FILM372 Hong Kong Cinema
This course offers an introduction to the dynamic history of Hong Kong cinema from 1960 to the present day. The course will acquaint students with Hong Kong's major films, genres, directors, and industrial trends; explore the factors that enabled the Hong Kong film industry to become a regional and global powerhouse; and consider the reasons behind the contraction of the industry since the mid-1990s and the outlook for Hong Kong cinema's future. Screenings will feature the films of Fruit Chan, Jackie Chan, Peter Chan, Chang Cheh, Mabel Cheung, Tony Ching Siu-tung, Chor Yuen, Stephen Chow, King Hu, Ann Hui, Michael Hui, Stanley Kwan, Andrew Lau & Alan Mak, Li Han-hsiang, Lo Wei, Johnnie To, Cecille Tong, Tsui Hark, Wang Tian-lin, Wong Kar-wai, John Woo, Corey Yeun Kwai, Toe Yuen Kin-to, and others.

FILM379 The Artist on Film
How can we get the essence of a painter, dancer, musician on film? The Artist on Film comes with the aesthetic challenge of translating artistic expression from one medium to another. Part of the problem is that the reason artists interest us in the first place is that they transmitted themselves so effectively into a different shaped box. We will consider what cinema shares with its neighboring arts, how it can evoke other media, and how distinctions between art forms shape our experience. Through creative assignments, this class will look at how filmmakers tackle the challenge of creatively representing artists and transforming their works into a new medium. This course is taught in the Basinger tradition of combining filmmaking with film watching. It is taught by a writer/director and a particularly good course for those interested in screenwriting and/or directing, but all cinephiles are welcome. The course is designed for majors but will consider sophomores who have completed 304 and 307. Assignments are screenplays and the course will not be covering basic screenwriting format, so some coursework or familiarity with screenwriting is recommended. Class will consist of two screenings a week with lecture and discussion.

Prereq: **FILM304 and FILM307**

FILM381 The Films and Influences of Martin Scorsese
Martin Scorsese is a student of the cinema who, for over 60 years, has openly processed his fascination with the medium into strikingly original work. His fiction features--such as Raging Bull and Goodfellas--and documentaries--such as Italianamerican and Rolling Thunder Revue--exhibit the same love for cinema that motivates his parallel efforts as film historian and preservationist. His directorial style has continued to evolve across his career, finding new approaches to form and content that engage and provoke audiences. In this course, students are asked to: - Define Scorsese's film style and its evolution over time. - Make comparisons between Scorsese's work and films from which he drew inspiration and reference. - Navigate the confrontational "push-and-pull" around difficult protagonists in social worlds defined by sexism, racism, and violence. - Develop tools of film analysis and an understanding of cinema that they can, in turn, carry into their own academic and creative work.

Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM383 History and Practice of Television Writing
This course offers a historical/industrial introduction to American television, and uses that as a springboard into analytical and creative exercises. Each unit will involve students viewing TV episodes (outside of class time) that are bound by theme, genre, production context, etc. These will serve as the foundation for in-class lecture and discussion on the industry and the decision-making of television creators. At the end of each unit, students will work on a culminating assignment of either analytical or creative writing. Key learning goals for the course: - An overview of television history: industry, censorship, technology, culture, and storytelling. - Identifying key concerns and parameters that affect creative decision-making, and how TV writers/creators work within them to respond to and reflect the concerns of their era. - Having students generate their own TV writing from imposed prompts/restrictions

Prereq: **FILM304 AND FILM307**

FILM384 Documentary Storytelling
This course explores the range of approaches, methods, and techniques employed by documentary filmmakers to tell their stories. After an introduction to elements of creative nonfiction storytelling, we will spend the semester looking at films organized by topical lens. Through close reading of documentary

texts, filmmaker statements and academic writing, we will examine how past and current documentaries successfully -- and sometimes unsuccessfully -- have tackled a wide variety of subject areas. During the semester, students also will develop an original documentary film idea based on a book or long magazine article and demonstrate their storytelling knowledge through final verbal pitches and a pitch deck. Industry guests visit to share their insight into documentary storytelling and provide students with additional pitch feedback.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM385**

FILM385 Introduction to Documentary
This course provides foundational knowledge for documentary filmmaking introducing students to the history and aesthetics of documentaries and exploring international nonfiction filmmaking from the origins of cinema to the end of the 20th century. The writings of film theorist Bill Nichols, including his influential documentary modes, play a central role in the course. Students learn how documentary has been defined and redefined through the study of how filmmakers were inspired by the concerns and technology of their age. This course also addresses issues of accountability, representation, access, and ethics in documentary filmmaking.

Gen Ed Area: **HA-FILM**
Prereq: **FILM304**

FILM386 Cinematic Language of Documentary
Drawing from documentaries produced since the advent of television, this course deconstructs the cinematic tools employed in the art of documentary filmmaking. We will explore how cinematography, sound, performance, mise-en-scène, and editing as well as archival material, character/subject, and location/place operate to serve filmmakers' storytelling goals. Students will learn how technological changes through to the present have influenced creative and practical filmmaking choices as well as brought forth issues of accountability, representation, access, and ethics. This class provides an opportunity for students to realize that the lines between documentary and fiction film are more porous than typically appreciated.

FILM387 Seminar on Television Series and Aesthetics
Through frequent viewing of episodes, classroom discussion, and written exercises, students will consider television programs over multiple seasons and series as they work to describe and differentiate models of television series construction. Of primary interest is the creative decision making that goes into creating this commercial art form--recognizing patterns of intention, choice, and effect; how these operate on a variety of scales; and what attitudes a program may manifest toward the medium and the viewer. Series viewed may include I LOVE LUCY, ATLANTA, THE X-FILES, RUSSIAN DOLL, and others, including student-generated selections.

FILM388 Global Film Auteurs
This course offers a comparative introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical, cultural, and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion. Screenings will include films directed by Andrea Arnold, Julie Dash, Fernando Eimbcke, Don Hertzfeldt, Krzysztof Kieslowski, Akira Kurosawa, Steve McQueen, Jafar Panahi, Satyajit Ray, Ousmane Sembène, Céline Sciamma, Wong Kar-wai, Agnès Varda, Yim Soon-rye, and Zhang Yimou, among others.

FILM389 Film Genres: The Western
Once the most popular Hollywood genre for decades, the Western still has a palpable impact on the form and content of present-day cinema. This course is devoted to aesthetic and cultural analysis of key films belonging to the Western genre throughout its more than 100-year history. Our aesthetic approaches will include discussions of typical components of the Western, authorship in the Western, narrative structure, and the construction of the West via visual space and sound. Our cultural analysis will place particular emphasis on the myth of the frontier, the relationship between the Western and political rhetoric, and the genre's treatment of race, ethnicity, and gender. Roughly equal weight will be placed on these two approaches. We will also address the historical trajectory of the Western from its early silent days through its decline in the early 1970s to its present-day status.

Prereq: **FILM304 AND FILM307**

FILM390 History of Film Sound
Sound is one of the most powerful tools at a filmmaker's disposal, yet in comparison to visuals, it remains difficult to describe and poorly understood. This course aims to do for the ear what film studies more commonly does for the eye by examining basic sound practices over the course of narrative film history. Focusing especially on U.S. cinema, but also devoting time to sound-conscious auteurs, we will develop an understanding of basic film-sound methods, look at more experimental uses, and track the technological developments of sound from its beginnings to the present day. The focus throughout the course will be on how such elements as music, sound effects, dialogue, and even silence play covert yet vital roles in telling stories and affecting viewers.

Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM391 Sex and Violence: American Film-making Under Censorship
This course examines how US filmmakers have used narrative and stylistic techniques to address censorship requirements in US cinema. Though the course will cover early cinema through recent cinema, a major emphasis will be placed on studio-era filmmaking from 1930 to the 1950s, when censorship was at its tightest. Through close film analysis, we will examine how censorship altered films and how filmmakers manipulated film form and style to convey their intended meanings. Our analysis will serve as a way to reflect broadly on

methods for making films within constraints, the range of cinematic techniques available to filmmakers, and how creative decisions can impact viewers.

Prereq: **FILM304 AND FILM307**

FILM392 Cinema Stylists: Sternberg, Ophuls, Sirk, Fellini
This course analyzes the films of four international renowned auteurs--Josef von Sternberg, Max Ophuls, Douglas Sirk, and Federico Fellini--whose work is consistently defined by the use of highly noticeable, expressive, and even dazzling stylistic techniques. The course will cover the major works of all four filmmakers and will examine each director's films in terms of narrative techniques, personal worldview and--especially--a distinct set of stylistic concerns. Relevant film style topics will include, but are not limited to, lighting, set design, costume, camera movement, color, sound, and editing. Studying these four filmmakers will reveal how filmmakers can define cinema in deeply personal terms and employ a flashy--even flamboyant--style to achieve their goals.

FILM394 Afrofuturist Cinema
In Space is the Place, jazz musician and cosmic philosopher Sun Ra states that "the first thing to do is to consider time as officially ended. We work on the other side of time." Afrofuturist narratives tend to unfold in this inverted time, or "after the end of the world." In this class, we will begin our research in the loop of Sun Ra's speculative refrain. We will examine cinematic depictions of hauntings, dystopias, aliens, the surreal, and space travel. We will discuss works by Anisia Uzeyman, Ryan Coogler, Wanuri Kahui, Ngozi Onwurah, Terrance Nance, Jordan Peele, Mati Diop and more.

FILM395 Autobiographical Storytelling
How do filmmakers and writers negotiate memory, identity, and the author's voice to create original work drawn from life? Through analysis of a broad range of autobiographical narratives by experimental, documentary, and fiction filmmakers and writers, we will investigate various modes of working with personal source material, and explore the capacity and complexities of family and individual narratives to showcase diverse perspectives and interrogate assumptions about the self on screen. Inspired by the films and writing we will study, the creative work produced in this course may be drawn from a variety of sources: one's own lived experience, the lived experience of a family or community member, an event, a place, an artistic and/or cultural tradition. Thinking through the fluid nature of autobiography and the vast range of narrative possibilities for representing autobiographical material on screen will be part of class discussions. In this reading- and writing-intensive course, students should expect to spend several hours reading and writing outside of class per week. For most class periods, students will use Perusall to read and annotate either scholarly articles or pieces of autobiographical writing, or to read and comment on their peers' screenplays via Google Drive. Weekly screenings and readings may include work by Pedro Almodovar, Chantal Akerman, Radha Blank, Julie Dash, Mati Diop, Nathalie Léger, Barbara Loden, Lucrecia Martel, Jonas Mekas, Nanni Moretti, Alice Rohrwacher, Céline Sciamma, Agnès Varda, and others. In addition, the course will include screenings and discussions of videographic criticism (e.g., audiovisual work that critically reappropriates existing works of film and media).

FILM396 Black American Cinema
What is Black Cinema? Is it, as Tommy Lott has claimed, a critical form of filmmaking that resists the "Hollywood master narrative"? Or, as Michael Gillespie claims, does it elaborate Black visual and expressive culture without any pressuposed commitment to a "real" Black lifeworld? While these are critical questions that we will encounter in this class, we will not attempt to answer them. The class surveys a wide range of films to tell a conceptual story about the complex relationship between Blackness and cinema. We will discuss works by filmmakers such as Melvin Van Peebles, Oscar Micheaux, Spencer Williams, Kathleen Collins, Charles Burnett, Julie Dash, Ayoka Chenzira, and more.

FILM397 Cinema and City in Asia
This course will look at the representation of the city in Asian cinema. It will explore links between urban and cinematic space across a range of thematic, historical, and cultural concerns. We will watch a wide range of films from China, Hong Kong, Japan, South Korea, Taiwan, India, Philippines, and Singapore--and learn to critically examine the ways in which cinema becomes an innovative and powerful archive of urban life as it engages with the events and experiences that shape the cultural, social, and political realities of the past, present, and future in Asia. The course is open to all sophomores including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required. Among other assignments like videographic criticism, students will also have an opportunity to make short city films using their phone-cameras and readily available editing software as an option for their final class projects.

FILM398 Analyzing Music Videos
Music videos are fascinating objects. One can think of them as marketing assets. However, they can also be very experimental. While movies tend to foreground the visual, music videos typically begin with a song. In this class, we will think

critically with and about music videos. We will discuss music video history, directors, styles, sound-image relations, and the star. Some of the artists and directors we will cover include Michael Jackson, Prince, Beyonce, Rihanna, Hype Williams, Michel Gondry, Dave Meyers, Hiro Murai, and Kahlil Joseph.

FILM430 Documentary Production
In this course, documentary history and theory meet production: "What does it take to make different style documentaries -- including observational, poetic, expository, participatory, and reflexive?" Students will explore documentary story elements and film grammar as they learn how to capture sound, record video, edit material, light subjects, conduct an interview, and work with archival materials, graphics, and music. They will learn through practice and by screening and analyzing a wide range of long-form documentaries made by a wide range of filmmakers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **FILM385**

FILM435 Directing the Documentary
Students embark on an intensive journey into the world of short-form documentary filmmaking through a hands-on course designed to help foster the emergence of their cinematic voices. The methods that many documentary filmmakers use to develop and craft their work serve as a model for the coursework. In a supportive environment, students engage in progressive learning to allow each to tackle many of the same key creative, practical, financial, and ethical decisions working researchers, directors, producers, writers, camera operators, sound recordists, and editors make during research and development, pre-production, production, and post. Students screen and analyze documentary shorts throughout the semester. During the first half of the semester, students complete exercises designed to help them to improve their technical skills while completing research and development and a written proposal for a six-to-eight-minute documentary. In the second half of the course, students direct, shoot, and edit their work. Ongoing feedback during the entire semester is provided. The course includes self-directed online training assignments and in-class workshops. Students enrolled in this course should anticipate heavy and unevenly distributed time demands.
Offering: **Host**
Grading: **A-F**

FILM448 Directing Actors for the Camera
Working with actors is an essential component of cinema and television. This workshop course leads students through exercises both as actors in front of the camera and directors behind the camera. Topics include: directing actors for the camera, casting actors, the analysis of screen performance, script analysis from the actor and the director's POV, on-camera acting technique, introduction to the craft of staging dramatic scenes for single-camera shooting, director/actor collaboration, and communicating with actors to create successful performances.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM448Z Directing Actors for the Camera
The actor is arguably the most important instrument in the director's arsenal for storytelling. This course aims to give students a set of tools to draw on when facing the actual task of telling a story through a lens with performers. Through discussions and exercises, we'll cover script analysis, casting, rehearsing, staging, framing, editing, and more. Emphasis will be on creating strategies for getting the desired performance. Students will be acting in scenes as well as directing them. The goal throughout is to demystify all elements and for each student to understand better what kind of director they want to be. The instructor has been a member of the Directors Guild of America since 1990 and a member of the Writers Guild of America since 1985. As director, writer, and producer, he has credits on over 500 episodes of television. Smartphones with cameras are strongly recommended and will be used for class exercises.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307**

FILM450 Sight and Sound Workshop
Film 450 explores the elements of cinematic form and style through filmmaking exercises. The focus of this course is to introduce concepts of narrative form and visual audio design in order to create coherent and emotionally engaging experiences for an audience. In other words: visual storytelling. Each exercise will challenge students to address both aesthetic and practical decisions in taking an idea from concept to the screen. Sections one and two provide technical training and practical experience in the 16mm film format, including lighting, cinematography, and editing. Section three (when offered) includes an introduction to digital non-linear editing and examines the differences between film and video. No assignments will have dialogue or synchronous sound recording. However, we will use this sound restriction to deepen our understanding of visual storytelling.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM451 Introduction to Digital Filmmaking
This course is designed for NON-FILM MAJORS to provide a basic understanding of how films are made, providing technical training and practical experience with digital video cameras, sound gear, and lighting equipment. Through a series of exercises, students will refine their critical and aesthetic sensibilities and develop a basic understanding of how to use composition, lighting, sound, and editing to tell a story. No required time demands out of class. The course format is Lecture with Technical Exercises
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **None**

FILM453 The Art and Craft of Film Adaptation
Film adaptations of literary texts have been a staple of cinematic production from the silent era to the present day, and remain both an enduringly popular phenomenon and an occasional source of derision or disbelief: Can the movie ever be as good as the book? In this course we will interrogate the long-held assumption that source materials for adaptations are the authoritative texts while secondary works are necessarily inferior. Adopting a lateral approach that allows us to examine how stories change and are changed by new iterations and new mediums, we will examine the varied modes, motives, and techniques of film adaptations, analyzing how filmmakers transform character, plot, setting, and point of view as they adapt varied source material into feature films. Students will be asked to annotate and analyze literary sources, film scholarship, screenplays, and films, and should expect to spend several hours reading and writing outside of class time per week. In addition to film analysis assignments and in-class writing exercises, students will create an original adapted screenplay treatment and pitch deck.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM454 Screenwriting
This course focuses on writing for the screen, with emphasis on how the camera tells stories. We will be focused exclusively on the screenplay.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307**

FILM455 Writing for Television
This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsize, and pitch a story idea with their "producing partners" to "network executives." Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.

FILM458 Screenwriting: The Short Film
This is a writing course and study of the short film that will start from ground zero: separating the screenplay from other forms (e.g., the play and the novel), and grounding students in visual language as the basis of the medium. How do we write in pictures? We will study four feature screenplays, but place particular

emphasis on how to scale a project for the short form. We screen 12 short films in class, and perform case studies of previous student films from first draft to finished film. This course is designed for students intending to make a film or write a screenplay for their thesis. The course prioritizes majors, but will consider sophomores who have completed Film 304 and 307 and intend to major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM 307**

FILM458Z Screenwriting: The Short Film
Since watching movies (good ones) is so easy and pleasurable, screenwriting is a medium that everyone's uncle thinks they can do. But anyone who has had to read an amateur screenplay knows different. This is a writing course that will start from ground zero: separating the screenplay from other forms, e.g., the play and the novel, and grounding students in visual language as the basis of the medium. How do we write in pictures?
Offering: **Host**

Prereq: **FILM304 AND FILM307**

FILM459 Writing for Television II
This advanced course requires that each student act as writer, producer/network executive, and lead discussant on one of the professional scripts we read. Students will be responsible for two meetings with the professor during the semester, two to three meetings with their producing partners, and one meeting with their actors (who will perform a short scene from the student's script at the end of the semester). Each student will conceive of and pitch three story ideas in the first classes, winnowing down to one idea for which they will write a story area, an outline, and a final script (which will go through three major revisions). Students are expected to come to class with a background in creative writing, focusing on character and dialogue as well as having completed one TV screenplay.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-ENGL**
Prereq: **None**

FILM460 TV Writer's Room
This course will introduce television series structure, including both the half-hour and one-hour formats. We will start by analyzing familiar shows and then each student will write original scenes for discussion in class. We will then develop an original series idea in class as a group and function as a "writers room" would on a series. Each student will be required to write equal parts of the outline/beat sheet, develop characters, and write/revise scenes, with the goal of executing a full pilot script in collaboration with one another under the guidance of the instructor. Grading will be based on weekly assignments, as well as regular attendance, class punctuality and attention to deadlines.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM461 Directing with Nicholas Ray and Robert Bresson
This is a hybrid studies/production course taught by a filmmaker that looks at two iconic filmmakers to learn what directing is beyond talking to the actors. What is it we are directing when we pick up a camera or making a cut? Nicholas Ray and Robert Bresson are two artists who had opposite cinematic approaches to express their deep spiritual struggles. We are going to compare these two seekers as a way to deepen our understanding of film style. Assignments will be screenplays, storyboards, and other pre-production material for your own films. The last section will look at five modern filmmakers influenced by Ray and Bresson to focus on incorporating their influence into your own work.
Offering: **Host**
Grading: **A-F**

FRENCH LANGUAGE AND LITERATURE (FREN)

FREN101 Elementary French I
This course is designed for first-time French learners who wish to acquire and develop listening, speaking, reading, and writing skills by learning basic vocabulary, useful expressions, and fundamental grammatical structures. Students will also gain cultural insights into the French-speaking world, from Senegal to New Caledonia, from Quebec to Louisiana, from Belgium to Guadeloupe, and beyond. In class, students will participate in activities that promote communicative proficiency and cultural competence through vocabulary and grammar exercises, games, skits, conversation, authentic readings, and the use of various audio-visual materials. Classes are conducted in French. FREN 101 is the first semester of the elementary French language sequence.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN102 Elementary French II
This second-semester elementary French course is designed for students who have taken FREN101 or have had one or two years of French in high school and placed into FREN102 through the language placement test. The main goal of this course is to enable students to achieve intermediate communicative proficiency in French by developing their listening, speaking, reading, and writing skills. Students will thus increase their vocabulary, learn more advanced grammatical structures, and gain further cultural insights into the French-speaking world. In class, students will participate in activities that promote communication and cultural competence through vocabulary and grammar exercises, games, skits, conversation, authentic readings, and the use of various audio-visual materials. Classes are conducted entirely in French.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN110 Accelerated Intermediate French I & II
This course combines two semesters of intermediate French into one to allow for a faster track in French. The course develops students' abilities in the four basic skills of listening, speaking, reading, and writing through oral and written practice. It focuses on grammatical structures and vocabulary at the intermediate level and introduces students to contemporary French-language cultures from around the world through discussion of cultural and literary texts and use of audiovisual material.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN111 Intermediate French I
Students will develop their abilities in the four basic skills of listening, speaking, reading, and writing through oral and written practice. The course focuses on grammatical structures and vocabulary at the intermediate level and introduces students to contemporary French-language cultures from around the world through discussion of cultural and literary texts and use of audiovisual material.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN112 Intermediate French II
This is a course for students who have taken FREN 111 or arrive at Wesleyan with a good command of French. It builds on students' previous knowledge to expand and refine their ability to express themselves, both orally and in writing, through exposure to a variety of challenging cultural and literary materials in various media. The course includes a review of basic grammar but emphasizes more complex linguistic structures.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN215 Advanced Intermediate French
This course prepares students for upper-level French courses and for study abroad. It offers students the opportunity to review and strengthen their speaking, writing, and reading abilities in French. Class time is devoted to grammar review and to discussions of short reading assignments (literary and non-literary) from the French-speaking world (France, Africa, and the Caribbean). The semester ends with students reading an entire novel in French. Daily class discussions, oral presentations, weekly discussions with French teaching assistants, outside-of-class grammar review, and compositions are to be expected.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN216 Introduction to French Literature and Culture: From Notre Dame to The Terror
This class will introduce students to the ideas, culture, art, and literature of pre-Revolutionary France. We will read a "romance" by Chrétien de Troyes, bawdy tales by Rabelais, poems by Louise Labé and Ronsard, Montaigne's mediation on cannibals, a play by Molière, and a short "science fiction" tale by Voltaire. This class is designed to help students improve their writing and speaking skills and prepare for a term abroad in a francophone country.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN217 Exoticism: Imaginary Geographies in the 19th-century French Short Story
In this seminar we will consider the fascination with the exotic--with foreign landscapes, customs, and culture--in 19th-century French fiction, particularly in the genre of the short story. Discussions will focus on the representation of foreignness, the construction of the exotic woman, and the status of the European gaze. Major authors may include Bernardin de Saint-Pierre, Chateaubriand, Balzac, Merimee, Loti, Flaubert, Hugo, Baudelaire, and Théophile Gautier. Although a 20th-century text, we will also read Duras's L'Amant.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN219 "Enfances": Literature and Childhood
At the heart of our discussions in this class will be the question of how adults construct the child's point of view. How can we define childhood? How can we evoke it through narrative? How ought we make art for children? We'll explore a variety of literary and cinematic sources from the French speaking world including Marjane Satrapi's Persepolis, the Comtesse de Ségur's Les Malheurs de Sophie, François Truffaut's L'Argent de Poche, and assorted French-language picture books. Along the way we will work on developing analytic and creative writing skills in French. (This course is conducted in French.)
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN220 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes
Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

FREN221 French Mythologies
Starting from "Mythologies" by Roland Barthes (1957) and "Nouvelles Mythologies" edited by Jerome Garcin (2007), this course examines how contemporary social values are turned into modern myths and some of the domains that seem to define France in the 21st century. How do the representations of food, fashion, le chic, la laïcité, strikes, colonialism and post-colonialism, etc., in contemporary novels and films still define France today?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN222 Love and Loss in Medieval and Early Modern French Literature and Culture
The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.
Offering: **Host**

Prereq: **None**

FREN223 French Way(s)
What are "French" ways? What is important to the French, and how do they view themselves? What do they think about issues facing their country, Europe, and the world at large? What relationship does France have with the francophone world? What does it even mean to be "French?" Students in this course will explore these questions by examining a variety of materials including the press, comic strips, films, music, vlogs, television and radio broadcasts, and other selected readings. This course is designed for highly motivated students with a firm foundation in French who wish to refine their skills in listening, speaking, reading, and writing while gaining more insight into French life and culture.

FREN224 Cultural Mo(uve)ments from the 19th to 21st Centuries
The purpose of this course is to familiarize students with movements such as romanticism, realism, surrealism, and the Nouveau Roman, to name a few. Some of these movements stem directly from the political context, while others seem to have grown almost organically. Though the course will primarily rely on literary texts, it will also examine the "passerelles" between literature, music, and painting.

Prereq: **None**

FREN225 20th-Century Franco-Caribbean Literature and the Search for Identity
This course investigates how 20th-century Francophone literature from the Caribbean defines Caribbean identity. Through a study of literary texts, films, and paintings from Guadeloupe, Martinique, Haiti, Guyana, and Louisiana, we will explore the evolution of Caribbean self-definition, focusing on the major concepts of Negritude, Antillanite, Creolite, and Louisianitude. This course is taught entirely in French. Readings, written assignments, and class discussions

will be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. This course will count as one course toward the French studies major and minor, the Romance Studies major, and the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

FREN226 From the Diary to the Graphic Novel, Women Writers from the 17th to the 21st Centuries
While women in France were for a long time not welcomed in the literary sphere, they have nonetheless participated in the various movements that have affected literature from the 17th century on. The purpose of this course is to discuss women's space within the literary field. Through the study of various texts, this course will examine women's compliance and defiance towards literary trends. Far from only writing diaries and fairy tales, French women writers have considerably expanded their presence in genres that seemed resolutely closed to them.

FREN227 Revolutions: American, French, Haitian
This 200-level course (which is open to students who have taken FREN215) examines the American, French, and Haitian Revolutions through a comparative historical and literary lens, with particular attention to political language, revolutionary texts, and transatlantic exchange. We will read short excerpts from primary documents -- pamphlets, declarations, speeches, letters, and constitutional texts -- alongside selected secondary sources in order to analyze how revolutionary figures articulated concepts of liberty, rights, sovereignty, and citizenship across the Atlantic world. One of the primary goals will be to consider how revolution was experienced and represented differently in colonial North America, metropolitan France, and Saint-Domingue (Haiti), and how race, slavery, and empire shaped each revolutionary trajectory. There will be three short papers, class presentations, and a final term paper.

This course is taught entirely in French. Readings, written assignments, and class discussions will be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country.

Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. FREN228 Fight like the French: Debates, Quarrels and Polemics in French Culture
In the age of "fake news" and polarization, knowing how to debate is essential. The French are notoriously practiced in debate; the importance of public opinion and the figure of the public intellectual have made French society as a whole particularly prone to the agonistic discussion of ideas. This course will survey foundational aesthetic and political debates in French culture from the 15th century to this day, focusing on those that were led by writers, philosophers, and intellectuals and that have entered French literary and cultural history. The course will show how controversies mark and make paradigmatic changes in the cultural landscape, advancing the arts and sciences and voicing political dissent. Throughout the course we will read literary works, treatises, letters, and newspapers.

FREN229 What Can the Middle Ages Teach Us About Nature?
Today nature is at the center of our preoccupations. This course will go back to a time before human beings thought they were the masters of nature, when nature was at the same time teaching and allegory, metaphor and science. We will explore the different functions of nature in bestiaries, poems, romances, and herbaria from the Middle Ages to the beginning of the Early-Modern period (in modern French translation). We will be able to see a real herbarium in the Special Collections & Archives. Students will also visit the Davison Center for the Arts and the Joe Webb Peoples Museum to explore visual representations of nature as well as scientific displays. During the semester, students will put together a herbarium that will be displayed in an exhibition at the end of the semester.

FREN230 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture
The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

FREN231 By Sword, By Cross, and By Pen: An Introduction to Early Modern French Literature and Culture
This course introduces French literature and culture from the 15th to the 17th centuries, when the French territory expanded to its present borders with the rise of the French monarchy. Historical developments include religious upheaval and civil war, overseas exploration and conquest, and the greater dissemination of written works with the invention of the printing press. In this evolving context we will read a variety of literary works of prose and poetry. We will follow the emergence of genres such as the essay and the novel, and observe how different literary forms served to express ideas ranging from personal experiences to sociopolitical aspects of contemporary society. Several film representations of this period will also help us consider how we envision the past.

FREN232 French Society in Music From the Roaring Twenties to Today
Music has kept the beat of French history through its ordinary and extraordinary chapters. How has music supported France's cultural power and interacted with its external influences? How do songs guard dominant narratives or rally people under revolutionary banners of protest? Over the course of the semester, we will explore music (and its multimodal nature) as a site of cultural expression and a means of understanding social and political movements of modern French society over the last 100 years.

In the first part of this course, we will situate the music of artists such as Josephine Baker, Edith Piaf, Boris Vian, and Serge Gainsbourg in relation to major 20th-century events, from post-World War I Annés folles to May '68. We will consider how songs engage political events and discover the ways in which music shapes and is being shaped by its society. The second part of the course focuses on contemporary music of French expression (Indochine, Orelsan, Yseult, Angèle, Stromae) as related to questions of gender and sexuality, the legacy of decolonization, immigration, technology, and consumerism. Listening to the voices of France and its "others," we will examine expressions of belonging and alienation within a society that constantly reinvents itself while endeavoring to preserve its "inherent" characteristics. Close readings of lyrics paired with historical contextualization will be supplemented with theoretical and literary texts, excerpts from films and documentaries, posters, and photography.

FREN233 French and Francophone Gastronomy (CLAC .50)
This course explores the variety of French and Francophone gastronomy through texts, recipes, and other media such as films and cooking shows. Through these materials, students will reflect on the relationship between food and culture and the shape it takes in French and Francophone cultures. They will develop a deeper knowledge and appreciation for various foods and dishes. The course will include a hands-on component through which students will cook and taste foods from various areas in the Francophone world. The course will culminate in a final public event during which students will introduce and share foods from the Francophone world, which attendees will have the opportunity to taste. In addition to weekly meetings, there will be a few cooking workshops. Grade will be based on class participation, weekly reflection journals, a final presentation, and a final paper. This course is taught entirely in French. Readings, written assignments, and class discussions will be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. FREN234 Francophone Belgian Culture
The Kingdom of Belgium gained its independence from the United Kingdom of the Netherlands after the Belgian revolution of 1830 and has since then developed as one of the central powers of the European Union, of which it was a founding member and whose principal institutions are located in the Belgian capitol, Brussels. The kingdom contains four linguistic regions: Dutch-speaking Flanders, French-speaking Wallonia, German-speaking Eupen-Malmedy, and bilingual (French-Dutch) Brussels. This course will study the development of Francophone Belgian culture since the mid-20th century. We will focus on authors like Georges Simenon, Marguerite Yourcenar, Jean Bofane, Joseph Ndwaniye, Amélie Nothomb, Nicolas Ancion, and Bernard Quiriny; musicians like Toots Thielemans, Jacques Brel, Cecile Kayirebwa, Princesse Mansia M'Bila, Dieudonné Kabongo, Zap Mama, Hooverphonic, Stromae, Damso, Romeo Elvis, and Angèle; and cineastes like Chantal Akerman, Jaco Van Dormael, Jean-Pierre and Luc Dardenne, Lucas Belvaux and Bouli Lanners. The course will also include a unit on the well-known bandes dessinées (comic books) created by Belgian authors and artists, like Herge (Tintin), Morris et Goscinny (Lucky Luke), Jean Van Hamme (Thorgal, XIII, Largo Winch), Hermann (Jeremiah), and Spenale (Wonder Pony).

FREN236 Going South: "Le Sud" and Its Representations in French Literature and Culture
The course explores representations of "le Sud" across media, from myths and legends to songs, literature, film, and television. We will learn the origins of Provençal identity and how its portrayal has evolved over time. We will gain a greater knowledge of the many artists and thinkers who have been drawn to the South. Eventually, we will work out a new definition of "le Sud," from Provence to one that includes other Souths such as the global South represented by immigrants from former French colonies.

Although a geographical denomination, a cardinal point, "le Sud" is a contradictory and moving space. The French anthem was first sung on one of Marseille's streets (rue Thubaneau), and the city remains a cosmopolitan port, open to migrations. The 2005 riots did not affect Marseille, yet the first elected mayors from the far-right Front National were in Orange, Toulon, and Vitrolles. The South remains a place of light and sun that attracted numerous painters and a place of dark and shady business run by local and international mafias. How

have these contradictions shaped "le Sud" as territory, community, and idea, and how do they function within definitions of French identity?

Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

FREN237 Francophone North America: French-Canadian, Cajun, Creole, and Haitian Cultures in North America
This course introduces students to key cultural and political mo(ve)ments that made the Francophone (French-speaking) communities in Canada, Maine, and Louisiana. From the tragic Grand Dérangement of Acadians (1755-1763), and the Creole Saint-Domingue refugees in Louisiana (1792-1809), to the more recent arrival of French-speakers from Haiti, Africa, and Asia, Francophone cultures in North America continue to evolve as their diversity grows with each new migration. Special attention will be paid to Canadian and U.S. linguistic policies, migration policies, and the role of art (literature, cinema, etc.) and activism in shaping Francophone identities in an Anglophone context.

Writers studied may include Réjean Ducharme (Québec), Dany Laferrière (Québec-Haïti), Kim Thùy (Québec-Vietnam), Victor Séjour (Louisiana), Zachary Richard (Louisiana), as well as a few writers in English such as Kate Chopin (Louisiana), Edwidge Danticat (US-Haïti), Louise Penny (Québec), and singer-songwriter Josée Vachon (Québec-Maine) who straddle the Francophone-Anglophone divide.

The course will be conducted entirely in French except for a few readings in English.

FREN238 Representing the Self, Representing Yourself
In our digital age, with the pervasiveness of Facebook, Instagram, and other forms of social media, what can testimony do? What stories are told? How are they told? What do they mean? How do writers, artists, musicians, intellectuals, and politicians represent themselves? As students, how can you give your memories material substance? How do others' narratives influence the way you interpret your own being? In this course, we will begin to answer these questions by reading, watching, and examining a vast selection of French and Francophone texts, films, and images that recount the self from the Middle Ages to today. There will be a particular focus on queer people, women, and people of color, and how they negotiate difference and alterity in their work. Throughout the course, you will also journal your own experiences and imitate other writers' modes of expression (e.g., memoires, autobiographies, autofiction, the graphic novel, film, documentary, theater, poetry, music, photography). The course will culminate in the creation of your own story, which will in turn prepare you to think critically about the world around you and how to tell your story in interesting, creative, and provocative ways. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

FREN240 Cinema and the French Theatrical Tradition
This course examines the connections between French theater and film by looking at manifestations of the theatrical tradition in 20th- and 21st-century cinema. We will read four plays and view a selection of films, along with commentary by directors, playwrights, and actors on their craft. Coursework will focus on the development of literary and visual analysis, the acquisition of terminology related to theater and film, and the appreciation of these two art forms in their past and current contexts.

FREN241 Seeing Is Believing?: The Search for Cinematic Truth
The French director Jean-Luc Godard once remarked that, "Cinema is the truth 24 times per second." Godard refers here to an interplay between truth, time, and the mechanics of film. But does cinema really show us the truth? What kind of reality is it able to capture and how does "truth" relate to its means of representation? This course examines how Francophone film treats the relationship of cinema to truth, covering aspects of film history, theory, and its technical construction. The course is organized around four main areas of inquiry: we first consider the role fantasy and spectacle in the early films from Georges Méliès and the Lumière Brothers, before exploring how cinema re-orients its relationship to the "real" via social realism and the experimental documentary style of the French New Wave. We then discover how cinematic "truth" is reclaimed by filmmakers outside of France, before finally turning to the highly-aestheticized, non-narrative films of "Cinéma du look."

This course will familiarize students with the basics of film analysis and critique, while also providing a foundation in the technical aspects of cinema and how it has evolved as both an art and a science. Each film will be accompanied by readings, and the theoretical framework of the course will derive from André Bazin's Qu'est-ce que le cinéma? and excerpts from Gilles Deleuze's Cinéma II: L'Image-temps. For their final project, students may submit either a traditional research paper or an original film project that engages with cinematic theories and techniques discussed over the course of the semester.

FREN242 Francophone Graphic Novels: Text, Image and the Spaces In-Between
This course introduces students to Francophone graphic novels (bandes dessinées) from regions such as Côte d'Ivoire, Rwanda, Belgium, Quebec, the French Caribbean, and France, showcasing their cultural and artistic diversity. After an introduction to key concepts in comics studies, students will engage

with acclaimed works like Persepolis (Satrapi, 2000), Aya de Yopougon 1 (Abouet & Oubrerie, 2005), and Péyi an nou (Oublié, 2017). These texts serve as a lens to examine pressing debates on identity, migration, memory, race, gender, and religion. Coursework includes critical readings, visual and textual analysis, and creative writing/drawing. By discussing the content of these graphic novels, students will become familiar with a broad range of human experiences as well as major global events. By also focusing on their multimodal form, they will develop a toolbox for analyzing this unique textual/visual medium on its own terms and in relation to other media, especially visual art, cinema, and literature. The class is taught in French.

FREN246 Writing Diaspora: Introduction to Asian Francophone Literature and Art
The transnational and open category of Asian Francophonie can inspire students who are language learners of French to contemplate their relationship with the language. Designed for those who are new to Diaspora Studies and Asian Francophone literature, this course introduces a wide range of personal trajectories, challenging the binary division between a mother tongue and a foreign language. Through close-readings of novels, essays, haiku, and experimental literature, students will analyze the correlation between transgressing generic expectations and the desire to overcome the challenge of narrating diasporic experiences. The syllabus includes writers based in France such as Dai Sijie, François Cheng, Shan Sa, and Linda Lê, as well as those in Canada including Ying Chen, Ook Chung, Kim Thúy, and Aki Shimazaki. It concludes with Theresa Hak Kyung Cha, an Asian American multilingual writer and artist. Materials also include their feature-length films, video art, calligraphy, and installation art to explore these artists' multi-media creativity in challenging conventional historical narratives.

This course is taught entirely in French. Written assignments, class discussions, and most readings will also be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country.

Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class.

This course will count as one course toward the French studies major and minor, the Romance Studies major, the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

FREN247 What (Not) to Wear: Fashion in French Literature and Art
In this course we will consider the political, social, historical, and artistic importance of French fashion through a series of case studies. We will explore a number of sources such as ancien régime costume design, realist novels, memoirs, impressionist paintings, 20th-century advertising, and archival fashion magazines. Attention will be paid not only to what was being worn, but also to those who helped make fashion materially possible, for instance textile workers both in France and in colonized areas. This course is taught in French.

FREN248 Colonial/Decolonial
Colonial/Decolonial is taught in French and open to anyone who has completed FREN 215. It offers an exploration of the often-contentious debates surrounding colonization and its aftermath in shaping French and Francophone cultures and societies. The course examines the historical processes, theoretical frameworks, and artistic expressions that define colonial and postcolonial dynamics. In the first half, we trace the intellectual and cultural justifications and critiques of colonial expansion through readings from Bougainville, Diderot, and Prévost, alongside representations of the "other" in the Encyclopédie and the Description de l'Égypte. The second half explores postcolonial and decolonial thought as both historical phases and interconnected schools of theory. Topics include the specifics of decolonization from France, portrayals of the French colonizer, and connections between the Francophone world and other formerly colonized regions. Guiding these discussions are works by Aimé Césaire, Frantz Fanon, Edward Said, Maryse Condé, Assia Djebar, Albert Memmi, and Henri Laurens. The course also includes screenings of Pépé le Moko (1939, dir. Julien Duvivier), The Battle of Algiers (1966, dir. Gillo Pontecorvo), Adieu Bonaparte (Egypt, 1985, dir. Youssef Chahine), and Atlantique (2019, dir. Mati Diop). Additional insights are drawn from several podcasts and interviews on Radio France, linking colonial, postcolonial, and decolonial discourses to contemporary theoretical, political, and artistic debates.

FREN249 The Art of the Essay: A Creative Non-Fiction Class
This is both a creative writing and literature seminar, a hybrid experience where students will read some of the most momentous and important examples of the essay genre while simultaneously producing their own interpretative compositions. We will begin by reading a few essays by Montaigne (the writer who effectively defined the genre) before moving on to other authors from the French and Francophone world (e.g., Baudelaire, Voltaire, Césaire, and Beauvoir) who gravitated to this open and highly personal way of writing. We will also speak to several essayists during the semester.

FREN253F French Literary Masterpieces on Screen (CLAC 0.5)
This CLAC course is linked to the FYS RL&L 252F: French Literary Masterpieces in Translation and on Screen. In this CLAC course, conducted entirely in French, students will have the opportunity to read the texts in their original language, and to hone their French speaking, listening, and writing skills. Assignments will include written commentaries (i.e., close readings) and short presentations on the material. As for the films, students in the CLAC course will be expected to watch and discuss French-language adaptations. This CLAC course is intended for students who have at minimum an advanced intermediate level of French. Learners of French as well as native and heritage speakers of French are welcome. Credit: 0.5. Regardless of students' previous exposure to the French language, including AP and IB courses, students interested in the CLAC course

must take Wesleyan's French placement test and score into at least FREN 215 (Advanced Intermediate French). Should they place into FREN 215, they must enroll in this class in order to be eligible for the CLAC course. Students who place into FREN 112 or below will not generally be eligible due to the degree of difficulty, though students may submit a petition. Moreover, all students must meet with the instructor before enrolling in the CLAC course for an oral comprehension and expression evaluation. This CLAC course, in combination with the FYS in English, will count toward the French Studies Major or Minor, as well as the Romance Studies Major.

FREN254 Paris to Saigon: French Representations of Asia
The course explores the ways in which French explorers, writers, and artists traveled to Asian countries, such as Japan, China, and Vietnam, in the 19th, 20th, and 21st centuries and represented "Extrême-Orient," a Eurocentric designation. Attentive analysis of their works will allow us to question the colonial construction of the Far East as "other"; examine Asian influences on cultural, aesthetic, and literary expressions; and discuss Asian presence in postcolonial France. Issues such as orientalization, eroticization, and hybridization of genres and identities will be the subjects of our study.

FREN270 Monstrous Margins & Otherness
This course proposes to study monsters as a critical lens for examining sociocultural tensions, hopes, and anxieties in French literature and culture from the Renaissance to the present day. Dwelling across borders and boundaries, the monster is a paradoxical figure: it is unsettlingly close to us yet also marked by radical otherness. Throughout the semester, we will explore this dual dynamic: on the one hand, it is a figure that threatens social, moral, and cultural norms, and on the other, the monster exposes the failures and blind spots of the very structures that try to contain it. From fairy-tale villains and vampires to the postmodern zombie, we will examine what the monsters tell us about being human and about our perceptions of reality. Class readings include a variety of genres (fairy tales, short stories, poetry) and media forms (literature, visual arts, film). Class work will combine close readings of literary and visual texts with theoretical frameworks, as well as creative writing.

Readings, written assignments, and class discussions will be conducted in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may enroll in this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country. Students who are not admitted to the course during pre-registration are strongly encouraged to submit an enrollment request and attend the first class meeting. This course counts toward the French Studies major and minor, the Romance Studies major, and the COL major. FREN273 The Business of Letters: The French Epistolary Novel
Before the 18th century, the first-person narrative was often perceived as self-indulgent, not to mention distasteful. Eighteenth-century readers, however, became fascinated with the intimacy, immediacy, realism, and confessional aspect of highly charged first-person perspectives. It comes as no surprise, then, that this was the golden age of the Roman Epistolaire, the novel composed entirely of letters. In this class we will read a number of epistolary novels that allowed for the development of highly subjective, and often challenging, points of view. Sample works include Madame de Graffigny's critique of European society (Lettres D'une Peruvienne), Mme de Charriere's praise of female independence (Lettres de Mistriss Henley), Montesquieu's political satire of French life through the eyes of Persian travelers (Lettres Persanes), and Laclos's tale of seduction and aristocratic libertinage (Les Liaisons Dangereuses). We will also read one example of the epistolary novel's stylistic counterpart, the Roman-Memoire.

FREN275 Histories of Race: Science and Slavery in an Age of Enlightenment
The concept of race was first "invented" during the 18th century by anatomists, natural historians, and, ultimately, the century's classifiers. This class will come to grips with the birth of this concept in two ways. First, we will read excerpts from travelogues to Africa and the Caribbean (as well as short excerpts from natural history) in order to chart the slow and halting creation of the concept of race as it crystallized in European thought during the 18th century. Having studied this "proto-raciology," the class will then examine 16 unpublished manuscripts that were submitted to a contest on the source of "blackness" organized by the Bordeaux Royal Academy of Sciences in 1739. These include essays submitted by priests, anatomists, and partisans of climate theory. Students in this class will actively engage with these materials by producing glossary definitions that will be published along with the entire collection of essays. The ultimate goal of this course is to provide students with an understanding of the concept of race that will inform their reactions to this question as both a historical concept . . . and an ongoing problem that affects all of us in the present.

FREN281 French and Francophone Theater in Performance
This course introduces students to the richness of the French and Francophone dramatic repertories, on the one hand, and, on the other, invites them to discover acting techniques (such as movement, physicalization, memorization, mise en scène, and so forth). Students will thus put their language skills into motion, and the course will culminate in a public performance at the end of the semester. (Special accommodations will be made for students who do not wish to perform publicly). Taught exclusively in French, the course will place particular emphasis on the improvement of students' oral skills through pronunciation and diction exercises, all the while polishing their written expression and enhancing their aural comprehension.

FREN301 The Race Makers: How the Enlightenment Invented the Most Dangerous Idea in History
The concept of race was first "invented" during the 18th century by anatomists, natural historians, and, ultimately, the century's classifiers. While this seminar is constructed as something of an intellectual history seminar, it will also delve into the lives and (often messy) psychologies of several of the people who helped develop the idea of race during the eighteenth century. We will become familiar with a French king and the signatory of the Code Noir (Louis XIV), the Swedish inventor of the term Homo sapiens (Linnaeus), the theorist of human degeneration from a white prototype (Buffon), the most famous philosopher of the eighteenth century (Voltaire), the theorist of human stage theory (Robertson), a skull-measuring naturalist (Blumenbach), and an American president, in Thomas Jefferson. The class will also examine 16 manuscripts that were submitted to a contest on the source of "blackness" organized by the Bordeaux Royal Academy of Sciences in 1739. The goal of this course is to provide students with an understanding of the origins of race that will inform their reactions to this question as both a historical concept, and an ongoing problem that affects all of us in the present.

FREN302 West African Literatures and Cultures in French
This course explores major texts in modern and contemporary Francophone African literature by delving into four major themes that traverse the recent cultural, literary, and political history of Francophone West Africa.

The course starts by investigating the relationships between orality and literature through the lens of often-intersecting debates around tradition and modernity; the focus will then shift to articulations of nation, liberation, and the promises of independence, war, and memory, and finally the ruptures and continuities of the post-colonial, neoliberal present.

By spending significant time with primary sources that span over a century of literary and cultural production from and about Francophone Africa, students will have a deep understanding of the urgencies animating writers wrestling with the weight of the colonial past, the violence of decolonization, the brightness of independence, and the uncertainty of the present. A thorough engagement with some of the most important authors of the last 60 years (e.g. C. H. Kane, B. Diop, Y. Ouloguem, M. Condé, among others) will allow us to deep-dive into the possibilities of literary expression, as well as questions of belonging, nation, and evolving ideas of "Africa."

FREN304 The Art of the Essay: Creative Nonfiction in French
The Art of the Essay is both a creative nonfiction writing class and a literature seminar, a hybrid experience where students will read some of the most momentous and important examples of the essay genre while simultaneously producing their own interpretative compositions. Writing experiences may include opinion pieces, historical fiction, writing on art or music, and biographical sketches. To improve our own writing, we will read essays by Montaigne (the writer who effectively defined the genre) before moving onto later authors from the French and Francophone world (e.g., Voltaire, Baudelaire, Césaire, Beauvoir) who gravitated to this open and highly personal way of writing to further their own artistic or ideological positions. As a supplement to the class we will also be inviting journalists and essay writers from both France and the United States to speak to us. This course is taught entirely in French. Readings, written assignments, and class discussions will also be in French. While any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course, it is an advanced course intended for students who have already taken two courses in French beyond FREN 215 or already have studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. This course will count as one course toward the French studies major and minor, the Romance Studies major, and the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

FREN305 Negotiating French Identity: Migration and Identity in Contemporary France
With the largest minority in France being of Maghrebi origin, Islam has become the second largest religion in France today. What are the repercussions of this phenomenon for French identity? How did French society understand its identity and regard foreigners in the past? What do members of the growing Franco-Maghrebi community add to the ongoing dialogue surrounding France's republican and secular identity? This course will analyze the recent attempts at redefining French identity through a study of literary texts, films, and media coverage of important societal debates (e.g., the Scarf Affair, French immigration laws, the Algerian war). Readings, discussions, and papers will be in French.

FREN306 Spectacles of Violence in Early Modern French Tragedy
The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on

why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

FREN307 Exoticism: Imaginary Geographies in the 19th-century French Short Story
This course will consider the fascination with the exotic--with foreign landscapes, customs, and culture--in 19th-century French fiction, particularly in the genre of the short story. Discussions will focus on the representation of foreignness, the construction of the exotic woman, and the status of the European gaze. Major authors may include Bernardin de Saint-Pierre, Chateaubriand, Balzac, Merimee, Loti, Flaubert, Hugo, Baudelaire, Myriam Harry, and Théophile Gautier.

FREN308 Southern France Today: Villages, Territories, and Metropolises
This course offers an interdisciplinary exploration of Southern France, with a focus on Marseille, through historical, literary, sociological, and comparative approaches. It is designed to encourage students to question prevalent stereotypes and controversial contemporary issues related to the region.

Throughout the course, students will examine various topics such as migration, ethnic and social segregation, economic growth, safety, the environment, housing, transportation, urban planning, metropolization, education, and culture. By using Marseille as a case study, students will reflect on the notion of scale in the context of French and European governance.

Students will engage with a range of materials, including novels, short stories, graphic novels, journalistic investigations, films, archival footage, and testimonials from residents, association representatives, experts, and researchers. Additionally, the course will include a comparative analysis with Paris, other French cities, and Mediterranean regions.

By the end of the course, students will gain a deeper understanding of the region's place in French politics, society, and culture, while also developing critical thinking, research, and analytical skills.

FREN309 Writing Childhood in Contemporary French Literature
In the 20th century, children's literature and writings about childhood expanded alongside commercial book publishing, greater literacy, and theories on childhood. This course will follow the development of formal and creative expressions of childhood by turning first toward children's literature, including picture and comic books and classic works such as "Le Petit Prince." Literary depictions of childhood, as memory, testimony, and social commentary, will compose the second half of the course. Visual imagery (book illustrations, films) will be studied as well to consider the connections between childhood and its representations--for example, how children's literature reflects modernity and how childhood is a means to make sense of adulthood.

FREN310 French Crowds, Mobs, and Mobilities
Under the date of 14th July 1789, Louis XVI entered in his diary but one word: "Rien." That day, a crowd of sans-culottes flooded the streets of Paris, overwhelmed the guards, and captured the Bastille. What the king could not foresee is the political power of a mob, a "foule," deriving its etymology and strength from the pressure of thousands of feet pounding the pavement. From this founding event on, the building of the French nation could be read as a history of mobile crowds kept alive today in yearly student and union demonstrations. How does "rien" become the emblematic event of French national identity? What moves a crowd, and what does a crowd move? What do such gatherings accomplish, and how do they form in France and why? Can governments bring crowds to a stop? What does immobility mean for the French?

Drawing on French sociology and literature, this course will explore the influence that crowds have exerted on French politics, society, and aesthetics. We will discuss the power of numbers by focusing on major events in French history from the 18th century to contemporary France: the French Revolution, the Paris Commune, May 1968, the 1983 March for Equality and Against Racism, the Yellow Vests, and the COVID-19 lockdowns. Students will be encouraged to relate the course to their own experience of mobile crowds, in concerts or sports events, on more quotidian moves such as commuting, and to draw comparisons across time and space.

FREN312 Clandestins, Sans-Papiers, Migrant/e/s: 100 Years of Illegalization in the Francophone Mediterranean
Who is illegal, and why? When did "migrating illegally" across the Mediterranean start, and how? How did we come to think about certain ways of moving across borders as a criminal act? Using sources and literature on and about empire, borders, citizenship, seafaring, smuggling, and human rights, the course will attempt to answer these questions in the specific context of the Francophone Mediterranean, intended here as a space of migration much broader than the sea itself. We will read about Algerian workers hidden in the hulls of steamships at the turn of the century, watch Tunisian border policemen helplessly patrol an endless stretch of desert in a sandstorm, and read from "illegal" Africans seeking refuge inside the church of St. Bernard, in Northern Paris, in the hot summer of 1986, before police broke in. Through this heterogenous set of encounters, students will be able to explore, engage critically, and respond to some of the discursive, legal, and logistical devices that made and still make people on the move "illegal" in contemporary France and in the long wake of its colonial empire.

FREN314 From the Diary to the Graphic novel, Women Writers from the 17th to the 21st Centuries
While women in France were for a long time not welcomed in the literary sphere, they have nonetheless participated in the various movements that have affected literature from the 17th century on. The purpose of this course is to discuss women's space within the literary field. Through the study of various texts, this course will examine women's compliance and defiance towards literary trends. Far from only writing diaries and fairy tales, French women writers have considerably expanded their presence in genres that seemed resolutely closed to them.

FREN315 The Politics of the French Language and the Birth of the French State
Today, the advantages of national borders and monolinguistic language policies are being trumpeted all across the world. And yet, the study of premodern languages and literatures reveals that the history of national languages has always been a multicultural affair. In this course, we will look at the case of the French language, particularly the establishment of French as a literary language through strategies of legitimization. Starting with an examination of the first text written in the language that would later become French, from the 9th century, we will then go on to study (in modern French) a series of medieval and early-modern poems, plays, treatises and essays that borrow from other languages and literatures, even as they establish French as a literary and a national language. The final portion of this class will include a meditation on the status of French language in contemporary Francophone countries based on Derrida's essay "Le monolinguisme de l'autre."

FREN316 Women Writing in the Renaissance
Women writing in 16th-century France--the French Renaissance period--had the recent advantage of print publication to circulate their works despite great social limitations on women's roles and education. This course explores their writing--including fiction, poetry, epistolary, and polemic--and choices of subject matter with a focus on references to writing as/by women. We will situate these writers in their historical, cultural, and literary environments and read critical scholarship on this field of study. We will also take a comparative approach by looking at 15th- and 17th-century authorship to see how circumstances evolved and at several contemporary perspectives to consider the currency and perhaps continuity of early modern women's literary production and creations.

FREN317 The New World Bites Back: Cannibalism and the Colonial Encounter
What is the cannibal? Perhaps it makes us think of Hannibal Lecter or zombies from Dawn of the Dead. How do we understand the horror and fascination the cannibal, whose monstrosity depends in some sense on its humanity? An emblematic figure of the tension between alterity and resemblance, this course examines the diverse political, cultural, literary and economic representations of cannibalism that underly the relationship between Europe and the "New World." Major Readings: Montaigne's "Des Cannibales," Voltaire's Candide, Dutertre's Histoire des Antilles, Marx, Capital (excerpts) Aimé Césaire's Une Tempête, Suzanne Césaire's Le Grand camouflage. 40-50 pages of reading per week.

FREN318 French Renaissance Theater Lab
In this seminar students will explore a variety of dramatic texts written and performed during the French Renaissance (c. 1500-1610). The first two-thirds of the semester will provide an overview of the poetics, rhetoric, and performance of early French theater, followed by discussions about gender, religion, politics, violence, and other topics as they arise within each play. Authors will include Marguerite de Navarre, Jean de La Péruse, Étienne Jodelle, François d'Amboise, Louise Labé, Robert Garnier, and Catherine Des Roches. During the last third of the semester, students will participate in a collaborative digital (online) critical edition of one of the plays studied. Emerging technologies in the field of digital humanities will be integrated into this lab portion of the seminar, as well as more conventional methods of establishing critical editions. Readings, written assignments, and class discussions will be in French.

FREN322 The French New Wave: From National to World Cinema
This course introduces students to one of the most creative and influential moments in cinema history: the French New Wave (Nouvelle Vague). Flourishing in the post-World War II period between the 1950s and 1960s, this new generation of film critics and filmmakers sought to redefine what François Truffaut calls a certain qualité française through cinematic experimentation, while using their works to comment on global geopolitical conflicts. The course situates the Nouvelle Vague within its local production context while also studying its contribution to cinema as a global artform. The filmmakers studied include core members of the Cahiers du Cinéma, such as François Truffaut, Claude Chabrol, and Jean-Luc Godard, as well as extended members of the Left Bank Group, including Alain Resnais, Chris Marker, and Agnès Varda. The final week will focus on the international legacy of the French New Wave, with East Asian New Wave movements as key examples. This course will be conducted entirely in French except for a few readings in English.

FREN324 Interpreting the "New World": France and the Early Modern Americas
The impact and long-lasting effects of the "discovery" of the "New World" on Europeans cannot be overestimated. This advanced seminar will compare and contrast styles of expedition and conquest among the European nations, though the course will focus on the French context and the various events and encounters that occurred in the early modern Americas, particularly between 1492 and 1610, a period that laid the groundwork for the subsequent colonial project. Throughout the course, we will pay special attention to the Amerindians' points of view. In turn, students will examine the insights and blind spots in 16th-century French navigators', cosmographers', cartographers', and intellectuals' interpretations, representations, and negotiations of difference by critically engaging with concepts such as nature, culture, alterity, gender, sexuality,

marriage, religion, exchange, possession, conquest, and war. Reading, writing, and class discussions will be in French.

FREN325 Museums, Objects, and Empire: Exhibiting the Self, Exhibiting the Other
This course will analyze the relationship between colonization and material culture. Using literary and historical documents, we will ask how objects helped to construct identities by studying the way objects were collected, used, and displayed during the colonial period. The course will also analyze how spectacles, exhibits, and museums have shaped a discourse about the other. The course will lead to an exhibition based on student work. Reading, writing, and class discussion will be in French.

FREN326 Topics and Genres in French Popular Culture
Spanning the mid-19th century to the present, this course will present and examine the expansion of such genres as newspapers' feuilletons (serialized novels), romans de gare (easy literature), detective novels, and bandes dessinées (graphic novels). Though at times poor in their execution, such productions are a revealing window into French society, and their popularity has only increased. The course will particularly focus on the participation of renowned writers in so-called low-cultures genres, as well as on women writers' growing presence in the field.

FREN328 The "Cold" War in Motion: Memories through French Post-war Cinema
This course examines in parallel cinema history and global geo-political history during the post-war period (1945-1990s). How does a portable camera travel to document the "hot" realities of the "Cold" War? How does the thinking power of montage reconstruct histories of destruction into collective memories in sound, color, and image? Through close analysis of short and feature-length films produced by French filmmakers, students will dissect the art of filmmaking into philosophical penmanship, as reflected in the notion of "caméra-stylo". Materials include documentaries, essay-films, and fictional films from Alain Resnais, Chris Marker, Agnès Varda, Jean-Luc Godard, William Klein, Marcel Ophüls, Jean-Pierre Melville, and Louis Malle. These filmmakers reflect on the histories of the Second World War, colonialism, and the Cold War, as well as on countries that represented political and cultural alternatives during the time of reconstruction. This course is taught entirely in French. Written assignments, class discussions, and most readings will also be in French. While any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course, it is an advanced course intended for students who have already taken two courses in French beyond FREN 215 or already have studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. This course will count as one course toward the French studies major and minor, the Romance Studies major, the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

FREN330 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes
Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

FREN333 Asia and the Making of France
Enlightenment philosophers, impressionist painters of the 19th century, and French Maoist intellectuals in the 1960s were all influenced by Asia. Although these influences from Asia were at times the fruit of solid knowledge, they were also often the result of imagination. In addition to attracting French intellectuals and artists, Asia also contributed very concretely to the economic development of modern France and its geopolitical position in the world. This relationship relied on voluntary exchanges but also on violence and French exploitation of Asian territories and people. Through the study of historical documents, films, and literary texts, this course aims to understand the various ways Asia shaped France. We will consider the various representations of Asia conveyed in 19th- and 20th-century France and the historical context of their production by focusing on key moments such as the Opium Wars in China, French colonialism in Indochina, and the two world wars. Reading, writing, and discussion will be in French.

FREN345 Weird Literature: Tales of the Supernatural, Inexplicable, and Bizarre
In this course we'll look at fantastic literature (broadly defined) from 19th century France: tales of the supernatural, the inexplicable, and the bizarre. This genre flourished in post-enlightenment, post-revolutionary France. Part of our task will be to consider what made stories of the strange so appealing to French authors at this point in time, and how writers used the genre to grapple with societal changes and scientific advances. We will examine some formal definitions of the fantastic and the uncanny, and work towards our own characterizations, as we consider issues such as madness and sanity, provincial

superstition, the clash of science and the inexplicable, and the place of gender within such narratives. We will also consider the reception of these texts: how they were illustrated and/or adapted and where (if at all) we can find echoes of them in modern culture. Authors to be studied include Maupassant, Merimée, and Villiers de L'Isle-Adam.

FREN348 Artistic Creation in Fin-de-siècle France
The end of the nineteenth and beginning of the twentieth century--the so-called fin de siècle--was a period of remarkable creative energy, production, and upheaval in France. Many of the most-recognized names in the art world were active there during that time: Debussy, Monet, Picasso, Stravinsky, Matisse, Baudelaire, Van Gogh...and many of them collaborated across media. In this course, we'll dig deep into the music, visual arts, and literature of the period, relying on contemporaneous primary sources (literature, of course, but also newspapers and popular periodicals, artists' letters and manifestos, performance reviews and notes, etc) as well as relevant secondary analyses, to get a sense of the competing energies of liberation and decadence that nourished so many remarkable and influential works of art.

FREN356 From the Diary to the Stage: Women Writers and Literary Genres from the 17th to the 21st Centuries
While women in France were not welcomed in the literary sphere, they have nonetheless participated in the various movements that have radically affected literature from the 17th century on. The purpose of this course is to discuss women's space within the literary field. Through the study of various texts, this course will examine women's compliance and defiance toward literary trends. It will also investigate the roles of literary categories (letters, plays, fairy tales, poems, novels, and essays) in women's production.

FREN357 Autobiography and Photography; Text and Image
Over the last decades, the question of autobiography as a genre has been thoroughly analyzed. The issue is further complicated by the use of photography within autobiographical texts, whether they are included in the text or merely described. In this course, we will examine the various roles of photography in autobiography. Is photography a way to trigger memory? Is it more referential than the word? How is the reader to read the coexistence of word and image? Such are some of the questions that will be discussed.

FREN360 Clair Obscur: Literature and Culture in 19th-Century France
This seminar will explore the literature and culture of 19th-century France with a specific focus on Paris and its development over the course of the century. We will consider the impacts of population growth, the industrial revolution, political upheavals, artistic developments, and the transformation of the cityscape itself. How did novelists, poets, journalists, and composers use their works to depict and to grapple with the transformation of the city? We will also consider how colonialism and empire manifested themselves within the boundaries of the colonizing state, for example in the Expositions Universelles. Texts studied will include works by Charles Baudelaire, Victor Hugo, Louise Michel, Jacques Offenbach, and Guy de Maupassant. Towards the end of the course we will turn our attention to artistic representations of Paris across the century. Readings, written assignments, and class discussions will be in French. While any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course, it is an advanced course intended for students who have already taken two courses in French beyond FREN 215 or already have studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. FREN363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

FREN372 Exoticism: Imaginary Geographies in 18th- and 19th-Century French Literature
This course will consider the fascination with the exotic -- with foreign landscapes, customs, and culture -- in 18th- and 19th-century French fiction and, to a lesser extent, poetry. Discussions will focus on the representation of foreignness and the construction of the exotic woman, as well as on the status of the European gaze. Major authors may include Bernardin de Saint-Pierre, Chateaubriand, Balzac, Mérimée, Loti, Flaubert, Hugo, Baudelaire, and Gautier.

FREN382 Jungle and Desert in Francophone African Literature
This course analyzes the constellation of images and sensations conjured up by the terms "jungle" and "desert," which are opposite but equally extreme. We will

explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes.

Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And, finally, how do we each see ourselves in relation to landscape? What is our own version of an "extreme" landscape?

FREN390 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

FREN391 Diderot: An Encyclopedic Mind
In this class we will come to know the most progressive and often radical thinker of the French Enlightenment, Denis Diderot (1713-1784). We will begin this seminar with an examination of how this country abbot grew into the most well known atheist of his generation. We will then move onto his famous 74,000 article Encyclopédie, a book that not only dragged sacrilege and freethinking out into the open, but triggered a decades-long scandal that involved the Sorbonne, the Paris Parliament, the King, and the Pope. (During this portion of the class, students will undertake translations of select entries [from French to English] of the "dictionnaire" for possible publication.) In the second half of the semester, we will also study the writer's freewheeling art criticism. Finally, we will read two groundbreaking novels. The first of these, "La Religieuse", is a gripping pseudo-memoir of a nun who suffers unspeakably cruel abuse after she announces that she wants to leave her convent. The second, "Jacques le Fataliste", is a freewheeling anti-novel where Diderot used fiction to take up the problem of free will. In the final portion of the class, we will also read selections from his anticolonial and antislavery writings.

FREN397 Forbidden Love: From the Middle Ages to the French Revolution
This seminar examines the notion of "forbidden love" in prose fiction, memoirs, poetry, and theater written in French from the Middle Ages to the French Revolution. Students will gain a theoretical and historical understanding of concepts such as love and desire, and how they inform ideas of race, gender, and sexuality in the early francophone world. Students will also watch 20th- and 21st-century film and theatrical adaptations of selected works. By the end of the course, students will have acquired an appreciation for a central but often neglected dimension of francophone literature and culture, become familiar with a method combining a historical approach with the use of essential theoretical concepts, explored how attention to noncanonical and/or "nonliterary" material can extend their knowledge of the period, and provided evidence of competence in critical reading and in the presentation of independent research.

FREN399 French Histories: National Identity and Narratives since the Third Republic
At the end of the nineteenth century, schooling became free and mandatory in France. Since then, politicians have often considered the teaching of history as key to the construction of French national identity. Even today, some argue that the role of school is to equip children with a national narrative. French historians have questioned and resisted this instrumentalization, denouncing oversimplifications and ideological distortions. They also acknowledge that some biases have pervaded French history.

Through readings of historical novels, biographies, essays, and graphic novels as well as selected film and documentary viewings, this course will explore some of these national narratives and the way French historians, philosophers, and artists have participated in the construction of a French national identity.

The course will focus on France and its colonies since the 1870's and the Third Republic. Preliminary knowledge of the period is not required for this class. The final project will be a re-telling of a French historical event through students' preferred medium (video, graphic novel, essay, or podcast). The assignments during the semester will help students accumulate material and hone their skills toward this goal.

GERMAN LITERATURE IN TRANSLATION (GELT)

GELT230F The Simple Life (FYS)
As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GELT239 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GELT279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GERMAN STUDIES (GRST)

GRST101 Elementary German
This course is an introduction to German and leads to communicative competence in German by building on the four primary skills--speaking, listening, reading, and writing--while developing participants' awareness of life and culture of German-speaking countries. Learning German and its structure will also enhance students' awareness of commonalities between the English and the German languages. The GRST101/102/211 course sequence will help students appreciate that contemporary Germany is economically and politically the leading country in the European Union and has a dynamic, multicultural society. The German language opens vistas into a world of ideas that is as complex as it is elemental. It provides access to many fields, from philosophy to the natural sciences and many disciplines between: history, musicology, art history, and environmental studies. These three courses prepare students to study abroad in Germany, on one of the two Wesleyan-approved programs in Berlin and Hamburg or continue with GRST212 here at Wesleyan.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **None**

GRST102 Elementary German
This is the second part of the two-part sequence in Elementary German (see GRST101). Students will continue their study of the four primary skills--speaking, listening, reading, writing--plus German grammar and culture. They will read a variety of authentic texts, listen to native speakers, handle everyday conversational situations, and write short compositions. At the end of the semester, students will write, perform, and videotape a skit based on the material learned this semester. GRST211 is the course following GRST102. Students who take GRST211 can apply to study abroad in Germany on one of Wesleyan's approved programs in Berlin and Hamburg or continue with GRST214 here at Wesleyan.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST101**

GRST211 Intermediate German
This course typically follows GRST101 and 102 and increases students' proficiency in the German language while they learn about different cities and regions in the German-speaking world. Working collaboratively, students engage in cultural activities with authentic readings and contextualized grammar in a unifying context. Through exposure to a variety of texts and text types, students develop oral and written proficiency in description and narration, as well as discourse strategies for culturally authentic interaction with native speakers. Classes focus on active use of the language. Film, music, and other audio clips are regularly integrated into the course to increase students' listening

comprehension. Through regular writing assignments, students expand their vocabulary and practice varied styles and techniques. Among the course goals are improved communication and reading skills, an expanded vocabulary, more accurate and nuanced written expression, and increased insight into historical and cultural features of the German-speaking world. After the successful completion of this course, students can study abroad through Wesleyan's approved German programs in Berlin and Hamburg or continue with GRST212 at Wesleyan.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST102**

GRST212 Practice in Speaking and Writing German
This course is designed to build and strengthen skills in oral and written German. It functions as a bridge between the basic language series (GRST101&102 and 211) and the more advanced literature/culture courses. This course extends the focus on language and culture through reading, interpreting, and discussing longer German texts (including poems and short stories) begun in GRST211. Moreover, students will research various aspects of the history and culture of Germany and gain practice writing about and presenting the results of their research. Grammar instruction and review as well as vocabulary-building are integral parts of this course, since mastery of the structures of German will facilitate students' ability to express more complex ideas. We will supplement the textbook with additional readings, music, and films. Class discussion will be conducted in German.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST211**

GRST213 German Culture Today
Readings, class discussion, and written work will be based on current and recent events and developments in Germany. Topics will include Germany's place in the new Europe and the world, Germany as a multicultural society, and German contemporary culture. The course will provide extensive practice in speaking, reading, listening, and writing in German and using literary and nonliterary texts, as well as audio and visual materials. Structured conversation, debates, and analysis of different types of texts, along with writing assignments in a variety of genres, will strengthen proficiency in German and prepare students for 300-level courses. This course can be taken either before or after study in Germany.

GRST221 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders. Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

GRST224 The Holocaust in Contemporary Popular Culture
How to describe the indescribable and to speak the unspeakable? Long after the end of World War II, filmmakers still grapple with these questions, and their answers vary ethically and aesthetically. This course will discuss depictions of the Holocaust in contemporary popular culture. We will touch on graphic novels, TV sketches, and social media, but mainly focus on film. While the time frame will be limited to mainly the last two decades, we will explore a vast range of texts including: Hollywood fare and East European art-house movies; gritty dramas and dark comedies; reenactments of real-life events and alternative history. From Hipster Hitler to the Jojo Rabbit, from "Inglorious Basterds" to "Son of Saul," what all these examples share is an artistic and thematic audacity. We will examine how they try to propose new and unsettling answers to old but ever-vital questions: How did the Holocaust happen and might it happen again?

GRST227 Criticism and Psychoanalysis
This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

GRST230F The Simple Life (FYS)
As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions:

How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GRST231 Reading Theories
In this survey of theories that have shaped the reading of literature and the analysis of culture, emphasis is on key concepts--language, identity, subjectivity, gender, power, and knowledge--and on key figures and schools such as Marx, Freud, Nietzsche, Saussure, Barthes, Gramsci, Benjamin, Althusser, Foucault, Lacan, Deleuze, Jameson, Berlant, Moten, postmodernism, and U.S. feminism.

GRST232F Marxism and Abolitionism (FYS)
This course explores the historical encounter of Marxist revolutionary theory, with its roots in German idealism (Kant, Schiller, Fichte, Hegel), and abolitionist causes. How have abolitionist movements historically informed, expanded, and challenged Marxist theory and its tactical playbook? What made Marx a touchstone for so many black revolutionary thinkers, including W.E.B. du Bois, Franz Fanon, C.L.R. James, and Angela Davis? How have anticommunist, racist, security-statist ideologies been mobilized to undermine and defeat transformative social movements? We will begin with the Haitian Revolution and work our way through the abolition of slavery in the US and the anticolonial and civil rights struggles of the mid-20th century to the prison abolition movement today. In addition to the above mentioned authors, readings will include Toussaint L'Ouverture, Frederick Douglass, Ottilie Assing, V.I. Lenin, Rosa Luxemburg, Georg Lukács, Max Weber, Martin Luther King, Jr., Herbert Marcuse, and the Combahee River Collective.

GRST233F Holocaust Remembrance in Germany: The Third Generation (FYS)
Remembering the Nazi past is a fundamental aspect of postwar German culture. In this course, we will trace the Holocaust's aftermath in contemporary German literature and thought. We will pay close attention to the socio-cultural and historical-political changes in attempts to glean new meanings from a past that is both omnipresent and highly evanescent. It will be our particular concern to encounter versions of Jewish identity and attempts to prescribe different narratives. We will focus especially on contrasting the creative works of the immediate postwar period and "the third generation." These contemporary writers explore a historical trauma that has become an integral part of specific Jewish-German identity. At the same time, their temporal and personal distance to the actual events necessitates new imaginative approaches to the past. Careful readings of literary, theoretical, journalistic, and historical texts, as well as personal discussions will enable us to critically think about the challenges and limits of how to write about the Holocaust 70 years after it occurred, and how the difficulties in doing so might inform other kinds of writing about historical and personal trauma. Students need to read Olga Grjasnowa's "All Russians Love Birch Trees" prior to the start of the course. Students will have Zoom class discussions and intensive peer-feedback-driven writing practice.

GRST234F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

GRST238 Bauhaus: Art, Craft, Design
This seminar examines the theory and practice of the Bauhaus, the most influential art school of the 20th century. The Bauhaus proposed a radical concept: to reconstruct the material world of war-torn Europe to reflect principles of unity in the arts and within all world cultures. In the 15 years of its existence, from 1919 until 1933, the Bauhaus underwent many changes, including moves from Weimar to Dessau and Dessau to Berlin, as well as the reorientation of its curriculum away from craft and towards industrial production. Throughout, its activity was defined by a series of tensions, between fine and applied arts and between form and function. Attracting men and women from Western and Eastern Europe, the Americas, and East Asia, the Bauhaus adopted an international and gender-inclusive orientation from the beginning, even as gender inequalities persisted. After the school's forced closure in 1933 by the National Socialists, many of its teachers and students left Germany to found art schools throughout the globe, and its core principles continue to shape art pedagogy and practice today, above all its a commitment to experimental learning in de-hierarchized workshops. This course will examine the origins, core products and theories, and afterlife of the Bauhaus.

GRST239 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social

upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GRST241 Introduction to European Avant-Garde, 1880-1940
This course introduces students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

GRST249 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

GRST250 Cultural Criticism and Aesthetic Theory: Walter Benjamin and Theodor Adorno
This seminar introduces and explores the cultural criticisms and aesthetic theories of Walter Benjamin and Theodor Adorno, two of the 20th century's most notable Marxist thinkers and critics. Our aim will be to illuminate the intimate interconnections between cultural criticism and aesthetic theory taking place concurrently with the rise of the artistic avant-gardes (with which both thinkers felt deep affinities). We will study the intellectual origins, cultural contexts, methods, and critical aims of Benjamin's and Adorno's uniquely individual yet also closely related practices of cultural criticism. Further, we will examine the assumptions underlying their aesthetic writings and seek to reconstruct their respective contributions to aesthetics.

Over the course of the semester, we will study the works of our protagonists both on their own terms and in comparison to each other. Major thematic units will include (but are not limited to) their writings on literary aesthetics, narrative, and translation; architecture and the city (Naples, Moscow, Paris, Berlin); landscape and nature; mass culture and aesthetic autonomy. Our starting point will be Georg Lukács's Theory of the Novel, a work to which both Benjamin and Adorno were much indebted. On occasion, we will supplement our explorations with asides from the 1920s and 1930s (by Alfred Sohn-Rethel, Siegfried Kracauer, Bertolt Brecht, Asja Lachs, Ernst Bloch) as well as scholarship for optional reading (by Susan Sontag, Hannah Arendt, Fredric Jameson, Susan Buck-Morss, Miriam Bratu Hansen, Susan Ingram, Judith Butler, Esther Leslie).

GRST251 Kafka: Literature, Law, and Power
Elias Canetti claimed that among all writers, Kafka was "the greatest expert on power." In this course we will focus on Kafka's narratives of power relations. We

will read and discuss Kafka's sometimes painfully precise descriptions of how power is exerted in the family and in personal relationships and how scrutiny and discipline are exercised over the body. We will also consider Kafka's depictions of physical violence and of apparatuses and institutions of power and the ethical and political implications of these depictions. The working hypothesis of this course is that Kafka not only tells stories about power, but that his stories also contain an implicit theory of how power works in modern society.

GRST252 From Caligari to Hitler: Weimar Cinema in Context
This course offers a critical introduction to German silent and sound films from 1919 to 1932. It will test the thesis of Siegfried Kracauer's classic study that expressionist films in particular prepared the way for Hitler's rise to power. The focus will be on canonical films of the era including THE CABINET OF DR. CALIGARI, NOSFERATU, and THE LAST LAUGH (Murnau); METROPOLIS and M (Fritz Lang); and THE JOYLESS STREET and PANDORA'S BOX (Pabst). Some attention will also be given to films made at the ideological extremes of Weimar culture: KUHLE WAMPE (with a screenplay by Brecht), Leni Riefenstahl's THE BLUE LIGHT, and Pabst's THREEPENNY OPERA. Readings will include screenplays, essays, and reviews from the period as well as selected literary works such as Brecht's THREEPENNY OPERA and Irmgard Keun's novel THE ARTIFICIAL SILK GIRL.

GRST259 Criticism and Marxism
This course introduces students to the Marxist (or historical-materialist) tradition, with an accent on its centrality to interpretative methods in literary studies and to related fields in the human sciences. We will study foundations, beginning with Marx and Engels, and our reading will carry us through the range of Marxisms that inform contemporary critical practice. We will focus on historical materialism as a style of dialectical thought, uniquely equipped to grasp both our immediate objects of study (literary texts and other cultural productions) and the social forces through which those objects are determined. In the same dialectical mode, we will reflect often on the relation between our work in the classroom and our contemporary social and historical situation. Students with an interest in literary and social theory will benefit from the course, as will students who know a little bit about Marxism but want to understand the logic of this crucial body of thought.

GRST261 Reading Nietzsche
Friedrich Nietzsche, trained philologist and self-proclaimed "free spirit," remains one of the most controversial figures in modern thought, a source of fascination and outrage alike. Best known as the philosopher of the "Dionysian," the "will to power," the "eternal return of the same," the "transvaluation of all values," and the "over-man," Nietzsche also proudly considered himself the most accomplished prose stylist in the German language. In this course, we will examine two closely interrelated issues: (1) the genesis of Nietzsche's major philosophical thoughts in the areas of epistemology, aesthetics, ethics, and the critique of religion, from his earliest to his latest writings; (2) the cultivation of a philosophical style that, in its mobilization of highly artistic modes of aphoristic reduction, metaphorization, personification, and storytelling, aspires to turn critical thinking into a life-affirming art form. The course will combine philosophical interpretation with textual analysis. No prior knowledge of Nietzsche's works is expected; however, a willingness to set aside significant chunks of time to dwell in Nietzsche's texts is required. Students with reading knowledge in German are encouraged to read at least some of the assignments in the original. Guidance in doing so will be provided based on individual need.

GRST263 Inside Nazi Germany, 1933--1945
This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

GRST264 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933
Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

GRST266 Ethics After the Holocaust
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

GRST266F Ethics After the Holocaust (FYS)
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

GRST267 Losers of World War II
This course explores the experiences of Germany and Japan in the postwar era. These countries faced the dual challenge of making political transitions to democratic government and recovering from the economic ruin of World War II. Japan and Germany both were occupied and rebuilt by the United States, and both were blamed for the devastation of the war. How did Japan and Germany respond to being cast as worldwide villains? How strong were the democracies that developed? This course explores these questions by comparing the culture, history, and institutions of these two countries.

GRST268 Foundations of Critical Theory: Marx, Nietzsche, and Freud
This course serves as an introduction to the main ideas of Marx, Nietzsche, and Freud, and their distinct yet similar techniques of interpretation. Michel Foucault once claimed that Marx, Nietzsche, and Freud "have changed the nature of the sign and modified the fashion in which the sign can in general be interpreted" -- which means that they changed the way in which we interpret and make sense of the world and of ourselves. Marx did so by leading his readers, in Capital, to "the hidden abode of production" where "the secret of profit-making must at last be laid bare;" Nietzsche did so by inviting his readers, in his Genealogy of Morality, to "go down and take a little look into the secret of how they fabricate ideals on earth;" Freud did so by teaching that we cannot know ourselves and are hence "not the master in our own house."

This course is designed to make critical theory and contemporary discourses in the humanities and social sciences more accessible by providing the modern historical and philosophical foundations for key critical concepts such as interpretation, subject/agency, history, origin, society and social power, value, modernity, capitalism, socialism, and religion/morality. We will explore some of the most influential writings of the respective authors in a comparative manner and, thus, come to a better understanding of the genesis of critical modern thinking.

GRST269 Modern Aesthetic Theory
As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebility of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

GRST270 Theories of Fascism
Fascism came out of the horrors of the First World War and drove the world into the even greater horrors of the Second World War. Arguably, however, fascism is more ubiquitous and elusive than historical dates suggest: it was prefigured in how early-modern authoritarian leaders agitated the masses (as analyzed by Max Horkheimer), in France's Second Empire Bonapartism (as analyzed by Karl Marx), and in Richard Wagner's intoxicating spectacle of the total work of art (as analyzed by Friedrich Nietzsche, Charles Baudelaire, Theodor Adorno, and many more). After fascism as a political movement was largely defeated, its theoretical value for understanding race, class, gender, and sexual domination in late-capitalist societies only increased, albeit in a fractured and often hazy way. Over the decades, the body of theoretical thought on fascism has grown to encompass not only its program, tactics, rhetoric, and organization, but also its aesthetics, psychology, and political economy. Because fascism, as Alberto Toscano observed, "is a matter of returns and repetitions," this course will study theories of fascism in thematic units rather than chronologically. Our focus will be on fascism's transatlantic dimension, and it will include the writings of fascist agitators (Mussolini, Hitler), intellectuals (Evola, Schmitt, Heidegger), and artists (Wagner, Marinetti, Riefenstahl, Jünger). In addition, the course will draw on the traditions of anti-fascist Critical Theory (from Zetkin and Lukács to the Frankfurt School to Žižek and Theweleit), French post-war thought (Lacoue-Labarthe, Guattari), and Black Radicalism (Césaire). We will also study reevaluations of fascism in the context of its political, cultural, and intellectual resurgence over the last decade (Marasco, Herzog, Massumi, Traverso, Toscano).

GRST272 Introduction to History: Germany from Napoleon to the Berlin Republic
Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions. We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

GRST273 Tatort - Window into Germany (CLAC.50)
Few television shows have become anchored in German cultural discourse as firmly as "Tatort," a weekly crime show produced and broadcast by public television since 1970. Watched by up to 40% of all potential viewers, new episodes are prominently reviewed in major daily newspapers and serve as a focus for discussions about German politics, culture, and society. Episodes have tackled questions of police brutality, immigration, gentrification, and the surveillance state, while also shining a light on Germany's changing conception of itself. Over the years, the show has attracted some of the major directors and actors from German-speaking regions, such as Wolfgang Petersen, Margarethe von Trotta, Dominik Graf, Sibel Kekili, and Götz George. In this course, we will watch current and canonical episodes of the show, using it as a way into discussions about Germany's past, present, and future.

GRST277 The Past is Our Present Problem: Post-1945 German Literature and Culture
The quarter century following Germany's unconditional surrender in 1945 saw a continued struggle between a desire to move on and rebuild a society and culture in ruins on the one hand, and efforts to own up to--and learn from--Germany's recent Nazi past on the other. Literature, in particular, became one of the driving forces trying to understand how the Third Reich was possible, what happened to the remnants of Nazi ideology in the new Germanies, and what avenues forward there were for a language and literature so thoroughly complicit in the horrors of genocide and Holocaust.

In this course, we will explore how writers (re)configure, but also ignore, questions of personal and national identity, the function of language, the role of tradition, individual agency and social norms, or gender roles. With a main focus on West Germany, we will read some of the most important works of the time, ranging from so-called "rubble literature" of the immediate post-war years (Wolfdietrich Schnurre, Wolfgang Borchert) to texts trying to find ways to confront questions of guilt and responsibility (Günther Grass, Heinrich Böll) and to more radical attempts to reconfigure what literary art in German is able and obligated to say (Paul Celan, Peter Weiss). To complement the focus on West Germany, we will also read select texts from the other German-speaking countries: Austria (Thomas Bernhard, Ingeborg Bachmann), Switzerland (Max Frisch), and East Germany (Christa Wolf). In addition to close readings, we will engage with larger questions and cultural movements of the time, from debates between authors who left Nazi Germany and those who stayed, to the Gruppe 47 (Group 47) and its attempt to change the literary landscape between 1947 and 1967, to the increased politicization of literature and resurgence of debates of Nazism's staying power surrounding the social movements of the late 1960s. We will combine our readings with looks at historically significant moments such as the founding of two German states, the so-called economic miracle in West Germany, the conservative "restoration" efforts under chancellor Adenauer, or

the election to the chancellorship of Kiesinger, a former Nazi bureaucrat with the Propaganda Ministry.

GRST279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GRST280 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

GRST284 Frankfurt School Critical Theory, Then and Now
This course serves as an introduction to Critical Theory as first envisioned and practiced in the 1930s and 1940s by a group of European refugee scholars in New York and Los Angeles associated with the "Institute for Social Research," which later became known as the "Frankfurt School" (the city of Frankfurt being the location of its European origin and post-WW2 abode). Drawing on the German philosophical (Kant and Hegel), sociological (Weber and Simmel), psychological (Nietzsche and Freud), and Marxist (Engels, Marx, and Lukacs in particular) intellectual traditions, "Critical Theory" was intended to shed light on the genesis of capitalist class societies' inherently antagonistic and irrational makeup. Uncompromisingly interdisciplinary, the critical theorists explored phenomena such as authoritarian movements, mass media, propaganda, and the culture industry, and in doing so championed the significance of art and radical thought for the prospects of liberation from authoritarianism and alienated social relations. For the first generation of Critical Theorists (who must be distinguished from their less radical heirs, such as Habermas and Honneth), critique was not a purely academic exercise, but was pursued for the sake of radical social transformation and thus was sparked by a utopian impulse.

GRST288 The Human Condition: Arendt, Nietzsche, Marx
"God is dead," the philosopher Friedrich Nietzsche wrote at the close of the 19th century, "and we have killed him!" Nietzsche presents these words as being proclaimed by "a madman who in the bright morning lit a lantern and ran around the marketplace crying incessantly." Both the content of this famous quotation and its setting express a concern with the internal and external conditions under which modern humans live and make sense of their lives: without the certainty of divine guidance and order (internally), encountering one another only as impersonal buyers and sellers on the marketplace (externally). In this seminar, we will study three strikingly unique yet nonetheless intersecting ways of addressing the human condition after the death of god. We will start with Hannah Arendt's magisterial "The Human Condition" (1958), in which she presents the history of how in the Western philosophical tradition the active life (the vita activa, as distinguished from the vita contemplativa, the life of the mind) has been conceptualized. Drawing on Nietzsche's genealogical method, Arendt traces the genesis of concepts from their Greek, Latin, and Biblical origins to modernity. In doing so, she focuses on the activities of labor, work, and action: Labor is the "metabolism between humans and nature" (Marx), the process through which we appropriate the earth for our survival as a species; work is the transformation of the earth into a durable world; and plurality is the sharing of this world with others.

From Arendt's comprehensive conceptual history of the human condition, we will proceed in reverse chronological order to contextualize and challenge her claims. Arendt singles out Nietzsche and Marx as the paradigmatic modern "life and labor philosophers" and foremost representatives of philosophical "naturalism," and we will first examine Nietzsche's account of the devolution of European morality to nihilism and his critique of Western metaphysics as a "life-denying" death-cult, and will then, in the final third of the semester, investigate Marx's attempts to historicize and rethink the interdependence of humans and their natural environment in terms of an alienation of practice and the transformation (necessitated by the capitalist "law of value") of human labor

into an abstract power of domination over humans and, eventually, the whole planet.

GRST289 The Formation of the Modern Self: German Romanticism
The 18th century in Europe saw tremendous changes in the ways people thought about and saw the world. In the process, old certainties, assumptions, and authorities collapsed, requiring new conceptions of self and world. In the decades around 1800, it became increasingly clear that the Enlightenment's optimistic view of progress was hiding some deeper concerns about unsettling and urgent problems, such as the reintegration of the newly "liberated" individual into society, the disconnect between scientific hypothesis and a more holistic view of the world, the role of language as the main mediator of human experience, or the sorting and ordering of the sheer mass of knowledge and information that the Enlightenment produced. It was German authors and thinkers, in particular, who started asking and answering such questions, creating some of the lasting conceptualizations of the modern self in literature (Goethe), aesthetics (Kant), and anthropology (Herder), but also exploring roads not pursued any further, such as Goethe's theory of color. Later authors explored even more troubling questions about communal cohesion (Hölderlin), the dangers of misinformation and misconceptions (Kleist), and the disruption wrought by new technology (E.T.A. Hoffmann), topics of as much urgency then as they are today. By reading authors from this German "Romanticism," we will historicize, evaluate, and critique notions of the modern individual, just as this very self is starting to dissolve under the pressure of new technology and accelerating social and political processes.

GRST290 Nietzsche - Science, Psychology, Genealogy
This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

GRST291 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

GRST292 Reason and Its Limits
This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness--but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

GRST293 The History of Global Warming
Our planet is now hotter than at the beginning of modern industrialization, and more places on earth are on the brink of becoming uninhabitable due to extreme heat. There is little prospect that the steady rise of global surface temperatures is going to stop or revert anytime soon. We are only beginning to see the dangerous ecological and social consequences of this planetary heating up. With the collective failure to meet the Paris climate goals, the planet has entered a period described by Wim Carton and Andreas Malm as "The Long Heat." Drawing on their and the work of other historians and critical theorists, we will explore the past and future history of global warming, from the mass adoptions of first coal and later oil as the "prime movers" of industrial production, to the politically embattled introduction of alternative energy sources. We will ask why there has not been a large-scale transition to green energy, and why the proposed technological solutions to planetary overheating are so inadequate. Throughout the semester, we will pay close attention to the political, social, economic, and cultural causes that have shaped both high- and low-carbon technologies.

GRST294 Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond
The Holocaust, Germany's STASI terror, resistance to dictatorships, debates about Germany's war memorials, and colonial history come to mind when we think of 20th-century Germany. In this seminar we will pursue the questions: What do we remember? How do we remember? What are places of remembrance, how are they created, and what functions do they have in

our society and for us personally? The term "places of remembrance" comes from the French (lieux de mémoire, literally, places of memory). This term was coined by the French historian Pierre Nora. For him, places of remembrance are not only material places, but also the so-called 'immaterial' places such as people, data and concepts that are anchored in people's collective memory and have an identity-forming function. In relation to Germany, places of remembrance can be specific places (like Weimar) or memorial sites (the Auschwitz concentration camp), but also buildings (Kaiser Wilhelm Memorial Church in Berlin), monuments (Bismarck Monument in Hamburg), people (e.g., names of people on street signs), events (Fall of the Wall), customs (Christmas) or symbols. The French sociologist Maurice Halbwachs, who was murdered at Buchenwald, described memories as a connective structure. They connect people socially and temporally. But not only individuals, also societies, nations and cultures remember (= collective memory). According to Halbwachs, crystallization points or places of memory are needed for this process. Like pieces in a mosaic, these form the identity of a culture, a nation, or a society. Their meaning and their perception can change over time. Some things can also be forgotten, but places of remembrance can help us avoid forgetting. With this caveat in mind, we want--among other things--to explore, discuss, and present "places of remembrance" and the role of memory culture in Germany and beyond.

GRST298 Marxism and Climate Crisis
Since the Communist Manifesto of 1848, the notion of "crisis" has played a prominent role in Marxist theorizing. Today's intensifying climate crisis is lending new theoretical and political weight to the Marxist critique of extractive, productive, and consumptive practices that transform nature into a means of production for ensuring ceaseless economic growth through the accumulation of capital. The consequences of this are not only the exhaustion of human labor-power and human sociality but also of non-human nature (fossilized carbon, wild animal biomass, topsoil, clean water, forests, etc.). Our perspective for studying and understanding this destructive transformation of nature will primarily be informed by a set of recent "eco Marxist" writings that oppose eco-modernist technocracy and instead reconceptualize capitalism as "a way of organizing nature" (J. Moore); extend the notion of social alienation to a "metabolic rift" between the labor process and the natural environment (Saito's "degrowth communism"); and explore the economic and ideological drivers behind the current expansion of fossil fuel extraction (Malm and the Zetkin collective).
In light of the Center's semester theme of Energy and Exhaustion, we will ask three kinds of questions: historical (about the origins of the "Capitalocene" and of "fossil capital"); theoretical (how is Marx's "general law of accumulation" also a law of environmental depletion and planetary limits?); and political (traditional "Promethean" Marxism envisioned revolution as the full actualization of productive forces -- what is the meaning of social revolution in our age of emerging fascism and overshooting climate limits?).

GRST301 Advanced Seminar in German Literature: Poetry as a Way of Life
Who am I? What is the world? And what can language (not) do? Throughout its history, German poetry has returned, time and again, to asking these fundamental questions about a self, its relation to the world, and language's capacity to represent, influence, and constitute an I. Poetry serves as one of the central sites where the epistemological, moral, social, and aesthetic potential of mankind is negotiated. Lyric texts play a fundamental role in the creation and exploration of the promises, problems, and paradoxes of modern notions of subjectivity, society, and art. Almost all of the most canonical German poems pick up on some or all of these issues, and we will read a selection from the 18th to the 21st centuries. The goal of this class is to provide students with an overview of German poetic traditions and to give students the tools to talk about poetry in German. We will explicitly engage with analytic terminology as well as aesthetic discourses. All readings, writings, and discussions in German.

GRST302 Forward, Without Forgetting: The GDR in Literature and Film
In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include short stories, songs, and excerpts by and among others: Wolf Biermann, Johannes Becher, Günther de Bryn, Stefan Heim, Rainer Kunze, Brigitte Reimann, Claudia Rusch, Susanne Schädlich, Maxi Wander, Christa Wolf. Participants will view and discuss films and TV series produced before and after unification.

GRST303 German-Language Theater After 1945: Show, Teach, Remember
Theater has played an integral role in the development of German culture since the 18th century. Playwrights, directors, and producers have been able--indeed compelled!--to constantly negotiate and define theater's pedagogical role vis-à-vis the public and the political sphere. They had to ask how theater can and should (re)present the world on stage, and how the world on stage can and should relate to the audience and its world. German-language theater after 1945 additionally had to tackle questions about Germany's past, as well as the past of (its) theater traditions, the connection between visuality, aesthetics, and the power that had played such an immense role during the National Socialist era. In this course, we will read some of the most important and influential plays written and produced in the German-speaking countries since 1945, as well as influential theoretical texts. We will discuss such performance aspects as set designs, language, and acting techniques, and we will ourselves stage short excerpts in various styles as a way of gaining first-hand experience with the range of possibilities in this infinitely flexible genre.

Prereq: **GRST213**

GRST304 Punk, Pop & Politics in Cold War Germany
This course introduces artistic responses and positions developed in the face of social and political realities in a divided country after WWII until its reunification and subsequent rapprochement. We will explore this period through works by artists, musicians, and young German authors, including Joseph Beuys and his concept of society as a social sculpture; bands of the Neue Deutsche Welle, who

paired German lyrics with punk and new wave music; and the representative painting styles of the Neue Wilde, young painters who left abstraction and conceptual art behind to give expression to their observed reality. We will read contemporary texts that accompanied these developments in the form of literary writing (Rolf Dieter Brinkmann, Peter Glaser, Rainald Goetz) or as critical responses in newspapers, art journals, and pop magazines (Diedrich Diederichsen, Jutta Koether, Peter Bömmels), supported by excerpts from influential theoretical texts. Students will develop skills to critically engage these works and will apply these skills by preparing their own responses to works of art and cultural events.

GRST305 Oppression, Resistance, Despair: Attempting Change in Pre-Revolution Germany, 1830-1848
The 1830s-40s were a volatile moment in the history of German democracy and literature. After the defeat of Napoleon and the restoration of the old political order in 1815, authorities started rigorous and increasingly violent campaigns to oppress and destroy the budding (proto-) democratic and early nationalist movements. At the same time, the beginning of industrialization in the German-speaking world led to massive social upheavals, increasing poverty, famines, and the loss of entire economic sectors. In this context, authors of the Vormärz, the decades right before the March revolutions of 1848, became increasingly politicized, critical not only of their societies, but also the previous literary paradigms of Weimar Classicism and Romanticism. In their works, revolutionary in form and content, they fought for a better world and reflected on the need for resistance in the face of defeat and despair, the possibilities for a good life in an unjust world, and the role of art in political and social struggle. The course's main focus will be on Georg Büchner (1813-1837), whose works explore the tension between subjective agency and the destructive dynamic of history (Danton's Tod), idyll and insanity (Lenz), or individual life and structural oppression (Woyzeck). We will also engage with the function of humor and subversion in social critique (Heinrich Heine), the fight for a better status for women (Fanny Lewald, Louise Aston), and hugely problematic components of the rising German nationalism like anti-French and anti-Jewish sentiments.

GRST306 Feeling Critical: Emotions in the 20th & 21st Centuries
Do Germans have feelings? The prevailing image of the cold German, characterized by emotional restraint and subdued industriousness, indicates significant changes since the Romantic era, when German was considered the language of passion, equally suited for expressing deeply felt personal convictions and nation-forging collective sentiments. Focusing on the pivotal transitional decades of the 20th century to today, a period stimulating conspicuously non-emotional, critical artistic-intellectual responses to ongoing political shifts and global crises, we turn to the cultural artifacts of this time as an archive of feelings (Ann Cvetkovich) to trace this development. Through close readings of literary and journalistic texts, works of visual art, performances, music, film, and theater in their cultural and political contexts, we explore if and how they negotiate and contribute to affective structures and strategies--an approach termed "reading for emotion" by Anna Parkinson. We examine methods of evading or sharing "authentic" emotions in recent literary expressions, including German Popliteratur, autofiction, and social media formats, dialectic tensions of pop-journalism that engages aspects of critical theory and cultural studies from an affirmative perspective, and Christoph Schlingensief's confrontational artistic interventions in response to a social and political landscape of repressed feelings. Course readings, discussions, and assignments will be in German.

GRST310 Newest German Literature and Film
This seminar is designed to introduce students to films and literary texts produced in the German language in the past few years. Because the materials we will read and watch are of recent vintage, they are not yet part of an established canon: What their significance is, and how and why we should engage with them, is far from settled. For this reason, this seminar will fulfill a twofold task: (1) It will critically engage with some of the most cutting-edge literary and filmic creative work currently being done in the German language; and (2) it will offer extensive opportunities to explore and critique how these texts deal with contemporary social issues such as the revival of nationalist, Islamophobic, and authoritarian politics; the European Union's crisis of legitimacy in the wake of the Covid-19 pandemic; or the new "social question" arising from the dismantling of the welfare state and the growing "precarization" of work.

GRST320 Places of Remembrance: Historical Consciousness in Germany
Memorial days and monuments: every nation recalls its history. Antisemitism, the Holocaust, East Germany's STASI terror and the resistance to dictatorships, and the more recent debates about Germany's colonial history come to mind when we think of 20th century Germany. In this seminar, we will explore the culture of remembrance (Erinnerungskultur) and visit places of remembrance (Erinnerungsorte) virtually. We will discuss how and what we do--and do not--remember, based on selected readings, documentaries, and memorial sites. Speakers from Germany will be invited via Zoom to talk about specific places and activities of remembrance. We will develop online projects, for example, one's own family history or that of others, or geo-mapping memorial sites.

GRST330 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and

literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

GRST332 The Racialized German Screen
In this course, we will examine filmic constructions of racial otherness in German cinema from early sound film until the present. The films in this course represent Asian, Jewish, Black, Native American, Romani, and Muslim characters. Some of these racialized character types are inextricably tied to Germany's history of war, migration, and asylum, including the post-WWII "war child," the West German guest worker, the former East German asylum seeker, and the twenty-first-century refugee. We will consider the parameters of national cinema, asking to what extent Germany's films can be seen as a projection screen for anxieties about racialized others, but also potentially fantasizing about cosmopolitan, multicultural Germany. While the majority of these productions are created by white German filmmakers, we witness a shift in more recent productions, where filmmakers of color step behind the camera to reclaim their narratives while employing their own strategies of representation. In addition to screening and analyzing films, we will read accompanying texts that will provide an aesthetic and cultural frame for interpretation.

Through careful film screenings, reading assignments, scaffolded analysis assignments, a presentation, and the creation of a final video essay, students will develop analytical skills in the viewing and interpretation of films and in writing original arguments about film history and cinema culture. Students will gain vocabulary for interpreting, analyzing, evaluating, and researching films in the context of the history that shaped and was shaped by them. No prior film studies knowledge is required, but the class discussions will take place entirely in German.

GRST342 Empire, Memory, Translation: A Seminar on the Rings of Saturn
In this seminar, we will explore three themes: The lasting effects of European imperialism and colonialism in (mostly but not exclusively) Europe and their literary representations; the relationship between historical memory and fiction in these representations; and the role of translation in shaping the relationship between historical memory and fiction.

At the center of this course is W. G. Sebald's travelogue "The Rings of Saturn" ("Die Ringe des Saturn"), a work we will read in both its German original and its congenial English translation. Sebald's genre-defying narrative recounts the historical traces of empire, war, and colonialism in the observations and reminiscences of the protagonist's wandering through the de-industrializing landscape of England's Suffolk County during the early 1990s. Obsessively associating phenomena near and far in an almost paranoid fashion, Sebald's first-person narrator leads the reader to the devastations wrought in China during the Opium Wars and in the Congo during Belgian rule; the local and global effects of cycles of capital accumulation, resource exploitation, and climate change; and the challenges and pitfalls of memory's attempts to find an adequate narrative form for how the globally disparate effects of capitalist modernity are interlinked.

All discussions and papers will be in German, and readings will be in German and English, with a consistent focus on theoretical and practical questions of translating from German to English. We will proceed at a slow pace, with plenty of time to grant our superb primary text the time and attention it deserves. This course is designed for students who have taken GRST 213 or have spent a semester studying abroad in a German-speaking country. We will focus on developing critical writing, reading, interpretation, and translation skills in German. Since the quantity of reading is fairly modest, we will put much emphasis on regular writing and rewriting.

GRST350 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)
This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

GRST370 History of German Cinema
This course will provide a survey of some of the most significant German contributions to the history of cinema. We will watch and discuss one film every week and use additional source materials to illuminate each film's social, political, and cultural context. Our itinerary will include famous films from the Weimar Republic, consider Nazi cinema, engage with GDR cinema, explore the New German Cinema, and finally will conclude with contemporary German and Austrian film. All course materials, discussions, and papers will be in German.

GRST376 The Volksstueck Tradition
In this course we will be studying the Austrian and German genre of the Volksstück. As the name suggests, plays in this genre are intended to address the joys and sorrows of ordinary people in their everyday lives, both reflecting and commenting on the social life of their times. While 19th-century Austrian Volksstücke owed much to the conventions of the commedia del arte, the genre evolved in the 20th century into a form of critical social analysis. This evolution accompanied changing concepts of the "Volk," with salaried office workers coming to the fore during the Weimar Republic. The 20th-century Volksstücke written between the world wars present characters who in real life would likely become supporters of the Nazis. Starting in the 1960s, playwrights and audiences rediscovered the Volksstücke of the prewar period, and new authors emerged. Topics and stylistic features we will examine include the changing figurations of the "Volk," dialogue employing actual or synthetic dialect and colloquial language, the prevalence of inarticulateness or inauthentic speech, oppression and exploitation of women, shifts in class attitudes, and the increasing influence of the mass media. Interesting parallels to the Volksstück can be found in Norman Lear's long-running television series "All in the Family." Among the authors we will be reading are Johann Nepomuk Nestroy, Bertolt Brecht, Karl Kraus, Marieluise Fleisser, Ödön von Horváth, Rainer Werner Fassbinder, Martin Sperr, Wolfgang Bauer, and Franz Xaver Kroetz. All reading, writing, and class discussion will be in German.

GRST385 Die Grenzen meiner Sprache bedeuten die Grenzen meiner Welt (CLAC .5)
This CLAC will explore the practice of translating philosophical German by focusing on Wittgenstein's Tractatus, its recent translations, and its (often unnamed) sources and influences -- including writings by Gottlob Frege and Immanuel Kant as well as by various Viennese intellectuals such as Karl Kraus and Otto Weininger. The Tractatus is a particularly productive focal point because it advances a theory of language and meaning that has immediate relevance for conceptualizing what is involved in translating from one language into another. In practicing translation, students will be testing the theory that they are attempting to translate. This will provide them an additional dimension in which to wrestle with the content of the text. Enrollment in the associated seminar, PHIL389/COL386, is encouraged but not required. The course is open to students at all levels of German study. Discussions will be conducted in a mixture of English and German, since we will be discussing the nuances of words and phrases in both languages. By preparing (and discussing) their own translations of texts, students will become familiar with the sorts of challenges that arise in rendering philosophical German into English and will develop strategies for negotiating these challenges. Students will also be encouraged to consider translations into other languages in which they are competent.

GRST386 German Romanticism: Disenchantment and Re-enchantment
Famously, the sociologist Max Weber described the rational, enlightened age as "disenchanted": Unlike "the savage," he claimed, who uses "magical means" for manipulating "mysterious incalculable powers," the denizens of capitalist modernity use "technical means and calculation" to master "all things." At the same time, Weber indicated that the "process of disenchantment, which has been under way for millennia in Western culture," birthed abstract new enchantments: "Having lost their magic, the multiple gods of the past rise up from their graves in the form of impersonal forces, fighting for power over our lives and thus beginning anew their eternal struggle against one another." Against the backdrop of Weber's dialectic of disenchantment and re-enchantment, this course offers a representative overview of some of the key ideas, works, and authors of German Romanticism, a term that designates both a period that extends from about 1795 to 1848 and a style of creative and intellectual production that encompasses a remarkable diversity of phenomena, including the proto-avant-garde experiments with communal "sympoetry" and "symphilosophy" in the Early Romantic circles and the rise of "Dark Romanticism" that fuses a fascination with science and new technologies with a turn to the occult and demonic. In tracing the tensions between disenchantment and re-enchantment, we will consider works of literature, criticism, art, and music, including works by some of the key figures in the German intellectual and artistic tradition, such as Heinrich Heine, the Brothers Schlegel and the Brothers Grimm, E. T. A. Hoffmann, Ludwig Tieck, Caspar David Friedrich, Robert and Clara Schumann, Franz Schubert, Karoline von Günderrode, Bettina von Arnim, Novalis, Annette von Droste-Hülshoff, and the young Karl Marx.

GRST390 Romanticism-Realism-Modernism
In the study of German literature (and art), the terms romanticism, realism, and modernism designate a span of time extending from the "Age of Goethe" to the mid-20th century literary cultures of West Germany, East Germany, Austria, and Switzerland. In this seminar, we want to take a closer look at representative examples for each of the three categories: What kind of subject matters are prevalent in each respective period? What narrative, dramatic, and poetic devices and forms are typically employed? What distinguishes these

periods from one another? How useful are these distinctions? What, finally, is the purpose of such periodizing of literature? The purpose of this seminar is twofold: 1. It is intended to provide a historical overview of German literature by engaging with representative romanticist, realist, and modernist works of prose, drama, and lyric; and 2. It is designed to critically probe the concepts of romanticism, realism, and modernism. How useful are these categories in making us understand the evolution of fiction, authorship and readership, literary subjectivity, or narrative form? What are some pitfalls of using these categories? All readings, papers, and discussions will be in German.

GRST391 Weimar Modernism and the City of Berlin
One of the most fascinating aspects of Weimar modernism is the emergence of new forms of perception and consumption, reflected in a new urban consumer culture that generated an ever-changing array of visual and aural stimulations. This changed reality was perhaps best captured by the young medium of film, but older media like literature and painting also responded to this modernist challenge. This course will examine not only exemplary works of literary and visual production from the Weimar period, but also other aspects of Weimar modernism, such as the development of radio, design, fashion, advertising, and architecture, emphasizing analyses of the new mass culture of entertainment, distraction, and "pure exteriority" (Kracauer) in combination with left-wing cultural and political criticism. The city of Berlin, then the third largest in the world and in many ways the international capital of modernism, will provide the main locus of investigation. All course readings, discussions, and assignments will be in German.

GOVT108F It's (Not) a Laughing Matter: Humor as Resistance and a Force for Social Change
Using a global perspective, this course will focus on developing critical thinking and writing skills as well as developing intellectual empathy. The students will learn to define issues within a broad cultural context and gain experience in evaluating and interpreting content in a variety of mediums. Students will interact with their classmates and actively participate in classroom activities to improve their ability to work in groups, think outside of the box, improve their writing, and develop their oral presentation skills.

The subject matter crosses disciplinary boundaries, linking the neuroscience of laughter with social science analyses about the power of humor. Students will be able to explain how humor can be a crucial tool to cope with painful and even repressive circumstances. They also will investigate how comedians and political activists use humor and other art forms to push for political and social change.

GOVT116F Good Books on Bad Wars (FYS)
This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

GOVT151 American Government and Politics
This course introduces the "building blocks" of American politics and government at the national level. It has four main parts: (1) foundations of our governmental system, (2) political institutions and the way they generate policy, (3) politics at the level of the individual citizen and the mechanisms that link the masses to elites, and (4) how all the factors come together in the making of public policy. We will scrutinize insider accounts of politics, scholarly work on governmental processes, and popular debates on issues and institutions. In addition, we will discuss why Americans are often so unhappy with their politics and politicians and the challenges faced by elected officials attempting to meet a wide scope of public demands. This course is designed specifically for first-year students.

GOVT155 International Relations
Why do states go to war with each other? How do we solve global problems? How do we govern the global economy? To equip students to answer these questions, this course introduces students to an analytical framework emphasizing the role of political interests, strategic interactions, and international institutions. Students will use this framework to understand current events and to critically analyze theories and concepts that have been used to explain world politics. Students will also consider critical perspectives on international relations, such as the role of colonialism in shaping the global order.

GOVT158 Writing the World
How do U.S. newspapers and magazines frame world politics? How adequate is their coverage of ongoing crises and breaking stories around the world? The course will involve reading some classic texts of political journalism and some political novels (such as Orwell's HOMAGE TO CATALONIA and Vargas Llosa's THE FEAST OF THE GOAT). We will also read current articles on contemporary politics from a variety of sources. Students will be assigned to write alternative sources, both reporting and opinion, on current events of their choice. The topics covered will include military conflicts, elections and political crises, and economic stories. We will of course assess the impact of the Web (e.g., blogs, YouTube) on news coverage.
Offering: **Host**

GOVT159 The Moral Basis of Politics
An introduction to upper-level courses in political theory, this course offers an introductory survey of political theory from ancient Athens to 20th-century North America, Asia, and Europe. We will read, discuss, and write about works authored by a number of seminal political thinkers. In doing so, we will encounter and evaluate diverse answers to some of the central questions in the analysis of politics: What is politics and where does it take place? What does it mean to exercise political rule? What is justice? How are political societies legitimately founded? What is the place of revolution in politics? What is power and how does it operate in political life? How is democracy intertwined with struggles against social oppression?

GOVT200 Doing Political Science Research
This course focuses on how to conduct and evaluate empirical political science research. It is specifically designed for first-year and sophomore students who are intending to major in Government. Topics covered include generating research questions, reviewing and synthesizing existing research, designing research studies, and qualitative and quantitative approaches to studying political phenomena. Students will also be introduced to different datasets political scientists use to answer research questions in the American, comparative, and international relations subfields and learn the basics of working with quantitative data. In addition to preparing students to engage in their own research projects, the course better equips students to think critically and productively about research evidence in political science and popular media discussions of politics.

GOVT205 Judicial Process and Politics
How do courts in the United States work? What is the function of law and courts in both the American political system and the daily lives of people with legal problems? Are courts, which are governed by different processes and rules, producing varied outcomes? These questions will drive our examination of legal systems in America, which will include both federal and state systems. We will consider the factors that influence the decisions of judges--including law, politics, and ideology. We will also interrogate the scope of judicial power. In this class, students will develop a deeper knowledge of law and legal systems in the United States, engage with concepts relevant to the study of judicial politics, and develop independent research ideas relevant to this field.

GOVT206 Public Policy
"Public policy" describes the actions employed by the government to achieve a variety of social goals. Some of these actions may be of great consequence (e.g., incarcerating prisoners, providing income maintenance to the poor, preventing deaths from pollution or workplace hazards). This course provides a survey of several key public policies in the U.S. It will begin with an exploration of the policy-making process, policy design, and policy evaluation. The remainder of the course will be devoted to the examination of several key policy areas including criminal justice, education, social welfare, economic management, health care, and environmental protection regulation. In each case, the current Trump administration has made significant changes that we will place in the larger historical context. By integrating theoretical debates and the historical evolution of core public policies, the course aims to develop analytical skills as well as an appreciation for the technical and political complexities of policy-making.

GOVT209 Experiments in Public Life: Introduction to Effective Local Political Action
This course serves as an introduction to local political engagement. With a focus on the City of Middletown as a key case study, students will learn how they can "think global, act local" on political issues that they care about. The course will begin by studying theories about how political power is organized and exercised, and we will learn how well these theories explain how policy is made and implemented in local communities. We will study how local government works and how non-governmental actors, such as grassroots organizations and the business community, are involved in making change.

Members of this class will not just study how politics works in theory, we will learn how it operates in real life in our city. We will participate in city meetings, meet with local officials and advocates, and learn how regular citizens -- even university students -- can become effective political actors in their communities. Throughout the semester each student will research a local political issue that they care about, and by the end of the semester they will contribute a positive case study to a public-facing "Positive Local Action" website that we will be developing as a class.

GOVT210 Calderwood Seminar in Public Writing: Law, Courts, and Policymaking in the US
In this course we will explore some of the most salient policy questions in contemporary American politics through a lens that puts law and courts at the center of inquiry. Among the topics we will cover are the place of judiciary in American democracy, hate speech and the First Amendment, criminal justice, immigration, surveillance, and privacy. In exploring these various topics, we will see how law is socially constructed by a myriad political, economic, and cultural forces, and how social phenomena are legally constructed as courts deliberate and decide on particular cases.

This is a writing-intensive course. Students will try their hand at public writing, working on op-eds, book reviews, and blog posts. They will read and edit each other's work.

Prereq: **None**

GOVT214 Media and Politics
Mass media play a crucial role in American politics, as citizens do not get most of their information about the workings of government from direct experience but rather from mediated stories. This course examines the evolving relationship between political elites, mass media, and the American public.

Prereq: **None**

GOVT215 Congressional Politics and Policymaking
This course is an introduction to the politics of congressional policy making and how the way we elect our members of Congress affects the way they perform in Congress. We will focus our attention on changes in the legislative process over the past several decades and how these changes have influenced the relations between members and their constituents, between the two parties, between the House and Senate, and between Congress and the president.

GOVT217 The American Presidency
This course surveys the institutional and political development of the Presidency of the United States. We examine the constitutional framework establishing the executive branch, including the unique manner of presidential election, and analyze the politics of presidential leadership. Topics to be discussed include the presidential nominating and election process, the use and growth of presidential power, the rise of the presidential branch, and the relationship of presidents to other political elites and the party system.

GOVT220 US Political Economy: State, Markets, and the Dynamics of Change
The past century has witnessed dramatic changes in the US political economy. Many of these changes stemmed from the policies and institutions introduced during the New Deal, which created a foundation for a period of great prosperity in the immediate postwar period--a quarter century of steady growth, low inflation and unemployment, and declining inequality. Yet, by the mid-1970s, the nation was mired in stagflation and subsequent decades brought a significant departure from the earlier policy mix. The US entered a period of stagnant wages, growing inequality, and heightened vulnerability to a host of risks, all of which contributed to the severity of the financial crisis of 2007-08, the Great Recession, and the slow recovery thereafter. In this course, we will explore the critical role of policy and institutions in shaping economic performance, the factors that contributed to their erosion, and the factors that shape and limit the options available to contemporary policymakers.

GOVT221 Environmental Policy
Arguably, environmental protection is the most complex and fascinating regulatory policy area. This course explores U.S. environmental regulation. We will examine the key features of policy and administration in each major area of environmental policy. Moreover, we will place regulation in a larger context and examine the factors that shape the environmental decisions of various economic actors. Although the course focuses primarily on domestic policy, at various points in the course we will draw both on comparative examples and the challenges associated with coordinating national policies and practices on an international level.

GOVT222 Averting Catastrophe: Public Policy and Risk Management
The U.S. faces several significant risks that, if poorly managed, could have significant implications for the economy, the environment, and public health. This course focuses on the government's role as risk manager. We will explore how public policies can be used to manage risk, mitigate the extent of damages to the environment, the economy, and public health, and avert catastrophic outcomes. After examining the concept of risk, decision-making under conditions of uncertainty, and competing policy instruments, we will turn to a series of case studies, including offshore oil spills, nuclear accidents, financial crises, the COVID-19 pandemic, and climate change. In each case, we will seek to better understand the factors that shape performance and consider the implications for strengthening the government's role as risk manager. We will conclude with an examination of an emerging issue: the regulation of artificial intelligence, a technology that even its strongest advocates admit could result in unprecedented dislocations and risks.

GOVT223 Constructing and Deconstructing the Administrative State
Steve Bannon, Donald Trump's chief strategies, famously called for the "deconstruction of the administrative state," while others have denounced the "deep state" as a permanent ruling elite committed to circumventing the Constitution and the will of the voters. The administrative state has always occupied a precarious place in the US. There has been an ongoing tension between the need for bureaucracy and a political culture steeped in anti-statism and populism. In this class, we will examine the efforts to expand the reach of the administrative state and efforts to reign in the bureaucracy during the Progressive Era, the New Deal, and the postwar decades, including a detailed discussion of the Trump presidency. This exploration will be grounded in a history of public policy and theoretical debates from across the ideological spectrum.

Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT226 Constitutional Political Economy: Law and Courts in the Making of the American Economy
In the first part of the course, we address the foundational question -- What is law? -- and explore how key aspects of political and social life are organized through legal constructs. Questions such as what counts, from a legal standpoint, as religion, speech, family, or commerce serve as entry points for analyzing how law constitutes social meaning, power, and material outcomes. The second part of the course offers a historical overview of American political economy in the twentieth century, tracing institutional transformations associated with major structural shifts and critical turning points, such as the Great Depression and the New Deal, the rise of neoliberalism, and financialization. In the third part, the course focuses on the role of courts in shaping the contours of the American economy. We examine how political struggles over constitutional interpretation have influenced issues ranging from economic regulation and labor rights to consumer protection, corporate power, and market governance. This section situates judicial decision-making within broader economic and political transformations, highlighting the mutual constitution of law and economic change. This course is organized as a research seminar. Each student will develop a substantial research project and work closely with the instructor to refine it into an academic paper over the semester.

GOVT229 Black Lives, Black Power & Black Politics
This course will explore the lineage of Black politics, with a particular focus on the social movements that have brought Black political thought to the forefront of the national conversation, through the lens of the academy and popular culture. In particular, students will learn about the many different iterations of the struggle for Black political freedom and autonomy, starting before the United States existed. We will trace this through slavery, reconstruction, the civil rights movement, all the way up to the contemporary Black Lives Matter movement. The course will provide considerable historical background on the conditions that created these movements and the ever-present role of government in shaping their trajectory. We will explore the commonalities and innovations in these struggles over time, and how they have shaped the development of the American state. We will also explore the degree to which patterns of dispossession, exploitation, and resistance have not only shaped the engagement of Black Americans with the broader polity, but also the way these same themes have weighed on the contributions of Black Americans to broader American culture. For the latter aspect we will engage with both popular music and film. Students will leave the course with a broader understanding of the historical context in which Black politics emerged, the themes that have commonly animated the many iterations of this struggle, and how this has all shaped the landscape of popular American culture.

GOVT232 Campaigns and Elections
This course introduces students to the style and structure of American campaigns and how they have changed over time. We also consider academic theories and controversies surrounding campaign "effects" and whether or not parties, media, campaigns, and elections function as they are supposed to according to democratic theory. Students will read, discuss, and debate classic and new scholarship in the field of political and electoral behavior. Students will also conduct research into different electoral contests in the United States at either the federal or state level.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT238 American Political Parties
This course explores the origins, purposes, roles, and consequences of political parties in the American political system. After a brief consideration of the broader theories behind political party systems, we will turn our focus to the party system in the United States. V. O. Key (1964) presented a tripartite definition of political parties that we will use to structure our exploration of parties for the rest of the course: party as organization, party in government, and party in the electorate. In these sections, we will address political party polarization, party identification, parties' fundraising, and many other related topics. From this rich examination of political parties in the U.S. context, we will discuss why parties exist and enable democracy, but also discuss their potential flaws and failures.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

GOVT239 Racial and Ethnic Politics
This course will provide historical context on the development of race and racial attitudes, and demonstrate the crucial role that they play in contemporary politics with a particular focus on immigration, criminal justice, welfare, and housing policy. The assigned readings will examine how the mere presence of underrepresented racial groups in the United States has shaped policies in these arenas, and the way these policies have, in turn, shaped the material circumstances and the burgeoning identities of these groups. The course will also uncover the complex relationship between race, political participation, and public opinion.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT245 Regulation and Governance
Regulation describes an array of public policies explicitly designed to govern economic activity and its consequences at the level of the industry or firm. In the first half of the course, we will explore of the history of economic regulation (e.g., finance, transportation), the new social regulation (e.g., environmental protection, occupational safety and health), deregulation, and regulatory reform. The second half of the course will turn to an examination of governance. Governance focuses on efforts to develop solutions to regulatory problems by engaging a much larger field of forces (e.g., various nongovernmental organizations, trade associations, standard setting associations, supply chains, markets) in addition to using standard policy instruments. We will consider the extent to which effective governance is compromised (or enhanced) by global competition and the quest for corporate profitability.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT250 Civil Rights and Liberties
This course introduces students to the development of civil liberties and civil rights law in the United States. We will focus primarily on the decisions of the Supreme Court that concern the First Amendment (including religious freedom, freedom of speech and expression, and freedom of the press), privacy and personal liberty, equal protection, voting, and representation. In this course, students will learn about the evolution of major legal doctrines governing civil liberties and civil rights. Students will also develop an understanding of the process of Supreme Court decision-making.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT253 The American National Security State
In this course we will focus on the rise of the national security apparatus in the U.S. through the second half of the 20th century. This topic deals with political issues that are often characterized as "intermestic" because they occur at the point of intersection between domestic and international politics. Accordingly, we will examine the ways in which external forces influence internal state-building. We will also consider the choices and implications of policies designed to provide for what President Roosevelt famously called "freedom from fear."

Prereq: **None**

GOVT254 Capitalism and the Politics of Climate Change: When an Unstoppable Force Meets an Immovable Object
This course explores the complex relationship between capitalism and climate change. In the first part of the course, taking a comparative approach with a primary focus on the US, we begin by examining how capitalism has evolved since the Industrial Revolution, and how various capitalist models have developed worldwide, depending on the role of the state. In the second part, we question the "hegemony of growth" -- how growth has been perceived as an indicator of progress and distributive justice -- and explore competing visions of green growth and degrowth. In the third part, the course shifts to the political economy of decarbonization. We discuss the history and current realities of carbon dependency, examine cross-national variations in decarbonization efforts, consider the challenging trade-offs, and explore the economic and political factors underlying the struggle over climate policies. Our discussion will also focus on the role of economists and other experts in shaping mitigation efforts.

Prereq: **None**

GOVT261 Politics of Inequality
This course focuses on inequality along various identity-based dimensions in American politics. Students will leave with a deep understanding of when inequality is a normative concern, and how politics has created and has the power to alleviate inequality along class, racial, and gender divides. Specifically, the course will focus broadly on the level of inequality in these three areas, and the degree to which this has changed over time. We will explore both the political and social phenomena that have driven this inequality, and the ways they intersect and exacerbate the impact for those who share multiple stigmatized identities. Finally, students will, in their final papers, explore potential political policies that can help to reduce or even eliminate inequality.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT262 Experiments in American Political Behavior
This seminar explores the cutting-edge of experimental political science, with a substantive focus on American political behavior. Students will become familiar with various types of experiments, such as laboratory experiments, survey experiments, field experiments, and natural experiments. In doing so, students will engage with research that aims to isolate the causal consequences of group affiliation (including partisanship, race/ethnicity, and other social identities), affect and emotions, political knowledge and sophistication, political advertisements and campaign efforts, and media/information environments on individuals' political attitudes and behavior. Along the way, students will gain a deep proficiency in experimental design and develop foundational skills in statistical analysis and basic programming.

Identical With: **CEAS273, ENVS273**
Prereq: **None**

GOVT274 Russian Politics
The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

GOVT275 Political Resistance to Dictatorships
The series of seminars is focused on different strategies of non-violent resistance against authoritarian regimes. We'll explore various aspects of building an efficient resistance movement--from fundraising to electoral strategies, from online communication to polling--based on best practices from countries all around the world. Pro-democracy activism and the fight against dictatorship is never an easy game to play; still, a lot can be derived from the existing

experience to make it more efficient. But even if the resistance movement is successful, it doesn't guarantee a perfect democratic transition: resentment and disappointment often start to prevail in the society very soon. In workshops and role-playing games students will be encouraged to put together feasible transition plans for different countries.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

GOVT277 Islamic Movements and Parties
This course examines the diversity of movements and political parties that take Islam as a reference point, and situates these discussions within broader debates around religion and politics. Through a variety of cases spanning from the Middle East and North Africa to Southeast Asia, we will explore the rise and evolution of different types of Islamic movements, and discuss different modes of mobilization, organization and interaction with the state and with other social and political actors. We will examine why some groups form political parties, and how they navigate the tensions between the needs of the party and the mission of the movement. We will consider how Islamic parties impact local and national politics, and in turn how they respond to shifting political terrains and challenges from within. The course will conclude with a reflection on "post-Islamism" and Western attitudes towards Islamic movements.

Prereq: **None**

GOVT278 Nationalism
Nationalism is the desire of an ethnic group, a nation, to have a state of its own. Nationalism emerged as a powerful organizing principle for states and social movements in the 19th century and was integral to the wars and revolutions of the 20th century. This course examines rival theories about the character of nationalism and tries to explain its staying power as a political principle into the 21st century. It looks at the role of nationalism in countries such as the U.S., France, India, China, and Japan, and nationalist conflicts in Northern Ireland, Quebec, Yugoslavia, the former U.S.S.R., and Rwanda. The course is reading- and writing-intensive.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT278Z Nationalism
Nationalism is a political movement advocating self-rule for a community that sees itself as having a common identity and shared historical fate. To different degrees, ethnicity, language, religion, and culture have been used to demarcate the nation's boundaries. There are some 6,000 nations in the world but only 200 states, so competition for self-rule can be fierce. This course introduces the main theorists of nationalism as a response to the rise of capitalism, and explores its complex relationship with liberalism, socialism, and democracy. Why does nationalism persist--even as capitalist globalization makes national economies more open and porous? We explore both state-level nationalism, which ranges from war and genocide to protectionist trade policy, and everyday or "banal" nationalism, which expresses itself through food, music, and sport.

We start off with relatively familiar cases from the developed world--the US, Brexit, Northern Ireland, and Quebec, and the classic cases of France and Germany. We then look at decolonization in Africa and the genesis of genocide in Rwanda. The socialist world is represented by the multiethnic federations of the Soviet Union and Yugoslavia. We then look at nationalism in Japan and China, followed by the Arab world. Finally, we look at the role of the internet in the propagation of nationalism. Students will be expected to read all four assigned books before the start of the class, and will have to write a three- to four-page response paper on one of the books.

GOVT281 Social Movements in East Asia
Despite East Asia's reputation for acquiescent populations and weak civil society, the region has been replete with social movements. This course assesses the state of civil society in both authoritarian and democratic societies in East Asia

by surveying contemporary social movements in China, Japan, South Korea, and Taiwan. The course is designed for students to gain an understanding of how civil society looks in East Asian countries and its role in social and political changes in the past and present times. Although the course will not be able to cover the entirety of social movements in the region, the course is to equip students with contextual knowledge and theoretical tools to take a critical approach to examining current and future social movements in the region.

Prereq: **None**

GOVT282 Activism in Exile
This course examines how social movements and political opposition groups adapt and adjust their activism when they are in exile. Through a variety of cases spanning from the Middle East to South Africa, we will explore what shapes diasporic activism and why some movements are more resilient than others. We will situate these discussions within broader debates around social movements and migration. After we consider what exile is, how different migration regimes emerge, and how conditions in the host states may vary, we will look at both cases of violent and nonviolent mobilization in order to understand what shapes diasporic activism. The course concludes with a reflection on what happens after exile, when movements and leaders return to their home country.
Offering: **Host**
Grading: **A-F**

GOVT284 Comparative Politics of Western Europe
The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian "second republic"?

GOVT295 Korean Politics Through Film
This course explores the contemporary politics of Korea through academic sources and films. Students will discover how the tumultuous history of modern Korea has contributed to the present political conditions in the two Koreas. The course will focus on issues surrounding major political events in both South and North Korea, including Japanese colonialism, Japan-Korea relations, Korean War, military dictatorships, economic development, democratization, neoliberalism, inter-Korean relations, and US-Korea relations. Films and documentaries spanning from the 1990s to the present will highlight these political issues and events through the eyes of Korean filmmakers. The course will explore how films problematize political issues and how a film's storytelling compares to actual history and scholarship on Korea.
Offering: **Crosslisting**

GOVT296 Japanese Politics
This introductory course in Japanese politics begins with an overview of the Japanese political system: its historical origins, institutional structures, and main actors. The course then moves on to explore specific policy areas such as industrial and financial policy, labor and social policy, and foreign policy. The course culminates in student research projects presented in an academic conference format of themed panels.

GOVT298 Terrorism and Film
This course provides an overview of the major concerns and debates in the study of terrorism and political violence, and it uses the prism of cinema to further grapple with the complexity of political violence. We will explore the root causes of violence and the varied reasons why individuals and organizations turn to violent tactics. We will also discuss what policies are most effective and desirable, problematizing our understanding of security, and examining the implications of counterterrorism for civil liberties, human rights, and international law. The films assigned contextualize the theoretical issues and address the question of political violence from alternative perspectives: those of the perpetrators of violence, victims, soldiers, government officials, and police officers. In this immersive winter session, students are expected to watch the films outside of class, between the morning and the afternoon class session. Through the readings, films, discussions and assignments, the goal of the course is to help you understand the major controversies and debates surrounding terrorism, to equip you with the tools to critically engage with the media, academic and policy discourses on political violence, and to enhance your speaking, writing and analytical skills.

GOVT302 Latin American Politics
This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include: why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

GOVT303 War and Society
While most societies condemn physical violence between individuals, they condone and encourage collectively organized violence in the form of warfare. War is obscene, yet all modern societies have engaged in warfare. This course will examine war as a social, political, and historical phenomenon. We will look at the way in which wars have led to the consolidation of political power and the acceleration of social change, as well as the relationship between military service and the concept of citizenship. The course also examines the crucial role played by technology in the interaction between war and society. Films and novels will be examined to test to what extent these literary works accurately reflect, or obscure, the political, social, and technological logic driving the evolution of war. Our examples will include warfare in premodern society, the gunpowder revolution in early modern Europe and Japan, the American Civil War, colonial wars, World War I, World War II, Vietnam, and Iraq.

GOVT305 Challenges to Democracy in East Asia
East Asia is home to a remarkable diversity of political regimes, economies, religions, and cultural traditions. The region includes one of the most repressive countries in the world, North Korea, alongside authoritarian regimes like China that tout political stability and rapid economic growth. At the same time, Japan, South Korea, and Taiwan represent fully consolidated democracies -- albeit ones that continue to grapple with significant domestic and international challenges. This course examines the workings and challenges of democracy in East Asia by addressing questions such as: What are the defining features and challenges of existing democracies in East Asia? To what extent are these features unique to the region? Why do some citizens in East Asia find authoritarianism appealing?

How do historical experiences with authoritarian rule shape democratic institutions and political culture today? And does China's authoritarian model present a challenge to democracy in the region?

GOVT307 Identity & Politics of South Asia: India, Pakistan, and Afghanistan
In this course, we will cover the politics of India, Pakistan, and Afghanistan. We will consider identity issues going back to the Partition of India to present-day religious and sectarian tensions. Other themes include caste and indigenous politics, gender identity, authoritarianism and corruption, Hindutva and Islamist Terror, diaspora politics, state-level security dimensions, and how countries in the region balance their relations with China and India. Lectures along with Bollywood and regional film screenings will be complemented with discussions with South Asia experts via Zoom.

GOVT308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.

GOVT309 Contemporary Challenges in Latin American Politics
Latin America's contemporary challenges include corruption, crime, economic woes, social policy shortcomings, populism, declining political trust, the erosion of fragile democracies, and the political underrepresentation of women and minority groups. This course examines the historical legacies, international influences, and social-structural factors that shape and constrain how Latin American citizens and governments are responding to these challenges. Weekly readings and discussions, along with a succession of analytic exercises, will prepare students to write a research paper on a Latin American politics topic of their choice.

GOVT311 United States Foreign Policy
This course provides a survey of the content and formulation of American foreign policy with an emphasis on the period after World War II. It evaluates the sources of American foreign policy including the international system, societal factors, government processes, and individual decision makers. The course begins with a consideration of major trends in U.S. foreign policy after World War II. With a historical base established, the focus turns to the major institutions and actors in American foreign policy. The course concludes with an examination of the challenges and opportunities that face current U.S. decision makers. A significant component of the course is the intensive discussion of specific foreign policy decisions.

GOVT312 Strategic Dilemmas in Politics
Politics is full of strategic interactions: politicians and voters, enemies and allies, office-holders and bureaucrats. But while the details might be different from issue to issue, the challenges are often the same. How can a large group cooperate on a common goal? How can you make a promise or threat credible?

How can you learn someone's true intentions? This course uses in-class games and simulations to explore some of the key lessons that game theory can teach us about politics. There will be a bit of introductory game theory, but the focus will be on the intuition, not the method. The goal is to identify and analyze common strategic challenges in politics.

GOVT313 Civil Wars and Armed Groups
Since 1945, five times as many people have died in conflicts within countries (between governments and rebels/militias) than in conflicts between countries. This course digs into the big questions about civil wars: Why do they begin? Who participates? How do they end, and why do some never end? How do combatants treat civilians, and why? Class will be primarily discussion-based, evaluating common answers to these questions, and the evidence behind them, from conflicts all over the world. Along the way, students will design their own research question and a strategy to answer it. The course is especially appropriate for sophomores and juniors who are potentially interested in writing a thesis, but relevant to any student interested in war and peace.

GOVT314 Public Opinion and Foreign Policy
The relationship between leaders and the public remains a core concern of democratic theorists and political observers. This course examines the nature of public views on foreign policy, the ability of the public to formulate reasoned and interconnected perspectives on the issues of the day, and the public's influence on foreign policy decisions with a focus on the U.S. We will consider the role of the media and international events in shaping public perspectives and public attitudes toward important issues such as internationalism and isolationism, the use of force, and economic issues. This course provides an intensive examination of a very specific area of research. As such, strong interest in learning about public opinion and foreign policy is recommended.

GOVT315 Policy and War through Film
This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

GOVT316 Wars of Resistance in Scholarship and Film
This course explores the theory, practice, and interpretation of wars that see ostensibly stronger powers wage wars against relatively weaker resistance movements. It combines scholarly readings and interpretive films to gain a deeper understanding of how and why resistance and insurgency can prevail when confronting adversaries who are numerically superior. Students will analyze the inescapable paradoxes that can make wars of asymmetry difficult for stronger states. The seminar discussions will develop a keener grasp of the logic that permeates wars where the weak resist invasion and occupation. This course intersects international security studies, history, and conflict studies. This course will improve knowledge about asymmetric wars and for critical analysis. Though there are no prerequisites, it is desirable that students have previously taken a course in conflict studies or war.

GOVT318 America's Unexceptional War of Independence
Americans often think of the War of Independence as an exceptional event, focusing on the unique people, ideas, and historical turning points. But in many ways the key actors in the War of Independence faced similar challenges that others around the world have faced and continue to face: how to organize around political grievances, how to prevent a conflict from escalating, how to manage trade relationships, and how to navigate great power politics. Through lectures, group discussions, and essays, this course will compare the American experience to other conflicts, examining how the American experience reflects broader patterns.

GOVT319 Citizenship and Statelessness in Comparative Perspective
This course will investigate how modern nation-states decide who has the right to citizenship, along with situations where certain groups are denied citizenship of any country. Every country in the post-Westphalian world-system hosts large numbers of minorities and migrants. Thus, it becomes essential for each nation to define its territorial boundaries and who belongs to it. Are citizenship rules determined mainly based on material considerations, such as economic and security issues? Or are such policies based on racial and civilizational notions shaped by encounters with pre-colonial and colonial forces? In this seminar, we will consider these questions about belonging and territorial definitions, which are often politically contested. We will start by paying attention to various theoretical explanations of citizenship, and then look at case studies from non-Western and Western settings. Class discussions will be complemented alongside discussions with experts who will join us in-person on campus or via Zoom.

GOVT320 International Relations of South Asia
Since independence in 1947, the countries of South Asia have seen major wars, a nuclear arms race, dozens of small insurgent movements supported by neighbors, and complicated politics around identity, citizenship, and migration. At the core of these issues are questions about whether and how to transition a multiethnic, multireligious empire into nation states. This course will explore the

major questions of war, peace, and politics in modern South Asia. Why did India and Pakistan fight three wars in the first 25 years of independence, but have largely avoided open conflict since? Why have some insurgencies escalated into major conflagrations while others have simmered at low levels for decades? How have religion and language shaped patterns of migration and citizenship, and been shaped by them in return? Along the way, students will design and conduct their own research on key issues in South Asian politics.

GOVT321 Topics in International Law
This course is a seminar on international cooperation and international law (IL) for students of international relations. The course's primary goal is to enhance students' understanding of how ILs facilitate or hinder international cooperation. The course has four modules: a) Introduction, b) IR theories on ILs, c) Application (Trade, Climate, Gender, Conflict), d) Future of ILs. The emphasis throughout the course is on the role of politics, understanding why ILs operate as they do, and recent episodes that illustrate the issues. Throughout the course, students will learn to produce concrete policy recommendations drawing from key research in the literature on ILs, practice giving others constructive feedback on peers' policy proposals and revise their own projects, and think critically about theories of international relations.

Prereq: **None**

GOVT322 Global Environmental Politics
This course is an introduction to environmental politics for students of international relations. This course aims to enhance students' understanding of how international politics may affect environmental outcomes. The course has four modules: a) Introduction, b) IR theories and the environment, c) Application to select environmental issues, d) Policy implications. The introductory module presents several concepts that are important to understanding environmental cooperation. The IR theory module introduces canonical IR theoretical frameworks. Primarily, this module investigates how states' power dynamics, international institutions, domestic political systems, and NGO networks may explain the likelihood of international cooperation on environmental issues. The third module applies the theoretical concepts to real-world policy issues such as climate change, water air pollution, and endangered species. The final module focuses on the future of environmental cooperation among states. Assignments include an in-class quiz on key concepts, a role-based negotiation simulation, a podcast episode analyzing an environmental agreement of student choice, and a final exam. By the end of the semester, students think critically about environmental agreements by applying theories to policy examples.

GOVT323 Refugees in World Politics
The primary objective of this course is to provide students with i) an introductory overview of the political, economic, social, and security determinants of refugee flows; and ii) the political and social responses of receiving governments and societies to them. Using both historical and contemporary case studies, this course will highlight security concerns engendered by internal displacement and transnational migration. These include armed conflict, smuggling, trafficking, and terrorism. This course will also highlight the concepts of citizenship in receiving states, and the roles played by the international institutions in influencing state policies towards refugees.

GOVT324 Africa in International Politics
The continent of Africa features 54 countries and the fastest growing population on the planet. This course contextualizes the African continent in international politics, and provides an overview of the many ways (especially sub-Saharan) African states engage with foreign countries, with international institutions, and with each other, from colonial times to the present. We'll focus on integrating the African continent into theories of international relations, including African countries' roles in the international political economy and in international security. Topics include colonialism, trade, aid and structural adjustment programs, sovereign debt, international and regional organizations and blocs, security arrangements, and African states' roles in ongoing international climate governance. The focus of the course is on the foreign policy and international interactions of countries in sub-Saharan Africa. The course therefore provides a broad overview of diverse topics and countries, emphasizing breadth over close study of a particular case or topic. The assignments provide an opportunity for students to add depth to their knowledge of particular countries and contexts of their choosing. In addition to giving students the opportunity to learn more about politics in contemporary sub-Saharan Africa, the course will provide students with experience testing social scientific theories against empirical evidence, conducting original research using primary and secondary sources, and writing succinct research reports. Students will analyze both issues of academic and political importance.

GOVT325 Solving the World's Problems: Decision Making and Diplomacy
This course represents a hands-on approach to decision making and diplomacy. It is designed to allow students to take part in diplomatic and decision-making exercises in the context of international political issues and problems. Important historical decisions will be evaluated and reenacted. In addition, more current international problems that face nations today will be analyzed and decisions will be made on prospective solutions. Finally, various modern-day diplomatic initiatives will be scrutinized and renegotiated.

GOVT326 Political Consulting for International Business
This course is an applied course in political consulting skills for international business. It is designed for students who are directed toward a career in international business. Entry to the course requires a strong track record in prior involvement and or interest in international business. Emphasis will be placed on developing the most important political skills related to working in an international corporation. Learning will take place by applying what has been learned in real-life international business scenarios. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional environments. The course asks the class to function as a working committee of top executives trying to confront important international business challenges.

GOVT327 Experiments in International Development
Do policies designed to promote development around the world actually work? Do they sometimes produce effects we didn't expect? This seminar teaches the experimental method of social science research and applies it to these questions. Students will read examples of how social scientists have used experiments to study international development -- broadly defined -- including foreign aid, conflict and violence, illicit finance, elections, climate cooperation, trafficking in persons, and migration. Over the course of the seminar, students will design and analyze their own experimental research project and will write either an academic research article or an impact evaluation policy report. The seminar is especially appropriate for any student considering a career in policy or social science. Throughout this course, students will learn about experimental methods. They will also learn how to form a research question, conceptualize and measure variables, develop testable hypotheses, select an appropriate case/unit of analysis, write a literature review. These skills may be especially helpful for students who pursue an honors thesis or other original research project.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT329 International Political Economy
This course examines the political consequences of and responses to international economic exchange between countries with an emphasis on whether climate change changes this political behavior. In particular, we will look at how domestic actors, such as voters, firms, and associations, respond to and try to shape government action on issues such as trade, international finance, migration and foreign direct investment. Rather than consider climate change and its policy as a separate domain, this course will focus on the interaction between the climate and other policy areas in international political economy (IPE). Students will be provided with an introduction to these topics via lectures and discussion sections as well as data analysis and social science research techniques in weekly labs.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT330 Policy and Strategy in War and Peace
This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.

GOVT333 International Organization
Why do international organizations (IOs) exist? Do they shape outcomes in international politics? Who runs international organizations? This course considers the role that institutions have played in addressing global problems since World War II. Some argue their role is trivial, since there is no international police force that can constrain states' behaviors. Others argue their role is profound, as institutions help states to overcome important barriers to cooperation. And just as in domestic institutions, the rules of IOs represent some interests more than others, creating opportunities for controversy and contestation. We will apply these theories to understand several institutions governing economic stability, environmental sustainability, human rights, security affairs, and global development. At the conclusion of the course, students will be able to explain why these IOs exist, how well they work, and what challenges they face in the future.

GOVT336 New Topics in International Political Economy
This course helps students understand how states cooperate in three new areas: global health, climate, and identity politics. The course introduces new IPE research on health, climate, and identity, focusing on these issues' relationships with interstate economic interactions. The course has four modules: a) IPE theory review, b) Global health and trade/intellectual property, c) Environmental protection and trade/foreign direct investment, d) Identity politics and globalization. After a brief review of IPE theories in the first module, the course will touch on specific topics of importance. For example, the health unit explores the relationship between intellectual property rights and global health outcomes, how trade policies affect states' responses to health crises, and how the global trade regime (i.e., the WTO) mediates those policy responses. The environment module investigates how economically developed countries use trade agreements to protect the environment and why some companies support climate actions more strongly than others. The identity module examines how gender, race, and ethnicity may shape individual preferences on globalization. In the process, students will apply IPE theories to understand new challenges the world faces. This course is designed for students who are already familiar with core concepts in IPE, including those who have previously taken GOVT 329. However, GOVT 329 is not a prerequisite.

GOVT338 Global Modern Political Thought
Modern political thought is defined by questions of the consolidation of state power, democratic governance, the rise of capitalism, and the legitimate uses of violence. Yet, these questions are intertwined with questions of colonialism, racism, and inequality. How does capitalism give rise to new ways of life across different times and places? What new forms of subjectivity arise with the consolidation of the nation-state, the emergence of new forms of communication, and the rise of the so-called autonomous individual? What is the relationship between democracy, empire, and colonialism? This course will consider the writings of thinkers such as Thomas Hobbes, John Locke, Jacques Rousseau, and Karl Marx in dialogue with Franz Fanon, Mao Zedong, B.R. Ambedkar, Mahatma Gandhi, Kwame Nkrumah, Enrique Dussel, and others. This course is required for political theory concentrators in the government major.

GOVT339 Contemporary Political Theory
How shall we get along? This course examines some important 20th and 21st century theories of politics. Major issues include the role of reason and emotion in grounding the basic principles of our political lives, the conceptual foundations of liberal and civic republican democracy, and critiques of liberalism from communitarian, critical theory, and postmodern perspectives. We will explore what political theory can be today. This course, together with GOVT337 and GOVT338, provides a survey of major Western political theories; at least two of these courses are recommended for students concentrating in political theory.

GOVT340 Action and Inaction in Social Movements
This is a class on contentious politics that examines how the action-inaction binary shapes our understanding of social movement strategies, life cycles, resilience, and success. We will examine activity and inactivity in the context of a variety of social movements, diaspora groups, and rebel organizations, at various stages of their lifecycle. When is inactivity a failure of mobilization or a sign of weakness, and when is it an intentional strategy? What does "doing nothing" look like? Can it ever be an effective strategy for a group? When is inactivity a form of organizational defeat? To address these questions, we will look at different forms of "nothing doing": social movements that choose disengagement or tactics such as hunger strikes, exiled movements that focus on internal bonding and capacity building rather than overt activism, and rebel groups that intentionally abstain from violence or mobilization for prolonged periods.

GOVT341 Visions of Democracy
This course will explore diverse articulations of what democracy was, what it is, and what it could be. It takes its cue from Sheldon Wolin's suggestion that in political theory, putting forward a vision means mobilizing the imagination to illuminate otherwise hidden phenomena and communicate the theorist's values. The visions of democracy that we will analyze in the course were written in (or about) a wide range of time periods; center a variety of locations, including Latin America, Europe, North America, and South Asia; were expressed in different genres, from poetry to academic political theory; and present different valuations of democracy, from conservative critical to romantic laudatory.

GOVT342 Questioning Authority: On the Politics of the Teacher-Student Relationship
What is the authority of the teacher in an era where the legitimacy of institutions and curriculum are under fire? Can hierarchical relationships between teachers

and students be beneficial for learning and for political life? What are alternative conceptions of the teacher-student relationship? This course will explore different models of teaching within the history of political thought and beyond. From Socrates to the present, the context and manner of teaching has been just as important to political theorists as the content itself. The course will consider how questions of power, sexuality, risk, wisdom, and friendship inform different pedagogical styles and their implications for preparing citizens for democratic life. Readings include John Locke, Immanuel Kant, Alexis deTocqueville, John Dewey, Hannah Arendt, Mr. Rogers, Jacques Ranciere, Bernard Stiegler, Laura Kipnis, and others.

GOVT346 War on Terror in Contemporary Political Thought
In an ironic statement made to the men and women at Whiteman Air Force Base on October 19, 2001, Secretary of Defense Donald Rumsfeld claimed that in the emerging struggle that came to be known as the "War on Terror," Americans would be faced with a choice when confronting a new, ill-defined enemy: "We have two choices: Either we change the way we live, or we must change the way they live. We choose the latter." And yet, despite Rumsfeld's resoluteness that Americans would stand firm and never "change the way we live," there is hardly a single aspect of American--and indeed global--society, culture, and politics that has not been altered or even dramatically transformed by the attacks of September 11 and the US response. The discipline of political theory practiced in the United States and across the world was no exception. In the immediate aftermath of the attacks, a new set of questions were placed on the agenda of political theorists, and older, even perennial questions taken up by the discipline were sharpened or pursued with greater urgency and intensity. This course provides students with a snapshot of a set of theoretical debates that the War on Terror provoked (and still provoke), including debates related to the limits and character of patriotic attachment, the question of the US's imperial ambitions, and how we might forge new conceptual tools to understand forms of terrorist and state terrorist violence. These debates will not simply enable students to think about September 11 and the War on Terror specifically. This course will introduce students to a set of concepts and questions that oftentimes precede, and indeed move far beyond the context of September 11 itself. In short, the attacks of September 11 and the War on Terror provide us with an entry point to examine concepts that are integral parts of the current toolbox political theorists use to make sense of the world.

GOVT347 Political Freedom
Is political freedom about doing what you want as long as you don't hurt anyone else? Is it about collectivizing power or actively participating in governance? Is freedom an inherently individual practice or a necessarily collaborative one? A private or public matter? Does it depend upon rights or the transformation of social conditions? Does it emerge from political representation or direct democracy? Is capitalism the scene of human domination, human freedom...or both? Is freedom a concept, a principle, or a practice? What is the relationship of political freedom to power, equality, and community? What is the relationship of social identity to freedom -- is it emancipatory or imprisoning? Is freedom something we even desire, or do we experience it as a burden? What happens when Dr. King meets Karl Marx, when John Stuart Mill meets Kate Bornstein, when Cathy Cohen meets Milton Friedman? In this course, we will pursue these kinds of questions through consideration of classics in Western political theory, contemporary writings, and some films. We will neither settle the question of what freedom is nor the question of how to produce it. However, we will deepen our appreciation of its importance and complexity.

GOVT348 Justice and Equality
To what extent and in what ways does justice require that people have (roughly) equal life prospects? That issue has become increasingly urgent as inequality has increased rapidly during the last 40 years or so. Although inequality in the US has grown faster than in most other (already developed) countries, the increase in inequality is widespread. At the same time, at the global level there has been a reduction of inequality as economic growth has delivered hundreds of millions of people from deep poverty. This class will examine the relationship between equality and justice. Our principal concern will be to assess how, in what ways, and among whom justice requires equality, but we will also look at the dynamics of inequality--how inequality has developed historically, the factors explaining the recent surge of inequality within countries while equality of life prospects has lessened globally, how growing inequality may be affecting domestic politics, and the policies that could address the issue of equality.

GOVT350 Law, Justice, and Democracy
In this course, we will explore law from a political-sociological perspective, in relation to the historical, political, and cultural contexts within which it exists. In the first part of the course, we will address the question "what is law?" by exploring a variety of theoretical approaches (Marxian, Weberian, and Durkheimian perspectives, legal formalism, legal realism, and critical legal studies). We will then move on to discussing the relationship between law and justice. In the third part of the course, we will talk about the politics of crime and punishment, exploring a number of key issues, including the birth of modern prison, rising incarceration rates in the U.S., the emergence of drug courts, and the politics of death penalty. In the fourth section, we will discuss the role courts play in constructing political and social reality. What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases. In the final section of the course, we will discuss law's place in the American system of government by exploring the evolving relationship between courts, the presidency, and Congress.

GOVT352 Deception and Democracy
What's the best way to tell if a politician is lying? According to the punchline of this old joke, you should simply determine whether their lips are moving. This course will undertake a more complex and nuanced analysis of political deception and democratic government. Is lying for political gain undemocratic? What ethical duties and obligations befall representatives and citizens within a democracy? Where do we draw the line between persuasion and deception? By examining the philosophical treatment and historical practice of political deception - from Plato's Myth of the Metals to Donald Trump's illusory trade deficit with Canada - we will broaden our understanding of various participatory, deliberative, and epistemic forms of democracy and their procedural and substantive commitments.

GOVT354 Marx and Marxism
What does it mean to "think like a Marxist" or "see the world as a Marxist" might? What are the fundamental concepts, categories, methods, and modes of inquiry we associate with the work of Karl Marx and those who consider themselves "Marxists"? What are the significant political, social, and theoretical problems that motivate scholars, activists, and citizens who participate in this ongoing tradition of thought and practice? This course will provide students with points of entry to make sense of these questions, placing particular emphasis on Marxism as a multifaceted and evolving method that rather than a dogmatic worldview that sets forth a series of rigid truth claims. Together, we will work to decipher some of the key texts produced by Karl Marx and others within the Marxist tradition. This will in turn enable us to parse out a diverse set of theoretical, historical, empirical, and normative questions, which, in addition to those above, include the following: 1. What is capitalism? How did Marx believe it worked, and how do contemporary Marxists believe it works in the present? What, if anything, is wrong with capitalism as a mode of social organization? What are the theoretical tools Marxists use to approach these questions? What are the diagnostic and prescriptive elements of the theory? 2. How do Marxists tend to explain contemporary socio-political pathologies like racialization, class domination, imperialism, fascist resurgence, environmental catastrophe, gender-based domination, or the degradation of democratic politics? What might this method allow us to see that other modes of inquiry cannot? 3. How, if at all, must Marxist styles of inquiry adapt in order to maintain their relevance as analytical tools? How have more contemporary Marxist thinkers expanded, modified, or critiqued the work of Marx in order to maintain the life of the tradition? Which new categories have been integrated into Marxist theorizing in recent decades, and to what effect? 4. What is insufficient with the Marxist method? What inevitably falls outside of its purview? Is this a fatal flaw or a problem to be corrected? Is it appropriate for us to ask that this method allow us to explain everything? 5. What is "Marxism" and how might it differ from the work of Marx himself? How do we link certain seemingly disparate literatures together as a coherent movement? In other words, what makes "Marxism" an "ism"?

GOVT355 Political Theory and Transitional Justice
Transitional justice refers to the variety of legal, political, and social processes that occur as a society rebuilds after war; it includes war crimes trials, truth commissions, and the creation of memorials. Although the term "transitional justice" is a recent one, the philosophical issues contained within it are at the core of political philosophy. What kind of society is best? What is the relationship between political institutions and human nature? What does justice mean? The purpose of this course is to understand the issues of transitional justice from both practical and philosophical perspectives and will include case studies of World War II, South African apartheid, and the genocide in Rwanda.

GOVT356 Theorizing Subjection Beyond Contract and Consent
What modes of subjection does political life elicit from us, and how do they underpin and challenge our ideas of consent? Can we give genuine consent when we have already been subjected to parental authority? When we have unconscious desires we cannot avow? When we lack meaningful control over the norms that constitute our political, social, psychic lives? This class examines the centrality of the notion of consent to the liberal democratic order, and how it requires a prior mode of subjection that the liberal subject cannot knowingly or willingly consent to. In Unit 1, we read classic formulations of the liberal individual who consents to political rule (Locke, Hobbes, Rousseau). We look for the ways these theorists presuppose and disavow practices of subject formation that are beyond consent--parental authority, the informal authority of mores and norms, deception, precarity, ideology. We then read critiques of the social contract tradition that highlight the constitutive exclusions of liberalism, and ask how consent bears upon subjects that are constituted by the state as included others (Pateman, MacKinnon, West, Mills, Simplican). In Unit 2, we read critiques of the liberal subject that interrogate the possibility of genuine consent, examining issues of false consciousness (Marx, Marcuse), self-opacity and the unconscious (Freud, Benjamin), discursive constitution (Foucault), and performativity (Butler). We use these thinkers to interrogate the distinctions underpinning liberal notions of consent, such as autonomous and heteronomous, authentic and inauthentic, public and private. In Unit 3, we examine how the notion of consent is changing in in our current political moment, in which the liberal democratic state is waning, but the notion of consent persists, such as under neoliberalism (Brown, Feher, Berlant), sexual assault (Kessel, Halley, Murray), and right-wing movements (Grattan, Anker). We close by considering what might be alternatives to and reconfigurations of this model of consent (late Foucault, Maxwell).

GOVT357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

GOVT358 Fascism
In 1932, Benito Mussolini proudly declared the twentieth century to be "a fascist century," one that would shed the supposedly degenerate nineteenth-century aspirations towards "socialism, liberalism, and democracy" and their attendant assumptions of progress, equality, and rationalization. This prediction surely did not come to pass, yet the interwar period of the twentieth century (1918-1939) and the fascist movements that incubated during this period have left an indelible stamp on global history. The twentieth century was not "a fascist century," but it was surely a century haunted by the global experience of fascist terror. At the same time, fascism cannot be consigned to history as some kind of political artifact. The afterlives of interwar fascist movements have in many cases been vibrant, and neo-fascist and "post-fascist" movements continue to maintain degrees of influence in western and non-western countries alike. The so-called "populist turn" in the decade after the financial crisis of 2008 has also brought renewed attention to potential linkages and continuities between certain contemporary political formations and the beliefs and practices of the fascists of the interwar years. But what exactly is fascism? This seemingly basic question has vexed scholars for decades, and provoked countless competing interpretations that settle on vastly different conclusions. Additionally, methodological debates concerning how to approach these movements as subjects of scholarly inquiry have been no less contentious. This course will introduce students to an important set of debates and interpretations regarding fascism's character as a doctrine; the sociological, economic, and political conditions that facilitated its rise; the question of how fascists mobilized support; and the fundamental questions related to how fascists governed and why. Importantly, we will also approach the theoretical questions of the foundations of fascist ideology, how fascists imagined their ideal political subjects, and the kinds of affective energies (rage, nostalgia, disgust, fear, desire for redemption/purification, etc.) that facilitated distinctly fascistic sentiments. Our course will not provide students with fixed, dogmatic answers to each of these questions, but will rather grant students access to a set of tools that will enable them to engage in responsible, scholarly inquiry on these matters of pressing political concern.

GOVT365 Cybercrime and Cybersecurity
This course will cover the elements of "computer crime" under U.S. law, how computer-based crimes are investigated and prosecuted, and current legal and policy developments that affect data security and privacy. The course will also address U.S. cybersecurity policy and the governance of offensive cyber operations, as well as the role of private-sector institutions such as providers of critical infrastructure, electronic communications, and data storage. Topics will include hacking, ransomware, botnets, government access to data, geolocation information, data privacy regulations, and the role of cyber activity in international affairs. The course is not a technical or Computer Science course, but will involve high-level discussion of computer-related topics such as how computers, networks, the internet, and cloud storage work. Students will not need to have a background in these areas and the professor will provide supplemental materials in this area.
Offering: **Host**
Grading: **A-F**

GOVT374 Seminar in American Political Economy and Public Policy
In 2023, the standoff over the debt ceiling threatened to have catastrophic consequences for the U.S. and the world economy. Why were the politics so complicated? Why were the stakes so high? This seminar explores the long-term fiscal challenges facing the United States grounded in a broader discussion of the postwar political economy. Although the nation exited World War II with a record level of debt, within three decades, the debt-to-GDP ratio had fallen by almost 80 percent. However, significant tax cuts in the 1980s and again in the 2000s, the growth of entitlement spending, and a series of shocks (e.g., two wars, the financial crisis, and the COVID-19 pandemic) brought about a great reversal. Within the next few decades, the national debt is projected to exceed 200 percent of GDP. By that time, interest payments will be the largest component of federal spending. Moreover, absent policy change, the trust funds supporting Social Security and Medicare will become insolvent, placing greater pressure on public finances. This seminar will explore the structure of federal finances, the politics of taxation, the growth of entitlements as a share of federal spending, the ways in which polarization has undermined the budgetary process, and the normative and practical implications of the debt. We will conclude with a discussion of competing reform proposals.

GOVT375 American Political Development
This is a course about the big questions in American politics. What is it all about? What does it mean to be living under a text written more than two centuries ago? Is the very concept of development an oxymoron for constitutional government? This course introduces students to a scholarship and a method of analysis that melds the historical with the institutional, applied to understanding the evolving state/society relationship in American political life. We will examine the ways in which developing state institutions constrain and enable policy makers; the ways in which ideas and policy-relevant expertise have impacted the development of new policies; the ways in which societal interests have been organized and integrated into the policy process; and the forces that have shaped the evolution of institutions and policies over time. This seminar will provide an opportunity to survey the literature drawn from several theoretical perspectives in the field and to consider competing arguments and hypotheses concerning the development of the American state and its changing role in the economy and society.

GOVT376 Political Polarization in America
In the 1950s, political scientists feared that weak parties in the United States threatened democratic accountability. Today, many political scientists argue strong, ideologically extreme parties distort representation. Undoubtedly, things have changed, but why? Several possible culprits exist, including partisan gerrymandering, primary elections, the ideological realignment of the electorate, and changing congressional procedures. We will cover the possible explanations and try to decipher what explanation, or combination of explanations, is most convincing. While we evaluate the arguments for why polarization has increased

we will also debate the merits and drawbacks of strong parties at the elite level. Finally, we will examine to what extent polarization among elected officials and activists reflects polarization in the public.

GOVT377 American Political Thought
This course will provide students with a thorough discussion of the main currents of American political thought. We will explore a selection of key texts and speeches that have helped to shape American political culture. Beginning with the Founders and ending with the contemporary era, we will cover moments of critical change between then and now. We focus on the intellectual battles of the past because, apart from being rewarding in themselves, they help us to think critically about contemporary politics. Accordingly, this course will emphasize how ideas give rise to individual identities, how they motivate political actors, and how they explain political outcomes.

GOVT379 Access to Civil Justice
In this course, students will explore contemporary issues related to the public's ability to access civil legal advice, legal representation, and fair outcomes within our civil justice system. Students will be exposed to scholarship that highlights the difficulties the public faces when they have justice problems, including 1) exclusion from legal processes; 2) lack of resources; 3) lack of awareness of rights; 4) difficulty recognizing the nature of their problem; and 5) lack of confidence in the justice system. The course will culminate with student-designed research projects investigating and proposing solutions to an access to justice question relevant to a collaborating local, state, or national civil justice organization's work.

Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT380 Public Opinion and Polling Lab
Survey research is a crucially important tool for understanding how everyday people think about any given topic. This is especially important to those studying government in a democracy as public preferences serve as a key guide to legislators and policy makers on how the government should function. However, there are a number of challenges that can make getting an unbiased assessment of the public's true beliefs difficult. This course is meant to serve as a more advanced hands-on seminar that will expose participants to the exciting and messy nature of survey research. More specifically, students will get first-hand experience designing surveys and analyzing the results but will also work through the many challenges in assessing public attitudes, including how to conceptualize and measure opinions and how to sample and weight data appropriately.

Credits: **0.50**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT381 DeltaLab: Computational Media Analysis
The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.

GOVT382 Erosion of Democracy
This seminar will explore the characteristics, causes, and consequences of "democratic backsliding" -- deterioration in the quality of democracy that may or may not lead to democratic breakdown. Topics to be covered include the meaning of democracy, the measurement of democracy, the right to vote, electoral integrity, democracy and the rule of law, democracy and populism, democracy and the Covid-19 pandemic, dimensions and sequences of democratic erosion, the causes of democratic erosion, and resistance to democratic erosion.

GOVT384 Representation in Congress
This class will examine the nature of congressional representation both from the perspective of how individual members represent their constituents and how effectively Congress as a whole represents the diverse interests of the country. We will pay particular attention to how reelection motivates members of Congress's behavior and how increases in polarization and the centralization of power in the hands of party leaders has affected the nature of congressional representation. In addition, we will focus on the degree to which certain groups are over or underrepresented in Congress and the resultant consequences for policymaking and institutional legitimacy.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT385 Women and Politics
In this course we will study a variety of topics related to the theme of women and politics: women's political participation, the gender gap, women in political parties, female leadership, and women's issues. Because women's political

engagement is affected by their position in society and in the economy, we will also study topics such as inequality, power, discrimination, and labor force participation. Although we will consider these issues in the U.S., our approach will be strongly cross-national.

GOVT386 The Nuclear Age in World Politics
This course examines the role of nuclear weapons in world politics. Why do states acquire nuclear weapons? What are they good for? Do nuclear weapons make weak states more secure by leveling the playing field, or less secure by making them targets for annihilation? Are nuclear weapons a force for stability or instability? Are missile defenses defensive or offensive? Are these weapons still relevant, or is it time to rethink their usefulness? Topics include rational and extended deterrence, strategic doctrine, nuclear superiority, the stability-instability paradox, nuclear proliferation, rogue states, nuclear terrorism, missile defense, and Cold War crises.

GOVT387 Foreign Policy at the Movies
Recent research on public opinion has suggested that public attitudes about foreign affairs are informed by many non-news sources. This course examines the messages and information provided by movies with significant foreign affairs content. The questions considered are, What are the messages about international politics sent by the movies? Are these messages consistent with the understanding of the events and processes within the political science literature? What are the implications of movies and the information they provide for democratic governance? Students will watch the movies outside of class. Class periods will be devoted equally to discussion of the political science concepts and their portrayal in films.

GOVT389 Globalization in Practice: Activism in the Global Village
Globalization is considered by many to be the most powerful transformative force in the modern world system. Modernization and technology have effectively made the world a smaller place with respect to the interdependence and interpenetration among nations, which are greater today than at any time in history. But while most agree on the transformative power of globalization, many disagree on its nature and its effects on modern society. Liberals hail globalization as the ultimate means to world peace and prosperity. Leftists see it as a means of reinforcing the inequality and unbalanced division of labor created by modern capitalism. Still others, such as mercantilists and nationalists, see it as a source of political instability and cultural conflict. In the final analysis, globalization carries a variety of malign consequences but also produces abundant means for advancing life on our planet. This class will approach globalization through an activist platform. Each student will be an activist and work on solving real world problems that are produced by globalization. But globalization has also generated a great many resources and outcomes that can be used by activists to solve these problems. Students will learn to use these as building blocks for a better world. This class is heavily project-based. It applies theories and learning to real life situations. There is also much teamwork involved. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional activist environments.

GOVT390 Presidential Foreign Policy Decision-Making
In the realm of foreign policy, good choices can avoid or win wars, while poor choices can lead to disaster. Although analysts consistently evaluate the quality of US presidential foreign policy decision-making, the fundamental aspects of good and poor judgment remain controversial. This course starts with a consideration of the effects of both individual character and decision-making processes in determining the quality of foreign policy choices. The majority of the course focuses on these issues through the intensive simulations of foreign policy decision-making, with students taking on the roles of the major players.

GOVT393 The Politics of Authenticity
Is there such a thing as an authentic self? If so, can politics help us realize it? Fifty years ago, authenticity was a thriving political ideal, invoked by radical feminists, black liberation movements, gay and lesbian activists, Marxists and conservatives alike. Over the past four decades, however, political appeals to authenticity have come under heavy scrutiny. Some claim that appeals to authenticity inadvertently marginalized individuals who are not "true women," "real blacks," or "actual natives." Others argue that the idea of an authentic culture can be deployed to constrain individual members of cultural minorities. Where does authenticity reside--in gender, sexuality, experience, or culture--and how do we know which one is "real"? Is it worth faulting politicians for hypocrisy if there is no such thing as a "true self"? What becomes of certain emancipatory or justice claims--such as those coming from trans-politics or multiculturalism debates--without a notion of authenticity? In this course, we will discuss what authenticity is or might be, how it has been conceptualized in political theory and contemporary social movements, and why it has become an object of widespread suspicion and continuing appeal.

GOVT394 Law, Justice, and Democracy
This advanced research seminar will study law though a political sociological lens. Students will write a major term paper exploring a theoretical or empirical question.

We will ask: What is law? What does it mean to think of law as a social construct? We will explore how these questions have been answered by social theorists like Marx, Weber, Durkheim, and Foucault, and by legal scholars writing in the tradition of legal positivism, legal realism, and critical legal studies.

We will talk about the relationship between law and justice. What does it mean for laws to be unjust? What are the normative arguments that have been made about how to respond to unjust laws?

We will discuss how social phenomena get legally constructed. Who is a person? What constitutes speech? What constitutes religion? What is a crime? What is gender? Who is a criminal? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

We will spend some time on questions of crime and punishment. We will talk about the history of modern prison, and why the carceral state has expanded in the U.S. We will also talk about death penalty, and how and when the modern state kills.

Finally, we will talk about the place of courts in the American system of government, and policymaking.

GOVT395 Caste, Race, and Democracy
Drawing on the resources of social and intellectual history, political theory, literature, and social science, this seminar will explore the intimacies and differences between two forms of social differentiation: caste in South Asia and race in the United States. We will focus, in particular, on the relationships between caste formation, racial formation, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression.

GOVT396 Intro to Human Rights Advocacy Seminar
This course is limited to students already admitted into the Human Rights Advocacy Minor (HRAD-MN).

Fresh from having completed the Human Rights Standards Course (CSPL-228), you will already have a good understanding of how global and domestic human rights institutions should (in principle) function to respect, protect, and fulfill human rights norms. In this 1.5 credit seminar we turn our attention towards the specific methods of human rights activism. The seminar is structured as an intensive workshop where we practice and refine skills, challenge ourselves and our classmates to reflect deeply about our emerging identities as aspiring human rights activists, eat lunch together, and prepare actively for our human rights fact-finding practicum (which will take place during the summer break).

The course continues some of the themes raised during the Human Rights Standards course. We will discuss what others have written about the ethics of "doing" human rights, but we will also develop our own personal ethical framework in anticipation of our own field research. Likewise, we will read what others have written about the process of effectuating attitudinal change about human rights, but we will also refine our own theories of change in the real-world contexts in which we will soon be working. Much of our learning will come about experientially and through thoughtful discussion, so please come to class prepared to engage.

GOVT397 Acting and Citizenship
From Plato's fears about the corrupting effects of tragedy on the civic devotion of citizens, to Rousseau's concerns about the theater as the cause of moral

decay, to Richard Sennett's contemporary arguments for an understanding of citizenship as a performance in the "theatrum mundi," the performance and spectacle of theater, through both watching and in acting, has been closely linked to expectations of democratic citizenship. This course will examine the history of acting as a way to consider what we are called to do to sustain democratic life. How is being a citizen or a juror the equivalent of playing a role? Can the practice of acting help develop skills of empathy and deliberation that are needed to navigate difficult political questions? On the other hand, can the "inauthenticity" of acting be a corrosive parallel that treats all civic interactions as strategic ones grounded in self-interest? Drawing on texts from the history of political thought, theater studies, and the psychology of acting, the course will culminate in a performance art piece at Wesleyan, developed by the class, to highlight the demands of citizenship. A willingness to act is expected, but no experience is required.

GOVT398 What Is the Good Life?
Work, political participation, friendship, art, and justice: These are the components that political philosophers have long thought to be components of a life well lived. How do these practices shape our identity and relationships with others? How do they contribute to a thriving society? How have theorists changed our understandings of these core concepts over time? What happens when they come into conflict? This course will use these five categories to understand what the "good life" means from ancient, modern, and postmodern perspectives.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT399 Citizens, Judges, Juries: Who Decides in Democracy?
The tensions between rule by the people, rule by elites, and rule of law are at the core of democratic theory. What is the proper balance among the three? Under what circumstances is one group of decision makers better than another? What happens when they come into conflict? This is an upper-level course in political theory designed for students who have taken GOVT159, The Moral Basis of Politics or an equivalent course in philosophy and related disciplines. We will focus on the following topics: the role of voting in liberal democracies, the Athenian jury system, deliberative democracy, referendum and initiatives, civil disobedience, and the role of juries in the U.S. criminal justice system.

GREEK (GRK)

GRK101 Introduction to Ancient Greek: Semester I
This course is an introduction to the rich and beautiful language of ancient Greek, the language of Homer, Plato, and Euripides. In the first semester students will begin to learn the grammar and syntax of the language and start developing the vocabulary necessary to appreciate and understand Greek with the goal of reading as soon as possible. Throughout the semester we will also explore some inscriptions and dip our toes into both Herodotus and biblical Greek.

This course is a prerequisite for GRK102.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK102 Introduction to Ancient Greek: Semester II
This course is a continuation of GRK101. We will complete the study of Greek grammar and continue to develop vocabulary and reading skills. We will read selections from Sophocles, Euripides, Lysias, Apollodorus, Demosthenes, Aristotle, and Plato, among others.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **GRK101**

GRK205 Reading Greek Prose: Court Room Dramas, Selections from Athenian Oratory
In classical Athens there were no public prosecutors and no lawyers. Citizens took it on themselves to prosecute their political enemies, their wives' lovers, and violent offenders against family, friends, and state. Court cases are fascinating for the laws, political dynamics, social beliefs, animosities and gossip they bring to light. In this course, we will focus on selections from two cases in Greek and will also read additional cases in translation.

This course will satisfy the History, Politics, and Social Justice concentration for the Classical Studies Major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK225 Feminist Icons or Misogyny's Monsters? Women in Euripides
Judith Butler writes: "to be a woman is to have become a woman, to compel the body to conform to an historical idea of 'woman,' ...to materialize oneself in obedience to an historically delimited possibility, and to do this as a sustained and repeated corporeal project."

In his tragedies, Euripides's women are powerful, nonconformist, and independent; however, they are also agents of chaos who sow devastation and destruction of domestic space. The Medea follows an alienated foreign protagonist consumed by obsession with revenge that culminates in the murder of her own children; the Bacchae follows women celebrating a female-only religious practice that ends in a frenzied, animalistic slaughter of one of their own sons. Exploring the corpus of Euripides's work through the lens of feminist theory, phenomenology, and postmodern critical theory, this course will ask whether the resistance of women in Euripidean tragedy to "[obey] a historically delimited possibility" is constitutive of a righteous proto-feminism, or rather a sensationalized stage device which reinforces Athenian society's strict gender roles. Over the course of the semester, we will translate Euripides's Medea from the original Greek. We will also read a number of tragedies in translation, focusing in particular on Euripides's Bacchae, while comparing Euripides's works to other tragedians' such as Aeschylus's Agamemnon and Sophocles's Antigone. Students will complete independent comparative projects examining similar themes and characters in modern works.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC.50)
The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

Identical With: **CGST250**
Prereq: **GRK102**

GRK252 Dionysiac Transformations: Gender, Violence, and Justice in Euripides' Hecuba
Euripides' "Hecuba" dramatizes the immediate aftermath of the Trojan War, as the victorious Greeks are waiting for favorable winds in Thrace--a no-man's-land. At this liminal time and space, we witness the "civilized" victors' abuse of power and the law against their female captives and the brutal revenge of the oppressed, culminating in literal transformation and loss of human form. Working with the Greek and secondary readings, we will explore the rhetoric and morality of power, justice, and empathy, how these shift within the plot, and how the dramatic medium itself may affect the audience's sympathies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK290 Truths and Other Fictions
What makes for a good story? What makes for a good argument? Is deception ever beneficial?

In this course we will read selections from ancient Greek works in the original, ranging from Homer, tragedy, love-poetry, law-court speeches, sophistic treatises, and Platonic philosophy to explore whose truth prevails, whose story moves, and who is better for it. The precise selection of sources will depend on the composition of the student-group and previous familiarity with Greek texts.

For CLST Major requirements, this course can be used for the Literature and Performance track and the History, Politics, and Social Justice track.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

GRK291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)
The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of ta Aphrodisia (the things/matters related to Aphrodite) in a culture that has no one term/concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

Gen Ed Area: **HA-CLST**
Identical With: **CGST291**
Prereq: **GRK102**

GRK295 Must It Be Revenge? Punishment in Theory and Practice
Is legal punishment a sublimation of revenge? Should violent revenge ever be endorsed or morally justified? Are there (equal) rights to revenge or to protection from it? What might create empathy with acts and actors of unprecedented violence? In this course we will address these questions by moving across genres in the Classical period, from philosophy (prose) to tragedy (poetry): Plato's Crito has Socrates argue about civil (dis)obedience, even in cases of wrongful or unjust conviction; Euripides' Hecuba dramatizes institutional failures and post-war corruption that result in unparalleled dehumanizing cruelty. They both test assumptions and ideas about the power of democracies to cultivate lawfulness and collective welfare.

The course is suitable for students at the intermediate and advanced level of Greek.

GRK320 Lampooning Democracy ¿ Aristophanes
Aristophanes continues to make us laugh, but he is hardly ever "just kidding." The playwright lived through the Peloponnesian War-the nature and scale of which irreparably altered the political and cultural landscape of all of Greece-as well as the subsequent oligarchic revolutions and democratic restorations that followed in the tumultuous aftermath at Athens. All the while, he produced the only plays that substantiate for us the genre of "Old Comedy," replete with scathing political and cultural commentary. Often called the "father of comedy" itself, Aristophanes' political satire never shrinks from launching its barbs at the most powerful contemporary politicians running Athens. Cleon, one of the foremost political figures during the Peloponnesian War, is a routine object of derision and mockery in his plays (especially his Knights and Wasps). Consequently, Cleon was a constant plaintiff against the social impact of Aristophanes' work. But his targets are not merely the military/political elite: perhaps most controversial is Plato's claim that Aristophanes' work, particularly his comedy Clouds, led directly to the prosecution and execution of the philosopher Socrates. Despite the contemporary specificity of Aristophanes' works, his plays remain a persistent source of inspiration for modern reception-Spike Lee's 2015 Chi-Raq, for example, is just one of many instances of modern reception of Aristophanes' Lysistrata. In this course, we will read selections from several of Aristophanes' comedies in Greek and translation, along with contemporary works referencing the people and events central to his works, as well as commentary on Aristophanes himself. Students will continue to hone their skills in translation of Attic Greek while doing a deep dive into the meter, themes, and other generic conventions of Old Comedy. This course aims to use Aristophanes' work along with contemporary comparanda to begin to pick apart the complex and deliberately ambiguous nature of political satire, and to understand why pointed political commentary on specific moments and figures in Athenian history still resonate so strongly with modern audiences.

GRK350 Body, Soul, and Afterlife Journeys in Ancient Greece
The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This course is connected to the Classical Studies course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This course is conceived as appropriate for students on the advanced level of ancient Greek.

GRK355 Homer in Bronze Age Context
Although written down in the 6th century B.C., the Homeric epics offer a literary narrative that captures echoes of a Bronze Age world in transition, an era of globalization reshaped by collapse, migration, and war. Empires fell and pirates plundered. This course recontextualizes the original Greek texts of the "Iliad" and the "Odyssey" in this space.

Reading sections of the "Iliad" and the "Odyssey" in the original Greek, this course introduces students to the literary and linguistic structures of Homer and contemporary Mediterranean texts. We will examine Homeric language and scholarly approaches to structure, narrative, and cultural concepts (kinship, blood sacrifice, piracy, honor) in the context of Bronze Age Indo-European texts, from Hittite historical annals and poems, to Mycenaean Linear B tablets (the earliest-known form of Greek), as well as inscriptions from Archaic-period Greece.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

GRK365 Greek Tragedy: Euripides
Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

GRK367 The Great Greek Creation Myth: Hesiod's Theogony
In this seminar, we will read Hesiod's Theogony, the Greek creation myth, in the original ancient Greek and examine this fabulous work in light of other creation stories of the ancient Near East, Egyptian, and Hittite cultures by which

it was influenced. Through examination of structural themes and motifs (how the universe was created and ordered, the role of violence, the origins of an application of justice, the creation of mankind, the shaping of women), we will discuss whether and how the Theogony diverges from other creation myths to establish or reflect values that can be said to be uniquely Greek. Discussion will be supplemented by passages from Hesiod's Works and Days, along with other creation myths and secondary scholarship.

This course satisfies a 300-level language requirement and falls under the Literature and Performance area concentration for CLST majors.

HEBREW (HEBR)

HEBR101 Beginning Hebrew I
In the beginning, there was an old Hebrew language that was dead in the 19th century and then revived into a modern language. In this course you will begin your journey into a fascinating language that is used to read ancient as well as modern texts. From reading with vowels, to reading without vowels, from handwriting in script to typing in Hebrew (so that you will be able to use social media), Hebrew has always had something special and unique to offer. Students will not only be introduced to all aspects of reading, writing, speaking, and understanding the language, but also will be exposed to the language as embedded in its cultural context. To meet that end, students will attend the series of 24th Annual Contemporary Israeli Voices 2026, which brings to campus the most diverse and contemporary cultural voices as well as converse with native speakers over Lunch and Learn meetings. Those extra cultural events account for the additional half credit (with a total of 1.5 credit for this course). This course counts toward the minor in Jewish and Israel Studies.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CJST, SBS-CJST**
Prereq: **None**

HEBR102 Beginning Hebrew II
In the second part of the Beginning Hebrew course, students will continue their journey to studying the Hebrew language, an old language that was dead in the 19th century and then revived into a modern language. Students will be introduced to all aspects of reading, writing, speaking, and understanding along with an emphasis on enlarging vocabulary, learning new grammatical concepts, writing short compositions, and further developing all language skills. Multimedia resources will be used to enhance listening and comprehension. Exposure to cultural material will also be explored through participation in the 20th Annual Ring Family Wesleyan University Israeli Film Festival 2027, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Participation in cultural events account for the additional 0.5 credit with a total of 1.5 credits for this course. This course counts toward the minor in Jewish and Israel studies.

Prereq: **HEBR101**

HEBR201 Intermediate Hebrew I
In this course, students will continue their journey, exploring Hebrew on a higher level, both linguistically and culturally. Linguistically, students will master new

grammatical skills, work more intensively on their conversational skills, and type short papers in Hebrew. Culturally, students will be exposed to Israeli media and ongoing public discussions. This will include students participating in the 24th Annual Contemporary Israeli Voices 2026 series, which will feature renowned international scholars and writers. Students will attend lectures, converse with native speakers over Lunch and Learn meetings, and write a short paper on each event. The cultural events will account for the extra half credit with a total of 1.5 credits for this course. The course counts toward the Minor in Jewish and Israel Studies.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-CJST, SBS-CJST**
Prereq: **HEBR102**

HEBR202 Intermediate Hebrew II
In this course, students will continue their journey, exploring Hebrew on a higher level both linguistically and culturally. Linguistically, students will master new grammatical concepts, read more complicated texts, and work more intensively on their conversational skills by presenting a subject of their choice as well as participating in students' debates, and typing short papers.

To meet the cultural component, students will participate in the 20th Annual Ring Family Wesleyan University Israeli Film Festival 2027, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse in Hebrew with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Students will reflect upon the films by typing in Hebrew a short response paper. Participation in cultural events accounts for the additional half credit, with a total of a credit and half for this course. The course counts towards the Minor in Jewish and Israel Studies.

HEBR315 Hebrew in the Media: From National Literature to International Films and TV Shows (CLAC 1.0)
This language course is offered as an enrichment opportunity to students with intermediate or advanced Hebrew skills who are interested in improving all their language skills and/or acquiring additional linguistic and cultural preparation for study abroad in Israel. Cultural activities including participating in the 24th Annual Contemporary Israeli Voices 2026 and Lunch and Learn meetings with native speakers are part of the course. In addition, special writing workshops with internationally renowned Israeli scholars will be integrated into the course curriculum. The course explores the changes in Israeli society as it moves from national ideological literature to the exploration of new multicultural media such as films and TV shows and thus gaining international fame and inspiring widespread emulation. The course may be repeated for credit. The course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

The course counts toward the minor in Jewish and Israel Studies.

HEBR413 Israeli Cinema (CLAC 1.0)
This Hebrew course will be linked to the film course, taught in English, entitled CJST 250: Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema. This course is targeted toward students with very advanced knowledge of the Hebrew language. Students will mostly view the same films as the parent class, with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in

format and themes of Israeli films. Scholar visits will be part of the course, and students will attend a few cultural enrichment activities. This course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative; for more information, see https://www.wesleyan.edu/cgs/eventsprograms/clac/index.html.

HEBR414 Israeli Cinema (CLAC 1.0)
This most advanced Hebrew course can be taken either as a language enrichment course to the parent course, CJS223: Israeli Women Filmmakers and Israeli Society, or taken by itself independently as an advanced Hebrew course. The focus of the course will be studying films made by female filmmakers. Students will analyze, discuss, and write on the films with special attention to mapping the cultural and social changes in Israeli society as well as changes in films' formats and themes. Conversing in Hebrew with Israeli film directors and scholars during Lunch and Learn Meetings as well as attending the screening of films in Hebrew in the 20th Annual Ring Family Wesleyan University Israeli Film Festival and writing reflective papers on films will provide a cultural and social framework for the course. In addition, the course will include special workshops delivered by renowned Israeli filmmakers and scholars. The course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

HINDI-URDU LANGUAGE (HIUR)

HIUR101 Introduction to Hindi-Urdu Language and Culture I
This course is an introduction to the modern standard form of Hindi-Urdu, the most widely spoken language in South Asia, with its manifestation in deeply rooted cultural contexts. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film (in particular recent Bollywood songs) to reinforce structures and vocabulary.

The goal of this course is to provide students with a solid foundation in Hindi-Urdu grammar and vocabulary, as well as the cultural awareness and practical experience necessary for basic, yet accurate and appropriate, communication in spoken and written Hindi-Urdu. This course is designed to develop students' ability in the four skills of language learning. Students will learn to confidently navigate a range of common social and "survival" situations in Hindi-Urdu target cultures. Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

Core objectives include: the development of communicative and interactional abilities in Hindi-Urdu on familiar topics related to daily activities; the development of analytical competence (analysis of language, critical thinking, etc.) and learner autonomy through linguistic analysis and reflection; and the development of sociocultural/intercultural awareness governing language use according to the appropriate target cultural norms.

HIUR102 Introduction to Hindi-Urdu Language and Culture II
This course is a continuation of Introduction to Hindi-Urdu Language and Culture I. It offers a balanced treatment of speaking, listening comprehension, reading, writing skills, and desi culture. Through scaffolding techniques, students will reach their potential zone of proximal development (ZPD), which is Novice-High, from their current ZPD, which is Novice-Mid.

At the end of the course, students will be able to communicate short, culturally appropriate messages on highly predictable, everyday topics that affect them directly. They will be able to produce lists and notes, primarily by writing words and phrases. They can provide limited formulaic information on simple forms and documents. These writers can reproduce practiced material to convey the simplest messages. In addition, they can transcribe familiar words or phrases, copy letters of the alphabet or syllables of a syllabary, or reproduce basic characters with some accuracy.

Students will get level-appropriate knowledge of the target culture, which is an essential ingredient of the course. All the material and activities will be presented through contextualized material. Students can understand key words, true aural cognates, and formulaic expressions that are highly contextualized and highly predictable, such as those found in introductions and basic courtesies. They will be able to understand words and phrases from simple questions, statements, and high-frequency commands.

Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

HIUR201 Intermediate Hindi-Urdu Language and Culture I
This course is a continuation of Introduction to Hindi-Urdu Language and Culture II, which emphasizes written expression and texts in both Perso-Arabic and Devanagari script systems and familiarity with cultures of the South Asian diaspora. The goal of this course is to provide students with an opportunity to build upon their knowledge of the Hindi-Urdu language and culture and bring them up to the intermediate low/mid-level in all four skills: reading, writing, listening, and speaking.

At the end of this course, students will be able to successfully handle a limited number of uncomplicated communicative tasks in straightforward social situations. Students will be able to produce some of the concrete exchanges and predictable topics necessary for survival in the target-language culture. These topics relate to basic personal information; for example, self and family, some daily activities and personal preferences, and some immediate needs, such as ordering food and making simple purchases. Students will also be able to ask a few appropriate questions, creating and writing statements and formulating questions based on familiar material.

As listeners, students will be able to understand simple, sentence-length speech, one utterance at a time, in a variety of basic personal and social contexts. They will develop accurate comprehension with highly familiar and predictable topics. Intermediate-mid listeners may get some meaning from oral texts typically understood by advanced-level listeners.

As readers, students will be able to understand short, noncomplex texts that convey basic information and deal with basic personal and social topics to which the reader brings personal interest or knowledge, although some misunderstandings may occur. Readers at this level may get some meaning from short connected texts featuring description and narration, dealing with familiar topics.

HIUR202 Intermediate Hindi-Urdu Language and Culture II
This course prepares students to achieve intermediate low-to-high level speaking, listening comprehension, reading, and writing skills. With a strong emphasis on achieving proficiency in spoken Hindi-Urdu, students are encouraged to speak Hindi-Urdu as much as possible, both in and outside of the classroom. Enrolled students are encouraged to form study groups that meet regularly outside of class to practice conversation in Hindi-Urdu and to learn nuances of the culture.

Students will work with a variety of web-based materials to learn songs; watch short film clips and advertisements; and read letters, dialogues, song lyrics, poems, and short stories in Hindi-Urdu. This course will introduce students to many aspects of Hindi-Urdu-speaking cultures through authentic language use,

and students will also have the opportunity to participate in the Hindi-Urdu language learning community on campus.

Standard text, course materials prepared by the instructor, and authentic materials (contextualized in the target culture) available on the internet will be used with equal emphasis on spoken and written Hindi-Urdu. The structure and conversations will be prepared in a variety of authentic contexts of Hindi-Urdu. Students are also offered extensive exposure to spoken language emphasizing speaking and listening at normal speed with near-native pronunciation and intonation. By the end of this course, the students will be at the intermediate-high level of the ACTFL proficiency scale. At this level student are expected to converse comfortably in colloquial Hindi-Urdu on a wide variety of familiar subjects.

HIUR251 Hindi-Urdu Language and Culture for Heritage Learners
This course is specifically designed for heritage learners of Hindi and Urdu who have some proficiency in these languages. Such students may speak or merely understand the heritage language(s) and are, to some degree, bilingual in English and the heritage language.

The course can be tailored to the specific needs of learners of both Hindi and/or Urdu; the content of the course will be selected according to needs and requirements of each learner. For this purpose, a needs analysis will be conducted at the beginning of the semester to learn the students' proficiency level and interests.

As part of this class, students will not only learn the language and culture in the class but also get a chance to practice the language and familiarize themselves through language tables and a native peer from the target community. Students will visit cultural/community centers to get a feel for the language and culture in practice.

HISTORY (HIST)

HIST101F History and the Humanities (FYS)
This course offers first-year students an opportunity to explore the humanities from a variety of different disciplinary perspectives, traditionally Western as well as global, and to make connections between humanistic learning and history. The course is a small discussion seminar in which primary source materials, or classic texts, are used exclusively. An effort will be made to examine the interrelationship of ideas in the various disciplines and to compare history, literary analysis, philosophy, and theory as modes of inquiry and as ways of thinking about documents and texts. The course thereby aims to provide students with the critical tools by which to analyze texts produced in the remote or recent past. The course also serves a related purpose: to familiarize students with the heritage of Western historical tradition and to impart knowledge of the crucial role of history and the humanities as a component in general education. Students may take HIST101F without having to take HIST102F.

An effort will be made to examine the interrelationship of ideas in the various disciplines and to compare history, literary analysis, philosophy, and theory as modes of inquiry and as ways of thinking about documents and texts. The course thereby aims to provide students with the critical tools by which to analyze texts produced in the remote or recent past. The course also serves a related purpose: to familiarize students with the heritage of Western historical tradition and to impart knowledge of the crucial role of history and the humanities as a component in general education. Students may take HIST102F without having taken HIST101F.

HIST103F From Protest to Revolution: A Middle Eastern History (FYS)
This seminar explores protests, rebellions, insurgencies, and revolutions that have shaped the history of the Middle East from the birth of the three monotheistic religions to this day. Why do people rebel? We will seek answers in the context of religion, ethnicity, language, and race in the long and political history of this wide-ranging human geography. The main focus will be the agency of those who strived for change and modes of resistance, finishing with the 21st-century activisms in labor, LGBTQ+, student, journalist, academic, and political Islamic mobilizations.

HIST104F Islam and Empire Through Fiction (FYS)
This first-year seminar will cover the three different empires of the Early Modern era (c. 1500-1800), encompassing much of the Muslim world: the Ottoman Empire in the core of the Middle East, Safavid Empire in Persia and beyond, and Mughal Empire in South Asia. Our aim is to analyze both common and divergent patterns and structures of imperial rule as well as shared imperial legacies and cultural resources. In addition to lectures and secondary background readings, students read and discuss fictional works, with a view to exploring "Islamic civilization" through literary voices of acclaimed authors. Reading fiction is to help us through the fragmentary nature of the sources used to reconstruct the major debates that surround the emergence and formation of Islamic empires in the Early Modern period. Questions of fictional narration, historical memory, and revisionist history will also be discussed.

HIST106F Black Reconstruction: The Origins of America's Racial Divide (FYS)
Voter intimidation, racial violence, an impeached president, an embattled Congress, threats of a civil war, and emboldened domestic terrorists are not a new phenomenon in American history. All have their roots in America's most violent, revolutionary, and contested era: Reconstruction. Beginning after the Civil War, Radical Republicans inside and outside Congress worked with free Black allies to found an American nation that lived up to its ideals. White domestic terrorists, backed by an increasingly recalcitrant Democratic Party, violently opposed the increased political power and civil rights of African Americans. In this first-year seminar, we will examine the contours of that contest, the world that it created, and the lasting influence of America's unfinished revolution.

HIST107F Life of the Modern Fact (FYS)
Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This course explores the tools and techniques that people have used to craft facts in varied domains of applied science, such as agriculture, climate modeling, epidemiology, and pharmaceutical production. The course also examines how broader social structures, such as law and community, helped produce facts as people shared, defended, and used them. We consider examples from the 17th century through the present day, including practices of nature study, classification, quantification, and experiment.

HIST108 Time Machines: Bringing the Past to the Present and the Future to the Past
In the course we will explore how ghosts of the past and imaginaries of the future haunt the present. We will do so by looking at the temporal disjuncture in canonical and seemingly concrete evidentiary categories of disciplinary history. In essence, we will see how they serve as time machines to bring the past into the present and the present to the future. The course will be organized around a variety of themes from ghosts, haunting, trauma, and historical injustice, through heritage, memory, and presentism, to technological imaginaries and the Anthropocene. In addition, we will look at the ways such imaginary time

travel occurs in seemingly everyday sites as well such as supermarkets, films, and amusement parks.

HIST109F With Bold Knife and Fork: An Introduction to Food History (FYS)
This first-year seminar is an introduction to food history and food studies, two linked fields in which we ask how people have satisfied their appetites, and what their choices mean. This encompasses everything from the question of how agriculture began, to the question of what it meant to eat a Korean taco in Los Angeles in, say, 2014. Food history and food studies are vast fields, and in this seminar we will sample many versions of them. Because this seminar is designed for students just beginning college, it introduces a variety of academic approaches to food, from chronological analyses of how specific ingredients became important for specific populations, to the anthropological treatment of food and identity, to cultural histories informed by primary sources--that is, documents written by historical actors. We even read contemporary "food writing," including restaurant reviews, which are themselves historical documents of a sort. This course also has a strong chronological through-line, winding from the establishment of agriculture to the modernization and industrialization of global food ways.

HIST110F Been in the Storm So Long: Grassroots Movements and the Black Freedom Struggle (FYS)
Most civil rights narratives focus on Martin Luther King, Jr. and other prominent leaders of the civil rights movements. This course seeks to shift that narrative to young activists working on the ground in the struggle for Black freedom. These college students used grassroots organizing tactics, embedding themselves in local Black communities, to drive local politics and draw attention to larger systemic issues. We will look specifically at the work of the Student Nonviolent Coordinating Committee (SNCC), led by John Lewis and Stokely Carmichael, as they moved from the shock troops of the Southern freedom struggle to Black Power.

HIST112F Religion, Science, and Empire: Crucible of a Globalized World (FYS)
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

HIST113F The Intellectual History of US Conservatism Since 1945
How do we understand the phenomena of Trumpism? What are the ideas that have inspired this movement? This course attempts to provide answers by looking at the origins and evolution of US conservatism from 1945 until the present. It does so through the prism of intellectual history -- namely by focusing on the ideas and ideology that have constituted the conservatism movement in the US for roughly the last eighty years. Topics to be discussed include: Neoliberalism, Neo-conservatism, America First, Paleoconservatism, the Religious Right, American Fascism, Trumpism, etc.

HIST114F From Sumo to Sonic: Japan at Play (FYS)
This class explores the many ways the Japanese have played throughout time including sports, card games, martial arts, video games, poetry contests, and more. We will contemplate the general societal impact of play and look to Japanese history as a specific, and oftentimes distinct, example. The class is a combination of lectures about the historical and cultural significance of Japanese games and class time devoted to you playing some of those games to better understand them. By the end of this course, you will know about the sumo wrestling competitions that delighted the Heian court over one millennium ago as well as current baseball phenom Otani Shohei. You will have explored the wonderful virtual worlds of visionary video game creators, such as Miyazaki Hidetada and Kojima Hideo, while trying your hand at some of Japan's most enduring board and card games. No knowledge of Japan or the Japanese language is required for this course.

HIST116 Environmental History: Telling Stories in Place
This course introduces students to environmental history, the study of the changing relationships between humans and nature through time. We will consider how the natural world has shaped human history; how humans have transformed the environments they have moved through, made use of, and inhabited; and how ideas about nature have shaped people's interactions with the world around them and with one another. Focusing on both historiography and methods, we will read classic and recent work in the field and learn to conduct historical research. We will also pay attention to narrative and the writing of history, through reading, in-class workshops, peer editing, and trying

different kinds of historical storytelling. The central assignment will be a short research paper in which students will practice environmental history through the study of a particular place.

HIST116F Independence at 250: The American Revolution and its Broader Impact (FYS)
The Declaration of Independence was both part of and yet separate from the American Revolution. The document is both a statement of principles and also a list of grievances. Its authors looked to the future and hoped to create something new, while historians too often read independence backwards and assume the United States would always become a country. This course will explore the making and meaning of Independence as it relates to the American Revolution and its significance within North America and beyond. While other countries drew inspiration from the Declaration, many living within the boundaries of what would become the United States -- enslaved workers, women, Indigenous peoples, and others -- felt excluded from the project that the Declaration announced. By reading the most recent and exciting scholarship and investigating relevant primary sources, this course will look within and beyond the United States to ask new questions and understand different perspectives on the meaning of the American Revolution.

HIST117 Chinese Cities
More than half of China's population now resides in cities. Within the next few years, China plans to accelerate the rate of urbanization by building sprawling cities and relocating more people into urban areas. This course explores the history of Chinese cities from the imperial to modern age. Cities were centers of commerce, intellectual activity, and, in the words of historian and political scientist David Strand, "storehouses of political technique, strategy, and sentiment open to anyone with the understanding and the will to inventory to exploit them." We will study how cities supported massive populations with limited resources, inspired new forms of social organization, and transformed the political and social order of China.

HIST117F Global Psychedelia: Music and Politics in the Middle East and Beyond (FYS)
This course explores the emergence of Turkish psychedelic rock within the global psychedelic moment of the 1960s and 1970s, tracing how musicians drew on historical poetic traditions while engaging with worldwide experiments in sound and counterculture. We begin with the medieval context of Anatolia and political resistance to Ottoman authorities and examine how this literature and history shaped the sonic vocabulary of 1960s artists such as Selda Bagcan, Cem Karaca, and Mogollar. We then analyze how electrified folk, political lyrics, and hybrid aesthetics articulated new visions of modernity in a changing Turkish society. Throughout, we situate the Turkish case within the Middle East and broader global developments, including youth movements, anti-establishment politics, and censorship. By working with music, historical texts, and cultural theory, students will investigate how sound becomes a site for negotiating identity, power, and belonging. For the final project, students will write and produce a radio essay that will be broadcast in collaboration with WESU 88.1FM.

HIST118F History of U.S Social Movements (FYS)
This first year seminar course examines the long history of movements for social change in the United States from the 1830s to the 1970s. Movements we will explore will include abolitionism, women's rights, the black freedom struggle, modern feminism, and gay liberation. We will focus on the tactics used by social movements to achieve their goals, how social movements related to each other, how social movements changed over time, and how social movements interacted with the broader forces of American society, including politics, race, law, and religion. A major focus of this course will be how historians conduct research, use evidence, and write history. Students will be exposed to primary sources as well as selected secondary sources in the field.

HIST120F Sex and Sexuality in Islam (FYS)
Islamic societies have long traditions of commentary about the body and sexuality. Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims throughout time. Instead of essentializing the Islamic "viewpoint" on sexuality, we will survey the variety of opinions and ideas about sex from medieval Islam to the modern world. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and modern sex manuals and debates, among other sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct in Islam, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature.

HIST122F Germany from Napoleon to the Berlin Republic (FYS)
Was Germany destined to launch two world wars in the 20th century? Were the roots of Germany's deviance from the path of liberal democracy deep or shallow, culturally determined or shaped more by circumstance? This course analyzes these and other questions in the fascinating and turbulent history of modern Germany. We will begin our study by examining the political, social, and economic upheavals ushered in by the Napoleonic conquests, highlighting the territorial, religious, and class divisions pulling at the fabric of German society in the context of revolution, rapid industrialization, and urbanization. We will then analyze the processes that resulted in Bismarck's unification of Germany in 1871 and how Germany's nationalism, growing industrial power, and deep internal divisions contributed to a policy of aggressive imperialism that would challenge both the European and international status quo. The course carefully analyzes the role played by these processes in the outbreak of the World War

I and will explore the profound impact of war and defeat on German society. Situating both the Weimar Republic and National Socialism in this context, we will subsequently study the rise of Hitler, World War II, and the Holocaust. The course will conclude with the Cold War history of the two German states until the collapse of the Berlin Wall and reunification in 1990. The aims of the course are to provide a firm grounding in the historical processes that have shaped modern Germany, to develop and refine the critical skills of historical analysis, and to familiarize students with the major historical debates over the continuities and discontinuities of German history.

HIST123F Cinema India: South Asia's Past on Film (FYS)
This first year seminar course examines the relationship of film and history in India. We will focus on how filmmakers represent the past and, alternatively, how films inform historical memory--especially in the context of the competing trajectories of nationalism, postcolonialism, and globalization. A central concern will be the historiographical challenges and opportunities of film. We will pay particular attention to Hindi cinema, including films produced by the Bombay/ Mumbai ("Bollywood") film industry since the 1950s, though we will also consider the rise of "parallel" cinema. Feature films will range from classics like "Mughal-e Azam" (1960) and "Umraon Jaan" (1981), to lesser known works like "Shatranj ke Khiladi" (1977), "Mirch Masala" (1987), and "Hazaaron Khwahishen Aisi" (2005). We will also probe the critical and box-office success of relatively recent blockbusters such as "Lagaan" (2001), "Rang de Basanti" (2005), and "Jodhaa Akbar" (2008), comparing them to the ambivalent domestic and diaspora response to period dramas like "Dil Se" (1998), "Mangal Pandey" (2005) and "Laal Kaptaan" (2019).

HIST129 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

HIST130F North American Borderlands (FYS)
North American Borderlands explores the physical, social, political, cultural, and economic spaces that borders create and purport to divide. The course covers a long history and a wide variety of material - with subjects ranging from 17th-century contests between Algonquian peoples and Dutch traders along the saltwater frontier to the Gilded Age story of a Texas slave who reinvented himself as a Mexican millionaire, to the sulfur dioxide that blew up from U.S. power plants to fall as acid rain in Canada and sour relations between the two nations in the 1980s. By the end of the course, students will be able to recognize borderlands as distinctive spaces of conflict, exchange, dispossession, and opportunity.

HIST132 History of Energy
From fire to fossil fuels, humans are characterized by their ability to use more energy than other species. By capturing and releasing reservoirs of energy stored over the course of Earth's history, humans have increased their resource base, expanded global population, and modified the environments on which they have relied for subsistence.

This course introduces students to themes in the history of energy transitions, from photosynthesis to fire to the exploitation of fossil fuels beginning in the 19th and 20th centuries. By taking up the use of pre-industrial fuels, animal muscle, water, and wind, in addition to coal, oil, and gas, we will consider the ways humans have come to rely on cheap and abundant energy. In a broad survey of energy regimes, we will probe the effects of production and consumption of energy on politics, environment, economy, and society.

HIST141 Theories and Models
This class will focus on how theories and models are designed and regarded across the university curriculum--in the humanities, the social sciences, and the sciences. This topic is particularly pertinent to intellectual history, a subject that regularly uses texts from across the modern university curriculum as its primary readings. Given the range of intellectual history, both in terms of chronology and subject matter, intellectual history could be argued to be the subject best positioned to consider the process of making theory.

Questions to be addressed include: What are some of the unexpected results of the increased use of mathematics and computers even in the humanities and social sciences, not just in the sciences, and how has this changed the relationship of theory and models for each of these disciplines? To what extent does the debate about the refutability, the falsifiability--or truth status--of models indicate an ongoing need for theory? The specific modern academic subjects to be examined will be philosophy, economics, and physics. Thomas Kuhn's THE STRUCTURE OF SCIENTIFIC REVOLUTIONS (1962) will serve as a starting point for this study; however, most of the readings during the semester will be much more recent.

HIST143F Jesus Chicken: Business and Religion in America (FYS)
Summary: Although many Americans are aware of the religious identity of the fast-food chain Chick-fil-A (earning it the moniker of "Jesus Chicken" in some communities), there is nothing new about businesses that project a religious ethos. This First Year Seminar explores the blurry boundary between business and religion in America, examining the ways in which businesses use religion and the ways in which religious entities often function as businesses. Although this course primarily focuses on the Christian tradition, it will also examine the ways in which other religious communities (such as Jewish and Buddhist) approach the marketplace. Chronologically, the course spans the 17th to 21st centuries, paying special attention to the emergence of the market economy in the U. S. from 1800-1850 and the growth of consumer culture in the second half of the 20th century. This course will provide students with an introduction to historical methods and the critical study of religion, while focusing on developing collegiate-level reading, writing, and critical thinking skills that will form a foundation for any major at Wesleyan.

HIST151 Introduction to History: The "Russian World" Past and Present
The "Russian World" has become a central--though deeply ambiguous and contested--theme in contemporary political discourse both within and beyond Russia. This course will offer a survey of how different conceptions of the "Russian World" have been articulated and deployed over time by following the history of Russian lands and peoples from the eighth century to the present day. This course is one of the gateways to the history major and is intended especially for first- and second-year students. As an introduction to history, the course will introduce students to the discipline of history by examining the historical sources, concepts, theories, and methods necessary for reading and writing history.
Offering: **Host**

HIST154 Introduction to History: Twelve Medieval People
This course is one of the gateways to the history major. It is also an introduction to the Middle Ages through a study of 12 exemplary medieval lives and minds, spanning a thousand years of history. We focus on people--bodies, minds, and souls--coping with history and creating sense for their world. The course will typically feature one person or pair per week, and by examining their writings or stories and the contexts in which these were produced, the nature of medieval life, the pressure on the self, the articulation of gender and ethics for the entire period will come into view. Among the figures studied are likely to be St. Augustine, Queen Brunhild, St. Anselm, Abelard, Heloise, William Marshal, King Louis IX, Dante, Catherine of Siena, Christine de Pisan, Joan of Arc, Margery Kempe, and Pope Pius II.

As an introduction to history course, we will also offer an examination of the basic concepts, techniques, and skills for reading, understanding, and writing history: documents and archives, text and context, sceptical inquiry, argument construction, and an interest in good and expressive writing.

HIST155 Cold War Environmental History
War remakes the natural world to support organized violence. Pervasive militarism renders its transformations permanent. In the context of the Cold War, the United States and the Soviet Union pursued competitive testing of nuclear weapons; engaged in proxy wars with devastating local effects; and embarked on extensive modernization projects in agriculture and public works. In many such projects, political antagonism masked commonality and collaboration in science and technology. In this course, we reckon with the persistent environmental effects of militarism by pursuing a global history removed from the ideological projections of its actors.

HIST156F Introduction to History: The Ottoman World (FYS)
This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans, Anatolia, the Middle East, and North Africa emerged during the 20th century. At the center of the course is the transformation of the so-called classical Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be starting from the 15th century and end with the analysis of the making of the modern Ottoman society by the beginning of the 20th century before its imminent collapse. The late 16th-century transformations and the question of Ottoman "decline," on the one hand, and transformation to a modern state on the other, comprise the historiographical context to be addressed alongside basic historical patterns and events. A primary concern is to have students engage with critical issues not only in the study of Ottoman history, but also situating this history in the discussions on world history in general, and the history of the Middle East in particular.

HIST157 Wayward Warriors: Samurai in History and Media
The most indelible image of Japan is that of the samurai, a class of warriors who presumably ruled the enduring island nation for over a millennium. While lengthy and prosperous military regimes are not unique to Japan, the rule by the samurai has been a captivating source of national pride and international intrigue due to their supposedly strict adherence to the code of Bushido. Bushido's unique blend of devoting one's life to swordsmanship, honor, and loyally serving one's lord has sparked countless interpretations and exaggerations in all forms of media. This course will explore the factual history of the samurai while also critically analyzing the many fictitious narratives surrounding these wayward warriors throughout the centuries. By the end of this course, you will be able to separate the fact from the many fictitious yet entertaining samurai stories we will explore in literature, film, tv, anime, and video games.

No knowledge of Japan or the Japanese language is required for this course. All texts and subtitles will be in English.

HIST160 Intro to History: U.S. in the World Since 1776
Transcending the nation-state framework, this course foregrounds transnational and international frameworks to explore the United States' role in the world since 1776. We will explore the rise of the United States' vast settler colonial empire in North America, its vast overseas empire in the Pacific and Atlantic Oceans, and the role of the United States in international and global affairs in the 19th and 20th centuries. We will look both at the policies created by U.S. presidents, diplomats, and military leaders, as well as the experiences of Black, Indigenous, People of Color, and colonized peoples of the Global South who have been affected by the U.S. presence in the world. We will also underscore the importance of international organizations, non-state actors, and non-governmental organizations, such as the United Nations and the American Red Cross, that have shaped international society over the 20th century. Throughout the course, we will explore the themes of race and ethnicity, imperialism and colonialism, migration and immigration, nationalism and internationalism, self-determination and decolonization, militarism and development, and diplomacy and foreign policy.

HIST161 Energy Legacies and Ecological Futures
Manresa Island, on the coast of South Norwalk, Connecticut, was the site of an NRG coal-fired power plant (and later oil). The plant, slated for decommission, was shuttered overnight after heavy flooding during Hurricane Sandy. Its planned transformation, funded by a 501(c)3 non-profit corporation, includes the remaking of its massive turbine hall as a community space and the remediation of the entire peninsula for use as a public park. The 125-acre site includes a birch forest on a coal ash dump, salt marsh, and other coastal wetland habitats that currently harbor populations turkey, osprey, and deer. Casual observers liken Manresa's abandoned spaces to those of Chernobyl, with the detritus of human settlement engulfed by resurgent vegetation and wildlife. This flawed analogy obscures as much as it reveals, conjuring ethically compromised aesthetics of post-industrial ruin photography and associated practices of dark tourism. But there is a parallel history of energy, hazard, and aftermath with which we have yet to reckon locally or globally. The objective of this course is to produce histories of energy transition calling on (1) records of Manresa Island recently acquired by the 501(c)3, and (2) the testimonies of NRG workers present during Hurricane Sandy. The course will train students in modalities of archival and oral history with reference to these untapped resources. This course will require 2-4 field site visits to Manresa Island, to be scheduled 12-5 p.m. Thursday or Friday. Multiple scheduling options will be available, and students should be able to commit to at least two field trips per semester. Transportation will be provided.

HIST162 Intro to History: The Mediterranean World (650-1650)
This course offers a broad introduction to the history of the Mediterranean 'world' (and whether that is a useful category) from the end of antiquity to early modernity. Taking a thematic approach, we will explore the entangled histories of Jewish, Muslim, and Christian societies, and investigate the Mediterranean as a dynamic site of interaction, competition, and creativity. Topics will include the legacies of empire, cultural, religious, and economic exchanges; conflict and conversion; translation and scientific developments; and others.

HIST163 An Introduction to the Middle Ages: People, Ideas, and Places
This course will explore the Middle Ages, focusing on individuals, ideas, and notable places and the sorts of places characteristic of this very dynamic and innovative period from around 1050 till 1450. The precinct of the king's court and castle, the peasant's village, and the cathedral city will get especially close attention, as will certain famous sorts of writing and thinking as we'll explore the forebearers of the modern novel -- romance and sagas from France and the Norse -- as well as the philosophy of figures like St Anselm and Catherine of Siena. Attention to chronicle writing and its politics and the wide ranging scientific reflection of Hildegard of Bingen and Roger Bacon, who supposedly learned from a magical brass head, will also figure large next to the wide-ranging writings Geoffrey Chaucer including his Canterbury Tales and of moralist and feminist defender of Joan of Arc, Christine de Pisan. The course will focus on texts individually and in concert and sometimes on the physical remains of buildings, art, and manuscripts that illuminate crucial elements of European culture, ethics, and power in this period. An important aspect of the course will be reading primary sources closely and critically to learn how to see the wider world of which they are part, a main technique of creating the past through interpretation and integration. We shall also learn about libraries, archives, good internet research techniques and how to assemble primary and secondary sources for historical writing. This course does not provide a chronological overview of the Middle Ages, but will give all necessary context for understanding.

HIST164 Bushido and Bullets: Samurai Flicks and Western Films
Bushido and bullets; shoguns and sheriffs; katanas and .45 Colt Revolvers. Alliterations aside, the connections between samurai films and westerns are as deep as they are numerous. Many cinephiles know that Japanese director Kurosawa Akira influenced multiple directors in the west, such as George Lucas, Sergio Leone, and Stephen Spielberg. What is perhaps less known is that Kurosawa was greatly influenced by a man who directed some of the greatest westerns from the 1930s to the 1960s -- John Ford. Diving into those influences is one of the goals of this class as we watch some of the greatest samurai films and their western counterparts. The other goal of this class is to categorize and analyze the many aspects of these films, from the protagonist's psyche to the evolution of civilized society, to see why these two seemingly disparate movie genres resonate so deeply. Finally, we will critique these films and discuss their merit in the twenty-first century. All Japanese movies will have subtitles. No knowledge of Japan or the Japanese language is required for this course.

HIST165 Introduction to History: Slavery and Abolition in the Atlantic World
Racial slavery was inextricably tied to the rise of both colonialism in the "New World" and global capitalism. It fueled a complete reorientation of world economic and political systems with consequences still evident today. Yet people on both sides of the Atlantic--Black and white--challenged the idea of racial slavery and its entrenched interests. The abolitionists succeeded in emancipating millions, but did not fully achieve their goals for human rights. In this course, we will examine the rise and fall of slavery in the Western Hemisphere, with particular attention paid to the North American mainland and Caribbean.

HIST167 Introduction to History: Yoga: A Global History
Yoga as a philosophical, religious, and ascetic discipline has shaped the lives of major world-historical figures, including the Buddha, the Mughal emperor Akbar, Mahatma Gandhi, and Steve Jobs. Though yoga is usually understood today as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced dramatic change over the millennia--not least with the rise of "postural" yoga in India from about 1000 CE, its systematization as "hatha yoga" by about the sixteenth century, and its growing popularity in the West since the early twentieth century. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psycho-somatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis) as it spread from India to both the East and West.

HIST170 Introduction to History: American Material Culture
This course introduces students to the study of history through an investigation of American material culture and the built environment from the pre-colonial period to the present. The course is structured around Friday site visits in the New England and mid-Atlantic regions, including the Pequot Museum, Mystic Seaport, Central Park, New York City waterfront, Fresh Kills, and local suburbs. Students will consider theories and methods of studying history through objects, landscapes, and architecture. We will consider how changing patterns of settlement and land use shaped human and natural ecology, and how people fashioned cultures and communities through the fabrication, circulation, and use of a wide range of natural and human-made objects.

HIST171 Introduction to History: History of U.S. Social Movements
This Introduction to History course examines the long history of movements for social change in the United States from the 1830s to the 1970s. Movements we will explore will include abolitionism, women's rights, the black freedom struggle, modern feminism, and gay liberation. We will focus on the tactics used by social movements to achieve their goals, how social movements related to each other, how social movements changed over time, and how social movements interacted with the broader forces of American society, including politics, race, law, and religion. A major focus of this course will be how historians conduct research, use

evidence, and write history. Students will be exposed to primary sources as well as selected secondary sources in the field.

HIST171Z Introduction to History: History of U.S. Social Movements
Online course: Monday through Friday 2-4pm with additional asynchronous lectures. This Introduction to History course examines the long history of movements for social change in the United States from the 1830s to the 1970s. Movements we explore will include abolitionism, women's rights, the black freedom struggle, modern feminism, and gay liberation. We will focus on the tactics used by social movements to achieve their goals, how social movements related to each other, how social movements changed over time, and how social movements interacted with the broader forces of American society, including politics, race, law, and religion. Students will be exposed to primary sources as well as selected secondary sources in the field. Given the winter sessions focus we will focus on 10 different U.S. social movements, with the first half of class devoted to the outline and history of each movement in a lecture format, and the second half based on a discussion of how the movement builds on and relates to other social movements and broader U.S. history.

HIST172 Introduction to History: Germany from Napoleon to the Berlin Republic
Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions. We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

HIST173 Intro to History: Heretics on Trial: The Holy Inquisition and Its Enemies
The Inquisition was among the most feared institutions of the early modern West. In its efforts to impose religious orthodoxy, it persecuted minorities, prohibited behaviors it deemed heretical--like magic and unbelief--and censored intellectual inquiry. Yet despite its resoluteness, the ability of the Catholic Church to impose control varied widely across time and place and was often met with equally firm resistance. This introductory course examines how the Catholic Inquisition functioned, from its origins in the medieval period to its final demise in the nineteenth century, paying particular attention to geographic and temporal specificities. From Cartagena de Indias to Lima, Goa, Rome, and Toledo, inquisitorial tribunals spanned a significant portion of the Atlantic world. The records produced by its scribes are some of the richest sources of the social, cultural, religious, and economic history of the era, yet they are also some of the most challenging to deal with, both epistemologically and morally. Historians have relied on Inquisition archives to reconstruct the lives of individuals and communities who left no other written records, all the while seeking to acknowledge that the records were produced under duress by officials who suspected the accused of the terrible crime of heresy. Through a wide range of primary sources like trial transcriptions, Inquisition "autobiographies," written confessions, censored books, and literary sources, students will both survey the lives of people who faced the Inquisition's scrutiny, while considering the role of violence, persecution, and resistance in the creation of the very records that allow for historical reconstruction.

HIST174 Introduction to History: European Reformations
An introduction to history course, European Reformations will provide an introduction to the concepts and tools for reading, writing, and enjoying history by examining the ideas and people who developed the Protestant Reformation, one of the most explosive changes in world history that continues to reverberate and affect lives and politics today. Centering on the ideas and politics of the European Reformation age, we will examine thinkers and problems within Catholic Europe that led to the crisis of the Reformation from around 1500. A focus on the ideas and actions of figures such as Luther and Calvin and the religious martyrs of the 16th century will be central, but we will also examine Catholic responses and the changing political and legal ideas that the Reformation produced.

HIST176 Introduction to History: Science in the Making
This course introduces students to a range of perspectives -- drawn from history, sociology, anthropology, geography, media studies, and literary studies, among others -- on how to write about the history of science, technology, and medicine. Throughout, its emphasis is on examining the relationship between the histories of science we can tell and the materials that our histories draw upon, from publications and archival documents to oral histories, material culture, and film. In addition to reading academic literature, students will gain practical experience working with historical sources and conducting original research on topics related to the history of science at Wesleyan and places nearby. Past final student projects have included works of public and digital history, as well as traditional academic writing.

HIST177 Introduction to History: Yoga: A Global History
Yoga as a philosophical, religious, and ascetic discipline has informed the thinking of major world-historical figures as wide ranging as Siddhartha Gautama ("Buddha" or "wise one"); the Mughal emperor, Jalaluddin Muhammad ("Akbar" or "the great"); Mohandas K. Gandhi ("Mahatma" or "great soul"); and Apple Inc. founder, Steve Jobs. Though yoga is usually embraced as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced dramatic change over the millennia. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psychosomatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis)--in the Indian subcontinent and beyond.

HIST179 Intro to History: Biodiversity and its Histories
Biodiversity loss may portend the next mass extinction, but what is biodiversity? Euro-American concepts of biodiversity have become a category of policy and politics at local, regional, national, and international levels. This course will track the development of these concepts from the 18th century to the present, paying special attention to the growth of natural history collections to document taxonomy, evolution, biogeography and ecology of species. How does the idea of living variation in genes, traits, species, and ecosystems relate to human and non-human beings?

HIST185 Introduction to History: The United States Empire
The United States has had an overseas empire longer than it has not. This "introduction to history" course will examine the long history of the United States empire across the North American continent, the Pacific Ocean, and the Caribbean Sea from the establishment of the US Constitution and the Northwest Ordinance of 1787 to the twenty-first century global military empire. We will explore how the US amassed and governed its empire as well as how Native, Indigenous, Black, Asian, and Latine peoples have navigated, negotiated, and resisted different forms US colonialism. Studying US history from the perspective of empire not only augments our framework of an US national history, but questions fundamental assumptions we take for granted in narrating US history, including the geography and temporality of the US, notions of citizenship and inclusion, the power of US militarism, and the seemingly incommensurable divide between liberal and conservative politics. As esteemed historian William Appleman Williams wrote, this course examines "empire as a way of life."

Gen Ed Area: **SBS-HIST**
Prereq: **None**

HIST186 The Raj: India and Britain (Introduction to History)
This course examines the linked history of India and Britain from 1600 to 1947. The focus will be on the rise and demise of the British Empire in South Asia, commonly referred to as "the Raj," and how the experience shaped what it meant to be both Indian and British. Along the way we will learn how merchants from a remote island nation in western Europe managed to take control of the wealth and manpower of the Indian subcontinent; how Indians helped to build the Raj but gradually turned against it; and how in rebelling against the Raj, and reshaping it, Indians crafted new forms of protest, new understandings of violence, and new modes of political belonging. This is an Introduction to History course intended mainly for first- and second-year students who are interested in the past, and perhaps (though not necessarily) are contemplating the history major. As such, it will introduce students to the discipline by reflecting on the nature of historical evidence, how to find sources, develop an archive, and craft a historical argument.

HIST188 Introduction to History: Revolutionary Women
"I do not think the war would have been won without the women.... Now women have to liberate themselves." The fighter Maudy Muzenda's reflection on the role of women in Zimbabwe's liberation war speaks to a broader pattern in global history. Women have been central to the radical transformation of societies in Africa, Asia, Europe, and the Americas from the early modern era to the present. In this course we will examine revolutionary women who took up arms and others who protested for improved working conditions, voting rights, sexual liberty, and human rights. Our cases will include the history of political revolutions in France, Cuba, Russia, and China, as well as in Zimbabwe. We will also explore the critical role of women in the global Industrial Revolution, the Suffrage Movement, the rise of international feminisms, and the everyday struggles of women in multiple sexual revolutions.

HIST190 Introduction to History: Environment
Humans have profoundly altered the character of Earth's environment since the advent of agriculture and settled societies some 10,000 years ago. This course is a study of the historical relationship between human beings and their habitats, with additional attention to arid lands as places of settlement, cultivation, and development. We explore how global problems such as climate change, biodiversity attenuation, and depletion of fossil soils, fuels, and water are linked to social problems such as economic inequality, food insecurity, conflict, and declining public health. The course reviews evidence of major environmental problems; considers how varied academic disciplines address them; and models a historical approach to understanding environmental change.

The course is divided into two parts: "Environmental Concepts," and "Case Studies." In Spring 2022, the case studies will be devoted to biodiversity.

HIST191 Introduction to History: Pacific Worlds
This introductory course explores the Pacific Ocean as a region of historical inquiry. With a strong viewpoint from the Pacific Islands, this course interrogates long held notions of the Pacific as a vast empty space, emphasizes the Indigenous Pacific, charts the rise of imperial powers, and follows the paths of Indigenous peoples, labor migrants, merchants, scientists, militaries, and tourists, among other historical actors. This course will cover the topics of race and indigeneity, gender and sexuality, militarism and tourism, and the environment, as well as colonialism, imperialism, and decolonization. Taking an expansive definition of historical text to account for the ways Indigenous peoples and migrants understand history, this course will include poetry, song, fiction, film, art, objects, and oral and living histories, and will explore varied methods and frameworks in the discipline of history.

HIST192 Introduction to History: U.S. Political History, 1789-Present
The election of Donald Trump to the presidency in 2016 has sparked a widespread reckoning--both inside and outside of universities--with the dismal state of American understandings of our political past. Despite handwringing to the contrary, polarized partisanship, voter suppression, and policy stagnation are not new phenomena. This course examines the elections and elected officials, policy and policy making, and parties and party politics that shaped American history from the founding to the present. The course will chart the ways that elites have structured the relationship of American citizens to the state and explore what might come next. This course is the "top-down" companion of the "bottom-up" political history covered in HIST171: Introduction to History: History of U.S. Social Movements.

HIST195 How to Read and Write History: Models from the Past and Present
This an introduction to history course meant as both a major gateway and a general pre-major introduction to the practice of making history. It will introduce students to some of the different ways that people have represented the past and history around the world in both amateur, artistic, and professional historical modes. Ancient, medieval, modern, and postmodern examples will be discussed and we'll reach beyond non-fictional writing to fictional models, artistic renditions, and visual histories on buildings, sculpture, art, and in film and television. Central to the course's aims will be helping students to practice styles of history writing themselves in a writing-intensive way that includes both analysing history texts and practicing writing in different styles and with different aims in order to develop each student's own latent powers as a historian, working to make past and present worlds.

HIST200 The Historian as Detective
Whodunnit? In many ways, the craft of history is much like the art of detection. Historians arrive on the scene after the "crime" was committed. We look for traces, or clues, left behind. We try not to contaminate the crime scene. We pore over the evidence. We consider both motive and opportunity. We take note of silences. We keep an open mind. We seek the truth. And, as it happens, the professional historian and the professional detective--in fact as well as fiction--emerged roughly around the same time. We are like twins separated at birth. Perhaps if we are reunited, we might learn something new about each other, and ourselves. This course will draw upon classic (and not-so-classic) works of history, criminal detection, and detective fiction to better understand the importance of forensics and method in the discipline of history, as well as the importance of history in the art of detection. Each week will pair a work of literature with a work of history, supplemented by key essays in historical methodology.

HIST201 Medieval Europe
This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity, its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the modern world, including the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

HIST202 History of the Multiracial U.S. West, 1846-Present
What is the U.S. West--a geographic or spatial designation? A cultural creation? A set of sociopolitical relations? A period of history? Who are the communities that have called the U.S. West home from the nineteenth century to the present day? How do different communities, migrations, and peoples in the U.S. West shape race and racial categorizations? And, how are they shaped by race and racial categorizations? How does class, labour, and capitalism affect these histories? What does it mean to tell a multiracial history of the U.S. West? As Silicon Valley oligarchs continue to hold sway in politics across the United States while everyday immigrant communities are under renewed nativist assault, we take these opening questions to figure out how, exactly, we got here. The "we" and the "here" of how "we got here" are, of course, just as hotly contested as any of these questions. We will spend this course attempting to untangle the multiracial histories of the U.S. West from the mid-nineteenth century until the present. Beginning with the Mexican-American War (1846-1848) and the Treaty of Guadalupe Hidalgo (1848) and ending in our contemporary moment, the class will introduce students to key histories of the region through a combination of lectures and student discussion. An emphasis will be placed on interdisciplinary historical approaches to the histories of the U.S. West, and students will be exposed to the approaches of cultural, social, political, gender, oral, labour, and legal historians alongside various interdisciplinary scholars.

HIST204 Greek History
This course explores the development of Greek civilization from the Bronze Age Mycenaeans to the death of Alexander the Great. We will ask big questions: What did democracy mean in the ancient world? How did war shape political life and cultural values? Why did Greek city-states rise, flourish, and sometimes go to war with one another? These questions will be explored through close engagement with primary literature as well as evidence from art and archaeology. Readings in translation include works by Homer, Herodotus, Thucydides, Aeschylus, Sophocles, and Euripides. No previous knowledge of ancient Greece or classical antiquity is required.

This course fulfills the requirement for an Ancient History Survey course.

HIST205 Roman History
This course traces the history of Rome from its foundation, through its rise as an Italic and Mediterranean power, up to the transfer of the empire to Constantinople. It focuses on the political, military, and social achievements of the Roman people and the contributions of its principal historical figures, from the legendary kings of the regal period, to Republican leaders such as Marius, Sulla, Pompey, and Caesar, through Augustus and the establishment of the principate and subsequent emperors such as Vespasian, Hadrian, and Diocletian. This course will fall under the History/Social Justice track.

HIST207 Japan Since 1868: Society and Culture in Modern Japanese History
This course examines the history of Japan from roughly 1800 to the present. With a broad-ranging observation covering politics, economy, society, culture, and foreign relations, we will look at a variety of historical events that the Japanese people experienced. Our goal is not only to understand what happened when, but also to be concerned with how people at different historical stages saw the world around them. Major historical events, trends, ideas, and people will constitute the vital part of the course; however, we will also inquire into everyday life of ordinary people, whose names do not remain in historical records. We will use a wide range of materials including written sources available in the English language, films, literature, and comics.

HIST208 Digital and Visual Storytelling
During this seminar, we will develop a digital group project that addresses the question of remembering and denying pasts through the historical and critical relationship between carcerality, race, and storytelling in Connecticut. By engaging with contemporary forms of digital and visual storytelling (ArcGIS StoryMaps), this group project will work with the modalities of archival studies and digital humanities, accompanied by readings in critical race studies, visual and literary theory, and decolonial theory. We will first explore "remembering the past" through two post-Civil War Connecticut landmarks: The Church of the Good Shepherd (1867-69), dedicated to Samuel Colt, and the Mark Twain House (1874), now a museum. Both architectures exist as pivotal markers for a new modern American narrative intertwined with legacies of slavery, manufacturing, firearms, and storytelling. We will then consider how to make visible denied "pasts" by conducting archival research on the formative period of the 1860s and 1870s and in respect of the Connecticut context. Centrally, valuable insights for the project development will be provided by the in-class meetings with scholars, artists, and archivists, whose work rethinks and challenges the bond between carcerality, race, and storytelling.

HIST209 Reenacting Justice: Guns in America
This seminar, developed in collaboration with visiting guest instructor Glenn LaVertu (Parsons), combines readings, discussion, archival research, storyboarding, project-based learning, legal analysis, and filmmaking in presenting new takes on an old genre: Westerns. We will read and watch Westerns alongside study of the development of the American legal system, considering the aesthetics of justice, narrative, and guns. Students will work on film and theater projects related to the manufacturing, use, and mythologization of "Old West" in popular culture, television, and film. Film projects will be screened and discussed at the Center for the Study of Guns and Society's annual undergraduate conference on Thursday, April 25, and Friday April 26, 2024, and at the presentation of "Stories of Carceral Connecticut," a celebration of student projects for the Mellon Foundation project, "Carceral Connecticut," on Friday, May 3, 2024. (Both events are required). The course will consider the aesthetics of storytelling, guns, and justice, as well as be a lab for creating and narrating new stories. Engaging with contemporary debates about Westerns as manifestations of American gun culture, the purpose of the project is to draw parallels between the way in which gun violence is portrayed in film, particularly period, Western movies, and the realities of gun violence today. The final project is an opportunity to expose multiple points of view regarding gun violence and justice and their socio-political effects, and to write and develop new scripts, storyboards, and film scenes, as well as study old ones.

Assignments and Grading System:

Grading is based on weekly assignments and participation, an in-class midterm on the readings, and a final project.

Requirements:

- Class Participation (20%): Regular attendance, submission of weekly 1-2 pg written critical reflections on assigned topics (e.g. a primary source, an advertisement or magazine article, a report about a field trip or movie, etc.) Participation in the April 25 evening student mini-film festival and April 26 all-day undergraduate research conference is required.

- Midterm (40%): In-class midterm on the readings and discussions (in class; Thursday before break).

- Final project (40%): (20% for the project; 10% on the written artist's statement; 10% for the presentation at the April 25 mini-film festival night and April 26 panel).

Required Texts

(Available for purchase at the bookstore, and available for free reading on Olin e-reserve through the Course Moodle).

- *Joyce, Justin A. Gunslinging Justice: The American Culture of Gun Violence in Westerns and the Law (Manchester Univ. Press 2018).

- Densley, James ed. The Conversation on Guns (JHU Press, 2023).

- Light, Caroline E. Stand Your Ground: A History of America's Love Affair with Lethal Self-Defense (Beacon Press 2017).

- McKevitt, Andrew C. Gun Country: Gun Capitalism, Culture & Control in Cold War America (Univ of North Carolina, Chapel Hill, 2023).

Additional writings (e-reserve at Olin Library and on Moodle) are by Kelly I. Aliano, The Performance of Video Games: Enacting Identity, History and Culture through Play (2022); Vanessa Agnew et al, Handbook of Reenactment Studies: Key Terms (2023); and Priya Satia; Roxanne Dunbar-Ortiz; Richard Slotkin; Gillian Rose; Carol Anderson, Jennifer Carlson, Terrence H. Witkowski, Lindsay Livingston, Peter Boag, Joan Burbick, Jelani Cobb, and more.

HIST210 The Medieval Middle East: From the Advent of Islam to the Mongol Conquests (620-1258)
This course explores key themes in Islamic history from the emergence of Islam in 7th-century Western Arabia to the Mongol conquests and the fall of Baghdad in 1258. Focusing on the early and medieval periods, with particular attention to the Near Eastern context, we will engage with both secondary scholarship and primary sources to deepen our understanding of the cultural, intellectual, and social history of what constitutes "Islamic" civilization. Topics include the Late Antique context in which the Prophet Muhammad lived, the tenets of the faith, the development of religious and political authority through the caliphate, the translation movement from classical Greek science and philosophy via Syriac into Arabic and the subsequent rise in "rational theology," encounters with the Eastern Roman Empire, the Mongol conquests that ended the caliphate, and other topics.

HIST211 U.S. Labor History
How does the history of labor in the United States of America compare to that of other highly industrialized nations? For example, how did the system of slavery shape industrialization in the United States? Why were the socialist and communist movements much weaker in the U.S. than in Germany, France, and Italy, and why was there no major labor party in the U.S. as there was in England and Australia? Why have American workers been extraordinarily militant in job actions compared to their counterparts elsewhere? How have the religious convictions of the American people affected industrial relations? And why do Americans flinch at the word "class?" It is not a problem for the English, French, or Germans--what explains the difference?

HIST212 Modern Africa
What is African Modernity? We will examine this question as we survey the major historical transformations in Africa since approximately 1800. Important themes include: African political innovations, the abolition of the slave trade and its effects, European colonialism, African adaptation and resistance, nationalism and decolonization, and Africa's role in shaping major global events. We will also study the impacts of religious and social transformations amid rapid economic and political change. Finally, we will examine African visions for post-colonial development and how to shape the future of the continent. During the semester we will also cover some of the issues surrounding African history as a discipline. No single course can cover more than a sliver of the complexity and variety in the continent. For this reason, we approach the study of Modern Africa as comparative history. However, students satisfactorily completing this course will be able to write knowledgeably about African history and will have the foundation necessary to undertake further study about Africa with sensitivity to the complexity of its recent past.

HIST214 The Modern and the Postmodern
In this course we will examine how the idea of "the modern" develops at the end of the 18th century and how being modern (or progressive, or hip) became one of the crucial criteria for understanding and evaluating cultural change during the last 200 years. Our readings will be drawn from a variety of areas--philosophy, novels, music, painting, and photography--and we will be concerned with the relations between culture and historical change. Finally, we shall try to determine what it means to be modern today and whether it makes sense to go beyond the modern to the postmodern.

HIST217 Empires, Slavery, and Revolution: Africa to 1800
In this course we will examine the dynamic political and social histories of precolonial Africa. We will study the rise of kingdoms and empires such as Mali and Kongo, as well as revolutions in society from the technological development of iron production, to the emergence of trade networks, the development of ancient cities, the spread of religious healing and reform movements such as Cwezi spirit possession, and the role of gender in early African societies. Over the course of the semester we will also consider the impact of slavery and the first African encounters with Europeans. The methods for studying the early African past are interdisciplinary. You will have the opportunity to explore how ancient Africa has been imagined in the past by Africans and early Arabic and European observers, and how contemporary scholars write these histories. As we trace a history of early Africa in the world, we will consider several methods: the study of myths and oral traditions, linguistic and archaeological data, as well as ecological and archival records.

HIST219 Russian and Soviet History, 1881 to the Present
Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

HIST220 Authority and Resistance: France Since 1870
Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

HIST221 History of Ecology
The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

HIST223 Chinese Eco-Civilization: History, Experience, and Myths
The course traces the historical roots of the ideas of eco-civilization, a policy platform that appeared in the twenty-first century by examining how Chinese agrarian civilizations and their nomadic neighbors transformed the bio-physical environment over the course of 3,000 years of history. We will draw on translations of Chinese literary texts including poetry, classical prose, and novels to explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the modern period. How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice? Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs?

HIST224 Modern China: States, Transnations, Individuals, and Worlds
This course examines China's turbulent transition to modernity. It covers the Ming-Qing transition, Manchu conquest of central Eurasia, China's conflict and engagement with the West, birth of China's first republic, and the People's Republic of China under Mao Zedong, Deng Xiaoping, and his successors. The dramatic transformation of China spanning the late 19th century to the present day is the focus of this course. The Chinese people today continue to deal with the legacy of these reforms, wars, and revolutions, as China's leaders and people dealt with unprecedented challenges. The three central themes of this course are (1) the reconstitution of (a somewhat) unified China after decades of political upheaval, (2) China's vulnerabilities in the face of domestic troubles and threats from abroad, and (3) the challenges of maintaining a high-growth economy with scarce resources.

HIST225 Pirates, Traders, and Colonial Settlers in Maritime East Asia
Why is Maritime East Asia so contentious? Why is it emerging as the next global flashpoint? This course examines the historical roots of political tensions in Maritime East Asia by exploring the history of Taiwan. As early as the sixteenth century, merchant-pirates who dominated coastal China and Japan recognized Taiwan's strategic importance. For centuries, Dutch, British, American, and imperial powers used Taiwan as a springboard to gain a foothold in the Asia-Pacific region. Migrants from coastal China, who settled in Taiwan and Southeast Asia, worked with these imperial powers to colonize new frontiers and displace the indigenous population. The territorial disputes, economic rivalry, and business empires that shape our global economic order arise from the centuries-long struggle for dominance over Maritime East Asia. These historical legacies served as the driving force for political change. Maritime East Asia and particularly Taiwan not only transformed into an economic powerhouse but also stand at the forefront in the struggle against authoritarianism.

HIST226 Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa
The 1929 Women's War is a touchstone for women's history in Africa. By 'sitting on a man' women in Nigeria shocked colonial authorities and demanded economic rights and a public voice. These unruly women danced in protest and rioted (sometimes nude), but their actions were not uncommon sights for their African audience. African women across the continent had long wielded power as queen mothers, prophets, and traders. Others challenged the constraints of ordinary domestic life through their labor, dress, or spirit possession. Gender and contested authority are central to everyday life and politics in Africa. In this course, we will study the history of political and domestic authority on the continent with special consideration for the ways in which gender, sexuality, and power intersect. These histories are diverse both in time and place. For this reason, this course will not present a single narrative of gender in African history. However, students who satisfactorily complete the course will be able to write knowledgeably about the major debates surrounding gender and sexuality in Africa. Major themes include: spiritual authority; domestic and sexual life; the division of labor; and the impact of colonial rule and post-colonial politics. We will examine how women (and also men) have grappled with these intricate social and political relations from the pre-colonial period into the post-colonial era.

HIST228 The Memory of Slavery in Monuments, Museums, and Media
This course will examine how Americans have remembered and forgotten their nation's troublesome history of racial chattel slavery. Monuments, museums, historic sites, archives, burial grounds, genealogical societies, and films have all contributed to the contested legacy of slavery in America. We will consider how and why representations of slavery have changed over time and what those changes suggest about the larger society. We will ask how did representations of slavery and racism inform larger narratives of American identity? How did Black Americans respond to popular depictions of slavery, and create their own forms of public history? How did the memory of slavery inform the twentieth century Black freedom struggle? How does slavery continue to shape the contemporary United States, and how should we approach that legacy today? Students will also work with local museums and historic sites to produce projects focusing on the history of slavery in Connecticut.

HIST229 A Fair Country? Canadian Protests and Progress After 1900
From hockey to healthcare, Canadians define themselves by debates over what makes a fair country. This class will explore Canada's 20th century as episodes of resistance in the service of greater equality. From labor movements to protests against (and participation in) global conflict; from women's rights and the welfare state to social justice and environmentalism; from French nationalism and Quebec separatism to the Quiet Revolution and domestic terrorism; from racism to Indigenous resilience. Looming in the background is the American leviathan, a constant threat to Canadian social and political culture but also a foil against which the country can measure itself.

HIST230 Rome After Rome: Culture and Empire of Constantinople
Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capitol to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.

In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (https://arcg.is/0e4Lb4). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

HIST231 Guns and Society
Students will discuss some of the key questions that animate the emerging interdisciplinary field of gun studies, considering guns as objects and symbols and as sites of both shared and contested meanings in everyday life. Readings will include recent scholarship about the evolution of gun technologies and the changing place of guns in U.S. society, from the colonial era through to the present day, exploring how the history of guns in U.S. history is relevant to other histories, including studies of race, gender, class, labor and capital, social movements, and military and civilian life. Special focus will be put on visual studies, museum studies and public history, science and technology studies, public health, and legal history. Assignments include four shorter (2-page) papers and a 15-page final research paper. Each student, working in small groups, will also deliver a 10-minute presentation and have opportunities for site visits to local museums and gun violence memorials such as the Coltsville National Historic Park (Hartford), Springfield Armory National Historic Site (Springfield, Massachusetts), and the Connecticut Gun Violence Memorial (New Haven).

(This course is a prerequisite for individualized humanities "labs" designed for students to delve into a particular aspect of the topic of guns and society in a more applied way in the spring semester, through special projects that can include an individually designed research paper, a museum/archives project, a theater sketch, a podcast, a high school teaching module, an art project, an exhibit in a local museum, an oral history project, or a syllabus, among other possibilities to be discussed with the instructor.)

HIST232 Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity
Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have

successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, begging collectives, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

HIST233 History and Archaeology of Industrial Connecticut
Despite the fact that Middletown is a UNESCO Site of Memory and is home to many preserved historical sites, there has been little archaeological excavation, documentation, and storytelling specifically focused on extant industrialization, weaponry, and carceral artifacts dating to the Revolutionary War and early industrial eras. This course will explore the rich history of industrial sites in Middletown and surrounding regions of Connecticut. Students will learn about historical and archaeological methods for the study of past material culture, landscapes, and environments, focusing on how objects and sites can reveal hidden traces of Middletown's ties to agricultural, textile, munitions, and other forms of industrial production over the last few hundred years. Students in the course will have opportunities to work with archaeologists and museum professionals as they research local historic and archaeological objects. Students will also take part in archaeological investigations of local sites near Wesleyan's campus. As a final project, students will produce a public-facing online exhibit, physical exhibit, or public outreach activity based on their research. Students enrolling in the course must be available for a weekend fieldwork activity in April involving survey and/or excavation of a local archaeological site. This course is supported by a Mellon Foundation grant.

HIST234 Crossroads of Knowledge: Eurasia in the Post-Mongol Era (1258--1526)
In 1258, the Mongols sacked Baghdad -- the capital of the Abbasid Caliphate and symbolic center of Islamic civilization at the time. Paradoxically, this destructive act ushered in the period when Islam saw its greatest expansion. This course explores the period of relative stability that characterized Eurasia in the aftermath of the otherwise incredibly violent Mongol conquests, a period referred to as the 'Pax Mongolica' or 'Mongol Peace.' This peace fostered the unprecedented exchange of ideas, goods, and scholars across Eurasia -- not to mention conversions to Islam -- while laying the groundwork for the emergence of great empires like the Ottomans, Safavids, and Mughals. In addition to these chronological developments, we will examine the flow of knowledge, technology, and cultural practices through major trade routes and scholarly networks -- focusing on the enduring legacy of this period -- and learn how the Mongol legacy impacted Islam's spread beyond its origins in Arabia.

HIST235 Magic, Witchcraft, and Miracle, from Saints to Salem
Until the "disenchantment of the world" in the 18th and 19th centuries, Europeans lived in a universe shot through with hidden and awesome power. God's action in the world was possible, but puzzlingly he often operated through other agents, through the saints and by miracle. On the other hand, humans were often tempted to appeal to other powers to get what they wanted, and the use of magic--some pagan in origin, some not--was a pervasive influence. The world was full of demons and even devils, who used illusion and magic to entrap people by possessing them or turning them toward witchcraft in exchange for wealth and health. Surprisingly, the occult was not all bad, and Catholics and later Protestants too wrestled with the question of what to accept and what to suppress. Magical forces did not fade with the Renaissance but actually grew alongside the first developments toward modern natural science in the 16th and 17th centuries. The necromancer joined the saint, the priest, and the witch as the faces of occult power. This course will take a broad look at the people and powers that filled the place where science and a lot of religion sit today. The course will survey medieval developments and will end in New England in the 17th century. The instructor will provide background and narrative history in order to place the readings into their appropriate context. In surveying the long history of magic and miracle in Europe, we shall ask such questions as: What exactly do these terms mean and how have the meanings changed? How far away from such a worldview are we today and did magic really end in the 17th century? And, if so, why? Who controlled the use of magic and how was its misuse identified and punished? Were the processes of law, inquisition, and prosecution fair or effective? Were there really witches or just witch hunts? Why did people believe in miracles and magic? Who were the practitioners? Why did it all decline?

HIST236 Dante in His World: Politics, Poetry, Religion
Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante's own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

HIST237 Making New Worlds: Encounters on Turtle Island
From before the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, Turtle Island (North America) was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on Indigenous homelands with deep histories. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease). Throughout, we will focus on the persistence and resistance of Indigenous nations who protected (and still protect) their homelands and lifeways.

HIST238 America 250: The Promises and Tragedies of Independence, 1763-1815
Independence was a process, not an event. The Declaration built on relationships and identities that formed before 1776 and its impact reverberated across the globe in the decades (and centuries) after. But what kind of world did the drafters of the Declaration imagine? What did their document actually create? What other conceivable futures were sacrificed so that Independence could succeed? Exploring the era that made Independence possible helps illuminate the paradoxes, complexities, promises, and tragedies of the North American experiences at the end of the eighteenth century. The Declaration of Independence opened one future and foreclosed on others. The Revolution required to make Independence a reality was a brutal conflict that divided families, destroyed economies, shattered kinship networks, and created not one but (eventually) two countries. Revolution and Independence looked different to women, labourers, the enslaved, loyalists, and Indigenous nations who were swept up in the American project and had to navigate the new realities it brought about. That the United States would become a super power was far from the minds of those fighting for or against American independence.

HIST239 The United States in the Long 19th Century
This survey course will introduce important themes in the history of the United States during The Long 19th century (the early Republic to WWI), a period of rapid displacement, settlement, and migration. With a commitment to teaching and learning "history from below," we will examine topics such as territorial expansion; development of capitalist enterprises; African, African American, and Indigenous enslavement and freedoms; overlapping migrant diasporas; and contestations over the meanings of democracy, by uplifting the perspectives of historically marginalized peoples. In doing so, we will come to recognize how formations of race, class, gender, and sexuality are inextricable from the formation of the nation.

HIST239Z The Long 19th Century
Please note: Some readings and assignments will be due during winter break, prior to arriving on campus for Winter Session. Please visit the Winter Session website for the full syllabus -- http://www.wesleyan.edu/wintersession.

In 1787, the ratification of the Constitution established the United States of America as a republic in which power rested with the people. But the slim document left many fundamental questions unanswered. Would the overwhelmingly agricultural country be one of small yeoman farmers or large-scale plantations? Would the new nation limit western expansion to honor treaties with American Indian nations? Would the growing ranks of wage laborers in the nation's burgeoning cities have the same political rights as property owners? Would a nation founded on the shores of the Atlantic World pursue closer integration into global trade or protect its craftsmen and nascent industrial manufacturers? Could women make a claim to civic participation in a nation whose liberty they had helped win? Would a nation dedicated to freedom be able to reconcile the bondage of one-fifth of its population?

The Long 19th Century explores the history of the United States from the Early Republic to the Progressive Era (1787 to 1913), as an array of different groups and competing interests attempted answers to those questions. The period witnessed an incredible expansion of the United States from one of several imperial claimants in North America to the dominant power on the continent. Simultaneous to this expansion in geographic scope, the 19th century saw a shift in the scale of governance from a limited government to a powerful federal state that abolished property rights in slavery and intervened in struggles between labor and capital. In following that expansion and shift, this course explains the evolution of the modern United States.

HIST240 The United States, 1898-2001
This survey course examines United States history in the twentieth century in its geographic expanse from the North American continent into the U.S. island empire in the Atlantic and Pacific Oceans. While this course will survey a traditional U.S. political history, it places an emphasis on the diversity of experiences of those living within the United States. We will explore how the U.S. amassed its island empire, how immigration law emerged, how U.S. international affairs such as wars impacted domestic policies, as well as how domestic social movements such as labor, Civil Rights, feminist, Indigenous sovereignty, and social justice movements shaped the course of United States history into the present. In doing so, we will pay critical attention to the historical and analytical themes including, but not limited to, race, indigeneity, gender, and sexuality.

HIST242 World History
Using material culture, visual sources, primary texts, and articles, this course will give students a solid understanding of World History from the River Valley Civilizations, the Classical Period, and the Post-Classical Period, to the Early-Modern Period, the Long 19th Century, and the Contemporary Period. Emphasis will be placed on the development of major cultures around the world -- and

there will also be discussion of how the major cultures fail to explain much of World History.

In practical terms, students will learn how to assess a broad range of historical sources from varied places and times; how to debate these works in class discussion; how to produce concise and precise reading notes based on an argument/counter-argument format; and how to work collaboratively on the group project.

HIST243 How to Make History, or the Art of History: Past, Present, & Future
History is one of the oldest of intellectual endeavors and through its many transitions and versions around the world it is unified generally by its literary and artistic character as much as by its research intensity. It is a study of finding out but also always about the telling. With the development of professional historiography in the 19th century, the imaginative and creative aspects of making history have been spoken about less, but they have remained crucial parts of history's success. Today especially, it is important to understand the versions of history-making that have existed and the possibilities for students and other historians to make well-shaped, moving, decisive history. The course will examine the history of history-making, looking through its long history around the world to understand historiographical developments but also to give ourselves examples now for ways of writing history more effectively. The course will pay unusual attention to the possibilities of making history today, not only in the academy, but in fiction, in film, on television--everywhere that history is, in fact, made.

HIST244 The Ottoman World
This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans, Anatolia, the Middle East, and North Africa emerged during the 20th century. At the center of the course is the transformation of the so-called classical Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be starting from the 15th century and end with the analysis of the making of the modern Ottoman society by the beginning of the 20th century before its imminent collapse. The late 16th-century transformations and the question of Ottoman "decline," on the one hand, and transformation to a modern state on the other, comprise the historiographical context to be addressed alongside basic historical patterns and events. A primary concern is to have students engage with critical issues not only in the study of Ottoman history, but also situating this history in the discussions on world history in general, and the history of the Middle East in particular.

HIST244Z Imagining the End: Neoliberalism and the Arts
Many of us now like to paraphrase the philosopher Frederic Jameson when he argued that it has become "easier to imagine the end of the world than the end of capitalism." As the recent deluge of post-apocalyptic movies and documentaries about melting glaciers makes clear, this is an accurate statement. Yet while most of us imagine how neoliberal capitalism will bring about the end of the world, others try to imagine the end of the status quo. Since neoliberalism became the global hegemonic system, artists of all kinds have been imagining ways we can survive and (perhaps) overcome it: think about the songs of Tracy Chapman or Residente, the street art of Keith Haring or Lady Pink, the movies of Chloe Zhao or Alejandro González Iñárritu, or the writings of Ursula Le Guin or Roberto Bolaño. This course explores how engaged art from the 1970s to the present has responded to -- and fought against -- neoliberal hegemony in the United States, Latin America, and beyond. Through the arts, we will explore the nightmares of global collapse and the dreams of a new egalitarian and sustainable society. In addition to analyzing movies, poems, short stories, songs, and street art, we will read theoretical and historical studies that help us understand how neoliberalism shapes contemporary culture and makes art into one of the few areas in which dissent can be expressed.

HIST245 Modern Latin America Since 1810
This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

HIST246 France at War, 1934-1944
Beginning with a Parisian riot widely understood to be a fascist insurrection in 1934, followed immediately by massive popular protests from the Left, France entered a decade in which it was at war with itself, often characterized as a Franco-French civil war. These were years of uncommon political engagement, disappointments, struggle, and multiple disasters. A divided France encountered the menace of another European war, concluding with its astonishing defeat in 1940 by Nazi Germany. This seminar explores the ideological antagonisms that shaped French life during the Popular Front, a broad alliance of the Left, 1934-1938, and during the German occupation, 1940-1944, when French authorities collaborated with the occupier. We will consider interpretation and memory of these dark years and draw upon documents, films, memoirs, and journalistic accounts.

HIST247 The Fall of Rome and Other Stories
The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with selections from a range of

authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea, and many others--to connect the fall of Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

HIST248 Time: A History
History unfolds across time, but time itself has a history. This course explores how people have understood, measured, and lived with time, and how those understandings have shaped social life. We will approach the history of time through three interpretive arcs drawing on the history of science, intellectual and cultural history, and social history. First, we examine efforts to quantify and measure time, from ancient sundials to modern atomic clocks. Second, we consider the multiple "temporalities" through which societies have viewed and experienced time, shaped in part by technological change. Finally, we explore how time has structured human life, including topics such as artificial lighting and the history of night, the invention of interest on debt, high-speed communication, and the concept of the Anthropocene. Through discussion of secondary texts and primary sources, supplemented with lectures, this course will explore the history of time and its role in the human experience from antiquity to present.

HIST249 History of the End
How will it end? Scientific/political hubris, a nuclear event, an asteroid, environmental disaster, overpopulation, resource scarcity, commodity price spikes, riots, social chaos, social control? This course investigates how people have imagined apocalypse and post-apocalypse over time, on the premise that fantasies of the end provide a window into the anxieties of the societies that produce them. In spite of its orientation toward fictional scenarios, this is primarily a course about postwar American environmental and political thought, and the ways these inflect or are inflected by fantasy.

HIST252 Botanizing Worlds
What can plants tell us about the human condition, and more broadly about the rapidly changing conditions on Earth? In recent years, scholars, writers, and artists have been calling for new ways to address "plant blindness"; finally, it appears that plants are having a moment. Plants are crucial to the survival of human life. From the food we eat to the air we breathe to the clothes we wear, plant bodies are used to build homes, cure our ailments, and feed our addictions. Putting plants to use is tantamount to survival, but this course aims for a less extractive relationship with plants. This course explores what we might gain by learning from plants -- to know them, think with them, and attune our senses to their liveliness -- raising fundamental questions about human-plant relations to reconsider what it means to be human. This course aims to gather the lively energies surrounding plants today and the expertise of scholars and regional collaborators, and direct them toward the development of a cutting-edge, interdisciplinary curriculum by bringing together researchers, artists, and curators from multiple institutions to read and discuss key works in the botanical humanities and connect with related sites (botanic gardens, greenhouses, laboratories, archives, special collections, etc.) at our campuses. This course will showcase exercises, assignments, and reading lists that can promote humanistic research and thinking with and about plants.

HIST253 Latinx History and U.S. Empire
How has Latinx history in the United States been shaped by U.S. imperialism across the Americas? What is the relationship between different Latinx communities in the United States and U.S. empire? What role has U.S. empire played in Latinx im/migration, both historically and in our contemporary moment? Does "Latinx" refer to a race, an ethnicity, a culture, or something else entirely? How do we understand Latinidad in relation to other racial formations in the United States and the broader hemisphere? Taking these opening questions as our guides, this survey course will introduce students to Latinx history through a transnational framework by emphasizing the centrality of U.S. imperialism in understanding who Latinx people are and how they have ended up in the United States. The course will trace the histories of U.S. imperialism and Latinx communities beginning in the nineteenth century and extending into the present day. An emphasis will be placed on interdisciplinary historical approaches to the study of Latinidad and Latinxs in the United States as related to U.S. imperialism and colonialism, racial capitalism, transnational racial and ethnic formations, and im/migration. Students will be exposed to the approaches of cultural, social, gender, political, oral, labour, and legal historians, alongside the work of Ethnic Studies, Latinx Studies, and American Studies scholars.

HIST254 Science in Western Culture
This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called "science" and how they have attained such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have "done science" in different times and places. Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between science and state power by exploring the changing nature of scientific authority, the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

HIST255 The Vikings and the Viking Age, 700-1243
The Vikings erupted from their isolated northern homelands throughout Europe from the eighth century, and arguably reoriented European history both in the West, where they were instrumental in the history of the British Isles and France, as well as the East, where they were founders of the Russian kingdom. By 1100, they and their descendants had also established themselves in the Mediterranean, Italy, Sicily, and the Holy Land. This course will examine the reasons the Vikings emerged, and will explain their role not only as warriors, but as important merchants, administrators, and contributors to a robust European literary culture. They provide the perfect avenue by which to understand the creation of European culture and politics. The course will also act as an introduction to the dark age history of England, France, and Northern Europe.

HIST257 From Chocolate to Coca: Commodities and the Making of Latin America
Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

HIST258 Intimate Histories: Black Women's Sexuality
Black feminist theory teaches us that African American women have historically confronted racism and sexism in addition to other forms of oppression. How has this experience shaped the sexual lives of everyday black women and famous figures? This course places the sexual at the center of African American women's history. It will examine how regimes of violence have intervened in black women's sexual freedom, from intimate bonds to reproduction to same-sex desire. It will cover black women's resistance to these regimes; to their sexual agency in diverse spaces from the plantation to the porn industry. This course will also tackle the enduring impact of the Jezebel stereotype in the history of black women's sexuality. Using primary and secondary sources, this class will fundamentally investigate the significance of African American women's sexual history in the histories of American sexual, racial, gender, and class politics.

HIST259 Asians and Pacific Islanders in U.S. Empire
This course forefronts the diversity of experiences between and within the Asian and Pacific Islander communities in the U.S. empire both on the North American continent and in the Pacific. While political and social categories place Asians and Pacific Islanders within the same group, the groups' vastly varied experiences under U.S. empire makes it necessary to challenge the historical narratives that gloss over key contexts that continue to influence Asian American and Pacific Islander American experiences today. Thus, we will engage in an integrated, not conflated, history of Asians and Pacific islanders, paying attention to the specificities of imperial experiences and their effects on race, class, gender, migration, and diasporic patterns. We will explore topics of immigration and migration, labor and trade, citizenship and belonging, race and indigeneity, gender and sexuality, war and militarism, religion and culture in various contexts, including cities such as San Francisco and New York, regions such as the Pacific Northwest and the American South, countries of the Pacific Rim including the Philippines and Vietnam, and the Pacific islands such as Guam, Hawai'i, and American Samoa.

HIST260 Seeking the Land of the Rising Sun: Introduction to Premodern Japanese History and Culture
This class spans the course of human history on the Japanese archipelago from long before the adaption of the Chinese writing and legal system to the climactic Battle of Sekigahara in 1600, which ushered in the Tokugawa Shogunate. Throughout the course, we will explore many narratives of Japanese history, delving into topics such as politics, religion, war, economics, literature, and the day-to-day lives of the Japanese people across time. By the end of this course, you will have a firm grasp on topics such as the extravagant court culture of Kyoto during the Heian period, the unique relationship between Shinto and Buddhism, the rise of warriors in the provinces, and the eventual breakdown of a centralized state that led to more than one hundred years of civil strife. Further, you will be able to qualify the national and international "image" of traditional Japanese culture that has been crafted through an emphasis on the many connections, however tenuous, that exist between premodern and

modern Japan, such as samurai, Bushido, Shinto, sumo wrestlers, ninja, etc. No former knowledge of Japan or Asia is required for this course. All lectures, weekly readings, and books included on the list for the comparative book review will be in English. All readings will be provided save for the required textbook, Japan Emerging: Premodern History to 1850, and the books for the comparative book review. The ebook of Japan Emerging is available for free through the library.

HIST261 Enlightenment and Science
This course will examine the positive and negative ways that 21st-century science and technology have been impacted by the Enlightenment. In this earlier time, without government or private sources of funding for science, the emphasis on immediate outcomes became common. Practitioners of science often had to be showmen to attract attention in order to get funding. Through the study of contemporary news articles, this class will also consider such ethical choices, many of them to do with resource allocation, that we are facing in science, medicine, and technology today. It has been assumed that the modern age was drawn from the scientific method and the scientific advances of the Enlightenment. It was Émilie du Châtelet and Voltaire, both strong supporters of Isaac Newton, who, in the mid-18th century, chose the rational, scientific method as the marker of their intellectual age, the Enlightenment. This choice was adopted by their intellectual cohort, and in turn it was slowly accepted as the standard by European society overall. Thus Enlightenment science did not only lead to modern, 21st-century science, it also directly shaped modern attitudes toward the proper running of society and this continues until today. Yet, little work has been done on what it means to organize a society along scientific principles, especially given that this represented a sharp shift away from traditional decision-making on the state level, and a move towards secularization. How did this new, rational approach shift the priorities of European societies, particularly in terms of the distribution of resources? In the 18th century, there was also a desire by educated readers who were not themselves practicing science to learn more about both the history of science and contemporary scientific discoveries. In this century, emerging modern science was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans as well as privileged practitioners of science. Talented young men from less privileged backgrounds were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also active in scientific circles, perhaps most notably Margaret Cavendish, Émilie du Châtelet, and Caroline Herschel. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In both cases, science was discussed as a normal topic of discussion, not just a subject for specialists. However, the professionalization and specialization of the sciences in the 19th century led to mixed results--it certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly established manner. It also resulted in the end of educated people outside of the sciences considering science to be an area that they should know in order to be proper citizens, not just intellectuals. For centuries it was assumed that the modern age was drawn from the scientific advances of the European Enlightenment in the 18th century. Then, in the last few decades, many scholars started to attack what has been called the Enlightenment Project with its wholesale emphasis on science and rationality. Others have found that there were also valuable nonscientific achievements in Europe during the Enlightenment. However, there is a need to bring the scientific method and the technological advances of the 18th century back into the conversation about the science of that time and then of our own time. Given that we now live in an age both bettered and dominated by science and technology, it is of paramount importance to understand the origins of modern science and technology.

HIST261Z Enlightenment and Science
This course will be a study of how we, as a society, have obtained our views on science. The class will concentrate on the positive and negative ways that twenty-first-century science and technology have been impacted by the Enlightenment. In general terms, the long-eighteenth-century European Enlightenment is taken to be the marker of the modern age--when modern science emerged. The time has now come for a reconsideration of the complexity of science and the scientific method during the Enlightenment as a means of comprehending its direct impact on the modern age in which we are living today. This class will focus overall on the strengths and weaknesses that modern science, technology, and thus society have inherited from the Enlightenment.

This is not wholly a story of science and technology in the West, but a World History story. This class will highlight test cases and ethical choices--to give two modern examples, decisions about resource allocation, that of fossil fuels and vaccines--that we are facing today. These choices are not made simply on scientific, logical lines but also according to the preferences of society. In order to understand our current situation, we must inform ourselves about how we arrived at this situation. Two centuries ago, without government or private sources of funding for science, the emphasis on immediate outcomes in science became common. Practitioners of science (the term "scientist" was not used until the nineteenth century) often had to be showmen to attract attention in order to get funding. Likewise, by the twenty-first century, it is now almost impossible for scientists to get grants for pure research; winning applications have to stress immediate public outcomes in order to get funded. This effectively puts a stopper into the very source of new scientific ideas--pure science--and of virtually all new scientific break throughs, and this is a world-wide trend in the sciences.

In this class, we will examine crucial examples of the key scientific subjects that emerged during the Enlightenment, and social and political responses to these same scientific discoveries, from both the Enlightenment and Counter-Enlightenment, which stressed religion over science. We will read responses from non-practitioners of science at the time--educated people trying to make sense of emerging modern science in the midst of politically and economic troubled times. There was, in the eighteenth century, no safety net--such as unemployment benefits--for those who wanted to practice science in a time that there were no jobs in science. There was certainly no safety net for rest of society either. The parallels to our own time are self-evident: political polarization, closely linked to radically different views toward science, in the midst of epidemics and widespread financial distress.

Emerging modern science in the long eighteenth century was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans in addition to well-connected practitioners of science. Talented young men from less privileged backgrounds

were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also active in scientific circles. Such accomplished women were rare during the Enlightenment but they should not be ignored. Margaret Cavendish, Emilie du Chatelet, and Caroline Herschel are prime examples of women practitioners of mathematics, physics, and astronomy respectively. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In all these cases, even the political salons, science was discussed as a general topic of discussion, not just a subject for specialists. And those knowledgeable in the sciences were expected to make their work accessible to non-specialists. Later, however, the nineteenth-century professionalization of, and specialization in the sciences led to mixed results. It certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly-established manner. Alas, it also resulted in the end of the belief that educated people outside of the sciences should know about it in order to be proper citizens. Overall, this class will address areas of commonality and difference between Enlightenment science and technology and modern science and technology, including lingering problems, as well as possible solutions suggested from past writings and experiences.

There will be many distinctive aspects of this class. One will be the intensive textual analysis of primary documents in class. Another will be the active participation of several guest speakers. There will also be a virtual visit to Special Collections, Olin Library, Wesleyan University.

HIST262 Atomic Africa: A Technological History of the Cold War
"Atomic Power Programme Moves Ahead: NUCLEAR REACTOR FOR GHANA" In 1962 the Ghanaian Times proclaimed Ghana's atomic ambitions. Strikingly, it was only two years after the West African nation raised the international alarm against France's nuclear testing in the Sahara. In the midst of the global Cold War, African activists, politicians and scientists called for an end to nuclear imperialism and struggled for political and scientific sovereignty. It was an era marked by the struggle for decolonization but also by the promise of a new technological age. As African politicians planned for an Africa of the future, they faced intense political pressures from both the U.S. and the Soviet Union. They also formed partnerships with China and Cuba, reshaping the international lines of Cold War cooperation and the nature of "development." Over the course of the semester, we will examine Cold War stories across the continent including the mining of uranium, the international Congo Crisis, the development of African radiation experts, the use of radio by liberation forces in Angola, the emergence of an African Jet Age, and the building of the Freedom Railway in Tanzania. In addition, we will examine how students, workers, and scientists negotiated the currents of the Cold War and responded in creative ways to produce their own Atomic Africa.

HIST263 Inside Nazi Germany, 1933--1945
This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

HIST264 Waterways: Maritime World History
Human history has been shaped by the sea. Whether as a source of food, a frontier, a boundary, or a bridge, the sea has represented a site of both opportunity and danger. This course will examine the way humans have responded to their marine and maritime environments, both in terms of the technologies they have developed to navigate and exploit them but also insofar as the sea has shaped the way humans think about themselves. While our inquiry will extend into the deep past and the early development of human culture and civilization, we will focus on maritime history over the past millennium, the development of oceanic worlds, the rise of the "age of sail" between the 16th and 19th centuries, and the transformation of global navigation and politics with the rise of steam, diesel, and nuclear power.

HIST265 From Modern Empire to Economic and Cultural Powerhouse: Introduction to Modern Japanese History and
A survey of Japanese civilization from prehistory to the beginning of the 21st century. This course examines Japanese history and culture in chronological order, introducing important events and individuals, prominent literary and artistic works, and recurring themes across the ages. We will explore the definition and boundaries of Japan itself, delving into how the needs of modernization and industrialization propelled colonial and imperialist expansion, which violently reshaped peoples and cultures both inside and outside the country's current borders. across the Japanese archipelago interacted and coalesced into the foundation of what we recognize today as the nation of Japan. The course also also devotes a significant portion of time to Japan post-World War II, examining the political, economic, social, and cultural changes that transformed Japan's international image into a land of peace and tradition today. In addition to the main textbook, the reading assignments incorporate a significant number of primary sources, ranging from government edicts, laws, and ideological tracts to literature and private correspondence.

HIST265Z The History of Surveillance and Information in the United States
This course considers the history of surveillance and information in the United States during the 19th and 20th centuries. We will explore technologies and systems that evolved during this period to track, codify, and control people in the US and abroad, as well the many efforts to resist these processes. Readings and lectures will pay particular attention to how surveillance and control over information empowered both the state and private entities in novel ways. The course is built around supporting students as they undertake a research project that interrogates how information and surveillance have shaped contemporary life.

HIST266 Visions of World Order: From the French Revolution to the Present
This course offers a survey of how social scientists, philosophers, and statesmen have understood and imagined global order from the late 18th century until the present. The course first examines interpretations of global order that emerged during the late 18th and 19th centuries: Cosmopolitanism (Immanuel Kant), Positivism (August Comte, Saint Simon), Nationalism (Giuseppe Mazzini), and Marxism. The course then turns to the first half of the 20th century by examining the international thought of W.E.B. Dubois, Marcus Garvey, Rosa Luxemburg, and Gandhi, while also discussing fascist and liberal internationalist views of world order that emerged after World War I. The third part of the course discusses visions of Cold War order connected to American modernization theory (W.W. Rostow), neoliberalism (Friedrich Hayek), post-colonialism (Franz Fanon), Third Worldism, Neoconservatism (Jeane Kirkpatrick), and Systems Theory. The course concludes with the Post-Cold War period and how it has been imagined by such thinkers as Francis Fukuyama and Samuel Huntington along with a discussion of such topics as the global turn to nationalism, the Green New Deal, and the "New Cold War with China."

HIST267 Development in Question: Conservation in Africa
"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, scientists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international and governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine game park politics, the history of resource extraction, climate change, and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

HIST268 The Origins of Global Capitalism: Economic History, 1400--1800
This course explores how the modern market economy came into being in Europe and why this system expanded outward to bring the rest of the world into its orbit by 1800. Among other things, it seeks to provide answers for why China's economy--perhaps the most sophisticated in the world before 1500--fell into relative stagnation and why Europe was the first region to develop mechanized industry and break out of a poverty trap that had restricted prosperity for millennia. The course begins by exploring late medieval European agriculture, market systems, institutions, and technology to reveal how the paths of economic development taken in Europe began to diverge fundamentally from those taken by societies in Africa, Asia, and the Americas. It will explore the role of the spice trade in the expansion of European influence abroad, the significance of new food and cash crops in the development of plantation systems and long-haul trade, the impact of organized coercion in the development of monopolies and monopoly companies, and the role of proto-industrial methods of production and colonial economies in the birth of the Industrial Revolution. The course aims to be accessible, broad, and comparative, drawing insights from many fields to consider the environmental, geographical, cultural, institutional, and political factors shaping the economic changes that have created modern capitalism.

HIST270 On Evidence: Archives, Museums, and Prisons
This course introduces an interdisciplinary study of the idea of evidence in connection to the modern development of archives, museums, and prisons, by setting this in a contemporary dialog with the discourses on state violence, incarceration, and refugeetude. This course will firstly establish historical and theoretical connections between carcerality, Western archival record-keeping practices (e.g., scientific grids, mugshots, taxonomies, and forms of surveillance), and museological frameworks developed during the transition from the 19th to the 20th century.

Furthermore, it considers how records, artifacts, digital data, bones, sites of "memories," oral traditions, embodied knowledge, or intergenerational trauma can become evidentiary material. Such inquiries are central to decolonial archival studies as they are critical for historically marginalized, racialized, and gendered subjects, whose claims to social justice, human rights, and cultural heritage are tied to the aftermaths of slavery, genocides, and colonialism. Our readings and discussions will specifically draw upon decolonial archival studies, digital

humanities, visual studies, human rights discourse, Asian American studies, Black studies, and Indigenous studies, which have continuously challenged what constitutes evidence.

HIST271 Free the Land: Histories of Environmental Racism
This course will introduce students to the study and discussion of environmental racism and environmental justice in the United States that centers the histories and experiences of communities of color. Environmental racism is defined by Dr. Robert Bullard ("the Father of Environmental Justice'') as "any policy, practice or directive that differentially affects or disadvantages (where intended or unintended) individuals, groups or communities based on race." This course expands and illuminates this definition through examinations of watershed moments--from the Transatlantic Slave Trade to struggles in the greater Connecticut River Valley today--in which communities of color in the United States bear the deadly brunt of toxic fumes, poisoned groundwater, nuclear waste, perilous disaster work, land theft, and the slow violence of biological extermination. Throughout the semester, we will read scholarly texts, engage primary sources, analyze popular and independent media, and study testimony and self-published materials from activists and eyewitnesses.

HIST272 Law, Court, and Crime in England, 600--1660
This course will discuss the nature and development of law, dispute resolution, custom, and rule in England from the arrival of the English on the island in the age of Arthur when feud and compensatory justice dominated. It will then examine the rise of royal power, local custom, and the common law in the 12th and 13th centuries, including the Magna Carta crisis. We will focus on the growing politicization of law and the development of courts and lawyers alongside new sorts of lawmaking in parliament and through the power of the king. The growth and challenge of royal and parliamentary power will frame the last parts of the course that anticipate the revolutionary crisis of the 17th century. Along the way, the course will ask, Who gets to make law, what is the role of writing in the development of custom and law, how did the English decide who was right and who wrong: calculation, testimony, jury, or ordeal? What were the forms of punishment and compensation employed, and what did this tell us of conceptions of the person: mutilation, execution, or incarceration? How did social status and gender shape expectations and outcomes in the legal process: Who could be a legal actor, a responsible malefactor, a property owner, or a slave; who could be judge and legislator? The course will be based on the examination both of recent scholarship and a wide array of primary sources such as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

HIST273 Well-Behaved Women Seldom Make History: Gender, Sex, and Power in Colonial America
When Laurel Thatcher Ulrich wrote that "well-behaved women seldom make history," she meant that colonial women who conformed to gendered and sexual expectations rarely emerged in the historical record. As such, the women who feature most prominently as individuals in the historical record of the colonial period are those who acted outside proscribed social norms. We will, therefore, look at the ways that colonial Americans attempted to police those prescribed social boundaries from the persecution of Anne Hutchinson, to their fascination with witchcraft, to their reification of white womanhood. As we will see, many used intimacy to shape the world they lived in even as they were left out of the formal aspects of governing. Finally, this course seeks to understand how early Americans both constructed those gendered expectations and how they served to reinforce the patriarchal, racial, and colonial hierarchies of early America.

HIST274 Crisis, Constitution, and War: the U.S.'s Early Decades
It is common today for Americans to fight over how to interpret the U.S.'s early decades. Specifically, recent decisions by the U.S. Supreme Court (some guided by originalist jurisprudence) have sparked vigorous debate over the meaning of the U.S. Constitution. This course not only examines the Constitutional Convention of 1787, but also the preceding years of unrest and crises such as Shay's Rebellion. Military history is another important focus of the course, and students will discuss the technological, operational, and social dynamics of the Quasi-War, Barbary Wars, and the War of 1812. Finally, this course also investigates how the U.S. struggled to exercise power in North America, as free and enslaved peoples resisted its authority during the Whiskey Rebellion, Wars of the Northwest Territory, and Gabriel's Rebellion. One unique aspect of this course is its four-week long embodied learning exercise, as students "gather" in 1780s Philadelphia as constitutional convention delegates. What exactly they are gathering to accomplish is a matter of controversy, but ultimately the student-delegates will work through "sectional interests, backroom deal-making, personal rivalries, and foreign intrigue" as they attempt to approve a new constitution within the constraints of the era's historical context.

HIST275 Empires on Fire: Revolutions in the Atlantic World
This class will explore what historians have called the "Age of Revolutions." The ideas, ideologies, and actions that set empires aflame during the long 18th century formed an entangled revolutionary experience that spread from one part of the Atlantic world to the next. From England's "Glorious Revolution" in 1688 to the American, French, and Haitian revolutions at the end of the 18th century, and then on to the South American and Canadian uprisings in the early 19th century, this course will examine revolutions not as discrete events but as interrelated processes. By studying the perspectives of leading politicians, regular subjects and citizens, and marginalized groups, students will investigate the wide variety of revolutionary experiences.

HIST275Z Building a Relational Database: Introduction to Historical Research Data

This course empowers students to become not only readers of history but creators of historical data, new scholars actively seizing the current digital history moment as an occasion to break down history's myths through the activities of research, datafication, and analysis. The digital age -- even the advent of GenAI -- has changed nothing fundamental about the practice of historical research. But it could: the digital age is an opportunity for scholars to act as agents of change. This winter course focuses on the role of data in existing historical practices. Our series of focused workshops and targeted research investigations will enact and enable new methods and practices of history. Targeted readings address current theories and methods for working with the range of historical source materials: moth-eaten archives, curated library collections, digitizations, and digital-born objects. We will then get right to work on practices and your own research projects. Students will set up an archival relational database through the web-based tool Nodegoat. They will finish the session by curating their own historical archive, which they will codify as a relational database, and then explore development through further research or publication.

HIST276 Sultans, Saints, and Scholars: The Rise of the Ottoman World

How did a small band of Turkish nomads at the frontiers of the Byzantine Empire transform into a world power spanning three continents? In this class, we will explore the dynamic history of the Ottoman Empire from its emergence in the early fourteenth century until the early seventeenth century. This course traces the political, cultural, and social developments that shaped the Ottoman Empire's rise and left a lasting impact on the Middle East, Europe, and beyond. Key topics include the significance of Istanbul as a cultural and political hub, the interplay of religion and governance, the role of the sultan, the palace, and the harem, the dynamics of urban life, coffeehouse culture, and the ways the Ottomans saw themselves in relation to their neighbors and the world. We will analyze primary sources like travelers' accounts, dream diaries, poetry, and court records -- alongside modern scholarship -- to understand how the Ottomans governed their diverse populations, navigated religious pluralism, and adapted to changing political landscapes and environmental pressures. We will also examine the role of saints, mystics, and scholars who influenced spiritual life and shaped ideas of law and community. No prior background in Ottoman or Middle Eastern history is required -- just a curiosity about the past and a willingness to engage with complex histories.

HIST278 Visualizing Firearms History: An Applied Quantitative and Archival Approach for a Project-Based Expl

This project-based course provides a unique cross-disciplinary opportunity to study important historical questions surrounding firearms. Combining quantitative methodology in data science with qualitative research methods in history, students will answer questions they are passionate about based on existing datasets. Students will read, discuss, and write responses to the latest historical scholarship on the technological development of guns, firearms in media, gun violence statistics, and advertisements. Students will choose one of four datasets to research and analyze. These include data sets related to firearms patents since the 1820s, firearms in media (film, television, anime, games), firearms-related deaths, and advertisements of firearms. Students will develop skills in hypothesis testing and inferential statistical analysis alongside qualitative research methods used in history. The course offers one-on-one support and training in the skills required to complete a team-based final project. The final project will be hybrid between a research paper and also an exhibit (e.g., film, website, media, art installation). Students will present their work at the center's third annual undergraduate research conference (Spring 2025). Select students can apply to continue on as QAC summer apprentices and Baker Collabria Fellows in Data Analysis, and as CSGS NEH-funded summer history research fellows and as History thesis researchers.

HIST279 The Making of Modern Japan

This class spans the course of modern Japanese history from the dawn of the Tokugawa Shogunate in 1600 to Japan's current struggles with economic recession and declining birth rate. Throughout the course, we will delve into topics such as politics, religion, war, economics, media, and the daily lives of the Japanese people to shed light on how Japan has adapted to the onslaught of new domestic and global challenges that have occurred over the past four centuries. By the end of this course, you will have a firm grasp on topics such as the complex nature of Bushido, the first "miraculous" industrialization of a non-european nation, the rise of Japanese imperialism, the postwar path to pacifism, and Japan's global position as a leader in technology, tourism, public transportation, and soft power. No former knowledge of Japan or Asia is required for this course. All lectures, weekly readings, and books included on the list for the comparative book review will be in English. All readings will be provided save for the books for the comparative book review.

HIST280 The Industrial Revolution in Global Context: Economic History Since 1800

With the development of mechanized industry in the late 18th century, a productivity revolution was unleashed that would soon spread from Britain to continental Europe, North America, and Japan. By the early 21st century, three successive industrial revolutions had profoundly transformed these societies as well as the rapidly developing economies of East and South Asia. This course analyzes the historical forces driving this process. It begins by studying the transformation of Europe's overwhelmingly rural and agricultural economy into a predominantly urban and industrial one, looking closely at entrepreneurs, technology, and changing trading patterns during various phases of this process. The focus will be on Britain, Germany, the United States, and Japan, considering not only industrial development but also its broader implications, including colonial empire, great power rivalry, protectionism, economic depressions, and warfare, to highlight the complex relationship between economic and political power. The course will also analyze how industrial capitalism survived the disasters of the 20th century to drive a process of regional and global economic integration in the late 20th century. It will conclude by considering the opportunities and challenges posed to the mature industrial economies by the newly emerging industrial powers China and India.

HIST281 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)
This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

HIST282 Histories of Ukraine
Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses a specific territory, it has also been a space where multiple communities--Ukrainians, Russians, Jews, and Poles--have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

HIST283 The History of Emotions & Religion: Feeling One's Way to the Past
When examining the lives of communities, societies, and religions, scholars tend to focus on ideas and practices such as "justice" and "salvation" or fair elections and religious discipline. But what about emotions? For reasons we will examine, Western scholars -- and, thus, students -- have often overlooked the centrality of emotions in the social interactions of and between various cultures. This seminar will consider various historical (and a few contemporary) references to emotion in written texts. It will take into account the variability of the language about emotions (indeed, does the category of "emotion" even translate into all languages?). Emotions examined in American, European, South Asian, and Middle Eastern contexts include those that might be translated into current American English as fear, love, awe, submission, dispassion, pride, and loyalty. Each will be considered in their historical context with reference to the contemporary terms used and their linguistic register. Papers will involve the use of historical dictionaries and encyclopedias in order to understand period uses of terms we might now described as "emotive." Seminar members will visit with Wesleyan's Rare Books staff in preparation for a final project that will require use of the archives of either Wesleyan or the Middlesex Historical Society.

HIST284 Death and the Limits of Representation
The disciplines of history, philosophy, and literature all hinge on the issue of representation. The ability to communicate ideas, visions, or arguments all depend on the ability to represent these abstract notions in a concrete and recognizable form. In this course we will problematize the basis of all three disciplines by exploring Death as the limit of representation: as that which is ultimately unknowable (or knowable only second-hand) and thus beyond representation. Indeed, what is the concept of the "ghost" but an attempt to represent someone who is dead in the recognizable form of the body that once lived. Yet, the ghost appears and disappears, is not bound by the laws of time or space, and is largely present in its absence. By exploring texts by such authors as Plato, Shakespeare, Poe, Derrida, Levinas, Mbembe, and Hartman, and studying historical events such as the "black death," the Middle Passage, and the Shoah, we will attempt to understand the project of representation and its limits.

HIST285 Modern South Asia
This course examines the history of South Asia since the 1940s. Using a combination of memoir, history, and film, we examine the forces that have shaped South Asia (India, Pakistan, Bangladesh, Nepal, Bhutan, and Sri Lanka) in the twentieth and twenty-first centuries. We begin with the trauma of Partition in 1947 and then work backwards and forwards in time to explore key themes like religious nationalism, popular media, caste, language politics, war, separatism, policing, the logistics of democracy, and economic development.

HIST286 Photography and Law: Mugshots, Privacy and Publicity, Obscenity, Copyright, and Evidence
This seminar is designed as an introduction to the major developments in the legal history of photography in transatlantic (US-UK especially) society from the first law cases involving photography in 1840 through to contemporary legal debates about such topics as cameras in the courtroom, sexting, surveillance, photographing police, dash cam and body cam videos, admissibility of photographs as evidence, obscenity and moral boundaries of subject matter, and copyright. A range of secondary historical and theoretical writings will anchor the discussions, but the course will focus primarily on student analysis and interpretation of primary and archival sources (texts of legal cases, law reviews and dissertation, news articles, and documentary and video footage). Students will gain knowledge of how legal history has shaped the history of photography, and new perspectives on the historical origins of contemporary issues in photography and digital imaging. This course should be of interest especially to history majors and non-majors who are interested in law, photography, and culture and will also contribute to the "Visual and Material Studies" module in History.

HIST287 Science in Modernity and After: 20th-Century Science and Technology
The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

HIST289 God & Guns: The History of Faith and Firearms in America
This course examines the history of firearms and religion in the United States, ultimately seeking to understand the significance of gun culture within American Christianity and the powerful "God & Guns" story at the core of many Americans' identity. Beginning with an overview of colonial and revolutionary-era views of firearms and violence, the course examines the influence of slavery, gender, and the wars of the 20th century, paying special attention to the emergence of a masculine, warrior Jesus within evangelical and fundamentalist communities during the Cold War. Students will be challenged to consider the ways in which this story helps explain one facet of popular support for Donald Trump and to reflect on how firearms are central to the identity of many conservative American Christians.

HIST290 Environmental and Industrial History of the Long Island Sound
This course is a history of the Long Island Sound, the body of water which stretches from the East River in New York City to Block Island in Rhode Island and connects the eastern seaboard states of New York and Connecticut to the Atlantic Ocean. After a brief account of the sound's glacial history and riverine geography, we will focus on the environmental, social, and economic history of the region from the 18th to 21st centuries, with a focus on exploitation for textiles, metal production, fishing, and oystering. We will dedicate special attention to industrial pollution and federal, state, and local efforts to assess environmental impacts and restrict dumping in the sound. Field trips will include a visit to Manresa Island, the site of a coal-fired power plant (and later, oil), shuttered amid heavy flooding during Hurricane Sandy (2012). Topics discussed include the regulation and remediation of dumped sediment in Norwalk Harbor and Manresa Island containing heavy metals and coal ash.

HIST291 Gender and History: Global Feminist Theories and Narratives of the Past (FGSS Gateway)
What is a female husband? In the 1980s an increasing number of feminist scholars posed questions about the relationship between biological sex and gender roles. The African scholar Ifi Amadiume, who studied the history of female husbands in West Africa, asserted that such relationships between sex and gender needed to be studied in a global context. More than two decades after Amadiume's influential book "Male Daughters, Female Husbands: Gender and Sex in an African Society" (1987) was published, the scholarship on global gender and sexuality is vibrant and dynamic. These works have shown gender to be central to understanding society at different periods and geographical locations, but it is far from a universally understood category.

This seminar will introduce first- and second-year students to the history of gender, sex, labor, and feminist activism from a global and comparative perspective with readings from the history of Africa, the Americas, Asia, and Europe. We will also cover the development of influential theories in the field and how they apply to the writing of history. This course is especially appropriate for prospective history and feminist, gender and sexuality majors, though all students interested in using gender as category of historical analysis for their scholarly work in other fields are welcome.

HIST291Z Gender and History: Global Feminist Theories and Narratives of the Past
What is a female husband? In the 1980s an increasing number of feminist scholars posed questions about the relationship between biological sex and gender roles. Ifi Amadiume, who studied the history of female husbands in West Africa, asserted that such relationships between sex and gender needed to be studied in a global context. More than two decades after Amadiume's influential book Male Daughters, Female Husbands: Gender and Sex in an African Society (1987) was published, the scholarship on global gender and sexuality is vibrant and dynamic. These works have shown gender to be central to understanding society at different periods and geographical locations, but it is far from a universally understood category. This seminar will introduce students to the history of gender, sex, and the body from a global and comparative perspective with readings from the history of Africa, the Americas, Asia, and Europe. We will also cover the development of influential theories in the field and how they apply to the writing of history. For the first three weeks of the summer session we will focus on 1) Producing a Gendered Discipline 2) Feminist Theories and Sexualities and 3) Gender in the Archive. In the final week, students will produce a final research paper relating to one of four possible themes: International Feminisms, Women's Rights, Queering Histories, or Gender and Labor. Our readings for the

week will guide an in-depth discussion of each topic. The course is especially appropriate for prospective history and feminist, gender and sexuality majors (this is a gateway course for FGSS), though all students interested in using gender as a category of historical analysis for their scholarly work in other fields are welcome.

HIST292 Remaking Empire: The Ottomans in an Age of Transformation (1622-1839)
This course examines the Ottoman Empire from the upheavals surrounding the regicide of Osman II in 1622 to the start of the Tanzimat reforms of 1839. Traditionally labeled a period of decline, these two centuries now appear as an era of profound transformation. We will explore shifting patterns of political authority, the rise of provincial households, reconfigurations of military and fiscal institutions, and the dynamism of religious, intellectual, and urban life. The course also situates the empire within broader currents of early modern change, including global trade, diplomacy, and technological adaptation. Through analysis of primary sources and recent scholarship, students will analyze how the Ottomans confronted crisis, negotiated reform, and reimagined imperial order, laying crucial foundations for the nineteenth-century restructuring that foregrounds the modern Middle East. No prior knowledge of Ottoman history is required.

HIST293 Advanced Research in Digital History
The digital age has changed everything and nothing about the practice of historical research. After being equipped with core concepts, terminology, and practices of historical research, students will engage and explore various applications: across moth-eaten archives, curated library collections, optical scans, and digital-born objects. We will then immediately apply this work to collectively setting up an archival relational database through the digital tool Nodegoat. Students will finish the semester by curating their own historical archive and codifying it as a relational database. Depending on the specific project and student abilities, students will also connect this work to utilizing and/or learning skills in translation, GIS, database creation, database management, and digital visualization. Successful students will be connected to the Travelers' Lab international network: an opportunity to connect, receive feedback from, and collaborate with professors at higher education institutions in the United States and around the world. Depending on the year students may also be offered conference presentation and publication opportunities.

HIST293Z The U.S. Civil War, 1861--1865
This course surveys United States history from the early national period to the Gilded Age and the Progressive Era at the end of the 19th century. Central themes to be addressed will include the struggle over the meanings of democracy and constitutionalism, the transformations resulting from industrialization, as well as continental expansion and expropriation of Indigenous lands. We will also examine the series of reform crusades dedicated to religion, abolition and the changing roles of women. Particular attention will be paid to the formation and consolidation of the United States as both a nation state and as an emergent global imperial power.

HIST295 Trouble in Mind: The History of Psychiatry in the United States
This is a class in the history of psychiatry (and to a lesser degree, the disciplines that comprise clinical psychology). Many of us experience disturbances of mood, thought, and behavior over the course of our lives. When we do, we sometimes seek help from those with training in medicine or psychology. This has not always been the case, however. The question we explore in this seminar is how this came to be. In so doing, we will consider how theories seeking to explain the mind and therapies seeking to treat its invisible wounds have evolved over the past two-plus centuries, and how that evolution has shaped and been shaped by the shifting ways we see, hear, imagine, react to, and -- ultimately -- attempt to relieve mental anguish.

HIST296 Colonial Latin America
This course studies the history of Latin America and the Caribbean from pre-conquest times to the emergence of independence movements in the early 19th century. Lectures will explore the key environmental, cultural, economic, political, and religious transformations that shaped colonial societies throughout the region. Beginning with the formation of indigenous and Iberian polities before 1492, we will consider how early modern colonial governance functioned and evolved throughout the period of Spanish and Portuguese rule in the Americas. Through an array of primary and secondary sources we will reconstruct the lived experiences of a diversity of actors across the colonial world. We will pay particular attention to the methods and approaches that scholars have used to understand the history of the region.

HIST297 Environmental Art: Research through Art/Art through Research
How can communities understand the conditions wrought by fossil fuel infrastructure and anthropogenic climate change? How should they confront environmental crisis and imagine ecological futures? What can we know about our environment, and what eludes us? Co-taught with visiting artist-composer Ari Benjamin Meyers, this class is a practical experiment in "Research through Art," and "Art through Research" (Dombois, 2009) focusing on the site of coal and oil-fired power plant shuttered amid heavy flooding during Hurricane Sandy. The landscapes of Manresa Island (South Norwalk, CT) include an abandoned

turbine hall, a birch forest on a coal ash dump, and an array of wetland and coastal habitats. Participants will use practice-based research methods to develop works of art engaging with the site in its past, present, and future conditions. The course models artistic research methods with reference to a specific site and set of environmental conditions, bringing together students from arts/performance, sciences, humanities, and social sciences to produce site-specific works in a coastal ecosystem transformed by fossil fuel infrastructure.

At the heart of this course is a concern with what it means to be uncertain. The sciences provide tools to address problems of uncertainty. Practices of research, within and beyond the sciences, gather varied approaches to not knowing. Artists employ methods drawn from multiple academic disciplines (ethnography, sociology, history, the sciences), media (technoscience, video, audio, installation, multimedia), and sites of research (archive, laboratory, biome, habitat). While artists may engage many of the same practices as academic researchers, their works break the analytic frame. Art may be prescriptive or descriptive, didactic or agnostic, pointed or indeterminate; it may delight, frustrate, provoke, agitate, or inspire. Art may be curious or inquire; it may also make space for the experience of uncertainty. How does uncertainty make us feel? How should we respond?

Students across disciplines -- performance, visual arts, music, ecology, biology, geochemistry, history, religion, sociology, psychology, anthropology, economics, government, etc. -- are encouraged to submit a statement of interest for permission of instructor (POI). The purpose of the POI is to secure a collaborative balance of students across disciplines, toward the production of environmental art that engages a broad public.

This course will require 4-6 scheduled site visits to Manresa Island in South Norwalk, CT, requiring students to leave campus by 12 p.m. Friday and return by 5 p.m. Transportation will be provided.

HIST299 Mapping The Borderlands: The U.S./Mexico Border and Digital Storytelling
The U.S./Mexico border is not only a geographical boundary, but a complex mapping project, where governments and corporations project their visions of the landscape into policies and boundaries, only to run afoul of people, terrain, and climate. Therefore, this course will serve two interrelated functions: 1) to explore borderlands as a concept and spatial relations, particularly at the U.S./Mexico border 2) to use digital tools to tell spatial stories about the border. While the current location of the border is often naturalized as an ahistorical and timeless dividing line between the United States and Mexico, this course acquaints students with a long historical approach and competing perspectives on issues arising from the presence of the U.S./Mexico border/lands. Using monographs, first-hand accounts, film, and music, we will trace the recent history, politics, and culture of the borderlands, exploring topics like racialization, immigration, gender, place-making, and cultural exchange. At the same time, we will examine and apply digital methods that complement our understanding of the U.S./Mexico border.

HIST301 The Spanish Civil War, 1936--1939
The Spanish Civil War erupted during a decade in Europe marked by ideological tensions, economic and social crises, the weakness of democracies contrasted to the dynamism of dictatorial regimes, and an international climate that culminated in the outbreak of World War II. The ideological character of the civil war in Spain, which appeared to pit left vs. right, or democracy vs. fascism, or nation and religious faith vs. communism and revolution, captured the imagination of Europeans and spurred their involvement in the war. All of Europe's dangers seemed to have exploded in Spain, whatever the specifically Spanish factors that unleashed and defined the struggle. This seminar will examine the events in Spain and Europe's response to them through contemporary writings, such as journalistic and participants' accounts, diplomatic documents, memoirs, films, biographies, and general and specific studies from the 1930s to the present.

HIST302 Reproductive Politics and the Family in Africa
This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal and sexual health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, childhood health, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced health policy and political ideologies which, in turn, changed conceptions of motherhood, fatherhood, and the family.

HIST303 Policing and Power
This course examines the history of American policing by considering the contexts and conflicts that birthed and shaped the modern carceral state, focused primarily on the late nineteenth century to the 1980s. Moving through five modules, it considers the origins of policing and imprisonment in Europe and the United States, policing as social control or social order, the role of police in constructing the state, policing in a transnational context, and the modern era of mass incarceration. These modules ask what police power is, what histories have shaped the limits or excesses of that power, and how law enforcement shaped American society, culture, and politics.

HIST304 Middle East Intellectuals and Modernity
How have Middle Eastern intellectuals conceived and discussed modernity? We will use this question to analyze the variety in the history of thought in Middle Eastern societies in the 19th and early 20th centuries. Modernization, formation of the modern state and issues of nationalism, imperialism and colonialism, main intellectual questions of the time, will form the framework as we analyze their political, social, and cultural impact on the production of knowledge in the Ottoman and post-Ottoman lands. As such it is NOT a history of the Middle East but rather a history of mentalities, organized around four thematic/chronological modules (Reform, Modern State and Constitutionalism/ Panislamism, Nationalisms and Colonialisms) each representing a set of concepts, ideas, and movements as well as facts and problems, all of which will be compared to the larger world of modern state formation both in thought and practice. The principal aim is to familiarize students with the processes of modernization in the making of the modern Middle East.

HIST305 Coexistence and Violence in Europe: Jews, Muslims, Roma and their Neighbors
From the end of the 18th to the beginning of the 21st century, the territories of Central and Eastern Europe were transformed from imperial borderlands with religiously and ethnically diverse populations into homogenous nation-states. This course will examine the processes that remade these borderlands, along with the changing relations between the various ethnic and religious communities that dwelled within them. Students will consider examples of both peaceful coexistence and violent conflict among these populations, as well as the impact of the modern state, its institutions, and ideologies such as nationalism, liberalism, socialism, and fascism on these regions. Throughout the course, students will consider especially the history of Jewish, Muslim, and Romani minorities in light of major themes.

HIST306 We Were Eight Years in Power: Reconstruction and the Politics of Black Inequality
We Were Eight Years in Power examines the crucible of American democracy by looking at the struggle of African American rights following the Civil War. Debates in the period on the rights of African Americans continue to structure American ideas of race and citizenship to the present day. The foundations of American racial animus and systemic racism date to Reconstruction. We will explore both the periods of Reconstruction (1863-1877) and Redemption (1877-1910), its dark successor that saw the establishment of Jim Crow. We will discuss readings on the promise of interracial rule, Reconstruction in the north, the violent overthrow of racial equality, and the establishment of the color line in American law.

HIST307 The Economy of Nature and Nations
On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek oikos, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the oikos over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

HIST308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America
This course examines the history of American evangelicalism and fundamentalism, beginning with a brief overview of Protestantism in the colonial and revolutionary eras. Then, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and subcultures (such as Christian music). The course concludes by investigating the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped fundamentalism and evangelicalism, and reflect on how these movements' views of American history contribute to their own sense of identity and purpose.

HIST309 The Idea of Nature: Theory and Practice
What is nature, that our minds are so full of it? Aristotle, the first naturalist in European intellectual history, called it an inner principle of change, and wove his observations of the natural world into the fabric of his philosophy; Darwin

inherited a millennia-old tradition of thinking about change in nature and produced the theory of evolution we live with today. This seminar charts the long history of the idea of nature in European thought, moving between the histories of philosophy and what was once called "natural philosophy" and is now called "science." Along the way, we will meet the constituent parts of living "nature": animals (what are they, anyway? And are we them?), plants, and then, with the advent of microscopy, the cell itself. This course also explores the cultural life of the idea of nature, by devoting substantial time to a specific case study: the natural history museum, a creation of the Victorian period that has, for more than a hundred years, offered many people their first glimpse of the idea that nature is the kind of thing that has a meaningful past, and possibly a future as well. How did natural history museums explore evolutionary theory for the general public? How did they expand people's sense of time, and of the variety of species in nature? How did they court, and deal with, political and religious controversy? And how were they sometimes the beneficiaries of, and complicit in, the political and intellectual project of colonialism? We explore all these questions. Readings include Aristotle, Hans Blumenberg, Georges Canguilhem, Charles Darwin, Sigmund Freud, Pierre Hadot, Donna Haraway, Ursula LeGuin, Harriet Ritvo, Sophia Roosth, and Steven Shapin.

HIST310 Treaty People: Indigenous Diplomacy and Settler Duplicity, 1600-1921
Indigenous nations have engaged in diplomatic relationships with settler states from the time of contact. Many of the earliest treaties retain cultural and legal force today. The Two Row Wampum in the 17th century, the Peace and Friendship Treaties (1726-1779), and the Canadian Numbered Treaties (1871-1921) are only a few examples of the hundreds of nation-to-nation agreements that defined and still define Indigenous and settler relations in the places we now call the United States and Canada. In this class students will read treaty texts and the diplomatic negotiations that led to the agreements to understand how treaties led to colonial oppression rather than peaceful co-existence. A deep reading of the most recent scholarship on Indigenous treaty making will then illuminate the contemporary relevance of historical treaties as tools of Indigenous resurgence as the foundation for legal claims to sovereignty and LandBack.

HIST311 The History of the Samurai
This course examines the history of Japanese warriors, known among other things as samurai and bushi, from their origins in ancient Japan to the dismantling of the samurai class after the Meiji Restoration in 1868. Through a combination of primary and secondary sources, we will trace the development of warrior power and identity, the rise of warrior power in medieval Japan, the domestication and bureaucratization of warriors during the Edo Period (1600--1868), and warrior discontent with socioeconomic change as one of the driving forces behind the Meiji Restoration. Other themes include the relationship between warrior government and adjudication, the use of Buddhism for legitimation, and male-male intimacy and sexual relations.

HIST312 Diggers and Discontents: Doing History from Below
History looks different when told from the perspective of those without power. This course will introduce students to the practice of "doing history from below," which includes finding the voices of the marginalized and illuminating the actions of those who fought against established power structures. Each week, we'll read about the discontented from the 17th to 19th centuries, including the poor, criminals, women, the enslaved, pirates, Indigenous nations, and workers. We will discuss how the very institutions of historical practice reify the status quo and elide the experiences of those who fought for alternate (and better) futures.

HIST313 Schemers and Redeemers: Capitalism and Christianity in the Early Republic
This course examines the intersection of two of the most significant themes in U.S. history: Capitalism and Christianity. Beginning with the Early Republic (1790s) and continuing through the mid-19th century, this course asks students to explore how Americans used their religious identities to negotiate and shape market activity and institutions (and in turn, how the marketplace shaped their religion). Students will investigate the varied ways in which religious women and men resolved tensions between gender, class, slavery, moral dogma, and market imperatives. Finally, this course will require students to reflect on how the early 19th-century U.S. experience informs our understanding of the relationship between capitalism and Christianity in 21st-century America.

HIST314 The Political Ascetic
Ascetics have long played a decisive role in Indian politics. Gandhi is the best known exemplar of this fact. But the figure of the "political ascetic" long predates Gandhi. This seminar examines the philosophical, religious, and historical underpinnings of the political ascetic in the long sweep of Indian history, which thereby affords a revised understanding of the recent Indian past -- including agrarian (or kisan) asceticism, Gandhian post-modern asceticism, Ambedkar's Buddhist-dalit asceticism, and Savarkar's Hindu nationalist asceticism.

HIST315 Global Histories: Problems in Scale, Scope, Depth, and Time
How big is too big? How far back in time can historians go? How best to understand the relationship between science and history? What counts as evidence? What accounts for the rise (or return, some would argue) of macro-history? What does it portend for the future of microhistory? This advanced seminar will examine the history and historiographical implications of macro-historical frameworks, including comparative history, world history, global history, deep history, and big history.

HIST316 History of Science, Medicine, and Technology in the Islamicate World
A survey of major turning points, debates, and socio-political context of the history of science, medicine, and technology in the Islamicate World. The course will provide samples from the contributions of the Islamicate world to the following scientific fields: astronomy, mathematics, geography, cartography, medicine, optics, and mechanics. In addition, the course will probe into the relationship between scientific production and other fields of knowledge such as religion, occult sciences, art, and Sufism.

HIST317 The Great Game
The term "Great Game" was first popularized by Rudyard Kipling in his classic novel Kim (1901), where it referred to spycraft in the service of empire. The term gradually came to refer to the struggle for "mastery" of Asia during the 19th century, mainly between the British and Russian Empires. Nowhere were the effects of this imperial rivalry more pronounced than in what is now Afghanistan, Pakistan, Punjab, Kashmir, and Tibet. More recently the term (and the mental architecture and attitudes that have evolved to sustain it) has been applied to grand strategy, global geopolitics, and espionage more broadly, in scenarios as wide-ranging as Cold War "Containment" and the "War on Terror," as well as the more recent US "pivot to Asia," China's "Belt and Road Initiative," and "Global Biopolitics." This seminar will examine the history of the Great Game--as both spycraft and great power rivalry -- and its wider geopolitical reverberations. We will also examine an array of Great Game manifestations in popular culture. Readings will combine historical narrative and analysis with film and literature.

HIST318 The Politics of Death: The Living, the Dead, and the State
This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

HIST319 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933
Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

HIST320 Visions of World Order: From the French Revolution to the Present
This course offers a survey of how social scientists, philosophers and statesmen have understood and imagined global order from the late 18th century until the present. The course first examines interpretations of global order that emerged during the late 18th and 19th centuries: Cosmopolitanism (Immanuel Kant), Positivism (August Comte, Saint Simon), Nationalism, (Giuseppe Mazzini) and Marxism. The course then turns to the first half of the twentieth century by examining the international thought of W.E.B. Dubois, Marcus Garvey, Rosa Luxemburg and Gandhi, while also discussing fascist and liberal internationalist views of world order that emerged after World War I. The third part of the course discusses visions of Cold War order connected to American modernization theory (W.W. Rostow), neoliberalism (Friedrich Hayek), post-colonialism (Franz Fanon), Third Worldism, Neoconservatism (Jeane Kirkpatrick) and Systems Theory. The course concludes with the Post-Cold War period and how it has been imagined by such thinkers as Francis Fukuyama and Samuel Huntington along with a discussion of such topics as the global turn to nationalism, the Green New Deal and the "New Cold War with China."

HIST321 Media and Power in Latin America: From Quipus to Twitter
This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

HIST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present
Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike. This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in Tristes Tropiques (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film Fitzcarraldo (1982).

HIST323 No Day But Today: United States Queer History
Queer history, as a subfield, has flourished in the more than five decades since the Stonewall Riots. What began as an attempt by activists involved in the liberation era to reclaim the lost and erased historical memory for queer people has developed into a vibrant field of interdisciplinary scholarly interrogation. This seminar will introduce students to the historiographic contours of queer history and help them develop independent research projects. We will take advantage of the extensive queer periodicals collection assembled by Wesleyan University's Department of Special Collections and University Archives.

HIST324 Homelands: Indigenous Worlds in North America
This class will investigate the story of Indigenous peoples discovering Europeans. It is a difficult story to tell, because few Indigenous inhabitants left written records describing what it was like when ships arrived on the shores and the men and women disembarked, established settlements, and began the process of expanding across the continent. Some encounters were peaceful, while others were violent. Every encounter, however, can be understood by studying Indigenous societies and their worldviews. Far from static and unchanging groups, Indigenous nations were constantly adapting to their physical and spiritual world. This class will use primary and secondary sources to explore North America from the Indigenous perspective, including the rise and fall of great societies before the arrival of Europeans, strategies of contact and exchange after 1500, and the quest to maintain authority and independence during the 18th and 19th centuries.

HIST325 Fugitives and Freedman: The Politics of Slavery in the Civil War Era
The actions of fugitive slaves and newly-freed people turned the crisis of American union into a war for emancipation. Questions of slavery's expansion, permanence, and end dominated the political discourse of the United States from 1848 through 1877. This course will examine the ways in which political actors, especially African Americans, kept the twin issues of slavery and emancipation in the public sphere to restructure American society in the middle of the 19th century.

HIST326 Radical Mapping: History, Praxis, and Grounded Theory
From Indigenous trade routes in precolonial Louisiana to 21st-century digital commemorations of lynching sites, this advanced seminar will examine at the craft of mapping as a site of historiographical study and an opportunity to propose new ways of understanding time and space that center communities of color. We situate the rise of the professionalized fields of Western geography and cartography as a colonial practice, engage critical and resistant readings of historical maps, and convene in a collaborative studio model. Some questions we will explore include: What is a map, and what kind of power does the object and practice wield? How have communities of color been both enclosed and liberated by spatial arrangements of earth, sea, and sky? What would it mean, in the words of David Harvey, to develop a "People's Geography?" What interventions are cutting-edge scholars making, and what methods are they using to articulate original historical research?

HIST327 Gender and Sexuality in Japanese History Across the Premodern/ Modern Divide
This seminar explores both changes and continuities in Japanese conceptualizations of gender and sexuality between premodern and modern times. Structured around the notion that modernization produced a paradigmatic shift in Japanese life and thought, the course will examine gender and sexuality as both discourse and practice, considering how Japanese people described, experienced, and shaped gender roles and sexual life in their daily existences. We will investigate the dominant gender system and understandings of gender and sexuality operating in Japan before and during the Edo period (1600-1868), then consider the influence of Western views and concepts like the male/female and heterosexual/homosexual binaries on Japanese society and culture from the Meiji period (1868-1912) through postwar times. Other topics include gendered differences in education, gender performance in kabuki, female and male prostitution, the "gender crisis" of the Japanese modern girl, the salaryman and professional housewife archetypes, and postwar gay masculinities.

HIST328 The First Female Historian: The Crusade-Era Epic History of Anna Komnena
Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena -- a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire -- to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with The Alexiad through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

HIST330 Introduction to Public History: Working with Museums, Archives, and Historic Sites
This course will introduce students to the history, ideas, and best practices that shape the world of "public history." How do institutions like museums, archives, and historic sites balance the standards of formal academic scholarship with the demands of interpreting history for a larger public audience? What role do these cultural organizations play in the construction of larger historical narratives? What responsibilities do they have to their audience, stakeholders, and society? The course will turn on six key concepts that shape the world of public history: History and Memory, Inclusivity and Accessibility, Shared Authority/Inquiry, Agendas and Audiences, Legal and Ethical Frameworks, and Economics and Entrepreneurship. Through class readings, discussions, and field work, students will develop an understanding of not only the theories and ideas behind public history, but also the practical daily concerns public historians encounter on the ground. The course will help prepare students who are considering a career in museums, archives, historic sites, historic preservation, and the nonprofit sector. Students will also work with the Wesleyan University Special Collections staff to complete exhibits to be displayed in the Olin Library

HIST331 Pacific Ecologies
From the Whanganui River of the Whanganui Maori in Aotearoa (New Zealand) to Litekyan of the CHamoru people in Guåhan (Guam), Pacific Indigenous peoples' conception of the environment challenges the Western dichotomy that separates humans from nature. Grounded in islands and flowing with oceanic currents, this upper-level seminar will engage with Indigenous and migrant histories of what constitutes the "natural world," including attention to more-than-human relations. We will also examine the effects of militarism, imperialism, and climate change in shaping human-to-environment relations; and engage with how Pacific Indigenous peoples have led environmental movements rooted in Pacific genealogies, motivations, and worldviews. In doing so, we will examine how different perspectives of the environment and ecologies can influence notions of time and temporality in historical narration and writing.

HIST332 Race, Capital, and Sexual Consent
Race, Capital, and Sexual Consent will focus on the early 19th century through to the Progressive Era. It will explore racialized sexual markets, from what Black feminist historian Adrienne Davis has called "The Sexual Economy of American Slavery," to the Victorian-era marriage market, to continuing and emerging sex work and pleasure economies. This course will focus on areas of overlap, tension, and reinforcement within and between these racialized sexual markets. Fundamental to this class will be the question of if/how sexual consent is configured within these markets, and what this means in the broader evolution of American liberalism in the 19th- and early 20th-century U.S.

HIST334 Social History of Islam in Africa
The history of Islam in Africa spans 14 centuries, and Islam continues to play a central role in shaping contemporary African societies. In this course, we will examine the long social history of Islam on the continent. Islamic expression in Africa is diverse. We will explore the dynamic ways in which Islam has influenced local cultures and politics as well as the various ways in which individual Africans and African communities have made Islam their own. Topics of discussion include early trade and state formation; Islamic education, literacy, and conversion; the role of women in Muslim societies; Islamic cultural productions; Muslim responses to colonialism; and the contemporary development of political Islam. We will end the course by reflecting on the responses of Africans to contemporary changes in the wider Muslim world.

HIST335 Nature, Science, and Empire in Early Latin America
This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

HIST337 Missionary Mysteries: the Objects and Archives of Wesleyan's Missionary Past
This course examines the history of Wesleyan University's connections to missionary work in the nineteenth and early twentieth centuries, as seen through the university's archival and object collections. Students will spend the bulk of classroom time in hands-on learning as they engage with the archives of the Wesleyan Missionary Lyceum and cultural heritage collections obtained by missionaries and brought back to the University. Beginning with an overview of historical, archival, and museum methods, the course then will examine objects and written records from the Americas, West Africa, East Asia and the South Pacific. Students will be challenged to consider the ways in which Wesleyan has been engaged in colonialism, imperialism, and global evangelism. Topics of investigation will include: gender, linguistics, museum ethics and repatriation, the use of objects as educational tools.

HIST338 Constructing the Past: Theories of Historical Knowledge
This seminar will explore how we "make history" by exploring issues and debates in contemporary theory of history. Wesleyan is known as the epicenter for theory of history because of the academic journal "History and Theory," owned and edited by Wesleyan University faculty for the past 60 years. We will discuss such topics as the nature of historical truth; time and temporality; fiction and fact; history as a science with laws vs history as an art, with style; gender history; agency and causation; history of the emotions; of animals, and history's moral imperatives. We will give special attention to recent arguments about the theory of history, and how we construct the past. Key figures are likely to include Walter Benjamin, R. G. Collingwood, Michel Foucault, Hayden White, Frank Ankersmit, Nancy Partner, Joan Scott, and Reinhart Koselleck as well as publications by Wesleyan faculty past and present.

HIST339 Chronos Through the Ages: A History of Time and Temporality
Why do we start the new year in the dead of winter? Why is September the ninth month when its name means "seventh" in Latin? The same could be asked of October, November, and December. How can time zones be so variable, and why do we change the clocks by an hour twice a year? Contrary to our modern view of time as a scientific constant that runs the same everywhere in the world, the answers to these questions reveal that how we think about time has been socially constructed and contingent on historical circumstances. This course will introduce students to the history of time as it has been understood through human culture, from antiquity to the modern era, as well as critical engagements with how historians and anthropologists engage with time. We will analyze primary sources from different eras that all grappled with the concept of time, and learn about the history of clocks, calendars, and more. Students will come away with critical reflections on our modern assumptions about time.

HIST340 Policing and Power
This course examines the history of policing in the United States by considering the contexts and conflicts that birthed and shaped the modern carceral state, focused primarily on the late nineteenth century through the 1980s. Moving through five modules, it considers the origins of policing and imprisonment in Europe and the United States, policing as social control or social order, the role of police in constructing state power, policing in a transnational context, and the modern era of mass incarceration. These modules ask what police power is, what histories have shaped the limits or excesses of that power, and how law enforcement shaped American society, culture, and politics. We will pay considerable attention to how these histories can help us navigate contemporary debates around law enforcement and crime.

HIST341 Body Histories in Africa
African bodies have long generated intrigue and misunderstanding. Outside observers, such as missionaries, travelers, colonial administrators, and anthropologists, have documented practices such as scarification and spirit possession as they simultaneously rendered their African practitioners "other." All too often the body as an instrument for creative expression, ritual healing,

or social action was lost in translation. More recently Western feminists have focused their attentions on female circumcision. The persistence of circumcision (for both girls and boys) and other bodily practices speaks to their enduring social value and symbolic meaning. What can we learned from these and other body histories in Africa? In this course we will examine embodied rituals such as spirit possession, which marks the body as a site for human engagement with the supernatural. The widespread practice is also a gendered technique of healing documenting shifting understandings of health and illness. In addition, we will study the practice of "sitting on a man" by which women addressed the body politic through dance and collective nudity. The revealed body in motion shamed men into action and has been employed in the 21st century to shame oil companies for their greed and environmental destruction. In this and other examples, we will approach the body as an archive: it is an archive in motion and subject to social renewal. Our embodied evidence will allow us to explore shifting histories of religion, art, sexuality, the economy, and politics from the precolonial era to the contemporary moment. By taking the body as our lens we will also learn new ways to examine the African past through histories of aesthetics, value, labor, hierarchy, and knowledge production.

HIST342 The Rise of the Conservative Movement in the United States Since 1945
"So inevitable, yet so unexpected," Alexis de Tocqueville declared, referring to the French Revolution of 1789. The same is true of the conservative movement that developed in the United States during the second half of the 20th century. What is the nature of modern American conservatism? How and why did it emerge? What are its social bases? How has conservatism evolved in America since the 1930s? What sort of varieties and conflicts exist within the movement? How did mid- and late-20th-century American conservatives compare to earlier sorts of conservatism in America in the early Republic, the antebellum South, modern American liberalism, and political conservative parties in Europe and Britain? What is the historical significance of the movement?

HIST343 America's First Civil Rights Movement: Black Activism in the U.S. from the Founding to Reconstructio
Historians long described free African Americans in the early United States as occupying an "in-between" legal status, neither enslaved property nor entirely legal persons. This class would explore how free Black people rejected that status, seeking liberation, protection, and equality in the early United States. In so doing, they participated in, and meaningfully shaped, debates over the contours and privileges of American citizenship. Through this subject lens, students will be introduced to the methods of political, social, and legal history, and will have the chance to use contemporary social theories on activism, inclusion, and liberation as a critical lens.

HIST344 From World Economy to World Wars: The Age of Deglobalization, 1914-1945
Why was an unprecedented era of global trade, investment, and prosperity suddenly shattered by world war in 1914? And why did such catastrophic global conflicts break out twice in the twentieth century? This seminar analyzes the intersections of trade, investment, great power rivalry, and international security to assess the role that economic interdependence played in the heightened tensions foreshadowing the two most destructive conflicts in history. Looking closely at prewar global entanglements and inter-imperial rivalries, it will analyze why war broke out in 1914 and why it spread beyond Europe. It will consider the attempts at peacemaking in 1919 and how the failure to create a durable world economic order encouraged protectionism, protected imperial blocs, and aggression by Italy, Germany, and Japan in the 1930s. The course will discuss the Second World War as an outgrowth of the unresolved problems of the interwar period. We will study this war and its aftermath, as well as the more durable economic order created during the Cold War. The seminar concludes with student presentations on a topic of their choosing that will culminate in research papers submitted at the end of the semester.

HIST345 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s
This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

HIST346 Wesleyan and War: The University's Collections & Connections from the Seven Years' War to Vietnam
This course examines the theme of warfare in the context of Wesleyan University, as seen through the university's archival, rare book, and other collections. Students will spend the bulk of classroom time in discussion and hands-on learning examining the Library's rich collections beginning with the Seven Years' War (1750s), the American Revolution, Barbary Wars, and the War of 1812. As we move into the Civil War, students will also analyze the Wesleyan community's participation in the nation's wars, including the different responses of campus and alumni from World War I to World War II through the Vietnam War and its transformative impact on the University. Students will engage with Wesleyan's collections, developing intermediate and advanced research skills by considering the ways in which Wesleyan and its alumni have engaged with warfare, collecting, and American history. Topics of investigation will include:

espionage, naval warfare, Indigeneity, gender, slavery, education, technology, and tactics/strategy.

HIST348 Urban Histories of Latin America
Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the every-day experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

HIST349 Is History True?: The Genealogies and Genres of Facts
History, as both genre and discipline, has a complicated relationship with truth. As a genre, it is popularly understood to be factual -- a reflection of what really happened; as a discipline, it constructs the very reality that it claims to represent. History, in short, is based on the "facts" that it constitutes as real. This is not to say that our world is "post-truth" or unreal or that all "facts" are equally true. Rather, it is to suggest that to access historical reality we need to investigate the genealogies and genres of "facts," since facts (even "alternative facts") are the building blocks that make reality politically, socially, and culturally meaningful. So how does a "fact" become real? What genres of proof are used to constitute historical truth, and by whom? In this class, we will use historical approaches to understand how "facts" gain meaning and agency and analyze the (often porous) boundaries between history, memory, myth, rumor, and conspiracy. To do this, we will consider case studies -- political tropes like "Godless Communism" or "Judeo-Bolshevism"; legal categories such as "genocide" and "crimes against humanity"; and historical frameworks like "the Holocaust" and the "end of history" -- to consider how they structure our worldviews. The format of the course will combine discussion seminar with independent research projects.

HIST350 Black New Orleans
New Orleans is a location on a map, a collective memory, and a metaphor. But most of all, New Orleans is and has been a site of Black cultural production for centuries. While the name often conjures images of Mardi Gras beads and Bourbon Street revelers, this intermediate level seminar unpacks the complex histories of Black communities beyond stereotypes popularized by mass media and tourism marketing. We will discuss topics such as airboat tours, so-called post-Katrina "resilience," voodoo priestess Marie Laveau, and more. Drawing inspiration from historian Jessica Marie Johnson's statement that "Black New Orleans Is The Center of The World," we will come to understand the Crescent City as a crucible and incubator of Black culture. The materials used in this course are as multifaceted as the city itself and include scholarly texts, primary sources, fiction, spoken word, music, and documentary film.

HIST351 Beyond 1619: Enslavement in the United States, 1619-1860
The recent publication of the New York Times' "1619 Project" has refocused attention on the history and lasting effects of enslavement in the United States. Discussion of slavery as America's "original sin," however, oversimplifies the complex, multifaceted, and adaptable nature of enslavement in American history. This seminar will provide students with a grounding in the extensive literature of slavery in the United States from 1619 to the outbreak of the Civil War. We will examine slavery as an economic system of labor exploitation, a racialized hierarchy that legitimized white supremacy, and as a site of resistance and cultural formation. We will explore, additionally, the lives of enslaved individuals alongside our study of the institution of slavery.

HIST352 The Communist Experience in the Soviet Union (CLAC.50)
Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

HIST353 The Communist Experience in the 20th Century
Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

HIST353Z The Communist Experience in the Twentieth Century
More than thirty years have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the Communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union but also beyond it (in Eastern Europe and Asia). In the global conflict between Capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day's materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day's online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

HIST354 Slavery and the American Legal System
This class will uncover the deep, foundational relationships between American slavery and the nation's legal, constitutional, and judicial traditions. It will, in turn, consider the historical and structural tensions between democratic state-building and the social, economic, and security imperatives of a slave society. It will begin with a historical analysis of how, starting in the seventeenth-century British empire, slaveholder sought to shape the construction of what would become the foundations of American law. After considering the historical foundations of American slavery, the class will turn toward an examination of how slavery's legal foundations shaped American legal, constitutional, and jurisprudential practices after its abolition. Students will complete final projects that work to uncover the extent of slavery's continued presence in the precedents and traditions that shape the modern American judiciary.

HIST354Z Self and Text in Roman North Africa: Augustine's Confessions
The native North African Augustine of Hippo wrote the most influential autobiographical text in (so-called) Western literature. It remains the most brilliant text I have ever read: a mind-bendingly complex and yet fully coherent literary self. Let's read it together. Set between Carthage and Rome in 400, Augustine wrote just 10 years before the Eternal City would be sacked by the disaffected former legions of the empire (the Goths). Split between conqueror and conquered, civilization and apocalypse, Augustine wove humanity's existential and epistemological questions into a literary tapestry for the ages: Who am I? How do you speak? Who are you? How do I listen? Who are we? How do we know? At once memoir, critique of empire, philosophy, psychology, theology, personal history, criticism, and a letter, these Confessions require close, careful, focused, attentive readings from a diverse group of interpreters. Join our learning community and spend two snowbound weeks at Wesleyan with a book you will never forget.

HIST356 Between Worlds: Change and Continuity in Early Latin America
The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

HIST357 Regulators: The Administrative State in Modern America
How much arsenic is permissible in drinking water? Should financial firms be required to hold on to some of the risky securities they issue? Can a company sell a jar of peanut butter that contains only 90% peanuts? In the modern United States, the answers to these questions are determined by the administrative state - a collection of dozens of regulatory agencies, bureaus, and commissions comprising millions of officials and staff. Historians, political scientists, and other scholars have long recognized the administrative state as an important site of governance. But unlike Congress, the courts, or the Presidency, most of us have little idea about what exactly the administrative state does, much less how these regulatory bodies came to have so much power and responsibility. EPA G-Men banging down doors in Springfield might get a laugh on "The Simpsons," but why do EPA special agents carry guns?

This course approaches the making of the administrative state as a central component in the history of the modern United States. The seminar begins in the late 19th century, when elected officials created commissions of experts in an attempt to govern an increasingly complex economy, and continues through the 20th century, with its bursts of new state authorities and responsibilities, before concluding in the present, asking what a long history of the administrative state can teach us about contemporary policy. To understand the context in which the administrative state emerged and evolved, we cast a wide net. Among other subjects, students will consider popular movements for environmental protection and worker safety, intellectual transformations in understandings of risk and public welfare, political fights over the scale and scope of the government, and biographies of regulators and the powerful institutions that they make up. Readings include classic texts and new scholarship across different disciplines, alongside contemporary journalism and novel approaches like podcasts - returning throughout the semester to the question of how we can tell an engaging and vital history of the administrative state. Toward that end, students will also explore a variety of different primary source materials throughout the semester before embarking on their own original research projects.

HIST358 The "Self" in Self-Determination: Personhood & Peoplehood in Empire & Decolonization
This seminar course will explore the historical literature on self-determination and decolonization movements in the twentieth century across the globe. Combining the fields of US imperial history, international history, global indigenous studies, and diasporic studies, this course will delve deep into the historical development of right of self-determination within and outside of imperial regimes. It interrogates how peoples articulated their sense of "personhood" and "peoplehood" to claim political rights within the borders of nations and empires, as well as on the international stage. The course will also explore how decolonization as a concept transformed beyond the realm of law and personhood and encompassed culture, the environment, and lifeways.

HIST359 Reorienting East Asia: A Thematic Study of China, Japan, Korea, and Beyond
Although the concept of East Asia is firmly cemented in the western imagination, the reality behind the east Asian region -- if one was to call it that -- is far more complex. This course will explore topics in history, politics, religion, language, economics, and modern media as they relate to the three countries usually characterized as east Asia: China, Japan, and Korea. In so doing, you will learn about various connections that bind the countries together as well as the areas in which they do not connect. You will also learn about other players in the region who do not typically receive the attention they deserve, such as Mongolia, Tibet, India, the Ryukyu Islands, and Indochina. By the end of this course, you will be able to highlight unique aspects of each country and qualify the connections made between multiple cultures that have been neighbors for over a millennium.

HIST360 Evidence: A History
What counts as evidence and proof has changed and varied over time. This class will introduce students to the changing nature of evidence and proof in history, science, law, medicine, and news media. Topics include histories of trial by ordeal, trial by jury, photography, the footnote, fact checkers, expert testimony, the polygraph, statistics, DNA, and AI. Students will read amicus briefs, watch films, write papers, create evidence for mock trials, and study the rise and political effects of "alternate facts" discourse.We will also explore the ways that historical narratives, museums, and commemorations use evidence to tell stories through exhibits, monuments, plays, textbooks, and markers. The class will also discuss the history of landmark legal trials where new forms of evidence were central, and discuss the different ways that films handle evidence in genres such as true crime documentary. This is a discussion-based course that aligns with the Center for Humanities theme for Fall 2025: "Genres of Proof. Assignments include oral and written reports, a creative visual assignment, and a final research paper.

HIST361 Race and Immigration in U.S. History
This seminar asks us to consider how we might understand the histories of race and im/migration within the context of a settler colonial nation, beyond the mythology of a "nation of immigrants" at a time when immigrants, migrants, refugees, and non-citizens are under renewed attack in the United States.
An emphasis will be placed on interdisciplinary historical approaches to U.S. immigration, demonstrating its intersection and entanglement with U.S. imperialism, racial capitalism, transnational racial formations, and the carceral state and policing throughout U.S. history. Students will be exposed to the approaches of cultural, social, gender, political, labour, and legal historians who study these issues, alongside the work of various interdisciplinary scholars of race and im/migration. Though chronologically organized, each session will focus on a different set of peoples, migrations, and themes. Taken together, the course will provide for a strong foundation to understanding the entangled histories of race and im/migration in the United States.

HIST363 Histories of Mexican America
This course will explore and allow for discussion of key themes in Mexican American and Mexican immigrant history in the modern United States. The course will cover diverse geographies and time periods, from the northern borderlands of colonial New Spain to postwar California to contemporary New Haven and rural Vermont. Alongside ranging geographies and temporalities, the course will also pay specific attention to various communities who have historically -- whether proudly, ambiguously, or reluctantly -- been part of the peoples we now call Mexican Americans and Mexican immigrants. It will serve as a critical exploration of the intertwined histories of both Mexican American and Mexican immigrant communities in the United States -- of where, how, and why they have historically intersected, collaborated, and stood in solidarity with one another alongside when they have been at odds with each other throughout U.S. history. An emphasis will be placed on interdisciplinary historical approaches to Mexican American and Mexican migrant histories. Students will be exposed to the approaches of cultural, social, political, gender, oral, labour, and legal historians alongside various interdisciplinary Ethnic Studies scholars.

HIST365 North/South Borderlands of the United States
This advanced seminar on the U.S.-Mexico and U.S.-Canada borderlands situates our current moment's renewed anti-migrant and pro-border policing politics within a longer history of mobility, immigrant exclusion, labour exploitation, and border violence while disrupting common assumptions that place the northern and southern borders of the United States in binary opposition to one another. The course guides us in thinking expansively about what constitutes border violence and policing within differing racial and national contexts. We will engage with histories and historiographies from Canada, the United States, and Mexico, pulling together diverse countries that nonetheless share not only geographies but political visions of mobility and migrant life, whether dictated "from above" by state actors or "from below" by communities acting (at times) in solidarity with one another. The class traces border politics at hemispheric, national, and local levels along with immigrant, labour, and Indigenous politics from the nineteenth century to the present day. The course will help us make historical sense of renewed calls for immigration restriction alongside opposing calls for solidarity that are envisioned in the popular slogan "No One is Illegal on Stolen Land."

HIST367 Life of Modern Fact
Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

HIST368 Energy Legacies and Ecological Futures
Rooted in a history of energy production, this course explores the possible futures of aging fossil fuel infrastructure, a primary political, economic, and ecological crisis of the 21st century. Students will participate in the planning of a conference on the "Futures of Fossil Fuel Infrastructure" to be held at Manresa Island in South Norwalk, CT. Manresa, in the marine estuary of the Long Island Sound, is the site of a shuttered coal- and oil-fired power plant planned as a public park with the support of a philanthropic 501(c)3.

In this course, students will consider multiple prescriptions for remediation, public access, community, ecological restoration, landscape architecture, and adaptive re-use in historical perspective. Students will have the opportunity to formulate and exhibit their own visions informed by historical examples.

HIST371 Fascism
This seminar aims to identify varieties and components of fascist ideologies and to undertake comparative analysis of European fascist movements in the first half of the 20th century. The initial focus will be on the several ways fascism has been defined and understood, including examples of how the term has been utilized to characterize certain governments and personalities. Specific attention then will be devoted to Italy, Germany, Spain, and France, with emphasis on Mussolini and Hitler and their regimes. Additionally, apparent linkages of fascism to post-1945 politics, such as the National Front in France, will be explored. Other fascist movements may be chosen as the subject of a major research paper. Materials for the seminar will include documentary sources, films, interpretive studies, and biographies.

HIST372 Historical Narrative and the Graphic Novel
Historical narratives are all around us -- from the films and television we watch, to the murals and monuments we walk past on the street, to the underlying foundations of the jokes we tell or the phrases we say. Building from this assumption, that we are surrounded by historical narratives both explicitly and subliminally, this seminar will focus on the ways that graphic novels engage with historical storytelling and historical narratives. The course will focus on how graphic novelists tell history, with particular emphasis on modern U.S. history in a transnational framework. We will read across graphic novel genres, from historically-inspired mysteries to memoirs to young adult fiction set in the contemporary moment. Alongside these graphic novels, we will read the work of historians and interdisciplinary scholars who have written about the histories told in illustrated format. The course will therefore provide snapshots of transnational twentieth- and twenty-first-century U.S. histories, with each focusing on a different time period and community, while asking us to take seriously the question of how we tell history beyond the confines of academia.

HIST373 Language and Power in Latin America
What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From Indigenous polities, to the

imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region. The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of Indigenous peoples as social and political actors in contemporary Latin America.

HIST374 Food Security: History of an Idea
The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

HIST375 Unraveling Nature: Environmental Histories of Latin America
In the late eighteenth century, as almost three-hundred years of Spanish-rule in the Americas neared collapse, the Colombian scholar Francisco José de Caldas wrote that the key to understanding human variety lay in the different environments that human societies inhabited. For Caldas, nowhere was this more evident that in the Andes, where within close proximity a variety of temperature ranges and degrees of atmospheric pressure clearly influenced the character and customs of people. From the depths of the Amazon to the highest peaks of the Andes and the semi-arid lowlands of the Gran Chaco, the Latin American environment has continually inspired chroniclers, scientists, state-planners, and environmental activists, all seeking to unravel its workings in the service of their economic, political, social, and religious ideals. This class investigates the range of technologies and genres that scholars, administrators, local experts, and communities across Latin America have used to make the region's varied geographic spaces intelligible from the fifteenth century until the present day. It explores tensions between material and theoretical influences on the spatial imaginary and examines how environments were made and remade to serve imperial, colonial, national, and global projects. Important themes include Indigenous cosmologies and natural knowledge, the establishment of colonial extractive economies, the export-led growth of the nascent Latin American nations, the developmentalist projects of the late twentieth century, and recent efforts to contest the exploitation of nature by endowing natural bodies, like rivers and mountain ranges, with legal rights.

HIST376 Travel and Communication in Europe
This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

HIST378 LAND BACK! Indigenous Sovereignty Politics
This advanced research seminar will feature a look at the contemporary LAND BACK movement through current case studies with a focus on tracing the historical and legal genealogies of settler colonial land dispossession, indigenous land title, and self-governance issues bounded to territory (recognized and otherwise). We will examine different historical periods, moments, geographical sites, and case studies to explore the complexities of life for Indigenous peoples in the Pacific Islands and North America subject to the authority of the United States in relation to land as a central part of exercising sovereignty. In relation to these themes, the course will also examine: Indigenous peoples' varied political statuses in settler colonial context; self-determination; structures of domination and resistance; Indigenous agency; Native nationalism and decolonization. Readings will focus on the recognition and assertion of collective land rights, treaty rights, as well as land claims, land recovery, and land reclamation.

HIST379 The Fire Next Time: The Modern Black Freedom Struggle
The Fire Next Time explores the spectrum of African American politics in the mid-20th century United States. It will examine not only the nonviolent social movement against the Jim Crow South but will scrutinize expanding notions of black militancy against racial oppression in modern America. We will complete and discuss readings on the "short" and "long" civil rights movements; the position of women in movements for black equality; the leadership of Martin Luther King, Jr. and Malcolm X; the work of civil rights activists in the urban North; and the movement for Black Power. This course seeks to provide students with an understanding of the major themes and contexts of the most important social movement of the 20th-century United States.

HIST380 Transforming Bodies: Movement and Agency in West Africa
Dancers in West Africa embody human agency and transform historical worlds. As one elder farmer proclaimed: "Our ciwara have power[!]" Masked ciwara dancers on the Mande Pleateau call upon the collective labor of farmers to produce rural life, and more recently, have responded to transformations of the agricultural landscape. They emphasize the power of the human body over agricultural machines. Elsewhere in West Africa, the Atsiagbekor dance energized and celebrated Ewe male soldiers by acting out scenes from the battlefield. The dance movements were also secret codes used during battle to give instructions. How and when to fight, defend, or retreat depended on this embodied communication. The accompanying loud drum music served an added purpose of instilling fear in enemy ranks because it created the impression of a mighty army on the march. Still performed, the dance now symbolizes Ghanaian cultural heritage and helps to shape local historical memory.

In this course we will examine the body as an active agent in West African social and political life. We will study the historical and contemporary meanings of laboring bodies through dance and everyday movement, such as women's pounding of fufu or stirring of toh daily meals. We will also reflect on the ritual enactment of enslavement or colonial rule as a means to subvert old power structures. The body in these cases was a tool for resistance. We will also unpack multiple interpretations for specific women's embodied protests such as "sitting on a man." Collective body movement was powerful, but individual bodies might also enact healing or express religious devotion. Spirit possession, for example, marked the body as a site for human interaction with the supernatural. In this and other examples, the body is an archive in motion and subject to social renewal. By taking the body and movement as a lens, we will explore shifting histories of labor, performance, gender, politics, aesthetics, and religion from the pre-colonial era to the contemporary moment. We will also learn new ways to creatively move and narrate the African past and present.

HIST382 Anthropocene as Modern Grand Narrative
The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's systems, where the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism versus uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale--one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

HIST385 Science and the State
Over the past two centuries, states have been among the most prodigious producers and consumers of scientific information. Broad areas of scientific inquiry--such as demography, economics, geography, and ecology--substantially developed in response to the need of states to manage their populations, their economies, and their natural resources. State-directed scientific and technological innovation has also played a critical role in the pursuit of national security and infrastructural development, most notably through the development of nuclear weapons, missiles, and an array of military technologies. Finally, states have turned to scientific experts to enhance the credibility and legitimacy of policy decisions. This course introduces students to literature in the history of science that explores the connections between systems of knowledge and state power. Themes developed include the tensions between expertise and democracy, secrecy and scientific openness; the relationship between political culture and scientific and technological development; and the role of quantification, standardization, and classification in producing political order.

HIST386 China as Scientific Powerhouse
Science, technology, and medicine played an integral role in the China's transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad

philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on "its own terms" by understanding how the unique political and social challenges of modern China shaped Chinese science.

HIST389 Sachem School: Indigenous Lifeways and Settler Radicalism After 1600
In the 21st century, we face a series of interconnected reckonings: environmental collapse, economic disparity, racial inequality, and more. There were, and still are, alternative ways of organizing our economies, reframing our relationships with the land, and creating kinship networks that mitigate against inequality and enmity. This class will explore what settlers learned -- and refused to learn -- from the Indigenous societies they encountered after contact in northern North America. From Roger Williams's ideas of religious toleration in the 1640s to #landback today, settlers have at times demonstrated a willingness to learn from Indigenous lifeways and employ those lessons in ways deemed "radical" by Western standards. Understanding this history illuminates a path toward a future in which we continue learning from Indigenous nations and work to repair the damage settler societies have inflicted on each other and our world.

HIST390 The Redeemed Narrative: Microhistories in Early America
This course will guide students in thinking about American social history, the efforts by historians to recover the lived experiences of those who did not leave substantial archival documentation, through a close examination of examples of microhistory in early America. Microhistory, situated between the New Social History, influenced by the Annalistes and British Marxists, and the Cultural Turn, influenced by critical and linguistic theory, offers a unique opportunity to analyze the ways that early American historians creatively utilize evidence. We will pay particular attention to the ways that microhistory recovers histories of race and gender despite the paucity and problematic nature of archival sources. While students will receive a grounding in the theories of archival source interpretation, emphasis will be placed on the ways that historians have put those theories into practice. The course is designed to be an upper-level seminar, preparing students with the research tools to write their senior thesis or major capstone paper.

HIST391 The Treason of the Intellectuals: Power, Ethics, and Cultural Production
In his 1928 essay Julien Benda railed against the "treason" of the European intellectual establishment who abandoned disinterested intellectual activity in favor of political and nationalist engagement. In this course we will explore the relation of intellectuals to politics and the ethical ramifications thereof. Beginning with the Dreyfus Affair, the course will emphasize political involvement in France to focus on the vexed relationship between political action and intellectual production. We will examine figures such as Zola, Benda, Breton, Celine, Sartre, Camus, Beauvoir, Aron, Fanon, Foucault, Mbembe, Derrida, Kristeva, and Cixous.

HIST392 The Acceleration of Europe: Mobility and Communication, 1000---1700
This research course explores the thesis that during the Middle Ages, Europeans began to move faster, to move more often, and, by doing so, transformed the nature of social life, cultural life, and the character of selves and minds in the world. The course will explore the material aspects of this, such as the nature and development of roads and bridges, ships and canals, inns and hospitality that sustained and encouraged advancing travel. Thematic importance will be given to the place of horses and horseriding in these developments. The course is about the history of communication and the idea that a particular sort of traveler was created through later medieval travel and became the means of cultural and psychological acceleration. The social and cognitive networks established through travel, including the exchange of letters and messages, linked the local to the national. Merchants, pilgrims, soldiers, judges, students, preachers, and bureaucrats became the means of spreading news, changing views, and speeding up the world. This course will expose students to methods and skills in the digital humanities such as network analysis, geographic information systems, and database analysis.

HIST393 Materia Medica: Drugs and Medicines in America
This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the

development of an international drug trade, and the formation of national pharmaceutical markets in the Untied States in the 19th century. Participants will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

HIST395 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

HIST396 The U.S. South: A Global History
When people think of the U.S. South, they often think of a place that's isolated and insular--a region cut off from the rest of the United States and the wider world. Yet nothing could be further from the truth. Throughout its history, the South has been deeply entangled in the world and in the larger processes of globalization. Few regions of the United States have been more connected or more cosmopolitan. This seminar explores the global history of the U.S. South from the early 1800s to the present. By tracing the transnational movement of people, ideas, and commodities, it seeks to understand how the world has shaped the South, and also how the South has shaped the world.

HIST397 United States Overseas Empire
The United States is an empire: an empire that expands beyond the North American continent into many islands across the globe. From Puerto Rico and the U.S. Virgin Islands in the Atlantic to American Samoa and Guam in the Pacific, the US remains an imperial power with unincorporated island territories, a euphemism for replacing the anachronistic term "colonies." The residents of these territories have truncated political rights; they do not have voting representation in U.S. Congress, and they cannot vote in U.S. Presidential elections. Though U.S. territories are usually footnotes in the grand narrative of U.S. history, this course argues that they are integral to understanding the

United States as a whole. We will examine the history of how the U.S. acquired and governed the territories from the perspective of the islands themselves, emphasizing the local effects of U.S. colonial policies. We will analyze how U.S. foreign policy split indigenous peoples into separate political entities, how economic interests changed native political systems, how U.S. militarism affected the ecology of whole islands and the culture of territorial residents, and how public health policies racialized island peoples. We will also explore how self-determination and decolonization movements were stymied by the U.S. government, and how a whole host of other colonial policies and actions has affected and continues to affect the territories. The course will cover islands currently under U.S. control, including American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, the United States Virgin Islands, and Hawaii. It will also examine former territories, Trust Territories of the Pacific, and occupied islands including the Philippines, Cuba, Haiti, the Dominican Republic, among others. With the changing nature of U.S. imperialism, we will also consider the United States expansive military base presence throughout the globe. The history of these islands can tell us much about limits of U.S. citizenship, about the growth of U.S. commerce and militarism globally, about patterns of migration and immigration, and about the changing discourse of race and indigeneity.

HIST398 Visions of the Future: Capitalism and Colonialism in the World's Fairs
This course will explore the history of the world's fairs from the 1851 Great Exhibition in London to the 1939 New York World's Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world's fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

ITALIAN (ITAL)

ITAL101 Elementary Italian I
Italian 101 is the first half of a two-semester elementary sequence. Our emphasis is on the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will learn to talk about things in your own immediate environment, such as family, friends, daily routine, likes and dislikes, and you will learn how to handle basic social interactions such as meeting people, planning events, eating out, inquiring about other people's lives, and relating information in simple terms. We will explore roughly five units of the textbook; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

Students are strongly encouraged to enroll in the continuation of the Italian Elementary sequence in Spring (Italian 102): language learning is cumulative and requires time and consistent effort. Italian 101 and Italian 102, taken together, will provide a strong linguistic foundation--which is necessary to access Intermediate and Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

ITAL102 Elementary Italian II
This course is the second half of a two-semester elementary sequence. Our emphasis is on the continuing development and strengthening of oral and written competence, and reading and comprehension skills. Specifically, you will master the linguistic skills necessary to describe and narrate simple events in the past and in the future, make comparisons, express possibility, express your point of view, and agree and disagree with the opinions of others. You will also reach a better understanding of culture, society, and everyday life in Italy as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. By the end of this course, you can expect to be able to function quite ably and with assurance in day-to-day circumstances in Italian. We will explore roughly five units of the textbook; additionally, your linguistic and cultural experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance. Students are strongly encouraged to enroll in this course after taking Italian 101 to continue their Italian Elementary sequence: language learning is cumulative and requires time and consistent effort. Italian 101 and Italian 102, taken together, will provide a strong linguistic foundation--which is necessary to access Intermediate and Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.

Prereq: **ITAL101**

ITAL103 Intensive Italian
Intensive Italian is a course designed for highly motivated students who wish to learn the basics of Italian language in one semester. The course emphasizes the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. We will use the textbook both in class and at home; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

This course is particularly recommended for students with a background in other romance languages, such as Spanish, French, or Portuguese.

ITAL111 Intermediate Italian I
Italian 111 is the first half of a two-semester intermediate sequence. Authentic artifacts such as literary excerpts, films, newspaper articles, songs, and commercials constitute the starting points of this course. These include topics ranging from stereotypes and perceptions of Italy to significant moments in Italian history and politics, family and student life, employment, immigration/ emigration, organized crime, and environmental awareness, all of which shed light on the rich diversity and complexities within Italy and offer a variety of opportunities to improve and refine your ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will build on previously learned grammatical structures and acquire more complex ones that will allow you to improve your ability to relate information, narrate stories, make hypotheses, express your opinions, and debate the opinions of others, both in writing and in conversation. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance. Students are strongly encouraged to enroll in the continuation of the Intermediate Elementary sequence in Spring (Italian 112): language learning is cumulative and requires time and consistent effort. Italian 111 and Italian 112, taken together, will provide a strong linguistic and cultural foundation--which is necessary to access Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.

ITAL216 Words and Sex: Storytelling, Censorship, and Boccaccio's Decameron
We will explore literary genres and representations of sex and gender in Boccaccio's Decameron. Through close readings of selected tales and cultural analyses of their trans-historical and transnational reception, we take the Decameron's words as point of departure for the study of storytelling and the politics of readership. As modern readers of Boccaccio's renowned and classic Medieval collection of short tales, we investigate the text's notions of love, gender, and sexuality by comparing and contrasting the Decameron with various other texts across varying media, from the works of Petrarch and Chaucer to the modern readings of D. H. Lawrence and Pier Paolo Pasolini, and from visual arts to digital humanities. Students are invited to creatively engage with these and other texts of their choice (and with approval of the instructor) in order to produce, by the end of the course, either a) an analytic blog post that may be published on the H-Net of the Transnational Italian Studies working group; or b) an individual or collective project inspired by Boccaccio's Decameron.

ITAL217 Infernal Passions: Love, Sex, and Desire from Dante to Today
This course traces the explosive themes of love, sex, and desire in contemporary Italian cultural productions. At the heart of this exploration is Dante, whose Divine Comedy transformed personal passion into cosmic drama, making him a foundational voice in how desire, transgression, and redemption have been conceived and represented in Italian culture. His legacy serves as both a mirror and a provocation for today's artists, writers, and filmmakers. Each unit pairs Dante's verses with 20th- and 21st-century texts and cinematic works that engage in a dialogue about power, eroticism, and resistance -- exploring the tension between the sacred and the profane, the persistence of obsessive love, the commodification of sex, and the subversion of heteronormative desire. Tracing these echoes across time, we will uncover how Italian culture continuously redefines the politics of the body, gender, and sexuality.

ITAL220 Italian Gaming Lab: Using Tabletop Games for Language Learning (CLAC.50)
Italian Gaming Lab is designed as a game-based Italian language laboratory that will focus on why and how tabletop games can be effective tools for language learning; examples will include board games, card games, and tabletop role-playing games (TTRPGs), an increasingly popular type of game that is based on collaborative storytelling in which participants either impersonate one or more characters or create and organize entire worlds.

In this CLAC course, we will explore how a game-informed pedagogy can work in Italian language and culture classrooms and to highlight analog gaming approaches that have worked inside and outside the language classroom. We will discuss the basics of Game-Based Learning (GBL) applied to L2 acquisition, as well as play a series of games that can illustrate the gameful principles previously studies. Participants will discuss the application of gaming principles to L2 acquisition and create reports and playful presentations on their linguistic journey through play. The course offers students the opportunity to use language creatively and to develop critical knowledge within the rising and innovative field of Game-Based Learning and educational game design.

The course will be conducted in Italian, and games will be played in Italian. Both intermediate/advanced learners of Italian (second-year level or above) and native speakers are welcome. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

ITAL221 Culture, Society, and History in Italy
This course is designed for students who have completed at least two years of college-level Italian or who have achieved equivalent competency through study in Italy. Our primary objective is to enhance students' speaking abilities and Italian cultural literacy through exposure to a variety of Italian texts and contexts. The course will be organized both thematically and chronologically, taking into consideration a group of three themes that could change from one year to the next. Some groups or themes that might organize the course include the following groupings: l'amore, la morte, e l'altro; la città, la campagna, i sogni; il passato, il presente, e il futuro. We examine these themes in literary texts, paying attention to the different genres, and in opera and film. Students are expected to participate actively in this seminar setting. Class is conducted entirely in Italian.

ITAL222 Ruin and Redemption: Narrating Twentieth-Century Italy
When fugitive far-left terrorist Cesare Battisti was extradited to Italy in January 2019 to serve out a life sentence for crimes committed in the late 1970s, he provided fresh evidence for the way that 20th-century events still cast long shadows into contemporary Italy. The events, their narration and re-narration over time tell the story of unresolved conflicts and overturned verdicts in a context characterized by repression, revisionism, and rehabilitation. In this course we study three historical events of the past century that continue to haunt contemporary Italian society, culture, and politics: fascism; civil war and resistance; and the political violence of terrorism in the 1970s and 80s. We approach these events by examining the ever-changing narratives about them. For each narrative we focus on specific issues (e.g., for fascism: the rise of fascism, racism and anti-Semitism, colonialism, Mussolini's cult of personality, the exaltation of war, fascist intellectuals, the art of the regime, etc.), but we use these as an entry point to articulate contradictions and complexity. We explore these narratives through various media and forms of expression: from films to novels, from landmarks to newspaper articles, from poems to billboards. By exploring how the polarizations of these narratives flow into the 21st century, we unveil the fractures and conflicting agents at the core of contemporary Italy.

The course is conducted in Italian. Authors include: Gianni Amelio, Marco Bellocchio, Italo Calvino, Liliana Cavani, Umberto Eco, Beppe Fenoglio, Dario Fo, Natalia Ginzburg, Helena Janaczek, Primo Levi, Pier Paolo Pasolini, Luisa Passerini, Cesare Pavese, Rossana Rossanda, Roberto Rossellini.

ITAL223 Home Movies: Italian "Families" on Film
What is "the family" in an Italian social and cultural context? How has it changed over time? How has it responded to the transformations of Italian society since the time of the postwar economic miracle until today? Have its contours changed to adapt to new values? Has it fossilized existing values? Are families limited to flesh-and-blood kinship or are they constructed along lines of shared values and loyalty? This course seeks some answers to these questions through a sustained exploration of a variety of types of families as they are presented in Italian cinema from roughly 1950 until today. We will take stock of representations of the "traditional" family and the related social values, seeking to understand how Italian filmmakers, through their focus on the family, enter into the debate concerning tradition and change within Italian society, culture, and history. To that end, we will examine family dynamics along a broad spectrum of relative and intersecting aspects including affiliation, love, and rivalry; elective families (organized around crime syndicates, families constituted according to affinity); "failed" and "challenged" families and what that means; and examples of single-parent and same-sex families that seek to challenge conventional heteronormative paradigms. Along the way, we will recur to some critical readings (in sociology, history, and anthropology) that will help us frame our inquiry. This course is conducted in Italian. ITAL 223 is an appropriate course for anyone seeking an advanced class after ITAL112.

We will screen one primary film each week, which will anchor our discussions and serve as the basis for that week's activities. Students will also make 10-15 minute presentations on a secondary film that will serve as a "companion" to the primary text and will thicken our understanding of that week's themes.

ITAL224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance
In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolo Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

ITAL225 Italian/Middletown: Podcasting Middletown's Italian Treasures
This class uncovers Italian Treasures in Middletown, both on and off campus. An advanced course in Italian that is as suited for fifth-semester students as it is for those returning from Bologna or who have already taken a course in Italian, we will explore Italian podcasts and podcasting in Italian before turning our attention to podcast production of our own. Our course begins with audio explorations of podcasts in Italian, which will allow us to examine a variety of themes and subjects (e.g., true crime, sports, health, politics, among others), conducting contextualized grammar review as we go. Alongside study of both the medium of podcasting and examples of Italian podcasts, we will learn about the history of Middletown's Italian community and conduct a hunt for Italian treasures to explore and study. How does Middletown's Italian past link to its present? And to Wesleyan? Where can we find Italian "treasures" on campus and off? Throughout the semester, students will produce several short audio assignments, for which they will prepare (and submit) scripts. In service to all audio assignments, students will work on their pronunciation and diction with the Foreign Language Teaching Assistant from the University of Bologna. In addition to the brief audio assignments and scripts, major assignments include one 5-min podcast episode at midterm and one 7-min episode by the end of November. In the last week of class, students will collaborate on editing and producing a 55-min podcast that folds together all their individual chapters and includes music and linking narrative. This final podcast will be broadcast on Wesleyan's WESU.

ITAL226 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

ITAL227 Devotion and Deception: Erotic Discourse from Dante to Petrarca
In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarca. Through a close reading of such texts as Dante's Vita nova (ca. 1295), Giovanni Boccaccio's Decameron (ca. 1353), and Petrarca's Rerum vulgarium fragmenta (often referred to as the poetry book par excellence: il canzoniere, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate 'love stories' in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

ITAL228 Writing the Self
This course examines literary self-writing as a practice through which identity is questioned, shaped, and reimagined, with particular attention to writing across languages and cultural contexts. Through readings by Italian and transnational authors (including Alba de Cespedes, Anna Banti, Italo Svevo, Jhumpa Lahiri, Espérance Hakuzwimana) the course explores how narratives of the self engage with issues of gender, class, race, memory, and social belonging. Students will analyze a range of autobiographical and autofictional forms while developing their own sustained work of self-writing in Italian, shaped through ongoing revision and discussion. The course is thought in Italian.

ITAL229 Roads to Rome: Italian Cinema from Neorealism to Today
Do all roads lead to Rome? In ancient times, people across the Mediterranean referred to Rome as Caput Mundi, "the capital of the [Western] world." In 1906, while living there, James Joyce wrote to his brother Stanislaus: "Rome reminds me of a man who lives by exhibiting to travellers his grandmother's corpse." Four

decades later, in 1948, film critic Jean-Georges Auriol remarked: "At present, there is no doubt that Rome is the capital of cinema in Europe, if not the world."

This course offers a virtual journey to the Eternal City by means of a critical survey of Italian cinema from neorealism to the present. By analyzing fundamental films that take Rome as their setting and subject, we will discuss major trends in postwar Italian cinema as we explore the history of Italy from fascism to today. Through the works of Federico Fellini, Cecilia Mangini, Pier Paolo Pasolini, Paolo Sorrentino, Lina Wertmüller, and others, including several Academy Awards winners and nominees, we will address topics such as the legacy of World War II and the transition to democracy, traditional and queer notions of love, the relationship between Italy and the United States, Catholic religion and the Vatican, politics and organized crime, and the transnational representation and aestheticization of Italy.

This course is conducted in Italian.

ITAL230 The Sick Body: Illness, Medicine, and Mourning in Italian Culture
This course approaches Italian literature and film through the lens of the medical humanities, examining how illness and mourning are narrated across time. From plague narratives and early medical thought to modern psychiatry, institutional care, and the AIDS crisis, the course explores how bodily vulnerability is shaped by cultural beliefs, social norms, and medical practices. Literary texts and visual materials -- including anatomical studies and film -- invite students to consider illness not only as a biological condition but as a lived experience structured by gender, sexuality, class, religion, and power.

ITAL231 Italian Colonialism and Its Legacies
This course is an introduction to the history and consequences of Italian colonialism. We will study literary and historical texts describing the social and political forces that led to colonization as well as writings by colonized people and their descendants in order to gain a balanced, comprehensive understanding of this often-overlooked moment in Italian history. Students will read futurist, fascist and postcolonial theoretical work and will examine Italian, African and Albanian cultural artifacts representative of the colonial experience. We will also discuss current debates about immigration in Italy and their relationship to this colonial history. Literary texts will include: Dell'Oro's L'abbandono; Cialente's Cortile a Cleopatra; Ali Farah's Madre piccola; Marinetti's Mafarka futurista; and work by prominent Italian scholars of colonialism such as Del Boca and Isnenghi. This course is conducted in Italian.

ITAL232 Italy at School: Biography of a Nation
Soon after the unification of Italy (1861), the Coppino Law extended primary school to five years, making it free of charge and mandatory for its first three years (1877). Edmondo De Amicis would subsequently depict these reforms in his best-selling novel Cuore (1886), a text that introduced some enduring features of school narratives but also many stereotypes, thus attracting constant criticism and inspiring several parodies of its moralistic underpinnings. Ever since then school narratives have become a key component of Italian culture, creating a genre that has thrived especially in the last three decades, with a number of both fiction and nonfiction books published by teacher-writers who have reflected on their experience.

In this course we will study Italy from the perspective of these texts about school that often originated within school walls themselves. In so doing, we will reconstruct the history of a relatively young country, Italy, through the institution that, like no other, has been given the responsibility of "making Italians." At the same time we will question the image of Italian society that school narratives have, intentionally or not, contributed to portraying. In addition to reading Lucio Mastronardi's Il maestro di Vigevano (1962), we will focus on a wide range of materials, including novels, memoirs, poems, popular songs, films, and works of art that, even in the absence of a unanimously acclaimed "classic" of the genre, have shaped the Italian collective imaginary. Materials will be organized around five poles that have been quintessential to the debate on school in Italy across politics and culture: characters (teachers and students, obviously, but also colleagues, classmates, and families), labor and working conditions (including themes such as precarious work, class conflict, labor rights), gender and identity (questioning traditional gender roles and discussing integration of migrants at school), places and geographies (addressing topics from school design to teaching in prisons, as well as center-periphery integration and north-south divide), and actions (both those of teachers and of students, such as obtaining a certification vs. passing a test, disciplining students vs. questioning teachers' authority, resigning from job vs. cutting classes). The course will be conducted in Italian.

ITAL233 Modern Italy on the Silver Screen: 1960--2015
This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's La dolce vita, Pasolini's Mamma Roma, De Sica's Matrimonio all'italiana, Leone's Il buono, il brutto, il cattivo, Argento's Suspiria, Moretti's Caro diario, Ozpetek's Saturno contro, and Giordana's Quando sei nato non puoi più nasconderti. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

ITAL235 The Invention of Fiction: Giovanni Boccaccio's Decameron
In this course we read and discuss Giovanni Boccaccio's Decameron (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio inhabited. We examine the Decameron's tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

ITAL236 Inferno
In this course we read and discuss Dante's Inferno (ca. 1306-1309) and its afterlife. Inferno is the poetic description of Dante's (imagined or actual) journey through Hell. We study how its poetry and narrative embody the notions of love, sorrow, evil, guilt, redemption, and punishment. We examine the poem as both a product and an interpretation of the world it describes and of its radical otherness: its representation of the otherworld, its relationship with religion and faith, its fear of death, its obsession with the Devil. We inquire into Dante's inventiveness and poetic technique, reviewing his magisterial use of realistic and figurative language. We observe how Inferno casts its long shadow on modern culture: in the description of the horror of Nazi concentration camps (Primo Levi's memoir), or in the representation of the inauthentic life in consumerist society (Pier Paolo Pasolini's rewriting of Inferno in contemporary Italy). We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (or to Disney comics), continuously camouflaging and adapting to different media. And we critically reflect on how, after seven hundred years, Inferno has not finished saying what it has to say. The course is conducted in Italian.

ITAL238 What's in a Name? Autobiography and Autofiction in Modern Italian Culture
This course explores the relationship between a person's (or a character's) identity and their name, examining the crucial relevance of naming and renaming practices in shaping individual identities and collective narratives through a wide variety of Italian texts. In the first module, we read Holocaust memoirs and contemporary short fiction and we listen to podcasts and songs by Black and Jewish Italian authors to analyze the nuanced ways in which names shape racial identity, from the derogatory act of name-calling and the deprivation of personal names to the empowering act of reclaiming one's name and narrative. In the second part of the course, we consider coming out stories and gender transition accounts, including graphic novels and feature films, to reflect on the impact of putting into words one's gender identity and choosing new names in individual journeys of self-discovery and affirmation. In our last module, we focus on the last twenty years of Italian literature to study one of its dominant genres (that some Italian critics polemically named a "disease"): autofiction, a blend between autobiography and fiction. For the final essay or project, each student will choose a recently published novel to read, analyze, and adapt or (partially) translate. This course is conducted in Italian.

ITAL241 Antonioni and Cinema of the Environment
From its earliest days, the cinema has sought to capture the wonders of the world: exotic landscapes, industrial inventions, and human prowess in the face of nature. At the same time, many important filmmakers--and particularly those in the Italian tradition--have mined their medium's capacity to register and comment upon environmental change. Few directors traversed the upheavals of the 20th century quite like Michelangelo Antonioni. Beginning with his early documentaries, we'll explore cinema's relationship to both the natural world and the built environment across Antonioni's long career. From the foggy landscape of the Po valley to the urban centers of Milan, Rome, London, and Los Angeles, we will assess the images produced by location shooting and realist techniques, but also by formal abstraction and non-narrative time. What might Antonioni's inclination toward abstraction and detachment ("Antoniennui," in a memorable pun) tell us about the world? How should we square his stylistic tendencies with his camera's attention to an environment under pressure? What lessons does his cinema hold for the present?

We'll approach these questions using the core methods of the humanities: close reading, careful viewing, and critical analysis. Along the way, we'll sharpen our understanding of film scholarship, and explore how to make critical (and creative) arguments about cinema and the environment.

ITAL244 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

ITAL245 Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)
This 0.5-credit course is conducted in Italian and designed to supplement the English-language Italian cinema course "Not Just Neorealism: Italian

Cinema, its History, and Politics" (RL&L 245). The presentations that are part of the requirements for the parent course (RL&L 245) will serve as our basis in this discussion-based section: Students will be responsible for screening films in addition to those required for 245, for presenting them, and, during the discussion sections in Italian, responsible also for linking them to the course material. Further, students enrolled in the CLAC will also make mini-presentations to the broader body of the students enrolled in the parent course only, linking the extra screenings to those that are part of the course syllabus, and enriching the discourse and knowledge base.

Students are required to be simultaneously enrolled in the parent course in order to enroll in the CLAC section. For this reason, enrollment is granted on a POI basis.

Students must have advanced competency in Italian: completed ITAL 221 or a course with a higher number, spent a semester (or more) in Wesleyan's Program in Bologna, or be linguistically proficient. For any questions about linguistic preparation, please contact the instructor.

Please note that at present this section is not acceptable as one of the nine required courses for the ITST major.

ITAL246 Crises and Emergencies in Modern Italy
The COVID-19 pandemic revived a longstanding concern in Italian theory about the relationship between rule of law and state of exception. This course draws upon biopolitics and cultural studies to investigate the relevance and ramifications of the emergency management paradigm in modern Italy. It also provocatively questions an established trend in public discourse, namely the rhetoric of the crisis: "crisi di governo," "crisi di valori," but also "emergenza migratoria," "emergenza ambientale," and so on. Why is Italy constantly in crisis? By relying on various genres of literature and on a wide range of media including films, songs, and social media, we will analyze artistic representations of these crises and emergencies, as well as the state responses to them. The critical exploration of case studies from four interconnected thematic areas revolving around issues of public health, power, body, and space will often unveil diverging narratives, allowing for reflections on the tension between safety and freedom, vulnerability and resistance, individual and collective memory, and truth and fiction.

ITAL247 Coming Out/Coming of Age: Narratives of Becoming in Italian Culture
By examining narratives of "becoming" in Italian literary and screen texts, we will work to read against a dominant "master" narrative of Italian culture that is cis-male, patriarchal, and "white." The literary and screen texts we will explore in depth include some "classic" narratives of coming of age in the Italian cultural tradition which we will lay alongside Italian cultural "coming out" narratives, some "classic," others less so. What can we learn from such adjacencies? What does one "come out" of with regard to either strand of inquiry? Is adolescence a "closet" out of which one emerges with a sexual identity? Does one come of age as an artist or "come out" as a practitioner of a particular artistic genre (filmmaker, poet, novelist)? How do artistic choices of practice subtend and inform sexual identity? What gets left behind in this "progress" of "becoming"? These are some of the questions we will address in this course, conducted in Italian.

ITAL249 Italian Filmmaking by the Book: Adaptations, Texts, and Contexts
This course explores the adaptations and transformations of Italian literary texts into their cinematic and televisual counterparts. We will principally study Italian narratives from the 20th and 21st centuries and their screen adaptations as a way of uncovering the modes and means by which Italian screen culture borrows from literary antecedents. Is the relation between literary texts and their screen adaptations a love story or bad romance? Is it characterized by a "faithfulness" to the text or a "betrayal"? Throughout the semester, students will acquire an enriched understanding of the assorted texts and their contexts by studying varied genres (short fiction, novels, nonfiction, detective stories), a variety of themes (crimes both real and imagined, petty and powerful; historical revisionism; personal and political dilemmas), and diverse geographical settings focusing principally on Southern Italy (including cities and islands reaching from the Mediterranean to the Adriatic).

All students in the course will study a common core of five author/director pairs. The core consists of "Il Gattopardo" (di Lampedusa/Visconti); "Io non ho paura" (Ammaniti/Salvatores); "L'amica geniale" (Ferrante/Costanzo); "Gomorra" (Saviano/Garrone/Sollima); and "Novelle per un anno/Caos" (Pirandello/Taviani). Additionally, students will, in consultation with the instructor, choose a sixth pairing from the list of the following titles, which will serve as the basis of their end-semester presentation as well as an element of the oral final exam: "Il giorno della civetta" (Sciascia/Damiani); "Il contesto/Cadaveri eccellenti" (Sciascia/ Rosi); "I Malavoglia/La terra trema" (Verga/Visconti); "Padre Padrone" (Ledda/Taviani); "Quo vadis, baby?" (Verasani/Salvatores); "Acciaio" (Avallone/Mordini); "Il conformista" (Moravia/Bertolucci); "Todo modo" (Sciascia/Petri); "Minchia di re/Viola di mare" (Pilati/Maiorca); "Benzina" (Stancanelli/Stambrini); "Il padrino" (Puzo/Coppola); "La tregua" (Levi/Rosi); and "Le forme dell'acqua" (Camilleri/Sironi). Students may also care to consider literary texts from earlier historical periods: Basile's 16th-century "Il cunto de li cunti/Il racconto dei racconti" (Garrone) and Collodi's 19th-century "Pinnochio" (with adaptations by Disney, Benigni, and Garrone). This course will be conducted in Italian. This course is appropriate for all students who have completed ITAL 112 or whose placement exam indicated a course numbered ITAL 221 or higher.

Students are encouraged to put the lengthened winter break to good purpose. All students are expected to read the first book of Ferrante's Neapolitan quartet, "L'amica geniale," during the winter break. It is a long novel, but students will find that the Italian is not challenging. Any edition in Italian will be fine (e.g., electronic, print, used, etc.). Reading in advance of the semester will facilitate students' workload as well as keep Italian flowing during the lengthy pause. It is further greatly recommended that students read di Lampedusa's "Il Gattopardo"

in advance of the semester. If students have already taken an Italian course numbered 221 or higher, or have already studied in Italian, it is recommended that they read "Il Gattopardo" in Italian. Any edition will serve.

ITAL256 Medieval Gigs: Saints, Scholars, Sailors, Sinners
A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages. For those staying closer to home, like clerics and other literate "Italians," we review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

ITAL260 Castles of Cards: Italian Romance Epic Storytelling Lab
Celebrated authors of 20th-century Italian literature such as Italo Calvino and Gianni Celati have included in their works several features of Renaissance romance epic, from the importance of orality and the idea of sharing stories with a community of listeners to multi-threaded narratives and a playful attitude to the world of storytelling. The current popularity of fantasy literature and TV series puts us in an ideal position for the study of the chivalric romance and for an exploration of the continuities and the differences between past and present literary forms. In this course we focus on canonical and less canonical texts of the Italian Renaissance epic and their modern rewritings. After a multimedia investigation of Andrea da Barberino's "Guerrin Meschino," Luigi Pulci's "Morgante," Boiardo's "Inamoramento de Orlando," Ariosto's "Orlando Furioso," and Tasso's "Gerusalemme liberata" along with their rewritings by authors such as Bufalino, Nori, Celati, Calvino, and Giuliani, we will take inspiration from Calvino's "Il castello dei destini incrociati" to transform the classroom into a storytelling lab. The same deck of tarot cards that Calvino used for his book will help us to take part in a role-playing game and create a collaborative story that will gradually unfold throughout the semester. The class aims both at studying the Italian romance epic in order to reenact it creatively and also at using this collaborative rewriting as an interpretive tool to explore Renaissance literature from within.

ITAL263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance
What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's "Iliad" and Virgil's "Aeneid." This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

ITAL267 Female Dicks: Police, Detectives, and Private Investigators in Contemporary Italian Culture
Through the act of detection and "solution" of a crime, classic detective stories and police procedurals often serve as consoling narratives, knitting up the unraveled social fabric and seeing that justice will either be served or promised. In solving the crime, the detective--sometimes called a "dick" in the classic American hard-boiled detective literature--often restores order to social chaos. What changes when women--female dicks--conduct the investigation? Do women investigators, as agents of detection, uphold existing (patriarchal) power structures, dynamics, and epistemologies? Challenge them? Transform them? These are some of the themes we will contemplate as we study Italian "gialli" published since 1995.

We will concentrate on three different types of female dicks: la Deferente (the deferential), la Scomoda (the disquieting, uneasy), and la Vendicatrice (the vindicator). We will read novels in several different book series privileging Bologna as a location; further, we will also explore films and television series, trying to plumb the relationship of these Italian screen texts to the phenomenon of global and transnational noir.

This course is conducted through the medium of Italian and is suitable for anyone who has already taken a fifth-semester course (or one that is more advanced) on the Middletown campus or who has participated on the ECCO Program in Bologna. If you have questions about whether this is the course for you, please contact the instructor.

ITAL280 Journeys of the Mind and Body
From Dante's descent into the underworld to contemporary narratives of migration, journeys -- both real and imaginary -- have shaped Italian literature, art, and film production. This course explores how movement, whether physical, psychological, or symbolic, serves as a catalyst for transformation, self-discovery, and historical reckoning. We will examine visionary landscapes in Dante and Leopardi, shifting bodies in Tasso and Tondelli, evolving female identities from Veronica Franco to Elena Ferrante, and testimonies of displacement from Primo Levi to Igiaba Scego. How do literary and artistic journeys negotiate the tension between reality and imagination? In what ways does movement -- whether forced or voluntary -- reshape identity and power? How do historical and cultural contexts influence the meaning of travel?

ITAL289 The Mediterranean Archipelago: Literary and Cultural Representations
"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands -- both fictional and real -- as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevitc's statement that "the Mediterranean is not only geography," we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto's Island of Alcina to Goethe's Capri), narrative stratagem (from Homer's Phaeacia to Boccaccio's Rhodes), literary protagonist (from Deledda's Sardinia to Murgia's Sardinia), political concept (from Plato's Atlantis to Campanella's Taprobane), and existential condition (from Cervantes's Cyprus to Cavafy's Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands' inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

JAPANESE (JAPN)

JAPN103 Elementary Japanese I
This course is designed for those who have no previous experience studying Japanese. The objective of this course is for students to acquire communicative and functional skills in Japanese. You will learn the basics of speaking, listening, reading, writing, orthography, and sociolinguistics (when to say what and why) of modern Japanese. Textbook Genki Lesson 1 - Lesson 8 will be covered. Each of the 8 lessons covered in this course includes new vocabulary items and expression patterns related to topics such as time, shopping, daily activities, travel, family, and expressing opinion. In addition, students will learn to read and write 46 basic hiragana and katakana syllables and approximately 86 Kanji (Chinese characters). Class meets daily, five hours per week, and includes weekly TA sessions.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

JAPN104 Elementary Japanese II
This course is a continuation of JAPN103, and will approach elementary-level Japanese from two angles: form (grammar) and context (social usage). Students will continue to enhance their fundamental skills in Japanese, with a focus on describing thought and action, expressing intent, and developing intercultural and interpersonal communicative abilities (apologizing, giving/receiving advice, making requests, etc.). The course will continue to emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 9 - Lesson 16 will be covered and 123 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN103**

JAPN205 Intermediate Japanese I
This course will approach intermediate-level Japanese from two angles: form (grammar) and context (social usage). Students will learn complex expressions, such as communicating regret, respect (honorifics/humbling), passive experiences, and causative forms. The course will emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 17 - Lesson 23 will be covered and 107 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN104**

JAPN206 Intermediate Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including the geography, speech styles, technology, sports, and food of Japan. Students will also learn various strategies in conversation: asking questions, apologizing, asking for favors and expressing gratitude, asking for advice and getting information, and expressing one's thoughts. Lesson 1- Lesson 5 from the textbook Tobira will be covered and 176 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN205**

JAPN217 Third-Year Japanese I
The primary goal of this course is to enable students to acquire Japanese language proficiency through integrating four skills: speaking, listening, reading, and writing. Lesson 6 - Lesson 9 from the textbook Tobira cover different topics, including religion, pop culture, traditional performing arts, and education in Japan. The class meets three hours per week.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN206**

JAPN218 Third-Year Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including convenient things, history, traditional crafts, and nature of Japan. Students will also learn various strategies in conversation: conveying information, talking about past events, explaining how things are made, and extending one's dialogue. Lesson 10-Lesson 13 from the textbook "Tobira" will be covered and 141 additional kanji will be introduced.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN217**

JAPN219 Fourth-Year Japanese: Conceptualizations of Identity in Contemporary Japan
Enrolled students and faculty will determine the twice-weekly, 80-minute class meeting times together.

By placing Japan in a global context and exploring key social, cultural, and political themes through comparative analysis with other nations, this course fosters deep engagement with modern literary texts, current media reports, visual materials, and critical discussions conducted entirely in Japanese. Students will actively interpret complex materials while expanding their understanding of contemporary Japanese society.

Themes explored in the course include:

1) Issues related to the modern Japanese family, including the declining birthrate and aging population

2) Diversity and identity in Japan, addressing topics such as the concept of "Japanese-ness," the experiences of resident aliens and the naturalization process, biracial and bicultural individuals, indigenous groups such as the Ainu, and the experiences of Zainichi Koreans (resident Koreans in Japan) *Note: These themes are subject to change.

By the end of the semester, students will have developed the following competencies:

1) Enhanced reading comprehension of articles on various aspects of Japanese society, with improved speed and accuracy through the study of Kanji characters, grammar, and expressions

2) The ability to analyze and comprehend complex content more efficiently, using acquired linguistic skills to grasp key concepts

3) Proficiency in articulating, both orally and in writing, summaries of learned material in a clear, accessible manner, and expressing well-supported personal opinions

4) The ability to present and critically evaluate differing viewpoints, and engage in thoughtful discussions on various issues

5) A deeper understanding of global perspectives, fostering an appreciation for cultural differences and the importance of intercultural understanding
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN218**

JAPN220 Fourth-Year Japanese: Advanced Japanese through Contemporary Fiction, Essays, and News Reports
In this course, taught completely in Japanese, students will read original works of short fiction, essays in Japanese by well-known contemporary authors, and newspaper and magazine pieces. We will also include several movies and/or television dramas. We will explore various genres and popular themes in Japanese literature and consider style and voice. Through the works we look at, students will also be introduced to advanced Japanese grammar, expressions, patterns, kanji, and vocabulary.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **JAPN219**

JAPN228 Conversational Japanese Through Role Play
Using a situational approach, students will learn through spoken practice various Japanese expressions for functions such as requests, invitations, apologies, comfort, encouragement, offers, advice, permission, humility, and how to describe or explain situations, explain procedures, ask for corrections, make excuses, and share topics, etc., in different situations. Additionally, in these situations, students will practice switching smoothly to the most appropriate speech styles (casual/polite/honorific) based on the relationship or psychological distance between the speaker and the listener so that their Japanese sounds "natural" to people they are engaging with out in the "real world." Students will be given situations in class, and they will think of appropriate conversations for those situations, studying through role-playing. Students must adjust the level of politeness based on the given relationship. The role playing and discussions will also derive from students watching scenes from popular Japanese media (movies, drama, internet, etc.) and then talking about them.

JAPN229 Debating Japan and the World in Japanese
Tied to courses being offered in the CEAS, students in this course read related literature, scholarly articles and blogs, watch videos and films, and debate in Japanese about current events and issues surrounding Japan, Asia, and the world. Guest Japanese speakers may visit the class. Some possible themes are foodways, educational systems, Japanese relations with other Asian countries, identity and stereotypes, and cultural appropriation. However, an overarching focus will be on the history and current dynamics of Japanese-American relations. All materials, reading and writing assignments, and discussion will be in Japanese, with some comparative materials in English, and some translation by students into English. Native speakers of Japanese are strongly encouraged to participate.

JAPN230 Contemporary Japanese Politics in Japanese
This seminar is a discussion-based class designed for advanced language learners and native speakers of Japanese. We will discuss a wide range of contemporary topics in Japanese society and politics. All texts, discussions, and assignments will be in Japanese. Diverse texts will be used--for example, newspaper, magazine, and academic journal articles as well as video broadcasts and web resources.

JAPN231 Conversational Japanese Through Role Play II
This course is for students with basic grammatical and structural proficiency in Japanese, but who are interested in improving their speaking skills. This includes (but is not limited to) students who are concurrently taking other Japanese language classes but desire more speaking practice, students who have

studied Japanese on their own but are not currently enrolled in a regular class, students who studied Japanese in the past and are looking to refresh their skills, or students who simply want to become better speakers and listeners. It is an opportunity for all students of Japanese to refresh and reinforce their speaking and listening skills. This course employs a situational, role-playing approach (students are given situations in class and asked to generate conversations appropriate to those situations). Language functions learned in JAPN 228 will now be applied in more concrete, real-life situations. Students will encounter and learn various Japanese expressions for occasions such as dining out, shopping, traveling, visiting the doctor, communicating at school, making phone calls, and more. In these situations, students also will practice switching smoothly to the most appropriate speech styles (casual/polite/honorific) based on the relationship between the speaker and the listener. Multimedia sources from Japan (movies, television, websites, etc.) will also be used in class sessions.

JAPN285 Translating Modern Japanese Song Lyrics (CLAC.50)
This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other's choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.

KOREAN (KREA)

KREA153 Elementary Korean I
Elementary Korean will introduce students to written and spoken Korean. Taught by a native-speaker instructor, the course is useful to students who may have spoken Korean at home as well as to those students who have no previous experience with the language.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA154 Elementary Korean II
Elementary Korean II is the second part of the elementary course in Korean. Students will develop communicative skills in speaking and listening, but increased attention will be given to reading and writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **[KREA153 or LANG153 or ALIT153 or EAST153]**

KREA205 Intermediate Korean I
Intermediate Korean I is the first part of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA206 Intermediate Korean II
Intermediate Korean II is the second half of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **KREA205**

KREA217 Advanced Korean I
Advanced Korean I is the first half of the advanced course in spoken and written Korean. Various functions of more complex grammar patterns and vocabulary than those learned in previous levels will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **None**

KREA218 Advanced Korean II
Advanced Korean II is the second half of the advanced course in spoken and written Korean. In addition to the textbook, selected readings from news articles and short stories from modern Korean literature will be introduced to help students develop their writing skills and a higher level of reading comprehension. Upon the completion of this course, students will be able to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Prereq: **KREA217**

KREA255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)
This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

KREA262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in

through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

LATIN (LAT)

LAT101 First-Year Latin: Semester I
Conquer Latin in two semesters! Acquire a basic vocabulary and build your skills with essential grammar as you develop your ability to read passages in Latin from the principal classical authors--including Cicero, Vergil, and Ovid. This first semester covers half the textbook. In the second semester (LAT 102), you will complete the textbook.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT102 First-Year Latin: Semester II
Continue your conquest of Latin by completing your acquisition of a basic vocabulary and essential grammar.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **LAT101**

LAT104 Intensive Introductory Latin
Learn Latin in a semester with this intensive introduction to grammar and syntax. Readings in original authors help illustrate and reinforce the fundamental principles of the language in preparation for more advanced reading at the intermediate level. Recommended for students wanting accelerated Latin acquisition or those with some background wanting a quick review.
Offering: **Host**
Grading: **OPT**
Credits: **1.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT201 Catullus and Cicero: Love and Life in Republican Rome
We will read portions of Cicero's "Pro Caelio" speech and a selection of the poems of Catullus, with a focus on the tangled social web linking the poet Catullus, the young Caelius, their shared love interest Lesbia/Clodia, and Cicero's long-standing feud with Clodia's brother. We'll get a glimpse behind the curtain of the private lives and public performances of Rome's elite during the late Republic -- complete with secret affairs, political scheming, and even an accusation of poisoning! We will also explore how these texts reflect social and cultural tensions of Rome in the 50s BCE, a period of growing instability not long before the Republic's dramatic fall. This course will fall under the Literature and Performance track.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT202 Latin Lyric Poetry
In this intermediate-level Latin course, students will continue to develop their facility with the Latin language and their understanding of Roman literary history through a reading of selections of Latin lyric and elegiac poetry, two corpora that are both heavily influenced by earlier Greek models and show a remarkable degree of Roman ingenuity. The work of Horace and Catullus will provide an entry point into this fascinating material. We will then turn to work by the elegists Propertius and Tibullus, as well as shorter poems by Ovid. Throughout the course, we will also be investigating a number of questions. What is lyric poetry, and to what extent must Latin lyric poetry be read as a continuation of the Greek lyric tradition? How do Roman authors take Greek models and rework them to address the interests of their contemporary audience? How and for whom were these poems performed, and how does this affect the way we read this corpus? To facilitate our discussion we will be reading translations of a number of Greek lyric songs and of Latin lyric poetry by Seneca and Statius, some examples of modern lyric, and scholarly literature. In addition to our daily reading in Latin, we will undertake a careful review of Latin grammar, as well as long-term translation and commentary assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT203 Latin Prose: Roman Letters
Whose voices could be heard in the politically turbulent first century CE, and what did it mean to write from within the orbit of power? Through letters of Seneca the Younger and Pliny the Younger, this course explores how elite Romans navigated questions of morality and meaning under the Roman Empire. Seneca, who spent years as an advisor to Nero, crafts letters to articulate a philosophy for ethical living. Pliny recounts episodes from his life, including an eyewitness account of the eruption of Vesuvius, and probes the values of

his contemporary world. This course will include a review of Latin grammar and syntax while gradually acclimatizing students to the rhythms and stylistic patterns of Latin prose.

This course satisfies the Literature and Performance track & History, Politics and Social Justice track.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT221 Roman Comedy
It has long been recognized that Plautus and Terence displayed widely different comic styles: Terence was an artist; Plautus, an untutored genius. We shall examine this difference through a critical reading of selected plays in their divergent literary and historical contexts.

This course will fall under the Poetry & Performance and History/Social Justice tracks.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT230 Love and Suffering in Ancient Rome (CLAC.50)
In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-CLAS**
Identical With: **CGST231**
Prereq: **LAT102**

LAT251 The Age of Nero
Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT254 Apuleius: THE GOLDEN ASS
Fast-paced, magical, sexy, and bizarre, Apuleius' GOLDEN ASS, or METAMORPHOSES, contains more than enough rowdy episodes to keep us entertained for a semester. The novel tells the story of the feckless Lucius, the man-turned-ass whose encounters with the residents of Thessaly range from the vulgar to the weird to the sublime. Our goals, in addition to reading and understanding the Latin, include tracing prominent themes and becoming acquainted with recent relevant scholarship.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT281 Roman Satire: Juvenal
Roman satire, as practiced by Lucilius, Horace, Persius, and Juvenal is a strange hybrid: it combines social criticism, literary parody, philosophical rumination, and obscene burlesque, a self-consciously "humble" genre set in the framework of dactylic hexameter, the meter of high-flown Homeric and Vergilian epic. It is among a small minority of ancient literature which directly addresses itself to the humbler aspects of the everyday lives of Roman citizens. This course on Roman satire will focus on Juvenal, the last practictioner of Roman verse satire. We will begin the course with a selection of short readings from each of the four Roman satirists in order to orient ourselves with standard topics of Roman satire (including dining, country vs. urban life, the body, sex, and gender roles) and differentiate the approaches. We will spend the rest of the semester exploring Juvena's seminal works: his first and second book of Satires, wherein he situates himself as a figure marginalized by a new order of foreign interlopers, powerful gender deviants, and tyrannical patrons and emperors, as well as Satire 10, his caustically philosophical take on the "Vanity of Human Wishes."
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT290 Wine, Wit, and Wealth: Status and Society in Horace and Martial
This course explores conspicuous consumption and hospitality in Rome during the early Empire. Through translating selections from Horace's Satires and Martial's Epigrams -- with a tasty detour into the cookbook recipes attributed to Apicius -- we will examine how some of ancient Rome¿s wittiest writers used themes of food and friendship to explore urban life and social status. Students will continue developing their skills in reading Latin poetry, with emphasis on grammar, close reading, and critical analysis. The course is appropriate for students at the intermediate and advanced levels.

This course satisfies the Literature and Performance requirement for the Classical Studies Major.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT301 Petronius
Follow the down-and-out Roman Encolpius as he embarks on a titillating tour of the Mediterranean, persecuted (with impotence!) by the phallic god Priapus. Join him as he attends the longest dinner party in Latin literature, a class-crossing affair including nouveau riche, citizens, slaves, freedmen, and foreigners. In addition to reading the Latin, we will examine issues of scholarship, from the title (Satyrica? Satyricon?), to the genre, to sexuality, to class and status.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT322 Lucretius
"Imagine there's no heaven..." This course offers close reading in Latin of extensive selections of the DE RERUM NATURA, the remarkable poem in which Lucretius argues that the world is made up of atoms, that the soul dies with the body, that the gods never help or punish human beings, and that mortals should live their lives in search of the peace of mind of Epicurean philosophy. We will try to understand Lucretius' Latin, which we will hope to read with increasing ease and accuracy to relate fully to his rhetorical and poetic techniques and to the literary, philosophical, historical, and cultural background of this unusual and fascinating poem.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLAS**
Prereq: **None**

LAT325 Pseudointellectuals and Eccentric Millionaires: Petronius!
Follow the young, naïve, and curious Encolpius as he winds his way through Rome in the oldest surviving ancient Roman novel! Our hapless "hero" confronts the guile and treachery of Rome's shadiest denizens in this Menippean satire, running into thieves, impotence, sexual voracity, drunkenness, and general debauchery along the way. Join Encolpius at the absurdly wealthy Trimalchio's home for a bizarre and interminable dinner party full of questionable characters from every corner of Roman society. What enticing or disgusting delights will find him along the way? This notoriously absurd, funny, and occasionally horrifying work will allow us to explore issues of class, status, slavery, sexuality, and narratology. Petronius' work gives "novel" insight into the cultural phenomena of his day using Latin full of colloquialisms, misunderstandings, and eclectic vocabulary geared towards diverse social interaction.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT330 Love and Suffering in Ancient Rome (CLAC .50)
In this CLAC course, students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-CLST**
Identical With: **CGST331**
Prereq: **LAT102**

LAT331 Vergil: AENEID 2
Vergil's Aeneid book 2 is almost cinematic in its tragic, poignant, and frenetic depiction of the fall of Troy, from looming threat of the Trojan Horse to the firing of the city, rooftop battles, and the violent loss of loved ones while the gods manipulate events with petty disdain for human life. Students will read book 2 in its entirety in Latin, and the rest of the work in English. The purpose of this course is to continue to develop skills in reading Latin poetry and to continue the study of Latin grammar with close reading and critical analysis.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT335 Martial
This half-credit course will explore a variety of themes in Martial's "Epigrams." Underappreciated today, the "Epigrams" depict friendships, rivalries, sexualities, ethnicities, violence, gender roles, professions, aspirations, and failures in a sharp social commentary on the imperial Roman world. In addition to weekly translation, we will survey the latest scholarly literature on Martial's corpus.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT340 Beastly Readings in Latin Poetry and Global Antiquity
Where and what is the animal in Roman literature? This advanced Latin course explores selections from Virgil's Georgics and Aeneid, and Ovid's Metamorphoses to understand how Roman poets utilize the category and reality of the animal in their literary worlds. What can intrusive animals and "beastly reading" tell us about Roman poetic agendas and conceptions of the human from antiquity to today? We will also experiment with comparative approaches by introducing Greek literary antecedents and Sanskrit literature in translation -- what might we learn from comparative reading across other ancient literary traditions? Readings and critical literature in Classical scholarship and Animal Studies will inform our analyses over the course of the semester. This course counts towards the Literature and Performance concentration in the Classical Studies Major. This course requires prerequisite LAT 200 level or permission of instructor to enroll.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT351 The Age of Nero
Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

For CLST Major requirements, this course can be used for the Literature and Performance track.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT353 Demagogues and Tyrants in the Roman Historians
Reading selections from Livy's ab Urbe Condita, Sallust's Bellum Catilinae, and Tacitus' Annales we will consider these historians' depictions of tyrants and demagogues (e.g., the Tarquins, Catiline, Tiberius, Nero) throughout Rome's political history, their views on the interactions between these controversial figures and the Senate and people of Rome, and their narratives describing the circumstances behind their rise and fall. At the same time, we will explore the role of fact vs. fiction, propaganda, and bias in the writing of Roman history through comparative analysis with contemporary sources and inscriptional evidence.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT360 Constructing Masculinity and Identity in Roman Elegy
This course will explore the ways in which Roman elegists used the genre of their poetry to construct a literary alternative to Roman masculinity and mores. Propertius, Tibullus, and Ovid each developed a masculine persona that rejected career politics and militarism in favor of the battlefields of love, creating a culture war between the status quo and a new Roman masculinity. The course will include weekly translation and secondary readings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Prereq: **None**

LAT375 Set in Stone: Reading Roman Life through Inscriptions
Inscriptions are our tweets from the ancient Romans. From the alphabets scrawled by school children on wax tablets to the curse tablets of scorned lovers and the biographical epitaphs on funerary monuments lining the roads leading into Roman cities they provide an intimate view of daily life in the ancient world, while public inscriptions document the political, religious, and social workings of the Roman state. This course will survey a representative sampling of the Latin inscriptional record from the earliest period through the Empire, including examples of laws, decrees, and religious dedications, Augustus' Res Gestae, and the methods employed in inscribing objects.

LATIN AMERICAN STUDIES (LAST)

LAST121 Tales of Resistance: Modernity and the Latin American Short Story (In English)
Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, as well as immigration to Europe and the United States.

LAST126 Intro to History: Heretics on Trial: The Holy Inquisition and Its Enemies
The Inquisition was among the most feared institutions of the early modern West. In its efforts to impose religious orthodoxy, it persecuted minorities, prohibited behaviors it deemed heretical--like magic and unbelief--and censored intellectual inquiry. Yet despite its resoluteness, the ability of the Catholic Church to impose control varied widely across time and place and was often met with equally firm resistance. This introductory course examines how the Catholic Inquisition functioned, from its origins in the medieval period to its final demise in the nineteenth century, paying particular attention to geographic and temporal specificities. From Cartagena de Indias to Lima, Goa, Rome, and Toledo, inquisitorial tribunals spanned a significant portion of the Atlantic world. The records produced by its scribes are some of the richest sources of the social, cultural, religious, and economic history of the era, yet they are also some of the most challenging to deal with, both epistemologically and morally. Historians have relied on Inquisition archives to reconstruct the lives of individuals and communities who left no other written records, all the while seeking to acknowledge that the records were produced under duress by officials who suspected the accused of the terrible crime of heresy. Through a wide range of primary sources like trial transcriptions, Inquisition "autobiographies," written confessions, censored books, and literary sources, students will both survey the lives of people who faced the Inquisition's scrutiny, while considering the role of violence, persecution, and resistance in the creation of the very records that allow for historical reconstruction.

LAST218 From Chocolate to Coca: Commodities and the Making of Latin America
Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

LAST219 Latin American Economic Development-Macro
In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

LAST226 Survey of Latin American Literatures, Cultures, and Ideas
A close study of texts from the colonial period to the present will serve as the basis for a discussion of some of the major ideas and cultural and political debates that have emerged in modern Latin America to this day. Thinkers include Las Casas, Sor Juana, Bolívar, Sarmiento, Martí, Neruda, Borges, García Márquez, Menchú, and Bolaño, among others. For purposes of understanding context, students will also read selected chapters from works by historians and cultural critics and will watch several films. (Please note that this course was previously called "Spanish American Literature and Civilization.")

LAST229 Between Worlds: Change and Continuity in Early Latin America
The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

LAST232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America
This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

LAST239 Writings from the Abyss: Andean Women Authors Between Territory, Memory, and Body
This course explores literature written by Andean women through a lens that centers the body, gender, and territory as key axes of resistance writing. We will ask ourselves how authors from regions such as Peru, Bolivia, and Ecuador -- from the mid-20th century to the present -- articulate their experiences and genealogies from positions that engage with ancestral knowledge, Indigenous worldviews, Andean spiritualities, and political memory. The selected texts highlight representations of the female body as a site of conflict, pleasure, maternity, trauma, and rebellion. Topics will include the coloniality of gender, state violence, language and orality, racialization, and sexual dissidence. The course is organized thematically and combines literary analysis with approaches drawn from cultural studies, Andean feminisms, and decolonial theory. Readings will include texts written in Spanish as well as bilingual or translated works from Quechua, Aymara, or Kichwa, alongside visual materials, interviews, and digital archives when relevant.

LAST240 From the Banjo to Dembow: Afro-Caribbean Music in Motion
This course analyzes the global circulation of Afro-Caribbean musicians, dancers, audiences, musical styles, and even musical instruments from the beginning of European colonialism to the present day. We will seek to understand the political interconnections between the Caribbean and the wider world by focusing our attention on specific "musical itineraries." These will include, among others, the creation of the banjo by enslaved people in the Caribbean and the instrument's role in black resistance in North and South America, the musical aftershocks of the Haitian Revolution in Cuba and Louisiana, the production of black internationalist politics at weekly "regge" dances led by Jamaicans in early 20th-century Costa Rica, and the rise of reggaetón between Panama, Puerto Rico, Cuba, the Dominican Republic, and the United States.

We will question how these musical itineraries propelled black political movements and shaped larger ideas about race, nation, diaspora, and the meaning of "the Caribbean" itself. No prior musical knowledge is required for this course.

LAST241 Contested Archives: Power and Memory in Latin American Archival Practices
This course explores the histories and politics of archiving in Latin America, from colonial record-keeping and imperial control to contemporary community-led, feminist, and dissident archival projects. What counts as an archive? Who decides what is preserved and erased? How are bodies, languages, and stories made (in)visible through archival dynamics? What alternative archival imaginaries emerge from Latin America's colonial and postcolonial contexts? We will analyze how archives have functioned both as instruments of domination and as tools of resistance, central to the construction of national histories, racial hierarchies, and cultural identities, but also capable of challenging erasure and reclaiming marginalized memories. Through an interdisciplinary and decolonial lens, we will engage with both historical texts and cultural and artistic interventions that challenge dominant archival logics, including literary works,

films, visual art, performance, and digital media that interrogate, fictionalize, or subvert archival practices. We will examine a variety of materials, including state archives, ecclesiastical records, truth commissions, community memory projects, and speculative/fictional texts based on archival material. By reading across genres and media, the course highlights how cultural production can both expose and reimagine the power of the archive. Works include texts by Diamela Eltit, Horacio Castellanos Moya, Cristina Rivera Garza, Patricio Guzmán, Diana Taylor, Silvia Rivera Cusicanqui, Aníbal Quijano, installation and performatic art by Regina José Galindo and diverse materials from archives and memory projects throughout Latin America.

LAST242 Histories of the Caribbean: New Questions, Methods, and Vantage Points
This course explores some of the most exciting new trends in historical scholarship on the Caribbean. We will consider how recent scholars of the Caribbean have turned a critical eye to existing methods and reimagined "archives" as they have crafted new stories about gender, sexuality, race, the environment, and the rise of modern capitalism. In this way, we will question how these new directions in Caribbean studies have reshaped the study of history more generally. We will use a wide geographic lens in order to gain an expansive vision of the circuits of the Greater Caribbean, stretching from Antigua, Guadeloupe, Barbados, Martinique, Jamaica, Trinidad, Guyana, Cuba, Puerto Rico, and Haiti into the wider Atlantic world.

LAST244Z Imagining the End: Neoliberalism and the Arts
Many of us now like to paraphrase the philosopher Frederic Jameson when he argued that it has become "easier to imagine the end of the world than the end of capitalism." As the recent deluge of post-apocalyptic movies and documentaries about melting glaciers makes clear, this is an accurate statement. Yet while most of us imagine how neoliberal capitalism will bring about the end of the world, others try to imagine the end of the status quo. Since neoliberalism became the global hegemonic system, artists of all kinds have been imagining ways we can survive and (perhaps) overcome it: think about the songs of Tracy Chapman or Residente, the street art of Keith Haring or Lady Pink, the movies of Chloe Zhao or Alejandro González Iñárritu, or the writings of Ursula Le Guin or Roberto Bolaño. This course explores how engaged art from the 1970s to the present has responded to -- and fought against -- neoliberal hegemony in the United States, Latin America, and beyond. Through the arts, we will explore the nightmares of global collapse and the dreams of a new egalitarian and sustainable society. In addition to analyzing movies, poems, short stories, songs, and street art, we will read theoretical and historical studies that help us understand how neoliberalism shapes contemporary culture and makes art into one of the few areas in which dissent can be expressed.

LAST245 Modern Latin America Since 1810
This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

LAST247 Caribbean Writers in the U.S. Diaspora
The Caribbean cloaks a complex history in a Club Med exterior. While white sands and palm trees proclaim it the "antidote to civilization," Caribbean writers undertake to represent a fuller picture of the individual in a world shaped by colonialism, slavery, nationalism, and cultural striving. This course will examine selected literary texts as part of an ongoing dialogue among the region's history, mythology, and aesthetics.

LAST251 Cycles of Resistance: Indigenous Voices in Latin American Literature and Culture
This course explores the richness and diversity of Indigenous voices in Latin America, from early colonial records to contemporary expressions. Using a transhistorical methodology, we will examine how socio-political issues and topics like land defense, cultural resilience, gender violence, hybrid identity, and political resistance persist and evolve through diverse perspectives in Indigenous discourse and cultural production. We will analyze and compare foundational texts like the Popol Vuh and Nueva corónica y buen gobierno, as well as original manuscripts alongside contemporary voices such as those of Humberto Ak'abal, Yana Lucila Lema, and Sonia Guiñansaca. Special attention will be given to the writings of indigenous women, exploring how they have challenged hegemonic narratives and reclaimed their bodies and territories. Additionally, we will explore multimedia expressions and digital activism to understand how indigenous individuals and communities adapt and resist in a globalized world. This course invites students interested in literature, cultural studies, gender studies, and human rights to engage critically with indigenous perspectives, fostering a deeper understanding of the complexities of Latin American cultures.

LAST252 Race and Nation in Latin America
How does race operate in Latin America, and in what ways does it intersect with the concept of nation and national belonging? The regions we call Latin America and the Caribbean have, since the first human encounter between "Old" and "New" Worlds of the 15th century, been often understood as places of mixture--both cultural and biological. From at least the early 19th century, when independent nations in the region began to emerge from colonial rule, intellectuals, statesmen, and citizens alike have had to contend with "race" and its inextricable connection to the concept of "nation." This course aims to introduce students to the history of race and national formation in Latin America

and the Caribbean, from the wake of the independence movements of the early 19th century to the present. It draws on historical, anthropological, and literary approaches to identifying, analyzing, and interpreting the varied meanings of race and nation throughout the region.

LAST258 Bolívar's Interpreters: Nation Construction in the Americas
No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

LAST260 Neotropical Acuatic Ecosystems: Their Importance, Sustainable Use, and Conservation (CLAC 1.0)
(English translation below Spanish text) El curso de Ecosistemas Acuáticos Neotropicales permitirá a los estudiantes buscar información y discusión sobre la diversidad y complejidad de los ambientes acuáticos en la América tropical. Comenzaremos a aprender definiciones, características, distribución y ejemplos de humedales, lagos, ríos y muchos otros hábitats acuáticos en todo el neotrópico. El origen del sistema hidrológico. Evolución de las principales cuencas: Amazonas, Magdalena, Orinoco y Paraná. El Paleo Orinoco-Amazonía: Importancia geológica y biótica. Dinámica geológica. Evidencia geológica y biológica. Hipótesis evolutivas de la fauna piscícola. Evolución del paisaje amazónico como parte del conocimiento para comprender los diversos procesos y patrones de riqueza y distribución de la biodiversidad. Los humedales (sabanas inundadas) de Colombia-Venezuela como ejemplo de humedales neotropicales. El Pantanal brasileño y las llanuras colombo-venezolanas como "áreas de criadero" para la biota acuática y terrestre y su importancia para el mantenimiento de la biodiversidad. Los estudiantes también leerán y buscarán información sobre el Sistema Fluvial Orinoco como ejemplo de estudio. La importancia biótica, el desarrollo sostenible y la conservación. Identificar los factores antrópicos que afectan al sistema. El desarrollo social y económico, y las contribuciones a través de los Programas de Evaluaciones Acuáticas Rápidas (RAP's) como metodología para producir información que permitió proponer áreas para la conservación de la biodiversidad. Terminamos con un análisis de los recursos y la importancia pesquera de las principales cuencas neotropicales: Amazonas, Orinoco y Paraná-Paraguay. Seguridad alimentaria. Ejemplos de ríos en riesgo.

This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemicity, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST265 Multilingual Aesthetics in Latin America
This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue,

and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

Prereq: **None**

LAST273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters
Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra's other Chile, César Aira's Colón (Panamá), Fernando Vallejo's Medellín (Colombia), and Mayra Montero's eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904--1914), the Cold War (1947--1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

LAST274 Insular Borders of Latin(x) America
Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire's control of its remaining insular colonies in the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the United States' successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island "intra-colonial" (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai'i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Edouard Glissant's concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

LAST276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

LAST277 The Secret Life of Waste: Trash in Latin American Art & Literature
From space junk to microplastic particles found in human blood, man-made waste and pollution are ubiquitous. What are the effects of waste on the environment? What can the decomposition of waste create and/or undo? What is the afterlife of waste? Is waste apocalyptic? Through figures such as rottenness, radioactivity, mutation, and zombies, we will explore the ways in which Latin American art and literature try to answer some of these questions by imagining living amidst the remnants of hyperconsumption and by exploring the unforeseen effects that coexisting with waste could have upon the land and the body. We will study a wide range of visual and literary engagements with trash from novels, poetry, comics, and films to environmental art projects. Artists and writers may include Cecilia Vicuña, Daniel Lie, Samanta Schweblin, Fernanda Trías, Vik Muniz, H. G. Oesterheld, Javier Campos, and Alejandro Durán, among others.

LAST278 Narratives of the Latin American Jungle
This course is a critical exploration of the ways in which forests and its plurality of beings, and particularly the tropical territories marked as jungle or rainforest in South America (the Amazon, the Darién), have been narrated, imagined, and contested in cultural production and in indigenous and peasant ontologies and place-based practices for more than a century. We will investigate the construction of jungle as a territory of dwelling shaped by the relational condition between human and other-than-human beings (plants, animals, water) and as a place where diverse anxieties about sovereignty, politics, race, development, gender, and subversion collide. We will examine this cultural geography in relation to diverse histories of modernization, development and extractivism, the global angst over the environment and its destruction, local processes of (cosmopolitical) resistance, and the various political and environmental conflicts that have shaped the region over the past century. Attending to Amazonian indigenous thought and to political ecology and other intellectual practices emerging from Latin America, as well as to literature, film, popular culture and visual art, we will discuss the potential to disavow modern/colonial binaries like nature-culture, human-nonhuman and civilization-barbarism, in a place that has been central to the way in which Latin America has been imagined for centuries.

LAST279 Christianity and Globalization
This course focuses on recent developments in global Christianity. We will look at various interlinked dynamics: the rise of spirit-filled Evangelicalism, especially Pentecostalism, faith-based humanitarianism, child-sponsorship programs, and themes of militarism such as spiritual warfare. We will pay attention to the role of U.S. power in the world and how the narratives that various Protestant Christians tell through their writings and media shape life across international spaces. We will sample a variety of methods in how one studies the field of Christianity. These will include historical, sociological, and anthropological methods, all of which challenge traditional scholarly accounts (meaning those in the field of church history) in order to expand our understandings of Christianity in the modern period.

LAST280 Screening Youth in Contemporary Latin American Cinema
This course will examine some of the most important Latin American films from the past three decades that also happen to cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality and gender, cultural identity, and citizenship through the lens of youth. These films question the roles of minors in relation to politics and resistance, and reflect upon the cultural constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dimensions at play in these films and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, this course includes a creative project by which students will develop an idea for a short film based on their own personal coming-of-age narrative.

Prereq: **SPAN221**

LAST281 Labor in Latin America and the Caribbean: Pedestals and Veils of Disposability
This course examines the racialized and gendered exploitation of labor that has long structured everyday life across the Western hemisphere. It asks how shifting productions of race and gender mediate the distinction between productive and disposable humanity. We will examine a variety of materials from the region spanning the colonial period to the present, including literature, film, visual and performance art, economic theory, political philosophy, grassroots activism, testimonials, chronicles, and journalism. Through these texts, we will problematize a range of interdisciplinary issues, such as the veiled continuities of conquest and enslavement, the accelerated pace of capitalist extraction of human and non-human value, and state responses to forced migrations of populations considered criminal, undesirable, or superfluous. We will also study

aesthetic and lived examples of resistance from Latin America, the Caribbean, and their diasporas, with particular interest in how collective organizing has taken on new forms in the face of work's increasing informalization and precaritization. Building off these examples, students will develop an accessible final project that applies their research and analytical skills not only to produce knowledge, but to cultivate critical consciousness for the reader, listener, or viewer.

LAST283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile
This course explores how poetry, novels, and films, produced during and after Chile's military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

Identical With: **SPAN282**
Prereq: **None**

LAST286 Racial Capitalism and Resistance in Central America
In modern-day Central America and its diasporas, the most precarious communities are descendants of colonized, enslaved, and dispossessed populations. Yet while the fact of race and class intersecting is evident, why and how they have evolved together is not. This course examines the relationship between race formation and economic dispossession across the region through a transnational perspective. Through a wide range of Central American and hemispheric cultural objects, theoretical frameworks, and grassroots praxes, we will meditate on the theoretical paradigm of racial capitalism, which holds that racialism and capitalism are co-constituting and have evolved together to produce an economic world order dependent on colonialism, violence, exploitation, and containment. Students will develop their interpretive and analytical skills by collaboratively examining issues of whiteness, mestizaje, and multiculturalism; resource extraction; economic exploitation and expulsion; rage, resistance, and revolution; policing, counterinsurgency, and criminality; migration; identity and ethno-politics; and education. Beyond these cultural, theoretical, historical, and aesthetic concerns, a central component of the course is a creative or community engaged project that students will develop in close collaboration and in stages throughout the semester.

LAST288 Territories of Dwelling, Desire and Resistance in Latin America
What does it mean to dwell in a place? How are spatial orders and more-than human dimensions conceived of and what is the symbolic and material weight of these conceptions? This course seeks to examine the ways in which diverse spaces categorized as rural or as "natural frontiers" in Latin America have been inhabited, negotiated, and contested in the 20th and 21st centuries. How have cultural practices constructed them as territories of dwelling, desire, possession, dispossession, and resistance? How does narrative and art reflect on local modes of dwelling and on the relationships between community, embodiment, desire, memory and the materiality of place? We will focus on texts and artistic practices--literature, film, performance, and the visual arts--that, in thinking about mountains, rivers and other bodies of water, plants, more-than-human beings, seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries and complicate extractivist and other capitalist logics that have sought to transform them. We will trace how these texts intervene in urgent debates about extractivism, the destiny of rural lands, the uses, abuses and rights of nature, the struggles for peasant and indigenous rights, environmental justice, and the defense of alternative ontologies. We will focus particularly on the Andean and Amazon regions of South America, with specific attention to Colombia and Perú.

LAST290 Current Environmental Issues in Latin America (CLAC 1.0)
(English translation below Spanish text) Este curso proporcionará información histórica y actual sobre el desarrollo de temas ambientales en América Latina. La información se dividirá en la evaluación del uso del medio ambiente durante los períodos precolombino y colonial (a); y b) período moderno. Se discutirá

la organización, estructura y gobernanza del medio ambiente. El desarrollo de políticas públicas, planes de gestión, factores que se deterioran y los posibles usos sostenibles del medio ambiente y sus recursos. Leeremos literatura interdisciplinaria incluyendo: académica, informes, documentos oficiales gubernamentales y proyectos de ONG dedicados al diagnóstico, desarrollo y uso o nuestros recursos en América Latina. Por último, se estudiarán casos particulares de países latinoamericanos como Argentina, Brasil, México, Costa Rica, Perú y Venezuela. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs' projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST291 From the Muralists to the Narconovela: The Public Intellectual in Mexico
Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

LAST292 Spanish American 'Modernismo' in a Global Context
The publication of Nicaraguan Rubén Darío's AZUL... in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

LAST294 Queering Latin America: Contemporary Gay, Lesbian, and Transgender Literature and Film
This course studies important and groundbreaking films, novels, and poetry by contemporary gay, lesbian, and transgender artists. It focuses on their strategies to survive, respond to, and defy the changing socio-political Latin American landscape of the last 80 years. We will introduce some key critical concepts and debates from queer theory to guide our discussions. Some of the artists we will study include: Alejandra Pizarnik, Lucía Puenzo, Manuel Puig, Pedro Lemembel, Karim Aïnouz, Lorenzo Vigas, Rosamaría Roffiel, and Norma Mosgrovejo, among others.

LAST295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures
What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

Identical With: **SPAN295**

Prereq: **SPAN221**

LAST296 Colonial Latin America
This course studies the history of Latin America and the Caribbean from pre-conquest times to the emergence of independence movements in the early 19th century. Lectures will explore the key environmental, cultural, economic, political, and religious transformations that shaped colonial societies throughout the region. Beginning with the formation of indigenous and Iberian polities before 1492, we will consider how early modern colonial governance functioned and evolved throughout the period of Spanish and Portuguese rule in the Americas. Through an array of primary and secondary sources we will reconstruct the lived experiences of a diversity of actors across the colonial world. We will pay particular attention to the methods and approaches that scholars have used to understand the history of the region.

LAST297 "Un pedacito de la historia negra": Afro-Latin American Literature and Culture
The significant contributions of Afro-descendent individuals to the development of Latin American culture have been frequently overlooked or torn to pieces. Yet, the experiences and bodies of racialized people have been key in shaping and transforming the region's culture. Beyond their representation in early colonial and republican works, Afro-descendent writers and characters have been crucial in the modern aesthetics of Latin American literatures. Along with musicians and other artists, they have provided a continuous challenge to the idea of Latin America and its cultural production as a product of a homogeneous cultural and racial miscegenation. Inspired by Colombian artist Joe Arroyo's opening to a famous salsa song, wherein he sets out to tell "un pedacito de la historia negra," in this seminar we will study short stories, novels, poetry, music, and film, including works that explore the experience of being racialized in Latin America, poetic experimentalism through orality, and the retelling of the history of Black resistance in the Caribbean through modern media. Engaging with historical and contemporary issues such as racial discrimination, social inequality, and cultural pride and preservation, this course invites students to critically analyze the fundamental role of Afro-Latin Americans in shaping Latin American cultures and histories.

LAST298 Food Security and Environmental Conservation (CLAC 1.0)
(English translation below Spanish text) En este curso los estudiantes investigarán información y discusión sobre la seguridad alimentaria y el uso del medio ambiente en una selección de países de América Latina. Haremos preguntas sobre la base de la producción y disponibilidad de alimentos. También examinaremos la información disponible de las agencias públicas y privadas sobre los programas establecidos por los países para garantizar la seguridad alimentaria de sus habitantes y el uso sostenible y la conservación del medio ambiente. Discutiremos conceptos como: La soberanía alimentaria y la seguridad como un sistema alimentario en el que las personas que producen, distribuyen y consumen alimentos también controlan los mecanismos y políticas de producción y distribución de alimentos; La nutrición como normas mundiales y particulares de consumo de alimentos; La Justicia social relacionada con la accesibilidad de los alimentos; y el derecho humano a una alimentación adecuada y a la libertad del hambre como uno de los objetivos del milenio de las Naciones Unidas. El estudiante revisará casos particulares en América Latina. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. In this course students will research and discuss food security and the use of the environment in a selection of Latin American countries. We will ask questions about the basis of food production and availability. We will also examine the available information from public and private agencies about programs established by countries to ensure the food security of their inhabitants and the sustainable use and conservation of the environment. We will discuss concepts such as: food sovereignty and security as a food system in which the people who produce, distribute, and consume food also control the mechanisms and policies of food production and distribution; nutrition as a global and particular standard of food consumption; social justice related to the accessibility of food; and the human right to adequate food and freedom from hunger as one of the United Nations' objectives of the millennium. Students will look at particular cases in Latin America. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST299 Decolonizing Speculative Fiction in Latin America
This course interrogates what it means to imagine alternative futures in colonial and postcolonial settings. As the writings of conquistadors, explorers and missionaries show, Europe envisioned the New Continent as the land of the future or utopia, to the point that contemporary decolonial theorists have observed that nothing was "discovered" by the first European travelers to America but the idea of discovery itself. Modern temporalities of progress became thus inseparable from the image of the Americas as a frontier of imperial expansion, religious conversion, and economic exploitation. If European SF (science fiction/speculative fiction) emerged hand-in-hand with positivist notions of progress and civilization, Latin American SF contested Eurocentric epistemologies by claiming the ability to imagining the future and fictionalizing worlds otherwise. The course will center on three key moments of Latin American literary history: 1) the early to mid-twentieth century experiments in fantastic literature from the Southern Cone, which broke with realist mimesis from the margins of modernity; 2) post-1989 SF novels from Bolivia, Guatemala and Chile, that address the making of neoliberal globalization from the vantage point of the Global South; and 3) contemporary Dominican and Cuban works in which Afro-Caribbean religions and gender formations engage in productive conversations with digital technologies, biomedical engineering, game cultures, and climate change.

LAST302 Latin American Politics
This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include: why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

LAST308 Greater Latin America: Ideas, Politics, and Culture in the Americas
What is "Latin America," who are "Latin Americans" and what is the relationship among and between places and people of the region we call Latin America, on the one hand, and the greater Latin diaspora in the US on the other? This course will explore the history of Latin America as an idea, and the cultural, social, political, and economic connections among peoples on both sides of the southern and eastern borders of the United States. The course will draw from a variety of sources, including literature, visual arts, music, and oral history. Topics we will consider include the origin of the concept of "Latin" America, Inter-Americanism and Pan-Americanism, transnational social movements and intellectual exchanges, migration, and identity politics.
Offering: **Host**

LAST309 Territory, Community, and Identity in the Americas
How does a place shape community social relations? And in what ways do peoples' relationships to natural resources and the built environment shape their political identities? This course will explore these questions by focusing on particular case studies in the Western Hemisphere. We will consider the ways in which communities are tethered to a particular idea of territory, whether they be "fugitives," "runaways," "natives," or "immigrants." The cases we will explore include quilombos and palenques comprised of people who escaped enslavement in Portuguese and Spanish America, indigenous communities forged before, during, and after colonization by Europeans, and newfound communities or colonies comprised of relatively recent (im)migrants.
Offering: **Host**

LAST315 Cuban Literature and Film: Imagination, Revolt, and Melancholia
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

LAST320 Media and Power in Latin America: From Quipus to Twitter
This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

LAST321 Secrets, Lies, and Fictions in the Americas
In 1964, historian Richard Hofstadter underlined the spread of a "paranoid style" in American politics. Although Hofstadter's description seems more appropriate today than ever, in an increasingly interconnected global order the role of misinformation, uncertainty, manipulation, and conspiratorial imaginaries in shaping and limiting democracies and public spheres cannot be exclusively assigned to any particular locale. From a continental standpoint, this course offers analytical tools to explore the political complexity of lies, secrets, and fictions in both the United States and Latin America since the mid-twentieth century to this day. By studying a series of cases--including the Guatemalan

civil war, the assassination of John F. Kennedy, the Pentagon Papers, the U.S. intervention in the Middle East, the "dirty war" in Latin America, censorship in socialist Cuba, the arrest of Augusto Pinochet in London, Wikileaks, hacker practices in the early days of internet, or Cambridge Analytica--we will address the relations between surveillance, spectacle, and conspiracies (both factual and imagined) in the contemporary techno-political landscape. Moreover, the course emphasizes the speculative and theoretical potentials of art and literature when it comes to understanding socio-political phenomena. Beyond distinctions between truth and falsehood, fictional constructions are key to our collective capacity to imagine alternative worlds. By mapping out the ways in which fictions circulate as such or rather as truthful versions of reality, we will problematize the limits and uses of truth, lies, and official and alternative narratives, as well as the power of states, corporations, individuals, and collectives to direct attention and frame information.

LAST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present
Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike. This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in Tristes Tropiques (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film Fitzcarraldo (1982).

LAST335 Nature, Science, and Empire in Early Latin America
This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

LAST343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations
The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

LAST344 The Haitian Revolution Beyond Borders
In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti's neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti's founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti's long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

LAST348 Urban Histories of Latin America
Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the every-day experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

LAST373 Language and Power in Latin America
What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From Indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region. The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of Indigenous peoples as social and political actors in contemporary Latin America.

LAST375 Unraveling Nature: Environmental Histories of Latin America
In the late eighteenth century, as almost three-hundred years of Spanish-rule in the Americas neared collapse, the Colombian scholar Francisco José de Caldas wrote that the key to understanding human variety lay in the different environments that human societies inhabited. For Caldas, nowhere was this more evident that in the Andes, where within close proximity a variety of temperature ranges and degrees of atmospheric pressure clearly influenced the character and customs of people. From the depths of the Amazon to the highest peaks of the Andes and the semi-arid lowlands of the Gran Chaco, the Latin American environment has continually inspired chroniclers, scientists, state-planners, and environmental activists, all seeking to unravel its workings in the service of their economic, political, social, and religious ideals. This class investigates the range of technologies and genres that scholars, administrators, local experts, and communities across Latin America have used to make the region's varied geographic spaces intelligible from the fifteenth century until the present day. It explores tensions between material and theoretical influences on the spatial imaginary and examines how environments were made and remade to serve imperial, colonial, national, and global projects. Important themes include Indigenous cosmologies and natural knowledge, the establishment of colonial extractive economies, the export-led growth of the nascent Latin American nations, the developmentalist projects of the late twentieth century, and recent efforts to contest the exploitation of nature by endowing natural bodies, like rivers and mountain ranges, with legal rights.

LAST383 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy (CLAC 1.0)
(English translation follows below) Este curso examinará los factores clave que han afectado el desarrollo de Venezuela y su entorno desde el período

precolonial hasta el presente. Dividiremos la historia de Venezuela en dos períodos críticos: antes y después del descubrimiento de petróleo. Haremos preguntas sobre la naturaleza y las interacciones de los factores y agentes clave que transformaron a Venezuela de una colonia a la de un país económicamente independiente. Al examinar los períodos económicos anteriores y posteriores al petróleo por separado, aprenderemos que los factores clave, como la agricultura, el uso de la tierra y la influencia colonial europea, cambiaron drásticamente, transformando así muchas instituciones sociopolíticas. Los contrastes incluirán la resiliencia y la erradicación de enfermedades, los derechos humanos y la esclavitud, la propiedad de la tierra, la salud humana, los impactos en la biodiversidad y la salud humana, y la protección de las culturas indígenas. En última instancia, examinaremos los factores que han llevado al colapso de la democracia. Leeremos una literatura interdisciplinaria que incluye antropología, religión, sociología, ciencias ambientales, derecho e historia. El curso se presenta en un formato de lectura / discusión en el que todas las lecturas, escritos y discusiones serán en español. This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LANG105G Beginning Cantonese I
Learn Cantonese before you go abroad! This quarter-credit, online course is intended to prepare students with fundamental language skills before they study abroad. This course will help students acquire basic speaking and listening skills in Cantonese through an online language learning platform. By the end of the quarter, students will be able to discuss topics about people and travel in Cantonese at an elementary level of proficiency.
Offering: **Host**

LANG141 Elementary Modern Greek
The course is an introduction to the language and culture of modern Greece. The fundamentals of reading, writing, and speaking are taught. We start by learning the Greek alphabet and sounding out basic words and expressions. We then progress to acquiring useful vocabulary; practicing in-class dialogue exercises; and eventually constructing original sentences for use in conversation. In addition, we examine different aspects of Greek culture including modern Greek literature in translation, the Mediterranean Diet, contemporary Greek history, and Orthodox Christian spirituality and holiday customs.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

LANG142 Elementary Modern Greek II
The course builds upon the language skills acquired in LANG 141. Students learn how to count, tell time, and give directions in Greek; compose short descriptive essays in the target language; and translate passages into English. Student-led conversation hours outside of class provide further opportunity to practice speaking and to explore interests such as Greek music, social media, and travel. In class, we also examine historical and cultural topics including life in contemporary Athens, the Greek War of Independence, and the story behind the modern revival of the Olympic Games.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

LANG151 Elementary Swahili I
This course is an introduction to the study of the Swahili language, the most widely spoken language on the African continent, and focuses on the development of all four skills (listening, speaking, reading, and writing). The course includes regular meetings with a remote instructor, independent work, and weekly sessions with a teaching assistant.
Offering: **Host**

LANG160 Introduction to Tamazight: The Native Language of North Africa and Beyond (CLAC.50)
This course will introduce students to the language (sounds and script) and culture of the Amazigh people, an ethnic group (commonly known as Berbers) native to North Africa and West Africa, specifically Morocco, Algeria, Tunisia, Libya, Mauritania, northern Mali, and Niger, with some oases in Egypt and the Canary Islands. The Tamazight language--the alphabet of which is called Tifinagh--has been a written language for almost 3000 years, although it was disrupted throughout history due to various invasions and conquests of the area. The Tuareg people of the Sahara desert in Northern Africa, and as of late Morocco and Algeria, have been using the Tifinagh alphabet (oldest dated inscription from about 200 BC) and the Tamzight language as a secondary national language. The objectives of this course are: 1. To introduce students to

the sounds and script of Tifinagh; 2. To teach students basic conversation and essential elements of the Tamazight language; and 3. To familiarize students with the culture of the different Amazigh peoples.

LANG233 Introduction to ASL / English Interpretation (CLAC 0.5)
Having completed course work in Beginning ASL I, II and Intermediate I, II, students who have demonstrated a strong interest in continuing their studies at a more sophisticated and challenging level may find this course work interesting pursuant to becoming a professional, credentialed Sign Language Interpreter.

This experience will provide students with a working knowledge of the profession of interpreting including the Code of Professional Conduct, certification criteria, the roles and responsibilities of a professional interpreter and discussions of the role of the interpreter in a variety of professional settings including educational, medical, legal, the performing arts, counseling, and rehabilitation.

Students who attend this course demonstrate that they are able to express in ASL, with some confidence, routine and everyday experiential topics within a conversational format with some elaboration. They demonstrate clear and accurate signing and fingerspelling at a moderate rate of speed.

This coursework uses a process-oriented approach for applying the essential cognitive strategies for interpretation. These strategies include organizing and manipulating visual images, analyzing message for meaning, and self-monitoring for message accuracy. This experience serves as a transition from language learning to beginning interpretation.

LANG250 Visual Gestural Communication
The Visual Gestural Communication course (VGC) is an introduction to communication mostly based on iconicity via gestures. Students will use body movements in performance-like activities to model people's actions in the real world or in imaginary universes, facial expressions to convey feelings and emotions as well as some ideas and concepts, hand gesticulations to represent objects and concepts. Students will practice their non-verbal (aka not based on language) communication in diverse settings on a variety of topics taking into account different perspectives and sensibilities in the world: countries, cultures, languages, minorities, genders, ages, etc. Students will also be exposed to a stylized form of signed language used by the Deaf community in international settings, commonly called International Sign Language. This course does not require previous exposure to American Sign Language.

LANG290 Intermediate American Sign Language I
This course is the third (3rd) of six American Sign Language (ASL) courses encompassing two terms for Elementary, two for Intermediate, and two for Advanced. The two Intermediate ASL courses are an introduction to communication in ASL. You will expand your vocabulary and enhance your grammar while starting to get a basic understanding of the Deaf experience. The course will be taught primarily in ASL and with clarifications in written English as needed. Interactive activities in class and homework assignments will provide you with ample opportunities to practice communication in ASL as much as possible. Because of the absence of a standardized written system for ASL, you will complete many of the assignments by recording yourself on video.

MATH114 History and Philosophy of Mathematics (for Everyone) (FYS)
Mathematical knowledge is a pinnacle of human knowledge and achievement, so we will never have an adequate account of human knowledge until mathematical knowledge is properly understood. For this reason, the course addresses the question: How do we come to know mathematical truths? What is distinctive about the course is that we will try to answer this philosophical question via scientifically, culturally, and historically informed reflection. This "humanizes" mathematical thought by finding its origins in humans (and in animals), and by finding it in specific cultural contexts and practices and in the historical expression and transmission of ideas. We will reflect on examples of proto-mathematical practices (measurement, record-keeping, writing), on the cognitive or psychological limitations that we overcome mathematics, as well as on some of the history of properly mathematical practices (arithmetic, geometry, algebra). We will identify the distinctive features of various mathematical practices and ask why they take the forms they do and what general morals can be drawn from them. You will also be invited to draw a philosophical moral about the nature of mathematical truth. Meetings will be a mixture of lectures, discussion, and review. Assignments will include writing assignments, problem sets, and "explainer" presentations in which you explain what's going on in a given passage. Hints and pointers about the readings will be provided. Never fear; no calculus will be presupposed or taught!

MATH114F History of Math (Is for Everyone!) (FYS)
Mathematics is often taught as an abstract realm of eternal truths. The aim of this course is to "humanize" mathematical thought by re-embedding it in specific cultural contexts, material practices, and the historical transmission of ideas. We will focus on developments in geometry and algebra (and their interaction) in Ancient Greece, Medieval Islam, and Renaissance Europe, culminating in the analytic geometry of René Descartes. The principal aim of the course, however, is not to equip students with specific mathematical skills that they will go on to exercise in other contexts; it is rather to identify and reflect on the distinctive features of culturally specific mathematical practices and why they take the form they do. This will involve doing a good deal of math, but that mathematical study will be wedded to historical and philosophical inquiries. Historically, we will study the relation of particular mathematical practices to other cultural activities (commerce, taxation, the arts, etc.), their dissemination across space and time (through different places, cultures, and generations), and how their reception in different places and ages has led to transformations in the practices themselves. We will make use of Special Collections to consider different ways mathematics has been performed and preserved in writing, the role of mathematical texts in education, and the material transmission of mathematical knowledge: e.g., how a demonstration makes its way from Syracuse in 250 BC into a textbook printed in the United States over 2000 years later. Philosophically, we will interrogate the notion of mathematical proof by considering different methods of demonstration (reductio, construction, exhaustion, induction, analysis) and identifying the principles of adequacy to which they appeal. We will also reflect on the forms in which mathematical knowledge is presented (axiomatic systems, treatises, problems, theorems, methods) and ask what makes a result significant or generative in a specific tradition or paradigm. No special mathematical background is presupposed, but the class will require significant effort of everyone, regardless of mathematical experience. It is difficult to internalize the intellectual styles of different mathematical paradigms and to appreciate their distinctive methods and results. Some results (such as the Pythagorean theorem) will be familiar, but our approach to them likely will not be. There will be problem sets and tutorial sessions to help us digest the mathematical content. Assignments will include art projects, essays, problem sets, and "explainer" presentations.

MATH117 Introductory Calculus
This course is designed to introduce basic ideas and techniques of differential calculus. Students should enter with sound precalculus skills but with very limited or no prior study of calculus. Topics to be considered include differential calculus of algebraic, exponential, and logarithmic functions. (Integral calculus will be introduced in MATH118.)
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH118 Introductory Calculus II: Integration and Its Applications
This course continues MATH117 and is designed to introduce basic ideas and techniques of calculus. Students should enter MATH118 with sound precalculus skills and with very limited or no prior study of integral calculus. Topics to be considered include differential and integral calculus of algebraic, exponential, and logarithmic functions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH119 Elements of Calculus, Part I
This course is the first half of a two-semester calculus sequence (MATH119, MATH120). This sequence is designed for students who have not previously studied calculus. The course, together with MATH120, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH120 Elements of Calculus, Part II
This course is the second half of a two-semester calculus sequence. This sequence is designed for students who have not previously studied calculus. The course, together with MATH119, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH119**

MATH121 Calculus I
MATH121, together with MATH122, will cover both theoretical and practical aspects of limits, derivatives, and integrals; the calculus of exponential, logarithmic, trigonometric, and inverse trigonometric functions; techniques of integration; plane analytic geometry; various applications of calculus; and sequences and series, including power series and intervals of convergence.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH122 Calculus II
The continuation of MATH121. Topics covered include techniques and applications of integration and an introduction to sequences and series.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH123F Mathematical Deduction with Calculus (FYS)
This course is a first-year seminar (FYS). Topics covered include techniques and applications of integration and an introduction to sequences and series, with an emphasis on mathematical writing. Weekly papers will be required.It is suitable for students who have already taken calculus and are interested in pursuing the mathematics major. Students may not receive credit for both MATH 122 and MATH 123.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH121**

MATH132 Elementary Statistics
Topics included in this course are organizing data, central measures, measures of variation, distributions, sampling, estimation, conditional probability (Bayes' theorem), hypothesis testing, simple regression and correlation, and analysis of variation.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH133 Intermediate Statistics
This class continues the study of statistics begun in MATH 132. Topics will include experimental design, ANOVA, multiple regression, non-parametric tests, and further topics as time permits. This course is an ideal continuation for students who have taken MATH 132 or who got a 4 or 5 on the AP Statistics exam and who wish to deepen their statistics knowledge.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH132**

MATH134F Mathematical Thinking (FYS)
In this course we seek to illustrate for the students that mathematics is an organic way of thinking, with a beauty and elegance of its own, that also includes its essential applications to many concrete physical models. Students will learn the techniques of mathematical writing, as well as take a survey of important mathematical topics.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH211 Problem Solving for the Putnam
This course will explore the problems and problem-solving techniques of the annual William Lowell Putnam mathematical competition. Particular emphasis will be placed on learning to write clear and complete solutions to problems. The competition is open to all undergraduate students.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH221 Vectors and Matrices
This is a course on the algebra of matrices and vector spaces. It emphasizes a concrete approach to the material. Topics include solving systems of linear equations, vector algebra, matrix algebra, properties of invertible matrices, determinants, the vector space Rn and its subspaces, dimension, and linear transformations. It concludes with a discussion of eigenvalues, eigenvectors, and matrix diagonalization. If time permits, additional topics such as the dot product, the Gram-Schmidt process, and basic aspects of vector spaces will be discussed. MATH 221 and MATH 223 cover very similar material, but they are intended for students with different experience in mathematics. MATH 221 takes a more concrete approach to the material, and it is suitable for students who have not yet engaged with proof-based mathematics. MATH 223 takes a more theoretical approach that is appropriate for students who have taken proof-based math courses already or for students with strong mathematics backgrounds who are willing to learn how to read and write proofs in parallel with linear algebra. MATH 221 and MATH 223 fulfill the same requirement for the mathematics major, and students need only select the option that is best suited to their current background in mathematics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH122**

MATH222 Multivariable Calculus
This course treats the basic aspects of differential and integral calculus of functions of several real variables, with emphasis on the development of calculational skills. The areas covered include scalar- and vector-valued functions of several variables, their derivatives, and their integrals; the nature of extremal values of such functions and methods for calculating these values; and the theorems of Green and Stokes.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH223 Linear Algebra
This is a first course on linear algebra. It emphasizes a theoretical approach to the material. Topics include vector spaces, subspaces, dimension, linear transformations and matrices, determinants, eigenvalues and eigenvectors, and diagonalization of linear operators. If time permits, additional topics such as inner product spaces, Hermitian and unitary transformations, and elementary spectral theory will be discussed. MATH 221 and MATH 223 cover very similar material--they are both linear algebra courses--but they are intended for students with different experience in mathematics. MATH 223 takes a more theoretical approach that is appropriate for students who have taken proof-based math courses already or for students with strong mathematics backgrounds who are willing to learn how to read and write proofs in parallel with linear algebra. MATH 221 takes a more concrete approach to the material, and it is suitable for students who have not yet engaged with proof-based mathematics. MATH 221 and MATH 223 fulfill the same requirement for the mathematics major, and students need only select the option that is best suited to their current background in mathematics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH122**

MATH225 Introduction to Real Analysis
In this rigorous treatment of calculus, topics will include, but are not limited to, real numbers, limits, sequences and series, continuity and uniform continuity, differentiation, the Riemann integral, sequences and series of functions, pointwise and uniform convergence of functions, and interchange of limiting processes. MATH228 or comparable experience in writing mathematical proofs is strongly recommended for success in this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH226 Complex Analysis
This course will present the basic properties of complex analytic functions. We begin with the complex numbers themselves and elementary functions and their mapping properties, then discuss Cauchy's integral theorem and Cauchy's integral formula and applications, Taylor and Laurent series, zeros and poles and residue theorems, the argument principle, and Rouche's theorem. In addition to a rigorous introduction to complex analysis, students will gain experience in communicating mathematical ideas and proofs effectively.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH228 Discrete Mathematics
This course is a survey of discrete mathematical processes. Students will be introduced to the process of writing formal mathematical proofs, including mathematical induction. Topics may include set theory, logic, number theory, finite fields, permutations, elementary combinatorics, or graph theory.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **None**

MATH229 Differential Equations
This course is an introduction to the theory of ordinary differential equations. Topics will include existence and uniqueness theorems as well as techniques to solve systems of equations, with applications in pure mathematics and related fields such as physics, chemistry or biology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH221 AND MATH222) OR (MATH222 AND MATH223)**

MATH231 An Introduction to Probability
This course teaches the basic theory of probability. Although the notions are simple and the mathematics involved require only a basic knowledge of the ideas of differential and integral calculus, a certain degree of mathematical maturity is necessary. The fundamental concepts to be studied are probability spaces and random variables, the most important ideas being conditional probability and independence. The main theorems we will study are the law of large numbers and the central limit theorem.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH222 AND MATH228**

MATH232 Mathematical Statistics
This course covers the basic notions of estimation, hypothesis testing, regression, analysis of variance, experimental design, and other topics in statistics from a rigorous mathematical perspective. This material will be supplemented by various case studies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH231**

MATH233 Stochastic Processes
This course provides a rigorous introduction to the theory of stochastic processes. Topics include a review of basic concepts of probability theory (probability spaces, random variables, expectation), Markov chains, Poisson processes, random walks, and Brownian motion. Students entering the course should have completed MATH231, and be comfortable with multivariable calculus and linear algebra.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH231**

MATH241 Set Theory
A course on axiomatic set theory, emphasizing its dual role as a foundation upon which the rest of mathematics can be built, and as a rich subject in its own right, primarily concerned with the nature of the infinite. The axioms of Zermelo-Fraenkel Set Theory (ZFC); the interpretation of mathematical concepts,

including the standard number systems, inside set theory; finite, countable, and uncountable sets; cardinal and ordinal numbers and their arithmetic; transfinite induction and recursion; the role of the Axiom of Choice; the cumulative hierarchy of sets.
Offering: **Host**

Gen Ed Area: **NSM-MATH**
Prereq: **MATH228**

MATH242 Knot Theory
This course is an introduction to topology, the study of space in a general sense. We will approach topology through knot theory, the study of embeddings of a circle in a three-dimensional space.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH228**

MATH243 Mathematical Logic
This course is an introduction to mathematical logic, including first-order logic and model theory, axiomatic set theory, and, as time permits, Goedel's incompleteness theorem.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH228**

MATH244 Topology: Point Set
This is an introduction to general topology, the study of topological spaces. We will begin with the most natural examples, metric spaces, and then move on to more general spaces. This subject, fundamental to mathematics, enables us to discuss notions of continuity and approximation in their broadest sense. We will illustrate topology's power by seeing important applications to other areas of mathematics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH228**

MATH246 Applied Topology
This course teaches the main concepts in Applied Topology. Students will learn to apply nonlinear methods to analyze the shape of data sets. These approaches are drawn from classical topology and focus on the shape in one of two ways: they either 'measure' it, that is count the occurrences of patterns within the data set; or build combinatorial representations of the data set. As an example of the former, we will look at persistent homology, whereas the latter will be represented by mapper. The topics covered include: basic notions from topology, simplicial complexes (Cech complexes, Vietoris-Rips complexes, etc.), homology, persistent homology and applications, mapper.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH223**

MATH247 Applied Linear Algebra
This is a course on topics in linear algebra that are the foundations of modern data science and machine learning. Topics include dimensionality reductions, matrix decompositions, elementary spectral theory, multivariate optimizations, and their applications to machine learning such as gradient descent and support vector machines.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH221 OR MATH223) AND MATH222**

MATH252 Differential Forms
This class will be an introduction to differential forms, a central tool in modern topology, geometry, and physics. The course begins where MATH222 ends, with Green's theorem, the divergence theorem, and Stokes' theorem. All of these theorems are special cases of one theorem, known as the general Stokes' theorem, about integration of differential forms. The objective of the first part of the course will be to understand and prove this theorem. We will then discuss manifolds and what can be learned about them using differential forms, concentrating on de Rham cohomology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH221 AND MATH222) OR (MATH222 AND MATH223)**

MATH255 Advanced Topics in Real Analysis
Topics to be addressed include convergence of sequences and series of functions, spaces of functions and their topologies, the Lebesgue integral (on the line) and its basic convergence theorems, and Fourier series.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH225**

MATH261 Introduction to Abstract Algebra
This course is an introduction to abstract principles based on the special properties of the integers, rational, real and complex numbers. The course will cover general algebraic structures as well as their quotients and homomorphisms, with emphasis on fundamental results about groups and rings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH221 AND MATH228) OR (MATH223 AND MATH228)**

MATH262 Advanced Topics in Abstract Algebra
This second course in abstract algebra will cover fields and polynomial rings, as well as Galois theory and the insolvability of the quintic polynomial. Additional topics will be covered as time permits.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH261**

MATH264 Algebraic Geometry
This course is an introduction to algebraic geometry, the study of the geometric structure of solutions to systems of polynomial equations. These may take the form of lines, circles, parabolas, ellipses, hyperbolas, elliptic curves, leminiscates or Cassini ovals.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH261**

MATH265 Mathematics of Quantum Computing
This is a one-semester course introducing students to the mathematics of quantum computing. No prior understanding of quantum mechanics will be

assumed. However, the course will rely heavily on material from linear algebra, and will also assume students are familiar with basic concepts from group theory. Classical computers store information in the form of bits -- a binary state of zero or one. In a quantum computer, information is processed in the form of qubits, which can exist not just in these two classical states, but in combinations of these two states -- this is the notion of superposition. In this course, we study how to model the fundamental notions of quantum computing with mathematics, and explore the ways quantum computing may supersede classical computing for certain tasks. The precise topics covered will depend in part on the backgrounds and interests of enrolled students, but primary topics for the course include Bell's inequality, Shor's algorithm, and Grover's search algorithm. Other aspects of quantum computing will be explored as time permits.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **NSM-MATH**
Prereq: **MATH261 AND (MATH221 OR MATH223)**

MATH271 Error-Correcting Codes
Nowadays messages are sent electronically through different kinds of communication channels. Most of these channels are not perfect and errors are created during the transmission. The object of an error-correcting code is to encode the data so that the message can be recovered if not too many errors have occurred. The goal of this course is to introduce the basic mathematical ideas behind the design of error-correcting codes. It makes use of algebraic techniques involving vector spaces, finite fields, and polynomial rings. These techniques will be developed in this course so that prior knowledge is not necessary.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH228**

MATH283 Differential Geometry
This course is an introduction to the classical differential geometry of curves and surfaces in Euclidean 3-space. Topics from global differential geometry and extensions to higher dimensions will be considered as time and the background of the students permit.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH284 Euclidean and Non-Euclidean Geometry
Euclid developed an axiomatic system to describe plane geometry in 300 BC. This system is fundamental to our understanding of mathematics today. In this course, we will compare and contrast plane geometry and its axiomatic system with several beautiful geometries, including spherical, elliptical and hyperbolic geometries, and their applications.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Prereq: **MATH222 AND (MATH221 OR MATH223)**

MATH285 Introduction to Lie Theory
Lie theory is a fundamental area of mathematics, with many applications to physics and other sciences. In this course, we will study the basics of elementary Lie theory. This course will focus on matrix groups, which have concrete descriptions and include all of the Lie groups that commonly arise in applications. Topics covered in this class will include the algebra and topology of matrix groups, Lie algebras, matrix exponentiation, and applications.

Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.
Offering: **Host**
Grading: **OPT**

MATH507 Topics in Combinatorics
A graph is a set of vertices with an accompanying set of pairs of vertices, called edges. Given a set of searchers, a vertex search is a series of steps in which a searcher is either placed on or removed from a vertex in the graph. When both incident vertices of an edge simultaneously contain a searcher, then the edge is said to be cleared. The question of what is the minimum number of searchers needed to clear a graph is related to deep theorems of the structure of graphs, such as theorems about the pathwidth and treewidth of graphs. Graph searching and its variants are related to the game of Cops and Robbers (also called the pursuit-and-evasion game) which has applications in many areas, including robot movements and network security. A partially ordered set (poset) is a set with an order relation that is reflexive and transitive. Finite posets are used as finite models for topological spaces, which can describe large data sets. We will study both their topological and algebraic properties, including the Moebius and zeta functions, R-labelings, shellable labelings, lexicographically shellable labelings, and their homology. Special cases of posets such as Cohen-Macaulay posets, lattices, and modular and distributive lattices will be important examples. These topics are being used in current work in topological data science.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MATH509 Model Theory
An introduction to model theory: The syntax and semantics of first-order logic, definability, compactness and Löwenheim-Skolem theorems, realizing and omitting types, quantifier elimination and model completeness, countable models of complete theories.

Grading: **OPT**

MATH513 Analysis I
MATH513 and MATH 514 constitute the first-year graduate course in complex analysis, real analysis, and functional analysis. The Fall semester is devoted to complex analysis and measure theory. Fall topics include holomorphic functions, Cauchy's theorem, Cauchy's integral formulas, analytic continuation, the calculus of residues, the maximum modulus principle, and conformal mappings; sigma algebras, Borel measures, Lebesgue-Stieltjes measures, measurable functions, the dominated convergence theorem, Egorov's theorem, and Littlewood's principles. Spring topics continue with the development of measure theory before moving on to functional analysis. Spring topics may include product measures, Fubini's theorem, and the Radon-Nikodym theorem; Banach spaces, Hilbert spaces, linear functionals, linear operators, the Banach-Alaoglu theorem, and the Hahn-Banach theorem.
Offering: **Host**

MEDIEVAL STUDIES (MDST)

MDST125 Love, Sex, and Marriage in Renaissance Europe
This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to: How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **RL&L123, FGSS123**
Prereq: **None**

MDST125F Love, Sex, and Marriage in Renaissance Europe (FYS)
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.
Offering: **Crosslisting**

MDST125Z Love, Sex, and Marriage in Renaissance Europe
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, the Italian Peninsula, the Low Countries, Portugal, Spain, and Sweden. (N.B. Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about "homosexual" love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how have contemporary (21st-century) writers reimagined Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

MDST128 Rome After Rome: Culture and Empire of Constantinople
Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capitol to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.

In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (https://arcg.is/0e4Lb4). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

MDST131 Introduction to Western Art I: Ancient to Medieval
This course introduces the art and architecture of the Western world during the ancient and medieval periods. The artistic traditions of the Near East, Europe, and the wider Mediterranean will be surveyed from the prehistoric era to ca. 1400 CE. Questions of style, content, function, and cultural and historical context will be examined alongside such perennial concerns as religion, rulership, social class, luxury, and the definition of art within its ancient and medieval milieus.

MDST135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

MDST151 European Architecture and Urbanism to 1750
This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society's identity? What is the relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

MDST203 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

MDST204 Medieval Europe
This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity, its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the modern world, including the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

MDST207 Chaucer and His World
In this course, we will read Chaucer's fascinating dream-visions, The BOOK OF THE DUCHESS and THE HOUSE OF FAME and his best-known work, THE CANTERBURY TALES. We will also read selections from Chaucer's sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer's poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer's reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

MDST209 Mosque and Cathedral: Islam and the West, c. 600-1500
This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaic, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.

MDST210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

MDST211 Magic, Witchcraft, and Miracle, from Saints to Salem
Until the "disenchantment of the world" in the 18th and 19th centuries, Europeans lived in a universe shot through with hidden and awesome power. God's action in the world was possible, but puzzlingly he often operated through other agents, through the saints and by miracle. On the other hand, humans were often tempted to appeal to other powers to get what they wanted, and the use of magic--some pagan in origin, some not--was a pervasive influence. The world was full of demons and even devils, who used illusion and magic to entrap people by possessing them or turning them toward witchcraft in exchange for wealth and health. Surprisingly, the occult was not all bad, and Catholics and later Protestants too wrestled with the question of what to accept and what to suppress. Magical forces did not fade with the Renaissance but actually grew alongside the first developments toward modern natural science in the 16th and 17th centuries. The necromancer joined the saint, the priest, and the witch as the faces of occult power. This course will take a broad look at the people

and powers that filled the place where science and a lot of religion sit today. The course will survey medieval developments and will end in New England in the 17th century. The instructor will provide background and narrative history in order to place the readings into their appropriate context. In surveying the long history of magic and miracle in Europe, we shall ask such questions as: What exactly do these terms mean and how have the meanings changed? How far away from such a worldview are we today and did magic really end in the 17th century? And, if so, why? Who controlled the use of magic and how was its misuse identified and punished? Were the processes of law, inquisition, and prosecution fair or effective? Were there really witches or just witch hunts? Why did people believe in miracles and magic? Who were the practitioners? Why did it all decline?

MDST212 Wesleyan University Collegium Musicum
The Collegium Musicum (literally "company of musicians") is a vocal performance ensemble dedicated to exploring and performing the diverse European repertories of medieval, renaissance, and baroque music. Emphasis is given to the study of musical styles, performance practices, vocal independence, healthy singing, and musicianship. Students investigate various cultural aspects of the production of music, including primary sources, acoustics, and cultural heritage. In spring 2026, we begin our celebration of the Collegium's 25 Years of early music at Wesleyan with a program entitled "Song of Songs, Old and New." Like much Biblical literature, the Song of Songs can be traced back to Sumerian origins. Our program will intersperse ancient Mesopotamian poetry relating to the spiritual marriage of Inanna (Sumerian goddess of love, fertility, and war) and Dumuzi (the shepherd god) with music that reflects the Jewish and Christian understandings of the related mystical union. Biblical language that evokes the fragrance of wine, blossom, fruits, and spices was particularly appealing to European Renaissance composers. We will present a simple Icelandic form of discant, a polytextual French motet, complex polyphony in multiple parts by Palestrina, Lassus, Bouzignac, and Aleotti, and some contemporary responses to these popular texts.

MDST213 Cross, Book, Bone: Early Medieval Art, ca. 300-1100
This class surveys the art and architecture of early medieval Europe, from the decline of the Roman Empire and the multiculturalism of Late Antiquity through the glory of Byzantium, the rise of Islam, and the establishment of Germanic kingdoms in Northern Europe. Style, content, function, and historical context shall be examined across monuments of architecture, sculpture, mosaic, manuscripts, painting, and the luxury arts. Questions of religious practice, political messaging, and cross-cultural translation shall be threaded throughout, for example: How might one picture God? How might one build a house of worship or decorate a sacred text? How might one best picture a ruler? How were art and artistry defined in early medieval Europe? How might we see dialogue, overlap, and/or competition between the art and architecture of Islam and Christianity, among other religious traditions? The art historical periods considered will include Late Antique, Byzantine, Umayyad, Abbasid, Migration, Insular, Carolingian, Mozarabic, Ottonian, and Viking art.

MDST214 Introduction to the New Testament
The purpose of this course is to provide an introduction to those writings of the earliest Christians that came to be included in the Bible. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of ancient Christianity. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will therefore focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, having as one of the chief aims of the course the acquisition of critical skills in reading and understanding the Bible. In the process we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

MDST215 Religion and Politics in Early Christianity
The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

MDST219 Northern Renaissance Art
The Northern Renaissance, roughly ca. 1400-1600, was a period of thrilling transition in Europe and profound change for the Western tradition of art and architecture. For art history, the period's many paradigm shifts include the rise of oil painting, the spread of the printing press and print media, the growth of middle-class patronage, the Protestant Reformation, radical developments in the practice of portraiture, an increasingly global worldview and mentality, the foundations of what might be referred to as an art market, and a fundamental revision of the purpose and definition of both art and the artist. This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England. We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourgs, Campin, van Eyck, van der Weyden, Fouquet, Riemenschneider, Lucas van Leyden, Bosch, Dürer, Grünewald, Altdorfer, Cranach, Holbein, and Bruegel. Such a narrative will be equally enriched with less familiar and less canonical works. Threaded throughout are questions of mimesis, realism, skill, medium, and the growing cult of genius, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe.

MDST220 Love and Loss in Medieval and Early Modern French Literature and Culture
The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-RLAN**
Identical With: **FREN222**
Prereq: **None**

MDST221 Mystical Visions, Medieval Women, and the Performance of Early Music
This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Various "medievalisms"--modern interpretations of the medieval--are explored, to show how musicians continue to interact with early practices in new and exciting ways. This allows us to talk not only about performers of historical early music, but also about composers like Kaija Saariaho, folk groups like Vulcan's Hammer and Folkal Point, and pop artists like Janelle Monaé and Florence Welch. The creation of medievalist music for films and video games is also relevant, as an arena where musicians reimagine the medieval for new audiences.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MDST222 Early Renaissance Art and Architecture in Italy
This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.
Offering: **Crosslisting**

MDST223 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance
In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolo Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

MDST224 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

Prereq: **None**

MDST226 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

MDST227 What Can the Middle Ages Teach Us About Nature?
Today nature is at the center of our preoccupations. This course will go back to a time before human beings thought they were the masters of nature, when nature was at the same time teaching and allegory, metaphor and science. We will explore the different functions of nature in bestiaries, poems, romances, and herbaria from the Middle Ages to the beginning of the Early-Modern period (in modern French translation). We will be able to see a real herbarium in the Special Collections & Archives. Students will also visit the Davison Center for the Arts and the Joe Webb Peoples Museum to explore visual representations of nature as well as scientific displays. During the semester, students will put together a herbarium that will be displayed in an exhibition at the end of the semester.

MDST228 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History
This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic EL CID (12th-13th century); the bawdy and highly theatrical prose dialogue known as LA CELESTINA (1499); the anonymous LAZARILLO (1554), the first picaresque novel; and María de Zayas's proto-feminist novella THE WAGES OF VICE (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

MDST229 Fight like the French: Debates, Quarrels and Polemics in French Culture
In the age of "fake news" and polarization, knowing how to debate is essential. The French are notoriously practiced in debate; the importance of public opinion and the figure of the public intellectual have made French society as a whole particularly prone to the agonistic discussion of ideas. This course will survey foundational aesthetic and political debates in French culture from the 15th century to this day, focusing on those that were led by writers, philosophers, and intellectuals and that have entered French literary and cultural history. The course will show how controversies mark and make paradigmatic changes in the cultural landscape, advancing the arts and sciences and voicing political dissent. Throughout the course we will read literary works, treatises, letters, and newspapers.

MDST230 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes
Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

MDST231 Cuneiform to Kindle: Fragments of a Material History of Literature
This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

MDST232 Obscure Enigma of Desire
This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

MDST236 Don Quixote: How to Read the Ultimate Novel
No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

MDST237 Dante in His World: Politics, Poetry, Religion
Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante's own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

MDST238 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100--1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

MDST241 Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity
Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, begging collectives, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

MDST245 The Invention of Fiction: Giovanni Boccaccio's Decameron
In this course we read and discuss Giovanni Boccaccio's Decameron (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio inhabited. We examine the Decameron's tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

MDST247 Devotion and Deception: Erotic Discourse from Dante to Petrarca
In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarca. Through a close reading of such texts as Dante's Vita nova (ca. 1295), Giovanni Boccaccio's Decameron (ca. 1353), and Petrarca's Rerum vulgarium fragmenta (often referred to as the poetry book par excellence: il canzoniere, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate 'love stories' in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

MDST249 The Fall of Rome and Other Stories
The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with selections from a range of authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea, and many others--to connect the fall of

Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

MDST254 Cervantes
Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

MDST255 The Vikings and the Viking Age, 700-1243
The Vikings erupted from their isolated northern homelands throughout Europe from the eighth century, and arguably reoriented European history both in the West, where they were instrumental in the history of the British Isles and France, as well as the East, where they were founders of the Russian kingdom. By 1100, they and their descendants had also established themselves in the Mediterranean, Italy, Sicily, and the Holy Land. This course will examine the reasons the Vikings emerged, and will explain their role not only as warriors, but as important merchants, administrators, and contributors to a robust European literary culture. They provide the perfect avenue by which to understand the creation of European culture and politics. The course will also act as an introduction to the dark age history of England, France, and Northern Europe.

MDST257 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture
The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

MDST258 Medieval Gigs: Saints, Scholars, Sailors, Sinners
A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages. For those staying closer to home, like clerics and other literate "Italians," we review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

MDST260 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

MDST268 The Origins of Global Capitalism: Economic History, 1400--1800
This course explores how the modern market economy came into being in Europe and why this system expanded outward to bring the rest of the world into its orbit by 1800. Among other things, it seeks to provide answers for why China's economy--perhaps the most sophisticated in the world before 1500--fell into relative stagnation and why Europe was the first region to develop mechanized industry and break out of a poverty trap that had restricted prosperity for millennia. The course begins by exploring late medieval European agriculture, market systems, institutions, and technology to reveal how the paths of economic development taken in Europe began to diverge fundamentally from those taken by societies in Africa, Asia, and the Americas. It will explore the role of the spice trade in the expansion of European influence abroad, the significance of new food and cash crops in the development of plantation systems and long-haul trade, the impact of organized coercion in the development of monopolies and monopoly companies, and the role of proto-industrial methods of production and colonial economies in the birth of the Industrial Revolution. The course aims to be accessible, broad, and comparative, drawing insights from many fields to consider the environmental, geographical, cultural, institutional, and political factors shaping the economic changes that have created modern capitalism.

MDST272 Law, Court, and Crime in England, 600--1660
This course will discuss the nature and development of law, dispute resolution, custom, and rule in England from the arrival of the English on the island in the age of Arthur when feud and compensatory justice dominated. It will then examine the rise of royal power, local custom, and the common law in the 12th and 13th centuries, including the Magna Carta crisis. We will focus on the growing politicization of law and the development of courts and lawyers alongside new sorts of lawmaking in parliament and through the power of the king. The growth and challenge of royal and parliamentary power will frame the last parts of the course that anticipate the revolutionary crisis of the 17th century. Along the way, the course will ask, Who gets to make law, what is the role of writing in the development of custom and law, how did the English decide who was right and who wrong: calculation, testimony, jury, or ordeal? What were the forms of punishment and compensation employed, and what did this tell us of conceptions of the person: mutilation, execution, or incarceration? How did social status and gender shape expectations and outcomes in the legal process: Who could be a legal actor, a responsible malefactor, a property owner, or a slave; who could be judge and legislator? The course will be based on the examination both of recent scholarship and a wide array of primary sources such as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

MDST273 The History of Science in Islam
This course will examine the intellectual legacy of the sciences in the Islamic world. Premodern Muslims cultivated various dimensions of what are today understood as the "hard sciences," including physics, mathematics, biology, and chemistry. In addition to exploring Islamic contributions to these fields during the classical period, known according to some sources as the "Golden Age of Islamic Science," we will explore Islamic medicine and medical theories, astronomy and astrological works (including tools used for astronomical observation), and the sciences of optics and alchemy. We will chart the development of these sciences while looking at the broader cultivation of scientific knowledge in Islamic societies, including the establishment of scientific institutions such as universities, observatories, hospitals, and pharmacies.

MDST310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why "convivencia" ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

MDST311 The Body in Medieval Art
Medieval thinkers theorized the body in ways vastly different from how human bodies are conceptualized and defined today in the twenty-first-century West. Indeed, the "medieval body" was not at all a stable or monolithic entity, but rather a shifting constellation of ideas and practices that waxed, waned, and coexisted throughout the European Middle Ages, ca. 400-1400. The diversity of medieval attitudes toward the body helped inform its representation in art,

which, simultaneously, was also dependent upon conventions of craft, medium, artistry, preciousness, and style. "Body" signals not only earthly bodies -- sexed, fleshly, corruptible, and soon to decay -- but also the soul (whose well-being was equally fragile), as well as heavenly, angelic, and divine bodies, including that of Christ. This course analyzes medieval strategies of representing these bodies while situating them in their respective intellectual and cultural environments. Primary-source materials will be contextualized by secondary literature, and our inquiries will remain cognizant of gender-, sexuality-, race-, and performance-critical methods. The bodies examined will include, and are not limited to, saintly, gendered, racialized, clerical, monstrous, virginal, heretical, sickly, healthy, courtly, resurrected, and uncircumscribable bodies.

MDST312 The Medieval Beast
How did medieval writers think about the distinction between human and animal? This course will begin with the categories of soul and body, ruler and ruled, speech and noise--among others. We will also read about human-animal hybrids like werewolves and bird-men in order to think through some of these binaries. Texts will include bestiaries (encyclopedias of animals), treatises on hunting, beast-fables from Christian, Muslim, and Jewish traditions, Marie de France's "Lais" and "Fables," Chrétien de Troyes's "Knight of the Lion," "Sir Gawain and the Green Knight," and Chaucer's "Parliament of Fowls."

MDST313 Medieval Manuscripts
Medieval manuscripts were dense, considered gatherings of text and image, and they are among the richest of artifacts bequeathed to us by the Middle Ages. Manuscripts both crystallized and intervened in many of the key intellectual, religious, and aesthetic foundations of medieval Europe. To step into a luxurious medieval manuscript--into its script, its miniatures, its marginal decoration, its scribbles, its little monsters and unexpected grotesques, its tears and signs of use--is to probe a particular artform, distinct to pre-modernity, in which the definition of painted image and written word differed markedly from later centuries of the Western tradition. Throughout, basic questions of the relationship between text and image, and the linguistic and the pictorial, repeatedly beg attention. How were these books made, who used them (if they were used at all), how did the reading process unfold in the medieval period, and how did pictorial decoration assist in revealing--or, perhaps, obscuring--truth? These questions, and more, will inform this seminar's systematic inquiry of the making, function, and layout of the medieval book, from its Late Antique origins to the 15th century advent of printing.

MDST315 The Politics of the French Language and the Birth of the French State
Today, the advantages of national borders and monolinguistic language policies are being trumpeted all across the world. And yet, the study of premodern languages and literatures reveals that the history of national languages has always been a multicultural affair. In this course, we will look at the case of the French language, particularly the establishment of French as a literary language through strategies of legitimization. Starting with an examination of the first text written in the language that would later become French, from the 9th century, we will then go on to study (in modern French) a series of medieval and early-modern poems, plays, treatises and essays that borrow from other languages and literatures, even as they establish French as a literary and a national language. The final portion of this class will include a meditation on the status of French language in contemporary Francophone countries based on Derrida's essay "Le monolinguisme de l'autre."

MDST321 Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

MDST330 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes
Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

MDST350 The First Female Historian: The Crusade-Era Epic History of Anna Komnena
Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena -- a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire -- to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with The Alexiad through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

MDST353 Race, Ethnicity, and Religion in Medieval Literature
Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question and related issues by considering the emergence of medieval ideas of race, ethnicity and religious difference. We will also think through the meaning of these categories and recent controversies about locating "race" in medieval studies. Our focus will be on a selection of texts dealing with encounters -- real and imaginary -- of Western European Christians with cultures ranging from the Mongol Empire to the Jewish communities in their own territories. The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts, and romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasies.

MDST354Z Self and Text in Roman North Africa: Augustine's Confessions
The native North African Augustine of Hippo wrote the most influential autobiographical text in (so-called) Western literature. It remains the most brilliant text I have ever read: a mind-bendingly complex and yet fully coherent literary self. Let's read it together. Set between Carthage and Rome in 400, Augustine wrote just 10 years before the Eternal City would be sacked by the disaffected former legions of the empire (the Goths). Split between conqueror and conquered, civilization and apocalypse, Augustine wove humanity's existential and epistemological questions into a literary tapestry for the ages: Who am I? How do you speak? Who are you? How do I listen? Who are we? How do we know? At once memoir, critique of empire, philosophy, psychology, theology, personal history, criticism, and a letter, these Confessions require close, careful, focused, attentive readings from a diverse group of interpreters. Join our learning community and spend two snowbound weeks at Wesleyan with a book you will never forget.

MDST360 The Mediterranean Archipelago: Literary and Cultural Representations
"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands -- both fictional and real -- as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevitc's statement that "the Mediterranean is not only geography," we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto's Island of Alcina to Goethe's Capri), narrative stratagem (from Homer's Phaeacia to Boccaccio's Rhodes), literary protagonist (from Deledda's Sardinia to Murgia's Sardinia), political concept (from Plato's Atlantis to Campanella's Taprobane), and existential condition (from Cervantes's Cyprus to Cavafy's Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands' inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

MDST363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

MDST373 From Courtly Love to Cannibalism: Medieval Romances
Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist switches genders, skin color changes with religion, and a dog might be the hero of a narrative. In this course, we will begin with texts that date from the Romance's origins in 12th-century France and continue with the form's development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur's court. Some of the topics we will consider are Romance's engagement with "chivalry," the religious and racial conflicts of the Crusades, and of course, Christian mysticism and the Holy Grail.

MDST376 Travel and Communication in Europe
This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation

of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

MDST378 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage
This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel. Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

MDST390 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

MDST427 Central Asian Music Ensemble
The Central Asian Music Ensemble is dedicated to the study and performance of music from a region at the crossroads of Eurasia, encompassing the post-Soviet states of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan. Established in Fall 2023, the ensemble currently comprises Kazakh and Kyrgyz plucked and bowed lutes, plucked zithers, end-blown flutes, clay ocarinas, jaw harps, frame drums, and other percussion instruments. Students learn the basic techniques of playing the instruments and singing in a variety of

regional styles while exploring the history and cultural significance of music in nomadic and sedentary Central Asian societies through individual tutorials, group rehearsals, and engagement with visiting artists from Central Asia. In addition to playing traditional and contemporary repertoires from the region, students are encouraged to compose and improvise with ensemble instruments. Previous experience with string or wind instruments such as the guitar, violin, cello, or flute is desirable but not required. Students from diverse backgrounds are welcome to participate.

MOLECULAR BIOLOGY AND BIOCHEMISTRY (MB&B)

MB&B101F The Personal Genomics Revolution (FYS)
The first draft of the human genome sequence was published approximately 15 years ago, having taken more than a decade to complete at a cost of approximately three billion dollars. With incredible advances in sequencing technology, accompanying analysis tools, and maturation of sequence databases, we have arrived at the beginning of an era of "personal genomics." Today, individuals can have their genomes sequenced in a few hours for a few hundred dollars! This course explores the kinds of information contained within one's genome and the various ways in which genome sequences can be used for improving quality of life. Students will conduct original research to explore societal attitudes about the use of personal genomics for the purpose of making lifestyle choices (dating, diet, vocations, etc.); establishing notions of personal identity (race, gender, nationality, etc.); creating new social networks (based on genetic kinship); or prolonging life span (and revolutionizing medicine). As part of this research, students will also consider ethical issues (e.g., privacy, discrimination) surrounding the use of personal genomics, as well as how education might impact societal attitudes on particular applications of this technology. As this is an FYS course, student work will focus on developing skills in scholarly writing, which will include peer evaluations of other student writing and production of a final scholarly paper based on the results of their research project.
Offering: **Host**
Grading: **OPT**

Prereq: **None**

MB&B102F Writing about Science (FYS)
This first-year seminar course will cover topical areas of science including the chemistry of foods and food additives, drugs, diseases and their treatments, the environment, and reproductive technologies. This class would be an excellent choice for prospective non-science majors who have an interest in understanding how modern science works. The course will emphasize writing and how to convey complex scientific concepts to a lay audience. Students will take on special projects and work to understand and present their findings in presentations and written form.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B103 Copernicus, Darwin, and the Human Genome Project
Much of art and philosophy is inspired by the question: What does it mean to be human? The project of science has provided rational explanations of human identity that threaten our self-perception as special beings--beginning with the Copernican revolution and discoveries about our unspecial place in the universe. In this course, we will discuss three paradigms arising from modern molecular biology that provide perspective on the lines between living and non-living, human and non-human life, and human and machine by exploring the science of DNA, evolution, and the Human Genome Project, respectively. As part of both discussions, we will consider how society negotiates with science, as depicted in politics and popular art, ethical issues pertaining to the advancement of scientific (e.g., reproductive, genetic) technologies, and plausible resolutions to the tension between science and society that arise from a detailed understanding of the scientific method. Little or no background knowledge in science/biology will be assumed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B107 The Science of Human Health: Microbiology and Immunology
Studying the molecular and cellular biology of disease-causing viruses and bacteria, we will survey the basic mechanisms that they deploy to colonize and harm our bodies. We will also learn about the cells and macromolecules that comprise our immune system, how they act in concert to detect and combat disease or, in certain instances, cause autoimmune disease. A case-study approach will be pursued to join these two subjects and to illustrate the complex interplay between pathogens and the immune system that allows us to successfully combat certain diseases, become persistently infected by others, or succumb to debilitating or fatal illnesses.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B111 Introduction to Environmental Toxicology
This course will look at the human health consequences of anthropogenic and natural toxins in the environment. We will examine how chemicals are absorbed, distributed, and detoxified within our bodies, and the mechanism of acute and chronic damage to our health. We will explore how toxins travel through the environment and how permissible levels of exposure are decided upon. This naturally leads to a discussion about the perception and management of risk. We will look at case studies relating to industrial pollution, accidents, and contamination of our air, water, and food through the lens of human disease and social cost. Students are asked to think critically about available scientific evidence and form opinions about how much risk is acceptable in our daily lives.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B112 Fundamentals of Public Health and Communicable Diseases Epidemiology
As Influenza, HIV-AIDS, and COVID-19 pandemics have made abundantly clear, Public Health is a vital field of science and medicine that impacts the health and well-being of our communities on a global scale. In this course, we will learn the core principles of public health approaches, their functions, and how they translate into a comprehensive public health system. Focus will be on important emerging and re-emerging infectious diseases of global impact. Lectures, discussions, and case studies will be utilized to weave infectious diseases and public health responses together to illustrate effective and innovative ways of improving the health of our world community. Economic, social, and medical barriers that impare progress will be addressed.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B113F The mRNA Revolution in Medicine: A Misunderstood & Mistrusted Science (FYS)
The first use of messenger RNA (mRNA) vaccines saved millions of lives in the COVID-19 pandemic. Yet mRNA technology has been widely mistrusted from its first public introduction into the present day. This course will detail how mRNA medicine works, and why it has enormous therapeutic potential in areas ranging from cancer to rare genetic diseases. Grounded in this scientific understanding, students will then develop their own project that explores why this revolutionary medical technology is met with such resistance today. Examples of possible areas of focus include the psychology of belief, pseudoscience, and comparative historical perspectives on other medical advancements.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B117 Life in the Cell from a Molecule's Perspective
What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

MB&B155 Tiny Organisms with a Big Effect: The Microbiome
With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multicellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual's health. This course will look at the true nature of the microbiome, to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.
Offering: **Crosslisting**
Grading: **A-F**

MB&B181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication, chromosome dynamics, transcription, translation, and gene regulation. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including transport across cell membranes, cellular energetics, protein sorting, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology. This course will require about 10 hours per week of engagement. Students should enroll separately in MB&B/BIOL191 Principles of Biology 1 - Laboratory.
Offering: **Host**

MB&B182 Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

Prereq: **[MB&B191 or BIOL191]**

MB&B193 Principles of Biology I Laboratory (Online)
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL193, NS&B193**
Prereq: **None**

MB&B194 Principles of Biology II: Advanced Topics
This course provides an optional supplement to the introductory course in physiology, development, evolution, and ecology (BIOL182, which should be taken concurrently). It is designed for highly motivated biology students who seek to enrich their understanding by engaging with current research in an intensive seminar setting. Students in BIOL194 will read and discuss recent journal articles that probe in greater depth some of the subjects covered in BIOL182. Weekly meetings will consist of a short lecture by the professor followed by group discussion of the readings.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL194**
Prereq: **BIOL181 or MB&B181**

MB&B198 Principles of Biology II Laboratory _ Online
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophysiology, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **BIOL198, NS&B198**
Prereq: **BIOL192**

MB&B207 Introduction to Biophysics
This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS207**
Prereq: **PHYS116**

MB&B208 Molecular Biology
This course is a comprehensive survey of the molecules and molecular mechanisms underlying biological processes. It will focus on the cornerstone biological processes of genome replication, gene expression, and protein function. The major biomacromolecules -- DNA, RNA, and proteins -- will be analyzed to emphasize the principles that define their structure and function. We will also consider how these components interact in larger networks within cells to permit processing of external and internal information during development and how these processes become perturbed in disease states.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL208**
Prereq: **MB&B181 OR MB&B181Z**

MB&B209 Research Frontiers in Molecular Biology and Biochemistry
This course of weekly discussions of current research is for students who have completed the MB&B or BIOL introductory series. Discussions will be informal in nature and cover topics of current interest in molecular biology and biochemistry, emphasizing possibilities for future research areas for the students.

Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Prereq: **MB&B181 or BIOL181**

MB&B210 Genetics and Genomics
Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL210**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B212 Principles and Mechanisms of Cell Biology
The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and behavior of cells, because with this perspective one can begin to ask complex questions including: why does mutating a protein cause a cell to malfunction and how does this cause tissue malfunction or disease? We will examine the cell mainly in the context of the multicellular organism--where cells respond to as well as regulate their local environment. Hence, this course provides

students with a firm foundation in cell biology as we examine eukaryotic cell structure, organelle function, cell adhesion and motility, signal transduction and cell differentiation, cell survival and apoptosis, and consider how these mechanisms integrate to generate coherent cell behaviors. Published research will be discussed throughout the course in order to build students' understanding of research in cell biology. Lectures, assignments and assessments include opportunities for students to develop a broad and deep knowledge of cell biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL212**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B213 Informal Science Education for Elementary School Students I
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary-age children in an afterschool program taking place at five local elementary schools. The classroom components include writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CIS213**
Prereq: **None**

MB&B214 Informal Science Education for Elementary School Students II
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary-age children in an afterschool program setting at five local elementary schools. The classroom component includes writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class. This course is a continuation of CHEM241.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CIS214**
Prereq: **None**

MB&B223 The Molecular Basis of Cancer
Cancer is a group of diseases characterized by unregulated cell growth and tissue invasion. This course will focus on the molecular events that lead to cancer. We will cover topics in both molecular and cellular biology and genetics that are relevant to understanding the differences between normal and cancer cells. Particular focus will be placed on oncogenes and tumor suppressor genes, DNA damage responses, the p53 signaling pathway, cell cycle regulation, and the molecular basis of cancer therapies. This course will utilize both the textbook and primary scientific literature in the study of cancer.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **BIOL223**
Prereq: **MB&B181**

MB&B228 Medical Biochemistry
This introductory course will focus on the essential concepts of biochemistry important to students interested in the health professions, including the chemical and biological foundations of cellular metabolism and related disease states. Major topics will include the structure and function of biological molecules in the human body (proteins, carbohydrates, fats, nucleic acids, vitamins), enzyme catalysis, cellular signaling, and digestion, absorption, and processing of nutrients for energy and growth.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL228**
Prereq: **[MB&B181 or BIOL181] AND CHEM251**

MB&B231 Microbiology
This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL231**
Prereq: **BIOL182 OR MB&B208**

MB&B232 Immunology
In this introduction to immunology, particular emphasis will be given to understanding both the innate immune response and its agents as well as the acquired immune response mediated by B and T cells. Cellular and antibody responses in health and disease will be addressed, along with mechanisms of immune evasion by pathogens, autoimmune disease, and cancer.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL232**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182]) OR [MB&B208 or BIOL208]**

MB&B233 Cellular Mechanisms of Gene Regulation and Gene Editing Tools
This course will explain the mechanisms of gene expression in eukaryotes. Then we will define the main and current techniques used for gene editing (CRISPR/Cas9, TALEN, site director mutagenesis, CRE/Lox recombination). Discussions will include how these technologies can be used to optimize organisms for health, food, and energy applications. Ethical use and current regulations of gene editing tools will also be considered.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **MB&B181**

MB&B235 Microbiology Laboratory
This laboratory, to be taken concurrently with MB&B231, is an essential part of learning microbiology. Techniques in general and specific areas of microbiology including recombinant DNA procedures involving microorganisms will be taught.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Prereq: **None**

MB&B237 Signal Transduction
Cells contain elaborate systems for sensing their environment and for communicating with neighbors across the membrane barrier. This class will explore molecular aspects of signal transduction in prokaryotic and eukaryotic cells. Topics will include membrane receptors, GPCRs, kinases, phosphorylation, ubiquitination, calcium signaling, nuclear receptors, quorum sensing, and human sensory systems. We will integrate biochemical functional approaches with structural and biophysical techniques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **BIOL237**
Prereq: **[MB&B208 or BIOL208]**

MB&B240 How Do We Build Muscle? The Molecular Basis of Skeletal Muscle Development and Disease
This lecture- and discussion-based course examines the molecular mechanisms that govern skeletal muscle development, homeostasis, regeneration, and disease. Through critical analysis of primary research articles, students will explore the regulation of myogenesis, including transcriptional control, chromatin remodeling, signaling pathways, mitochondrial metabolism, and ion homeostasis. Emphasis is placed on understanding how disruptions in these processes lead to muscle disorders such as muscular dystrophies, mitochondrial myopathies, cachexia, and metabolic muscle disease. Students will learn to interpret experimental approaches commonly used in muscle biology, including genetic models, cell culture systems, multi-omics analyses, and physiological assays. The course integrates developmental biology with disease mechanisms, fostering mechanistic thinking and critical evaluation of scientific evidence. Designed for advanced undergraduates interested in molecular biology, physiology, regenerative biology, and biomedical research.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **(MB&B181 OR BIOL181) AND (MB&B182 OR BIOL182) AND MB&B208 AND CHEM251**

MB&B265 Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL265, COMP113, CIS265**
Prereq: **[MB&B181 or BIOL181]**

MB&B265Z Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics. MB&B/BIOL181 or POI: Those not meeting the prerequisite should contact the professor directly.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL265Z, CIS265Z, COMP113Z**
Prereq: **MB&B181 OR BIOL181**

MB&B266 Bioinformatics
This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL266, COMP266, CIS266**
Prereq: **[MB&B181 OR BIOL181]**

MB&B285 Molecular Biology Journal Club I
This course involves presentation and discussion of recent literature in the field of molecular and cellular biology.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B585**
Prereq: **None**

MB&B286 Molecular Biology Journal Club II
This course includes the presentation and discussion of recent findings in the field of molecular and cellular biology.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B586**
Prereq: **None**

MB&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **NS&B303, MB&B523**

Prereq: **(CHEM251 AND CHEM252 AND [MB&B208 or BIOL208])**

MB&B306 Epigenetics
Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B506**
Prereq: **MB&B181**

MB&B307 Molecular Biophysics Journal Club I
This course includes presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from journals including but not limited to the Biophysical Journal, Biopolymers, Current Opinion iIn Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B507, CHEM507, CHEM307, PHYS317, PHYS517**
Prereq: **None**

MB&B308 Molecular Biophysics Journal Club II
Presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from the Biophysical Journal, Biopolymers, Current Opinion in Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B508, CHEM508, PHYS318, PHYS518, CHEM308**
Prereq: **None**

MB&B309 Molecular and Cellular Biophysics
This course is an integration of the physical and chemical principles underlying biological systems from molecules to cells. The objectives are to develop an understanding of the underlying biological and physical principles that inform biophysical methods (e.g., protein-protein interaction studies, enzyme kinetics, spectroscopy, structural biology), how these concepts and techniques can be used to address open scientific questions, and how to critically evaluate their use in scientific literature. Particular emphasis will be placed on the biophysical concepts underlying studies of proteins, enzymes, and metalloproteins.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM309, CHEM509, MB&B509, PHYS339, PHYS539**
Prereq: **None**

MB&B310 Mechanisms of Protein Trafficking Within Eukaryotes
This course surveys the mechanisms of protein trafficking and sorting within eukaryotic cells with an emphasis on the major protein exocytosis pathway.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B510**
Prereq: **[MB&B208 or BIOL208] OR [BIOL212 or MB&B212]**

MB&B311 Genomics Analysis
This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL310, CIS310**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B313 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function
This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B513**
Prereq: **None**

MB&B315 The Regulation of Ribosome Biosynthesis
This course will focus on understanding one of life's original, and still greatest, feats: namely, how cells make proteins. Since early life forms evolved ribosomes several billion years ago, their synthesis, regulation, function, and evolution have been at the core of all aspects of biology.

This act of protein translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course, we will investigate the biosynthetic pathways that are involved in effecting protein synthesis from various approaches. Both prokaryotic and eukaryotic systems will be considered, including the questions of how ribosome biosynthesis and activity is relevant to genetic diseases, cancer, cell growth, and antibiotic activity.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B515**
Prereq: **[MB&B208 or BIOL208]**

MB&B316 Advanced Topics in Structural Biology
This course will examine how researchers use the tools of structure determination to explore current fundamental questions in the biological sciences. Beginning with a short history of the field of structure biology, we will examine the benefits and limitations of various techniques used to study protein and DNA structure. We will read primary literary sources on a number of contemporary topics for which structural biology has made important contributions. This may include (but is not limited to) microbial pathogenesis, immunology, gene regulation, membrane protein biology, neurological signaling, signal transduction, and metabolism. This course will explore how the study of structural biology contributes to our understanding and treatment of human diseases, including the development of drugs and other therapeutic interventions.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B516**
Prereq: **None**

MB&B317 Advanced Topics in Recombinant DNA
The breaking and rejoining of DNA molecules is at the heart of so many cell biological processes, including adaptive immunity, the common emergence of new viral variants (such as the flu), the fundamental life cycle of other viruses (such as retroviruses), the prevention of aneuploidy in reproductive cells, the production of chromosomal rearrangements in cancer cells, and the repair of damaged DNA. Used as a tool by molecular biologists, recombinant DNA has led to tremendous insight into cell function, development, and disease. Recombinant DNA methodology is growing in its capacity to precisely change the genes carried by organisms, which has important implications for both the food industry and medicine. In this half-semester course, we will examine primary literature that touches on how recombination between DNA sequences is utilized within cells and as a research tool by humans to promote new genetic outcomes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B517**
Prereq: **None**

MB&B321 Biomedicinal Chemistry
This course is designed to explore the molecular basis of disease and treatment options. Topics will reflect the importance of chemistry and biochemistry in the advancement of medicine today and will include treatment of metabolic disorders, rational drug design, and mode of drug action. A large portion of the course will be dedicated to learning computer programs used in computational drug design as part of a final drug design project.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM321**
Prereq: **(CHEM251 AND [CHEM383 or MB&B383])**

MB&B322 Mechanisms of Protein Trafficking Within Prokaryotes
This course surveys the mechanisms of membrane protein topogenesis and protein secretion within E coli, the quintessential prokaryote, where sophisticated genetic and biochemical analysis has been possible. The course surveys the primary literature with student presentations and a written final examination.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B522**
Prereq: **[MB&B208 or BIOL208] OR [BIOL212 or MB&B212]**

MB&B325 Introduction to Biomolecular Structure
This course aims to provide a framework for understanding three-dimensional structures of proteins, nucleic acids, and their complexes. The first half of the course emphasizes structural modules and topological patterns in major classes of proteins and nucleic acids. The second part of the course covers novel structural motifs, such as helix-turn-helix, zinc-finger, and leucine zipper, that are responsible for recognition of specific nucleotide sequences in nucleic acids by proteins. Analysis of structures using tools available on the Web and independent exploration of protein and nucleic acid databases are strongly encouraged.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM325**
Prereq: **None**

MB&B328 Topics in Eukaryotic Genetics: Transcription
This half-semester course will follow two principal themes: We will examine the use of genetic methods in current biological research and apply these methods to address questions about the regulation of gene expression in eukaryotes. Our examination of transcriptional regulation will lead us into the related topics of gene organization, chromosome structure, and signal transduction.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B528**
Prereq: **None**

MB&B330 Molecular and Cellular Basis of Human Diseases
This course will cover the molecular, genetic, cellular, and biochemical aspects of selected human ailments. Topics will include aging, atherosclerosis, osteoporosis, diabetes, obesity, and Alzheimer's disease.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **MB&B530**
Prereq: **[MB&B208 or BIOL208] OR [CHEM383 or MB&B383]**

MB&B333 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list

(i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **MB&B533, BIOL533, BIOL333**
Prereq: **MB&B181 OR BIOL181**

MB&B334 Stochastic Biology: Randomness and Order in Gene Regulation
While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stems cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B534**
Prereq: **None**

MB&B335 Protein Folding: From Misfolding to Disease
Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B336 Metals, Metalloenzymes, and Disease
This course examines how transition metals regulate cellular biochemistry and how disruptions in metal homeostasis contribute to human disease. Through analysis of primary scientific literature and active discussions, students will explore the roles of metals such as copper, iron, and zinc in enzymatic activity, mitochondrial function, redox balance, and gene regulation. Emphasis is placed on understanding how metal deficiency, overload, or mislocalization leads to developmental and degenerative disorders. Case studies include Wilson disease, Menkes disease, mitochondrial myopathies, neurodegenerative diseases, and cancer. Students will connect molecular mechanisms to tissue dysfunction and clinical outcomes while developing skills in critical analysis of experimental design and data interpretation.

MB&B340 Practical Methods in Biochemistry
This course centers on currently used techniques for protein separation, characterization, and purification, such as ultracentrifugation, gel electrophoresis, and chromatography. These topics will be introduced within the general context of the behavior of macromolecules in solution. The relative stability of proteins in different media, the forces stabilizing protein structure, and the interaction of proteins will be discussed. We will explicitly consider different techniques used to study proteins. Relatively novel techniques to be discussed include surface plasmon resonance, microarray methods and mass spectrometry, and single molecule microscopy. In the course, we will go through three or four different protein purification protocols and discuss the methods used in each one. We will also touch upon the commonly used spectroscopic techniques used to characterize proteins, including absorption, fluorescence, and circular dichroism. The course will focus on biochemical techniques and understanding the physical principles underlying these techniques and will also discuss tactics for optimizing established isolation and purification procedures and for isolating and characterizing an unknown protein.

The course content is appropriate for advanced undergraduates (juniors/seniors) and beginning graduate students from chemistry, biology, molecular biophysics or MB&B.
Offering: **Host**
Grading: **A-F**

MB&B361 RNA Biology
RNA is often sidelined as simply the intermediary between genomic information in DNA and the cell's crucial effectors in proteins. Yet the presence of RNA at the center of the central dogma not only hints at a key role in life origins, but also indicates the enormous power of RNA in controlling gene expression. This course will first cover RNA structural & catalytic capabilities, their possible role in life's origins, and their use in cells today. Second, we will detail how RNA participates in gene regulation via translation, splicing, modification, localization, quality control, decay, and more. Third, we will investigate emerging RNA technologies in both research and medicine that exploit RNA's centrality to macromolecular processes in the cell.
Offering: **Host**

Identical With: **MB&B564**
Prereq: **MB&B208 AND CHEM141 AND CHEM142**

MB&B367 Principals of the Cytoskeleton: How Cells Move and Change Their Shape
Cells come in all shapes and sizes and can dynamically change their shapes in response to environmental cues. How is cell shape determined and regulated? Intricate intracellular networks of protein polymers, that constitute the cytoskeleton, provide a rigid structure that determines cell shape. These cytoskeletal networks are dynamic and can generate forces that push or pull against cell membranes, producing protrusions or invaginations. The cytoskeleton can also produce forces that fold tissues to shape whole multicellular organisms. In cell-walled organisms (plants, fungi, and bacteria), rigid cell walls demarcate cell shape, and the cytoskeleton directs the deposition of new cell-wall material, shaping the cell wall as cells grow. Because the cytoskeleton plays a central role in cellular structural integrity, it is commonly targeted by pathogens, including Chlamydia trachomatis, Vibrio cholera, Listeria monocytogenes, and Rickettsia rickettsia. Each of these pathogens has evolved mechanisms to hijack and weaponize the host cytoskeleton to facilitate host cell invasion. In this discussion-based course we will read and discuss the primary research literature to answer questions such as: How is a single cytoskeletal polymer assembled? How are polymers arranged into networks? How do pathogens co-opt elements of the cytoskeleton during infection? During the course students will gain valuable skills in scientific communication and in how to plan, interpret and critique experimental protocols and data, all while discovering the design principles and amazing capabilities of the cytoskeleton.

MB&B375 The Cell-Division Cycle and Cancer
This course will cover a broad range of topics that are related to the process of cell division. We will discuss how the cell cycle is executed and regulated in a variety of eukaryotic systems. Major consideration will be applied to discussions of cancer and the defects in cell-division regulation that underlie this disease. Some of the topics include growth factors, signaling pathways, apoptosis, cyclin-dependent kinases as cell-cycle regulators, transcriptional and posttranscriptional control of cell-cycle genes, DNA replication, DNA damage checkpoints, and tumor suppressors.

Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B577**
Prereq: **None**

MB&B381 Physical Chemistry for the Life Sciences
The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.
Offering: **Host**

Identical With: **CHEM381, MB&B581, ENVS382**
Prereq: **(CHEM251 AND MATH120) OR (CHEM251 AND MATH121)**

MB&B382 Practical and Theoretical NMR
Nuclear magnetic resonance (NMR) is an extremely powerful and flexible technique that can be used to analyze molecules sized from just a few atoms

up to tens of thousands of atoms. This course will provide an introduction to how NMR spectroscopy works and background on the important theoretical aspects relevant for the most common NMR experiments. Time will be spent gaining practical experience in conducting NMR experiments both during and outside class. The ultimate goal of both the theoretical and hands on sections of this course is to enable you to correctly select and perform NMR experiments necessary to characterize molecules. In addition to learning how NMR hardware is used to produce spectra, we also cover important tasks like sample preparation and the finer points of data processing that will help you get better data. Beyond simple one-dimensional experiments, we will discuss a number of different multidimensional NMR experiments for determining the structures of small organic molecules, including COSY, HSQC, HMBC, and NOE. Furthermore, you will learn how protein structures are solved using 2D and 3D experiments, and how the motion of those proteins can be measured at the atomic level.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM382**
Prereq: **None**

MB&B383 Biochemistry
This rigorous introductory course to the principles and concepts of contemporary biochemistry presents both the biological and chemical perspectives. The major themes will be the structure and function of the major macromolecules (proteins, lipids, and carbohydrates), the basis and measurement of enzymatic activity, and general mammalian and plant cellular metabolism.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM383**
Prereq: **CHEM252 AND MB&B208**

MB&B386 Biological Thermodynamics
This course is addressed to undergraduate and graduate students interested in biological chemistry and structural biology. The course presents thermodynamic methods currently used to relate structure to function in biological molecules. Topics include binding curves, chemical ligand linkages, binding polynomial, cooperativity, site-specific binding processes, and allosteric effects. Several models for allosteric systems, such as the Monod-Wyman-Changeux model, the induced-fit model, and the Pauling model, are analyzed in detail. Applications of these models are illustrated for functional regulation of respiratory proteins and for protein-nucleic-acid complexes involved in control of gene expression.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM386**
Prereq: **(MATH121 AND MATH122)**

MB&B387 Enzyme Mechanisms
The chemical mechanisms involved in the action of a series of typical enzymes will be considered.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM387**
Prereq: **[CHEM383 or MB&B383]**

MB&B394 Advanced Laboratory in Molecular Biology and Genetics
This course is designed to familiarize students with current research techniques in molecular biology, biochemistry, and genetics. A variety of methods and approaches will be applied in a series of short projects, primarily using E. coli and Saccharomyces cerevisiae (budding yeast) as model systems. Students will gain hands-on experience employing recombinant DNA, microbiology, protein biochemistry, and other methods to answer basic research questions. This course provides excellent preparation for students planning to conduct independent research at the undergraduate level (MB&B401/402) and beyond.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Prereq: **[MB&B208 or BIOL208]**

MB&B395 Structural Biology Laboratory
One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by X-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, cryo-electron microscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, protein purification, and column chromatography. The course will provide hands-on experience with spectroscopic and biophysical methods such as fluorescence, UV-Vis absorption, X-ray crystallography, isothermal titration calorimetry, and circular dichroism as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

MB&B500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.

MB&B506 Epigenetics
Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.
Offering: **Host**

Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

MB&B513 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function
This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B313**
Prereq: **None**

MB&B515 The Regulation of Ribosome Biosynthesis
This course will focus on understanding one of life's original, and still greatest, feats: namely, how cells make proteins. Since early life forms evolved ribosomes several billion years ago, their synthesis, regulation, function, and evolution have been at the core of all aspects of biology.

This act of protein translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course, we will investigate the biosynthetic pathways that are involved in effecting protein synthesis from various approaches. Both prokaryotic and eukaryotic systems will be considered, including the questions of how ribosome biosynthesis and activity is relevant to genetic diseases, cancer, cell growth, and antibiotic activity.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B315**
Prereq: **[MB&B208 or BIOL208]**

MB&B516 Advanced Topics in Structural Biology
This course will examine how researchers use the tools of structure determination to explore current fundamental questions in the biological sciences. Beginning with a short history of the field of structure biology, we will examine the benefits and limitations of various techniques used to study protein and DNA structure. We will read primary literary sources on a number of contemporary topics for which structural biology has made important contributions. This may include (but is not limited to) microbial pathogenesis, immunology, gene regulation, membrane protein biology, neurological signaling, signal transduction, and metabolism. This course will explore how the study of structural biology contributes to our understanding and treatment of human diseases, including the development of drugs and other therapeutic interventions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B316**
Prereq: **None**

MB&B517 Advanced Topics in Recombinant DNA
The breaking and rejoining of DNA molecules is at the heart of so many cell biological processes, including adaptive immunity, the common emergence of new viral variants (such as the flu), the fundamental life cycle of other viruses (such as retroviruses), the prevention of aneuploidy in reproductive cells, the production of chromosomal rearrangements in cancer cells, and the repair of damaged DNA. Used as a tool by molecular biologists, recombinant DNA has led to tremendous insight into cell function, development, and disease. Recombinant DNA methodology is growing in its capacity to precisely change the genes carried by organisms, which has important implications for both the food industry and medicine. In this half-semester course, we will examine primary literature that

touches on how recombination between DNA sequences is utilized within cells and as a research tool by humans to promote new genetic outcomes.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B317**
Prereq: **None**

MB&B520 Topics in Nucleic Acid Structure
This course focuses on the principles of nucleic acid structure. The scope of this course is to go beyond the common DNA structures such as B-DNA and A-DNA helical structures. The course will concentrate on other DNA structural motifs such as branched DNA, supercoiled DNA, triplex DNA, and quadruplex DNA. Physical characterization of these structures as well as the functional implication of these structures (in terms of DNA replication, transcription, telomeres, etc.) will be discussed extensively. Discussion will also center on the forces that stabilize these structures, such as H-bonding and stacking interactions. The course will also cover other important DNA structural motifs such as curved or bent DNA as found in A-tracts and the relevance of these structures in promoter recognition and gene expression. Important RNA structures, such as ribozymes and pseudoknots, will be discussed. We will also discuss the significance of DNA structural motifs in eukaryotic genomes and the application of bioinformatic tools to search for these motifs.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

MB&B522 Mechanisms of Protein Trafficking Within Prokaryotes
This course surveys the mechanisms of membrane protein topogenesis and protein secretion within E coli, the quintessential prokaryote, where sophisticated genetic and biochemical analysis has been possible. The course surveys the primary literature with student presentations and a written final examination.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **MB&B322**

MB&B523 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

MB&B530 Molecular and Cellular Basis of Human Diseases
This course will cover the molecular, genetic, cellular, and biochemical aspects of selected human ailments. Topics will include aging, atherosclerosis, osteoporosis, diabetes, obesity, and Alzheimer's disease.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **MB&B330**
Prereq: **[MB&B208 or BIOL208] OR [CHEM383 or MB&B383]**

MB&B533 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

Identical With: **MB&B333, BIOL533, BIOL333**
Prereq: **MB&B181 OR BIOL181**

MB&B534 Stochastic Biology: Randomness and Order in Gene Regulation
While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging

a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stems cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B535 Protein Folding: From Misfolding to Disease
Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B536 Metals, Metalloenzymes, and Disease
This course examines how transition metals regulate cellular biochemistry and how disruptions in metal homeostasis contribute to human disease. Through analysis of primary scientific literature and active discussions, students will explore the roles of metals such as copper, iron, and zinc in enzymatic activity, mitochondrial function, redox balance, and gene regulation. Emphasis is placed on understanding how metal deficiency, overload, or mislocalization leads to developmental and degenerative disorders. Case studies include Wilson disease, Menkes disease, mitochondrial myopathies, neurodegenerative diseases, and cancer. Students will connect molecular mechanisms to tissue dysfunction and clinical outcomes while developing skills in critical analysis of experimental design and data interpretation.

MB&B561 RNA Biology
RNA is often sidelined as simply the intermediary between genomic information in DNA and the cell's crucial effectors in proteins. Yet the presence of RNA at the center of the central dogma not only hints at a key role in life origins, but also indicates the enormous power of RNA in controlling gene expression. This course will first cover RNA structural & catalytic capabilities, their possible role in life's origins, and their use in cells today. Second, we will detail how RNA participates in gene regulation via translation, splicing, modification, localization, quality control, decay, and more. Third, we will investigate emerging RNA technologies in both research and medicine that exploit RNA's centrality to macromolecular processes in the cell.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

MB&B567 Principals of the Cytoskeleton: How Cells Move and Change Their Shape
Cells come in all shapes and sizes and can dynamically change their shapes in response to environmental cues. How is cell shape determined and regulated? Intricate intracellular networks of protein polymers, that constitute the cytoskeleton, provide a rigid structure that determines cell shape. These cytoskeletal networks are dynamic and can generate forces that push or pull against cell membranes, producing protrusions or invaginations. The cytoskeleton can also produce forces that fold tissues to shape whole multicellular organisms. In cell-walled organisms (plants, fungi, and bacteria), rigid cell walls demarcate cell shape, and the cytoskeleton directs the deposition of new cell-wall material, shaping the cell wall as cells grow. Because the cytoskeleton plays a central role in cellular structural integrity, it is commonly targeted by pathogens, including Chlamydia trachomatis, Vibrio cholera, Listeria monocytogenes, and Rickettsia rickettsia. Each of these pathogens has evolved mechanisms to hijack and weaponize the host cytoskeleton to facilitate host cell invasion. In this discussion-based course we will read and discuss the primary research literature to answer questions such as: How is a single cytoskeletal polymer assembled? How are polymers arranged into networks? How do pathogens co-opt elements of the cytoskeleton during infection? During the course students will gain valuable skills in scientific communication and in how to plan, interpret and critique experimental protocols and data, all while discovering the design principles and amazing capabilities of the cytoskeleton.
Offering: **Crosslisting**

MB&B575 The Cell-Division Cycle and Cancer
This course will cover a broad range of topics that are related to the process of cell division. We will discuss how the cell cycle is executed and regulated in a variety of eukaryotic systems. Major consideration will be applied to discussions of cancer and the defects in cell-division regulation that underlie this disease. Some of the topics include growth factors, signaling pathways, apoptosis, cyclin-dependent kinases as cell-cycle regulators, transcriptional and posttranscriptional control of cell-cycle genes, DNA replication, DNA damage checkpoints, and tumor suppressors.

Prereq: **None**

MB&B581 Physical Chemistry for the Life Sciences
The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MUSIC (MUSC)

MUSC102 World Music
This course will explore the diversity and range of musical expression around the world, mapping styles across Asia, Africa, Europe, and the Americas. We will immerse ourselves in a combination of extensive listening to recordings and viewing videos, reading, discussion, in-class performances, and attending relevant cultural events. The world as a whole will be surveyed and regional traits will be identified. Emphasis will be placed on specific pieces, musical instruments, artists, genres, and countries; discovering cross-cultural commonalities and differences; and understanding histories and processes of globalization. Assignments will consist of quizzes on the listening material, Moodle Forum posts, recording and concert reviews, and midterm and final group or solo projects. Three parallel goals will be pursued: 1) to become literate in a broad range of music from around the world; 2) to become familiar with a variety of approaches to understanding music from around the world; and 3) to experience the creative formation of a global music community in microcosm through midterm and final projects.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC103 Materials and Design
Materials and Design is an introduction to some of the elements of musical notation within the Western European musical tradition. Its primary aim is to provide students with a vocabulary and set of tools with which they can describe their experience of music, broadly understood. Focused on music's formal construction and operation within a specific cultural practice, the course also encourages critical listening and thinking skills across genres and geographies. It presumes no prior musical knowledge or training. This particular version of Materials and Design (Spring 2027) is an experimental version that examines how musical notational and theoretical practices are often encoded in digital audio workstations by teaching Ableton Live alongside introductory music theory. The class culminates in final creative projects developed over the course of the semester. Additional lab sessions outside of class are required for developing both theory and software skills. Prior experience with Ableton or digital audio tools are not required.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC103T Theory of Pop Music
This class endeavors to introduce students to fundamental music theory topics through analysis of popular music from the 20th and 21st centuries. We will use the work of such artists as The Beatles, Radiohead, Lauryn Hill, Beyoncé, Kendrick Lamar, Prince, etc., to teach scales and modes, basic jazz fundamentals, chord progressions, secondary functions, and song form. Besides discussion and in-class analysis, students will build their compositional "toolkit" by studying and discussing compositional techniques, learn how genre is created using theoretical principles, and will be asked to write in those genres through templated compositional exercises. Students will demonstrate theoretical analysis of pop songs in essay form and will learn to transcribe pop songs by ear, notating the chord progressions and melodies. As students progress in their theoretical knowledge, they will practice analyzing their own -- and each other's -- music.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-THEA**
Identical With: **THEA229**
Prereq: **None**

MUSC103Z Materials and Design
Materials and Design is an introduction to some of the elements of musical notation within the western European musical tradition. Its primary aim is to provide students with a vocabulary and set of tools with which they can describe their experience of music, broadly understood. Focused on music's formal construction and operation within a specific cultural practice, the course also encourages critical listening and thinking skills across genres and geographies. It presumes no prior musical knowledge or training. Unlike the Fall and Spring versions of MUSC 103, this version of Materials and Design is expanded in terms of scope and the level of student engagement. In the case of the former, the summer terms will allow for vibrant discussions about the history of musical "materials"--instruments, natural resources, and people--as well as how these materials are "designed"--notational practices, improvisation, the formation of canons, accessibility related to class, gender, sexuality, race, and place of origin.

In the case of the latter, whereas the Fall and Spring versions of the course are designed for the quick acquisition of a specific skill set, the immersion format of the summer course will allow for greater and more individualized exploration, including independent and group listening assignments, improvisation exercises, discussion posts, and more.
Offering: **Host**
Grading: **A-F**

MUSC104 Rhythms of the World: An Introduction to Rhythm, Meter, and (Musical) Time
In MUSC 104, students explore the diverse ways people around the world use rhythm and time in musical expression. Through a combination of experiential learning and theoretical investigation, students will discover what rhythmic models reveal about music cultures and how these models resonate in us when we put them into practice. Our direct interactions with varied musical traditions will deepen students' rhythmic skills, broaden their musical creativity, and provide a foundation for deeper engagement in Wesleyan's musical offerings.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC105 MF DOOM and Pierre Henry
This course will explore the relationship between hip hop and musique concrete by investigating the works of MF DOOM and Pierre Henry. The music of both employs the full range of sound through techniques of turntablism and sound sampling. In this course, we will explore the basic processes of sampling and field recording and use the compositional methods of DOOM and Henry in the creation of our own pieces. In this process, we will also examine the role of these methods in the history of hip hop and musique concrete. Course work will consist of weekly writing assignments and discussions plus monthly creative compositional assignments. Any choice of sampling software may be used in the completion of those assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC106 A Thousand Years of Music History
This course will offer a history of European art music from the early Middle Ages to the present day. Featured composers will include Hildegard, Machaut, Strozzi, Bach, Handel, Mozart, Beethoven, Debussy, Stravinsky, Beach, and Cage. Students will relate course content to art, architecture, and literature of the periods, as well as to major economic and historical events. We will explore the technical workings of music and together build a vocabulary for analyzing music and articulating a response to it; music will be interpreted as a cultural phenomenon. By the end of the semester, students should be equipped for a lifetime of informed listening.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC108 History of Rock and R&B
This course will survey the history of rock and r&b (broadly defined as a conglomeration of loosely connected popular musical genres) from their origins in the 1940s and '50s through the early 1990s. Three parallel goals will be pursued: to become literate in the full range of their constituent traditions; to experience the workings of the music industry by producing group projects; and to become familiar with a variety of theoretical approaches to the music, confronting issues such as economics of the industry, race relations and identities, youth culture and its relationship to American popular culture, and popular music as a creative, cultural, and social force. For the midterm and final projects, the class will form a music industry in microcosm (musicians, journalists, producers, video and sound engineers, visual artists), resulting in audio and video releases and a magazine.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC109 Introduction to Experimental Music
This course is a survey of recent and historical electronic and instrumental experimental works. MUSC 109 begins with early experimentalists and germinal works of John Cage, then quickly moves to a wide range of composers working with idiosyncratic electronics, invented instruments, intermedia, sound art, and many other areas of sound exploration and inquiry. Artists works include (and are not limited to) Henry Cowell, Earle Brown, Christian Wolff, Morton Feldman, Anthony Braxton, La Monte Young, Terry Riley, David Behrman, Gordon Mumma, Alvin Lucier, La Monte Young, Muhal Richard Abrams, George Lewis, Roscoe Mitchell, Robert Ashley, Steve Reich, Philip Glass, Meredith Monk, Laurie Anderson, Arthur Russell, John Zorn, and Julius Eastman. The course includes discussions of recent work by composers, performers, and sound artists such as Pamela Z, Tristan Perich, Guillermo Galindo, Lesley Flanigan, Jace Clayton (DJ / rupture), Holly Herndon, Raven Chacon, Jennifer Walshe, and Object Collection. The course includes lectures, demonstrations, and performances, and occasional visits by special guests.
Offering: **Host**
Grading: **OPT**

MUSC110 Introduction to South Indian Music
This course will introduce students to one of the world's great musical traditions, one that has been part of Wesleyan's renowned World Music Program for more than 60 years. Students will learn beginning performance techniques in melody (raga) and rhythm (tala), the cornerstones of South Indian music. Through a listening component, they will also learn to identify important ragas (melodic modes). Lectures will cover a wide range of topics, including karnatak (classical) music, temple and folk traditions, music in South Indian film, and pop music. Readings and lectures will also provide the historical and cultural context for this rich and diverse musical world and will prepare students for the fullest possible enjoyment of the annual Navaratri Festival in October.
Offering: **Host**

Gen Ed Area: **HA-THEA**
Identical With: **THEA348, GSAS211**
Prereq: **None**

MUSC115 Introduction to North Indian Music
This course will introduce students to North Indian Hindustani classical music, one of the two classical musical traditions of India. Students will learn about the basic concepts of melody and rhythm--the cornerstones of Indian music. Through listening components, they will also learn to sing the basics and identify important ragas (melodic modes) and tal (rhythm). Lectures will cover a wide range of topics, including Hindustani (classical) music, light classical music genres, folk music traditions, music in Bollywood film, and contemporary pop music. Readings and lectures will also provide the historical and cultural context for this rich and diverse musical world.

MUSC116 Visual Sounds: Exploring the Landscape and Architecture of Musical Notation
This course examines a diverse range of musical works seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the 9th century? How do 1960s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater.

One of the reason composers started to experiment with open scores in the 1950s and '60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students. No prior knowledge of musical notation or instrumental expertise is required. Meetings will involve discussion of a wide range of readings with the goal of expanding understanding of multiple relationships between music and visual materials.

Learning Objectives:

- To gain familiarity with the diversity of forms of musical notation.

- To recognize the variable relationships between inspiration, transcription, performance, and recordings.

- To consider musical notation as a form of design, a language code, and a form of translation.

- To develop creative processes and understand the creative processes of others.

MUSC117 Musicking Body
"What is this thing called music?" asks Christopher Small in his book "Musicking" (1998) and observes, "Music is not a thing at all but an activity, something that people do." Taking a cue from Small's concept of "musicking" as an inherently social and physical process, this course will explore the role of the human body in the act of music performance and the creation of musical meaning. We will discuss interdisciplinary approaches to the study of music as embodied experience, drawing insight from fields as diverse as philosophy, feminist and performance studies, anthropology, ethnochoreology, and ethnomusicology. We will examine the modes, aesthetics, and cultural connotations of bodily expression, movement, and gesture in a variety of music and dance traditions worldwide--from Sufi-shamanic rituals in Central Asia to Indian classical vocal music, and from drumming and martial arts in East Asia to African American popular genres. By engaging with a range of theoretical perspectives and case studies of embodied sounds, we will reflect on the corporeal, sensory aspects of music performance and perception, the tacit nature of learning and transmission, the intersections of human musicking with the environment and technology, and the ways in which the musicking body is entangled with the physical, social, spiritual, and political forces that shape our lives.

MUSC118F Bob Dylan and His World: Sources and Legacies (FYS)
Bob Dylan's songwriting, recordings, and performances in the 1960s are widely recognized as causing a seismic shift in American music and in the youth counterculture. He did not exist in a vacuum, though, and drew deep from the wells represented by songwriter Woody Guthrie, mountain ballad singer Jean Ritchie, and blues musician Robert Johnson, among many others. His meeting with the Beatles and subsequent world tour with the Band caused unforeseen reverberations, such as the Beatles moving into increasingly sophisticated lyrical territory and Aretha Franklin covering a song by the Band. Many artists covered Dylan songs early on (Stevie Wonder, Sam Cooke, the Byrds, and Sonny and Cher), and many credited Dylan with opening up new avenues of creative expression, including Joni Mitchell, who has been recognized as one of the most inspiring and accomplished singer-songwriters of any era. In this course we will explore (1) the sources of Dylan's art; (2) Dylan's albums, performances, and films throughout his career, with a primary focus on the 1960s; and (3) artists who have been touched by Dylan's legacy, including those outside of North America. We bypass hero worship in favor of understanding cultural and social currents that enable individuals like Dylan to blossom. In addition to collecting, interpreting, analyzing, and presenting evidence as part of written scholarly arguments, which will be stressed throughout the semester, either the midterm or final project may take the form of a creative work other than a paper.

MUSC119F Jazz in the 1960s (FYS)
The 1960s were a turbulent but stimulating time for the world of jazz. The R&B-based soul jazz movement was at its peak and often at odds with the still-developing avant-garde aesthetic. Certain other influences, such as those of Brazilian and African music, were becoming widespread in jazz for the first time. Older forms of jazz like bebop, big band music, and traditional jazz (aka "Dixieland") were struggling to remain viable and relevant. Rock music's surge in popularity was threatening the commercial solvency of jazz while acting as a musical and cultural force to which all jazz musicians had to react in some manner. Meanwhile much of this decade's jazz is inexorably linked to the political and social upheaval of the era, particularly those aspects relating to Black Americans' sense of identity and struggles for equality.

In this course, we will broadly explore the various movements that made up the jazz of this decade. We will delve more deeply into the music of some of the most important figures in jazz during this time, such as Art Blakey, John Coltrane, Miles Davis, Ornette Coleman, Charles Mingus, Stan Getz, Rahsaan Roland Kirk, Jimmy Smith, Yusef Lateef, and Sun Ra. We will study musicians who typified a particular movement, those who assimilated several into a personal style, and those who moved freely among factions. All the while, we will be contextualizing the music within the social and political climate of the decade and the broader artistic and commercial landscape of music at the time.

MUSC120F Music, Place, and Culture: An Exploration of African American Soundscapes and Traditions (FYS)
This course will explore African American soundscapes and traditions through the lens of New Orleans, a cradle of jazz, brass bands, Mardi Gras celebrations, and more. From the historically significant grounds of Congo Square to the mean streets of the Calliope; from the moving voice of gospel singer Mahalia Jackson to the edgy flows of southern hip-hop artist Mystikal; from the sweet trumpet sounds of jazz pioneer Louis "Satchmo" Armstrong to the emphatic full body twerk of bounce artist Big Freedia; from the inspiring soulful sounds of Tank and the Bangas to the powerful sonic echoes of parading brass bands, New Orleans is a place where music and culture bubbles up from the streets and travels throughout the world.

New Orleans is also a place of perpetual marginalization stemming from systemic racist policies that often lead to life-threatening forms of policing and gentrification. These policies disproportionately affect the very African American communities that provide the world such rich, and sometimes healing, iconic sounds. New Orleans serves as an ideal place--bearing strong African American musical roots--to study the manner in which culturally invested people understand, negotiate, and produce space musically. Course participants will immerse themselves in the varied genres of African American music-making traditions through reading and writing assignments, in-class discussions, active music listening, video screenings, creative projects, and possible guest artist engagement. Music genres to be studied include jazz, gospel, soul, funk, blues, hip-hop, rap, zydeco, and bounce.

MUSC121 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

MUSC122 Sample, Remix, Reuse, and Replay: Approaches to Musical Adaptation in Audiovisual Culture
Many of the musics we listen to and encounter are palimpsests, collages, and assemblages. Texts are layered upon and juxtaposed against pre-existing texts, creating polyvocal dialogues and contrasting and complementary systems of meaning. This class introduces students to questions and controversies of adapted and remixed musical media in 20th and 21st century society, analyzing the ways music and other texts and materials (e.g., paintings, plays, places, novels, technologies, genres, historical events, preexisting music) are adapted through processes of revision, remix, remediation, sampling, restaging, and reinterpretation to create new layers of meaning. The course will consider the roles of film, television, video games, music video, digital audiovisual formats and technologies, and related audiovisual media. We will journey from the recycling of preexisting classical music in video games to the remediation and transmission of live operas to the movie theater screen in the MET Live in HD series, from compositions that translate the visuality of iconic paintings into sound to the practice of remix and sampling in hip hop culture, from the digital adaptation of operatic conventions in Final Fantasy VI to cover versions that complicate listeners' expectations of gender performance, from the live performance of video game soundtracks by a symphony orchestra in Video Games Live and Pokémon: Symphonic Evolutions to the compilation mixtape scores of Hollywood films, and from Tan Dun's Internet Symphony for the YouTube Orchestra to how the urban neighborhood of Washington Heights in New York City is repurposed, staged, and cast as a central character in In the Heights or how American political history is adapted and revitalized in Hamilton. Themes in the course include, among others, the changing roles and responsibilities of musicians in an age of digital globalization; the power of musical media and referential texts to structure human experience; and the role of the composer and listener as manipulators and interpreters of musical meaning across comparative audiovisual texts. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can achieve success in this course without previous musical knowledge.

MUSC122F Writing about Sound: What the audible can teach us about our world
Sound speaks volumes, even if what it tells us can be tricky to put into words. If we listen critically, sound can teach us important lessons--like how technology is evolving, society changing, and what it means to be human. That is why sound has recently preoccupied the academic study of music, visual arts, media, ecology, race, disability, architecture, economics, and the history of science. Touching on each of these areas, this course blends core texts and case studies in the interdisciplinary field of sound studies to offer something interesting to all students, regardless of their chosen major. As part of Wesleyan's first-year seminar program, the course has two aims: to explore how philosophers, ethnographers, practitioners, and journalists have written about sound; and to help students cultivate good habits for putting their own arguments into writing. There are no prerequisites to join the class, and assignments will focus on developing weekly reading responses into longer-form essays.

MUSC123F Afrobeats Nation: History, Creativity, and Transatlantic Performance (FYS)
Afrobeats has become a global phenomenon in recent years. With Burna Boy and Tems' Grammy win, and performance at the Coachella festival alongside Rema, Fireboy, and Wizkid, Afrobeats appeals to a borderless "Afronation" in the post-Fela era. Given the entries on global music charts (Billboard Hot 100), streaming numbers, and performances at the Grammy Awards, Paris La Défense Arena, Afro Nation, Glastonbury Festival, Wireless Festival, Madison Square Garden, and Citi Field, Afrobeats artists are shaping the global music scene. This course examines the creativity, social history, and transnationality of West African popular music from 1960 to date. We will cover issues of hip hop appropriation and resistance, gender politics, visual culture, Fela Kuti's Afrobeat and Black consciousness, and the global appreciation of contemporary Afrobeats music.

MUSC124F Mapping Culture (FYS)
What is a culture, how can it be intimately wrapped up in a location, and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom--"location, location, location" and "All politics is local"--tell us about the importance of actual places in cultural formations? We will first orient

ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location. From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip-hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti) and social formations. Haight Ashbury (San Francisco) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models as students embark on their own to map out a culture of their choice as their midterm and final projects, using Google maps, Story Maps, or some other interactive multimedia format. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC125 Music and Downtown New York, 1950-1970
This course will explore the history, interconnections, and simultaneous flourishing of four distinct music communities that inhabited and shaped downtown New York during two particularly rich decades in American culture: Euro-American experimentalists; African American jazz-based avant-garde; blues and folk revivalists; and Lower East Side rock groups. Much of the course will be devoted to understanding their points of convergence and divergence, especially in conversation with broader currents of the time (e.g., the Civil Rights Movement and related notions of freedom, shifting youth subcultures, and avant-garde aesthetics). We will read about and listen to recordings of a wide variety of musicians, identify aesthetic and cultural trends, and study the local industry that supported them. Student research, interpretation, and writing will be emphasized throughout the semester.

MUSC127 C-Pop in the Shadow of a Rising China
Explore the emotional aspect of a rising China and understand the inner feelings of contemporary Chinese youth through C-pop. How did "red songs" from the Cultural Revolution become popular songs in the 21st century? How did an "extremely soft and feminine" voice threaten the Chinese Communist Party? Why do songs from the "jazz capital of the Orient" trigger nostalgia? How do underground rock and punk bands negotiate their existence? How is rap in China different from that of the US or anywhere else? How do Chinese artists deal with LGBTQ issues and ethnic minority issues in popular music? Why do TV variety shows matter? What future is there for China's burgeoning "internet songs"? Popular music in a rising China presents complex issues of state-sponsored popular culture intersecting with bottom-up popular taste and desire, the repressive collective "we" intersecting with the resilient individual "I" in artistic expressions, the imagined "ancient China" intersecting with contemporary sound and technology, and the intensifying nationalistic sentiment intersecting with China's expanding global ambition. This course offers students opportunities to explore aesthetic, political, and cultural meanings expressed in China's popular music from the 1980s to the present. Chinese language knowledge is not necessary.

MUSC128F Music and the Moving Image: From Music Video to Film to Digital Media (FYS)
On August 1, 1981--the day that a cable TV channel playing music videos 24/7 made its debut--the inaugural video aired on MTV by the band The Buggles announced to viewers, "Video Killed the Radio Star." Since the launch of MTV, music videos have shaped popular culture, and their production, narrative, multimodal, and editing aesthetics have influenced other musical screen media, including film, commercials, television title sequences and end credits, film trailers, live concert films, video games, YouTube fan remixes and more. The development of digital new media technologies made the production technologies once only accessible to commercial record labels and production companies available to fans and consumers on their computers, cameras, and mobile media devices. This course explores the relationships between music and moving images (e.g. television, film, computer, video games, mobile media, digital media), and how the music video format has influenced modes of music making, performance, reception, and circulation. Music videos have shaped the aesthetic style of a wide range of screen media genres, serving as a form of branding popular music and artists, introducing experimental and avant-garde techniques to a mass audience, and facilitating participatory fan musicking. This course thinks deeply about several key issues concerning music and moving images (e.g. virtuality, identity politics, cross-cultural exchange, participatory musicking, fandom, virtuosity, adaptation, branding, liveness, nostalgia), examining how screen media with their visual and auditory content can be listened to and read as cultural texts.

Case studies in this seminar range from the history, genre expectations, and experimentalism of music videos to ethnographic filmmaking, from the visual album (Beyoncé's LEMONADE) to fan produced video game music machinima, from the sound design of documentary film to the movie musical, from Hollywood compilation soundtracks to the pace, camera angles, and dance sequences of post-MTV Bollywood film, from 8-bit video game sound to the music pedagogy of children's television programs (Sesame Street's "Geometry of Circles" scored by Philip Glass), and from the use of pre-existing music in television commercials (United Airlines' use of George Gershwin's RHAPSODY IN BLUE, Michael Jackson's "Billie Jean/New Generation" for Pepsi), video games (ETERNAL SONATA, TETRIS), and mobile media apps (the Clapping Music app, the John Cage Prepared Piano app) to expressions of Indigenous musical modernity (Tanya Tagaq's multimedia collaboration NANOOK, the Anishinaabe singing mobile game app HONOUR WATER, the soundscapes of the Iñupiat Alaskan Native video game NEVER ALONE).

MUSC129 The Art of Listening
Over the 20th century, the advent of electronic sound recording and transmission triggered rapid changes in all forms of auditory culture. We will examine this evolution through the different approaches to listening that emerge with the concepts of soundscape, sound object, sound art, and sound design. We will give particular attention to the artists and composers who explicitly shaped these concepts through their work. This includes figures such as writer William S. Burroughs, composer John Cage, singer Bing Crosby, pianist Glenn Gould, theatre director Elizabet LeCompte, filmmaker Walter Murch, artist Max Neuhaus, composer Pauline Oliveros, guitarist Les Paul, composer R. Murray Schafer, and theorist Pierre Schaeffer. In addition to readings, listenings, and viewings, class members will perform works by composers such as Maryanne Amacher, John Cage, Alvin Lucier, and David Tudor and create sound works of their own. The class should be of interest to anyone who anticipates working with sound in their creative endeavors, whether as a musician, artist, dancer, or filmmaker.

MUSC130F Wagner and Wagnerism: Richard Wagner's Music and Influence from the 1840s to the Present (FYS)
Richard Wagner is perhaps the most influential composer who ever lived. Not only an influence on every musician who followed him, he has also had enormous influence on literature, the theatre, visual arts, and even politics. His music is beautiful but controversial. His ideas range from the most exalted, idealistic visions of the future and human possibility to some confused political notions and a particularly virulent antisemitism. In the words of one of his countless biographers, "Humanity has paid dearly for the Wagnerian patrimony." He was a particular favorite of Hitler, but also of W.E.B. Du Bois. Can Wagner and his legacy be redeemed? Should it? The first step is to understand exactly what this complicated man and his long shadow are all about.

MUSC133F Caribbean Connection: Music and Culture of Trinidad and Tobago Music (FYS)
MUSC 133F will examine the history and development of three major genres of music from Trinidad and Tobago: Calypso, Soca, and Chutney music. In this course we will explore issues relating to culture, tradition, colonialism, gender, identity, religion, and sexuality in Trinbagonian party music. We will survey scholarly material as we listen and analyze the lyrical and visual components found in popular music videos, as well as the party/fete arena, to gain a better understanding of how these styles of writing and visual portrayals have shaped Carnival music today. Additionally, we will begin this course with an introductory examination of the musical traditions within some of the Spanish, French, Dutch, and English-speaking Caribbean, ending the course by probing the many ways Caribbean countries connect culturally and historically.

Although this is not a performance-based course, students would have a firsthand opportunity to play the steelpan and auxiliary percussion instruments as we learn about the invention of the instrument, as well as hear directly from Trinbagonian musicians and other Caribbean musicians via zoom.

Some styles of music explored in this course are: Tamboo bamboo, calypso, soca, chutney, chutney-soca, Jamoo, shango (orisha), tassa drumming, rhythm sections (folk drumming), steelpan, extempo, parang (parranda), parang-soca, zess, zouk, ska, rocksteady, reggae, reggaeton, afro-cuban, merengue, bachata, and vodou-jazz.

N.B. This course is open to ALL students and requires no prior knowledge of or experience in Caribbean music.

Prereq: **None**

MUSC134F Video Game and Anime Music Since the Year 2000 (FYS)
In this course, we will focus on two of the dominant popular media forms of the twenty-first century, video games and anime (broadly defined), to approach questions about the role of music in the digital era. We will ask: what role do sound and music play in these complex audiovisual art forms? As anime's production globalizes, to what extent can it considered an exclusively Japanese product? (And conversely, how does anime's global popularity point to longstanding anxieties in the anglophone world about "the rise of Japan"?) How do video games and anime bring to the forefront important conversations about the relationship between creative arts, technology, and economic systems? And finally, who are the figures creating this music, and how does their role differ from that of pre-twenty-first century composers? The course will include two major projects: (1) an in-class midterm presentation contrasting the role of

sound and music in two different media, and (2) a digital ethnographic project exploring the role of community in a particular video game or online fan space.

MUSC135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

MUSC201 Tonal Harmony
This course builds on the foundations established in Materials and Design, with an expanded focus on the analysis of Western European music from the Common Practice period (c. 1700-1900). Through guided listening, written analytical exercises, and in-class discussion, students will develop a deeper understanding of harmony, melody, and formal structures characteristic of the late Baroque, Classical, and early Romantic traditions. Weekly lab sessions emphasize the practical application of these concepts through sight-singing, dictation, and keyboard work, with sustained use of solfège to strengthen aural and theoretical fluency.
Offering: **Host**
Grading: **OPT**

Prereq: **MUSC201 OR MUSC202**

MUSC208 Post-Tonal Music Theory
At the dawn of the 20th century, European composers began to experiment with a radically new and completely decentered tonal language. Leaving the practice of tonality behind them, these composers used unorthodox numerical relationships to create formal links and motivic connections between the sounds of their compositions. Post-tonal theory represents the body of scholarship that attempts systematically to examine the formal procedures and properties associated with this modernist music; it also represents one attempt to understand the relationships between musical pitches that hold outside the framework of tonality. This course will serve as a general introduction to post-tonal music theory and will also serve as an introduction to the music of the Second Viennese School: Arnold Schoenberg, Alban Berg, and Anton Webern.

Beyond the music of these composers, we will also contemplate applications of post-tonal theory to more recent music.

MUSC212 South Indian Music: Solkattu
Solkattu is a system of spoken syllables and hand gestures used to teach and communicate rhythmic ideas in all of South India's performing arts. It has been part of Wesleyan's program in karnatak music for more than 40 years. Students of many different musical traditions have found solkattu valuable for building and sharpening rhythmic skills and for understanding the intricacies of karnatak tala (meter). Building on the fundamental skills acquired in MUSC110, students will learn increasingly advanced and challenging material in a variety of talas. An extended composition, developed for the group, will be performed in an end-of-semester recital.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC220 Composing, Performing, and Listening to Experimental Music
This is a first course in the composition of music that does not does not treat pitch relations as primary but, instead, finds approaches that can engage with all forms of sound whether pitched, unpitched, contextually specific, or abstract. Pieces from the last 100 years that have developed this approach will be presented and the ideas underlying their making (as likely to be drawn from acoustics, psychoacoustics, acoustical ecology, and sound engineering as music theory or history) will be discussed.

Weekly course work will focus on short compositional studies that respond to the pieces discussed and explore different digital and analog compositional techniques (tape manipulation, sound sampling, granular synthesis, frequency modulation, feedback, etc). Two larger creative projects will be completed, one at the eighth week of the semester and the other as an end-of-semester term project.

There will also be one primarily technological assignment. This will be to design a "plug-in" that could add a useful capability to your working environment (most likely Audacity, Reaper or Ableton Live). You will also attempt to build this plug-in using an AI tool, such as ChatGPT or Claude, capable of performing the coding on the basis of verbal prompts. (Ideally, this will yield a tool that facilitates your term project, but its role as an assignment is simply to demonstrate your ability to clearly communicate compositional and technological ideas.)

MUSC221 Live-Electronics for Composition, Improvisation, and Sound Art
This course delves in to Max with the goal of creating live-electronics sound-based systems. The class begins by looking at seminal works in experimental live electronics performance and interactive arts and quickly maneuvers into other arenas of performance and composition. Max for Live, Jitter, Mira, and experimental controllers will also be discussed and further pursued depending on individual student projects to be completed by the end of the semester.
Offering: **Host**
Grading: **A-F**

Prereq: **MUSC109**

MUSC222 Sound Art, Music, and Interactive Media
The focus of this course is on creative projects in digital media conceived in relation to historical considerations of these same techniques. Recording, amplification, and radio transmission have exerted a profound effect on musical practices of all forms since the beginning of the 20th century. In the period immediately after World War II, composers and artists began to focus on changing the relation of composers, performers, and listeners to sound in response to those techniques. We will consider those artistic strategies and the role they have played in shaping musical genres such as musique concrete, serial and spectral composition, interactive computer music systems, circuit bending, and entirely new genres such as sound, video, and performance art. Student projects will be focused on the creation of music, installations, and performances that respond to those ideas and issues. Our primary tool for those projects will be MAX/MSP/Jitter, a software environment designed to enable the composition of real-time interactive sound, video, and network connections.

The fundamental goal of this course is to develop the combination of technical skills and historical awareness needed to creatively engage the ever-expanding accumulation of data and social media that is currently enabling a new period of change in artistic practice.

MUSC223 Music, Recording, and Sound Design
This technical and historical introduction to sound recording is designed for upper-level students in music, film, theater, dance, and art. The course covers the use of microphones, mixers, equalization, multitrack recording, and digital sequencing. Additional readings will examine the impact of recording on musical and filmic practice. Participation in the course provides students with access to the Music Department's recording facilities in the music studios.

MUSC224 Experiments in Sound and Technology
This course will explore hybrid approaches to performance that combine live coding with analog electronics. SuperCollider and its extensions will be our live coding environment. Analog approaches will include both synthesizers (Arp 2600, Moog Modular), homemade/home modified electronics devices drawn from the David Tudor Collection of Electronic Instruments, and Instrumentation and other devices prototyped in class. Coursework will center on collaborations with classmates with complementary backgrounds and skills. To that end, this class is open to anyone who can demonstrate background in any one of the following areas: experimental music composition, sound production, performance video, computer programming, or electronic circuitry. Students interested in the course will be asked to provide a statement about their background and the nature of their interest in the course.

Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC225 Sound Systems and Chamber Electronics
A course in live electronic music centered on the transformation and spatial redistribution of sound. Coursework includes individually creating interpretations of fixed media work (by a composers such as Eliane Radigue, Luc Ferrari, Robert Ashley) for specific spaces using a sound system designed for that space and that piece. Collectively we will prepare realizations of ensemble pieces that played a pivotal role in the development of this music (such as John Cage's Cartridge Music and David Tudor's Rainforest IV). Term projects will take the form of concert music or sound installation or other hybrid forms.

On a technical level we will explore different generations of electronic

instruments and instrumentation drawn from Wesleyan's World Instrument Collection. This ranges from found objects such as slinky's and bird calls to Moog and Arp synthesizers and guitar pedals and other idiosyncratic synthesis devices. We will expand this vocabulary with digital sound techniques using SuperCollider 3, a free music programming environment that extends the DIY sensibility to software.

MUSC226 Field Recording
Behind every sound we hear while listening to music, watching television, playing games, or browsing the internet, an incredible amount of thought went into how to best capture and reproduce it. There are so many amazing sounds, and having the skillful ingenuity to capture those moments, often outside the convenience of a studio, is key to ensuring the ephemeral sonic elements in our world are incorporated into the lives of anyone who wants to listen. The practices discussed in this course will be focused on both the flexibility and practical considerations of creating from a home studio in the 21st century, and framed to fit a range of artistic and professional endeavors such as album production, broadcasting, ethnographic documentation, and sound recording for visual media. This course will illuminate every step of that process, from choosing equipment for making a particular recording, to editing, cleaning up, and mastering the deliverable result, while also touching on specific historical and technical elements of recording technology. By the conclusion of this course, students will have the foundations to share the sounds they hear--in the way they want them to be heard--with the world.

Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**
Prereq: **None**

MUSC227 Sound Production
Presenting art conceived as sound goes far beyond setting up a pair of speakers. With the immersive potential of new audio technologies, artists are empowered to think outside the box and create unique super-systems to express themselves. These endless possibilities can be immensely exciting or potentially overwhelming, depending on how much an artist is able to internalize where art and technology overlap. This course will prepare creative thinkers to incorporate audio into their work by establishing a fundamental understanding of modern speaker/transducer designs and configurations, FOH mixers and large-scale audio routing/processing technologies, control interfaces/protocols for producing and interacting with sound, basic room acoustics and strategies on maximizing the potential of a space, and methods of incorporating microphones/live audio into a project. By the end of this course, students will have the tools they need to set up and manage unique and complex audio systems, and better realize their relationship between art and technology.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**

MUSC230 Music Theater Workshop
This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts. This course counts towards the Theater Arts category for the THEA major.

MUSC231 Performing Arts Videography
This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's Pina, Elliot Caplan's Cage/Cunningham, John Cohen's The High Lonesome Sound, and Peter Greenaway's Four American Composers.

MUSC232 Instrument-Body
The ancient Greek word organon meant both instrument and sense organ, hence the development of a shared word in English for organ (as in a Hammond B3 organ) and organ (as in a kidney). This etymological overlap opens onto a set of generative questions into the nature of instruments: Are they inside or outside the body? Is the body an instrument? If the body is an instrument, who plays it? If an instrument is outside the body, what kind of object is it--a fetish? a prosthetic? an enhancement? an extension? a tool? a commodity? a technology?--and what does it do to the player? Can experimenting with new body-instrument relations become a pathway towards re-organ-izing the body and its relations? Instrument-Body is both a seminar and a studio course that takes these questions as a point of departure for creative and critical experimentation. We will read widely across the fields of musicology, art history, performance studies, queer studies, and critical race studies to investigate questions of instrumentality, embodiment, and technology. In addition, we will create performances across three units: "make an instrument," "break an instrument," and "make yourself an instrument." Students who already play instruments are encouraged to enroll, as are students that have no preexisting relationship to musical instruments.

MUSC240 Visual Sounds: Exploring the Landscape and Architecture of Musical Notation
This course examines a diverse range of musical works seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the ninth century? How do 1960s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater. One of the reasons composers started to experiment with open scores in the 1950s and 60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students. No prior knowledge of musical notation or instrumental expertise is required. Meetings will involve discussion of a wide range of readings with the goal of expanding understanding of multiple relationships between music and visual materials. Learning Objectives: To gain familiarity with the diversity of forms of musical notation. To recognize the variable relationships between inspiration, transcription, performance, and recordings. To consider musical notation as a form of design, a language code, and a form of translation. To develop creative processes and understand the creative processes of others.

MUSC241 Mystical Visions, Medieval Women, and the Performance of Early Music
This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Various "medievalisms"--modern interpretations of the medieval--are explored, to show how musicians continue to interact with early practices in new and exciting ways. This allows us to talk not only about performers of historical early music, but also about composers like Kaija Saariaho, folk groups like Vulcan's Hammer and Folkal Point, and pop artists like Janelle Monaé and Florence Welch. The creation of medievalist music for films and video games is also relevant, as an arena where musicians reimagine the medieval for new audiences.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MUSC242 Baroque and Classical Music
This discussion-based seminar provides an overview of the history of Western European music from the Baroque and Classical periods (roughly 1600 to 1800). More than a survey course, however, it engages students in some of the significant debates around the character and function of music, with a special focus on music's role in defining the modern era. Together, we will consider (and in some cases, reconsider) the following questions: How does music express? What were some of the paradigms for conveying meaning with music? Why does music feature so prominently in contemporaneous discourses as varied as the natural sciences, aesthetics, rhetoric, and others? By the end of the semester, students should expect to acquire some techniques for articulating their experience of music and relating that experience to compositional

procedures idiomatic to the style. Repertoire to be considered will include works by Monteverdi, Lully, J.S. Bach, Haydn, Mozart, and Beethoven. We will also devote time to exploring the role of this music in cultural exchanges in Asia and the Americas. Facility with musical notation is expected.

MUSC243 Music of the 19th Century
The nineteenth century is a time of great change--politically, socially and artistically. We will study many of the major composers, and major trends, through their relationship to Richard Wagner. Wagner's life intersects with almost every major figure in nineteenth century music, in one way or another, and his legacy defines much of the twentieth century, extending all the way to today. In addition to European composers, we will study selected composers in the United States as well. Europeans include Beethoven, Chopin, Berlioz, Schubert, Liszt, Louise Ferenc, Brahms, Arthur Sullivan, and Hugo Wolf. Americans include Frank Johnson (the first published African American composer), Louis Moreau Gottschalk, and "the Beethoven of America," Anthony Philip Heinrich.

MUSC244 Music of the 20th Century
In the 20th century, European and American art music (classical music in common parlance) became increasingly fragmented. Composition splintered into diverse idioms and methods: the minimalism of Steve Reich, impressionism of Claude Debussy, and indeterminacy of John Cage, to name only a few. Often, the proponents of one school vehemently rejected the techniques of the others. Perhaps as a result of such schisms, the audience for classical music--particularly contemporary composition--diminished in size, to the point that critics were hailing the "postclassical era" by the 1990s. The concert hall ceased to be a showcase for contemporary compositions and became a kind of museum devoted to preserving (and occasionally reinventing) canonic works of the past. Commercial popular musics such as jazz and rock eclipsed classical music in audience appeal and relevance. While some composers attracted listeners through their interface with folk and popular musics or with film (e.g., Aaron Copland, Leonard Bernstein), others preferred to cultivate small but devoted audiences of initiates for their challenging works (e.g., Milton Babbitt, Arnold Schoenberg). Meanwhile, the advent of mass-produced sound recordings enabled music from distant times and places to be preserved, transported, and heard on demand, with profound consequences for the creation, performance, and consumption of music. In this course, we will explore the many trends that have marked classical musicking in the 20th century. Through extensive listening assignments and primary source readings, we will meet many of the century's influential composers, performers, critics, record producers, pedagogues, patrons, and listeners. In discussions and writing, we will explore what the past century's legacy means for us as musicians and listeners today. While previous experience with music is useful, it is not a requirement for success in this course.

MUSC245 Music in the United States in the Nineteenth Century
The musical culture of the United States in the nineteenth century is very rich and diverse. American composers of the period are far better, and more interesting, than is generally assumed. This course will focus on music of the concert hall, church music, and popular music. Composers studied will include Anthony Philip Heinrich ("the Beethoven of America"), George Bristow, Francis "Frank" Johnson (the first published African American composer), and the early compositions of Amy Beach, Charles Ives, and others whose careers spill over into the twentieth century.

MUSC246 The Symphony: Evolution of Genre
This course will explore cultural settings and key elements in development of the orchestra as a performing force, conducting as an art form, organology, and music history, by means of tracing the evolution of a single genre: the symphony (from 1750s through 1950s). Preliminary list of composers includes J. Haydn, W. A. Mozart, M. Martines, L. v. Beethoven, J. Bologne, F. Schubert, F. Mendelssohn, H. Berlioz, P. Tchaikovsky, J. Brahms, A. Dvorzak, A. Beach, L. Farrenc, G. Mahler, J. Sibelius, F. Price, W. Grant Still, R. Vaughan Williams, D. Shostakovich, S. Prokofiev.

Prereq: **None**

MUSC247Z Women Writing Symphonies
The course focuses on the lives and work of pioneer female composers of the 19th and early 20th centuries who dared to venture into the traditionally male-dominated field of writing for orchestras -- symphonies, in particular. We will examine their compositional style in context of the "norms and traditions" of the day, survey critical reception and response to the premieres, as well as current scholarship, and take a closer analytical look at some of the scores that illustrate particularly innovative approaches to the genre of symphony. Featured composers are Louise Farrenc (1804-1875, France), Emilie Mayer (1812-1883, Germany), Alice Mary Smith (1839-1884, Great Britain), Amy Beach (1867-1944, United States), and Florence Price (1887-1953, United States). This course requires the ability to read music and knowledge of basic music theory.

Prereq: **None**

MUSC248 Music in Outer Space
Very few people have traveled out of the Earth's atmosphere, but many composers have voyaged extensively in the conceptual realms of outer space. Throughout human history, musicians have been inspired by the "harmony of the spheres," knowledge of the universe, celestial bodies, and planetary motion. From Pythagorus, Boethius, Philippe de Vitry, John Dunstaple, Johannes Kepler, Gustav Holst, György Ligeti, John Cage, Judith Weir, Alvin Lucier, Brian Eno, Karlheinz Stockhausen, Sun Ra, and Jeff Mills to the 1977 Voyager Golden Record, Hawkwind, David Bowie, the Grateful Dead, Pink Floyd, John Williams, Kraftwerk, and the Beastie Boys, we explore the importance of constellations to musical creativity, and the ways in which cosmic sounds have influenced artists. The course will approach the topic through various interpretative lenses. Readings are drawn from a wide range of sources--theoretical, scientific, poetic, and experiential. Discussion topics will include theories relating to the music of the spheres, the study of geometry and proportion, astro-acoustics, sonification, the use of metaphor (in naming the planets in our solar system, lunar and solar imagery), and the influence of imagined and documented sounds of space on composers past and present. Students will each construct their own soundscape of space in the near future. Musicians, astronomers, theorists, and composers: All are welcome.

MUSC249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology
The internet has revolutionized how people consume music, and how they read and write about it. This course will offer an introduction to music journalism as a practice of public musicology, one that has become central to contemporary life. Students will analyse and apply techniques used to write about music for the wider public, learn how to develop ideas, sharpen critical skills, and complete a series of reporting assignments. We will look at the history and function of music criticism, assess different kinds of music writing, discuss changing perceptions of music as a public art form, and the role of journalism in cultural preservation. The class will write and collaboratively edit a series of reviews, and make a short radio feature in collaboration with WESU (88.1FM). The reviews will focus on recordings, live events, and books on musical cultures. Students will have the opportunity to engage with professional music writers, which will help to prepare them for later work in music journalism, or in arts or media organizations.

MUSC250 Film and Folk Music of India
What is film music culture in India? What is folk music in India today? How do these genres interact and influence one another? Most research on the music of India has focused on the classical systems. However, for many people, the most important musical expressions found in their personal and social lives are film and folk musics. Even though film music is considered to be entertainment, it reflects almost all aspects of Indian music and culture. Students will be introduced to the culture and heritage of India. Film and folk music will be analyzed with reference to ancient and modern musical treatises. Topics covered will include the diverse cultures within India and its global diaspora. Students will be encouraged to sing or play the pop and folk songs of India.

MUSC252Z Expressions of Indigeneity in Music and Sound
What would an opera about Thanksgiving composed by a Native American artist sound like? To explore the politics of representation in Indigenous sound and music, this course draws students into a global dialogue about Indigeneity. Topics include the interplay of tradition and modernity, the impact of colonization, music production and consumption, and the politics of knowledge production through various media. In addition to reading and listening assignments, the students will engage in a local ethnographic project--creating an Indigenous sound map in the locale of their choice. For the final project, informed by readings and listening in class, students can choose their formats, either a research project, a creative project, or a combination of both.

MUSC256 A Celebration of Women in Jazz: A Critical Analysis of Gender
How can we take the lessons of Jazz with us into other spaces? In this course, students will study Women in Jazz and examine the broad impact of our social structures and power systems to consider how the lessons of Jazz can help us navigate our future. How can we take the values of Jazz, such as improvisation, listening skills, democracy, a celebration of diversity, and equity work, and use our agency to effect change for the better in our communities? This course will examine the traditionally male-dominated nature of Jazz, its history of misogyny, and underrepresentation of women and other gender expressions. Students will learn in general about the musical art form of Jazz, its history as Black American music, and its unique qualities including improvisation, the blues, and swing. There will be a strong focus on listening to music from women musicians, and students will learn how to actively listen to jazz and all music. Together, we will look at case studies of successful women musicians and composers from the history of Jazz through the present, reading biographical information and reviewing their performance and compositional contributions. Musicians may include Mary Lou Williams, Carla Bley, Terri Lynn Carrington, esperanza spalding, Nina Simone, Billie Holiday, Ella Fitzgerald, Melba Liston, Lil' Hardin Armstrong, Dinah Washington, Abbey Lincoln, Toshiko Akiyoshi, and Marian McPartland.

MUSC260 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

MUSC261 Music and Modernity in China, Japan, and Korea
This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the

issues of global/local cultural contacts, and a better understanding of music's central role in political and social movements in 20th-century East Asia.

MUSC262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

MUSC263 Queering Russian Music
This course takes Russian and Russophone music out of its usual frames and asks what happens when we listen through the lenses of gender, sexuality, and power. Using methodologies of queer studies and queer theory, we consider how music both reflects and reshapes ideas of "Russianness." From imperial ballet to Soviet pop, from Tchaikovsky to contemporary queer artists in media, the course highlights intersections of music, identity, and politics. Special attention is given to the 2000s wave of Ukrainian musicians (Ivan Dorn, 5'nizza, and others) whose presence redefined the sound and style of Russian pop music in the 21st century. Students develop tools for critical listening, music analysis, and cultural interpretation while engaging broader debates about identity, politics, and belonging in today's Russian cultural sphere.

MUSC265 African Presences I: Music in Africa
This is a team-taught course, with instructors Charry and Dankwa bringing their complementary areas of expertise for a wide-ranging, interactive, and engaging immersion into the music, history, and cultures of Africa. We will explore the diversity of musical expression throughout the African continent with a combination of intensive reading, listening to recordings, viewing videos, discussion, and hands-on performance (all levels welcome). We will survey the continent as a whole, explore regional features, discuss in depth specific pieces, genres, and countries, and look at the social and political horizons of music, including its role in everyday life and rituals and how musical experiences have changed in contemporary life. We will also explore the presence of African music in social media, including the spread and impact of African rap and hip hop.

MUSC265Z African Presences I
One of the assets of Africa's music scene is its vast plurality. Traditional music conceived, developed, and performed in Africa over many centuries coexists and interacts with contemporary art and popular music. Through readings, classroom discussions, listening, viewing, and practical performances, this course will examine some selected musical traditions linked geographically and historically to various areas of Africa. The course highlights several themes: structure and style; interconnection of traditional, popular, and art music forms; circulation of African music; and music's role in shaping African identities in the globalized world.

MUSC267 Lift Every Voice and Sing: A History of Gospel Music and African American Musical Traditions
This course will look at the cultural and historical background of Gospel Music, tracing it back to the pre-slavery era, and working our way up until the gospel music of today. This course is for students who are interested in why gospel music is such a universally beloved genre and tradition. While the course will focus on the formation of Gospel music, a diversity of other African American musical genres will be covered in this course.

MUSC268 The People's News: The Convergence of Gospel and Hip Hop in Modern Thought
The Convergence of Gospel and Hip Hop will survey the words and power of Gospel Music and its foray into Hip Hop. How do the words used within a culture develop and/or determine the message and meaning of said culture. If words have power, how is that power used? We will also consider the rejection of Gospel Singers who embraced the unholy and how the message evolved to expand into the formerly non sacred expanse of Hip Hop, and if it has been successful or a lesson in futility.

MUSC270 A&R: Past, Present & Future -- a Deep Dive into the Recording Industry
Have you ever wondered how the recording industry really works and how hits become hits? This course will teach you everything you've ever wanted to know about A&R (Artists & Repertoire) as the engine that has driven the music business since the 19th century. Beginning with the invention of recorded sound, we'll trace the evolution of the business -- musically and technologically -- through current day. We'll study the formats of recorded music (both physical and digital) alongside of the colorful characters who brought them and the songs within to the public. The second half of the course transitions from theory to practice, with students taking on the role of adjunct A&R representatives for Pure Tone Records, studying contemporary A&R methods and applying lessons from the past. The course culminates in students discovering and pitching new artists for potential signing. Course taught by two-time Grammy award-winning music producer and A&R executive Pete Ganbarg (Wes class of '88).

MUSC272 History of Jazz in American Culture
Jazz, has been a staging ground for working out some of the most defining issues and aspects of American culture. These include the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s-40s, until it was displaced and pushed to the margins by R&B and rock in the 1950s. But it has remained an inspiration for many artists up to the present day, including Kendrick Lamar's jazz-drenched To Pimp A Butterfly and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

This course will provide students with a broad-based literacy in the history of jazz, while examining its significance and impact within American culture. We will explore its early 20th-century origins in New Orleans, its rise as America's popular dance music in the 1920-30s, a shift to a more concert art-oriented form in the 1940s-50 (representing the epitome of cool and hipness), avant garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, as well as new directions from recent generations. We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados, and those interested in the social and cultural dynamics as well as the musical materials.

MUSC275 Music and Downtown New York
This course will explore the history and flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of major cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of U.S. history. We will uncover their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and politics, and avant-garde aesthetics. Drawing from primary sources, we will read about and discuss recordings of a wide variety of musicians, view a broad cross-section of film, identify aesthetic and cultural trends, and study the local industry that supported them. A key theme will be the importance of a place. Projects throughout the semester can include written papers, recordings, artwork, culture mapping, or other creative endeavors somehow related to each of the four topics.

MUSC277 Jazz Avant-Gardes
What is an avant-garde and what does it mean in the context of jazz? This course will explore this question focusing on the 1950s and 60s and beyond. We will take a holistic approach, examining the music and its surrounding community within the broader social and cultural currents of the times. These currents

include European-inherited avant-garde aesthetics, the increasingly urgent civil rights movement and changing conceptions of freedom, artist collectives, and Afrofuturism. Three key artists will provide a focal point: Ornette Coleman, Cecil Taylor, and Sun Ra. Others will expand our view, including Thelonious Monk, John Coltrane, Alice Coltrane, the Art Ensemble of Chicago, Anthony Braxton, Yoko Ono (a non-jazz artist who contributed to an experimental sensibility in NYC), and others. We will immerse ourselves in a combination of reading, listening to recordings, viewing videos, discussion, and some in-class performances. Throughout the semester we will pursue the parallel goals of using this movement in jazz to expand our understanding of avant-garde movements in general and using historical avant-garde movements to expand our understanding of how the phenomenon has played out in jazz. The first two weeks will function as a Jazz 101 boot camp, so no prior experience in jazz is necessary.

MUSC278 Survey of Jazz Styles
This course is a study of how jazz works, developing the awareness and tools that allow us to understand and evaluate what we are hearing when we listen to live or recorded jazz--how and why the musicians do what they do and the larger context into which a performance fits. We explore historical developments and chronology, the structures that govern jazz improvisation and other performance practices and the instrument roles and sub-styles that typically make up the music. Though there will be ample relevant information for musicians, a background in music theory or performance is not at all necessary for this course.

MUSC279Z Music and Wellbeing
IN-PERSON COURSE: 10:00am-noon and 4:00pm-6:00pm, Monday through Friday. Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings. Music has been, and continues to be, an essential component of the practices of traditional healers in most indigenous cultures. Methods vary greatly from culture to culture, and from ancient to modern times. Hindustani (North-Indian art) music is unusual in having a very well-established written record, as well as an oral history. But although knowledge of the medicinal effects of Hindustani musical tones and modes was once integral to understanding and selecting the rags (melodic systems) that make up this music, much of this knowledge has been lost. The sarangi (North-Indian viol) is an instrument closely associated with musical healing. Oral history transmitted through generations of sarangi players makes it possible to trace a lineage of music's medicinal purposes back to the Mughal era.

This course draws on my experience and knowledge as a Hindustani music scholar and an eighth-generation sarangi player from a hereditary musical family to open up a space for the development of community-focused performance methodologies. It looks at ways that my inherited tradition can provide a model for musical healing in contexts outside of India. Acknowledging the capacity for music to activate and influence autonomic system responses, components of the course involve research into the neuroscience of musical healing, public health initiatives, and the relationship to composition and to improvisation.

An integral part of the course, the "lab" will teach you strategies for listening and learning songs composed in rags. It will include structured breathing and yogic-postural forms, combined with healing strategies drawn from diverse sound-based creative practices. Borrowing tools from ethnomusicology, music-therapy, and medical anthropology, the course will extend the listening part of the lab to draw comparisons and analyze music healing practices. In addition, students will be encouraged to investigate, compare, and draw parallels to their own culture(s) and the discipline of music(s) they belong. Detailed and guided listening will make it possible for you to integrate emerging understandings of the relationships between ritual, music, and the health care. The course goal is to broaden your understanding of music as therapy, while raising awareness of the cultural processes that are constructed through musical practice. Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

MUSC285 Global Hip Hop of the Non-Anglophone World (CLAC .50)
Proficiency in a language other than English is required. Each student will present to the class a single piece of their choice in a non-English language every other week (for a total of five presentations). Presenters will provide the class with written lyrics in both the original language and in English translation. In lieu of analyzing recordings by others, students have the option to compose their own non-English rap songs and record (or perform) them for in-class discussion. The final paper will tie the five presentations together in a single formal document (or website). Class discussion will be in English, but the topics will all be rap lyrics and hip hop/youth culture in the non-Anglophone world.

MUSC290 Research Skills in Ethnomusicology--IRL & Digital
This course provides an introduction to research methods in ethnomusicology, a discipline that studies all types of music (and sound), both in real life and digital, from diverse humanistic and social scientific perspectives. The course is organized around weekly hands-on exploratory and empirical mini projects moving from virtual field to real-world fieldwork to interviewing musicians to digital sound-mapping and music video editing, from learning about Wesleyan's wide-ranging music ensembles to writing album reviews to "composing" an

ethnography, which will offer orientation to a discipline that has been central to Wesleyan's approach to music and sound for over 60 years.

MUSC291 The Gendering of Music in Cross-Cultural Perspective
This course presents a critical examination of issues explored and debated in recent studies of gender, sexuality, power, identity, and music from diversified music traditions, including Western art music, popular music, and world musics. Drawing upon interdisciplinary discourse on theories of feminism and gender, gay and lesbian musicology, as well as queer theory in ethno/musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

MUSC293 Mapping Culture
What is a culture? How can it be intimately wrapped up in a location and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom--"location, location, location" and "all politics is local"--tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location (Nile Project, Playing for Change). From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti and other street art) and social formations. Haight-Ashbury (SF) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models before students embark on their own to map out a culture of their choice as their final project, using either Google Maps or Story Maps. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC294 Queer Opera
Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

MUSC295 Global Hip-Hop
Over the past two decades, hip-hop, in its various facets of rap, deejaying, dance, visual art, fashion, and attitude toward authority, has gradually taken over as a primary medium of expression for youth around the world. Used as mass entertainment, elite aesthetic statement, social and political commentary, tool for education and social change, vehicle for economic opportunity, and as the core of a cultural movement, hip-hop has proven malleable enough to thrive embedded in scores of different languages and cultures around the world and effectively speak to local needs. Yet its local manifestations have also managed to retain their membership in a global hip-hop culture.

In this seminar we will study the global spread of hip-hop from an interdisciplinary approach, examining its varieties of expression from aesthetic, cultural, social, musical, linguistic, kinetic, economic, and technological perspectives. We will first come to an understanding of the rise and dispersion of hip-hop culture in the United States. Then, beginning with France, where it first took hold, we will move around the world examining local case studies and their more global implications.

MUSC296 Soundscapes of Islam
From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

MUSC297 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

MUSC308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

MUSC309 The Winslow Archives: Composition, Education, History
Richard Winslow taught at Wesleyan from 1949 to 1983, where he was the key figure in establishing the World Music Program and Wesleyan's continuing commitment to experimental music. In retirement, he remained very active as a composer and thinker. His long life ended in 2017, a few months short of his 100th birthday. In 2019, the family donated his papers and other materials

to the Wesleyan archives; these have now been processed, and a basic but complete finding aid is available at https://archives.wesleyan.edu/repositories/sca/resources/richard_k_winslow_papers.

Partly to honor his work, but mostly because he was such an extraordinary composer and thinker, Wesleyan is initiating a more detailed study of the archival materials, together with a series of performances. This seminar helps students gain a closer familiarity with Winslow's life and work through hands-on study of manuscripts, correspondence, and recordings. It will be of interest to composers, who will study Winslow's techniques as revealed in sketches, scores, and annotations; to musicologists and historians, who will help construct a complete chronology of Winslow's life and especially of his activities as a Wesleyan professor; and to archivists, librarians, and digital humanists, who will gain first-hand experience with the problems that attend categorizing, describing, and disseminating archival materials in a variety of media.

MUSC405 Private Music Lessons for Nonmusic Majors
Private instrumental and vocal lessons meet once a week at a regularly scheduled time. Permission of the instructor is required. Students contract to take 12 lessons. Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the Private Lessons Program must contact the instructor to determine whether an interview during the first week of classes is required. This course may be repeated four times for credit towards graduation regardless of section or combination of sections.

Each section is for different instrument or voice lessons. Please see each section for the instrument/voice lessons taught by that instructor. (Section 01 is only for Bass lessons). A full list of instructors and their instruments can be found under the Private Lessons section of the Music Department website.

In most cases the student needs to provide their own instrument. Piano and drums are available to students for lessons, and certain other orchestra instruments may be available to private lessons students.

Course Fee: $780 for 12 lessons billed through the Student Account. Financial support may be available for those who qualify. Please see the Music Department web site under Private Lessons for details.

MUSC413 Korean Drumming and Creative Music Ensemble
This course is an experiential, hands-on percussion ensemble with the predominant instrument in Korean music, the two-headed janggo drum. Students will learn to play a range of percussion instruments including janggo, barrel drum (buk), hand gong (kwenggari), and suspended gong (jing). Through the janggo, drumming students gain first-hand experience with the role music plays in meditation and the benefits it offers to develop a calm, focused group experience. In the end they integrate their focused mind, physical body energy, and breathing through a stream of repetitive rhythmic cycles. The students will be introduced to traditional folk and court styles of janggu drumming. The ensemble plays pieces derived from tradition and new ideas, and creates new works exploring imaginative sounds on their instruments. If there is an opportunity during the semester, the students will have a creative collaboration with a dancer(s) or musician(s) from other cultures. The ensemble will experience a deep respect for the diverse cultural backgrounds of the students developed from the efforts of teamwork and creating music together through Korean drumming. The semester will end with a live performance for the public.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **CEAS413**
Prereq: **None**

MUSC414 Korean Drumming and Creative Music Ensemble Advanced
This class offers more advanced techniques for those students who have taken the beginner course or who have some basic experiences in Korean drumming or who have long-term drumming experiences of any other cultures including Western drum set. Attendance and additional practice time are mandatory. In comparison to the beginner class, the advanced class will play rapid, vigorous, and seamless rhythmic patterns on janggu, buk, and kwenggari. Students are expected to be creative in utilizing materials given during the semester. Each student will focus on a lengthy solo work on any of these instruments, as well as ensemble playing. Students will explore both traditional and new emerging styles of Korean drumming. In the end, they will integrate their solos in the ensemble piece and create a new piece. The ensemble will experience a deeper level of drumming from contributing solo work to the ensemble and the efforts of teamwork. They will learn about group activity in music-making through sharing ideas and assisting each other. The semester will end with a live performance(s) for the public.

Identical With: **CEAS414**
Prereq: **MUSC413**

MUSC416 Beginning Taiko--Japanese Drumming Ensemble
This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and one or two pieces on the Japanese taiko drum. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements). Students with a musical background might find MUSC 417 Intermediate Taiko to be a suitable alternative, as it covers the same theoretical and historical content but at an accelerated pace and includes additional repertoire.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **CEAS416**
Prereq: **None**

MUSC417 Intermediate Taiko--Japanese Drumming Ensemble
This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and a couple of pieces on the Japanese taiko drum. The distinction between this course and MUSC 416 Beginning Taiko lies in the pace of instruction and the quantity of musical pieces covered. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC418 Taiko II: Japanese Drumming Ensemble
This is course is for students who have taken Beginning Taiko. Acceptance to this class is at the discretion of the instructor. Students will learn more advanced techniques in taiko drumming by learning pieces from the Matsuri and kumi daiko performance repertoires.
Offering: **Host**

MUSC427 Central Asian Music Ensemble
The Central Asian Music Ensemble is dedicated to the study and performance of music from a region at the crossroads of Eurasia, encompassing the post-Soviet states of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan. Established in Fall 2023, the ensemble currently comprises Kazakh and Kyrgyz plucked and bowed lutes, plucked zithers, end-blown flutes, clay ocarinas, jaw harps, frame drums, and other percussion instruments. Students learn the basic techniques of playing the instruments and singing in a variety of regional styles while exploring the history and cultural significance of music in nomadic and sedentary Central Asian societies through individual tutorials, group rehearsals, and engagement with visiting artists from Central Asia. In addition to playing traditional and contemporary repertoires from the region, students are encouraged to compose and improvise with ensemble instruments. Previous experience with string or wind instruments such as the guitar, violin,

cello, or flute is desirable but not required. Students from diverse backgrounds are welcome to participate.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **MDST427, REES227, ENVS427**
Prereq: **None**

MUSC428 Chinese Music Ensemble
The Wesleyan Chinese Music Ensemble is a performance group dedicated to exploring the modern Chinese ensemble and a variety of Chinese music styles. It is made up of a number of traditional Chinese instruments, including plucked lutes and zithers, hammered dulcimer, bowered fiddles, bamboo and reed flutes, and percussion. The course is designed to be hands-on and experiential, encouraging students to explore the basic ideas of Chinese music and culture through weekly rehearsals, practices, and performances.

Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **CEAS428**
Prereq: **None**

MUSC429 Voice Technique & Improvisation
The ensemble is structured as a singing workshop, focusing on technical and artistic development. The warmup regimen covers breath support, resonance, diction, range extension, and expressivity. These skills are applied to group and solo projects which emphasize improvisation and collaboration, culminating in a performance of Syntactical Ghost Trance Music, a system for spontaneous composition developed at Wesleyan by Professor Emeritus Anthony Braxton. Ensemble members will have opportunities to use electronics to expand the scope of vocality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC430 South Indian Voice--Beginning
Students will be taught songs, beginning with simple forms and increasing in complexity. There will also be exercises to develop the necessary skills for progress into the more complex forms.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **GSAS430**
Prereq: **None**

MUSC431 South Indian Voice--Intermediate
This course is a continued exploration of the song forms begun in MUSC430, with emphasis on the forms varnam and kriti, the cornerstones of the South Indian concert repertoire. Specific exercises will also be given to prepare students for the improvisational forms they will encounter in the advanced class to follow.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **GSAS431**
Prereq: **MUSC430 or GSAS430 or MUSC110**

MUSC432 South Indian Voice--Advanced
Development of a repertoire of compositions appropriate for performance, along with an introduction to raga alapana and svara kalpana, the principal types of improvisation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **MUSC430 OR MUSC431**

MUSC433 South Indian Music--Percussion
Students may learn mridangam, the barrel-shaped drum; kanjira, the frame drum; or konnakkol, spoken rhythm. All are used in the performance of classical South Indian music and dance. Beginning students will learn the fundamentals of technique and will study the formation of phrases with stroke combinations. Advanced classes will be a continuation of lessons in a variety of talas. Individual classes are supplemented by a weekly group section.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **[MUSC212 or GSAS212]**

MUSC434 Improvisational Techniques in South Indian Music
This course will introduce advanced students of karnatak vocal music to raga alapana and svara kalpana, the most important forms of melodic improvisation. Students will begin by learning precomposed examples of these forms. As they become comfortable with idiom, they will progress to designing their own improvisations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC435 Keyboard Techniques for Composers and Conductors
This course is intended for students who wish to master fundamental keyboard techniques. Through regular playing/performance assignments, this course will improve the students' ability to use the piano as a tool toward their musical careers. Students will focus on harmonization, score reading, and their ability to accompany and lead from the keyboard. This course is performance-based and requires weekly practice. Basic conducting and rehearsing strategies will also make up part of the curriculum. Students should have basic piano skills and a solid foundation in basic keyboard harmony.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **MUSC103**

MUSC436 Wesleyan Concert Choir
This choral ensemble welcomes members of both Wesleyan and Middletown communities and is devoted to performance of standard choral repertoire from the 17th century to the present day, both accompanied and a cappella. Solo and leadership opportunities will be available for advanced singers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC437 Singing to Your Instruments
Students will learn South Indian classical music by learning to sing and then applying this knowledge to non-Indian instruments they already play. They can then use their own instruments in recitals of South Indian music and dance.

Beginners will be introduced to basic exercises and simple compositions. Advanced students will be introduced to improvisation in addition to different types of compositions in various ragas and talas. Students will form an ensemble that will be encouraged to participate in on- and off-campus performances.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **GSAS437**
Prereq: **None**

MUSC438 Wesleyan University Collegium Musicum
The Collegium Musicum (literally "company of musicians") is a vocal performance ensemble dedicated to exploring and performing the diverse European repertories of medieval, renaissance, and baroque music. Emphasis is given to the study of musical styles, performance practices, vocal independence, healthy singing, and musicianship. Students investigate various cultural aspects of the production of music, including primary sources, acoustics, and cultural heritage. In spring 2026, we begin our celebration of the Collegium's 25 Years of early music at Wesleyan with a program entitled "Song of Songs, Old and New." Like much Biblical literature, the Song of Songs can be traced back to Sumerian origins. Our program will intersperse ancient Mesopotamian poetry relating to the spiritual marriage of Inanna (Sumerian goddess of love, fertility, and war) and Dumuzi (the shepherd god) with music that reflects the Jewish and Christian understandings of the related mystical union. Biblical language that evokes the fragrance of wine, blossom, fruits, and spices was particularly appealing to European Renaissance composers. We will present a simple Icelandic form of discant, a polytextual French motet, complex polyphony in multiple parts by Palestrina, Lassus, Bouzignac, and Aleotti, and some contemporary responses to these popular texts.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **MDST212, COL138**
Prereq: **None**

MUSC439 Wesleyan University Orchestra
The Wesleyan University Orchestra is a student-community ensemble that is open to everyone with a passion for orchestral literature. Prospective members should have an intermediate-to-advanced skill level of performance on an orchestral instrument. The orchestra performs music from all genres and time periods, ranging from the 18th-century "classics" to contemporary academic and popular compositions. The orchestra presents three concerts each year: a "masterworks" program in early December, often featuring one of the department's private lessons instructors or a guest artist as a soloist; a children's concert in early March; and the Student Concerto Competition concert in early May. The orchestra occasionally collaborates with the Wesleyan Concert Choir. For more information about the orchestra visit: https://orchestra.site.wesleyan.edu/

MUSC440 Vina and Voice in South Indian Music - Beginners
In this course, beginning students will learn the fundamental technical exercises of Vina performance and develop an understanding of phrase formation. The lute-type Vina is among the oldest and most revered instruments in South Indian music. Advanced classes will continue this training through more complex lessons and sustained practice in a variety of talas.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **GSAS440**
Prereq: **None**

MUSC441 Piping Performance: An Exploration of Artistic Expression through the Pipe Organ
With the ability to create the most delicate and jarring of timbres, and to fill the space with "other-worldly" soundscapes, the pipe organ is a vehicle that transports one toward artistic and musical growth. This course will introduce students to the history and development of the instrument, while fostering other musical skills and studies that assist each student to find their voice as an artist-creator. This multi-track course allows students to select their focus in one or more organ-related disciplines: improvisation, composition, performance practice, repertoire playing, church music, musicological research, etc. Students utilize their growing knowledge of the organ to complete three musical performance or research-related projects that they develop over the course of the semester. Final projects are publicly presented. A lab time in the form of private lessons, consultation, and individual practice is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC442 Chamber Music Ensemble
This course may be repeated for credit. A variety of small chamber music ensembles will be coached by instrumental teachers.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC443 Wesleyan Wind Ensemble (WesWinds)
Rehearsals will combine intensive concert preparation with occasional readings of works not scheduled for performance. Open to all members of the Wesleyan/Connecticut community.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC444 African Popular Music Performance
This course aims at bringing together students with diverse musical skills to explore the riches of African popular music (broadly defined to include a range of styles such as highlife, hiplife, hip-hop, dancehall, reggae, azonto, and gospel highlife) through performance. Popular music, first and foremost, is an urban genre. Its origins go back to the early 1900s when, because of European presence in the coastal areas of West Africa, and later spreading to other parts of the continent, new musical instruments, ideas, and imaginings became available. Today, popular music is the driving force of the music industry in Africa. Through intensive studio practice, reading, listening, viewing, and individual and group rehearsals, the goal of the course is twofold: to develop proficiency in African pop music performance and to become familiar with the intellectual discourse on African popular music, its interactions with traditional African music, and its role in the formation of generational identities. The course is fundamentally performance-based; hence, enrollment is limited to skilled musicians with some proficiency in singing and the following instruments: guitar, keyboard, drum sets, bass guitar, saxophone, trumpet, and trombone.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC445 West African Music and Culture: Beginners
This is a performance-based course that focuses on West African music. The course is designed to provide a practical and theoretical introduction to traditional West African music and culture. Students experience the rhythms, songs, movements, and languages of Ghana and its neighboring countries through oral transmission, assigned readings, film viewing, and guided listening to commercial and/or field recordings. This interdisciplinary approach to learning is in keeping with the integrated nature of drumming, dancing, singing, and hand clapping in West Africa. Students learn to play a range of instruments, including drums, metal bells, and gourd rattles.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC446 West African Music and Culture--Intermediate
This course is designed to build on the skills developed in MUSC445. The beginner repertoire is reviewed, and more demanding call-and-response patterns are learned, along with new, more challenging repertoire. Students may be asked to perform on and off campus.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **MUSC445**

MUSC447 West African Music and Culture--Advanced
This course is designed to build on the skills developed in MUSC445 and MUSC446. Complex repertoire is learned and brought to a higher performing standard. Students experience the intricacies of dance accompaniment while drumming and singing with the advanced West African dance class. The student ensemble will be asked to perform on (and possibly off) campus.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **MUSC446 OR MUSC445**

MUSC448 Ebony Singers: Gospel Music
This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

Gen Ed Area: **HA-MUSC**
Identical With: **AFAM241**
Prereq: **None**

MUSC450 Steelband
This is an ensemble course in the musical arts of the Trinidadian steelband. Students learn to perform on steelband instruments and study the social, historical, and cultural context of the ensemble. We also address issues of theory, acoustics, arranging, and composing. Readings, recordings, and video viewings supplement in-class instruction. The ensemble will present public performances.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **AFAM450**
Prereq: **None**

MUSC451 Javanese Gamelan--Beginners
Dominated by colorful bronze percussion instruments, the Gamelan ensemble features gongs, bronze and wooden xylophones, drums, and vocalists. Other instruments include bowed- and plucked-string instrument and flute. Some of the instruments date back to the 12th century in Java, Indonesia. The main content of the course is the instruction of various levels of difficulty in the playing techniques of different instruments and singing. Previous formal music instruction is not necessary.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **GSAS451**
Prereq: **None**

MUSC452 Javanese Gamelan--Advanced
Dominated by colorful bronze percussion instruments, the Gamelan ensemble features gongs, bronze and wooden xylophones, drums, and vocalists. Other instruments include bowed- and plucked-string instrument and flute. Some of the instruments date back to the 12th century in Java, Indonesia. This course is advanced-level performance of central Javanese gamelan. Emphasis on the classical repertoire.

Prereq: **None**

MUSC454 Latin Jazz Ensemble
This course is intended for those who would like to learn about the wide variety of instrumental and vocal genres known as "Latin jazz." Students should have intermediate to advanced musical ability, but singers who are fluent in Spanish are highly desirable. Students should have comfort with a mix of reading and improvisation, as Latin jazz charts are often a combination of chord symbols and classical reading. The main genres we will explore are salsa, bachata, bossa nova, rhumba. Repertoire from Celia Cruz, Tito Puente, Spanish Harlem Orchestra, Chucho Valdés will be mixed with jazz standards performed in the Latin jazz idiom. The final project will consist of a public concert.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC455 Jazz Ensemble
This course builds small-group performance skills including improvisation, accompaniment, pacing, interaction, repertoire, and arrangements.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC456 Jazz Improvisation Performance
In this extension of MUSC210, Theory of Jazz Improvisation, all materials previously explored will be applied to instruments in a workshop setting. Intensive practice and listening are required.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **AFAM390**
Prereq: **None**

MUSC457 Jazz Orchestra I
This course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Identical With: **AFAM396**
Prereq: **None**

MUSC458 Jazz Orchestra II
A continuation of MUSC 457, this course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane, and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.

Prereq: **None**

MUSC459 Methods of Improvisation Ensemble
The ensemble is open to musicians of all backgrounds, stylistic orientations, and traditions seeking to develop their improvisational abilities. All instruments are welcome. Weekly rehearsals will explore improvisation from a method-based perspective in order to develop the skills needed to create spontaneous compositional works as an ensemble. Each student will learn how to develop their musical foundational skills to be able to create unique rhythmic and sonic environments as both a soloist and an ensemble member. Traditional notations will not be used. Instead, graphic- and prose-based notations will be employed to facilitate the forging of a musical language unique to the ensemble.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC461 Sound Systems: The How of Hearing
Since the late 19th century artists, corporations and composers have all proposed, developed, presented, and occasionally commercialized physical systems that reconfigure how sound can be experienced. The early impact of the entertainment industry ranged from the introduction of stereo to movie theaters in Walt Disney's Fantasia to the development of close miking for the crooning of Bing Crosby to McCune sound service's introduction of stage monitors for the benefit of Judy Garland. Artists and composers used related methods to propose entirely new understandings of how music can be. Futurist Luigi Russolo's Intonarumori of 1913 proposed an Art of Noise, while Pauline Oliveros' concept of deep listening developed listening as a foundational form of music making. R. Murray Schafer's concepts of soundscape and acoustic ecology project a music of environmental relations mediated through sound, while Maryanne Amacher's sound characters create individual sounds understood as capable development and change beyond the expanse of any one performance or composition. This class will be a performing ensemble focused on "sound systems" as musical instruments and musical practices performing live and fixed media sound pieces through sound systems we will configure for different sites on campus. Together with developing the technical skills required to mount these pieces, we will also investigate and discuss the varied musical, social, acoustical, and psycho-acoustical understandings of music and sound that influenced their shaping.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **MUSC109**

MUSC463 Teaching Music Lessons to Children in Local Schools
This is a service-learning course. Wesleyan students will teach private and small group music lessons to local children. These sessions will be augmented by a weekly classroom session in which readings and the student teachers' journals will be discussed. Some of the Wesleyan Department of Music's private lesson instructors may visit to answer questions and guide the student teachers through the issues, musical and extra-musical, that the lessons will raise. Written assignments will include responses to weekly readings, regular journal entries, and an end-of-semester paper.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC464 Laptop Ensemble
This course promotes knowledge and skills in live electronics performance, cultivates new musical repertoire for the group, and increases public awareness of new forms of working music technology while developing overall technological and troubleshooting proficiency. The course accomplishes this through regular rehearsals as well as a combination of required group and "satellite" performances. A range of repertoire is curated over the course of the semester involving new pieces created for the ensemble, as well as the reinterpretation of historical works using live electronics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC465 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

MUSC466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**

MUSC470 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**

MUSC491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

MUSC492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

MUSC500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.

Grading: **OPT**

MUSC505 Topics in Applied Ethnomusicology/Public Musicology
Work in applied ethnomusicology and public musicology includes a wide range of activities and formats, including: blog posts, magazine articles, public community music performances, tweets, podcasts, pre-concert and public lectures, forensic testimony, and the development of digital open-access tools and resources. What unifies these and many other possible forms is a desire by scholars to convey the cultural relevance and influence of music by engaging audiences outside the academy. Many are concerned with the social responsibility of the university, and developing methods and projects to collaborate with and give back to the communities in which we live, work, and research. The seminar will also address what the tools, methods, and values of the interdisciplinary field of digital humanities can offer applied ethnomusicology and public musicology. We will apply a suite of open-source analytic, pedagogical, networking, research, and presentation tools developed by digital humanists to our own projects. Through readings and research-creation projects we will better understand the work of institutions for cultural preservation, the role of activist and political scholarship, how to write accessibly for all readers, and how to convey our ideas in a number of different formats (e.g. blogs, "think pieces" or online articles, pre-concert lectures, open-access digital archives and research webspaces).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC506 Reading Ethnomusicology
As one of the two core introductory courses to ethnomusicology, this course lays a general intellectual groundwork for MA students with a concentration in ethnomusicology through in-depth reading of some of the most important writings in ethnomusicology. Focusing on both intellectual history and current issues, the course evolves around the key concepts and themes that have defined, expanded, or challenged the field. Students will critically and comparatively discuss the approaches and contributions of each work they study. At another level, this course also aims at broadening students' knowledge of world musics through studying a wide range of music ethnographies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC507 Practicing Ethnomusicology
This course provides a broad introduction to the research methods of ethnomusicology. The theory and practice of musical ethnography are examined, including fieldwork techniques, ethnographic writing, research ethics and representation, bi-musicality, approaches to the transcription and analysis of musical sound, ownership, repatriation, and dissemination of ethnographic materials. Students gain an understanding of the historical development of ethnomusicology and its relationship to allied disciplines such as musicology and

anthropology, become familiar with the work of prominent scholars in the field, and acquire practical skills of ethnographic research.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC508 Graduate Seminar in Composition
This course is designed for first- and second-year composition students in the Graduate Program. We will discuss and analyze works covering a broad range of compositional styles and techniques, inviting composers to share their original work and research. In addition, students often perform their own works and those of fellow course members. Special guest composers and ensembles interact with the course when possible.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC509 Special Topics in Contemporary Music
Offerings of this seminar focus on different issues of specific relevance to contemporary music compostion.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC510 Graduate Proseminar in World Music Studies
This introductory seminar is offered every fall as a required course for all first-year music MA students. The primary focus is developing research, writing, and critical interpretive and analytical skills necessary for initiating and completing the MA thesis projects. Students will be exposed to the breadth of the music department's specialties, and we will identify and discuss current issues that cut across concentrations within the department.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC511 Group Tutorial, Graduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

MUSC512 Group Tutorial, Graduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

MUSC513 Improvisation in Cross-Cultural Perspective
This course will explore musical improvisation around the world from a variety of theoretical and practical perspectives. Readings on theories of improvisational processes, as well as on specific musical traditions in the United States, India, Indonesia, Africa, and elsewhere, will complement practical transcription and analysis projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC515 Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture
Music circulates, moves, and is mapped through places, pathways, materials, bodies, and technologies. Together, we will encounter a series of conceptual frameworks and case studies that map the nodes, pathways, boundaries, and movements of sonic phenomena and musical life. How do the movements of music and musicians, the places they occupy, and the boundaries they negotiate communicate spatial information about music practices? How they circulate physically and virtually? What are the different methods that ethnomusicologists use to represent and map these circulating sounds? This seminar not only discusses the physical cartography and circulation of music cultures, but also, the virtual spaces music moves through. In the opening decades of the 21st century, new media practices and Web 2.0 modalities (e.g. Spotify, YouTube, Twitter, Facebook) have enabled new cartographies, patterns, and pathways of circulation, and engendered new approaches to participatory musicking. The seminar also raises questions of how technologies and modes of mobility interface with categories of identity, race, and gender.

In-class discussions foreground the role of movement and how musical movement is mapped and represented. The seminar addresses such topics as: musical movements by way of travel, habitation, refuge, trade, ghettoization, migration, or telecommunication; sonic geography; the ways sounds and music flow and vibrate through, in, and among places (e.g. urban streets and neighborhoods, spaces of protest, music scenes, performance venues); composition as travel writing; why some musics and musical actors are more mobile than others; how travel and migration shape music-making and musical senses of place; how the maps and cartographic representations of places are redrawn as music and musical actors move and aural culture makes claims to space; the place of border theory, cartography, migration studies, transnationalism, and human geography in ethnomusicology; the impact of travel, tourism, festivals, and tours on local music scenes; mobile media and technologies; how subversive and DIY cartographies of music cultures and their movements offer alternative representations to conventional social and political customs; and how the spatiality and materiality of musical mobility is experienced through aural, tactile, visual, and haptic sensations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC517 Sex/Gender/Queerness in Music and Music Scholarship
This seminar is designed to involve all music graduate students, namely students in composition, ethnomusicology, and performance concentrations, from both MA or PhD programs. This course will examine the major ideas in the recent feminist, gender, and queer studies in the fields of composition, ethnomusicology, musicology, and popular music studies. The class will explore varied approaches in critical re/presentation of femininity/masculinity/transgender/queerness in composing, listening, performing, and analyzing music and sound. We will consider the significance of engaging feminism, gender studies, and queer studies in our varied relations with music. In so doing, each member of the class will have the opportunity to design their own final creative project and to develop a dialogue with the ideas presented in the readings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC518 Music and Embodiment
This course will explore the role of the human body in music performance, transmission, and perception. Through discussion of interdisciplinary literature on embodiment, analysis of cross-cultural case studies, and ethnographic projects describing their embodied engagements with music, students will examine the biological and cognitive foundations of human musicality, the cultural and social dimensions of music as embodied practice and experience, and the body politics of musical expression and participation. Topics covered will include the role of movement and gesture in singing and instrumental playing; the interrelation of instrument morphology, body techniques, and music structure; the interplay of sound, space, and architecture; and intersections between human musicking, technology, and the environment.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC519 Current Issues in Ethnomusicology
This course concentrates on current scholarship, intellectual issues, and music ethnographies in ethnomusicology. It challenges the students with contemporary theoretical debates among ethnomusicologists, such as music and identity, music and gender, race and power, music and technology, and music and decolonialization. The course will closely examine the impact of interdisciplinary approaches on music ethnography through critical analysis of the readings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-MUSC**
Prereq: **None**

MUSC520 Explorations in Musicology
What is Musicology? How and why do scholars write about music? This course will investigate some of the motivation for making music a scholarly object of inquiry. After reviewing some of the methodologies through which scholarship has been constructed (archival research, reception history, historiography, practice-led research), we will assess and discover new ways to write about music and the cosmos. This topic will serve as a prism through which musicological debate can be understood, and contrasted with ethnomusicological and other approaches. We will draw on a range of musicological approaches and frameworks--cultural, historical, scientific, and environmental studies, posthumanism, mythology, and countercultural spirituality.

Course Objectives:

- To gain familiarity with diverse thinking about music inspired by the great beyond

- To understand some of the reasons why musicians turn to cosmology

- To develop cross-cultural understandings of the collaborations of musicians and astronomers

- To explore celestial motion as a form of design, or a mode of rationalizing

- To use musicology tools to find new ways of analyzing phenomena

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC521 Seminar in Interdisciplinary Studies
The course, one of the four core PhD seminars in ethnomusicology, examines a number of disciplines as they relate to general current theoretical issues and the interests of ethnomusicology. Visitors from other departments will present their disciplinary perspectives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC522 Seminar in Comparative Music Theory
In this seminar we will take a deep dive into historical texts of music theory from the 18th, 19th, and early 20th centuries. Because of its significant overlaps with physics, acoustics, aesthetics, and philosophy, music theory can serve as an important site for any inquiry into the history of ideas. Particularly distinctive in music theory of the 18th century and beyond are the linkages that join the empirical and physical sciences with speculative discourses on beauty and subjectivity. In addition to covering major figures in the canonic history of Western music theory after 1700, this seminar will focus in particular on moments of colonial encounter and exchange that occurred through music theory; our aim will be to understand how the modern, Western self was in part fashioned through its investigation of non-Western musical systems. For their final papers, students are encouraged to draw on their own research interests, placing them in dialogue with the historical texts and methodological concerns that we will explore together this semester.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

MUSC530 Department of Music Colloquium
This lecture series showcases new work by performers, composers, and scholars in ethnomusicology, musicology, music theory, sound art, and cultural history. The colloquia also invite dialogue with professionals working in arts education, curation, and administration. Typically, a 45-minute talk is followed by 30 minutes of questions and discussions.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

MUSC561 Graduate Field Research
Research in the field, normally on thesis project.
Offering: **Host**
Grading: **OPT**

MUSC563 Field Research or Academic Education (Graduate)
Graduate-level tutorial for field research or academic education.
Offering: **Host**
Grading: **OPT**

Grading: **OPT**

NEUROSCIENCE & BEHAVIOR (NS&B)

NS&B149 Neuroethology: Sensory Basis of Animal Orientation and Navigation
This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **BIOL149**
Prereq: **None**

NS&B193 Principles of Biology I Laboratory (Online)
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B193, BIOL193**
Prereq: **None**

NS&B198 Principles of Biology II Laboratory _ Online
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophysiology, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **BIOL198, MB&B198**
Prereq: **BIOL192**

NS&B210 Research Methods in Cognition
This course will examine the experimental method as a means of gaining knowledge about human cognition. Students in this course will learn about general research methods in cognitive psychology related to experimental design, understanding and interpreting research, and ethical issues involved in research with human subjects. Classic research paradigms in cognitive psychology will be explored through the use of interactive demonstrations and in-class experiments.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **PSYC210**
Prereq: **(PSYC105 AND PSYC200) OR (PSYC105 AND ECON300) OR (PSYC105 AND QAC201) OR (PSYC105 AND MATH132)**

NS&B213 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **BIOL213, PSYC240**
Prereq: **None**

NS&B220 Cognitive Psychology
Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC220**

Prereq: **PSYC105**

NS&B222 Sensation and Perception
This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC222**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

NS&B224 Hormones, Brain, and Behavior
Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL224**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [BIOL182 or MB&B182]**

NS&B225 Cognitive Neuroscience
This course provides an introduction to cognitive neuroscience -- the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC225**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

NS&B227 Motivation and Reward
This course will focus on motivation and reward, providing students with a background in and understanding of the various theories and approaches to studying the topic of motivation, including an introduction to some of the history and the current advances in the field. The course uses animal and human research to try to unravel the brain areas and neurotransmitter systems involved in different forms of reward, including food, sex, and drugs, and examine cases of disordered motivation such as drug addiction, obesity, and disordered gambling. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **PSYC227**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

NS&B228 Clinical Neuropsychology
This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC228**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

NS&B238 Psychological Theories of Learning and Motivation
The goals of this course are to help students develop practical, evidence-based skills for effective classroom learning, understand and appreciate research on the neuroscience of learning and motivation across species, and apply theories of learning and motivation to understanding human behavior. Course objectives for achieving these goals include: implementing evidence-based practices; dispelling myths about learning; explaining mechanisms of memory consolidation and factors that modulate it; distinguishing between and identifying components of operant and classical conditioning; and explaining how each theory of motivation can be used to understand why people behave in certain ways. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC226**
Prereq: **PSYC105 OR NS&B213**

NS&B239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works. This course counts as an elective or column 1 breadth course towards the psychology major.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL239, PSYC239**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B243 Neurohistology
The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **BIOL243**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [MB&B181 or BIOL181]**

NS&B244 Neuropharmacology
This course will introduce students to the physiological and molecular effects of drugs on neuronal activity and behavior. We will cover key concepts in neuropharmacology, including pharmacokinetics and pharmacodynamics, alongside techniques used in modern pharmacotherapeutic discovery as it relates to the treatment of neurological and neuropsychiatric disease. Student assessment will include in-class quizzes and exams.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL244, BIOL544**
Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

NS&B245 Cellular Neurophysiology
This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL245, BIOL599**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B247 Laboratory in Neurophysiology
The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems. Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (Aplysia), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL247**
Prereq: **([NS&B213 or BIOL213 or PSYC240] AND [BIOL182 or MB&B182])**

NS&B250 Laboratory in Cellular and Behavioral Neurobiology
The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL250, NS&B555**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B251 Laboratory in Basic Practices in Neuroscience
This course will provide students with the knowledge and some tools to solve problems in neurobiology. Topics covered include a fundamental review of neurobiology and approaches in neuroscience research methods, behavioral studies, tissue/cell preparation, and histology/microscopy.

Students will learn how the applications of advanced neuroscience techniques have answered fundamental questions in neurobiology and neurophysiology. Modern approaches and their applications will be discussed, including behavioral studies, tissue preparation and analysis, histology, and microscopy.

The learning outcomes will be assessed by a project, oral presentation of the project, written laboratory class reports (lab notebooks), and a lab practicum.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **BIOL251**
Prereq: **NS&B213 OR BIOL213 OR PSYC240**

NS&B252 Cell Biology of the Neuron
Understanding the cellular biology of neurons is critical for understanding neurological disorders as well as neuropharmacological methods for treating the nervous system. In this course, we will explore how neurons function, focusing on structure-function relationships of the molecular building blocks of neurons. We will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include cytoskeleton, cellular polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, neuronal plasticity, and regeneration. This course is designed to follow on from NS&B213 Behavioral Neurobiology.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**

Identical With: **BIOL252**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B254 Comparative Animal Behavior
In this survey course, we explore a wide range of animal behaviors at the proximate and ultimate levels of analysis. Main topics include: the principles of communication, genetic regulation of behavior, neuroethology, biological rhythms, hormones and behavior, reproduction, and animal cognition. Students gain foundational knowledge by engaging with textbook readings and traditional lectures. Students practice self-directed inquiry, peer-assisted learning, and scientific communication through in-class work sheets, group discussions, take-home assignments, and presenting topics of their choosing. Finally, students will learn about research and the academic career path through scholar highlights, interacting with guest speakers, and reading primary literature.
Offering: **Crosslisting**
Grading: **A-F**

NS&B257 Neurogenetics
Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **BIOL257**
Prereq: **BIOL181 AND BIOL182**

NS&B280 Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC201, GOVT201, PSYC280**
Prereq: **None**

NS&B280Z Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. Prereq: **None**

NS&B299 Waves, Brains, and Music
Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.
Offering: **Crosslisting**
Grading: **OPT**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B302 Neurobiology of Aging
This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to the study of aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should have a clear understanding of what aging is and what effects it has on normal brain function. In class, I will introduce the topic with slide presentation and after that, we will discuss the topic based on the scientific article discussion. After the last class, students will have extensive opportunities for feedback and will write a project and present it in class as an oral presentation. Student evaluation will include weekly quizzes, project, a midterm and final exams, and class participation/attendance.

Course Objectives:

By the end of this course, students will:

1. Gain a Comprehensive Understanding: Develop a comprehensive understanding of the neurobiological processes associated with aging, including neurodegenerative diseases.

2. Explore Structural Changes: Examine structural changes in the aging brain, such as alterations in neuron density, synapse formation, and brain volume.

3. Analyze Functional Changes: Analyze functional changes in the aging nervous system, including changes in memory, cognition, sensory perception, and motor function.

4. Study Neurodegenerative Diseases: Investigate common neurodegenerative diseases associated with aging, such as Alzheimer's disease, Parkinson's disease, and age-related macular degeneration.

5. Explore Cellular and Molecular Mechanisms: Explore the cellular and molecular mechanisms underlying age-related changes in the nervous system, including oxidative stress, inflammation, and genetic factors.

6. Examine Potential Interventions: Review potential interventions and strategies to promote healthy aging and delay or mitigate age-related neurobiological changes.

NS&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.
Offering: **Crosslisting**

NS&B304 Glia: Not just neuronal glue!
Historically, neuroglial cells (i.e., astrocytes, oligodendrocytes, and microglia) were considered the space-filling cells of the brain, simply the brain's "glue." Later, their primary role was considered metabolic support of neurons (e.g., buffer extracellular potassium, recycle neurotransmitters, myelination, etc.). However, the notion of glia as inert bystanders has recently been revised. It is now accepted that glial cells play critical physiological roles in normal nervous system development and function, including controlling brain wiring, modulation of synaptic transmission, regulating blood flow, and serving as the brain's lymphatic system just to name a few functions. Moreover, glia contributes to a variety of neurological disorders such as epilepsy, glioma, multiple sclerosis, neurodegenerative diseases, and psychiatric disorders like major depressive disorder and schizophrenia. Hence, these underappreciated cells are long overdue recognition. This is an interdisciplinary course in which students will engage in a focused, in-depth exploration of how glial cells contribute to neurological and psychiatric disorders. Lectures by both basic scientists and clinicians will highlight recent research on the molecular mechanisms by which glial cells contribute to the establishment and progression of neurological and psychiatric disorders.

This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes, students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include quizzes and assessments for a lay audience, a midterm and a final exam, class participation, and attendance.

Course Objectives:

1. Describe the development, histology, and normal physiological function of glial cells.

2. Describe the role inflammation plays in neurological and psychiatric conditions.

3. Describe the role traumatic brain injury plays in neurological and psychiatric conditions.

4. Describe the role genetics plays in neurological and psychiatric conditions.

5. Describe the physiology, pathology, and disease mechanisms of neurological and psychiatric conditions.

6. Demonstrate effective written communication skills to construct a succinct "News & Views" style summary of a primary research report for a lay audience.

NS&B316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives
The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

NS&B317 Neuroethics
Ethics, or morality, is one of the complex features of human behavior. This course will explore "Neuroethics" from two perspectives: (1) the neuroscience of ethics (i.e., the role of the human brain in ethical or moral behavior) and (2) the ethics of neuroscience (i.e. the ethical implications of manipulating the brain). The first perspective will relate to the premise that human morality is embodied in and operates based on the principles of the functional architecture of the brain, in particular, the cerebral cortex. The course will examine the organization and neural networks, especially of the association cortices (prefrontal Cortex: ventromedial, dorsolateral and orbitofrontal cortex; the cingulate cortex; temporal association cortex; and the inferior and superior parietal lobes). The course will review studies on the development of moral values in children and their neural underpinnings, leading to studies of the functions of the adult brain in moral or ethical decision-making. Topics such as the neural basis of resolving the "Trolley Problem," neuroeconomics, altruism, poverty, forgiveness, and compassion will provide the basis for this discussion. We will evaluate from a neuroscience perspective questions such as determinism and free will, and the sense of "self"--ideas that have played a significant role in ethical theories. Based on this body of knowledge, we will look at emerging ethical issues arising from technological developments that allow for manipulating the normal and diseased brain. A variety of questions will be examined, including brain imaging and privacy; enhancement of normal brain function through chemical, electrical, and electromagnetic stimulation; implanted neural interfaces; restoring brain damage; and neuroscience and the law.

NS&B320 Neuroscience of Learning and Memory
One of the fundamental functions of our nervous system is to encode and store memories, which allows us to survive and shape our personal identities. In this course we will cover different animal models of learning and memory, which have been useful tools to understand maladaptive memories underlying neuropsychiatric and neurological disorders such as post-traumatic stress disorder, substance use, and Alzheimer's disease. We will look in detail at how neurons and neural circuits change and respond when an organism learns something new or recalls a past experience. This course will also involve detailed discussions related to sex differences in both learning behavior and the biological basis of memory processes. The central focus of the course will be integrating current work in basic cellular and molecular neurobiology with the experimental

psychology of learning and memory. This course counts as an elective towards the psychology major.

NS&B323 Biochemistry of Neurodegenerative Disease
Broadly defined, neurodegenerative disease occurs when a specific class of neuron dies and thus fails in its biological action. In this course, we will delve into the many different, intricate ways neuron death can occur and cause disease. From the chemistry of neurotransmitters, aggregation of proteins, and the collapse of neuromuscular junctions, many areas of the neurobiology can go awry. The focus of the course will be on understanding the complex interplay of small molecules and proteins that keep neurons healthy and functional. In this course, we will use current primary literature and lecture to understand the varied topics. This course aims to improve skills in reading and analysis of primary literature as well as the written and oral presentation of scientific findings.

NS&B326 History of the Brain
The course is designed to trace the people, experiments, social forces, and ideas that have helped shape the legacy of current neuroscientific knowledge. The course will be broken up into five parts. Part one will look at Ancient Egyptian, and Classical Greek and Roman conceptions of brain function. Part two will investigate methodological advances in the study of electricity and cell-staining techniques -- both developed in the 18th-19th century -- that paved the way for novel ways of looking at brain function and human behavior and how these new conceptualizations impacted the culture at large. Part three will investigate the history of assigning specific cognitive, emotional, and behavioral function to specific structures in the brain. Part four will link developments in neuroscientific study with their impact (both positive and ill) on the treatment and care of people with psychiatric and neurological illness form the 19th-century to the present day. Part five will present a summing up and an overview of contemporary models of brain and mind.

NS&B328 Chemical Senses
The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.
Offering: **Host**

NS&B341 Psychology of Human Memory
This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience

of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

NS&B344 Developmental Biology of the Nervous System
Near the top of the list of unsolved mysteries in biology is the enigma of how the nervous system constructs itself. Here is a part of our body that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. We will also discuss some disorders and dysfunctions that may happen during the neurobiology of development, such as cerebral palsy, autism, and attention-deficit hyperactivity disorder (ADHD). We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a mid-term and a final exam, and class participation.

NS&B347 Mammalian Cortical Circuits
The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Most of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

NS&B351 Neurobiology of Learning and Memory
Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

NS&B357 Sex and Gender: From Synapse to Society
From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.

NS&B358 Neurobiology of Movement
This course is designed to take a comparative approach to understanding the major motor systems of the brain and will cover the basic elements of motor "control." However, the motor system does much more than contract muscles. Even the most basic movements such as walking require whole-body coordination that must be learned and adapted to our environment. During active sensation, motor systems even modulate our sensory perceptions. Much of what we have learned about motor systems comes from animals as diverse as crickets, electric fish, and birds. This course uses a comparative approach to understand the functions various brain regions contribute to our active lives.

NS&B360 Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits
This course will examine structural and functional neuroplasticity in the nervous system. The ability of the nervous system to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and discover how adult neurogenesis is altered by the aging process, physical exercise, stress, and neuropsychiatric disorders, such as epilepsy and Alzheimer's disease. We'll also learn about potential stem cell therapies for enhancing brain repair and plasticity after brain injuries. Students will prepare for class by reading scientific papers and reviews on the topic. In class, I will introduce the topic with slide presentations, and after that we will discuss the topic based on the scientific article discussion. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a final exam, and class participation.

NS&B373 Exploring the Brain-Body Interface: The Neuroscience of Basic Survival
Basic survival depends on the brain's regulation of fundamental behaviors and physiological pathways, such as drinking, eating, digestion, thermoregulation, breathing, and cardiovascular function. How do the brain and body communicate with each other to achieve homeostasis under different physiological states, and what goes awry in disease? How have species adapted to thrive in challenging environments, such as extreme temperatures and resource scarcity? In this advanced seminar, students will take a deep dive into the exciting research taking place at the brain-body interface. We will explore the main components of the peripheral nervous system, such as the vagus nerve and the dorsal root ganglia, that act as gatekeepers into our internal and external sensory worlds. We will also explore pathways within the central nervous system that regulate our basic bodily functions. By reading primary literature and review papers and participating in in-class discussions, students will gain deep knowledge of this burgeoning field of neuroscience. Through short written assignments and oral presentations on topics of their choosing, students will gain practical skills in scientific scholarship and communication.

NS&B378 Advanced Research in Cognitive Neuroscience
This advanced research course provides in-depth training in the experimental methods of cognitive neuroscience, focused on human memory. Students will work individually and in groups on semester-long projects, which will include literature reviews, experimental design, data collection, analysis, journal-formatted writing of results, and oral presentations.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC378**
Prereq: **None**

NS&B382 Advanced Research in Decision Making
This course is designed to allow students to conduct supervised research in the area of the cognitive psychology of reasoning and decision making. Working as a team with the instructor and other members of the research group, students will undertake a semester-long experimental research project on a topic in reasoning and decision making.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **PSYC382**
Prereq: **None**

NS&B383 Advanced Research in Learning and Memory
This advanced research course is designed to allow students to conduct supervised research in the area of human learning and memory. Working with the instructor, students will become part of an active research lab, undertaking a semester-long experimental research project that seeks to answer a current question in the field of memory research.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC383**
Prereq: **None**

NS&B390 Experimental Investigations into Reading
Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC390**
Prereq: **None**

NS&B392 Behavioral Methods in Affective Neuroscience
This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **PSYC392**
Prereq: **None**

NS&B393 Advanced Research in Cognition and Neuropsychiatric Illness
Students in this advanced undergraduate research course will work in teams on novel and ongoing research studies focused on understanding neurocognitive dysfunction and its treatment in neuropsychiatric illness. Students will be matched to a research project and will participate in different aspects of this research including background literature review, acquiring elementary skills in neurocognitive and symptom assessment, and collecting and/or analyzing extant data using SPSS. Students may also be involved in learning cognitive training procedures.
Offering: **Crosslisting**

NS&B545 Developmental Neurobiology
Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Grading: **OPT**

NS&B555 Laboratory in Cellular and Behavioral Neurobiology
The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.
Offering: **Crosslisting**

PHILOSOPHY (PHIL)

PHIL112 Virtue and Vice in History, Literature, and Philosophy
Examines the long, complex and sometimes contradictory associations of virtue with piety, salvation, righteousness, intensity, strength, and, more recently with vulnerability and suffering. Beginning with Confucius and Aristotle, and winding our way through Christianity, humanism, postmodernism until the present, we will explore the ethics, power, and politics of the ideas of virtue and vice.
Offering: **Crosslisting**

Gen Ed Area: **HA-COL**
Identical With: **COL228, CHUM228, HIST140**
Prereq: **None**

PHIL118 Reproduction in the 21st Century
This course will cover basic human reproductive biology, new and future reproductive and contraceptive technologies, and the ethics raised by reproductive issues.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL118, FGSS118, STS118**
Prereq: **None**

PHIL151 Living a Good Life: Chinese Lab (CLAC.50)
This optional "lab" class is intended for students (1) who have taken or are currently taking PHIL 210: Living a Good Life; and (2) who have little or no exposure to classical Chinese. Each weekly session will introduce students to aspects of the classical Chinese language--the written language of pre-20th-century China. Students will be able to read (in Chinese) and discuss (in English) key passages from the Confucian classics on which the Living a Good Life courses is partly based. No previous knowledge of Chinese (classical or modern) is necessary.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Identical With: **CGST224, CHIN151**
Prereq: **None**

PHIL152 Living a Good Life: Greek Lab (CLAC.50)
This half-credit "Greek Lab" uses a slow reading of Plato's Republic to invite students into the world of Ancient Greek. In the first three weeks of the semester, students will be introduced to the Ancient Greek alphabet and explore the meanings of two key Greek philosophical terms -- eudaimonia (often translated as "happiness" or "flourishing") and dikaiosune ("justice" or "righteousness") -- that will set the stage for our study of Plato. In subsequent weeks, we will progress through each of the ten books of the Republic, highlighting a pivotal Greek keyword in each class session and discussing how its nuances inform Plato's argument for the good life as the just life.

No prior experience with Greek (ancient or modern) is required, and all readings and discussion will be geared toward students with little to no background in classical languages. Our goal is twofold: to develop an appreciation for Attic Greek, and to discover how direct exposure to the language enhances our

understanding of a core text in the history of philosophy. Through short reading assignments prior to class, followed by group work and guided discussion in class, students will gain a unique perspective on some of philosophy's most enduring questions, while also developing the tools to navigate Ancient Greek terminology with confidence. Please note: this course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative and is not meant to replace a full introductory course in Ancient Greek. Students seeking more in-depth language training should enroll in GRK 101.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Identical With: **CGST225**
Prereq: **None**

PHIL160 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Identical With: **FILM360, HIST129**
Prereq: **None**

PHIL185 Let's Talk: Civil Disagreement and Dialogue
This class is designed to help students improve their communication and dialogue skills through character development. We will consider ways to build community and trust in order to productively engage in and facilitate difficult conversations across political and social differences. Rooted in a philosophical framework for the study of values and virtue, we will reflect upon and incorporate the moral and intellectual features of good dialogues into our everyday lives. Our goal is to become the sort of people who can communicate effectively across differences in careful, constructive, open dialogues aimed at truth and justice.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ALLB**
Identical With: **CSPL184, RELI184, SOC276**
Prereq: **None**

PHIL185F Reasonable Disagreements: Science, Philosophy, Magic, & Society (FYS)
Much of contemporary social and political discourse revolves around science--with many assuming that science is rational, objective, true, and the ultimate source of knowledge. As a result, it would seem unreasonable to believe in things like astrology, magic, alchemy, and other non-scientific ideals, or even to suggest that science might not be as objective, rational, or true as we might think. In this class we will explore different historical and philosophical approaches to distinguishing "legitimate" forms of inquiry and knowledge, considering the ways that our contemporary perspectives on science have been shaped by a long history of philosophy, "natural" philosophy, magic, theology, and "pseudosciences." We will investigate issues and concepts within and about science, including topics such as the nature of theories, the nature of scientific progress, and the relations among science, values, and society.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Identical With: **CSPL185F, RELI185F, STS185F**
Prereq: **None**

PHIL195 Mellon Mays Fall Seminar
This course is for participants in the Mellon Mays Undergraduate Fellowship program. It is designed to introduce students to the requirements and rigors of graduate school. A central focus of the seminar will be to develop a research project on which the students would work over a two-year period.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL196 Mellon Mays Spring Seminar
This course is for participants in the Mellon Mays Undergraduate Fellowship program. It is designed to introduce students to the requirements and rigors of graduate school. A central focus of the seminar will be to develop a research project on which the students would work over a two-year period.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL201 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-PHIL**
Identical With: **COL359, CLST217**
Prereq: **None**

PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant
Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' MEDITATIONS, Locke's ESSAY CONCERNING HUMAN UNDERSTANDING, Hume's ENQUIRY CONCERNING HUMAN UNDERSTANDING, and Kant's CRITIQUE OF PURE REASON.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Gen Ed Area: **HA-PHIL**
Identical With: **COL360**
Prereq: **None**

PHIL204 Philosophical Classics IV: 20th-Century Analytic Philosophy
This course will study selected writings by the antispeculative, logic- and language-oriented thinkers who have shaped 20th-century Anglo-American philosophy--including Peirce, Frege, Moore, Russell, Wittgenstein, Carnap, Quine, Ryle, and Austin.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-PHIL**
Prereq: **PHIL202 OR PHIL101**

PHIL205 Classical Chinese Philosophy
Topics in this critical examination of issues debated by the early Confucian, Daoist, and Mohist philosophers will include the nature of normative authority and value, the importance of ritual, and the relation between personal and social goods.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

PHIL206 Community-Engaged Philosophy: Teaching the Search for a Good Life
In this half-credit course, students who have successfully served as discussion facilitators for PHIL210: Living a Good Life will learn how to teach an abbreviated version of the course to local high school students in a nine-week voluntary after-school program. Having been trained in this special approach to discussion facilitation for their fall semester work in PHIL210, students will be able to deepen their knowledge of both course content (philosophy) and their facilitation skills through guided experiential learning. Course topics will focus on the skills of learning through close observation and reflection on one's teaching (reflective practice), understanding one's students (adolescent development, cultural consciousness), and pedagogical knowledge regarding lesson planning, student engagement, developing productive classroom climate, promoting self-directed learning, and authentic assessment. Students must have served as discussion facilitators/leaders for PHIL210.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ALLB**
Identical With: **CSPL310**
Prereq: **None**

PHIL207 Live Like a Philosopher
Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL207F Live Like a Philosopher (FYS)
Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

PHIL208 Teaching Fellowship for National Education Leaders
This course is for students to serve as Teaching Fellows for a course with the National Education Opportunity Network (neonopportunity.org), which provides college courses to Title I and Title I-eligible high schools nationwide. Please inquire with the instructor for information on course topics available this semester. Students will: -Host weekly 45-minute synchronous discussion sessions with 15-25 high school scholars via Zoom to enhance their engagement with course content, expose them to college-level seminar-style discussions, and help improve their analytical and metacognitive skills. -Evaluate and provide feedback on student work. Specific time assignments for sessions with high school students and required Teaching Fellow group meetings will be scheduled at the same time every week based on availability. This course counts for 10 hours toward the 20-hour practicum requirement in the EDST major or minor. The other 10 hours can be completed by repeating this class or through an independent practicum.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST405, QAC302, CSPL305**
Prereq: **None**

PHIL210 Living a Good Life
For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world? This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. For details about the structure of the course and a syllabus of class meetings, along with the locations of plenary lecture sessions, breakout sessions, and dialogue sessions, please see this year's course website and past versions of the course at the following link: https://livingagoodlife.com. Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.50-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WesMaps for more information.

PHIL211 Critical Philosophy of Race
What is race? Can philosophy account for it or describe it? This class will serve as an introduction to the field of philosophy of race, and examine the general crises or problems that race and racism raise for philosophical projects and methods. We will explore topics such as the ontology of race, its relationship to other social formations like class and gender, its foundations in violence, and its fugitive possibilities. We will read work from classical philosophers of race--like Charles Mills, Linda Alcoff, and David Haekwon Kim--and from scholars at the margins of philosophy--like Gloria Anzaldua, Adrian Piper, and Fred Moten.

PHIL212 Introduction to Ethics
This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness. Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience. The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence? Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism
This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldúa, and Frantz Fanon. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

PHIL214 Reasoning About Justice
This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

PHIL214F Thinking with Animals (FYS)
Non-human animals are all around us but often we don't think about them, and more often than not, we don't consider thinking with them. Some people continue to believe that animals don't think at all. In this course we will explore our relationships with other animals, what we think of living with and around them, what we imagine they think about living with and around us. We will

use philosophical, scientific, and literary texts to help us explore our complex relationships with other animals.

PHIL216F Whither Democracy? Introduction to Political Philosophy (FYS)
The course introduces students to some of the major philosophical perspectives that continue to inform contemporary social and political thought. We begin with the two paradigmatic arguments for obedience to the state and arguments for civil disobedience given by Plato and Dr. Martin Luther King Jr. We then look at the main justifications for obedience to the state--the social contract, freedom and equality (by looking at the topic of work and a universal basic income)--and then explore the contemporary crisis of democracy. We then conclude by exploring civil disobedience as the legacy of Dr. King in light of Tahrir Square/ Occupy Wallstreet/BLM.

PHIL217 Truth & the Poet: Introduction to Phenomenology and Lyric Thinking
What is lyric poetry? What is phenomenology? Can poetry think phenomenologically? What can phenomenology tell us about the way lyric poetry communicates experience? What is the nature of poetic experience, and how does it relate to the structure of experience more generally? What is the relationship between subjectivity and objectivity in experience and the meaning that we give to it? This course provides a foundation for (1) ways of reading and discussing lyric poetry, and (2) understanding and engaging with the school of philosophical thought known as phenomenology. We will read poems from a wide variety of periods, languages, and cultures including Sappho, Césaire, Vallejo, Plath, Dickinson, Rilke, Rimbaud, Stevens, Baudelaire, Dylan, and many others. We will build a basic approach to phenomenology through select readings of Husserl and Heidegger. This course is designed for students with no prior knowledge of philosophy or poetry. By working interdisciplinarily with various thinkers and poets, this course will introduce or continue familiarity with close reading in the College of Letters and other areas of the humanities. This course is recommended but not required prior to taking COL 309 (The Poet & Truth).

PHIL218 Personal Identity and Choice
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL220 Human Nature
The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL221F Philosophy as a Way of Life (FYS)
For many philosophers, East and West, philosophy has been more than an effort to answer fundamental questions. It has been an activity aimed at changing

one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of life. How does philosophical reasoning interact with lived practice? How do metaphysical views lead to ethical commitments? Despite their differences, Confucians, Christians, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

PHIL222 Global Philosophy
Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves--sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions--in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL229F History and Philosophy of Mathematics (for Everyone) (FYS)
Mathematical knowledge is a pinnacle of human knowledge and achievement, so we will never have an adequate account of human knowledge until mathematical knowledge is properly understood. For this reason, the course addresses the question: How do we come to know mathematical truths? What is distinctive about the course is that we will try to answer this philosophical question via scientifically, culturally, and historically informed reflection. This "humanizes" mathematical thought by finding its origins in humans (and in animals), and by finding it in specific cultural contexts and practices and in the historical expression and transmission of ideas. We will reflect on examples of proto-mathematical practices (measurement, record-keeping, writing), on the cognitive or psychological limitations that we overcome mathematics, as well as on some of the history of properly mathematical practices (arithmetic, geometry, algebra). We will identify the distinctive features of various mathematical practices and ask why they take the forms they do and what general morals can be drawn from them. You will also be invited to draw a philosophical moral about the nature of mathematical truth. Meetings will be a mixture of lectures, discussion, and review. Assignments will include writing assignments, problem sets, and "explainer" presentations in which you explain what's going on in a given passage. Hints and pointers about the readings will be provided. Never fear; no calculus will be presupposed or taught!

PHIL231 Reason and Paradox
This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno's Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

PHIL233F Bodies and Experiences (FYS)
Philosophers study the world with their minds. But who says that they should only discuss "mental" stuff such as concepts, rationality, or logic? This course is about bodies, and about the experiences that we have in virtue of those bodies. We will explore a variety of contemporary philosophical topics that have bodies and experiences at their center. These include the experience of skilled movement when we dance or play a sport, having a physical disability, or being shamed for our body size. We will discuss the ways we experience race, gender, sex, and sexual orientation. We will learn what makes a question distinctly philosophical and what methods philosophers follow to answer it. But most importantly, we will learn to be OK with the fact that there might be no true answer at all.

PHIL242 Introduction to Buddhist Thought and Practice
This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

PHIL250 Thinking By Analogy: The Philosophical Use of a Literary Form
"Juliet is the sun!" So says Romeo, but what does it mean to say someone is the sun? Presumably, Juliet is the sun in being the source of warmth, life, and light in Romeo's world. Yet Juliet is of course not the sun in being an object of astrophysical study, or a giant ball of burning gas. Romeo's claim works, it seems, through a curious interweaving of being and not-being; of sameness and difference. Analogical thinking serves as a source of illumination in all human cultures, and is a pivotal method of comparative and critical inquiry across a range of diverse fields. It facilitates the exploration of abstract themes in literature, aids in drawing insightful inferences in scientific discovery, navigates the complexities of case precedents in legal reasoning, and supports the crafting of compelling ethical arguments. This course will examine the art of analogy as a tool for philosophical understanding and creative thought, tracing its development in the history of philosophy through to its contemporary applications. Roughly half of the semester will focus on premodern perspectives on analogical thinking and verbal image-making, with an emphasis on the contributions of Plato and Aristotle. The remaining half will focus on later works of philosophy and literature that theorize about or employ analogical methods. Our interest throughout will be in how such thinking helps address issues surrounding the nature of reality, representation, and interpretation.

PHIL251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

PHIL252 Nietzsche - Science, Psychology, Genealogy
This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

Gen Ed Area: **HA-COL**
Identical With: **COL290, GRST290**
Prereq: **None**

PHIL253 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard

Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

PHIL254 The Rationalist Tradition in Early Modern European Philosophy
This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

PHIL255 Moral Psychology
Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives.

Prereq: **None**

PHIL257 Human Nature in Chinese Thought
This is a course on theories and practices regarding human nature in the history of Chinese traditions, such as Confucianism, Daoism, Legalism, Buddhism, and Neo-Confucianism. What does it mean to be a human? Do all humans have something in common? How should we conduct our lives with respect to those common characteristics? Thinkers from both Western and Eastern traditions have offered their own distinctive and thought-provoking answers to those questions. In the West we are more familiar with the concept of "rational animal" which remains the classical understanding of human nature since the time of Plato and Aristotle. In the history of the Chinese tradition, however, very different approaches towards human nature were adopted, such as the concepts of sympathy, effortless action, no-self, and original enlightenment. Together they can offer us some new insights into the concept of human nature beyond just rationality.

PHIL258 Post-Kantian European Philosophy
In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

PHIL265 Postanalytic Philosophy: Science and Metaphysics
The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy's relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL266 Confucian Ethics
Is human nature fundamentally good or fundamentally bad? How do we live a good life? Is there a universally correct priority in value conflicts? This course focuses on various ethical topics that are explored within the Confucian tradition. The course will combine lecture with discussion of primary and secondary sources, as well as group and individual presentations.

PHIL267 History and Limits of Aesthetic Theory
This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

PHIL268 Black Horror Film: A Philosophical Introduction
In this class, we will explore the philosophical implications of the tradition of Black horror cinema. We will explore the ethics of screened Black suffering, the genealogy of the Black monster, the connection between Black horror and Black existentialism, and the political power of cinema. This course will include close readings of films such as Atlantics and Nope, as well as earlier forms of the genre like Blacula and Son of Ingagi. We will contextualize these films with philosophical work by Frantz Fanon, Hortense Spillers, Kara Keeling, and Stanley Cavell, among others.

PHIL269 Modern Aesthetic Theory
As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather

suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebility of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

PHIL270 Environmental Philosophy
This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition--human-centered and individualist accounts of existence, agency, knowledge, and value. Shared questions may include: Is there a coherent way of distinguishing "nature" from the non-natural? What can we understand about non-human experience and value? How do people become motivated to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies? How do concepts of moral responsibility apply to climate change? How does environmentally directed action relate to social justice? When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another? Despite near consensus about our times being rife with environmental crises, concepts like "environment" and "nature" defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainability, they may not share any clear positive account of justice or of sustainability. Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique--each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics). Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

PHIL271 Data, Privacy, and Ethics
Paying for items at the grocery store has become automated thanks to self-checkout stations. Grabbing a coffee at McDonalds involves plugging an order onto a screen. These and other new technologies positively and negatively impact society. For instance, many of these now automated procedures were once occupations, and research shows that automation is displacing jobs that would normally serve underrepresented communities. What's more is that these machines store your information: what you bought, how many items, and at what time you made the purchases. The internet and various social media websites store even more information that is bought and sold to companies and organizations. Thus, should it be permissible for automation to replace workers? What is and isn't moral use of such information? Who is responsible if a machine does something wrong? Are there scenarios in which an organization should not have access to data? In this class, we will explore these questions and other normative questions on data-driven technologies by way of case studies on particular topics. We will the explore the following topics: data ownership, surveillance and privacy, algorithmic bias and its solutions, misinformation, 'the black box problem,' opacity in machine learning, and societal implications of automaton. Authors to be read include Emmanuel Mesthene, Cathy O'Neil, Wendell Wallach, Frances Haugen, Sina Fazelpour, David Boonin, and more. Some relevant movies that touch on these topics include Chappie, Coded Bias, the Minority Report, and the Great Hack.

PHIL272 Human Rights Across Cultures
Are human rights universal? Do cultural differences matter to judgments about human rights? We will look at the current international human rights institutional framework and at theoretical perspectives from Europe and America, China, and the Islamic world. We will look primarily at philosophical materials but will also pay some attention to the premises of international legal documents like the Universal Declaration of Human Rights and to the assumptions behind activist organizations such as Amnesty International.

Prereq: **None**

PHIL273 Philosophy of Law
This course will consist of four sections. We will start by understanding what law is by looking at a classic debate within the philosophy of law between natural law and legal positivism (whether law and morality are connected). We will then look at adjudication, the different methods that judges use to interpret laws and we will do this by looking at famous, recent supreme court judgments. We will then look at freedom of religion cases and think about whether religious practices should be exempt from general laws that normally applies to everyone. We will end with the largest section of the course: the legal regulation of freedom of speech and then connect it to freedom of speech on the internet.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL274 Self & Social Transformation
Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault's later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood's dawa movement from Egypt, Weight Watchers, and finally "ballroom" culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

PHIL275 Aesthetics of the Uncanny
In contrast to beauty, pleasure, and harmony, uncanniness stands as the ugly stepchild of philosophical aesthetics. In this class, we will survey ways of interpreting, explaining, and appreciating the aesthetic experience that more literally translates from German as "the unhomely" or "the not-at-home." As such, and more precisely, this course will explore the aesthetic experience of the unfamiliar or the unnaturally familiar. Our survey will take us through the horror genre, the post/modernist avant-garde, Internet aesthetics, terror-tinged spirituality, and psychedelicism, as well through theorists like Stanley Cavell, Sigmund Freud, and Cynthia Freeland.
Offering: **Host**

PHIL276 Virtue Ethics: Traditional, Comparative, and Contemporary Approaches
This course provides an overview and evaluation of various virtue-based approaches to ethics in the Western and Eastern traditions. In the first part of the course, we will get a basic sense for the structure and distinctive features of ancient virtue-based ethical theories. In the second part of the course, we will follow the trajectory of these approaches through to their revival in the late 20th century in the contemporary virtue ethics movement.

Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)
This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

PHIL278 Political Philosophy
The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Children, particularly impoverished black youth and, increasingly, immigrants, are funneled into correctional supervision. In this course we will ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL279 Race and Animals
Is there any connection between racism and human exceptionalism? This course will explore questions of if and how the processes of racialization and animalization are linked. Are racialized others always also dehumanized? What is the ontological significance of animalized racial caricatures? How do both processes connect to colonial violence? Readings will draw from a wide variety of disciplines and media, including primary historical sources, philosophical essays, film and documentary, and works in political theory, critical theory, post- and de-colonial theory, and history.

Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL280 Theory, Critique, Politics
The subject of this course centers on two questions in 20th century continental philosophy. First, what can theory bring to our understanding of politics? Second, what is the role of critique for political judgment? We will begin with Kant for an understanding of the meaning of "critique" that many 20th century continental philosophers draw upon. Following this introduction, the course will be split between German philosophers and French philosophers to allow us to understand the tensions and convergences between the two camps. The German philosophers we will read are Heidegger, Adorno, Herbert Marcuse, and Ernst Bloch. For the French philosophers, we will read Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, and Michel Foucault. By the end of the course students will be able to assess how different thinkers attempted to resolve the relationship of the philosopher to political society.

PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion
With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to

those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

PHIL286 Philosophy of Mind
This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

PHIL288 Sciences as Social and Cultural Practices
Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

Gen Ed Area: **HA-PHIL**
Prereq: **PHIL201 OR PHIL202 OR PHIL231**

PHIL290 Philosophical Logic
This course will study the philosophical and conceptual foundations of deductive reasoning, developing into an exact theory of the fundamental principles of such reasoning. A subsidiary aim is to equip the student with the necessary background for reading contemporary philosophical texts.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHIL**
Prereq: **PHIL231 OR PHIL230**

PHIL291 Reason and Its Limits
This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness--but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

Gen Ed Area: **HA-PHIL**
Identical With: **COL292, GRST292**

Prereq: **None**

PHIL292 Philosophy of Logic and Mathematics
This course focuses on some principal philosophical issues raised by logic and mathematics. In the first half, we will investigate a range of characterizations of the nature of logic and address the following questions. Is logic a set of true propositions or a set of rules governing correct reasoning? How, if at all, is logic connected with psychology, i.e., with facts about how we think? Is logic in some sense necessary? What, if anything, can logic tell us about the nature and constitution of reality? In the second half we shift to 3 main positions on the nature of mathematics. We start with the view that mathematics is just logic, a view known as logicism. We elaborate logicism by contrast with the Kantian view that mathematics rests on the spatial and temporal forms of one of our cognitive faculties, and against the background of certain conceptual development in 19th-century mathematics. We will go into some relatively non-technical details of how Gottlob Frege and Bertrand Russell attempted to justify logicism. We will uncover some deep problems with logicism, which partly motivates the other two positions we will examine: the (Kantian) formalist conception of mathematics advanced by David Hilbert, and the (Kantian) intuitionist conception of mathematics advocated by L. E. J. Brouwer.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-PHIL**
Prereq: **PHIL202**

PHIL294 Heidegger and the Being Question
Martin Heidegger argued in BEING AND TIME that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be BEING AND TIME and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger's own views about this question.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-PHIL**
Prereq: **None**

PHIL295 Philosophy of Mathematics and Logic
An introduction to the principal philosophical positions on the nature of mathematics and logic. The theories of mathematics to be examined include logicism, formalism, intuitionism, constructivism, and structuralism. The theories about logic to be discussed include monism vs. pluralism, extensionalism vs. intensionalism, theories of logical constants, and the status of second-order logic. Some of knowledge of deductive logic, such as PHIL 231 or MATH 243, is very helpful, but not required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PHIL**
Prereq: **PHIL202 OR PHIL231**

PHIL296 Philosophy of Psychology
How does the mind work? So-called "computationalists" think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called "mental representations") according to rules, and then issues "commands" to guide behavior. On the other hand, the "5E" (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. 5E theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn't happen "in a vacuum," and it isn't separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the 5E approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

PHIL298 Feminist Epistemology
Traditionally, the project of theorizing about knowledge (including concepts such as justification, belief formation, and rationality) assumes that such an enterprise is possible even if one ignores the context and situation of the knower: Philosophers can theorize about, say, belief formation, even if we ignore who is forming the belief--that is, we can ignore their educational, socio-economic background, gender, ethnicity, race, and disability status. Feminist epistemologists question this assumption: They think the context and situation of the knower is relevant for knowledge acquisition and generation. In this course, we will specifically focus on scientific knowledge, since science is typically assumed to be 'pure' and 'isolated' from socio-political and cultural influences. Some questions we will address include the following: Is the notion of scientific objectivity gendered? Is rationality gendered? In what ways can the process of scientific theorizing be more equitable? Do the ideals and standards of science themselves need to change? This course will study the work of Linda Alcoff, Elizabeth Anderson, Sandra Harding, bell hooks, Helen Longino, Maria Lugonés, Alison Wylie, and more.

PHIL301 Du Chatelet's Philosophy of Science
Èmilie Du Châtelet was a respected and lauded natural philosopher, mathematician, and physicist during her time. She published an essay on fire in 1739 alongside Voltaire, and published two editions of her work on physics and philosophy, namely the Foundations of Physics, in 1740 and 1742. After Du Châtelet's death in 1749, her former math tutor collected and submitted for publication her translation and commentary of Newton's Principia. It was successfully published and remains the leading translation of Newton's work today in France. Despite her success in the 18th century, Du Châtelet has been a neglected, and she remains an understudied figure in the history and philosophy of science since the 20th century. This course seeks to critically examine Du Châtelet's philosophy of science taking into account the authors with whom she engaged (Newton, Leibniz, and Descartes in particular) as well as the current state of scholarship concerning her work. The main text of study will be her Foundations of Physics, and the main topics of discussion will include the following: principles of knowledge, hypotheses, method, space and time, matter, motion, and gravity. Alongside the Foundations of Physics, we will also read Katherine Brading's Émilie Du Châtelet and the Foundations of Physical Science.

PHIL302 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

PHIL303 Plato's REPUBLIC
"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL304 Infinity and the Mathematization of Nature: Early Modern Perspectives
The "mathematization of nature" is a hallmark of the so-called "scientific revolution" in sixteenth- and seventeenth-century Europe. By privileging quantitative methods for measuring and explaining natural phenomena, thinkers broke with the largely "qualitative" forms of explanation typical of the Aristotelian tradition. Especially with the development of new mathematical methods--notably, advances in algebra, analytical geometry, and the development of infinitesimal calculus--the scope and explanatory power of natural philosophy was considerably extended. At the same time, however, new puzzles arose about how the pristine models of abstract mathematics could apply to the messy reality of concrete nature. This question was especially pressing in connection with new mathematics' exploitation the notion of infinity: infinite series, infinite extensions, infinitesimally small quantities, and even infinities greater than other infinities. Should we take the successful application of such infinitary mathematics to natural phenomena to imply that nature itself harbors an infinity of infinities? And how must we reconceive the cognitive powers of the human mind to make room for the fact that infinity has ceased to signify the unknowable as such and has instead become a primary tool for producing scientific knowledge?

In this seminar, we will examine some of the most prominent Early Modern applications of infinitary mathematical methods in the study of natural phenomena as well as central debates about what sense, if any, can be made of these procedures and their apparent success.

PHIL306 Sophist, Statesman, Philosopher: Plato's Later Metaphysics and Politics
How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides's puzzle and explore Plato's solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths
This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth--for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

PHIL327 Progressive Confucianism and Its Critics
Contemporary "Confucianism" designates a diverse set of philosophical, social, political, and religious approaches that are rooted in traditional East Asia and are playing significant--and increasing--roles in the modern world. "Progressive Confucianism" designates a subset of these approaches, emphasizing the ways that the Confucian tradition has developed throughout the centuries and arguing both that modern Confucianism must continue to develop, and that a properly developed Confucianism has much to contribute to contemporary philosophy and to modern societies. This seminar will explore the background out of which progressive Confucianism has emerged; its distinctive approach and key contributions to Confucianism and to global philosophy more generally; and central criticisms that it has faced, with sources ranging from more conservative (or even fundamentalist) Confucians to liberals and progressives.

PHIL331 The World Viewed
"Why are movies important?" With this question, posed on the second page of The World Viewed, Stanley Cavell both inaugurates and pre-emptively rejects the tradition of English-language philosophy of film. Published in 1971 and written at Wesleyan, Cavell's masterpiece was arguably the first full-length manuscript on film written by a British-American academic philosopher. And yet it has largely been disregarded or even denigrated by the tradition that followed it, in large part because of the radicality of Cavell's starting point. Rather than initiating the study of film by asking "Why are movies important?", most academic philosophers initiate that study by asking "What are movies, and how are they unique?" The force and novelty of Cavell's theory of film depends on his intuition that this latter question is the wrong basis for such a theory. In this course, we will closely read the entirety of The World Viewed. This exercise in close reading is also an exercise in desedimentation: by taking Cavell's poetic, autobiographical, far-reaching, and intentionally obscure writing seriously, we will attempt to deconstruct our notions of philosophy, film, thought, and the places the threee intersect. Special attention will be paid to Cavell's inaugural question. Readings will be supplemented by regular film screenings and additional work by Cavell, Noel Carroll, Susanne Langer, and others.

PHIL340 Human Nature
The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL344 Horror in Black Philosophy
This class will trace notions of horror through the history of Black philosophy, through close readings of works such as W.E.B. DuBois's Souls of Black Folk, Sylvia Wynter's "Unsettling the Coloniality of Being/Power/Truth/Freedom," Calvin Warren's Ontological Terror, and Denise Ferreira da Silva's Towards a Global Idea of Race. We will then examine Black horror films in the context of this philosophical lineage. We will pay special attention to the use of concepts of ineffability, inarticulability, and unintelligibility in the articulation of Blackness and anti-Black violence, and connect these concepts to the aesthetics and phenomenology of horror.

PHIL345 The Problem of the Negro as a Problem for Thought
Philosophical inquiries into the "the Negro problem" -- the question of what blackness is and how we socially reckon with its existence -- have historically flourished outside of the academic mainstream, weaving through a myriad of forms -- art, criticism, sociology, autobiography, oral traditions, etc. -- that are typically not counted as philosophy. This class will challenge our assumptions about where good and rigorous philosophy happens by attempting to track the metaphilosophical challenges that the study of blackness produces. We will read a survey of black studies texts from writers including Nahum Chandler, Marquis Bey, Christina Sharpe, and Fred Moten.

PHIL347 Ethics, Ecology, and Moral Change
People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

PHIL350 Radical Self-Care
This is a higher-level seminar on philosophy as a way of life that will explore how the notion of self-care has been developed and deployed throughout history by several political theorists and activists, including Mohandas Gandhi, MLK Jr., Nelson Mandela, Audre Lorde, Angela Davis, bell hooks, and Sara Ahmed.

When conducted in the present day, reflection on how one should live naturally requires attending to matters of sociopolitical concern, such as healthcare inequities, environmental degradation, wealth disparities, and prison reform. An investigation into the links between personal and social well-being has so far been something of a lacuna in the field of philosophy as a way of life, though in a variety of formulations and across several traditions, practices of self-care and self-formation have typically been seen as continuous with (and even a prerequisite for) a robust engagement with others and the pursuit of social justice causes. We will explore the connection between these two domains in this course. As a project during the semester, students will be asked to engage in a cause that matters to them by implementing selected ideas from the thinkers and activists that we'll be studying.

PHIL351 Deconstruction and Politics
Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

PHIL352 Black Thought and Critical Theory
This course follows Stuart Hall's insistence in "What is this 'Black' in Black Popular Culture?" that the theoretical articulations of "blackness" are always "conjunctural." We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century

thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of "blackness" at specific historical and theoretical conjunctions. How is "blackness" useful for social theory? Must we assume there is a transhistorical identity to "blackness"? In what ways does "blackness" conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

PHIL353 Blackness in the Anthropocene
To deny the "unprecedented" geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this "new era" has afforded us in terms of critical potential. From accusations that what we now call the "Anthropocene" has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the "Anthropocene" are still contested terrains. The aim of this course is to investigate the Anthropecene's many forms of socio-political erasures and theoretical "blind-sights." We will examine the ways in which Anthropocenean discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocenean times. We will explore questions like "who are 'recognizable/legitimate' victims in environmental disasters," "do events like hurricane Katrina or the migration crisis teach us anything about our human condition," and "what is the 'post' in post-humanism." We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

PHIL354 Ecologies of Attention: Biosemiosis, Attunement, and Ethics
We consider variants on biosemiotic accounts of meaning, following one thread through Emerson to Nietzsche, another from Peirce and James to Bateson (Ecology of Mind, 1972) and Gibson (Ecological Approch to Visual Perception, 1979), and a third through contemporary indigenous thinkers and anthropologists attempting to bridge scientific ecology and animist panpsychism--Kimmerer, Whyte, Kohn, Ingold, Strathern. While most of the texts here focus on the nature of meaning as a living process, they are also in constant dialogue with normative concerns, being both motivated by subversive or non-humanist ecological values and inspiring distinctive insights about how to lead meaningfully connected lives.

PHIL358 Decolonial Theory
Decolonial/Post-Colonial theory has always been a creatively different way to approach topics of social justice. This course has four parts. The first quarter will be both about defining what post-colonialism is through foundational texts, but also differentiating its methodology from liberalism and Marxism. We will then apply this knowledge by looking at how decolonization/post-colonialism feminism thinks differently about equality and freedom. In the second half of the course, we will focus on contemporary and cutting-edge readings on how decolonial/post-colonialism can help us think differently about our degraded environment and the looming climate crisis. The third quarter of the course links together Indigenous sovereignty and environmentalism, and we end the course with a look at the new internationalism about climate justice.

PHIL362 Origins of the Human Mind
Since classical antiquity, philosophers have often characterized human beings by way of contrasts between ourselves and nonhuman animals, particularly in terms of mental abilities humans possess and nonhuman animals (putatively) lack, such as reasoning and language. Only recently, however, have the sciences--particularly evolutionary biology, cognitive psychology, anthropology, and cognitive ethology--begun to offer the tools needed to characterize differences in the cognitive tool kits of different species and to attempt to piece together hypotheses about how human minds differ so greatly from those of our nearest relatives, the great apes, in spite of our genetic similarity and the comparatively brief period since the time of our last common ancestors. In this course, we will read several recent works by philosophers and scientists presenting theories of the evolution of distinctively human cognition.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PHIL**
Prereq: **None**

PHIL363 Philosophy of Perception
Roughly, perception is the cognitive activity embodied creatures engage in in order to find out things about their environment. In the most basic sense, perception involves conscious awareness of something other than ourselves, which causally depends on sensory organs (our eyes, ears, nose, etc.) being stimulated by something external to our physical body. In this course, we will explore the several different "levels" at which philosophers think about perception and the different questions being asked. At the metaphysical level, the central question is: What kind of "things" do we perceive? What is perceptual awareness of? At the epistemological level, we will deal with the question: can we gain knowledge about the world through perception? Finally, at the psychological level, we will ask: How do the psychological processes--studied by sciences like cognitive science, neuroscience, physiology, etc.-- relate to the metaphysical and epistemological questions?

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

PHIL381 Topics in Philosophy of Mind
This course will explore recent discussions in philosophy of mind. Topics will change from year to year. This year we will look at perspectival pluralism - the view that we understand the mind through a variety of cognitive lenses -- perspectives, frames, models -- that bring different things into focus and involve different forms of reasoning and representation. In addition to an introduction to perspectival pluralism, we will explore its possible implications in philosophy of science, theory of knowledge, truth, and metaphysics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-PHIL**
Prereq: **None**

PHIL383 Mind, Body, and World
This seminar in the metaphysics of mind and meaning begins with the philosophical and scientific background to cognitivist conceptions of mind and artificial intelligence. Both classic and recent criticisms of cognitivism and early AI emphasize the role of bodily movement and skill, language, social normativity, and engagement with and within the world as integral to conceptualization and understanding. These themes will then be explored constructively in some recent reconceptions of cognition as embodied and social-pragmatic, and of language and other conceptual repertoires as integral to bodily involvement in the world and with one another.

PHIL385 Understanding Life and Mind
Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

PHIL389 A Book of Nonsense: Wittgenstein's Tractatus
Wittgenstein's Tractatus Logic-Philosophicus is one of the most enigmatic and yet influential texts of 20th-century European philosophy. In this seminar we will explore its major themes in depth. In the Tractatus, Wittgenstein advances a conception of the nature of all representation. This conception invokes, on the one hand, the making of pictures, and, on the other, the uses of language. Central to the conception is the idea that representation and represented necessarily share a common form. So if language represents reality, then reality has the form of language. Wittgenstein thus declares, "The limits of my language signify the limits of my world." The pre-eminent place of language in the Tractatus is one of its most impactful legacies, contributing to the "linguistic turn" that can be observed in analytic philosophy around the turn of the twentieth century. Via this linguistic turn, Wittgenstein transforms the Kantian idea of the bounds of sense into a doctrine of meaningful linguistic use: distinguishing significant linguistic representations from signs that merely seem to make sense -- i.e., nonsense masquerading as sense. The Tractatus rejects "traditional" metaphysical philosophy as at bottom nonsense which says nothing true or false. But Wittgenstein also advances a distinction between what can be said by means of language, and what shows itself in our uses of language. And it turns out that what can be shown cannot be said. The twin ideas of nonsense and of showing lead to the deepest mysteries of the Tractatus: some seemingly "metaphysical" positions, such as solipsism and mysticism, in spite of being nonsense, nevertheless show what are, in some sense, truths. Most paradoxically, the words of the Tractatus themselves turn out to be nonsense and say nothing. Our final aim is an elucidation of what and how one is to learn from such a book of nonsense.

PHIL390 Topics in Metaphysics
Philosophy, especially in the European tradition, has perennially been interested in necessary features of reality, and in the nature of necessity itself. It has also been inveterately invested in rationality, and in discovering its nature. Is there such a thing as necessity that stems from rationality? One answer that has had much staying power is that logic and its laws frame the most fundamental type of necessity: it is impossible, for example, that there both is and isn't anything that travels faster than the speed of light in vacuum, for any such supposed situation violates the logical law of non-contradiction, and so is in a sense not really intelligible. (Except possibly in Australia.) This seminar is an examination of this answer through discussion of views of two seminal figures in modern European philosophy: Immanuel Kant and Gottlob Frege. We will focus on a recently prominent style of reading Kant as inheriting and transforming Aristotle's hylomorphism, and on the ways in which some proponents of this style of interpretation see Frege's conception of logic as closer to that of G. W. Leibniz. We will assess the extent to which such interpretations may be sustained by the actual writings of the philosophers just mentioned, as well as how well they hold up philosophically.

PHIL391 Topics in Philosophy of Logic and Mathematics
Is logic distinct from mathematics? This is the overarching question of this seminar. Specifically, we will discuss two contrasting types of answers to this question. One, which can be traced to Leibniz, holds that the answer is no, that the truths of mathematics, in part or altogether, are logical truths. The other, which can be traced to Kant, answers yes, because knowledge of mathematics requires some non-logical form(s) of intuition, perhaps of space and time. We will look closely at versions of the Leibnizian answer advanced by two originators of analytic philosophy: Gottlob Frege and Bertrand Russell. Both, but Frege in particular, have deep philosophical reasons for their positive answer, which is nowadays known as logicism. We will discuss some of those philosophical reasons. More importantly, both insist that their answers would not be truly compelling unless they identified precisely the fundamental truths of logic, and gave rigorous proofs of axioms of mathematical theories from the truths of logic. Part of our work is to understand Frege's proofs of the Dedekind-Peano axioms of arithmetic from his formulation of logic. We will discuss how Russell, through the Paradox that bears his name, demonstrates the inconsistency of Frege's logic. We will then investigate two programs of salvaging logicism. One, called neologicism, attempts to show how arithmetic is derivable from a consistent variant of Frege's logic. The other, due to Russell, is to circumvent his Paradox by a conception of logic as governing a hierarchy of types of entities, and then deriving arithmetic from this type-theoretic logic. We will next turn to a version of the Kantian answer advanced by David Hilbert. This answer, called (Hilbertian) formalism, holds that genuinely contentful mathematics rests on something like our intuitive knowledge of the possibilities of operations with signs, but that all of classical infinitary mathematics may be justified as a conservative extension of this content. If time permits, we will examine Kurt Gödel's theorems of the incompleteness of arithmetic and the trouble they raise for Hilbert's formalism.

PHIL393 Do We Truly Choose? Free Will in Philosophy and Theology
Free will has been a central pillar of philosophical inquiry throughout history. While contemporary debates often focus on issues of consciousness, mechanics, neurobiology, and physics, premodern discussions frequently revolved around the role of God in defining the boundaries of human freedom. This seminar will delve into diverse perspectives on free will, drawing from philosophical traditions across time and place -- both past and present, East and West -- with particular emphasis on the Islamic context. Through a close reading of key sources, the course examines how different thinkers have conceptualized human agency and the extent to which it determines action. Ultimately, the seminar will grapple with the vexed question: do human agents actually enable their acts, or, in the final analysis, truly "do nothing"?

PHYSICAL EDUCATION (PHED)

PHED101 Tennis, Beginning
This course is designed for those who have had no formal instruction in tennis. Basic grips and stroke technique will be taught for the forehand, backhand, serve, and volley. Also covered will be equipment selection, court etiquette, and proper scoring of games, sets, and matches. The introduction of basic doubles formation will also be included. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED102 Tennis, Intermediate
This course is designed for those who have taken beginning tennis and have learned the basic grips and strokes. The intermediate group will have a more detailed analysis of stroke technique. Ladder match play will give students the opportunity to learn singles and doubles strategy. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED104 Golf
This course is designed to teach the basic information necessary to play and enjoy the game of golf. Each classroom period is spent teaching beginning golfers to play the game correctly from the start: mastering the pre-swing, fundamentals of grip and aim, addressing the ball, and swing technique. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED105 Everyday Athlete
By the end of the course, students will be able to: 1. Demonstrate proper technique in fundamental movement patterns (squat, hinge, push, pull, carry, core). 2. Understand and apply key training principles such as overload, progression, and recovery. 3. Track and reflect on their own physical progress and wellness habits. 4. Build a personal weekly fitness plan that balances strength, cardio, mobility, and rest. 5. Recognize the mental performance components of training: motivation, focus, and resilience.
Offering: **Host**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED106 Fitness, Beginning
This course is designed to meet the needs of the individual interested in establishing a self-paced exercise program. The emphasis of this course is on the development of cardiovascular endurance. Individuals are instructed how to determine personal work-load levels and pace themselves during various classroom aerobic activities. Participants also receive additional instruction in strength training. Cardiovascular activities include fast walking, jogging, aerobic exercise, rope jumping, interval training, and rowing ergometer work. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED107 Inner Game of Golf
Golf is traditionally taught with verbal instruction from the teacher to the student. The students in this class will be taught with learning by feel. Through this unique approach, students will learn that their natural swing is already present within themselves and they simply need to allow it to come out. Through various drills and learning techniques, students will also discover that enjoyment of golf comes first, success comes second. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED112 Advanced Olympic Weightlifting and Powerlifting
The focus of the class will be on advanced weight room techniques. Half of the quarter will emphasize the art of Olympic weightlifting, including the clean and jerk and the snatch movements. The other half of the quarter will emphasize the art of powerlifting, including the three power movements--squat, deadlift, and bench press. Safety in these advanced techniques is always prioritized.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED118 Strength Training, Introduction
This course is designed for the individual who is unfamiliar with or has had no experience in programs focusing on building body strength. This course includes an introduction to the strength-training facilities at Wesleyan, proper strength-training techniques, and various elementary training programs. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED119 Strength Training, Advanced
This course is designed to meet the needs of students who are sincerely involved in strength training, body building, and/or competitive lifting. The course will include the use of four weight-lifting machines and instruction in competitive lifting techniques. There will also be discussion and demonstration of various progressive resistance modes that develop muscular strength and endurance. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED120 Swimming, Beginning
The objective of this course is to equip students with basic water safety skills and knowledge to make them reasonably safe while in, on, or about the water. We will introduce skills designed to improve stamina and basic coordination and to increase individual aquatic abilities. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED121 Swimming, Advanced Beginner
This course is designed to build upon the skills learned in beginning swimming. Emphasis is placed on improving the overhand crawl stroke with rotary breathing. Students will be introduced to the basic skills needed to learn the backstroke and breaststroke. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED122 Swimming for Fitness
This program is designed for the lap swimmer who is interested in learning and applying cardiovascular conditioning and training to swimming. Instruction is given in breathing exercises and pacing techniques. Individual work-load levels are determined, and self-paced programs are centered around those levels. Various training techniques are discussed and used in the program. A course prerequisite is the ability to swim 25 yards (any stroke) continuously and comfortably. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED123 Lifeguard Training
This course is designed to teach potential lifeguards the skills and knowledge needed to prevent and respond to aquatic emergencies. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED124 Squash
This course is geared toward the beginner but may be taken by those who have played some before. Basic grips and strike technique will be taught for the forehand, backhand, serve, and volley. Also covered will be safety precautions, court etiquette, and proper scoring of games and matches. The intermediate player may not get much attention the first two weeks while the beginners learn the basics. The first class of each quarter will meet in the lobby of the Freeman Athletic Center. Students must have their own racket and goggles.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED125 Table Tennis
Table tennis (also known as ping-pong) is a racket sport derived from tennis but distinguished by its playing surface being on top of a stationary table, rather than a court on which players stand. Table tennis uses paddles, vs a stringed racket, a small hollow plastic ball, and a net. While played in basements the world over, this course will teach you how to play the sport competitively. It will address technique, strategy, and rules and we will learn how to play both singles and doubles. Table tennis is played in so many different settings from backyards at home to rec rooms at work, and from university all the way to the Olympics. This is the perfect course to learn the sport from scratch or hone existing skills for social events, networking opportunities, or the sheer fun of playing.

Basic paddles and balls will be provided. Non-marking shoes are required.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED127 Tabata/Fitness Training
Tabata/fitness training is a program designed to enhance an individual's competency at all physical tasks. The student will perform exercise elements successfully at multiple, diverse, and randomized physical challenges. Areas of fitness will include cardiovascular endurance, stamina, strength, power, speed, balance, agility, and coordination. The start-stop training design is based on 20-second bursts of high-intensity workout followed by a 10-second rest. Each high-intensity burst/rest is repeated 4--8 times. The course will provide challenging workout programs that provide the health benefits of cardiovascular workouts with high- to moderate-intensity training and/or high- to moderate-intensity interval training. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED130 Skating, Beginning
This introduction course to ice skating will include lectures as well as work on ice and covers all basics of skating. Progress is self-paced. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED133 Interval Training
Interval training involves a series of low- to high-intensity exercise workouts interspersed with rest or relief periods. This course includes a variety of cardio drills and resistance training exercises designed to challenge and improve cardio and muscular strength while maintaining a strong core. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED137 Rowing for Fitness
This course is designed to introduce individuals to the use and benefit of rowing as a lifetime fitness activity. Through the use of the Concept II rowing ergometer, students will be taught proper rowing technique, conditioning, injury prevention, and ways to include rowing as a part of an overall exercise program. No previous rowing experience is necessary. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED138 Indoor Cycling
Indoor cycling, as an organized activity, is a form of exercise with classes focusing on endurance, strength, intervals, high intensity (race days), and recovery that involves using a special stationary exercise bicycle with a weighted flywheel in a classroom setting. During the class the instructor simulates the ride. Together you travel on flat roads, climb hills, sprint, and race! This is a truly fantastic cardiovascular class. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED139 Running for Fitness
This course is an introduction to the basic principles of a fitness running program. The training program will be individualized for each student based on individual goals. Topics will include proper training techniques, running gear, injury prevention, and stretching. All levels of running welcome. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED140 Racketlon
Racketlon combines tennis, badminton, squash, and table tennis into one sport. It is racketsports' answer to other combination sports such as triathlon or decathlon. Very commonly played in Europe, opponents play each of the sports to 21 points, and the winner is the person with the highest total points. Racketlon is also played in a doubles format where teams of two opponents play against each other. This class will introduce students to each of the four racketsports and how to play them in combination within the sport of racketlon. As a capstone experience, the class will play both a singles and a doubles racketlon. Previous racketsport experience will be valuable in this class, but is not required. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**

Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED142 Yoga for Fitness
This yoga class is designed to improve the health, performance, and mental acuity of students interested in improving their level of fitness. The class will blend balance, strength, flexibility, and power in a fitness format. This practical and user-friendly style of yoga is accessible, understandable, and achievable by individuals at any level of fitness. Attendance is required. The first class in each quarter will meet in the lobby of Freeman Athletic Center Lobby. This class meets in the second quarter.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED145 Indoor Cycling and Yoga
This is a combination class that warms up your body with some sun salutations, strengthens your lower body with a cycling ride, and then stretches your hard-worked muscles with yoga asanas. Yoga and indoor cycling are natural complements to one another because each exercise has a mental and a physical component and trains your body while developing mind/body awareness. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED147 Hatha Yoga
This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercise aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered: Warm-up:Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).

Stretching: Standing Separate Leg Stretching Pose -Dandayamana-Bibhaktapada-Paschimotthanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit)

Spine Strengthening, Sit up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit).
Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana(Sanskrit), Blowing in Firm Pose - Kapalbhati in Vajrasana(Sanskrit). Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

PHED148 Hatha Yoga
This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercise aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered:

Warm-up: Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).

Stretching: Standing Separate Leg Stretching Pose -Dandayamana-Bibhaktapada-Paschimotthanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit), Spine Strengthening Sit up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit).

Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana(Sanskrit), Blowing in Firm Pose - Kapalbhati in Vajrasana (Sanskrit).

Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

PHED152 Outdoor Hiking
Hiking is merely walking on a footpath, whether on a neighborhood path or a more adventurous trail that involves some climbing. Hiking is a moderate cardiovascular activity. Common benefits include weight loss, prevention of osteoporosis, decreased blood pressure, and relief of back pain. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED155 Speed Agility Plyometric Training
Learn to increase your cardio by speed and quickness. Agility training focuses on foot speed, quickly changing direction and improving reaction to visual cues. Plyometrics is an explosive movement to build muscle. The two will be combined to enhance the over all body conditioning. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**

Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED157 Pickleball
Pickleball is a paddle sport with combined elements of tennis, badminton, and ping pong, and played on a doubles badminton court. The net is similar to a tennis net, but is two inches lower. The game is played with a hard paddle that is similar to table tennis and usually made up of graphite or composite. The ball is comparable to a whiffle ball.

The game can be played in either singles' or doubles' matches. For new players, the basics of the sport are easy to learn. Typically, one session of three or four games is all that it takes to grasp the basics.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED158 Wiffle Ball
This course is an introduction to the game of Wiffle Ball. The course is designed to teach the basic rules, fundamentals, and techniques of the game. The course includes instruction on pitching, fielding, baserunning and hitting, as well as game strategy. We will also include game play to be able to compete with the skills that we have developed. Game play will focus on the slow/med speed pitch version of the game. Classes will take place in Bacon Field House, which offers an ideal size and surface for instruction and game play.
Offering: **Host**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED159 Cross Training Fitness
This class will use dynamic warm-up, dynamic flexibility, bodyweight, dumbbells, free weights, kettleballs, interval training, cardio/fitness machines, aquatic training, core training, and neuromuscular training in a fun, progressive way so students have a variety of ideas to implement to stay fit for life. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED160 Move Well: Mobility, Flexibility, and Longevity in Physical Activity
This course introduces students to foundational mobility, flexibility, and recovery practices designed to improve movement quality, reduce injury risk, and support lifelong physical well-being. Through guided foam rolling, stretching, and mobility exercises, students will develop an understanding of how the body moves and how to care for it amid academic, athletic, and daily life demands. Classes will emphasize practical, accessible techniques that can be applied before and after physical activity, during periods of high stress, or as part of a regular wellness routine. The course is designed for students of all fitness levels and athletic backgrounds and encourages sustainable, lifelong approaches to physical activity.
Offering: **Host**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED170 Sculling
This course is designed for those students that have completed the introductory Rowing for Fitness course (PHED137). It gives them the opportunity to take these skills to the water and learn a fitness activity that can last a lifetime. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **PHED137**

PHED172 Dorm to 5k: Running for Fitness
This course is designed to introduce students to the fundamentals of physical fitness, focusing on developing the stamina, technique, and mental strategies needed to successfully complete a 5K run. Students will progressively improve their endurance, strength, and overall fitness through a combination of running, cross-training, and education on healthy lifestyle habits. By the end of the course, students will be able to complete a 5K race and incorporate sustainable fitness practices into their daily routines.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

PHED195 Theory of Coaching
This course is designed to introduce students to the basic principles and theories of coaching. Students will become familiar with coaching philosophies, coaching objectives, leadership, and motivation styles. Students will also be introduced to team management and planning techniques, evaluation tools, training techniques, and risk management concerns for coaches. This course has no prerequisite and is open to all students.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED196 Basketball Fundamentals
This course is designed to introduce students to the fundamentals of basketball. From the basic skills of the game -- dribbling, shooting, passing, defending -- to the rules of the game that govern the sport. Students will enjoy both skill development and game strategy as the grow from 2 v 2 games into a full 5 v 5 environment. In addition to basketball fundamentals, the course will cover the importance of overall physical fitness and how to set themselves up for a lifetime of activity.
Offering: **Host**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHED201 Practicing Mindfulness Techniques During Activity
This course will provide students with an introduction to mindfulness and teach them mindfulness tools they can use to better self-regulate their emotional states and manage the stress-reaction cycle so many college students find themselves in.

Mindfulness can be brought to any activity. In this course, students will practice different mindfulness techniques through various types of physical activity such as walking meditation, yoga, and time in nature, to name a few. Part lecture,

part activity class, students will acquire skills that aid in reducing stress caused by many of life's major stressors: time, people, sleep, work/academics, roles, food, pain, change, fear, panic, and anxiety.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**

Prereq: **None**

PHED401 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYSICS (PHYS)

PHYS105 Calderwood Seminar in Public Writing: Radical Sustainability
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **ENVS235, WRCT235**
Prereq: **None**

PHYS107 Life in the Cell from a Molecule's Perspective
What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **MB&B117**
Prereq: **None**

PHYS111 Introductory Physics I
This course, along with PHYS 112 in the spring semester, is an introduction to the fundamental principles of physics. Employing trigonometry and algebra the goal is to provide tools for the quantitative understanding of a wide variety of phenomena, with many examples taken from the life sciences. The lab PHYS 121 is recommended. Since algebra is an important prerequisite for PHYS 111, we strongly recommend that all students take a diagnostic test prior to the start of the course. It can be found at https://www.khanacademy.org/math/algebra/test/subject-challenge?modal=1 Taking this "Course Challenge" will take 30-45 minutes and leave you with a good idea of where your algebra skills might need review. Follow-up guided lessons can be chosen at this website.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS112 Introductory Physics II
This is the second of two non-calculus courses covering fundamental principles of physics. The emphasis is on developing a conceptual understanding of the physical processes that govern our universe. Proficiency in elementary algebra, vector algebra, trigonometry, and arithmetic is required. The lab PHYS122 is recommended.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **PHYS111**

PHYS113 General Physics I
This course is the first term of a general physics course with calculus, recommended for students interested in majoring in the sciences. With the focus on Newtonian dynamics, PHYS 113 seeks to develop both conceptual understanding and the ability to use this knowledge to obtain quantitative predictions of how the universe works. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of mechanics. The associated lab, PHYS123, is highly recommended. PHYS113 and PHYS116 are part of a sequence of courses that lead into the physics major. PHYS113 is a pre-requisite for PHYS116; therefore, students must take them in sequence.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS116 General Physics II
This course is the second term of a general physics course with calculus, recommended for students interested in majoring in the sciences. The focus is on the physics of charged particles, including an introduction to the concepts of electric and magnetic fields. Students will develop both conceptual understanding of how charged particles give rise to both electricity and magnetism and the ability to use this knowledge to quantitatively describe the behavior of these particles in a variety of contexts, including electrical devices. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of electricity and magnetism. The associated lab PHYS124 is highly recommended; any student wishing to major in physics should enroll in PHYS124, since it is a requirement for the major.
Offering: **Host**
Grading: **OPT**

Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **PHYS113**

PHYS116P General Physics II Problem Solving
This course in the problem solving session component of General Physics II. All students enrolled in PHYS 116 must register for one section of PHYS 116P. This course meets weekly for a session focused on direct solving of problems based on material that is covered during General Physics II class time. Students will work in collaboration to develop the problem solving skills that will allow them to succeed in General Physics II and beyond.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.00**
Gen Ed Area: **None**
Prereq: **None**

PHYS121 Introductory Physics Laboratory I
This laboratory course provides experience with phenomena discussed in PHYS111 lectures. While this course is not required by the Physics Department, students planning to enter the health professions should be aware that a year of physics WITH LABORATORY is usually required for admission. Consult your major advisor if you are in doubt about similar requirements in your field. Each laboratory is limited to 16.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS122 Introductory Physics Laboratory II
This course provides laboratory experiences for students taking PHYS112.

This laboratory course teaches students how to obtain, process, and evaluate data and compare these data with quantitative models of how our world works.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS123 General Physics Laboratory I
This laboratory course provides experience with phenomena discussed in PHYS113 lecture, integrating calculations with the experiments. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS113. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS124 General Physics Laboratory II
This laboratory course is designed to be taken in conjunction with PHYS116. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS116. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **PHYS113 OR PHYS123**

PHYS170Z Introduction to Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA170Z, CIS170Z**
Prereq: **None**

PHYS205 Introduction to Mechanical Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA170, CIS170**
Prereq: **None**

PHYS206 Introduction to Electrical Design & Engineering
Students will learn about engineering mechanics, electronic control systems, and physical actuators (e.g., for movement) using a microprocessor platform, sensors and motors. The final project will require a student team to ideate, design, analyze, and optimize a mechatronic system. This course will allow students to better understand components, methods, and challenges in mechatronics systems commonly found in automation and robotics.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA175, CIS175**
Prereq: **None**

PHYS207 Introduction to Biophysics
This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.
Offering: **Crosslisting**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **MB&B207**
Prereq: **PHYS116**

PHYS210 How Things Fail: Mechanics and Materials
This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium, force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will entail design, implementation, and testing of an optimized model of a structure.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **IDEA210, CIS210**
Prereq: **IDEA170 AND (PHYS111 OR PHYS113)**

PHYS213 Waves and Oscillations
The properties of periodic motion recur in many areas of physics, including mechanics, quantum physics, and electricity and magnetism. The ubiquity of oscillatory motion in biological and chemical systems, as well as engineering, provides interdisciplinary importance for developing the formal description of periodic motion. We will explore the physical principles and fundamental mathematics related to periodic motions. Topics will include damped and forced harmonic motion, normal modes, the wave equation, Fourier series and integrals, and complex analysis. Principles and techniques developed in this course are central to many subsequent courses, particularly Quantum Mechanics (PHYS214, PHYS315), Classical Dynamics (PHYS313), and Electricity and Magnetism (PHYS324). An important component of this course is to develop the ability to use mathematical software packages to graph expressions, solve equations, and obtain numerical solutions to differential equations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **PHYS116**

PHYS214 Quantum Mechanics I
This course provides an introduction to wave and matrix mechanics, including wave-particle duality, probability amplitudes and state vectors, eigenvalue problems, and the operator formulation of quantum mechanics.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **(PHYS213 AND MATH221) OR (PHYS213 AND MATH223)**

PHYS215 Special Relativity
This calculus-based half-credit, half-semester introduction to Einstein's theory of special relativity promotes both a qualitative understanding of the subject and a quantitative problem-solving approach.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS217 Nonlinear Dynamics and Chaos
Why is it often very difficult to predict the behavior of systems even when we know the interactions between the constituent parts? When the interactions are nonlinear, the tools of linear mathematics are inadequate. When nonlinear systems have more than three dimensions in their state space, they are often chaotic with fundamental limits on predictability. This course systematically addresses one and two dimensional nonlinear systems, analyzing fixed points, bifurcations, and limit cycles. We then explore chaos in continuous systems and discrete maps. The course balances mastery of mathematical tools for analyzing nonlinear systems, development of physical intuition, and practical problem-solving.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **PHYS213**

PHYS219 Introduction to Contemporary Physics
This course examines the foundations of modern physics, including special relativity, the building blocks of matter, the fundamental interactions and gravity, and recent views of the universe such as entanglement, supersymmetry, strings, and dark matter and dark energy.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **(PHYS113 AND PHYS116)**

PHYS313 Classical Dynamics
This is a course in classical mechanics at the intermediate level that utilizes problem solving instruction and learning. It approaches Newtonian mechanics from a more advanced point of view and introduces Lagrangian and Hamiltonian dynamics.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS513**
Prereq: **(PHYS213 AND MATH222) AND (MATH221 OR MATH223)**

PHYS315 Quantum Mechanics II
This course will expand the formalism of quantum mechanics to include spin and angular momentum in three dimensions. The quantum theory of identical particles will be developed and applied to multi-electron atoms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS515**
Prereq: **(PHYS214 AND MATH223) OR (PHYS214 AND MATH221)**

PHYS316 Thermal and Statistical Physics
Thermodynamics and statistical mechanics are pillars of physics. Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered. Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for

understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS516**
Prereq: **PHYS214**

PHYS317 Molecular Biophysics Journal Club I
This course includes presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from journals including but not limited to the Biophysical Journal, Biopolymers, Current Opinion iIn Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B507, MB&B307, CHEM507, CHEM307, PHYS517**
Prereq: **None**

PHYS318 Molecular Biophysics Journal Club II
Presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from the Biophysical Journal, Biopolymers, Current Opinion in Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B508, MB&B308, CHEM508, PHYS518, CHEM308**
Prereq: **None**

PHYS320 Introduction to Tensors and General Relativity
Students will learn the basics of physics in curved spacetime and the use of tensors to describe physical quantities and laws. Geodesics in curved spacetimes and how space and time change in general relativity will be a particular focus.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Prereq: **MATH222 AND PHYS215 OR PHYS313**

PHYS321 Physics Research at Wesleyan
This seminar introduces students to the exciting and diverse research conducted within the physics department. Faculty members from various research areas will give talks showcasing their work, providing insight into both fundamental and applied physics. The goal is to help students explore different research topics, understand what physics research entails, and discover potential opportunities to get involved in faculty-led projects. This seminar is open to all students with an interest in physics who are curious about research, but have not yet chosen a specific focus, particularly first- and second-year students and also graduate students in their first year of study. The course is structured as a series of faculty presentations, followed by discussions where students can engage with researchers, ask questions, and explore potential research pathways.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **PHYS523**
Prereq: **None**

PHYS322 Physics Colloquium with Journal Club II
Students will review and discuss materials in preparation for attending the physics colloquium. Attendance at the colloquium is also required.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

PHYS324 Electricity and Magnetism
This course covers the classical field theory of electricity and magnetism. The core of the course covers electrostatics and magnetostatics with emphasis on both physical insight and the partial differential equations that describe these fields. We then cover electrodynamics to complete Maxwell's equations and to derive the elementary properties of electromagnetic radiation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS524**
Prereq: **PHYS116 AND PHYS124 AND PHYS213 AND MATH222**

PHYS339 Molecular and Cellular Biophysics
This course is an integration of the physical and chemical principles underlying biological systems from molecules to cells. The objectives are to develop an understanding of the underlying biological and physical principles that inform biophysical methods (e.g., protein-protein interaction studies, enzyme kinetics, spectroscopy, structural biology), how these concepts and techniques can be used to address open scientific questions, and how to critically evaluate their use in scientific literature. Particular emphasis will be placed on the biophysical concepts underlying studies of proteins, enzymes, and metalloproteins.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B309, CHEM309, CHEM509, MB&B509, PHYS539**
Prereq: **None**

PHYS340 Computational Physics
Most modern problems in physics cannot be analytically solved, making numerical solution necessary. This course introduces students to vital numerical methods used in modern computational physics. Students will develop code to calculate exact numerical solutions to a range of physics problems, such as N-body motion, the solution of Schrödinger's equation, and phase transitions. Methods covered include root finding, numerical integration of initial and boundary value problems, Monte Carlo techniques, and an introduction to machine learning methods. Code will be developed using Python and there will be opportunities to gain experience in the C programming language as well. Previous programming experience is strongly encouraged but not required.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **(MATH221 AND PHYS213) OR (MATH223 AND PHYS213)**

PHYS342 Experimental Optics
This is an experimental course in optics, including lenses, lens combinations, interference and diffraction, interferometry, and spectrometry.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS542**

Prereq: **(PHYS116 AND PHYS213)**

PHYS345 Electronics Lab
This laboratory course covers the fundamentals of analog and digital electronics: passive DC and AC circuits, linear transistor and integrated circuits, and digital integrated circuits.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS545**
Prereq: **(PHYS116 AND PHYS213)**

PHYS358 Condensed Matter
This calculus-based course is an introduction to the physics of the solid state. It includes topics such as the reciprocal lattice, elastic constants, band structure, and Fermi surfaces.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS558**
Prereq: **PHYS316 AND PHYS315 AND PHYS324**

PHYS377 Chemistry of Materials and Nanomaterials
This course will provide an introduction to materials chemistry, with a special emphasis on nanomaterials. Topics covered will include colloidal metal nanomaterials; semiconductors and quantum dots; carbon nanotubes, fullerenes, and graphene; metal-organic frameworks; self-assembly and metamaterials; electron and scanning probe microscopies; and lithography. The course will also discuss applications of these materials and techniques in areas such as plasmonics and sensing, catalysis, energy generation, and medicine.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **CHEM377**
Prereq: **CHEM251**

PHYS395 Structural Biology Laboratory
One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by X-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, cryo-electron microscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, protein purification, and column chromatography. The course will provide hands-on experience with spectroscopic and biophysical methods such as fluorescence, UV-Vis absorption, X-ray crystallography, isothermal titration calorimetry, and circular dichroism as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B395, CHEM395**
Prereq: **(CHEM142 OR CHEM142Z OR CHEM144) AND (CHEM325 OR MB&B208 OR PHYS207)**

PHYS401 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS402 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS407 Senior Tutorial (downgraded thesis)
Downgraded Senior Thesis Tutorial - Project to be arranged in consultation with the tutor. Only enrolled in through the Honors Coordinator.
Offering: **Host**
Grading: **A-F**

PHYS408 Senior Tutorial (downgraded thesis)
Downgraded Senior Thesis Tutorial - Project to be arranged in consultation with the tutor. Only enrolled in through the Honors Coordinator.
Offering: **Host**
Grading: **A-F**

PHYS409 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS410 Senior Thesis Tutorial
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS411 Group Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS412 Group Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PHYS419 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Host**
Grading: **Cr/U**

PHYS420 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Host**
Grading: **Cr/U**

PHYS421 Undergraduate Research, Science
Individual research projects for undergraduate students supervised by faculty members.
Offering: **Host**

Individual research projects for undergraduate students supervised by faculty members.
Offering: **Host**
Grading: **OPT**

PHYS423 Advanced Research Seminar, Undergraduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

PHYS424 Advanced Research Seminar, Undergraduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

PHYS465 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

PHYS466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

PHYS470 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

PHYS491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

PHYS492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

PHYS500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **ASTR500, CHEM500, BIOL500, E&ES500, MB&B500, MUSC500, PSYC500, MATH500**

Identical With: **MB&B508, MB&B308, CHEM508, PHYS318, CHEM308**
Prereq: **None**

PHYS521 Physics Colloquium I
Presentations by outside experts and discussion of material at the forefront of the discipline, emphasizing emerging, novel physics topics.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

PHYS522 Physics Colloquium II
Presentations by outside experts and discussion of material at the forefront of the discipline, emphasizing emerging, novel physics topics.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **([PHYS315 or PHYS515] AND [PHYS313 or PHYS513])**

PHYS523 Physics Research at Wesleyan
This seminar introduces students to the exciting and diverse research conducted within the physics department. Faculty members from various research areas will give talks showcasing their work, providing insight into both fundamental and applied physics. The goal is to help students explore different research topics, understand what physics research entails, and discover potential opportunities to get involved in faculty-led projects. This seminar is open to all students with an interest in physics who are curious about research, but have not yet chosen a specific focus, particularly first- and second-year students and also graduate students in their first year of study. The course is structured as a series of faculty presentations, followed by discussions where students can engage with researchers, ask questions, and explore potential research pathways.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **PHYS321**
Prereq: **None**

PHYS524 Electricity and Magnetism
This course covers the classical field theory of electricity and magnetism. The core of the course covers electrostatics and magnetostatics with emphasis on both physical insight and the partial differential equations that describe these fields. We then cover electrodynamics to complete Maxwell's equations and to derive the elementary properties of electromagnetic radiation.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS324**
Prereq: **PHYS116 AND PHYS124 AND PHYS213 AND MATH222**

PHYS531 Research Frontiers in Physics I
This seminar focuses on presenting general methods used in current theoretical and experimental research performed in the Physics Department. The exposition will be done by student participants, guided by the instructing faculty.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS532 Research Frontiers in Physics II
This seminar focuses on presenting general methods used in current theoretical and experimental research performed in the Physics Department. The exposition will be done by student participants, guided by the instructing faculty.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS533 Research Communication in Physics I
This course consists of weekly meetings for students to practice their scientific presentation and listening skills. Students will each claim responsibility for one or two meetings. Presentations may consist of research-relevant papers, practice talks for conferences, or research updates for the general graduate audience.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS534 Research Communication in Physics II
This course consists of weekly meetings for students to practice their scientific presentation and listening skills. Students will each claim responsibility for one or two meetings. Presentations may consist of research-relevant papers, practice talks for conferences, or research updates for the general graduate audience.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS539 Molecular and Cellular Biophysics
This course is an integration of the physical and chemical principles underlying biological systems from molecules to cells. The objectives are to develop an understanding of the underlying biological and physical principles that inform biophysical methods (e.g., protein-protein interaction studies, enzyme kinetics, spectroscopy, structural biology), how these concepts and techniques can be used to address open scientific questions, and how to critically evaluate their use in scientific literature. Particular emphasis will be placed on the biophysical concepts underlying studies of proteins, enzymes, and metalloproteins.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B309, CHEM309, CHEM509, MB&B509, PHYS339**
Prereq: **None**

PHYS542 Experimental Optics
This is an experimental course in optics, including lenses, lens combinations, interference and diffraction, interferometry, and spectrometry.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS342**
Prereq: **(PHYS116 AND PHYS213)**

PHYS545 Electronics Lab
This laboratory course covers the fundamentals of analog and digital electronics: passive DC and AC circuits, linear transistor and integrated circuits, and digital integrated circuits.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS345**
Prereq: **(PHYS116 AND PHYS213)**

PHYS549 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

PHYS550 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

PHYS558 Condensed Matter
This calculus-based course is an introduction to the physics of the solid state. It includes topics such as the reciprocal lattice, elastic constants, band structure, and Fermi surfaces.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PHYS**
Identical With: **PHYS358**
Prereq: **PHYS316 AND PHYS315 AND PHYS324**

PHYS563 Analytical Mechanics
Advanced classical mechanics: multidimensional motion, rigid bodies and rotational dynamics, chaotic dynamics, elementary continuum mechanics, and applications.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **(PHYS213 AND PHYS217 AND PHYS313) OR (PHYS213 AND PHYS217 AND PHYS513)**

PHYS565 Mathematical Physics
Historically, physics and mathematics are closely related. Physics uses powerful tools developed by mathematicians, while physicists, investigating the actually existing universe, provide mathematicians with new concepts and ideas to explore. This way, many mathematical techniques, and even entire areas of

mathematics, developed from the need to solve certain real-life problems posed by physical reality. The purpose of this course is to give students an overview of the powerful array of mathematical tools available for the solution of physical problems. Starting with the presentation of tools of complex analysis, we will apply them to the solution of ordinary and partial differential equations. We will encounter Fourier and Laplace transforms and will study the Green's function method for the solution of bound and scattering problems. We will also look into the elements of Group Theory and apply it to angular momentum in quantum many-body systems.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **MATH222 AND MATH223 AND PHYS313 AND PHYS315 AND PHYS324**

PHYS566 Electrodynamics
This course covers boundary value problems, Green's functions, multipoles, fields in dielectric and magnetic media, electromagnetic radiation, and wave guides.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **PHYS324**

PHYS567 Statistical Mechanics
This course will develop important concepts in statistical physics by examining several applications in detail. The areas covered will include the classical and quantum gases, critical behavior and phase transitions, and elementary transport phenomena.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **[PHYS316 or PHYS516]**

PHYS568 Quantum Mechanics
This course will develop advanced concepts of quantum mechanics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **[PHYS315 or PHYS515] AND [PHYS313 or PHYS513]**

PHYS571 Advanced Topics in Atomic and Molecular Physics
Topics in modern optical and atomic physics will be explored with an emphasis on precision time metrology. Fundamental questions, experimental challenges, and various applications will be discussed.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **PHYS315**

PHYS572 Advanced Topics in Atomic and Molecular Physics
Several plasma applications will be discussed, for example, in fusion, chemical analysis, surface treatment, and medicine.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **PHYS515**

PHYS573 Advanced Topics in Condensed Matter
The course will cover advanced topics in condensed-matter physics, with emphasis on current research problems within the department.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **PHYS324 OR PHYS524**

PHYS574 Advanced Topics in Condensed Matter
The course will cover advanced topics in condensed-matter physics, with emphasis on current research problems within the department. This course may be repeated for credit.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **PHYS324 OR PHYS524**

PHYS575 Advanced Topics in Theoretical Physics
This graduate course presents advanced topics in theory of relevance for current research in the department. The specific material varies each time the course is taught.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **PHYS213 AND PHYS214 AND PHYS324**

PHYS576 Advanced Topics in Theory
This graduate course will present advanced topics in theory of relevance for current research in the department.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-PHYS**
Prereq: **None**

PHYS588 Seminar in Atomic and Molecular/Chemical Physics.
Weekly seminars presented jointly with the Chemistry Department under the auspices of the Chemical Physics Program. These informal seminars will be presented by students, faculty, and outside visitors on current research and other topics of interest.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **CHEM548**
Prereq: **None**

PORTUGUESE (PORT)

PORT101 Portuguese I
Introduction to the Portuguese language and the Lusophone-world with a focus on Brazil. Students will develop basic language skills (reading, listening, writing, and speaking) along with an awareness of the Portuguese-speaking world in Africa, Asia, Europe and the Americas, including its presence in the United States. PORT 101 and PORT 102 are designed as a year-long sequence, with each course covering half the textbook, along with other materials including Brazilian film, poetry, media, children's literature, journalism and music.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**

Prereq: **None**

PORT102 Portuguese II
This course is the continuation of PORT 101, part of a year-long sequence of Portuguese. The second semester will further develop language skills (reading, listening, writing, and speaking) with increasing attention to oral proficiency and cultural topics. Music, poetry, short fiction, media, and journalism are integrated with the textbook to explore culture topics and current events. Students who plan to study abroad with Portuguese or wish to pursue further language study may petition to continue with a tutorial option.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

PORT155 Portuguese (Romance Language Speakers) I
This course offers students who have a strong working knowledge of Spanish or another Romance language the opportunity to study Brazilian Portuguese in an accelerated format. This course is conducted entirely in Portuguese. Completion of both semesters is required for study abroad in Brazil.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **CGST155**
Prereq: **FREN112 OR ITAL112 OR SPAN112**

PORT156 Portuguese (Romance Language Speakers) II
This course is the continuation of a yearlong course in intensive Portuguese. The second semester will concentrate on mastery of grammar points, with increasing attention to readings, writing, and cultural topics. Music, poetry, short stories, Internet resources, video, and journalism are integrated with the textbook.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **PORT155 or LANG155**

PORT401 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PORT402 Individual Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

PSYCHOLOGY (PSYC)

PSYC105 Foundations of Contemporary Psychology
This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for upper-level courses in psychology and as a valuable contribution to students' liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC105F Foundations of Contemporary Psychology (FYS)
This course will introduce the field of psychology through digital projects that include data collection and analysis, video production/editing, graphic design, and script writing. Students will learn about contributions of the brain to our behavior, sensation and perception, emotions, development, learning, mental health, memory, our social world, and more.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC105Z Foundations of Contemporary Psychology
This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for upper-level courses in psychology and as a valuable contribution to students' liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC117F Psychological Science and the Good Life (FYS)
How can we use psychological science to help improve our coping, resilience, and well-being? We are in an intense period of adjustment - historical change in how society functions, a recent shift to a world with Covid-19, and, for you, the transition to Wesleyan and college. Fortunately, psychological science has given us many helpful research findings about how the mind and brain work, how to improve well-being, and how to change our own behaviors and mindsets for a better life. In this course, we will learn about the scientific findings that point us toward well-being, and we will practice the skills that are supported by such evidence. The aim of the course is to leave with a better understanding of psychological science, a toolkit of research-supported practices we can use in our everyday lives, and a supportive community.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC118F Social Psychology of Close Relationships: Examining Human Connections (FYS)
This course introduces first-year students to reading, writing, and discussing research in social psychology focused on relationships. We will cover topics pertaining to experiences that are common in college or university, including friendships, love, attraction, romantic relationships, family relationships, and

group dynamics. Students will learn to review, understand, and critique research studies in social psychology. Students will be encouraged to apply research to their own experiences through several short writing assignments, group activities, and class discussions. Students will also develop an APA-style research paper over the course of the semester, which will be presented during class. This course counts as an elective towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC119F Conflict Resolution for College Students (FYS)
Human interaction inevitably results in conflict. Yet not all conflict is destructive; at times conflict can lead to growth. The college years are replete with examples of interpersonal conflicts, such as those with roommates, friends, family, professors, employers, and strangers. In addition, students may be part of a team or organization and conflict can happen at the organizational level as well. Further, individuals and organizations are embedded within different cultural contexts, which can also yield conflicts with other cultures in terms of values and priorities.

This course will focus on the psychological causes and consequences of interpersonal, intergroup, and intercultural conflict. Topics discussed will include the role of power, status, trust, communication, and social identity as well as different models of negotiation and mediation. Students will learn about various theories related to the causes of conflict along with practical strategies for navigating conflict in ways that are constructive.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC120F Stress, Trauma, and Resilience (FYS)
This First Year Seminar uses examples of stressful and traumatic exposures to war-time combat and interpersonal violence drawn from literature, film, and real life, to study the continua of changes to psychological and biological mechanisms involved in the human response to life threatening experiences. Psychiatric diagnosis of the response to stress and trauma are introduced and the utility and limitations of the descriptive approach are considered. Key mechanisms studied include those from the psychological domains of fear and anxiety, memory and cognition, habits and reward processing, and social processes. Alterations in these mechanisms are used to illustrate the manner in which trauma alters human behavior in ways that can be both adaptive and problematic. Students in this course also learn how to methodically read, interpret, and explain findings from scientific journal articles; oral presentations developed in class are used to create outlines for written assignments throughout the semester that, in turn, serve as building blocks for a final paper. This course counts as an elective towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC121F The Brain: Fact or Fiction?
Dopamine fasting, bio-hacking, and nootropics, oh my! It seems like every day experts present us with a new method to "fix" or "understand" our brains. But, how do we assess what is true in the world of neuroscience? In this course, we will discuss some common misconceptions about the brain perpetuated in the media and discover the origins of these common myths. Not only will we learn some neuroscience, but this course will also teach the basics of assessing scientific claims. Students will get practice reading primary scientific articles, writing accurately about psychological research, and critiquing brain science as depicted in their favorite (or least favorite) media, from podcasts to science fiction. Assignments will include two short writing assignments and one long paper that will be written throughout the duration of the course.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC122F Psychology of Communication (FYS)
Language is unique to human beings and a central component of human cognition. This class is designed to introduce students to the role of language in thought and the psychology that underlies how we use language to communicate, both as speakers and listeners. We will cover major themes in this area of study, including different levels of linguistic analysis, the psychology of communication processes, the relationship between speaking and thinking, and the role of efficiency in communicative behavior. The course will be largely discussion-based, centered on the regular readings of scholarly articles. There will be several short writing assignments and content-based assignments, as well as a longer final paper.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC123F Diagnosing Ourselves and Others: Psychological Classifications in Everyday Life (FYS)
Our understanding of self and others increasingly relies on psychological classifications such as anxiety, trauma, imposter syndrome, attachment style, boundaries, narcissism and the like. We share common meanings of these mental terms though usually we are unaware of their origins or scientific status. The seminar explores the circulation of this phenomenal psychological discourse in science, personal life and social media. We trace the evolution of popular diagnostics of ourselves and others, asking how their everyday usage shapes our cognition, behavior, and relationships. We also consider this vocabulary's underlying counter punctual themes of human vulnerability and resistance along with their effects on our moral life. This course counts as an elective requirement towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC124 Lab - Research Methods in Psychological Science
This course is the laboratory component that accompanies PSYC 212 Research Methods in Psychological Science with Lab. This course counts as an elective requirement towards the psychology major. PSYC 124 and PSYC 212 Research Methods in Psychological Science with Lab must be taken concurrently.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC125F Psychology of Queer Issues (FYS)
While the LGBTQ+ community itself, and acceptance of LGBTQ+ community, have increased over the course of history, members of the community continue to have unique interpersonal experiences and experience bias at both the

individual and systemic level. This course will cover major perspectives that aim to provide interdisciplinary insights into our understanding of the experiences of LGBTQ+ people. Topics for this course will include psychological theories that can contribute to widely held perceptions and attitudes about the LGBTQ + community, the role of ideologies, as well as intersectional perspectives that provide a more wholistic understanding of the queer experience. Additionally, this course will also discuss how the issues faced by LGBTQ+ people may not only stem from outside the community, but also within the LGBTQ+ community, and the unique consequences these may have. Through reading and discussion of theoretical and experimental research, we will analyze and learn the perspectives that researchers use to understand the experience of LGBTQ+ people, while also considering the social implications that can come from our current psychological understanding about the queer experience. This course counts as an elective towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC126F Speaking Your Language (FYS)
How do(es) the language(s) we speak shape our perception of the world? How is our perception of others shaped by their language, accent, or dialect? This course will investigate these questions through psychological research as well as a variety of other sources. We will learn about different theories of language acquisition, myths surrounding bilingualism as well as linguistic relativity. The second half of the course will focus on accents, accented speech, and accent bias. Throughout the course students will be challenged to consider their own linguistic backgrounds and examine how it shaped their experiences growing up. As a first-year seminar, this course will give students the necessary skills to become critical consumers of both empirical and non-empirical sources as well as to articulate their opinions in both spoken and written forms.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC200 Statistics: An Activity-Based Approach
This course will introduce the concepts and methods used in the analysis of quantitative data in the behavioral and life sciences. The approach will emphasize activity-based learning. Lectures will be used for the initial presentation and wrap-up of topics, but most class time will be devoted to activities in which students perform analyses. The topics covered will include descriptive statistics, sampling distributions, estimation, hypothesis testing, analysis of variance, and regression. All sections of this course will satisfy the statistics requirement for the PSYC major and the methodological requirement for the NS&B major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105**

PSYC201 Psychological Statistics
This course provides a general introduction to the use of statistics in everyday life and in psychological research. Special emphasis will be placed upon the development of critical thinking skills for evaluating the validity of statistically-based claims found in the media and in published research. In addition, the course will focus on the practical application of statistics and the logical connection between various analytic techniques. Both descriptive and inferential statistics will be discussed, and students will learn to clean and analyze data using Microsoft Excel and specialized statistical software (e.g., SPSS and/or R).
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105 OR PSYC101**

PSYC202 Qualitative Research Methods in Psychology
The goal of the course is to introduce students to basic research strategies for investigating human thought and behavior, with a focus on qualitative methods. The course provides detailed introduction to different qualitative methods, including interview, observation, case study, content analysis, archival, life history, and narrative techniques. Attention is given to the framing of research questions, design of studies, the ethics of psychological research with humans, and assumptions about human nature. The course is problem- and project-based, providing hands-on research experience.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC206 Research Methods in Cognitive Development and Education
This course introduces students to translational research in psychology--research that draws on psychological science to inform practice. The first third of the course will cover basic research methods, fulfilling the requirement for the major and preparing students to critically read, interpret, and engage in research. Then, we will investigate a series of case studies in which people have attempted to take basic research in developmental science and apply it to education settings. Example research-based interventions we might choose to study include mindfulness, growth mindset, early numeracy, reading instruction, teacher development, and anti-bias education. We will ask questions like: Which aspects of the research did the interventions account for, and which aspects were set aside? What are the factors that facilitate or block the use of research in practice? How are research-based interventions evaluated, and how do the outcomes of those evaluations affect our interpretations of the original research findings? What tradeoffs are made when putting research findings into the real world? How do seemingly small details about how interventions are designed and implemented affect the research-practice interface? Through our discussions, we will cover some core topics located at the bridge between research and practice such as practitioner expertise, science communication, participatory action research, educational design, and implementation science.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC207 Research Methods in Developmental Psychology
The goal of this course is to introduce students to basic research strategies and methods, with a focus on those pertinent to developmental psychology. Course materials will focus on conceptual, design, and analytic issues. This course is designed to provide students with the knowledge, skills, and understanding to conduct and evaluate research. In the service of these goals, students will participate in lectures, readings, discussions, and hands-on projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC208 Research Methods on Emotion
This course will focus on methods and techniques to study emotions in their social context, including emotional narratives, interviews, experiments with emotional stimuli (e.g., mood induction), surveys, and daily diaries. We will investigate which methods and techniques are best suited to study various

positive and negative emotions. The course will give special attention to ethical issues in emotion research.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC200 OR QAC201 OR ECON300 AND PSYC105 OR PSYC105F OR MATH132**

PSYC210 Research Methods in Cognition
This course will examine the experimental method as a means of gaining knowledge about human cognition. Students in this course will learn about general research methods in cognitive psychology related to experimental design, understanding and interpreting research, and ethical issues involved in research with human subjects. Classic research paradigms in cognitive psychology will be explored through the use of interactive demonstrations and in-class experiments.

Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC212 Research Methods in Psychological Science with Lab
This course introduces students to basic quantitative research methods in psychological science, with a laboratory component. This course is designed to provide students with the knowledge, skills, and understanding to conduct and evaluate research in psychological science. Lectures, readings, discussions, and hands-on research projects will be included. This course counts as a research methods or elective requirement towards the psychology major and the lab course counts as an elective. PSYC212 and PSYC124 Lab - Research Methods in Psychological Science must be taken concurrently.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Prereq: **None**

PSYC213 Research Methods in Social Psychology
The course examines research methods and techniques used in social psychology, including observation, correlation, and experimentation. Students will learn about study design, research ethics, and how to collect and analyze data, as well as effective ways to report results. All students are expected to undertake a research project.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC214 Research Methods in Sleep Research
Have you ever read an empirical research article and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting findings when researchers test the same phenomenon? This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. This is an interactive lecture and lab-based course. Through a series of hands-on lab assignments, students will acquire the necessary skill set to be able to critique, analyze, and design psychological research. Students will explore both qualitative and quantitative methodological designs used in psychological research (e.g., experiments, interviews, and surveys). Additionally, students will gain skills in conducting basic statistical analyses (e.g., correlation, t-test, ANOVA). The course will culminate with a final project in which students will design an original research study.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC214Z Research Methods in Sleep Research
Have you ever read about a published study and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting results when researchers study the same phenomenon? This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. Through a series of interactive lectures and hands-on class activities that complement the assigned textbook chapter readings, you will acquire the necessary skill set to critique, interpret, and design psychological research. The intensive nature of winter courses (10 classes, 4 hours each) requires that students are fully engaged with the material and will keep up with all assigned readings (~2 textbook chapters and 1 assigned empirical article per class). Course content will be grounded within the field of sleep health research, with an emphasis on quantitative research methods and design. You will be expected to apply your knowledge of research methods in psychology by designing an original research study on a sleep-related topic of your choice.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC220 Cognitive Psychology
Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as

inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B220**
Prereq: **PSYC105**

PSYC222 Sensation and Perception
This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B222**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

PSYC225 Cognitive Neuroscience
This course provides an introduction to cognitive neuroscience -- the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B225**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

PSYC226 Psychological Theories of Learning and Motivation
The goals of this course are to help students develop practical, evidence-based skills for effective classroom learning, understand and appreciate research on the neuroscience of learning and motivation across species, and apply theories of learning and motivation to understanding human behavior. Course objectives for achieving these goals include: implementing evidence-based practices; dispelling myths about learning; explaining mechanisms of memory consolidation and factors that modulate it; distinguishing between and identifying components of operant and classical conditioning; and explaining how each theory of motivation can be used to understand why people behave in certain ways. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B238**
Prereq: **PSYC105 OR NS&B213**

PSYC227 Motivation and Reward
This course will focus on motivation and reward, providing students with a background in and understanding of the various theories and approaches to studying the topic of motivation, including an introduction to some of the history and the current advances in the field. The course uses animal and human research to try to unravel the brain areas and neurotransmitter systems involved in different forms of reward, including food, sex, and drugs, and examine cases of disordered motivation such as drug addiction, obesity, and disordered gambling. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B227**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

PSYC228 Clinical Neuropsychology
This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B228**
Prereq: **PSYC105 OR [NS&B213 or BIOL213 or PSYC240]**

PSYC230 Developmental Psychology
This course is an introduction to human behavior and psychological development focusing on infancy and childhood. We will examine theory and research about physical, social, emotional, language, brain and cognitive development, with emphasis on cognitive development. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC230Z Developmental Psychology
In this two-week, full-credit course, students will learn how children develop across different domains -- physical, cognitive, language, social-emotional, identity, personality. We will emphasize the primary research literature in developmental science and expose students to the fundamental methods and theories used to study how children develop. In the process, we will learn to appreciate the beauty and detail of human development, as well as the ingenuity of research in the field over the last several decades.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **EDST231Z**
Prereq: **None**

PSYC239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B239, BIOL239**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

PSYC240 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B213, BIOL213**
Prereq: **None**

PSYC245 Psychological Measurement
This course will discuss various approaches to the measurement of psychological constructs such as intelligence and personality. Topics covered will include ability tests (e.g., IQ tests), achievement tests (e.g., classroom assessments), and diagnostic clinical assessments (e.g., the draw-a-person test). Strengths and weaknesses associated with various methods of measurement (e.g., self-report vs. performance measures) will also be discussed. Special attention will be given to the criteria used to critically evaluate the psychometric quality of measurement instruments. Students will learn the steps necessary to develop psychometrically sound, practically useful, and legally defensible tests. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC246 Behavior Change, Clinical Interventions and Health Promotion
This class will review the current science and historical context of mental and physical health behavior change approaches across three levels of intervention: the self, the individual, and society. Major topics will include fundamental behavioral principles, basic elements of empirically supported individual treatments (e.g., cognitive behavioral therapies, interpersonal therapy), and the design and evaluation of population-level health interventions. Lectures, readings, and clinical examples will illustrate both the theory and step-by-step practice of evidence-based approaches to behavior change across levels. Assignments may include a self-monitoring exercise, in-class role plays, a group project, an exam, and brief writing assignments. This course is designed to introduce students to a broad range of contemporary approaches to psychological and behavioral treatments; however, it will not provide the skills needed to implement psychological interventions. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC248 Adolescence and Emerging Adulthood
This course takes a global, cultural perspective to the study of human development during adolescence (ages 10-18 years) and emerging adulthood (ages 18-25 years). Students will gain a deeper understanding of key aspects of psychosocial functioning during these two developmental age periods. The course approaches adolescence and emerging adulthood as periods of both opportunity and vulnerability. Topics include cognitive development, love and sexuality, media, peer relationships, and risk and resilience. Class activities and assignments provide opportunities for students to actively engage with the material presented and discussed in class. Students also will have the opportunity to participate in a cross-cultural experience, culminating in a class documentary on a selected topic related to adolescent and emerging adulthood development. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105 OR PSYC105F**

PSYC251 Psychopathology
This course provides an overview of psychopathology, the study of "abnormal" behavior or mental disorders. From various theoretical perspectives, the ways that abnormality is defined will be considered. You will learn what we know and don't know about the phenomenology, diagnosis, and causes of mental disorders. Major domains of psychopathology, the symptoms and behaviors associated with common mental disorders, and the mechanisms hypothesized to be involved with them will be covered. The ways that different paradigms steer the development and implementation of treatments will be examined. This course is not designed to help resolve personal experiences with mental illness. This class will challenge widely accepted ideas about mental illness. You will learn to think critically about how mental illness is understood by society, mental health professionals, and clinical researchers. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105**

PSYC253 Educational Psychology
This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the

fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate. This course counts as an elective or column 2 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **EDST253**
Prereq: **None**

PSYC259 Discovering the Person
This course surveys major developments in psychology and psychiatry from 1860 to the present. Through readings and lectures, the course introduces the major schools, theories, and systems in the American "psy" sciences. We examine the kinds of persons who were "discovered," the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine phenomena that were located, catalogued, and explained by these sciences, including rationality, gender, cognition, personality, race, emotion, psychiatric disorders, development, intelligence, and the will. Attention is given to the scientific grounds of investigations and the empirical evidence sought in the century-long process of discovering and naming psychological kinds. Readings include primary source documents, histories, and philosophical analyses. This course counts as an elective or column 2 breadth course towards the psychology major. Students who have taken PSYC310 or SISP312 cannot take this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **STS259**
Prereq: **PSYC105**

PSYC260 Social Psychology
What leads us to become attracted to one person rather than another? How does prejudice develop, and how can it be reduced? Can psychological research help protect the environment and, if so, how? This course offers an overview of classic and contemporary social psychology, covering topics such as group behavior, friendship, stereotyping, conformity, obedience, and conflict resolution. This course counts as an elective or column 3 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC265 Culture in Psychology: An Introduction to Theory and Research
Culture is central to the study of mind and behavior. This course will provide students with an introduction to theory and research on culture in psychology. We will discuss what culture is, the methods that psychologists use to study culture, and how much of our behavior is universal or culture-specific. We will explore how culture influences how we think, feel, and behave. This course counts as an elective or column 3 breadth course towards the psychology major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC277 Psychology and the Law
This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature. This course counts as an elective or column 3 breadth course towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **AFAM287**
Prereq: **PSYC105**

PSYC280 Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC201, GOVT201, NS&B280**
Prereq: **None**

PSYC280Z Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

Identical With: **CGST238**
Prereq: **SPAN110 OR SPAN111 OR SPAN112 OR SPAN113**

PSYC282 People and Places: An Introduction to Environmental Psychology
This course explores human-environment interactions and the relationships between natural, social, and built environments in shaping people as individuals, and in turn, how people shape their environment(s). This course will critically explore theories and research that serve as the foundation of the field, as well as examine applications to real-world problems. This course will incorporate inquiry-based approaches to environmental psychology including the methods of participant observation and PhotoVoice. This course will engage ecological approaches and multi-level concepts in understanding human-environment dynamics and interactions from the home/personal space, community, and urban life, among others, as well as reflect on students' experience of their physical and social environments. As a survey course, this course will cover myriad topics with consideration to social justice, and varying conceptualizations and experiences addressing gender, race, class, age and people with disabilities. Considering the COVID-19 pandemic, this course will give special consideration to public space and home environments. As a discussion-based seminar, topics will ultimately be driven by student interest. Several films and podcasts may be incorporated into class. This course counts as an elective towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ENVS**
Identical With: **ENVS246**
Prereq: **None**

PSYC283 Trouble in Mind: The History of Psychiatry in the United States
This is a class in the history of psychiatry (and to a lesser degree, the disciplines that comprise clinical psychology). Many of us experience disturbances of mood, thought, and behavior over the course of our lives. When we do, we sometimes seek help from those with training in medicine or psychology. This has not always been the case, however. The question we explore in this seminar is how this came to be. In so doing, we will consider how theories seeking to explain the mind and therapies seeking to treat its invisible wounds have evolved over the past two-plus centuries, and how that evolution has shaped and been shaped by the shifting ways we see, hear, imagine, react to, and -- ultimately -- attempt to relieve mental anguish.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Identical With: **HIST295**
Prereq: **None**

PSYC285 The Narratives of Illness and Recovery
This course provides a detailed examination of primarily first-person accounts of illness and recovery. The focus will be on narratives that deal with mental illnesses and trauma or the psychological aspects of physical illnesses. We will explore the relationship of story and narrative to the healing process. Students will analyze across texts the common psychological traits that lead to recovery and generativity, as well as the response to loss and the experience of suffering. Particular emphasis will also be placed on the role of "the wounded healer," those persons who have suffered and then choose to assist others who face similar predicaments.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-COL**
Identical With: **COL200, ENGL200**
Prereq: **None**

PSYC286 Contemporary Literacy: What Does It Mean to Be Literate in the 21st Century?
How do humans learn to read and write -- and how has that learning evolved in a rapidly changing media landscape? This course explores the cognitive, social, and cultural processes involved in literacy acquisition, from early development to advanced academic and digital literacies. Rooted in Paulo Freire's concept of literacy as a practice of meaning-making and empowerment, the course invites students to critically examine how literacy is shaped by power, identity, and access.

Drawing on contemporary multiliteracies research, students will explore the diverse ways literacy is practiced in today's digitally mediated world. Special attention will be given to media and information literacy--essential skills for navigating misinformation, algorithms, and fragmented media environments. This course will also center on literacy as the foundation for civic learning and engagement, inviting students to think about the ways schools scaffold citizenry through literacy instruction. Through critical inquiry, hands-on analysis, and reflective practice, students will develop the tools to access, evaluate, and produce information in a way that is ethical, critical, and socially responsive.

This course is ideal for students interested in education, media studies, communication, and anyone seeking to understand literacy beyond the printed word in our complex digital age.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST226**
Prereq: **None**

PSYC287Z Understanding Inequality: Psychological and Educational Perspectives
This class focuses on recent work by psychologists, economists, and education researchers examining the effects of growing inequality on our collective mental health and on the school-related performance of children in particular. One class theme is that U.S. economic inequality has grown substantially in the past few decades, so that we now have one of the highest levels of inequality of any advanced industrialized country in the world. A second key theme is how few Americans are aware of the extent of these changes and their effects on the well-being of children and adults. The course also focuses on the nature of

the "American Dream" and how distorted perceptions of social mobility affect many Americans' concerns about inequality. The overall class concentrates on how these economic realities and related psychological misperceptions have combined to create a cascade of negative psychosocial and educational consequences, ranging from "deaths of despair" in adults, to increased mental health issues in children, to the growing polarization of educational opportunities and outcomes at all ages. Among the topics that will be covered are: the growth of wealth and income inequality in U.S. (including comparisons with other advanced, industrialized countries); psychological research on how people perceive and misperceive inequality; the moral nature of inequality in relation to thinking about distributive justice; the psychological literature on the consequences of inequality; and, finally, the limitations of a meritocracy for addressing these consequences. This course fulfills the Category 1 requirement for the Education Studies Major and Minor, and an elective credit for the Psychology Major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST211Z**
Prereq: **None**

PSYC288Z Zero to Infinity: The Psychology of Numbers
What are the origins of mathematical thinking, and why do some people become experts while others get nervous calculating a tip? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their intuitive understanding of numbers, geometry, and space to successfully navigate their environments. Yet, individual differences in math achievement emerge early in development and often persist throughout children's education. In this course we read and discuss both foundational and cutting-edge articles from cognitive science, education, and psychology to understand how mathematical thinking develops. We will also tackle questions such as: How do culture and varying social contexts affect numerical understanding? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? This class will involve a blend of synchronous class-time meetings and asynchronous work.
Offering: **Crosslisting**

Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST250Z**
Prereq: **None**

PSYC293 Towards Antiracist Psychological Science
What does it mean to conduct "antiracist" studies that "decenter whiteness"? What investigative practices are warranted and what scientific foundations are necessary for doing innovative, antiracist research? This course takes up these questions, grounding exploration of scientific practices in a fuller understanding of psychology's history and epistemology. We examine past practices that fostered and sustained racist beliefs, consider race theories, and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These and related concepts along with historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105**

PSYC295Z The Science of Happiness
Positive psychology is the study of human strengths and happiness. The field has compiled an enormous research base offering evidence of the fundamental components of well-being and flourishing. While early research employed a narrow, "Western" definition of happiness, the discipline later broadened its focus to include traditionally "Eastern" concepts such as social harmony and compassion. More recently, the field has been redefined through second-wave and third-wave positive psychologies, which seek to break free from the binary concepts of "positive" and "negative" in favor of a dialectic approach, while utilizing concepts of flourishing through suffering, and including models for systemic change. This course will primarily utilize journal articles to trace the history and development of positive psychology from its inception to the current state of the field. Core concepts will be discussed and critiqued. Students will be required to keep a "flourishing journal" and complete out-of-class activities for personal reflection and practice of individual experiences of well-being. Additional course requirements include shorter and longer reflection papers, in-class discussion, and a final project. This course is being offered as a blend of synchronous class meetings and asynchronous work.
Offering: **Host**
Grading: **A-F**

PSYC303 Social Media and Development: Constructing the Self Online
Humans typically develop their view of themselves, or their self-concept, through interactions with others in their community. For adolescents, this takes place typically within school environments and other community institutions as they begin to rely less on their parents. With the dawn of social media, these interactions are taking place on a global scale with increased anonymity. How does this social and technological change impact how teens and young adults form their views of themselves? What implications do these changes have for adults who work with adolescent populations? This course will explore these questions, illuminating an understanding of the accepted model of self-concept development and the impacts of social media. Students will also explore related concepts of self-esteem and social development. This course will use empirical research to examine and critique the overall negative view of social media usage amongst adolescents, and train students to probe commonly accepted viewpoints using careful scholarship. The course will provide a discussion of research standards in the field of social media research and encourage critical evaluation of empirical research.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST333**
Prereq: **None**

PSYC304 Celebrating Learner Differences: Creating Inclusive Classrooms Using Research
How do humans develop the capacity to learn? This course will focus on the dynamic influence of the cognitive, social emotional, and demographic factors involved in this process, using a research-based framework. Students will be encouraged to evaluate the learning process throughout K-12 educational settings and will explicitly learn to read and critique research in the learning sciences. Students will also evaluate the utility of research in different learning settings and the effectiveness of associated pedagogical tools and strategies.

The course will begin with a discussion on learning sciences research and explicit instruction for research evaluation. Topical considerations will include the development of human memory, executive function, attention, and other

cognitive processes that underlie learning and information processing. Students will also explore background factors, including socioeconomic status, and social emotional factors, including motivation and emotion, as predictive and associated factors for learning and information processing.

This course fulfills the Category 1 requirement for the Education Studies Major and Minor. It satisfies the ELECTIVE only requirement for the PSYC major.

Identical With: **EDST335**
Prereq: **None**

PSYC305 Neuroscience of Learning and Memory
One of the fundamental functions of our nervous system is to encode and store memories, which allows us to survive and shape our personal identities. In this course we will cover different animal models of learning and memory, which have been useful tools to understand maladaptive memories underlying neuropsychiatric and neurological disorders such as post-traumatic stress disorder, substance use, and Alzheimer's disease. We will look in detail at how neurons and neural circuits change and respond when an organism learns something new or recalls a past experience. This course will also involve detailed discussions related to sex differences in both learning behavior and the biological basis of memory processes. The central focus of the course will be integrating current work in basic cellular and molecular neurobiology with the experimental psychology of learning and memory. This course counts as an elective towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **NS&B320**
Prereq: **NS&B213**

PSYC316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives
The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.
Offering: **Host**

PSYC320 Practicing Science: Thinking and Writing
This course is designed to provide students with instruction and practice in academic writing in science. Students will complete and discuss assigned readings about academic science writing. They will engage in writing with peer and instructor feedback, in a supportive community of practice. This course counts as a specialized or elective requirement towards the psychology major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC321 Seminar on Social Action
This seminar introduces students to theoretical and empirical research on conceptions, perceptions, and outcomes of strategies for social action, including scholarship on individuals' and groups' change efforts. In this course, students will engage with social psychological concepts both classical and modern to answer pressing questions such as when is social action (in)effective or (in)authentic? What (dis/en)courages people to join movements and what behaviors support (or undermine) them? What explains backlash against change initiatives? Students will be asked to consider the benefits and constraints of social action strategies and develop their own theories as to what forms of action are most (or least) conducive to change and when. This course counts as a specialized or elective requirement towards the psychology major. This course counts as a specialized or elective requirement towards the psychology major.

Prereq: **PSYC105**

PSYC322 Psychology of Decision-Making
We make decisions all the time. The vast majority of decisions have little consequence, though some are monumental and can deeply affect our lives. The broad goal of this course is to explore the science of judgment and decision-making. We will leverage concepts and research from the fields of psychology, neuroscience, and economics to understand how an individual makes judgments and decisions, why these decisions are subject to bias, and whether humans are "rational" decision-makers. Along the way, we will examine major questions that have guided decision research, consider domains where decision-making could be improved, and think of practical applications of course concepts to everyday life. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite (plus any courses listed under individual sections), as this is an upper-level course (that relies on student contributions) in the Psychology Department.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC326 History of the Brain
The course is designed to trace the people, experiments, social forces, and ideas that have helped shape the legacy of current neuroscientific knowledge. The course will be broken up into five parts. Part one will look at Ancient Egyptian, and Classical Greek and Roman conceptions of brain function. Part two will investigate methodological advances in the study of electricity and cell-staining techniques -- both developed in the 18th-19th century -- that paved the way for novel ways of looking at brain function and human behavior and how these new conceptualizations impacted the culture at large. Part three will investigate the history of assigning specific cognitive, emotional, and behavioral function to specific structures in the brain. Part four will link developments in neuroscientific study with their impact (both positive and ill) on the treatment and care of people with psychiatric and neurological illness form the 19th-century to the present day. Part five will present a summing up and an overview of contemporary models of brain and mind.
Offering: **Host**

PSYC327 Psychology of Queer Issues
While the LGBTQ+ community itself, and acceptance of LGBTQ+ community, have increased over the course of history, members of the community continue to have unique interpersonal experiences and experience bias at both the individual and systemic level. This course will cover major perspectives that aim to provide interdisciplinary insights into our understanding of the experiences of LGBTQ+ people. Topics for this course will include psychological theories that can contribute to widely held perceptions and attitudes about the LGBTQ + community, the role of ideologies, as well as intersectional perspectives that provide a more wholistic understanding of the queer experience. Additionally, this course will also discuss how the issues faced by LGBTQ+ people may not only stem from outside the community, but also within the LGBTQ+ community, and the unique consequences these may have. Through reading and discussion of theoretical and experimental research, we will analyze and learn the perspectives that researchers use to understand the experience of LGBTQ+ people, while also considering the social implications that can come from our current psychological understanding about the queer experience.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC327Z Psychology of Conflict Resolution
This course will focus on the psychological causes and consequences of interpersonal, intergroup, and international conflict. Topics discussed will include the role of power, status, trust, and social identity. Students will learn about various theories related to the causes of conflict, as well as practical techniques for navigating conflict, including negotiation, mediation, and facilitation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC329 Neural Costs of War
This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

PSYC330 Engaging Antiracist Psychological Science: From History and Theory to Practice
Responding to calls for antiracist psychological science, this seminar explores what it means to design and conduct that science. What does it mean to conduct "antiracist" studies that "decenter whiteness"? The exploration of scientific practices is grounded in gaining a fuller understanding of psychology's history, epistemology, research practices, and influence on social policy. Upon surveying past practices that fostered and sustained racist beliefs, we examine race theories and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These

historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science. The course incorporates lab activities, 6 papers, and a final project that engages a key concept or practice of antiracist psychology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105**

PSYC332 Seminar in Cognitive Neuroscience
This seminar is an in-depth analysis of the ways that scientists study the neural basis of cognition in humans. Topics to be covered include the representation of visual categories, the neural influence of attention, episodic memory, theories of spatial cognition, and decision-making. Through reading and discussion of primary research articles, we will evaluate the methods and theoretical debates in each domain, while recognizing and integrating common themes that link across the field. Students will also learn how to work with simple computer models and simulations (using Python), in order to gain a strong foundation in the computational principles that underlie recent advances in the field of cognitive neuroscience.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC334 Seminar in Social Neuroscience
One of the most complex functions we (and other animals) exhibit is the ability to interact with other members of our species. Social behavior, in turn, depends on processes at scales ranging from the entire nervous system down to the effects of individual hormones and genes. This course will examine phenomena such as facial processing, attributions of agency and mental states, aggression, dominance, social isolation, in-group/out-group identification, and group decision-making.

To understand these concepts, we will discuss experimental findings that employ a variety of methods, ranging from behavioral studies to physiological assays, but with particular emphasis on methods from cognitive neuroscience. As we discuss primary research in the field, students will not only gain insight into the specific social behaviors covered, but a broader understanding of research approaches in psychology and neuroscience. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC337 Psychology of Language
Language is central to both cognition and the human experience. This class is designed to familiarize students with the fundamental principles and questions that surround the study of language and communication from a cognitive psycholinguistic perspective. The course will cover different approaches to the study of language, focused on the role of language in cognition. Additionally, we will cover how speakers and listeners use language to successfully communicate with one another. The course will be a mix of both lectures and discussions, centered on regular readings of scholarly articles that are foundational to the field. Students will be evaluated on routine writing exercises, including periodic short assignments and a longer final paper. Students may also be evaluated on participation, engagement, short quizzes, and/or short homework assignments. Formally, students will be asked to engage with peer-reviewed research, utilize library resources, engage critically with course material, discuss new ideas with peers, and improve their academic writing capabilities on complex and current scientific topics. Students who have taken PSYC122F will not be admitted due to the overlap in content.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC338 Masculinities
This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

PSYC339 Psychology of Human Sexuality
This course introduces the psychology of human sexuality in its evolutionary, physiological, reproductive, and social contexts. We'll explore various psychological theories of human sexuality, as well as sexual motivations, sexual anatomy, sexual response, sexual pleasure, gender and gender identity, sexual orientation, sexual behavior, sexuality across the life span, safe sex, and consent. In addition, this course covers contemporary issues that may arise each week, such as sex education, gender diversity, and sexual orientation. In light of the current political climate, it is anticipated that politically sensitive topics may be discussed in class to sort out myths from evidence supported by scientific research. The course emphasizes current research in psychology, sexology, and sociology and will be inclusive across cultures, races, ethnic groups, gender, sexual orientation, and relationship orientation. This course is also intended to be responsive to student questions and to provide a space for discussions in a non-judgmental, inclusive, and accepting environment.
Offering: **Host**

Prereq: **PSYC105 OR PSYC105F OR PSYC260**

PSYC340 Seminar on Migration and Child Development
How do the current politics of borders and citizenship impact the well-being of migrant children, youth, and families? How do U.S. immigration policies intersect with what research tells us about what children need to thrive? Is there a role for psychologists to inform today's discourse on immigration policy? These are a few of the questions that we will be exploring throughout our time in this class.

Through class readings, discussions, and course assignments, we will examine why and under what circumstances children and families migrate to the United States. We will explore how various parts of the migration experience relate to child and adolescent development. Together we will analyze contemporary immigration policies through the lens of developmental psychology. Students will

learn to grapple with the opportunities and limitations of developmental science to inform immigration policies that matter for the day-to-day lives of immigrant children and families.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**

PSYC341 Psychology of Human Memory
This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

PSYC343 Sleep and Psychosocial Functioning in Youth
This course is designed to orient students to the fascinating world of sleep and psychosocial functioning, with a focus on the adolescent and emerging adulthood years. We will explore how sleep relates to various aspects of psychosocial functioning, including cognitive development (e.g., memory), emotional well-being (e.g., mental health), social adjustment (e.g., social media use), and cultural contexts (e.g., race-ethnicity). The content for this course is primarily based on published empirical research and theory. The seminar format of this course is designed to facilitate a dynamic and interactive learning environment and requires active participation from all students.

Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC344Z Parenting
This course engages students with the science and practice of parenting through an interdisciplinary and cross-cultural lens. A critical component of the course is the integration of interdisciplinary perspectives on parenting-related topics that highlight the cultural nuances that inform parenting norms, beliefs, and practices. Consequently, assigned readings will be based on selected chapters and empirical research articles within the fields of psychology, sociology, and anthropology. Students will also evaluate the relevance and validity of parenting-related content in popular media (e.g., social media, websites, books, podcasts, and blogs), in relation to published theory and empirical research. Student evaluation will be largely based on students' contributions (written and oral) to class discussions. Assignments are designed to assess students' ability to understand, critique, and apply course content. Topics include parenting styles, discipline, parent-child sleep, and gender socialization. All assigned readings will be posted in Moodle.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC347 Science of Suicide Risk & Prevention
This course will explore the science of suicide research, prevention, and intervention. Topics will include terminology, epidemiology, historical and contemporary theories of suicide, ethical and methodological challenges to suicide research, risk and protective factors, empirically supported approaches to prevention and intervention, suicide in the media and popular culture, and emerging issues and controversies in the field of suicidology. In many ways, the field of suicide research is young and knowledge is rapidly changing. Special attention will be paid to novel methodological advances in clinical psychological science. The course will use books, empirical articles, class discussion, critical thinking, exams, and writing assignments to accomplish its learning objectives. This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness nor will it address assessing suicide risk among friends or family members.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC348 Topics in Cognitive Development
In this course we will discuss in depth a selection of current topics in cognitive development research. We will read and discuss primary literature and focus on cutting-edge debates in the field, surveying evidence from different stages of human individual development as well as (when appropriate) evidence from different nonhuman species.
Offering: **Host**

PSYC351 Your Brain on Drugs: The Neuroscience Behind Drugs of Abuse and Addiction
Substance use disorder (colloquially known as drug addiction) is a pervasive disease that has touched countless lives. In order to understand the disease, one must first understand the mechanism of actions of addictive substances. This course will cover several major classes of abused drugs (nicotine, alcohol, amphetamines, cannabis, psychedelics, etc.) through a combination of lectures and discussion of current research articles studying these substances and their effects on the brain. Societal influences on the conception of addiction and addiction treatment will also be discussed. This course is largely discussion based, with a final project on a drug of choice.
Offering: **Host**

Identical With: **NS&B356, BIOL356**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

PSYC358 Seminar in Intergroup Peace and Conflict
This seminar is an in-depth analysis of key psychological readings on the topic of intergroup peace and conflict. Topics covered include key psychological theories in intergroup relations used to articulate the reasons and sources for intergroup conflict (i.e., Social Identity Theory, Realistic Group Conflict Theory), topics covering how intergroup conflict is perpetuated (i.e., revenge, collective memory and collective victimization), strategies to reduce conflict and promote peace (i.e., contact theory, norm interventions, intergroup dialogues, protest), and behaviors that ideally progress beyond conflict (i.e., apologies, forgiveness, reconciliation, reparation). Additionally, the course examines philosophies of peace. Students in the course will not only discuss psychological strategies that are used to move toward peace, but critically consider/reconsider what a peaceful society means and what one would actually look like. Through reading and discussion of theoretical and experimental research articles, we will not only evaluate the methods scholars use to study these real-world issues, but also critically analyze and deconstruct the theoretical underpinnings influencing how psychologists approach and evaluate intergroup conflict and peaceful societies.

PSYC365 Seminar on Emotion
This seminar aims to provide an intensive introduction to what emotions are and how they influence our relations with other people. The seminar will cover general theory on emotion as well as theory on specific emotions (e.g., anger,

shame, envy, humiliation). As emotions are multicomponential processes, we will examine how the social context shapes different components of the emotion process (e.g., phenomenological experience, regulation, and expression of emotion). Moreover, we will explore how emotions operate at the individual, interpersonal, intergroup, and cultural levels of analysis.

PSYC374 Early Childhood Practicum
In this small intensive practicum course, students will spend a minimum of 3 hours per week working in early childhood education settings. The practical experience will be complemented by contemporary research about early child development, education, policy, and practice. Course topics will be driven by the interests of the group, by the questions that naturally emerge from the practicum placement experience, and by current debates in the field. Such topics include but are not limited to: diversity in language acquisition; scaffolding children's autonomy and executive function; the unique functions of exploratory play in human learning and development; and in-the-field consequences of new legislation (e.g., Connecticut's 2023HB-06880-R02-BA mandates on play-based learning and raising the kindergarten age). In addition to reading primary sources and working within early childhood classrooms, we will benefit from conversations with experts actively working to integrate research, practice, and policy. Students will keep journals documenting their field placements, submit response papers to class readings, participate actively in class discussions, and complete an in-depth exploration of a topic of their choice that bridges across the scholarly literature and the field placement experience. This is an advanced class available by Permission of Instructor (POI). Previous coursework in psychology is strongly recommended. Students are encouraged to participate for the full year (.5 credit per semester), and those who intend to do so will be given priority.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC375 Advanced Research in Social Psychology: Social Representations of Crime in Children's Television
This is an advanced research seminar examining the relationship between adult understandings about crime and criminals and the images depicted in children's entertainment. Working with the instructor, students will become part of an active research lab, collecting and analyzing qualitative data that will ultimately contribute to a project that aims to connect early childhood media exposure to adult understandings about such things as the "causes" of crime, the demographics of crime, and solutions to crime. Students will gain significant knowledge about and fluency with social representation theory, as well as hands-on experience using a variety of qualitative data analysis techniques.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC376 Advanced Research in Adolescent Development
This course is designed to provide students with experience conducting research in adolescent development. Students will learn about community-based and online research methods with immigrant youth and families. There will be opportunities to gain competencies in various research-based skills such as conducting literature reviews, data management, collecting and analyzing quantitative and qualitative data.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC377 Advanced Research in Racism and Intergroup Relations
Students in this advanced research course will contribute to ongoing research studies on the topics of race, racism, and intergroup relations. Students will be introduced to social psychological and cultural psychological research methods within the study of racism and intergroup relations. Students will contribute to different aspects of the research process such as literature reviews, collecting and analyzing quantitative and/or qualitative data, data management, and manuscript preparation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC378 Advanced Research in Cognitive Neuroscience
This advanced research course provides in-depth training in the experimental methods of cognitive neuroscience, focused on human memory. Students will work individually and in groups on semester-long projects, which will include literature reviews, experimental design, data collection, analysis, journal-formatted writing of results, and oral presentations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B378**
Prereq: **None**

PSYC379 Advanced Research in Conceptual Development
Students in this course work on new and ongoing research projects in the Cognitive Development Laboratory. Students will be individually matched to a research project and participate in all aspects of research including background literature review and designing, running, and analyzing experiments.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC380 Advanced Research in Social Identity
Students in this course will contribute to ongoing research on topics related to social identity. As part of the research team, students will learn and apply social psychological approaches to investigate how people understand their social group memberships, experience or express identity-based bias, and evaluate strategies for addressing prejudice, discrimination, and stereotyping. As part of an active research lab, this course will provide an overview on how to conduct experimental research in social psychology.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC382 Advanced Research in Decision Making
This course is designed to allow students to conduct supervised research in the area of the cognitive psychology of reasoning and decision making. Working as a team with the instructor and other members of the research group, students will undertake a semester-long experimental research project on a topic in reasoning and decision making.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Identical With: **NS&B382**
Prereq: **None**

PSYC383 Advanced Research in Learning and Memory
This advanced research course is designed to allow students to conduct supervised research in the area of human learning and memory. Working with the instructor, students will become part of an active research lab, undertaking a semester-long experimental research project that seeks to answer a current question in the field of memory research.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B383**
Prereq: **None**

PSYC384 Advanced Research in Cognitive Development
This course is designed to allow advanced students to conduct a supervised group research project in cognitive development. Working with the instructor, students will conduct an experiment that seeks to answer a current question in the field of cognitive development.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **None**

PSYC385 Advanced Research in Digital Learning
This hands-on research seminar offers applied experience in the design, implementation, and evaluation of digital learning. Students will develop expertise in curricular design, critically reviewing research on project-based learning strategies, and supporting digital learning across diverse educational settings.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **None**

PSYC386 Advanced Research in Sleep
This advanced research course is designed to provide students with an in-depth understanding of how to critique and analyze psychological research. Specifically, we will focus on research within the field of sleep and psychosocial functioning. This seminar course takes an intensive lab-based approach. Students will have access to a comprehensive dataset that includes assessments of stress, anxiety, depression, physical activity, interpersonal relationship quality, personality, procrastination, and chronotype. Based on this data, students will be expected to commit to a semester-long project, which involves analyzing data and reporting findings on a self-selected topic. Upon completion of this course, students will have a strong working knowledge of the field of sleep and psychosocial functioning. This course also provides opportunities for students to develop analytical, writing, critical thinking, and presentation skills. Students also will gain data analytic skills using the Statistical Package for the Social Science (SPSS) program.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **(PSYC105 AND PSYC200)**

PSYC388 Advanced Research in Measurement
In this advanced seminar on psychological measurement, students will receive individualized mentoring from the instructor on each aspect of the course, including conducting an in-depth literature review on a topic, developing a new measurement instrument, gathering and analyzing pilot data using a variety of advanced statistical methods (e.g., factor analysis, Rasch measurement, item response theory), and writing a professional paper reporting on the results and future directions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Prereq: **PSYC105**

PSYC389 Advanced Research in Social and Historical Process
Students will become familiar with core theories on the temporal dynamics and cultural diversity of psychological phenomena. Students will work collaboratively on empirical projects that engage and appraise the theories.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC105**

PSYC390 Experimental Investigations into Reading
Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B390**
Prereq: **None**

PSYC392 Behavioral Methods in Affective Neuroscience
This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B392**
Prereq: **None**

PSYC393 Advanced Research in Cognition and Neuropsychiatric Illness
Students in this advanced undergraduate research course will work in teams on novel and ongoing research studies focused on understanding neurocognitive

dysfunction and its treatment in neuropsychiatric illness. Students will be matched to a research project and will participate in different aspects of this research including background literature review, acquiring elementary skills in neurocognitive and symptom assessment, and collecting and/or analyzing extant data using SPSS. Students may also be involved in learning cognitive training procedures.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-PSYC**
Identical With: **NS&B393**
Prereq: **None**

PSYC396 Advanced Research on Culture and Emotion
This course offers an in-depth examination of how culture (e.g., cultural values, norms) influences the emergence, experience, expression, and social consequences of emotions. Students will work in a team on a semester-long research project on culture and emotion (e.g., envy, humiliation, shame, happiness). The course includes advanced theoretical and empirical literature. The readings and research projects will give special attention to how gender intersects with culture in emotional experience and expression. Students will also learn how to adapt methods (e.g., narrative approaches, diary studies, field experiments) and techniques (e.g., adjustment of research measures to specific cultural communities, translation) to study emotions in their cultural context.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-PSYC**
Prereq: **PSYC265 OR PSYC208 OR PSYC365 OR PSYC200 OR QAC201 OR ECON300**

PSYC397 Advanced Research in Clinical Psychology
This advanced research course provides students the opportunity to conduct supervised research in clinical psychology, specifically in the area of suicide and self-injurious behaviors. Depending on the semester and student interests, tasks may include study design, data collection, clinical interviewing, data management, data analysis, and manuscript preparation. Weekly lab meetings will focus on current topics in clinical research and will include student presentations. All students will complete a research paper in journal article format. It is expected that those enrolled in this course will work independently and take initiative to extend their learning in the areas most consistent with their interests. Note: This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness, nor will it address assessing suicide risk among friends or family members.

PSYC500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.
Offering: **Crosslisting**
Grading: **Cr/U**

Grading: **OPT**

QUANTITATIVE ANALYSIS CENTER (QAC)

QAC133F Data-fy That: Theory and Practice of Digital History (FYS)
History is not simple. It is not the past, but a way of talking about the past with a unique claim to authority. For this reason no imperialism ever fails to claim a history, while at the same time every revolution rewrites it. History is an activity, it is a practice. Whether in the analog world of pen and paper or in the digital metaverse, history is its data. To practice history is to select an object of study and to "data-fy" it. In this course you will be empowered to become not only a reader of history, but a creator of historical data, a scholar actively seizing the current digital history moment as an occasion to break down history's myths through the activities of research, datafication, and analysis. We will critique the past as it has been conceived by upending archives through the construction of relational databases: a quiet revolution defying the colonizer and empowering the colonized. History can always be claimed by the powerless. Everywhere, and out of anything, we seek to democratize the historical present. Join the revenge of the archive.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-COL**
Identical With: **COL133F**
Prereq: **None**

QAC150 Working with SQL and Databases
Many of you have heard of studies that analyzed Twitter messages and predicted some phenomena--spread of flu in New York, consumer confidence index, and so on. Behind the success of these studies are the systems for data storage and retrieval. A regular user can access only the latest nine days of tweets. Any study that aspires to analyze longer periods has to deal with the issues of storing the observations and retrieving them later for analysis. The goal of this course is to show you how to do that--how to connect to various types of databases and how to retrieve and update your data. We will start with relational databases; learn SQL, the language used to query and update the data; and explore the latest developments in the database field--Hadoop and MapReduce.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC151 Working with Excel and VBA
Many of us know Excel for its spreadsheets: a quick and easy way to store some information, share it, and maybe make some charts. The goal of this course is to show you the more advanced features of Excel. We will write code in Visual Basic for Applications (VBA), learn how to import data from external databases and Web-based resources, create custom menus to interact with a user, and examine how Excel can be used in business decision making.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC153 Working with Mathematica
This course introduces students to Mathematica's computing environment and all the basic features of the software. Starting with basic operations and computations, students will be introduced to graphics, visualization, and mathematical computations and will learn through a series of hands-on lab exercises to use the Mathematica programming language for modeling and data analysis. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, a basic calculus background, and a willingness to make mistakes and learn from them is expected.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC**
Prereq: **None**

QAC154 Working with MATLAB
The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **IDEA154, CIS154**
Prereq: **None**

QAC155 Working with Python
This course introduces students to programming, data management, and analysis with Python. Through a series of hands-on lab exercises, students learn to work with a variety of data using a high-level programming language and associated libraries to effectively manage and analyze their data. The emphasis is on data exploration and visualization and includes work with unstructured data generated by social media interactions. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC156 Working with R
This course introduces students to programming, data management, and analysis with R. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use R's programming language and associated packages to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC157 Working with SAS
This course introduces students to programming, data management, and analysis with SAS. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use SAS's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and

visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC158 Working with Stata
This course introduces students to programming, data management, and analysis with Stata. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use Stata's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC159 Working with High Performance Computing (HPC) Tools
This is a cross-disciplinary course designed to introduce students to UNIX and learn how to perform calculations/analysis in a high performance computing (HPC) environment. We assume students have a basic understanding of computing, but no prior experience with working with UNIX or HPC is expected. All students will gain experience working on Wesleyan's High Performance Computing cluster. We will learn to work in a UNIX environment, how to write BASH scripts, and how to schedule and complete our work in a multiuser HPC environment. In the second part of the course, we shift the focus to parallel computing. We introduce CUDA devices used for parallel computing, and work to convert a serial program into its parallel version. Students will develop and implement a project of their choosing, which may involve UNIX and HPC combined with any area of interest. Anticipating the course will be taken by students studying a broad range of disciplines brought together by a common interest in HPC, individualized support and feedback will be provided at several checkpoints throughout the course. Students will gain insight into the many ways UNIX and HPC are crossing traditional disciplinary boundaries to advance research in a variety of fields, expanding the possibilities in our data-driven era.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **SBS-QAC**
Prereq: **COMP112**

QAC171 Business Modeling with Excel
Broadly speaking, this course is about evidence-based decision-making. It is intended for students with a background in Excel and VBA who want to learn how to use spreadsheets to develop business and financial models and communicate the results. Model building is different from the usual Excel skills as it focuses more on the analytical/mathematical aspects than on data wrangling and requires some basic familiarity with economic/financial models and data analysis tools. We will start with problems where the inputs are deterministic and we must decide on optimal allocation of resources. We will then advance to problems with stochastic inputs and explore solutions either through simulation or through optimization of goal functions. Through this work we will develop the appropriate programming skills (e.g., VBA) and learn to effectively use Excel to implement our models and display the results of our analyses.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **QAC151 AND ECON300**

QAC190F Big Data, Big Promises, Big Problems? (FYS)
This seminar explores the transformation of the modern data landscape from its pre-datafication beginnings in the early 90s to the contemporary age of "big data." Throughout this transformation, various sectors of society, including healthcare, education, business, urban planning, governance, sustainability, media, science, and art, have experienced unprecedented opportunities for growth and advancement. However, alongside these opportunities, significant challenges have arisen, including privacy concerns, fairness and bias issues, data governance, and model interpretability, all of which have far-reaching implications. The seminar provides a systematic exploration of the characteristics of the "big data" landscape, its impact on the production and distribution of goods and services, and its "data ethics" implications. We will explore the promises, and problems, of our data-driven era, paving the way for informed discussions and critical thinking in our fields of study.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-QAC**
Prereq: **None**

QAC201 Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **GOVT201Z, NS&B280Z, PSYC280Z**
Prereq: **None**

QAC203 Hollywood and Big Data
Taught by a media research executive with a long industry experience this course is designed to provide students with an introduction and understanding of how the media industry is using data to make decisions that shape the art landscape of our times. Data around consumer behavior--what, how and why people are watching--has exploded recently and is extensively used in making decisions

about what TV shows and movies to produce, how to promote them and how to make them. The course will explore how the media industry quantifies different kinds of content, the ways in which people watch and pay for that content, and how value is attributed across the media landscape. Students will be introduced to essential "media metrics" (e.g. viewership, box office, engagement) and learn to evaluate different data sets for their integrity and representative insights. Visiting media executives will discuss how data informs their jobs ("evidence-based decision making"). Assignments will include written briefs based on different data sets and a final project presentation highlighting skills in analyzing and presenting insights extracted from media research data. By the end of this course, students will be familiar with key decision-making tools in the media industry and be able to analyze and understand the impact on media output

QAC204 Visualizing Firearms History: An Applied Quantitative and Archival Approach for a Project-Based Expl
This project-based course provides a unique cross-disciplinary opportunity to study important historical questions surrounding firearms. Combining quantitative methodology in data science with qualitative research methods in history, students will answer questions they are passionate about based on existing datasets. Students will read, discuss, and write responses to the latest historical scholarship on the technological development of guns, firearms in media, gun violence statistics, and advertisements. Students will choose one of four datasets to research and analyze. These include data sets related to firearms patents since the 1820s, firearms in media (film, television, anime, games), firearms-related deaths, and advertisements of firearms. Students will develop skills in hypothesis testing and inferential statistical analysis alongside qualitative research methods used in history. The course offers one-on-one support and training in the skills required to complete a team-based final project. The final project will be hybrid between a research paper and also an exhibit (e.g., film, website, media, art installation). Students will present their work at the center's third annual undergraduate research conference (Spring 2025). Select students can apply to continue on as QAC summer apprentices and Baker Collabria Fellows in Data Analysis, and as CSGS NEH-funded summer history research fellows and as History thesis researchers.

QAC205Z Building a Relational Database: Introduction to Historical Research Data
This course empowers students to become not only readers of history but creators of historical data, new scholars actively seizing the current digital history moment as an occasion to break down history's myths through the activities of research, datafication, and analysis. The digital age -- even the advent of GenAI -- has changed nothing fundamental about the practice of historical research. But it could: the digital age is an opportunity for scholars to act as agents of change. This winter course focuses on the role of data in existing historical practices. Our series of focused workshops and targeted research investigations will enact and enable new methods and practices of history. Targeted readings address current theories and methods for working with the range of historical source materials: moth-eaten archives, curated library collections, digitizations, and digital-born objects. We will then get right to work on practices and your own research projects. Students will set up an archival relational database through the web-based tool Nodegoat. They will finish the session by curating their own historical archive, which they will codify as a relational database, and then explore development through further research or publication.

QAC211 Digging the Digital Era: A Data Science Primer
The course introduces students to the practice of what has come to be known as data science. Using a multidisciplinary approach and data from a variety of sources that cover any aspect of everyday life--from credit card transactions to social media interactions and Web searches--data scientists try to analyze and predict events and behavior. The first part of the course defines the area and introduces basic concepts, tools, and emerging applications that will include a broad introduction to machine learning tools and algorithms. It will include a brief mathematical background and introduction to modeling across disciplines. In part two of the course, we work on data acquisition and management and introduce appropriate programming and data management tools. In part three, we concentrate on basic analytical and visualization techniques as we explore and understand the emerging patterns. Using a learning-by-doing approach in a computing laboratory, students will learn how to write computer programs in R to access, organize, and analyze data through a series of small projects designed to illustrate the application of the techniques we develop for a variety of data sets and situations. The class will include hot topics like big data, privacy, and ethical issues around data, to name a few. Students will also engage in a semester-long project where they will address their own research questions working with "messy data."
Offering: **Host**

Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC216 Introduction to Survey Design and Analysis
Survey data provide valuable information for the study of public opinion and behavior, and they are commonly used in several fields such as political science, public policy, economics, education and psychology. This course is an introduction to survey design, current implementation methods, and survey data analysis. By the end of the course, students will be able to design and conduct their own survey research projects. The class meetings include lectures, discussions, hands-on exercises, and work on a term project.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **SBS-QAC**
Prereq: **None**

QAC220 Applied Vectors and Matrices
An introduction to the mathematics of matrices and their application in traditional and modern methods of data analysis and scientific computing. The course promotes an interdisciplinary approach, and topics may include: - Coordinate transformations in data visualization, iterated patterns in mosaics and art - Use of least squares approach with linear solvers for regression, as well as image alignment - PCA-decomposition of computer images (the "eigenfaces" example) - Matrix decomposition methods: Singular Value Decomposition and Non-negative Matrix Factorization - Dimensionality reduction and data compression - Matrix operations in deep learning. - ChatGPT and word vector embeddings Students will use R for most of the computational tasks, and Mathematica for symbolic math and deep learning.

Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **SBS-QAC**
Prereq: **MATH121**

QAC231 Introduction to (Geo)Spatial Data Analysis and Visualization
Geographic information systems (GIS) provide researchers, policy makers, and citizens with a powerful analytical framework for spatial pattern recognition, decision making, and data exploration. This course is designed to introduce social science and humanities students to spatial thinking through the collection, management, analysis, and visualization of geospatial data using both graphical and command line-based spatial analysis platforms. Classes will consist of short lectures, hands-on training, group projects, critiques, and class discussions. Weekly readings and assignments will build skills and reinforce concepts introduced in class. The course will culminate in a group project developed through student-driven inquiry and including geocomputation. Readings across multiple disciplines will allow students to comprehend the breadth of applied geospatial thinking in today's research arena. The course is part of Wesleyan's Digital and Computational Knowledge Initiative and is aimed at students with limited or no prior GIS experience.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC232Z Mapping the Pandemic
The COVID-19 pandemic has altered the global community's daily relationship with space and movement, both at a hyperlocal scale of social distancing to a global scale of disease spread. Spatiotemporal visualizations in the form of maps and apps have allowed us to watch the worldwide spread of COVID-19 and keep tabs on local case counts in our own spaces. Geographic information systems (GIS) provide citizens, researchers, health care providers, and policy makers with a powerful analytical framework for visualization, data exploration, spatial pattern recognition, response planning, and decision making within our life in the time of COVID-19. This course is designed to develop spatial thinking and visualization skills relevant to COVID-19. Students will look at (and critically evaluate) existing maps and apps related to the current pandemic, create their own maps and apps, and critically evaluate their classmates' maps and apps. Class meetings will consist of case study lectures/discussions, instructor-led skill-building workshops, studio work sessions, and presentation/critique sessions. Spatial data collection, management, analysis, and visualization will occur within a cloud-based GIS (ArcGIS Online). Readings prior to the first class will establish a baseline for student comprehension of the breadth of applied geospatial thinking in today's research arena. The course is aimed at students with limited or no prior GIS experience.

QAC234 Working with Remote Sensing Data with Applications in Social Science Research
The last decade has seen an increase in application of remote sensing data in social science research: nighttime light data is used to support research into economic development and urbanization, measurements of pollutants serve as a proxy for economic activity, digital elevation models are used by historians to reconstruct most probable locations of ancient roadways, and archeologists use image analysis to discover ancient sites. This course will introduce students to the universe of publicly available remote sensing data products and will teach the students how to work with the remote sensing data (e.g., using Google's Earth Engine and its scripting platform). Topics covered in the course include the manipulation of geometric features, making of maps and animations of environmental variables, generation of time series for geographic regions, and operations on aerial photography.

QAC239 Proseminar: Machine Learning Methods for Audio and Video Analysis
In this course, students are introduced to machine learning techniques to analyze image, audio, and video data. The course is organized in three parts, and in each part we will first introduce how these nontraditional data can be converted into appropriate (mathematical) objects suitable for computer processing, and, particularly, for the application of machine learning techniques. Students then will learn and work with a number of machine learning algorithms and deep learning methods that are effective for image and audio analysis. We will also explore major applications of these techniques such as object detection, face recognition, image classification, audio classification, speaker detection, and speech recognition.

QAC241 Introduction to Network Analysis
This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.
Offering: **Host**

QAC250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.
Offering: **Host**

QAC251 Data Visualization: An Introduction
This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.

QAC300 Data Science I: Statistical Foundations
The course bridges classical statistical theory with modern data science applications, providing students with rigorous mathematical foundations and practical computational skills. Topics progress from probability theory and hypothesis testing to predictive modeling, regularization, and overview of machine learning methods. We emphasize the transition from traditional inference to prediction-oriented data science, covering bootstrap methods, robust inference, linear and logistic regression, model selection, and ensemble methods. Ethical considerations in algorithmic bias and responsible AI are integrated throughout. Extensive hands-on work includes computational assignments with emphasis on reproducible research practices.

QAC301 Statistics Education Practicum
This course will serve students who are pursuing their undergraduate degree in a variety of disciplines but who want to expand their skills in statistics and applied data analysis in preparation for a future career. It will also serve students who are currently pursuing independent, quantitative research at the undergraduate or graduate level. The course will center on personal interaction in support of introductory statistics students. Active peer mentoring and supporting experiences will be based on the theory that good teachers (and learners) of statistics need to be developed, as opposed to being trained. In line with this theory, this hands-on course will provide an intensive opportunity to build specific knowledge regarding teaching and learning in the area of data-driven statistical inquiry. Students enrolled in this course will (1) attend statistics-mentoring development sessions (one hour per week); (2) provide one-on-one support for introductory statistics students during workshop-oriented class sessions (three hours per week); (3) lead small group-mentored meetings for five to six statistics students (one hour per week); and (4) monitor and critique progress on applied data assignments (one hour per week). In addition to these hands-on experiences, students will pursue a project aimed at furthering the field of statistics education. Projects may take the form of course evaluation, content/conceptual curriculum development, or translation of educational statistical software materials. Similar to QAC380 (Introduction to Statistical Consulting), this course is aimed at providing students with an opportunity to enhance their statistical skills beyond the introductory level.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **None**

QAC302 Teaching Fellowship for National Education Leaders
This course is for students to serve as Teaching Fellows for a course with the National Education Opportunity Network (neonopportunity.org), which provides college courses to Title I and Title I-eligible high schools nationwide. Please inquire with the instructor for information on course topics available this semester. Students will: -Host weekly 45-minute synchronous discussion sessions with 15-25 high school scholars via Zoom to enhance their engagement with course content, expose them to college-level seminar-style discussions, and help improve their analytical and metacognitive skills. -Evaluate and provide feedback on student work. Specific time assignments for sessions with high school students and required Teaching Fellow group meetings will be scheduled at the same time every week based on availability. This course counts for 10 hours toward the 20-hour practicum requirement in the EDST major or minor. The other 10 hours can be completed by repeating this class or through an independent practicum.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST405, CSPL305, PHIL208**
Prereq: **None**

QAC305 Exploratory Data Analysis and Pattern Discovery
The course introduces the theory and practice of exploring, describing, summarizing and detecting patterns of interest in complex datasets. Various approaches including aggregation, clustering, data visualization, and latent variable modeling will be employed. This course will give students an opportunity to develop computational skills (primarily in R) and to learn how to discover and interpret relationships in unstructured observational data. The applications and examples for this course will be broad and relevant to many fields of study.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **QAC211 OR ECON300 OR GOVT367**

QAC307 Experimental Design and Causal Inference
The course provides the foundations and statistical thinking to design, collect, and analyze experimental data and introduces appropriate techniques for observational data when causal inference is the objective of the analysis. Throughout the course, we introduce and compare various experimental designs. We will discuss sample size and power calculations as well as the advantages and disadvantages of each of these designs. With observational data, we will explore difference-in-difference models, propensity score matching techniques, regression discontinuity designs. This course gives students the opportunity to develop further their computational skills as we learn how to describe, interpret, control, and draw inferences from experimental and observational data.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **CIS307**
Prereq: **QAC201 OR PSYC200 OR MATH132 OR ECON300**

QAC311 Longitudinal Data Analysis
Work across different fields, from medicine and public health to social sciences and education, often involves the collection and analysis of longitudinal data--combination of cross-sectional and time series (repeated measures for the unit of observation) data. This rich data structure provides opportunities to explore questions that could not be addressed with simpler data sets, but at the same time requires special considerations because we are analyzing observations that are not independent. The course introduces students to appropriate graphical exploration of the data and the specification and estimation of fixed and random-effects models. It also develops the basic framework for difference-in-differences models and explores their applications.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON303 OR GOVT367 OR PSYC200**

QAC312 Hierarchical Linear Models
Research questions cannot always be explored by collecting data with independent observations. Sometimes this is due to limitations or constraints on the data collection method, and other times our questions pertain to data that are measured at both the individual and group levels (e.g., patients from different hospitals or students from different schools that belong to different districts). Hierarchical linear models (HLM), also called multi-level or mixed models, explicitly model such nested data structures and address analytical and estimation issues not accounted within the framework of the classical linear model. Using data sets from different fields of study (e.g., education, medicine, and health) students will learn to formulate multilevel research questions, estimate and critically examine HLM applications.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON303 OR GOVT367 OR PSYC200**

QAC313 Latent Variable Analysis
The course is an introduction to latent variable modeling. Students will learn the fundamental statistical methods for structural equation modeling (SEM), including principal component analysis, confirmatory factor analysis, path analysis, and SEM for both quantitative and binary observed variables. In addition, students will learn the basic components of SEM, such as assumptions, testing model fit and indices of fit, testing competing models, estimation methods, and issues in model identification. Students will learn to develop structural equation models using AMOS, R, and/or Mplus statistical software.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON303 OR GOVT367 OR PSYC200**

QAC314 Survival Analysis
Survival or event history analysis focuses on modeling and analysis of time-to-event data--such as onset of a disease; duration of a strike; failure of a biological, physical, or social system; or recidivism). This course introduces students to survival and hazard functions, the analysis of censored data using parametric and non-parametric estimation methods; compares survival curves for different groups; and discusses competing risk models. The emphasis is on the applications of the different methods with the objective of broadening computational skills in R and/or SAS and to reinforce statistical writing and communication. These skills will be applied to a variety of problems in political science, public health, engineering, and medicine.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON303 OR GOVT367 OR PSYC200**

QAC320 Applied Time Series Analysis
Understanding and modeling the past allows us to extract insights in our areas of study that are not possible to extract without time series data. This course is an introduction to the theory and practice of time series analysis. We will learn to identify and model the components of a time series process, and to properly model relationships among variables over time. By emphasizing the practical applications of time series analysis, the course will give students an opportunity to further develop computational skills and learn how to develop forecasting models, and to make inference using time series data.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-QAC**
Prereq: **ECON300 OR QAC201**

QAC323 Bayesian Data Analysis: A Primer
This course introduces the applied principles of Bayesian statistical analysis. The Bayesian paradigm is particularly appealing in research where prior research and historical data are available on parameters of interest. This course will teach students appropriate techniques for analyzing data of this nature as well as broaden computational skills in R. The course will lay the foundation for Bayesian data analysis that students can use to further develop skills in decision making.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **CIS323**
Prereq: **MATH132 OR ECON303 OR GOVT367**

QAC356 Advanced R: Building Open-Source Tools for Data Science
An in-depth exploration of the R programming language and development environment; from syntax and data structures, to data analysis and visualization, report writing, project management, and software development. Students will work in teams to create open-source data science applications that can be used to manage and prepare data, perform statistical analysis, and create compelling

visualizations and reports. Students will also have an opportunity to contribute to a shared Wesleyan R package that contains datasets and functions that are useful for teaching introductory and advanced data science courses.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **QAC201 or MATH132 or ECON300 or QAC302 AND COMP112 AND QAC156 or QAC211 or QAC251**

QAC375 Advanced Research in Digital History
The digital age has changed everything and nothing about the practice of historical research. After being equipped with core concepts, terminology, and practices of historical research, students will engage and explore various applications: across moth-eaten archives, curated library collections, optical scans, and digital-born objects. We will then immediately apply this work to collectively setting up an archival relational database through the digital tool Nodegoat. Students will finish the semester by curating their own historical archive and codifying it as a relational database. Depending on the specific project and student abilities, students will also connect this work to utilizing and/or learning skills in translation, GIS, database creation, database management, and digital visualization. Successful students will be connected to the Travelers' Lab international network: an opportunity to connect, receive feedback from, and collaborate with professors at higher education institutions in the United States and around the world. Depending on the year students may also be offered conference presentation and publication opportunities.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-COL**
Identical With: **COL375, HIST293**
Prereq: **None**

QAC378 DeltaLab: Computational Media Analysis
The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **SBS-QAC**
Identical With: **GOVT381**
Prereq: **None**

QAC380 Introduction to Statistical Consulting
In this course, students will be exposed to realistic statistical and scientific problems that appear in typical interactions between statisticians and researchers. The goal is for students to apply what they have learned in their basic statistics and data analysis courses to gain greater experience in the areas of research collaboration, data management and analysis, and writing and presenting reports on the results of the analyses. An important objective of the course is to help develop communication skills, both written and verbal, as well as the professional standards and interpersonal skills necessary for effective statistical consulting.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **NSM-QAC, SBS-QAC**
Prereq: **MATH132 OR ECON303 OR PSYC200 OR [QAC201 or GOVT201 or PSYC280 or NS&B280]**

QAC381 QAC Praxis Service Learning Lab
As a service learning lab, this course provides students with an opportunity to further develop their abilities to analyze data and apply their knowledge and statistical computing skills as they work closely with nonprofit community partners on data analytic projects. Students in the course will identify research questions of interest to the community partner, gather and manage data, conduct statistical analyses, and interpret and summarize results. The service component involves providing statistical consulting to community partners by formulating and completing data analytic projects, the results of which may be used to improve services, identify areas requiring increased services and areas in which services can be made more efficient, as well as improving data collection, data reporting, and organizational functioning.
Offering: **Host**
Grading: **A-F**

Prereq: **MATH132 OR ECON300 OR PSYC200 OR QAC201 OR SOC257 OR GOVT201 OR PSYC280 OR NS&B280**

QAC385 Applications of Machine Learning in Data Analysis
The course provides a broad overview of machine learning algorithms and focuses on their application in data mining. Building on a basic background of regression analysis, and following a learning-by-doing approach, students are introduced to data mining tools and techniques that are used to identify patterns and relationships in large and complex data. While the emphasis is on intuition and application rather than theoretical results, through different case studies, students are introduced to the fundamentals of the different methods and learn how to conceptualize a problem, analyze it using appropriate tools, and communicate their results.

QAC386 Quantitative Textual Analysis: Introduction to Text Mining
We encounter computerized processing of text in almost every field of life. Google tries to infer the meaning of our search queries, online review engines try to extract information about what products are popular with the users, and across different fields scholars analyze text for insights into the processes and phenomena they study. This course will introduce you to the skills necessary to mine text for information and knowledge. You will learn how to use Python to retrieve text from a variety of sources, how to use regular expressions to identify which pieces of text are useful to your study, and how to use techniques from data mining to analyze the processed text to extract information and for classification and prediction.

QAC387 Generative AI -- LLM Tools for Data Analysis
The goal of this course is to educate students in the techniques of doing data analysis with the assistance of artificial intelligence. The course will cover the use of Generative AI -- Large Language Models (LLMs) and consider the ethical dimensions in the development of AI tools and their applications. Through hand-on exercises and a term project students will develop the understanding and the skills for development, application, and appropriate use of AI tools in data analysis to advance empirical research and evidence-based decision making.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

QAC388 Deep Learning and Large Language Models: An Introduction
You have probably used ChatGPT, DeepSeek, Midjourney, or another generative AI in your lifetime. But how do these tools actually work? This course will help you answer that question by introducing you to the theory and practice of deep learning, the fundamental technology underlying generative AI. Students will learn the building blocks of modern neural networks, including matrix and vector operations, embeddings, backpropagation, and attention. This will culminate in the implementation of the original GPT transformer language model from scratch in PyTorch. We will then explore extensions of transformers in other modalities, including vision and diffusion transformers for understanding and generating images, and transformers for time series analysis. Along the way, we will cover other types of neural networks, including multilayer perceptrons, CNNs, and RNNs. We will use these models in a variety of practical applications using real-world datasets.

RELIGION (RELI)

RELI102F Sex and Sexuality in Islam (FYS)
Islamic societies have long traditions of commentary about the body and sexuality. Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims throughout time. Instead of essentializing the Islamic "viewpoint" on sexuality, we will survey the variety of opinions and ideas about sex from medieval Islam to the modern world. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and modern sex manuals and debates, among other sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct in Islam, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature.

RELI115F Theorizing Religion with Zombies (FYS)
This course introduces students to theories in religious studies in order to investigate the intellectual and cultural histories of two highly influential and essentially religious ideas: the zombie and the apocalypse. We will critically trace their representations in popular culture in order to explore writings in biblical narrative, history, modernity, monster theory, alterity, gender, capitalism, race, epidemiology, film theory, and media studies. We will begin with ancient texts, move to the history of the concept of the zonbi in Haiti, and then trace the trope of this modern monster and its various meanings into the contemporary moment.

RELI151 What is Religion? Kool-Aid, Sacred Space, and the "God-Emperor"
This course will introduce students to the academic study of religion. It will not offer a survey of "world religions"; rather, it will call upon a set of case studies to help us explore various theoretical issues in the study of religion. These include theories of religious experience, the interpretation of religious texts, the relationship between thought and practice, and the intersections of religion with law, culture, race, gender, and national identity. Perhaps most importantly, we will examine some of the historical, social, and political processes that have produced "religion" as a category in the first place. Together, these discussions will offer us a set of descriptive and analytical tools for understanding the role of religion in social, economic, and political life in both premodern and contemporary settings.

RELI151F What is Religion? JewBus, Museums, and the First Amendment (FYS)
Why did the FBI assault the Branch Davidians' compound near Waco, Texas, thinking it was a cult, while those inside viewed the government as serving the anti-Christ? Can one be Buddhist and Jewish at the same time? Are museums religious spaces? Does secularism protect religion from the government or the government from religion? This class will introduce you to the ways in which we study religions by reading critical case studies, including those about Muslims debating the hijab, the treatment of sacred objects in museums, and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.

RELI167 Introduction to History: Yoga: A Global History
Yoga as a philosophical, religious, and ascetic discipline has shaped the lives of major world-historical figures, including the Buddha, the Mughal emperor Akbar, Mahatma Gandhi, and Steve Jobs. Though yoga is usually understood today as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced dramatic change over the millennia--not least with the rise of "postural" yoga in India from about 1000 CE, its systematization as "hatha yoga" by about the sixteenth century, and its growing popularity in the West since the early twentieth century. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psycho-somatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis) as it spread from India to both the East and West.

RELI173F Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies (FYS)
Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, and environmental legal frameworks with language that invokes the Mother Earth. This seminar will explore the social, legal, and metaphysical aspects of eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, pantheist, monist and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Erndl 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S foks? Engaging emerging podcasts, shamanic documentaries, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke Mother Earth, the Pachamama, or the Goddess to self-regulate the ecologically destructive practices of our late-stage capitalism?

RELI174F Jesus Chicken: Business and Religion in America (FYS)
Summary: Although many Americans are aware of the religious identity of the fast-food chain Chick-fil-A (earning it the moniker of "Jesus Chicken" in some communities), there is nothing new about businesses that project a religious ethos. This First Year Seminar explores the blurry boundary between business and religion in America, examining the ways in which businesses use religion and the ways in which religious entities often function as businesses. Although this course primarily focuses on the Christian tradition, it will also examine the ways in which other religious communities (such as Jewish and Buddhist) approach the marketplace. Chronologically, the course spans the 17th to 21st centuries, paying special attention to the emergence of the market economy in the U. S. from 1800-1850 and the growth of consumer culture in the second half of the 20th century. This course will provide students with an introduction to historical methods and the critical study of religion, while focusing on developing collegiate-level reading, writing, and critical thinking skills that will form a foundation for any major at Wesleyan.

RELI175F Constructing the Human: Humans and Animals in the Hebrew Bible (FYS)
How do we define "humanness" and what assumptions do we make about our own distinctions between "humans" and "animals" when we define humanness? This course will look at the process of constructing the human category in the ancient world and Hebrew Bible and then compare that process to our own modern conceptions of humanness. In what ways are they similar and in what ways are they different? How can ancient examples of the human category inform our own ethical understandings of what it means to be human?

RELI176F Morality and Health: Religion, Bodies, and Biomedicine (FYS)
We often think of religion and medicine as diametrically opposed. Faith, prayer, and alternative health methods can seem incompatible with science and biomedical care. Yet, throughout most of human history, religion and health have been intimately intertwined. And they still are. The ways that we treat our bodies--individual and collective--are often influenced by religious ideas,

moral systems, and embodied spiritual practices. This course explores differing religious approaches to life, personhood, and death. We will ask how race, gender, and sexuality intermix with religiously derived ideas about morality and health. Readings will cover birthing, dying, healing pilgrimages, self-help, organ transplantation, Artificial Reproductive Technologies, vaccination, and more.

RELI177 Introduction to Black Religions in the Americas
This course will both introduce students to the themes of Black religions formed in and through the Americas, and specific traditions, for example Santería, Islam, Christianity, and Buddhism. The Americas are formed in and through Black Atlantic. The phrase the Black Atlantic centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. The term aptly captures the shifting geographies we call the Americas. Africans were not solely objects of dehumanizing subjugation and property. Africans co-created the new world of the Americas through material practices, traditions of knowledge, and meaning making summed up in religion. Students will read scholarly articles and engage multi-sensory sources and first-person accounts of both themes and traditions. All resources will be provided in class or via Moodle. Books for purchase are not required.

RELI179F Not Like Us: Religion, Race, Pop Culture (FYS)
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What is this 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr. to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity, and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

RELI184 Let's Talk: Civil Disagreement and Dialogue
This class is designed to help students improve their communication and dialogue skills through character development. We will consider ways to build community and trust in order to productively engage in and facilitate difficult conversations across political and social differences. Rooted in a philosophical framework for the study of values and virtue, we will reflect upon and incorporate the moral and intellectual features of good dialogues into our everyday lives. Our goal is to become the sort of people who can communicate effectively across differences in careful, constructive, open dialogues aimed at truth and justice.

RELI185F Reasonable Disagreements: Science, Philosophy, Magic, & Society (FYS)
Much of contemporary social and political discourse revolves around science--with many assuming that science is rational, objective, true, and the ultimate source of knowledge. As a result, it would seem unreasonable to believe in things like astrology, magic, alchemy, and other non-scientific ideals, or even to suggest that science might not be as objective, rational, or true as we might think. In this class we will explore different historical and philosophical approaches to distinguishing "legitimate" forms of inquiry and knowledge, considering the ways that our contemporary perspectives on science have been shaped by a long history of philosophy, "natural" philosophy, magic, theology, and "pseudosciences." We will investigate issues and concepts within and about science, including topics such as the nature of theories, the nature of scientific progress, and the relations among science, values, and society.

RELI201 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

RELI205 Dharma, Karma, and Living with the God/dess/es: Hindu Lives
Through fiction, autobiography, biography, art, a comic book, a city, and a village, this course explores some of the myriad understandings of what it is to be Hindu. In an effort to introduce students to Hindu culture and religion, a number of approaches shall engage the questions: what is Hindu dharma, and what is it to be Hindu? The class will also investigate the issue of "Hinduism," a term created in the 19th century to identify a Hindu "religion" rejected by many 21st-century Hindus. This issue expresses just one of many arising from the Indian experience of contact with the West. Overall, the course immerses students in the lives of Hindu individuals and communities so that we, as a class, can draw our conclusions about Hindu practices and meanings in different political, mythic, social, and cultural contexts.

RELI207F Who is the Dalai Lama? (FYS)
This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulkus) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the 15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

RELI209 Anthropology and/of Islam
This course examines the relationship between the discipline of Anthropology and Islam while also surveying the development of the Anthropology of Islam. Until the middle of the 20th century, Western study of Islam was dominated by Orientalists and colonial social scientists. As the study of Islam and its social worlds entered into the field of modern anthropology alongside decolonizing processes worldwide, the anthropological study of Islam was caught up in, and crucial to, the various critical turns in the discipline that faced as it attempted to decoupled itself from colonialism. With this as the backdrop, "Anthropology and/of Islam" takes on the rich and varied, often complicated, canon of the "Anthropology of Islam" with a particular focus on the Middle East and North Africa primarily between 1975 and 2025 but with an eye to the field globally. It also also attends to the ways in which this field has been responsible for paradigmatic shifts in the Anthropology itself.

RELI209F Religion, Science, and Empire: Crucible of a Globalized World (FYS)
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

RELI210 Gender and Spirituality in the United States
Reclaim your goddess energy. Worship at the altar within. Celebrate your moon cycle. Good vibes only. Messages like these invite women to sanctify themselves, find meaning in the workings of their bodies, and connect to supreme natural forces. They also have powered spiritual and political movements over the past 70 years. While we might we be inclined to relegate an interest in astrology, crystals, aromatherapy, yoga, or reiki to the realm of hobbies or health practices, this course will instead provide a more nuanced view. We will learn the historical and religious contexts of contemporary American spiritualities, particularly as they have been practiced by and marketed to women. We will answer questions such as: How different is spirituality from religion? Why has spiritual practice been commodified and gendered feminine since the New Age era of the 1960s? How has women's spirituality reflected changing ideals of womanhood and the feminine over time? Throughout the class, we will read and listen to popular spiritual content and contextualize it within broader struggles over identity, sexuality, and feminism. In particular, we will interrogate issues of religious appropriation and consider the effects of contemporary movements on the communities who have cultivated sacred practices for centuries.

RELI211 Black Women and the Sacred
This course examines how Black women engage spiritual practices, in and beyond religious traditions to remake an anti-Black world. Black women have famously been called the "mule of the world." In this role, the Black woman is beast of burden, property, ungendered, enslaved. As such the Black woman constitutes a limit for the normal, the human, and thus the religious. In the study and practice of religions in the modern, western world, Black women are included through exclusion as heretics, demons, and witches. Nevertheless, Black women and their practices across normative formations of nation, race, and religion have cultivated social practices, ideas, and communities which form a counter-poetics, a counter-mythology, and an otherwise possibility of what religion, unbounded and non-normative might be. This course examines typical accounts of Black women in different religious traditions, but more importantly, the course examines how Black women's practices upset normal accounts of nation, race, gender, sexuality, and religion. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

RELI212 Introduction to the New Testament
The purpose of this course is to provide an introduction to those writings of the earliest Christians that came to be included in the Bible. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of ancient Christianity. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will therefore focus on a close reading of the New Testament in

light of historical situations and social contexts in the Greco-Roman world, having as one of the chief aims of the course the acquisition of critical skills in reading and understanding the Bible. In the process we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

RELI213 Refugees & Exiles: Religion in the Diaspora
Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. What does it mean to be forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? In our search for answers, we will examine a variety of case studies including the contemporary refugee crises in the Middle East, the border between the United States and Mexico, the black transatlantic, and the destruction of the temple in the Hebrew Bible. This course is a project-based Service Learning in which all assignments are geared toward the final project, in which each student will produce a radio show based on an analysis of a refugee crisis of their choice. These shows will air on WESU 88.1 FM Middletown. To learn more and listen to previous seasons of last year's radio shows visit https://reli213.site.wesleyan.edu

RELI214 Postcolonial Religion: Pentecostalism and the Global South
This course examines the concepts and structures of the city and religion throughout the postcolonial global south through traditions and practices of Pentecostalism. The postcolonial marks both a theoretical and a historical break with the structured violence and domination imposed on most of the world through European expansion, land expropriation, indigenous extermination, African enslavement and Christian evangelization. Postcolonial religion, thus marks a reworking of the past, reforging of the present, and otherwise possibilities for communities and their sacred traditions in the future. This seminar will stretch and test this thesis through an examination of global Pentecostalism, a religion, which both marks the colonial, especially Christian evangelization, even as its rapid expansion in the global south among Latin American, sub-Sahara African and Black-descended people in the US and Europe expresses creolization, indigenization and urbanization. Perhaps, rather than a clean break, postcolonial religion, in the form of Pentecostalism indicates ongoing refusals, ruptures and relations between the metropole, and a history of subjugation and imagined utopian cities and futures of abolition. Seminar focuses on digital humanities in learning and assignments. Books for purchase are not required.

RELI215 Religion and Politics in Early Christianity
The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

RELI216 Jesus Through Jewish Eyes
In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

RELI217 The Environment, The Bible, and Moral Debate
The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular "biblical" view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

RELI218 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RELI219 Online and #IRL: Digital Media, Power, and Religion
From meditation apps and Zoom church to TikTok witches and spiritual influencers, religion and spirituality pervade the Internet. Yet digital media reflects social, economic, and political negotiations of power that often elude our scrolling eyes. This course critically examines digital media and religion by asking how the "power" of digital infrastructures affects religion. Together we will map different platforms and mediators (social media, material technologies, and corporate gatekeepers) that shape "power" and "religion" online. We will survey how religious practitioners navigate digital media through case studies of ex-Evangelical Twitter users, Hindu mega-temple live streams, ritual smartphone apps, and more. We will discuss "spiritual machines" and ask, "Has digital technology become a new god?" This course takes an interdisciplinary approach and engages research from technology studies, media studies, and religious studies. Students will also examine methods, ethics, and theories of studying digital religion and develop their own digital religion case studies.

RELI220 Modern Christian Thought
This course will provide an introduction to the field of Christian thought by exploring the relationship between conceptions of God and conceptions of selfhood, from St. Augustine through liberation, feminist, evangelical, process, and eco-theologies. How do the ways people think about God reflect, support, or interrupt the ways they think about the human subject? And what sorts of ethics, communities, and political decisions do these models underwrite?

RELI221 Islam and Muslim Cultures: Introduction with Case Studies
This course provides an introduction to Islamic traditions and Muslim societies. No background is required. Using a variety of in-depth case studies (Black Muslims in the US, Islamist women of Egypt, and gender dynamics among Hyderabadi Shia), the course familiarizes students with many of the beliefs and practices Muslims associate with Islam and examines commonalties and diversity in how Muslims live their religion. While paying particular attention to peoples and places in South Asia, the Middle East, and the U.S., the course will demonstrate how contemporary Muslim communities exist within global networks that shape local and transnational religion, cultures, and politics.

RELI222 Identity and Jewish Literature: Sexuality, Race, and Gender
What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

RELI223 Jewish Identity in the Ancient World
Jewish Identity is not monolithic but instead, wonderfully, varied, and diverse. The Hebrew Bible gives a multitude of accounts of how many different identities within the course of history came to be and through analyzing these accounts, this course will aim to answer the questions of: What did Jewish Identity look like in the time period of ancient Israel? What variety of identities can be seen in the Hebrew Bible itself? What key historical events aided in the development of different identities in the ancient world? What was the process of identity formation in the ancient world? Is that process of identity formation different

than how one might construct identity today? Is it right to even speak of Jewish Identity in 600-700 years in which the Hebrew Bible was written?

RELI224 Zen Buddhism Across East Asia: Teaching and Practice
In this course, we will examine Zen/Chan Buddhism in history and in its contemporary practice. We will trace how Zen Buddhism sprouted from Chinese religious traditions in the Tang Dynasty (618-907), flourished in the Song Dynasty (906-1279), and then spread to other East Asian countries such as Japan and Korea. Then, we will pay attention to the ways in which Zen Buddhism found its way to modern Western society, through figures such as D. T. Suzuki and Okakura Kakuzo since the 19th century. Course readings consist of primary sources of Zen Buddhism, which are available in English translation. A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

RELI225 Socialist Utopias: Transcendence and Religion in Communist States
Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

RELI226 American Christianities: What Do Christians Want?
The course explores contemporary Evangelical Christianity in the United States, and focuses largely on white Evangelicals and how they are shaping our current moment in profound ways. We will interrogate how ideals of the nation, civil religion, the prosperity gospel, capitalism, and the family shape Christian social action. Religion is not only what groups think and believe, but also what they do. We will examine why Christians love Wal-Mart, fund global humanitarian efforts, travel on international missions, use digital media and become influencers, support anti-abortion activism, wage spiritual warfare against demons, and more. By considering a variety of conservative Christian groups, we will critically evaluate the diverse social imaginaries, theological frameworks, and historical foundations that shape this strand of contemporary U.S. Christianities.

RELI229 Tibetan Religion
This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. It will also examine the lesser-known communities of Tibetan Muslims and Christians inside Tibet and in exile. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

RELI230 Cinematic Encounters: Muslims and/in/of the West
Please note: students will be required to view all films prior to the first day of class, and to submit pre-session assignments. Examining contemporary films by and about Britons, Indians, Pakistanis, Afghans, and Black and white Americans offers the opportunity to challenge the simplistic binaries of West versus Islam upon which popular representations often rely. We will pay attention to the aesthetic choices made by directors and screenwriters as they depict themes of Muslim emigration, European imperialism and colonialism, religion and secularism, terrorism and state violence, representations of gender, and issues of multiple belonging. Particular analytic emphasis will be given to the concept of nationalism. Films that may be included are "The Outpost," "The Kingdom of God," "The Battle of Algiers," "Lagaan," "Zero Dark Thirty," "The Beauty Shop of Kabul," "Restrepo," "Khuda ke Liye," "My Name Is Khan," "Malcolm X," and "AmericanEast."

RELI231 Greeks-Romans-Christians
Western civilization emerged, in part, out of the achievements of ancient Greeks, Romans, and Christians. Art, architecture, philosophy, and literature were all forged in a crucible of clashing cultures. This course will introduce students to the religious worlds of Greek, Roman, and Christian antiquity. Attention will be given to the mythologies of the gods and cultic practices of the people, including religious sanctuaries, festivals, and sacrifices; divination, magic, and the mysteries; philosophy, ethics, and theology. We will conclude with an assessment of the rise and eventual triumph of Christians, their appropriation and critique of Greco-Roman culture, and their obsession with martyrdom and the cult of the dead.

RELI234 Ancient Christianity irl: Art, Objects, and Sacred Spaces in the Roman Empire
This course will introduce students to ancient Christianity through the study of a variety of sources, including textual, material, and visual. We will examine the development of Christianity in the Roman Empire during the first six centuries CE, following the rise of Christianity from a religious movement to an imperial religion. We will investigate the myriad representations of Christianity throughout the ancient Mediterranean world: amulets, magical spells, books deemed crucial for the faith and those deemed heretical, the earliest images of Jesus and his followers, and those spaces devoted to Christian cultic practices. This course requires no background and will engage topics in units diachronically so that students can understand the evolution of ancient Christianity from the Classical period through late antiquity.

RELI235 Gods, Heroes, and Chaos!: An Introduction to Greek and Roman Mythology
This class will dive into the wild and tumultuous world of ancient Greek and Roman mythology to begin to understand its impact on culture and identity in both the ancient and modern world, reading primary source literature, looking at iconography and material culture, and studying later examples of mythological reception. Primary sources span mythical stories of the creation of the universe and the gods themselves; the dramatic exploits, interrelationships,

and depictions of the gods; the careers of major heroes and heroines; and the myth of the Trojan war and its long aftermath. While we read ancient works, we will discuss the impact of mythology on religious and cultural practices, history, cultural identity, art, politics, and day-to-day life. We will also discuss the enduring influence these myths have on modern culture -- for better and for worse -- in today's politics, culture and art. Students will acquire mythological literacy, to understand the language of myth itself in both the ancient and modern world, to be able to read the impact myth continues to have on the way we define the natural world, the divine, and humanity's place in the universe. This course counts towards the Literature and Performance track of the Classics major.

RELI241 Cults, Crusades, Jihad, and Multiculturalism: On (Non)Religious (In)Tolerance
"More people have died in the name of religion than any other cause on Earth." Is this true? If not, why do so many people believe it? Even if it is not true, a great many people have died for causes propelled by religious ideologies and sentiments. Then again, a great many people have been killed because of their religious identities and associations. How do religious traditions generate emotions of empathy, suspicion, antagonism, and/or indifference? And how do secular traditions promote similar emotions toward specific religions and toward religion in general? This course will investigate what these dynamics tell us about various religions in different cultures--specifically those of South Asia and the United States--and how some social ideologies allow only for specific religions or all religions. We will explore these in the context of the so-called "cult" of the Branch Davidians in Waco, Texas; the pogrom against Muslims by Hindu nationalists in India; various jihads in Afghanistan, Pakistan, and India; and the role of imagined Muslims in the language of tolerance among the American republic's founders.

RELI242 Introduction to Buddhist Thought and Practice
This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

RELI250 Islamic Movements and Modernities
No background is required for this seminar. The so-called Islamic State once grabbed headlines daily with criminal acts primarily committed against other Muslims, but also against non-Muslims. Its violence overshadowed even al-Qaeda and the Taliban in media coverage. This seminar will track the development of these groups as well as the many more Islamic movements that reject violence and seek peaceful social change. Indeed, many Muslims object to the name "Islamic State" because they recognize the group as neither Islamic nor a legitimate state. The seminar examines how specific Muslim communities in the Middle East, Europe, South Asia, and the United States have engaged the modern conditions of Western imperialism, nationalism, and globalization and shaped their own forms of modernity. The seminar also investigates the increasingly digital, transnational, and intercultural realms of Muslim experiences.

RELI251 Not Like Us: Religion, Race, Pop Culture
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What Is This 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

RELI252 The Five Rachels: Jewish Women in Contemporary American Culture
The course will focus on five iconic contemporary female TV characters, actors, and creators; American, Jewish, and incidentally--or not--sharing the same name: Rachel. Rachel Green ("Friends"), Rachel Berry ("Glee"), Rachel Menken ("Mad Men"), and Rebecca Bunch ("Crazy Ex-Girlfriend"), played by Rachel Bloom, and Midge Maisel ("The Marvelous Mrs. Maisel"), played by Rachel Brosnahan. These five complement each other and offer us a panoramic view of the American Jewish female experience: discrimination, inclusion, the generational gap, and their relationship with Israel. In addition, they allow us to explore the three most common stereotypes associated with the Jewish woman: the Jewish nose, the Jewish mother, and the Jewish American princess. We will discuss the conflicts and the societal shifts these characters embody, and how they define themselves, their Jewishness, their femininity, their unique surroundings, and place in history.

RELI253 Rabbis and Reinterpretation
This course explores the dynamic and creative ways in which rabbinic texts, particularly the Mishnah and Talmud, reinterpret biblical passages. We will investigate the methods of rabbinic exegesis, their theological and legal motivations, and the role of these texts in shaping the larger Jewish tradition. Emphasis will be placed on close readings of primary sources in translation, contextual analysis, and critical engagement with secondary scholarship.

RELI255 Heretics and Heresy
What is religion all about? Is it fundamentally about belief, truth, or God? About understanding, revelation, or salvation? Is religion about one's origins, identity, or destiny? Is it about what one does or is supposed to do? How would we ever know? And who gets to say so? This class will explore the emergence of "heresy"--notions of error--in the construction of religious belief and practice in ancient Christianity, and how "heretics" became central to the way Christianity defined itself in relation to Jewish and Greco-Roman religious traditions. We will examine these issues, in part, by reading a number of remarkable, and recently discovered "heretical" texts from antiquity and early Christianity, including the Gospel of Thomas, the Gospel of Mary, the Gospel of Judas, the Gospel of Truth, and the Cologne Mani Codex.

RELI260 Ancient Jewish Mysticism
This course examines how ancient Israelite/Judahite communities (Bronze Age through the Iron Age) imagined, accessed, and managed the "invisible world": the dead, hostile spirits/demons, divine messages about the future, and the binding power of spoken formulas (oaths, blessings, curses). Rather than treating "mysticism" as later contemplative tradition, we use the term in a deliberately narrow, historical sense: ritual and textual techniques meant to cross or manipulate the boundary between human and nonhuman realms -- especially under conditions of threat, uncertainty, or political pressure. Working historically and comparatively, we read biblical texts alongside contemporary ancient Near Eastern ritual and inscriptional evidence (Akkadian, Aramaic, Sumerian, Ugaritic), asking: What practices do the texts presuppose? What do polemics against "illicit" rites reveal about what people actually did? How do treaties, curses, and apotropaic objects encode beliefs about divine enforcement? And how does material culture (amulets, inscriptions, ritual installations) complicate strictly "literary" reconstructions?

RELI263 God & Guns: The History of Faith and Firearms in America
This course examines the history of firearms and religion in the United States, ultimately seeking to understand the significance of gun culture within American Christianity and the powerful "God & Guns" story at the core of many Americans' identity. Beginning with an overview of colonial and revolutionary-era views of firearms and violence, the course examines the influence of slavery, gender, and the wars of the 20th century, paying special attention to the emergence of a masculine, warrior Jesus within evangelical and fundamentalist communities during the Cold War. Students will be challenged to consider the ways in which this story helps explain one facet of popular support for Donald Trump and to reflect on how firearms are central to the identity of many conservative American Christians.

RELI264 Theorizing Religion with Zombies
This course introduces students to theories in religious studies and other fields in order to investigate the intellectual and cultural histories of two highly influential and essentially religious ideas: the zombie and the apocalypse. We

will critically trace their representations in popular culture in order to explore writings in biblical narrative, history, modernity, monster theory, alterity, gender, capitalism, race, epidemiology, film theory, and media studies. We will begin with ancient texts, move to the history of the concept of the zonbi in Haiti, and then trace the trope of this modern monster and its various meanings into the contemporary moment.

RELI265 The History of Emotions & Religion: Feeling One's Way to the Past
When examining the lives of communities, societies, and religions, scholars tend to focus on ideas and practices such as "justice" and "salvation" or fair elections and religious discipline. But what about emotions? For reasons we will examine, Western scholars -- and, thus, students -- have often overlooked the centrality of emotions in the social interactions of and between various cultures. This seminar will consider various historical (and a few contemporary) references to emotion in written texts. It will take into account the variability of the language about emotions (indeed, does the category of "emotion" even translate into all languages?). Emotions examined in American, European, South Asian, and Middle Eastern contexts include those that might be translated into current American English as fear, love, awe, submission, dispassion, pride, and loyalty. Each will be considered in their historical context with reference to the contemporary terms used and their linguistic register. Papers will involve the use of historical dictionaries and encyclopedias in order to understand period uses of terms we might now described as "emotive." Seminar members will visit with Wesleyan's Rare Books staff in preparation for a final project that will require use of the archives of either Wesleyan or the Middlesex Historical Society.

RELI268 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

RELI270 Magical Money and Enchanted Capitalisms
In the early days of the 20th century, Max Weber foresaw that with the rise of capitalism and modernity, the world would become increasingly disenchanted. Now, with the turn of the 21st century, people all over the world experience capitalism as a realm of enchantment. In Malaysia, ghosts possess factory workers; in South Africa, capitalism produces zombies; and in Bolivia, mines eat their miners. Instead of Weber's "iron cage," we live in a world of "voodoo economics" where Korean shamans conduct ceremonies to bless new businesses, Russian psychics curse business competitors, and prosperity theology preaches that God will make you rich. This class explores the enchantment of the financial sphere, combining theory on the disenchantment of modernity (Max Weber) and commodity fetishism (Karl Marx, Sigmund Freud, William Pietz) with ethnographic accounts of how capitalism and the economy become mystified and enchanted.

RELI271 Secularism: Godlessness from Luther to Lenin
Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

RELI272 Ethics After the Holocaust
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

RELI272F Ethics After the Holocaust (FYS)
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society,

ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

RELI274 The History of Science in Islam
This course will examine the intellectual legacy of the sciences in the Islamic world. Premodern Muslims cultivated various dimensions of what are today understood as the "hard sciences," including physics, mathematics, biology, and chemistry. In addition to exploring Islamic contributions to these fields during the classical period, known according to some sources as the "Golden Age of Islamic Science," we will explore Islamic medicine and medical theories, astronomy and astrological works (including tools used for astronomical observation), and the sciences of optics and alchemy. We will chart the development of these sciences while looking at the broader cultivation of scientific knowledge in Islamic societies, including the establishment of scientific institutions such as universities, observatories, hospitals, and pharmacies.

RELI275 Moral Complexity in Islam: Origins to the Present
Ethics seem straightforward, until you need to explain your choices. How do you judge actions of truth and deception, love and hate, wealth and poverty, pain and punishment, freedom and slavery? Over the long history of Islamic cultures, how did people describe a good, full life? Is there a unique Islamic ethos of action? Do Islamic thinkers tie values and decisions to divine revelation, or to reason? How do we determine the nature of good and evil? Can God do evil, and what would that even mean? In confronting these questions along with Islamic philosophers and thinkers we will find a surprising range and diversity, and some of history's most compelling answers. Diverse and creative, these answers from the Islamic past compel us to rethink some of our basic presuppositions. Blending theory with case studies from the Islamic past and present, we will approach some of the hard ethical questions that Muslims across the world have had to deal with historically and continue to address today.

RELI275F Religions Resisting Modernity (FYS)
Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of what it means to be modern.

RELI277 Magick and Her Practices, of Late
In this course we ask why paganism and Goddess worship have become "the fastest growing American religion," examining the tensions between science and society that so often provoke magic-infused social resistance movements. We explore the rise of Goddess worship in the Americas since the 1970s, considering its ties to ecofeminist, womanist, indigenous, and environmentalist movements. We examine the force of agency and its relation to ritual magic.

We then dive into the purported roots of several modern magic traditions, including Wicca, Dianic witchcraft, Feri traditions, and Haitian Vodou, among others, and ask how these cosmovisions define and/or transcend our gendered personhoods.

As we find our way back to a renewed understanding of modern paganisms, students will design individual or small group projects wherein they experience, ethnographically consider and/or perform extant manifestations of magic and ritual, bringing peoples lived experiences into conversation with course readings. This class is taught as a twice-weekly seminar designed around written assignments and engaged discussions, while inviting but not requiring students to engage in phenomenological experiences outside of class that may inform their written work. Students will produce ethnographic essays that are both analytical and personally reflective.

RELI281 Political Fantasies of Zion
Palestine, Zion, Judah, the Promised Land. A small piece of land in the Middle East has a very long and contested history full of religious meaning for Judaism, Christianity, and Islam. Some imagine the State of Israel as an island--"the only democracy in the Middle East" or the only Western state in the region--surrounded by a hostile environment. The geographical area, by contrast, has often been portrayed as a crossroad, a place where cultures clashed, merged, and exchanged ideas.

In this class, we will examine this tension between a physical and imagined space, between political reality and idea, by recovering alternative Zionist, non-Zionist, and anti-Zionist visions of the Zion. Jewish statehood is a very recent phenomenon. Throughout the modern period, the vast majority of Jews lived under empires, whether Habsburg, French, Romanov, British, or Ottoman. How did the imperial experience shape Jewish religious and political views? What role does the imagination of Zion play in today's political context? Reading political pamphlets, poetry, maps, artworks, and utopian fiction, we will pay attention to the construction of the Zionist idea not just in political Zionism but also in contrasting visions including Canaanism, cultural Zionism, diaspora nationalism, a Jewish-Arab federation, a binational state, and the rejection of statehood as heresy. In the last part of the class, we will look at recent contemporary issues from the news, e.g., the agreements between the State of Israel and the United Arab Emirates, or government corruption in Israel, in order to see how these ideas of Zion are still present in today's discourse.

RELI282 Religion and the Scientific Imagination
Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they

measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring "debates" between them.

RELI283 Jesus and His Interpreters
The search for the Jesus of history -- what can be known as a matter of historical record about Jesus of Nazareth, apart from religious beliefs and commitments -- creates unending challenges. Jesus left us nothing in writing. Everything we have heard about him comes from texts written many years -- even decades -- after he lived. And indeed, the New Testament never claims that Jesus himself said and did all the things attributed to him. To understand the figure of Jesus, therefore, we must investigate what his many interpreters said about him, and why. This course will focus principally on a close reading of the Gospels in the New Testament (Matthew, Mark, Luke, and John) as well as the two earliest Gospels (the Sayings Gospel "Q" and the Gospel of Thomas) that are not included in the Christian Bible. We will seek to understand how and why these texts interpreted Jesus the way they did.

RELI289 Indigenous Religions: Politics, Land, Healing
From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

RELI291 From Jerusalem to Ground Zero: Muslim, Jewish, Christian, Sioux, and Hindu Notions of Sacredness
Many Jews, Christians, and Muslims view Jerusalem as a "sacred" place. But what does this mean? How does a place--or an object or person--become sacred, holy, revered? Is Ground Zero sacred? If so, how do we compare the destruction of an office building that makes part of Manhattan sacred and Native American efforts to protect venerated sites from "development" that they describe as "desecration"? Does the term "sacred" even translate in other languages? When does a stone sculpture become an embodiment of a Hindu deity?

Using examples such as Jewish, Christian, and Muslim views of Jerusalem, Lakota Sioux recognition of revered places and wicasa wakan (medicine men), and Hindu engagements with divine images, this seminar will explore these questions.

RELI292 Reason and Revelation: An Introduction to the Philosophy of Religion
With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

RELI295 Religion in Dungeons and Dragons
As a fantasy roleplaying game, Dungeons & Dragons has been prevalent for over 40 years. In this game, players partake in fantastical journeys, slaying beasts, completing quests, and interacting with divine beings. Though not often discussed, religion has played an important role in Dungeons & Dragons since its creation: clerics pray to their gods and invoke physical changes in the world, strange cults organize and perform perverse rites, summoning ancient beings for evil. There have been many different editions of Dungeons & Dragons, and each treats these religious elements in a different way. This course answers the questions, "What role does religion play within Dungeons & Dragons and how does the presentation of religion within Dungeons & Dragons map onto scholarly trends within Religious Studies?"

RELI299 Imagining Communities: National Religions and Political Rituals
From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under

God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

RELI300 Semiotics of al-Barzakh: The Grammars of the End of Days and Horizons of Possibility
This course builds from the Islamic eschatological concept of "al-Barzakh" as it has been taken up in anthropological theories, as well as in Islamic thought more generally, with careful attention to the term's semiotic transformations and significations. It does so in order to explore both how the term describes an earthly place and an eschatological hereafter as well as a theoretical and practical alternative to the notion of the liminal personhood.

Since at least the 12th century, thinkers have explored the Islamic concept of al-Barzakh to explore the connection between the earthly present and the heavenly hereafter and the scales of judgment in between. This term, somewhat akin to Christian notion of purgatory or limbo, appears only three times in the Qur'an. It is explained as being like the productive firmament that separates salt and sweet water. In places like Morocco, this is commonly interpreted as referring to the Strait of Gibraltar and the underwater isthmus that separates and produces the waters of the Atlantic Ocean and the Strait of Gibraltar.

We will read both contemporary scholarly apprehensions of this term and its various applications in Muslim-majority contexts such as Morocco, Egypt, Sudan, and Iran--often ethnographic--as well as Islamic philosophy that attempts to bring the concept into relation with earthly personhood. In our approach, we will move through a variety of scholarly genres and epochs in order to trace the genealogies of present-day popular invocations of the term as we contrast it with other apprehensions of the eschatological and the liminal.

We will work to understand how this term contains space for both an imagination of everyday life as well as the boundary-generating difference marking here and there, then and now, by looking at how the term is evoked by artists, scholars, religious adherents, psychoanalysts, and border crossers. As we go along, we will pay special attention to the languages of belonging and difference evoked by this term and attend to how an anthropological approach to semiotics might elucidate new grammars of community and horizons of possibility that exist alongside notions of the liminal, uncanny, dreaming, the hereafter, and the imagination of the end of days.

RELI301 Jesus and the Gods: Christianity and the Religions of Antiquity
How did Jesus of Nazareth come to be understood as a god, who dies and rises, in a world brimming with gods? Why was he remembered as a philosopher and a martyr, like Socrates? How did early Christians understand their rituals of death and resurrection in terms of salvation and sacrifice? How--and with what motives--did writers throughout history compare Jesus with the priests and kings of ancient Israel or with the gods and goddesses of the "Mystery Religions"? This course will focus on the methods and politics of comparing Christianity and the religions of antiquity. Considering themes and theories of religion and sacrifice, wisdom and prophecy, ethics and philosophy, and mythmaking and cultural critique, we will ask how the politics of classification and comparison have shaped not only our understanding of Jesus and Judaism, and of ancient Greece and Rome, but also the construction of Judaism and Christianity as religions, and the very category of religion itself.

RELI302 Kierkegaard: An Advanced Seminar in Absurdity
Throughout Kierkegaard's "pseudonymous authorship"--a set of books written by different characters he dreamed up to remove the burden of authorship from himself--we encounter the possibility that, from the perspective of ethics, philosophy, and even religion, the truth will seem ridiculous. Truth, for these pseudonymous authors, takes the form of paradox, that reason and common sense can only call "absurd." Of course, it is no surprise that a paradox seems absurd; if it is not absurd, it is not a paradox. For the pseudonyms, it is therefore either the case that truth is paradoxical, exceeding the realms of ordinary thinking and existing, or that it is not. If it is not, then the absurd is simply absurd and both philosophy and religion are right to reject it. But if truth "is" paradoxical, then we are faced with the problem of thinking the unthinkable, communicating the incommunicable, and getting serious about absurdity. In this seminar, we will wrangle some of these pseudonyms' best-known, most exciting, and crankiest books, along with a few of Kierkegaard's signed, vitriolic attacks on the established church.

RELI303 Extinction/Rebellion: Christianity and the Climate Crisis
Although this course is not devoted specifically to the subject of "XR"--the decentralized environmental activist organization and global campaign of civil disobedience--it borrows the movement's self-designation as a point of departure for an exploration of the historical, conceptual, and geopolitical significance of Christianity to the "Anthropocene." How is Christianity entangled among the "historical roots of our ecologic crisis"? What is "eco-theology"? How do ancient narratives of creation and traditional Christian teachings regarding the origin of humankind continue to shape modern, scientific, and popular assumptions about the natural world and our place in it? What does the book of Genesis have to say about commercial agriculture, ethical veganism, and the relation of divinity with the more-than-human, animal-vegetal-mineral web of

life? Whence this "planet of slums" and whither Paradise or the Promised Land? Which elements of the Christian imagination enabled colonization of the New World, indigenous displacement and genocide, the transatlantic slave trade, and capitalist globalization? Is another world still possible, and could Christian thought and practice play a pivotal part in actualizing an alternative planetarity today? We will pursue these questions together by way of readings in theology, philosophy, critical science studies, ecology, geography, political economy, Black feminism, queer theory, and Indigenous studies. Ultimately, the course analyzes aspects of Christianity's intimate involvement in the history of climate change and considers how critical attention to this history may contribute to collective acts of rebellion against mass extinction.

RELI305 Pantheologies: Animal, Vegetable, Mineral, World
Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

RELI306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions
Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other powerful "other-than-human persons" who must be respected, who can protect, but who are also feared. In the eyes of early Christians and often in contemporary popular culture, these animate and agentive landscapes can seem monstrous. We will explore medieval ideas about the Wild Man of the Forest, Indigenous and Feminist theory, and draw on case studies from North America, Siberia, Mongolia, and the instructor's fieldwork materials with landscape beings in Buryatia. The class will explore the different relationships human beings have with animate and sacred landscapes, think about the ramifications these relationships have for sovereignty over and in the "natural" world and why the idea that land is alive might be threatening. The course includes a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during Fall Break. The trip will be fully funded with no cost to the students). The trip is required, and in order to take the class you must be available to participate in this travel during Fall Break (10/24-10/27).

RELI307 Ritual
Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion, and not all rituals are religious. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

RELI308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America
This course examines the history of American evangelicalism and fundamentalism, beginning with a brief overview of Protestantism in the colonial and revolutionary eras. Then, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and subcultures (such as Christian music). The course concludes by investigating the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped fundamentalism and evangelicalism, and reflect on how these movements' views of American history contribute to their own sense of identity and purpose.

RELI309 Scoundrels, Sinners, and Saints: Approaches to Buddhist Life Writing
This seminar will examine a variety of religious biographies and autobiographies in order to evaluate the significance of life writing in the Buddhist traditions of Asia. Materials will cover a broad range of historical periods, from early medieval to modern, and geographic regions, including South Asia, East Asia, the Himalayas, and Tibet. Topics include the structure, function, style, production, and reception of biographies and autobiographies, as well as more thematic questions of religious transmission, soteriology and praxis, formations of self-identity, gender, and the relationships of biographical literature to art and pilgrimage. Readings include primary Buddhist texts in translation supplemented by secondary scholarship on hagiography and sainthood, literary theory, narrative constructions of the self, and Buddhist history.

RELI311 Pain and Punishment in the Hebrew Bible
The Hebrew Bible has many graphic depictions of pain and punishment; some inflicted upon the Israelites and many inflicted by the Israelites themselves. Many of the laws of the Hebrew Bible describe the proper ways to inflict punishment and many of those same laws describe the ways in which someone might be absolved of punishment. This course aims to answer the questions of: What role did pain and punishment play in the ancient world? How was the physical experience of either connected to religious experience? In what ways was pain, and often disgust, utilized to either connect or separate someone from the divine? What is the relationship between divinity, power, physicality, and punishment? In asking these questions, this course will demonstrate that, much of the time, spirituality, devotion, and religiousness, need not be divorced from the physical world and need not be considered metaphysical qualities.

RELI312 Judaism in the Time of Jesus
This course is designed to help us understand the emergence of Judaism - its practices and beliefs, as a philosophy, a way of life, a religion -- from the formation of the Hebrew Bible (ca. 400 BCE) to the parallel development of rabbinic Judaism and early Christianity (ca. 100 CE). We will be concerned with the creation of community and its institutions, the rise of sectarianism and claims of normativity, the creation of the Bible as scripture and various modes of its interpretation, the relationship of early Judaism to ancient Israelite religion and society, and relations between Jews and Judaism to gentiles and gentile culture. Attention will be given to the creativity of Jewish literature, its common setting in times of oppression, and its place in the religious heritage of Judaism and Christianity.

RELI313 Curating Religion: Museums, Monuments, and Memorials
Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they represent present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan's collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

RELI314 Buddhist Traditions of Mind and Meditation
This seminar surveys a range of Buddhist meditation practices in the context of traditional theories of mind, perception, and cognition, with an emphasis on the traditions of South Asia, East Asia, and the Himalaya. Beginning with canonical descriptions of the mind and its variety of mental states, the course will then examine early scriptural expositions on the two principal types of meditation techniques: tranquility or concentration meditation (samatha) and insight meditation (vipasyana). Next will be an examination of techniques for cultivating compassion and the view of emptiness that were central to the later Indian traditions of the Mahayana or Great Vehicle. The course will finally turn to the elaborate systems of Tantra that developed in India and spread through Tibet, which incorporate the visualization of deities and recitation of mantras. Readings will include both primary Buddhist canonical works and commentaries by contemporary Buddhist teachers in English translation as well as secondary scholarship on the historical context of Buddhist meditation systems, cognitive theory, and ritual practice.

RELI315 Ethics and Action in the Buddhist Cosmos
We often think about nirvana, or "enlightenment," as the ultimate goal of Buddhist practice. But the reality is much more complex. Buddhist traditions imagine a huge range of positive outcomes for moral behavior: immediate material benefits, rebirth in a better body or in a wealthier family, and enjoyment of gold-paved heavens or eternally blissful Pure Lands.

In this seminar we will read Buddhist scriptures, commentaries, biographies, narrative anthologies, and scholarly works that trace the many ways of thinking about ethics, action, and rebirth in the vast Buddhist cosmos. We will tour Buddhist heavens and hells, Pure Lands and political dystopias, as well as the complex worlds of Buddhist modernity. Along the way we will begin to think about key issues in the study of religion: narrative and ethics, magic and material culture, cosmology and sacred presence, modernity and globalization.

RELI316 Human Rights and Spiritual Ecologies of Indigenous Peoples
This seminar will explore the social, legal, and metaphysical aspects of indigenous spiritual ecologies and their relation to United Nations discourses, indigenous community media production, and land rights movements. We will consider how indigenous peoples both respond to legal frameworks and press their positions into national and international human rights standards, on issues ranging from governance to cultural survival, from environmental management to language policy.

A particular emphasis will be put on the Andean and Amazonian regions of South America, the Mesoamerican highlands (Chiapas, Guatemala), the United States, and the United Nations Permanent Forum on Indigenous Issues, but students are encouraged to pursue their research projects across Abya Yala (the Americas).

This course focuses on developing critical thinking skills and places a special emphasis on writing and thoughtfully responding to the materials presented in class. Classes will not only consist of framework lectures and discussion questions, but also a combination of student panel presentations and writing in a collaborative environment. Participation in these activities is crucial to success in this course. Opportunities for student engagement in Manhattan at the April 2024 United Permanent Forum on Indigenous Issues are currently in development.

RELI317 Colonizing Space: Exploration, Extraction, and Inhabitation
In his 2025 Inauguration Address, the US President promised that the nation "will pursue our manifest destiny into the stars, launching American astronauts to plant the Stars and Stripes on the planet Mars." What is "manifest destiny," and what does it have to do with outer space? Would planting a flag on Mars amount to claiming it as territory? And why is this administration setting its highest hopes on Mars? This course will track the ideological and colonial history of the Apollo era before approaching the scientific, economic, and legislative landscape of the corporate sector known as "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of Earth, the Moon, asteroids, and Mars. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

RELI317F Colonizing Space: Exploration, Extraction, and Inhabitation (FYS)
Under its "Artemis Mission," NASA plans to put "the first woman and first person of color" on the Moon to build a permanent outpost. This lunar base will allow NASA to mine the Moon, extract precious metals from asteroids, and eventually colonize Mars--hopefully before China and Russia do the same. Thanks to recent legislation, NASA will rely throughout this mission on the rocket and extractive technologies of private corporations like SpaceX, Blue Origin, Moon Express, and Deep Space Industries, whose CEOs proclaim they are saving the human race by expanding it into space. It will also rely on the backing of the newly-created sixth branch of the U.S. military: the Space Force.

This course will track the ideological and colonial history of the Apollo era before approaching the scientific, corporate, and legislative landscape of "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of the Earth and its cosmic neighbors. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

RELI318 Awesome Cinema: Religion, Art, and the Unrepresentable
How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the non-rational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason.

RELI320 Schemers and Redeemers: Capitalism and Christianity in the Early Republic
This course examines the intersection of two of the most significant themes in U.S. history: Capitalism and Christianity. Beginning with the Early Republic (1790s) and continuing through the mid-19th century, this course asks students to explore how Americans used their religious identities to negotiate and shape market activity and institutions (and in turn, how the marketplace shaped their religion). Students will investigate the varied ways in which religious women and men resolved tensions between gender, class, slavery, moral dogma, and market imperatives. Finally, this course will require students to reflect on how the early 19th-century U.S. experience informs our understanding of the relationship between capitalism and Christianity in 21st-century America.

RELI321 Visual Worlds of Himalayan Religions
How do Tibetan Buddhists look at religious images? What do pilgrims in Nepal see when faced with sacred monuments? Why do devotees in Bhutan display erotic caricatures in public? This seminar will explore the ubiquitous role of images and imagining in the religious traditions of the Himalayan region. Readings and viewings will examine the painting, sculpture, architecture, and performing arts of the Himalaya (including Tibet, Nepal, north India, and Bhutan), placing them in the context of local religious beliefs, ritual practices, and literary canons. The seminar aims to understand how Himalayan cultures produce religious images and the ways of seeing that invest them with meaning. Classes will address specific modes of visual representation, the relationships between text and image, and the social lives of images, as well various theoretical and methodological approaches for their reading and interpretation. Particular attention will be paid to representations of Buddha Sakyamuni and visual expressions of his life.

RELI322 Playing God: Race, Colonialism, and Raising Dinosaurs from the Dead
This seminar draws on the fields of religious studies, ecocriticism, philosophy of science, decolonial thought, Black studies, political anthropology, and queer

theory to examine our culture's fascination with dinosaurs. Questions discussed include: What are the ethical implications of "discovering" dinosaur fossils on stolen Indigenous land? How have "philanthro-capitalists" used dinosaurs to promote the ideology of American exceptionalism? How do fossil fuels and their extraction relate to searches for fossil animals? Why do creationists believe dinosaurs still live, and how is this a remnant of European imperialism? Is the dream of resurrecting extinct species scientific or religious? How do natural history museums benefit from and contribute towards colonialism? Is the past more like a natural resource or public utility? In the process of addressing these and many more questions, students will examine what dinosaurs can teach us about humans, non-humans, post-humans, extinction, and the end of the world.

RELI323 The Black Charismatic
In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called "charismatic") black political leadership by attending to Tavis Smiley's yearly "State of the Black Union" address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley's annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley's yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

RELI324 Biopolitics, Blackness and Spirit Baptism: The Birth of American Pentecostalism
American Pentecostalism is a conservative, Protestant, Evangelical revival movement that emerges in and through Black practices that constitute an exclusion in the racialized religious, social, cultural, and political formations of early 20th-century United States. Rather than examining Pentecostalism through a single lens called "religion," this course will use the themes of Biopolitics and Blackness to examine Pentecostalism through its most commonly known feature--an experience called the baptism of the Holy Spirit. Pentecostals were narrated in popular and critical accounts in the late 19th and early 20th century as exhibiting criminality, insanity, and raced, gendered, and sexed Black pathology. These marks of abnormality were all part of a formation of power in America known as biopolitics. As an idea, biopolitics is popularized by French historian/philosopher Michel Foucault. Foucault's concept attempts to explain how different intellectual and professional disciplines emerge in nations during the late 19th and early 20th centuries to best create a thriving population, which could be made to live. The power of the nation-state had traditionally been expressed in and through the power to kill. As a revival movement, Pentecostalism rehearses these themes, as early adherents fight over what it means to be made alive when racial Blackness is almost often seen as a mark of and for death. The course will study original accounts and sources from the historical period, read critical, interpretive accounts, and use a variety of media. All resources will be provided in class or via Moodle.

RELI325 The Black Soul: DuBois and the Practice and Grammar of Religion
W.E.B. DuBois is a foreparent in modern sociology, history, poetics, and aesthetics. DuBois was no less formidable and foundational for understanding religion in general, and Black religions in particular. This course seeks to read several of the great works of DuBois, interpreting them in light of their relevance for the study of religion. The course will also give extensive consideration to how DuBois both studied and used religious grammar and practices to build his intellectual program. The course will examine DuBois's impact on the study of religion globally in the aftermath of his work. DuBois's works will be considered, along with interpretations from Edward Blum, Hazel Carby, David Chidester, Gary Dorrien, Cheryl Sanders, Theodore Vial, Stephanie Shaw, Victor Anderson, and Rebecka Rutledge Fisher.

RELI326 Religion and Rocks
In the last few decades, scholars have increasingly cautioned against anthropocentrism in the natural and social sciences, calling our critical and ethical attention to the worlds of nonhuman animals, vegetables, funghi, bacteria, and even quarks. Attuned as we've become to this entangled riot of agents, one might be forgiven for wanting something unquestionable (not to mention unmoving) to stand on. Nevertheless, this course will suggest we turn our attention to the literary, religious, cultural, and scientific imagination of rocks. Why do children collect rocks; what do geologists learn from them; what does industry do to them? How does a mountain become sacred; how do sages encourage stones to speak; who buys and sells crystals, and why? And why is it the case that, even though particular people hold particular stones, gems, mountains, planets to be powerful and even sacred, the category of "rocks" seems not to merit much critical (much less ethical) consideration?

RELI327 How to Be a Buddha: Buddhist Philosophy in Practice
What does it mean to become a buddha? How might one lead an awakened life? This advanced seminar explores the paths of ethical practice, philosophical insight, and meditative cultivation through one of Mahayana Buddhism's most celebrated and influential texts: The Guide to the Bodhisattva's Way of Life (Bodhicaryavatara). Composed in verse by the renowned eighth-century Indian scholar Shantideva, this masterwork of Indian philosophy and Buddhist

literature sets forth in vivid detail the ideal of the bodhisattva, an individual focused on attaining the state of a buddha for the benefit of others. Through a close reading of Shantideva's work in various translations, traditional Buddhist commentaries, and secondary scholarship, we will follow Shantideva's account of the bodhisattva path, examining key points along the way including the nature of suffering and the possibility of liberation; the ethical frameworks of bodhicitta (the mind of awakening); the tension between individual agency and interdependence; the nature of mind; views of no-self and emptiness; and the unfolding of wisdom. The seminar will also consider how, in recent decades, the Guide has been recast and reinterpreted under the rubric of human flourishing and as an approach to living a "good life."

RELI337 Missionary Mysteries: the Objects and Archives of Wesleyan's Missionary Past
This course examines the history of Wesleyan University's connections to missionary work in the nineteenth and early twentieth centuries, as seen through the university's archival and object collections. Students will spend the bulk of classroom time in hands-on learning as they engage with the archives of the Wesleyan Missionary Lyceum and cultural heritage collections obtained by missionaries and brought back to the University. Beginning with an overview of historical, archival, and museum methods, the course then will examine objects and written records from the Americas, West Africa, East Asia and the South Pacific. Students will be challenged to consider the ways in which Wesleyan has been engaged in colonialism, imperialism, and global evangelism. Topics of investigation will include: gender, linguistics, museum ethics and repatriation, the use of objects as educational tools.

RELI373 Religion, Science, and Empire: Crucible of a Globalized World
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

RELI375 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

RELI377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse
This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or "inflationary," version of the big bang hypothesis in relation to Christian and indigenous myths of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast "multiverse" in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies--that is, theories that posit a rebirth of the cosmos out of its fiery destruction--in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle "decides" upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

RELI391 Religion and the Social Construction of Race
In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (a) the intersections of race and religion as a process in which power plays a pivotal role; and (b) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Father Divine, the Nation of Islam, Rastafari, Haitian Vodou, Jonestown, the Christian White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

RELI393 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

RELI395 The Anthropology of Religion
What do we study when we study religion? We can observe practices, record speech, examine objects and actions--but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of "explaining away" the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

RELI398 Majors Colloquium in Religious Studies
This course is designed to teach us how to reflect critically upon the theories, methods, and discourses that constitute the academic study of religion. We will be concerned with current studies in history and the history of religions, classic theory on religion, ethnographic methods, and contemporary theory on secularism. Our task is to understand and assess how scholars of religion make critical judgements. And so, since the building blocks of argumentation remain constant -- definitions, classifications, data, and explanations -- we will seek to

identify and evaluate each scholar's principles of selection, means of description, stipulation of evidence, use of comparative categories, and methods and models of argumentation.

ROMANCE LANGUAGES AND LITERATURES

RL&L115F Italian Cinema, Italian Society (FYS)
This First Year Seminar on Italian cinema (taught in English) investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with popular genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Ophuls, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others.

Major Screenings will be organized for students. Students are not responsible for purchasing the films.

RL&L120F Tales of Resistance: Modernity and the Latin American Short Story (FYS)
Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, as well as immigration to Europe and the United States.

RL&L122F The Little Prince and Beyond: Literature and Childhood (FYS)
This first-year seminar will explore French literature and films for and about children. At the heart of our discussions in this class will be the question of how adults construct the child's point of view. How can we define childhood? How can we evoke it through narrative? How ought we make art for children? We'll look at a variety of sources including Marjane Satrapi's graphic novel memoir Persepolis, Antoine de St. Exupéry's The Little Prince, 19th-century didactic literature, films by François Truffaut, and classic fairy tales. No knowledge of French is required; all readings will be in translation and discussions will be in English. We will work on a variety of critical writing formats and students will also have the opportunity to produce creative writing as well.

Prereq: **None**

RL&L123 Love, Sex, and Marriage in Renaissance Europe
This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to: How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

RL&L123F Love, Sex, and Marriage in Renaissance Europe (FYS)
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level

research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

RL&L125 Jungle and Desert Adventures
This course analyzes the constellation of images and sensations conjured up by the terms "jungle" and "desert" that are opposite but equally extreme. We will explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes. Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And finally, how do we each see ourselves in relation to landscape? What is our own version of an "extreme" landscape?

Prereq: **None**

RL&L126 El Greco to Picasso: Modern Art's Passion for Golden Age Spain
This course examines the life and afterlife of the Spanish artists of the Golden Age, whose achievements reached unprecedented heights in the 17th century. Centuries later, their works took on new roles as artists of other times and cultures found their own inspiration in works of the past: Manet copied Velázquez, Picasso copied El Greco, and (famously on "Project Runway") Christian Soriano copied Murillo. What allowed these complex works to resonate so strongly in another era? Is such influence automatically a sign of success? And why have the works of Francisco Goya inspired more filmmakers than any other artist? Students will be introduced to the reading of visual art for stylistic, historical, and political content and develop a critical understanding of art and society in Golden Age Spain, as well as insights into the role of art as a cultural currency.

RL&L129 Writing the French Revolution
"Liberty, equality, and fraternity" was the slogan of the French Revolution and features three concepts of enduring interest. In this seminar we will explore the French Revolution and its antecedents -- and what these can mean for us today. In the process we will delve into a number of ways of thinking and modes of representation: historical thinking, of course, but we will also get a sense of the origins of sociology and political science, the power of scientific thinking, and differences between literary and visual representation (especially films). This course will also serve as a writing workshop emphasizing the nuts and bolts of good writing and experimenting with such rhetorical modes as argument, personal narrative, persuasion, and fiction-writing.

RL&L130F If This Is an Author: Primo Levi and the Politics of Authorship (FYS)
In this First Year Seminar, we look at what makes an author to help you become a better writer. Through the case study of Primo Levi, we address questions of authorship, reception, and appropriation. From his seminal Holocaust text, "If This Is a Man" (first published in 1947, also known in the States as "Survival in Auschwitz"), to the philosophical essays of "The Drowned and the Saved" (1986), Levi was a writer of many genres (memoir, poetry, short fiction, novel, non-fiction) who confronted some of the most crucial themes of the 20th century: genocide, moral choices, the uses of science and technology, the relationship between historical truth and memory, and the power of language. In this course, we reflect on what an author is in theory (Barthes, Foucault, Sedgwick, Spivak, etc.) and in practice, engaging with and reacting to Levi's writing through such questions as: what makes a literary work authentic and why should we trust the words of an author? How do authors affirm their authority in their own country and abroad, and what is the role of publishers, translators, and critics in their reception? What happens when an author becomes a character for another author, and, more generally, what are the aesthetic and ethical implications of appropriating an author's body (of work)? As we critically read a significant portion of Levi's "Complete Works", you will hone your interpretative and writing skills through class discussion, short writing assignments, in-class presentations,

and ample feedback, understanding how questions of authorship do not pertain solely to a literary author like Primo Levi, but can also help you become a more confident writer.

RL&L140F Van Gogh and the Myth of Genius (FYS)
This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist's own account of his career in his paintings and prodigious correspondence. Van Gogh's extensive, insightful, and fascinating writing begs the question of how one should treat an artist's statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886--1890.

RL&L141 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of Impressionist, Neo-impressionist, and Symbolist painters before moving to the south of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

RL&L148F Responding to Political Turmoil (FYS)
"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--including the creation of the U.S.; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The course is both academic and project-based: as we gain perspective through academic readings and assignments on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and intended to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L150F Undoing Gender in Medieval France (FYS)
In this course, we will go way back--before Stonewall and even Simone de Beauvoir--to depictions of gender diversity in multiple medieval literary genres including romances, songbooks, lais, and chantefable. We will dive deep into medieval French texts with an ability to hold ambiguous and complex representations of gender and sexuality. We will discuss canonical French literary works in translation and also in medieval manuscript, alongside contemporary works on gender, queer, and trans theory, in order to illuminate what medieval literature can teach us about gender identities and desire processes that trouble or even escape the gender binary, as it is commonly understood today. As will become clear from our explorations of medieval French texts and manuscripts, many identity categories that we take to be stable, eternal, or "natural," are contingent and simply "naturalized." Medieval genders are not ours, and our genders will not be those of future generations.

This is a writing-intensive course, and you will produce upwards of 20 pages of academic writing by the semester's end. In this class, we will consider writing a collaborative and ongoing process. In the first few weeks, you will be exposed to ideas about gender and sexuality that surprise you. Your first written assignment will be to describe something "weird" that intrigues you and that you would like to investigate more. Sparks of confusion and intrigue are often seeds that grow into ideas and ultimately arguments! As you investigate this topic, you will be encouraged to begin writing about it, and sharing your writing with your peers. In addition to reviewing drafts of your peers essays, you will produce abstracts, outlines, and short conference papers to practice different means of focusing your thought in writing and communicating your thoughts to an audience. Our course will culminate in a collaborative miniconference, where we will work collaboratively to trouble and undo commonsense notions of gender.

RL&L176 Days and Knights of the Round Table
This course will study the evolution of the Arthurian legend from its origins in sixth-century Britain to its fullest development in the 13th-century French Lancelot-Grail cycle. The course will look at the way the various developments of the legend were rooted in specific historical circumstances and yet contributed to the elaboration of a rich and complex narrative that has been appropriated in different ways by each succeeding period of Western European culture.

RL&L203 Modern Europe
This course surveys the history of Europe since 1815 and is intended primarily as an introduction to decisive events and interpretation of central themes. Attention will be devoted to major political, social, economic, and cultural developments, beginning with the many dimensions of the political and industrial revolutions of the 19th century; continuing with the emergence of nation-states and nationalism, working-class movements, the consequences of imperialism and the World War I, and communism and fascism; and concluding with study of the World War II, the reassertion of Europe, the collapse of the Soviet system, and contemporary issues.

RL&L210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

RL&L212 Early Renaissance Art and Architecture in Italy
This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

RL&L213 Introduction to Existentialism
This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldúa, and Frantz Fanon. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

RL&L217 Venice and the Renaissance
Venice -- a city built almost impossibly on a forest of stilts sunk into the mud of the lagoon and buttressed by powerful myths of divine origins, permanence, and prosperity - produced some of the most spectacular works of Renaissance art and architecture. This introductory-level course on the art and culture of Venice's "golden age" considers the works of artists such as Carpaccio, Bellini, Giorgione, Titian, Veronese, and Tintoretto, and architects such as Codussi, Sansovino, and Palladio in the context of the city's unique setting, social and governmental structure, cultural and political milieu, and larger geopolitical significance. It also positions Venice's artistic production within the broader framework of early

modern Europe, exploring its connections with Byzantium and the Islamic world. The course also introduces students to key issues and methods of art history.

RL&L218 Art and Architecture of Renaissance Florence
How did Florence rebound from calamitous plague to become the self-styled locus of the Renaissance? This survey of the art and architecture of Florence evaluates its cultural achievements against the improbabilities of their success. The city had negligible Roman history but championed the revival of classical antiquity; it was repressive but pushed the boundaries of representing gender and sexuality; its government slid from a republic to an absolute monarchy but fostered creative latitude; it spawned one of Italy's most popular religious zealots and popularized secular ideals; it had no empire but became a hub of global trade and knowledge transmission. To understand how this happened, we will study famous artists like Botticelli, Leonardo da Vinci, and Michelangelo alongside their lesser-known and even nameless contemporaries. Painting, sculpture, architecture, drawing, and printmaking will come alive in lectures and by discussing related texts in translation, recreating artistic techniques, and examining original Renaissance artworks in person.

RL&L219 Global Rome: Art and Architecture in Early Modernity
Rome has long called itself the "head of the world," but in the early fifteenth century, it was a backwater. This course surveys the art and architecture of Rome as it reclaimed the papal seat, grew its population, witnessed their deaths amid an infamous sack, and then amassed singular power through the transoceanic expansion of Catholicism. The local particulars of Rome will be considered alongside its global history, situating the accomplishments of Raphael, Michelangelo, Caravaggio, Artemisia Gentileschi, Bernini, and others in relation to Rome's ties to Europe, Africa, the Americas, and Asia. Particular attention will be given to Rome's relationship to its ancient empire, as well as the roles of female artists and patrons in a city whose population skewed increasingly male. Students will study architecture, painting, sculpture, drawing, print, tapestry, arms and armor, jewelry, clothing, and ephemeral design, as well as period texts in translation.

RL&L220 Authority and Resistance: France Since 1870
Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

RL&L221 The Pedagogy of Second Language Teaching and Learning
This course offers a foundation for second language (L2) acquisition in the classroom and teaching approaches. Specifically:

- characteristics of L2 learning

- an understanding of the most commonly used L2 methodologies and strategies

- basic know-how for analyzing and creating materials for language learning/ teaching

- L2 teaching as a profession

Classes and readings will be in English, given that the tutorial combines students of French and Spanish. However, the development of students' target language (TL) is also considered a priority in the course, supported by looking at authentic and pedagogical materials, creating pedagogical materials of their own, and by using the language in class during volunteering hours.

This course is intended for students who, being FREN, HISP, or RMST majors or advanced learners in French or Spanish, may be considering a career in education, and who commit to volunteering at the Middletown public schools while taking this course (at the very least). There is a volunteering commitment of 2 hours/week minimum during the semester. Students must take this course concurrently with a FREN or SPAN course numbered 215 or above.

RL&L222 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

RL&L223 Second Language Acquisition and Teaching
This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting. Students of French and Spanish may also wish to enroll in RL&L 223L, a 0.5 credit service learning course in which students volunteer in the Middletown Public Schools.

RL&L223L Second Language Acquisition & Pedagogy - Teaching Romance Languages
How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language? This course is intended for students who may be considering a career in education. We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting.

In this service-learning course, students are required to volunteer a minimum of two hours per week in the Middletown Public Schools, assisting French, Italian, and Spanish teachers in their world language classes. Students will write weekly journal entries reflecting on their classroom experience, and will learn to evaluate, adapt, and create pedagogical materials. By the end of the semester, they will have created a portfolio of activities that can be used in a foreign language classroom.

RL&L224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance
In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolo Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

RL&L225 French Literary Masterpieces in Translation and on Screen
In this First-Year Seminar students will study five novels originally written in French, from the seventeenth to the twentieth centuries, alongside and against their respective cinematic adaptations. We will begin with Marie-Madeleine de Lafayette's The Princess of Clèves (1678), one of Europe's first psychological novels, and Christophe Honoré's The Beautiful Person (2008). We will then read Choderlos de Laclos's epistolary novel Dangerous Liaisons (1782) and watch Roger Vadim's Les Liaisons dangereuses 1960, followed by Gustave Flaubert's Madame Bovary (1856) and Anne Fontaine's Gemma Bovery (2014). Moving into the twentieth century, we will discuss Colette's Chéri (1920) and Stephen Frears's Chéri (2009). We will end the course with Nobel-prize winner Annie Ernaux's Happening (2000) and Audrey Diwan's Happening (2021). Other adaptations that students may wish to explore include but are not limited to: Jean Delannoy's La Princesse de Clèves (1961), Manoel de Oliveira's The Letter (1999), Andrzej Zulawski's Fidelity (2000), and Rémy Sauder's 2011 documentary on how The Princess of Clèves has been taught in a French high school in Marseille; Miloš Forman's Valmont (1989), Stephen Frears's Dangerous Liaisons (1998), and Roger Kumble's Cruel Intentions (1999); adaptations of Madame Bovary by Vincent Minnelli (1949), Claude Chabrol (1991), and Sophie Barthes (2014); Pierre Billon's Chéri (1950). These novels and their adaptations will allow us to think about notions of canon formation (i.e., how do we define, and who decides, what a "masterpiece" is?); genre and narrative; the uses of history in fiction; censorship, controversy, and scandal; gender, sex, and class; and how these texts have been and continue to be read, used, adapted, translated, and transformed from their time of publication to the present day. Students who have sufficient knowledge of French will have the opportunity to read the texts in their original language and have discussions and written assignments in French.

RL&L225F Writing Biography: Denis Diderot, a Case Study (FYS)
How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

RL&L226 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RL&L227 Desire, Deception, Disenchantment: Five French Novels in Translation and on Screen
This course aims to study five French novels from the 17th to the 20th centuries in translation, alongside and against their respective cinematic adaptations. We will begin with Lafayette's The Princess of Cleves (1678), one of the Western world's first psychological novels, and then move on to Choderlos de Laclos' epistolary novel Dangerous Liaisons (1782). We will then read Gustave Flaubert's Madame Bovary (1856), Albert Camus' The Stranger (1942), and Marguerite Duras's The Lover (1984). Films will include: Jean Delannoy's 1961 adaptation of Lafayette's novel, Christophe Honoré's The Beautiful Person (2008), a modern-day adaptation of the story, and Rémy Sauder's 2011 documentary on how the novel is being used in a French school in Marseille; three adaptations of Laclos's novel: Roger Vadim's cutting-edge Les Liaisons dangereuses 1960, Miloš Forman's 1989 Valmont, and Stephen Frears's 1998 acclaimed Dangerous Liaisons; three adaptations of Madame Bovary: Vincent Minnelli's film (1949), Claude Chabrol's adaptation from 1991 starring Isabelle Huppert, and Sophie Barthes's version (2014); Luchino Visconti's adaptation of Camus' The Stranger (Lo straniero, 1967); and Jean-Jacques Annaud's The Lover (1992). These novels and their adaptations will allow us to think about notions of canon formation; genre and narrative; the uses of history in fiction; censorship, controversy, and crime; gender, class, race, and (post)colonialism; translation; and how these texts have been and continue to be read, used, adapted, and transformed from their time of publication up to the present day.

RL&L229 Political Turmoil
"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--the creation of the US; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo, among others--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The goal of the course is ultimately project-based: as we gain perspective on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and destined to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s
In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing

role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

RL&L231 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100--1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

RL&L232 Obscure Enigma of Desire
This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

RL&L233 Modern Italy on the Silver Screen: 1960--2015
This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's La dolce vita, Pasolini's Mamma Roma, De Sica's Matrimonio all'italiana, Leone's Il buono, il brutto, il cattivo, Argento's Suspiria, Moretti's Caro diario, Ozpetek's Saturno contro, and Giordana's Quando sei nato non puoi più nasconderti. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

RL&L234 Cuneiform to Kindle: Fragments of a Material History of Literature
This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

RL&L235B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870
This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

RL&L236 Don Quixote: How to Read the Ultimate Novel
No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

RL&L237 Making New Worlds: Encounters on Turtle Island
From before the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, Turtle Island (North America) was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on Indigenous homelands with deep histories. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease). Throughout, we will focus on the persistence and resistance of Indigenous nations who protected (and still protect) their homelands and lifeways.

RL&L238 America 250: The Promises and Tragedies of Independence, 1763-1815
Independence was a process, not an event. The Declaration built on relationships and identities that formed before 1776 and its impact reverberated across the globe in the decades (and centuries) after. But what kind of world did the drafters of the Declaration imagine? What did their document actually create? What other conceivable futures were sacrificed so that Independence could succeed? Exploring the era that made Independence possible helps illuminate the paradoxes, complexities, promises, and tragedies of the North American experiences at the end of the eighteenth century. The Declaration of Independence opened one future and foreclosed on others. The Revolution required to make Independence a reality was a brutal conflict that divided families, destroyed economies, shattered kinship networks, and created not one but (eventually) two countries. Revolution and Independence looked different to women, labourers, the enslaved, loyalists, and Indigenous nations who were swept up in the American project and had to navigate the new realities it brought about. That the United States would become a super power was far from the minds of those fighting for or against American independence.

RL&L239 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

RL&L240 Revolutionary France and the Birth of Modern Art, 1789-1900
This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. Themes this class explores include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public;

painting and revolution in France and its colonies; the redefinition of history painting in light of the abolition of slavery and the Declaration of the Rights of Man; the expansion of France's colonial empire and the representation of racial difference; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the destabilization of classicism in light of scientific discoveries and ideas of "primitivism"; and the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience. Although these developments took place two centuries ago, they continue to define the field of modern art today.

RL&L241 Introduction to European Avant-Garde, 1880-1940
This course introduces students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

RL&L242 Italian and Italian American Cinema: Not Just Mafia Movies
The entanglements of Italian and Italian American cinema date to the medium's silent era. If the Taviani Brother's 1987 film Good Morning, Babylon is to be believed, while filming Intolerance (1916) D.W. Griffith lauded and lamented the genius of Giovanni Pastrone's colossus Cabiria (1912), doubting that his own epic film would be able to match the virtuosity of the earlier Italian example. Flash forward to 1931-32 and the trio Little Caesar (1931), Public Enemy (1931), and Scarface (1932) sear into the American imaginary the cinematic representation of the Italian mobster. Beyond Italian artistry and aesthetics of the sort Griffith ostensibly applauded, and the numerous examples of the violent, lawless gangster of Italian descent, what are some other (stereo) typical intersections between Italian and Italian American cinema?

Mapping the Transatlantic transmissions of representations, stereotypes, and aesthetic values reveals how these two cinematic traditions co-articulate and condition each other, with "Hollywood on the Tiber" offering a chief example of the ways Italian and American industrial contexts invoke and implicate each other. How do Hollywood's glamorized gangsters inform Italian representations of organized crime? How do American cinematic "Latin lovers" draw on Italian models? How have representations of masculinity, men, and fathers; femininity, women, and mothers; (large) families, food, religion, class mobility, questions of race and racism, and immigration unfolded in their respective contexts and what do intersections among them reveal?

Two non-fiction films from Scorsese help draw our parameters for our discussion: Italianamerican (1977), for socio-cultural codes; for cinematic contexts, My Voyage to Italy (1999), in which the director reviews his Italian influences and which also serves as an introduction to Italian cinema. We subsequently investigate the indicated themes and topics as they range across a corpus of texts which includes, on the Italian American side: Scarface (Hawks, 1932), Not Wanted (Lupino, 1949), The Godfather (Coppola, 1972), Mean Streets (Scorsese, 1973), Rocky (Avildson, 1977), Raging Bull (Scorsese, 1980), Moonstruck (Jewison, 1987), Married to the Mob (Demme, 1988), True Love (Savoca, 1989), Do the Right Thing (Lee, 1989), The Freshman (Bergman, 1990), Goodfellas (Scorsese, 1990), My Cousin Vinny (Lynn, 1992), Household Saints (Savoca, 1993), The Sopranos (Chase, 1999), The Departed (Scorsese, 2006), Wendy and Lucy (Reicherdt, 2008), The Miracle at St. Anna (Lee, 2008). Alongside these, we examine Italian films drawn from this list: Cabiria (Pastrone, 1912), Umberto D. (De Sica, 1952), I Vitelloni (Fellini, 1953), Rocco and His Brothers (Visconti, 1960), Eclipse (Antonioni, 1962), Amarcord (Fellini, 1974), Kaos (Taviani Brothers, 1984), Mediterraneo (Salvatores, 1990), Johnny Stecchino (Benigni, 1991), Lamerica (Amelio, 1994), Gomorra (film Garrone 2008, series 2014), The Young Pope (Sorrentino, 2016), and The Confessions (Andò, 2016). The films for group presentations will also be drawn from these lists.

This course has no prerequisites. We will work on students' capacity for formal film analysis as we go along and, at the beginning of the course, some students may have greater proficiency in this area. At the same time, other students may initially have a broader knowledge base of Italy and Italian society. Everyone has something to learn. Conducted in English.

RL&L243 Art and Culture of the Italian Baroque
This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

RL&L244 European Architecture and Urbanism, 1750-1910
This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include Neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and

public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

RL&L245 Not Just Neorealism: Italian Cinema, Its History and Politics
This introductory course on Italian cinema, taught in English, investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of the auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others. Additional material includes readings in film theory and criticism, Italian history, literary sources, screenplays, and interviews. For interested students with advanced competency in Italian, there will be a .50 credit (CLAC) discussion section, ITAL245/CGST245, at a time to be determined but very likely after our second class of the week. Italian and Romance Studies Majors, please see additional comments below.

RL&L250 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

RL&L251 Italian Art and Architecture of the 16th Century
In addition to key monuments of 16th-century Italian art and architecture, this course seeks to introduce students to some of the most important figures of the period: artists and architects--such as Leonardo, Michelangelo, Raphael, Bronzino, Titian, and Palladio; their princely and ecclesiastical patrons--such as Cosimo I de' Medici and Pope Julius II; and their critics and biographers--such as Giorgio Vasari and Ludovico Dolce. Our aim will be to understand the complex artistic and architectural landscape of the period against the backdrop of shifting intellectual and religious trends, including the Counter-Reformation. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

RL&L252F French Literary Masterpieces in Translation and on Screen (FYS)
In this First-Year Seminar students will study an array of literary chefs-d'oeuvre originally written in French, from the seventeenth to the twenty-first centuries, alongside and against their respective cinematic adaptations. These novels and their adaptations will allow us to think about notions of canon formation (i.e., how do we define, and who decides, what a "masterpiece" is?); content and form, and how they relate to prose narrative and to the moving image; genre and narrative; the uses of history in fiction; censorship, controversy, and scandal; gender, sex, and class; and how these texts have been and continue to be read, used, adapted, translated, and transformed from their time of publication to the present day. Students will have the opportunity to write both academically and creatively. Students who have sufficient knowledge of French will be able to read the texts in their original language and have discussions and written assignments in French by enrolling in the 0.5 CR Cultures and Languages Across the Curriculum (CLAC) course linked to this seminar. (See the FREN 253F course description for the eligibility requirements to enroll in the CLAC course.)

RL&L254 Breaking the Waves: The Japanese and French New Wave Cinemas and Their Legacy
While the French and Japanese New Wave(s) existed as largely contemporaneous cinematic movements, rarely are they discussed together, instilling the impression of two parallel streams, never to converge or intersect. This course hopes to serve as an intervention into this perceived divide through close readings of these groundbreaking cinematic works and an examination of their revolutionary content in the interest of articulating shared philosophical concerns. In many cases, New Wave filmmakers worked as writers and critics before producing films themselves, a fact that speaks to the intensely theoretical nature of their cinema. This course will therefore examine critical writings published in the space of Cahiers du Cinema, Film Art, and other journals as a means of better understanding the thought process that underlies these films. How do these films figure as a response to that of the previous generation and how did they hope to revolutionize cinematic praxis? What was their relationship to political activism and the events of 1968? Finally, we will consider the legacy of these cinemas: What is the prevailing influence of the New Wave on Hollywood and global cinema? What aspects of the movement have been retained and what has been lost along the way?

RL&L261 Framed: Re/presenting Italian Women Filmmakers
This course trains on Italian films written and directed by women with women protagonists and their stories. Our explorations circulate around activities intended to anchor the course in the real and active and invite students to

reflect on the ways these activities and stories resonate in their own lives. Some activities whose filmic representations and reimaginings we will investigate include working, loving, sexing, framing, growing, thinking, collaborating, acting, and making. Our focus on filmmakers will comprise contributions by screenwriters, actors, directors, and editors and consequently we will explore the ways in which women have been "framed" by and for the camera and how women filmmakers have helped "reframe" those representations. Seen historically, our examination will reach from Elvira Notari's films (1911 to 1929) to significant post-WWII collaborations of women actors and directors (e.g., Anna Magnani [with both Luchino Visconti and Roberto Rossellini], Monica Vitti [and Michelangelo Antonioni], Sofia Loren [and Vittorio De Sica], Claudia Cardinale [Sergio Leone and Federico Fellini]). The 1970s and especially the cinema of Liliana Cavani and Lina Wertmuller, set the stage for many of Italy's contemporary women filmmakers, including Francesca Archibugi, Francesca Bertini, Laura Bispuri, Francesca Comencini, Wilma Labate, Alina Marazzi, Susanna Nicchiarelli, Costanza Quatriglio, Alice Rohrwacher, Marina Spada, and Angela Torre. Feminist film criticism and theory will also help us "frame" and "reframe" these contributions.

RL&L266 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

RL&L271 The Sonnet: Forms of Love, Death, and Beyond
This course explores motifs of love, death, and beyond through a single poetic form: the sonnet. We will read transhistorically from the "invention" of the sonnet in the 13th-century Sicilian School to its use in contemporary American poetry, touching on poets in a variety of languages and time periods. From individual poems to sonnet sequences, we will explore the way in which lyric poetry engages non-narrative modes of meaning-making within the formal expectations of the sonnet. Are sonnets uniquely adapted to types of experience which defy easy articulation? In what ways does the form of the sonnet make it possible to give literary representation to the ineffable? This course pays close attention to the relationship between form and content in a variety of poetic works. Poets to be read include Dante, Labé, Shakespeare, Inés de la Cruz, Barrett Browning, Yeats, Millay, Rilke, and Stallings. Writing assignments will include both creative and analytic writing.

RL&L275F Religions Resisting Modernity (FYS)
Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of what it means to be modern.

RL&L279 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

RL&L280 Exploring Personhood in the 20th and 21st Centuries (CLAC 1.0)
The goal of this course is to provide a thorough examination of the concept of personhood in the 20th century by studying how it has been portrayed and understood in diverse cultural contexts across Arabic, English, and Francophone cultures. Through the use of comparative analysis and an interdisciplinary approach to cultural artifacts--such as works of literature, art, and religious texts as well as current debates around AI and personhood--students will explore how different cultures have approached the question of what it means to be a person and how this has evolved over time. By the end of the course, students will have a deeper comprehension of the various ways in which personhood has been created and perceived throughout different cultural and historical contexts.

The impact of historical occurrences and cultural movements on the construction of personhood, the influence of religion and politics or the fictional writing on conceptions of personhood, the representation of personhood in

literature and art, and the emergence of AI as a new frontier in the investigation of personhood are some of the major topics covered in the course. This will open up new discussion topics about posthuman beings and persona status, particularly in science fiction.

RL&L284 Comparative Politics of Western Europe
The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian "second republic"?

RL&L300 The Arthurian Legend on Film
This course will serve both as an introduction to the Arthurian legend and to its cinematographic representation since the 1940s. Medieval texts will be paired with films that are "based" -- more or less closely -- on them. We will consider the ways in which these stories are told in literature and in film and the differences between them. We will also consider the ways in which the legend was used to address both medieval and modern preoccupations.

RL&L301 History of Spanish Cinema
This course explores the development of Spanish cinema from the early 20th century to the present. We will evaluate how social, political, and economic circumstances condition Spanish cinematography at key junctures of Spanish cultural history in terms of the production and distribution of films, cinematographic style, and thematics. The course will also highlight key facets of the Spanish star system as well as the auteurism of those directors who have achieved international acclaim by reworking a national film idiom within international frames of reference.

RL&L302 West African Literatures and Cultures in French
This course explores major texts in modern and contemporary Francophone African literature by delving into four major themes that traverse the recent cultural, literary, and political history of Francophone West Africa.

The course starts by investigating the relationships between orality and literature through the lens of often-intersecting debates around tradition and modernity; the focus will then shift to articulations of nation, liberation, and the promises of independence, war, and memory, and finally the ruptures and continuities of the post-colonial, neoliberal present.

By spending significant time with primary sources that span over a century of literary and cultural production from and about Francophone Africa, students will have a deep understanding of the urgencies animating writers wrestling with the weight of the colonial past, the violence of decolonization, the brightness of independence, and the uncertainty of the present. A thorough engagement with some of the most important authors of the last 60 years (e.g. C. H. Kane, B. Diop, Y. Ouloguem, M. Condé, among others) will allow us to deep-dive into the possibilities of literary expression, as well as questions of belonging, nation, and evolving ideas of "Africa."

RL&L311 Translation Workshop in Early Modern Spain: Topographies of Love, Arcadia, and History
This course takes a practical approach to the translation of early modern Spanish literature. We will begin by consulting various comments on the art and craft of translation made by 16th-century Spanish translators in their own works before we encounter the curious case of the "pastoral prosimetrum," a type of narrative fiction that reimagined the author and their contemporaries under literary pseudonyms in an updated version of an idyllic Arcadian landscape. From Spanish to English, from experience to poiesis, we'll recontextualize these topographies of love in their own literary and historical moment in order to translate those imaginaries into contemporary English. Readings will be in English and Spanish. Discussions and translations will be in English. There are no prerequisites, but reading knowledge of Spanish is required. Please consult the instructor if you have questions about your language ability.

RL&L321 Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

RL&L325 Eloquent Forms: Topics in Italian Renaissance and Baroque Sculpture
Early modern Italy was a site of vibrant and far-reaching innovation in the plastic arts. Driven by intense artistic competition, sustained by lavish patronage, and produced for religious, commemorative, and decorative purposes in both public and private settings, sculpture reached an unprecedented peak of creative ambition, material experimentation, and theoretical reflection during this period. From monumental urban commissions such as fountains to small-scale precious objects prized by elite collectors, sculptural works profoundly shaped the visual and sensory worlds of early modern Italy. This seminar explores the making and meaning of sculpture in the Renaissance and Baroque periods through close engagement with the works and careers of key artists, including Lorenzo Ghiberti, Donatello, Andrea del Verrocchio, Niccolò dell'Arca, Francesco Laurana, Properzia de'Rossi, Michelangelo, Benvenuto Cellini, Giambologna, Leone Leoni, Gianlorenzo Bernini, and Alessandro Algardi, among others. Readings and discussions are organized around thematic issues such as the making and viewing of early modern sculpture; the rhetoric of sculptural materials; verisimilitude and animation; sculpture and the senses; fragmentation and the non finito; touch, desire, and the nude; representations of force and violence; antiquarianism and collecting; tombs and sculptural commemoration; and monsters and monstrosity in garden sculpture.

RL&L327 Criticism and Psychoanalysis
This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

RL&L333 Appeasement and the Origins of the Second World War
In this study of Europe's crisis, 1933-1939, from Hitler's appointment as chancellor of Germany to the outbreak of the Second World War, attention will focus upon the reassertion of German power and its effects upon the diplomacy and politics of Great Britain and France. Specific topics will include Hitler's aims and actions; critical events concerning the Rhineland, Spain, Czechoslovakia, and Poland; pacifism and the French Left; Neville Chamberlain and British conservatism; and the debate over the immediate origins of the war in 1939. Readings will include memoirs and contemporary diplomatic documents, newspapers, and journals.

RL&L339 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

RL&L350 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design

principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

RL&L351 Deconstruction and Politics
Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

RL&L382 Politics, Revolutions and Visual Culture in the Post-Revolutionary Arab Societies
The course "Politics, Revolutions, and Visual Culture in Post-Revolutionary Arab Societies" critically investigates the interaction of politics, social revolutions, and visual culture in the aftermath of the Arab Spring. This course examines the dynamic interaction between political transformation, revolutionary movements, and the various forms of artistic expression in Arab countries.

Students will delve into the complex interplay between politics and visual culture through a combination of theoretical discussions, case studies, and visual analysis, gaining a nuanced understanding of how images, art, photography, film, and other visual media have shaped and reflected sociopolitical changes in post-revolutionary Arab contexts.

RL&L390 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

RUSS205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **HA-REES**
Identical With: **REES205, RULE205, WLIT241**
Prereq: **None**

RUSS208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RUSS220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

RUSS221 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from

Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

RUSS223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RUSS224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.
Offering: **Host**

RUSS226 Documentary Fictions
How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of nonfiction? How does creative nonfiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

RUSS233Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

RUSS235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RUSS240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

RUSS251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RUSS252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RUSS254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies,

national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.

RUSS255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RUSS256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RUSS260 Dostoevsky's BRAT'IA KARAMAZOVY
A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

RUSS265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative

parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RUSS276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RUSS279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RUSS281 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

RUSS290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RUSS291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RUSS297 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization. The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

RUSS320 Post-Soviet Cultures: from Chernobyl to Zelenskyy
In this course, we will explore short fiction, documentary prose, films, poems, and songs that embrace the period from the collapse of the Soviet Union to Russia's war on Ukraine. Many of these works reflect on the major events of the post-Soviet era and sometimes even influence the course of history. For example, the comedy series, Servant of the People, in which Volodymyr Zelenskyy starred as a history teacher who becomes the president of Ukraine, helped him win the presidency in reality. We will discuss works that address the Chernobyl disaster, the collapse of the Soviet Union, transformations of Putinism, the Revolution of Dignity in Ukraine, and Russia's full-scale invasion of Ukraine. We will explore some of the most famous Russophone authors of the contemporary period (Svetlana Alexievich, Liudmila Petrushevskaia, Viktor Pelevin, Vladimir Sorokin) and different aesthetic trends and genres: from Siberian punk in music to postmodern dystopia in literature. We will pay special attention to contemporary Ukrainian culture, reading Andrei Kurkov's Ukraine Diaries and watching the Oscar-winning 20 Days in Mariupol. All the readings, films, and songs will be studied in Russian. The course is open to students who have completed four semesters of Russian language or more (or an equivalent). It is also open to heritage and native speakers of Russian. We will work with advanced Russian grammar and vocabulary. The assignments will be diversified and adjusted to students' individual language levels.

RUSS321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause

proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSS360 Siberia
Siberia has been a charged concept in world culture, mostly associated with the cold climate, exile, and prisons. Our course will pay tribute to these aspects of Siberia, grounded in historical and geographical reality, but it will also focus on an exploration of the region that goes beyond the stereotypes. We will explore Siberia as a place with diverse cultures, studying the folklore, literature, and films of its indigenous peoples. We will discuss how Russian literature and films conceptualize the colonization of Siberia, as well as the region's history of dissent and separatism, for example, oblastnichestvo and its aspiration to become "The United States of Siberia." We will explore modern Siberian authors and artists who became influential Russian classics while keeping their distinct Siberian roots, including Siberian punk as one of the most influential movements in late-Soviet and post-Soviet music. The readings will include writings by Nikolai Yadrintsev, Varlam Shalamov, Nikolai Klyuev, Yeremei Aipin, and Viktor Astafiev. The course is taught entirely in Russian. It is open to students who have completed four semesters of Russian or their equivalent, as well as for heritage and native speakers of the Russian language. The assignments will be diversified and adjusted to the individual levels of Russian. Students will get an opportunity to hone their listening, writing, reading, and speaking skills in Russian.

RUSSIAN LITERATURE IN ENGLISH (RULE)

RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RULE208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RULE220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RULE223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RULE224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of

belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

RULE233 Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

RULE233Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

RULE235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RULE240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

RULE251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RULE252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This

course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RULE254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.

RULE255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RULE256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RULE265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RULE267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical

distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RULE276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

Prereq: **None**

RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

Identical With: **RUSS277, REES277, WLIT242**
Prereq: **None**

RULE279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RULE290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type

of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RULE291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RULE321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES)

REES121F Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

REES200 Histories of Ukraine
Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses

a specific territory, it has also been a space where multiple communities--Ukrainians, Russians, Jews, and Poles--have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

REES204 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

REES206 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

REES216 Secularism: Godlessness from Luther to Lenin
Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

REES219 Russian and Soviet History, 1881 to the Present
Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

REES220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

REES221 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

REES223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

REES224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

REES225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)
Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

REES226 Documentary Fictions
How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of nonfiction? How does creative nonfiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

REES227 Central Asian Music Ensemble
The Central Asian Music Ensemble is dedicated to the study and performance of music from a region at the crossroads of Eurasia, encompassing the post-Soviet states of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan. Established in Fall 2023, the ensemble currently comprises Kazakh and Kyrgyz plucked and bowed lutes, plucked zithers, end-blown flutes, clay ocarinas, jaw harps, frame drums, and other percussion instruments. Students learn the basic techniques of playing the instruments and singing in a variety of regional styles while exploring the history and cultural significance of music in nomadic and sedentary Central Asian societies through individual tutorials, group rehearsals, and engagement with visiting artists from Central Asia. In addition to playing traditional and contemporary repertoires from the region, students are encouraged to compose and improvise with ensemble instruments. Previous experience with string or wind instruments such as the guitar, violin, cello, or flute is desirable but not required. Students from diverse backgrounds are welcome to participate.

REES235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

REES240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

REES249 Is History True?: The Genealogies and Genres of Facts
History, as both genre and discipline, has a complicated relationship with truth. As a genre, it is popularly understood to be factual -- a reflection of what really happened; as a discipline, it constructs the very reality that it claims to represent. History, in short, is based on the "facts" that it constitutes as real. This is not to say that our world is "post-truth" or unreal or that all "facts" are equally true. Rather, it is to suggest that to access historical reality we need to investigate the genealogies and genres of "facts," since facts (even "alternative facts") are the building blocks that make reality politically, socially, and culturally meaningful. So how does a "fact" become real? What genres of proof are used to constitute historical truth, and by whom? In this class, we will use historical approaches to understand how "facts" gain meaning and agency and analyze the (often porous) boundaries between history, memory, myth, rumor, and conspiracy. To do this, we will consider case studies -- political tropes like "Godless Communism" or "Judeo-Bolshevism"; legal categories such as "genocide" and "crimes against humanity"; and historical frameworks like "the Holocaust" and the "end of history" -- to consider how they structure our worldviews. The format of the course will combine discussion seminar with independent research projects.

REES251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

REES252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly

assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

REES254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.

REES255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

REES256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

REES257 The Soviet Century (CLAC.50)
This course begins and ends with two crucially important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the Russian government with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to remake the world. On December 26, 1991, the Soviet Union collapsed into 15 countries. The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will explore the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the course will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider key theoretical writings in addition to poetry and prose by major Russian and Russophone authors. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. This class consists of lectures and focused discussion of essays and films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to

REES260 Dostoevsky's BRAT'IA KARAMAZOVY
A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

REES263 Queering Russian Music
This course takes Russian and Russophone music out of its usual frames and asks what happens when we listen through the lenses of gender, sexuality, and power. Using methodologies of queer studies and queer theory, we consider how music both reflects and reshapes ideas of "Russianness." From imperial ballet to Soviet pop, from Tchaikovsky to contemporary queer artists in media, the course highlights intersections of music, identity, and politics. Special attention is given to the 2000s wave of Ukrainian musicians (Ivan Dorn, 5'nizza, and others) whose presence redefined the sound and style of Russian pop music in the 21st century. Students develop tools for critical listening, music analysis, and cultural interpretation while engaging broader debates about identity, politics, and belonging in today's Russian cultural sphere.

REES265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

REES266 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

REES267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

REES268 Nabokov
Vladimir Nabokov--brilliant writer, outrageous literary gamesman, and cosmopolitan exile--is a towering figure of 20th-century literature. His most famous novel, "Lolita," propelled him to international stardom and changed the transnational literary landscape. Child of a turbulent century, Nabokov

wrote exquisite and at times disturbing prose in Russian and English, balancing between imaginary worlds and harsh realities. This seminar offers a sustained exploration of Nabokov's major Russian and American writings as well as film adaptations of his "Despair" (Rainer Werner Fassbinder) and "Lolita" (Stanley Kubrick). We will consider memory, exile, trauma, nostalgia, and identity as we read Nabokov, who saw existence as a "series of footnotes to a vast, obscure, unfinished masterpiece."

REES276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

REES277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

REES279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

REES280 Russian Politics
The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

REES282 Modern Shamanism: Ecstasy and Ancestors in the New Age
The wise and mysterious native shaman has long held a particular fascination for Western scholars of religion, but does this figure even exist? What does it mean to be a practicing shaman today? Beginning with Eliade's definition of "archaic ecstasy," we examine the idea of the shaman, their role in the New Age

movement, and the challenges faced by contemporary indigenous shamans, from negotiating international intellectual property rights law to Ayahuasca tourism and environmental activism. Course materials are supplemented by A/V materials from the instructor's fieldwork in Siberia.

REES289 Indigenous Religions: Politics, Land, Healing
From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

REES290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

REES291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

REES296 Soundscapes of Islam
From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system

that has been a source and stimulus for creativity among Muslim peoples worldwide.

REES297 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

REES299 Imagining Communities: National Religions and Political Rituals
From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

REES306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions
Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other powerful "other-than-human persons" who must be respected, who can protect, but who are also feared. In the eyes of early Christians and often in contemporary popular culture, these animate and agentive landscapes can seem monstrous. We will explore medieval ideas about the Wild Man of the Forest, Indigenous and Feminist theory, and draw on case studies from North America, Siberia, Mongolia, and the instructor's fieldwork materials with landscape beings in Buryatia. The class will explore the different relationships human beings have with animate and sacred landscapes, think about the ramifications these relationships have for sovereignty over and in the "natural" world and why the idea that land is alive might be threatening. The course includes a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during Fall Break. The trip will be fully funded with no cost to the students). The trip is required, and in order to take the class you must be available to participate in this travel during Fall Break (10/24-10/27).

REES318 The Politics of Death: The Living, the Dead, and the State
This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

REES321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the

transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES344 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

REES353 The Communist Experience in the 20th Century
Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

REES353Z The Communist Experience in the Twentieth Century
More than thirty years have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the Communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union but also beyond it (in Eastern Europe and Asia). In the global conflict between Capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day's materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day's online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

REES360 Siberia
Siberia has been a charged concept in world culture, mostly associated with the cold climate, exile, and prisons. Our course will pay tribute to these aspects of Siberia, grounded in historical and geographical reality, but it will also focus on an exploration of the region that goes beyond the stereotypes. We will explore Siberia as a place with diverse cultures, studying the folklore, literature, and films of its indigenous peoples. We will discuss how Russian literature and films conceptualize the colonization of Siberia, as well as the region's history of dissent and separatism, for example, oblastnichestvo and its aspiration to become "The United States of Siberia." We will explore modern Siberian authors and artists who became influential Russian classics while keeping their distinct Siberian roots, including Siberian punk as one of the most influential movements in late-Soviet and post-Soviet music. The readings will include writings by Nikolai Yadrintsev, Varlam Shalamov, Nikolai Klyuev, Yeremei Aipin, and Viktor Astafiev. The course is taught entirely in Russian. It is open to students who have completed four semesters of Russian or their equivalent, as well as for heritage and native speakers of the Russian language. The assignments will be diversified

and adjusted to the individual levels of Russian. Students will get an opportunity to hone their listening, writing, reading, and speaking skills in Russian.

SCIENCE IN SOCIETY PROGRAM (SISP)

SISP127F War and Technology (FYS)
In this class, we will discuss technological changes caused by war and accompanying social changes and ethical debates in both militaries and civilian societies. Topics will include technological changes in warfare and weapons, as well as the ways in which societies have responded to new injuries and health issues resulting from war. Subjects may include the development of machine guns, trench warfare, chemical warfare, nuclear warfare, drones, cyber-warfare, and surveillance technologies, in addition to the professionalization of nursing, military psychiatry, medical experimentation, environmental contamination, and disability and health issues for veterans and civilians. We will also talk about the implementation in the civilian world of technologies developed or expanded during war. We will discuss cases from across the globe, focusing chronologically on 1850 to the present. Readings may include selections from Margaret Humphreys, John Ellis, Carol Byerly, Warwick Anderson, Beth Linker, Paul Lerner, Jessica Adler, Edmund Russell, Charles Perrow, Susan Smith, Susan Lindee, Jessica Wang, Kelly Moore, Janet Abbate, Stephen Graham, and others.

SISP135F Skin, Sex, State, Software: Surveillance & Society (FYS)
Scopophilia is the derivation of pleasure from looking. What pleasures does the surveillance state gain from looking at us? From feeling and documenting us? How do privacy activists fight back against such surveillance, and what might be wrong with privacy rights discourse? Which groups are always already surveilled? In this class, students will play with notions of surveillance--including sousveillance, lateral surveillance, and counter surveillance--as engaged by queer and feminist studies, the cultural anthropology of expertise, and social studies of science and technology. We will draw on case studies ranging from police technologies, facial recognition software, PornHub's data collection projects, TSA airport body scanners, Facebook ads, science fiction like Black Mirror, and more to understand how bodies, races, genders, and sexualities are made known and contested by activists, artists, corporations, and governments. Students will also collect data for a creative personal surveillance project culminating at the end of the quarter.

SISP201 Critical Global Health
This course explores the medical, social, political, and economic dimensions of the global health enterprise. Topics covered include (1) the history of the term "global health" and the field of science and practice to which it refers; (2) struggles over expertise, ethics, and governance that characterize the enterprise; (3) the unintended consequences of global health interventions for health and social life; and (4) alternative, decolonial epistemologies for fostering a healthier world.

SISP208 Technologies of Time
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk.

This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will research and design speculative timekeeping devices or time machines for worlds otherwise.

SISP213 Calderwood Seminar in Public Writing: Writing Science, Writing Science Studies
This Calderwood Seminar in Public Writing will give students practice writing about science, technology, and medical studies for general audiences. It will also function as a capstone experience for SISP majors: students will have a chance to reflect on the methodologies and theories they have learned during their time in the program, while also using those methodologies and theories to analyze issues and texts in our world today. Students will work collaboratively, editing each other's work, and significant class time will be spent workshopping student writing. The aim will be to produce publishable pieces of cultural analysis for the popular press.

SISP215 Metabolism and Technoscience
This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

SISP236 Race, Gender, and Medicine in U.S. History
This course will examine the intersections of race, gender, public health, and medicine in the United States, largely focusing on the 20th century. Topics will include the racialization of certain diseases, race and health care access, and the history of African Americans in health care professions and health care activism. Students will learn about the history of medicine and public health in the United States, African American history, and historical research methods. We will consider the built environment, the law, and federal and local politics as they relate to medical care in the United States. By the end of this course, you will gain further understanding of some of the major currents in the history of medicine and public health in the United States; you will make connections between race and health care experiences in the U.S.; you will be able to discuss historical research methods and appraise the values and limitations of various kinds of sources. Possible readings may include selections from Sowande' Mustakeem, Rana Hogarth, Sharla Fett, Deirdre Cooper Owens, Jim Downs, Tera Hunter, Samuel K. Roberts, Susan L. Smith, Natalia Molina, Nayan Shah, Wendy Kline, Vanessa Gamble, Jonathan Metzl, Susan Reverby, Alondra Nelson, Keith Wailoo, Jennifer Nelson, and Jennifer Brier.

SISP240 Research Methods in Science Studies
This seminar exposes students to qualitative research methods in science studies including ethnography, archival and discourse analysis, social worlds analysis, comparative historical analysis, narrative analysis, visual culture and media analysis. The course will survey methodological traditions in science and technology studies, sociology and cultural studies, and feminist and critical race studies that guide the collection of evidence about scientific knowledge and practices, the relationships between users and technologies, and broader sociotechnical infrastructures. Coursework will culminate in small-scale individual and group research projects utilizing qualitative research methods.

Prereq: **None**

SISP243 Commodities and Addiction
This course will examine several commodities that have often been described as addictive. We will use a case study approach and focus on the following substances: tobacco, sugar, opiates, and alcohol. We will also consider the history of the concepts of addiction and addiction treatment. The course will be largely focused on United States history but will also consider the global history of the production of these substances and the development of global consumer markets. Some of the subjects that we will discuss include colonization, slavery, agricultural and environmental history, advertising, public health, and criminalization of substance use.

SISP245 Ethnography and Design
Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

SISP250 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SISP300 Black Phoenix Rising: Death and Resurrection of Black Lives
The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racisms and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

SISP306 Precision Medicine: A Biomedical Revolution
Drawing insights from history, sociology, and anthropology, this course will examine the rise of precision medicine and its sociomedical implications. An emerging biomedical paradigm, the aim of precision medicine is to develop individually tailored approaches to disease prevention and treatment through the integration of genomic and other molecular sciences into research and practice. The course will explore the promises that have underpinned major worldwide investments in the precision approach, interrogate the concept of "precision" and the semantic work it performs within medicine and beyond, investigate the paradigm's implications for understandings of race and other key forms of human difference, and examine the challenges it presents for the pursuit of health justice.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**

SISP309 Multispecies Worldbuilding: The Chestnut Project
How do forests think (Kohn)? Do rocks listen (Povinelli)? Can insects speak (Mitchell)? How do fungi make history (Tsing)? Should trees have rights (Stone)? These are some of the most exciting questions percolating in the humanities, arts, and social/natural sciences today. They disrupt Western colonial notions of what it means to be human, while also calling for methods, theories, and apparatuses that might imagine and build more livable multispecies worlds.

This course has two goals: (1) introduce students to key texts on more-than-human, more-than-Western ontologies, particularly from the fields of multispecies/cyborg anthropology, science and technology studies, biology, and environmental humanities; (2) engage students in transdisciplinary research on the American chestnut (Castanea dentata), a tree species once known as the "queen of forests" from the Appalachian mountains to the Mississippi river until fungi wiped them out in the early twentieth century. This course will lay the groundwork for students to participate in current debates and projects to restore a transgenic version of the American chestnut in the eastern United States within the next five years.

SISP310 Botanical STS: Plants as Nature, Capital, Empire
Interest in the social and technoscientific lives of plants has been rising. Described as the Plant Turn or Critical/Transnational Plant Studies, this multidisciplinary field of study encompasses the social and environmental

sciences, experimental humanities, and visual/sonic/literary arts. In this course, we will delve into contemporary works that situate the relationship between plants and botanical studies at the center of critical analysis and creative practice. What happens to notions of agency/intelligence, property/exchange, and power/knowledge when we think with and about plants? We will explore answers to these questions by engaging in three types of activities: readings and film screenings, field visits to botanical collections and agricultural stations, and online use of global plant databases.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Prereq: **None**

SISP311 Media and Environment: In/Sensible Worlds
In this seminar, we will examine the relationship between media technologies, sensory apparatuses, and changing environments. How do various kinds of media shape perceptions and interactions with our surroundings, multispecies ecologies, and planet Earth? How might we study the environment AS media? These seemingly simple questions matter because, like never before, media and environment co-produce who/what becomes sensible or insensible--and, ultimately, available or not available for life. This seminar will include readings from the fields of Critical Media and Communication Studies, Feminist/Postcolonial Science, and Technology Studies, Environmental/Digital Arts, and Humanities. Importantly, we will examine a range of creative media projects that explore ecology, environment, and earthly survival: films, games, sensors, and web projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Prereq: **None**

SISP317 Sexuality, Gender, and Science
This course will consider how the concepts of gender and sexuality have been treated in scientific fields, focusing primarily on the 19th and 20th centuries. We will examine the history of ideas about gender and sexuality as reflected in the development of sexology, theories of homosexuality, psychology, and endocrinology. We will also discuss contraceptive and reproductive technologies, the inclusion of women in clinical trials, women in scientific professions, and recent studies that use algorithmic predictions of sex or sexual orientation. Readings may include selections from Sigmund Freud, Siobhan Somerville, Emily Martin, Sarah Igo, Laura Briggs, Ronald Bayer, Sandra Morgen, David Serlin, Allan Bérubé, Dorothy Roberts, Johanna Schoen, Jennifer Terry, Carolyn Herbst Lewis, Steven Epstein, Riley Snorton, Rebecca Jordan-Young, Mar Hicks, and Safiya Noble.

SISP325 TechnoPrisons: Corrections, Technology, and Society
The United States currently incarcerates more of its citizens than any other nation, and most of them are members of disadvantaged social groups. How does our government practically accomplish mass incarceration? This first-year seminar (FYS) examines prisons as technologies and the role that specific technologies play in the U.S. prison system. To say that prisons are technologies means that prisons operate as an architectural system that is designed to hold people captive within enclosed social spaces. At the same time, prisons are the location for multiple kinds of technological systems including surveillance systems, biomedical technologies, classification and administrative technologies, and military technologies. This seminar introduces basic concepts within science and technology studies (STS), criminology, and sociology to investigate how prison happens.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Prereq: **None**

SISP331 Decolonizing Ecocinema: Aesthetics and Politics of Disaster
This seminar will focus on twelve experimental documentary films as critical texts that situate, theorize, and decolonize representations of disaster. What the films share is an insistence that struggles for social and environmental justice are deeply entangled and thus require "new figures and tactics" (Povinelli). We will consider how representation is composed from choices made at two levels: aesthetic forms and specialized languages articulated through the camera and editing software; and political calls for accountability and embodied, embedded, inherited praxis. We will unpack how the medium of film alters and stylizes engagements between subjects positioned behind, in front of, prior to, and after the camera frames, records, and plays back images and sounds.

The films will take us to more-than-human worlds, questioning how we engage with species and landscapes, history and technology, power and language. A partial list of characters includes wild bees in Hawaii (Swarm Season, Christman 2019); steel mines in Mongolia (Behemoth, Liang 2015); colonial waters in Tierra del Fuego (Pearl Button, Guzman 2015); shepherds in Montana (Sweetgrass, Barbash and Castaing-Taylor 2010); farmers in Thailand (Agrarian Utopia, Raksasad 2009); and stray cats in Istanbul (Kedi, Torun 2016). As companions to the films, we will read essays from post/decolonial media/science studies, visual anthropology, and environmental humanities.

Gen Ed Area: **SBS-SISP**
Prereq: **None**

SISP356 Afro-Caribbean Philosophy
This seminar focuses on the philosophical production of Afro-Caribbean thinkers since the middle of the twentieth-century. We focus on close readings of Frantz Fanon, Édouard Glissant, and Sylvia Wynter alongside others to consider a Caribbean approach to questions and problems of modernity, relationality, space, race, belonging, the human, creolization, language, anti-colonialism, and liberation. We consider the roots of some of these questions in the work of earlier thinkers such as Aimé Césaire, as well as contemporary influences of their work across and beyond the Caribbean. We will work beyond the linguistic divisions of the Francophone, Hispanophone, or Anglophone Caribbean to consider conversations in common across the archipelago, in a multiplicity of languages.
Offering: **Host**

Gen Ed Area: **SBS-PHIL**
Prereq: **None**

SISP357 AI, Algorithms, & Power
This course explores artificial intelligence (AI) as a cultural, sociopolitical, and literary object. Course readings will begin with the observations of anthropologists at the post-WWII Macy Conferences on cybernetics. Students will put algorithmic data mining and machine learning in historical context, exploring classification systems and intelligence testing. Students will also examine the reanimation of the artificial human in newer discourses of AI, such as big data and predictive policing, virtual reality and drone strikes in commercial

and military operations, health and assistive technology, and play and labor on platforms like Mechanical Turk. Course texts will include speculative fiction on artificial life, social theories of simulation and virtuality, and new work from queer studies and critical race studies interrogating algorithmic bias and the testing and classification of humanity.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CHUM**
Prereq: **None**

SISP366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

SOC206 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations: 200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

SOC231 Sociology of Crime and Punishment
This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the American system of mass imprisonment is effective, and how we might envision improvements and alternatives.

SOC234 Media and Society
This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding, pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.

SOC240 Comparative Race and Ethnicity
This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different

consequences. Through comparisons of Western and non-Western societies, we will investigate how race and ethnicity operate as markers of social exclusion in distinctive ways.

Prereq: **SOC151**

SOC241 Mental Illness and Society
Psychiatric disorders are commonly viewed through a purely biomedical and/or a psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private "personal trouble," is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.

SOC243 Being Together: Affect, Care and the Politics of Experimental Kinship
This course looks at unique and experimental forms of kinship, community, and intimacy through the implicit and explicit challenges they offer to the foundational role of the privatized family unit to civic and economic life. We will look at historical examples of collectives, communes, and intentional communities to explore the challenges and possibilities of alternative forms of being, living, and working together. This course will also focus on college as a perhaps unique context for work about and involving friendship and collaboration, and will involve students in creative and analytical projects. There will be a specific focus on digital culture and social media, aging and vulnerability, interspecies companionship, and the politics of affect.

SOC244 Feminist and Queer Theories of Social Reproduction
This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

SOC245 Intersectionality and Identity (FGSS Gateway)
Intersectionality has emerged as a central motif within both social analysis and political debate. We will examine the origins of this framework within black feminism and women-of-color activism, as well as the way this framework traveled to, and is used within, sociology and other disciplines. The course will also address critiques of intersectionality that have emerged within and outside of feminist theory, and extends the concept of intersectionality to think through intersections between various social identities and social institutions such as capitalism and colonialism.

SOC246 Social Movements
How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex
This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

SOC259 Cultural Studies of Health
Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice. This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SOC260 Sound and Screen
This course explores contemporary developments in the study of media, focusing on three primary areas--music, video games, and the Internet--that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and "unpack" some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupation with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

SOC262 The Rise and Fall of the Nuclear Family
In the United States, the "American Dream" family has often been thought to include a heterosexual, two-parent household with 2.5 kids, a house in the suburbs, and a white picket fence. While this is no longer the dominant family form, this "ideal" still holds great symbolic meaning, and non-normative family forms continue to be stigmatized and pathologized or rendered illegitimate and not considered as family. This course will examine the changing dynamics of families in the US and worldwide. We will consider how families function both within and beyond the context of the nuclear family as well as the political, legal, and social implications of who counts as family. We will focus on how race, class, gender, and sexuality shape family life and we will explore themes including marriage promotion policy, the division of household labor, gender inequality, intergenerational families, non-biogenetic kinship, families of choice, and more. Course texts will include sociological, historical, and queer theory approaches, in addition to sources from popular media. Through reading and engaging with literature on diverse family forms, this course aims to use a critical

lens to approach the concept of the nuclear family and to consider the future possibilities of the family as a social institution.

SOC265 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.

SOC266 The Social Life of Data
All over the world, actions, feelings, and thoughts are becoming data. Divining future desires and anxieties, promiscuous digital networks collect and collate a wide variety of everyday data, marking populations as risky or profitable. Participation in these networks is frequently mandatory in order to access a wide variety of political, social, and economic opportunities. Even if you manage to delete your account or withdraw from these networks, digital systems leave ghostly activity traces or zombie profiles waiting to come back to life. The rise of these data systems offers profound sociological and philosophical challenges to how we understand social life, power, control, memory, conscious thought, and even the nature of humanity and the environment. This course engages with the impact of data infrastructures and digital technologies in a non-deterministic fashion, which is to say that technical systems and structures, while powerful, do not fully determine social possibility. Focusing on historical, established, and emergent data systems, we look to understand technology as a field of affordance and prohibition, with feelings, thoughts, and politics dynamically interacting with rapidly modulating standards, norms, and methods. Course themes address a variety of theoretical topics that have been central to the social study of science and technology, including the efficacy of critique in encountering information processing systems.

SOC269 Bad Sex
In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, "Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations." Brooks is far from alone in this critique of promiscuity. What is it about "casual encounters" and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

SOC270 Urban Societies
This course is a study of the social construction of the city focused primarily on the U.S. context. It examines various themes related to the development of modern cities beginning with the consolidation of capitalism during the industrial revolution. The class will consider the distinct experience of urban life as opposed to other modes of existence, or what Louis Wirth calls "Urbanism as a Way of Life." In addition, students will look at forms of stratification such as race and class inequality and their relationship to spatial issues such as suburbanization and revitalization. Also considered are contemporary issues such as globalization, the revival or renewal process of many American cities, environmental issues, as well as the effect of new media on how we conceptualize the city. All of this will be done by focusing on the relationship between individual experiences and the effect of the urban environment on issues of identity construction and interpersonal relations. In order to develop critical thinking and engagement around these urban issues, the course emphasizes weekly writings and class participation in development towards a final paper.

SOC274 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with

an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

SOC275 The Hair Class
Hair does things. It covers and expose us. We pluck, conceal, wax, curl, and otherwise manage it. Its presence and absence serve as sites of critical engagement, personal and cultural expression, and political strife. This course will explore the social significance of hair, wherever, and on whomever it grows (or fails to grow). We will discuss daily practices, politics, histories, and legends about the manipulation of human and animal hair. We will draw on social theory, visual and social analyses, and cultural commentary to understand hair follicles as both incredibly ordinary and fantastically bizarre. This is an advanced discussion-based research seminar that is writing-intensive.

SOC278 Bored in the House: Work, Leisure, and the Domestic Mundane
At the beginning of the COVID epidemic, Detroit rapper Curtis Roach released an instant classic on TikTok, a fifteen second ditty capturing the zeitgeist of the coming wave of domestic isolation: "Okay I'm bored in the house, and I'm in the house bored." The recent waves of mass quarantine, both forced and quasi-voluntary, have crystallized our focus on the domestic, and its attendant crises. More than ever, we must confront the vanishing material and psychic separations between work and leisure, the badly needed reimagining of public and private not anchored in a spectral domestic privacy, and the foundational dynamics of class, race, sexuality, gender, capacity, and institutionalized violence that structure where we can live, work, and play. This course has a special focus on the exhausting digital, which sucks up ever more energy (both in terms electric power--see the astounding energy use to train and deploy generative AI--and human attention and engagement) while leaving us with sleeping problems, carpal tunnel, and phantom vibrations. This course seeks to be not just an academic study of the themes of this course, but an ongoing experiment in boredom praxis. We will think about what we do when we are bored, and why, and we will try to sit with and direct our boredom in gently investigational ways. This also extends to critically thinking about how we do work in this class, and our techniques and tactics of maintaining leisure time in academia.

SOC279 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.

SOC280 Abolition and Social Praxis
This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

Prereq: **SOC151**

SOC285 The Sociology of Reality TV: Race, Colorism, and Xenophobia
The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether responsibility exists on the networks who help create these shows.

SOC288 The Medium and the Message
Do you like to draw autobiographical comics, record bedroom pop songs, make queer zines, write ChatGPT poetry, choreograph burlesque performances, design and print ugly posters, sew avant-garde garments, create absurdist TikToks, or produce niche podcasts? This seminar is for students who want to think through the sociological content, implications, and impact of their creative work. In the course, students will develop and make substantial progress on a creative project that addresses sociological themes in its form and/or content. Students need not have any formal training, but should have demonstrated experience in their preferred medium. Course texts will address sociological issues surrounding cultural production, including representation, dissemination, and professionalization. Class sessions will be divided between discussion of readings and example work, experimental exercises, workshopping, and student presentations.

To apply for the seminar, students should submit the following: 1) a description of the specific project they wish to develop over the semester, keeping in mind that they will be expected to make and share progress each week; 2) a sample of previous work that demonstrates familiarity with any necessary technology (software, instruments, tools, recording devices, etc.); and 3) a "bibliography" of personal influences (including any relevant readings, creative work, etc.).

SOC292 Death and Dying at the End of the World
Death looms large over life. The digital has given people unprecedented access to global media focused on death and dying, from far-flung calamities killing thousands to intimate gofundme pages for your friends' cancer treatments. In an age of data-enabled prediction and preemption, death is capricious and untimely, remaining stubbornly resistant to scientific and philosophical certainty, despite ever more complex systems for death management. Meanwhile, circulating discourses of ecological and political catastrophe have proliferated thoughts of genocide, extinction, and planetary death. In this course, we look at contemporary encounters with death and dying at a variety of scales, from the search for death's meaning/a meaningful death, to understanding death as a public feeling and inspiration for political imagination.

SOC294 Techno-Latinidad: Science, Technology, Institutions and the Making of Latino Identity (FYS)
The growth of the US Latina/o population in the United States has prompted intense study of the experiences of this heterogenous and multifaceted community. Scholars, scientists, pollsters, activists, artists, entrepreneurs, and policymakers are all currently asking numerous questions about the present realities, impact, and future opportunities of Latinas/os in this country. But as we amass knowledge about Latinas and Latinos, it is critical to also ask how it is that Mexicans, Puerto Ricans, Cubans, Dominicans, and many others came to be known and often to know themselves as "Hispanics" and as "Latinas/os" in the first place? When and how has the Latina/o identity category shape-shifted, been contested, strategically employed, maligned, and also celebrated in the United States and beyond? What are the stakes and the prospects for future representation, unity, belonging, and equality in American social life for all those who comprise this complex category? These questions and the histories that they urge us to keep present root our ways of knowing and living the category of Latino/a in the United States today. In this course, we will explore these questions, focusing on the sociological processes of identity formation and racialization, through the lens of Latinidad across the 20th and 21st centuries. While the history of Latinidad in the United States is conventionally narrated through stories of social movements, bureaucratic negotiations, and strategies of media and marketing, this course will update and expand this repertoire in important ways. Incorporating theory and research from science and technology studies, the course will place fresh emphasis on Latina/o bodies to excavate lesser-known histories of and emerging developments in medical, forensic, and surveillance technologies to track the accelerating technoscientific construction of Latinindad.

SOC295 Narrative Nonfiction and the Archive
Journalists, narrative historians, and biographers all work to reconstruct past events from interviews, archives, and in-person investigation before writing up their findings in an immersive and engaging form. This series of practical writing workshops with Distinguished Writer in Residence Cal Flyn will challenge its participants to produce nonfiction accounts of past events from decades ago, right into the present day -- and to grapple with the technical difficulties that come with uncertain histories, gaps in documentary evidence, and unreliable memories. We will also undertake close reading of carefully selected extracts

from writers including Katherine Boo, Sadiya Hartman, Truman Capote, and Patrick Radden Keefe, and practice our research skills using Wesleyan's own archives.

SOC296 Drugs: Mysticism, Optimization, Oblivion
Drugs are central to the American story. Many take drugs to wake up, drugs to keep focused at work, drugs to calm down, drugs to party, drugs to understand the self and the world, drugs to mitigate pain and drugs to fall asleep. American drug consumption is a significant driver of global production in both licit and illicit markets, while the 50+ year American "war on drugs" has violently reshaped global political economies at a massive human and economic cost, while failing to curb usage or trafficking. In recent years, piecemeal legalization of marijuana and psychedelic mushrooms, the integration of MDMA and ketamine into pharmacological research and various therapeutic modalities, and the opioid crisis spillover from doctors offices to city streets have further frayed the already blurred distinctions between legal and illegal drugs. Especially since the middle of the twentieth century, drugs have also been deeply intertwined with American art and cultural production, with all manner of media, youth culture, nightlife, spiritual and religious practices and even sports entangled with, enhanced by, and responsive to substances. In this course we focus on three impulses that drive drug use in the contemporary moment; the desire to expand or alter consciousness, to sharpen, heighten and optimize the mind and body, and to escape from the body and the world. While these impulses might be neatly segmented into archetypes like the hippie/psychonaut, office worker/student and junkie/slacker, we will explore the sometimes surprising overlaps and bleed between these different visions, reflected, for example, by the South American psychedelic ayahuasca's spread in America from countercultural ceremonies for mind-expansion to quick fix wellness retreats for tech workers. This course is focused on the American experience, while grounded in an increasingly global context, and takes neither a judgemental nor celebratory orientation to drug use.

SOC297 Journalism and Human Rights
This course explores the experiences of journalists in covering crisis, war, and conflict. It examines their ability to continue reporting on human rights issues and expose war crimes against humanity. Together, we will learn about the challenges and risks facing journalists in their written, audio, visual, and electronic work, as well as the forms of restrictions imposed on journalists in various countries. This class will draw on live testimonies, documentation, and new stories from Palestine, Sudan, Syria, Ukraine, and Russia.

SOC298 How to Write about Pop Music and Why
What does it mean to write critically about a pop song or album at a time when anyone can listen to it with minimal effort? What is the value of an artist profile when artists' careers and lives are so publicly intertwined? How does a critic derive the aesthetic or moral authority to comment on music made by performers with dissimilar backgrounds, lifestyles, and values? In this class we'll look at the way the critical discourse around popular music has evolved in terms of immediacy, accessibility, scope, and purpose, paying attention to both "classical" pop journalism and ways of engaging with music that, while not quite reviews, nonetheless contribute significantly to the discourse around it. Most of all we'll listen to music together and explore different forms of interpreting and making sense of it.

SOC299 The Future Perfect
Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

SOC300 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

SOC308 Baby Got Back: Embodiment, Gender, and Sexuality in Black Music
This multimedia course uses a sociocultural approach to explore how black bodies continue to be sized, classed, sexed, and gendered through black musical expression. We will examine black music as a cultural object, both embedded in and responsible for steering national cultures, to argue that black music is indeed a lens through which to examine the struggles, contradictions, and triumphs of black peoples in the U.S. and abroad. Connecting theoretical frameworks of race, embodiment, socioeconomic status, gender, and sexuality with: (1) visual cultures of black bodies in motion (stemming from minstrelsy and chitlin' circuits to musicals and music videos) and (2) a variety of songs written, produced, and/or performed by black musicians (that include but are not limited to: the blues, jazz, rock and roll, rhythm & blues, soul, afrobeat, hip hop, dancehall, pop, soca, hip life, and reggaeton), this class will seek to interrogate how black music creates, replicates, regulates, packages, and distributes identity through a paradigm of production and consumption. We will discuss topics such as commodification, resistance, and representation while listening to artists such as Nina Simone, Sir Mix-A-Lot, Las Crudas, former 2 Live Crew member Luke, Biggie Smalls, Mr. Killa, De La Soul, Lil' Kim, Outkast, Jill Scott, Ayisoba, Big Freedia, Alison Hinds, Nicki Minaj, and Fela Kuti to attempt to understand exactly what type of power (and magic) that music possesses.

SOC309 America's Lure: The Politics of the Transnational US University
Over the course of the last decade the number of international students traveling to the United States has more than doubled. As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the "lure" of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university.

SOC313 Time, Masks, Mirrors: Aging in America
Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the sociocultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the "aging" mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others.

SOC315 The Health of Communities
Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown's Community Health Center (CHC) & Moses Weitzman Research Institute.

SOC318 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments
This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science

in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Truillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

SOC319 Theories of Capitalism
Capitalism has profoundly shaped world history, acting as one of the primary drivers of social change, and working to shape a tremendous variety of social institutions ranging from colonialism to our sense of time. This course takes a critical approach to the study of capitalism, looking at the ways capitalism has intersected with and transformed the nature of social oppression (particularly in relation to nation, race, gender, and sexuality), as well as the ways it works to shape everyday consciousness. Historical changes within capitalism will be explored, considering particularly the rise of corporate capitalism and of contemporary neoliberalism. We will examine a wide variety of theoretical approaches to capitalism, taking Marx's thought as a jumping-off point for elaboration and critique. We will conclude by considering alternatives to capitalism that have been proposed in both historical and contemporary contexts, together with an examination of practical efforts to implement these possibilities.

SOC321 Disgusting? Revolting!
Who or what do we find utterly repugnant? Are we the nasty, vile ones? Is it possible that we are unconsciously attracted to that which disgusts us? What might it take to turn disgust into desire, and vice versa? In what ways might disgust indicate not only disruption or transgression, but some kind of threat and alternative to the status quo? What might be lost or gained when the disgusting clean up their acts, or are shown to have been respectable all along? In this course we will explore the politics of filth, particularly in terms of the desires, attitudes, identities, and behaviors that elicit disgust. We will consider how disgust infuses political ideology--i.e., how people understand and approach the social groups that disgust them (for example, racialized immigrants, queers, fat people, and drug addicts), but also the wealthy, the privileged, the "basket of deplorables." We will also explore the psychoanalytic relation of disgust to desire.

SOC322 The Sociology of Nina Simone
An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as "Mississippi Goddam" and "To Be Young, Gifted and Black" undoubtedly made social, cultural, and political contributions to American society. However, much of Simone's personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone's career, but ignited her passion to speak truth to power; and utilize cultural and sociological paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

SOC323 "Racing" Across Africa
Is Africa post-racial? Have you wondered how someone becomes Black/African, white, ethnic, and/or native and its implicit hierarchies, which scholars refer to as racialization? When you think about race and racism, does Post-Independence (PI) Africa come to mind? If not, why is PI Africa removed from our understanding of race? How can we think about Africa today as always undergoing processes of racial imperialism and how does it intersect with sexuality, gender, and class? Lastly, how do we conceptualize Post-Independence Africa in relation to the African diaspora?

We will go from Ghana to Kenya, Nigeria to South Africa, to understand how race is articulated in these spaces during colonization and after formal colonization has ended. We will also gain theoretical language needed to refute raceless logic. These processes will help us recognize why PI Africa is perpetually marginalized within a globally racialized capitalist economy. This course will contribute to thinking about forms of solidarity in our own lives toward visions of decoloniality, equity, and justice for those racialized as Black, especially in Africa.

SOC324 Black Girl Magic?: Survival and Speculative Fiction in the Social World
"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag -- cisgender, well-to-do, fit/thin, non-disabled, and/or famous -- and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/quare studies, popular culture, political science, speculative fiction, and cultural sociology.

SOC326 Race, Fantasy and Fetish
What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to `race play¿, this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

SOC328 Experiments in Public Life: Creating and Presenting Socially Conscious Music
This course will revolve around examining and participating in this realm of music-making through different lenses. We will examine varied relationships a creator can have to the issue/stance to which the art relates, varied ways the art can be presented, varied ways of identifying and reaching different target audiences, and varied potential outcomes. Students will create work in response to a diverse set of prompts designed both to refine their individual goals of artistic and community engagement and to challenge them to create outside of those zones. In addition to individual and collaborative creative work, there will be readings and listening assignments encompassing a genre-diverse array of music (ranging from Olivier Messiaen to Charles Mingus to Nina Simone to Public Enemy, to name just a few) accompanied by some brief reflective writing assignments. Work created in the course will be shared with the community (defined multifacetedly) in a variety of ways online and in person, with the students bearing much of that organizational and curatorial responsibility.

SOC333 Take Care/Say No
Situated between Maxine Waters's "reclaiming my time" and Nikole Hannah Jones's "I refuse," Take Care/Say No is a course designed to interrogate how Black womxn make decisions regarding their own survival in the face of overwhelming sociocultural, political, and economic commitments and obligations. Tagged as universal caretakers, Black womxn around the world often confront not only the legacies of colonialism, slavery, and imperialism through tropes like "mammy" or "superwoman," but also local definitions of womanhood, laced with misogynoir, that outline what they should do, how little space they should take up, and how grateful they should be for even the smallest leisure time. Paying attention to how the Covid-19 pandemic blurred lines between public and private life, students will closely read Black feminist/womanist texts to critically engage with the fields of cultural sociology, medical sociology, psychoanalysis, and political science. Throughout this course, we will 1) decipher the meaning of Black womxn's labor and leisure practices in their families, communities, and workplaces, and 2) challenge our understanding of terms like "care-work," "self-care," and "rest" to fully reimagine a world where Black womxn are free to say no and take care of themselves.

SOC352 Race, Immigration, and the U.S. Empire
Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by relaying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are grafted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

SOC355 The Personal Is Social
How do social forces show up in our everyday lives? Which forces grab our attention, and why? When are we more inclined to see something as individual rather than social? What kinds of conclusions can we reasonably draw about the social world based on our individual experiences? In this seminar, students will read texts that use personal experience as a foundation for sociological observation, reflection, and insight. We will spend time thinking about the appeal and limitations of various methods, surveying a range of approaches to incorporating personal experience into scholarship, including memoir, autotheory, and autoethnography. Students will practice these kinds of writing throughout the semester, culminating in a final paper that blends personal writing with sociological analysis.

SOC399G Advanced Research Seminar: Introduction to Critical University Studies
The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we're here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through a feminist, queer, and anti-racist frame. What, we will ask, does it look like to think in and about the university at this historical moment? What does it mean to consider the university's history in relationship to power and the nation-state? What are the gender, sexual, class, and racial politics of knowledge production? And how can we most productively take up the university itself as an object of scholarly inquiry?

SOC399H Hot Mamas: Black Women, Sexuality, and Body Size
Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat Black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside Blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of Black women. We will journey our way through this course using the works of Black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

SOC399I Advanced Research Seminar: Assembling the Self
This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will read a variety of autoethnographic texts, in which the authors use personal experience as a foundation for sociological reflection and insight. We will spend time thinking about the political and methodological benefits and limitations of autoethnography, surveying a range of approaches to incorporating one's experience into scholarship, and attending to the ways that autoethnographic texts respond to existing research and theory. In the second half of the class, students will develop a substantial and original autoethnographic essay, with class sessions focused on workshopping and presenting writing in progress.

Prereq: **SOC151**

SOC399K Advanced Research Seminar: Law & Society
In this course we will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government--the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

SOC399L Advanced Research Seminar: The Social Body
This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will survey topics, perspectives, and approaches within the sociology of the body--a disciplinary subfield that examines the human body as a site where the social materializes and is rendered legible--as well as considering more generally the craft of academic scholarship. Substantive topics will include ADHD, anorexia, pain/pleasure and disability, and racial/ethnic cosmetic surgery. This overview will serve as a foundation for the second half of the course, in which students will develop a substantial and original research essay, with class sessions focused on workshopping and presenting writing in progress.

SOC399M Abolitionist University Studies
This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

SOC399R Advanced Research Seminar: I Write What I Like
Love letters, propaganda, admission essays, manifestos, research papers, memoir, profiles, invitations, journaling, tweets, and texts. We write a lot. Whether it's grammar and syntax or word counts and page limits, we do so with rules in mind that help shape what gets said. We fret over whether to write in first or third person, what type of citations to use, and whether we have enough evidence. Too often rules are imposed before we've sorted through our thoughts, let alone what we want to say about them. As we think about these formal and informal rules, we'll consider the specificities and usefulness of various forms of writing, and how each presents constraints that open up or foreclose different kinds of thoughts about society.

We'll think about how writers, activists, and academics approach writing to move us in different ways. We'll experiment with and repurpose diverse genres as we develop our own approaches to writing as an essential tool of social analysis.

SPANISH LANGUAGE AND LITERATURE (SPAN)

SPAN101 Elementary Spanish I
This introductory course is designed for students without prior Spanish language study. Students will develop basic receptive and productive language skills (reading, listening, writing, and speaking) along with an awareness of the various cultures of the Spanish-speaking world, including the United States. Note that Span 101 and Span 102 are designed as a year-long course, with each course covering half of the textbook, along with other materials. Completion of Span 102, or evidence of appropriate level, will be required to continue onto Intermediate Spanish (111-112).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

SPAN102 Elementary Spanish II
This course is the continuation of SPAN101, though students may place directly into 102 via the Wesleyan Language Placement Exam. The course further develops basic language skills (reading, listening, writing, and speaking) and incorporates readings and media from a variety of sources, allowing students to explore the cultures of the Spanish-speaking world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **SPAN101**

SPAN103 Elementary Spanish for High Beginners
SPAN103 is intended for students with prior experience in Spanish (and is considered the same level as SPAN 102). This language course places emphasis on the development of speaking, listening, reading and writing, within a cultural framework, so students can attain an intermediate level in the language (and subsequently enroll in SPAN 110 or 111).

To enroll in this course students must have placed into SPAN 102 or SPAN 103 on Wesleyan's Placement exam. Enrollment for Juniors and Seniors is contingent upon space availability during drop/add period. This course is not linked to another class.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

SPAN110 Spanish for High Beginners
Intermediate-level language course following SPAN103, with emphasis on the development of four basic language skills (reading, listening, writing, and speaking) within a cultural framework.

This course is comparable to SPAN111 and can be followed by SPAN112. Those seeking to follow with SPAN113 require permission of instructor. A weekly electronic journal is required for this course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **SPAN102 AND SPAN103**

SPAN111 Intermediate Spanish I
This intermediate language course places continued emphasis on the development of reading, listening, writing, and speaking skills within a strong cultural framework. The sequence SPAN111 and SPAN112 seeks to expand students' active and passive control of vocabulary and grammar and for students to gain experience in using formal and informal registers of Spanish. Note that Span 101 and Span 102 are designed as a year-long course, with each course covering half of the textbook, along with other materials. Completion of Span 112, or evidence of appropriate level, will be required to continue onto Advanced Spanish - Introduction to Hispanic Literatures (Span 221).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

SPAN112 Intermediate Spanish II
This course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion within a cultural framework that explores an array of topics connecting to other academic disciplines. Students will experience working with written texts and other media materials and produce a variety of written pieces. The course is a continuation of Span 111, though students may place directly into the course via the Wesleyan Placement exam or an appropriate AP score.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **SPAN111 OR SPAN 110**

SPAN113 Intermediate-Advanced Spanish
Within a cultural framework focused on the Spanish-speaking world--especially Latin America--this course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion while providing the experience of working with written texts and other media materials. Students will explore an array of topics that connect to other academic disciplines.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **SPAN110 OR SPAN111**

SPAN201 Spanish Play
Students will be in charge of directing and staging a play in Spanish with the assistance of a Spanish professor. The workshop will take place over 10 weeks. Minimum one hour per week, which will increase to 2 as the day of the opening approaches. Rehearsals will be split between activities including reading and commenting on the dramatic text and working on diction, which can be done collectively or in smaller groups, and workshopping and rehearsing the play. Although the play will be in Spanish, we will try to allow for a wider audience by providing a brief English translation of the plot.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

SPAN203 Spanish for Heritage Speakers
This course is designed to meet the specific needs of students who are heritage speakers of Spanish to increase their language skills and confidence. Students who take this course must have placed into SPAN112 or above. Emphasis is placed on the following: development of linguistic strategies that advance students' written and oral expression beyond the colloquial level, grammatical and orthographic norms of Spanish, critical reading (reading for understanding and analyzing what is read), and expansion of vocabulary. The linguistic work will be conducted through course materials that explore, through a variety of literary and nonliterary texts, the use of Spanish in the U.S. Materials include a textbook or manual and topics related to the experience of Spanish speakers in the U.S.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **None**

SPAN204 Teaching Spanish K-12: Second Language Pedagogy (CLAC 0.5)
This is a community engagement course in which students learn basic principles of language pedagogy and language acquisition to inform their teaching of Spanish to children at one of the Middletown public schools. Readings in English and Spanish; class discussion and assignments in Spanish. Students will familiarize themselves with characteristics of second language (L2) learning and teaching, a basic know-how on analyzing and preparing materials for language learning/teaching, and L2 teaching as a profession.

Language and course requirement: Students must have recently taken a SPAN course numbered 221 or above. Preference will be given to EDST and HISP majors, as well as juniors and seniors.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **CGST218, EDST204**
Prereq: **None**

SPAN221 Introduction to Hispanic Literatures and Advanced Practice in Spanish
Poems, plays, essays, short stories, and films representative of various Spanish-speaking countries and different periods of literary history are used to improve speaking and writing skills and to introduce students to the fundamentals of literary analysis. It includes a formal review of recurring grammatical and rhetorical problems students have at this level in Spanish. The course is conducted exclusively in Spanish. Besides the three hours of class sessions with the professor, all students are required to attend a weekly one-hour conversation section with a Colombian or Spanish TA.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Prereq: **SPAN112 OR SPAN113**

SPAN225 Creative Writing in Spanish
Taught by renowned Mexican writer Cristina Rivera Garza, Distinguished Writer in Residence for 2024-25, this seminar will offer students the tools to articulate their ideas and experiences in Spanish in narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of prose in Spanish and by working throughout the semester on crafting at least one short piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the semester students will practice extensive writing, critical reading, and peer editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **WRCT225**
Prereq: **None**

SPAN227 Writing Short Fiction in Spanish
This course will be both an examination of the short story form in Latin American letters, a genre that has been crucial to the region's intellectual traditions and its ruptures, and a deep exploration of the act of writing short fiction in Spanish. By examining diverse aspects of the craft of fiction writing, and through a discussion of their own writing and that of their peers, students will search for their (multilingual) voice to explore some of their philosophical, affective and linguistic concerns, become stronger writers and storytellers and improve their skills in Spanish. They will also familiarize themselves with some of the most captivating fiction produced by Latin American and Latinx short story writers over a century.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **CGST227, WRCT277**
Prereq: **SPAN221**

SPAN230 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History
This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic EL CID (12th-13th century); the bawdy and highly theatrical prose dialogue known as LA CELESTINA (1499); the anonymous LAZARILLO (1554), the first picaresque novel; and María de Zayas's proto-feminist novella THE WAGES OF VICE (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).
Offering: **Host**

SPAN231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage
From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation. This counts as a Theater Method course for the Theater Major.

Prereq: **None**

SPAN232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America
This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read,

and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

Prereq: **SPAN221**

SPAN236 Cervantes
Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

SPAN239 Rebels and Rebellions in Early Modern Spain
What does it mean to be a rebel? This course examines literary, visual, and historiographical representations of rebels and rebellions in early modern Spain. Students will examine the uprisings of aggrieved comuneros (proto-bourgeois revolutionaries) in Castile and of outraged moriscos (Muslims converts to Christianity) in Granada and Aragon, the covert spiritual rebellions of crypto-Jewish conversas (Jewish converts to Christianity) and crypto-Muslim moriscas, as well as texts composed by women writers who rebelled against gender norms and Spain's most famous playwright's classic rebellion play. We will analyze the scathing testimonies of expelled moriscos and paintings that reimagine the pre-expulsion revolts of Valencian moriscos alongside gripping examples of local resistance to the moriscos' banishment, an astonishing and unprecedented tragedy in Spanish history. The seminar will introduce students to a critical framework for analyzing visual and multilingual texts. Close readings of "rebellious" texts will acquaint students with both known and nameless rebels of Spain, as well as with the unresolved legacies they left behind.

SPAN240 Writings from the Abyss: Andean Women Authors Between Territory, Memory, and Body
This course explores literature written by Andean women through a lens that centers the body, gender, and territory as key axes of resistance writing. We will ask ourselves how authors from regions such as Peru, Bolivia, and Ecuador -- from the mid-20th century to the present -- articulate their experiences and genealogies from positions that engage with ancestral knowledge, Indigenous worldviews, Andean spiritualities, and political memory. The selected texts highlight representations of the female body as a site of conflict, pleasure, maternity, trauma, and rebellion. Topics will include the coloniality of gender, state violence, language and orality, racialization, and sexual dissidence. The course is organized thematically and combines literary analysis with approaches drawn from cultural studies, Andean feminisms, and decolonial theory. Readings will include texts written in Spanish as well as bilingual or translated works from Quechua, Aymara, or Kichwa, alongside visual materials, interviews, and digital archives when relevant.

SPAN241 Contested Archives: Power and Memory in Latin American Archival Practices
This course explores the histories and politics of archiving in Latin America, from colonial record-keeping and imperial control to contemporary community-led, feminist, and dissident archival projects. What counts as an archive? Who decides what is preserved and erased? How are bodies, languages, and stories made (in)visible through archival dynamics? What alternative archival imaginaries emerge from Latin America's colonial and postcolonial contexts? We will analyze how archives have functioned both as instruments of domination and as tools of resistance, central to the construction of national histories, racial hierarchies, and cultural identities, but also capable of challenging erasure and reclaiming marginalized memories. Through an interdisciplinary and decolonial lens, we will engage with both historical texts and cultural and artistic interventions that challenge dominant archival logics, including literary works, films, visual art, performance, and digital media that interrogate, fictionalize, or subvert archival practices. We will examine a variety of materials, including state archives, ecclesiastical records, truth commissions, community memory projects, and speculative/fictional texts based on archival material. By reading across genres and media, the course highlights how cultural production can both expose and reimagine the power of the archive. Works include texts by Diamela Eltit, Horacio Castellanos Moya, Cristina Rivera Garza, Patricio Guzmán, Diana Taylor, Silvia Rivera Cusicanqui, Aníbal Quijano, installation and performatic art by Regina José Galindo and diverse materials from archives and memory projects throughout Latin America.

SPAN242 Cycles of Resistance: Indigenous Voices in Latin American Literature and Culture
This course explores the richness and diversity of Indigenous voices in Latin America, from early colonial records to contemporary expressions. Using a transhistorical methodology, we will examine how socio-political issues and topics like land defense, cultural resilience, gender violence, hybrid identity, and political resistance persist and evolve through diverse perspectives in Indigenous discourse and cultural production. We will analyze and compare foundational texts like the Popol Vuh and Nueva corónica y buen gobierno, as

well as original manuscripts alongside contemporary voices such as those of Humberto Ak'abal, Yana Lucila Lema, and Sonia Guiñansaca. Special attention will be given to the writings of indigenous women, exploring how they have challenged hegemonic narratives and reclaimed their bodies and territories. Additionally, we will explore multimedia expressions and digital activism to understand how indigenous individuals and communities adapt and resist in a globalized world. This course invites students interested in literature, cultural studies, gender studies, and human rights to engage critically with indigenous perspectives, fostering a deeper understanding of the complexities of Latin American cultures.

SPAN243 Latin American Philosophies of Education
This course offers an intellectual inquiry into educational thought situated firmly within the historical and cultural realities of Latin America. It asks how thinkers and educators from the region -- which includes Brazil and the Caribbean -- critique eurocentric models and affirm local traditions of schooling and knowledge. Thinking from the American university, we will explore what it means to consider the classroom a site of epistemic resistance that challenges the coloniality of power permeating teaching and learning across the hemisphere. Topics studied include colonial and decolonial pedagogy; feminist and ecofeminist pedagogies; popular education in campesino, indigenous, labor, and transnational movements; liberation theologies and pedagogies; rural teaching and teacher training; education and land dispossession; debt; schooling in times of war, climate disaster, and incarceration; and the crisis of the modern university. Readings include materials from Paolo Freire, Leopoldo Zea, José Vasconcelos, Ochy Curiel, the Landless Workers Movement (MST), Enrique Dussel, Yuderkys Espinosa, Emma Chirix, Mumia Abu-Jamal, Willy Thayer, Silvia Rivera Cusicanqui, Verónica Gago and Lucí Cavallero.

SPAN244 Boomerang and Back: The Central American Civil Wars in Hemispheric Perspective
The violence and wreckage long imposed on the Global South is now plainly felt in the United States, from its streets and schools to its places of work and worship. The "imperial boomerang," first theorized by Aimé Césaire, has returned home. This seminar draws on archival material from Central America to critically reflect back on the civil wars in Nicaragua, Guatemala, and El Salvador from a contemporary hemispheric lens. We will examine, among other topics, the colonial legacies of 20th-Century agricultural dispossession; theories of revolutionary Marxism and feminism; religion and liberation theology; discourses and ethics of survivor testimony; carceral aftermaths of counterinsurgency; and the politics of postwar reconciliation under neoliberalism. This course incorporates a wide range of cultural objects produced during and after the civil wars, including radio, poetry and literature, photography, children's drawings, artisan crafts, and fiction and documentary film. Alongside published works from Roque Dalton, Rigoberta Menchú, Susan Meiselas, Gioconda Belli, Otto René Castillo, Pamela Yates, and others, students will also study unpublished archival materials, such as broadcasts from Radio Venceremos, songs and embroidered testimonies from the Honduran refugee camps, and international solidarity art from Cuba, the US, Vietnam, and Spain.

SPAN250 Defiant Echoes: Resistance and Reinvention in the Spanish Canon
Can the literary canon be both a tool of oppression and a space for rebellion? In this course, we will challenge traditional notions of the Spanish canon, exploring how voices of dissent have reshaped it from the 18th century to today. Through literature, comics, memoirs, theater, and essays, we will uncover how writers and artists have resisted imposed identities and fought for a more inclusive cultural landscape. From the groundbreaking works of Emilia Pardo Bazán and Federico García Lorca to contemporary creators like Quan Zhou Wu, Ana Penyas, and Desiree Bela-Lobedde, we will analyze how these voices question authority, identity, and belonging. Through engaging discussions and critical analysis, students will examine the evolving definition of Spanish identity and consider how narratives of power, exclusion, and resistance continue to shape the literary world. Whether you are interested in literature, history, cultural studies, or activism, this course will give you new perspectives on the power of storytelling as a force for change.

SPAN252 Tracing Identities: Graphic Narrative in the Hispanophone World
This course traces the construction of identities in Hispanophone graphic novels by focusing on how they build alternative spaces. Graphic novels have become highly popular in Spain, in part, for how they have created a space of dissent, a space where predominant discourses on identity, migration, memory, race, and gender are being reexamined, questioned, and (re)constructed. After an introduction to key concepts in comic studies, students will engage with relevant works by artists from Spain, Equatorial Guinea, or Argentina, such as Ana Penyas, Pere Ortín y Nzé Esono Ebale, Paco Roca, Quan Zhou Wu, Marcela Garcés, or Pepita Sandwich among others. By discussing the content of these graphic novels, students will develop crucial humanistic skills such as critical thinking, communication, teamwork, and cultural competencies and become familiar with a broad range of human experiences as well as major global events. Materially speaking, we will focus on their unique textual/visual medium and how they dialogue with other media, especially photography, but also cinema, and literature. Coursework includes critical readings, visual and textual analysis, and creative writing/drawing. This class is taught in Spanish.

SPAN254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde
This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca's writing but to the potentially transformative power of language and literature in general.

Lorca's writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which

he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca's verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at http://span254.site.wesleyan.edu/ to review in detail the materials, objectives, and modes of assessment for this course.

SPAN255 Barcelona Beyond the Tourist Gaze: Margins, Memory, and Modernity
How do the margins of a city shape its identity? This course explores Barcelona beyond its iconic landmarks, focusing on how its cultural and physical landscapes have been constructed, contested, and reimagined over time. Through literature, film, photography, maps, and performance, we will examine how Barcelona's history of modernization, political struggles, and cultural production reflect broader tensions in contemporary Spanish and Catalan identity. Special attention will be given to the role of slavery, the city's penitentiary past, and the voices often left out of dominant narratives. By engaging with these complex histories, students will gain a deeper understanding of how the margins -- both literal and figurative -- reveal the layered realities of nationhood, memory, and artistic expression.

SPAN256 City, Mobility, and Technology: Towards the Modern City in Spain
Movements, itineraries, encounters--these are some of the elements that have characterized modern literature. From the Baudelairean figure of the flâneur to the car chases of popular movies like Bullit, the city is described from a series of journeys that create a representation of urban space. However, these narratives reveal more than a personal account of the city: they show the urban architectures that allow the movement in those spaces (ie, paths, roads, lighting) and in doing so they portray the development of the modern city.

With this framework in mind, in this course we will analyze the construction of the modern city in Spain through literary and filmic texts. We will pay special attention to Barcelona and Madrid, but we will also look at how other international cities are perceived and represented in Spanish literature. In doing so, we will explore how these authors understand the modern city and the international connections and influences that shaped it at specific historical moments.

SPAN257 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain
In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged into the limelight of Spanish national cultural discourses. Although they represent discrete realities -- not all Gypsies identify with flamenco and not all flamenco artists are Gypsies -- correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain's dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to foster a deeper understanding of the importance of the Roma community within the framework of European and Spanish culture and a deeper appreciation for flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

SPAN259 Detective Fiction: Procedure and Paranoia in Spanish Narrative
The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective--a person who is generally outside the law and sometimes crazy or paranoid--help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

SPAN260 Between Word and World: Major Spanish Poets of the 20th Century
Our goal in this course is to study how the leading poets in 20th-century Spain use the lyric mode to negotiate the relationship between themselves and their community at key junctures in the nation's history. In doing so, we will also identify and assess the various notions of community that arise in modern Spanish poetry, attempting to evaluate how those notions evolve or are affected by such events or movements as (1) the avant-garde and the second Republic (1920-1936), (2) the Civil War and the Franco regime (1939-1975), and (3) sweeping political and social transformations of the past 30 years as signaled by the country's democratization, integration into the European Union, economic development, and by the massive influx of immigrants from Africa, Latin America, and Eastern Europe (1977-present). Key essays (critical and theoretical), some by the poets themselves, are included in the syllabus to provide critical tools for discussing how the public experience is lyricized through the intimate filter of the poet's own sensitivity. We will seek to understand the role played by context in conditioning the decisions poets make in adopting the epic, elegiac, didactic, or testimonial mode of expression, to name just a few. The image of the poet standing at the crossroads of lyrical creativity--word--and historical circumstance--world--will be central to our critical inquiry.

SPAN261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain
Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

SPAN262 Through Foreign Eyes: The U.S. in Spain in the 20th Century
Although the relationship between Spain and the U.S. has a long history that can be traced back to colonial times, during the 20th century, an extensive corpus of literature in which Spanish authors portray the U.S. prominently becomes visible. The appearance of this body of work gives rise to a series of questions: How do Spaniards see the U.S.? What are the consequences of this understanding? Why is there such interest in portraying the U.S. from a Spanish point of view? Of course, cultural and social definitions are constructions always limited to historic, social, and cultural events, be they of a military, political, or purely commercial nature. One could think that these portraits dwell on stereotypes; nonetheless, we are before a literary production that uses the U.S. to create a narrative about how Spain enters a global economic market through a cultural exchange. These are texts about traveling, the construction of the individual, and the shaping of a nation; texts that cross the boundaries of literary genres to define Spanish identity. We are before the construction of a narrative that questions the building of alterity and shapes the identity of modern Spain. In our approach to the main historic events that define the relationship between Spain and the U.S. during the 20th century, we will examine novels, poems, and movies that result from such events to analyze questions related to identity, globalization, localism, modernity, and nation. What we will engage in is, in fact, a debate about how we define ourselves, whether we are Spanish or American, through foreign eyes.

SPAN263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance
What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society.

In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Hispanophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's Iliad and Virgil's Aeneid. This course is taught in conjunction with Italian 263 and French 263. The final collaborative performance, scheduled during the Final Exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

SPAN264 Orientalism: Spain and Africa
Over the past several decades, North African and Middle Eastern cultures have become conspicuously important within the Spanish cultural arena. Translations of writers from Lebanon to Morocco abound in Spanish bookstores. Spanish writers have begun addressing North African and Middle Eastern issues with greater frequency, especially in their novels. The dramatic rise in the African immigrant population in Spain during the 1980s and 1990s, meanwhile, has been matched by a rise in press coverage of issues pertaining to Africa and the Middle East. These factors constitute the point of departure for our historical overview of the treatment of Islamic cultures in modern Spain, from early 19th century to the present. Guided by Edward Said's seminal essay, Orientalism, we will assess the extent to which (and the process by which) Spain passes from the Orientalized subject of European Romanticism (painting, literature, music) to an Orientalizing European power in the late 20th century. In doing so, we will seek to relate the representation of Islamic cultures in Spanish literature and painting to social, political, and economic factors, most important of which was Spain's military invasion into Morocco in the late 19th and early 20th centuries. We will also survey changing attitudes among Spanish intellectuals with regard to the Islamic world and toward Spain's Islamic heritage, the result, perhaps, of 20th-century modernization and, most recently, of Spain's full integration, after Franco's death, into Europe's military and political structures. The tools for this study include works of literature primarily, but we will also focus on painting, historical essays, newspaper articles, and film.

SPAN265 History of Spanish Cinema for Spanish Speakers (CLAC.50)
Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: https://span301.site.wesleyan.edu/. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

SPAN267 Image/Word: Narrative and Photography in Contemporary Spain
The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization; that is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar, where students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life. In this seminar we will work with Cuban artist and writer Jacqueline Herranz-Brooks, who will work with students in their creative project.

SPAN269 Appearing Acts: Visual Histories and Identity Construction Through Photography in Spain
In her reading of Plato's "Allegory of the Cave," Susan Sontag finds a close bond between photography and the world, our cave. Photography, she says, shows us a new visual code that constructs narratives that "alter and enlarge our notion of what is worth looking at," and in doing so can influence, guide, and condition our knowledge of the world. Keeping this in mind, when it comes to Spain, what kind of world does photography construct? How does the visual field influence and guide our knowledge of modern Spain? In this seminar, we will reflect on how photography has conceptualized social and national identities in Spain from the 19th century to the present, asking how images create, shape, and question the cultural and social archive. Through the examination of photographs, theories, and methods, we will draw a contextualized history of photography that will help us to consider its role in the interdisciplinary construction of Spanish identity.

SPAN270 Survey of Latin American Literatures, Cultures, and Ideas
A close study of texts from the colonial period to the present will serve as the basis for a discussion of some of the major ideas and cultural and political debates that have emerged in modern Latin America to this day. Thinkers include Las Casas, Sor Juana, Bolívar, Sarmiento, Martí, Neruda, Borges, García Márquez, Menchú, and Bolaño, among others. For purposes of understanding context, students will also read selected chapters from works by historians and cultural critics and will watch several films. (Please note that this course was previously called "Spanish American Literature and Civilization.")

SPAN271 Against Epistemicide: Latin American Critical Thought
This class explores seminal social and political texts that reconceptualize America Latina against the legacies of colonialism and Eurocentrism. We will focus on Liberation and Decolonial Latin American Thought in order to move from the idea of Latin America to that of Abya Yala. We will begin with the triad: La ciudad letrada by Ángel Rama, Culturas híbridas by Néstor García Canclini, and Colonialidad del poder, eurocentrismo y América Latina by Aníbal Quijano. We will then decolonize their own theories through the work of women thinkers such as María Lugones, Yuderkis Espinosa, Ofelia Schutte, Mary Louise Pratt, Linda Martín Alcoff, and Catherine Walsh.

SPAN272 Cubanidad: Diaspora, Exiles, and Cultural Identity in Cuban Literature and Film
This course will examine shifting notions of Cubanness, or "cubanidad," from the 19th century to the present times from a diasporic framework. We will discuss writings by/about African slaves, Chinese indentured laborers and migrants, and Spanish immigrants in Cuba, as well as Cuban exiles in the U.S. and Spain from the 19th century to the beginning of the 20th century. Through a variety of literary texts and films, we will then study select cases of European exiles who visited Cuba in the 1930s and '40s, the later massive waves of Cuban migration to the U.S. after the Revolution, and the more recent immigrants who have settled in Cuba.

SPAN273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters
Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra's other Chile,

César Aira's Colón (Panamá), Fernando Vallejo's Medellín (Colombia), and Mayra Montero's eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904--1914), the Cold War (1947--1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

SPAN274 Insular Borders of Latin(x) America
Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire's control of its remaining insular colonies in the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the United States' successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island "intra-colonial" (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai'i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Edouard Glissant's concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

SPAN275 Multilingual Aesthetics in Latin America
This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

SPAN276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

SPAN277 The Secret Life of Waste: Trash in Latin American Art & Literature
From space junk to microplastic particles found in human blood, man-made waste and pollution are ubiquitous. What are the effects of waste on the environment? What can the decomposition of waste create and/or undo? What is the afterlife of waste? Is waste apocalyptic? Through figures such as rottenness, radioactivity, mutation, and zombies, we will explore the ways in which Latin American art and literature try to answer some of these questions by imagining living amidst the remnants of hyperconsumption and by exploring the unforeseen effects that coexisting with waste could have upon the land and the body. We will study a wide range of visual and literary engagements with trash from novels, poetry, comics, and films to environmental art projects. Artists and writers may include Cecilia Vicuña, Daniel Lie, Samanta Schweblin, Fernanda Trías, Vik Muniz, H. G. Oesterheld, Javier Campos, and Alejandro Durán, among others.

SPAN278 Narratives of the Latin American Jungle
This course is a critical exploration of the ways in which forests and its plurality of beings, and particularly the tropical territories marked as jungle or rainforest in South America (the Amazon, the Darién), have been narrated, imagined, and contested in cultural production and in indigenous and peasant ontologies and place-based practices for more than a century. We will investigate the construction of jungle as a territory of dwelling shaped by the relational condition between human and other-than-human beings (plants, animals, water) and as a place where diverse anxieties about sovereignty, politics, race, development, gender, and subversion collide. We will examine this cultural geography in relation to diverse histories of modernization, development and extractivism, the global angst over the environment and its destruction, local processes of (cosmopolitical) resistance, and the various political and environmental conflicts that have shaped the region over the past century.

Attending to Amazonian indigenous thought and to political ecology and other intellectual practices emerging from Latin America, as well as to literature, film, popular culture and visual art, we will discuss the potential to disavow modern/colonial binaries like nature-culture, human-nonhuman and civilization-barbarism, in a place that has been central to the way in which Latin America has been imagined for centuries.

SPAN280 Screening Youth in Contemporary Latin American Cinema
This course will examine some of the most important Latin American films from the past three decades that also happen to cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality and gender, cultural identity, and citizenship through the lens of youth. These films question the roles of minors in relation to politics and resistance, and reflect upon the cultural constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dimensions at play in these films and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, this course includes a creative project by which students will develop an idea for a short film based on their own personal coming-of-age narrative.

SPAN281 Labor in Latin America and the Caribbean: Pedestals and Veils of Disposability
This course examines the racialized and gendered exploitation of labor that has long structured everyday life across the Western hemisphere. It asks how shifting productions of race and gender mediate the distinction between productive and disposable humanity. We will examine a variety of materials from the region spanning the colonial period to the present, including literature, film, visual and performance art, economic theory, political philosophy, grassroots activism, testimonials, chronicles, and journalism. Through these texts, we will problematize a range of interdisciplinary issues, such as the veiled continuities of conquest and enslavement, the accelerated pace of capitalist extraction of human and non-human value, and state responses to forced migrations of populations considered criminal, undesirable, or superfluous. We will also study aesthetic and lived examples of resistance from Latin America, the Caribbean, and their diasporas, with particular interest in how collective organizing has taken on new forms in the face of work's increasing informalization and precaritization. Building off these examples, students will develop an accessible final project that applies their research and analytical skills not only to produce knowledge, but to cultivate critical consciousness for the reader, listener, or viewer.

SPAN282 Narratives of Crisis: Violence and Representation in Contemporary Latin American Culture
How have Latin American literature, film, and performance of the past three decades articulated the many forms of violence in a region facing complex armed conflicts, wars deployed around the drug trade, and diverse forms of political unrest? Focusing on Colombia, Peru, Central America, and Mexico, we will investigate how contemporary cultural artifacts reflect on the linguistic, ethical, and social dimensions of subjectivity in times of crisis and provide productive analytical frameworks to examine violence, history, and memory in the region.

SPAN283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile
This course explores how poetry, novels, and films, produced during and after Chile's military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

SPAN284 Tales of Resistance: Modernity and the Latin American Short Story
Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

SPAN285 Racial Capitalism and Resistance in Central America
In modern-day Central America and its diasporas, the most precarious communities are descendants of colonized, enslaved, and dispossessed populations. Yet while the fact of race and class intersecting is evident, why and

how they have evolved together is not. This course examines the relationship between race formation and economic dispossession across the region through a transnational perspective. Through a wide range of Central American and hemispheric cultural objects, theoretical frameworks, and grassroots praxes, we will meditate on the theoretical paradigm of racial capitalism, which holds that racialism and capitalism are co-constituting and have evolved together to produce an economic world order dependent on colonialism, violence, exploitation, and containment. Students will develop their interpretive and analytical skills by collaboratively examining issues of whiteness, mestizaje, and multiculturalism; resource extraction; economic exploitation and expulsion; rage, resistance, and revolution; policing, counterinsurgency, and criminality; migration; identity and ethno-politics; and education. Beyond these cultural, theoretical, historical, and aesthetic concerns, a central component of the course is a creative or community engaged project that students will develop in close collaboration and in stages throughout the semester.

SPAN286 Bolívar's Interpreters: Nation Construction in the Americas
No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

SPAN287 Constructions of the Self
How does one define oneself? What forces are active in the creation of our personal identities? How much control do we exercise over these processes? What role do writing and literature play in the construction of notions of the self? While these questions are timeless and know no geographical boundaries, we will examine how several different Latin American and U.S. Latino authors have addressed these concerns in their art, with an eye toward understanding the cultural specificity of each of their propositions, as well as how writing itself becomes the subject of writing in the search for subjectivity.

SPAN288 Territories of Dwelling, Desire and Resistance in Latin America
What does it mean to dwell in a place? How are spatial orders and more-than human dimensions conceived of and what is the symbolic and material weight of these conceptions? This course seeks to examine the ways in which diverse spaces categorized as rural or as "natural frontiers" in Latin America have been inhabited, negotiated, and contested in the 20th and 21st centuries. How have cultural practices constructed them as territories of dwelling, desire, possession, dispossession, and resistance? How does narrative and art reflect on local modes of dwelling and on the relationships between community, embodiment, desire, memory and the materiality of place? We will focus on texts and artistic practices--literature, film, performance, and the visual arts--that, in thinking about mountains, rivers and other bodies of water, plants, more-than-human beings, seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries and complicate extractivist and other capitalist logics that have sought to transform them. We will trace how these texts intervene in urgent debates about extractivism, the destiny of rural lands, the uses, abuses and rights of nature, the struggles for peasant and indigenous rights, environmental justice, and the defense of alternative ontologies. We will focus particularly on the Andean and Amazon regions of South America, with specific attention to Colombia and Perú.

SPAN289 Contact Zone: Introduction to Amazonian Narratives
Often, the Amazonian region has been considered a marginal space within the territorial limits of Perú, Colombia, Venezuela, and Brazil. However, this territory is and has been key for these nations' past, present, and future. Beyond its outstanding biodiversity, the Amazon rainforest has housed for various centuries multiple and diverse native and non-native linguistic and ethnic groups. From the original Yanomami inhabitants to the contemporary European descendant citizens of Iquitos, the Amazonian territory has been a zone of contact where multiple cultural and cosmological views interact. In this class students will engage with a variety of materials, including literary works, travel diaries, films, and photographs that explore the Amazon rainforest: modern odysseys (La Vorágine), shape-shifting ghost stories (Las tres mitades de Ino Moxo), accounts of guerrilla warfare in the jungle (Naturaleza común), and apocalyptic prophecies (A queda do céu). By analyzing the literary and audiovisual archive resulting from multiethnic and multilingual interactions in the region, students will examine the role of the Amazon and its inhabitants in shaping the modern Latin American nations surrounding it. They will acquire a comprehensive understanding of the Amazonian region, its cultural diversity, and the complex issues it faces, such as racial and ethnic clashes, resource extraction, and the existential threat this poses to both human and non-human beings inhabiting it.

SPAN290 From the Muralists to the Narconovela: The Public Intellectual in Mexico
Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

SPAN291 Spanish American 'Modernismo' in a Global Context
The publication of Nicaraguan Rubén Darío's AZUL... in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

SPAN295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures
What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

SPAN296 Cuban Literature and Film: Imagination, Revolt, and Melancholia
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

SPAN298 "Un pedacito de la historia negra": Afro-Latin American Literature and Culture
The significant contributions of Afro-descendent individuals to the development of Latin American culture have been frequently overlooked or torn to pieces. Yet, the experiences and bodies of racialized people have been key in shaping and transforming the region's culture. Beyond their representation in early colonial and republican works, Afro-descendent writers and characters have been crucial in the modern aesthetics of Latin American literatures. Along with musicians and other artists, they have provided a continuous challenge to the idea of Latin America and its cultural production as a product of a homogeneous cultural and racial miscegenation. Inspired by Colombian artist Joe Arroyo's opening to a famous salsa song, wherein he sets out to tell "un pedacito de la historia negra," in this seminar we will study short stories, novels, poetry, music, and film, including works that explore the experience of being racialized in Latin America, poetic experimentalism through orality, and the retelling of the history of Black resistance in the Caribbean through modern media. Engaging with historical and contemporary issues such as racial discrimination, social inequality, and cultural pride and preservation, this course invites students to critically analyze the fundamental role of Afro-Latin Americans in shaping Latin American cultures and histories.

SPAN299 Decolonizing Speculative Fiction in Latin America
This course interrogates what it means to imagine alternative futures in colonial and postcolonial settings. As the writings of conquistadors, explorers and missionaries show, Europe envisioned the New Continent as the land of the future or utopia, to the point that contemporary decolonial theorists have observed that nothing was "discovered" by the first European travelers to America but the idea of discovery itself. Modern temporalities of progress became thus inseparable from the image of the Americas as a frontier of imperial expansion, religious conversion, and economic exploitation. If European SF (science fiction/speculative fiction) emerged hand-in-hand with positivist notions of progress and civilization, Latin American SF contested Eurocentric epistemologies by claiming the ability to imagining the future and fictionalizing worlds otherwise. The course will center on three key moments of Latin American literary history: 1) the early to mid-twentieth century experiments in fantastic literature from the Southern Cone, which broke with realist mimesis from the margins of modernity; 2) post-1989 SF novels from Bolivia, Guatemala and Chile, that address the making of neoliberal globalization from the vantage point of the Global South; and 3) contemporary Dominican and Cuban works in which Afro-Caribbean religions and gender formations engage in productive conversations with digital technologies, biomedical engineering, game cultures, and climate change.

THEATER (THEA)

THEA105 Production Laboratory
This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions happen. All sections will participate in the backstage work of the Theater Department's productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA109 Introduction to Drafting for Theater
This course provides an introduction to drafting as a means for communicating design ideas for theater. Students will explore the basic principles of hand drafting before transitioning to 2D and 3D CAD modeling via Vectorworks. Students will become familiar with theater industry drafting standards and will learn to use technical drawings as a way to understand space, volume and scale. Assignments will be largely project-based, and students will share and discuss their work in class. For Theater Majors, this course counts towards the Technical Practice requirement.
Offering: **Host**

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA110 Drafting for Theatrical Design
This course is intended to provide students with a basic knowledge of computer drafting, for theatrical design and other performative arts. Students will learn the language of the line, the drafting standards for theater, as codified by the United States Industry of Theatre Technology (USITT), and the means to create accurate, measured drawings. We will cover topics including, geometry, line weights, scale, theatrical drafting conventions and symbols, ground plan drawings, elevation drawings, section drawings, dimensioning, page layout, and printing.

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA114 Incarcerated Stories: Documenting In/Justice
Students in "Incarcerated Stories: Documenting In/Justice" will collaborate with formerly incarcerated individuals and their families to create performances of theater and music based on interviews, trial transcripts, prison memoirs, and other texts related to mass incarceration. Students will learn how to apply their skills as writers, performers, or musicians to community service and activism as they learn about the United States' criminal justice system and its position at the heart of systemic racism in America. The class will be taught remotely and the performances generated by the students and their formerly incarcerated collaborators will be disseminated as widely as possible, with the objective of amplifying marginalized voices to raise awareness of mass incarceration's social impact and the need for carceral reform. Due to the collaborative nature of this course, and its dependence on interaction with formerly incarcerated individuals and their family members who will be visiting the class remotely via Zoom, weekly online attendance is required.

THEA118F Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

THEA135F Documentary Performance: Theater and Social Justice (FYS)
This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course's initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.

THEA143 Gospel, Rap, and Social Justice
Students in this course will explore the creation of theater and music inspired by a collective reading of Dante's Divine Comedy, Michelle Alexander's The New Jim Crow, Anna Deavere Smith's Notes from the Field, and a range of texts examining the impact of mass incarceration on communities of color. The course will examine how activists and artists have drawn on gospel, rap, spirituals, and other musical and theatrical forms to survive, heal, and advocate for social change. Through creative and analytical work, students will consider the contemporary relevance of Dante's poem to issues of justice, voice, and power, with an emphasis on amplifying marginalized perspectives and interrogating the structures of the carceral state.

THEA145F Clash of the Titans: Classical vs. Contemporary Voices in Theater and Film
This course will explore how classic texts have informed and inspired contemporary writers of theater and film, and how seemingly disparate parts of the canon enrich and illuminate one another. We will dive into close readings of plays, exploration of scenes from an actor's point of view, supplemental viewings and reflections/critical analyses of films and plays, and an original adaptation. Plays by Euripides, Luis Alfaro, James Ijames, Shakespeare, Ibsen, and Lucas Hnath are currently under consideration. Film viewings include Black Orpheus and Hamlet.

THEA150 Introduction to Performance Studies
What is performance? Is it an event or an action? Is it what happens on a stage or in your living room? Furthermore, what does performance have to do with our understanding of how race, gender, sexuality or community function both historically and in the present? This course approaches theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking. Students will be introduced to the theoretical, critical, and creative field of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performances ranging from the play "Fairview" by Jackie Sibblies Drury, to "Fires in the Mirror" by Anna Deveare Smith, to the punk performance work of Sister Spit, and the story weaving work Spiderwoman Theater. In this writing-intensive course we will pay particular attention to queer artists and artists of color.

THEA172F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between

the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

THEA175F August Wilson (FYS)
During his lifetime, the world-renowned African American playwright August Wilson graced stages with award-winning plays from his "Century Cycle." This course examines the cycle's 10 plays in the order in which the playwright wrote them, from Jitney (1982) to Radio Golf (2005). In all cases, we pay special attention to the playwright's presentation of language, history, memory, religion, visual art, and music within his oeuvre.

THEA180 Reading Plays for Production: Conceiving for Performance
Propose, read, and discuss plays in consideration for production for Theater Department Mainstage. Reading a script is different than reading a novel: in this class, we will examine how to read a text for performance. Over the course of the semester, we will consider a range of plays and approaches to performance--from classics to contemporary plays to devised work. In the course, students will explore plays and performance ideas recommended by the community with an emphasis on examining how they might operate as productions within the Theater Department's Mainstage. Students will lead discussions, gain skills in text analysis, dramaturgy, and creative and practical thinking as they consider what type of work the Theater Department might produce. This class will result in a slate of scripts and performance ideas that will be offered to the Theater Department faculty for consideration for one of the Mainstage productions. This course counts towards the Theater Arts category for the THEA major. This course may count (one time only) towards the Performance Practice credit requirement for the THEA major.

THEA183 The Actor's Experience
The Actor's Experience is an introduction to the practices of acting in rehearsal with a director. It is held in conjunction with THEA281- Intro to Directing; students will be working directly with the student directors in that class. Basic aspects of staging, collaboration, script, and character analysis will be covered. Commitment to attending scheduled rehearsals is vital. Each actor will have the opportunity to perform in both a short-form scene (mid-term) and long-form scene (final), performed in front of the class and invited guests. This class is a chance to be in community with other students interested in theater, and practice collaboration and care. Together students will consider why theater matters, and how theater-makers can offer more care to themselves, each other, and our audience. Students will participate in in-class staging exercises, outside rehearsals with peers, reading discussions, and viewing plays. The Actor's Experience is a half-credit class intended for majors and non-majors at varying levels of experience and is held in conjunction with the Intro to Directing class.

THEA185 Text & Visual Imagination: Introduction to Eco Design for Performance
Eco-scenography is an introduction to design for performance. In this course, students will learn the core principles of design for performance while exploring sustainability and environmental practices with an emphasis on understanding of materials, such as production cycle and manufacturing process, as well as integrating environmental justice paradigms by analyzing specific case studies. Through three specific project-based assignments--1. object design, 2. garment design, and 3. environmental design--students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.

This course counts towards the Theater Arts category for the THEA major.

THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern
This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's Poetics and Plato's Republic. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy ¿ for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the

dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

THEA203 Playing in the Theater Archive: An Introduction to Performance Studies
This class will serve as an introduction to theatricality, performance studies, and aesthetic theories. We will analyze plays and performances as we examine classical and contemporary conceptions of the theatrical. Given the complex and varied roles theater has played throughout history, we will begin by placing pressure on the terms "theater" and "history." We will pay particular attention to the intersections between theater history, dramatic literature, cultural performance, and the role of the theater archive as we explore key moments in theatrical development. Readings will be organized geographically and diachronically, giving us a mobile and flexible account of theater, theory, and practice across a variety of cultures. At the end of this course, students will be familiar with touchstones in theater history; be able to write a critical and descriptive performance paper; demonstrate a knowledge of critical performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.

THEA204 A Nation and its Theater: Cultural and National Identity in Performance
In the wake of Black Lives Matter, the insurrection in January 2021 on our nation's capital, a global pandemic, and the Trump presidency, the very notion of what "America" is, has been, or ever was is being grappled with on a global scale. The nation is fractured in its sense of national and cultural identities and is struggling to imagine a collective future. This course examines the concept/model of a "national theater" and interrogates the cultural, historical, and political role these institutions play within their countries. It examines what role the theater can, should, or should not play within the formation, reinforcement or dismantling of national and cultural identities.

Through an examination of models such as the Teatro Nacional de Venezuela, the National Theater Company of China, the Uganda National Cultural Center, Ireland's Abbey Theater, and France's Comédie-Française, this course looks at: (1) how politics, history, and culture give rise to/craft the shape of national theater agendas; (2) the role of national theaters in building/challenging/reinforcing national and cultural identities; (3) how government agendas and public funding can affect the role that national theaters play; and (4) how the colonial legacy of a European national theater model has influenced non-Western models.
Students will engage with theoretical and non-western notions of "nation," and debate the role/responsibility of a "national theater" to provide representation and inclusive/pluralist notions of cultural identity. Students will then look at historic attempts in the United States to create national theater concepts such as the Federal Theater Project, the Living Newspaper, and the American National Theater and Academy. For their final project, students will be asked to imagine/craft a proposal for a "National Theater" for the United States.

THEA210 Shakespeare
This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

THEA211 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects
You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

THEA215 Latinx Theater in the U.S.: Analysis & Performance
This Latinx theater study and performance class will examine American-born playwrights of the Latinx Diaspora. Playwrights who are of Mexican, Cuban, Puerto Rican, and Dominican descent are just a few of the many Latinx identities in the United States. The goal will be to examine the specific cultural identities within the United States, their origins, experiences, and stories in this country. We will analyze and explore the universal resonance of these plays as well as their current relevance to contemporary American culture, both politically and socially. Students will be required to do monologue work and scene study for the performance portion of this course.
Offering: **Host**

Prereq: **None**

THEA216 Performance Curation as Relational Praxis
When we hear the word "curator" we might think of the iconic fictional character of Bette Porter--someone who works in a museum or gallery with a vision for how paintings, sculptures, and wall texts are put together for a show. In this class we will expand on this idea of the curator to explore what happens when we add performance to the task of curation. Or, put differently, we will ask what happens when we remove performance from the more theatrical tradition to add it into the gallery and museum space. Thinking between performance studies, visual art, and museum studies, this course explores the role of the performance curator. Connecting performance curation to community engagement, social practice, and transformative justice, we will explore the ways in which performance might address questions of racial inequality, gender variance, class access, and dis/ability. We will ask: How does performance live in art institutions? How do you compensate a performer for a fleeting piece of work? How does performance help us reimagine the space of the art institution itself? Does performance curation make possible new genres of performance? Can, and how, might we apply its practices back to more traditional theater contexts at the university, in the art world, and beyond?

In this class students will explore theories of performance curation as a practice of not only selecting and choosing, but of building relationships. We will look at museum shows, arts organizations, and performance scholars to eventually build individual proposals for our own performance events. Artists and scholars to be discussed include Nivald Acosta, Mariana Valencia, Justin Allen, Morgan Bassichis, Jamie Shearn Coan, Ralph Lemon, Thomas Lax, Adrienne Edwards, Tourmaline, Carolyn Lazard, The Poetry Project, Center for Experimental Lectures, Wendy's Subway, Adult Contemporary, and more.

THEA217 Performing Democracy: Theater, Activism, and Community Engagement
This course will give students the opportunity to use theater as a tool for community engagement and social activism. No theater experience is required, but students will be asked to make informal presentations of texts related to issues of social justice, climate change, health care, and economic equality in a variety of community settings that may include senior citizen homes, public schools, or political campaign rallies. During election years these presentations may involve re-enactments of presidential debates and political speeches by figures from Greta Thunberg, Chief Joseph, James Baldwin, and Barack Obama to Richard Nixon, William F. Buckley, Emma Goldman, and Donald Trump. These presentations will be designed to elicit discussion and debate from community audiences and encourage those community members to vote and participate in the democratic process as advocates for the principles they believe in most strongly. Students will collaborate with their community partners in creating new performances that give voice to their experience and concerns.

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA220 Performing Indonesia
This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

THEA221 Adaptation for Performance Theater
This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of non-conventional sources (fiction, poetry, oral history, biography, memoir, newpapers, etc.). The models we will examine include Anna Deveare Smith's adaptation of interviews related to social justice ("Notes from the Field") and Lee Breuer's modern musical adaptation of Sophocles ("Gospel at Colonus"). Initially, students will work with fragments from Dante's "Inferno" and move on to adapting a text of their choice for a final script. The course will be useful for students considering performance adaptations as part of their capstone and honors projects.

This course counts towards the Theater Arts category for the THEA major.

THEA222 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

THEA223 Femme Fashion and Culture in America: 18th to 21st century
In this course, students will explore through a hands-on design approach the history of women's fashion and clothing in America and Europe. This history is long and diverse, with dress styles changing rapidly as the world and its expectations of women adapted and developed. In this course, you will study how social and economic change affected women's fashion in America--from the societal distinctions and separations of classes in the 18th century to the ready-to-wear era through the 21st century and the way it has shaped the female experience. We will analyze this through plays from each period, visual research, costume renderings, and materials research.

THEA229 Theory of Pop Music
This class endeavors to introduce students to fundamental music theory topics through analysis of popular music from the 20th and 21st centuries. We will use the work of such artists as The Beatles, Radiohead, Lauryn Hill, Beyoncé, Kendrick Lamar, Prince, etc., to teach scales and modes, basic jazz fundamentals, chord progressions, secondary functions, and song form. Besides discussion and in-class analysis, students will build their compositional "toolkit" by studying and discussing compositional techniques, learn how genre is created using theoretical principles, and will be asked to write in those genres through templated compositional exercises. Students will demonstrate theoretical analysis of pop songs in essay form and will learn to transcribe pop songs by ear, notating the chord progressions and melodies. As students progress in their theoretical knowledge, they will practice analyzing their own -- and each other's -- music.

THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage
From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation. This counts as a Theater Method course for the Theater Major.

THEA232 Instrument-Body
The ancient Greek word organon meant both instrument and sense organ, hence the development of a shared word in English for organ (as in a Hammond B3 organ) and organ (as in a kidney). This etymological overlap opens onto a set of generative questions into the nature of instruments: Are they inside or outside the body? Is the body an instrument? If the body is an instrument, who plays it? If an instrument is outside the body, what kind of object is it--a fetish? a prosthetic? an enhancement? an extension? a tool? a commodity? a technology?--and what does it do to the player? Can experimenting with new body-instrument relations become a pathway towards re-organ-izing the body and its relations? Instrument-Body is both a seminar and a studio course that takes these questions as a point of departure for creative and critical experimentation. We will read widely across the fields of musicology, art history, performance studies, queer studies, and critical race studies to investigate questions of instrumentality, embodiment, and technology. In addition, we will create performances across three units: "make an instrument," "break an instrument," and "make yourself an instrument." Students who already play instruments are encouraged to enroll, as are students that have no preexisting relationship to musical instruments.

THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

THEA235 Writing on and as Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and staging live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Toni Morrison, Lidia Yuknavitch, Oliver Baez Bendorf, Glenn Ligon, Eve Sedgwick, Fred Moten, and Billy Ray Belcourt, this course will challenge students to craft ideas and arguments by enhancing critical and creative writing skills. We will experiment with style and form from academic arguments, to performance lectures, artist interviews, and free-form creative prose essays. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. Students will also be asked to complete hybrid creative writing assignments in response to prompts that imagine writing as always in conversation with performance. More specifically, students will write pieces about embodiment, sound, and the visual. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten) and "listening in detail" (Vazquez).

This course encourages students to experiment with their writing practices. Over the course of the semester students will be asked to write four separate creative/critical pieces, all of which will be workshopped in the space of the classroom.

THEA235Z Writing On and As Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and doing live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Glenn Ligon, Claudia Rankine, Eve Sedgwick, Fred Moten, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading skills, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, artist interviews, and free-form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten), "gaps, overlaps, dissonances" (Sedgwick), and "listening in detail" (Vazquez). Online course. Special schedule: 11am - 4pm (EST) January 10-13, 16-19.

THEA236Z Writing the Body
How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Melissa Febos, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

THEA237 Performance Art
This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-

based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

THEA239 Songwriting Workshop
In this course, students will learn the basics of songwriting including form, lyric writing, chord progression, rhythm, storytelling, etc. We will focus first on "traditional" song form and its component parts (verse, chorus, bridge), and then branch out to less traditional and freer forms. We will discuss lyrics in depth and analyze lyric-writing techniques in various genres such as pop, rock, rap, musical theater, and others. As time, interest, and abilities allow, we will also delve into the world of music theory with an emphasis on function and structure. Students will be guided through practical matters such as transcription, recording, and publishing on social media platforms, so that they can apply the principles and guidelines discussed in class under real world circumstances. This course counts towards the Theater Arts category for the THEA major.

THEA243 Chinese Theater and Drama
This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific actors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

THEA245 Acting I
This studio course will explore the fundamentals of acting and how they are applicable to all areas of life, regardless of vocation. A wide range of exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. Students will examine the creative process practically and theoretically, through exercises including games, improvisation, monologues, and scene work. Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play. THEA248 Ethical Design for Stage and Fashion
Now more than ever we must look at the way we as consumers and large businesses are impacting our planet as well as the future of our planet. It has been estimated that 85 percent of our clothing ends up burned or in landfills each year and that the average American throws away about 81 pounds of clothing every year, and that's just America! In this class students will tackle a variety of hands-on projects that will explore clothing, wig, hat and accessory construction using unconventional materials. Students will explore their personal habits as a consumer of "fast fashion" and the implications fast fashion has on our economy and planet, as well as inspecting the fashion, theater and film industry participation in fashion waste. Students will also explore ways in which society can embrace sustainability and become more eco-friendly. By the end of the semester students will have a new or broader understanding of ethical and sustainable fashion and how to apply it to their everyday lives moving forward as well as a range of projects to demonstrate these learned skills. Some of the questions we will explore in this class: What does sustainable fashion mean? What is ethical fashion? Do we need ethical fashion? What are small and large ways we as individuals and large businesses can lesson our fashion waste?

THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde
This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca's writing but to the potentially transformative power of language and literature in general.

Lorca's writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca's verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at http://span254.site.wesleyan.edu/ to review in detail the materials, objectives, and modes of assessment for this course.

THEA259 Face the Blank Page
A 13-week course for the beginning playwright. Students will read 12 plays and write essays on each one, in which they will explore the creation of the play. The why of it. Who is the main character, what do they want, what's stopping them from getting it, and finally, what is the point of no return? Students will look at the time and society in which the play is placed. What obstacles were

part of their world; what did they have to overcome, and what did they have to accept? Every play will also serve as a prompt for a writing exercise that students will be responsible for. Students will take a character or situation from the play and make it their own. Also, as a group, the class will write an original play. Each student will be assigned a scene, and week by week the play will come together. This collective creation will be inspired by a song; everyone will have the same song, and each student will continue the play based on the scene that preceded it. Each student will be a part of building the structure of the play and will be able to put their own stamp on it.

THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain
Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

THEA263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance
What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's "Iliad" and Virgil's "Aeneid." This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

THEA265 Acting for the Camera: Film, Theater, and Television in the "Post"-Pandemic World
This studio course will explore the fundamentals of acting for the camera. A wide range of exercises and techniques will be used to cultivate a sense of ease and freedom and to develop the imagination, relaxation, concentration, focus and technical skills required to create life in front of the camera. The course will explore both film and television, and include auditioning and current industry film/tv practices, as well as how to navigate Zoom and other online platforms in professional readings, workshops, livestreams, and auditions. By the end of the course, students will have honed techniques enabling them to bring their full selves to the camera with confidence and a lack of self-consciousness, and be familiar with self-tapes, auditioning, and current industry practices and protocols in the film/TV/theater industry.

THEA266 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai

Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

Prereq: **None**

THEA267 Revolution Girl-Style Now: Queer Performance Strategies
Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer," we will pair theoretical readings with theatrical sites.

Prereq: **None**

THEA269 Introduction to Performance Studies
Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the "performance" as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA275 All Together Now: Theater and Theatricality
In 1967, critic Michael Fried famously declared that "theater is the death of art." Fried never clarified what kind of theater, nor did his widely influential text cite specific theater artists. Rather, his indictment was against the condition of theater in general -- its association with spectacle, commercialism, an appeal to popular culture and mass media. But above, Fried's concern was with the way in which, in the postwar period, social forces were increasingly part of modern art practices, including a growing international exchange of artists shifting the paradigm of art away from Western tenets to which Fried (and other like him) desperately clung. This course will examine the relationship between theater, performance, and the visual arts from the postwar period to the present -- paying close attention to what the notions of "theater" and "theatricality" as artists grappled with an increasingly political and global field of practice, in which the boundary between art and everyday life was continually blurred. We will consider the way visual artists embraced time-based and embodied practice, the way theater and performance artists explored objectified and material relations to the body, and the influence of art practices from across the world in which such dichotomies held little sway. We'll draw our cast studies from the canons of performance art and theater from throughout the world (including the US, France, Mexico, Argentina, Japan, India, Senegal, and more). Students will gain critical language for understanding performance in the context of the visual arts, and visual arts in the context of performance. We'll discuss contemporary case studies and meet with practicing artists to understand the way they relate to the concept of "theater" and "theatricality." And we'll develop our own critical and creative approaches to rethinking what being an interdisciplinary artist might look like in the future.

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

THEA279 Music Theater Workshop
This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts. This course counts towards the Theater Arts category for the THEA major.

THEA280 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of

reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.
Offering: **Crosslisting**

THEA281 Introduction to Directing
Intro to Directing provides an entryway into the mechanics and ethos of directing. Basic aspects of staging, script analysis, and planning the rehearsal process will be covered, as well as leading a room, working with actors, and developing the director's voice and vision. This class is also a chance to deeply consider together the role of theater in the context of our current social, political, and environmental realities. Why take this class, NOW? Why choose to direct theater, NOW? How does theater as an industry need to change, and how can theater-makers offer more care to themselves, each other, our audiences? As a director, what role do we have to play in righting wrongs, providing alternate realities, creating new futures? This course is part of the Sustainability and Environmental Justice course cluster, and we will look at these questions in part through a sustainability lens, using Adrienne Maree Brown's Emergent Strategy as our guide. D1 is taught in conjunction with The Actor's Experience. Majors and non-majors welcome. The class is not open to first years. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**

THEA284 Dressing the Imagination: From Page to Stage
What does it mean to create a character in an imaginary world? How do your favorite fictional characters go from imagination and concept to the costume you see on the screen or the stage? And how does the collaborative process impact a costume designer's vision, as well as the costume maker's execution? In this course we will answer all of these questions. Throughout the semester we will look at a variety of scenes and characters from plays and musicals. Students will then apply research and design to create half-scale costumes. Working in a collaborative design environment students will have the opportunity to explore their ideas in a safe space, gain confidence in leadership, oral communication, presentation, self-management, and costume creation.
Offering: **Host**

THEA285 Acting II: It's All Greek to Me
This studio course will explore performance and adaptation of classical text. A wide range of exercises and techniques will be used to cultivate a sense of ease and freedom, and to develop the imagination, relaxation, concentration, focus, and technical skills required for heightened language and text. We will be utilizing Greek myths and characters as archetypes. The course will also include a devising portion, whereby the students will offer up an original contemporary take on their chosen archetype/myth via any style of performance, including song, poetry, monologue, scene, and film. Independent writing and attendance at Hadestown in Hartford is also required, and the course will end on March 8, 2023.
Offering: **Host**
Grading: **OPT**

THEA285Z Scene Study: Acting Across Adaptations in Theater and Film
This course will explore how classic texts have informed and inspired contemporary writers of theater, film, and television, and how seemingly disparate parts of the canon enrich and illuminate one another. We will dive into close readings of plays, exploration of scenes from an actor's point of view, supplemental viewings and reflections/critical analyses of films and plays, and an original adaptation. We will be taking a non-traditional dive into these texts, using free-writes, and exercises including breathwork, stretching, movement and music. The class will have asynchronous work as well and requires rehearsal hours. Content might include Hamlet/Haider, Medea/Mojada, Vanya/Uncle Vanya/Vanya on 42nd Street, Hadestown, Euridyce, Original Myths, and The Taming of the Shrew/Ten Things I Hate About You/Kiss Me Kate.

Prereq: **None**

THEA286 Solo Performance
This course focuses on the expansive ways we can tell stories through our own voice and body. Over the course of the semester, students will explore and create solo performance through a generative process of creative research, prompts, and experiments. We will read and view the work of historic and contemporary solo performance artists to connect with lineage and learn about various elements they utilize including autobiographical material, found text, visuals, sound, and movement. Students will draw from personal, familial, cultural histories, and contemporary conditions, bringing their own embodied archive into the room. Each student will be supported in finding and strengthening their unique voice as performer and maker, and the class itself will function as a rehearsal room, a collective space of dramaturgy for each person's work. The course will culminate in final showings of each student's work. This course counts towards the Theater Arts category for the THEA major.

THEA291 French and Francophone Theater in Performance
This course introduces students to the richness of the French and Francophone dramatic repertories, on the one hand, and, on the other, invites them to discover acting techniques (such as movement, physicalization, memorization,

mise en scène, and so forth). Students will thus put their language skills into motion, and the course will culminate in a public performance at the end of the semester. (Special accommodations will be made for students who do not wish to perform publicly). Taught exclusively in French, the course will place particular emphasis on the improvement of students' oral skills through pronunciation and diction exercises, all the while polishing their written expression and enhancing their aural comprehension.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.25**
Gen Ed Area: **HA-RLAN**

THEA292 Spectacles of Violence in Early Modern French Tragedy
The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

THEA301 Immersive Theater: Experimental Design, Material Culture and Audience-Centered Performance
This course offers a comprehensive exploration of Third Rail Projects' approach to crafting and performing in immersive performance formats. Students will work closely alongside Co-Artistic Director Tom Pearson to explore Third Rail's toolbox of techniques, including:

- Developing presence and clarity around audience engagement

- Remaining spontaneous and responsive to the changing landscape of an active audience

- Generating game play for crafting immersive scenes

- Understanding ritual, narrative, and audience initiation through the study of a scene from one of our immersive productions

THEA302 Contemporary Theater: Theories and Aesthetics
This class will serve as an introduction to Theater & Performance Studies, interdisciplinary fields that brush against anthropology, linguistics, critical race studies, psychoanalysis, queer theory, and art history. We will approach "performance" as a practice and a lens. Students will explore close reading strategies for both textual and live performance events and examine live art, theater, everyday performances, and presentations of the self. This course will pay particular attention to the social and cultural importance of performance and performativity, especially as they come to bear upon queer, black, Latinx, and indigenous lives and dreams.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **THEA105 OR THEA150 OR THEA245 OR [THEA199 or ENGL269] OR THEA185**

THEA305 Lighting Design for the Theater
This course will introduce students to the history, basic principles, and practical application of lighting design through lecture, discussion, demonstration, and practical application. Students will develop a deeper understanding of the methodology and applications of light in storytelling, which will help them communicate with collaborators. Students will have the opportunity to develop skills in computer drafting, lighting console programming, and script analysis for design. This course counts towards the Theater Arts category for the THEA major as a design course and towards the concentration category for the IDEAS Performance Design minor.
Offering: **Host**
Grading: **OPT**

Prereq: **THEA105 OR DANC105**

THEA306 Techniques of the Liar: Performance, Artifice, Fraud
This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

THEA308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

THEA310 Shakespeare's Macbeth: From Saga to Screen
A close reading of Shakespeare's play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare's "sources," then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare's contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of MACBETH from 1948 to the present.

Gen Ed Area: **HA-ENGL**
Identical With: **ENGL305**
Prereq: **None**

THEA311 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

THEA315 Stage Management
This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time and self-management, industry standards, union practices, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work or hinder it. Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show. Potential projects include: Creation of a prompt book, and templates to use while stage managing, calling a pre-produced theatrical piece, and interviewing a professional working Stage Manager This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA316 Advanced Topics in Performance Studies
What does "theory" have to do with "performance"? Furthermore, what is the relationship between thinking and doing ("theory" and "praxis")? If performance studies shifts the frame from an emphasis on being to one of doing, then what does it mean to "do" theory? In this class we will engage works that orbit "the live." We will use performance as a lens to explore questions of liveness, presence, the body, and affect. We will look to both live/recorded performances and recent work in the field of performance studies to explore the cultural significance of performance in our current moment and location. This version of Advanced Topics in Performance Studies is particularly interested in intersectional work between performance and queer of color critique, Indigenous studies, black studies, environmental justice, and transformative justice. In class students will read new work in the field of performance studies, and should be prepared to engage with the activist potential of performance.

While we will engage performance in a number of creative and experimental ways, student projects will take the shape of semester-long critical research papers. Come with or without an idea you want to work on, and we will spend the semester workshopping that idea into a developed paper. This class is especially recommended for anyone interested in doing an honors thesis in theater.

Readings and viewings will include: José Muñoz, Ashon T Crawley, Tavia Nyong'o, Sandra Ruiz, Lou Cornum, Vick Quezada, Judit Butler, Ivan Ramos, Eve Sedgwick, Emily Johnson, The Forge Project, Walter D. Mignolo, Billy Ray Belcourt, Marquis Bey, Christina Sharpe, Morgan Bassichis, Jeremy O. Harris, Miranda Haymon, and others.

THEA322Z Sounding Stories: Developing Contemporary Radio Drama
This course will examine the almost-150-year-old form of the radio drama and ask what its future might sound like. In the 20th century, radio dramas held a place of great influence in entertainment, politics, and revolutionary action. Streaming media of the 21st century has transformed the modern listening landscape, and with it, revitalized the prominence of audio storytelling while opening access to its development. Over the summer session, we will listen to modern approaches to radio drama production, explore their themes and inspirations, and create our own new works of audio theater.

Students will be introduced to sound recording and editing, the specificities of narrative development for audio, as well as experimental applications in the medium. Students will learn to use software (Adobe Audition) and the university's foley/sound studio to craft their projects. Throughout the session, guest practitioners (WNYC, Audible, Spotify, Oral History Association) will visit the class to discuss their unique perspectives on the craft.

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA323 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.
Offering: **Crosslisting**

Prereq: **None**

THEA327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern
The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to ¿train¿ citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grapple with demanding questions -- legal, social, and ethical: the ¿laws¿ of war; discrimination (based on gender, class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional conditioning.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sara Uribe, and Luis Alfaro, and movie adaptations.

This course will fall under the Literature and Performance & and History/Social Justice tracks.

THEA329 Technical Practice A
This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester. Students will work under the tutelage of a faculty member, learning skills and techniques through a hands-on, project-based production process.

Student stage managers will have the opportunity to lead or assist the rehearsal process. Student technical directors and master carpenters will assist in bringing the production from the idea and scenic design phase into reality and construction. Student scenic charges will be responsible for the painting of sets. Student master electricians will execute the lighting design of a production. Student prop managers will acquire, build, and source properties for a production. Student assistant costume shop supervisors will assist the costume shop manager with the daily running and operations. Student lead wardrobe and lead run crew positions will supervise the wardrobe and run crews of productions. Student crew members will work on the run crew for projects, such as light board operations, scenic run crew and fly persons, wardrobe, and sound board operations. Student house managers will work with the stage

manager and ticket sales to run the front of house for productions. Student program designers will build and maintain digital programs for productions.

The students interested in enrolling in this class should apply for team positions in the production such as stage manager, technical director, master electrician, or crew.

THEA337 Insubstantial Pageants: Late Shakespeare
This seminar examines the Center for the Humanities' Spring 2020 theme of "Ephemera" through the lens of four late plays by Shakespeare ("Hamlet," "King Lear," "The Winter's Tale," "The Tempest") and their preoccupation with the time, temporality, belatedness, and the ephemerality of theater (and the world-as-stage).

In addition to considering the mutability of the play-texts themselves (several of which exist in multiple versions), we will consider how they refashion their sources, and how they are themselves refashioned in later productions and adaptations.

THEA338 French Renaissance Theater Lab
In this seminar students will explore a variety of dramatic texts written and performed during the French Renaissance (c. 1500-1610). The first two-thirds of the semester will provide an overview of the poetics, rhetoric, and performance of early French theater, followed by discussions about gender, religion, politics, violence, and other topics as they arise within each play. Authors will include Marguerite de Navarre, Jean de La Péruse, Étienne Jodelle, François d'Amboise, Louise Labé, Robert Garnier, and Catherine Des Roches. During the last third of the semester, students will participate in a collaborative digital (online) critical edition of one of the plays studied. Emerging technologies in the field of digital humanities will be integrated into this lab portion of the seminar, as well as more conventional methods of establishing critical editions. Readings, written assignments, and class discussions will be in French.

THEA341 Social Media for Theater Marketing
The use of social media in today's arts industry is ubiquitous and ever-changing. The study of this communication medium through this course will involve current

trend research, content creation, assessment of impact and application of lessons learned. Students will research relevant topics for weekly discussion and apply findings to content creation, which will be subject to critical analysis through quantitative and qualitive assessments. Through this study and field work at events and interviews, students will gain basic working knowledge of this interactive arts marketing and its effectiveness. In addition to regular class meetings (schedule to be determined), the majority of the work for this course will be through field work, including researching and attending events, interviewing faculty and students, photo/video editing, and collaborating with graphic design team members. Students will work in Canva or Adobe Design Suite.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA345 Advanced Scene Study: Modern Times and the Old School World
This studio course will explore how classic texts and traditional acting methodology can inform and illuminate our contemporary work. We will dive into this conversation via scene work and creating a piece based on a classical play. We will specifically be focused on contemporary BIPOC artists and their adaptations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA346 Shakespeare's Islands
How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripherality and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CHUM**
Identical With: **CHUM364, ENGL377**

THEA347 Plague and Care-Work in Shakespeare's England
Plague exerted an enormous influence on the plays of Shakespeare and his contemporaries, and indeed on theater as a commercial enterprise. Pandemic theater closures and quarantines were frequent throughout his career, and it is likely that his son Hamnet died of plague. This seminar examines four Shakespeare plays (Romeo and Juliet, Hamlet, King Lear, The Winter's Tale) and their preoccupations with time, temporality, belatedness, mortality and ephemerality (of theater and the world-as-stage) and with an ethics and recognition of the work of care, as these are shaped by the recurrence of plague- a perspective that will allow us to draw connections and discern differences between Shakespeare's time and our own.

THEA351 Melodrama Since 1700
Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like Mozart's Magic Flute, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator's declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg's Pierrot Lunaire. But slowly melodrama as a term began to take on connotations relating to one of comic opera's central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in Mildred Pierce). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

Prereq: **MUSC201 OR MUSC202**

THEA352 Following Fornés: Creativity, Intimacy, and Imagination
This course undertakes an investigation and application of the creative process of visionary iconoclast Maria Irene Fornés: a queer, Latinx playwright whose

wildly idiosyncratic plays defied both convention and categorization. Fornés' legendary workshops shaped a generation of playwrights, including Nilo Cruz, Caridad Svich, and Sarah Ruhl. Students will engage with Fornés' own creative process via her published plays and unpublished ephemera, including the spoken fragments, outtakes, and audio marginalia left behind from the filming of her documentary collaboration with director Michelle Memran, "The Rest I Make Up," applying what we discover to the conception and creation of individual performance works. Our work will be contextualized by assigned readings and research into Fornés as a key figure of the American theater. Syllabus includes daily journaling, weekly reading, a group research project, and ongoing work on individual creative projects. This class welcomes an interdisciplinary cohort of students. Those who are interested in writing/creating live works of performance of all kinds are best suited to this class. No experience necessary.

THEA353 Destroying the Audience: Limits of Performance and Representation in the Theater of (Non) Being
Young Jean Lee's Theatre Company, active between 2003 and 2016, is most known for a series of "racial-identity plays," written and directed by Lee, which adopt an experimental approach to the critique of racial politics, driven by the motto "destroy the audience." On the one hand, this course will explore literary and artistic works that express an ambivalent, if not antagonistic, relationship to the presence of an audience. On the other hand, this course will consider the role and function of the audience as a social category by considering how the concept of audience (broadly understood) contributes to cultural production about race and gender as a potentially active element in the creative process. Students can expect to read and/or view drama, visual art, performance, film, and self-writing (autobiography and memoir) which, explicitly or implicitly, address the presence of the audience as a way of tackling larger social and cultural problems related to race and ethnicity. The goal will be to foster an understanding of the politics of gender, sexuality, ability, language, and class that determine how these issues are conceptualized and articulated. This course will employ an interdisciplinary approach to the discussion of primary and secondary texts, engaging audience studies, performance studies, ethnic studies, and disability studies, in addition to queer/trans of color, postcolonial, and legal theory, to historically contextualize and theoretically ground a cultural understanding of the relation between audience and racial performance.

THEA354 Improvisation: Diasporic Modalities
Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/music, the environment, and our community? How do we honor the self in collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.
Offering: **Crosslisting**

THEA355 Voice & Movement for Actors: Embodying Imagery and Language into Acting Text
In this advanced acting course students will approach acting text through a physical theatre lens, engaging with voice and movement pedagogies involving abstract imaginative use of the voice and body. These techniques will be used to connect the voice and body to image and text, and to build a physical vocal practice as a tool for professional actors. Personal exploratory and imaginative work will be applied to poetry and to contemporary scene work. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **THEA245**

THEA357Z Space and Materiality: Performing Place
Scenography explores and shapes the material world in and through the performative event. In site-specific performances, it transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and direct understanding of the material potential and limitations of the four key elements involved in the scenographic project -- artistic design, the actor's body, local architecture, and time.

This course is divided into three units: (1) site-specific; (2) street performance; and (3) immersive theater. Each unit includes scholarly readings, assignments in performance and scenography, and specific showings. There will be two written responses for the course (5-to-7-page papers) on two of the works experienced at the festival that demonstrate the student's cumulative grasp of site specificity, scenography, and materiality. There will also be a final media journal showing.

THEA359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models

and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.

THEA360 Media for Performance
This course examines the use of media and technology as it relates to dramaturgy and design for performance. Class time will be used for lecture, discussion, and experimentation, during which we will explore new technologies used in the industry, including projections, motion tracking, and software such as After Effects and Isadora. Throughout the semester, students will use the skills learned to create their own digital performances.

THEA363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

THEA364 Friendship and Collaboration: In Theory, In Practice
How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, Black thought, and Indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA365 Greek Tragedy: Euripides
Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

THEA369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire's A Tempest (1969), a bold postcolonial adaptation of Shakespeare's Tempest, to Winsome Pinnock's Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater.

At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

THEA372 Site-Specific Choreography
This course addresses the construction of contemporary performance in alternative, nontheatrical spaces. Students will create, design, and structure movement and image metaphors; design and realize scenic objects; and integrate technologies that enhance performance at large. Daily practice will focus on developing compositional tools to trigger events, to set off the performance space, and to create optimal conditions for audience and performer participation. Skills in movement observation, critical reading, and video analysis will inform the course's practical and historical frameworks.

THEA373 Afro-pessimism, Gender, and Performance
This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe's colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to "inanimate" things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer's body's disappearance/remains endow the Western art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars', artists', and activists' response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibits, and film screenings.

THEA376 The Artist in the Community: Civic Engagement and Collaborative Dancemaking
Through both theoretical analysis and practical application, students will grow their understanding of community-based performance and collaborative art-making. Grounded in readings and seminar discussions about the practice and process of community-based art, students will apply their learning through community-engaged research. Through direct practice, students in the course will explore how collaborative performance can address local issues, spark community dialogue, and encourage civic participation--whether on a college campus, in a neighborhood, or across a city.

Class meetings will take place virtually during the semester. Student research and project development will be conducted in person. Note: This course includes required Spring Break travel to work on a Forklift Danceworks project. Travel expenses for the trip are paid by the University.
Offering: **Crosslisting**

THEA381 Directing II
This course, the continuation of THEA281, presents a further investigation of the elements of directing: script selection, research, production concept, orchestration of that concept, casting and coaching actors, and development of a ground plan. Elements of set, lights, costumes, props, music, etc. will be developed within a shared laboratory approach. This is an advanced directing course in studio format. Students will develop all work in a focused, workshop environment; additional research and written description of ideal design elements will accompany the studio project. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **(THEA245 AND THEA281)**

THEA383 Introduction to Costume Design for Performance
This course is an exploration of costume design concepts for contemporary performance including theater and other genres. The class will include beginning elements of costume design, including character/script analysis, research, costume lists, action charts, visual design concepts and techniques, and collage and drawing skills. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**

THEA384 Advanced Costume Design & Construction
In this course students will work in a collaborative environment exploring costume construction and costume design. Students develop designs that emerge through a process of character analysis, based on the script and directorial concept. Period research, design, and rendering skills are fostered through practical exercises. Instruction in basic costume construction, including drafting and draping, provides tools for students to produce final projects.

Prereq: **THEA105 OR THEA383 OR ARST131**

THEA385 The Working Theatermaker: Acting Beyond the University
This course is geared toward those students venturing into the earliest stages of an acting career. Emphasis will be placed on auditioning for film, television, and theater, finding opportunities in NYC, LA, and regional markets, cultivating a network, self-tapes, clarifying a mission statement, and logistics of the business (headshots, agents, casting directors, unions). The course will include talks with industry professionals, and students will leave the course with a tentative plan of action, including audition material and resources to facilitate the transition from the classroom into the professional world. If interested, please contact the instructor via email ASAP to set up individual conferences. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**

THEA385Z The Working Actor: Acting Beyond the University
This course is geared toward those students venturing into the earliest stages of an acting career. Emphasis will be placed on auditioning for film, television, and theater; finding opportunities in NYC, LA, and regional markets; cultivating a network; self-tapes; clarifying a mission statement; and logistics of the business (headshots, agents, casting directors, unions). The course will include modules that address the industry shift to online, including voice-over, radio plays, Zoom-specific plays, and auditioning via Zoom/self-tapes. Schedule: Monday through Friday; A mix of asynchronous and synchronous class time, to be determined based on student enrollment/time zones.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA386 Musical Theater Performance
This studio course will explore the fundamentals of musical theater performance: how to analyze a script and song applying concepts such as given circumstances, actions, objectives, etc., based in Michael Chekhov and Stanislavski techniques; how to use dramaturgical research and original context to illuminate and create character; and how to prime the instrument for optimal performance. A wide range of vocal and physical exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. We aim to expand the performer's potential for transformation and expression, so that they may enter into any genre, style, or period of musical theater with ease and confidence. Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play. This course will include exploring, analyzing, and performing solo songs and duets, and a module on the current state of the industry--including talks with professional artists, casting directors, and musical theater collaborators--culminating in a showcase, with potential collaborations with original work by fellow students and guest artists. Course will also require supplemental viewings, independent rehearsals, and attendance at two live performances TBD. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA390 Performance Ensemble
Since theater is an act of collaboration, this course will offer advanced acting, directing, design, and playwriting students an opportunity to practice collaborative creation in an ensemble environment. Using impactful American ensembles (Tectonic Theater, Rude Mechs, the Team, PearlDamour) as a guide, students will experiment with techniques of research, generation, storytelling, and performance. We will explore dynamic use of space, negotiate differences in communication, and create text, action, image, and object as we collaboratively develop a coherent theatrical event to be shared for an invited audience in a workshop setting.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.

NOTE: Ensemble creation is rigorous play. Come prepared to be physical, take risks, step into the unknown, and make discoveries

This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **THEA281 OR THEA199 OR THEA245**

THEA391 The Live Event: Politics and Practice of Creating Site-Specific Performance
In this course students will consider the role of site in performance-making. We start the semester with the assumption that there is no site that is not specific: every place carries with it a political, social, and historical identity, as well as an aesthetic and an architecture. At the same time, we as artists and makers are driven by our own values and interests. How do we enter into a collaboration with a site to create a live event with meaning and impact, both for ourselves and for our audiences? From architect Maya Lin, whose interactive Vietnam War Memorial rewrote the function of a monument to be about personal encounter and shared reckoning, to artist Paul Ramirez Jonas, whose "Key to the City" project gave thousands of people access to private spaces across New York, to "Haircuts by Kids," a project of the Canadian theater company Mammalian Diving Reflex, in which third-graders are trained to offer haircuts to adults, artists across disciplines are devising diverse answers to this question.

This class combines seminar-style discussion with studio-style making. Students will engage with scholarship by Miwon Kwon, Paul Smith, Tania Bruguera, Claire Bishop, and Shannon Jackson among others, in order to contextualize the making of our own sited live event works that explore how space, place, and architecture play into questions of narrative, performance, and community. Short written responses to reading will be turned in throughout the semester. The class culminates in either a final paper or final, sited project (individual or collaborative) on campus or in Middletown.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA393 Afterparty: End Times, Pleasure, and Clean Up
What do we do in end times, or "after the party" as Joshua Chambers Letson would have it? Already exhausted, with streamers and confetti scattered on the ground, what happens after the party is over? How do we pick up the pieces and move on? Can narratives of perpetual end times create new beginnings and new horizons? Beginning at the end, this course will engage conversations in science fiction, Black studies, art and performance, Indigenous studies, queer of color critique, and environmental justice to explore the work of endings and beginnings, of hope and hopelessness, of destruction and desire. We will pay particular attention to questions of futurity and pleasure as they are manifest in the aesthetic. Writers and artists to be discussed will include N.K. Jemisin, Sylvia Winter, Ursula Le Guin, Katherine McKittrick, Ohan Breiding, Franny Choi, Saeed Jones, Calvin Warren, Joshua Chambers Letson, Dana Luciano, David Wojnarowicz, adrienne maree brown, Autumn Brown, José Esteban Muñoz, Nick Estes, Dionne Brand, Samuel Delany, Tourmaline, Allison Akootchook Warden (AKU MATU), Jordan Peele, and M.E. O'Brien & Eman Abdelhadi. Students will be invited to craft both creative and theoretical responses to class assignments.

THEA395 Voice & Movement II: Character-Driven Transformation
Furthering the integrated continuum of Voice & Movement I, this advanced acting course will emphasize character building to expand into complex characterization through sounding, moving, and speaking. There will be experimentation with diverse sources to stretch the actor's organism, such as vocal and body energies, universal archetypes, rhythm work, and group composition, in tandem with acting texts to approach character-driven physical/vocal transformations. How do you maintain the actor values you have developed while stretching your own voice and movement patterns to the extent of being "unrecognizable"? How do you interpret complex text challenges presented by a playwright with physical/vocal choices? How can these choices honor what the playwright has created while at the same time "make it yours"? This course aims to expand your expressive potential to create dimensional characters in plays.

THEA427 Mainstage Production - Performance Practice
This course offers students the opportunity to participate in the fully-produced Mainstage Theater production each semester. Student performers will work under a faculty director, learning skills and techniques through a hands-on, project-based rehearsal process. Student stage managers will have the opportunity to lead or assist the rehearsal process, with faculty mentoring. Student assistant directors will hone their skills by close collaboration with the Mainstage director, providing valuable preparation for their own senior projects or future directing endeavors. Student dramaturges will embark in a variety of deep-research tasks and close-reading of the production materials and/or text(s), as guided by the instructor. Assigned work done under faculty supervision in the department production program working toward the creation of the Mainstage

Production. Students interested in enrolling in this class should audition for acting roles, or apply for stage management, dramaturge, or assistant directing positions.
Offering: **Host**

THEA428 Theater Projects - Performance Practice
This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester, such as projects approved as part of our Senior Capstone program. This usually includes both single-semester senior projects, Honors Thesis productions, and guest artist collaborations.

Student performers will work under a project director, learning skills and techniques through a hands-on, project-based process. Student stage managers will have the opportunity to lead or assist the rehearsal process, with faculty advisement. Student assistant directors will hone their skills by close collaboration with the project directors. Student dramaturges will embark in a variety of deep-research tasks and close-reading of the production materials and/or text(s), as guided by the instructor. This is a recommended course for students that are considering pursuing their own capstone projects in theater.

Students interested in enrolling in this class should audition for acting roles, or apply for stage management, dramaturge, or assistant directing positions.

THEA434 Applied Scenography: From Idea to the Stage
This course may be repeated for credit. In this course, students will develop a specific design for the stage by doing close reading and analysis of the text for their specific projects. Students will be guided through each step of these processes in a formal approach: concept development, visual research, renderings or drawings, model-making, and/or drafting. The course will have a special emphasis on the collaborative process and on the designer's role to fulfill the needs for the actual construction of their projects. Students will create and design set, media, or costumes for their projects, integrating the notions of design principles and performance elements. This course counts toward the Theater Major as Performance Practice (in Design) only.

WRITING (WRCT)

WRCT105F Literature and Memory in Contemporary Latin America: Creative Writing Workshop
For many Latin American authors, personal memory is also a collective memory. Delving into childhood, family secrets, or past trauma in their literary works reveals how writing may become a form of personal reparation and a way to participate in a general sentiment experienced in the social fabric. In this course, students will analyze contemporary Latin American authors in translation to compare different approaches to memory as a resource for imagination and social commentary. This class, designed as a seminar and a creative writing workshop, will encourage students to experiment with their writing and develop a conversation with Latin American authors about memory through direct experience with creativity and the crafting of a literary text. Authors include Reinaldo Arenas, Camila Villada Sosa, and Diamela Eltit, among others. Two US-based Latin American authors will visit the class at different times to discuss their work and their experience with writing and memory as source of inspiration. This course is a creative writing workshop.

WRCT107 American English Pronunciation and Idioms
This course is designed for anyone who would like to explore American English at a deeper level. We will look at the sounds and speech patterns of various American English dialects, practice difficult-to-pronounce words, discuss the issues of one's first language transferring into their other languages, and the oddities of idioms and colloquialism that don't translate literally. This course is recommended for those wanting to learn more about American English as well as those who are planning to teach it.

WRCT108F Real Reels: Exploring Documentary Film (FYS)
Since the early days of film, the documentary form has grown and evolved as an attempt to capture the "real" onscreen. This course offers exposure to a broad array of documentary films and poses questions on topics ranging from story modes to spectatorship, criticism to ethics, propaganda to audio design. What can an immersion in the form teach us about the meaning of truth? What can it teach us about ourselves?

WRCT109F Writing About Your First Year in the United States (FYS)
This course is designed for incoming international students who would like to reflect on their first year in the United States while exploring U.S. academic writing formats, the philosophies of liberal arts education, their own bilingual identities, and other topics related to U.S. academia. Assignments will involve keeping a journal, reading and writing a variety of essays, pre-writing activities, academic vocabulary exercises, and advanced grammar analysis. The reading will focus on essays about immigrant experiences. Authors such as Amy Tan, Maxine Hong Kingston, Alain Mabanckou, and Ariel Dorfman will be included as examples of excellent essay writing and to provide materials for discussion. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the U.S. after middle school, and students whose dominant language is not English.

WRCT110F Academic Writing in the US for International Students (FYS)
This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Reginald Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

WRCT111F Writing About Culture (FYS)
In the age of social media, pithy critiques and quick reads circulate quickly. Whether on Twitter, Facebook, Instagram, or Reddit, the Internet provides a space for everyone to share their opinions on popular culture and current events. This course asks us to slow down and rewind a bit to consider what scholars in cultural studies might teach us when it comes to writing about culture. We will ask the following: What is culture? What can culture teach us about the powerful structures and ideologies that shape our worlds? How might this understanding of culture help us fashion our selves and imagine new realities and ways of being?

To address these questions, students will read theory alongside contemporary cultural criticism both for content and for style and method of analysis. In addition to reading and discussion, students will practice writing about culture through multiple lenses, discovering and developing their own writerly values

in order to produce a publishable piece of cultural criticism to be submitted to a publication of their choice by the end of the semester.

WRCT112F The Logistics of Climate Change (FYS)
According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can't be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

WRCT114F Why You Can't Write (FYS)
Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course center the practice of writing. As such, students can expect to write, revise, and comment on classmates' writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

WRCT115 Writing Mentoring
This course may be repeated for credit. Have you ever wanted a personal writing collaborator? Someone who would meet with you privately to help you with your writing? Your writing mentor will work with you on your particular writing concerns, whether you need help generating ideas, structuring your essay, improving sentence clarity and grammar, or managing your time. As mentors and mentees meet on a weekly basis, this program is designed for students who enjoy regular collaboration. If you participate, you will enroll in a 0.25-credit tutorial and have a peer assigned to meet with you throughout the semester. We work with students of all writing abilities and in all disciplines. All services are free. Please apply here: https://forms.gle/1K1tQKf382AV57vL8. Applications are due Tuesday, February 3, 2026 at noon. For more information, contact the Ford Fellow at writingworks@wesleyan.edu. Students will be selected based on their applications and enrolled in the course after add/drop.

WRCT115F Diffusion of Innovation (FYS)
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

WRCT116F The Literature of Travel (FYS)
Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of 'travel literature,' including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT117F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

WRCT118F Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

WRCT120F Uncertainty and the Future (FYS)
The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)
How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

WRCT135 Writing about Research: U.S. Style
This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT135F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)
This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.

WRCT136F TV as Cultural Touchstone (FYS)
Why do we watch TV? What makes a good show good? What does television do for us? This writing course focuses on television as a sociocultural phenomenon. We will scan TV history, from its precursors and twentieth-century origins through the present moment. Areas of focus will include the game show, the MTV music video, the soap opera, the half-hour sitcom, the late-night show, the hour-long drama, and reality TV (Real Housewives, RuPaul's Drag Race). We'll read some accompanying cultural and anthropological writing as well as story theory and TV criticism.

WRCT140L Introduction to TESOL
This Community-Engaged Learning course will explore social issues, classroom management, and current debates related to Teaching English to Speakers of Other Languages (TESOL), as well as learning languages in general. The course introduces the "best practices" of TESOL through current research, practical assignments, and students' reflection on their experience teaching English over the course of the semester. Students will critique existing materials, create their own lesson plans and activities, and conduct teaching demonstrations for our class. Working with community partners, students will also complete 20 hours of teaching/tutoring English Language Learners. This course fulfills both the pedagogy and practicum requirements for the Education Studies major and minor.

WRCT145F Bad Ideas About Writing: Introduction to Writing Studies
Writing can be a divisive subject. Some people love writing poetry, fantasy, or romance in their free time but start biting their nails at the mention of an assigned writing project in class. Many have grown up hearing their writing is not good enough, that they need to "learn proper English," or that they "can't say that" in a school paper. Bad Ideas About Writing: An Introduction to Writing Studies provides a venue for reflection on writing education and personal literacy. We will analyze attitudes and practices around writing that stem from cultural movements and systemic discrimination. Additionally, students can expect to participate in peer review sessions to develop skills in giving and receiving feedback. This course is ideal for students interested in writing/literacy education as well as those who seek a better understanding of the process and theory of writing to benefit their own practice.

WRCT155F Writing in the Age of Generative AI (FYS)
Why does anyone need to learn how to write if we have generative AI? In this course, we will take up this commonly asked question, exploring the evolving role of generative AI, particularly large language models (LLMs), in the teaching and practice of writing in higher education. Together, we will consider why we need to learn to write and how we have been taught to write and the ways these

educational approaches have shaped what we think writing is in order to imagine what the work of writing might look like in the age of generative AI. By critically examining the intersection of AI technology and writing pedagogy, the course addresses foundational philosophical and conceptual questions such as: What is intelligence? What does it mean to learn and to educate? What constitutes authenticity and voice in writing? We will investigate these questions through the lens of various writing education theories and juxtapose them with how LLMs function, learn, and generate text. In addition to these conceptual questions, the class will also be a testing ground for the ways in which generative AI dis/engages writers with our writing processes and practices. We will experiment with different generative AI tools at various stages of the writing process. This hands-on approach will help us explore complex questions about the ethics of AI, particularly around individuality and collaboration.

Prereq: **None**

WRCT157 Translation as Worldmaking
This course introduces translation as a creative, ethical, and collaborative practice that shapes literature, culture, and the movement of ideas across languages and media. Students will explore translation as history, theory, and craft through readings by translation scholars and practicing translators, alongside examples from literary, audiovisual, and digital contexts, including machine translation and AI. Each week combines discussion with hands-on translation activities, emphasizing choice, responsibility, and perspective. The course treats translation as a way to think about power, identity, and how meaning changes across contexts. Knowledge of a second language is encouraged, but not required.

WRCT200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT201 Writing Theory and Practice
Writing is central to education in the U.S., but how does someone learn to write? In this course, students will consider this question by reading theories of composition, debating key concepts of writing such as reflection, transfer, and translanguaging, as well as discussing scholarship out of cultural studies, literacy studies, genre studies, technical and professional writing, and public writing. Together we will explore the potential of writing education, carefully considering how we, as educators, can foster just and innovative writing education. As we read about writing instruction, literacy, and assessment, students will be expected to bring scholarship in dialogue with lived experience. To do so, they will engage in a number of praxis-based assignments, including group work to develop assignments, assessment practices, and curricular recommendations. The course will culminate in a final project of each students' design, that tackles the practicalities of teaching writing.

WRCT202 Pedagogy for Teaching English to Speakers of Other Languages Tutors
This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the US every year. Students enrolled in this course will gain practical experience by committing to volunteer with an organization working with English Language Learners (options will be provided). They are encouraged, but not required, to continue their service afterward with the Wes ELL Program. There is a volunteering commitment of two hours/week, or 20 hours a semester, minimum during the semester.

WRCT203 Investigative Storytelling
This creative writing workshop is designed for students who aim to craft new narrative work through investigative or documentary research. Students might create a play, a screenplay, poetry, fiction, creative nonfiction, a digitally driven project, or something else. We will study some existing investigative artworks--dramatic pieces by Moises Kaufman, nonfiction by Leslie Jamison, poetry by Robin Coste Lewis, documentary film by the Maysles brothers, long-form journalism by Nikole Hannah-Jones, and podcasts by Brian Reed. We will cover interview techniques, research strategies, issues of rights and intellectual property use, and structure/dramaturgy as we plan, research, write, and workshop material together. Class members will regularly share work-in-progress and offer feedback to one another. By the end of the semester, students will be well acquainted with best practices for crafting investigation-based pieces and will have completed full or partial drafts of their projects, depending on project scope. Students are expected to have some workshop experience.

WRCT205 Multilingual Language Policy
This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect education, the languages spoken in a country and the policies to preserve or suppress them, bilingual businesses, immigration policies, and the US legal system. We will also discuss the recommendations of scholars for increasing multilingualism in the USA and changing the attitudes toward it, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

WRCT206 Writing in Multiple Languages
This course explores the theories and practices of writing in languages other than your native language(s). The course will cover additional language writing development theory, translanguaging (using more than one language at a time), multilingual writing identity, and ample opportunities to explore these topics while writing in multiple languages. In order to adequately participate in this class, you must be able to write in a language other than English at at least a low intermediate level. All additional languages are welcome!

WRCT207 Multilingual Learners Literacy Development
In 2021, in the state of Connecticut, approximately 14% of the K-12 population were English Language Learners (ELL) (https://portal.ct.gov/-/media/SDE/Performance/Research-Library/EL-DEMOGRAPHICS-10012020.pdf). This growing population includes students whose written languages vary considerably from English, students whose education has been interrupted due to the chaos of war and resettlement in the U.S., and students who have undiagnosed learning disabilities. This service-learning course focuses on an area of great need for this population -- English literacy. This course will offer students an opportunity to tutor ELLs for 20 hours during the semester while studying and applying the theories and best practices of ELL literacy development. In addition, this course will discuss best practices for teaching math to ELLs, lesson planning, classroom management, and other necessary skills for successful teachers in any field.

WRCT208Z Art and Practice of Literary Publishing
The Art and Practice of Literary Publishing is an introduction to the editorial and acquisitions process in academic and literary publishing. Students will gain hands-on experience with the life cycle of a book -- from submission and review to production, marketing, and distribution -- while learning how publishers shape literary and scholarly cultures. The course combines practical exercises with discussions of publishing theory and contemporary industry challenges.

WRCT209 Learning to Write
Ask any writer and they'll tell you: writing is a process. In college, however, writing is often reduced to a rapid act of drafting before an imminent deadline. The question for most college writers, then, is this: If you want to learn to write, and if writing is a process, when do you get to practice your process? In this course, students will do just that: practice, practice, practice. We will read what scholars and practitioners say about writing to frame our own thinking about our relationships to writing and our practices as writers. Most importantly, students will write regularly, revise often, and review/workshop their peers' work just as often as they process feedback from the instructor. This course is especially appropriate for students who want to develop their writing skills and bolster their agency as writers particularly in academic settings. Assignments will include weekly reflections, a variety of writing assignments including personal writing, response papers, and two formal argumentative essays, regular writing workshops (peer review), and final writing project based on each student's individual disciplinary interests.

WRCT210 Translation in Theory and Practice
This seminar is a workshop devoted to helping students from a range of disciplines and departments hone their practices of translation. Translation is part of a wide range of academic, publishing, and creative activities: humanities and social science scholars read texts in translation, translate while doing field work and archival research, and include translations in their articles and books; translation is an engine of creativity for many writers, bilingual or not. This course will begin by looking at various alternate translations of the same texts, to expand our sense of options and possibilities. The next five weeks of reading will introduce students to some of the main debates, theories, and practices of translation into English.

The second half of the course will focus on students' own translation projects. While you are welcome to pursue a project you already have in mind, most students will be choosing and starting a new project, guided by the discussions and topics in the first half of the course. The scope can be small (a single short story, a chapter of a novel or biography, a few poems or song lyrics), or you can have an eye to a bigger project you want to pursue after the end of the semester (a senior thesis, a short-story submission for publication, a book pitch). Week by week, all students will respond in class and in writing to translations-in-progress. In the last week, we will get to see and respond to everyone's revisions.

Facility in a language other than English is required; perfect fluency is not required.

WRCT210Z Contemporary Short Stories in Translation
This course will introduce students to a wide range of contemporary short stories from around the world, translated into English. We will read fiction from four geographical clusters--Nordic Europe, Latin America, East Asia, Western Europe--as well as from outside these relatively well-defined categories. Along with exploring the fiction itself, we will consider how the English-language publishing industry treats these different zones, as we acknowledge the risk of ending up with national or regional stereotypes. We will also keep in mind the translator's role as an active creator of the works we are reading. In week two, we will pay special attention to the crucial professional role of the translator in getting these authors published and recognized, and there will be in-class visits from one translator in each cluster. The objective of the course is to get a basic overview of different contemporary trends and traditions, and their various paths to publication in English, as well as hopefully finding one or two new favorite writers.

WRCT211 Calderwood Seminar in Public Writing: Legal Advocacy for Disabled Veterans
The public rarely understands what it takes to fight for one's legal rights or benefits. Good writers can translate those battles in ways that teach, empower, and (re)build community support for struggling individuals. This course is a study in the translation of legal challenges into civic advocacy.

In this course, students will write about real plaintiffs and legal cases for public audiences. As part of their journey, students will delve into the military and medical files of a disabled veteran applying for a discharge upgrade from the military. Most discharge upgrade applicants suffer from addiction and/or mental health issues, the same issues that cut short the veterans' military careers. Using academic legal writing, news sources, and confidential personnel and medical files, students will describe issues facing veterans in general, and our veteran client specifically. Students will write for a disability blog, a legal services organization (LSO) website, a middle school social studies magazine, a podcast, and a newspaper. Students' writings will inform the instructor's writing--as the veteran's pro bono legal counsel--of a discharge upgrade brief.

WRCT212 Introduction to Fiction
This course introduces students to the craft of short-story writing. In the first half of the course, we'll read and discuss stories by Joyce Carol Oates, Edward P. Jones, Kazuo Ishiguro, Akhil Sharma, and other successful writers as a means of exploring the conventions (and contentions) of the short-story form. In the second half of the course, students will use their newly filled "writer's toolbox" to plan, draft, and ultimately share their own stories with the rest of the class, while also learning to provide focused, supportive feedback for each other along the way.

WRCT213 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects
You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

WRCT214 Art Criticism
As a young critic, the art historian Hal Foster wrote: "I do not demystify the work which I discuss so much as I am demystified by it." Beyond criticism's primary object -- the artwork to be judged, rejuvenated, revealed -- what does it let slip about its own function as a social and cultural practice? This course will introduce students to art criticism while also attempting to understand the rapidly changing economic conditions that make it possible (or not). Students will be invited to write pieces of criticism on a range of media -- sculpture, photography, painting, print, video, and performance -- with assignments modeled on different genres of art writing (e.g., the exhibition review, the "critic's pick," the single artwork study, and the "hybrid" review-essay). The course will give students a chance to work closely with the Davison Art Collection and the Zilkha Gallery.

WRCT215 Fact into Fiction
Although we think of literature as the realm of the imagination, many works of fiction are inspired by facts. A Kentucky slave's attempt to murder her child rather than let it grow up in bondage; a bombing in Saigon that ushered the U.S. invasion of Vietnam; the transformation of the Congo in the years after its independence from Belgium; and the epic journey of the bank robber Ned Kelly in Australia: all these are true events that have inspired the novels we might read in this seminar. How do novelists take history and turn it into story? How do they fashion characters out of real people? And how do they create fully realized worlds none of us who are alive have seen? We will examine aspects of characterization, point of view, plot, narrative time, setting, dialogue, language, structure, themes, imagery, and subtext. We will also read some theoretical texts

to help us expand the language we use to describe and discuss novels. The goal of this seminar is to teach you to read like a writer.

WRCT216 Sports Writing: The World Cup
Soccer is a near-universal sport that separates itself from other sports because of its accessibility and inclusivity. Because of this global reach and popularity, soccer also acts as a platform for different people around the world, on an individual and national level, to play out and construct their identities. This course is an opportunity to look at the many ways that soccer is not just a game but a stage where different ideas of politics, identity, race, nationalism, gender, labor, beauty, style, and grand human narratives are formed, explored, and contradicted. This is for lovers of the sport as much as it is for those who don't see themselves as such but are interested in exploring those different areas as manifested in soccer. Through the creation of and contribution to a World Cup-specific soccer magazine for the semester, each student will be able to interrogate the game of soccer and what it reveals about the greater human society off the field.

WRCT217 Reporting for Narrative
Narrative nonfiction--a.k.a. feature writing, or literary journalism--deploys exhaustive reporting and research in a form that draws on the tools and traditions of literature: character, plot, and scene, along with essayistic inquiry and lyric attention to the line. This course, structured as a weekly writing seminar, will provide an editorial and critical scaffolding for students to produce a final work of long-form nonfiction of their own, which will go through a rigorous process of development and revision. Workshopped peer critique of writing in progress will be supplemented by discussions of readings in the craft of nonfiction, the theory of narrative, and classic and contemporary examples of the form, from magazine features to book-length dispatches.

WRCT218 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

WRCT219 Introduction to Podcasting
This course is an introduction to the fundamentals of audio reporting, applicable to broadcast or podcast: how to find and generate story ideas, how to conduct effective interviews, and, most importantly, how to use our critical faculties to produce stories in sound. We'll explore a variety of audio forms, from the "vox pop" to the feature. We'll also think about the mission, history, and aesthetics of broadcast media (with an emphasis on public radio and the podcast ecosystem it helped, in part, to spawn) and the ways it's changing in the current podcast boom-bust cycle (and its present co-optation and disruption by right-wing ideologues and generative AI). Finally, we'll explore the ways in which radio journalism connects with other genres, forms, and traditions, such as oral history, documentary, and sound art.

WRCT224 Writing the Internet
How has online culture seeped into creative writing and restructured our understanding of narrative? In this course, we will examine texts that have been stylistically and philosophically influenced by the internet and contrast them with short works (essays and stories) from pre-internet periods. The aim of this study is to discern shifts in the representation of human experience, and to discover what these shifts suggest about the more delicate facets of existence: emotion, embodiment, and cognition. This knowledge will then be put to practical use in weekly writing assignments geared towards dissecting, enhancing, and vivifying the writing process. Readings will include "Pattern Recognition," "Letters to a Young Poet," "Information Age," "IMAGE MUSIC TEXT," "No One is Talking About This," "The Gay Science" and "Something Speaks to Me." Essays include, "Three Ways of Being-With Technology," "A Global Neuromancer," and "The White Album."

WRCT225 Creative Writing in Spanish
Taught by renowned Mexican writer Cristina Rivera Garza, Distinguished Writer in Residence for 2024-25, this seminar will offer students the tools to articulate their ideas and experiences in Spanish in narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of prose in Spanish and by working throughout the semester on crafting at least one short piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the

semester students will practice extensive writing, critical reading, and peer editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.

WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)
How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

WRCT226 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT228Z The Art of the Personal Essay
We all have stories to tell. But there is hard work in the act of transforming our intimate experiences into meaningful and captivating stories. This course dives into this labor by focusing on the craft of essay writing. Quite specifically, students will practice a variety of creative nonfiction writing techniques as a means of critically reflecting and analyzing personal experiences in order to produce essays that speak to readers in and outside of our immediate communities and contexts. Course assignments will include a writer's journal, workshop letters to classmates, two micro/flash essays, a longer essay whose subject and style is decided by the writer, and a reflective collage essay. Readings will include essays published notable essayists and memoirists such as (but not limited to) Kiese Laymon, Jose Antonio Vargas, Zadie Smith, and Gloria Anzaldúa. We will also read chapters from Mary Karr's book on writing craft, The Art of Memoir.

WRCT229 Introduction to Writing Fiction
Fiction is a lie--a beautiful lie that holds inside it a human truth. In this class, we will explore this apparent contradiction and learn how to craft truthful lies. Over the course of the semester, we will read selected contemporary fiction, with a special emphasis on the craft of writing. We'll discuss characterization, point of view, plot, structure, dialogue, fictional time, and fictional space. You'll write one short story and bring it to class for your peers to critique, in a format commonly known as the "workshop." You will also revise this story, using techniques discussed in class. The aims of this course are: (a) to refine your understanding of the attributes, techniques, and styles of fiction; and (b) to help you improve your own writing through effective use of reader feedback and revision strategies. Readings may include work by Franz Kafka, Alifa Rifaat, J.M. Coetzee, Louise Erdrich, Julie Otsuka, Gabriel García Márquez, and others.

WRCT230 Writing Across Languages: Multilingual Identities, Literatures, and Translation
"To speak a language is to take on a world, a culture" -- Frantz Fanon, Black Skin White Masks, 1952 If we enter and inhabit different worlds and cultures through language, how does writing across languages form unique multilingual voices, identities, and politics? In this course, students will gain confidence and skills in writing in multiple languages or multiple dialects of Englishes. The class will read multilingual and transnational authors in various genres -- including creative fiction and nonfiction, poetry, and journalistic forms. We will practice writing through short writing prompts and translations, etc. We then discuss the experience of doing so in conversations with theories on translanguaging, translation, and multilingual identity. Along with writing, students will be able to critically examine multilingual and/or transnational experiences and the politics of translation and transnational literature, thereby shedding new light on the relationships with our language(s). Intermediate level of a language other than English or an English dialect other than American academic English is preferred for full participation in class. If you have questions about other qualifying experiences, contact the Kim-Frank Multilingual Writing Fellow, Xiran Tan, at xtan01@wesleyan.edu.

WRCT235 Calderwood Seminar in Public Writing: Radical Sustainability
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

WRCT237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change
The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantel of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

WRCT249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology
The internet has revolutionized how people consume music, and how they read and write about it. This course will offer an introduction to music journalism as a practice of public musicology, one that has become central to contemporary life. Students will analyse and apply techniques used to write about music for the wider public, learn how to develop ideas, sharpen critical skills, and complete a series of reporting assignments. We will look at the history and function of music criticism, assess different kinds of music writing, discuss changing perceptions of music as a public art form, and the role of journalism in cultural preservation. The class will write and collaboratively edit a series of reviews, and make a short radio feature in collaboration with WESU (88.1FM). The reviews will focus on recordings, live events, and books on musical cultures. Students will have the opportunity to engage with professional music writers, which will help to prepare them for later work in music journalism, or in arts or media organizations.

WRCT250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

WRCT250M Science Journalism: Why Animals Matter
This is a writing intensive course on journalistic and nonfiction writing about animals. The reading will cover the importance of animals in the study of climate change, disease and environmental degradation, and the evolution of human nature. It will also consider animals as independent beings worth attention as subjects in their own right. Writing projects will emphasize basic journalistic skills and the techniques needed to translate technical material on science and public health to make it accessible and appealing to the public.

WRCT250N Writing Reality: Journalism in an Era of Polarization and "Fake News"
How should the news media cover Donald Trump? How did the Internet, the 24-hour news cycle, and rising polarization help change the nature of journalism itself, but also lead to an era of "Fake News" accusations in which Americans exposed to different sources of information come away with completely different sets of facts? This class will explore our new digital and highly partisan media landscape, grounded in a close study of current events. We will study the impact and consequences of today's media -- both how to consume it, and how to write for it.

WRCT250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder. The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and "Fake News"--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

WRCT250Q The Journalist as Citizen
In this weekly writing seminar, we will explore how journalists exercise their roles as citizens and, in turn, how journalism affects the functioning of our democracy. Using historic and contemporary examples, we will examine how, at its best, the media exposes inequity, investigates wrongdoing, gives voice to ordinary people, and encourages active citizenship.

WRCT250R First Person Singular
This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebold, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koeppel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: https://petergodwin.com/about/

WRCT250V The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn
In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated--"the media has been democratized"--and reviled--"the media is too fractured and people are living in information bubbles." The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism. The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise. This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, working on an individual project, and in collaboration with other students.

WRCT250W Topics in Journalism: The Art and Craft of Journalistic Nonfiction
Journalistic nonfiction uses the tools of the newsroom to create long-form stories that read like novels. Students will learn the skills to ensnare readers in any medium of narrative nonfiction writing, from articles and books to screenplays and teleplays. Journalists excel in conducting interviews and marshaling facts. But few journos ever master the art of narrative storytelling. Nonfiction book writers can wield a narrative arc to tell a story. But many book writers are weak on basic reporting. We will read the work of newspaper reporters who learned to write long-form narratives, and magazine writers who learned the skills of the newsroom. By semester's end, students will know tools of both trades. We will hear from some of the writers about their work. To keep the focus on journalism, we will mostly skirt the genres of history and memoir. Students will write mostly in the third person, and primarily about events in living memory.

WRCT256 Writing for Television
This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsize, and pitch a story idea with their "producing partners" to "network executives." Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.

WRCT262 Practical Criticism
In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called "practical criticism." Each week, he distributed a single poem to his students without revealing the poem's title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards's experiment for the twenty-first century. We will follow Richards's protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students' judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanuel Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

WRCT263 What Will She Do?
In his preface to The Portrait of a Lady, Henry James recalled the challenge presented to him by the novel's main character, Isabel Archer. "By what process of logical accretion was this slight 'personality,' the mere slim shade of an intelligent but presumptuous girl, to find itself endowed with the high attributes of a Subject?" he wondered. "What will she do?" This seminar takes James's

question -- "What will she do?" -- as crucial to the novel, a genre of fiction that is particularly interested in how young women determine what to do with their lives. Reading across five novels -- Jane Austen's Emma, George Eliot's Middlemarch, Henry James's The Portrait of a Lady, Nella Larsen's Quicksand, and Toni Morrison's Beloved -- we will trace the history of the novel through its evolving representations of sex, desire, race, gender, class, and consciousness.

WRCT264 Writing the Eco-Crisis
There has never been a more urgent time in which to write about the environment. Our planet faces rapid global warming, deforestation, ocean acidification and dramatic biodiversity loss as a result of our reckless exploitation of Earth's resources. In this class (taught by Distinguished Writer in Residence, Cal Flynn), we will discuss how best to approach such topics in writing: how to marshal accurate information, form convincing arguments, inspire others to action, or evoke the beauty of the natural world and all that might -- if we do not mend our ways -- be lost. Together we will read and analyze nonfiction work by writers including Rebecca Solnit, Elizabeth Kolbert, David Wallace-Wells, Rachel Carson, E.O. Wilson, and Robin Wall-Kimmerer. Students will also be expected to write and revise an essay on or investigation into an environmental issue of their choice, as well as to offer creative critique to others' works-in-progress within a supportive class environment.

WRCT265 Creating Children's Books I
The goal of the course is to develop the skills necessary to create stories and sequential art specifically aimed at young readers. In an industry that welcomes unique voices and styles, there are underlying guidelines that inform children's literature and typically apply to most picture books. The course covers the creation, style, layout, and pacing of sequential art as well as the structure, content, and specific considerations for writing manuscripts for children.

In addition to studying the craft of effective storytelling and visual narration, we'll take a look at the business of publishing that will familiarize students with practices in the industry.

WRCT266 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

WRCT267 Reporting on Global Issues: International Journalism in Action
This course is designed to introduce students to various mediums of international reporting beyond the traditional print format, like video and podcasting. Visual and auditory formats have gained widespread prominence, making journalism more accessible to diverse audiences. After delving into sourcing, research, and reporting techniques, students will engage in discussions with accomplished innovative journalists, hosts, and reporters who possess extensive experience in covering international issues. Throughout the semester, students will gain valuable insights from these conversations and collaborate in teams to produce a podcast episode for a class series focused on migration.

WRCT270 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

WRCT272 Knowing Their Place: Two Centuries of Women Generating Wonder in the Natural World
This seminar will examine the intersection of natural science, women's history, and poetic prose through the writings of Rachel Carson and the female nature writers who both preceded and succeeded her, including Mary Treat, Anna Botsford Comstock, Mabel Osgood Wright, Annie Dillard, Terry Tempest Williams, Robin Wall Kimmerer, Camille Dungy, and others. These women looked closely at the natural world and wrote intimately on botany, birdwatching, and the ecology of their local landscapes, teaching their readers to feel wonder and a sense of connection with place. What does it mean to know a landscape or an ecosystem intimately? How does a sense of place become political? How does gender affect perspective on the natural world and environmental stewardship?

Each student will put these ideas into play in a portfolio of place-based personal essays.

WRCT277 Writing Short Fiction in Spanish
This course will be both an examination of the short story form in Latin American letters, a genre that has been crucial to the region's intellectual traditions and its ruptures, and a deep exploration of the act of writing short fiction in Spanish. By examining diverse aspects of the craft of fiction writing, and through a discussion of their own writing and that of their peers, students will search for their (multilingual) voice to explore some of their philosophical, affective and linguistic concerns, become stronger writers and storytellers and improve their skills in Spanish. They will also familiarize themselves with some of the most captivating fiction produced by Latin American and Latinx short story writers over a century.

WRCT280 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

WRCT282 Narrative Nonfiction and the Archive
Journalists, narrative historians, and biographers all work to reconstruct past events from interviews, archives, and in-person investigation before writing up their findings in an immersive and engaging form. This series of practical writing workshops with Distinguished Writer in Residence Cal Flyn will challenge its participants to produce nonfiction accounts of past events from decades ago, right into the present day -- and to grapple with the technical difficulties that come with uncertain histories, gaps in documentary evidence, and unreliable memories. We will also undertake close reading of carefully selected extracts from writers including Katherine Boo, Sadiya Hartman, Truman Capote, and Patrick Radden Keefe, and practice our research skills using Wesleyan's own archives.

Prereq: **None**

WRCT284 Literary It Girls: Joan Didion, Eve Babitz, and the Personal Essay
This reading-intensive seminar explores the personal essay as a form of public-facing literature through the iconic work of Joan Didion and Eve Babitz. Both writers turned lived experience into sharp, stylish cultural critique -- crafting essays that are as much about perception and voice as they are about events. Reading essays each week, students will closely analyze how Didion and Babitz shape persona, modulate tone, and render the personal legible within larger social and political landscapes. Topics include the aesthetics of cool detachment, intimacy as a rhetorical strategy, and the role of the "literary it girl" in shaping 20th-century literary culture. Throughout, the course asks what it means to write personally for a public audience, and how voice becomes both self-expression and social commentary. The semester culminates in a critical-creative essay on a contemporary literary figure of the student's choosing who continues this legacy.

WRCT286 How to Write about Pop Music and Why
What does it mean to write critically about a pop song or album at a time when anyone can listen to it with minimal effort? What is the value of an artist profile when artists' careers and lives are so publicly intertwined? How does a critic derive the aesthetic or moral authority to comment on music made by performers with dissimilar backgrounds, lifestyles, and values? In this class we'll look at the way the critical discourse around popular music has evolved in terms of immediacy, accessibility, scope, and purpose, paying attention to both "classical" pop journalism and ways of engaging with music that, while not quite reviews, nonetheless contribute significantly to the discourse around it. Most of all we'll listen to music together and explore different forms of interpreting and making sense of it.

WRCT288 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations: 200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of

Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

WRCT300 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT301 Promoting Early Civic Engagement: The Middle School Debate Project
Civic participation starts early. Students begin to find their place in public life in middle school. Debate can provide students with tools and a platform for expressing their ideas in public. Through debate, students learn to critically analyze texts, see multiple perspectives, and advocate for change to the status quo. This service-learning course pairs civically-engaged Wesleyan students with middle and high school teachers and students. Wesleyan students will design and test parliamentary debate training materials on our campus. Then, the class will help to implement the training materials at public schools in Middletown and Hartford. Our class will also mentor high school student apprentices who will help to run two interscholastic debate competitions. Wesleyan students will be assessed on their: 1. contributions to training materials, 2. preparation for mentoring and coaching sessions, 3. contributions to middle school debate competitions and campus trips, 4. reflection papers/presentations on effectiveness in working with public school partners, and 5. contribution to the class report: "Supporting Middle School Debate Collaborations in Connecticut."

WRCT301Z Writing 21st Century Science
Twenty-five years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the Human Genome was nearly complete, a year ahead of schedule. Biomedical scientists envisioned an era of unparalleled progress, leading in a straight line from the new DNA sequence data to human health and behavior. At the same time, new technologies were expected to produce genetically modified crops that would end global hunger. Any evolutionary impacts of climate change on animals and plants in nature were thought to be far in the future. Instead, molecular insights have uncovered unexpected factors in development and disease including epigenetics and the microbiome. Genetically modified crops have led to unforeseen threats to their wild relatives, while constructed ecosystems are providing completely new ways of farming. For natural populations, twenty-first century biologists are scrambling to understand the human-caused evolutionary changes taking place within our lifetimes. Tools are available not just to decode genes but to edit them, at once raising new possibilities and urgent ethical questions.

This course invites students to grow as writers by engaging with these new areas of scientific investigation in an intensive workshop format. Drawing on common content from recent journal articles, Q&A sessions with guest researchers, and a virtual field trip to an innovative farm, students will unpack contemporary biology by explaining the basic science in their own voices, while considering the science in larger societal contexts through connections to their own knowledge and experience. Through science journalism pieces, blogposts, Powerpoint slideshows and researcher profiles, students will learn to communicate cutting-edge scientific findings in clear, non-specialist language. The course will build strengths in communication and collaboration through individual writing and revising, active peer editing, and in-class workshopping of each piece, in a collective student-led format. In place of a final exam, students submit a final essay reflecting on their experience in the course.

WRCT304 Love and Other Useless Pursuits
What is love? Is it an emotion? A judgment? A way of coming to know ourselves or others? What is the point of love? Does it have a defined object, a purpose, or an end? Does it have a logic or does it defy logic? What good or evil can it do in the world? "Love and Other Useless Pursuits" is an upper level seminar that approaches these questions through a comparative history of literature, literary theory, and philosophical aesthetics. The authors we read will likely include Plato, Andreas Capellanus, Tullia d'Aragona, Margaret Cavendish, Immanuel Kant, Stendhal, Johann Wolfgang von Goethe, Ralph Waldo Emerson, Marcel Proust, Djuna Barnes, James Baldwin, Simone de Beauvoir, bell hooks, and Lauren Berlant.

WRCT305 The Critic and Her Publics
The critic and her public are difficult concepts to define or fix. The critic is not a creative writer, an academic, a journalist, or a reporter, yet criticism borrows from the protocols of all four professions. The critic's publics are not made up exclusively of scholars, specialists, artists, or lay readers, but span these divisions. The aim of this course is to trace the evolution of the critic, her function, her style, and her publics from the seventeenth century to the present. Readings will include essays by Jane Anger, Margaret Cavendish, Joseph Addison, Richard Steele, Eliza Haywood, John Dryden, Samuel Johnson, Matthew Arnold, Henry James, T.S. Eliot, Virginia Woolf, Walter Benjamin, José Ortega y Gasset, Jorge Luis Borges, Clement Greenberg, James Baldwin, Mary McCarthy, Roland Barthes, Susan Sontag, Elizabeth Hardwick, Edward Said, Toni Morrison, Renata Adler, Michael Warner, Anne Carson, Margo Jefferson, and Elif Batuman. The class will be linked with the Shapiro Center talk series, "The Critic and Her Publics," and the Shapiro Center Master Classes.

WRCT306 Foundations of Playwriting from the Global South
Cimientos (Spanish for "foundations") is a play development program run by NYC-based Latinx theater company IATI Theater. Since 2001, this program has showcased authors from around the world. However, in most recent years, the experience of working with playwrights from Argentina, Chile, Colombia, Mexico, Kenia, and Uganda has opened up the possibility of addressing playwriting as a deterritorialized praxis in which political, thematical, and historical discussions intertwine with shared aesthetics and new forms to understand theater in the Global South. In this workshop-seminar, students will analyze canonical texts and unpublished plays from contemporary authors based in the Global South to participate in the discussion of decolonizing playwriting. Students will analyze critical scholarship on the Global South to trace a contemporary South-South relationship within playwriting as a literary and political device. Authors from the Cimientos program will join the class as guest speakers to prompt students to develop creative writing techniques. Students will present a draft of a short play that integrates the material covered in class.

WRCT308 Ancestral Writings: (Re)Tracing AfroCaribbean and Indigenous Frameworks for Creative Writing
Coined by Puerto Rican author Mayra Santos-Febres, "ancestral writing" elicits a reconceptualization of creative writing and its techniques from the point of view of our ancestors in Latin America, more particularly, the Afro-diasporic and indigenous. In this course, students will explore theoretical, literary, and cinematic material that encourages decentralizing creativity and writing as a political praxis. Concepts such as the ch'ixi in Aymara culture and biocultural memories from Andean indigenous nations will work as points of departure to develop decolonizing, anti-imperialist, and anti-racist writing techniques. Guest speakers, who include specialists in the Quechua language and Afro-Caribbean folklore, will encourage students to (re)formulate techniques for their creative writing. Students will analyze texts by Silvia Rivera Cusicanqui, Mayra Santos-Febres, Odi Gonzales, Frantz Fanon, Guaman Poma, Elicura Chihuailaf, and Solimar Otero, among others. Students will present a creative writing piece that puts into practice the material studied in class.

WRCT309 The 21st Century Novel
This course is designed to introduce you to some great works of contemporary fiction. The reading list is not meant to be comprehensive, nor do I claim that these are the very best of all the contemporary novels in the world, but the course should provide an orienting overview of various contemporary styles and themes, as well as, ideally, give you one or two new favorite books. We will experiment with organizing our study by time rather than nation or language (Does the category of "the 2010s novel" make as much or more sense than, say, "the American novel" or "the Francophone novel"?)--the reading list includes work from eight countries, half in translation. In exploring what if anything makes the 21st Century novel different, I don't have a particular theoretical perspective in mind, but if you are interested in one you can bring it up in discussion and apply it in your final paper.

We will neither ignore nor treat as an unfortunate if indispensable crutch the fact that four of our books will be read in translation. No one can read all books in their respective original languages; translation is how we experience international literature--we always read books from language contexts outside our own with a double focus, as texts produced by a doubled authorship. This dynamic is worthy of attention and appreciation in its own right. I am a translator, including of one book on the reading list; I will bring my translation experience into our discussions, but even when none of us knows the original language, we can engage more fully with the work by remembering the translator's role in the creation of what we're reading and considering the translator's choices.

WRCT310 Literary Movements: Conceptual and Experimental Fiction
The course seeks to examine the modern novel by focusing on fiction structured around a concept ("conceptual fiction") and fiction which deviates from the traditional modes of storytelling in a coherent enough way ("experimental fiction"). Together, we will examine novels and short stories in which an idea, an image, or metaphor directly informs the structure, plot, characterization, or all of the above of the work. We will also look at works of formal invention and/or subtle experimentation as far as they are constructed around a discernible and coherent pattern. There have been countless such works in the modern/contemporary period and some of the notable practitioners include Virginia Woolf, Moshin Hamid, George Saunders, Cormac McCarthy, Carlos Fuentes, Toni Morrison, and John McGregor, amongst others have work in this "movement." We will also look at critical essays around these books including from David Lodge, James Baldwin, and Victor Schlovsky, amongst others.

We will study texts from some of these writers (Woolf, Hamid, Saunders, McCarthy) closely and try to determine what it means to create fiction around a "concept." Implicit in this inquiry would be the broader question of form, formal invention, and the vagaries of experimentation. What makes a novel unique? What new grounds does this novel or story break? Does the experimental mode help or hinder meaning? What makes a novel unique? How does structure distinguish a novel rather than plot or characterization, or, for that matter, ideas? What are the ways by which a novel can subvert the traditional form of the novel? What are the strictures of genre and how do they constrain or help expand the art of storytelling?

WRCT317 Writing and Drawing Comics
This is an intensive workshop course for students interested in making comics. We will read comic strips and books that vary widely in genre and style, and learn to identify and emulate cartooning techniques. This is a permission of instructor course. No comic experience is necessary, but students will be expected to create work each week, so some comfort with drawing/artmaking is encouraged. To apply, please email srwarren@wesleyan.edu with 2-3 samples that show both writing and drawing/artmaking (e.g., a creative essay and a selection of sketches, a painting and a poem, etc.).

WRCT330 The Craft of Criticism
This seminar will explore the craft of writing criticism for magazines and newspapers. Over the course of the semester, we will look at different genres of the form--the book review and the "briefly noted," the 4,000-word review-essay and the blurb, memorial essays and "braided" criticism--to consider the protocols of writing for different publications and publics. Students will be assigned to write four works of criticism of varying lengths and will be asked to select a different object for each assignment (e.g. novel, film, album, exhibition). A series of shorter reflections will also be assigned on questions of rhetoric, affect, and style in response to weekly readings. The course will be offered in conjunction with the Shapiro Center's "The Art of Editing" series and its master classes on editing and fact-checking taught by members of The New Yorker staff.

WRCT350 Literature in the Age of Social Media
What does it mean to write, and to read, when the predominant form of self-expression for many of us resides in social media? What does it mean to construct a digital self, separate and apart from the selves that exist IRL? To interact primarily through the mediation of screens? In what ways do we commodify ourselves, and are we commodified? What risks do we run in revealing our inner most thoughts and feelings in an age of autocratic and capitalist surveillance, in which algorithms direct the attention once guided by more organic social forces? And how do all these issues affect the core mission of literature, which is to tell stories that reflect both the public self and the private one? We'll examine all these questions through a collection of texts, ranging from novels (Megha Majumdar's A Burning, Patricia Lockwood's No One Is Talking About This, Tao Lin's Taipei), essays (Jia Tolentino's Trick Mirror, Samantha Irby's wow, no thank you), and poems (Emily Berry's "Paris," Tommy Pico's "Junk"). We'll also consider these questions through some short writing assignments that ask students to engage in the creative act through the lens of social media.

WRCT357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

WRCT413 The Fact: Master Class on Fact Checking
How do you identify a fact? How do you verify it? In this master class, the head of the fact-checking department at The New Yorker, Fergus McIntosh, introduces students to the bizarre, delightful, and contentious world of fact checking. Across three sessions, students will learn what the roles and responsibilities of a fact checker are, how to approach the practice of checking, sourcing, and editing, and where to draw the line between fake news and the truth.

WRCT414 Science Broadcasting: Master Class
How can scientists communicate their methods and insights to non-specialist audiences? "Broadcasting Science" will be taught by Joseph Palca, who worked for over three decades as NPR's science correspondent. The course will cover practical topics, such as how to record and edit audio and how to get comfortable with hearing your own voice on a recording. It will also cover editorial concepts, including how to frame a science story and how to simplify complex science. By the end of the class, students are expected to produce a 1-to-3-minute audio piece on a topic of their choosing.

WRCT415 Magazine Editing: Master Class on Editing Print Media
This master class will introduce students to the theory and the practice of editing a long-form magazine piece. Each class will focus on the structure of a different genre of magazine writing: the reported piece, the profile, and the review-essay. It will also cover important (and often controversial) topics in magazine writing, ranging from the practicalities of line editing to the idea of a "house style," the difference between writing for the web and writing for print, and navigating relationships with writers. "Magazine Editing" will be taught by Leo Carey, Senior Editor at The New Yorker. Master classes meet three times per term in the evening at the Shapiro Center.

WRCT416 The Art of Interviewing: Crafting the Flow Master Class
When people speak, they interrupt, they falter, they repeat themselves -- they stumble their way to articulacy. As editors, how can we prune back all of that excess language in order to discover what someone is really trying to say, and what they really mean? How can we create a satisfying feeling of an arc out of a conversation, while preserving its digressions? In this course, which will be taught by Michele Moses, a veteran audio editor at The New Yorker, students will learn interview and to edit audio interviews. Unlike editing for print, this requires paying attention not only to what is said but to what is conveyed through tone and delivery. We will use a style of listening that is part theater director, part psychoanalyst, and part script supervisor. This class will include a workshop component, in which we will conduct and record interviews and then edit them. We will use Descript, so no hard audio skills are required.

WRCT417 Master Class - Public Speaking
Public speaking is something that freaks out most human beings -- sweaty palms, shaky knees, the stuff of nightmares. We have all found ourselves on the other side of a public address, bored out of our minds, listening to a speaker drone on. But public speaking doesn't have to be terrifying or dull. In this masterclass, we'll tackle the challenge of speaking in public: finding a topic, building credibility, writing to engage an audience, and what to do about the nerves that come from standing in front of other people. At the end of the class, each student will deliver a three-to-five-minute talk (standing ovations only). The class will be taught by Corey Hajim, a writer, story editor, and speaking coach who spent seven years at TED, curating hundreds of talks for the mainstage.

WRCT500 Writing as a Multilingual Graduate Student
This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues

in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

PRIZES

George H. Acheson and Grass Foundation Prize in Neuroscience • Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

Alumni Prize in the History of Art • Established by Wesleyan alumni and awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

American Chemical Society Connecticut Valley Section Award • Awarded for outstanding achievement to a graduating chemistry major.

American Chemical Society Undergraduate Award in Analytical Chemistry • Awarded for excellence in analytical chemistry.

American Chemical Society Undergraduate Award in Inorganic Chemistry • Awarded to an undergraduate student in inorganic chemistry to recognize achievement and encourage further study in the field.

American Chemical Society Undergraduate Award in Organic Chemistry • Awarded to a senior who has displayed a significant aptitude for organic chemistry.

American Chemical Society Undergraduate Award in Physical Chemistry • Awarded in recognition of outstanding achievement by undergraduate students in physical chemistry, and to encourage further pursuits in the field.

American Institute of Chemists Award • Awarded for outstanding achievement to a graduating chemistry major.

American Society for Biochemistry and Molecular Biochemistry Honor Society • The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

Ayres Prize • The gift of Daniel Ayres, Class of 1842, to the first-year student who attains the highest academic standing in the first semester.

Baden-Württemberg—Connecticut Sister State Exchange • A grant for one academic year's study at a university in the German state of Baden-Württemberg, administered by the Connecticut Department of Higher Education.

Baldwin Fellowship • Established in 1952 by family and friends of Horace Reed Baldwin, Class of 1947, and awarded annually for study at law school to the member of the senior class who, in the opinion of the committee, shows the most promise of becoming an outstanding lawyer and public-spirited citizen.

Beinecke Scholarship • Awarded by the Sperry Fund for graduate study in the arts, humanities, and social sciences.

Bertman Prize • Established in memory of Bernard T. Bertman, associate professor of physics, by gifts from his colleagues, family, and friends, in 1970. Awarded to a senior majoring in physics who displays a particularly resourceful and creative approach to physics research.

Best Honors Thesis in Sociology Award • Established by the Department of Sociology to honor Herbert H. Hyman, distinguished scholar, pioneer in survey research methodology, and Professor Emeritus in the Department of Sociology. Awarded annually to students, whether sociology majors or not, who in the opinion of the faculty have written outstanding theses on a sociological topic.

Best Paper Prize in Sociology • Awarded annually to students who have written the best scholarly papers in sociology in the previous year.

Blankenagel Prize • Income from the John C. Blankenagel Fund, established in 1970, awarded at the discretion of the Department of German Studies to enrich educational offerings in the area of humanistic studies, or to assist a superior student in completing a project in German studies.

Boylan Award • Given by Jennifer Boylan in honor of her classmate, Annie Sonnenblick, the award recognizes an outstanding piece of creative nonfiction, journalistic work, or writing for general readers.

Bradley Prize • The gift of Stanley David Wilson, Class of 1909, in memory of Professor Walker Parke Bradley, to the senior or junior who excels in chemistry and particularly in special original work.

Bridge Builder Award • Awarded to a student and student group who have succeeded in strengthening the relationship between Wesleyan and the greater Middletown community.

Briggs Prize • Established in 1900 by the gift of James E. Briggs, to the student who has done the most effective work in intercollegiate debating.

Professor Samuel Hugh Brockunier Prize • Awarded for the best final essay on a social studies topic by a student in the Graduate Liberal Studies program.

Christopher Brodigan Fund Award • Established in memory of Christopher Brodigan, a Wesleyan student who died in an accident in his freshman year. The fund pays tribute to Christopher's deep interest in Africa and to the public service he provided through teaching in Botswana prior to entering Wesleyan. Awarded to graduating seniors and recent graduates who plan to pursue public service or research in Africa.

Erness Brody Prize • Established in 2002 by Ann duCille in honor of Professor Erness Bright Brody, former chair of the African American Studies Program. Awarded annually to a senior African American Studies Program major for excellence in written expression.

Bruner Freshman Improvement Prize • The gift of William Evans Bruner, Class of 1888, to the student whose second-semester first-year record shows the greatest relative improvement over that of the first semester.

Butler Prize • The Butler Prize, established in 1991 in honor of retiring colleague Jeffrey D. Butler, is awarded for the best Honors thesis in African, Asian, or Latin American history.

Butterfield Prize • Established by the Class of 1967 and awarded to the graduating senior who has exemplified those qualities of character, leadership, intellectual commitment, and concern for the Wesleyan community shown by Victor Lloyd Butterfield, eleventh president of the University.

Camp Prize • Established in 1905 by the Board of Trustees in memory of Samuel T. Camp, trustee 1880–1903. Awarded for excellence in English literature.

Nancy Campbell/National Trust for Historic Preservation Summer Internship Program • Established by friends and admirers in honor of Nancy Campbell, wife of former Wesleyan University President Colin Campbell, in recognition of her national leadership in historic preservation, and awarded to rising juniors or rising seniors.

Frank Capra Prize • Established in 1983 to honor Frank Capra, Hon. 1981, the great American film director whose collected papers are in the Wesleyan Cinema

Archives. Best film to exemplify Capra's skill in telling a human story that contains both humor and pathos.

Cardinal Crest Award • Awarded to the member of the WSA who has given honor to his/her post on the WSA or one of its committees through his/her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Chadbourne Prize • The gift of George Storrs Chadbourne, Class of 1858, to that member of the first-year class outstanding in character, conduct, and scholarship.

Citation of Citizenship in the Department of Mathematics and Computer Science • Recognizes those students studying mathematics or computer science, whose contributions both aid the educational mission of the department and foster a sense of community that encourages and supports all members of the department.

Clark Fellowship • Established in memory of John Blanchard Clark by his parents, Mr. and Mrs. Donald L. Clark of Pittsford, New York; his sister, Catherine; relatives; and friends. Awarded annually to a qualified graduating senior of Wesleyan University for graduate study in a school of medicine. Recipients are judged by members of the Health Professions Panel on their potential for outstanding achievement, their promise of community leadership and public-spirited citizenship, and their scholastic record at Wesleyan.

Clee Scholarship • Established by friends and associates of Gilbert Harrison Clee, Class of 1935, late president of the Board of Trustees. Awarded annually to a member of the junior class, who will remain a Clee Scholar throughout his or her junior and senior years, who will have demonstrated high standards of leadership, a deep commitment to Wesleyan University, an interest in the broad implications of multinational business enterprises, a sensitivity to the need for a creative balance between the public and private sectors, and an intention to pursue a career in business. A specific objective will be to select individuals who exemplify the qualities that characterized Gilbert Harrison Clee as a humane person and as a leader.

Cole Prize • Established through the gift of George Henry Walker, Class of 1881, in the memory of Charles Edward Cole. Awarded to the first-year student who shows the greatest ability in fiction or nonfiction writing.

Congress-Bundestag Youth Exchange for Young Professionals • This fellowship funded by the German Bundestag and U.S. Department of State, that annually provides 75 American and 75 German young professionals, between the ages of 18 -24, the opportunity to spend one year in each other's countries, studying, interning, and living with hosts on a cultural immersion program.

Connecticut Higher Education Community Service Award • Established in 1993 by the Connecticut Department of Higher Education to promote community service leadership and activities by students at Connecticut's institutions of higher education. This award recognizes outstanding student contributions to the promotion of community service through projects that increase student participation in their college community and projects that develop a unique approach to effective community service.

Herbert Lee Connelly Prize • Given in 1980 by Mabel Wells Connelly in the name of her husband, a member of the Class of 1909 and alumni secretary, 1924–56. Supplemented by friends, relatives, and sons Hugh Wells and Theodore Sample '48, the fund provides income to be awarded annually to a deserving undergraduate who demonstrates an interest in English literature and an unusual ability in nonfiction writing.

CRC Award for Outstanding First-Year Chemistry Students • Awarded to an outstanding first-year chemistry student, based on grades in organic chemistry over the interval of the current academic year.

Critical Language Scholarship • An intensive summer program of overseas language and cultural immersion in one of 15 languages deemed critical to U.S. national security.

Christina Crosby Award for Social Justice Feminism • Awarded each year to a FGSS major who epitomizes Christina's dedication to social justice activism and scholarship (expressed in multiple ways - through thesis or essay writing, through activism on and/or off campus etc.).

Davenport Prize • Established in 1948 by the gift of Ernest W. Davenport in honor of his brother, Frederick Morgan Davenport, Class of 1889, for excellence shown by seniors in the field of government and politics.

Dorchester Prize • Established through the gift of Daniel Dorchester IV, Class of 1874. Awarded for the best thesis submitted to the English department.

W. E. B. Du Bois Prize • Awarded annually for academic excellence to a student majoring in African American studies.

Dutcher Prize • Established by gift of Arthur A. Vanderbilt, Class of 1910, in honor of Professor George Matthew Dutcher, for highest excellence in the history department.

Kevin Echart Memorial Book Prize • Awarded to the graduating College of Letters senior who best exemplifies the intellectual curiosity and range, the pleasure in colloquy, the capacity for admiration and skepticism, and the moral seriousness and love of books that we honored in our late colleague Kevin Echart and seek to foster in the students of the College of Letters.

Exceptional Program of the Year Award • Awarded to the coordinator(s) of an exceptional program, cultural event, speaker, or production that has had positive campus-wide impact.

William Firshein Prize • Awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry Department.

First-Year Leadership Award • Awarded to a first-year student who has demonstrated outstanding leadership or involvement in the Wesleyan community.

Susan Frazer Prize • Awarded annually to the student (or students) who has done the most distinguished work in the elementary and intermediate French language sequence.

Freeman Prize • Established in 1975 by Mansfield Freeman, Class of 1916. Awarded annually to a senior for excellence in East Asian studies.

French Government Teaching Assistantship • One-year assistantship for teaching English at a *lycée* in France, administered by the Institute for International Education (New York).

Beulah Friedman Prize • This prize recognizes work of outstanding achievement by a student in the history of art. The prize is awarded to a member of the senior class.

Friends of the Wesleyan Library Undergraduate Research Prize • Established in 2017 to recognize research projects in any field (besides honors theses) in any field that demonstrate outstanding and creative use of Wesleyan's library collections and resources.

Fulbright Fellowship • These grants are funded by the United States government under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act) and by many foreign countries. The grants, administered by the Institute for International Education, provide for one year of study at a university abroad.

Fulbright-Hays Doctoral Dissertation Research Abroad Grant • Awarded by the United States Department of Education to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of six to twelve months.

Fulbright Teaching Assistantship • Placement abroad providing classroom assistance to English-language teachers who also serve as cultural ambassadors for the United States.

Gay, Lesbian, and Sexuality Studies Prize • Donated by the Wesleyan Gay and Lesbian Alumni Association (GALA), this prize is awarded annually to the undergraduate who has done the best research and writing on a subject in gay, lesbian, and sexuality studies.

German Academic Exchange Service Fellowship • At least one fellowship per year for study at a German university. The German Academic Exchange Service is a private, self-governing organization of German universities, which promotes international exchange among institutions of higher learning.

German Pedagogical Exchange Service Assistantship/Fulbright Grant • A one year teaching apprenticeship in Germany.

Giffin Prize • Established in 1912 by a gift of Mrs. Charles Mortimer Giffin, in memory of her husband, an honorary graduate of the Class of 1875. Awarded for excellence in the Department of Religion.

Akiva Goldsman Prize in Screenwriting • Awarded to the graduating film studies major who has written the best full-length screenplay in the Department of Film Studies.

Barry M. Goldwater Scholarship • Awarded by the Barry M. Goldwater Scholarship and Excellence in Education Foundation to a college student who has outstanding potential and intends to pursue a career in mathematics, the natural sciences, or engineering.

Graduate Student of the Year Award • Awarded to a graduate student who has proven to be a vital and dynamic member of the Wesleyan community through taking on an active leadership role in campus life.

Graham Prize • The gift of James Chandler Graham, Class of 1890, awarded to a member of the graduating class for excellence in natural science.

Grant/Wilcox Prize • Awarded in honor of Connecticut filmmakers Ellsworth Grant and Roy Wilcox to the senior whose work in film and video best addresses significant environmental, social, or artistic issues.

James T. Gutmann Field Studies Scholarship • Established in 2007 by Lisette Cooper ’81, to honor her former professor and mentor, James T. Gutmann. Awarded to an especially promising major in earth and environmental sciences to support geologic field research expected to lead to a senior honors thesis.

Hallowell Prize • Established by friends and associates of Burton C. Hallowell, Class of 1936, former professor of economics and executive vice president of the University. Awarded annually to an outstanding senior in the study of social science, as determined by the governing board of the Public Affairs Center.

Sarah Hannah Prize • Offered in memory of Sarah Hannah '88, in association with the Academy of American Poets, and awarded for an outstanding poem.

Hawk Prize • The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

Health Education Prize • Awarded annually to the graduating senior who best exemplifies the goals of Wesleyan’s Health Education Program, which are the promotion of healthy lifestyles and disease prevention. The student who is chosen for this prize has demonstrated commitment not only to his or her personal well-being but has also served as a role model to peers in the Wesleyan community and beyond.

Heideman Award • Established in 1972, in honor of Enid and Walter Heideman. Awarded annually to an undergraduate who has helped others in the Wesleyan community, in the tradition of the Heidemans.

Rachel Henderson Theater Prize • Awarded annually to that student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of his or her undergraduate career.

Holzberg Fellowship • Established in memory of Jules D. Holzberg, professor of psychology, by gifts of his colleagues and friends. Awarded to a senior who intends to pursue graduate study in clinical or community psychology in recognition of the commitment to research and applied work on the resolution of social problems on the individual and collective level that is consistent with Professor Holzberg’s lifelong professional interests and humanitarian concerns.

Horgan Prize • Established by the Department of English in honor of Paul Horgan, professor emeritus and writer-in-residence. Awarded to the student who has written the best short story of the year.

Ingraham Prize • The gift of Robert Seney Ingraham, Class of 1888, and his wife, for excellence in New Testament Greek or, in years when a course in that subject is not given, for excellence in a course in Greek elective for juniors and seniors.

Jessup Prize • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

Johnston Prize • The gift of David George Downey, Class of 1884, in memory of Professor John Johnston. Awarded to those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

Keasbey Memorial Scholarship • Awarded by the Keasbey Memorial Foundation on the basis of academic excellence and a strong record of extracurricular participation for two years of graduate study in England.

Barry Kiefer Prize • In memory of Barry I. Kiefer to celebrate outstanding graduating PhD students in biology and molecular biology and biochemistry.

Leavell Memorial Prize—Film • Awarded annually to a senior film student who has done outstanding work in the major, and who best reflects the departmental goals of citizenship, scholarship, and the wedding of theory and practice.

Leavell Memorial Prize—Music • Awarded annually to a senior who has done outstanding work in music, and whose work manifests the ideals of the World Music Program in the Department of Music.

Lebergott-Lovell Prize • In honor of Professors Emeritus of Economics Stanley Lebergott and Michael Lovell. To be awarded to the best paper written in the

current academic year that uses econometric techniques to analyze an economic problem. Established in 2011 by Bruce Greenwald; first awarded in 2012.

Leonard Prize • Given in 1917 in memory of William Day Leonard, Class of 1878, by his friends. Awarded annually to the member of the WSA who has given honor to his or her post on the WSA or one of its committees through his or her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Levy-Spira Prize • Awarded for distinction in Latin American studies. Established in 1992 in memory of Eduardo Levy-Spira '82, by his family and friends.

Limbach Prize • Established in 1966 by Russell T. Limbach, professor of art, in memory of his wife, Edna Limbach. Awarded annually to the student who has contributed the most imaginative, generous, thoughtful, and understanding social service to the people of the city of Middletown and/or the Wesleyan community.

Lipsky Prize • The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unfailing kindliness, quiet dignity, and brilliant scholarship.

Littell Prize • The gift of Franklin Bowers Littell, Class of 1891, for excellence in one or more advanced courses in astronomy.

Luce Scholarship • The Henry Luce Foundation selects 18 graduates to spend a year in an Asian country and provides an experience that will broaden the participant's perspective on his or her chosen career field.

Macmillan Scholar of Saint Andrew's Society of the State of New York • Awarded by the Saint Andrew's Society of the State of New York, this scholarship enables outstanding college graduates of Scottish descent to engage in a year of graduate study in Scotland.

John W. Macy Summer Internship in Public Administration • Established by friends and colleagues of John W. Macy, Class of 1938. Awarded to the junior who most clearly exemplifies, in the decision of the selection committee, the characteristics associated with John Macy: high intellectual ability, a capacity for sustained effort in difficult tasks, strong ethical standards, an ingrained sense of duty, and a commitment to public service as a worthy career.

Mann Prize • Established in memory of Albert Mann, Class of 1906, devoted alumnus and faculty member, by his daughters and their families. Awarded annually to the senior(s) showing the most outstanding achievements in the Romance languages.

George C. Marshall Scholarship • Awarded annually for two years of study at any university in the United Kingdom, on the basis of distinction of intellect and character as evidenced by both scholastic attainments and other activities and achievements; strong motivation and seriousness of purpose; and the potential to make a significant contribution to one's own society.

Martius Yellow Award • Awarded for excellence in organic synthesis.

Roger Maynard Award • A memorial award to that senior scholar-athlete who best exemplifies the spirit, accomplishments, and humility of Roger Maynard, Class of 1937, former trustee.

James L. McConaughy Writing Prize • Awarded for a piece of nonfiction writing, on a topic in the social sciences or sciences, that is designed to interest general readers. Funds for this award were given originally by members of the Class of 1936 in honor of their classmate, James L. McConaughy, a former governor of Connecticut and president of Wesleyan University.

Richard McLellan Prize • Awarded annually to a junior who exemplifies those qualities that characterize the late Richard McLellan, director of the Career Planning Center and associate dean of the college: character, leadership, commitment to public service and diversity, wide cultural interests, and a sense of humor.

Priscilla Meyer Fund • Established in honor of Professor Priscilla Meyer's teaching career at Wesleyan. Awarded to Wesleyan students who are the most dedicated to the study of topics related to Russia, Eastern Europe, or Eurasia.

Meyer Prize • Established in 1991 in honor of retiring colleague Donald A. Meyer, and awarded for the best honors thesis in American History.

Joan W. Miller Prize • Established by Professor Miller in 2008. It is awarded for the outstanding honors thesis in the College of Social Studies.

Richard A. Miller Summer Internship Grant • Awarded in honor of Woodhouse/Sysco Professor of Economics Richard A. Miller to students pursuing summer internships related to potential business careers.

George J. Mitchell Scholarship • Awarded annually for one year of graduate study in any discipline offered by an institution of higher learning in Ireland or Northern Ireland on the basis of superior records of academic excellence, leadership, and public service.

Monroe Prize • Established in 1985 by the Center for African American Studies in memory of John G. Monroe, director, scholar, and teacher in the Center for African American Studies and in the Theater Department. This prize is to be awarded annually to the Wesleyan sophomore or junior who, in the opinion of the review committee, submits the best scholarly essay in the field of African American studies.

David Morgan Prize • To be awarded annually to the senior major or majors in the College of Social Studies (CSS) and/or the history department who best demonstrated the integrity and commitment to community that characterized David's 37 years of service to the CSS, his department, and to the University.

Peter Morgenstern-Clarren Social Justice Award • Awarded to a sophomore or junior with a demonstrated commitment to social justice issues.

Mosaic Award • This award recognizes the contribution(s) of a person or organization that has brought about cultural awareness and education on one or more of the following issues: race, ethnicity, culture, and/or sexual orientation.

Geraldine J. Murphy Prize • Established in memory of Geraldine J. Murphy, who was the first woman hired as a full-time instructor at Wesleyan (1957), the first woman promoted to a tenured position, and the first woman promoted to the rank of full professor. The prize is endowed by alumni of the Wesleyan Master of Arts in Teaching program. Awarded to a student who has written an outstanding critical essay that focuses on short fiction or novels.

Needler Prize • Established by Sophie Needler, in memory of her husband, Bennett Needler. Awarded annually to one or two graduating seniors who have demonstrated excellence in Hebrew or Jewish studies.

NNK Award • Awarded for the best screenplay for an undergraduate film.

Carol B. Ohmann Memorial Prize • Awarded for excellence in feminist, gender, and sexuality studies.

Olin Fellowship • Founded in 1854 by the wife of Stephen Olin, president, 1839–41 and 1842–51. Later increased by gifts of their son, Stephen Henry Olin, Class of 1866 and acting president, 1922–23, and his wife, Emeline. Awarded in recognition of achievement in English. The fellowship supports supervised work in English outside of the Wesleyan course structure.

Outreach and Community Service Award • Awarded to the senior theater major who, through his or her work in the Theater Department, has done a significant service in the community.

Outstanding Collaboration Award • Awarded for a program that was successfully planned in the spirit of partnership and teamwork.

Parker Prize • Established in 1870 by the Reverend John Parker, trustee 1859–71. Awarded to a sophomore or junior who excels in public speaking.

Peirce Prize • Awarded in successive years for excellence in biology, chemistry, and geology.

Emily White Pendleton Scholarship • Established in 1979 by Ralph Darling Pendleton, founder of the Theater Department, in memory of his wife. Awarded annually to a dance major or to a student who is significantly involved in dance and who shows outstanding promise in the field.

Peterson Fellowship • Established in 1963 by bequest of William Harold Peterson, Class of 1907, for graduate study in biochemistry at Wesleyan.

Plukas Prize • Established in 1986 by John Plukas, Class of 1966, this prize is awarded to graduating economics seniors to be applied toward summer expenses, during which period each student will work under the supervision of a faculty advisor to convert an honors project into a publishable article.

Plukas Teaching Apprentice Award • Established in 1986 by John Plukas, Class of 1966, this prize is awarded for excellent service to the economics department as a teaching apprentice.

Gwen Livingston Pokora Prize • Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

Prentice Prize • The gift of Mrs. Elizabeth Brooks Prentice in memory of Professor George Prentice to that junior or senior who excels in German. This prize is given in alternate years.

The Wallace C. Pringle Prize for Research in Chemistry • Gift of Eleanor and Wallace Pringle and their family and friends. This prize is to be awarded annually by the chemistry department to a student for excellence in research.

Sophie and Anne Reed Prize • Established in 1968 by Leon Reed and his sons, S. Chadwick '41 and Dr. Victor Reed, in memory of Mrs. Sophie Reed, for the best poem or group of poems.

Damain Garth Reeves Memorial Book Prize • Awarded to the first-year student who best embodies the personal and intellectual qualities of Damain Reeves, Class of 2000.

Rhodes Scholarship • Two years of study at Oxford University, awarded on the basis of high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership, and physical vigor.

Rice Prize • Awarded for excellence in mathematics to a senior.

Michael Rice Prize in Computer Science • Endowed in 2008 by the Fernando and Appapillai families in honor of Dr. Michael D. Rice and awarded to a senior for excellence in computer science.

Rich Prize • The gift of Isaac Rich, trustee 1849–72, in memory of his wife, and later supplemented by appropriations from the Board of Trustees. Awarded to those seniors whose orations are judged best in composition and delivery.

Robertson Prize • Awarded to a sophomore for excellence in mathematics.

Robins Memorial Prize • Established in 1969, in memory of George D. Robins (Class of 1898), by Frank D. Robins '34 and Douglas H. Robins '66, for excellence in history.

Steven J. Ross Prize • Established in 1979 as a gift of Steven J. Ross of Warner Communications. Awarded annually for the best undergraduate film, digital and/or virtual, made in the Film Studies Department.

Juan Roura-Parella Prize • Established in 1984 to be awarded annually to an undergraduate whose work represents the kind of catholic curiosity and general learning that Professor Juan Roura-Parella exemplified.

Rulewater Prize • Awarded for outstanding reflection and writing on an interdisciplinary topic in the Graduate Liberal Studies program.

Robert Schumann Distinguished Student Award • Established in 2007 by a gift from the Robert Schumann Foundation. Awarded to an outstanding student who demonstrates academic accomplishment and excellence in environmental stewardship through work at Wesleyan or the greater Middletown community.

Scott Biomedical Prize • Awarded to a member(s) of the molecular biology and biochemistry senior class who has demonstrated excellence and interest in commencing a career in academic or applied medicine.

Scott Prize • Established by Charles Scott Jr., MA, Class of 1886, and trustee 1905–22, in memory of John Bell Scott, Class of 1881, for excellence in modern languages.

Mary and John Sease Prize • Awarded for outstanding work in environmental science.

Sehlinger Prize • Established by the Class of 1965 in memory of Charles Edward Sehlinger III, who died in 1964. The award of a medical dictionary is given to a premedical student for excellence of character, community spirit, and academic achievement.

Senior Legacy Award • Awarded to a senior who has consistently demonstrated outstanding leadership throughout his or her four years in the Wesleyan community.

Frances M. Sheng Prize • Awarded for excellence in Chinese language and excellence in Japanese language.

Sherman Prize—Classical Studies • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Sherman Prize—Math • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Rae Shortt Prize • Established in memory of Rae M. Shortt. Awarded to a junior for excellence in mathematics.

Samuel C. Silipo Prize • Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

Silverman Prize • Established by gift of Elisha Adelbert Silverman, Class of 1922, and awarded to a member of the junior or senior class for excellence in chemistry.

Skirm Prize • Established by members of the Class of 1931 in memory of their classmate, Thomas H. Skirm, this prize is awarded to a government major early in his or her senior year, to recognize the best research or writing project done during the junior year.

Social Activist Award • Awarded to the individual or student group who best exemplifies the spirit of social activism and through whose efforts constructive social change ensued.

Annie Sonnenblick Writing Award • Established by the family of the late Annie Sonnenblick, Class of 1980, in 1992 as a complement to the annual Annie Sonnenblick Lecture. The prize provides financial support for a student who wishes to undertake an independent writing project during the summer between his or her junior and senior years.

Spinney Prize • The gift of Joseph S. Spinney, trustee 1875–82 and 1888–93, for excellence in Greek. Awarded for the best original essay on some aspect of Greek or Roman civilization.

Spurrier Award • The William A. Spurrier Ethics Award, established by Dr. James Case, given to the student who demonstrates in the field of ethics: sensitivity, insight, depth, and humor. Given in memory of William Spurrier III, chaplain and Hedding Professor of Moral Science and Religion.

Student Organization of the Year • Awarded to a student organization that has excelled in sustaining leadership, an active membership, and programmatic efforts that contribute to the larger Wesleyan community.

Studio Art Program Prize • Awarded to one or more students who show particular promise for success as demonstrated through performance in classes and general contributions to the department.

Taylor Scholarship • Awarded to a history major based on outstanding academic achievement and other qualities such as fine character, good fellowship, leadership, and service to the Wesleyan community.

Thorndike Prize • Established by a gift of Elizabeth Moulton Thorndike in memory of her husband, Edward Lee Thorndike, Class of 1895, for excellence in psychology.

Tishler Teaching Award • Established by the family and friends of Dr. Max Tishler, professor emeritus of chemistry and University Professor of the Sciences, emeritus. Awarded annually in his memory to the best graduate teaching assistant in chemistry.

Elizabeth Verveer Tishler Prize—Art • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

Elizabeth Verveer Tishler Prize—Music • Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance. Two prizes are given annually: one for Western classical piano performance and the other for jazz piano performance.

David A. Titus Memorial Prize • Established by family, friends, and students in memory of Professor David Titus to support the summer studies of a deserving Wesleyan junior majoring in government, East Asian studies, or the College of Social Studies.

Tölölyan Fund for the Study of Diasporas and Transnationalism • Established in 2008 by Bruce Greenwald, professor of economics at Columbia Business School, in honor of Wesleyan Professor Khachig Tölölyan. The award funds the summer research of a junior with the best proposal for a thesis on the study of diasporic or transnational issues.

Trench Prize • The gift of Miss Grace A. Smith, in memory of William James Trench, trustee 1835–67, for excellence in the Department of Religion.

Truman Scholarship • A national competition funded by the United States government that provides scholarships for graduate study to juniors who have outstanding leadership potential and intend to pursue careers in public service.

Kenneth W. Underwood Prize in Social Ethics • Awarded to the College of Social Studies (CSS) student selected to discuss a paper on the subject of social ethics delivered by a guest scholar at one of the two annual CSS banquets.

United States Teaching Assistantship in Austria • One-year assistantship for teaching English in Austria, funded by the Austrian government.

Karl Van Dyke Prize • Awarded each year to one or more students majoring in physical science or having a predominant interest in physical science and technology and who show outstanding achievement in academic work and a promise of productivity in a professional career.

Vanguard Prize • Established by black alumni in tribute to the black members of the Class of 1969, whose perseverance and pioneering leadership earned them designation as the Vanguard Class. The prize is awarded annually to a graduating senior who has achieved academic excellence and contributed significantly to maintaining Wesleyan's racial diversity.

Walkley Prize • Two prizes, the gift of Webster Rogers Walkley, Class of 1860, in memory of David Hart Walkley, Class of 1878, for excellence in psychology. Awarded to those juniors and seniors who present the best reports or work embodying original research.

Watson Fellowship • Awarded by the Thomas J. Watson Foundation, to enable college graduates of unusual promise to engage in an initial postgraduate year of independent study and travel abroad.

Weidenfeld Scholarship • The Weidenfeld Scholarship supports all tuition fees and living costs associated with graduate study at Oxford University. It fosters European networks and promotes the post-university careers of its scholars through work placements, long-term mentoring, and engagement in leadership and conferences.

Weller Prize • The gift of Mrs. LeRoy Weller, in memory of her husband, LeRoy Weller, Class of 1899, to the student having the highest academic average for the sophomore year.

Wesleyan Animal Studies Prize • Awarded for the best thesis or senior essay on a subject in animal studies.

Wesleyan Black Alumni Council Memorial Prize • Established in 1986 by the Wesleyan Black Alumni Council in memory of deceased black alumni. The prize provides a summer stipend to support a deserving student engaged in independent study or community service related to the concerns of black people.

Wesleyan Fiction Award • A gift from Norman Mailer to the Wesleyan Writing Program, this award recognizes an outstanding piece of fiction written by a Wesleyan student.

Wesleyan Global Fellowship • Funded and administered by the Fries Center for Global Studies, this pilot one-year program supports several weeks of independent exploration in one or two countries outside the U.S. The prizes go to graduating seniors whose passion, imagination, and independence led to their being selected as university-wide nominees for the Watson Fellowship.

Wesleyan Memorial Prize • The gift of undergraduates in the Class of 1943 in memory of fellow students who made the supreme sacrifice in the Second World War, to the members of the junior class outstanding in qualities of character, leadership, and scholarship.

White Fellowship—Government • Awarded for excellence in government to a graduate or an advanced undergraduate in government.

White Fellowship—History • Awarded for excellence in history.

White Prize • Established in 1942 by Horace Glenn White Jr., Class of 1933, and increased in 1943 by friends in his memory. Awarded for advanced undergraduate study in economics.

M. G. White Prize • The Marni Goldstein White Award recognizes the best Honors Thesis written in American Studies each year.

Wilde Prize • Established in 1963 by Frazer B. Wilde, LLD, Class of 1958, awarded to a junior or senior for excellence in economics.

Winchester ENGL 201 Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best essay written in a section of ENGL 201 in the preceding calendar year.

Winchester Fellowship • Established in 1938, in memory of Professor Caleb Thomas Winchester, by his widow. Awarded to Wesleyan graduates for postgraduate work in English.

Winchester First-Year Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best scholarly essay written by a first-year student in any English department course in the preceding calendar year.

Wise Prize • The gift of Daniel Wise, DD, Class of 1859, for excellence in the philosophy department; for the best essay on moral science or on some subject in the field or values.

Adjunct Professor of Physical Education; Head Coach of Wrestling/Strength and Fitness Coach

Amy B. Bloom
BA, Wesleyan University; MSW, Smith College
Shapiro-Silverberg Professor of Creative Writing, Emerita

Reinhold Blumel
PHD, Technical University Munich
Co-Coordinator, Informatics and Modeling; Professor of Physics; Charlotte Augusta Ayres Professor of Physics

Elizabeth Bobrick
BA, Marlboro College; MA, Johns Hopkins University; PHD, Johns Hopkins University
Visiting Professor of Letters; Visiting Professor in Liberal Studies; Visiting Scholar in Classical Studies

Rosalie Bochansky
BA, Bryn Mawr College; MFA, Yale University; MFA, Yale University
Assistant Professor of the Practice in Theater; Assistant Professor of the Practice, Design and Engineering Studies

David Bodznick
BS, University of Illinois Urbana; PHD, University of Washington; MAA, Wesleyan University
Professor of Biology, Emeritus

Amir Bogen
BA, College of Management Academic; MA, Tel Aviv University
Visiting Instructor in Liberal Studies

Abigail Huston Boggs
BA, Wesleyan University; PHD, University Calif Davis
Assistant Professor of Sociology; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, Education Studies

Nathaniel Walker Boling
BA, Appalachian State University; MA, New York University; MA, Cornell University; PhD, Cornell University
Teaching Associate

Philip H. Bolton
BS, Michigan State University; PHD, University of California, San Diego; MAA, Wesleyan University
Professor of Chemistry, Emeritus

John Bonin
BA, Boston College; MA, University of Rochester; PHD, University of Rochester
Chester D. Hubbard Professor of Economics and Social Science, Emeritus

Jeanne M. Bonner
BA, Wesleyan University; MFA, Bennington College
Visiting Assistant Professor in Liberal Studies

Iris Bork-Goldfield
MA, Ludwig Maximilians University; PHD, Ludwig Maximilians University
University Professor of German Studies, Emerita

Karl David Boulware
BBA, Baruch College; MA, Duke University; PHD, University Of Alabama
Associate Professor of Economics

Richard W. Boyd
BA, University of Texas Austin; PHD, Indiana University Bloomington; MAA, Wesleyan University
Professor of Government, Emeritus

Eugene Bozzi
Percussion/Drum Instructor; Private Lessons Teacher

Alexander Brakel
Visiting Scholar in History

Juli Brandano
BA, Barnard College; MFA, University of Illinois at Urbana-Champaign; MFA, University of Illinois at Urbana-Champaign
Visiting Professor of Dance

Anthony Braxton
John Spencer Camp Professor of Music, Emeritus

Katie Brewer Ball
BA, Occidental College; MA, New York University; PHD, New York University
Faculty Coordinator of Sustainability Environmental Justice Initiatives; Chair, Theater; Associate Professor of Theater; Associate Professor, Feminist, Gender, and Sexuality Studies; Faculty Coordinator of Sustainability and Environmental Justice Initiatives

Emmy Brockman
BA, Oberlin College; MA, Mills College
Visiting Professor of Education Studies

Nathan Brody

BA, University Of New Hampshire; MA, University of Michigan; PHD, University of Michigan; MAA, Wesleyan University
Professor of Psychology, Emeritus

A. Taeko Brooks
BA, University of Hawaii; MA, University of Hawaii
Visiting Scholar in East Asian Studies

E. Bruce Brooks
BM, Oberlin Conservatory; PHD, University of Washington
Visiting Scholar in East Asian Studies

mayfield brooks
BA, Trinity College; MFA, University of California-Davis; MFA, University of California-Davis; MA, Northwestern University
Visiting Professor of Dance

Judith Brown
BA, University of California, Berkeley; MA, University of California, Berkeley; PHD, Johns Hopkins University
Professor of History, Emerita

Nancy Brown
Classical Trumpet Instructor; Private Lessons Teacher

Scott Brown
BM, University of Georgia; MM, Florida State University
Saxophone Instructor

Khalilah Brown-Dean
BA, University of Virginia; MA, Ohio State University; PHD, Ohio State University
Executive Director of the Allbritton Center for the Study of Public Life; Rob Rosenthal Distinguished Professor of Civic Engagement

Veronica Brownstone
BA, McGill University; MA, University of Pennsylvania; PhD, University of Pennsylvania
Assistant Professor of Spanish; Assistant Professor, Latin American Studies

Neely Bruce
BMU, University of Alabama; MMU, University of Illinois Urbana; DMU, University of Illinois Urbana; MAA, Wesleyan University
Professor of Music; John Spencer Camp Professor of Music

Dina Brun
BA, Brandeis University; MA, Yale University
Visiting Instructor of Writing

Katherine Brunson
BA, Harvard University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Chair, Archaeology; Associate Professor of Archaeology; Associate Professor, Environmental Studies; Associate Professor, East Asian Studies

Raquel Bryant
BA, Brown University; PHD, University of Massachusetts at Amherst
Assistant Professor of Earth and Environmental Sciences; Assistant Professor, Environmental Studies

Carycruz Bueno
BA, Mount Holyoke College; PHD, Georgia St University
Assistant Professor of Economics

Laureano Andrés Bulus Rossini
PhD, Universidad Nacional de la Plata
Visiting Scholar in Physics

Ann Campbell Burke
AB, New York University; MA, Harvard University; PHD, Harvard University
Professor of Biology, Emerita

Torie Burmeister
BA, Skidmore College; PhD, Boston University
Visiting Professor of Classical Studies

Stephen Busemeyer
BA, University of Hartford
Koeppel Journalism Fellow

Alisha Butler
BA, Yale University; MA, University of Maryland College Park; PHD, University of Maryland, College Park
Assistant Professor of Education Studies

Andrew Lee Butters
BA, Brown University; MS, Columbia University in the City of New York
Koeppel Visiting Writer

C

Joe Cacaci
BA, Manhattan College; MA, Emerson College
Artist-in-Residence, Film Studies

Michael A. Calter
BS, University of Vermont; PHD, Harvard University
Professor of Chemistry; Beach Professor of Chemistry; Professor, Integrative Sciences

Ron Cameron
BA, Western Kentucky Uni; PHD, Harvard University; MAA, Wesleyan University
Professor of Religion

Peggy Carey Best
AB, Earlham College; PHD, Union Institute Grad School
Visiting Professor of Science and Technology Studies

Claudia Carle
BA, Hobart William Smith Colleges; M.Arch., Yale University
Visiting Professor of Art

Raymond Edward Carlson
BA, Yale University; MPhil, University of Cambridge; MA, Columbia University in the City of New York; PhD, Columbia University in the City of New York
Visiting Professor of Art History

Philip Carney
BA, Trinity College
Adjunct Professor of Physical Education; Head Coach of Men's Crew

Sarah Kristin Carney
BA, Connecticut College; MA, Wesleyan University; PHD, CUNY The Graduate Center
Associate Professor of the Practice in Psychology

John F. Carr
BA, St. Michaels College; MFA, The Catholic University of America; MAA, Wesleyan University

Professor of Theater, Emeritus

Christine Celeste Caruso
BA, Fordham University; MA, Columbia University; MPH, Boston University; PHD, CUNY The Graduate Center
Other; Assistant Professor of the Practice in the Bailey College of the Environment; Assistant Professor of the Practice in the College of the Environment

Robert Cassidy
BA, Fitchburg State University; MA, Boston University; MA, Tufts University; PHD, Tufts University; MA, U.S. Naval War College; MA, French War College
Assistant Professor of the Practice in the Allbritton Center for the Study of Public Life; Assistant Professor of the Practice, Government; Tutor, College of Social Studies; Mentor to the Veteran Scholars

César Jeanpierre Castillo-García
BA, Universidad del Paciacute;fico Peruacute;; MA, Universidad del Paciacute;fico Peruacute;; MA, The New School; PhD, The New School
Visiting Professor in the College of Social Studies

Benjamin Chaffee
Visiting Professor of Art; Associate Director Curator of Visual Art

Sonali Chakravarti
BA, Swarthmore College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Professor of Government; Tutor, College of Social Studies

Wai Kiu Chan
BS, University of Hong Kong; MPHIL, University of Hong Kong; PHD, The Ohio State University
Chair, Mathematics and Computer Science; Professor of Mathematics

Elizabeth Chang-Davidson
BS, Massachusetts Institute of Technology; MS, Carnegie Mellon University; PHD, Carnegie Mellon University
Assistant Professor of Engineering and Applied Science; Assistant Professor of Design and Engineering

Douglas K. Charles
BA, University of Chicago; MA, Northwestern University; PHD, Northwestern University
Professor of Anthropology, Emeritus

Eric Charry
BMU, New England Conservatory of Mu; MMU, New England Conservatory of Mu; MFA, Princeton University; PHD, Princeton University
Chair, Music; Professor of Music

Michelle Chen
BA, Dartmouth College; PHD, Northwestern University
Assistant Professor of Chemistry

Barry Chernoff
BS, SUNY at Stony Brook; MS, Adelphi University; PHD, University of Michigan
Director, Bailey College of the Environment; Professor of Earth and Environmental Sciences; Professor of Biology; Robert Schumann Professor of Environmental Studies; Professor, Environmental Studies

Frankie Chik
PhD, Arizona State University
Visiting Professor of East Asian Studies

Joan Cho
BA, University of Rochester; MA, Harvard University; PHD, Harvard University
Associate Professor of East Asian Studies; Associate Professor, Government

Devin Prakash Choudhury
BA, Columbia University in the City of New York; PhD, University of California-Berkeley
Mellon Postdoctoral Fellow; Mellon Postdoctoral Fellow in the Center for Humanities

Alcee Chriss
BM, Oberlin College; MM, Oberlin College
University Organist; Assistant Professor of Music

Mary Ann Clawson
BA, Carleton College; MA, SUNY at Stony Brook; PHD, SUNY at Stony Brook
Professor of Sociology, Emerita

Frederick M. Cohan
BS, Stanford University; PHD, Harvard University
Huffington Foundation Professor in the Bailey College of the Environment; Professor of Biology; Professor, Environmental Studies; Professor, Integrative Sciences

Lisa Cohen
BA, Brown University; MPHIL, Yale University; PHD, Yale University
Associate Professor of English, Retired

Karen L. Collins
BA, Smith College; PHD, Massachusetts Institute of Technology
Associate Director, College of Design and Engineering Studies; Professor of Mathematics; Edward Burr Van Vleck Professor of Mathematics; Professor, Integrative Sciences; Professor, Design and Engineering Studies

Stephen Edward Collins
BA, Wesleyan University; MFA, University of Texas Austin
Professor of Film Studies

Demetrius James Colvin
Adjunct Instructor, CPE; Adjunct Instructor, Education Studies; Director, Resource Center; Adjunct Instructor, Liberal Studies

Robert T. Conn
BA, Dartmouth College; PHD, Princeton University
Chair, Latin American Studies; Professor of Spanish; Professor, Latin American Studies

John Anthony Connor
MA, Manchester University; MAA, Wesleyan University
Professor of English, Emeritus

David Constantine
BS, Eastern Nazarene College; PHD, University of Michigan
Associate Professor of Mathematics

Isabella Grace Convertino
BA, Wesleyan University; MFA, Yale University; MFA, Yale University
Visiting Professor of Art

Joseph David Coolon
BS, Kansas State University; PHD, Kansas State University
Director, College of Integrative Sciences; Associate Professor of Biology; Associate Professor, Integrative Sciences; Director of the College of Integrative Sciences

Asa Cort
BS, Johnson & Wales University; MBA, Southern Connecticut State University

Visiting Professor of Economics

Carla Coste Sanchez
BS, University Of Puerto Rico; PHD, University of North Carolina at Chapel Hill
Assistant Professor of the Practice in Chemistry

Ethan M. Coven
BA, University of Rochester; MA, Yale University; PHD, Yale University; MAA, Wesleyan University
Professor of Mathematics, Emeritus

Maya Cozier
BFA, School of Visual Arts; MFA, Columbia University in the City of New York; MFA, Columbia University in the City of New York
Visiting Professor of Art

Barbara H. Craig
BA, The University of Maine; MPA, University of Connecticut; PHD, University of Connecticut; MAA, Wesleyan University
Professor of Government, Emerita

Tom Crean
MA, Wesleyan University
Guitar Instructor; Private Lessons Teacher

Martha Crenshaw
BA, Newcomb College Tulane U; MA, University of Virginia; PHD, University of Virginia; MAA, Wesleyan University
Colin and Nancy Campbell Professor in Global Issues and Demo

Anthony Ravindra Cummings
MPHIL, University of Cambridge; PHD, Syracuse University
Professor of Earth and Environmental Sciences; Professor, Bailey College of the Environment; Philip 71 and Lynn Rauch Endowed Professor of Climate Change, Sustainability, and Environmental Management

Ana Laura Camargo Cunha
Visiting Scholar in History

Christine Marie Curley
BA, Rhode Island College; MA, Rhode Island College; PhD, University of Connecticut
Visiting Professor of Psychology

Andrew S. Curran
BA, Hamilton College; MA, New York University; PHD, New York University
William Armstrong Professor of the Humanities; Professor of French

Jennifer Curran
Director, Continuing Studies

Walter Jr. Curry
BA, Iowa State University
Adjunct Professor of Physical Education; Head Coach of Track Field (Men's Women's)

Jonathan Cutler
BA, Tufts University; MA, Union Theological Seminary; PHD, CUNY The Graduate Center
Chair, Sociology; Associate Professor of Sociology

D

Jennifer D'Andrea
Visiting Professor in Liberal Studies; Director of Counseling and Psychological Services

Nathan Dame
BA, Weber State University
Visiting Artist-in-Residence in Theater

Logan Dancey
BA, University Puget Sound; PHD, Univ. of Minnesota Twin Cities
Associate Professor of Government

John Wesley Dankwa
BA, University of Cape Coast; MA, University of Cape Coast; PHD, Wesleyan University
Assistant Professor of Music

Norman Danner
BA, University of California, Berkeley; PHD, Indiana University Bloomington
Professor of Computer Science

Akshat Das
MS, University of Delhi; PhD, University of Houston
Visiting Professor of Mathematics

Saida Daukeyeva
BMU, Moscow State Tchaikovsky Conservatory; PHD, Moscow State Tchaikovsky Conservatory; PHD, School of Oriental and African Studies, University of London
Assistant Professor of Music; Assistant Professor, Russian, East European, and Eurasian Studies; Assistant Professor, Medieval Studies

Michael Lawrence Davino
BS, University of Connecticut; MS, University of Connecticut; PhD, University of Connecticut
Visiting Professor of Physics

Anthony P. Davis
BS, U.S. Coast Guard Academy; MS, Ohio State University; PHD, Wesleyan University
Professor of the Practice; Professor of the Practice in Chemistry; Professor of the Practice, Integrative Sciences

Richard Holt Davis
PHD, University of Chicago
Visiting Assistant Professor, CPE; Visiting Professor, CPE

Nuwan De Silva
PhD, Iowa State University
Nuwan De Silva; Visiting Professor of Chemistry

Lucy De Souza
PhD, University of British Columbia
Assistant Professor of Psychology

Anita Deeg-Carlin
Visiting Instructor of Global Studies; Director for Intercultural Learning

Liana DeMarco
BA, Saint Michaels College; MA, University of Massachusetts-Boston; MA, Yale University; PhD, Yale University
Mellon Postdoctoral Fellow in African American Studies

Stephen Henri Devoto
BA, Haverford College; PHD, Rockefeller University
Professor of Biology, Emeritus

Jason Di Resta

Art History Visual Arts Librarian, Art History; Art History Visual Arts Librarian

Carolina Diaz
BA, Universidad Catolica de Chile; MA, Rutgers University; PHD, Rutgers University
Assistant Professor of Spanish; Assistant Professor, Latin American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Daniel A DiCenzo
BA, Williams College
Adjunct Professor of Physical Education; Head Coach of Football

Lisa C. Dierker
BA, Ohio State University; MA, University of Connecticut; PHD, University of Connecticut
Professor of Psychology; Walter Crowell University Professor of Social Sciences; Professor, Education Studies

Lindsay R Dolan
BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Government

Lisa A. Dombrowski
BA, Wesleyan University; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Professor of East Asian Studies; Professor, Film Studies

Patrick Dowdey
BA, University of Pennsylvania; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Visiting Scholar in East Asian Studies; Visiting Scholar of East Asian Studies

Royette Dubar
MS, Brock University; PHD, Brock University
Associate Professor of Psychology; Faculty Ambassador

Ann duCille
BA, Bridgewater State College; MA, Brown University; MA, Brown University; PHD, Brown University
Professor of English, Emerita

Zora Duncan
BA, University of Illinois at Urbana-Champaign; MA, University of California-Riverside; PhD, University of California-Riverside
Visiting Professor of Feminist, Gender, and Sexuality Studies

Alex Dupuy
BA, University of Connecticut; MA, Brandeis University; PHD, SUNY at Binghamton; MAA, Wesleyan University
John E. Andrus Professor of Sociology, Emeritus

Cem Duruoz
Guitar Instructor; Private Lessons Teacher

Natalie Dykstra
Visiting Professor in Liberal Studies

E

Ronald Ebrecht
BM, Southern Methodist University; MM, Yale University
University Organist, Emeritus

Sierra Eckert
BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of English

Craig Edwards
Traditional Fiddle Styles Instructor; Private Lessons Teacher

Gabriel Eggers
BA, Princeton University; PHD, Georgia Tech
Visiting Professor of Earth Environmental Sciences

Marc A. Eisner
BA, University of Wisconsin at Madison; MA, Marquette University; PHD, University of Wisconsin at Madison; MBA, University of Connecticut
Professor of Government; Henry Merritt Wriston Chair in Public Policy; Professor, Environmental Studies

Douglas Elkins
MFA, Hollins College; BFA, SUNY Purchase
Associate Professor of the Practice in Dance

Benjamin Ross Elling
BA, Cornell University; PHD, Stanford University
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences

Perry Elliot
Violin Instructor; Private Lessons Teacher

Fred M. Ellis
BS, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst; MAA, Wesleyan University
Professor of Physics, Emeritus

Ren Ellis Neyra
BA, Freed Hardeman College; PHD, SUNY at Stony Brook
Co-Coordinator, Caribbean Studies; Coordinator, Social, Cultural, and Critical Theory; Associate Professor of English; Associate Professor, African American Studies

Richard Elphick
BA, University of Toronto; MA, University of California, Los Angeles; PHD, Yale University
Professor of History, Emeritus

Merve Gul Emre
BA, Harvard University; PHD, Yale University; MA, Yale University
Director, Shapiro Writing Center; Shapiro-Silverberg University Professor of Creative Writing and Criticism

Forest Entsminger
BA, Trinity University; MFA, Yale University; MFA, Yale University
Visiting Professor of Theater

Paul Erickson
BA, Harvard University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Chair, College of Science and Technology Studies; Associate Professor of History; Associate Professor, Science and Technology Studies; Associate Professor, Environmental Studies

Kaisha Esty
BA, University of Nottingham; MA, University of Nottingham; PHD, Rutgers University

Assistant Professor of African American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, History

Demetrius L. Eudell
BA, Dartmouth College; PHD, Stanford University
Professor of History, Emeritus

F

Clarissa F. Cavarsan Muller
BS, Universidade Federal de Satilde;o Paulo (Unifesp); PhD, Universidade Federal de Satilde;o Paulo (Unifesp)
Visiting Professor of Neuroscience and Behavior

Chloé Samala Faux
BA, Columbia University in the City of New York; MA, Columbia University in the City of New York; MPhil, Columbia University in the City of New York; PhD, Columbia University in the City of New York
Provost's Postdoctoral Fellow of Anthropology; Provost¿s Postdoctoral Fellow of Anthropology

Brian C. Fay
BA, Loyola Marymount University; MA, Oxford University; DPHIL, Oxford University; MAA, Wesleyan University
William Griffin Professor of Philosophy, Emeritus

Hafiz FazaleHaq
MA, University Of New Mexico; PHD, University Of New Mexico
Assistant Professor of the Practice in South Asian Language; Assistant Professor of the Practice, Global South Asian Studies; Assistant Professor of the Practice in South Asian Language and Culture

Zach Felder
BA, Hobart William Smith Colleges; M.Arch., Yale University
Visiting Professor of Art

Ni Ye Feng
BS, University of California, Los Angeles; PHD, Cornell University
Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior

Lucas Jonatan Fernández-Alcázar
Visiting Scholar in Physics; Visiting Scholar of Physics

Adam Fieldsteel
BA, Brown University; PHD, University of California, Berkeley; MAA, Wesleyan University
Professor of Mathematics, Emeritus

Zachary Fine
BA, New York University; PhD, University of Oxford
Postdoctoral Fellow in Criticism

John E. Finn
BA, Nasson College; JD, Georgetown University; PHD, Princeton University
Professor of Government, Emeritus

Oriana Fisher
MS, Brandeis University; BS, Brandeis University; PHD, Yale University
Assistant Professor of Molecular Biology and Biochemistry

Sue C. Fisher
BA, California State Univ - Northr; MA, University of California, San Diego; PHD, University of California, San Diego; MAA, Wesleyan University
Professor of Sociology, Emerita

Joseph J. Fitzpatrick
BA, Harvard University; PHD, Duke University
Chair, College of Letters; Associate Professor of the Practice in Letters; Associate Professor of the Practice, Russian, East European, and Eurasian Studies

Octavio Flores-Cuadra
BA, Universidad Americas; MA, Universidad Americas; PHD, University of Pittsburgh
Adjunct Professor of Spanish

Cal Flyn
BA, University of Oxford; MA, University of Oxford
Distinguished Writer-in-Residence

Douglas Foyle
AB, Stanford University; MA, Duke University; PHD, Duke University
Chair, Government; Associate Professor of Government

Erika Franklin Fowler
BA, St Olaf College; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Director, Wesleyan Media Project; Professor of Government

Harris Friedberg
BA, Harvard University; PHD, Yale University
Associate Professor of English

Michael Jay Frisch
PHD, Carnegie Mellon University
Tishler Professor of Chemistry

Richard John Friswell
Co-Director, Wasch Center Seminars; Visiting Scholar

Courtney Fullilove
BA, Columbia University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Professor of History; Professor, Environmental Studies; Professor, Design and Engineering Studies; Professor, Science and Technology Studies

Susanne Grace Fusso
BA, Lawrence University; MA, Yale University; PHD, Yale University
Chair, Russian, East European, and Eurasian Studies; Professor of Russian, East European, and Eurasian Studies; Marcus L. Taft Professor of Modern Languages

G

Leslie Gabel-Brett
BA, Wesleyan University; PHD, City College
Distinguished Visiting Professor of Public Policy

Juan Norberto Galan
BA, Wesleyan University
Visiting Instructor of Art

Priscilla Gale
Voice Instructor; Private Lessons Teacher

Giulio Gallarotti
BA, Hunter College; PHD, Columbia University
Professor of Government; Professor, Environmental Studies

Elaine Gan
BA, Wellesley College; MFA, University of California, Santa Cruz; PHD, University of California, Santa Cruz
Assistant Professor of Science and Technology Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Peter B. Ganbarg
BA, Wesleyan University
Visiting Professor of Music

Daniella Gandolfo
BA, Pontificia Universidad Catolica del Peru; MA, University of Texas Austin; PHD, Columbia University
Co-Coordinator, Urban Studies; Professor of Anthropology; Professor, Latin American Studies

Matthew Carl Garrett
BA, Bard College; MPHIL, Cambridge University; MA, Stanford University; PHD, Stanford University
Associate Professor of English; Associate Professor, American Studies

Noel R Garrett
Visiting Assistant Professor in Liberal Studies; Visiting Professor in Liberal Studies

Courtney Gaston
BA, Centenary College La; MFA, University of Iowa
Assistant Professor of Theater; Assistant Professor, Design and Engineering Studies

Giacomo Gates
Jazz Vocal Instructor; Private Lessons Teacher

Jayson Peter Gill
BA, Metropolitan State University; MA, University of Connecticut; PhD, University of Connecticut
Visiting Professor of Archaeology

C. Stewart Gillmor
BS, Stanford University; MA, Princeton University; PHD, Princeton University; MAA, Wesleyan University
Professor of History and Science, Emeritus

Martha S. Gilmore
BA, Franklin & Marshall College; PHD, Brown University; MSC, Brown University
Dean of the Natural Sciences and Mathematics; Director, Graduate Studies; Co-Coordinator, Planetary Science; Joshua Boger University Professor of the Sciences and Mathematics; Professor of Earth and Environmental Sciences

Megan H. Glick
BA, Northwestern University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Chair, American Studies; Coordinator, Disability Studies; Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science and Technology Studies; Faculty Ambassador

Jeffrey Goetz
Staff Instructor; Associate Director, Continuing Studies

Gravity Goldberg
MEd, Boston College; EdD, Columbia University in the City of New York; BA, Boston College
Visiting Professor of Education Studies

Greg Goldberg
BA, New York University; PHD, CUNY The Graduate Center
Associate Professor of Sociology

James Joseph Golden
Visiting Assistant Professor in Liberal Studies

Wei Gong
BA, Beijing Language and Culture U; MA, The University of Hong Kong
Associate Professor of the Practice in East Asian Studies

Bernardo Antonio Gonzalez
BA, University of California, Berkeley; MA, University of California, Berkeley; PHD, University of California, Berkeley; MAA, Wesleyan University
Professor of Spanish, Emeritus

Natalia Gonzalez-Pech
PHD, Rice University
Assistant Professor of Chemistry

Maryam Gooyabadi
PhD, University of California-Irvine
Assistant Professor of the Practice in Quantitative Analysis

Martin Gosman
BBA, University of Wisconsin at Madison; MBA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Visiting Scholar in Economics

Peter S. Gottschalk
BA, College of the Holy Cross; MA, University of Wisconsin at Madison; PHD, University of Chicago
Academic Secretary; Professor of Religion; Professor, Science and Technology Studies; Professor, Education Studies; Professor, History; Professor, Global South Asian Studies

Laura B. Grabel
BA, Brandeis University; PHD, University of California, San Diego; MAA, Wesleyan University
Lauren B. Dachs Professor of Science and Society, Emerita

Claire Grace
BA, Brown University; MA, Middlebury College; PHD, Harvard University
Associate Professor of Art History; Associate Professor, American Studies

Roger Mathew Grant
BM, Ithaca College; PHD, University of Pennsylvania
Dean of the Arts and Humanities; Deputy Provost; Professor of Music

Vera Grant
CER, University of Freiburg
Adjunct Professor of German Studies, Emerita

Laura Grappo
BA, Wesleyan University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Salim Green
BA, Wesleyan University; MFA, University of California-Los Angeles; MFA, University of California-Los Angeles
Luther Gregg Sullivan Fellow in Art; Sullivan Fellow in Art

Nathanael Greene
BA, Brown University; MA, Harvard University; PHD, Harvard University; MAA, Wesleyan University

Professor of History

James Greenwood
BS, SUNY at Binghamton; MS, Brown University; PHD, Brown University
Chair, Earth and Environmental Sciences; Associate Professor of Earth and Environmental Sciences

Amy Grillo
AB, Brown University; EDM, Harvard University; EDD, Harvard University
Associate Professor of the Practice in the Allbritton Center for the Study of Public Life; Associate Professor of the Practice, Environmental Studies

Erik Grimmer-Solem
BA, Brigham Young University; MSC, London School of Economics and Political Science; MPHIL, Cambridge University; DPHIL, Oxford University
Ezra and Cecile Zilkha Professor in the College of Social Studies; Professor of History; Tutor, College of Social Studies; Professor, German Studies

Richard S. Grossman
AB, Harvard University; MSC, London School of Economics and Political Science; MA, Harvard University; PHD, Harvard University
Professor of Economics; Andrews Professor of Economics

Lori Gruen
BA, University of Colorado Boulder; PHD, University of Colorado Boulder
William Griffin Professor of Philosophy, Retired

Matthew Guberman-Pfeffer
PHD, University of Connecticut
Visiting Scholar in Chemistry

James T. Gutmann
BA, Amherst College; PHD, Stanford University; MAA, Wesleyan University
Professor of Earth and Environmental Sciences, Emeritus

H

Benjamin Haber
BA, New College of Florida; MPHIL, CUNY The Graduate Center; PHD, CUNY The Graduate Center
Assistant Professor of Sociology

Mary Alice Haddad
BA, Amherst College; MA, University of Washington; PHD, University of Washington
Professor of Government; John E. Andrus Professor of Government; Professor, East Asian Studies; Professor, Environmental Studies

Nina Hagel
BA, Johns Hopkins University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Assistant Professor of Government; Assistant Professor, Feminist, Gender, and Sexuality Studies; Tutor, College of Social Studies

Anthony Hager
BS, Pennsylvania State University; PHD, Pennsylvania State University
Professor of Mathematics, Emeritus

Gebremedhin Gebremeskel Haile
PHD, Chinese Academy of Scienc
Frank B. Weeks Visiting Professor of Earth and Environmental Sciences; Visiting Professor of Earth Environmental Sciences

Corey B. Hajim
BA, University of Vermont; MBA, Harvard University
Visiting Professor of Creative Writing and Criticism

Hrissi Haldezos
Adjunct Instructor in Modern Greek; Adjunct Instructor in Greek; Senior Associate Director of Student Accounts and Loan Services

Carolyn F. Halsted
Piano Instructor; Temporary Dance Accompanist; Private Lessons Teacher

Geoffrey Hammerson
Visiting Assistant Professor of Liberal Studies; Visiting Scholar in the College of the Environment

Blake Meyer Hansen
MM, University of Hartford
Conductor, Wesleyan Concert Choir; Visiting Instructor of Music

Kolby Hanson
BA, Stanford University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Government; Assistant Professor, Global South Asian Studies

I. Harjito
MA, Akademi Seni Karavitan
University Professor of Music

Ilana Yacine Harris-Babou
BA, Yale University; MFA, Columbia University
Assistant Professor of Art

Miyuki Hatano-Cohen
BA, Tohoku Gakuin University
Assistant Professor of the Practice in East Asian Studies

Anthony Ryan Hatch
AB, Dartmouth College; MA, University of Maryland College Park; PHD, University of Maryland College Park
Director, Center for the Humanities; Professor of Science and Technology Studies; Professor, African American Studies; Professor, Sociology; Professor, Environmental Studies

Rachel Heng
BA, Columbia University; MFA, University of Texas Austin
Assistant Professor of English

Elizabeth (Beth) Hepford
BA, University Of Kansas; MA, Arizona State University; PHD, Temple University
Associate Professor of the Practice in TESOL; Associate Professor of the Practice, English; Associate Professor of the Practice, Education Studies

William Herbst
BA, Princeton University; MSC, University of Toronto; PHD, University of Toronto; MAA, Wesleyan University
John Monroe Van Vleck Professor of Astronomy, Emeritus

Gordana Herning
BS, University of Colorado at Boulder; MS, University of Colorado at Boulder; PhD, Princeton University
Visiting Professor of Design Engineering Studies

April Hickman
AA, Casper College; MFA, Yale University
Assistant Professor of Theater

Scott Higgins
BA, Oakland University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Director, College of Film and the Moving Image; Chair, Film Studies; Curator of the Wesleyan Cinema Archives; Professor of Film Studies; Charles W. Fries Professor of Film Studies

Cameron Hill
BA, Yale University; PHD, University of California, Berkeley
Associate Professor of Mathematics; Associate Professor, Integrative Sciences

Patricia R. Hill
BA, College of Wooster; PHD, Harvard University
Professor of American Studies, Emerita

Manju Hingorani
BS, University of Bombay; PHD, Ohio State University
Distinguished Research Professor in Molecular Biology Bioc; Distinguished Research Professor in Molecular Biology Biochemistry

Christiaan Hogendorn
BA, Swarthmore College; PHD, University of Pennsylvania
Professor of Economics

Jay Clinton Hoggard
BA, Wesleyan University; MA, Wesleyan University
Professor of Music; Professor, African American Studies

Oliver W. Holmes
BA, City College; MA, University of Chicago; PHD, University of Chicago; MAA, Wesleyan University
Professor of History, Emeritus

Scott G. Holmes
BS, College of William and Mary; PHD, University of Virginia
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Abigail S. Hornstein
AB, Bryn Mawr College; MPHIL, New York University; PHD, New York University
Chair, Economics; Professor of Economics; Woodhouse/Sysco Professor of Economics

Steven W. Horst
BA, Boston University; PHD, University of Notre Dame
Coordinator, Christianity Studies; Professor of Philosophy; Professor, Science and Technology Studies

Mark A. Hovey
BS, Ohio State University; PHD, Massachusetts Institute of Technology
Associate Provost for Budget and Personnel; Professor of Mathematics; Professor, Integrative Sciences

Robert Hoyle
French Horn Instructor; Private Lessons Teacher

Cameron Stephen Hu
BA, University of Pennsylvania; MA, University of Chicago; PhD, University of Chicago
Mellon Postdoctoral Fellow; Mellon Postdoctoral Fellow, Center for the Humanities

Yu-ting Huang
BA, National Taiwan University; MA, National Taiwan University; PHD, University of California, Los Angeles
Assistant Professor of East Asian Studies

Elijah Huge
BA, Yale University; MAR, Yale University
Director, College of Design and Engineering Studies; Professor of Art; Professor, Environmental Studies; Professor, Design and Engineering Studies

Meredith Hughes
BS, Yale University; PHD, Harvard University
Chair, Astronomy Department; Associate Professor of Astronomy; Associate Professor, Integrative Sciences

Lutz Hüwel
PHD, University of Gottingen
Professor of Physics, Retired

I

Masami Imai
BA, U. of Wisconsin Eau Claire; PHD, University Calif Davis
Professor of Economics; John E. Andrus Professor of Economics; Professor, East Asian Studies

Anthony A. Infante
BA, Temple University; PHD, University of Pennsylvania; MAA, Wesleyan University
Professor of Molecular Biology and Biochemistry, Emeritus

Tushar Irani
BA, Colgate University; PHD, Northwestern University
Faculty Director, Mellon Mays Undergraduate Fellowship; Professor of Philosophy; Professor of Letters; Professor, Education Studies; Professor, National Education Equity Lab; Professor, CPE

Ryuichiro Izumi
BA, Keio University; PHD, Rutgers University
Assistant Professor of Economics

J

Elizabeth Jackson
BA, Rutgers University; MA, University of Texas Austin; PHD, University of Texas Austin
Visiting Professor of Portuguese

Joyce Jacobsen
BA, Harvard University; MSC, London School of Economics and Political Science; PHD, Stanford University
Andrews Professor of Economics, Emerita

Anuja Jain
BA, University of Delhi; MA, University of Delhi; PHD, New York University
Assistant Professor of Film Studies; Assistant Professor, Global South Asian Studies

Hadel Jarada
BA, University of California, Berkeley; PHD, Harvard University
Assistant Professor of Letters; Assistant Professor, Medieval Studies; Assistant Professor, History

Ronald S. Jenkins
BA, Haverford College; EDD, Harvard University
Professor of Theater

Carlos Alberto Jimenez Hoyos
MA, Rice University; PHD, Rice University
Assistant Professor of Chemistry

Seoyeon Jo
MA, University of Kansas; PhD, University of Kansas
Visiting Professor of Economics

Khalil Anthony Johnson
BA, University of Georgia Athens; MPHIL, Yale University; PHD, Yale University
Chair, African American Studies; Associate Professor of African American Studies; Associate Professor, Education Studies

Ruth Johnson
BS, University of Witwatersrand; PHD, Cambridge University
Associate Professor of Biology; Associate Professor, Integrative Sciences; Science Facilities Liaison

William D. Johnston
BA, Elmira College; MA, Harvard University; PHD, Harvard University
John E. Andrus Professor of History, Emeritus

Darius Aston Jones
BM, Virginia Commonwealth Universi; MA, New York University
Assistant Professor of Music

Barbara Jean Juhasz
BA, Binghamton University; MA, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Coordinator, Civic Engagement; Chair, Psychology; Professor of Psychology; Jeffrey L. Shames Professor of Civic Engagement; Professor, Neuroscience and Behavior; Professor, Integrative Sciences; Professor, Education Studies

K

Robert Ira Kabacoff
BA, University of Connecticut; PHD, University of Missouri, St. Louis
Professor of the Practice in Quantitative Analysis, Emeritus

Sharisse Leigh Kanet
BA, Wesleyan University; MA, CUNY Queens College; PHD, CUNY The Graduate Center
Visiting Assistant Professor in Liberal Studies; Visiting Professor in Liberal Studies

Emmanuel Kaparakis
Director, Hazel Quantitative Analysis Center; Adjunct Assistant Professor of Quantitative Analysis; Director of Centers for Advanced Computing

Natasha Karageorgos
MA, Tomsk State University; PHD, CUNY The Graduate Center
Coordinator, Russian Language Program; Assistant Professor of the Practice in Russian, East European, and Eurasian Studies

Indira Karamcheti
BA, University Calif Santa Bar; MA, University Calif Santa Bar; PHD, University Calif Santa Bar
Associate Professor of Global South Asian Studies; Associate Professor, Education Studies

Hasan Karatas
BA, Bogazici University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Visiting Professor, CPE

Samson Allal Kartaoui-Jardine
Visiting Assistant Professor in Liberal Studies

Dalit Katz
BA, Hebrew University; MA, Hebrew University
Director, Center for Jewish Studies; University Professor of Jewish Studies; Jeremy Zwelling Professor of Jewish Studies; University Professor, Religion; University Professor, Fries Center for Global Studies

Marilyn A. Katz
BS, Columbia University; MA, Yale University; PHD, Yale University; MAA, Wesleyan University
Professor of Classical Studies, Emerita

Kerwin Kaye
BA, University of Colorado Boulder; MA, University San Francisco; PHD, New York University
Associate Professor of Feminist, Gender, and Sexuality Studies; Tutor, College of Social Studies; Associate Professor, American Studies

Michael S. Keane
BA, University of Texas Austin; MS, University of Gottingen; PHD, University of Erlangen-Nurnber
Professor of Mathematics, Emeritus

Anthony Bruno Keats
BA, Macalester College; MA, Tufts University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Associate Professor of Economics

Alex Keegan
BA, Brown University; MFA, Yale University
Visiting Professor of Theater

Camille Keeler
Research Affiliate in Chemistry; Manager of Scientific Facilities and Instrumentation

R. Lincoln Keiser
BA, Lawrence University; MA, Northwestern University; PHD, University of Rochester; MAA, Wesleyan University
Professor of Anthropology, Emeritus

Christine Kemp
BA, Skidmore College; MA, Bridgewater State College
Adjunct Associate Professor of Physical Education; Head Coach of Field Hockey

David N. Kendall
Visiting Professor in Liberal Studies

Shona Kerr
BMU, Cardiff University
Adjunct Professor of Physical Education; Head Coach of Squash (Men's Women's)

Ajna F. Kertesz
BA, Skidmore College; MA, The University of Texas at Austin; PhD, The University of Texas at Austin
Visiting Professor of Psychology

Scott M. Kessel
BA, Wesleyan University; MALS, Wesleyan University
Visiting Professor of Art; Drum Instructor

Melanie Khamis

BS, London School of Economics and Political Science; MS, University of Warwick; PHD, London School of Economics and Political Science
Professor of Economics; Professor, Latin American Studies

Yu Nong Khew
MAR, Southern California Institute of Architecture
Assistant Professor of Art; Assistant Professor, Design and Engineering Studies

Roy Kilgard
BA, Valdosta St University; PHD, University of Leicester
Professor of the Practice in Astronomy; Professor of the Practice, Integrative Sciences

Jin Hi Kim
BA, Seoul National University; MFA, Mills College
Director, Korean Drumming Ensemble; Assistant Professor of the Practice in Music, Part-Time; Director of the Korean Drumming Ensemble

Kyungmi Kim
MA, Yonsei University; MS, Yale University; MPHIL, Yale University; PHD, Yale University
Associate Professor of Psychology; Associate Professor, Integrative Sciences

Yujin Kim
BA, Chung-Ang University; MA, Seoul National University; PhD, The University of Texas at Austin
Postdoctoral Researcher in Quantitative Analysis

Patricia Klecha-Porter
BS, Ithaca College; MS, Springfield College Ma
Adjunct Professor of Physical Education, Emerita

Ethan Kleinberg
BA, University of California, Berkeley; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Editor-in-Chief, History and Theory; Professor of History; Professor of Letters; Class of 1958 Distinguished Professor

Caleb Knapp
BA, SUNY at Binghamton; MA, University of Washington-Seattle Campus; PhD, University of Washington-Seattle Campus
Visiting Assistant Professor of Feminist, Gender, and Sexuality Studies

Joseph L. Knee
BA, SUNY at Binghamton; PHD, SUNY at Stony Brook
Beach Professor of Chemistry, Emeritus

Glenn Knight
Visiting Professor in Liberal Studies; Associate Director, Admissions and Student Services (Graduate Liberal Studies and Continuing Studies)

Carrie L. Koffman
Saxophone Instructor; Private Lessons Teacher

Katja Kolcio
MA, University of Georgia Athens; PHD, Ohio State University; MA, Ohio State University
Chair, Dance; Associate Professor of Dance; Affiliated Member; Associate Professor, Environmental Studies; Associate Professor, Russian, East European, and Eurasian Studies

Astra Kolomatskaia
BA, University of Waterloo; MA, University of Cambridge; PhD, Stony Brook University
Postdoctoral Fellow in Computer Science; Postdoctoral Fellow in Mathematics and Computer Science

Natasha Korda
BA, Columbia University; PHD, Johns Hopkins University
Professor of English; Professor, Feminist, Gender, and Sexuality Studies

Omer Koru
BA, Sabanci University; MA, Sabanci University; PhD, University of Pennsylvania
Assistant Professor of Economics

Hannah Reyzl Kosman
BA, Swarthmore College; MA, Yale University; PhD, Yale University
Visiting Professor of French

Tsampikos Kottos
BA, University of Crete; MS, University of Crete; PHD, University of Crete
Professor of Physics; Lauren B. Dachs Professor of Science and Society; Professor, Mathematics; Professor, Integrative Sciences

Erica Kowsz
Assistant Staff Professor; Associate Director of Fellowships

Hari Krishnan
BA, University of Manitoba; MFA, York University; PHD, Texas Womans University
Co-Chair, Global South Asian Studies; Professor of Dance; Professor, Feminist, Gender, and Sexuality Studies; Professor, Global South Asian Studies

Daniel Krizanc
BS, University of Toronto; PHD, Harvard University
Co-Coordinator, Informatics and Modeling; Professor of Computer Science; Edward Burr Van Vleck Professor of Computer Science; Professor, Environmental Studies; Professor, Integrative Sciences

Alex Kruckman
SB, Brown University; PHD, University of California, Berkeley
Assistant Professor of Mathematics

Timothy Ku
BS, University of Rochester; MS, University of Michigan; PHD, University of Michigan
Associate Professor of Earth and Environmental Sciences; Associate Professor, Integrative Sciences

David Kuenzel
MA, University of Washington; DIP, University of Tubingen; PHD, University of Washington
Associate Professor of Economics

Katherine M. Kuenzli
BA, Yale University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Chair, Art and Art History; Professor of Art History; Professor, German Studies

Ronald J. Kuivila
BA, Wesleyan University; MFA, Mills College
Director, Electronic Music and Recording Studios; Professor of Music

Matthew Kurtz
BA, Reed College; MA, Princeton University; PHD, Princeton University
Professor of Psychology; Professor, Neuroscience and Behavior

Basak Kus
BA, Bogazici University; MA, SUNY at Stony Brook; PHD, University of California, Berkeley

Professor of Government

L

Gale Lackey
BS, West Chester University; MED, West Chester University
Adjunct Professor of Physical Education, Emerita

Maya Coupard LaLiberte
BA, Smith College
Visiting Instructor of Dance

Jennifer Lane
BA, Amherst College; MS, Smith College
Adjunct Professor of Physical Education; Head Coach of Softball

Robert P. Lane
BA, Colgate University; PHD, California Institute Tech
Professor of Molecular Biology and Biochemistry, Emeritus

Salvatore LaRusso
BMU, Eastman School Of Music; MS, Fairfield University
Director, Wesleyan Wind Ensemble

Antonio Laverghetta
BS, University of South Florida; MS, University of South Florida; PhD, University of South Florida
Assistant Professor of the Practice in Quantitative Analysis

Glenn Joel LaVertu
MFA, Rhode Island School of Design; MFA, Rhode Island School of Design
Visiting Scholar; Visiting Scholar in History

Constance Leidy
BS, Tulane University; PHD, Rice University
Associate Professor of Mathematics

Andrew Leland
BA, Oberlin College; MA, University of Missouri-Columbia
Koeppel Fellow in Journalism; Research Fellow

Charles C. Lemert
BA, Miami University Middletown; MA, Harvard University; PHD, Harvard University; MAA, Wesleyan University
John E. Andrus Professor of Social Theory, Emeritus

Jeffers Lennox
BA, University of Toronto; MA, Dalhousie University; PHD, Dalhousie University
Professor of History

Rosemary Lennox
Visiting Instructor of Art; Assistant Director of Exhibitions and Assistant Curator of Education; Visiting Instructor of East Asian Studies

Leo A. Lensing
BA, University of Notre Dame; MA, Cornell University; PHD, Cornell University; MAA, Wesleyan University
Professor of Film Studies, Emeritus

Typhaine Leservot
BA, University of Caen; MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill
Associate Professor of French; Associate Professor, Letters

Daniel Levin Becker
BA, Yale University
Distinguished Writer-in-Residence; Distinguished Writer in Residence

Han Li
BS, Nankai University; PHD, Yale University
Associate Professor of Mathematics

Dan Licata
BS, Brown University; PHD, Carnegie Mellon University
Associate Professor of Computer Science

Richard W. Lindquist
BS, Worcester Poly Institute; MA, Princeton University; PHD, Princeton University; MAA, Wesleyan University
Professor of Physics, Emeritus

James Lipton
BS, U Nebraska Lincoln; MSC, Cornell University; PHD, Cornell University
Professor of Computer Science; Professor, Integrative Sciences

Mengjun Liu
BA, Beijing Normal University; MA, Nanjing Normal University
Associate Professor of the Practice in Chinese; Associate Professor of the Practice in East Asian Studies

Mia Lobel
BA, Wesleyan University; MA, University of California-Berkeley
Visiting Instructor of Creative Writing and Criticism

Donald Long
BS, Springfield College Ma
Adjunct Professor of Physical Education, Emeritus

Marc Robert Longenecker
BA, Wesleyan University; MA, Wesleyan University
Professor of the Practice in Film Studies

Valeria Lopez Fadul
BA, Yale University; MA, Princeton University; PHD, Princeton University
Associate Professor of History; Associate Professor, Latin American Studies

Susan F. Lourie
BA, Temple University; MALS, Wesleyan University
Adjunct Professor of Dance, Emerita

Rachel Lowe
Visiting Scholar in Chemistry

Joyce O. Lowrie
BA, Baylor University; PHD, Yale University; MAA, Wesleyan University
Professor of Romance Languages and Literatures, Emerita

Chia-Yu Joy Lu
BFA, National Taiwan Normal University; MA, University of Sheffield; PHD, Wesleyan University
Director, Chinese Music Ensemble

Joshua Daniel Lubin-Levy
BA, Wesleyan University; MA, New York University
Visiting Professor of Theater; Director and Chief Curator, Center for the Arts

M

Marisa Dovidio MacClary
BA, Wesleyan University; MBA, Babson College
Entrepreneur in Residence; Visiting Professor of Public Policy

Antonio J. Machado Allison
MS, Central University of Venezuela; PHD, George Washington University
University Professor in the Bailey College of the Environment; University Professor, Latin American Studies; University Professor in the College of the Environment

Randall M. MacLowry
BA, Wesleyan University
University Professor of Film Studies and Co-Director of the; University Professor of Film Studies and Co-Director of WesDocs

Amy MacQueen
BA, Columbia University; PHD, Stanford University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Zito Madu
Visiting Instructor of Creative Writing and Criticism

Urip Maeny
DIPL, Indonesian Conservatory of Mus
Retired Artist-in-Residence, Dance; Visiting Instructor of Dance

Clark Maines
BA, Bucknell University; MA, Pennsylvania State University; PHD, Pennsylvania State University; MAA, Wesleyan University
Professor of Art History, Emeritus

Aayatti Mallick Gupta
Visiting Scholar in Chemistry; Temporary Postdoctoral Research Associate

Victoria Ursula Manfredi
BA, Smith College; MS, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Vice-Chair, Computer Science; Associate Professor of Computer Science; Associate Professor, Integrative Sciences

Alex Margolis
MA, University of Oxford; PhD, University of Oxford
Van Vleck Visiting Professor of Mathematics

Alyx Mark
BA, Southern Illinois Univer; MA, George Washington University; PHD, George Washington University
Associate Professor of Government

Peter A. Mark
BA, Harvard University; MA, Syracuse University; PHD, Yale University; MAA, Wesleyan University
Professor of Art History, Emeritus

Nadejda Marques
Visiting Professor of Public Policy; Visiting Assistant Professor in Liberal Studies

Anne Martin
Adjunct Professor of Public Life; Chief Investment Officer

Douglas Arthur Martin
BA, University of Georgia Athens; MFA, The New School; PHD, CUNY The Graduate Center
Associate Director, Creative Writing; Associate Professor of English; Associate Professor, Feminist, Gender, and Sexuality Studies

Eduardo Martin Lopez
BS, Universidad de Salamanca; PhD, Universidad Autoacute;noma de Madrid
Visiting Professor of Neuroscience and Behavior; Visiting Professor in Neuroscience and Behavior

Caitlin Ann Martin-Wagar
Visiting Scholar in Psychology

Naho Maruta
MA, University of Wisconsin at Madison
Professor of the Practice in East Asian Studies; Professor of the Practice, Fries Center for Global Studies

Bruce A. Masters
BS, Georgetown University; PHD, University of Chicago; MAA, Wesleyan University
John E. Andrus Professor of History, Emeritus

Ioana Emy Matesan
MA, Arizona State University; PHD, Syracuse University
Associate Professor of Government; Tutor, College of Social Studies

Melissa Matthes
Visiting Professor in Liberal Studies

Paula Matthusen
BM, University of Wisconsin at Madison; MA, New York University; PHD, New York University
Director of Graduate Studies; Professor of Music

Alexis May
BA, Wesleyan University; MA, University British Columbia; PHD, University British Columbia
Associate Professor of Psychology; Associate Professor, Integrative Sciences

Leo Mayo
BS, Central Connecticut State University; MED, American Intl College
Adjunct Associate Professor of Physical Education; Head Coach of Cross Country

Mary Stephanie Mazzella
BA, Iona College; MBA, Iona College
Visiting Professor of Economics

Robin Mazzola
BFA, Paier College Of Art
Adjunct Assistant Professor of Theater; Costume Shop Manager

Elizabeth A. McAlister
BA, Vassar College; MA, Yale University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Director of Academic Writing; Professor of Religion; Professor, African American Studies; Professor, American Studies; Professor, Feminisit, Gender, and Sexuality Studies

Heather Annie McCalden
BFA, New York University; MA, Royal College of Art
Visiting Instructor of Creative Writing and Criticism

Sean McCann
BA, Georgetown University; PHD, CUNY The Graduate Center

Professor of English; Kenan Professor of the Humanities; Professor in Liberal Studies

Matthew Joseph McCue
BA, Hofstra University; MFA, Columbia University in the City of New York; MFA, Columbia University in the City of New York
Visiting Professor of Film Studies

James W. McGuire
BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Government; John E. Andrus Professor of Government; Professor, Latin American Studies

Jodi McKenna
BA, Brown University; MED, St. Lawrence University
Adjunct Professor of Physical Education; Head Coach of Women's Ice Hockey

Grace McKenzie-Smith
BA, Bowdoin College; PHD, Princeton University
Assistant Professor of Physics

Rashida Z. Shaw McMahon
BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Chair, English; Associate Professor of English; Associate Professor, Theater; Associate Professor, African American Studies

Chelsie McPhilimy
BA, University of Wisconsin at Madison; MFA, Ohio State University
Assistant Professor of the Practice in Dance

Jamir Dean Meah
Staff Professor; Assistant Director Office of Religious and Spiritual Life and Muslim Chaplain

Kaylah Michelle Medvec
BS, University of Saint Joseph
Graduate Student, CHEM-PHD; Visiting Instructor of Chemistry

Michael Meere
BA, Northwestern University; MA, University of Virginia; MA, Universite Lumiere Lyon 2; MA, Universite of Paris - Sorbonne; PHD, University of Virginia
Section Head, French; Associate Professor of French; Associate Professor, Medieval Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Tracy Mehr-Muska
Staff Professor; Assistant Director Office of Religious and Spiritual Life and Catholic or Protestant Chaplain

Yuxuan Mei
BS, Columbia University in the City of New York; MS, University of Washington-Seattle Campus; PhD, University of Washington-Seattle Campus
Assistant Professor of Computer Science; Assistant Professor, Design and Engineering Studies

Laverne Melon
BA, Middlebury College; MS, SUNY at Binghamton University; PHD, Purdue University W Lafyte
Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences; Assistant Professor, Feminist, Gender, and Sexuality Studies

Stanley Daniel Menacherry
PhD, Emory University
Visiting Scholar in Chemistry

Maaza Mengiste
BA, University of Michigan; MFA, New York University
Professor of English

Eva Meredith
BA, Franklin Pierce College
Adjunct Professor of Physical Education; Head Coach of Women's Soccer

Priscilla Meyer
BA, University of California, Berkeley; MA, Princeton University; PHD, Princeton University; MAA, Wesleyan University
Professor of Russian Language and Literature, Emerita

Ari Benjamin Meyers
BA, Yale University; MM, Johns Hopkins University
Visiting Professor of Science and Technology Studies

Cecilia Miller
BA, LeTourneau College; MPHIL, University of St Andrews; DPHIL, Oxford University
Chair, History; Professor of History; Tutor, College of Social Studies; Professor, Medieval Studies

Kathleen (Kate) E Miller
BA, Tufts University; MA, Yale University; PHD, Wesleyan University
Visiting Professor of Environmental Studies

Richard A. Miller
BA, Oberlin College; MA, Yale University; PHD, Yale University; MAA, Wesleyan University
Woodhouse/Sysco Professor of Economics, Emeritus

Marlon Millner
BA, Morehouse College; MDiv, Harvard University; MA, Northwestern University; PhD, Northwestern University
Visiting Professor of Religion; Visiting Professor of African American Studies

Elizabeth Milroy
BA, Queens University; MA, Williams College; PHD, University of Pennsylvania
Professor of Art History, Emerita

Naveen Minai
PhD, University of California-Los Angeles; BA, Loughborough University
Assistant Professor of Feminist, Gender, and Sexuality Studies

Mostafa Mirabi
PhD, Wesleyan University; MS, Amirkabir University of Technology; BS, Amirkabir University of Technology
Visiting Scholar in Mathematics

Jennifer Mitchel
SB, Massachusetts Institute of Technology; PHD, Brown University
Assistant Professor of Biology; Assistant Professor, Integrative Sciences

Ben Model
BFA, New York University
Visiting Professor of Film Studies

Jessica Marion Modi
BA, University of Virginia-Main Campus; MFA, New York University; MFA, New York University; MA, Yale University
Visiting Professor of African American Studies

Daniel Moller

MS, Louisiana Technical University; PHD, Louisiana Technical University
Associate Professor of the Practice in Design and Engineering

Marichal B Monts
BA, Wesleyan University
Conductor, Ebony Singers

J. Donald Moon
BA, University Minnesota Mpls; MA, University of California, Berkeley; PHD, University Minnesota Mpls
John E. Andrus Professor of Government, Emeritus; Ezra and Cecile Zilkha Professor in the College of Social St

R. Walden Moore
BM, University of Kentucky; MM, Yale University
Visiting Professor of Music

Steven Moore
BA, University of South Carolina; PHD, University of Michigan
Assistant Professor of Government

Edward C. Moran
BS, Pennsylvania State University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Director, Van Vleck Observatory; Co-Coordinator, Planetary Science; Professor of Astronomy; John Monroe Van Vleck Professor of Astronomy; Professor, Integrative Sciences

Jill G. Morawski
BA, Mount Holyoke College; MA, Carleton University; PHD, Carleton University; MAA, Wesleyan University
Professor of Psychology; Willbur Fisk Osborne Professor of Natural Science; Professor, Feminist, Gender, and Sexuality Studies; Professor, Science and Technology Studies

Melisa Moreno Garcia
Visiting Scholar in Chemistry

Thomas J. Morgan
BA, Montana State University; BS, Montana State University; MSC, University of California, Berkeley; PHD, University of California, Berkeley; MAA, Wesleyan University
Foss Professor of Physics, Emeritus; Research Professor in Physics

Mattia Mossali
PhD, Universitagrave; degli Studi di Bergamo; MPhil, CUNY Graduate School and University Center; PhD, CUNY Graduate School and University Center
Visiting Professor of Italian

Ishita Mukerji
AB, Bryn Mawr College; PHD, University of California, Berkeley
Fisk Professor of Natural Science, Emerita

Kate Mullen
BS, Central Connecticut State University; MA, Springfield College Ma; MED, Springfield College Ma
Senior Woman Administrator; Adjunct Professor of Physical Education; Head Coach of Women's Basketball

Michelle Aaron Murolo
BS, Clarion University of Pennsylvania; PHD, Yale University
Professor of the Practice in Biology

Wendi Field Murray
BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona
Adjunct Assistant Professor of East Asian Studies; Visiting Professor of History; Adjunct Assistant Professor, Archaeology; Archaeology Collections Manager

N

Janice R. Naegele
BA, Mount Holyoke College; PHD, Massachusetts Institute of Technology
Alan M. Dachs Professor of Science, Emerita

Christian Hart Nakarado
BA, Yale University; MAR, Yale University
Assistant Professor of Art; Assistant Professor, Design and Engineering Studies

Sushirdeep Narayana
BS, National Institute of Technology, Karnataka; MS, Texas A & M University; PhD, University of Illinois at Chicago
Postdoctoral Fellow in Computer Science

Jesse Nasta
BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of the Practice in African American Studies

Julia Nations-Quiroz
BA, Rice University; MA, Vanderbilt University; MA, Yale University
Visiting Instructor of Religion

Valerie Nazzaro
BA, University of Connecticut; MA, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut
Professor of the Practice in Quantitative Analysis; Professor of the Practice in Quantitative Analysis

Louise Neary
BA, Boston College; MA, Boston College; PHD, University of Illinois Urbana
Chair, College of Education Studies; Adjunct Professor of Spanish; Adjunct Professor, Education Studies

Howard Needler
BS, Yale University; BA, Oxford University; PHD, Columbia University; MA, Oxford University
Professor of Letters, Emeritus

Andrea Negrete
BA, University of Washington; MED, University of Washington; PHD, University of Virginia
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Amanda Nelson
Visiting Professor of History; Dietrich Family Associate University Librarian for Unique Collections University Archivist

David Paul Nelson
BA, Kalamazoo College; MFA, California Institute of Arts; PHD, Wesleyan University
Adjunct Associate Professor of Music; Adjunct Associate Professor, Global South Asian Studies

Ellen Nerenberg
AB, Stanford University; PHD, University of Chicago
Professor of Italian; Hollis Professor of Romance Languages and Literatures

Aleksandra Katarzyna Newland
BA, Grazyna and Kiejstut Bacewicz University of Music; MA, Grazyna and Kiejstut Bacewicz University of Music
Flute Instructor; Private Lessons Teacher

Tammy Vo Nguyen
BFA, The Cooper Union; MFA, Yale University
Assistant Professor of Art

Thanh Nguyen
MBA, Northwestern University; MLS, University of Pennsylvania; MA, Dartmouth College; MA, Middlebury College
Visiting Professor of Public Policy

Janice Nimura
BA, Yale University; MA, Columbia University in the City of New York
Visiting Professor of Environmental Studies

Ruth Nisse
BA, Columbia University; PHD, University of California, Berkeley
Professor of English; Professor, Medieval Studies

Brian Hale Northrop
BA, Middlebury College; PHD, University of California, Los Angeles
Professor of Chemistry; E. B. Nye Professor of Chemistry; Professor, Integrative Sciences

Laurie Nussdorfer
BA, Yale University; MSC, London School of Economics and Political Science; MA, Princeton University; PHD, Princeton University
Professor of Letters, Emerita; William Armstrong Professor of History, Emerita

Okechukwu Nwafor
BA, University of Nigeria; MFA, Nnamdi Azikiwe University; PHD, University of Western Cape
Assistant Professor of Art History

O

Kenneth Adam O'Konis
BA, Saint Anselm College; MEd, Harvard University; EdD, Northeastern University
Visiting Professor of Chemistry

Alison O'Neil
BS, Binghamton University; PHD, Montana State University
Assistant Professor of Chemistry; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences; Assistant Professor, Biology

Kristin Oberiano
BA, Occidental College; MA, Harvard University; PHD, Harvard University
Assistant Professor of History

Christian Obst
MA, Johann Wolfgang Goethe Universitauml;t Frankfurt am Main; MA, Brown University; PhD, Brown University
Visiting Professor of German Studies

Suzanne OConnell
BA, Oberlin College; MS, SUNY at Albany; PHD, Columbia University
Professor of Earth and Environmental Sciences; Harold T. Stearns Professor of Earth Science; Professor, Integrative Sciences

Jesse Moses Ofgang
BA, Western Connecticut State Univ; MA, Royal Conservatoire of Scotland
Bagpipes Instructor; Private Lessons Teacher

Pavel V Oleinikov
Associate Professor of the Practice in Quantitative Analysis

Donald B. Oliver
BS, Brandeis University; PHD, Tufts University; MAA, Wesleyan University
Professor of Molecular Biology and Biochemistry; Daniel Ayres Professor of Biology; Professor, Integrative Sciences

Maria-Christina Oliveras
BA, Yale University; MFA, National Theatre Conservatory
Assistant Professor of Theater

Rich Olson
BA, Cornell University; PHD, Columbia University
Coordinator, Molecular Biophysics; Chair, Molecular Biology and Biochemistry; Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Allison Diane Orr
BA, Wake Forest University; MFA, Mills College
Research Fellow of the Bailey College of the Environment; Research Fellow of the College of the Environment

María Ospina
BA, Brown University; MA, Harvard University; PHD, Harvard University
Chair, Romance Languages and Literatures; Professor of Spanish; Professor, Latin American Studies

Rosemary Elizabeth Ostfeld
BA, Wesleyan University; MA, Wesleyan University; MPHIL, University of Cambridge; PHD, University of Cambridge
Assistant Professor of the Practice in Environmental Studies; Assistant Professor of the Practice Environmental Studies

Akos Ostor
BA, University of Melbourne; MA, University of Melbourne; PHD, University of Chicago
Professor of Anthropology, Emeritus

Eiko Otake
BA, SUNY Empire State College
Visiting Artist-in-Residence

Marcela Oteiza
MFA, California Institute of Arts; BFA, University of Chile
Professor of Theater; Professor, Design and Engineering Studies; Professor, Bailey College of the Environment; Professor, Latin American Studies

P

Tom Packet
MA, Vrije Universiteit Brussel
Visiting Scholar in Art History

Teresita Padilla-Benavides
BS, Escuela Nacional de Ciencias B; MS, Centro de Investigacion y Estu; PHD, Centro de Investigacion y Estu
Assistant Professor of Molecular Biology Biochemistry; Assistant Professor, Integrative Sciences

Paula Paige
BA, Mount Holyoke College; MA, Middlebury College

Adjunct Professor of Romance Languages and Literatures, Emer

George Mathew Paily
MSC, Indian Institute of Technology; PHD, Pennsylvania State University
Associate Professor of the Practice in Physics

Tyrone S. Palmer
BA, Brooklyn College; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of English

John T. Paoletti
BA, Yale University; MA, Yale University; PHD, Yale University; MAA, Wesleyan University
Professor of Art History, Emeritus

Emmanuel Paris-Bouvret
Coordinator, Less Commonly Taught Languages; Adjunct Instructor in French; Director, Language Resources and Technology; Adjunct Instructor in Romance Languages and Literatures

Jahyon Park
PHD, Cornell University
Assistant Professor of East Asian Studies

Jess Park
BS, Konkuk University; BA, University of Oregon; MFA, The New School; MFA, The New School
Visiting Professor of Art

Ben Parker
Visiting Instructor in Liberal Studies; Makerspace Coordinator

Richard Parkin
BA, University of California, Berkeley; MFA, University of California, Los Angeles
Assistant Professor of Film Studies

Christopher Parslow
BA, Grinnell College; MA, University of Iowa; PHD, Duke University
Robert Rich Professor of Latin, Emeritus

Pedro Pascual
Assistant Professor of the Practice in American Sign Language

Andrea Patalano
BA, Brown University; MA, University of Michigan; PHD, University of Michigan
Professor of Psychology; Professor, Neuroscience and Behavior

Rehana Patel
BA, Cambridge University; MA, Cambridge University; MS, University South Carolina; PHD, Wesleyan University
appointments

Courtney Patterson-Faye
BA, University of Pennsylvania; MA, Northwestern University; PHD, Northwestern University
Associate Professor of Sociology

Maryam Patton
BA, Princeton University; MA, Harvard University; MPhil, University of Oxford; PhD, Harvard University
Assistant Professor of History

Peter C. Patton
BA, Franklin & Marshall College; MS, Colorado St University; PHD, University of Texas Austin; MAA, Wesleyan University
Alan M. Dachs Professor of Science, Emeritus

Melissa Jane Pavlik
BA, University of Chicago; MA, King's College London
Visiting Instructor of Government

Katie Pearl
BA, University of Washington; MFA, Brown University
Associate Professor of Theater

Justin Craig Peck
BA, Brandeis University; MA, University of Virginia; PHD, University of Virginia
Associate Professor of Government

Gayle Pemberton
BA, University of Michigan; MA, Harvard University; PHD, Harvard University; MAA, Wesleyan University
Professor of African American Studies, Emerita; Professor of English, Emerita

Michael Perez
BA, University Texas Arlington; PHD, Texas A&M University
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Ana Perez-Girones
BA, University of Seville; MA, Cornell University
Adjunct Professor of Spanish; Adjunct Professor, Education Studies

George Petersson
BS, City College; PHD, California Institute Tech
Fisk Professor of Natural Science, Emeritus

Joel Pfister
BA, Columbia University; MA, University of Sussex; MA, University College, University of London; PHD, Yale University
Professor of English; Professor of American Studies; Olin Professor of English

Earl W. Phillips
BA, Wesleyan University; JD, The Catholic University of America
Distinguished Teaching Professor in Environmental Sciences

Kathleen Marie Pike
BA, Johns Hopkins University; MA, Yale University; PHD, Yale University
Visiting Scholar in Psychology

Ryan Pike
BA, University of California-Santa Barbara; MA, Yale University
Visiting Instructor of Government

William R. Pinch
BA, University of Virginia; MA, University of Virginia; PHD, University of Virginia
Associate Editor, History and Theory; Professor of History; Professor, Environmental Studies; Professor, Global South Asian Studies

Victoria Pitts-Taylor
BA, Ohio University; PHD, Brandeis University
Chair, Feminist, Gender, and Sexuality Studies; Professor of Feminist, Gender, and Sexuality Studies; Professor, Sociology; Professor, Science and Technology Studies

Ulrich Plass
MA, University of Michigan; PHD, New York University
Chair, German Studies; Professor of German Studies; Professor, Letters

Jocelyn Tamara Lenore Pleasant
BA, George Washington University

Graduate Student, ETHN-PHD; Visiting Instructor in Music; Visiting Instructor of Music; Drum Instructor

Scott L. Plous
BA, University Minnesota Mpls; PHD, Stanford University
Professor of Psychology

Catherine Poisson
BA, Sorbonne; MA, New York University; PHD, New York University
Associate Professor of French, Emerita

David Pollack
SB, University of Chicago; MA, Harvard University; PHD, Harvard University
Associate Professor of Mathematics

Philip Pomper
BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago; MAA, Wesleyan University
William Armstrong Professor of History, Emeritus

Gabrielle Ponce-Hegenauer
BA, University of Illinois Urbana; MFA, Johns Hopkins University; PHD, Johns Hopkins University
Associate Professor of Letters; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Romance Languages and Literatures

Morgan Baylie Pope
BM, Middle Tennessee State Univers; MM, New Eng Consv Music
Bassoon Instructor; Private Lessons Teacher

Tyler Porter
BA, Kent State University; MA, Cornell University; PHD, Cornell University
Assistant Professor of the Practice in Economics

Nadya Potemkina
MM, University Nthrn Iowa; MM, Ball State University; DMA, The University of Memphis
Director of Private Music Lessons; Adjunct Associate Professor of Music; Adjunct Associate Professor, Russian, East European, and Eurasian Studies

Christopher Potter
BA, University of Connecticut; MA, University of Connecticut
Adjunct Professor of Physical Education; Head Coach of Men's Ice Hockey

Helen Mills Poulos
BS, Pepperdine University; MS, Pennsylvania State University; MPHIL, Yale University; PHD, Yale University
Chair, Environmental Studies; Distinguished Associate Professor of the Bailey College of the Environment and Earth and Environmental Sciences; Distinguished Associate Professor of the College of the Environment and Environmental Studies

Joya Powell
BA, Columbia University; MA, New York University
Assistant Professor of the Practice in Dance; Assistant Professor of the Practice, African American Studies

Joyce Powzyk
BS, Principia College; PHD, Duke University
Professor of the Practice in Biology

Rex F. Pratt
BS, University of Melbourne; PHD, University of Melbourne; MAA, Wesleyan University
Beach Professor of Chemistry, Emeritus

James John Praznik
Assistant Professor of the Practice in Music and Technical Director

Wallace C. Pringle
BA, Middlebury College; PHD, Massachusetts Institute of Technology; MAA, Wesleyan University
Professor of Chemistry, Emeritus

Liana Pshevorska
BA, University of Arizona; MA, University of Arizona; PHD, Princeton University
Associate Professor of the Practice in French; Associate Professor of the Practice, Fries Center for Global Studies; Associate Professor of the Practice, Russian, East European, and Eurasian Studies

Q

Justine Quijada
BA, University of Chicago; MA, Columbia University; PHD, University of Chicago
Associate Professor of Religion; Associate Professor, Russian, East European, and Eurasian Studies; Associate Professor, Environmental Studies

Andrew H Quintman
BA, Hampshire College; MA, University of Michigan; PHD, University of Michigan
Chair, Religion; Associate Professor of Religion; Associate Professor, East Asian Studies; Associate Professor, Global South Asian Studies

R

John Raba
BS, University of New Haven; MED, University of New Haven
Adjunct Professor of Physical Education; Head Coach of Men's Lacrosse

Hari Ramesh
BA, Williams College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of Government; Tutor, College of Social Studies; Assistant Professor, Global South Asian Studies

Valentina Ramia
MS, The New School; MA, The New School; PhD, Stanford University
Andrew W. Mellon Postdoctoral Fellow in American Studies

Felipe Ramirez
BS, Colorado St University; PHD, University of Michigan
Associate Professor of Mathematics

Alba Yanina Ramos
PHD, National University of Cordoba
Visiting Scholar in Physics; Visiting Scholar of Physics

Julia A. Randall
BFA, Washington University; MFA, Rutgers University
Associate Professor of Art

Christopher Rasmussen
BA, University of Virginia; MS, University of Virginia; PHD, University of Arizona
Associate Professor of Mathematics

Wendy Rayack
BA, Oberlin College; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Associate Professor of Economics, Emerita

Seth Redfield
BM, New Eng Consv Music; BS, Tufts University; MS, University of Colorado Boulder; PHD, University of Colorado Boulder
Co-Coordinator, Planetary Science; Professor of Astronomy; Fisk Professor of Natural Science; Professor, Integrative Sciences

Joseph Reilly
BA, Trinity College; MBA, University of Rhode Island
Adjunct Professor of Physical Education; Head Coach of Men's Basketball

Phillip G. Resor
AB, Dartmouth College; MS, University of Wyoming; PHD, Stanford University
Professor of Earth and Environmental Sciences; Professor, Education Studies

Matt Reynolds
BA, University of Massachusetts Amherst; MEd, University of Massachusetts Amherst
Adjunct Associate Professor of Physical Education; Head Coach of Men's Baseball

Julie Ribchinsky
Cello Instructor; Private Lessons Teacher

Michael D. Rice
BS, Western Mich University; MS, Western Mich University; PHD, Wesleyan University
Professor of Computer Science, Emeritus

Beth Ann Richards
MA, Georgia St University; MFA, Pine Manor College
Visiting Professor, CPE

Jeff Rider
BA, Yale University; MA, University of Chicago; PHD, University of Chicago
Professor of French; Professor, Medieval Studies

Casey Riedmann
BA, Robert Morris University; MA, San Diego State University; MA, Northwestern University; PhD, Northwestern University
Postdoctoral Research Fellow

Andrea Roberts
BS, Cornell University; MS, Polytechnic University; PHD, Wesleyan University
Professor of the Practice in Chemistry

Michael J. Roberts
BA, Cambridge University; MA, Cambridge University; MA, University of Illinois Urbana; PHD, University of Illinois Urbana; MAA, Wesleyan University
Robert Rich Professor of Latin, Emeritus

Sonia Roberts
BA, Vassar College; PHD, University of Pennsylvania
Assistant Professor of Computer Science; Assistant Professor, Design and Engineering Studies

Patricia Rodriguez Mosquera
BA, Autonoma University of Madrid; MA, Autonoma University of Madrid; PHD, University of Amsterdam
Professor of Psychology; Professor, Feminist, Gender, and Sexuality Studies

Robert J. Rollefson
BA, University of Wisconsin at Madison; PHD, Cornell University; MAA, Wesleyan University
Professor of Physics, Emeritus

Jennifer S. Rose
BA, University of Rhode Island; MA, University of Rhode Island; PHD, University of Rhode Island
Director, Institutional Review Board; Professor of the Practice in Quantitative Analysis; Professor of the Practice, Education Studies

Phyllis Rose
BA, Radcliffe College; MA, Yale University; PHD, Harvard University; MAA, Wesleyan University
Professor of English, Emerita

Robert Rose
BA, Lamar University; MA, Louisiana State University; PHD, Indiana University Bloomington
Postdoctoral Fellow in Computer Science

Rob Rosenthal
BA, Rutgers University; MA, University Calif Santa Bar; PHD, University of California, Santa Barbara
John E. Andrus Professor of Sociology, Emeritus

Michael S. Roth
BA, Wesleyan University; MA, Princeton University; PHD, Princeton University
President; University Professor

Joseph T. Rouse
BA, Oberlin College; MA, Northwestern University; PHD, Northwestern University; MAA, Wesleyan University
Professor of Science and Technology Studies; Professor of Philosophy; Hedding Professor of Moral Science; Professor, Environmental Studies

Dana Royer
BA, University of Pennsylvania; PHD, Yale University
Professor of Earth and Environmental Sciences; George I. Seney Professor of Geology; Professor, Environmental Studies

Mary-Jane Victoria Rubenstein
BA, Williams College; MPHIL, Cambridge University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Dean of the Social Sciences; Professor of Religion; Professor, Feminist, Gender, and Sexuality Studies; Professor, Science and Technology Studies; Professor, Philosophy

Mirko Rucnov
BA, University Nevada Lasvegas; MFA, Columbia University
Associate Professor of the Practice in Film Studies

Sasha Rudensky
BA, Wesleyan University; MFA, Yale University
Associate Professor of Art; Associate Professor, Russian, East European, and Eurasian Studies

Colton John Runyan
BA, The University of Texas; PhD, University of Cambridge
Visiting Professor of History

Ashraf Rushdy
BA, University of Alberta; MA, University of Alberta; PHD, Cambridge University
Professor of English; Benjamin Waite Professor of the English Language; Professor of African American Studies; Professor, Feminist, Gender, and Sexuality Studies

Matthew Francis Russo
BM, University of Hartford; MM, Yale University; DMA, University of Hartford
Trombone Instructor; Private Lessons Teacher

Irina M. Russu
BS, University of Bucharest; PHD, University of Pittsburgh; MAA, Wesleyan University
E. B. Nye Professor of Chemistry, Emerita

Peter Rutland
BA, Oxford University; DPHIL, York University
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought; Professor of Government; Tutor, College of Social Studies; Professor, Russian, East European, and Eurasian Studies

S

Iddrisu Saaka
DIPL, University of Ghana; MFA, University of California, Los Angeles
Douglas J. and Midge Bowen Bennet Associate Professor of Dance; Associate Professor of Dance; African Scholars Faculty Mentor; Associate Professor, CPE

Roberto Saba
BA, Universidade de Satilde;o Paulo (USP); MA, Universidade de Satilde;o Paulo (USP); PhD, University of Pennsylvania
Associate Professor of American Studies; Associate Professor, History; Associate Professor, Latin American Studies

Tim Sahay
BS, University of Chicago; PhD, Massachusetts Institute of Technology
Menakka and Essel Bailey '66 Distinguished Visiting Scholar

Lily Leopold Saint
BA, University of Pennsylvania; PHD, CUNY The Graduate Center
Coordinator, African Studies; Associate Professor of English

Alejandro Salinas-Albrecht
BA, California State University, Northridge; MFA, University of California, Los Angeles
Assistant Professor of the Practice in Film Studies

Yoshiko Yokochi Samuel
BA, Aichi Prefectural Women's Coll; MA, Michigan State University; MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Professor of Asian Languages and Literatures, Emerita

Edwin Sanchez
CER, Yale University
Associate Professor of Theater; Associate Professor, English

Charles A. Sanislow
BS, Northrn Michigan Unv; MA, Ball State University; PHD, Duke University
Chair, Neuroscience and Behavior; Professor of Psychology; Professor, Neuroscience and Behavior

Brenda Nallely Santos Ocampo
Visiting Scholar in Molecular Biology Biochemistry

Hirsh Sawhney
BA, University of Michigan; MFA, Rutgers University
Associate Professor of English; Associate Professor, Global South Asian Studies

Maria L Sbaraglini
BS, Universidad de Buenos Aires; PhD, Universidad Nacional de la Plata
Visiting Professor of Biology

Ronald Schatz
BA, University of Wisconsin at Madison; MAT, Harvard University; PHD, University of Pittsburgh; MAA, Wesleyan University
Professor of History, Emeritus

Karl E. Scheibe
BS, Trinity College; PHD, University of California, Berkeley; MAA, Wesleyan University
Professor of Psychology, Emeritus

Jeffrey Schiff
BA, Brown University; MFA, University of Massachusetts at Amherst
Professor of Art, Emeritus

Christy Schirmer
BA, University of Washington-Seattle Campus; MA, San Francisco State University; PhD, The University of Texas at Austin
Visiting Professor of Archaeology

Daniel Schniedewind
BA, Wesleyan University; MA, University of California-Santa Cruz; PhD, University of California-Santa Cruz
Visiting Professor of Anthropology

Paul Schwaber
BA, Wesleyan University; MA, University of California, Berkeley; PHD, Columbia University
Professor of Letters, Emeritus

Vera Schwarcz
BA, Vassar College; MA, Yale University; PHD, Stanford University; MAA, Wesleyan University
Mansfield Freeman Professor of East Asian Studies, Emerita

Nancy L. Schwartz
BA, Oberlin College; PHD, Yale University; MAA, Wesleyan University
Professor of Government, Emerita

Anthony O Scott
BA, Harvard University; MA, Johns Hopkins University
Distinguished Professor of Film Criticism

Stanley A. Scott
Banjo/Mandolin/North Indian Vocal/Guitar Instructor; Private Lessons Teacher

Philip H. Scowcroft
BA, Harvard University; MA, Cornell University; PHD, Cornell University
Edward Burr Van Vleck Professor of Mathematics, Emeritus

John Seamon
BS, Columbia University; PHD, University of Massachusetts at Amherst
Professor of Psychology, Emeritus

Olga Sendra Ferrer
BA, Universitat Autonoma de Barcelona; MA, North Carolina State University; MA, Princeton University; PHD, Princeton University
Section Head, Spanish; Associate Professor of Spanish

Jimin Seo
BA, Florida State University; MFA, Columbia University in the City of New York; MFA, Columbia University in the City of New York
Visiting Professor of English

Mira Seo
BA, Swarthmore College; BA, University of Oxford; MA, Princeton University; PhD, Princeton University

Provost's Distinguished Fellow of Classical Studies

Megan Sesma
Harp Instructor; Private Lessons Teacher

Francois Seyler
PHD, Universite Laval
Assistant Professor of Economics

Rudabeh Shahid
BA, Middlebury College; MA, University of Sussex; PhD, Durham University
Visiting Professor of Government; Tutor, College of Social Studies

Anu (Aradhana) Sharma
BA, Eugene Lang College; MA, Columbia University; MA, Stanford University; PHD, Stanford University
Professor of Anthropology; Professor, Feminist, Gender, and Sexuality Studies; Professor, Global South Asian Studies; Professor, Environmental Studies

Anya Shatilova
BA, Saint Petersburg State University of Culture and Arts; MA, Wesleyan University; PhD, Wesleyan University
Visiting Professor of Music

Avner Shavit
PHD, Sorbonne Nouvelle University Paris 3
Assistant Professor of the Practice; Gittel and Mervin Silverberg Scholar in Jewish Studies; Silverberg Assistant Professor of the Practice in Jewish Studies

Gary Shaw
BA, McGill University; DPHIL, Oxford University
Associate Editor, History and Theory; Professor of History; Professor, Medieval Studies

Damien Francis Sheehan-Connor
BA, Amherst College; MD, Tufts University; PHD, University Calif Santa Bar
Associate Professor of Economics

Sadia Quraeshi Shepard
BA, Wesleyan University; MA, Stanford University; MFA, Hunter College
Assistant Professor of Film Studies; Assistant Professor, Global South Asian Studies

Meng-ju Renee Sher
BA, Wesleyan University; MA, Harvard University; PHD, Harvard University
Associate Professor of Physics; Associate Professor, Integrative Sciences; Associate Professor, Environmental Studies

Will Sheridan
BA, Williams College; M.Arch., Yale University
Visiting Professor of Art

Sanford Shieh
AB, Cornell University; BA, Cornell University; BA, Oxford University; PHD, Harvard University
Chair, Philosophy; Professor of Philosophy

Keiji Shinohara
Artist-in-Residence, Art; Artist-in-Residence, East Asian Studies

COREY SHOTWELL
Voice Instructor

Cathy Shufro
AB, Brown University
Visiting Instructor of Public Policy

Anna Shusterman
SB, Brown University; PHD, Harvard University
Professor of Psychology; Professor, Education Studies

Lauren Silber
BA, University of Connecticut; MA, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Assistant Director of Academic Writing; Associate Professor of the Practice in Academic Writing; Associate Professor of the Practice, Feminist, Gender, and Sexuality Studies; Associate Professor of the Practice, English; Associate Professor of the Practice, American Studies; Associate Professor of the Practice, Education Studies

Yaya Simakov
BA, Connecticut College; MFA, Temple University
Assistant Professor of Film Studies

Zaira Simone-Thompson
BA, The New School; MA, New York University; PHD, CUNY The Graduate Center
Co-Coordinator, Caribbean Studies; Assistant Professor of African American Studies

Michael Singer
BS, University Southern Calif; PHD, University of Arizona
Professor of Biology; Professor, Environmental Studies

Harry M. Sinnamon
BA, La Salle University; MS, Villanova University; PHD, University of Rochester; MAA, Wesleyan University
Professor of Psychology, Emeritus

Joseph M. Siry
BA, Princeton University; MAR, University of Pennsylvania; PHD, Massachusetts Institute of Technology; MAA, Wesleyan University
Program Director, Art History; Co-Coordinator, Urban Studies; Kenan Professor of the Humanities; Professor of Art History

Gilbert L. Skillman
BA, University Kentucky Lexngt; MA, University of Michigan; PHD, University of Michigan
Co-Chair, College of Social Studies; Professor of Economics; Chester D. Hubbard Professor of Economics and Social Science; Tutor, College of Social Studies

Joseph Slaughter
BS, U.S. Naval Academy; MA, University of Maryland College Park; MA, U.S. Naval War College; PHD, University of Maryland College Park

Mark Slobin
BA, University of Michigan; MA, University of Michigan; PHD, University of Michigan
Winslow-Kaplan Professor of Music, Emeritus

Richard S. Slotkin
BA, Brooklyn College; PHD, Brown University; MAA, Wesleyan University
Olin Professor of English, Emeritus; Professor of English, Emeritus

Michael James Slowik
BA, Wesleyan University; MA, University of Chicago; MA, University of Iowa; PHD, University of Iowa
Vice Chair, Film Studies; Professor of Film Studies

Colin A. Smith

BA, New York University; PHD, University of California, San Francisco
Associate Professor of Chemistry; Associate Professor, Integrative Sciences; Associate Professor, Molecular Biology and Biochemistry

Courtney Weiss Smith
BA, University Of Dayton; MA, Washington University; PHD, Washington University
Associate Professor of English; Associate Professor, Science and Technology Studies; CPE Instructor, Wesleyan

David Andrew Smith
MA, CUNY Queens College
Jazz Trumpet Instructor

Gay Smith
BA, University of Hawaii; MA, University of Hawaii; PHD, University of California, Los Angeles; MAA, Wesleyan University
Professor of Theater, Emerita

Victoria Smolkin
BA, Sarah Lawrence College; PHD, University of California, Berkeley
Associate Professor of History; Associate Professor, Russian, Eastern European, and Eurasian Studies

Daniel Smyth
BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago
Associate Professor of Letters; Associate Professor, Philosophy; Associate Professor, German Studies

Shiv Rattan Soin
Entrepreneur-in-Residence; Visiting Scholar in Public Policy

Peter Gordon Solomon
BS, North Carolina State University; MA, University of Connecticut
Adjunct Professor of Physical Education, Emeritus

Ben Somera
BA, University Southern Calif
Adjunct Professor of Physical Education; Head Coach of Volleyball

Stephan Sonnenberg
BA, Brown University; MA, Science Po; MA, Tufts University; JD, Harvard Law School
Associate Professor of the Practice in Human Rights Advocacy and Conflict Resolution

Caleb Spivey
BFA, Valdosta State University
Assistant Professor of the Practice in Theater

Elise Springer
BA, Wesleyan University; MA, University of Connecticut; PHD, University of Connecticut
Associate Professor of Philosophy; Associate Professor, Feminist, Gender, and Sexuality Studies

Régulo Stabilito
Conductor, Wesleyan Symphony Orchestra; Visiting Professor of Music

Lynne Stahl
Humanities Interdisciplinary Studies Librarian, Feminist, Gender, and Sexuality Studies; Humanities Interdisciplinary Studies Librarian

Nicole Lynn Stanton
BA, Antioch College; MFA, Ohio State University
Provost and Senior Vice President for Academic Affairs; Professor of Dance; Professor, African American Studies; Professor, Environmental Studies

Emily Stark
BA, Pomona College; MA, Tufts University; PHD, Tufts University
Assistant Professor of Mathematics

Francis W. Starr
BS, Carnegie Mellon University; PHD, Boston University; MS, Boston University
Professor of Physics; Foss Professor of Physics; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Professor, Design and Engineering Studies

Robert S. Steele
BA, Whitman College; PHD, Harvard University; MAA, Wesleyan University
Professor of Psychology, Emeritus

Gary Martin Stein
BA, CUNY Queens College; MA, Claremont Graduate University; MA, University of Southern California; PhD, University of Southern California
Visiting Scholar of History

Daniel Steinmetz-Jenkins
BA, Concordia College Or; MA, Reed College; PHD, Columbia University
Assistant Professor in the College of Social Studies; Assistant Professor, History

Steven E. Stemler
BS, University of Washington; MED, Boston College; PHD, Boston College
Professor of Psychology; Professor, Education Studies

Philip E. Stern
BA, Wesleyan University; MA, Montclair State University; JD, New York Law School
Visiting Professor of Education Studies

Brian A. Stewart
BS, Stanford University; PHD, Massachusetts Institute of Technology
Chair, Physics; Professor of Physics; Professor, Environmental Studies; Professor, Integrative Sciences

Joseph Stoltz
Digital Humanities Postdoctoral Researcher, History; Digital Humanities Postdoctoral Researcher

William W. Stowe
BA, Princeton University; MPHIL, Yale University; PHD, Yale University; MAA, Wesleyan University
Benjamin Waite Professor of the English Language, Emeritus

Tracy Heather Strain
AB, Wellesley College; EDM, Harvard University
Corwin-Fuller Professor of Film Studies; Professor of Film Studies and Co-Director of WesDocs

Shirley L Sullivan
Visiting Instructor of Dance; Center for Prison Education Associate Director of Programs

Sonia Sultan
BA, Princeton University; MA, Harvard University; PHD, Harvard University
Professor of Biology; Alan M. Dachs Professor of Science; Professor, Environmental Studies

Ben Sulzinsky
BA, Wesleyan University

Visiting Instructor of Design and Engineering Studies

Prof. Sumarsam
BA, Akademi Seni Karavitan; MA, Wesleyan University; PHD, Cornell University
Professor of Music; Winslow-Kaplan Professor of Music

Andrew Szegedy-Maszak
BA, University of Michigan; MA, Princeton University; PHD, Princeton University; MAA, Wesleyan University
Jane A. Seney Professor of Greek, Retired

T

Ying Jia Tan
BA, University of California, Berkeley; MA, Stanford University; PHD, Yale University; MPHIL, Yale University
Associate Professor of History; Associate Professor, Science and Technology Studies; Associate Professor, East Asian Studies

Fumi Tanakadate
BA, Wesleyan University; MA, Manhattan School Music
Visiting Instructor in Music

Amy Cynthia Tang
BA, Harvard University; PHD, Stanford University
Douglas J. and Midge Bowen Bennet Associate Professor of English; Associate Professor of English; Associate Professor, American Studies

Erika A. Taylor
BS, University of Michigan; PHD, University of Illinois Urbana
Chair, Chemistry; Professor of Chemistry; Professor, Environmental Studies; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Director of the Wesleyan Mathematics and Science Scholars Program

Tula Telfair
BFA, Moore College Of Art; MFA, Syracuse University
Program Director, Art Studio; Professor of Art; Professor, Environmental Studies

Kate TenEyck
BFA, Rhode Island School of Design; MFA, University of Hartford
Adjunct Assistant Professor of Art; Art Studio Technician

David Teva
Staff Professor; Director of Religious and Spiritual Life and University Jewish Chaplain

Boris Tezak
BS, Florida Atlantic University; MS, Florida Atlantic University; PhD, Florida Atlantic University; PhD, Florida Atlantic University; BS, Florida Atlantic University; MS, Florida Atlantic University
Assistant Professor of Biology

Mitali Thakor
BA, Stanford University; PHD, Massachusetts Institute of Technology
Assistant Professor of Science and Technology Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, Anthropology

Kelly M. Thayer
BA, Regis College; PHD, Wesleyan University
Assistant Professor of Integrative Sciences; Assistant Professor, National Education Equity Lab; Assistant Professor in Liberal Studies

Chadwick Glenn Thomas
BM, Johns Hopkins University; MM, University of Michigan-Ann Arbor; D.M.A., University of Hartford
Clarinet Instructor

Ellen Thomas
BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
Smith Curator of Paleontology of the Joe Webb Peoples Museum; Harold T. Stearns Professor of Integrative Sciences, Emerita

alexandra thompson
BA, Yale University; M.Arch., Yale University
Visiting Professor of Art

Roland Thornqvist
BA, University of North Carolina at Chapel Hill
Adjunct Professor of Physical Education; Head Coach of Men's Tennis

Khachig Tölölyan
BA, Harvard University; MA, University of Rhode Island; PHD, Brown University; MAA, Wesleyan University
Professor of English and Letters, Emeritus

Damon Austin Tomlin
BE, Vanderbilt University; PHD, Baylor College of Medicine
David Scott Williams Visiting Assistant Professor of Psychology; Visiting Professor of Psychology

Jesse Wayne Torgerson
BA, Biola University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Associate Professor of Letters; Associate Professor, History; Associate Professor, Medieval Studies

Elizabeth G. Traube
BA, Radcliffe College; MA, Harvard University; PHD, Harvard University; MAA, Wesleyan University
Professor of Anthropology; Professor, Feminist, Gender, and Sexuality Studies

Helen Treloar
BS, University of Melbourne; PHD, University of Melbourne
Professor of the Practice in Neuroscience and Behavior

William Trousdale
Associate Professor of Physics, Emeritus

Yvonne Troxler
Piano Instructor; Private Lessons Teacher

Min-Feng Tu
BS, National Tsing Hua University; MS, California Institute Tech; PHD, California Institute Tech
Associate Professor of the Practice n Physics; Associate Professor of the Practice in Physics

Jennifer Tucker
BA, Stanford University; MPHIL, Cambridge University; PHD, Johns Hopkins University
Director, Center for the Study of Guns and Society; Professor of History; Professor, Science and Technology Studies; Professor, Feminist, Gender, and Sexuality Studies; Professor, Environmental Studies

Alfred Turco
BA, Brown University; MA, Harvard University; PHD, Harvard University
Professor of English, Emeritus

Evan Turiano

Visiting Assistant Professor of History

Laura Ann Twagira
BA, Wellesley College; MA, Sarah Lawrence College; PHD, Rutgers University
Associate Professor of History; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science and Technology Studies; Tutor, College of Social Studies

Patrick Tynan
BS, University of Massachusetts at Amherst
Adjunct Professor of Physical Education; Head Coach of Women's Crew

U

Monique Flores Ulysses
BA, University of Victoria; MA, McGill University; MA, Yale University; PhD, Yale University
Visiting Professor of History

Selin Ünlüönen
BA, Yale University; MA, Yale University; PhD, Yale University
Luther Gregg Sullivan Fellow in Art History

Roman Utkin
MA, Kazan State University; MPHIL, Yale University; PHD, Yale University
Associate Professor of Russian, East European and Eurasian Studies; Associate Professor, German Studies; Core Member; Associate Professor of Russian, East European, and Eurasian Studies

V

Sanaz Vajedian
BS, Amirkabir University of Technology; MS, University of Tehran; PhD, University of Tehran
Assistant Professor of the Practice in Quantitative Analysis; Assistant Professor of the Practice in Earth and Environmental Sciences

Libby Van Cleve
Oboe Instructor; Private Lessons Teacher

Johan C. Varekamp
BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
Smith Curator of Mineralogy and Petrology of the Joe Webb Pe; Harold T. Stearns Professor of Earth Science, Emeritus

Emily Elizabeth Vasquez
MPH, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Science and Technology Studies; Assistant Professor, Sociology

Eirene Visvardi
BA, University of Crete; MPHIL, Cambridge University; PHD, Stanford University
Associate Professor of Classical Studies; Associate Professor, Letters

Jody Cormack Viswanathan
BA, University of Washington; PHD, Wesleyan University
Visiting Scholar in Music; Visiting Scholar of Music

Danielle Vogel
BA, Dowling College; MA, Naropa University; PHD, University of Denver
Director; Associate Professor of English, Creative Writing

Erik Vogt
Visiting Professor of German Studies

Maya von Ziegesar
BA, Princeton University
Visiting Instructor of Philosophy; Research Fellow

Greg A. Voth
BS, Wheaton College; MS, Cornell University; PHD, Cornell University
Associate Director, College of Design and Engineering Studies; Professor of Physics; Professor, Integrative Sciences

W

John Kiarie Wa'Njogu
BA, Kenyatta University; MA, Ohio State University-Main Campus; PhD, Ohio State University-Main Campus
Visiting Professor of African Languages

Phillip B. Wagoner
BA, Kenyon College; PHD, University of Wisconsin at Madison
Professor, Global South Asian Studies, Emeritus; Professor of Art History, Emeritus

Peter Waite
BFA, Hartford Art School; MFA, School Art Institute Chgo
Visiting Assistant Professor, Continuing Studies; Visiting Assistant Professor in Continuing Studies

Tanner Ethan Walker
BA, University Calif Santa Crz; MA, Yale Divinity School; PHD, Brown University
Assistant Professor of Religion; Assistant Professor, Jewish Studies; Assistant Professor, Design and Engineering Studies

Sophie Wallis
BA, Utah State University; MA, University of Connecticut
Visiting Instructor in Liberal Studies

Leslie A. Warren Warren
BA, University of Vermont
Visiting Instructor in American Sign Language

Sofia Raquel Warren
BA, Wesleyan University
Visiting Instructor of Writing

Marvin Warshaw
Viola Instructor; Private Lessons Teacher

Takeshi Watanabe
BA, Yale University; PHD, Yale University
Associate Professor of East Asian Studies

Clifton Nathaniel Watson
BA, University of Connecticut; MA, North Carolina Central Univ; PHD, Fordham University
Adjunct Assistant Professor, CPE; Adjunct Assistant Professor of Public Policy; Director, Jewett Center for Community Partnerships

Christopher S. Weaver
BS, Hobart and William Smith Colleges; MALS, Wesleyan University; CAS, Wesleyan University; SM, Massachusetts Institute of Technology

Distinguished Professor of Computational Media; Distinguished Professor of Computational Media

Xinyi Wei
MA, Universiteacute; Paris 4 Sorbonne; PhD, Northwestern University
Assistant Professor of French

Kari Weil
BA, Cornell University; PHD, Princeton University; MA, Princeton University
University Professor; University Professor, Feminist, Gender, and Sexuality Studies; University Professor, Environmental Studies; University Professor of Letters

Shelli Elizabeth Weiler
BA, Wesleyan University; MFA, Yale University; MFA, Yale University
Visiting Professor of Art

Leslie Weinberg
BA, Case Western Reserve Univ; MFA, University of Connecticut
Retired Artist-in-Residence, Theater

Stephanie Kuduk Weiner
BA, University Minnesota Mpls; PHD, Stanford University
Professor of English

Michael P. Weir
BS, University of Sussex; PHD, University of Pennsylvania
Co-Coordinator, Informatics and Modeling; Professor of Biology; Professor, Integrative Sciences

Matthew Jason Weise
BS, University of Wisconsin-Milwaukee; MS, Massachusetts Institute of Technology
Visiting Artist-in-Residence in Film Studies

Joseph Weiss
BA, University British Columbia; MA, University of Chicago; PHD, University of Chicago
Chair, Anthropology; Associate Professor of Anthropology; Associate Professor, American Studies; Associate Professor, Science and Technology Studies

Margot Weiss
BA, University of Chicago; MA, Duke University; PHD, Duke University
Coordinator, Queer Studies; Associate Professor of Anthropology; Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Ruth Striegel Weissman
DIP, University of Tubingen; PHD, University of South Carolina; MAA, Wesleyan University
Walter Crowell University Professor of Social Sciences, Emer; Visiting Scholar in Psychology

Sarah Wellons
AB, Princeton University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Astronomy; Assistant Professor, Integrative Sciences

Arthur S. Wensinger
MAA, Wesleyan University
Marcus L. Taft Professor of German Language and Literature a

Erica Peters Wessmann
BFA, Cooper Union for the Advancement of Science and Art; MFA, Yale University; MFA, Yale University
Visiting Professor of Art

T. David Westmoreland
BS, Massachusetts Institute of Technology; PHD, University of North Carolina at Chapel Hill
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

Michael F. Whalen
BA, Wesleyan University; MS, Springfield College Ma
Frank V. Sica Director of Athletics and Chair, Physical Education; Adjunct Professor of Physical Education

Geoffrey H. Wheeler
BA, Dartmouth College
Adjunct Professor of Physical Education; Head Coach of Men's Soccer

Tess Wheelwright
Director, Center for Prison Education

Duffield White
BA, Wesleyan University; PHD, University of Michigan
Associate Professor of Russian Language and Literature, Emer

James White II
BS, Birminghm Sthrn College; MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Visiting Scholar in Astronomy

Nicholas Whittaker
BA, Harvard University; MPhil, CUNY Graduate School and University Center; PhD, CUNY Graduate School and University Center
Assistant Professor of Philosophy

Ellen B. Widmer
BA, Wellesley College; MA, Tufts University; MA, Harvard University; PHD, Harvard University; MAA, Wesleyan University
Professor of Asian Languages and Literatures, Emerita

Sarah Wiliarty
BA, Harvard University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Co-Chair, College of Social Studies; Associate Professor of Government; Tutor, College of Social Studies; Associate Professor, German Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Steven Douglas Wilkinson
DMA, University of Hartford
Tuba Instructor; Private Lessons Teacher

Kim Williams
BA, C.W. Post Campus, LIU
Adjunct Professor of Physical Education; Head Coach of Women's Lacrosse

Vanessa French Williamson
BA, Bates College
Adjunct Assistant Professor of Physical Education; Head Swim Coach of Swimming Diving/Aquatics Director

Janice Willis
BA, Cornell University; MA, Columbia University; PHD, Columbia University
Professor of Religion, Emerita

Jon C. Wilson
Adjunct Assistant Professor of Physical Education; Head Coach of Men's and Women's Golf

Krishna R. Winston

BA, Smith College; MPHIL, Yale University; PHD, Yale University; MAA, Wesleyan University
Director, Susan B. and William K. Wasch Center for Retired Faculty; Marcus L. Taft Professor of German Language and Literature,; Professor, Environmental Studies, Emerita; Co-Director, Wasch Center Seminars; Visiting Scholar

Roy Wiseman
Bass Instructor; Private Lessons Teacher

Adam Wolfsdorf
MPL, Columbia University Teachers; PHD, Columbia University Teachers
Visiting Assistant Professor in Liberal Studies; Visiting Professor in Liberal Studies

Carol S. Wood
AB, Randolph Macon W College; PHD, Yale University; MAA, Wesleyan University

Edward Burr Van Vleck Professor of Mathematics, Emerita

Jennifer Piper Wood
BA, University of Connecticut; EDM, Harvard University; MA, Yale University; PHD, Yale University
Visiting Professor of English; Dean for the Class of 2027

Antonina Griecci Woodsum
BA, University of Massachusetts at Amherst; MS, University of Massachusetts at Amherst; PHD, Columbia University
Assistant Professor of American Studies

Y

Stephanie Yanosov
MA, Wesleyan University; BA, Quinnipiac University
Adjunct Assistant Professor of Physical Education; Head Coach of Women's Tennis

Sacha Yanow
BA, Sarah Lawrence College
Visiting Instructor of Theater

Jeffrey Yelton
BS, University of Florida; PHD, Pennsylvania State University
Visiting Professor of Mathematics

Lauren Murphy Yeoman
BA, Tufts University; MFA, Columbia University
Assistant Professor of Theater

Gary Yohe
BA, University of Pennsylvania; MA, SUNY at Stony Brook; MPHIL, Yale University; PHD, Yale University
Huffington Foundation Professor of Economics and Environment

Iris Yoon
PHD, University of Pennsylvania; BA, Swarthmore College
Assistant Professor of Mathematics

Hanna Yousuf
BA, College of Wooster; PHD, University of Wisconsin-Milwaukee; MA, University of Wisconsin-Milwaukee
Visiting Professor in Neuroscience and Behavior; Visiting Professor in Neuroscience and Behavior

Z

Camilla Zamboni
MA, Ohio State University
Section Head, Italian; Associate Professor of the Practice in Italian; Associate Professor of the Practice, Fries Center for Global Studies; Associate Professor of the Practice, Education Studies

Brianna Zawadzki
Staff Professor; Brinson Prize Fellow; Staff Instructor

Yared Zeleke
MFA, New York University
Visiting Professor of Film Studies

Balazs Zelity
BA, Budapest Business School; MA, Universite Catholique de Louvain; PHD, Brown University
Assistant Professor of Economics

Xiaoxue Zhao
BA, Yale University; PHD, Yale University
Assistant Professor of Economics

Su Zheng
BA, Central Conservatory of Music; MA, New York University; PHD, Wesleyan University
Director of Undergraduate Studies; Associate Professor of Music; Associate Professor, East Asian Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Yunjun Zhou
BA, Sun Yat-Sen University (iquest;iquest;iquest;iquest;); MS, University of Pennsylvania; MA, University of Chicago
Visiting Instructor of East Asian Studies

Xiaomiao Zhu
MA, Wesleyan University
Adjunct Professor of Asian Languages and Literatures, Emerit

Sebastian Zimmeck
LLM, University of California, Berkeley; PHD, University of Kiel; MS, Columbia University; PHD, Columbia University
Associate Professor of Computer Science; Fellow in Applied Computational Data Analysis

Jason Platt Zolov
BA, Wesleyan University; MBA, Columbia University
Visiting Professor of Quantitative Analysis

CATALOG DISCLAIMERS

A copy of the lists of officers and faculty, as well as academic regulations, for the 2023-2024 issue of the Wesleyan University Catalog was prepared as of August, 2023. Information about fees and expenses, financial aid, and scholarships applies to the academic year 2023-2024. However, plans of study, course titles, fees, expenses, and other matters described herein are subject to change at the discretion of the University. Such changes may apply to matriculated students. University policies and guidelines for their implementation are published online at wesleyan.edu (https://wesleyan.edu).

As required by law, a copy of the Wesleyan University security report is available upon request. This report includes statistics for three previous years on specific reported crimes that occurred on campus, on property that is owned or controlled by the University, and public property within a reasonably contiguous geographic area to campus. The report also includes institutional policies concerning campus security, crime prevention, the reporting of crimes, University policy on alcohol and drugs, and many other related matters. A copy of this report is available at the Office of Admission, the Office of Public Safety, or the Public Safety website located at wesleyan.edu/publicsafety (http://wesleyan.edu/publicsafety).

STATEMENT OF NONDISCRIMINATION

Wesleyan University admits students without regard to race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression, to all rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression in admission to, access to, employment in, or treatment in its programs and activities.

CATALOG ARCHIVE

Effective as of the 2017-2018 academic year, the university catalog became an online-only publication.
