sequences, but by interacting with spontaneous behaviors and stimuli. Nothing takes a player out of a virtual world faster than countless NPCs saying "I used to be an adventurer like you, but then I took an arrow to the knee." Likewise, nothing destroys the ambience of a world faster than hearing the same combination of birds and running water over the course of hours. Thankfully, contemporary game design tools can make the process of emulating the natural world both possible and fairly intuitive. In this course we will examine the nature of what it means to create an organic-feeling virtual world and then employ the audio tools in the Unity engine, along with the adaptive sound design middleware FMOD, to craft organic sonic environments which will be both adaptive and varied. We will look at both historical implementations of ambience -- such as the Myst (1994) series -- as well as examine modern implementations of environmental audio. Special attention will also be paid to the theory and scholarship of audio in natural sonic environments outside of the realm of gaming, as these practices thrive when applied to virtual worlds.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**
Identical With: **DDC229**
Prereq: **None**

IDEA230 Video Game Audio Design
In the creative world, introducing limitations demands incredible innovation from an artist. This course serves to develop a foundational approach to designing and composing audio for video games by exploring the historical practices and limitations in game audio, utilizing middleware pipelines to create audio in contemporary game engines, and developing a better understanding of the role sound designers play in a studio environment. We will examine and emulate compositions which employ the iconic sound architectures present in classic home consoles, taking us all the way from the implementation of Beethoven's Sixth Symphony in "Smurfs: Rescue in Gargamel's Castle" (1982), through David Wise's implementation of octave displacement in the NES classic "RC Pro-Am" (1988), on to the string of composers who all had to create homogeneous yet individualized soundtracks for the "Rockman" game series (starting in 1987), and landing in the nostalgic implementation of these architectures in the practically polar opposite games of SUDA 51 ("Killer 7" and "No More Heroes") and Toby Fox's "Undertale" (2015).

The contemporary unit of this course will examine the nature of what it means to create an organic-feeling virtual world and then employ the audio tools in the Godot engine, along with the adaptive sound design middleware FMOD, to craft living sonic environments which are both dynamic and varied. The skills developed in this course include basic music theory as it applies to video games, studio recording techniques (sound, music, and voice-over), knowledge of implementing audio calls and flags, and a general appreciation of sound in games.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **DDC230**
Prereq: **None**

IDEA233 Studies in Computer-based Modelling and Digital Fabrication
This course operates at the intersection of design and production, introducing students to digital tools critical to contemporary architecture and design. Throughout the semester, students will develop a series of projects that fluidly transition between design, representation, and fabrication with an emphasis on understanding how conceptual design interfaces with material properties. The course will offer a platform for students to research, experiment, and, ultimately, leverage the potential of digital tools toward a wide array of fields and disciplines. Students will be expected to utilize the Digital Design Studio's resources, including 3D printers, laser cutter, and 4-Axis CNC mill, as well a selection of fabrication equipment housed in the school's metal and wood shops to represent, model, and realize a series of design projects.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST233**
Prereq: **None**

IDEA234 Architecture I
This course is a synthesis of fundamentals of design principles and introduction to design vocabulary, process methodologies, and craft. Emphasis is placed on developing students' ability to examine the relationship between production (the process of creating things) and expression (the conveying of ideas and meaning) involved in the making of architecture. The intent of the course is to develop students' awareness and understanding of the built environment as a result of the investigations, observations, and inquiries generated in the studio.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST235**
Prereq: **None**

IDEA235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Identical With: **CSPL235, FGSS236, AFAM235**
Prereq: **None**

IDEA236 Fast & Furious
Fast and Furious is a class which explores the power of the multiple through the production of zines, posters, t-shirts, tote bags, pins and more. Beginning in the 1930s, the production of zines mainly in the sci-fi fan world became popular after the advent of the mimeograph--the first widely available duplicating machine. This way of making content was able to circumvent mainstream and institutional publishing models creating channels for more creatives to distribute their work. Today, there are even more technologies that can be used in the production of zeitgeist material. In this class, we will learn how to create with a Xerox machine, silkscreen, letterpress, polymer, and more. In each assignment we will contend with the power of quantity. What does it mean to make five of something? Ten? Fifty? One hundred? We will also experiment with format. How can a message be told through a wearable garment? How does the narrative change when it's a tote bag? And finally, we will explore the poetics of distribution. What are the artistic possibilities of a zine when it can be sent through the mail or left in a pile for the public?
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-ART**
Identical With: **ARST236**
Prereq: **None**

IDEA243 Introduction to Graphic Design
This course will open your mind to the world of graphic design, both past and present. You will learn how to analyze and critique design in addition to how to present your work and convey your ideas to others. You'll explore various tools available to a designer including hand skills and computer software. Computers will simply be a possible tool to help complete each project - this is not a software class.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST243**
Prereq: **None**

IDEA246 Graphic Design: Website as Portfolio
Students will focus on the creation of an online portfolio of work as both an extension of their own practice and calling card for the world at large. Emphasis will be placed on the deployment of the site as a space for both interactive and graphic design and the development of writing about/documenting work and projects. Hard coding skills not necessary; focus will be on familiarization with user friendly sketching platforms, research organization systems, and out-of-the-box CMS for website development. Visiting artist talks will also be arranged.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST246**
Prereq: **None**

IDEA247 American Architecture and Urbanism, 1770-1914
This course considers the development of architecture and urbanism in the United States from the late 18th through the early 20th century. Major themes include the relationship of American to European architectures; the varied symbolic functions of architecture in American political, social, and cultural history; and the emergence of American traditions in the design of landscapes and planning for modern cities, especially Boston, New York, Philadelphia, Washington, D.C., Chicago, Los Angeles, and San Francisco. The course considers houses for different sites and social classes, government buildings, churches and synagogues, colleges, and commercial architecture of different kinds includes the origins of the skyscraper. Urban environments include cemeteries, public parks, streets, and civic centers. Discussion will be informed by recent historiography on race and the American built environment. Movements studied include neoclassicism, the Gothic and Romanesque revivals, the Chicago School, the Arts and Crafts movement, and the City Beautiful movement. Major figures studied include Thomas Jefferson, Benjamin Latrobe, Frederick Law Olmsted, Frank Furness, Henry Hobson Richardson, Louis Sullivan, the early work of Frank Lloyd Wright, Greene and Greene, Bernard Maybeck, Julia Morgan, and McKim, Mead and White.

Gen Ed Area: **HA-ART**
Identical With: **ARHA246**
Prereq: **None**

IDEA248 Frank Lloyd Wright: Myth and Fact
This course considers the architecture of Frank Lloyd Wright in the context of his own life and development as an artist and in the context of the broader history of modern architecture, of which Wright's work was a part and to which it contributed. The seminar also considers the relationship of Wright's achievements to the social, economic, technical, and ideological history of the United States from the mid-19th through the mid-20th centuries. A major theme will be critical reading of Wright's own statements about his life and work in relation to other sources, later accounts, and his buildings and projects themselves. Both Wright's residential and public architecture will be considered in conjunction with his designs for landscapes and urbanism. Architectural drawings will also be examined as a medium in themselves, along with textual and physical evidence, as a means of generating maximal insight into Wright's built and unbuilt works.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

IDEA254 Architecture of the 20th Century
The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-aided design from the 1990s, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa. Major movements and architects considered include the Viennese Secession, the Bauhaus, Le Corbusier, Mies van der Rohe, Frank Lloyd Wright, Alvar Aalto, and Louis Kahn, among many others.
Offering: **Crosslisting**
Grading: **A-F**

IDEA258 Contemporary World Architecture
This course is a study of architecture and urban design throughout the world from the 1990s to the present. American topics include public and private development in the "neoliberal" city in New York, Chicago, Los Angeles, and post-Katrina New Orleans; contemporary museum architecture; sprawl and New Urbanism; and affordable housing. Major American architects considered include Frank Gehry, Richard Meier, Daniel Libeskind, and Diller Scofidio + Renfro. In Europe, the focus is on contemporary public architecture in Berlin, London, Oslo, Hamburg, Paris, Valencia, Lisbon, Rome, and Athens, with attention to major works of Sir Norman Foster, Zaha Hadid, Jean Nouvel, Santiago Calatrava, Rem Koolhaas, and Renzo Piano, among others. In China we will study state monuments of the Communist Party in Beijing and issues of preservation and urban development there and in Shanghai. In Japan the recent work of Tadao Ando, Kengo Kuma, and Shigeru Ban is a focus, as are selected projects by other architects in Tokyo, Yokohama, and Osaka. Additional lectures will treat airport architecture in Asia, and sites in India, Jerusalem, Cairo, Abu Dhabi, Guinea, South Africa, Nigeria, Rio di Janeiro, Chile, and Quito, Ecuador. The last quarter of the course focuses on green or sustainable architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling and ventilation, timber and rammed-earth techniques, LEED certification, wind and geo-exchange energy, green skyscrapers, vertical farming, and zero-carbon cities.

Prereq: **None**

IDEA261 Science Materials For a Malagasy Classroom
Students will design and produce a variety of educational science materials to be used in a fifth grade classroom in Madagascar. These items include a science logo, bookmarks, educational science games, posters, and a comic book with conservation themes for children. Students who are interested in design and natural history as a means through which to communicate science themes on wildlife endemism, evolution, and climate change would be appropriate for this course. All students will need to conduct independent research into science topics, distill down the salient features, and use that information to design elementary school materials. Working both individually and in teams, students will conceive, design, critique, and move into product production (MakerSpace). In addition, prototypes of the materials will be reviewed and rated by fifth graders in a Middletown elementary school for feedback.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL161, ENVS261**
Prereq: **None**

IDEA267 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding, diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

IDEA271 Designing With Living Systems: Soft + Hairy
In this part seminar, part studio course, students will go on field trips and read extensively to develop an understanding of mycelium and how it is explored in design. We will explore temporality in design with particular focus on how biodegradable materials such as mycelium can form our experience of an object. We will study how mycelium can be utilized as a living material to form a built ecology. In particular, we will study how to design for impermanence -- sometimes using waste materials -- and develop an understanding for material recovery. Students will work both individually and collaboratively in a studio environment. Field trips to New York City museums, fabricators, and galleries, as well as around CT may be expected as part of this course.
Offering: **Crosslisting**

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST271, ENVS271**
Prereq: **ARST131 OR IDEA110 OR IDEA180**

IDEA275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **ARCP275, ANTH275, STS275**
Prereq: **None**

IDEA283 Drones and Change
Civilian use of unoccupied aerial vehicles or drones to capture data and measure change can enhance our understanding of the natural and built environments. While drones are increasingly available for entry-level to professional level adoption, there remains value in understanding how the infrastructure for their development and deployment have evolved and what is required to ensure their continued safe and ethical utility of these devices. In this class, we will explore the legal and infrastructure elements of drone development and deployment for civilian utility of drones, while working on data collection, analysis, and interpretation that will allow students to better appreciate the value and utility of drones. Over the course of the semester, students will work on understanding and building drones, collecting data with small drones, examining the commercial versus open-source platforms for drones, and preparing to take the Federal Aviation Authority Part 107 license to allow them to fly drones safely.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES283, ENVS269**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197**

IDEA285 Digital Projects Lab
This intermediate course in design engages form and process as vital lineaments in digital images, systems, and objects today. Through a series of short, hands-on, thematic projects, students will move past the basics of digital technique and challenge themselves to articulate how and why things appear as they do. Rather than focus on specific tools or software, assignments will straddle creative platforms and media, incorporating methods such as live signal processing, data moshing, remixing, and interaction design. Early assignments will address narrow thematic concerns while a long-term final project driven by students' own directives will be developed and executed in the second half of term.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **CIS285**
Prereq: **None**

IDEA286 Introduction to Time-Based Media
This introductory course offers a comprehensive exploration of time-based media in the expanded field, providing a foundational skillset for students interested in fine arts and media practices, yet open to all majors eager to develop their creative and critical voice. A core focus of the course is the act of making, which will be coupled with an investigation into how video can transform our relationship with ourselves, others, and the material world. Through screenings of historical and contemporary video art, we'll investigate theoretical frameworks, asking critical questions such as: What sorts of videos do we consider "art," and how might we use video as a tool for empathy, accountability, and aesthetic inquiry?

Students will build essential practical skills through regular technical exercises and hands-on projects, including camera operation, sound recording and design, lighting techniques, and video and sound editing, utilizing industry-standard software and various capture devices. Each assignment will be contextualized through group discussions and readings, investigating established video art traditions as well as the medium's role in vernacular applications like live-streaming, and social media. By the end of the course, students will gain both technical facility and a sharp critical eye for time-based art and culture.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST286, DDC286**
Prereq: **None**

IDEA287 Video Basics
This introductory course is for students of all majors eager to think critically and creatively about their relationship to video. How many videos do you have on your phone? How does the intimate, often humorous content we create relate to public space and artistic expression? Together, we'll explore the rich tradition of video art, which began in the mid-20th century when new technology was suddenly placed in the hands of everyday people. Artists quickly adopted, subverted, and transformed this specialized equipment beyond its initial commercial intent. Through hands-on projects, you'll learn to use affordable, widely available tools like CapCut and DaVinci Resolve to move beyond commercial aesthetics and create personal works of art. You will also be introduced to the specialized video equipment available on campus, focusing on the fundamental principles that can be applied to any camera you pick up. No prior experience is required: just a willingness to challenge and experiment with the videos you create every day.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST287, DDC208, ARST287**
Prereq: **None**

IDEA289 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and

textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Identical With: **CSPL289, FGSS284, SOC279**
Prereq: **None**

IDEA291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP291, ANTH291, CEAS291, ENVS291**
Prereq: **None**

IDEA292 Interdisciplinary Project Lab
Interdisciplinary Project Lab fosters a holistic approach to engineering and design. Inviting students to reconcile vision with precision, hands-on coursework will involve a broad range of fabrication techniques, integration of systems, prototyping, and iterative design methods, culminating in a final project. The theme of this semester will be designing with light. The first half of the semester will focus on developing facility in both modeling and prototyping through digital and analog fabrication practices through short, intensive design and engineering projects. Students will expand their knowledge of materials and fabrication, develop skills for effective communication through visualizations and physical objects, and evaluate the efficacy of their designs. The second half of the semester will focus on an open-ended design project within the scope of the course theme, developed individually or in groups, planned in consultation with the instructor, and developed with feedback from all-lab reviews and individual desk crits. Complementing each of the lab projects, presentations and workshops will introduce the conceptual underpinnings of the course and develop requisite technical skills. IDEA292: Interdisciplinary Project Lab is a required course for all IDEAS linked major tracks in the College of Design & Engineering Studies. It may also be counted towards the IDEAS minor as an elective in most minor concentrations (see https://www.wesleyan.edu/codes/ for more information).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170 OR ARST190 OR IDEA285 OR IDEA175 OR ARST235**

IDEA300 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **WRCT300, RL&L350, AFAM320, CSPL300**
Prereq: **None**

IDEA301 Technologies of Time
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk.

This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will research and design speculative timekeeping devices or time machines for worlds otherwise.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **SISP208**
Prereq: **None**

IDEA305 Lighting Design for the Theater
This course will introduce students to the history, basic principles, and practical application of lighting design through lecture, discussion, demonstration, and practical application. Students will develop a deeper understanding of the methodology and applications of light in storytelling, which will help them communicate with collaborators. Students will have the opportunity to develop skills in computer drafting, lighting console programming, and script analysis for design. This course counts towards the Theater Arts category for the THEA major as a design course and towards the concentration category for the IDEAS Performance Design minor.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA305**
Prereq: **THEA105 OR DANC105**

IDEA308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what

cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Identical With: **GOVT308, CEAS308, ENVS308**
Prereq: **None**

IDEA311 Media and Environment: In/Sensible Worlds
In this seminar, we will examine the relationship between media technologies, sensory apparatuses, and changing environments. How do various kinds of media shape perceptions and interactions with our surroundings, multispecies ecologies, and planet Earth? How might we study the environment AS media? These seemingly simple questions matter because, like never before, media and environment co-produce who/what becomes sensible or insensible--and, ultimately, available or not available for life. This seminar will include readings from the fields of Critical Media and Communication Studies, Feminist/Postcolonial Science, and Technology Studies, Environmental/Digital Arts, and Humanities. Importantly, we will examine a range of creative media projects that explore ecology, environment, and earthly survival: films, games, sensors, and web projects.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS311, ENVS333**
Prereq: **None**

IDEA320 Ecological Design II: Worn Out/Broken In
This course will function as a design studio that examines the afterlife of material production. While designers have traditionally focused their attention on the creation, distribution, and consumption of new products, this course asks students to carefully consider everything that follows those acts. By scrutinizing the use, care, maintenance, repair, and eventual demise of designed objects, students come to understand the intended and unintended consequences of making. Rigorous observation and research lead to the creation of analytic drawings and models for presentation at project reviews.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST320, ENVS321**
Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA321 Wood: Building with the Forest
This studio introduces students to full-scale design and construction through the production of a single, collaborative project over the course of the semester. Working from land-based research and precedent analysis, students develop a detailed design for a structure on a specific site in Middletown, then build it together in the field. Materials will be sourced from the northern hardwood forest and the design crafted to suit its ecosystem.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **ARST321, ENVS324**
Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA333 Software Engineering
Software engineering is the application of engineering principles to the software development process. Eliciting requirements from stakeholders, designing the architecture of a program, performing usability studies, and testing a codebase are some of the aspects that elevate program development to software engineering. Focusing on web and mobile apps, students in this course will gain expertise in state-of-the-art frontend, backend, and mobile technologies, as well as related tooling. We will also cover the collaborative organization of software projects, software licensing, software business models, and ethical considerations for professional software engineers.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP333**
Prereq: **COMP211 AND COMP212**

IDEA335 Advanced Research and Field Methods: Living on a Damaged Planet
In this seminar, students will learn interdisciplinary methods for conducting focused research and media-based fieldwork to study socioecological collapse and possibilities for more livable, more than human futures on a damaged planet. The course will be structured around two real-world case studies and field trips, including the restoration of chestnut forests in/around CT, and the transformation of a birch forest surrounding a decommissioned power plant in Manresa, CT. Course readings will draw from the fields of Science and Technology Studies (STS), Multispecies Ethnography, Environmental Sciences and Humanities, and Digital Media.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-STS**
Identical With: **STS335**
Prereq: **None**

IDEA336 Architecture II
This course is a second-level architecture studio whose focus will be a single, intensive research and design project. As the semester progresses, additional design, representation, and production tools will be introduced and used for developing work for the project, from graphics software to the laser cutter. Additional information about the architecture studio at Wesleyan and its past projects may be found at: http://www.facebook.com/wesnorthstudio
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **ARST336**
Prereq: **ARST235**

IDEA338 Building Nothing: Design After Progress
The built environment is responsible for over 40% of humanity's greenhouse gas emissions, but despite attaching words like "sustainable" and "resilient" to their products, design and construction practices remain fundamentally unchanged. This seminar considers the possibility of a design philosophy that doesn't take the goal of creation as a given. Topics include the lifespan of buildings and products, their maintenance and care, the unintended consequences of making, relationships with and obligations to materials and resources, and strategies for degrowth found in indigenous and vernacular design precedents. We read and discuss a key text each week that examines the history of technology and critically evaluates shifting theoretical perspectives on nature and human development as they relate to design.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CHUM**

Identical With: **CHUM338, ARHA217, STS333**
Prereq: **None**

IDEA350 Computational Media: Videogame Development
This course examines the interplay of art and science in the development of contemporary videogames using the Unity development platform and commercial artistic game tools. Students develop a comprehensive understanding of computational media, including legal and commercial aspects, combined with hands-on experience in a creative process that integrates design, art, and coding. There will be discussions with invited industry leaders in various subject areas. Students will have the opportunity to work as part of development teams and create working prototypes to better understand the challenges and rewards of producing graphic interactive software within a professional context.
Offering: **Host**
Grading: **A-F**
Credits: **2.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **FILM250, COMP350, CIS350**
Prereq: **None**

IDEA351 Videogame Architecture and Programming in Unity
Game Architecture and Programming in Unity centers around software design efficiencies and their application to real-time simulation and related interactive media. Students develop working prototypes with the Unity game engine, learn C# programming, and learn to appreciate the efficiencies of different software architectures and project structures. This class is intended to strengthen student knowledge and help bridge to classes such as Wesleyan's existing IDEA350/ COMP350 offering each Spring. By offering more comprehensive training in development platforms, as well as practical experience in technologies that accompany base programming when creating interactive media, students will have a deeper understanding of ways to develop ideas by better understanding the creative tools available. Examples of topics to be covered will include: entity-component vs. inheritance systems, singletons and Unity alternatives, and Scene workflows. Digital Artists will learn to integrate visual design programs such as Blender into the Unity platform as well.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **None**

IDEA353 Robotics
Students will use hands-on projects, building and programming Arduino-based robots to learn about the field of robotics. Topics will include perception, locomotion, localization, common programming frameworks for robotics, and ethical considerations. Some background in electronics and mechanical construction may be helpful but is not required.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP353**
Prereq: **COMP211**

IDEA355 Computational Design and Fabrication
This course introduces students to computational design and fabrication, which is an exciting application of computing and lays the foundation for the future manufacturing industry. We will focus on how computing can support computational design and also working with fabrication technologies such as 3D printing and laser cutting. Lecture topics include hardware abstraction languages, geometry processing fundamentals, physics-based simulation, optimization techniques, and data-driven design methods. Hands-on activities will complement lectures, providing practical experience with fabrication hardware and software tools. No prior knowledge of fabrication is required. Some background in linear algebra (MATH 221 Vectors and Matrices or MATH 223 Linear Algebra) is helpful but not necessary. Students who have not taken one these classes may want to do some reading before the course or be prepared to learn some of that material as the course progresses.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP355**
Prereq: **COMP212 AND MATH228**

IDEA359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA359, DANC359, ENVS359**
Prereq: **THEA105 OR THEA150 OR THEA185 OR ARST131 OR ARST190**

IDEA360 Media for Performance
This course examines the use of media and technology as it relates to dramaturgy and design for performance. Class time will be used for lecture, discussion, and experimentation, during which we will explore new technologies used in the industry, including projections, motion tracking, and software such as After Effects and Isadora. Throughout the semester, students will use the skills learned to create their own digital performances.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA360, DANC364**
Prereq: **None**

IDEA364 Architecture: Historiography, Theory, Criticism; Traditional and Contemporary Approaches
This seminar -- intended primarily for majors in history of art and architecture, for studio majors concentrating in architecture, and students interested in urban studies -- surveys different methods of studying architecture and its history. Emphasis throughout is on comparison of general theories of interpretation in art history and other disciplines and their application to specific works of art and architecture. Topics include monumentality and collective memory, stylistic analysis, philosophical aesthetics, iconography and semiotics, patronage and ideological expression, structural technology and building process, material culture and consumption, vernacular architecture and cultural landscapes, spatial form, urban landscapes, sociology, and affordable housing. Along with colonial, postcolonial, and decolonial studies of architecture, the seminar incorporates

feminist architectural history and theory, energy studies, race and histories of modern architecture, and questions of canon formation and canonicity.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA364**
Prereq: **None**

IDEA370 Regenerative Design II
This course builds on the exploration and knowledge learned in Product Design I to discover opportunities for systems thinking in design. Students will study challenges and opportunities related to aging, education, food, and mobility to investigate potential opportunities through the lens of regenerative design. The course will support students in developing digital modeling skills as well as rapid prototyping and fabrication techniques. Students will work both individually and collaboratively in a studio environment. Field trips to New York City design ateliers, fabricators, and workshops may be expected as part of this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST370**
Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA375 Modeling the Earth and Environment
Models can provide insights into Earth systems that are difficult to obtain by direct experimentation or observation. This course will introduce students to the process of translating Earth systems into idealized mathematical models, specific methods for solving the resulting equations, and implementation of models in MATLAB. We will explore cases from a range of topics in the earth and environmental sciences to gain a better appreciation of the insights models can offer. Students should have MATLAB installed on a laptop computer for in-class work.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES375, E&ES575**
Prereq: **MATH120 OR MATH121**

IDEA383 Introduction to Costume Design for Performance
This course is an exploration of costume design concepts for contemporary performance including theater and other genres. The class will include beginning elements of costume design, including character/script analysis, research, costume lists, action charts, visual design concepts and techniques, and collage and drawing skills. This course counts towards the Theater Arts category for the THEA major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA383**
Prereq: **THEA105 OR THEA185 OR ARST131 OR ARST445**

IDEA387 Virtual Production: The Music Video
This intensive studio course will explore the breadth and depth of the music video genre. Students will learn advanced post-production, motion capture, and video recording techniques. Class sessions will include technical demonstrations, group discussions, and conversations with practitioners in the field. Readings and screenings will examine the relationship between music videos, technology, contemporary art, and popular culture. Students will learn how to use the 3D motion capture studio and record live musical performances. Software will include Adobe AfterEffects, Blender, and DaVinci Resolve. Through weekly exercises and a final independent project, students will learn to work collaboratively and develop a distinct creative voice. The course will culminate with a final music video project, to be screened at the end of the semester. Previous experience in Adobe Premiere Pro software is required. Preference will be given to students who have successfully completed ARST 286, ARST 386, DDC 108, or DDC 448. All students must be concurrently enrolled in the virtual production lab which meets Fridays 1:20 p.m. - 3:20 p.m. in DDC.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST387, DDC387**
Prereq: **None**

INTEGRATED DESIGN, ENGINEERING, ARTS & SOCIETY MAJOR

MAJOR DESCRIPTION

The Major in Integrated Design, Engineering, Arts & Society (IDEAS) challenges students to think broadly, design responsibly, and respond critically to the complex social, technological, cultural, and environmental conditions surrounding them. Through a curriculum that brings together iterative creation, experimentation, and critique, IDEAS majors gain proficiency in making as a form of inquiry and research.

Students attracted to the IDEAS major bring a high level of intellectual curiosity, an interdisciplinary mindset, and an inventive imagination to improve systems and solve problems. Hands-on, collaborative, project-based courses form the core of the major. Drawing on Wesleyan's liberal arts tradition, students complete courses across all three academic divisions before establishing an area of focus. The linked IDEAS major is secondary to a primary major (e.g., Art Studio, Biology, Computer Science, Theatre, Physics, etc.) and students must complete all the graduation requirements from their primary major in addition to those of the IDEAS major. Each student works closely with an IDEAS advisor to develop their individual course of study, including a major capstone project, and assemble a portfolio encompassing work developed within IDEAS courses.

IDEAS majors graduate with an understanding of how design and engineering choices shape—and are shaped by—social structures. They bring a combination of strategic thinking and technical skill to a broad range of fields, including architecture, systems design, user-experience design, robotics and human-computer interaction, urban planning, sustainability, and service design.

ADMISSION TO THE MAJOR

The linked major in Integrated Design, Engineering, Arts & Society (IDEAS) is the secondary major to a primary, companion major (e.g., art studio, biology, computer science, physics, theater, etc.). Students cannot obtain the BA degree with IDEAS as their only major. Students must complete all the requirements for graduation from their primary major in addition to those of IDEAS as their linked major. Each student will work closely with an IDEAS advisor to develop an individual course of study within an established major track. Students are encouraged to declare the IDEAS linked major in the spring of their sophomore year.

MAJOR REQUIREMENTS

IDEAS Core (4 Courses)

Comprising four courses, the IDEAS major Core is designed to introduce students to hands-on, project-based studio, laboratory, and critical coursework in design and engineering. There are multiple possible introductory courses to fulfill three of the four core course requirements. The fourth course within the core (IDEA 292: Interdisciplinary Project Lab) acts as the gateway to the major.

1. Introductory Design Studio (ARST220, ARST235, or ARST270)
2. Engineering Foundations Lab (IDEA170 or IDEA175)
3. Design & Technology Seminar (IDEA180), (IDEA206), (IDEA235), (IDEA275), (IDEA311
   Or another Social Science course.
4. Major Gateway (IDEA292). All students intending to major must enroll in the Interdisciplinary IDEAS Project Lab after completing a foundations lab or introductory design studio course (1 or 2 above). Completion of the gateway courses is recommended prior to completion of sophomore year, but not required.

Range (4 Courses)

Building on the interdisciplinary foundation of the Core, the second set of course requirements collectively enhance students' design and engineering range. Like the Core, the Range consists of four courses:

1. Design Studio elective
2. Engineering/Quantitative elective
3. History/Theory elective
4. Programming elective (COMP112, IDEA285 or approved alternate)

Except where explicitly excluded by course prerequisites, the Range courses may be taken simultaneously with Core courses to increase the flexibility of student scheduling. Some of these courses may also overlap with the linked major.

Focus (4 Courses)

These four upper-level elective courses are specific to each major track, constitute the focus area of the student's major, and must be at the 200-level or higher. Students are strongly encouraged to select from pre-approved listings of courses for their chosen track, detailed below. At least two of these elective courses should be listed (or cross-listed) by the IDEAS program. Students may develop an alternate sequence with approval from their IDEAS advisor and program director.

Senior Capstone Project (1-2 Credits)

A team-based or independent original project culminating in a public presentation, exhibition, or publication. The capstone may be one to two credits, depending on scope of project. In many cases, this project will take the form of a senior thesis, and may be advised in coordination with the student's primary major. More details are provided in Section I below. Seniors will participate in colloquium lunches where they will make a brief presentation of their project, followed by discussion with students and participating faculty. Students will distribute a summary of their findings in the week prior to presenting to facilitate

discussion. All declared IDEAS majors will be invited to the colloquium luncheons to build community and encourage them to plan future projects.

Student Portfolio:

Historically speaking, the term portfolio describes a portable object for carrying papers, artwork, maps, etc., subsequently expanded to include both the object and its contents. For the purposes of the IDEAS Portfolio requirement, the portable object is a website. The contents are an individual student's projects, produced in their IDEAS courses. At a minimum, a Portfolio should include the best work a student has produced from at least three (3) IDEAS courses. Presented using images and text, the projects included should encompass both completed and process work. The Portfolio is also a project. The design and presentation of the Portfolio comprise a personal statement about its author, their training, interests, and ambitions.

IDEAS Major Tracks and their requirements are available on the CoDES website at this link (https://www.wesleyan.edu/codes/program/major-tracks.html).

IDEAS LINKED MAJOR TRACKS

STUDENT LEARNING GOALS

- Building a foundation of knowledge that includes the technical, aesthetic, and social aspects of design and engineering.
- Learning how to apply theoretical knowledge to the creation of objects, systems, or methods.
- Understanding how design and engineering choices are influenced by social structures and pressure, and vice-versa.
- Learning how to use the design process as a framework for creative exploration and problem solving.
- Learning how to effectively work in group settings and how to harness complementary skills of group members.

STUDY ABROAD

Study abroad is encouraged for IDEAS major students. Students should consider programs that offer courses in the areas of design and/or engineering. Students should request approval for any courses they wish to transfer for credit prior to study abroad.

LANGUAGE REQUIREMENT

There is no language requirement for IDEAS.

TRANSFER CREDIT

IDEAS Core courses must be taken at Wesleyan. Up to three course requirements for the IDEAS major can be fulfilled with transfer credits, subject to approval from an IDEAS advisor and program chair.

HONORS

Student honors projects may be pursued with an IDEAS Core faculty member or through a project with a mentor from the student's companion major that has prior approval from the student's IDEAS advisor. Such honors projects would fulfill the capstone described above. Projects completed in the companion department are not evaluated by IDEAS. For Departmental Honors in IDEAS, a student must have a minimum GPA of 85.0 and complete both Stage I and Stage II general education expectations. Depending on the focus area, an IDEAS mentored thesis may be a written thesis, exhibition, or body of work, and must be evaluated by the thesis advisor and two additional faculty members to meet the standards for honors or high honors.

CAPSTONE EXPERIENCE

Students will complete a team-based or independent original project culminating in a public presentation, exhibition, or publication. The capstone may be one to two credits, depending on scope of project. There are several ways to fulfill the capstone requirement.

1. The project may take the form accepted by the companion department as a senior project (e.g., senior thesis, senior essay, senior performance, senior exhibition, senior film thesis). The final project is submitted to the companion department and is not evaluated by IDEAS.
2. The student may register for and complete a senior thesis in the IDEAS major. The mentor can be any Wesleyan faculty member, but the topic must be approved by the student's IDEAS advisor. The thesis material may take the form of a written publication, public presentation, or exhibition, with the form approved by the student's IDEAS advisor and the College of Design & Engineering Studies chair.

INTEGRATED DESIGN, ENGINEERING, ARTS & SOCIETY MINOR

MINOR DESCRIPTION

The Minor in Integrated Design, Engineering, Arts & Society (IDEAS) prepares students to succeed at the intersection of design, the arts, and engineering in a liberal arts context. Students develop foundational knowledge in these areas by working in collaborative groups and individually on project-based assignments that emphasizemaking and doing as critical forms of knowledge. A minor in IDEAS requires seven credits and assembly of a portfolio encompassing work developed within IDEAS courses.Three core courses provide a foundation in the technical, aesthetic, and human dimensions of design and engineering. These courses are followed by a focus in one of many concentrations that span design and engineering disciplines.

ADMISSION TO THE MINOR

Students should complete at least one course from the required core courses to be admitted to the IDEAS minor. Declare the IDEAS minor through your WesPortal.

MINOR REQUIREMENTS

A minor in IDEAS requires seven credits. Comprising three courses, the IDEAS minor core is designed to introduce students to hands-on project-based studio, laboratory, and critical coursework in design and engineering. The remaining four elective courses come from course concentrations. Some courses offered on an irregular basis are not listed in concentrations, but may be used for electives subject to approval from the minor advisor.

STUDENT PORTFOLIO

Historically speaking, the term portfolio describes a portable object for carrying papers, artwork, maps, etc., subsequently expanded to include both the object and its contents. **For the purposes of the IDEAS Portfolio requirement, the portable object is a website.** The contents are an individual student's projects, produced in their IDEAS courses. At a minimum, a Portfolio should include the best work a student has produced from at least three (3) IDEAS courses. Presented using images and text, the projects included should encompass both completed and process work. The Portfolio is also a project. The design and presentation of the Portfolio comprise a personal statement about its author, their training, interests, and ambitions.

REQUIRED CORE COURSES

Students must complete one course from each group below.

Code	Title	Hours
One Engineering Foundations Lab		**1**
IDEA170	Introduction to Mechanical Design and Engineering	
IDEA175	Introduction to Electrical Design & Engineering	
One Introductory Design Studio		**1**
ARST190	Digital Foundations	
ARST220	Ecological Design I: Being at Home in the World	
ARST221	A Thousand Years of Iteration: Design for an Uncertain Future	
ARST235	Architecture I	
ARST236	Fast & Furious	
ARST243	Introduction to Graphic Design	
ARST270	Fundamentals of Design I	
ARST271	Designing With Living Systems: Soft + Hairy	
IDEA185	Form and Code	
THEA185	Text & Visual Imagination: Introduction to Eco Design for Performance	
One Design & Technology Seminar		**1**
ARCP275	Introduction to Archaeological Science: Natural Science Approaches to the Human Past	
ARCP360	Experimental Archaeology: Material Science and Past Behaviors	
CSPL235	Activism and Theories of Change	
STS311	Media and Environment: In/Sensible Worlds	
IDEA180	Design Studies	

Or another approved social science course

ELECTIVE COURSES FROM CONCENTRATIONS:

The concentrations provide topical focus in the wide array of areas in Design, Engineering, Arts & Society. The IDEAS concentrations consist of four courses above the three required courses, to make the total of seven courses in the minor.

Some of the proposed concentrations include courses listed among those that will satisfy the gateway course distribution requirement listed above. Students will work with an advisor to help them achieve the appropriate depth of study in the concentration. Related courses that are not offered on a regular basis or course substitutions may be considered for minor credit, subject to review by the minor advisor. Typically, introductory (100-level) courses may not be counted toward the elective requirement.

The IDEAS Minor Concentrations and requirements are available on the CoDES website (https://www.wesleyan.edu/codes/program/minor-concentrations.html).

Additional Minor Information

- There may be prerequisite courses required for some of the courses listed above. These prerequisites do not count towards the minor.
- Some of the courses may be cross-listed with other departments; students can enroll in any listing for the specified course.
- Students may propose a different combination of elective courses in consultation with the IDEAS advisor.
- Some courses may overlap with existing major requirements. A student may only count three course credits toward the IDEAS minor that are also counted towards a major, linked major, certificate, or other minor, unless receiving explicit approval from the IDEAS minor administrator to waive this requirement.

COLLEGE OF EAST ASIAN STUDIES

The College of East Asian Studies (CEAS) challenges students to understand China, Japan, and Korea through the rigors of language study and the analytical tools of various academic disciplines. This process demands both broad exposure to different subjects and a focused perspective on a particular feature of the East Asian landscape. Japan, China, and Korea are related yet distinctive civilizations. Each has its own traditions and patterns of development. These traditions have played an important role in the development of culture around the globe and remain formative influences today.

Students interested in East Asian studies will be guided by the expectations for liberal learning at Wesleyan and by the CEAS's interdisciplinary approach. Language, premodern history and culture, and the sophomore Proseminar provide the common core of our program. The Proseminar exposes students to a wide variety of intellectual approaches to East Asian studies and thereby provides a foundation for students to focus in more depth in particular areas.

AFFILIATED FACULTY

Talia Johanna Andrei
BA, Rutgers University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Art History; Assistant Professor, East Asian Studies

Stephen Angle
BA, Yale University; PHD, University of Michigan

COLLEGE OF EAST ASIAN STUDIES

CEAS114F From Sumo to Sonic: Japan at Play (FYS)
This class explores the many ways the Japanese have played throughout time including sports, card games, martial arts, video games, poetry contests, and more. We will contemplate the general societal impact of play and look to Japanese history as a specific, and oftentimes distinct, example. The class is a combination of lectures about the historical and cultural significance of Japanese games and class time devoted to you playing some of those games to better understand them. By the end of this course, you will know about the sumo wrestling competitions that delighted the Heian court over one millennium ago as well as current baseball phenom Otani Shohei. You will have explored the wonderful virtual worlds of visionary video game creators, such as Miyazaki Hidetada and Kojima Hideo, while trying your hand at some of Japan's most enduring board and card games. No knowledge of Japan or the Japanese language is required for this course.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Identical With: **HIST114F**
Prereq: **None**

CEAS155 Fictional Japan: Introduction to Japanese Literature and Culture
This course will explore the evolution of Japanese fictional narrative, from Japan's first encounter with "modern" literary forms in the late 19th century to postmodern digital discourses advanced through anime and gaming. In so doing, we will discuss the ways in which Japanese theories of literature intersect with notions of national identity, modernity, and Westernization. How does the Japanese novel participate in the modern process of nation building, and how is it used to situate Japan's position in East Asia and the world? We will also consider fictional works from marginalized groups in Japan to address how notions of gender and ethnicity serve as an intervention into traditional discourses on Japanese literature. Finally, we will explore new iterations of Japanese fiction in the form of digital media and database narratives. Does advanced technology fundamentally change how we produce and consume narratives and, therefore, view the world around us? How do these new forms impact constructions of national history and identity? Is this phenomenon somehow unique to Japan, or a simple product of globalization?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS156F Sex, Ghosts, and Cannibalism: The Chinese Short Story FYS
This course takes the passionate, the strange, and the peculiar--sex, ghosts, and cannibalism--as a lens through which to explore big issues in the history of Chinese literature and culture.

Focusing on short stories from the 7th to 21st centuries, we ask what fiction can tell us about the real concerns that shaped the lives of Chinese writers. How do literary depictions of sex and desire relate to social issues surrounding gender, power, and family? What do supernatural characters--hungry ghosts, lofty gods, unruly demons, seductive snakes, and fox spirits--reveal about the human world and belief systems used to make sense of unusual occurrences? What do motifs of cannibalism and related themes linked to bodies, consumption, hunger, and food tell us about the social and political changes China witnessed on its path toward becoming a modern nation-state?

As a First Year Seminar, this course is writing-intensive and is meant to equip you with the writing, reading, research, and presentation skills needed at Wesleyan. You will have numerous opportunities to write and revise your work, share your insights during class discussion, and practice the core skills of effective reading and interpretation.

All texts will be taught in English translation. No prior knowledge of China or Chinese language is required.

Identical With: **WLIT228F**
Prereq: **None**

CEAS157F Legacies of WWII in Postwar Japan (FYS)
In 1956, The Japanese Economic Planning Agency famously declared that "the 'post-war' is over." Indeed, by that time, the national economy had made a remarkable recovery since the end of WWII. Others place the end of the "post-war" with Emperor Hirohito's death in 1989. Still, was the "post-war" truly over for Japan? This seminar aims to tackle this dilemma of the "post-war" and assess how the war and the American occupation are remembered by the Japanese, as well as Americans and Asian neighbors, and how they continue to reverberate politically and culturally, seventy-odd years after the conflict's ostensible end. The course will begin with some history of WWII and the American occupation. Film, literature, and popular media, along with secondary scholarship, will energize discussions about topics such as the rise of anime and otaku culture, Orientalism, gendered racism in Japanese-American relations, the 1964 and 2020 Tokyo Olympics, American bases in Japan, and North Korea.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS158F Literary Pop Culture: The Tale of Genji and The Story of the Stone (FYS)
This first-year seminar addresses two of the great East Asian novels, "The Tale of Genji" (from Japan) and "The Story of the Stone" (also known as Dream of the Red Chamber) (from China), and their afterlives in modern and premodern popular culture. Topics of discussion include adaptations of both novels as literature and in other media forms (drama, film, TV, etc.); the two novels in painting/prints, games, fan fictions, etc.; shared themes such as family, romance, and power; and social issues including class, gender, and intergenerational conflict. No previous background in East Asian studies required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS159F A Cultural History of Japanese Food (FYS)
This seminar explores Japanese cuisine as a historical site in which cultural values are sought, contested, and spread for national and international consumption, regurgitation, or even purging. Through an historical examination of practices, ingredients, and values, we uncover, contest, and debate the aesthetics, beliefs, politics, environmental issues, and international exchange that characterize Japanese history. We consequently ask: What is Japanese cuisine? What is Japanese culture?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS164 Bushido and Bullets: Samurai Flicks and Western Films
Bushido and bullets; shoguns and sheriffs; katanas and .45 Colt Revolvers. Alliterations aside, the connections between samurai films and westerns are as deep as they are numerous. Many cinephiles know that Japanese director Kurosawa Akira influenced multiple directors in the west, such as George Lucas, Sergio Leone, and Stephen Spielberg. What is perhaps less known is that Kurosawa was greatly influenced by a man who directed some of the greatest westerns from the 1930s to the 1960s -- John Ford. Diving into those influences is one of the goals of this class as we watch some of the greatest samurai films and their western counterparts. The other goal of this class is to categorize and analyze the many aspects of these films, from the protagonist's psyche to the evolution of civilized society, to see why these two seemingly disparate movie genres resonate so deeply. Finally, we will critique these films and discuss their merit in the twenty-first century. All Japanese movies will have subtitles. No knowledge of Japan or the Japanese language is required for this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Identical With: **HIST164**
Prereq: **None**

CEAS180 Japan Rocks: Music in/as Contemporary Japanese Studies
This course aims to consider topics in modern and contemporary (understood as post-War) Japanese society through the lens of musical expression. By attending to specific instances of musical expression in modern and contemporary Japan, we will strive to understand not only the songs themselves but the contexts within which they were produced. This course aims to take music not merely as an object of study/analysis but as a means by which we might both critique and build upon the discipline of Japanese studies and area studies in general.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS181 Chinese Pop Culture
Popular culture is closely associated with our daily life and ways of thinking, seeing, and connecting with the world. This course will introduce select aspects of modern and contemporary Chinese-language popular culture and its circulation among Chinese-speaking sites, including China, Taiwan, and Hong Kong. We will mainly focus on forms that have circulated and continue to circulate from the modern to the contemporary period, including movie musicals, martial arts, Internet culture, and singing contests. We will also study how Chinese pop culture has influenced audiences and (re-)construct their identities, as well as explore how cultural producers in Chinese language have engaged with issues of fandom, gender and sexuality, ethnicity, and material life through a variety of pop cultural forms. Throughout the course, we will discuss theories of pop culture and analyze primary materials to understand the production and circulation of Chinese pop culture. This course is taught in English.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS201 Proseminar
This seminar explores some of the key tenets and methodologies of the academic discipline broadly known as 'area studies,' with the aim of further preparing students to pursue their chosen avenues of research as scholars of East Asian Studies at Wesleyan University. It is required of all CEAS majors in their sophomore year, and is also open to CEAS majors in their junior or senior years who may have been unable to take the seminar previously. The specific topics and concerns addressed by the seminar shift from year to year and according to the instructor, but may include questions of geopolitics, Orientalism, modernization and modernity, and productive approaches to grappling with written, musical, and filmic texts in disparate contexts and historical moments.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS202 Narrating China: Introduction to 20th- and 21st-Century Chinese Literature
This survey course introduces students to major literary movements in 20th- and 21st-century China through selective works by representative authors. It has two major aims: (1) It invites students to explore how individual authors--at different historical moments and in different social positions--have responded to historical changes that radically unsettled their senses of self and nation and also how their literary expressions may reveal the shifting subjectivity of modern China and Chineseness. (2) At the same time, it introduces students to the academic discipline of literary criticism, develops or deepens students' critical close reading and textual analysis, and invites them to discover the joy and reward of plunging into a reading experience and coming out with interpretations of their own making. While the course does attend to important historical flash points unique to Chinese history, it also explores literary themes that resonate globally, beyond the context of modern China. Varying slightly by semester, these themes could include the relation between politics and literature, revolution and revolutionary arts, alternative modernities, writerly authority and the individual self, gendered authorship, memory and trauma, ethnic governance and resistance, class divisions, ecological damages, labor migration, etc. This course assumes no prior knowledge of China or Chinese language, and all texts will be taught using English translations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Identical With: **WLIT223**
Prereq: **None**

CEAS203 Faces of Korea
This course addresses multiple topics that span both traditional and modern Korean culture, ranging from traditional cuisine, dance, music, art, architecture, and the modernization of Korea in the 20th century to Korean films, social issues, religion, and the Korean Wave.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS204 Chinese Media in Chinese: Star, Fandom, and Identity
This course is conducted in Mandarin Chinese and designed to supplement the standard English-language Chinese Pop Culture (CEAS 181) course. The course will have two main foci: (1) introducing students to Chinese-language scholarship on Chinese media, particularly pop culture and its flow within East Asia, and (2) analyzing and discussing Chinese media in-depth in Mandarin Chinese. Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. All the reading materials will be in Mandarin Chinese, and we will have oral presentations in Chinese and some written work in English. Evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CEAS205 Social Movements in East Asia
Despite East Asia's reputation for acquiescent populations and weak civil society, the region has been replete with social movements. This course assesses the state of civil society in both authoritarian and democratic societies in East Asia by surveying contemporary social movements in China, Japan, South Korea, and Taiwan. The course is designed for students to gain an understanding of how civil society looks in East Asian countries and its role in social and political changes in the past and present times. Although the course will not be able to cover the entirety of social movements in the region, the course is to equip students with contextual knowledge and theoretical tools to take a critical approach to examining current and future social movements in the region.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CEAS**
Identical With: **GOVT281**
Prereq: **None**

CEAS206 Korean Politics Through Film
This course explores the contemporary politics of Korea through academic sources and films. Students will discover how the tumultuous history of modern Korea has contributed to the present political conditions in the two Koreas. The course will focus on issues surrounding major political events in both South and North Korea, including Japanese colonialism, Japan-Korea relations, Korean War, military dictatorships, economic development, democratization, neoliberalism, inter-Korean relations, and US-Korea relations. Films and documentaries spanning from the 1990s to the present will highlight these political issues and events through the eyes of Korean filmmakers. The course will explore how films problematize political issues and how a film's storytelling compares to actual history and scholarship on Korea.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CEAS**
Identical With: **GOVT295**
Prereq: **None**

CEAS207 Introduction to History: Foundations of East Asian Cultures
This course introduces some of the cultural foundations of East Asia and how they have continued to resonate through history. We will be examining translated primary texts in history, literature, philosophy, and religion, mainly from China, Korea, and Japan. We will also be working with other media such as film and art. The course attempts to equip students with a basic fluency in interpreting ancient and modern materials from East Asia and identifying its cultural contexts.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Identical With: **HIST197, CHUM311**
Prereq: **None**

CEAS207Z Foundations of East Asian Cultures
This course introduces some of the cultural foundations of East Asia and how they have continued to resonate through history. We will be examining translated primary texts in history, literature, philosophy, and religion, mainly from China, Korea, and Japan. We will also be working with other media such as film and art. The course attempts to equip students with a basic fluency in interpreting ancient and modern materials from East Asia and identifying their cultural contexts. Some themes include the role of government, dilemmas of love, the methods and aims of education, gender roles and family, social inequality, self and society, and the social roles of literature and history. This course does not aim to be exhaustive, but seeks to enlarge narrow conceptions of Asian cultures and to offer tools for future exploration.

CEAS208 Modern Chinese Literature
This course introduces the history of modern Chinese literature from the republican era (early 20th-century) to the contemporary era. By discussing selected literary works, it serves an overview of the styles and features of modern Chinese literature in each time period and also introduces students to major themes from China's tumultuous 20th century. Topics will include the cultural transformations of the May Fourth movement, modernity, war, revolution, root-searching, and body writing. All readings will be in English translation.

CEAS210 Defining Japanese Culture Through Food
This course explores Japanese food traditions as a site in which cultural values are sought, contested, and disseminated for national consumption. Through an examination of various components of Japan's culinary practices such as the tea ceremony, sushi, whaling, and fusion cuisines, we uncover the aesthetics, religious beliefs, politics, environmental issues, and intercultural exchange that characterize Japanese history.

CEAS211 Food in Japanese Media (CLAC.50)
This 0.50 CLAC section is conducted in Japanese and will feature Japanese-language media (documentaries, films, TV shows, anime, and some texts such as news articles and manga). It is designed to supplement CEAS 210: From Tea to Connecticut Rolls: Defining Japanese Culture Through Food. All materials and discussion will be in Japanese. There may be some writing assignments depending on ability. The section is open to students with Japanese-language ability, from intermediate level to native speakers. With the instructor's approval, this section may be taken independently of the parent course. Evaluation will be primarily based on participation, effort, and completion of assignments.

CEAS212 Introduction to Korean Cinema
During the last few decades South Korean cinema has taken center stage in world cinema with the phenomenal success of its film industry and critical acclaim in the global context. However, Korea has boasted a thriving film culture and aesthetics since the "golden age" of the 1950s, of which renowned contemporary directors such as Bong Joon-ho and Park Chan-wook have claimed they are the inheritors. This course introduces Korean cinema from its beginnings in the colonial era to its recent achievements. While learning the concepts and theories of film studies as well as the cultural and political contexts to which Korean film culture has responded, students will explore films by key directors that constitute the crucial "moments" of South Korean cinema. We will examine the main topics in Korean cinema, including colonial production, the liberation and Western influence, nation and nationalism, modernity and women, gender politics, realist and modernist cinema, popular cinema and cultural depression, the Korean New Wave, democratization and political cinema, the Korean blockbuster, the questions of "Koreanness," and the "Korean Wave" in the global film market. The course also seeks to establish a balance between understanding Korean cinema as both a reservoir of historical memory and as an example of evolving world cinema. Through engagement with methodological issues from film studies in each week's readings, including the question of archives, national cinema discourse, feminist film theory, auteurism, and genre studies, students in this course will learn to analyze Korean filmic texts not only as a way to understand the particularity of Korean cinema but also as a frontier of cinematic language in the broader history of film.

CEAS213 The Chinese Canon and Its Afterlife
This course is an exploration of canonical works in Chinese literature, religious texts, historical narratives, art, and movies, with an emphasis on their aesthetic and cultural implications. Topics include Confucianism, Daoism, and Buddhism; folk religions and shamanism; cultural identity and self-cultivation; sexuality, cross-dressing, and gender politics; nature and utopias; emperors, scholars, and musicians; hermits and knights-errant; learned women poets and courtesans; drunken poets and Zen masters; fox spirits and ghosts; portraiture and representations of bodies; and secret societies and avant-garde artists. Several internationally acclaimed poets and translators of Chinese literature such as Eleanor Goodman and Zang Di will join the class discussion as guest speakers. They will discuss their writing process, and answer questions about their work. All readings are in translation. Although some Chinese characters will be introduced in calligraphy, no knowledge of Chinese is required.

CEAS215 The Legacy of World War II in Postwar Japan
In 1956, the Japanese Economic Planning Agency famously declared, "The 'postwar' is over." Indeed, by that time, the national economy had made a remarkable recovery since the end of World War II. Others place the end of the postwar with Emperor Hirohito's death in 1989. The new Reiwa era might be another marker. Still, was the postwar truly over for Japan? This seminar aims to tackle this dilemma of the postwar and assess how the war and the American occupation are remembered by the Japanese, and how they continue to reverberate politically and culturally, nearly 70 years after Japan regained its independence.

CEAS216 History of Japanese Cinema
During the last several decades, Japanese cinema has won international acclaim for its artistic achievement in form and content while gaining commercial dominance over the power of Hollywood films in its domestic film market. What have been the driving forces for the development of Japanese cinema as both art and industry? How have Japanese filmmakers contributed to the creation and advancement of new cinematic languages and genres that appealed not only to

domestic audiences, but also to global cinephiles? What have been the central issues and themes in Japanese film history? This course surveys Japanese cinema from its beginnings to the work of contemporary film auteurs. Students will learn the history of Japanese cinema by watching and discussing the canonical pieces by the prestigious directors and the studio genre films produced by the various major and minor local film companies. At the same time, we will examine the main topics and trends of Japanese cinema such as the pure film movement, Shochiku's shoshimin eiga, wartime film culture, melodramas under the U.S. occupation, New Wave films and political cinema, art cinema, the popularity of "series" movies, and the transnational and digital film culture in contemporary Japan. We will explore the world of the masters of classical Japanese cinema, including the films of Ozu Yasujiro, Mizoguchi Kenji, and Kurosawa Akira, and also those by Kurosawa Kiyoshi and Koreeda Hirokazu--the major contemporary Japanese auteurs.

CEAS217 Samurai: Imagining, Performing Japanese Identity
Among conventional images of Japan, the samurai still allures. This course examines the history of samurai and its myths to consider why it remains so popular, and what that says about the values, fantasies, and anxieties not only of Japan past and present, but also of the West. Through historical studies, literature, and film, the course discusses such themes as orientalism, sexuality and gender, nationalism, and samurai as postwar critiques of society.

CEAS217F Who is the Dalai Lama? (FYS)
This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulkus) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the 15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

CEAS218 "Other Chinas": Literature from Taiwan, Hong Kong, and Sinophone Southeast Asia
How do we study literary and cultural products created in Taiwan, Hong Kong, Malaysia, Singapore, and those created by Chinese-educated Tibetan, Uyghur, Manchurian, or Mongolian authors and artists? Are they Chinese? Or not? How might their places of production bring about literary and cultural subjectivities that are distinct from those from mainland and Han-dominated China (i.e., the conventional domain of Chinese humanities studies)? How do writers and artists deliberately record, or even create, their own unique and place-based senses of identity? How do they struggle with the ideas of exile, diaspora, colonization, decolonization, autonomy, assimilation, resistance--both in relation to China and within global geopolitics--while also striking out on their own to depict the joys and sorrows of human everydayness? This discussion-heavy course introduces students to a representative set of 20th-and 21st-century literary and cultural texts from some of these locales under the umbrella concept of the Sinophone. As Shu-mei Shih defines it, Sinophone aims to describe "Sinitic-language cultures and communities on the margin of China and Chineseness" where these cultures and communities engage in their own place-based cultural productions. It alerts us to the heterogeneity in the "Chinese-speaking world" and the relations of power that effected such heterogeneity. Students will read literary texts alongside relevant theoretical and historical writings, and parts of the course may include film and other cultural products as objects of critical examination. The course will be conducted in English, and all reading materials will be in English translation.

CEAS219 K-Wave: Korean Popular Culture and Media
This course explores the vibrant and ever-evolving world of Korean popular culture and its global phenomenon known as the Korean Wave or Hallyu. Through a comprehensive analysis of scholarly approaches and diverse media texts, we will explore how Korean popular culture has emerged, transformed, and resonated on a global scale. Through historical and theoretical frameworks, we will investigate how media productions intersect with broader sociocultural issues such as modernity, class, economy, gender, sexuality, and political dynamics. Students will critically examine a wide array of media forms, including films, television, music, and webtoons, analyzing their content, aesthetic strategies, and cultural impact. From a brief introduction of the origin of the Korean Wave, we will move to analyze the specific features of popular culture industries and productions in South Korea and their reception around the world. By linking media texts to their historical and sociocultural significance, we will uncover how Korean popular culture both shapes and is shaped by global media trends. Readings for this course will be available in English or in English translation. No previous knowledge of Korean history or culture is required.

CEAS220 Nature and the Human Realm in Chinese Literature
This course introduces students to a wide range of ways in which Chinese writers and poets define the ever-changing relationship between the human realm and nature in imaginative literature. Topics include Daoism and Yin-Yang; shamanism and prose poetry; martial arts and alchemy; the Peach Blossom Spring; travel and landscape literature; folk religions and magics; ghost stories and strange tales; rebellions and migrations, etc. All readings are in translation. No knowledge of Chinese is required.

CEAS221 Introduction to Premodern Chinese Literature
This course provides a comprehensive introduction to Chinese literature and culture from antiquity through the end of the imperial era. Readings span prose (philosophical, historical, and literary texts; myths and legends; anecdotes; and tales of the strange), poetry (from the Book of Songs through Tang and Song verse), drama, and vernacular fiction. We will consider how literary forms and styles evolved and how they engaged themes such as creativity, gender, literati

identity, daily life, and religion. All readings and discussions are in English. No prior background is required.

CEAS222 China as Scientific Powerhouse
Science, technology, and medicine played an integral role in the China's transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on "its own terms" by understanding how the unique political and social challenges of modern China shaped Chinese science.

CEAS223 Chinese Eco-Civilization: History, Experience, and Myths
The course traces the historical roots of the ideas of eco-civilization, a policy platform that appeared in the twenty-first century by examining how Chinese agrarian civilizations and their nomadic neighbors transformed the bio-physical environment over the course of 3,000 years of history. We will draw on translations of Chinese literary texts including poetry, classical prose, and novels to explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the modern period. How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice? Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs?

CEAS224 Modern China: States, Transnations, Individuals, and Worlds
This course examines China's turbulent transition to modernity. It covers the Ming-Qing transition, Manchu conquest of central Eurasia, China's conflict and engagement with the West, birth of China's first republic, and the People's Republic of China under Mao Zedong, Deng Xiaoping, and his successors. The dramatic transformation of China spanning the late 19th century to the present day is the focus of this course. The Chinese people today continue to deal with the legacy of these reforms, wars, and revolutions, as China's leaders and people dealt with unprecedented challenges. The three central themes of this course are (1) the reconstitution of (a somewhat) unified China after decades of political upheaval, (2) China's vulnerabilities in the face of domestic troubles and threats from abroad, and (3) the challenges of maintaining a high-growth economy with scarce resources.

CEAS225 Introduction to Chinese Poetry
This course explores various styles of traditional and modern Chinese poetry from the archaic period to the 21st century, with an emphasis on the range of ways in which poetry has been implicated, to a degree unknown in the West, in the political, spiritual, and aesthetic movements in China over the last three millennia. Topics include "The Book of Songs," "Nineteen Ancient Poems," the "Music Bureau" ballads, Six Dynasties poetry, the great Tang masters, the Song lyrics, women poets, and religious poets. Although some Chinese characters will be introduced in the unit on calligraphy, no knowledge of Chinese is required; all readings will be in English translation.

CEAS228 Zen Buddhism Across East Asia: Teaching and Practice
In this course, we will examine Zen/Chan Buddhism in history and in its contemporary practice. We will trace how Zen Buddhism sprouted from Chinese religious traditions in the Tang Dynasty (618-907), flourished in the Song Dynasty (906-1279), and then spread to other East Asian countries such as Japan and Korea. Then, we will pay attention to the ways in which Zen Buddhism found its way to modern Western society, through figures such as D. T. Suzuki and Okakura Kakuzo since the 19th century. Course readings consist of primary sources of Zen Buddhism, which are available in English translation. A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

CEAS229 Performing Indonesia
This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

CEAS232 Introduction to Chinese Film
This course introduces contemporary Chinese cinema in both national and international senses. We will learn the basics of film history in the PRC, Taiwan, and Hong Kong through four major genres: family melodrama, martial arts, action, and musical. Our engagement with these selected films will provide insights into fundamental issues such as family, history, nationalism, transnationalism, identity, gender, and sexuality. The goal of this course is to demonstrate how Chinese cinema has developed in the PRC, Hong Kong, Taiwan, and transnationally and to refine students' abilities to analyze and write about film critically.

CEAS233 Transnational China: Writing and Screening Chinese Immigration
Migration is a crucial issue for centuries, and people move around the world involuntarily or voluntarily due to political force, economy, technology, and globalization. Chinese immigration to the world has its long history, and the dispersion of Chinese populations has contributed to the formation of Chinese-speaking sites globally and brought about the construction of Sinophone culture in various geographical locales. This course will introduce the discourse of the Sinophone, a linguistic-oriented term that defines cultural productions with Sinitic languages in Chinese-speaking sites around the world and its relation to Chinese immigration, transnationalism, and heterogeneity. The critical questions we will explore in this course include (1) What is the relationship between the Sinophone (roughly, Chinese language users) and China, Chineseness, Chinese diaspora, and overseas Chinese studies? (2) What is China in the lens of Chinese immigrants? (3) How do cultural producers represent Chinese immigrants' lived experiences? We will read novels/novellas and watch films from writers and filmmakers who have experienced diverse migratory trajectories to get a picture of how they represent Chinese immigrants' identity formation and negotiation with local societies, as well as their roots of origin/homeland. Through reading scholarship on Sinophone and primary texts, students will understand the relationship between physical migration and cultural production and become acquainted with various forms of place-based cultural productions in three Sinophone spheres, including the United States, Taiwan, and Malaysia.

CEAS234 Modern Korea in Film and Fiction
How have writers and film directors responded to the rapid transformation of Korean society? In what ways have their works shaped the experience of Koreans and constructed Koreans' notion about the nation and the self? This course examines how Korean literature and film have acknowledged and represented the diverse political, social, and cultural changes that have occurred on the Korean Peninsula in the modern era. It also aims to build an understanding of the ways in which Korea has built the close historical, political, and cultural relationships with other East Asian countries. Through selected literary and cinematic texts by prominent masters, students will investigate the critical moments of modern history that have deeply affected and altered social practices and the actual lives of twentieth-century Koreans. While observing the flow of change in Korean society, students will examine how gender, class, ethnicity, and generation profoundly impact one's sense of the nation and the self. The class consists of occasional in-class film screenings, lectures, student presentations, and discussions.

CEAS236A Curatorial Workshop: Images of the Floating World
This course will provide students with practical training in the design and development of a gallery installation in the Davison Art Center (DAC). The theme for this semester is Japanese woodblock prints. We will carry out the many and diverse components involved in creating a gallery installation, from conception to execution, including concept development, catalog and label entries, accessibility, layout, and design. The course will culminate with an installation at the DAC. Images of the floating world, or ukiyo-e, refers to a genre of Japanese art that emerged in the 17th century to depict the pleasures of life of that period--beautiful women, famous kabuki actors, views of famous places, and erotic pictures, among other subject matter. In most cases, these are woodblock prints, images produced by craftsmen from woodcuts based on originals painted by artists. Because they could be produced quickly, cheaply, and in large numbers, woodblock prints were exceptionally well-suited for the representation of the latest fashions or politics. Ukiyo-e prints made their way to Europe in the 19th century and remain the most popular form of East Asian art in the West. The Davison Art Center has around 600 Japanese woodblock prints in its collection, ranging in date from the 17th to 20th centuries and including works from all the major artists of the Edo period (1615-1868).

CEAS237 Representations of Gender and Sexuality in China
This course explores the multifarious representations of men, women, and gender in literature, visual arts, philosophical texts, and historical narratives. It aims to provide an interdisciplinary reflection on conceptions of men, women, and gender: how they were created and transformed in history, how they reflect the power relations between men and women, and how they have further influenced the performance of gender in daily life. Works discussed in this course include the Book of Songs, "Rhapsody on the Gaotang Shrine," "The Prose Poem of the Beautiful Woman," the Palace Style Poetry, "The Story of Yingying," The Peony Pavilion, Feng Menglong's collection of erotic poetry, "Sinking," Madame Mao and the Revolutionary Model plays, and Eat Drink Man Woman.

CEAS238 Wartime Film Culture in the Japanese Empire
Just as in many other countries, cinema, within a short time of its emergence, became the most popular entertainment in modern Japan. Mindful of this, the Japanese government tried to turn the country's film industry into an arm of its propaganda machine to support its imperial program, especially the military component. This began with Japan's invasion of the Chinese continent in 1931 and lasted through the end of World War II in 1945. How did Japan's private film studios respond to such governmental efforts? How did wartime Japanese cinema manage to strike a balance between being entertainment and political texts? What are the characteristics of Imperial Japan's wartime film culture, and how are they different from the counterparts in other countries? Was the campaign to support war via movie productions in Japan successful, in terms of providing seamless propagandistic messages? What kind of legacy has the wartime film culture left in contemporary Japan and East Asia? In order to answer these questions, this course explores film culture of Imperial Japan and its territories during the wartime era, spanning roughly from the early 1930s through 1945. We will watch wartime films, and at the same time

examine the ways in which the film culture coexisted along with other forms of visual propaganda practice and political discourses. While probing how the films reflect the "virtues" of wartime conservatism, patriotism, perseverance, and self-control, this course will explore topics that include the propaganda culture of wartime Japan as a whole, Nazi propaganda and Japan, cultural films, monumental cinema, films featuring Japan-China or Japan-Taiwan romances, children-centered films, "kokumin eiga," films of volunteers and Japanese Spiritism, "Military Mothers" and gender, and the defeatist aesthetics and cracks in Imperial Japanese cinema. While we will for the most part watch and discuss films directed by the Japanese of mainland Japan, including such prominent directors as Mizoguchi Kenji and Kurosawa Akira, the films produced in the Japanese colonies of Korea, Taiwan, and Manchuria--whether independent productions or collaborative efforts--will also be examined. Film production in colonial Korea, in particular, was quite vibrant, relative to the cinematic output of Taiwan and Manchuria. We will observe how the films made in Japan's colonies joined the empire-wide filmic war-mobilization campaign, presenting their own justifications for war cooperation. Ultimately, this course will ask what kind of relationship Japanese cinema has had with the state and Japanese nationalism during the mid-century of Japan's tumultuous modern history.

CEAS239 Contemporary Korean Cinema and Society
This course offers an in-depth exploration of contemporary Korean cinema from the late 1990s to the present, emphasizing its intricate relationship with societal issues. Students will engage with a diverse array of films that not only demonstrate the artistic innovations of Korean filmmakers but also reflect the dynamic sociopolitical landscape of South Korea. Through guided analyses of film texts, we will employ various critical perspectives, including auteurism, national cinema, cultural studies, and genre theory, to enhance our understanding of cinematic narratives. A central focus of the course will be the examination of how gender, sexuality, and identity are portrayed in contemporary Korean films. Additionally, the course will investigate the impact of economic factors and transnational influences on the production and reception of Korean cinema, including the rise of genres such as "K-horror" and the rhetoric of transgressive violence. All films will have English subtitles, and all readings will be available in English; no prior knowledge of Korean film, history, or culture required. Join us on this captivating cinematic journey as we explore the intersections of films and society in contemporary Korea.

CEAS240 Gender and Power in Chinese Literature
This course explores the intersections of gender, power, and performance in Chinese society. Drawing on literary and historical sources, theories of gender and sexuality, and with reference to media forms such as theater and film, we assess the significance of gender as an analytical framework for studying Chinese literature, culture, and society. What power dynamics drive conceptions of gender and gender ideology in Chinese literature and history? And how do discussions around gender roles and sexuality change in the modern and contemporary periods? Course topics include: Chinese feminism; depictions of women in classical literature; gender roles, family, and marriage; conceptions of the body; constructing identities; women writers; the "new woman"; themes of cross-dressing; classical romance narratives; gender performance in Chinese theater; queer narratives; and more.

CEAS241 Visualizing Japanese-ness: Transnational Cinema in Modern Japan
This course is designed to interrogate evolving notions of transnationalism in Japanese cinema, from the prewar avant-garde to the postcolonial present. We will use the assigned films and supplementary readings as a means to explore concepts of Japanese nationalism and uniqueness (nihonjinron), colonial memory, hybridity, multiculturalism, neoliberalism, and creolization, among others. We will then use this theoretical foundation to analyze representations of Japanese minority groups (such as zainichi Koreans) to inquire into the possibility of obtaining a transnational or hybrid identity in the global era. How do these films "visualize" Japanese and/or transnational identity, and are these visions seen as compatible? In what ways and to what extent are these films engaged in a dialogue with theoretical concepts of postcoloniality and ethnicity?

CEAS242 Introduction to Buddhist Thought and Practice
This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

CEAS243 Chinese Theater and Drama
This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific actors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

CEAS244 Delicious Movement: Time Is Not Even, Space Is Not Empty
This course contemplates massive violence and bodily experiences of time and space through interdisciplinary discourse. Taught by NYC-based movement artist Eiko Otake, students will examine how being or becoming a mover reflects and alters each person's relationships with the environment, history, and other beings. Topics of study and discussion include war, atomic bomb literature, postwar Japan, and environmental violence such as the Fukushima nuclear explosions. A key concept of study will be metaphorical nakedness and how distance is malleable. Please note that homework load is heavy with weekly assignments and journals. Seeking collective learning, the course will culminate with a final project sharing. The class is fiercely non-competitive and non-technical. No previous dance training is necessary, but willingness to move with and in front of others is important. Please visit eikootake.org to learn about this instructor.

Fall 2026 schedule:

First Class: Monday, September 7 (on Labor Day)

Sundays: 2:30 - 6:00 pm and

Mondays: 6:30 - 9:30 pm

Last Class: Sunday, November 1

Questions: Please email: eikootake@gmail.com

CEAS245 The Fantastic and the Nonhuman in Pre-modern Chinese Literature
What defines the human and the humane, and how have "the human" and its many "others" been imagined throughout pre-modern Chinese history? This course explores a fascinating range of Chinese literature dealing with the fantastic and supernatural, from ancient times to the late imperial period. We will delve into captivating stories of gods, ghosts, seductive creatures, and alluring objects, investigating the boundaries of humanity and the rich spectrum of subhuman, superhuman, and nonhuman beings. Key themes include the interplay between the supernatural, gender, and sexuality, and how these narratives either reinforce or challenge traditional hierarchies and social norms. Through these stories, we will discover how pre-modern Chinese literature reflects, questions, and reimagines those cultural values and beliefs.

CEAS246 Eccentricity, Gender, and Occidentalism in Edo-Period Art (1615-1868)
The course will explore the history and artistic production of Japan's Edo period (1615-1868). This was a time of unprecedented peace, a time of social, economic, and political change that brought new modes and manners of visual expression and a sharpened focus on the individual artist. New trends in artistic identity emerged during this period, particularly those related to eccentricity, gender, and Sinophilia (love of Chinese culture). We will study the major artists and artistic movements of the Edo period, considering how these new trends found expression in the works of art produced during this time. Formal examination of the material and expressive qualities of works of art will be followed by a consideration of how other factors such as location, social background, education, and the religious faith of the artist are visible in the works they produced. The interplay between historical and artistic movements will be examined through discussion of issues such as materiality and medium, patronage and individuality, and traditionalism and poetic expression. Students will become familiar with the various media employed by Japanese artists, the techniques of painting and printing, and the sources and theories that inspired the innovative objects under investigation. More broadly, this course aims to teach students how to "read" Japanese art, how to look at a work of Japanese art and understand what it is they are seeing.

CEAS247 How to Become a Fortune Teller?: The Book of Changes and Predictivism in Ancient China
This seminar explores the Book of Changes as both a divination manual and a philosophical classic. Through close reading of selected hexagrams and traditional commentaries (e.g., Wang Bi, Cheng Yi, Zhu Xi, Wang Fuzhi), we trace how the text evolved from a tool of prognostication into a work of speculative philosophy addressing change, agency, and moral discernment. Topics include correlative cosmology (yin-yang, resonance), chance and decision-making, ethical timing, and the transformation of divination into reflective inquiry. Students will engage in interpretive exercises, textual discussions, and short "divination labs" that reconstruct historical interpretive practices. No prior training in literary Chinese or Chinese philosophy is required (though some background in the latter will be helpful); all readings and discussions are in English.

CEAS248 South Korean Cinema: Re/imagining Modern History on Screen
From its first productions during the colonial period to contemporary mainstream hits, South Korean cinema has been a contested sphere of the popular imagination regarding gender politics, modern Korean history, and political change. This course explores the films by the main directors of Korea to interrogate key problematic subjects in South Korean cinema, which include the discourse of modernity, the representation of historical and political trauma, the problems surrounding gender roles, and practices of film culture and industry. The film texts examined in this course include not only the breakthough masterpieces of prominent film auteurs but also popular genre films that enjoyed box-office success. Through these examples, students will examine how the most influential popular art form in South Korea has recognized, interpreted, and represented the Korean societal issues on screen. This course also seeks to establish a balance between understanding South Korean cinema as both a reservoir of historical memory and as an example of evolving East Asian films and world cinema. Through engagement with methodological issues from film studies in each week's readings, including the question of archives, national

cinema discourse, feminist film theory, auteurism, and genre studies, students will learn how to analyze Korean filmic texts not only as a way to understand the particularity of South Korean cinema and history but also as a frontier of cinematic language in the broader history of film. In addition, students in this class will be encouraged to perform the comparative studies with other East Asian cinema in their short papers or the final projects.

CEAS250 Korea in Transition
This course examines the dynamic transformations of the Korean peninsula from the late 19th century to the present. Part 1 explores Korea's political and economic development, focusing on how a country the size of Minnesota came to occupy a pivotal role in East Asian and global politics. In doing so, we trace the historical roots of the divergent paths taken by North and South Korea. Part 2 turns to the sweeping social and cultural changes that have shaped Korean identity and its place in a globalized world. Through a mix of primary sources (including writings from nationalist leaders and everyday people) and secondary works by historians, sociologists, and political scientists, students will learn to place contemporary Korean issues in historical perspective and gain a multifaceted understanding of the peninsula's political, economic, social, and cultural transformations.

CEAS251 Financial Markets, Policy, and Crisis: Insights from Japan
This course will use modern macroeconomics and economic history of Japan to shed some light on important questions in macroeconomics. Students will read empirical macroeconomics research not only on the Japanese economy but also on the United States and other countries to develop a sense of empirical research in macroeconomics. The course will also emphasize the major developments of macroeconomic policy in Japan since the Meiji Restoration to appreciate the role of history in understanding contemporary macroeconomic policy debates.

CEAS252 Global Philosophy
Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves--sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions--in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

CEAS253 Living a Good Life
For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world? This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. For details about the structure of the course and a syllabus of class meetings, along with the locations of plenary lecture sessions, breakout sessions, and dialogue sessions, please see this year's course website and past versions of the course at the following link: https://livingagoodlife.com. Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.50-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WesMaps for more information.

CEAS254 Breaking the Waves: The Japanese and French New Wave Cinemas and Their Legacy
While the French and Japanese New Wave(s) existed as largely contemporaneous cinematic movements, rarely are they discussed together, instilling the impression of two parallel streams, never to converge or intersect. This course hopes to serve as an intervention into this perceived divide through close readings of these groundbreaking cinematic works and an examination of their revolutionary content in the interest of articulating shared philosophical concerns. In many cases, New Wave filmmakers worked as writers and critics before producing films themselves, a fact that speaks to the intensely theoretical nature of their cinema. This course will therefore examine critical writings published in the space of Cahiers du Cinema, Film Art, and other journals as a means of better understanding the thought process that underlies these films. How do these films figure as a response to that of the previous generation and how did they hope to revolutionize cinematic praxis? What was their relationship to political activism and the events of 1968? Finally, we will consider the legacy of these cinemas: What is the prevailing influence of the New Wave on Hollywood and global cinema? What aspects of the movement have been retained and what has been lost along the way?

CEAS255 Irreducible Distance: Japan-Korea Relations through Literature and Visual Media
Despite physical proximity and shared cultural origins, the specter of imperialism and constant influence of economic competition has seemingly resigned Japan and South Korea as two nations that remain forever "close and yet so far."

Beginning with the colonial period (1910--1945) and ending with the current day, this course examines works of literature and visual media from both the Japan and Korea sides that address issues of intercultural relations and communication. What position does Japan for Korea and Korea for Japan occupy in the cultural imagination and how has this image shifted since the end of the colonial period? What role does Japan have in the formation of the North Korean state and articulation of ideology? How do political developments and ongoing issues of war responsibility (e.g., comfort women) continue to dictate the state of Korea-Japan relations? This course will also examine the influence of peripheral spaces (such as Jeju Island) and marginalized groups (such as the Korean minority in Japan) have in mediating discourse between these nations. Finally, recent cinematic works such as Assassination (2015) and Spirits' Homecoming (2016) have witnessed a rekindled interest in the colonial period. We will thus discuss how these films constitute an effort to reexamine and reconstruct these historical events and how they view them as relevant to an understanding of the present day.

CEAS256 Neo-Confucian Philosophy
This course presents critical discussion of issues central to Neo-Confucian (11th--19th centuries CE) philosophers that in many cases are still central in East Asian thought today. Topics will include the relation between knowledge and action, Neo-Confucian conceptions of idealism and materialism, and the connection between Neo-Confucian philosophy and spirituality. While our primary focus is on China, we will also look at distinctive Neo-Confucianism issues in Korea and Japan.

CEAS259 C-Pop in the Shadow of a Rising China
Explore the emotional aspect of a rising China and understand the inner feelings of contemporary Chinese youth through C-pop. How did "red songs" from the Cultural Revolution become popular songs in the 21st century? How did an "extremely soft and feminine" voice threaten the Chinese Communist Party? Why do songs from the "jazz capital of the Orient" trigger nostalgia? How do underground rock and punk bands negotiate their existence? How is rap in China different from that of the US or anywhere else? How do Chinese artists deal with LGBTQ issues and ethnic minority issues in popular music? Why do TV variety shows matter? What future is there for China's burgeoning "internet songs"? Popular music in a rising China presents complex issues of state-sponsored popular culture intersecting with bottom-up popular taste and desire, the repressive collective "we" intersecting with the resilient individual "I" in artistic expressions, the imagined "ancient China" intersecting with contemporary sound and technology, and the intensifying nationalistic sentiment intersecting with China's expanding global ambition. This course offers students opportunities to explore aesthetic, political, and cultural meanings expressed in China's popular music from the 1980s to the present. Chinese language knowledge is not necessary.

CEAS260 Seeking the Land of the Rising Sun: Introduction to Premodern Japanese History and Culture
This class spans the course of human history on the Japanese archipelago from long before the adaption of the Chinese writing and legal system to the climactic Battle of Sekigahara in 1600, which ushered in the Tokugawa Shogunate. Throughout the course, we will explore many narratives of Japanese history, delving into topics such as politics, religion, war, economics, literature, and the day-to-day lives of the Japanese people across time. By the end of this course, you will have a firm grasp on topics such as the extravagant court culture of Kyoto during the Heian period, the unique relationship between Shinto and Buddhism, the rise of warriors in the provinces, and the eventual breakdown of a centralized state that led to more than one hundred years of civil strife. Further, you will be able to qualify the national and international "image" of traditional Japanese culture that has been crafted through an emphasis on the many connections, however tenuous, that exist between premodern and modern Japan, such as samurai, Bushido, Shinto, sumo wrestlers, ninja, etc. No former knowledge of Japan or Asia is required for this course. All lectures, weekly readings, and books included on the list for the comparative book review will be in English. All readings will be provided save for the required textbook, Japan Emerging: Premodern History to 1850, and the books for the comparative book review. The ebook of Japan Emerging is available for free through the library.

CEAS263 China's Economic Transformation
China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China's great economic transformation beginning in 1978 in what is often described as a "gradualist" transition to market economy. In the past three decades, the speed of China's development and its growth rates of GDP are without precedent

in history. The course concludes by addressing the incompleteness of China's transition to a mature, developed market economy and by probing the issue of what is left to be done to create a harmonious society.

CEAS265 Japan Since 1868: Society and Culture in Modern Japanese History
This course examines the history of Japan from roughly 1800 to the present. With a broad-ranging observation covering politics, economy, society, culture, and foreign relations, we will look at a variety of historical events that the Japanese people experienced. Our goal is not only to understand what happened when, but also to be concerned with how people at different historical stages saw the world around them. Major historical events, trends, ideas, and people will constitute the vital part of the course; however, we will also inquire into everyday life of ordinary people, whose names do not remain in historical records. We will use a wide range of materials including written sources available in the English language, films, literature, and comics.

CEAS266 Modern Korean Women's Literature and Film
What are the salient issues addressed in Korean literature and film by female writers and directors? In what ways have Korean women intellectuals constructed their own identities in their literary and cinematic representations? How do female-authored works present women's problems in a light that differs from the predominant perspectives of their male counterparts? This course explores the female voice in novels, short stories, poetry, documentaries, and fiction films by Korean women from the 1910s to the present. Through selected works, we examine the struggles of early modern Korean feminists, women's lives in postwar society, and the female experience of displacement and belonging in contemporary Korea. In addition, the class occasionally questions how the Korean women's cinema and literature show the similarity with and/or difference from Chinese and Japanese counterparts in order to better contextualize the Korean cases within the East Asian and even broader world history and culture. In this class, students will gain an understanding of the ways in which women come to a recognition of the problems they face and articulate these specific issues via their unique ways of representation. Through what are largely self-reflective narratives, students will explore how Korean women dealing with an oppressive political and cultural environment that had a variety of manifestations--such as colonialism, dictatorship, national division, and traditional patriarchy--strived to make heard and seen women's voice and vision and present their gendered experience as a critique of the male-centered society. The class consists of occasional film screenings, lectures, presentations, and discussions.

CEAS267 Human Nature in Chinese Thought
This is a course on theories and practices regarding human nature in the history of Chinese traditions, such as Confucianism, Daoism, Legalism, Buddhism, and Neo-Confucianism. What does it mean to be a human? Do all humans have something in common? How should we conduct our lives with respect to those common characteristics? Thinkers from both Western and Eastern traditions have offered their own distinctive and thought-provoking answers to those questions. In the West we are more familiar with the concept of "rational animal" which remains the classical understanding of human nature since the time of Plato and Aristotle. In the history of the Chinese tradition, however, very different approaches towards human nature were adopted, such as the concepts of sympathy, effortless action, no-self, and original enlightenment. Together they can offer us some new insights into the concept of human nature beyond just rationality.

CEAS268 Music and Modernity in China, Japan, and Korea
This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the issues of global/local cultural contacts, and a better understanding of music's central role in political and social movements in 20th-century East Asia.

CEAS269 Chinese Cities
More than half of China's population now resides in cities. Within the next few years, China plans to accelerate the rate of urbanization by building sprawling cities and relocating more people into urban areas. This course explores the history of Chinese cities from the imperial to modern age. Cities were centers of commerce, intellectual activity, and, in the words of historian and political scientist David Strand, "storehouses of political technique, strategy, and sentiment open to anyone with the understanding and the will to inventory to exploit them." We will study how cities supported massive populations with limited resources, inspired new forms of social organization, and transformed the political and social order of China.

CEAS274 Pirates, Traders, and Colonial Settlers in Maritime East Asia
Why is Maritime East Asia so contentious? Why is it emerging as the next global flashpoint? This course examines the historical roots of political tensions in Maritime East Asia by exploring the history of Taiwan. As early as the sixteenth century, merchant-pirates who dominated coastal China and Japan recognized Taiwan's strategic importance. For centuries, Dutch, British, American, and imperial powers used Taiwan as a springboard to gain a foothold in the Asia-Pacific region. Migrants from coastal China, who settled in Taiwan and Southeast Asia, worked with these imperial powers to colonize new frontiers and displace the indigenous population. The territorial disputes, economic rivalry, and business empires that shape our global economic order arise from the centuries-long struggle for dominance over Maritime East Asia. These historical legacies served as the driving force for political change. Maritime East Asia and particularly Taiwan not only transformed into an economic powerhouse but also stand at the forefront in the struggle against authoritarianism.

CEAS275 From Modern Empire to Economic and Cultural Powerhouse: Introduction to Modern Japanese History and
A survey of Japanese civilization from prehistory to the beginning of the 21st century. This course examines Japanese history and culture in chronological order, introducing important events and individuals, prominent literary and artistic works, and recurring themes across the ages. We will explore the definition and boundaries of Japan itself, delving into how the needs of modernization and industrialization propelled colonial and imperialist expansion, which violently reshaped peoples and cultures both inside and outside the country's current borders. across the Japanese archipelago interacted and coalesced into the foundation of what we recognize today as the nation of Japan. The course also also devotes a significant portion of time to Japan post-World War II, examining the political, economic, social, and cultural changes that transformed Japan's international image into a land of peace and tradition today. In addition to the main textbook, the reading assignments incorporate a significant number of primary sources, ranging from government edicts, laws, and ideological tracts to literature and private correspondence.

CEAS278 Gender and Sexuality in Chinese Narrative
This course pays particular attention to gender relations and representations of sexuality in Chinese narrative. This course will require close readings of translated Chinese novels, short stories and movies. We will explore themes and motifs such as gender roles in Confucianism, female chastity, same sex desire, cross-dressing, masculinity and femininity, manhood and misogyny, eroticism, the cult of qing (passion), the New Woman, socialist and post-socialist desires, and writing bodies in the era of globalization. In addition to providing a platform for appreciation of the aesthetic beauty of Chinese narrative, the course encourages students to think about how representations of gender and sexuality incorporate or confront the mainstream moral values and social principles in China. All readings are in English, no prior knowledge of Chinese language or culture is required. No text book requirement.

CEAS280 Losers of World War II
This course explores the experiences of Germany and Japan in the postwar era. These countries faced the dual challenge of making political transitions to democratic government and recovering from the economic ruin of World War II. Japan and Germany both were occupied and rebuilt by the United States, and both were blamed for the devastation of the war. How did Japan and Germany respond to being cast as worldwide villains? How strong were the democracies that developed? This course explores these questions by comparing the culture, history, and institutions of these two countries.

CEAS281 Modern Japanese Art
This class is an introduction to the history of Japanese art from the mid-nineteenth century to the present. In this chronological study we will encounter a range of forms--woodblock prints, painting, photography, sculpture, performance, and new media--and we will consider how Japanese artists responded to major societal, political, and economic changes over the last two centuries, including industrialization and modernization, major natural disasters, war, questions of cultural/national identity, and debates centering on what "tradition" meant to artistic practice in the modern and contemporary eras. Using visual analysis as our core skillset, this course will also rely on readings from secondary scholarship, as well as those by Japanese artists and art critics from each time period to help us better understand the historical contexts surrounding each artist, artwork, or art movement.

CEAS282 Place and Space in Literary Hangzhou
The city of Hangzhou is unique in the Chinese cultural imagination. As a former dynastic capital, Hangzhou is saturated with the intrigues of China's turbulent political and social history. But the city is also famous as a literary and cultural center--a prime leisure location along the Grand Canal; the site of the famous West Lake (just as famously compared to the mythically beautiful Xi Shi); and the setting for numerous poems, short stories, and dramas. This seminar explores the literary culture situated in and around Hangzhou, considering topics such as food, folklore, and tourism, in addition to the city's depiction in poems, short stories, and dramas. Our aim is to explore how the Chinese cultural imagination about Hangzhou--part of a broader imagining of the southern region of Jiangnan ("South of the Long River")--is built through these many layers of texts, histories, and spaces. With Hangzhou as our geographical focus, we consider materials from a range of genres (poems, short stories, dramas, folktales, historical anecdotes) and time periods (Song to late Qing, with reference to the present as well). We consider how the image of Hangzhou is built up throughout time, and how the literary culture in and of Hangzhou is interwoven with the "real" experience of the city as a space/place.

CEAS284 Buddhist Art and Architecture
Visual imagery plays a central role in the Buddhist faith. As the religion developed and spread throughout Asia it took many forms. This class will first examine the appearance of the earliest aniconic traditions in ancient India, the development of the Buddha image, and early monastic centers. It will then trace the dissemination and transformation of Buddhist art as the religion moved north and then east through Central Asia, China, Korea, and Japan. In each region indigenous cultural practices and artistic traditions influenced Buddhist art. The class will address topics including the nature of the Buddha image, the expansion of the Buddhist pantheon, the function and reception of Buddhist images, the political uses of Buddhist art, and the importance of pilgrimage, both in the past and the present. Over the course of our study, we will consider four important movements in Buddhist practice: Mahayana, Pure Land, Esoteric, and Zen.

CEAS285 Pop Music Revolutionaries in Modern Japan
How do musicians, fans, industry stakeholders, and holders of political power use music to tell stories of everyday life? How does music become a means through which different visions for social, cultural, and political life are imagined and articulated, especially in moments of crisis and upheaval? This course introduces the work of influential musical figures in modern and contemporary Japan-from rock stars to folk singers, enka crooners to "idols"-and considers trends and topics in modern Japanese society through the lens of different forms of musical expression. By considering the work of these figures in their own historical contexts and in light of relevant scholarship, the course provides an opportunity to learn not only about songs and artists not often encountered outside of Japan, but also about the everyday historical, social, and political contexts within which they are embedded-and to which, often, they aim to speak back.

CEAS290 Unearthing Early China: Art and Archaeology
This course introduces early China by examining major archaeological discoveries from prehistory through the second century CE. We will analyze the formal and material features of early Chinese artifacts from important archaeological excavations at sites such as Liangzhu, Anyang, Zhouyuan, and Mancheng. We will discuss the ways in which these artifacts and archaeological sites demonstrate early Chinese cosmological beliefs and ritual practices, especially notions related to heaven, afterlife, and the transition from ancestor worship to the pursuit of

personal welfare in immortality. In addition, we will study the iconography and symbolism of objects found in these archaeological discoveries, which would serve as a foundation for the inception of visual arts in the later periods of Chinese history.

CEAS291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.

CEAS292 Too Much: Global Melodrama in Film
Often patronizingly dismissed as "women's weepies," this course will examine the proliferation and transformation of melodrama film within various national, subnational, postcolonial, queer, and global contexts. The course will focus on the specific language ad conventions of melodrama. We will watch a wide range of films from India, China, Japan, South Korea, Hong Kong, Hungary, Iran, Egypt, Kenya, Spain, Venezuela, Cuba, Argentina, and Mexico among various global film contexts. Importantly, this course will ask, what are the stakes and implications of "Global" in "Global Film Melodrama"? Moving away from an additive model that often present global film histories as an addendum to the "mainstream" cinemas, the focus will instead be on the emergence and significance of melodrama, and its specific idioms within transnational contexts. The course is open to all sophomores, including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required.

CEAS295 In Search of the Good Life in Premodern Japan
This course presents works of literature from premodern Japan to consider how people conceptualized and struggled to attain the good life. How did people's evocations of their ideals and desires reflect and engage with the historical reality? How did their social status (such as a Buddhist monk, samurai, or a lady-in-waiting), occupation, and gender contribute to their aspirations as well as struggles? What were their strategies for not just survival but for fulfillment in periods of warfare or disasters? Works will encompass diary literature, essays, fiction, and poems from a variety of authors across most of Japanese premodern history. Practices such as the tea ceremony and works of art will also be discussed to fill out the cultural context.

CEAS298 The Problem of Language in Chinese Philosophy
The class examines the criticisms of language in various schools of Chinese thought, exploring themes such as the ineffability of the absolute, the rejection of logic, naturalistic criticism of language as a vehicle of propositional knowledge, the "heart that precedes words" in apophatic practice, words as generator of duality, and more. Special emphasis will be given to the paradox of "saying the unsayable" in Daoism and Chan Buddhism, and on the various literary techniques by which the early thinkers have tried to avoid this conflict.

CEAS300 Storytelling in Japan's Empire (and its Aftermaths)
This course introduces different forms of storytelling in the Japanese Empire (1868-1945), and considers how the ghosts of Empire continue to haunt storytelling in the postwar era (1945 ~), as well. By considering texts (in English translation) produced by different individuals navigating everyday life in disparate locations across the Empire (including Korea, Taiwan, and the "home islands" of Japan itself), the course aims to move beyond historical timelines of "big events" and introduce the material realities and struggles, the complexities and contradictions of everyday life under Empire. Although it certainly takes up literary "texts" in the traditional sense of short stories, novels, and poetry, the course understands storytelling as occurring through a range of mediums, including film, music, and manga/graphic novels. By considering a disparate selection of literary, musical, and filmic stories from this period, it strives to attend to some of the contested and competing desires of individuals and entities seeking to navigate conditions of empire, colonialism, and war.

CEAS301 Modern China and the World Since 1945
This class will tackle key international problems in modern China's history over the past 70 years, beginning with the civil war; the Korean war; the Great Leap Forward; the Cultural Revolution; Deng Xiaoping's economic reform; Tiananmen 1989; Hong Kong's reversion to the PRC; democratization movements in China, Hong Kong, and Taiwan; and cross-strait relations over the years. We will explore China's recent assertiveness on territorial issues, as well as the reaction over time to Chinese foreign policy by the United States, Russia, Japan, India, and other key players. In addition to lectures and discussion, we will engage in some role-playing, with students taking various national and bureaucratic positions in mock negotiations and international exchanges. The goal will be to gain a better understanding both of Chinese options and the role of international players during key moments in modern China's history.

CEAS302 Minority Voices in Japanese Film and Literature
Although there is no such thing as a "homogeneous nation" in the world, Japan often has been falsely regarded as a country of a singular ethnicity and civilization. Is Japan a nation-state of one race and unified culture? Who are the voices in Japan defying this kind of Japanese myth? How do they claim their rights and agencies as members of Japanese society? What peoples have been discriminated against by other communities, despite their indigenous Japanese roots? What kind of relationship do these internal "others" have with the Japanese state? This course explores Japan's domestic minorities as depicted in Japanese literature and film, whose stories and images have been largely untold and invisible in the mainstream culture. Among the various minority groups in Japan, we will pay special attention to four groups: (1) the country's culturally defined minority group since the feudal era, burakumin (the untouchables); (2) the country's oldest and biggest foreign ethnic group, Koreans ("zainichi"), and other Asians; (3) the people of Japan's internal colony, Okinawa; and (4) Japan's medical outcasts, the victims of atomic disasters in Hiroshima and Fukushima. Students will deal with materials about the specified groups produced by prominent figures in Japanese literary and cinema history. At the same time, students will examine materials created by the otherized subjects themselves to probe how marginalized beings represent themselves in ways that are different from the dominant media portrayals.

CEAS306 Cinema and Moviegoing in American Chinatowns: Digital Tools and Storytelling
In the latter decades of the twentieth century, movie theaters dedicated to the screening of Chinese-language cinema dotted Chinatowns and Chinese ethnoburbs across the United States. What historical and economic forces explain the development of these unique exhibition sites, and how can we understand their social and cultural impacts? This seminar explores the production, distribution, and exhibition of Chinese-language films for overseas audiences and the moviegoing cultures that emerged around cinemas in Chinatowns and Chinese ethnoburbs. Units will explore Chinese immigration to North America, the establishment of Chinatowns, and early cinema spaces; Chinese immigrant and American-born Chinese filmmaking pioneers, the growth of "Chinese Hollywood," and challenges to Hollywood's dominant representations of Chinese characters and communities; the significance of diaspora audiences for Hong Kong movie studios and the creation of affiliated film distribution chains in the US; the expansion of Chinese-language cinemas in the 1960s and 1970s; the Mandarin and Cantonese films seen by overseas audiences and their range of appeals; and the social and cultural functions served by Chinese-language movie theaters. Students will learn qualitative and quantitative digital tools for film history research and use them to analyze original data sets, visualize research results, and create interactive GIS maps, storymaps, digital timelines, databases, web pages, oral histories, and other digital work related to cinema and moviegoing in American Chinatowns.

CEAS308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.

CEAS309 Scoundrels, Sinners, and Saints: Approaches to Buddhist Life Writing
This seminar will examine a variety of religious biographies and autobiographies in order to evaluate the significance of life writing in the Buddhist traditions of Asia. Materials will cover a broad range of historical periods, from early medieval to modern, and geographic regions, including South Asia, East Asia, the Himalayas, and Tibet. Topics include the structure, function, style, production, and reception of biographies and autobiographies, as well as more thematic questions of religious transmission, soteriology and praxis, formations of self-identity, gender, and the relationships of biographical literature to art and pilgrimage. Readings include primary Buddhist texts in translation supplemented

by secondary scholarship on hagiography and sainthood, literary theory, narrative constructions of the self, and Buddhist history.

CEAS311 The History of the Samurai
This course examines the history of Japanese warriors, known among other things as samurai and bushi, from their origins in ancient Japan to the dismantling of the samurai class after the Meiji Restoration in 1868. Through a combination of primary and secondary sources, we will trace the development of warrior power and identity, the rise of warrior power in medieval Japan, the domestication and bureaucratization of warriors during the Edo Period (1600--1868), and warrior discontent with socioeconomic change as one of the driving forces behind the Meiji Restoration. Other themes include the relationship between warrior government and adjudication, the use of Buddhism for legitimation, and male-male intimacy and sexual relations.

CEAS320 Literature and Media in China: From Inscriptions to Print Culture to New Media
What is the relationship between literary texts and "books"? How did people read before the advent of print, and in what forms/contexts did this reading take place? How does the format of a text shape the "message" that text conveys? How have new forms of media, such as digital technologies and the internet, changed how literature is understood and consumed? And how did all of these questions play out in the history of Chinese literature, specifically? This course takes these questions as a starting point to examine the relationship between Chinese literary writing and the media forms in which this writing has circulated over time. The course is divided into three chronological units, based around the following core topics: (I) the material cultures of writing and reading in premodern China; (II) the advent of print and early modern Chinese textual cultures; and (III) forms of new media in modern Chinese literature. We begin each unit by studying some key methodological approaches to Chinese literature and its media forms. We then take up specific texts, examples, and case studies that explore the range of Chinese literary media. For the purposes of this course, the terms "literature," "media," and "text" are all broadly defined. Indeed, a primary goal of this course is to work toward a concept of Chinese literature that takes issues of media, such as materiality, circulation, reading habits, and the process of writing into account.

CEAS325 Challenges to Democracy in East Asia
East Asia is home to a remarkable diversity of political regimes, economies, religions, and cultural traditions. The region includes one of the most repressive countries in the world, North Korea, alongside authoritarian regimes like China that tout political stability and rapid economic growth. At the same time, Japan, South Korea, and Taiwan represent fully consolidated democracies -- albeit ones that continue to grapple with significant domestic and international challenges. This course examines the workings and challenges of democracy in East Asia by addressing questions such as: What are the defining features and challenges of existing democracies in East Asia? To what extent are these features unique to the region? Why do some citizens in East Asia find authoritarianism appealing? How do historical experiences with authoritarian rule shape democratic institutions and political culture today? And does China's authoritarian model present a challenge to democracy in the region?

CEAS326 Gender and Sexuality in Japanese History Across the Premodern/ Modern Divide
This seminar explores both changes and continuities in Japanese conceptualizations of gender and sexuality between premodern and modern times. Structured around the notion that modernization produced a paradigmatic shift in Japanese life and thought, the course will examine gender and sexuality as both discourse and practice, considering how Japanese people described, experienced, and shaped gender roles and sexual life in their daily existences. We will investigate the dominant gender system and understandings of gender and sexuality operating in Japan before and during the Edo period (1600-1868), then consider the influence of Western views and concepts like the male/female and heterosexual/homosexual binaries on Japanese society and culture from the Meiji period (1868-1912) through postwar times. Other topics include gendered differences in education, gender performance in kabuki, female and male prostitution, the "gender crisis" of the Japanese modern girl, the salaryman and professional housewife archetypes, and postwar gay masculinities.

CEAS327 Progressive Confucianism and Its Critics
Contemporary "Confucianism" designates a diverse set of philosophical, social, political, and religious approaches that are rooted in traditional East Asia and are playing significant--and increasing--roles in the modern world. "Progressive Confucianism" designates a subset of these approaches, emphasizing the ways that the Confucian tradition has developed throughout the centuries and arguing both that modern Confucianism must continue to develop, and that a properly developed Confucianism has much to contribute to contemporary philosophy and to modern societies. This seminar will explore the background out of which progressive Confucianism has emerged; its distinctive approach and key contributions to Confucianism and to global philosophy more generally; and central criticisms that it has faced, with sources ranging from more conservative (or even fundamentalist) Confucians to liberals and progressives.

CEAS334 Native Matters: Materiality in Indigenous Literatures Across the Pacific
This seminar contemplates the function and representation of materiality in contemporary indigenous literatures. It highlights the centrality of embodied practices in indigenous cultural lives. The primary texts for the course will be literary texts (novels, short stories, essays, and poems) from different indigenous communities, including from North America, East Asia, Austrasia, and Oceania. We may also deal with non-textual materials such as artifacts, maps, clothes, video games, etc. Readings will also include theoretical or philosophical works from indigenous and non-indigenous thinkers on the subject of materials and materiality. The course will thematize materiality in two ways: the first is to understand materiality as a way for indigenous authors to represent or construct various understandings of indigeneity, either in traditional lifeways, modern indigenous realities, or indigenous futurisms, both within and between specific indigenous communities. The second is to engage with thing theory and materiality as a method of literary analysis.

CEAS343 Tibetan Religion
This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. It will also examine the lesser-known communities of Tibetan Muslims and Christians inside Tibet and in exile. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

CEAS346 Contemporary East Asian Cinema
This is a seminar on comparative narrative and stylistic analysis that focuses on contemporary films from Hong Kong, Taiwan, China, South Korea, and Japan, regions that have produced some of the most exciting commercial and art cinema in the last thirty years. We will begin by examining the basic narrative and stylistic principles at work in the films, then broaden the scope of our inquiry to compare the aesthetics of individual directors. Our goals are to analyze the narrative and stylistic tendencies of filmmakers while considering their work in a historical, cultural, and industrial context, and to develop our film analysis skills via formal comparison. Films from Bong Joon-ho, Fei Mu, Hong Sang-soo, Hou Hsiao-hsien, Kitano Takeshi, Kore-eda Hirokazu, Jia Zhangke, Jeong Jae-eun, Kon Satoshi, Lee Chang-dong, Mizoguchi Kenji, Ozu Yasujiro, Suo Masayuki, Tian Zhuangzhuang, Johnnie To, Tsai Ming-liang, Tsui Hark, Wai Ka-fai, Wang Xiaoshuai, Wong Kar-wai, Yim Soon-rye, Yoon Ga-eun, Yuen Kuei, and others will be featured.

CEAS358 Reorienting East Asia: A Thematic Study of China, Japan, Korea, and Beyond
Although the concept of East Asia is firmly cemented in the western imagination, the reality behind the east Asian region -- if one was to call it that -- is far more complex. This course will explore topics in history, politics, religion, language, economics, and modern media as they relate to the three countries usually characterized as east Asia: China, Japan, and Korea. In so doing, you will learn about various connections that bind the countries together as well as the areas in which they do not connect. You will also learn about other players in the region who do not typically receive the attention they deserve, such as Mongolia, Tibet, India, the Ryukyu Islands, and Indochina. By the end of this course, you will be able to highlight unique aspects of each country and qualify the connections made between multiple cultures that have been neighbors for over a millennium.

CEAS359 Philosophy of Wang Yangming
This seminar offers a broad engagement with Wang Yangming (1472-1529), one of the most innovative and influential of all Chinese philosophers. We will read all of his writings that are available in English translation (his major work, the Record for Practice (Chuan Xi Lu); many of his letters; and a few poems) as well

as the best recent scholarship on Wang, with the goal of both understanding and critically assessing his ideas, as well as opportunities to put Wang's ideas into constructive dialogue with contemporary philosophy. The seminar will also pay attention to the ways in which Wang's ideas have been understood and appropriated by thinkers, activists, and political leaders down to the present day.

CEAS363 Microfoundations of Growth in China
The rise of China is one of the most remarkable, if not miraculous, economic events in recent history. The course seeks to present a comprehensive overview of the transition challenges China faces as it continues to move from a centrally planned economy to adopting a greater reliance on market-based mechanisms. By reviewing the microeconomic literature on China's recent economic and institutional transformation, the class hopes to provide a general analytical framework for understanding the economic implications of the process.

CEAS372 Hong Kong Cinema
This course offers an introduction to the dynamic history of Hong Kong cinema from 1960 to the present day. The course will acquaint students with Hong Kong's major films, genres, directors, and industrial trends; explore the factors that enabled the Hong Kong film industry to become a regional and global powerhouse; and consider the reasons behind the contraction of the industry since the mid-1990s and the outlook for Hong Kong cinema's future. Screenings will feature the films of Fruit Chan, Jackie Chan, Peter Chan, Chang Cheh, Mabel Cheung, Tony Ching Siu-tung, Chor Yuen, Stephen Chow, King Hu, Ann Hui, Michael Hui, Stanley Kwan, Andrew Lau & Alan Mak, Li Han-hsiang, Lo Wei, Johnnie To, Cecille Tong, Tsui Hark, Wang Tian-lin, Wong Kar-wai, John Woo, Corey Yeun Kwai, Toe Yuen Kin-to, and others.

CEAS379 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage
This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel. Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

CEAS381 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

CEAS385 Legacies of Authoritarian Politics
This course explores the challenges and legacies faced by new democracies due to their authoritarian pasts. To examine legacies of authoritarian politics, we will first study the key features of authoritarian vs. democratic states. The second part will look at "life after dictatorship" including authoritarian successor parties, political participation, civic engagement, and policing in the post-authoritarian era.

CEAS388 Global Film Auteurs
This course offers a comparative introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical, cultural, and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion. Screenings will include films directed by Andrea Arnold, Julie Dash, Fernando Eimbcke, Don Hertzfeldt, Krzysztof Kieslowski, Akira Kurosawa, Steve McQueen, Jafar Panahi, Satyajit Ray, Ousmane Sembène, Céline Sciamma, Wong Kar-wai, Agnès Varda, Yim Soon-rye, and Zhang Yimou, among others.

CEAS390 Politics and Society in Japanese Women's Writing
How have some of modern Japan's most celebrated and insightful authors responded to key events and social conditions in contemporary Japan? What sorts of perspectives have these authors brought to issues of industrial pollution, or to youth crime and social change under capitalism, or to ongoing crises in Okinawa and Fukushima? This course seeks to hear the voices of these authors--and the social actors with whom they engage--by grappling with key modern Japanese literary texts in English translation.

CEAS395 A Wesleyan Student's Guide to Fascism: The Case of Modern Japan
"Fascism" is a term that is frequently encountered in social and political discourse. But what does this term actually mean? How can we conceive productively of different fascisms across different historical moments and (geo)political contexts--including our own? This course will consider fascism in modern Japan, and address the economic, (geo)political, social, and cultural circumstances that incited what we will call "fascist desire" in Japan's imperial moment and beyond. But while the specific experiences and characteristics of historical fascisms are informed by the unique contexts within which they unfold, including Japan's, fascism as phenomenon can never be reduced to national or cultural particularities, or confined to isolated historical moments. As one possible reaction to the experiences of modernity, that is, the specter of fascism is always with us, everywhere. By engaging with primary and secondary texts--scholarship, music, literature, film--that variously analyzed, challenged, bolstered, and critiqued fascism in the context of modern Japan, students will learn to recognize the specter of fascism in their own lived, everyday contexts, and grow in their ability to confront and counter the conditions and desires that help nourish it.

CEAS397 Cinema and City in Asia
This course will look at the representation of the city in Asian cinema. It will explore links between urban and cinematic space across a range of thematic, historical, and cultural concerns. We will watch a wide range of films from China, Hong Kong, Japan, South Korea, Taiwan, India, Philippines, and Singapore--and learn to critically examine the ways in which cinema becomes an innovative and powerful archive of urban life as it engages with the events and experiences that shape the cultural, social, and political realities of the past, present, and future in Asia. The course is open to all sophomores including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required. Among other assignments like videographic criticism, students will also have an opportunity to make short city films using their phone-cameras and readily available editing software as an option for their final class projects.

CEAS405 Curatorial Practice and Exhibition Creation
This course in curatorial studies culminates in the curation of an exhibition to be featured in the Center for East Asian Studies (CEAS) Gallery the following semester. Through weekly or biweekly seminars, students will be introduced to curatorial thinking and strategies to develop the academic and practical skills in this practice. Students will learn, consider, and critique the different approaches to the display and interpretation of objects (how they are telling a story and why). Professional experience in the visual arts field will be gained through the planning, research, and realization of a project in the gallery. The course will be co-advised by the Associate Director of Visual Arts, the Exhibitions Manager, and a relevant member of the CEAS faculty, who will consult on the exhibition. The application will be selected by the chair of CEAS who will select one student or group (consisting of at most two students) whose previous experience, coursework, interests, and vision are most suitable. The approach can vary, but it must have an East Asian component. This seminar is an opportunity for students to work with Wesleyan arts professionals and faculty to curate an exhibition in this space. Artists may apply to curate their own work, or a student can curate the work of colleagues. The CEAS Art and Archival Collection (an educational resource collection that includes works of art in various media mostly relating to China in the nineteenth and twentieth centuries) could also be a resource from which to curate an exhibition, which would involve working with the Archeology Collections Manager. Other possibilities include historical explorations of a given topic or didactic approaches that dovetail with the CEAS Outreach program.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**

CEAS406 Senior Thesis Seminar
This course will guide and support senior thesis writers in CEAS (College of East Asian Studies) to draft, revise, and complete their thesis projects. This course supplements students' one-on-one tutorials with their thesis advisors by offering a dedicated space to develop and discuss their projects in a supportive environment of peers. Over the course of the semester, students will utilize library resources, conduct empirical research, revise drafts of existing work, reflect on their own research and writing processes, and share their findings with classmates. Course materials will be drawn primarily from students' own thesis work.

Course topics include sessions on assessing sources, making strong arguments, formatting and bibliographies, understanding the "state of the field," writing and revising drafts, and sharing research findings. There will be numerous opportunities for giving and receiving feedback on work in progress.

CEAS413 Korean Drumming and Creative Music Ensemble
This course is an experiential, hands-on percussion ensemble with the predominant instrument in Korean music, the two-headed janggo drum. Students will learn to play a range of percussion instruments including janggo, barrel drum (buk), hand gong (kwenggari), and suspended gong (jing). Through the janggo, drumming students gain first-hand experience with the role music plays in meditation and the benefits it offers to develop a calm, focused group experience. In the end they integrate their focused mind, physical body energy, and breathing through a stream of repetitive rhythmic cycles. The students will be introduced to traditional folk and court styles of janggu drumming. The ensemble plays pieces derived from tradition and new ideas, and creates new works exploring imaginative sounds on their instruments. If there is an opportunity during the semester, the students will have a creative collaboration with a dancer(s) or musician(s) from other cultures. The ensemble will experience a deep respect for the diverse cultural backgrounds of the students developed from the efforts of teamwork and creating music together through Korean drumming. The semester will end with a live performance for the public.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **MUSC413**
Prereq: **None**

CEAS414 Korean Drumming and Creative Music Ensemble Advanced
This class offers more advanced techniques for those students who have taken the beginner course or who have some basic experiences in Korean drumming or who have long-term drumming experiences of any other cultures including Western drum set. Attendance and additional practice time are mandatory. In comparison to the beginner class, the advanced class will play rapid, vigorous, and seamless rhythmic patterns on janggu, buk, and kwenggari. Students are expected to be creative in utilizing materials given during the semester. Each student will focus on a lengthy solo work on any of these instruments, as well as ensemble playing. Students will explore both traditional and new emerging styles of Korean drumming. In the end, they will integrate their solos in the ensemble piece and create a new piece. The ensemble will experience a deeper level of drumming from contributing solo work to the ensemble and the efforts of teamwork. They will learn about group activity in music-making through sharing ideas and assisting each other. The semester will end with a live performance(s) for the public.

CEAS416 Beginning Taiko--Japanese Drumming Ensemble
This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and one or two pieces on the Japanese taiko drum. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements). Students with a musical background might find MUSC 417 Intermediate Taiko to be a suitable alternative, as it covers the same theoretical and historical content but at an accelerated pace and includes additional repertoire.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

CEAS428 Chinese Music Ensemble
The Wesleyan Chinese Music Ensemble is a performance group dedicated to exploring the modern Chinese ensemble and a variety of Chinese music styles. It is made up of a number of traditional Chinese instruments, including plucked lutes and zithers, hammered dulcimer, bowered fiddles, bamboo and reed flutes, and percussion. The course is designed to be hands-on and experiential, encouraging students to explore the basic ideas of Chinese music and culture through weekly rehearsals, practices, and performances.

Identical With: **MUSC428**
Prereq: **None**

CEAS460 Introduction to Sumi-e Painting
We will learn basic technique and composition of traditional Japanese sumi-e painting. Sumi-e is a style of black-and-white calligraphic ink painting that originated in China and was introduced into Japan by Zen monks around 1333. We will concentrate on the four basic compositions of sumi-e: bamboo, chrysanthemum, orchid, and plum blossom. We will also study the works of the more famous schools, such as Kano. Students will create a portfolio of class exercises and their own creative pieces.

CHINESE

CHIN101 Chinese Character Writing
This course is the lab course for Elementary Chinese I (CHIN 103) and focuses on the writing of Chinese characters. It is not a course in Chinese calligraphy but in basic writing. Strict stroke order will be introduced. About 600 Chinese characters will be covered. This is required for students who will be taking CHIN 103.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN102 Chinese Character Writing
This course supplements Elementary Chinese I (CHIN103) and focuses on the writing of Chinese characters. It is not a course in Chinese calligraphy but in basic writing. Strict stroke order will be introduced. About 600 Chinese characters will be covered.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**

Prereq: **None**

CHIN103 Elementary Chinese I
Elementary Chinese is an introduction to modern Chinese (Mandarin), both spoken and written. This course is designed for beginners and students who have some Chinese learning experience and would like to consolidate their foundation in Chinese. Students with significant experience speaking Chinese (any dialect) at home should enroll in CHIN105 instead of CHIN103. Students should enroll in a continuation of the course in the Spring or trailing semester to receive the full 3 course credits. Those students who do not enroll in the Spring semester will be given 1.5 credits and the grade earned at the conclusion of the Fall or initial course sequence semester. Please contact the instructor with any questions.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN104 Elementary Chinese II
Continuation of CHIN103, an introduction to modern Chinese, both spoken and written.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN103**

CHIN105 Elementary Chinese for Heritage Learners
This course is for students who have family backgrounds in Chinese language. It is appropriate for students who are already familiar with basic speaking and have excellent listening comprehension of any dialect of Chinese but cannot read or write. The course focuses on teaching students how to read and write Chinese characters. After this course, most students should be able to continue in second-semester Intermediate Chinese II (CHIN206) or Third-Year Chinese (CHIN218).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN151 Living a Good Life: Chinese Lab (CLAC.50)
This optional "lab" class is intended for students (1) who have taken or are currently taking PHIL 210: Living a Good Life; and (2) who have little or no exposure to classical Chinese. Each weekly session will introduce students to aspects of the classical Chinese language--the written language of pre-20th-century China. Students will be able to read (in Chinese) and discuss (in English) key passages from the Confucian classics on which the Living a Good Life courses is partly based. No previous knowledge of Chinese (classical or modern) is necessary.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Identical With: **PHIL151, CGST224**
Prereq: **None**

CHIN205 Intermediate Chinese I
This course continues an intense and engaging level of practice in listening, speaking, reading, and writing Chinese from CHIN103 and 104. We will conduct classes according to an interactive approach: between the reproductive and the performative, between role-playing and creative participation, and between oral sessions and written texts. Emphasis will be placed increasingly on expressive speaking and writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN104**

CHIN206 Intermediate Chinese II
This course continues all-round practice in listening, speaking, and writing Chinese from CHIN205. We will conduct classes according to an interactive approach: between the reproductive and the performative, between role-playing and creative participation, and between oral sessions and written texts. Emphasis will be placed increasingly on expressive speaking and writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN205**

CHIN207Z Classical Chinese I
This course introduces students to Classical Chinese, the written language of ancient China that has profoundly influenced the development of contemporary Chinese. Many idioms, proverbs, and grammatical structures in today's Chinese can be traced directly back to Classical Chinese, and its texts embody traditional Chinese thought and culture that continue to shape Chinese society today. Through the reading and analysis of selected classical texts, students will gain a deeper understanding of both the linguistic roots and the cultural foundations of modern Chinese. The course is taught primarily in Chinese. Students must have completed CHIN 206 or above to enroll. Those who have not taken a Chinese language course at Wesleyan must contact the instructor and take a Chinese placement test.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN206**

CHIN217 Third-Year Chinese I
Third-year Chinese is designed for advanced beginners who have a firm grasp of the Chinese language but a limited opportunity to expand vocabulary and fluency. The fall semester will cover a number of topics, including: smog, soft power, corruption in China, the craze of studying abroad in China, etc.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN206**

CHIN218 Third-Year Chinese II
A continuation of CHIN 217, this spring semester course will cover a number of topics, including Chinese festivals, cyberbullying and freedom of speech, left-behind children in China, privacy and security, the labor force in China, politics and identity in Taiwan, etc.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN217**

CHIN221 Fourth-Year Chinese I
This course is aimed at students who have completed six regular college semesters of Chinese courses or the equivalent. Its goal is to elevate students' language proficiency to the true advanced level. The course may use language textbooks, newspaper articles, literary texts, professional writing, academic papers, other authentic texts, television programs, and other media materials. The course will be conducted entirely in Chinese.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN218**

CHIN222 Fourth-Year Chinese II
This course is aimed at students who have completed seven regular college semesters of Chinese courses or the equivalent. Its goal is to continue elevating students' language proficiency to the true advanced level. The course may use language textbooks, newspaper articles, literary texts, professional writing, academic papers, other authentic texts, television programs, and media materials. The course will be conducted in Chinese.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **CHIN221**

CHIN223 Creative Writing in Chinese
The class will offer students a chance to use the Chinese language both communicatively and creatively in various literary genres including poetry, song lyrics, short stories, travelogues, memoir, plays, film scripts, and so on. The class is divided into three main sections. First, we will engage in close readings of some of the most interesting writings of contemporary Chinese literature that are both well-crafted and culturally significant. Second, using the class readings as reference points, the students will write their own pieces about their daily lives and dreams, oversea experiences as cultural observers, science fiction that portrays a future utopia, adaptations of Chinese ghost stories, and their imaginary lives as nonhuman animals. Third, the students will engage in dynamic class discussions and workshop each other¿s writings.

The class is not a standard advanced Chinese class. Bearing in mind that some of the most memorable Chinese poems and stories are written in simple language, participants in the class will focus on how to use the words and expressions they already know in fresh and innovative ways while expanding the horizon of their understanding of Chinese and global cultures. Native Chinese speakers, heritage speakers, and students who have taken Third Year Chinese and above can take the class and learn from each other in groups. No previous experience of creative writing is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN230 Contemporary Society in China
This is an advanced language course in which students learn by reading and discussing the articles online on various current topics. Topics include culture, academic subjects, and controversial issues. Students will learn specific vocabulary of these topics to further understand the culture and social development of China. By the end of the course, students will have improved their oral and writing proficiency in professional use of the Chinese language.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN301 A Glance at Chinese Literature and Culture
This is a general introduction to classical, modern, and contemporary Chinese literature. Students will read literary works valued greatly in Chinese history which will help frame an examination of Chinese language, literature, and culture. The values of Chinese culture that emerge in and from these texts will be discussed and contextualized.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

CHIN302 Narrating China: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Narrating China: Introduction to Modern Chinese Literature (CEAS 202) course. It allows students to encounter a selection of modern and contemporary Chinese literary texts in their original Chinese. As the parent course guides students through major literary movements and themes from 20th-century China, students in the CLAC tutorial will read poems, short stories, or excerpts of longer texts from the same periods in the original Chinese. In weekly meetings, students will discuss the readings in Chinese, to delve deeper into their stylistic and linguistic characteristics unobservable in translations.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Evaluation is based on students' preparedness, participation, and formal oral presentations, and will be tailored to students' language background. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.
Offering: **Host**
Grading: **Cr/U**

CHIN303 Chinese Calligraphy (CLAC.25)
This 0.25 CLAC course will provide students with a brief understanding of the art of Chinese calligraphy through calligraphy practice. They will learn about the characteristics of Chinese calligraphy from the "Four Treasures of the Study," as the tools of calligraphy (writing brush, ink stick, ink stone, and paper). They will understand the development history of Chinese calligraphy from five basic scripts of Seal (zhuanshu), Clerical (lishu), Standard (kaishu), Semi-cursive (xingshu), and Cursive (caoshu). The course focuses on imitation and practice of the Standard script kaishu. Prerequisite: Current or future Chinese class students are preferred.

CHIN305 East Asian Culture Through Chinese Pop Music (CLAC .50)
Even after the meteoric rise of K-Pop in recent years, Mandarin Chinese Language pop music, also known as Mandopop, remains a highly popular musical genre that influences East Asian popular culture. This course introduces students to the literary history and cultural forces that shaped Chinese popular music. The songs featured in the syllabus serve as a soundtrack to the "Introduction to History: Foundations of East Asian Cultures," as the themes largely mirror the contents of the parent course.

CHIN351 Classical Chinese Philosophy: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

JAPANESE

JAPN103 Elementary Japanese I
This course is designed for those who have no previous experience studying Japanese. The objective of this course is for students to acquire communicative and functional skills in Japanese. You will learn the basics of speaking, listening, reading, writing, orthography, and sociolinguistics (when to say what and why) of modern Japanese. Textbook Genki Lesson 1 - Lesson 8 will be covered. Each of the 8 lessons covered in this course includes new vocabulary items and expression patterns related to topics such as time, shopping, daily activities, travel, family, and expressing opinion. In addition, students will learn to read and write 46 basic hiragana and katakana syllables and approximately 86 Kanji (Chinese characters). Class meets daily, five hours per week, and includes weekly TA sessions.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**

Gen Ed Area: **HA-CEAS**
Prereq: **None**

JAPN104 Elementary Japanese II
This course is a continuation of JAPN103, and will approach elementary-level Japanese from two angles: form (grammar) and context (social usage). Students will continue to enhance their fundamental skills in Japanese, with a focus on describing thought and action, expressing intent, and developing intercultural and interpersonal communicative abilities (apologizing, giving/receiving advice, making requests, etc.). The course will continue to emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 9 - Lesson 16 will be covered and 123 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN103**

JAPN205 Intermediate Japanese I
This course will approach intermediate-level Japanese from two angles: form (grammar) and context (social usage). Students will learn complex expressions, such as communicating regret, respect (honorifics/humbling), passive experiences, and causative forms. The course will emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 17 - Lesson 23 will be covered and 107 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN104**

JAPN206 Intermediate Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including the geography, speech styles, technology, sports, and food of Japan. Students will also learn various strategies in conversation: asking questions, apologizing, asking for favors and expressing gratitude, asking for advice and getting information, and expressing one's thoughts. Lesson 1- Lesson 5 from the textbook Tobira will be covered and 176 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN205**

JAPN217 Third-Year Japanese I
The primary goal of this course is to enable students to acquire Japanese language proficiency through integrating four skills: speaking, listening, reading, and writing. Lesson 6 - Lesson 9 from the textbook Tobira cover different topics, including religion, pop culture, traditional performing arts, and education in Japan. The class meets three hours per week.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN206**

JAPN218 Third-Year Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including convenient things, history, traditional crafts, and nature of Japan. Students will also learn various strategies in conversation: conveying information, talking about past events, explaining how things are made, and extending one's dialogue. Lesson 10-Lesson 13 from the textbook "Tobira" will be covered and 141 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN217**

JAPN219 Fourth-Year Japanese: Conceptualizations of Identity in Contemporary Japan
Enrolled students and faculty will determine the twice-weekly, 80-minute class meeting times together.

By placing Japan in a global context and exploring key social, cultural, and political themes through comparative analysis with other nations, this course fosters deep engagement with modern literary texts, current media reports, visual materials, and critical discussions conducted entirely in Japanese. Students will actively interpret complex materials while expanding their understanding of contemporary Japanese society.

Themes explored in the course include:

1) Issues related to the modern Japanese family, including the declining birthrate and aging population

2) Diversity and identity in Japan, addressing topics such as the concept of "Japanese-ness," the experiences of resident aliens and the naturalization process, biracial and bicultural individuals, indigenous groups such as the Ainu, and the experiences of Zainichi Koreans (resident Koreans in Japan) *Note: These themes are subject to change.

By the end of the semester, students will have developed the following competencies:

1) Enhanced reading comprehension of articles on various aspects of Japanese society, with improved speed and accuracy through the study of Kanji characters, grammar, and expressions

2) The ability to analyze and comprehend complex content more efficiently, using acquired linguistic skills to grasp key concepts

3) Proficiency in articulating, both orally and in writing, summaries of learned material in a clear, accessible manner, and expressing well-supported personal opinions

4) The ability to present and critically evaluate differing viewpoints, and engage in thoughtful discussions on various issues

5) A deeper understanding of global perspectives, fostering an appreciation for cultural differences and the importance of intercultural understanding
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN218**

JAPN220 Fourth-Year Japanese: Advanced Japanese through Contemporary Fiction, Essays, and News Reports
In this course, taught completely in Japanese, students will read original works of short fiction, essays in Japanese by well-known contemporary authors, and newspaper and magazine pieces. We will also include several movies and/or television dramas. We will explore various genres and popular themes in Japanese literature and consider style and voice. Through the works we look at, students will also be introduced to advanced Japanese grammar, expressions, patterns, kanji, and vocabulary.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN219**

JAPN228 Conversational Japanese Through Role Play
Using a situational approach, students will learn through spoken practice various Japanese expressions for functions such as requests, invitations, apologies, comfort, encouragement, offers, advice, permission, humility, and how to describe or explain situations, explain procedures, ask for corrections, make excuses, and share topics, etc., in different situations. Additionally, in these situations, students will practice switching smoothly to the most appropriate speech styles (casual/polite/honorific) based on the relationship or psychological distance between the speaker and the listener so that their Japanese sounds "natural" to people they are engaging with out in the "real world." Students will be given situations in class, and they will think of appropriate conversations for those situations, studying through role-playing. Students must adjust the level of politeness based on the given relationship. The role playing and discussions will also derive from students watching scenes from popular Japanese media (movies, drama, internet, etc.) and then talking about them.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **JAPN104**

JAPN229 Debating Japan and the World in Japanese
Tied to courses being offered in the CEAS, students in this course read related literature, scholarly articles and blogs, watch videos and films, and debate in Japanese about current events and issues surrounding Japan, Asia, and the world. Guest Japanese speakers may visit the class. Some possible themes are foodways, educational systems, Japanese relations with other Asian countries, identity and stereotypes, and cultural appropriation. However, an overarching focus will be on the history and current dynamics of Japanese-American relations. All materials, reading and writing assignments, and discussion will be in Japanese, with some comparative materials in English, and some translation by students into English. Native speakers of Japanese are strongly encouraged to participate.

JAPN230 Contemporary Japanese Politics in Japanese
This seminar is a discussion-based class designed for advanced language learners and native speakers of Japanese. We will discuss a wide range of contemporary topics in Japanese society and politics. All texts, discussions, and assignments will be in Japanese. Diverse texts will be used--for example, newspaper, magazine, and academic journal articles as well as video broadcasts and web resources.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

JAPN231 Conversational Japanese Through Role Play II
This course is for students with basic grammatical and structural proficiency in Japanese, but who are interested in improving their speaking skills. This includes (but is not limited to) students who are concurrently taking other Japanese language classes but desire more speaking practice, students who have studied Japanese on their own but are not currently enrolled in a regular class, students who studied Japanese in the past and are looking to refresh their skills, or students who simply want to become better speakers and listeners. It is an opportunity for all students of Japanese to refresh and reinforce their speaking and listening skills. This course employs a situational, role-playing approach (students are given situations in class and asked to generate conversations appropriate to those situations). Language functions learned in JAPN 228 will now be applied in more concrete, real-life situations. Students will encounter and learn various Japanese expressions for occasions such as dining out, shopping, traveling, visiting the doctor, communicating at school, making phone calls, and more. In these situations, students also will practice switching smoothly to the most appropriate speech styles (casual/polite/honorific) based on the relationship between the speaker and the listener. Multimedia sources from Japan (movies, television, websites, etc.) will also be used in class sessions.

Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN104**

JAPN285 Translating Modern Japanese Song Lyrics (CLAC.50)
This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other's choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.

KOREAN

KREA153 Elementary Korean I
Elementary Korean will introduce students to written and spoken Korean. Taught by a native-speaker instructor, the course is useful to students who may have spoken Korean at home as well as to those students who have no previous experience with the language.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA154 Elementary Korean II
Elementary Korean II is the second part of the elementary course in Korean. Students will develop communicative skills in speaking and listening, but increased attention will be given to reading and writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **[KREA153 or LANG153 or ALIT153 or EAST153]**

KREA205 Intermediate Korean I
Intermediate Korean I is the first part of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA206 Intermediate Korean II
Intermediate Korean II is the second half of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **KREA205**

KREA217 Advanced Korean I
Advanced Korean I is the first half of the advanced course in spoken and written Korean. Various functions of more complex grammar patterns and vocabulary than those learned in previous levels will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able

to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA218 Advanced Korean II
Advanced Korean II is the second half of the advanced course in spoken and written Korean. In addition to the textbook, selected readings from news articles and short stories from modern Korean literature will be introduced to help students develop their writing skills and a higher level of reading comprehension. Upon the completion of this course, students will be able to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **KREA217**

KREA255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)
This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-CEAS**
Identical With: **CGST255**
Prereq: **None**

KREA256 Exploring Korea Through a Multifaceted Cultural Lens (CLAC .50)
This course will address a variety of aspects of traditional and modern Korean culture, ranging from traditional cuisine, music/art, religion, and the modernization of Korea in the 20th century to the Korean Wave, films, education, and the history of Korean pop music. Video clips, movies, and other multimedia materials will be utilized to better facilitate students' learning of Korean culture and heritage. This course will be conducted mostly in Korean. Students who have either completed one or two years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean and heritage speakers are also welcome.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-CEAS**
Identical With: **CGST256**
Prereq: **None**

KREA262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.
Offering: **Crosslisting**

COLLEGE OF EDUCATION STUDIES

The Education Studies Major is designed to help students acquire a deeper understanding of education and its relationship to society. Through a range of courses across the curriculum, students look critically and analytically at educational institutions, practices, and thinking, from early childhood through adulthood, using local, national, and global lenses. Foundation courses provide a theoretical background on philosophy, history, and psychology of education. Further requirements empower students with the knowledge, tools, and skills for analyzing different aspects of education, on topics such as human development and cognition, pedagogy and curriculum, and sociocultural approaches to the study of education. Students complete a methods course relevant to education studies as well as a practicum experience to gain hands-on experience complementing their academic work.

Education Studies is a linked major. It can only be declared and completed in addition to a primary major. There are no restrictions on the choice of a primary major. Students are encouraged to declare the Education Studies linked Major in spring of the sophomore year. Late declarations of the Major will be accepted through spring of the junior year.

ADVISING EXPERTS

- Undergraduate Education Studies Major (p. 316)
- Undergraduate Education Studies Minor (p. 1123)

EDST101 Introduction to Education Studies
This seminar will provide a space for newly declared education studies majors and minors to come together and develop as a cohort through learning about each other's educational backgrounds and scholarly interests. In addition, students will learn more about the areas of research and pedagogy being implemented by the Wesleyan faculty in education studies and build rapport with faculty members. The course content will cover the areas defined in the education studies major--including human development and learning; pedagogy; social, cultural, historical, and philosophical disciplines in education; transformative justice in education; methodologies in the study of education, including qualitative and quantitative; and the connection and tension between academic coursework and practical experiences in educational settings--and will introduce students to additional approaches and subfields.

Course components will include cohort-building activities to introduce the newly declared majors to each other and their educational backgrounds; collaborative reading and discussion of work taking place at Wesleyan and being studied by faculty in education studies; creating a space to discuss and read further about talks by visiting speakers, colloquia, or other events in the College of Education Studies; guest teaching by EDST and outside faculty; and a reflection paper on the path they plan to pursue through the major/minor.

EDST105 Foundations of Education Studies
This course introduces students to the interdisciplinary field of Education Studies. Drawing on the fields of sociology, cultural studies, political science, psychology, history, and philosophy, this course emphasizes the key tensions and debates in the field of education. Through course readings and class discussions, students will grapple with questions such as: What is the purpose of education? How do we conceptualize what it means "to learn" or "to educate"? What do we teach in schools, and why? What social, cultural, political forces shape the educational opportunity structure and student outcomes? How do students learn, and what does this mean for educational practice? How do we support developmentally appropriate pedagogy in K-12 settings? How do we determine how to assess or measure student progress toward our goals for the purpose(s) of education? Students will be responsible for a variety of course readings and demonstrating understanding through in-class critical writing assignments throughout the course. Students should expect to read about three articles or chapters to prepare for each class session. Discussion facilitations and a final self-study project will allow students to synthesize and deepen their learning. This course is required for Education Studies majors. The course is designed for students in their second year who are seriously considering the major. Prospective Education Studies minors and current majors/minors may be admitted if seats are available during add/drop.

EDST110F Writing about Teaching: An Exploration of American Educational Ideals through Writing and Film (FYS)
This seminar explores conceptions of teaching and learning through examination of fictional, ethnographic, and documentary accounts of teachers and their work. We will examine the portrayal of teaching in literature, creative nonfiction, journalism, and scholarly field research, as well as in film. What do these forms of representation tell us about cultural perceptions of schooling, teaching, and learning in the 20th and 21st century? What can we learn from close analysis of the ways in which authors use words and images to portray teachers and students? Participants in this seminar will have the opportunity to reflect upon their own perceptions of teaching and learning, to ground those perceptions in a philosophy of education, and to explore the ways in which writing well about teaching, from many disciplinary perspectives, can impact the profession and our understanding of the enterprise of teaching and learning. Students will practice a variety of modes of writing (critical and analytical essays; personal essays;

creative writing; brief ethnography and Lightfoot's social science "portraiture" method) and analysis of both writing and film, as well as visual thinking strategies and techniques for observing and documenting cultures of learning.

EDST114F Why You Can't Write (FYS)
Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course center the practice of writing. As such, students can expect to write, revise, and comment on classmates' writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

EDST116F Bad Ideas About Writing: Introduction to Writing Studies
Writing can be a divisive subject. Some people love writing poetry, fantasy, or romance in their free time but start biting their nails at the mention of an assigned writing project in class. Many have grown up hearing their writing is not good enough, that they need to "learn proper English," or that they "can't say that" in a school paper. Bad Ideas About Writing: An Introduction to Writing Studies provides a venue for reflection on writing education and personal literacy. We will analyze attitudes and practices around writing that stem from cultural movements and systemic discrimination. Additionally, students can expect to participate in peer review sessions to develop skills in giving and receiving feedback. This course is ideal for students interested in writing/literacy education as well as those who seek a better understanding of the process and theory of writing to benefit their own practice.

EDST140 Introduction to TESOL
This Community-Engaged Learning course will explore social issues, classroom management, and current debates related to Teaching English to Speakers of Other Languages (TESOL), as well as learning languages in general. The course introduces the "best practices" of TESOL through current research, practical assignments, and students' reflection on their experience teaching English over the course of the semester. Students will critique existing materials, create their own lesson plans and activities, and conduct teaching demonstrations for our class. Working with community partners, students will also complete 20 hours of teaching/tutoring English Language Learners. This course fulfills both the pedagogy and practicum requirements for the Education Studies major and minor.

EDST201 Writing Theory and Practice
Writing is central to education in the U.S., but how does someone learn to write? In this course, students will consider this question by reading theories of composition, debating key concepts of writing such as reflection, transfer, and translanguaging, as well as discussing scholarship out of cultural studies, literacy studies, genre studies, technical and professional writing, and public writing. Together we will explore the potential of writing education, carefully considering how we, as educators, can foster just and innovative writing education. As we read about writing instruction, literacy, and assessment, students will be expected to bring scholarship in dialogue with lived experience. To do so, they will engage in a number of praxis-based assignments, including group work to develop assignments, assessment practices, and curricular recommendations. The course will culminate in a final project of each students' design, that tackles the practicalities of teaching writing.

EDST201Z Teaching English as a Foreign Language (TEFL)
This course is designed for students that are considering teaching English outside of the United States in the future. It may be particularly useful for those considering applying for a Fulbright English Teaching Assistant, the JET program, the Peace Corps, or continuing after Wesleyan to get a TEFL or TESOL certificate or master's degree. The course will include basic language acquisition theory, TEFL teaching techniques, readings by sojourners in various programs, and opportunities to reflect on personal reasons for choosing to teach abroad.

Prereq: **None**

EDST202 Pedagogy for Teaching English to Speakers of Other Languages Tutors
This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the US every year. Students enrolled in this course will gain practical experience by committing to volunteer with an organization working with English Language Learners (options will be provided). They are encouraged, but not required, to continue their service afterward with the Wes ELL Program. There is a volunteering commitment of two hours/week, or 20 hours a semester, minimum during the semester.

EDST204 Teaching Spanish K-12: Second Language Pedagogy (CLAC 0.5)
This is a community engagement course in which students learn basic principles of language pedagogy and language acquisition to inform their teaching of Spanish to children at one of the Middletown public schools. Readings in English and Spanish; class discussion and assignments in Spanish. Students will

familiarize themselves with characteristics of second language (L2) learning and teaching, a basic know-how on analyzing and preparing materials for language learning/teaching, and L2 teaching as a profession.

Language and course requirement: Students must have recently taken a SPAN course numbered 221 or above. Preference will be given to EDST and HISP majors, as well as juniors and seniors.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**

EDST205 Multilingual Language Policy
This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect education, the languages spoken in a country and the policies to preserve or suppress them, bilingual businesses, immigration policies, and the US legal system. We will also discuss the recommendations of scholars for increasing multilingualism in the USA and changing the attitudes toward it, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.
Offering: **Host**

EDST207 Philosophy of Education
This course will explore central questions of philosophy of education such as: What does human flourishing entail? What is knowledge, how does it differ from belief, and how do we gain it? What is learning and what conditions make learning possible? What constitutes a teacher and what role should a teacher have? What should be learned and who should decide? What are the highest and most important aims of education? What does it mean for an education to be liberatory? What kind of education is needed in a democracy? We will seek perspectives from philosophers from traditions including transcendentalism, pragmatism, existentialism and critical theory, and class participants will be invited to articulate their own philosophies of education and to reflect on their educational experiences, placing them in conversation with our course readings. This course fulfills the Category 2 requirement for the Education Studies Major and Minor.

Prereq: **None**

EDST209F Religion, Science, and Empire: Crucible of a Globalized World (FYS)
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

EDST210 Educational Gaming Lab: Project-Based, Game-Based Pedagogy Approaches
In the past two decades, crowdfunding and renewed interest in games--board games, role-playing games, digital games, and instructional games--have created an increased and diverse gaming production, which has become the subject of several studies, articles, and projects related to all areas of education, from hard sciences to language learning and the arts. In an effort to explore how a game-informed pedagogy can work in various types of courses and to highlight analog and/or digital gaming approaches that have worked inside and outside the language classroom, this course will explore the basics of game-based learning (GBL) and discuss how games of all kinds can inform pedagogical discussions and the creation of learning materials. Educational Gaming Lab is designed as a project-based gaming laboratory that will focus on why and how analog games can be effective tools for pedagogy. Examples will include board games, tabletop role-playing games, escape games, and puzzles. Participants will discuss the application of gaming principles to various subjects and types of classrooms; then, they will engage in a final project in which they will either adapt existing games for specific learning outcomes or create brand new educational games. The course will be conducted in English and games will be created in English.

EDST211Z Understanding Inequality: Psychological and Educational Perspectives
This class focuses on recent work by psychologists, economists, and education researchers examining the effects of growing inequality on our collective mental health and on the school-related performance of children in particular. One class theme is that U.S. economic inequality has grown substantially in the past few decades, so that we now have one of the highest levels of inequality of any advanced industrialized country in the world. A second key theme is how few Americans are aware of the extent of these changes and their effects on the well-being of children and adults. The course also focuses on the nature of the "American Dream" and how distorted perceptions of social mobility affect many Americans' concerns about inequality. The overall class concentrates on how these economic realities and related psychological misperceptions have combined to create a cascade of negative psychosocial and educational consequences, ranging from "deaths of despair" in adults, to increased mental

health issues in children, to the growing polarization of educational opportunities and outcomes at all ages. Among the topics that will be covered are: the growth of wealth and income inequality in U.S. (including comparisons with other advanced, industrialized countries); psychological research on how people perceive and misperceive inequality; the moral nature of inequality in relation to thinking about distributive justice; the psychological literature on the consequences of inequality; and, finally, the limitations of a meritocracy for addressing these consequences. This course fulfills the Category 1 requirement for the Education Studies Major and Minor, and an elective credit for the Psychology Major.

EDST212 Un-Ruley Grammar: Teaching English Grammar to Speakers of Other Languages
What is the past perfect progressive and how do I explain it to my students? Many English teachers use grammar correctly but can't explain why and this course bridges that gap. We'll learn grammatical rules from the ground up and explore effective teaching strategies. As part of that process, we'll explore various theories of grammars from scholars like Chomsky and Halliday, as well as investigate who decides what's "correct" in different contexts and how academic grammar standards emerged. Cross-linguistic comparisons encouraged but not required. This course is designed for writing tutors, English majors, Education Studies students, and anyone interested in English grammar.

EDST213Z Introduction to Social Justice Education
What is social justice? What are the origins and theoretical foundations of social justice education? What are effective methods of teaching social justice? This course will provide a space for students to learn about liberatory methods for teaching and practicing social justice while interrogating the historical discourses that have shaped social justice education. The first half of the course will focus on understanding the history and theoretical underpinnings of social justice education. In this section, we will focus on liberation philosophy, critical pedagogy, feminist theory, postcolonial theory, intercultural communication theories, queer theory, indigenous studies, and disability studies.

The second half of the course will focus on contemporary practices and perspectives related to social justice education with a particular focus on liberatory, dialogic, and nonviolent approaches to social change. The coursework will involve reflection essays on class lectures and readings as well as intergroup dialogue and group activities that will encourage students to examine their own connection to the theoretical concepts presented in the lectures and homework assignments. The culminating project/final will be a research paper wherein students will explore one aspect of their own educational journey and connect it to the course content. Students will be provided a course pack for this class with all required reading materials.

EDST221 Decolonizing Education
Who determines what is true and worth knowing? How has the construction of knowledge and academic traditions from across the globe been impacted by such phenomena as (post)modernity, (neo)colonialism, and (neo)liberalism? Why do any of the questions above matter to your own personal history, beliefs, and identity? This course will provide a space for students to critically examine the history and development of the discourses that have shaped their educational experiences and their understanding of the purpose of education. The first half of the course will focus on texts and assignments that interrogate how some of our modern epistemological discourses were formed and maintained through the lens of postcolonial studies and critical educational studies.

The second half of the course will center on ways people have worked within these dominant modes of thought to resist hegemonic modern discourses that privilege logical positivism, quantification, objectivism, and Western European histories and ideologies above all else. This course will involve reflection essays on weekly readings, intergroup dialogue, and activities that will encourage students to examine their own connection to the theoretical concepts presented in class. The culminating project/final will be a scholarly personal narrative wherein students will synthesize both what they learned about themselves and the content that was presented during the course.

EDST223 Second Language Acquisition and Teaching
This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting. Students of French and Spanish may also wish to enroll in RL&L 223L, a 0.5 credit service learning course in which students volunteer in the Middletown Public Schools.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **RL&L223**
Prereq: **None**

EDST223L Second Language Acquisition & Pedagogy - Teaching Romance Languages
How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language? This course is intended for students who may be considering a career in education. We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting.

In this service-learning course, students are required to volunteer a minimum of two hours per week in the Middletown Public Schools, assisting French, Italian, and Spanish teachers in their world language classes. Students will write weekly journal entries reflecting on their classroom experience, and will learn to evaluate, adapt, and create pedagogical materials. By the end of the semester, they will have created a portfolio of activities that can be used in a foreign language classroom.

EDST224 History & Current Forces Shaping Special Education
In the course History & Current Forces Shaping Special Education, students will critically examine how social/political forces and varying conceptions of disability have shaped special education in the United States over time. Course themes include the historical and legal context of the education of students with disabilities within public schools, the contested nature of disability labels and its effect on pedagogical methods, the racialization of high incidence disabilities in schools, and the lived experiences of students living and learning with disabilities. Students will engage in readings, film viewings, lectures, discussions, and other activities to promote their understanding of the course content. Students will complete two major assignments--an analysis of an education policy or case and its effects on students or special education processes and an in-depth interview with an individual associated with a special education program. This course is intended to prepare students to critically examine past and present special education policy and processes while imagining the possibility of what such supports could do for students in schools.

Gen Ed Area: **SBS-EDST**
Prereq: **None**

EDST225Z Education and Empire
Wherever the U.S. has sought to gain or maintain control, whether by way of enslavement, forced assimilation, settler colonialism, or military occupation and imperialist rule abroad, education has played an all-too-often-overlooked supporting role. Yet wherever this is true, there are also people who have used education as a means of resistance, rebellion, revolution, and liberation. This course offers an introduction to the transnational history of education in relation to the development of U.S. empire both at home and abroad. By bringing together topics often approached separately--like immigration, pedagogy, settler colonialism, African American history, and the history of the U.S. empire--we will interrogate the ways that education has been mobilized to deploy power: controlling knowledge, categorizing and policing difference, administering unequal paths to citizenship/belonging, forcing assimilation, promoting socioeconomic divides, and asserting discipline and control. Topics to be covered include American Indian education and self-determination, African American education in slavery and freedom, U.S. colonial education in the Philippines/Cuba/Puerto Rico, immigration and forced Americanization schooling, Latinx fights for educational access and autonomy, State Department experiments in educational diplomacy, and knowledge production for national security and the war on terror. Throughout, we will draw links between the past and the present and between the classroom and geopolitics. Together, we will ask what it might mean to "decolonize" or "indigenize" education today and work on developing the ability to imagine otherwise.

EDST226 Contemporary Literacy: What Does It Mean to Be Literate in the 21st Century?
How do humans learn to read and write -- and how has that learning evolved in a rapidly changing media landscape? This course explores the cognitive, social, and cultural processes involved in literacy acquisition, from early development to advanced academic and digital literacies. Rooted in Paulo Freire's concept of literacy as a practice of meaning-making and empowerment, the course invites students to critically examine how literacy is shaped by power, identity, and access.

Drawing on contemporary multiliteracies research, students will explore the diverse ways literacy is practiced in today's digitally mediated world. Special attention will be given to media and information literacy--essential skills for navigating misinformation, algorithms, and fragmented media environments. This course will also center on literacy as the foundation for civic learning and engagement, inviting students to think about the ways schools scaffold citizenry through literacy instruction. Through critical inquiry, hands-on analysis, and reflective practice, students will develop the tools to access, evaluate, and produce information in a way that is ethical, critical, and socially responsive.

This course is ideal for students interested in education, media studies, communication, and anyone seeking to understand literacy beyond the printed word in our complex digital age.

EDST230 Schools in Society
What role have schools played in the evolution of American society? This course invites you to take a step back from your own K-12 experiences and critically position those experiences within a broader understanding of the U.S. education system. We will consider how education, broadly conceived, has the capacity to maintain and transform social inequalities. We will explore crosscutting themes of race, schooling, democracy, and notions of "progress" by examining topics in school segregation/integration, market-based reforms, pedagogy, learning theories, and the curriculum. This course fulfills the Foundations, Breadth Category 2, or Elective requirement for the Education Studies major and minor.

EDST232 Italy at School: Biography of a Nation
Soon after the unification of Italy (1861), the Coppino Law extended primary school to five years, making it free of charge and mandatory for its first three years (1877). Edmondo De Amicis would subsequently depict these reforms in his best-selling novel Cuore (1886), a text that introduced some enduring features of school narratives but also many stereotypes, thus attracting constant criticism and inspiring several parodies of its moralistic underpinnings. Ever since then school narratives have become a key component of Italian culture, creating a genre that has thrived especially in the last three decades, with a number of both fiction and nonfiction books published by teacher-writers who have reflected on their experience.

In this course we will study Italy from the perspective of these texts about school that often originated within school walls themselves. In so doing, we will reconstruct the history of a relatively young country, Italy, through the institution that, like no other, has been given the responsibility of "making Italians." At the same time we will question the image of Italian society that school narratives have, intentionally or not, contributed to portraying. In addition to reading Lucio Mastronardi's Il maestro di Vigevano (1962), we will focus on a wide range of materials, including novels, memoirs, poems, popular songs, films, and works of art that, even in the absence of a unanimously acclaimed "classic" of the genre, have shaped the Italian collective imaginary. Materials will be organized around five poles that have been quintessential to the debate on school in Italy across politics and culture: characters (teachers and students, obviously, but also colleagues, classmates, and families), labor and working conditions (including themes such as precarious work, class conflict, labor rights), gender and identity (questioning traditional gender roles and discussing integration of migrants at school), places and geographies (addressing topics from school design to teaching in prisons, as well as center-periphery integration and north-south divide), and actions (both those of teachers and of students, such as obtaining a certification vs. passing a test, disciplining students vs. questioning teachers' authority, resigning from job vs. cutting classes). The course will be conducted in Italian.

EDST235 Globalization and Education
As we've seen with the COVID 19 pandemic and social movements against injustice such as the Movement for Black Lives and the movement for reproductive justice, our world is deeply interconnected in many ways, including socially, economically, culturally, technologically, and politically. The ways in which we understand who we are and our place(s) in the world are deeply informed by events, beliefs, narratives, and ideologies that circulate globally. Education has long been a space where these ideas and frameworks have been taken up, contested, and reimagined. In this course, we will draw on scholarship from a variety of disciplines, such as anthropology, sociology, political science, economics, and history, trace key theoretical frameworks and definitions of globalization, such as world culture theory and de/coloniality, and examine globalization's impacts on education around the world. We will also look at major global actors working in education, such as the World Bank, USAID, and UNESCO, and the ways they shape and impact education. The central question that we will grapple with is: How can understandings of the complex forms and impacts of globalization help us track and make sense of our experiences and ideas about what education is and what it could be? This course is a prerequisite for Theory and Methods in Comparative Education. It counts towards the Category 2 requirement of the Education Studies Major and/or Minor.

EDST237 Imperial Education: Colonial Template
Where, how, and for what reasons did our modern structures of education originate? Beginning with the sketching out of an educational model in the British Raj, we will examine the dissemination of that model globally, in the British and French colonies of Asia, Africa, the Americas, and among immigrants and the proletariat. How and where does that model change, and to what effect? History will provide the context for our major subject matter: literature focussing on the educational experience. Among our historical and theoretical readings will be Macaulay's Minute on Indian Education, Viswanathan's The Beginnings of English literary study in British India, Wa Thiong'o's Decolonizing the Mind, Freire's Pedagogy of the Oppressed, and José Marti's On Education. We will also analyze literary texts and films, including Narayan's The English Teacher, Beti's Mission to Kala, Dangarembga's Nervous Conditions, Adichie's Purple Hibiscus, the film Sugar Cane Alley, and others.

Prereq: **None**

EDST240 Critical Youth Studies
This course will use sociocultural lenses to examine, unpack, and trouble traditional understandings of youth and adolescence--or how society determines,

monitors, and polices how human beings move towards and then reach adulthood. We will use various critical theoretical frameworks to study the assumptions placed on young people by different institutions and systems and the ways those assumptions control how, where, and who young people are allowed to be. Such an exploration is vitally important for the study of education because so much time is spent thinking about what and how young people should learn without ever really considering how we learn what a "youth" is thought to be. This course seeks to let go of normative modes of approaching and understanding the idea of "development" to better appreciate the myriad of ways that young people experience the process of moving toward adulthood.

EDST241 Children's Literature
Probably the first literature we fall in love with, children's literature shapes individuals and cultures in profound ways, investing us with important mythologies and guiding our identities and behaviors. This course will examine fairy tales, some works from the "golden age" of children's stories, and some contemporary works. We will enrich our reading of the fiction with some of the central theorists of this genre, including Bruno Bettelheim, Jack Zipes, and Maria Tatar.

Prereq: **None**

EDST241Z Children's Literature
Probably the first literature we fall in love with, children's literature shapes individuals and cultures in profound ways, giving us ways of seeing and understanding the world, investing us with important mythologies, and guiding our identities and behaviors. But who or what is a child? Who creates "children's literature" and what is a child's relationship with it? "Literature," in this case, is often pictorial as much as literate. Our intensive Winter session class will begin with definitions of the child, using images as well as historical and scholarly discussions, then move to an examination of picture books. Illustrations and fairy tales both guide lessons in literacy and language skills, and illuminate the world the child is entering. Next, we examine three authors from the golden age of children's literature in the U.S.: Louisa May Alcott, Mark Twain, and Frances Hodgson Burnett. The course moves into the twentieth century with Laura Ingalls Wilder's creation of the American frontier mythology -- and Louise Erdrich's answer to it. We conclude with Christopher Curtis's The Watsons Go to Birmingham and J.K. Rowling's Harry Potter: a specific history of the U.S., and the allure of historical nostalgia.

EDST245 Children's Educational Media: Historical, Psychological, and Pedagogical Perspectives
This course will focus on the evolution of children's educational media from multiple perspectives, including a psychological lens to analyze learning and social emotional development, a pedagogical lens to analyze media content and delivery, and a historical lens to situate educational media within the context of larger society and political trends. Content will also include an exploration of digital media development for children and adolescents, including applications and supportive educational technology through the lens of academic achievement and learning. Students will explore theories, commentaries, and empirical research surrounding children's media production, including an in-depth look at psychological and educational supports for children's media (parental mediation, co-viewing). The course will mainly focus on preschoolers to late elementary students but will discuss the limited educational media intended for adolescents.

EDST250 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

EDST250Z Zero to Infinity: The Psychology of Numbers
What are the origins of mathematical thinking, and why do some people become experts while others get nervous calculating a tip? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their intuitive understanding of numbers, geometry, and space to successfully navigate their environments. Yet, individual differences in math achievement emerge early in development and often persist throughout children's education. In this course we read and discuss both foundational and cutting-edge articles from cognitive science, education, and psychology to understand how mathematical thinking develops. We will also tackle questions such as: How do culture and varying social contexts affect numerical understanding? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? This class will involve a blend of synchronous class-time meetings and asynchronous work.

Prereq: **None**

EDST252Z School Systems Around the World: An Introduction to Comparative Education
Nearly every town across the entire planet has a local school. In what ways is the nature of formal schooling the same across vastly different cultural contexts and in what ways does it differ? What kinds of contextual factors (e.g., infrastructure, population size, location, political situation, etc.) influence the setup and approach to schooling in different contexts? In this course, we will examine school systems across a wide variety of cultural contexts and compare them in terms of their underlying philosophy of education, their different approaches to implementing education within their cultural context, and consider the ways in which educational systems around the world are compared (both appropriately and inappropriately).
Offering: **Host**

Gen Ed Area: **SBS-EDST**
Prereq: **None**

EDST253 Educational Psychology
This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate. This course counts as an elective or column 2 breadth course towards the psychology major.

Identical With: **PSYC253**
Prereq: **None**

EDST266 Language, Inequality and Education
This course explores the complexities of language use and policy in formal schooling, and interrogates the role of education as a site of both linguistic oppression and assimilation as well as linguistic revitalization and diversity. Drawing on research, theory, and practice from a variety of disciplines--such as anthropology, sociolinguistics, language policy and planning, and applied linguistics--we will explore issues such as language ideologies, language and identity, raciolinguistics, and educational language policies (e.g., bilingual education policies). We will also examine specific cases at the global, regional, country, and district level to better understand how micro-level language use, ideologies, and policies are linked to larger macro structures such as white supremacy, capitalism, and coloniality.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Prereq: **None**

EDST267 Qualitative Methods in Education Research
This course serves as an introduction to qualitative research methods in education and related disciplines. Through readings, lectures, and class discussions, students will develop an understanding of the purposes, philosophical assumptions, applications, and limitations of qualitative research for education-related inquiries. We will explore approaches to qualitative research, such as case study, ethnography, discourse analysis, and youth-led/ participatory action research (YPAR/PAR). We will discuss what it means to conduct ethical research, how our backgrounds influence our observations of the world and what we learn from others, and how, if at all, qualitative research can inform education policy and practice. Students will have opportunities to practice qualitative research skills and become critical consumers of qualitative research. This course fulfills the Category 3 requirement of the Education Studies Major and/or Minor.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Prereq: **None**

EDST275 Uses and Abuses of Education Research
The class will critically analyze how research has been utilized--for better or for worse--by scholars who study education, schooling, and young people. Instead of asking "How does one do research?" we will focus our inquiry on a broader set of questions about research within the field of Education Studies. Namely:

- What is research?

- Who does research and/or who gets researched?

- What does research produce?

- What is the relationship between research and knowledge? Research and truth? Research and power?

- How has research been done?

- Who has it traditionally served?

- And what does research do?

By asking these (and other) questions about what comprises "research," we will engage in unpacking how it is we see, observe, perceive, and analyze the educational worlds around us specifically through the lenses of race, gender, class, sexuality, Indigeneity, and ability. Because Education Studies is a field that investigates how and what we learn--and because research, put succinctly, deals with the production and reproduction of knowledges--studying research through the field of Education Studies allows us to study how we learn about knowledge itself.

EDST288 Teaching and Learning: Designing Opportunities for People to Think, Create, and Innovate
What impacts what we learn and how we learn it? Understanding sociological, psychological and cultural influences--as well as modern brain science--will dramatically affect how we design, plan for, and teach others about specific content and concepts. Written curriculum is the roadmap to learning and reflects the beliefs and values of the organization implementing it. Instruction is how that learning is delivered to the students. Curriculum and instruction--teaching and learning--are the cornerstones of what we learn and how we learn it. Many variables (e.g., language, culture, poverty, race, gender, etc.) impact an individual's ability to access and think deeply about the curriculum. This course will engage in inquiry about how people learn and what impacts their learning, as well as how we can effectively plan for and design learning that everyone can access, regardless of the variables that could potentially impact them.

EDST301 Senior Seminar in Education Studies
The senior seminar will provide a space for seniors in the education studies major, as a learning community, to reflect on and deepen their knowledge and understanding in core areas of education studies. Students will be expected to bring in relevant material from their other courses; to learn and discuss new material; and to work collaboratively to develop a grounding in the study of education individually and as a group. The course content will cover the areas defined in the education studies major, including human development and learning; pedagogy; social, cultural, historical, and philosophical disciplines in education; transformative justice in education; methodologies in the study of education, including ethnography and quantitative approaches. Discussions will explore the connection and tension between academic coursework and practical experiences in educational settings, and introduce students to additional approaches and subfields. Course components will include: (1) bridging across different students' distinct experiences in their classes relevant to each content area; (2) collaborative reading and discussion of new work beyond the scope of the existing EDST courses; (3) creating a space to discuss and read further about talks by visiting speakers, colloquia, or other events in the College of Education Studies; (4) guest teaching by EDST and outside faculty; and (5) an independent senior project (for thesis writers, this can serve as a scaffold to make progress on the thesis).

EDST307 Multilingual Learners Literacy Development
In 2021, in the state of Connecticut, approximately 14% of the K-12 population were English Language Learners (ELL) (https://portal.ct.gov/-/media/SDE/Performance/Research-Library/EL-DEMOGRAPHICS-10012020.pdf). This growing population includes students whose written languages vary considerably from English, students whose education has been interrupted due to the chaos of war and resettlement in the U.S., and students who have undiagnosed learning disabilities. This service-learning course focuses on an area of great need for this population -- English literacy. This course will offer students an opportunity to tutor ELLs for 20 hours during the semester while studying and applying the theories and best practices of ELL literacy development. In addition, this course will discuss best practices for teaching math to ELLs, lesson planning, classroom management, and other necessary skills for successful teachers in any field.

EDST310 Practicum in Education Studies
This seminar is intended to help students develop the skills to learn from experience in educational settings, through rigorous reflection, analysis, scholarly inquiry into educational questions, and action/implementation of new ideas. It is designed for students with previous coursework in education, experience in educational settings, or both. Students will be placed in a variety of educational settings in the community and each student will craft an independent study, with ongoing guidance from the professor and from the group, related to their placement. Class sessions will be seminar-style with students sharing and workshopping their studies and their practice. There will be group readings on aspects of education studies including reflective practice, classroom ethnography/teacher research, and observational techniques, but students will also develop individualized reading lists according to the focus of their independent study. In addition to ongoing written work in the form of analytic journals and critical reading synopses, students will complete an individualized final paper or project integrating their research and experience over the semester, and give a final presentation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Prereq: **None**

EDST311 Community Impact Practicum: Building Capacity to Support Educational Enrichment
In this practicum course, students will build an intellectual and practical framework to guide their volunteer work in educational settings in the local community. What does it mean to "help"? How do we assess the needs of community partners and build the knowledge and skills that will allow us to address those needs? What do we need to know and understand about the people with whom we work? What does research have to say about effective tutoring techniques and practices? How can we design meaningful learning experiences? How can we maximize not only our impact in the community, but also our own growth and learning? Through reflection on experiential learning and the study of scholarship addressing these questions, students will develop knowledge and skills to improve their effectiveness in supporting educational enrichment. Students taking this course must be engaged in at least 90 minutes per week of community service in an educational setting throughout the semester. Please note: If you are looking for a practicum that is more focused on the K-12 classroom experience, please see EDST310: Practicum in Education

Studies. In that practicum seminar, students carry out their own independent study related to their classroom placement.

EDST315 Education Law in an Age of Change
This course is an introduction to the legal processes that shape public education in the United States. This course examines constitutional, statutory, regulatory, and case law in education in order to see the efficacy and limitations of using the court to advance change in education. Through readings, class discussions, and assignments, we will grapple with the following questions: 1. What legal processes inform public education in the United States? 2. Which seminal court cases have shaped public education? 3. Who effects legal change in public education? 4. Do the various constituencies of public educational law function within symbiotic relationships? This course is a school law class, not a law school class.

EDST320 Early Childhood Practicum: Theory, Practice and Making Learning Visible
In this small intensive practicum course, students will spend a minimum of 2 hours per week working in early childhood education settings. The practical experience will be complemented by contemporary research about early child development, education, policy, and practice. Course topics will be driven by the interests of the group, by the questions that naturally emerge from the practicum placement experience, and by current debates in the field. Such topics include, but are not limited to: assessment and documentation of learning and development in early childhood settings; the unique functions of exploratory play in human learning and development; exploration and critique of developmental milestones and developmentally appropriate practice; in-the-field consequences of new legislation (e.g., Connecticut's 2023HB-06880-R02-BA mandates on play-based learning and raising the kindergarten age); and constructivism and social emotional development. In addition to reading primary sources and working within early childhood classrooms, we will benefit from conversations with experts actively working to integrate research, practice, and policy. Students will write "learning stories" documenting their observations in their field placements, submit response papers to class readings, participate actively in class discussions, and complete an in-depth exploration of a topic of their choice that bridges across the scholarly literature and the field placement experience. This class is available by Permission of Instructor (POI). Previous coursework in education or psychology is recommended.

Prereq: **None**

EDST323 It's All Happening in the Cafeteria: The (In)Justice of School Food
The National School Lunch Program (NSLP) is a federally-assisted meal program operating in public and nonprofit private schools across the US. In FY 2022, the NSLP provided nearly 5 billion meals to children in preK-12th grade. Given the scale of this operation, school food serves as an important lever for food systems change and a window into food justice through examining production, procurement, distribution, and consumption. This course will look at school feeding programs to explore a variety of facets of the food system including school food policy (with state-level advocacy for universal free meals), farm-to-school, food service workers, and child and household food security. This course is intended as an advanced seminar for students with a background and interest in the related areas of food systems and social justice.

EDST333 Social Media and Development: Constructing the Self Online
Humans typically develop their view of themselves, or their self-concept, through interactions with others in their community. For adolescents, this takes place typically within school environments and other community institutions as they begin to rely less on their parents. With the dawn of social media, these interactions are taking place on a global scale with increased anonymity. How does this social and technological change impact how teens and young adults form their views of themselves? What implications do these changes have for adults who work with adolescent populations? This course will explore these questions, illuminating an understanding of the accepted model of self-concept development and the impacts of social media. Students will also explore related concepts of self-esteem and social development. This course will use empirical research to examine and critique the overall negative view of social media usage amongst adolescents, and train students to probe commonly accepted viewpoints using careful scholarship. The course will provide a discussion of research standards in the field of social media research and encourage critical evaluation of empirical research.

EDST335 Celebrating Learner Differences: Creating Inclusive Classrooms Using Research
How do humans develop the capacity to learn? This course will focus on the dynamic influence of the cognitive, social emotional, and demographic factors involved in this process, using a research-based framework. Students will be encouraged to evaluate the learning process throughout K-12 educational settings and will explicitly learn to read and critique research in the learning sciences. Students will also evaluate the utility of research in different learning settings and the effectiveness of associated pedagogical tools and strategies.

The course will begin with a discussion on learning sciences research and explicit instruction for research evaluation. Topical considerations will include the development of human memory, executive function, attention, and other cognitive processes that underlie learning and information processing. Students will also explore background factors, including socioeconomic status, and social emotional factors, including motivation and emotion, as predictive and associated factors for learning and information processing.

This course fulfills the Category 1 requirement for the Education Studies Major and Minor. It satisfies the ELECTIVE only requirement for the PSYC major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

EDST336 Introduction to Comparative Education
This course offers an introduction to the field of Comparative and International Education. If the central question is "what is education," then how might a comparative perspective yield some insight? In this course, we will consider education in different contexts, ranging from regional foci such as Latin America and Sub-Saharan Africa to country-specific case studies to explore the following questions: What counts as education? What spaces and practices are recognized as educational? Who participates? What social, political, and economic purposes and outcomes are associated with education? Why and how do they make sense? Topics we will explore include gender and education, literacy, and privatization.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Prereq: **None**

EDST340 The Politics of Education
This course is an introduction to the complex political processes that shape public education in the United States. This course integrates concepts from multiple fields, including political science, government, sociology, and education, to examine how education is both a site of and a tool to manage broader social conflicts. Through readings, class discussions, and assignments, we will grapple with the following questions: Who governs public education in the United States? What forces and processes shape the formulation, enactment, and impact of education policies? How do educators, parents, and youth wield power to propel or resist education policy decisions? How do institutions of higher education, philanthropic organizations, governmental agencies, and other organizations influence the trajectory of education policy? This course will also introduce students to analytic tools that will allow them to unpack and interpret the politics surrounding education.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Prereq: **None**

EDST341 Case Studies in Educational Innovation and Entrepreneurship
Entrepreneurship, innovation, and reform are defining parts of the fabric of K-12 education in the US and other places, presenting opportunities and risks. For the first two months of the course, we will be visited most weeks by one or more experts who have led or studied innovative or entrepreneurial projects in the education sector. Perspectives and cases to be discussed include the founding of schools and businesses, start-up ventures, social entrepreneurship and nonprofit organizations, educational law and policy, and innovation within public schools and districts. A visit to New York City to visit multiple start-ups and investors is also planned, schedules allowing.

Students will learn from conversations with experts in the field about how to define problems in education, how different people have approached solutions to these problems, and lessons learned. The professor and students will work together to draw connections between the various case studies and to articulate larger principles. Our study will culminate in a guided project in which students will develop or investigate an educational innovation to solve a specific problem that they have learned about, following some of the principles of design and innovation that they have learned.

EDST342 Questioning Authority: On the Politics of the Teacher-Student Relationship
What is the authority of the teacher in an era where the legitimacy of institutions and curriculum are under fire? Can hierarchical relationships between teachers and students be beneficial for learning and for political life? What are alternative conceptions of the teacher-student relationship? This course will explore different models of teaching within the history of political thought and beyond. From Socrates to the present, the context and manner of teaching has been just as important to political theorists as the content itself. The course will consider how questions of power, sexuality, risk, wisdom, and friendship inform different pedagogical styles and their implications for preparing citizens for democratic life. Readings include John Locke, Immanuel Kant, Alexis deTocqueville, John Dewey, Hannah Arendt, Mr. Rogers, Jacques Ranciere, Bernard Stiegler, Laura Kipnis, and others.

EDST345 Education Technology - Sociological Perspectives & Implications
How do computers, smartphones, the internet, and other educational technologies impact students and teachers? In this course, students will apply the fundamental tools and approaches of educational and social science research to better understand and evaluate the effectiveness of the educational technologies that surround and support students and teachers around the world. As such, students will learn about the history of education and evolution of technology with a focus on teaching, learning, and assessment applications in K12 education.

Through readings, class discussion, assignments, and analyses of real-world teaching and learning data, students will consider educational technology frameworks, research, practice, and policy. Specifically, students will consider how different student, teacher, and system-wide educational technologies: 1) have impacted students, teachers, families, schools, and communities across a broad range of educational outcomes and groups, i.e., gender, class, race/ethnicity.

EDST346 Schools and the Carceral Regime: Antiblackness, Education Policy, and the (Un)Free
Over the past several decades, American schools have come to increasingly resemble prisons due to the adoption of certain policies and practices. Specifically, zero-tolerance policies, school-based police officers, metal detectors, randomized searches, and security cameras render the learning environment a container of social control. Although recent policy decisions have worked to undo some of these policies, many remain intact while others have been replaced with new prison-like structures. Together, these approaches illustrate what is commonly called the "school-to-prison pipeline" or "school-prison nexus," and underwrite the ideological justifications for the hyper surveillance of students of color. Moreover, punitive discipline policies are an outgrowth of

an antiblack racial imaginary that positions Black youth as inherently a problem needing to be monitored and controlled.

This course will examine the multiple ways that schools function as carceral sites for Black, Latinx, and LGBTQ+ youth with special attention to antiblackness, education policy, and justice. Through this course, students will have the opportunity to explore expanding notions of carcerality and how carceral approaches inflict physical, psychic, and symbolic violence on vulnerable populations. This course will also explore abolition as a useful praxis to transform schools and improve educational outcomes.

This undergraduate seminar leverages theoretical insights from neighboring disciplines, such as sociology, critical criminology, geography, and philosophy to explore how the carceral regime(s) shapes education policy and school practices. Students enrolled in this course will explore the expanding nature of carcerality and the implications for youth academic outcomes, sense of belonging, school engagement, and conceptions of safety. Given the context-dependent nature of carcerality, students will explore various educational contexts as case studies. In addition to case studies, students enrolled in this seminar will have the opportunity to engage with scholarly texts, podcasts, and films and learn through active class discussion, lectures, and group activities.

Although recent policy decisions have worked to undo some of these policies, many remain intact while others have been replaced with new prison-like structures. Together, these approaches illustrate what is commonly called the "school-to-prison pipeline" or "school-prison nexus," and underwrite the ideological justifications for the hyper surveillance of students of color. Moreover, punitive discipline policies are an outgrowth of an antiblack racial imaginary that positions Black youth as inherently a problem needing to be monitored and controlled.

This course will examine the multiple ways that schools function as carceral sites for Black, Latinx, and LGBTQ+ youth with special attention to antiblackness, education policy, and justice. Through this course, students will have the opportunity to explore expanding notions of carcerality and how carceral approaches inflict physical, psychic, and symbolic violence on vulnerable populations. This course will also explore abolition as a useful praxis to transform schools and improve educational outcomes.

This undergraduate seminar leverages theoretical insights from neighboring disciplines, such as sociology, critical criminology, geography, and philosophy to explore how the carceral regime(s) shapes education policy and school practices. Students enrolled in this course will explore the expanding nature of carcerality and the implications for youth academic outcomes, sense of belonging, school engagement, and conceptions of safety. Given the context-dependent nature of carcerality, students will explore various educational contexts as case studies. In addition to case studies, students enrolled in this seminar will have the opportunity to engage with scholarly texts, podcasts, and films and learn through active class discussion.

EDST349 Urban Education Policy and the Politics of Reform
This course examines enduring issues embedded in the policy and politics of urban education reform. This course will introduce students to a broad range of education reform strategies, such as market-based approaches to education, state takeover of school districts, and enhancing school, family, and community partnerships. Additionally, we will examine the political dynamics that propel reform efforts. This course conceptualizes urban as a geographic location and as a specific set of issues associated with urban environments. Although we will primarily focus on the policy and politics of education reforms within the context of urban centers across the United States, students will have opportunities to apply their knowledge to a wide range of contexts. This course fulfills the Category 2 requirement of the Education Studies Major and Minor.

EDST352 Human Rights and Education
Since the end of World War II, the idea of human rights has spread around the world with numerous documents, laws, and programs created to promote human rights in and through education. Within human rights discourses, education has emerged as simultaneously a right in and of itself, a crucial space that can either reproduce discriminatory practices or subvert and resist them, and a means through which knowledge of human rights can be promoted. But what do these developments in human rights and education mean in the everyday lives of formerly and currently colonized and oppressed peoples in the US and around the world, for whom education has been and continues to be used explicitly as a tool of oppression, forced assimilation, and violence? This class will explore this and other key questions related to human rights and education. What does it mean to be human, and how do we learn to be human? What rights mark a human being, who has them, and how do we learn who has them? Who, if anyone, should have a right to education? If they have a right to education, what kind of education is it? How does education as a human right relate to human rights education, and what are the implications of this relationship for our understanding of what changes to existing schooling systems might accomplish in terms of expanding and improving all humans' rights?

EDST354 Seminar on Intelligence and Creativity
What does it mean to be smart? Who decides whether something or someone is creative? The answers to these questions are of great consequence as they often determine who gets access to scarce resources. This course will introduce students to some of the most vibrant and lively debates in the fields of intelligence and creativity. Our goal will be to discuss relevant theories and evaluate empirical data associated with various perspectives and approaches to understanding these important constructs. In addition, students will gain familiarity with and critically evaluate how intelligence and creativity are

measured, as well as the usefulness of different measures for predicting the success of individuals and organizations.

EDST355 The Long Struggle: Examining New Perspectives on Education Reform
Black Teachers' ongoing struggle to enact anti-racist practices and policies while navigating segregation and significant resource challenges provide powerful testimony of the peculiar limitations of traditional urban education reform movements.

This course will help students understand the inextricable links between student achievement, opportunity, and community progress by examining African American teachers' experiences in schools. The historical and present-day experiences of Black teachers will be used to anchor the analysis of education reform through the eyes of too often marginalized communities. This course will review historical narrative, examine present-day policy, and allow students to gain first-hand perspectives from "front-line" education and policy leaders.

EDST358 Fugitive Perspectives on Education and Civil Society
In 1946, the African American novelist Ann Petry imagined what a white schoolteacher might think about working with black students in Harlem, New York: "Working in this school was like being in a jungle. It was filled with the smell of the jungle, she thought: tainted food, rank, unwashed bodies." Petry had herself worked in Harlem schools. She also held credentials from well-heeled white schools in Connecticut. Despite her own academic success, she questioned the inherent value of schools that regarded black children as if they were untamed savages. Challenging prevailing narratives of excellence and achievement, this course examines fugitive perspectives of black, Indigenous, LBGTQ, and poor folks who resisted compulsory schooling and avoided conscription into so-called civilized society. If, as historian Michael B. Katz has argued, US schools "are imperial institutions designed to civilize the natives; they exist to do something to poor children, especially, now, children who are black or brown," then why should any self-respecting black or brown child endure such schooling? What might so-called truants, illiterates, failures, burnouts, dropouts, and delinquents teach us about education and civil society? The history of education, however, has largely been interpreted from a biased perspective--namely, those who have been successfully schooled. We will therefore search for contrary voices in fragments of oral culture, ranging from slave narratives to folktales and recorded music. Contemporary scholarship will inform our analysis. Interdisciplinary scholars such as James Scott, Eric Hobsbawm, Tera Hunter, Saidiya Hartman, Lisa Brooks, and Audra Simpson will illustrate how to read against the grain and unearth hidden transcripts from classic authors such as W.E.B. Du Bois, Carter G. Woodson, Anna Julia Cooper, and Gertrude Simmons Bonin.

EDST360 Curriculum Analysis & Design: What We Teach, Why It Matters, and What Could Be
The topic of curriculum -- what is taught, what counts as knowledge, who gets centered, and what is left out or made invisible -- is a central component of education studies. All stakeholders are impacted by the curricular decisions about what is taught in schools. The concept of what curriculum is -- a pre-packaged textbook or a district-created roadmap -- has shifted across time and has implications for what it means to be a teacher. Curriculum also impacts whose experiences are included and excluded from courses and how we prepare students for life beyond school. This course will help students develop understanding of the scholarship around curriculum as well as gain first hand experience both analyzing and creating curriculum themselves. In this course, students will come to understand what curriculum is and isn't, the process of creating and adopting curriculum from a systems perspective, and the many competing forces behind decisions that get made. A deep dive into curriculum can add a bridge between theories of culturally responsive pedagogy, critical studies, conceptions of literacy, civic education and actual practice. Course content will be useful for students thinking about careers as teachers, policymakers, journalists, researchers, or educational publishers.

EDST364 Race, Nation, Empire, and Education
This course engages students in developing frameworks for understanding the historical and contemporary role of education in race-making, nation-building, and imperial projects. We focus on how educational processes shape the material, cultural, social, and political aspects of people's lives, and how these contend within a changing global landscape. Topics include education's dual role in settler colonialism and its potential for decolonization; scientific racism and discourses about intelligence; institutions of higher education and their entanglements with slavery and imperialism; education in colonial and post-colonial settings; legislating bodies and intimacies among young women of color; and education as a site for producing hegemonic notions of ideal citizen-subjects.

Prereq: **EDST230 OR EDST235 OR EDST241 OR EDST349 OR EDST221**

EDST373 Religion, Science, and Empire: Crucible of a Globalized World
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion

was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

EDST380 Advanced Research Practicum in Media and Literacy
Students in this course will participate in new and ongoing research projects within the College of Education Studies. Students will also be given the opportunity to design aligned individualized research projects to enhance their experience and help them to explore individualized areas of interest. This course will require students to search for and synthesize relevant literature to create literature reviews, practice extensive academic writing, and evaluate methodology. Students will also participate in data collection when appropriate.

Prereq: **EDST335 OR EDST226 OR EDST333**

EDST399 Abolitionist University Studies
This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

EDST405 Teaching Fellowship for National Education Leaders
This course is for students to serve as Teaching Fellows for a course with the National Education Opportunity Network (neonopportunity.org), which provides college courses to Title I and Title I-eligible high schools nationwide. Please inquire with the instructor for information on course topics available this semester. Students will: -Host weekly 45-minute synchronous discussion sessions with 15-25 high school scholars via Zoom to enhance their engagement with course content, expose them to college-level seminar-style discussions, and help improve their analytical and metacognitive skills. -Evaluate and provide feedback on student work. Specific time assignments for sessions with high school students and required Teaching Fellow group meetings will be scheduled at the same time every week based on availability. This course counts for 10 hours toward the 20-hour practicum requirement in the EDST major or minor. The other 10 hours can be completed by repeating this class or through an independent practicum.

Grading: **OPT**

EDUCATION STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Education Studies (EDST) helps students understand education and its relationship to society. Students will critically analyze educational institutions, practices, and theory—from early childhood through adulthood—using local, national, and global lenses. Foundational courses provide a background in the philosophy, history, and psychology of education, and further study illuminates aspects such as human development and cognition, pedagogy, curriculum design, methodologies, and sociocultural approaches. Rounding out their academic work, students in the major will gain direct insight through a hands-on practicum experience.

ADMISSION TO THE MAJOR

Students intending to major in Education Studies should submit a major request through their WesPortal. It is best to do this as early as possible so that you can receive emails and updates about the major that will help you with academic planning. Students who will declare at the canonical time (spring of sophomore year) should enroll in EDST105, Foundations of Education Studies, which will be taught in the spring semester every year.

Education Studies is a linked major. It can only be declared and completed in addition to a primary major. There are no restrictions on the choice of a primary major. Students are encouraged to declare the Education Studies Linked Major in the spring of the sophomore year. Late declarations of the Major will be accepted through the spring of the junior year, and students may be admitted to EDST 105 as space allows during the drop/add period.

MAJOR REQUIREMENTS

Students must take a minimum of 10.5 credits plus a practicum experience, with a qualifying course (at least .5 credit) or an independent practicum experience. Some courses can count toward different requirements, but students need to choose which requirement is being fulfilled by which course: an individual student cannot use the same course to fulfill multiple requirements toward the Major.

The courses may be completed in any order consistent with their prerequisites.

Students can use the same course to fulfill requirements in two academic programs (for example, a cross-listed course in ITAL and EDST could count toward both the EDST Minor and the ITST Major) if that is acceptable to the other department.

These are the requirements for the Major in Education Studies:

Code	Title	Hours
Cohort Courses		
EDST105	Foundations of Education Studies	1
EDST301	Senior Seminar in Education Studies	1
Core Course		**1**
Breadth Requirement		
Category 1: Cognition, Development, & Science of Learning		1
Category 2: Social & Structural Analyses of Education		1
Category 3: Research Methods & Data Analysis		1
Electives		**3**
Broader Contexts		**1**
Pedagogy		**.5**
Practicum		**.5**
Total Hours		**11**

COURSE PETITIONS

Students may petition to substitute a different course to meet a requirement by completing this petition form (https://forms.office.com/Pages/ResponsePage.aspx?id=eWz9qXFt80mREQyOWR3D0ZrbqMi0a91AqegIpgTx3ytUNDVQQ0FUU0NNWEExRzVPS1IyS
The petition form asks students to justify the substitution and to upload a syllabus or other supporting information. Substitutions are not allowed for cohort courses. Students will be notified via email whether their petition requests are approved. Once approved, students request the exception via Stellic in their WesPortal.

COURSE LISTS AND ARCHIVE

Click here to view all courses for the current year, as well as the course archive of all approved courses that fulfill requirements for the Education Studies Major. (https://docs.google.com/document/d/1gtZCuuzvRH8epYls8AF5EhE_RVAuvGu6A-gONyk-D_k/edit?usp=sharing)

COHORT COURSES

Students must take two courses, one typically in their first or second year of study, and one in the fall of senior year, that will (1) function to build a cohort in the College of Education Studies, (2) help students make sense of the interdisciplinary contributions to Education Studies, and (3) help students understand the faculty, research, and resources in Education Studies at Wesleyan.

Code	Title	Hours
EDST105	Foundations of Education Studies (!)	1
EDST301	Senior Seminar in Education Studies #	1

! Gateway course - normally taken in sophomore year; can be taken junior year for students who enter the Education Studies Major late.

Taken in the fall of senior year.

CORE COURSE

Students must take one core course in Education Studies that broadly covers the field.

Code	Title	Hours
Foundations Course		
EDST230	Schools in Society	1
PSYC/EDST253	Educational Psychology	1

BREADTH COURSES

Students must take one course in each of three core areas of Education Studies. There are multiple options across the curriculum for each category.

Category 1: Cognition, Development, & Science of Learning

Category 2: Social and Structural Analyses of Education

Category 3: Research Methods & Data Analysis

ELECTIVE COURSES

These courses can comprise any combination of courses in the Core or Breadth categories, and up to two Pedagogy classes. Students may petition for transfer credits that are relevant to Education Studies to count as electives.

BROADER CONTEXTS COURSE

Students take one course that addresses broad theoretical influences on how systems of knowledge or schooling are understood, constructed, transmitted, and changed. This course should sharpen students' ideas about what is taught, why it is taught, and how it is taught in the current U.S. or other contexts.

Students must take 1 credit in the Broader Context category. There are many courses that will satisfy this requirement.

PEDAGOGY & PRACTICUM

Students must complete two aspects of a practicum experience: pedagogy and practice.

- Students must take a minimum .5 credit course focused on pedagogy; there are several .5 and 1 credit courses with this focus offered at Wesleyan. Pedagogy courses are listed below.
- Students must also complete a teaching practicum/in-school experience with a minimum of 20 hours of student contact. The practicum experience does not need to be credit-bearing, as long as the 20 hour requirement is met.
- Students can meet both the pedagogy and practicum portions of the requirement separately, or they can meet them with a single 1-credit course (i.e., a service learning course that provides 20 hours of student contact *and* covers elements of pedagogy). Apart from service-learning courses, many options exist to fulfill the practicum requirement through JCCP programs, summer programs, teaching apprenticeships, and internships while studying abroad. Some ideas are listed below.
- If the practicum experience is something other than one of the approved ~~listed~~ courses listed below, students must submit a petition (https://forms.office.com/r/NGNdKLRucW) to get the experience approved in advance. Keep in mind that the experience must be fully documented with at least 20 hours of student contact.

STUDENT LEARNING GOALS

1. Understanding the foundations of Education Studies including history, theory, and philosophy of key movements and approaches (e.g., formal and informal education; experiential education; privatization movements; canon; relationship between schools and education)
2. Understanding of, and ability to apply, critiques of educational systems, policies, and practices from the lens of equity, opportunity, power, and transformative justice (e.g., civil rights; global education; gender; race; class; and disability)
3. Understanding the science and psychology of learning as a framework for examining education
4. Understanding of the relationship between culture and education, and between different cultures and their education systems (e.g., multiculturalism and multilingualism; globalization; goals of education within a culture or country; comparative studies of education systems, immigrants' experiences in unfamiliar systems)
5. Understanding education as an art as well as a science or system (developing a practical art of teaching, imagining critical generative interventions and experimental approaches to education including embodied arts practices or relationship making)
6. Practice applying one or more methodological approaches to research questions in education (e.g., quantitative and experimental methods; qualitative data collection; archival research; data science and 'big data' approaches; historiography; pedagogical research)
7. Practice working in and connecting theory to real-world educational settings (e.g., educational practice, advocacy, critique).

STUDY ABROAD

Many study abroad programs are appropriate for Education Studies majors and offer courses that could be used in the service of the major.

The Education Studies homepage maintains a list of study abroad programs that are relevant to Education Studies and that offer courses students could use to fulfill major requirements. Students are encouraged to study abroad if that

makes sense for their educational goals, but are not required to do so. Education Studies faculty are supportive of study abroad experience for many reasons, particularly the broad cultural perspective that it affords.

PRIZES

TRANSFER CREDIT

Core and Cohort courses must taken at Wesleyan. Other course requirements may be fulfilled with transfer credits. Courses that fit logically into one of the Category 1, 2, or 3 courses will count toward those requirements. Courses that do not fit logically into Category 1, 2, or 3 but cover content relevant to Education Studies will count toward electives. There are no restrictions on how many transfer credits can count toward the major.

The College of Education Studies is pleased to sponsor credit transfer requests for students who have taken Education Studies courses elsewhere. Students who wish to transfer credit in Education Studies courses at other institutions should submit a course petition request, a completed transfer credit form from the registrar, and a syllabus of the course.

HONORS

Following Wesleyan's guidelines for Departmental Honors, students in Education Studies must meet two requirements to be eligible for Departmental Honors in Education Studies.

1. Either a minimum GPA of 85.0 in Education Studies OR endorsement of two Core faculty in Education Studies; and
2. Completion of a Thesis that is determined by the thesis advisor and the second reader to meet the standards for honors or high honors.

Students should submit a declaration of interest to the department chair(s) in the spring of their junior year.

CAPSTONE EXPERIENCE

Students have many opportunities for capstone experiences within the Major: (1) senior Honors Theses; (2) individual and group tutorials supervised by Education Studies faculty; (3) annual fellowships to conduct mentored research in Education Studies; (4) a capstone Senior Seminar to weave together the threads of the interdisciplinary program of study; and (5) internships, fellowships, and practica to try out academic theories in real world settings.

COLLEGE OF FILM AND THE MOVING IMAGE

The College of Film and the Moving Image explores the motion picture in a unified manner, combining the liberal arts tradition of cultural, historical, and formal analysis with filmmaking at beginning and advanced levels. The department offers a major and a minor.

AFFILIATED FACULTY

- Undergraduate Film Studies Major (p. 1073)
- Undergraduate Film Studies Minor (p. 1124)

FILM104 Introduction to Collaborative Documentary Filmmaking
In this immersive, time-intensive, hands-on introduction to the documentary film process, students will create compelling stories where real people are the protagonists and narratives are informed by real life. Through close study and analysis of feature-length and short documentaries, plus active research, writing, producing, directing, shooting, sound recording, editing, and re-editing, students work in three-person crews to rigorously explore the power and possibilities of nonfiction storytelling and record, engage with, and understand our present moment. Each fall, the course has a theme around which film screenings and student projects are organized; for 2024, our focus will be food, farming, and sustainability. Students should expect to spend up to 10 hours of work per week outside the class time shooting, editing, and working collaboratively with their classmates, including multiple weekends. Film production experience is not required. Lessons include how to craft a compelling nonfiction narrative based on interviews and research, how to build partnerships with the protagonists of the stories you want to tell, how to shoot on-camera interviews and observational footage, how to record and edit sound, and how to edit using Adobe Premiere. Students will present works in progress in all phases of the creative process and actively participate in constructive critical discussions of one another's work. For more information about the course please visit: https://collaborativedocumentary.wescreates.wesleyan.edu/

PLEASE NOTE: This course has no prerequisites, is open to non-majors/minors and is not a FILM major/minor elective.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **None**

FILM105 Writing the Moving Image: Coming of Age
Designed for first-year students, this is an introduction to some of the core fundamentals of visual storytelling through an exploration of coming-of-age films. How do characters' emotional worlds guide their actions? How are characters informed by and created by the places they inhabit? How is a scene the building block -- as well as a microcosm -- for a film as a whole? Through close study and analysis of a wide variety of short and feature length coming-of-age films, weekly writing assignments, and in-class writing workshop sessions, students will explore the power and possibilities of story craft and learn how to write short film loglines, synopses, outlines, and screenplays. Students should expect to spend several hours per week outside of class reading, writing, and watching films. Over the course of the semester students will present works in

progress, participate in constructive critical discussions, offer weekly editorial feedback to their peers, and develop two short film screenplays.

FILM158 Form, Story, and Genre: An Introduction to Wesleyan Film Studies
What does it mean to "study film" at Wesleyan? Get a taste of the College of Film's approach to visual storytelling in this online course featuring genres and filmmakers from across our curriculum. We will consider how film guides viewers on an emotional journey through image and sound, with classes devoted to melodrama, comedy, action, horror, documentary, film noir, and the movie musical. In all cases, we explore the moment-by-moment experience of the viewer as guided by specific cinematic choices of editing, cinematography, staging, performance, sound, alignment, point-of-view, and placement of the audience. Instead of interpreting what films mean, we will seek to understand how they capture our attention, how they absorb us into stories, and how they make us feel. Guest lecturers will include members of the CFILM faculty. Each week students will watch one or two feature films on their own and gather for two lecture/discussions. This is a for-credit class (pass/fail) with grade determined by participation and two quizzes.

FILM202 Difficult Women: Post/Feminism in Television Comedies and Dramedies
Although postwar family sitcoms represented women as homemakers, one of the first and most popular sitcom wives also articulated discontent with domestic femininity. Lucy Ricardo became the prototype of the "unruly woman," a figure with feminist potential whose desires exceed and disrupt dominant gender norms. As those norms have shifted, so have TV's unruly women. Second-wave feminism, anticipated in I Love Lucy, was incorporated into a 1970s cycle of comedies centered on single working women whose career aspirations were rewarded. Over the following decades, a postfeminist sensibility dominated television comedies and dramas and became central to a gendered neoliberalism in which energetic individuals "empower" themselves. In recent years, a new type of female protagonist has emerged. Alongside the can-do optimism of single-women comedies from The Mary Tyler Moore Show to Sex and the City to 30 Rock and Parks and Rec, a stream of comedies and dramedies, made largely by and for women, have depicted a variety of flawed, difficult, unruly women coming of age under conditions of socioeconomic precarity, whose less focused energies seem to articulate a more uncertain, downbeat, post-recessional mood. In this course we will situate the latter cycle in relation to both the longer history of televisual representations of women and to the current state of feminist politics. Among the shows we will look at are: I Love Lucy, Bewitched, The Mary Tyler Moore Show, Sex and the City, Ally McBeal, Girlfriends, The Mindy Project, 30 Rock, Parks and Rec, Girls, Insecure, Broad City, Better Things, Two Broke Girls, New Girl, Crazy Ex-Girlfriend, Jane the Virgin, Unreal, Abbott Elementary, Fleabag, Dear White People, and Somebody Somewhere.

FILM203 Hollywood and Big Data
Taught by a media research executive with a long industry experience this course is designed to provide students with an introduction and understanding of how the media industry is using data to make decisions that shape the art landscape of our times. Data around consumer behavior--what, how and why people are watching--has exploded recently and is extensively used in making decisions about what TV shows and movies to produce, how to promote them and how to make them. The course will explore how the media industry quantifies different kinds of content, the ways in which people watch and pay for that content, and how value is attributed across the media landscape. Students will be introduced to essential "media metrics" (e.g. viewership, box office, engagement) and learn to evaluate different data sets for their integrity and representative insights. Visiting media executives will discuss how data informs their jobs ("evidence-based decision making"). Assignments will include written briefs based on different data sets and a final project presentation highlighting skills in analyzing and presenting insights extracted from media research data. By the end of this course, students will be familiar with key decision-making tools in the media industry and be able to analyze and understand the impact on media output

FILM210 The Foundations of Cinema
This course offers a seminar-style, comparative introduction to film form and aesthetics through an exploration of films from around the world spanning a range of eras. Students will learn how to describe and analyze the key formal elements of a film, including plot structure, narration, cinematography, editing, sound, and mise-en-scène (sets and props, costumes and makeup, lighting, and performance). Emphasis will be placed on discerning the functions of formal elements and how they shape the viewing experience.

Classes will integrate lecture, discussion, and creative exercises designed to provide students with the opportunity to both analyze and experiment with the formal elements of film. The course will also highlight Shanghai's pivotal role in China's rich film history, including a field trip to the Shanghai Film Museum. The material in this course will enable students to expand their understanding of global film history; assess the unique visions of individual filmmakers; develop their descriptive and analytical skills; and practice fundamental filmmaking techniques.

FILM230 Introduction to Korean Cinema
During the last few decades South Korean cinema has taken center stage in world cinema with the phenomenal success of its film industry and critical acclaim in the global context. However, Korea has boasted a thriving film culture and aesthetics since the "golden age" of the 1950s, of which renowned contemporary directors such as Bong Joon-ho and Park Chan-wook have claimed

they are the inheritors. This course introduces Korean cinema from its beginnings in the colonial era to its recent achievements. While learning the concepts and theories of film studies as well as the cultural and political contexts to which Korean film culture has responded, students will explore films by key directors that constitute the crucial "moments" of South Korean cinema. We will examine the main topics in Korean cinema, including colonial production, the liberation and Western influence, nation and nationalism, modernity and women, gender politics, realist and modernist cinema, popular cinema and cultural depression, the Korean New Wave, democratization and political cinema, the Korean blockbuster, the questions of "Koreanness," and the "Korean Wave" in the global film market. The course also seeks to establish a balance between understanding Korean cinema as both a reservoir of historical memory and as an example of evolving world cinema. Through engagement with methodological issues from film studies in each week's readings, including the question of archives, national cinema discourse, feminist film theory, auteurism, and genre studies, students in this course will learn to analyze Korean filmic texts not only as a way to understand the particularity of Korean cinema but also as a frontier of cinematic language in the broader history of film.

FILM231 Wartime Film Culture in the Japanese Empire
Just as in many other countries, cinema, within a short time of its emergence, became the most popular entertainment in modern Japan. Mindful of this, the Japanese government tried to turn the country's film industry into an arm of its propaganda machine to support its imperial program, especially the military component. This began with Japan's invasion of the Chinese continent in 1931 and lasted through the end of World War II in 1945. How did Japan's private film studios respond to such governmental efforts? How did wartime Japanese cinema manage to strike a balance between being entertainment and political texts? What are the characteristics of Imperial Japan's wartime film culture, and how are they different from the counterparts in other countries? Was the campaign to support war via movie productions in Japan successful, in terms of providing seamless propagandistic messages? What kind of legacy has the wartime film culture left in contemporary Japan and East Asia? In order to answer these questions, this course explores film culture of Imperial Japan and its territories during the wartime era, spanning roughly from the early 1930s through 1945. We will watch wartime films, and at the same time examine the ways in which the film culture coexisted along with other forms of visual propaganda practice and political discourses. While probing how the films reflect the "virtues" of wartime conservatism, patriotism, perseverance, and self-control, this course will explore topics that include the propaganda culture of wartime Japan as a whole, Nazi propaganda and Japan, cultural films, monumental cinema, films featuring Japan-China or Japan-Taiwan romances, children-centered films, "kokumin eiga," films of volunteers and Japanese Spiritism, "Military Mothers" and gender, and the defeatist aesthetics and cracks in Imperial Japanese cinema. While we will for the most part watch and discuss films directed by the Japanese of mainland Japan, including such prominent directors as Mizoguchi Kenji and Kurosawa Akira, the films produced in the Japanese colonies of Korea, Taiwan, and Manchuria--whether independent productions or collaborative efforts--will also be examined. Film production in colonial Korea, in particular, was quite vibrant, relative to the cinematic output of Taiwan and Manchuria. We will observe how the films made in Japan's colonies joined the empire-wide filmic war-mobilization campaign, presenting their own justifications for war cooperation. Ultimately, this course will ask what kind of relationship Japanese cinema has had with the state and Japanese nationalism during the mid-century of Japan's tumultuous modern history.

FILM232 Minority Voices in Japanese Film and Literature
Although there is no such thing as a "homogeneous nation" in the world, Japan often has been falsely regarded as a country of a singular ethnicity and civilization. Is Japan a nation-state of one race and unified culture? Who are the voices in Japan defying this kind of Japanese myth? How do they claim their rights and agencies as members of Japanese society? What peoples have been discriminated against by other communities, despite their indigenous Japanese roots? What kind of relationship do these internal "others" have with the Japanese state? This course explores Japan's domestic minorities as depicted in Japanese literature and film, whose stories and images have been largely untold and invisible in the mainstream culture. Among the various minority groups in Japan, we will pay special attention to four groups: (1) the country's culturally defined minority group since the feudal era, burakumin (the untouchables); (2) the country's oldest and biggest foreign ethnic group, Koreans ("zainichi"), and other Asians; (3) the people of Japan's internal colony, Okinawa; and (4) Japan's medical outcasts, the victims of atomic disasters in Hiroshima and Fukushima. Students will deal with materials about the specified groups produced by prominent figures in Japanese literary and cinema history. At the same time, students will examine materials created by the otherized subjects themselves to probe how marginalized beings represent themselves in ways that are different from the dominant media portrayals.

FILM234 Introduction to Russian and Soviet Cinema (CLAC.50)
This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

FILM250 Computational Media: Videogame Development
This course examines the interplay of art and science in the development of contemporary videogames using the Unity development platform and commercial artistic game tools. Students develop a comprehensive understanding of computational media, including legal and commercial aspects, combined with hands-on experience in a creative process that integrates design, art, and coding. There will be discussions with invited industry leaders in various subject areas. Students will have the opportunity to work as part of development teams and create working prototypes to better understand the challenges and rewards of producing graphic interactive software within a professional context.

FILM290 Too Much: Global Melodrama in Film
Often patronizingly dismissed as "women's weepies," this course will examine the proliferation and transformation of melodrama film within various national, subnational, postcolonial, queer, and global contexts. The course will focus on the specific language ad conventions of melodrama. We will watch a wide range of films from India, China, Japan, South Korea, Hong Kong, Hungary, Iran, Egypt, Kenya, Spain, Venezuela, Cuba, Argentina, and Mexico among various global film contexts. Importantly, this course will ask, what are the stakes and implications of "Global" in "Global Film Melodrama"? Moving away from an additive model that often present global film histories as an addendum to the "mainstream" cinemas, the focus will instead be on the emergence and significance of melodrama, and its specific idioms within transnational contexts. The course is open to all sophomores, including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required.

FILM301 History of Spanish Cinema
This course explores the development of Spanish cinema from the early 20th century to the present. We will evaluate how social, political, and economic circumstances condition Spanish cinematography at key junctures of Spanish cultural history in terms of the production and distribution of films, cinematographic style, and thematics. The course will also highlight key facets of the Spanish star system as well as the auteurism of those directors who have achieved international acclaim by reworking a national film idiom within international frames of reference.

FILM302 Not Just Neorealism: Italian Cinema, Its History and Politics
This introductory course on Italian cinema, taught in English, investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of the auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others. Additional material includes readings in film theory and criticism, Italian history, literary sources, screenplays, and interviews. For interested students with advanced competency in Italian, there will be a .50 credit (CLAC) discussion section, ITAL245/CGST245, at a time to be determined but very likely after our second class of the week. Italian and Romance Studies Majors, please see additional comments below.

FILM303 History and Analysis of the Animated Cinema
We will study the major trends in animation from its inception through our contemporary period with an emphasis on aesthetics and storytelling. Our main questions: How has the animated film developed and been defined as a film technique, a genre, and an art form? American works will be in conversation with Eastern European, Russian, Canadian, British, French, and Japanese animated film and television. Our approach is grounded in the rigorous historical study of form.

Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **None**

FILM305 Sophomore Colloquium for Declaring Majors
This course is designed for sophomores who have completed the CFILM gateway courses and wish to deepen their exploration of film art via a collaborative hybrid of film studies and film production. The course spans three units, each focusing on a set of films with similar generic, tonal, setting, or story attributes -- e.g., comedy, noir, suspense/horror. The beginning of each unit will involve watching and comparatively analyzing feature films, searching for different cinematic solutions to shared questions or different applications of common cinematic tools. Each unit will gradually shift to more fine-toothed film analysis -- e.g., scene breakdowns -- which will then transition to pre-production and production at the CFILM soundstage and/or set house. Each unit will culminate in the filming of a short scene, and students will rotate through different on-set roles across the semester. Through linking film analysis and film production, students will gain a closer understanding of the creative decision-making process in cinema. They will learn how to identify, discuss, understand, and execute a variety of filmmaking tools. Hopefully, this course also encourages students to find new favorite movies in unexpected places, to discover topics that draw them to further study in future film electives, and to better know their sophomore classmates via a collaborative, small class setting.

FILM307 Cinematic Storytelling: Styles, Tools, and Journeys
This history and analysis course explores how fundamental changes in film technology affected cinematic storytelling. We will consider the transition to sound, to color, to widescreen, and more recent "digital revolutions." Each change in technology brought new opportunities and challenges, but the filmmaker's basic task remained the emotional engagement of the viewer through visual means. We will survey major directors and genres from across history and point forward to contemporary cinema. Our aim is to illuminate popular cinema as the intersection of business, technology, and art. Through film history, we will learn about the craft of filmmaking and how tools shape art.

FILM308 The "Hollywood" Musical
The musical genre, born in the Hollywood studio system and taken up by filmmakers around the world, has been a wellspring of cinematic invention for nearly a century. We will trace the history of the form and examine specific approaches to the genre (Busby Berkeley, Astaire/Rogers, Freed Unit, etc.). Through the musical, we will consider: the relationship of emotion to form in cinema; how filmmakers control audience perception of the cinematic world; the interplay between story and spectacle; popular film's personal and communal address; the potential for abstract experimentation in studio films; and the complexity and value of entertainment. We will study the contributions of individual stars, producers, directors, composers, and art directors and consider how different filmmakers define the genre. Songs will get stuck in your head.

FILM311 Israel in Therapy: Society Under the Influence of TV Series
The course deals with the prototypes of the Israeli character as they appear in the original Israeli TV series In Treatment, and other Israeli TV series, such as Florentine and A Touch Away. We will compare the structure and the characters of the series to other dramatic Israeli series, examine the appearance of the characters, and discuss the similarities and differences between the roles they perform. In addition, we will examine the role of television drama series as a tool to define and characterize our societies, and also look over the five characters that appear in the first season of In Treatment, define them, and examine the five prototypes of the Israeli character they represent.

The instructor is the co-creator and head screenwriter of the original version of the TV series In Treatment as well as the Center for Jewish Studies distinguished Visiting Professor.

FILM312 The Short Film: Study and Practice
For first-time filmmakers, the short film is an essential learning tool for finding and honing a personal vision. This course is designed for prospective majors and introduces the core fundamentals of visual storytelling for short fiction films. Through close study and analysis of a wide variety of short films by established and emerging filmmakers, students will learn how to identify and employ the principles of narrative structure and examine the strategy and impact of formal choices on the viewer. Course assignments include a short film analysis paper, loglines and treatments, pitch deck presentations, and two short film screenplays. Please note: This course cannot be taken simultaneously with other screenwriting courses.

FILM313 Videographic Criticism
Since the 2010s, audiovisual essay practice or videographic criticism has set the foundations for a new mode of film scholarship by editing, remixing, reinterpreting, and deconstructing media. In this course, we will explore the recent history and practice of videographic criticism and create original video essays and accompanying theoretical statements. Students should expect to spend several hours reading, writing, watching, and video editing outside of class per week. Weekly screenings and readings will include work featured in journals including [in]Transition: Journal of Videographic Film & Moving Image Studies, Tecmerin Journal of Audiovisual Essays, ASAP/Review, and others. Prior experience with Adobe Premiere Pro is helpful but is not required. Students will produce weekly video essay exercises, write two short papers, and create a final project video essay.

FILM314 Directorial Style: Classic American Film Comedy
This course examines the personal formal and narrative style of various American film directors and personalities in the comic tradition. The class will discuss the overall worldview, the directorial style, and the differing functions of humor in films of each director and/or personality. The course is organized roughly chronologically: the first section focuses on silent- and studio-era filmmakers like Buster Keaton, Ernst Lubitsch, Frank Capra, and Billy Wilder; the latter section looks at contemporary filmmakers who have advanced and/or drawn influence from these earlier traditions.

FILM316 Cinema and Moviegoing in American Chinatowns: Digital Tools and Storytelling
In the latter decades of the twentieth century, movie theaters dedicated to the screening of Chinese-language cinema dotted Chinatowns and Chinese ethnoburbs across the United States. What historical and economic forces explain the development of these unique exhibition sites, and how can we understand their social and cultural impacts? This seminar explores the production, distribution, and exhibition of Chinese-language films for overseas audiences and the moviegoing cultures that emerged around cinemas in Chinatowns and Chinese ethnoburbs. Units will explore Chinese immigration to North America, the establishment of Chinatowns, and early cinema spaces; Chinese immigrant and American-born Chinese filmmaking pioneers, the growth of "Chinese Hollywood," and challenges to Hollywood's dominant representations of Chinese characters and communities; the significance of diaspora audiences for Hong Kong movie studios and the creation of affiliated film distribution chains in the US; the expansion of Chinese-language cinemas in the 1960s and 1970s; the Mandarin and Cantonese films seen by overseas audiences and their range of appeals; and the social and cultural functions served by Chinese-language movie theaters. Students will learn qualitative and quantitative digital tools for film history research and use them to analyze original data sets, visualize research results, and create interactive GIS maps, storymaps, digital timelines, databases, web pages, oral histories, and other digital work related to cinema and moviegoing in American Chinatowns.

FILM318 Awesome Cinema: Religion, Art, and the Unrepresentable
How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the non-rational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason.

FILM319 Television Storytelling: The Conditions of Narrative Complexity
This course examines the industrial and cultural conditions for the development of relatively complex forms of storytelling in commercial U.S. television. Narrative complexity is a cross-generic phenomenon that emerged over the 1980s and has proliferated within an increasingly fragmented media environment. In class discussions and individual research projects, students will analyze particular programs in-depth, with attention to their industrial and social conditions of production, their aesthetic and ideological appeals, and the cultural tastes and viewing practices they reflect and promote. We will also consider how television studies has responded and contributed to the increased prestige of certain types of programs.

Prereq: **(FILM304 AND FILM 307)**

FILM323 Film and Anthropology
Film & Anthropology is an exploration of the cross-pollinating relationship between ethnographic and filmmaking methods and styles. This is, in part, an effort to understand the contributions of both to the observed and documented experience of cultural life. We will watch films weekly and discuss them, as well as respond to them individually in weekly critical précis. We will, in the course of these viewings, come to some consensus as to what we mean by ethnographic and cinematic elements. The films themselves will cross genre boundaries, running the gamut from "traditional" ethnographic films to various forms of documentary and experimental film that in some way address or explore what I consider ethnographic elements. We will cover canonical early ethnographic work (Gardner, Asch, Marshall), feminist experimental interventions in ethnographic film (Minh-Ha, Varda, Deren), and contemporary work that experiments with ethnographic elements, and we will synthesize various genres into new forms of long-form documentary, ethnofiction, and trance film (Marker, Oppenheimer, Sensory Ethnography Lab, Gonzalez, Rosi, Minervini, Kuchar). We will observe the progression of style through the 20th century into the 21st, with the various intellectual threads of post-structuralism, creating modifications of centering the experience and voice of the oppressed, narrative reflexivity/abstraction/unreliability, formal experimental editing styles, the decolonial method as filmmaking practice, and the historicization and interrogation of anthropology as a fraught discipline.

FILM324 Visual Storytelling: The History and Art of Hollywood's Master Storytellers
This course studies distinctive auteurs including Frank Borzage, Howard Hawks, Dorothy Arzner, John Ford, and Vincente Minnelli. Each director uses popular genres to build unique cinematic worlds. Together, their films form the bedrock of a visual language for telling stories, engaging emotion, and shaping perception. Studying some of the studio era's greatest filmmakers reveals the possibilities of narrative cinema and provides models for new creative work. In addition to these auteurs, we consider how a broad range of subsequent filmmakers have developed and renewed their techniques. This class makes the craft of Hollywood visible so that students gain access to the tools of cinematic storytelling.

FILM326 At Home in the World: Transnational Women's Cinema
What does women's cinema signify? Is it cinema created exclusively by women, for women? Is it cinema that puts women at its center? Do these narratives privilege one type of woman over another? How do we understand and investigate these questions within non-Western and global contexts?

This course delves into the multiple subjectivities, sociocultural geographies, media practices, and politics that are folded into the category called "women's cinema." Beginning with an exploration of the 1970s "cine-feminism" that focused on women's filmmaking and political activism, we will expand our discussion to transnational contexts and explore how feminist politics advocated by female and male filmmakers influence an understanding of women-oriented issues, forms, and values in circulation. We will examine women's films produced within national and transnational geo-cultural spaces and pose questions about national, exilic, or postcolonial auteur subjectivities. We will analyze the films' aesthetics, institutional contexts, and global circulations and situate them within the frameworks of feminist theory, authorship, postcolonial studies and transnational feminist scholarship. We will study women's cinema from South Asia, North Africa, the Middle East, Europe, and the Americas. The course screenings will include films such as "Fire," "Water," "Like Water for Chocolate," "Bhaji on the Beach," and "Silent Waters/Khamosh Pani."

FILM328 Moving Images Beyond the West: An introduction to Global Media
The globalization of media has become a key issue of debate around the world. Yet, many discussions about globalization tend to obscure the often complex and contradictory relationships among global, national and local forces. This course critically examines the role that film, television, video games, and other media play in shaping our sense of global, national, and local cultures and identities. Focusing on Indian, Chinese, South Korean, African and other media producers, it examines how diverse audiences use global media to negotiate with issues of cultural identity in everyday life.

FILM329 Bollywood and Beyond: Introduction to Indian Cinema
India is one of the world's largest film-producing nations, releasing over 900 films every year. The Indian film industry remains an exceptional industry, holding its own against Hollywood's expansion into markets like India. This course will provide a historical and thematic introduction to Indian cinema commonly known as "Bollywood." We will examine the codes and conventions that are unique to Indian films as we attend to the ways in which Indian cinema addresses the socio-political issues of caste, class, religion, and gender. The course is open to all sophomores including non-film majors and non-film minors at Wesleyan. No previous experience in film is required.

FILM330 The Art and Business of Contemporary Film
Taught by a leading professional in independent film distribution, acquisition, and marketing, this course explores the contemporary cinema marketplace and its relationship to filmmaking. We will consider the process of defining and finding the potential audience for independent and studio films. The class mixes case studies of production, marketing, and reception with film screenings and analysis. Students will hone their skills of practical analysis: articulating a film's essential appeal, distilling its story, and assessing its artistic and commercial merits. Visiting producers and filmmakers will discuss their work in light of its intended audience and reception. Assignments include written briefs on recent releases and their market profiles, analyses of exemplary independent American films, and a collaborative case-study presentation. This is a master class in the film business taught from the perspective of effective cinematic storytelling.

FILM331 Video Games as/and the Moving Image: Art, Aesthetics, and Design
Video games are a mess. As a relatively new medium available on a range of platforms and in contexts ranging from the living room to the line for the bathroom, video games make new but confusing contributions to the meaning and possibilities of the moving image. We will work to understand what games are, what they can do, and how successful games do what they do best. Students will complete game design exercises, create rapid prototypes, playtest their games, and iteratively improve their games with play and their players in mind. They will complete analyses of games and game design projects both alone and in groups and participate in studio-style critiques of one another's work. Experience with computer programming is helpful but not essential.

FILM332 Women Make Movies: Histories of Women's Contributions to World Cinema
This course is not only about the cinema BY women but also work of women IN cinema. The course will engage critically with a variety of roles that women perform--from directors, writers, actors, film editors, critics, producers, costume designers, cinematographers, singers, and more. Attending to global feminist historiography, it will foreground the ways in which women shape the content, style, and development of the movie business globally as they navigate social, political, cultural, and industrial contexts. Addressing film cultures from Asia, Latin America, Iran, Africa, Europe, and the US, the course will expand the western cine-feminist critical tradition and ask: How does an investigation of women's contributions at all levels of filmmaking change our conception of film history? The course is open to all sophomores including non-film minors and non-film majors at Wesleyan. No previous experience in film is required.

FILM333 Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

FILM333Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

FILM336 Silent Storytelling
This course examines the development of visual storytelling from the post-nickelodeon cinema's presentational styles to the expressionistic filmic poetry of silent cinema's twilight years. Taught by noted film historian and accompanist Ben Model, it explores how silent-era filmmakers developed creative ways to invoke the audience's imagination as a storytelling component. Major filmmakers include Griffith, Keaton, Pudovkin, Lubitsch, Chaplin, Weber, and Vidor. We will look closely at silent film comedy, melodrama, and action. Our work will be based on close viewing of films and attention to the interaction between image, music, and the viewer's journey through each film. Films will be screened with live piano accompaniment in class sessions.

FILM341 The Cinema of Horror
This course focuses on the history and development of the horror film. We will seek to understand the appeal of horror. One of our guiding questions will be: "Why do audiences enjoy a genre that, on the surface, seems so unpleasant?" Toward this end, we will take up several distinct theories of how the genre is constructed, defined, and used by producers and viewers. Horror has been a watershed topic for scholars interested in film, and this course gives us the chance to critically engage with important arguments and methodologies in contemporary film studies. The genre has been equally inspiring for filmmakers interested in playing with form to elicit audience reaction. So, we will also be concerned with the aesthetics of horror: how film technique has been developed to terrify viewers.

FILM342 Cinema of Adventure and Action
The action film reached new heights of popular and commercial success during the 1980s and 1990s, but it is a form of cinema with a long history. This course

will examine the genre from cultural, technological, aesthetic, and economic perspectives. We will trace the roots of action cinema in slapstick, early cinema, and movie serials over to the historical adventure film, and, finally, to recent action movies in both Hollywood and international cinema. We will also cover conventions of narrative structure, character, star persona, and film style, as well as the genre's appeal to audiences and its significance as a cultural form.

FILM346 Contemporary East Asian Cinema
This is a seminar on comparative narrative and stylistic analysis that focuses on contemporary films from Hong Kong, Taiwan, China, South Korea, and Japan, regions that have produced some of the most exciting commercial and art cinema in the last thirty years. We will begin by examining the basic narrative and stylistic principles at work in the films, then broaden the scope of our inquiry to compare the aesthetics of individual directors. Our goals are to analyze the narrative and stylistic tendencies of filmmakers while considering their work in a historical, cultural, and industrial context, and to develop our film analysis skills via formal comparison. Films from Bong Joon-ho, Fei Mu, Hong Sang-soo, Hou Hsiao-hsien, Kitano Takeshi, Kore-eda Hirokazu, Jia Zhangke, Jeong Jae-eun, Kon Satoshi, Lee Chang-dong, Mizoguchi Kenji, Ozu Yasujiro, Suo Masayuki, Tian Zhuangzhuang, Johnnie To, Tsai Ming-liang, Tsui Hark, Wai Ka-fai, Wang Xiaoshuai, Wong Kar-wai, Yim Soon-rye, Yoon Ga-eun, Yuen Kuei, and others will be featured.

FILM347 Melodrama and the Woman's Picture
Within film history and criticism, the usage of the term "melodrama" has changed over time, as has the presumed audience for the genre. This course will investigate the various ways in which melodrama and the woman's picture have been understood in the United States and around the world, beginning in the silent period; ranging through the 1930s, '40s, and '50s; and culminating in contemporary cinema. We will pay particular attention to issues of narrative construction and visual style as they illuminate or complicate various analytical approaches to melodrama and speak to gender, sexuality, race, and class. Screenings include films directed by D. W. Griffith, Evgenii Bauer, Oscar Micheaux, John Stahl, Frank Borzage, Naruse Mikio, King Vidor, Wu Yonggong, Douglas Sirk, Vincente Minnelli, Max Ophuls, Mizoguchi Kenji, Kim Ki-young, Rainer Werner Fassbinder, Pedro Almodovar, Ann Hui, Lars von Trier, Farah Khan, and Luca Guadagnino, among others.

FILM348 Postwar American Independent Cinema
What exactly defines an "independent" film or filmmaker? How do independent filmmakers situate themselves in opposition to mainstream filmmaking and/or work in tandem with major studios? How have notions of independence changed over time? This course addresses these and other questions as it examines various models of American independent filmmaking in use from the studio era to the present day. We will explore the methods of production, distribution, and exhibition used by independent filmmakers and their range of reliance on the major studios. In addition, we will consider the aesthetic and cultural relationship between independent films and mainstream filmmaking, focusing in particular on how independents have used film form, narrative, and content to differentiate their product. Screenings will likely include films directed by Ida Lupino, Sam Fuller, Herbert Biberman, Dwane Esper, Roger Corman, Russ Meyer, Melvin Van Peebles, John Waters, Morris Engel and Ruth Orkin, John Cassavetes, Shirley Clarke, Maya Deren, Su Friedrich, Sadie Benning, Kenneth Anger, Andy Warhol, Mike and George Kuchar, Barbara Kopple, Julie Dash, Marlon Riggs, Charles Burnett, Wayne Wang, Jim Jarmusch, Chris Eyre, Todd Haynes, Ramin Bahrani, Kelly Reichardt, Aurora Guerrero, Joe Talbot, and Sean Baker, among others.

FILM349 Television: The Domestic Medium
Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

FILM350 Contemporary International Art Cinema
What exactly defines an "art" film or filmmaker? How do art house filmmakers situate themselves in relation to mainstream filmmaking and within the global film market? This course addresses these and other questions as it examines the aesthetics and industry of contemporary international art cinema. The class will explore the historical construction of art cinema; its institutional, cultural, and economic support structures; and the status of art cinema today. Featured directors include Marin Ade, Roy Andersson, Jayro Bustamante, Leos Carax, Alan Clarke, Luc and Jean-Pierre Dardenne, Terence Davies, Claire Denis, Mati Diop, Jaco van Dormael, Ryûsuke Hamaguchi, Joanna Hogg, Aki Kaurismaki, Abbas Kiarostami, Samira Makhmalbaf, Steve McQueen, Cristian Mungiu, Lucretia Martel, Corneliu Porumboiu, Abderrahmane Sissako, Thomas Vinterberg, Edward Yang, and Andrey Zvyagintsev, among others.

FILM352 From Caligari to Hitler: Weimar Cinema in Context
This course offers a critical introduction to German silent and sound films from 1919 to 1932. It will test the thesis of Siegfried Kracauer's classic study that expressionist films in particular prepared the way for Hitler's rise to power. The focus will be on canonical films of the era including THE CABINET OF DR.
