RUSSIAN AND EAST EUROPEAN, AND EURASIAN STUDIES

REES121F Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

REES200 Histories of Ukraine
Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses a specific territory, it has also been a space where multiple communities--Ukrainians, Russians, Jews, and Poles--have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

REES204 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the

Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

REES206 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

REES216 Secularism: Godlessness from Luther to Lenin
Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

REES219 Russian and Soviet History, 1881 to the Present
Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the

most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

REES220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

REES223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

REES224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

REES225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)
Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

REES226 Documentary Fictions
How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of nonfiction? How does creative nonfiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

REES227 Central Asian Music Ensemble
The Central Asian Music Ensemble is dedicated to the study and performance of music from a region at the crossroads of Eurasia, encompassing the post-Soviet states of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan. Established in Fall 2023, the ensemble currently comprises Kazakh and Kyrgyz plucked and bowed lutes, plucked zithers, end-blown flutes, clay ocarinas, jaw harps, frame drums, and other percussion instruments. Students learn the basic techniques of playing the instruments and singing in a variety of regional styles while exploring the history and cultural significance of music in nomadic and sedentary Central Asian societies through individual tutorials, group rehearsals, and engagement with visiting artists from Central Asia. In addition to playing traditional and contemporary repertoires from the region, students are encouraged to compose and improvise with ensemble instruments. Previous experience with string or wind instruments such as the guitar, violin, cello, or flute is desirable but not required. Students from diverse backgrounds are welcome to participate.

REES235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

REES240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

REES249 Is History True?: The Genealogies and Genres of Facts
History, as both genre and discipline, has a complicated relationship with truth. As a genre, it is popularly understood to be factual -- a reflection of what really happened; as a discipline, it constructs the very reality that it claims to represent. History, in short, is based on the "facts" that it constitutes as real. This is not to say that our world is "post-truth" or unreal or that all "facts" are equally true. Rather, it is to suggest that to access historical reality we need to investigate the genealogies and genres of "facts," since facts (even "alternative facts") are the building blocks that make reality politically, socially, and culturally meaningful. So how does a "fact" become real? What genres of proof are used to constitute historical truth, and by whom? In this class, we will use historical approaches to understand how "facts" gain meaning and agency and analyze the (often porous) boundaries between history, memory, myth, rumor, and conspiracy. To do this, we will consider case studies -- political tropes like "Godless Communism" or "Judeo-Bolshevism"; legal categories such as "genocide" and "crimes against humanity"; and historical frameworks like "the Holocaust" and the "end of history" -- to consider how they structure our worldviews. The format of the course will combine discussion seminar with independent research projects.

REES251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

REES252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

REES254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.

REES255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

REES256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

REES257 The Soviet Century (CLAC.50)
This course begins and ends with two crucially important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the Russian government with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to remake the world. On December 26, 1991, the Soviet Union collapsed into 15 countries. The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will explore the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the course will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider key theoretical writings in addition to poetry and prose by major Russian and Russophone authors. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. This class consists of lectures and focused discussion of essays and films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

REES260 Dostoevsky's BRAT'IA KARAMAZOVY
A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres

and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

REES263 Queering Russian Music
This course takes Russian and Russophone music out of its usual frames and asks what happens when we listen through the lenses of gender, sexuality, and power. Using methodologies of queer studies and queer theory, we consider how music both reflects and reshapes ideas of "Russianness." From imperial ballet to Soviet pop, from Tchaikovsky to contemporary queer artists in media, the course highlights intersections of music, identity, and politics. Special attention is given to the 2000s wave of Ukrainian musicians (Ivan Dorn, 5'nizza, and others) whose presence redefined the sound and style of Russian pop music in the 21st century. Students develop tools for critical listening, music analysis, and cultural interpretation while engaging broader debates about identity, politics, and belonging in today's Russian cultural sphere.

REES265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

REES266 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

REES267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

REES268 Nabokov
Vladimir Nabokov--brilliant writer, outrageous literary gamesman, and cosmopolitan exile--is a towering figure of 20th-century literature. His most famous novel, "Lolita," propelled him to international stardom and changed the transnational literary landscape. Child of a turbulent century, Nabokov wrote exquisite and at times disturbing prose in Russian and English, balancing between imaginary worlds and harsh realities. This seminar offers a sustained exploration of Nabokov's major Russian and American writings as well as film adaptations of his "Despair" (Rainer Werner Fassbinder) and "Lolita" (Stanley Kubrick). We will consider memory, exile, trauma, nostalgia, and identity as we read Nabokov, who saw existence as a "series of footnotes to a vast, obscure, unfinished masterpiece."

REES276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism.

We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

REES277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

REES279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

REES280 Russian Politics
The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

REES282 Modern Shamanism: Ecstasy and Ancestors in the New Age
The wise and mysterious native shaman has long held a particular fascination for Western scholars of religion, but does this figure even exist? What does it mean to be a practicing shaman today? Beginning with Eliade's definition of "archaic ecstasy," we examine the idea of the shaman, their role in the New Age movement, and the challenges faced by contemporary indigenous shamans, from negotiating international intellectual property rights law to Ayahuasca tourism and environmental activism. Course materials are supplemented by A/V materials from the instructor's fieldwork in Siberia.

REES289 Indigenous Religions: Politics, Land, Healing
From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

REES290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

REES291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

REES296 Soundscapes of Islam
From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

REES297 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian

heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

REES299 Imagining Communities: National Religions and Political Rituals
From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

REES306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions
Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other powerful "other-than-human persons" who must be respected, who can protect, but who are also feared. In the eyes of early Christians and often in contemporary popular culture, these animate and agentive landscapes can seem monstrous. We will explore medieval ideas about the Wild Man of the Forest, Indigenous and Feminist theory, and draw on case studies from North America, Siberia, Mongolia, and the instructor's fieldwork materials with landscape beings in Buryatia. The class will explore the different relationships human beings have with animate and sacred landscapes, think about the ramifications these relationships have for sovereignty over and in the "natural" world and why the idea that land is alive might be threatening. The course includes a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during Fall Break. The trip will be fully funded with no cost to the students). The trip is required, and in order to take the class you must be available to participate in this travel during Fall Break (10/24-10/27).

REES318 The Politics of Death: The Living, the Dead, and the State
This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

REES321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES344 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

REES344Z "If there is no God, then everything is permitted?" Moral Life in a Secular World
Please note: Students should expect some readings and assignments to be due during winter break, prior to beginning Winter Session. Please visit the Winter Session website for the full syllabus -- http://www.wesleyan.edu/wintersession.

In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

REES350 Twentieth-Century Russian Poetry (CLAC .50)
Taught in Russian, this course is dedicated to the reading of 20th-century Russian poetry in the original (Blok, Mayakovsky, Mandesltam, Akhmatova, Brodsky, Prigov, etc.). The course is appropriate for native speakers, heritage speakers, advanced and intermediate learners (with the minimum of four semesters of Russian).

REES352 The Communist Experience in the Soviet Union (CLAC.50)
Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

REES353 The Communist Experience in the 20th Century
Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history

itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

REES353Z The Communist Experience in the Twentieth Century
More than thirty years have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the Communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union but also beyond it (in Eastern Europe and Asia). In the global conflict between Capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day's materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day's online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

REES360 Siberia
Siberia has been a charged concept in world culture, mostly associated with the cold climate, exile, and prisons. Our course will pay tribute to these aspects of Siberia, grounded in historical and geographical reality, but it will also focus on an exploration of the region that goes beyond the stereotypes. We will explore Siberia as a place with diverse cultures, studying the folklore, literature, and films of its indigenous peoples. We will discuss how Russian literature and films conceptualize the colonization of Siberia, as well as the region's history of dissent and separatism, for example, oblastnichestvo and its aspiration to become "The United States of Siberia." We will explore modern Siberian authors and artists who became influential Russian classics while keeping their distinct Siberian roots, including Siberian punk as one of the most influential movements in late-Soviet and post-Soviet music. The readings will include writings by Nikolai Yadrintsev, Varlam Shalamov, Nikolai Klyuev, Yeremei Aipin, and Viktor Astafiev. The course is taught entirely in Russian. It is open to students who have completed four semesters of Russian or their equivalent, as well as for heritage and native speakers of the Russian language. The assignments will be diversified and adjusted to the individual levels of Russian. Students will get an opportunity to hone their listening, writing, reading, and speaking skills in Russian.

RUSSIAN LITERATURE IN ENGLISH

RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RULE208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RULE220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RULE223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RULE224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of

belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

RULE233 Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

RULE233Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

RULE235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RULE240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

Gen Ed Area: **HA-REES**
Identical With: **RUSS240F, REES240F, WLIT240F**
Prereq: **None**

RULE251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-REES**
Identical With: **RUSS251, REES251, WLIT244**
Prereq: **None**

RULE252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This

course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).
Offering: **Crosslisting**

RULE254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **REES254, RUSS254**
Prereq: **None**

RULE255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

Identical With: **RUSS255, REES255, WLIT259**
Prereq: **None**

RULE256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RULE265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RULE267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical

distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RULE276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

Prereq: **None**

RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RULE279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RULE290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type

of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RULE291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RULE321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSS205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RUSS208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RUSS220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RUSS221 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

RUSS223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RUSS224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom

cultural identities are contrived and performed. The course is conducted in English.

RUSS226 Documentary Fictions
How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of nonfiction? How does creative nonfiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

RUSS233Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

RUSS235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RUSS240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

RUSS251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RUSS252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RUSS254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century literature written in Russian by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature: Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Leo Tolstoy, who refused the nomination for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations. This class will also consider the role (and craft) of literary criticism. Pierre Bourdieu's and other theorists' writings on "cultural capital" will inform our discussions.

RUSS255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RUSS256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet

Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RUSS260 Dostoevsky's BRAT'IA KARAMAZOVY
A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

RUSS265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (MAD magazine and Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice's Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda's Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RUSS276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RUSS279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RUSS281 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

RUSS290 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RUSS291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RUSS297 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a

wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

RUSS320 Post-Soviet Cultures: from Chernobyl to Zelenskyy
In this course, we will explore short fiction, documentary prose, films, poems, and songs that embrace the period from the collapse of the Soviet Union to Russia's war on Ukraine. Many of these works reflect on the major events of the post-Soviet era and sometimes even influence the course of history. For example, the comedy series, Servant of the People, in which Volodymyr Zelenskyy starred as a history teacher who becomes the president of Ukraine, helped him win the presidency in reality. We will discuss works that address the Chernobyl disaster, the collapse of the Soviet Union, transformations of Putinism, the Revolution of Dignity in Ukraine, and Russia's full-scale invasion of Ukraine. We will explore some of the most famous Russophone authors of the contemporary period (Svetlana Alexievich, Liudmila Petrushevskaia, Viktor Pelevin, Vladimir Sorokin) and different aesthetic trends and genres: from Siberian punk in music to postmodern dystopia in literature. We will pay special attention to contemporary Ukrainian culture, reading Andrei Kurkov's Ukraine Diaries and watching the Oscar-winning 20 Days in Mariupol. All the readings, films, and songs will be studied in Russian. The course is open to students who have completed four semesters of Russian language or more (or an equivalent). It is also open to heritage and native speakers of Russian. We will work with advanced Russian grammar and vocabulary. The assignments will be diversified and adjusted to students' individual language levels.

RUSS321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSS360 Siberia
Siberia has been a charged concept in world culture, mostly associated with the cold climate, exile, and prisons. Our course will pay tribute to these aspects of Siberia, grounded in historical and geographical reality, but it will also focus on an exploration of the region that goes beyond the stereotypes. We will explore Siberia as a place with diverse cultures, studying the folklore, literature, and films of its indigenous peoples. We will discuss how Russian literature and films conceptualize the colonization of Siberia, as well as the region's history of dissent and separatism, for example, oblastnichestvo and its aspiration to become "The United States of Siberia." We will explore modern Siberian authors and artists who became influential Russian classics while keeping their distinct Siberian roots, including Siberian punk as one of the most influential movements in late-Soviet and post-Soviet music. The readings will include writings by Nikolai Yadrintsev, Varlam Shalamov, Nikolai Klyuev, Yeremei Aipin, and Viktor Astafiev. The course is taught entirely in Russian. It is open to students who have completed four semesters of Russian or their equivalent, as well as for heritage and native speakers of the Russian language. The assignments will be diversified and adjusted to the individual levels of Russian. Students will get an opportunity to hone their listening, writing, reading, and speaking skills in Russian.

SOC202 Social Analysis
This course is an introduction to the major components of sociological analysis: the language of sociological inquiry, research techniques and methodology, types of explanation, and the relationship between theory and research.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC206 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations:

200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC231 Sociology of Crime and Punishment
This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the American system of mass imprisonment is effective, and how we might envision improvements and alternatives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC234 Media and Society
This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding, pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC240 Comparative Race and Ethnicity
This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different consequences. Through comparisons of Western and non-Western societies, we will investigate how race and ethnicity operate as markers of social exclusion in distinctive ways.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC241 Mental Illness and Society
Psychiatric disorders are commonly viewed through a purely biomedical and/or a psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private "personal trouble," is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **None**

SOC243 Being Together: Affect, Care and the Politics of Experimental Kinship
This course looks at unique and experimental forms of kinship, community, and intimacy through the implicit and explicit challenges they offer to the foundational role of the privatized family unit to civic and economic life. We will look at historical examples of collectives, communes, and intentional communities to explore the challenges and possibilities of alternative forms of being, living, and working together. This course will also focus on college as a perhaps unique context for work about and involving friendship and collaboration, and will involve students in creative and analytical projects. There will be a specific focus on digital culture and social media, aging and vulnerability, interspecies companionship, and the politics of affect.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SOC**
Prereq: **SOC151**

SOC244 Feminist and Queer Theories of Social Reproduction
This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.
Offering: **Host**
Grading: **A-F**

SOC245 Intersectionality and Identity (FGSS Gateway)
Intersectionality has emerged as a central motif within both social analysis and political debate. We will examine the origins of this framework within black feminism and women-of-color activism, as well as the way this framework traveled to, and is used within, sociology and other disciplines. The course will also address critiques of intersectionality that have emerged within and outside of feminist theory, and extends the concept of intersectionality to think through intersections between various social identities and social institutions such as capitalism and colonialism.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **FGSS245**
Prereq: **None**

SOC246 Social Movements
How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

SOC247 Drugs, Culture, and Society
This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not.

SOC255 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex
This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

SOC259 Cultural Studies of Health
Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across

human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice. This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SOC260 Sound and Screen
This course explores contemporary developments in the study of media, focusing on three primary areas--music, video games, and the Internet--that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and "unpack" some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupation with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

SOC262 The Rise and Fall of the Nuclear Family
In the United States, the "American Dream" family has often been thought to include a heterosexual, two-parent household with 2.5 kids, a house in the suburbs, and a white picket fence. While this is no longer the dominant family form, this "ideal" still holds great symbolic meaning, and non-normative family forms continue to be stigmatized and pathologized or rendered illegitimate and not considered as family. This course will examine the changing dynamics of families in the US and worldwide. We will consider how families function both within and beyond the context of the nuclear family as well as the political, legal, and social implications of who counts as family. We will focus on how race, class, gender, and sexuality shape family life and we will explore themes including marriage promotion policy, the division of household labor, gender inequality, intergenerational families, non-biogenetic kinship, families of choice, and more. Course texts will include sociological, historical, and queer theory approaches, in addition to sources from popular media. Through reading and engaging with literature on diverse family forms, this course aims to use a critical lens to approach the concept of the nuclear family and to consider the future possibilities of the family as a social institution.

SOC265 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.

SOC266 The Social Life of Data
All over the world, actions, feelings, and thoughts are becoming data. Divining future desires and anxieties, promiscuous digital networks collect and collate a wide variety of everyday data, marking populations as risky or profitable. Participation in these networks is frequently mandatory in order to access a wide variety of political, social, and economic opportunities. Even if you manage to delete your account or withdraw from these networks, digital systems leave ghostly activity traces or zombie profiles waiting to come back to life. The rise of these data systems offers profound sociological and philosophical challenges to how we understand social life, power, control, memory, conscious thought, and even the nature of humanity and the environment. This course engages with the impact of data infrastructures and digital technologies in a non-deterministic fashion, which is to say that technical systems and structures, while powerful, do not fully determine social possibility. Focusing on historical, established, and emergent data systems, we look to understand technology as a field of affordance and prohibition, with feelings, thoughts, and politics dynamically interacting with rapidly modulating standards, norms, and methods. Course themes address a variety of theoretical topics that have been central to the social study of science and technology, including the efficacy of critique in encountering information processing systems.

SOC269 Bad Sex
In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, "Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations." Brooks is far from alone in this critique of promiscuity. What is it about "casual encounters" and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

SOC270 Urban Societies
This course is a study of the social construction of the city focused primarily on the U.S. context. It examines various themes related to the development of modern cities beginning with the consolidation of capitalism during the industrial revolution. The class will consider the distinct experience of urban life as opposed to other modes of existence, or what Louis Wirth calls "Urbanism as a Way of Life." In addition, students will look at forms of stratification such as race and class inequality and their relationship to spatial issues such as suburbanization and revitalization. Also considered are contemporary issues such as globalization, the revival or renewal process of many American cities, environmental issues, as well as the effect of new media on how we conceptualize the city. All of this will be done by focusing on the relationship between individual experiences and the effect of the urban environment on issues of identity construction and interpersonal relations. In order to develop critical thinking and engagement around these urban issues, the course emphasizes weekly writings and class participation in development towards a final paper.

SOC274 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

SOC275 The Hair Class
Hair does things. It covers and expose us. We pluck, conceal, wax, curl, and otherwise manage it. Its presence and absence serve as sites of critical engagement, personal and cultural expression, and political strife. This course will explore the social significance of hair, wherever, and on whomever it grows (or fails to grow). We will discuss daily practices, politics, histories, and legends about the manipulation of human and animal hair. We will draw on social theory, visual and social analyses, and cultural commentary to understand hair follicles as both incredibly ordinary and fantastically bizarre. This is an advanced discussion-based research seminar that is writing-intensive.

SOC278 Bored in the House: Work, Leisure, and the Domestic Mundane
At the beginning of the COVID epidemic, Detroit rapper Curtis Roach released an instant classic on TikTok, a fifteen second ditty capturing the zeitgeist of the coming wave of domestic isolation: "Okay I'm bored in the house, and I'm in the house bored." The recent waves of mass quarantine, both forced and quasi-voluntary, have crystallized our focus on the domestic, and its attendant crises. More than ever, we must confront the vanishing material and psychic separations between work and leisure, the badly needed reimagining of public and private not anchored in a spectral domestic privacy, and the foundational dynamics of class, race, sexuality, gender, capacity, and institutionalized violence that structure where we can live, work, and play. This course has a special focus on the exhausting digital, which sucks up ever more energy (both in terms electric power--see the astounding energy use to train and deploy generative AI--and human attention and engagement) while leaving us with sleeping problems, carpal tunnel, and phantom vibrations. This course seeks to be not just an

academic study of the themes of this course, but an ongoing experiment in boredom praxis. We will think about what we do when we are bored, and why, and we will try to sit with and direct our boredom in gently investigational ways. This also extends to critically thinking about how we do work in this class, and our techniques and tactics of maintaining leisure time in academia.

SOC279 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.

SOC280 Abolition and Social Praxis
This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

Prereq: **SOC151**

SOC285 The Sociology of Reality TV: Race, Colorism, and Xenophobia
The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether responsibility exists on the networks who help create these shows.

SOC288 The Medium and the Message
Do you like to draw autobiographical comics, record bedroom pop songs, make queer zines, write ChatGPT poetry, choreograph burlesque performances, design and print ugly posters, sew avant-garde garments, create absurdist TikToks, or produce niche podcasts? This seminar is for students who want to think through the sociological content, implications, and impact of their creative work. In the course, students will develop and make substantial progress on a creative project that addresses sociological themes in its form and/or content. Students need not have any formal training, but should have demonstrated experience in their preferred medium. Course texts will address sociological issues surrounding cultural production, including representation, dissemination, and professionalization. Class sessions will be divided between discussion of readings and example work, experimental exercises, workshopping, and student presentations.

To apply for the seminar, students should submit the following: 1) a description of the specific project they wish to develop over the semester, keeping in mind that they will be expected to make and share progress each week; 2) a sample of previous work that demonstrates familiarity with any necessary technology

(software, instruments, tools, recording devices, etc.); and 3) a "bibliography" of personal influences (including any relevant readings, creative work, etc.).

SOC292 Death and Dying at the End of the World
Death looms large over life. The digital has given people unprecedented access to global media focused on death and dying, from far-flung calamities killing thousands to intimate gofundme pages for your friends' cancer treatments. In an age of data-enabled prediction and preemption, death is capricious and untimely, remaining stubbornly resistant to scientific and philosophical certainty, despite ever more complex systems for death management. Meanwhile, circulating discourses of ecological and political catastrophe have proliferated thoughts of genocide, extinction, and planetary death. In this course, we look at contemporary encounters with death and dying at a variety of scales, from the search for death's meaning/a meaningful death, to understanding death as a public feeling and inspiration for political imagination.

SOC294 Techno-Latinidad: Science, Technology, Institutions and the Making of Latino Identity (FYS)
The growth of the US Latina/o population in the United States has prompted intense study of the experiences of this heterogenous and multifaceted community. Scholars, scientists, pollsters, activists, artists, entrepreneurs, and policymakers are all currently asking numerous questions about the present realities, impact, and future opportunities of Latinas/os in this country. But as we amass knowledge about Latinas and Latinos, it is critical to also ask how it is that Mexicans, Puerto Ricans, Cubans, Dominicans, and many others came to be known and often to know themselves as "Hispanics" and as "Latinas/os" in the first place? When and how has the Latina/o identity category shape-shifted, been contested, strategically employed, maligned, and also celebrated in the United States and beyond? What are the stakes and the prospects for future representation, unity, belonging, and equality in American social life for all those who comprise this complex category? These questions and the histories that they urge us to keep present root our ways of knowing and living the category of Latino/a in the United States today. In this course, we will explore these questions, focusing on the sociological processes of identity formation and racialization, through the lens of Latinidad across the 20th and 21st centuries. While the history of Latinidad in the United States is conventionally narrated through stories of social movements, bureaucratic negotiations, and strategies of media and marketing, this course will update and expand this repertoire in important ways. Incorporating theory and research from science and technology studies, the course will place fresh emphasis on Latina/o bodies to excavate lesser-known histories of and emerging developments in medical, forensic, and surveillance technologies to track the accelerating technoscientific construction of Latinindad.

SOC296 Drugs: Mysticism, Optimization, Oblivion
Drugs are central to the American story. Many take drugs to wake up, drugs to keep focused at work, drugs to calm down, drugs to party, drugs to understand the self and the world, drugs to mitigate pain and drugs to fall asleep. American drug consumption is a significant driver of global production in both licit and illicit markets, while the 50+ year American "war on drugs" has violently reshaped global political economies at a massive human and economic cost, while failing to curb usage or trafficking. In recent years, piecemeal legalization of marijuana and psychedelic mushrooms, the integration of MDMA and ketamine into pharmacological research and various therapeutic modalities, and the opioid crisis spillover from doctors offices to city streets have further frayed the already blurred distinctions between legal and illegal drugs. Especially since the middle of the twentieth century, drugs have also been deeply intertwined with American art and cultural production, with all manner of media, youth culture, nightlife, spiritual and religious practices and even sports entangled with, enhanced by, and responsive to substances. In this course we focus on three impulses that drive drug use in the contemporary moment; the desire to expand or alter consciousness, to sharpen, heighten and optimize the mind and body, and to escape from the body and the world. While these impulses might be neatly segmented into archetypes like the hippie/psychonaut, office worker/student and junkie/slacker, we will explore the sometimes surprising overlaps and bleed between these different visions, reflected, for example, by the South American psychedelic ayahuasca's spread in America from countercultural ceremonies for mind-expansion to quick fix wellness retreats for tech workers. This course is focused on the American experience, while grounded in an increasingly global context, and takes neither a judgemental nor celebratory orientation to drug use.

SOC298 How to Write about Pop Music and Why
What does it mean to write critically about a pop song or album at a time when anyone can listen to it with minimal effort? What is the value of an artist profile when artists' careers and lives are so publicly intertwined? How does a critic derive the aesthetic or moral authority to comment on music made by performers with dissimilar backgrounds, lifestyles, and values? In this class we'll look at the way the critical discourse around popular music has evolved in terms of immediacy, accessibility, scope, and purpose, paying attention to both "classical" pop journalism and ways of engaging with music that, while not quite reviews, nonetheless contribute significantly to the discourse around it. Most of all we'll listen to music together and explore different forms of interpreting and making sense of it.

SOC299 The Future Perfect
Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

SOC300 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

SOC302 Paternalism and Social Power
This course will consider the construction of caring and helping in the structuring of social relations. What does helping entail? How does power operate in the velvet glove? What, if anything, lies beyond paternalism? How does social change occur? Competing perspectives on paternalism from within social and political theory will be considered as vehicles for tracing power dynamics in a survey of U.S. social formations related to family, gender, sexuality, race, labor, class, medicine, criminal justice, religion, environmentalism, and international relations.

SOC308 Baby Got Back: Embodiment, Gender, and Sexuality in Black Music
This multimedia course uses a sociocultural approach to explore how black bodies continue to be sized, classed, sexed, and gendered through black musical expression. We will examine black music as a cultural object, both embedded in and responsible for steering national cultures, to argue that black music is indeed a lens through which to examine the struggles, contradictions, and triumphs of black peoples in the U.S. and abroad. Connecting theoretical frameworks of race, embodiment, socioeconomic status, gender, and sexuality with: (1) visual cultures of black bodies in motion (stemming from minstrelsy and chitlin' circuits to musicals and music videos) and (2) a variety of songs written, produced, and/or performed by black musicians (that include but are not limited to: the blues, jazz, rock and roll, rhythm & blues, soul, afrobeat, hip hop, dancehall, pop, soca, hip life, and reggaeton), this class will seek to interrogate how black music creates, replicates, regulates, packages, and distributes identity through a paradigm of production and consumption. We will discuss topics such as commodification, resistance, and representation while listening to artists such as Nina Simone, Sir Mix-A-Lot, Las Crudas, former 2 Live Crew member Luke, Biggie Smalls, Mr. Killa, De La Soul, Lil' Kim, Outkast, Jill Scott, Ayisoba, Big Freedia, Alison Hinds, Nicki Minaj, and Fela Kuti to attempt to understand exactly what type of power (and magic) that music possesses.

SOC309 America's Lure: The Politics of the Transnational US University
Over the course of the last decade the number of international students traveling to the United States has more than doubled. As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the "lure" of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race

studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university.

SOC313 Time, Masks, Mirrors: Aging in America
Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the sociocultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the "aging" mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others.

SOC315 The Health of Communities
Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown's Community Health Center (CHC) & Moses Weitzman Research Institute.

SOC318 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments
This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Truillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

SOC319 Theories of Capitalism
Capitalism has profoundly shaped world history, acting as one of the primary drivers of social change, and working to shape a tremendous variety of social institutions ranging from colonialism to our sense of time. This course takes a critical approach to the study of capitalism, looking at the ways capitalism has intersected with and transformed the nature of social oppression (particularly in relation to nation, race, gender, and sexuality), as well as the ways it works to shape everyday consciousness. Historical changes within capitalism will be explored, considering particularly the rise of corporate capitalism and of contemporary neoliberalism. We will examine a wide variety of theoretical approaches to capitalism, taking Marx's thought as a jumping-off point for elaboration and critique. We will conclude by considering alternatives to capitalism that have been proposed in both historical and contemporary contexts, together with an examination of practical efforts to implement these possibilities.

SOC321 Disgusting? Revolting!
Who or what do we find utterly repugnant? Are we the nasty, vile ones? Is it possible that we are unconsciously attracted to that which disgusts us? What might it take to turn disgust into desire, and vice versa? In what ways might

disgust indicate not only disruption or transgression, but some kind of threat and alternative to the status quo? What might be lost or gained when the disgusting clean up their acts, or are shown to have been respectable all along? In this course we will explore the politics of filth, particularly in terms of the desires, attitudes, identities, and behaviors that elicit disgust. We will consider how disgust infuses political ideology--i.e., how people understand and approach the social groups that disgust them (for example, racialized immigrants, queers, fat people, and drug addicts), but also the wealthy, the privileged, the "basket of deplorables." We will also explore the psychoanalytic relation of disgust to desire.

SOC322 The Sociology of Nina Simone
An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as "Mississippi Goddam" and "To Be Young, Gifted and Black" undoubtedly made social, cultural, and political contributions to American society. However, much of Simone's personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone's career, but ignited her passion to speak truth to power; and utilize cultural and sociological paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

Prereq: **SOC151**

SOC323 "Racing" Across Africa
Is Africa post-racial? Have you wondered how someone becomes Black/African, white, ethnic, and/or native and its implicit hierarchies, which scholars refer to as racialization? When you think about race and racism, does Post-Independence (PI) Africa come to mind? If not, why is PI Africa removed from our understanding of race? How can we think about Africa today as always undergoing processes of racial imperialism and how does it intersect with sexuality, gender, and class? Lastly, how do we conceptualize Post-Independence Africa in relation to the African diaspora?

We will go from Ghana to Kenya, Nigeria to South Africa, to understand how race is articulated in these spaces during colonization and after formal colonization has ended. We will also gain theoretical language needed to refute raceless logic. These processes will help us recognize why PI Africa is perpetually marginalized within a globally racialized capitalist economy. This course will contribute to thinking about forms of solidarity in our own lives toward visions of decoloniality, equity, and justice for those racialized as Black, especially in Africa.

SOC324 Black Girl Magic?: Survival and Speculative Fiction in the Social World
"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag -- cisgender, well-to-do, fit/thin, non-disabled, and/or famous -- and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/quare studies, popular culture, political science, speculative fiction, and cultural sociology.

SOC326 Race, Fantasy and Fetish
What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to `race play¿, this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

SOC328 Experiments in Public Life: Creating and Presenting Socially Conscious Music
This course will revolve around examining and participating in this realm of music-making through different lenses. We will examine varied relationships a creator can have to the issue/stance to which the art relates, varied ways the art can be presented, varied ways of identifying and reaching different target audiences, and varied potential outcomes. Students will create work in response to a diverse set of prompts designed both to refine their individual goals of artistic and community engagement and to challenge them to create outside of those zones. In addition to individual and collaborative creative work, there will be readings and listening assignments encompassing a genre-diverse array

of music (ranging from Olivier Messiaen to Charles Mingus to Nina Simone to Public Enemy, to name just a few) accompanied by some brief reflective writing assignments. Work created in the course will be shared with the community (defined multifacetedly) in a variety of ways online and in person, with the students bearing much of that organizational and curatorial responsibility.

SOC333 Take Care/Say No
Situated between Maxine Waters's "reclaiming my time" and Nikole Hannah Jones's "I refuse," Take Care/Say No is a course designed to interrogate how Black womxn make decisions regarding their own survival in the face of overwhelming sociocultural, political, and economic commitments and obligations. Tagged as universal caretakers, Black womxn around the world often confront not only the legacies of colonialism, slavery, and imperialism through tropes like "mammy" or "superwoman," but also local definitions of womanhood, laced with misogynoir, that outline what they should do, how little space they should take up, and how grateful they should be for even the smallest leisure time. Paying attention to how the Covid-19 pandemic blurred lines between public and private life, students will closely read Black feminist/womanist texts to critically engage with the fields of cultural sociology, medical sociology, psychoanalysis, and political science. Throughout this course, we will 1) decipher the meaning of Black womxn's labor and leisure practices in their families, communities, and workplaces, and 2) challenge our understanding of terms like "care-work," "self-care," and "rest" to fully reimagine a world where Black womxn are free to say no and take care of themselves.

SOC352 Race, Immigration, and the U.S. Empire
Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by relaying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are grafted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

SOC355 The Personal Is Social
How do social forces show up in our everyday lives? Which forces grab our attention, and why? When are we more inclined to see something as individual rather than social? What kinds of conclusions can we reasonably draw about the social world based on our individual experiences? In this seminar, students will read texts that use personal experience as a foundation for sociological observation, reflection, and insight. We will spend time thinking about the appeal and limitations of various methods, surveying a range of approaches to incorporating personal experience into scholarship, including memoir, autotheory, and autoethnography. Students will practice these kinds of writing throughout the semester, culminating in a final paper that blends personal writing with sociological analysis.

SOC399G Advanced Research Seminar: Introduction to Critical University Studies
The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we're here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through a feminist, queer, and anti-racist frame. What, we will ask, does it look like to think in and about the university at this historical moment? What does it mean to consider the university's history in relationship to power and the nation-state? What are the gender, sexual, class, and racial politics of knowledge production? And how can we most productively take up the university itself as an object of scholarly inquiry?

SOC399H Hot Mamas: Black Women, Sexuality, and Body Size
Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat Black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside Blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of Black women. We will journey our way through this course using the works of Black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we

believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

SOC399I Advanced Research Seminar: Assembling the Self
This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will read a variety of autoethnographic texts, in which the authors use personal experience as a foundation for sociological reflection and insight. We will spend time thinking about the political and methodological benefits and limitations of autoethnography, surveying a range of approaches to incorporating one's experience into scholarship, and attending to the ways that autoethnographic texts respond to existing research and theory. In the second half of the class, students will develop a substantial and original autoethnographic essay, with class sessions focused on workshopping and presenting writing in progress.

SOC399K Advanced Research Seminar: Law & Society
In this course we will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government--the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

SOC399L Advanced Research Seminar: The Social Body
This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will survey topics, perspectives, and approaches within the sociology of the body--a disciplinary subfield that examines the human body as a site where the social materializes and is rendered legible--as well as considering more generally the craft of academic scholarship. Substantive topics will include ADHD, anorexia, pain/pleasure and disability, and racial/ethnic cosmetic surgery. This overview will serve as a foundation for the second half of the course, in which students will develop a substantial and original research essay, with class sessions focused on workshopping and presenting writing in progress.

SOC399M Abolitionist University Studies
This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

SOC399R Advanced Research Seminar: I Write What I Like
Love letters, propaganda, admission essays, manifestos, research papers, memoir, profiles, invitations, journaling, tweets, and texts. We write a lot. Whether it's grammar and syntax or word counts and page limits, we do so with rules in mind that help shape what gets said. We fret over whether to write in first or third person, what type of citations to use, and whether we have enough evidence. Too often rules are imposed before we've sorted through our thoughts, let alone what we want to say about them. As we think about these formal and informal rules, we'll consider the specificities and usefulness of various forms of writing, and how each presents constraints that open up or foreclose different kinds of thoughts about society.

We'll think about how writers, activists, and academics approach writing to move us in different ways. We'll experiment with and repurpose diverse genres as we develop our own approaches to writing as an essential tool of social analysis.

THEATER

The Theater Department considers the critical and creative study of each theatrical area to be an essential component of a liberal arts education. Offerings include courses in acting; civic engagement and outreach; criticism, ethnography, history, and literature; costume, lighting, scenic, and media-based design; directing; performance studies; theory; performance art; playwriting; puppetry; and solo performance.

Many theater courses are cross-listed with academic departments in all divisions, as well as Wesleyan's colleges. Theater faculty and majors are committed to collaboration within and across departments. The Theater Department strongly encourages students to attend performances and lectures sponsored by all performing and visual arts departments.

Each year the department sponsors productions and other events in a variety of theatrical forms; some are directed by faculty members or guest artists, while others are directed by undergraduates. Theater courses and productions reflect the interdisciplinary and multiple interests of the faculty and majors. Theater Department productions take place in the Center for the Arts Theater, the Patricelli '92 Theater, and other spaces on campus. The Center for the Arts (CFA) is a state-of-the-art facility with 400 seats. The Patricelli '92 Theater is a historic brownstone building with a traditional proscenium. Both theaters are highly flexible and can be used as black boxes. Site-specific performances take place across campus: in the Davison Art Center, the Center for African American Studies, and the Russell House, to name a few. All theaters and alternative spaces are available to faculty and senior thesis productions. The theater department is part of the Center for the Arts, a complex of studios, classrooms, galleries, performance spaces, departments, and programs that provide a rich, interdisciplinary environment for study and performance.

AFFILIATED FACULTY

Rashida Z. Shaw McMahon
BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Chair, English; Associate Professor of English; Associate Professor, Theater; Associate Professor, African American Studies

BA, Sarah Lawrence College
Visiting Instructor of Theater

DEPARTMENTAL ADVISING EXPERTS

Ron Jenkins, Marcela Oteíza (Dance Dept)

- Undergraduate Theater Major (p. 1112)

THEA105 Production Laboratory
This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions happen. All sections will participate in the backstage work of the Theater Department's productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA109 Introduction to Drafting for Theater
This course provides an introduction to drafting as a means for communicating design ideas for theater. Students will explore the basic principles of hand drafting before transitioning to 2D and 3D CAD modeling via Vectorworks. Students will become familiar with theater industry drafting standards and will learn to use technical drawings as a way to understand space, volume and scale. Assignments will be largely project-based, and students will share and discuss their work in class. For Theater Majors, this course counts towards the Technical Practice requirement.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA110 Drafting for Theatrical Design
This course is intended to provide students with a basic knowledge of computer drafting, for theatrical design and other performative arts. Students will learn the language of the line, the drafting standards for theater, as codified by the United States Industry of Theatre Technology (USITT), and the means to create accurate, measured drawings. We will cover topics including, geometry, line weights, scale, theatrical drafting conventions and symbols, ground plan drawings, elevation drawings, section drawings, dimensioning, page layout, and printing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA114 Incarcerated Stories: Documenting In/Justice
Students in "Incarcerated Stories: Documenting In/Justice" will collaborate with formerly incarcerated individuals and their families to create performances of theater and music based on interviews, trial transcripts, prison memoirs, and other texts related to mass incarceration. Students will learn how to apply their skills as writers, performers, or musicians to community service and activism as they learn about the United States' criminal justice system and its position at the heart of systemic racism in America. The class will be taught remotely and the performances generated by the students and their formerly incarcerated collaborators will be disseminated as widely as possible, with the objective of amplifying marginalized voices to raise awareness of mass incarceration's social impact and the need for carceral reform. Due to the collaborative nature of this course, and its dependence on interaction with formerly incarcerated individuals and their family members who will be visiting the class remotely via Zoom, weekly online attendance is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA114Z Incarcerated Stories: Documenting In/Justice
Students in "Incarcerated Stories: Documenting In/Justice" will collaborate with formerly incarcerated individuals and their families to create performances of theater and music based on interviews, trial transcripts, prison memoirs, and other texts related to mass incarceration. Students will learn how to apply their skills as writers, performers, or musicians to community service and activism as

they learn about the United States' criminal justice system and its position at the heart of systemic racism in America. The class will be taught remotely and the performances generated by the students and their formerly incarcerated collaborators will be disseminated as widely as possible, with the objective of amplifying marginalized voices to raise awareness of mass incarceration's social impact and the need for carceral reform. Due to the collaborative nature of this course, and its dependence on interaction with formerly incarcerated individuals and their family members who will be visiting the class remotely via Zoom, weekly online attendance is required.

THEA115 America in Prison: Theater Behind Bars
This course will give students the opportunity to study theater as a tool for social activism and to apply that knowledge to practical work in institutions that are part of the American criminal justice system. No previous experience in theater is necessary. Students will be encouraged to use their own skills in music, art, and drama as they devise ways to use the arts as catalysts for individual and social transformation.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA118F Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT118F**
Prereq: **None**

THEA125F Performing Contemporary Playwrights (FYS)
This course will explore performance/close readings of classic and contemporary writers, specifically BIPOC artists. Plays by Migdalia Cruz, Dominique Morisseau, Luis Alfaro, Chay Yew, Sarah Ruhl, Quiara Alegria Hudes, Lynn Nottage, Lorca, the Greeks, and Shakespeare, are currently under consideration. No performance experience is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

THEA135F Documentary Performance: Theater and Social Justice (FYS)
This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course's initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA143 Gospel, Rap, and Social Justice
Students in this course will explore the creation of theater and music inspired by a collective reading of Dante's Divine Comedy, Michelle Alexander's The New Jim Crow, Anna Deavere Smith's Notes from the Field, and a range of texts examining the impact of mass incarceration on communities of color. The course will examine how activists and artists have drawn on gospel, rap, spirituals, and other musical and theatrical forms to survive, heal, and advocate for social change. Through creative and analytical work, students will consider the contemporary relevance of Dante's poem to issues of justice, voice, and power, with an emphasis on amplifying marginalized perspectives and interrogating the structures of the carceral state.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA145F Clash of the Titans: Classical vs. Contemporary Voices in Theater and Film
This course will explore how classic texts have informed and inspired contemporary writers of theater and film, and how seemingly disparate parts of the canon enrich and illuminate one another. We will dive into close readings of plays, exploration of scenes from an actor's point of view, supplemental viewings and reflections/critical analyses of films and plays, and an original adaptation. Plays by Euripides, Luis Alfaro, James Ijames, Shakespeare, Ibsen, and Lucas Hnath are currently under consideration. Film viewings include Black Orpheus and Hamlet.
Offering: **Host**

Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA150 Introduction to Performance Studies
What is performance? Is it an event or an action? Is it what happens on a stage or in your living room? Furthermore, what does performance have to do with our understanding of how race, gender, sexuality or community function both historically and in the present? This course approaches theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking. Students will be introduced to the theoretical, critical, and creative field of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performances ranging from the play "Fairview" by Jackie Sibblies Drury, to "Fires in the Mirror" by Anna Deveare Smith, to the punk performance work of Sister Spit, and the story weaving work Spiderwoman Theater. In this writing-intensive course we will pay particular attention to queer artists and artists of color.

THEA172F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

Prereq: **None**

THEA175F August Wilson (FYS)
During his lifetime, the world-renowned African American playwright August Wilson graced stages with award-winning plays from his "Century Cycle." This course examines the cycle's 10 plays in the order in which the playwright wrote them, from Jitney (1982) to Radio Golf (2005). In all cases, we pay special attention to the playwright's presentation of language, history, memory, religion, visual art, and music within his oeuvre.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL176F, AFAM177F**
Prereq: **None**

THEA180 Reading Plays for Production: Conceiving for Performance
Propose, read, and discuss plays in consideration for production for Theater Department Mainstage. Reading a script is different than reading a novel: in this class, we will examine how to read a text for performance. Over the course of the semester, we will consider a range of plays and approaches to performance--from classics to contemporary plays to devised work. In the course, students will explore plays and performance ideas recommended by the community with an emphasis on examining how they might operate as productions within the Theater Department's Mainstage. Students will lead discussions, gain skills in text analysis, dramaturgy, and creative and practical thinking as they consider what type of work the Theater Department might produce. This class will result in a slate of scripts and performance ideas that will be offered to the Theater Department faculty for consideration for one of the Mainstage productions. This course counts towards the Theater Arts category for the THEA major. This course may count (one time only) towards the Performance Practice credit requirement for the THEA major.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA183 The Actor's Experience
The Actor's Experience is an introduction to the practices of acting in rehearsal with a director. It is held in conjunction with THEA281- Intro to Directing; students will be working directly with the student directors in that class. Basic aspects of staging, collaboration, script, and character analysis will be covered. Commitment to attending scheduled rehearsals is vital. Each actor will have the opportunity to perform in both a short-form scene (mid-term) and long-form scene (final), performed in front of the class and invited guests. This class is a chance to be in community with other students interested in theater, and practice collaboration and care. Together students will consider why theater matters, and how theater-makers can offer more care to themselves, each other, and our audience. Students will participate in in-class staging exercises, outside rehearsals with peers, reading discussions, and viewing plays. The Actor's Experience is a half-credit class intended for majors and non-majors at varying levels of experience and is held in conjunction with the Intro to Directing class.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA185 Text & Visual Imagination: Introduction to Eco Design for Performance
Eco-scenography is an introduction to design for performance. In this course, students will learn the core principles of design for performance while exploring sustainability and environmental practices with an emphasis on understanding of materials, such as production cycle and manufacturing process, as well as integrating environmental justice paradigms by analyzing specific case studies. Through three specific project-based assignments--1. object design, 2. garment design, and 3. environmental design--students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.

This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**

Prereq: **None**

THEA199 Introduction to Playwriting
This course provides an introduction to the art and craft of writing for theater. In the course of the semester, students will create plot and characters, as well as compose, organize, and revise a one-act play for the final stage reading. The course will help students develop an artistic voice by completing additional playwriting exercises, as well as reading and discussing classic and contemporary plays. The instructor and students' peers will provide oral and written feedback in workshop sessions. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **ENGL269**
Prereq: **None**

THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern
This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's Poetics and Plato's Republic. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy ¿ for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-CLST**
Identical With: **CLST202**
Prereq: **None**

THEA203 Playing in the Theater Archive: An Introduction to Performance Studies
This class will serve as an introduction to theatricality, performance studies, and aesthetic theories. We will analyze plays and performances as we examine classical and contemporary conceptions of the theatrical. Given the complex and varied roles theater has played throughout history, we will begin by placing pressure on the terms "theater" and "history." We will pay particular attention to the intersections between theater history, dramatic literature, cultural performance, and the role of the theater archive as we explore key moments in theatrical development. Readings will be organized geographically and diachronically, giving us a mobile and flexible account of theater, theory, and practice across a variety of cultures. At the end of this course, students will be familiar with touchstones in theater history; be able to write a critical and descriptive performance paper; demonstrate a knowledge of critical performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA204 A Nation and its Theater: Cultural and National Identity in Performance
In the wake of Black Lives Matter, the insurrection in January 2021 on our nation's capital, a global pandemic, and the Trump presidency, the very notion of what "America" is, has been, or ever was is being grappled with on a global scale. The nation is fractured in its sense of national and cultural identities and is struggling to imagine a collective future. This course examines the concept/model of a "national theater" and interrogates the cultural, historical, and political role these institutions play within their countries. It examines what role the theater can, should, or should not play within the formation, reinforcement or dismantling of national and cultural identities.

Through an examination of models such as the Teatro Nacional de Venezuela, the National Theater Company of China, the Uganda National Cultural Center, Ireland's Abbey Theater, and France's Comédie-Française, this course looks at: (1) how politics, history, and culture give rise to/craft the shape of national theater agendas; (2) the role of national theaters in building/challenging/reinforcing national and cultural identities; (3) how government agendas and public funding can affect the role that national theaters play; and (4) how the colonial legacy of a European national theater model has influenced non-Western models.

Students will engage with theoretical and non-western notions of "nation," and debate the role/responsibility of a "national theater" to provide representation and inclusive/pluralist notions of cultural identity. Students will then look at historic attempts in the United States to create national theater concepts such as the Federal Theater Project, the Living Newspaper, and the American National Theater and Academy. For their final project, students will be asked to imagine/craft a proposal for a "National Theater" for the United States.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA210 Shakespeare
This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **ENGL205**
Prereq: **None**

THEA211 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects

You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

THEA213 Performing Arts Videography

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's Pina, Elliot Caplan's Cage/Cunningham, John Cohen's The High Lonesome Sound, and Peter Greenaway's Four American Composers.

Offering: **Crosslisting**

THEA215 Latinx Theater in the U.S.: Analysis & Performance

This Latinx theater study and performance class will examine American-born playwrights of the Latinx Diaspora. Playwrights who are of Mexican, Cuban, Puerto Rican, and Dominican descent are just a few of the many Latinx identities in the United States. The goal will be to examine the specific cultural identities within the United States, their origins, experiences, and stories in this country. We will analyze and explore the universal resonance of these plays as well as their current relevance to contemporary American culture, both politically and socially. Students will be required to do monologue work and scene study for the performance portion of this course.

Offering: **Host**

THEA216 Performance Curation as Relational Praxis

When we hear the word "curator" we might think of the iconic fictional character of Bette Porter--someone who works in a museum or gallery with a vision for how paintings, sculptures, and wall texts are put together for a show. In this class we will expand on this idea of the curator to explore what happens when we add performance to the task of curation. Or, put differently, we will ask what happens when we remove performance from the more theatrical tradition to add it into the gallery and museum space. Thinking between performance studies, visual art, and museum studies, this course explores the role of the performance curator. Connecting performance curation to community engagement, social practice, and transformative justice, we will explore the ways in which performance might address questions of racial inequality, gender variance, class access, and dis/ability. We will ask: How does performance live in art institutions? How do you compensate a performer for a fleeting piece of work? How does performance help us reimagine the space of the art institution itself? Does performance curation make possible new genres of performance? Can, and how, might we apply its practices back to more traditional theater contexts at the university, in the art world, and beyond?

In this class students will explore theories of performance curation as a practice of not only selecting and choosing, but of building relationships. We will look at museum shows, arts organizations, and performance scholars to eventually build individual proposals for our own performance events. Artists and scholars to be discussed include Nivald Acosta, Mariana Valencia, Justin Allen, Morgan Bassichis, Jamie Shearn Coan, Ralph Lemon, Thomas Lax, Adrienne Edwards, Tourmaline, Carolyn Lazard, The Poetry Project, Center for Experimental Lectures, Wendy's Subway, Adult Contemporary, and more.

THEA217 Performing Democracy: Theater, Activism, and Community Engagement

This course will give students the opportunity to use theater as a tool for community engagement and social activism. No theater experience is required, but students will be asked to make informal presentations of texts related to issues of social justice, climate change, health care, and economic equality in a variety of community settings that may include senior citizen homes, public schools, or political campaign rallies. During election years these presentations may involve re-enactments of presidential debates and political speeches by figures from Greta Thunberg, Chief Joseph, James Baldwin, and Barack Obama to Richard Nixon, William F. Buckley, Emma Goldman, and Donald Trump. These presentations will be designed to elicit discussion and debate from community audiences and encourage those community members to vote and participate in the democratic process as advocates for the principles they believe in most strongly. Students will collaborate with their community partners in creating new performances that give voice to their experience and concerns.

THEA220 Performing Indonesia

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford

Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

THEA221 Adaptation for Performance Theater
This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of non-conventional sources (fiction, poetry, oral history, biography, memoir, newpapers, etc.). The models we will examine include Anna Deveare Smith's adaptation of interviews related to social justice ("Notes from the Field") and Lee Breuer's modern musical adaptation of Sophocles ("Gospel at Colonus"). Initially, students will work with fragments from Dante's "Inferno" and move on to adapting a text of their choice for a final script. The course will be useful for students considering performance adaptations as part of their capstone and honors projects.

This course counts towards the Theater Arts category for the THEA major.

THEA222 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

THEA223 Femme Fashion and Culture in America: 18th to 21st century
In this course, students will explore through a hands-on design approach the history of women's fashion and clothing in America and Europe. This history is long and diverse, with dress styles changing rapidly as the world and its expectations of women adapted and developed. In this course, you will study how social and economic change affected women's fashion in America--from the societal distinctions and separations of classes in the 18th century to the ready-to-wear era through the 21st century and the way it has shaped the female experience. We will analyze this through plays from each period, visual research, costume renderings, and materials research.

THEA229 Theory of Pop Music
This class endeavors to introduce students to fundamental music theory topics through analysis of popular music from the 20th and 21st centuries. We will use the work of such artists as The Beatles, Radiohead, Lauryn Hill, Beyoncé, Kendrick Lamar, Prince, etc., to teach scales and modes, basic jazz fundamentals, chord progressions, secondary functions, and song form. Besides discussion and in-class analysis, students will build their compositional "toolkit" by studying and discussing compositional techniques, learn how genre is created using theoretical principles, and will be asked to write in those genres through templated compositional exercises. Students will demonstrate theoretical analysis of pop songs in essay form and will learn to transcribe pop songs by ear, notating the chord progressions and melodies. As students progress in their theoretical knowledge, they will practice analyzing their own -- and each other's -- music.

THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage
From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest

of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation. This counts as a Theater Method course for the Theater Major.

THEA232 Instrument-Body
The ancient Greek word organon meant both instrument and sense organ, hence the development of a shared word in English for organ (as in a Hammond B3 organ) and organ (as in a kidney). This etymological overlap opens onto a set of generative questions into the nature of instruments: Are they inside or outside the body? Is the body an instrument? If the body is an instrument, who plays it? If an instrument is outside the body, what kind of object is it--a fetish? a prosthetic? an enhancement? an extension? a tool? a commodity? a technology?--and what does it do to the player? Can experimenting with new body-instrument relations become a pathway towards re-organ-izing the body and its relations? Instrument-Body is both a seminar and a studio course that takes these questions as a point of departure for creative and critical experimentation. We will read widely across the fields of musicology, art history, performance studies, queer studies, and critical race studies to investigate questions of instrumentality, embodiment, and technology. In addition, we will create performances across three units: "make an instrument," "break an instrument," and "make yourself an instrument." Students who already play instruments are encouraged to enroll, as are students that have no preexisting relationship to musical instruments.

THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

THEA235 Writing on and as Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and staging live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Toni Morrison, Lidia Yuknavitch, Oliver Baez Bendorf, Glenn Ligon, Eve Sedgwick, Fred Moten, and Billy Ray Belcourt, this course will challenge students to craft ideas and arguments by enhancing critical and creative writing skills. We will experiment with style and form from academic arguments, to performance lectures, artist interviews, and free-form creative prose essays. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. Students will also be asked to complete hybrid creative writing assignments in response to prompts that imagine writing as always in conversation with performance. More specifically, students will write pieces about embodiment, sound, and the visual. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten) and "listening in detail" (Vazquez).

This course encourages students to experiment with their writing practices. Over the course of the semester students will be asked to write four separate creative/critical pieces, all of which will be workshopped in the space of the classroom.

THEA235Z Writing On and As Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and doing live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Glenn Ligon, Claudia Rankine, Eve Sedgwick, Fred Moten, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading skills, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, artist interviews, and free-form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten), "gaps, overlaps, dissonances" (Sedgwick), and "listening in detail" (Vazquez). THEA236Z Writing the Body
How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Melissa Febos, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

THEA237 Performance Art
This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

THEA239 Songwriting Workshop
In this course, students will learn the basics of songwriting including form, lyric writing, chord progression, rhythm, storytelling, etc. We will focus first on "traditional" song form and its component parts (verse, chorus, bridge), and then branch out to less traditional and freer forms. We will discuss lyrics in depth and analyze lyric-writing techniques in various genres such as pop, rock, rap, musical theater, and others. As time, interest, and abilities allow, we will also delve into the world of music theory with an emphasis on function and structure. Students will be guided through practical matters such as transcription, recording, and publishing on social media platforms, so that they can apply the principles and guidelines discussed in class under real world circumstances. This course counts towards the Theater Arts category for the THEA major.

THEA243 Chinese Theater and Drama
This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific actors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

THEA248 Ethical Design for Stage and Fashion
Now more than ever we must look at the way we as consumers and large businesses are impacting our planet as well as the future of our planet. It has been estimated that 85 percent of our clothing ends up burned or in landfills each year and that the average American throws away about 81 pounds of clothing every year, and that's just America! In this class students will tackle a variety of hands-on projects that will explore clothing, wig, hat and accessory construction using unconventional materials. Students will explore their personal habits as a consumer of "fast fashion" and the implications fast fashion has on our economy and planet, as well as inspecting the fashion, theater and film industry participation in fashion waste. Students will also explore ways in which society can embrace sustainability and become more eco-friendly. By the end of the semester students will have a new or broader understanding of ethical and sustainable fashion and how to apply it to their everyday lives moving forward as well as a range of projects to demonstrate these learned skills. Some of the questions we will explore in this class: What does sustainable fashion mean? What is ethical fashion? Do we need ethical fashion? What are small and large ways we as individuals and large businesses can lesson our fashion waste?

THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde
This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the

magical power of Lorca's writing but to the potentially transformative power of language and literature in general.

Lorca's writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca's verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at http://span254.site.wesleyan.edu/ to review in detail the materials, objectives, and modes of assessment for this course.

THEA259 Face the Blank Page
A 13-week course for the beginning playwright. Students will read 12 plays and write essays on each one, in which they will explore the creation of the play. The why of it. Who is the main character, what do they want, what's stopping them from getting it, and finally, what is the point of no return? Students will look at the time and society in which the play is placed. What obstacles were part of their world; what did they have to overcome, and what did they have to accept? Every play will also serve as a prompt for a writing exercise that students will be responsible for. Students will take a character or situation from the play and make it their own. Also, as a group, the class will write an original play. Each student will be assigned a scene, and week by week the play will come together. This collective creation will be inspired by a song; everyone will have the same song, and each student will continue the play based on the scene that preceded it. Each student will be a part of building the structure of the play and will be able to put their own stamp on it.

THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain
Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

THEA263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance
What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's "Iliad" and Virgil's "Aeneid." This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

THEA266 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

THEA267 Revolution Girl-Style Now: Queer Performance Strategies
Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer," we will pair theoretical readings with theatrical sites.

THEA269 Introduction to Performance Studies
Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the "performance" as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA275 All Together Now: Theater and Theatricality
In 1967, critic Michael Fried famously declared that "theater is the death of art." Fried never clarified what kind of theater, nor did his widely influential text cite specific theater artists. Rather, his indictment was against the condition of theater in general -- its association with spectacle, commercialism, an appeal to popular culture and mass media. But above, Fried's concern was with the way in which, in the postwar period, social forces were increasingly part of modern art practices, including a growing international exchange of artists shifting the paradigm of art away from Western tenets to which Fried (and other like him) desperately clung. This course will examine the relationship between theater, performance, and the visual arts from the postwar period to the present -- paying close attention to what the notions of "theater" and "theatricality" as artists grappled with an increasingly political and global field of practice, in which the boundary between art and everyday life was continually blurred. We will consider the way visual artists embraced time-based and embodied practice, the way theater and performance artists explored objectified and material relations to the body, and the influence of art practices from across the world in which such dichotomies held little sway. We'll draw our cast studies from the canons of performance art and theater from throughout the world (including the US, France, Mexico, Argentina, Japan, India, Senegal, and more). Students will gain critical language for understanding performance in the context of the visual arts, and visual arts in the context of performance. We'll discuss contemporary case studies and meet with practicing artists to understand the way they relate to the concept of "theater" and "theatricality." And we'll develop our own critical and creative approaches to rethinking what being an interdisciplinary artist might look like in the future.

THEA276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

THEA279 Music Theater Workshop
This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts. This course counts towards the Theater Arts category for the THEA major.

THEA280 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

THEA281 Introduction to Directing
Intro to Directing provides an entryway into the mechanics and ethos of directing. Basic aspects of staging, script analysis, and planning the rehearsal process will be covered, as well as leading a room, working with actors, and developing the director's voice and vision. This class is also a chance to deeply consider together the role of theater in the context of our current social, political, and environmental realities. Why take this class, NOW? Why choose to direct theater, NOW? How does theater as an industry need to change, and how can theater-makers offer more care to themselves, each other, our audiences? As a director, what role do we have to play in righting wrongs, providing alternate realities, creating new futures? This course is part of the Sustainability and Environmental Justice course cluster, and we will look at these questions in part through a sustainability lens, using Adrienne Maree Brown's Emergent Strategy as our guide. D1 is taught in conjunction with The Actor's Experience. Majors and non-majors welcome. The class is not open to first years. This course counts towards the Theater Arts category for the THEA major.

THEA284 Dressing the Imagination: From Page to Stage
What does it mean to create a character in an imaginary world? How do your favorite fictional characters go from imagination and concept to the costume you see on the screen or the stage? And how does the collaborative process impact a costume designer's vision, as well as the costume maker's execution? In this course we will answer all of these questions. Throughout the semester we will look at a variety of scenes and characters from plays and musicals. Students will then apply research and design to create half-scale costumes. Working in a collaborative design environment students will have the opportunity to explore their ideas in a safe space, gain confidence in leadership, oral communication, presentation, self-management, and costume creation.

THEA285 Acting II: It's All Greek to Me
This studio course will explore performance and adaptation of classical text. A wide range of exercises and techniques will be used to cultivate a sense of ease and freedom, and to develop the imagination, relaxation, concentration, focus, and technical skills required for heightened language and text. We will be utilizing Greek myths and characters as archetypes. The course will also include a devising portion, whereby the students will offer up an original contemporary take on their chosen archetype/myth via any style of performance, including song, poetry, monologue, scene, and film. Independent writing and attendance at Hadestown in Hartford is also required, and the course will end on March 8, 2023.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **HA-THEA**
Prereq: **THEA245**

THEA285Z Scene Study: Acting Across Adaptations in Theater and Film
This course will explore how classic texts have informed and inspired contemporary writers of theater, film, and television, and how seemingly disparate parts of the canon enrich and illuminate one another. We will dive into close readings of plays, exploration of scenes from an actor's point of view, supplemental viewings and reflections/critical analyses of films and plays, and an original adaptation. We will be taking a non-traditional dive into these texts, using free-writes, and exercises including breathwork, stretching, movement and music. The class will have asynchronous work as well and requires rehearsal hours. Content might include Hamlet/Haider, Medea/Mojada, Vanya/Uncle

Vanya/Vanya on 42nd Street, Hadestown, Euridyce, Original Myths, and The Taming of the Shrew/Ten Things I Hate About You/Kiss Me Kate.

THEA286 Solo Performance
This course focuses on the expansive ways we can tell stories through our own voice and body. Over the course of the semester, students will explore and create solo performance through a generative process of creative research, prompts, and experiments. We will read and view the work of historic and contemporary solo performance artists to connect with lineage and learn about various elements they utilize including autobiographical material, found text, visuals, sound, and movement. Students will draw from personal, familial, cultural histories, and contemporary conditions, bringing their own embodied archive into the room. Each student will be supported in finding and strengthening their unique voice as performer and maker, and the class itself will function as a rehearsal room, a collective space of dramaturgy for each person's work. The course will culminate in final showings of each student's work. This course counts towards the Theater Arts category for the THEA major.

Prereq: **None**

THEA291 French and Francophone Theater in Performance
This course introduces students to the richness of the French and Francophone dramatic repertories, on the one hand, and, on the other, invites them to discover acting techniques (such as movement, physicalization, memorization, mise en scène, and so forth). Students will thus put their language skills into motion, and the course will culminate in a public performance at the end of the semester. (Special accommodations will be made for students who do not wish to perform publicly). Taught exclusively in French, the course will place particular emphasis on the improvement of students' oral skills through pronunciation and diction exercises, all the while polishing their written expression and enhancing their aural comprehension.

Prereq: **None**

THEA292 Spectacles of Violence in Early Modern French Tragedy
The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.
Offering: **Crosslisting**
Grading: **A-F**

THEA301 Immersive Theater: Experimental Design, Material Culture and Audience-Centered Performance
This course offers a comprehensive exploration of Third Rail Projects' approach to crafting and performing in immersive performance formats. Students will work closely alongside Co-Artistic Director Tom Pearson to explore Third Rail's toolbox of techniques, including:

- Developing presence and clarity around audience engagement

- Remaining spontaneous and responsive to the changing landscape of an active audience

- Generating game play for crafting immersive scenes

- Understanding ritual, narrative, and audience initiation through the study of a scene from one of our immersive productions

THEA302 Contemporary Theater: Theories and Aesthetics
This class will serve as an introduction to Theater & Performance Studies, interdisciplinary fields that brush against anthropology, linguistics, critical race studies, psychoanalysis, queer theory, and art history. We will approach "performance" as a practice and a lens. Students will explore close reading strategies for both textual and live performance events and examine live art, theater, everyday performances, and presentations of the self. This course will pay particular attention to the social and cultural importance of performance and performativity, especially as they come to bear upon queer, black, Latinx, and indigenous lives and dreams.

Identical With: **IDEA305**

Prereq: **THEA105 OR DANC105**

THEA306 Techniques of the Liar: Performance, Artifice, Fraud
This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.
Offering: **Host**

Identical With: **FGSS305**
Prereq: **None**

THEA308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.
Offering: **Crosslisting**

Identical With: **MUSC308, ARST308**
Prereq: **None**

THEA310 Shakespeare's Macbeth: From Saga to Screen
A close reading of Shakespeare's play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare's "sources," then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare's contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of MACBETH from 1948 to the present.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL305**
Prereq: **None**

THEA311 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CHUM**
Identical With: **FGSS331, SOC300, AFAM331**
Prereq: **None**

THEA315 Stage Management
This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time and self-management, industry standards, union practices, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work or hinder it. Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show. Potential projects include: Creation of a prompt book, and templates to use while stage managing, calling a pre-produced theatrical piece, and interviewing a professional working Stage Manager This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA316 Advanced Topics in Performance Studies
What does "theory" have to do with "performance"? Furthermore, what is the relationship between thinking and doing ("theory" and "praxis")? If performance studies shifts the frame from an emphasis on being to one of doing, then what does it mean to "do" theory? In this class we will engage works that orbit "the live." We will use performance as a lens to explore questions of liveness, presence, the body, and affect. We will look to both live/recorded performances and recent work in the field of performance studies to explore the cultural significance of performance in our current moment and location. This version of Advanced Topics in Performance Studies is particularly interested in intersectional work between performance and queer of color critique,

Indigenous studies, black studies, environmental justice, and transformative justice. In class students will read new work in the field of performance studies, and should be prepared to engage with the activist potential of performance.

While we will engage performance in a number of creative and experimental ways, student projects will take the shape of semester-long critical research papers. Come with or without an idea you want to work on, and we will spend the semester workshopping that idea into a developed paper. This class is especially recommended for anyone interested in doing an honors thesis in theater.

Readings and viewings will include: José Muñoz, Ashon T Crawley, Tavia Nyong'o, Sandra Ruiz, Lou Cornum, Vick Quezada, Judit Butler, Ivan Ramos, Eve Sedgwick, Emily Johnson, The Forge Project, Walter D. Mignolo, Billy Ray Belcourt, Marquis Bey, Christina Sharpe, Morgan Bassichis, Jeremy O. Harris, Miranda Haymon, and others.

THEA322Z Sounding Stories: Developing Contemporary Radio Drama
This course will examine the almost-150-year-old form of the radio drama and ask what its future might sound like. In the 20th century, radio dramas held a place of great influence in entertainment, politics, and revolutionary action. Streaming media of the 21st century has transformed the modern listening landscape, and with it, revitalized the prominence of audio storytelling while opening access to its development. Over the summer session, we will listen to modern approaches to radio drama production, explore their themes and inspirations, and create our own new works of audio theater.

Students will be introduced to sound recording and editing, the specificities of narrative development for audio, as well as experimental applications in the medium. Students will learn to use software (Adobe Audition) and the university's foley/sound studio to craft their projects. Throughout the session, guest practitioners (WNYC, Audible, Spotify, Oral History Association) will visit the class to discuss their unique perspectives on the craft.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA323 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL385, AFAM323, FGSS323**
Prereq: **None**

THEA327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern
The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to ¿train¿ citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grapple with demanding questions -- legal, social, and ethical: the ¿laws¿ of war; discrimination (based on gender, class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional conditioning.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sara Uribe, and Luis Alfaro, and movie adaptations.

This course will fall under the Literature and Performance & and History/Social Justice tracks.
Offering: **Crosslisting**

THEA329 Technical Practice A
This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester. Students will work under the tutelage of a faculty member, learning skills and techniques through a hands-on, project-based production process.

Student stage managers will have the opportunity to lead or assist the rehearsal process. Student technical directors and master carpenters will assist in bringing the production from the idea and scenic design phase into reality and construction. Student scenic charges will be responsible for the painting of sets. Student master electricians will execute the lighting design of a production. Student prop managers will acquire, build, and source properties for a production. Student assistant costume shop supervisors will assist the costume shop manager with the daily running and operations. Student lead wardrobe and lead run crew positions will supervise the wardrobe and run crews of productions. Student crew members will work on the run crew for projects, such as light board operations, scenic run crew and fly persons, wardrobe, and sound board operations. Student house managers will work with the stage manager and ticket sales to run the front of house for productions. Student program designers will build and maintain digital programs for productions.

The students interested in enrolling in this class should apply for team positions in the production such as stage manager, technical director, master electrician, or crew.

THEA337 Insubstantial Pageants: Late Shakespeare
This seminar examines the Center for the Humanities' Spring 2020 theme of "Ephemera" through the lens of four late plays by Shakespeare ("Hamlet," "King Lear," "The Winter's Tale," "The Tempest") and their preoccupation with the time, temporality, belatedness, and the ephemerality of theater (and the world-as-stage).

In addition to considering the mutability of the play-texts themselves (several of which exist in multiple versions), we will consider how they refashion their sources, and how they are themselves refashioned in later productions and adaptations.

THEA338 French Renaissance Theater Lab
In this seminar students will explore a variety of dramatic texts written and performed during the French Renaissance (c. 1500-1610). The first two-thirds of the semester will provide an overview of the poetics, rhetoric, and performance of early French theater, followed by discussions about gender, religion, politics, violence, and other topics as they arise within each play. Authors will include Marguerite de Navarre, Jean de La Péruse, Étienne Jodelle, François d'Amboise, Louise Labé, Robert Garnier, and Catherine Des Roches. During the last third of the semester, students will participate in a collaborative digital (online) critical edition of one of the plays studied. Emerging technologies in the field of digital humanities will be integrated into this lab portion of the seminar, as well as more conventional methods of establishing critical editions. Readings, written assignments, and class discussions will be in French.

THEA341 Social Media for Theater Marketing
The use of social media in today's arts industry is ubiquitous and ever-changing. The study of this communication medium through this course will involve current trend research, content creation, assessment of impact and application of lessons learned. Students will research relevant topics for weekly discussion and apply findings to content creation, which will be subject to critical analysis through quantitative and qualitive assessments. Through this study and field work at events and interviews, students will gain basic working knowledge of this interactive arts marketing and its effectiveness. In addition to regular class meetings (schedule to be determined), the majority of the work for this course will be through field work, including researching and attending events, interviewing faculty and students, photo/video editing, and collaborating with graphic design team members. Students will work in Canva or Adobe Design Suite.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA346 Shakespeare's Islands
How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripherality and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.

THEA347 Plague and Care-Work in Shakespeare's England
Plague exerted an enormous influence on the plays of Shakespeare and his contemporaries, and indeed on theater as a commercial enterprise. Pandemic theater closures and quarantines were frequent throughout his career, and it is likely that his son Hamnet died of plague. This seminar examines four Shakespeare plays (Romeo and Juliet, Hamlet, King Lear, The Winter's Tale) and their preoccupations with time, temporality, belatedness, mortality and ephemerality (of theater and the world-as-stage) and with an ethics and recognition of the work of care, as these are shaped by the recurrence of plague- a perspective that will allow us to draw connections and discern differences between Shakespeare's time and our own.

THEA348 Music and Theater of Indonesia
Since the early history of Indonesia, the Indonesian people have continually been in contact with a number of foreign cultures. Particularly, Hinduism, Islam, and the West have had significant impact on the development of Indonesian culture. This course is designed as an introduction to the rich performing arts and culture of Indonesia. A portion of the course is devoted to demonstrations and workshops, including instruction of an Islamic frame drum ensemble, singing, and Gamelan (percussion ensemble of Java and Bali).

THEA350 Calderwood Seminar in Public Writing: Arts Journalism
Arts Journalism will give students the opportunity to write about the arts in a variety of short forms that put performance in context for general readers. Students will work in pairs, serving in alternate weeks as either writers or editors. The writing assignments will include live performance reviews, book reviews, program notes, op-eds, feature articles, artist profiles, interviews and grant proposals.

THEA351 Melodrama Since 1700
Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like

Mozart's Magic Flute, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator's declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg's Pierrot Lunaire. But slowly melodrama as a term began to take on connotations relating to one of comic opera's central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in Mildred Pierce). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

Prereq: **MUSC201 OR MUSC202**

THEA352 Following Fornés: Creativity, Intimacy, and Imagination
This course undertakes an investigation and application of the creative process of visionary iconoclast Maria Irene Fornés: a queer, Latinx playwright whose wildly idiosyncratic plays defied both convention and categorization. Fornés' legendary workshops shaped a generation of playwrights, including Nilo Cruz, Caridad Svich, and Sarah Ruhl. Students will engage with Fornés' own creative process via her published plays and unpublished ephemera, including the spoken fragments, outtakes, and audio marginalia left behind from the filming of her documentary collaboration with director Michelle Memran, "The Rest I Make Up," applying what we discover to the conception and creation of individual performance works. Our work will be contextualized by assigned readings and research into Fornés as a key figure of the American theater. Syllabus includes daily journaling, weekly reading, a group research project, and ongoing work on individual creative projects. This class welcomes an interdisciplinary cohort of students. Those who are interested in writing/creating live works of performance of all kinds are best suited to this class. No experience necessary.

Gen Ed Area: **HA-CHUM**
Prereq: **None**

THEA353 Destroying the Audience: Limits of Performance and Representation in the Theater of (Non) Being
Young Jean Lee's Theatre Company, active between 2003 and 2016, is most known for a series of "racial-identity plays," written and directed by Lee, which adopt an experimental approach to the critique of racial politics, driven by the motto "destroy the audience." On the one hand, this course will explore literary and artistic works that express an ambivalent, if not antagonistic, relationship to the presence of an audience. On the other hand, this course will consider the role and function of the audience as a social category by considering how the concept of audience (broadly understood) contributes to cultural production about race and gender as a potentially active element in the creative process. Students can expect to read and/or view drama, visual art, performance, film, and self-writing (autobiography and memoir) which, explicitly or implicitly, address the presence of the audience as a way of tackling larger social and cultural problems related to race and ethnicity. The goal will be to foster an understanding of the politics of gender, sexuality, ability, language, and class that determine how these issues are conceptualized and articulated. This course will employ an interdisciplinary approach to the discussion of primary and secondary texts, engaging audience studies, performance studies, ethnic studies, and disability studies, in addition to queer/trans of color, postcolonial, and legal theory, to historically contextualize and theoretically ground a cultural understanding of the relation between audience and racial performance.

THEA354 Improvisation: Diasporic Modalities
Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/ music, the environment, and our community? How do we honor the self in collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.
Offering: **Crosslisting**
Grading: **A-F**

THEA355 Voice & Movement for Actors: Embodying Imagery and Language into Acting Text
In this advanced acting course students will approach acting text through a physical theatre lens, engaging with voice and movement pedagogies involving abstract imaginative use of the voice and body. These techniques will be used to connect the voice and body to image and text, and to build a physical vocal practice as a tool for professional actors. Personal exploratory and imaginative work will be applied to poetry and to contemporary scene work. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **THEA245**

THEA357Z Space and Materiality: Performing Place
Scenography explores and shapes the material world in and through the performative event. In site-specific performances, it transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and direct understanding of the material potential and limitations of the four key elements involved in the scenographic project -- artistic design, the actor's body, local architecture, and time.

This course is divided into three units: (1) site-specific; (2) street performance; and (3) immersive theater. Each unit includes scholarly readings, assignments in performance and scenography, and specific showings. There will be two written responses for the course (5-to-7-page papers) on two of the works experienced at the festival that demonstrate the student's cumulative grasp of site specificity, scenography, and materiality. There will also be a final media journal showing.

Gen Ed Area: **HA-DANC**
Identical With: **DANC357Z**
Prereq: **None**

THEA359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.

THEA363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.
Offering: **Crosslisting**

Prereq: **None**

THEA364 Friendship and Collaboration: In Theory, In Practice
How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, Black thought, and Indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

Prereq: **None**

THEA365 Greek Tragedy: Euripides
Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

THEA369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé

Césaire's A Tempest (1969), a bold postcolonial adaptation of Shakespeare's Tempest, to Winsome Pinnock's Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/ womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Identical With: **DANC371**
Prereq: **None**

THEA373 Afro-pessimism, Gender, and Performance
This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe's colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to "inanimate" things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer's body's disappearance/remains endow the Western art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars', artists', and activists' response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibits, and film screenings.

THEA376 The Artist in the Community: Civic Engagement and Collaborative Dancemaking
Through both theoretical analysis and practical application, students will grow their understanding of community-based performance and collaborative art-making. Grounded in readings and seminar discussions about the practice and process of community-based art, students will apply their learning through community-engaged research. Through direct practice, students in the course will explore how collaborative performance can address local issues, spark community dialogue, and encourage civic participation--whether on a college campus, in a neighborhood, or across a city.

Class meetings will take place virtually during the semester. Student research and project development will be conducted in person. Note: This course includes required Spring Break travel to work on a Forklift Danceworks project. Travel expenses for the trip are paid by the University.

Identical With: **ENVS376, DANC376**
Prereq: **None**

THEA381 Directing II
This course, the continuation of THEA281, presents a further investigation of the elements of directing: script selection, research, production concept, orchestration of that concept, casting and coaching actors, and development of a ground plan. Elements of set, lights, costumes, props, music, etc. will be developed within a shared laboratory approach. This is an advanced directing course in studio format. Students will develop all work in a focused, workshop environment; additional research and written description of ideal design elements will accompany the studio project. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**

Prereq: **(THEA245 AND THEA281)**

THEA383 Introduction to Costume Design for Performance
This course is an exploration of costume design concepts for contemporary performance including theater and other genres. The class will include beginning elements of costume design, including character/script analysis, research, costume lists, action charts, visual design concepts and techniques, and collage and drawing skills. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **OPT**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA386 Musical Theater Performance
This studio course will explore the fundamentals of musical theater performance: how to analyze a script and song applying concepts such as given circumstances, actions, objectives, etc., based in Michael Chekhov and Stanislavski techniques; how to use dramaturgical research and original context to illuminate and create character; and how to prime the instrument for optimal performance. A wide range of vocal and physical exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. We aim to expand the performer's potential for transformation and expression, so that they may enter into any genre, style, or period of musical theater with ease and confidence. Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play. This course will include exploring, analyzing, and performing solo songs and duets, and a module on the current state of the industry--including talks with professional artists, casting directors, and musical theater collaborators--culminating in a showcase, with potential collaborations with original work by fellow students and guest artists. Course will also require supplemental viewings, independent rehearsals, and attendance at two live performances TBD. This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **None**

THEA390 Performance Ensemble
Since theater is an act of collaboration, this course will offer advanced acting, directing, design, and playwriting students an opportunity to practice collaborative creation in an ensemble environment. Using impactful American ensembles (Tectonic Theater, Rude Mechs, the Team, PearlDamour) as a guide, students will experiment with techniques of research, generation, storytelling, and performance. We will explore dynamic use of space, negotiate differences in communication, and create text, action, image, and object as we collaboratively develop a coherent theatrical event to be shared for an invited audience in a workshop setting.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.

NOTE: Ensemble creation is rigorous play. Come prepared to be physical, take risks, step into the unknown, and make discoveries

This course counts towards the Theater Arts category for the THEA major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Prereq: **THEA281 OR THEA199 OR THEA245**

THEA391 The Live Event: Politics and Practice of Creating Site-Specific Performance
In this course students will consider the role of site in performance-making. We start the semester with the assumption that there is no site that is not specific:

every place carries with it a political, social, and historical identity, as well as an aesthetic and an architecture. At the same time, we as artists and makers are driven by our own values and interests. How do we enter into a collaboration with a site to create a live event with meaning and impact, both for ourselves and for our audiences? From architect Maya Lin, whose interactive Vietnam War Memorial rewrote the function of a monument to be about personal encounter and shared reckoning, to artist Paul Ramirez Jonas, whose "Key to the City" project gave thousands of people access to private spaces across New York, to "Haircuts by Kids," a project of the Canadian theater company Mammalian Diving Reflex, in which third-graders are trained to offer haircuts to adults, artists across disciplines are devising diverse answers to this question.

This class combines seminar-style discussion with studio-style making. Students will engage with scholarship by Miwon Kwon, Paul Smith, Tania Bruguera, Claire Bishop, and Shannon Jackson among others, in order to contextualize the making of our own sited live event works that explore how space, place, and architecture play into questions of narrative, performance, and community. Short written responses to reading will be turned in throughout the semester. The class culminates in either a final paper or final, sited project (individual or collaborative) on campus or in Middletown.
Offering: **Host**

Prereq: **None**

THEA393 Afterparty: End Times, Pleasure, and Clean Up
What do we do in end times, or "after the party" as Joshua Chambers Letson would have it? Already exhausted, with streamers and confetti scattered on the ground, what happens after the party is over? How do we pick up the pieces and move on? Can narratives of perpetual end times create new beginnings and new horizons? Beginning at the end, this course will engage conversations in science fiction, Black studies, art and performance, Indigenous studies, queer of color critique, and environmental justice to explore the work of endings and beginnings, of hope and hopelessness, of destruction and desire. We will pay particular attention to questions of futurity and pleasure as they are manifest in the aesthetic. Writers and artists to be discussed will include N.K. Jemisin, Sylvia Winter, Ursula Le Guin, Katherine McKittrick, Ohan Breiding, Franny Choi, Saeed Jones, Calvin Warren, Joshua Chambers Letson, Dana Luciano, David Wojnarowicz, adrienne maree brown, Autumn Brown, José Esteban Muñoz, Nick Estes, Dionne Brand, Samuel Delany, Tourmaline, Allison Akootchook Warden (AKU MATU), Jordan Peele, and M.E. O'Brien & Eman Abdelhadi. Students will be invited to craft both creative and theoretical responses to class assignments.

THEA395 Voice & Movement II: Character-Driven Transformation
Furthering the integrated continuum of Voice & Movement I, this advanced acting course will emphasize character building to expand into complex characterization through sounding, moving, and speaking. There will be experimentation with diverse sources to stretch the actor's organism, such as vocal and body energies, universal archetypes, rhythm work, and group composition, in tandem with acting texts to approach character-driven physical/vocal transformations. How do you maintain the actor values you have developed while stretching your own voice and movement patterns to the extent of being "unrecognizable"? How do you interpret complex text challenges presented by a playwright with physical/vocal choices? How can these choices honor what the playwright has created while at the same time "make it yours"? This course aims to expand your expressive potential to create dimensional characters in plays.

THEA427 Mainstage Production - Performance Practice
This course offers students the opportunity to participate in the fully-produced Mainstage Theater production each semester. Student performers will work under a faculty director, learning skills and techniques through a hands-on, project-based rehearsal process. Student stage managers will have the opportunity to lead or assist the rehearsal process, with faculty mentoring. Student assistant directors will hone their skills by close collaboration with the Mainstage director, providing valuable preparation for their own senior projects or future directing endeavors. Student dramaturges will embark in a variety of deep-research tasks and close-reading of the production materials and/or text(s), as guided by the instructor. Assigned work done under faculty supervision in the department production program working toward the creation of the Mainstage Production. Students interested in enrolling in this class should audition for acting roles, or apply for stage management, dramaturge, or assistant directing positions.

Prereq: **None**

THEA428 Theater Projects - Performance Practice
This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester, such as projects approved as part of our Senior Capstone program. This usually includes both single-semester senior projects, Honors Thesis productions, and guest artist collaborations.

Student performers will work under a project director, learning skills and techniques through a hands-on, project-based process. Student stage managers will have the opportunity to lead or assist the rehearsal process, with faculty advisement. Student assistant directors will hone their skills by close collaboration with the project directors. Student dramaturges will embark in a variety of deep-research tasks and close-reading of the production materials and/or text(s), as guided by the instructor. This is a recommended course for students that are considering pursuing their own capstone projects in theater.

Students interested in enrolling in this class should audition for acting roles, or apply for stage management, dramaturge, or assistant directing positions.

THEA434 Applied Scenography: From Idea to the Stage
This course may be repeated for credit. In this course, students will develop a specific design for the stage by doing close reading and analysis of the text for their specific projects. Students will be guided through each step of these processes in a formal approach: concept development, visual research, renderings or drawings, model-making, and/or drafting. The course will have a special emphasis on the collaborative process and on the designer's role to fulfill the needs for the actual construction of their projects. Students will create and design set, media, or costumes for their projects, integrating the notions of design principles and performance elements. This course counts toward the Theater Major as Performance Practice (in Design) only.

WRITING PROGRAM

Wesleyan offers students a vibrant writing community and a multitude of ways to pursue their interest in writing. Writers, editors, and publishers visit campus throughout the year, and students support more than 20 magazines, journals, and literary groups. The curriculum emphasizes academic writing in many subject areas and also offers courses in fiction writing, creative nonfiction, poetry, screenwriting, playwriting, and mixed forms.

The Shapiro Center for Writing on Mount Vernon Street supports students, faculty, and staff in all their work as writers. Established in 2009 with a gift from John Shapiro '74 and Shonni Silverberg '76, the center brings together academic, creative, and public writing. The Center hosts events and visitors, runs peer-to-peer mentor and tutor programs, assists faculty with writing instruction, and collaborates with people across campus to foster a vibrant writing community.

At Wesleyan, we view writing as a powerful tool for learning, creating, and communicating, and as a cornerstone of a liberal arts education, rigorous scholarly endeavor, and a healthy civic life.

AFFILIATED FACULTY

Emily Elaine Bernard
BA, Yale University; PHD, Yale University
Distinguished Scholar in Residence; Visiting Scholar, Shapiro Center for Writing at Wesleyan University

BFA, New York University; MA, Royal College of Art
Visiting Instructor of Creative Writing and Criticism

Sofia Raquel Warren
BA, Wesleyan University
Visiting Instructor of Writing

WRCT105F Literature and Memory in Contemporary Latin America: Creative Writing Workshop
For many Latin American authors, personal memory is also a collective memory. Delving into childhood, family secrets, or past trauma in their literary works reveals how writing may become a form of personal reparation and a way to participate in a general sentiment experienced in the social fabric. In this course, students will analyze contemporary Latin American authors in translation to compare different approaches to memory as a resource for imagination and social commentary. This class, designed as a seminar and a creative writing workshop, will encourage students to experiment with their writing and develop a conversation with Latin American authors about memory through direct experience with creativity and the crafting of a literary text. Authors include Reinaldo Arenas, Camila Villada Sosa, and Diamela Eltit, among others. Two US-based Latin American authors will visit the class at different times to discuss their work and their experience with writing and memory as source of inspiration. This course is a creative writing workshop.

WRCT107 American English Pronunciation and Idioms
This course is designed for anyone who would like to explore American English at a deeper level. We will look at the sounds and speech patterns of various American English dialects, practice difficult-to-pronounce words, discuss the issues of one's first language transferring into their other languages, and the oddities of idioms and colloquialism that don't translate literally. This course is recommended for those wanting to learn more about American English as well as those who are planning to teach it.

WRCT108F Real Reels: Exploring Documentary Film (FYS)
Since the early days of film, the documentary form has grown and evolved as an attempt to capture the "real" onscreen. This course offers exposure to a broad array of documentary films and poses questions on topics ranging from story modes to spectatorship, criticism to ethics, propaganda to audio design. What can an immersion in the form teach us about the meaning of truth? What can it teach us about ourselves?

WRCT109F Writing About Your First Year in the United States (FYS)
This course is designed for incoming international students who would like to reflect on their first year in the United States while exploring U.S. academic writing formats, the philosophies of liberal arts education, their own bilingual identities, and other topics related to U.S. academia. Assignments will involve keeping a journal, reading and writing a variety of essays, pre-writing activities, academic vocabulary exercises, and advanced grammar analysis. The reading will focus on essays about immigrant experiences. Authors such as Amy Tan, Maxine Hong Kingston, Alain Mabanckou, and Ariel Dorfman will be included as examples of excellent essay writing and to provide materials for discussion. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the U.S. after middle school, and students whose dominant language is not English.

WRCT110F Academic Writing in the US for International Students (FYS)
This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Reginald Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

WRCT111F Writing About Culture (FYS)
In the age of social media, pithy critiques and quick reads circulate quickly. Whether on Twitter, Facebook, Instagram, or Reddit, the Internet provides a space for everyone to share their opinions on popular culture and current events. This course asks us to slow down and rewind a bit to consider what scholars in cultural studies might teach us when it comes to writing about culture. We will ask the following: What is culture? What can culture teach us about the powerful structures and ideologies that shape our worlds? How might this understanding of culture help us fashion our selves and imagine new realities and ways of being?

To address these questions, students will read theory alongside contemporary cultural criticism both for content and for style and method of analysis. In addition to reading and discussion, students will practice writing about culture through multiple lenses, discovering and developing their own writerly values in order to produce a publishable piece of cultural criticism to be submitted to a publication of their choice by the end of the semester.

WRCT112F The Logistics of Climate Change (FYS)
According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can't be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

WRCT113 A Nation of Immigrants?
America is a nation of immigrants. This ideological epithet has come to define the American experience as one of opportunity, advancement, and national incorporation. This course will approach this narrative from the perspective of im/migrants, refugees, exiles, displaced persons, and colonized minorities. To do so, we will read sociology, history, and political theory alongside literary texts,

inquiring into discourses of migration, mobility, and (un)belonging through an interdisciplinary and intersectional lens.

WRCT114F Why You Can't Write (FYS)
Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course center the practice of writing. As such, students can expect to write, revise, and comment on classmates' writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

WRCT115 Writing Mentoring
This course may be repeated for credit. Have you ever wanted a personal writing collaborator? Someone who would meet with you privately to help you with your writing? Your writing mentor will work with you on your particular writing concerns, whether you need help generating ideas, structuring your essay, improving sentence clarity and grammar, or managing your time. As mentors and mentees meet on a weekly basis, this program is designed for students who enjoy regular collaboration. If you participate, you will enroll in a 0.25-credit tutorial and have a peer assigned to meet with you throughout the semester. We work with students of all writing abilities and in all disciplines. All services are free. Please apply here: https://forms.gle/1K1tQKf382AV57vL8. Applications are due Tuesday, February 3, 2026 at noon. For more information, contact the Ford Fellow at writingworks@wesleyan.edu. Students will be selected based on their applications and enrolled in the course after add/drop.

WRCT115F Diffusion of Innovation (FYS)
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

WRCT116F The Literature of Travel (FYS)
Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of 'travel literature,' including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT117F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

WRCT118F Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

WRCT120F Uncertainty and the Future (FYS)
The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)
How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

WRCT133F Race and Representation (FYS)
This first-year seminar will introduce students to theories and understandings of race, racism, and racial inequality as debated in the academy and the public (US) sphere. So, too, will the course consider race as it is lived and represented in cultural objects such as film, literature, law, television, and music. Reading and writing will be heavily emphasized. Through regular writing activities, students will find comfort with and a voice for discussing a range of cultural texts, preparing them for everyday discussions about race in US culture.

WRCT135 Writing about Research: U.S. Style
This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT135F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)
This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.

WRCT136F TV as Cultural Touchstone (FYS)
Why do we watch TV? What makes a good show good? What does television do for us? This writing course focuses on television as a sociocultural phenomenon. We will scan TV history, from its precursors and twentieth-century origins through the present moment. Areas of focus will include the game show, the MTV music video, the soap opera, the half-hour sitcom, the late-night show, the hour-long drama, and reality TV (Real Housewives, RuPaul's Drag Race). We'll read some accompanying cultural and anthropological writing as well as story theory and TV criticism.

WRCT140L Introduction to TESOL
This Community-Engaged Learning course will explore social issues, classroom management, and current debates related to Teaching English to Speakers of Other Languages (TESOL), as well as learning languages in general. The course introduces the "best practices" of TESOL through current research, practical assignments, and students' reflection on their experience teaching English over the course of the semester. Students will critique existing materials, create their own lesson plans and activities, and conduct teaching demonstrations for our class. Working with community partners, students will also complete 20 hours of teaching/tutoring English Language Learners. This course fulfills both the pedagogy and practicum requirements for the Education Studies major and minor.

WRCT145F Bad Ideas About Writing: Introduction to Writing Studies
Writing can be a divisive subject. Some people love writing poetry, fantasy, or romance in their free time but start biting their nails at the mention of an assigned writing project in class. Many have grown up hearing their writing is not good enough, that they need to "learn proper English," or that they "can't say that" in a school paper. Bad Ideas About Writing: An Introduction to Writing Studies provides a venue for reflection on writing education and personal literacy. We will analyze attitudes and practices around writing that stem from cultural movements and systemic discrimination. Additionally, students can expect to participate in peer review sessions to develop skills in giving and receiving feedback. This course is ideal for students interested in writing/literacy education as well as those who seek a better understanding of the process and theory of writing to benefit their own practice.

WRCT155F Writing in the Age of Generative AI (FYS)
Why does anyone need to learn how to write if we have generative AI? In this course, we will take up this commonly asked question, exploring the evolving role of generative AI, particularly large language models (LLMs), in the teaching and practice of writing in higher education. Together, we will consider why we need to learn to write and how we have been taught to write and the ways these educational approaches have shaped what we think writing is in order to imagine what the work of writing might look like in the age of generative AI. By critically examining the intersection of AI technology and writing pedagogy, the course addresses foundational philosophical and conceptual questions such as: What is intelligence? What does it mean to learn and to educate? What constitutes authenticity and voice in writing? We will investigate these questions through the lens of various writing education theories and juxtapose them with how LLMs function, learn, and generate text. In addition to these conceptual questions, the class will also be a testing ground for the ways in which generative AI dis/engages writers with our writing processes and practices. We will experiment with different generative AI tools at various stages of the writing process. This hands-on approach will help us explore complex questions about the ethics of AI, particularly around individuality and collaboration.

WRCT157 Translation as Worldmaking
This course introduces translation as a creative, ethical, and collaborative practice that shapes literature, culture, and the movement of ideas across languages and media. Students will explore translation as history, theory, and craft through readings by translation scholars and practicing translators, alongside examples from literary, audiovisual, and digital contexts, including machine translation and AI. Each week combines discussion with hands-on translation activities, emphasizing choice, responsibility, and perspective. The course treats translation as a way to think about power, identity, and how meaning changes across contexts. Knowledge of a second language is encouraged, but not required.

WRCT200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT201 Writing Theory and Practice
Writing is central to education in the U.S., but how does someone learn to write? In this course, students will consider this question by reading theories of composition, debating key concepts of writing such as reflection, transfer, and translanguaging, as well as discussing scholarship out of cultural studies, literacy studies, genre studies, technical and professional writing, and public writing. Together we will explore the potential of writing education, carefully considering how we, as educators, can foster just and innovative writing education. As we read about writing instruction, literacy, and assessment, students will be expected to bring scholarship in dialogue with lived experience. To do so, they will engage in a number of praxis-based assignments, including group work to develop assignments, assessment practices, and curricular recommendations. The course will culminate in a final project of each students' design, that tackles the practicalities of teaching writing.

WRCT202 Pedagogy for Teaching English to Speakers of Other Languages Tutors
This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the US every year. Students enrolled in this course will gain practical experience by committing to volunteer with an organization working with English Language Learners (options will be provided). They are encouraged, but not required, to continue their service afterward with the Wes ELL Program. There is a volunteering commitment of two hours/week, or 20 hours a semester, minimum during the semester.

WRCT203 Investigative Storytelling
This creative writing workshop is designed for students who aim to craft new narrative work through investigative or documentary research. Students might create a play, a screenplay, poetry, fiction, creative nonfiction, a digitally driven project, or something else. We will study some existing investigative artworks--dramatic pieces by Moises Kaufman, nonfiction by Leslie Jamison, poetry by Robin Coste Lewis, documentary film by the Maysles brothers, long-form journalism by Nikole Hannah-Jones, and podcasts by Brian Reed. We will cover interview techniques, research strategies, issues of rights and intellectual property use, and structure/dramaturgy as we plan, research, write, and workshop material together. Class members will regularly share work-in-progress and offer feedback to one another. By the end of the semester, students will be well acquainted with best practices for crafting investigation-based pieces and will have completed full or partial drafts of their projects, depending on project scope. Students are expected to have some workshop experience.

WRCT205 Multilingual Language Policy
This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect education, the languages spoken in a country and the policies to preserve or suppress them, bilingual businesses, immigration policies, and the US legal system. We will also discuss the recommendations of scholars for increasing multilingualism in the USA and changing the attitudes toward it, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

WRCT207 Multilingual Learners Literacy Development
In 2021, in the state of Connecticut, approximately 14% of the K-12 population were English Language Learners (ELL) (https://portal.ct.gov/-/media/SDE/Performance/Research-Library/EL-DEMOGRAPHICS-10012020.pdf). This growing population includes students whose written languages vary considerably from English, students whose education has been interrupted due to the chaos of war and resettlement in the U.S., and students who have undiagnosed learning disabilities. This service-learning course focuses on an area of great need for this population -- English literacy. This course will offer students an opportunity to tutor ELLs for 20 hours during the semester while studying and applying the theories and best practices of ELL literacy development. In addition, this course will discuss best practices for teaching math to ELLs, lesson planning, classroom management, and other necessary skills for successful teachers in any field.
Offering: **Crosslisting**

WRCT209 Learning to Write
Ask any writer and they'll tell you: writing is a process. In college, however, writing is often reduced to a rapid act of drafting before an imminent deadline. The question for most college writers, then, is this: If you want to learn to write, and if writing is a process, when do you get to practice your process? In this course, students will do just that: practice, practice, practice. We will read what scholars and practitioners say about writing to frame our own thinking about our relationships to writing and our practices as writers. Most importantly, students will write regularly, revise often, and review/workshop their peers' work just as often as they process feedback from the instructor. This course is especially appropriate for students who want to develop their writing skills and bolster their agency as writers particularly in academic settings. Assignments will include weekly reflections, a variety of writing assignments including personal writing, response papers, and two formal argumentative essays, regular writing workshops (peer review), and final writing project based on each student's individual disciplinary interests.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Prereq: **None**

WRCT210 Translation in Theory and Practice
This seminar is a workshop devoted to helping students from a range of disciplines and departments hone their practices of translation. Translation is part of a wide range of academic, publishing, and creative activities: humanities and social science scholars read texts in translation, translate while doing field work and archival research, and include translations in their articles and books; translation is an engine of creativity for many writers, bilingual or not. This course will begin by looking at various alternate translations of the same texts, to expand our sense of options and possibilities. The next five weeks of reading will introduce students to some of the main debates, theories, and practices of translation into English.

The second half of the course will focus on students' own translation projects. While you are welcome to pursue a project you already have in mind, most students will be choosing and starting a new project, guided by the discussions and topics in the first half of the course. The scope can be small (a single short story, a chapter of a novel or biography, a few poems or song lyrics), or you can have an eye to a bigger project you want to pursue after the end of the semester (a senior thesis, a short-story submission for publication, a book pitch). Week by week, all students will respond in class and in writing to translations-in-progress. In the last week, we will get to see and respond to everyone's revisions.

Facility in a language other than English is required; perfect fluency is not required.

WRCT210Z Contemporary Short Stories in Translation
This course will introduce students to a wide range of contemporary short stories from around the world, translated into English. We will read fiction from four geographical clusters--Nordic Europe, Latin America, East Asia, Western Europe--as well as from outside these relatively well-defined categories. Along with exploring the fiction itself, we will consider how the English-language publishing industry treats these different zones, as we acknowledge the risk of ending up with national or regional stereotypes. We will also keep in mind the translator's role as an active creator of the works we are reading. In week two, we will pay special attention to the crucial professional role of the translator in getting these authors published and recognized, and there will be in-class visits from one translator in each cluster. The objective of the course is to get a basic overview of different contemporary trends and traditions, and their various paths to publication in English, as well as hopefully finding one or two new favorite writers.

WRCT211 Calderwood Seminar in Public Writing: Legal Advocacy for Disabled Veterans
The public rarely understands what it takes to fight for one's legal rights or benefits. Good writers can translate those battles in ways that teach, empower, and (re)build community support for struggling individuals. This course is a study in the translation of legal challenges into civic advocacy.

In this course, students will write about real plaintiffs and legal cases for public audiences. As part of their journey, students will delve into the military and medical files of a disabled veteran applying for a discharge upgrade from the military. Most discharge upgrade applicants suffer from addiction and/or mental

health issues, the same issues that cut short the veterans' military careers. Using academic legal writing, news sources, and confidential personnel and medical files, students will describe issues facing veterans in general, and our veteran client specifically. Students will write for a disability blog, a legal services organization (LSO) website, a middle school social studies magazine, a podcast, and a newspaper. Students' writings will inform the instructor's writing--as the veteran's pro bono legal counsel--of a discharge upgrade brief.

WRCT212 Introduction to Fiction
This course introduces students to the craft of short-story writing. In the first half of the course, we'll read and discuss stories by Joyce Carol Oates, Edward P. Jones, Kazuo Ishiguro, Akhil Sharma, and other successful writers as a means of exploring the conventions (and contentions) of the short-story form. In the second half of the course, students will use their newly filled "writer's toolbox" to plan, draft, and ultimately share their own stories with the rest of the class, while also learning to provide focused, supportive feedback for each other along the way.

WRCT213 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects
You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

WRCT214 Art Criticism
As a young critic, the art historian Hal Foster wrote: "I do not demystify the work which I discuss so much as I am demystified by it." Beyond criticism's primary object -- the artwork to be judged, rejuvenated, revealed -- what does it let slip about its own function as a social and cultural practice? This course will introduce students to art criticism while also attempting to understand the rapidly changing economic conditions that make it possible (or not). Students will be invited to write pieces of criticism on a range of media -- sculpture, photography, painting, print, video, and performance -- with assignments modeled on different genres of art writing (e.g., the exhibition review, the "critic's pick," the single artwork study, and the "hybrid" review-essay). The course will give students a chance to work closely with the Davison Art Collection and the Zilkha Gallery.

WRCT215 Fact into Fiction
Although we think of literature as the realm of the imagination, many works of fiction are inspired by facts. A Kentucky slave's attempt to murder her child rather than let it grow up in bondage; a bombing in Saigon that ushered the U.S. invasion of Vietnam; the transformation of the Congo in the years after its independence from Belgium; and the epic journey of the bank robber Ned Kelly in Australia: all these are true events that have inspired the novels we might read in this seminar. How do novelists take history and turn it into story? How do they fashion characters out of real people? And how do they create fully realized worlds none of us who are alive have seen? We will examine aspects of characterization, point of view, plot, narrative time, setting, dialogue, language, structure, themes, imagery, and subtext. We will also read some theoretical texts to help us expand the language we use to describe and discuss novels. The goal of this seminar is to teach you to read like a writer.

WRCT216 Sports Writing: The World Cup
Soccer is a near-universal sport that separates itself from other sports because of its accessibility and inclusivity. Because of this global reach and popularity, soccer also acts as a platform for different people around the world, on an individual and national level, to play out and construct their identities. This course is an opportunity to look at the many ways that soccer is not just a game but a stage where different ideas of politics, identity, race, nationalism, gender, labor, beauty, style, and grand human narratives are formed, explored, and contradicted. This is for lovers of the sport as much as it is for those who don't see themselves as such but are interested in exploring those different areas as manifested in soccer. Through the creation of and contribution to a World Cup-specific soccer magazine for the semester, each student will be able to interrogate the game of soccer and what it reveals about the greater human society off the field.

WRCT217 Reporting for Narrative
Narrative nonfiction--a.k.a. feature writing, or literary journalism--deploys exhaustive reporting and research in a form that draws on the tools and traditions of literature: character, plot, and scene, along with essayistic inquiry and lyric attention to the line. This course, structured as a weekly writing seminar, will provide an editorial and critical scaffolding for students to produce a final work of long-form nonfiction of their own, which will go through a

rigorous process of development and revision. Workshopped peer critique of writing in progress will be supplemented by discussions of readings in the craft of nonfiction, the theory of narrative, and classic and contemporary examples of the form, from magazine features to book-length dispatches.

WRCT218 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

WRCT219 Introduction to Podcasting
This course is an introduction to the fundamentals of audio reporting, applicable to broadcast or podcast: how to find and generate story ideas, how to conduct effective interviews, and, most importantly, how to use our critical faculties to produce stories in sound. We'll explore a variety of audio forms, from the "vox pop" to the feature. We'll also think about the mission, history, and aesthetics of broadcast media (with an emphasis on public radio and the podcast ecosystem it helped, in part, to spawn) and the ways it's changing in the current podcast boom-bust cycle (and its present co-optation and disruption by right-wing ideologues and generative AI). Finally, we'll explore the ways in which radio journalism connects with other genres, forms, and traditions, such as oral history, documentary, and sound art.

WRCT224 Writing the Internet
How has online culture seeped into creative writing and restructured our understanding of narrative? In this course, we will examine texts that have been stylistically and philosophically influenced by the internet and contrast them with short works (essays and stories) from pre-internet periods. The aim of this study is to discern shifts in the representation of human experience, and to discover what these shifts suggest about the more delicate facets of existence: emotion, embodiment, and cognition. This knowledge will then be put to practical use in weekly writing assignments geared towards dissecting, enhancing, and vivifying the writing process. Readings will include "Pattern Recognition," "Letters to a Young Poet," "Information Age," "IMAGE MUSIC TEXT," "No One is Talking About This," "The Gay Science" and "Something Speaks to Me." Essays include, "Three Ways of Being-With Technology," "A Global Neuromancer," and "The White Album."

WRCT225 Creative Writing in Spanish
Taught by renowned Mexican writer Cristina Rivera Garza, Distinguished Writer in Residence for 2024-25, this seminar will offer students the tools to articulate their ideas and experiences in Spanish in narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of prose in Spanish and by working throughout the semester on crafting at least one short piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the semester students will practice extensive writing, critical reading, and peer editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.

WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)
How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

WRCT226 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT227 Life Writing: Writing About the Self and from Experience
This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/ symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/ oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.

WRCT228Z The Art of the Personal Essay
We all have stories to tell. But there is hard work in the act of transforming our intimate experiences into meaningful and captivating stories. This course dives into this labor by focusing on the craft of essay writing. Quite specifically, students will practice a variety of creative nonfiction writing techniques as a means of critically reflecting and analyzing personal experiences in order to produce essays that speak to readers in and outside of our immediate communities and contexts. Course assignments will include a writer's journal, workshop letters to classmates, two micro/flash essays, a longer essay whose subject and style is decided by the writer, and a reflective collage essay. Readings will include essays published notable essayists and memoirists such as (but not limited to) Kiese Laymon, Jose Antonio Vargas, Zadie Smith, and Gloria Anzaldúa. We will also read chapters from Mary Karr's book on writing craft, The Art of Memoir.

WRCT229 Introduction to Writing Fiction
Fiction is a lie--a beautiful lie that holds inside it a human truth. In this class, we will explore this apparent contradiction and learn how to craft truthful lies. Over the course of the semester, we will read selected contemporary fiction, with a special emphasis on the craft of writing. We'll discuss characterization, point of view, plot, structure, dialogue, fictional time, and fictional space. You'll write one short story and bring it to class for your peers to critique, in a format commonly known as the "workshop." You will also revise this story, using techniques discussed in class. The aims of this course are: (a) to refine your understanding of the attributes, techniques, and styles of fiction; and (b) to help you improve your own writing through effective use of reader feedback and revision strategies. Readings may include work by Franz Kafka, Alifa Rifaat, J.M. Coetzee, Louise Erdrich, Julie Otsuka, Gabriel García Márquez, and others.

WRCT230 Writing Across Languages: Multilingual Identities, Literatures, and Translation
"To speak a language is to take on a world, a culture" -- Frantz Fanon, Black Skin White Masks, 1952 If we enter and inhabit different worlds and cultures through language, how does writing across languages form unique multilingual voices, identities, and politics? In this course, students will gain confidence and skills in writing in multiple languages or multiple dialects of Englishes. The class will read multilingual and transnational authors in various genres -- including creative fiction and nonfiction, poetry, and journalistic forms. We will practice writing through short writing prompts and translations, etc. We then discuss the experience of doing so in conversations with theories on translanguaging, translation, and multilingual identity. Along with writing, students will be able to critically examine multilingual and/or transnational experiences and the politics of translation and transnational literature, thereby shedding new light on the relationships with our language(s). Intermediate level of a language other than English or an English dialect other than American academic English is preferred for full participation in class. If you have questions about other qualifying experiences, contact the Kim-Frank Multilingual Writing Fellow, Xiran Tan, at xtan01@wesleyan.edu.

WRCT235 Calderwood Seminar in Public Writing: Radical Sustainability
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points

for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

WRCT237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change
The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantel of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

WRCT249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology
The internet has revolutionized how people consume music, and how they read and write about it. This course will offer an introduction to music journalism as a practice of public musicology, one that has become central to contemporary life. Students will analyse and apply techniques used to write about music for the wider public, learn how to develop ideas, sharpen critical skills, and complete a series of reporting assignments. We will look at the history and function of music criticism, assess different kinds of music writing, discuss changing perceptions of music as a public art form, and the role of journalism in cultural preservation. The class will write and collaboratively edit a series of reviews, and make a short radio feature in collaboration with WESU (88.1FM). The reviews will focus on recordings, live events, and books on musical cultures. Students will have the opportunity to engage with professional music writers, which will help to prepare them for later work in music journalism, or in arts or media organizations.

WRCT250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

WRCT250M Science Journalism: Why Animals Matter
This is a writing intensive course on journalistic and nonfiction writing about animals. The reading will cover the importance of animals in the study of climate change, disease and environmental degradation, and the evolution of human nature. It will also consider animals as independent beings worth attention as subjects in their own right. Writing projects will emphasize basic journalistic skills and the techniques needed to translate technical material on science and public health to make it accessible and appealing to the public.

WRCT250N Writing Reality: Journalism in an Era of Polarization and "Fake News"
How should the news media cover Donald Trump? How did the Internet, the 24-hour news cycle, and rising polarization help change the nature of journalism itself, but also lead to an era of "Fake News" accusations in which Americans exposed to different sources of information come away with completely different sets of facts? This class will explore our new digital and highly partisan media landscape, grounded in a close study of current events. We will study the impact and consequences of today's media -- both how to consume it, and how to write for it.

WRCT250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s
Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and "Fake News"--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.
Offering: **Crosslisting**

WRCT250R First Person Singular
This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebold, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koeppel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: https://petergodwin.com/about/

WRCT250V The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn
In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated--"the media has been democratized"--and reviled--"the media is too fractured and people are living in information bubbles." The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism.

The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise. This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, working on an individual project, and in collaboration with other students.

WRCT250W Topics in Journalism: The Art and Craft of Journalistic Nonfiction
Journalistic nonfiction uses the tools of the newsroom to create long-form stories that read like novels. Students will learn the skills to ensnare readers in any medium of narrative nonfiction writing, from articles and books to screenplays and teleplays. Journalists excel in conducting interviews and marshaling facts. But few journos ever master the art of narrative storytelling. Nonfiction book writers can wield a narrative arc to tell a story. But many book writers are weak on basic reporting. We will read the work of newspaper reporters who learned to write long-form narratives, and magazine writers who learned the skills of the newsroom. By semester's end, students will know tools of both trades. We will hear from some of the writers about their work. To keep the focus on journalism, we will mostly skirt the genres of history and memoir. Students will write mostly in the third person, and primarily about events in living memory.

WRCT256 Writing for Television
This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsize, and pitch a story idea with their "producing partners" to "network executives." Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.

WRCT262 Practical Criticism
In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called "practical criticism." Each week, he distributed a single poem to his students without revealing the poem's title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards's experiment for the twenty-first century. We will follow Richards's protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students' judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanuel Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

WRCT263 What Will She Do?
In his preface to The Portrait of a Lady, Henry James recalled the challenge presented to him by the novel's main character, Isabel Archer. "By what process of logical accretion was this slight 'personality,' the mere slim shade of an intelligent but presumptuous girl, to find itself endowed with the high attributes of a Subject?" he wondered. "What will she do?" This seminar takes James's question -- "What will she do?" -- as crucial to the novel, a genre of fiction that is particularly interested in how young women determine what to do with their lives. Reading across five novels -- Jane Austen's Emma, George Eliot's Middlemarch, Henry James's The Portrait of a Lady, Nella Larsen's Quicksand, and Toni Morrison's Beloved -- we will trace the history of the novel through its evolving representations of sex, desire, race, gender, class, and consciousness.

WRCT264 Writing the Eco-Crisis
There has never been a more urgent time in which to write about the environment. Our planet faces rapid global warming, deforestation, ocean acidification and dramatic biodiversity loss as a result of our reckless exploitation of Earth's resources. In this class (taught by Distinguished Writer in Residence, Cal Flynn), we will discuss how best to approach such topics in writing: how to marshal accurate information, form convincing arguments, inspire others to action, or evoke the beauty of the natural world and all that might -- if we do not mend our ways -- be lost. Together we will read and analyze nonfiction work by writers including Rebecca Solnit, Elizabeth Kolbert, David Wallace-Wells, Rachel Carson, E.O. Wilson, and Robin Wall-Kimmerer. Students will also be expected to write and revise an essay on or investigation into an environmental issue of their choice, as well as to offer creative critique to others' works-in-progress within a supportive class environment.

WRCT265 Creating Children's Books I
The goal of the course is to develop the skills necessary to create stories and sequential art specifically aimed at young readers. In an industry that welcomes

unique voices and styles, there are underlying guidelines that inform children's literature and typically apply to most picture books. The course covers the creation, style, layout, and pacing of sequential art as well as the structure, content, and specific considerations for writing manuscripts for children.

In addition to studying the craft of effective storytelling and visual narration, we'll take a look at the business of publishing that will familiarize students with practices in the industry.

Prereq: **None**

WRCT266 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

WRCT267 Reporting on Global Issues: International Journalism in Action
This course is designed to introduce students to various mediums of international reporting beyond the traditional print format, like video and podcasting. Visual and auditory formats have gained widespread prominence, making journalism more accessible to diverse audiences. After delving into sourcing, research, and reporting techniques, students will engage in discussions with accomplished innovative journalists, hosts, and reporters who possess extensive experience in covering international issues. Throughout the semester, students will gain valuable insights from these conversations and collaborate in teams to produce a podcast episode for a class series focused on migration.

WRCT270 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

WRCT272 Knowing Their Place: Two Centuries of Women Generating Wonder in the Natural World
This seminar will examine the intersection of natural science, women's history, and poetic prose through the writings of Rachel Carson and the female nature writers who both preceded and succeeded her, including Mary Treat, Anna Botsford Comstock, Mabel Osgood Wright, Annie Dillard, Terry Tempest Williams, Robin Wall Kimmerer, Camille Dungy, and others. These women looked closely at the natural world and wrote intimately on botany, birdwatching, and the ecology of their local landscapes, teaching their readers to feel wonder and a sense of connection with place. What does it mean to know a landscape or an ecosystem intimately? How does a sense of place become political? How does gender affect perspective on the natural world and environmental stewardship? Each student will put these ideas into play in a portfolio of place-based personal essays.

WRCT277 Writing Short Fiction in Spanish
This course will be both an examination of the short story form in Latin American letters, a genre that has been crucial to the region's intellectual traditions and its ruptures, and a deep exploration of the act of writing short fiction in Spanish. By examining diverse aspects of the craft of fiction writing, and through a discussion of their own writing and that of their peers, students will search for their (multilingual) voice to explore some of their philosophical, affective and linguistic concerns, become stronger writers and storytellers and improve their skills in Spanish. They will also familiarize themselves with some of the most captivating fiction produced by Latin American and Latinx short story writers over a century.

WRCT280 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's

"The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

WRCT282 Narrative Nonfiction and the Archive
Journalists, narrative historians, and biographers all work to reconstruct past events from interviews, archives, and in-person investigation before writing up their findings in an immersive and engaging form. This series of practical writing workshops with Distinguished Writer in Residence Cal Flyn will challenge its participants to produce nonfiction accounts of past events from decades ago, right into the present day -- and to grapple with the technical difficulties that come with uncertain histories, gaps in documentary evidence, and unreliable memories. We will also undertake close reading of carefully selected extracts from writers including Katherine Boo, Sadiya Hartman, Truman Capote, and Patrick Radden Keefe, and practice our research skills using Wesleyan's own archives.

WRCT284 Literary It Girls: Joan Didion, Eve Babitz, and the Personal Essay
This reading-intensive seminar explores the personal essay as a form of public-facing literature through the iconic work of Joan Didion and Eve Babitz. Both writers turned lived experience into sharp, stylish cultural critique -- crafting essays that are as much about perception and voice as they are about events. Reading essays each week, students will closely analyze how Didion and Babitz shape persona, modulate tone, and render the personal legible within larger social and political landscapes. Topics include the aesthetics of cool detachment, intimacy as a rhetorical strategy, and the role of the "literary it girl" in shaping 20th-century literary culture. Throughout, the course asks what it means to write personally for a public audience, and how voice becomes both self-expression and social commentary. The semester culminates in a critical-creative essay on a contemporary literary figure of the student's choosing who continues this legacy.

WRCT286 How to Write about Pop Music and Why
What does it mean to write critically about a pop song or album at a time when anyone can listen to it with minimal effort? What is the value of an artist profile when artists' careers and lives are so publicly intertwined? How does a critic derive the aesthetic or moral authority to comment on music made by performers with dissimilar backgrounds, lifestyles, and values? In this class we'll look at the way the critical discourse around popular music has evolved in terms of immediacy, accessibility, scope, and purpose, paying attention to both "classical" pop journalism and ways of engaging with music that, while not quite reviews, nonetheless contribute significantly to the discourse around it. Most of all we'll listen to music together and explore different forms of interpreting and making sense of it.

WRCT288 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations: 200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

WRCT300 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT301 Promoting Early Civic Engagement: The Middle School Debate Project
Civic participation starts early. Students begin to find their place in public life in middle school. Debate can provide students with tools and a platform for expressing their ideas in public. Through debate, students learn to critically analyze texts, see multiple perspectives, and advocate for change to the status

quo. This service-learning course pairs civically-engaged Wesleyan students with middle and high school teachers and students. Wesleyan students will design and test parliamentary debate training materials on our campus. Then, the class will help to implement the training materials at public schools in Middletown and Hartford. Our class will also mentor high school student apprentices who will help to run two interscholastic debate competitions. Wesleyan students will be assessed on their: 1. contributions to training materials, 2. preparation for mentoring and coaching sessions, 3. contributions to middle school debate competitions and campus trips, 4. reflection papers/presentations on effectiveness in working with public school partners, and 5. contribution to the class report: "Supporting Middle School Debate Collaborations in Connecticut."

WRCT301Z Writing 21st Century Science
Twenty-five years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the Human Genome was nearly complete, a year ahead of schedule. Biomedical scientists envisioned an era of unparalleled progress, leading in a straight line from the new DNA sequence data to human health and behavior. At the same time, new technologies were expected to produce genetically modified crops that would end global hunger. Any evolutionary impacts of climate change on animals and plants in nature were thought to be far in the future. Instead, molecular insights have uncovered unexpected factors in development and disease including epigenetics and the microbiome. Genetically modified crops have led to unforeseen threats to their wild relatives, while constructed ecosystems are providing completely new ways of farming. For natural populations, twenty-first century biologists are scrambling to understand the human-caused evolutionary changes taking place within our lifetimes. Tools are available not just to decode genes but to edit them, at once raising new possibilities and urgent ethical questions.

This course invites students to grow as writers by engaging with these new areas of scientific investigation in an intensive workshop format. Drawing on common content from recent journal articles, Q&A sessions with guest researchers, and a virtual field trip to an innovative farm, students will unpack contemporary biology by explaining the basic science in their own voices, while considering the science in larger societal contexts through connections to their own knowledge and experience. Through science journalism pieces, blogposts, Powerpoint slideshows and researcher profiles, students will learn to communicate cutting-edge scientific findings in clear, non-specialist language. The course will build strengths in communication and collaboration through individual writing and revising, active peer editing, and in-class workshopping of each piece, in a collective student-led format. In place of a final exam, students submit a final essay reflecting on their experience in the course.

WRCT304 Love and Other Useless Pursuits
What is love? Is it an emotion? A judgment? A way of coming to know ourselves or others? What is the point of love? Does it have a defined object, a purpose, or an end? Does it have a logic or does it defy logic? What good or evil can it do in the world? "Love and Other Useless Pursuits" is an upper level seminar that approaches these questions through a comparative history of literature, literary theory, and philosophical aesthetics. The authors we read will likely include Plato, Andreas Capellanus, Tullia d'Aragona, Margaret Cavendish, Immanuel Kant, Stendhal, Johann Wolfgang von Goethe, Ralph Waldo Emerson, Marcel Proust, Djuna Barnes, James Baldwin, Simone de Beauvoir, bell hooks, and Lauren Berlant.

WRCT305 The Critic and Her Publics
The critic and her public are difficult concepts to define or fix. The critic is not a creative writer, an academic, a journalist, or a reporter, yet criticism borrows from the protocols of all four professions. The critic's publics are not made up exclusively of scholars, specialists, artists, or lay readers, but span these divisions. The aim of this course is to trace the evolution of the critic, her function, her style, and her publics from the seventeenth century to the present. Readings will include essays by Jane Anger, Margaret Cavendish, Joseph Addison, Richard Steele, Eliza Haywood, John Dryden, Samuel Johnson, Matthew Arnold, Henry James, T.S. Eliot, Virginia Woolf, Walter Benjamin, José Ortega y Gasset, Jorge Luis Borges, Clement Greenberg, James Baldwin, Mary McCarthy, Roland Barthes, Susan Sontag, Elizabeth Hardwick, Edward Said, Toni Morrison, Renata Adler, Michael Warner, Anne Carson, Margo Jefferson, and Elif Batuman. The class will be linked with the Shapiro Center talk series, "The Critic and Her Publics," and the Shapiro Center Master Classes.

WRCT306 Foundations of Playwriting from the Global South
Cimientos (Spanish for "foundations") is a play development program run by NYC-based Latinx theater company IATI Theater. Since 2001, this program has showcased authors from around the world. However, in most recent years, the experience of working with playwrights from Argentina, Chile, Colombia, Mexico, Kenia, and Uganda has opened up the possibility of addressing playwriting as a deterritorialized praxis in which political, thematical, and historical discussions intertwine with shared aesthetics and new forms to understand theater in the Global South. In this workshop-seminar, students will analyze canonical texts and unpublished plays from contemporary authors based in the Global South to participate in the discussion of decolonizing playwriting. Students will analyze critical scholarship on the Global South to trace a contemporary South-South relationship within playwriting as a literary and political device. Authors from the Cimientos program will join the class as guest speakers to prompt students to develop creative writing techniques. Students will present a draft of a short play that integrates the material covered in class.

WRCT308 Ancestral Writings: (Re)Tracing AfroCaribbean and Indigenous Frameworks for Creative Writing
Coined by Puerto Rican author Mayra Santos-Febres, "ancestral writing" elicits a reconceptualization of creative writing and its techniques from the point of view of our ancestors in Latin America, more particularly, the Afro-diasporic and indigenous. In this course, students will explore theoretical, literary, and cinematic material that encourages decentralizing creativity and writing as a political praxis. Concepts such as the ch'ixi in Aymara culture and biocultural

memories from Andean indigenous nations will work as points of departure to develop decolonizing, anti-imperialist, and anti-racist writing techniques. Guest speakers, who include specialists in the Quechua language and Afro-Caribbean folklore, will encourage students to (re)formulate techniques for their creative writing. Students will analyze texts by Silvia Rivera Cusicanqui, Mayra Santos-Febres, Odi Gonzales, Frantz Fanon, Guaman Poma, Elicura Chihuailaf, and Solimar Otero, among others. Students will present a creative writing piece that puts into practice the material studied in class.

WRCT309 The 21st Century Novel
This course is designed to introduce you to some great works of contemporary fiction. The reading list is not meant to be comprehensive, nor do I claim that these are the very best of all the contemporary novels in the world, but the course should provide an orienting overview of various contemporary styles and themes, as well as, ideally, give you one or two new favorite books. We will experiment with organizing our study by time rather than nation or language (Does the category of "the 2010s novel" make as much or more sense than, say, "the American novel" or "the Francophone novel"?)--the reading list includes work from eight countries, half in translation. In exploring what if anything makes the 21st Century novel different, I don't have a particular theoretical perspective in mind, but if you are interested in one you can bring it up in discussion and apply it in your final paper.

We will neither ignore nor treat as an unfortunate if indispensable crutch the fact that four of our books will be read in translation. No one can read all books in their respective original languages; translation is how we experience international literature--we always read books from language contexts outside our own with a double focus, as texts produced by a doubled authorship. This dynamic is worthy of attention and appreciation in its own right. I am a translator, including of one book on the reading list; I will bring my translation experience into our discussions, but even when none of us knows the original language, we can engage more fully with the work by remembering the translator's role in the creation of what we're reading and considering the translator's choices.

WRCT310 Literary Movements: Conceptual and Experimental Fiction
The course seeks to examine the modern novel by focusing on fiction structured around a concept ("conceptual fiction") and fiction which deviates from the traditional modes of storytelling in a coherent enough way ("experimental fiction"). Together, we will examine novels and short stories in which an idea, an image, or metaphor directly informs the structure, plot, characterization, or all of the above of the work. We will also look at works of formal invention and/or subtle experimentation as far as they are constructed around a discernible and coherent pattern. There have been countless such works in the modern/contemporary period and some of the notable practitioners include Virginia Woolf, Moshin Hamid, George Saunders, Cormac McCarthy, Carlos Fuentes, Toni Morrison, and John McGregor, amongst others have work in this "movement." We will also look at critical essays around these books including from David Lodge, James Baldwin, and Victor Schlovsky, amongst others.

We will study texts from some of these writers (Woolf, Hamid, Saunders, McCarthy) closely and try to determine what it means to create fiction around a "concept." Implicit in this inquiry would be the broader question of form, formal invention, and the vagaries of experimentation. What makes a novel unique? What new grounds does this novel or story break? Does the experimental mode help or hinder meaning? What makes a novel unique? How does structure distinguish a novel rather than plot or characterization, or, for that matter, ideas? What are the ways by which a novel can subvert the traditional form of the novel? What are the strictures of genre and how do they constrain or help expand the art of storytelling?

WRCT330 The Craft of Criticism
This seminar will explore the craft of writing criticism for magazines and newspapers. Over the course of the semester, we will look at different genres of the form--the book review and the "briefly noted," the 4,000-word review-essay and the blurb, memorial essays and "braided" criticism--to consider the protocols of writing for different publications and publics. Students will be assigned to write four works of criticism of varying lengths and will be asked to select a different object for each assignment (e.g. novel, film, album, exhibition). A series of shorter reflections will also be assigned on questions of rhetoric, affect, and style in response to weekly readings. The course will be offered in conjunction with the Shapiro Center's "The Art of Editing" series and its master classes on editing and fact-checking taught by members of The New Yorker staff.

WRCT350 Literature in the Age of Social Media
What does it mean to write, and to read, when the predominant form of self-expression for many of us resides in social media? What does it mean to construct a digital self, separate and apart from the selves that exist IRL? To interact primarily through the mediation of screens? In what ways do we commodify ourselves, and are we commodified? What risks do we run in revealing our inner most thoughts and feelings in an age of autocratic and capitalist surveillance, in which algorithms direct the attention once guided by more organic social forces? And how do all these issues affect the core mission of literature, which is to tell stories that reflect both the public self and the

private one? We'll examine all these questions through a collection of texts, ranging from novels (Megha Majumdar's A Burning, Patricia Lockwood's No One Is Talking About This, Tao Lin's Taipei), essays (Jia Tolentino's Trick Mirror, Samantha Irby's wow, no thank you), and poems (Emily Berry's "Paris," Tommy Pico's "Junk"). We'll also consider these questions through some short writing assignments that ask students to engage in the creative act through the lens of social media.

WRCT357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

WRCT415 Magazine Editing: Master Class on Editing Print Media
This master class will introduce students to the theory and the practice of editing a long-form magazine piece. Each class will focus on the structure of a different genre of magazine writing: the reported piece, the profile, and the review-essay. It will also cover important (and often controversial) topics in magazine writing, ranging from the practicalities of line editing to the idea of a "house style," the difference between writing for the web and writing for print, and navigating relationships with writers. "Magazine Editing" will be taught by Leo Carey, Senior Editor at The New Yorker. Master classes meet three times per term in the evening at the Shapiro Center.

WRCT416 The Art of Interviewing: Crafting the Flow Master Class
When people speak, they interrupt, they falter, they repeat themselves -- they stumble their way to articulacy. As editors, how can we prune back all of that excess language in order to discover what someone is really trying to say, and what they really mean? How can we create a satisfying feeling of an arc out of a conversation, while preserving its digressions? In this course, which will be taught by Michele Moses, a veteran audio editor at The New Yorker, students will learn interview and to edit audio interviews. Unlike editing for print, this requires paying attention not only to what is said but to what is conveyed through tone and delivery. We will use a style of listening that is part theater director, part psychoanalyst, and part script supervisor. This class will include a workshop component, in which we will conduct and record interviews and then edit them. We will use Descript, so no hard audio skills are required.

WRCT417 Master Class - Public Speaking
Public speaking is something that freaks out most human beings -- sweaty palms, shaky knees, the stuff of nightmares. We have all found ourselves on the other side of a public address, bored out of our minds, listening to a speaker drone on. But public speaking doesn't have to be terrifying or dull. In this masterclass, we'll tackle the challenge of speaking in public: finding a topic, building credibility, writing to engage an audience, and what to do about the nerves that come from standing in front of other people. At the end of the class, each student will deliver a three-to-five-minute talk (standing ovations only). The class will be taught by Corey Hajim, a writer, story editor, and speaking coach who spent seven years at TED, curating hundreds of talks for the mainstage.
Offering: **Host**

Grading: **OPT**

WRCT500 Writing as a Multilingual Graduate Student
This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

AFRICAN AMERICAN STUDIES MAJOR

MAJOR DESCRIPTION

The Major in African American Studies enables students to better understand the social structures and cultural traditions created by Africans in the diaspora, Western conceptualizations of race, the relationship between issues of race and identity, and the histories and influences of people of African descent. The major offers an interdisciplinary, comparative, and cross-cultural approach to studying the experiences of people of African descent in the Black Atlantic world, especially in the United States and the Caribbean.

Students will apply, critique, and reimagine the methodologies and insights of many disciplines through coursework in the humanities, social sciences, and the arts. Wesleyan's Center for African American Studies provides resources that deepen classroom and campus-wide conversations about contemporary and historical matters.

The African American Studies major is attractive to students from diverse backgrounds seeking a deeper understanding of African American experiences and perspectives. Students may have particular areas of interest, such as African American history's impact on contemporary society, social justice, and civil rights, the effects of systemic racism, or a desire to better understand one's own identity and heritage. Others want to explore the rich vibrancy of African American literature, art, music, and culture in depth.

Students who graduate with a major in African American Studies not only develop critical thinking skills and cultural competence, but also gain a competitive edge in their pursuit of advanced degrees and careers in fields such as law, medicine, literature, education, business, public policy, and the sciences.

ADMISSION TO THE MAJOR

Students usually declare their major in African American Studies in the second semester of their sophomore year. Students are admitted to the major if they have earned a grade of B- or better in AFAM 101 (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?stuid=&facid=NONE&crse=015838&term=1209), or at the discretion of the Chair, if they have taken other courses in the Department.

MAJOR REQUIREMENTS

The African American Studies major consists of eleven semester courses. The two required courses are AFAM 101: Intro to Africana Studies and AFAM 301: Junior Colloquium. At least five other courses must be cross-listed with African American Studies: the three different area courses and the two elective courses (described below). All courses must be completed at Wesleyan. One individual tutorial can be counted toward the eleven required courses, as can two courses taken away from Wesleyan and used to fulfill the student's chosen area of concentration. The major program must include the following:

AFAM 101: Introduction to Africana Studies. This course will provide an overview of the field and locate African American Studies in the broader context of the African Diaspora. Students must earn a B- or better in AFAM 101 in order to major.

One 200-level (or above) course in three different areas:

- African American History
- African American Literature
- Relevant Social Science course

AFAM 310: Junior Colloquium

Two elective courses that originate in or are cross-listed with AFAM. Majors will meet these requirements by selecting from a list of pre-approved and cross-listed courses. They may also bring another relevant course to the Chair's attention and request that it count. The Department encourages majors to take at least one course in the Arts.

Field of concentration (4 courses). Each major must take four courses that represent an area of concentration. Concentrations may be conceived either disciplinarily (with the four courses coming from a single department) or thematically (with courses selected from different disciplines but designed around a specific topic). Concentration courses do not necessarily have to be cross-listed with **AFAM**. One **100**-level course can count for the concentration. None of the four courses taken in the field of concentration can count toward the **AFAM** core courses or the **AFAM** elective courses. We strongly recommend that students design their concentrations in consultation with their major advisor.

Code	Title	Hours
Required Courses		
AFAM101	Introduction to Africana Studies: Black Radical Thought and Praxis	1
AFAM301	Junior Colloquium: Defining African American Studies	1
Area Courses #		**3**
African American History		
African American Literature		
Relevant Social Science Course		
Field of Concentration Courses *		**4**
Electives ^		**2**
Total Hours		**11**

One 200-level (or above) course in three different areas
* Each major must take four courses that represent an area of concentration.
^ Two elective courses that originate in or are cross-listed with AFAM.

COURSES FOR NON-MAJORS

The African American Studies Department offers FYS courses especially designed for first-year students. First-year students also are admitted to many other courses, and students should review the individual course listings on WesMaps for details about enrollment.

GENERAL EDUCATION

Majors are encouraged to complete Gen Ed requirements.

STUDENT LEARNING GOALS

Our students are trained in cross-cultural, interdisciplinary, and critical approaches to the study of the experience of people of African descent in the Atlantic world, especially in the United States and the Caribbean. The major in African American Studies features an array of courses in the humanities, the social sciences, and the arts.

Students who major in African American Studies:

- will develop sophisticated critical reading, writing, and research skills and will apply these in their studies of the histories and influences of people of African descent.
- will demonstrate their familiarity with the foundational ideas, theories, and methodological approaches of African American Studies.
- will develop and apply analytical skills that are rooted in the discipline of African American Studies and that are informed by interdisciplinary approaches to research.
- will use their enhanced analytical skills to demonstrate their understanding, assessments, and critiques of Western conceptualizations of race, issues of race and identity, African American intellectual traditions, cultural production, and political histories.
- will apply, critique, and reimagine the methodologies and insights of many disciplines to their understanding of the cultural, historical, political, and social development of people of African descent.

HONORS

The honors thesis is produced during a student's senior year and is a yearlong independent research project. Students are eligible to write an honors thesis if they have achieved at least a B+ average in all of their African American Studies courses. Eligible students who wish to write a thesis must apply to the program by the last day of classes in their junior year. A detailed description of the process for earning honors in African American Studies is available on the program website.

CAPSTONE EXPERIENCE

Majors are required to undertake one substantial research or artistic project under faculty supervision. This may take the form of an honors thesis, a senior essay done through a yearlong individual tutorial, or a research paper of at least 15 pages in length that is generated in a **300**-level African American Studies Department seminar. Any work done to fulfill the research requirement must receive a grade of B- or better.

AMERICAN STUDIES MAJOR

MAJOR DESCRIPTION

Students who complete the major will have the opportunity to attain a historically grounded, theoretically informed, and globally oriented understanding of the U.S. as a cultural, social, and political formation. Students will also gain facility with interdisciplinary methodologies, working through challenging questions by applying diverse analytical structures.

Major Format Change

Please note, beginning 2025-2026, the American Studies major will have undergone revision. Students belonging to the classes of 2026-2028 will have the option to choose between the old major format and the new major format. Beginning with the class of 2029, only the new major format will be available.

ADMISSION TO THE MAJOR

To pursue the old major format (available only to classes 2026-2028):
There is no required prerequisite to declare the major following the old format. See the "Major Requirements" section for further information.

To pursue the new major format (available to classes 2026-2028, mandatory for classes 2029 and beyond):
The prerequisite for becoming an American Studies major is taking a gateway course by the conclusion of the sophomore year. Gateway courses originate in the American Studies Department and include a combination of First Year Seminars and themed Introduction to American Studies courses. See Wesmaps for current courses.

To declare the major (whether following the old or new format), students must complete the following steps during the second semester of their sophomore year:

1. Declare the major through Wesportal
2. Complete and return the major declaration form to the AMST Administrative Assistant

MAJOR REQUIREMENTS

Please see the caveat above under "Major Format Change" regarding the change in the American Studies major beginning 2025-2026.

To pursue the old major format (available only to classes 2026-2028):
The old major format consists of eleven courses (twelve with a two-semester senior thesis, which includes an additional tutorial credit) as follows: one themed Introduction to American Studies course; one themed Junior Colloquium; AMST200: Colonialism and Its Consequences; two hemispheric and/or transnational courses; four courses in a designated concentration; three electives; and a capstone. Among these course specifications, certain overlaps may occur to not exceed the eleven required courses. There are three choices for the capstone: (1) a 300-level seminar that originates in the American Studies Department, (2) a one-semester senior essay, or (3) a two-semester senior thesis.

To pursue the new major format (available to classes 2026-2028, mandatory for classes 2029 and beyond):
The new major format consists of ten courses (eleven with a two-semester senior thesis, which includes an additional tutorial credit) as follows: One gateway course; five courses at the 200- or 300-level that originate in the American Studies Department; three elective courses at the 200-or 300-level that may be taken outside of the department with the approval of the advisor; and a capstone. There are three options for the capstone: (1) a 300-level seminar that originates in the American Studies Department, (2) a one-semester senior essay, or (3) a two-semester senior thesis.
Please see the American Studies website for a list of all courses that originate in the American Studies Department.

AMST MAJOR REQUIREMENTS

Code	Title	Hours
Gateway		1
200- or 300-Level Courses Originating in American Studies		5
200- or 300-Level Elective Courses		3
Senior Requirement		1

HONORS

With departmental approval, students may complete a two-semester senior honors thesis. Students wishing to pursue a senior honors thesis should refer to the instructions on the department website regarding the application process, which occurs during the spring of the junior year. Students completing a thesis will enroll in a two-semester tutorial with a faculty advisor during their senior year. The thesis is typically 75 pages in length, reflects original research, and is evaluated for honors by two additional faculty members. The faculty advisor provides a letter grade for the two-semester tutorials.

CAPSTONE EXPERIENCE

There are three options for the capstone in the American Studies Major.

1. Students may take a 300-level course originating in the American Studies Department.
2. Students may complete a one-semester senior essay. The senior essay may be completed in the fall or spring of the senior year under the guidance of a faculty advisor. The student must secure a faculty advisor during the prior academic year. The essay is typically 25-30 pages in length, reflects original research, and is graded by the faculty advisor.
3. With departmental approval, students may complete a two-semester senior honors thesis. Students wishing to pursue a senior honors thesis should refer to the instructions on the department website regarding the application process, which occurs during the spring of the junior year. Students completing a thesis will enroll in a two-semester tutorial with a faculty advisor during their senior year. The thesis is typically 75 pages in length, reflects original research, and is evaluated for honors by two additional faculty members. The faculty advisor provides a letter grade for the two-semester tutorials.

ANTHROPOLOGY MAJOR

MAJOR DESCRIPTION

The major in Anthropology enables students to investigate the complex and diverse cultures and societies developed throughout our interconnected world. Coursework in this major includes anthropological theories and research methods and the study of topics such as urban anthropology, globalization,#media studies, consumer culture, art and performance, archaeology, social movements and activism, migration, development and humanitarianism, race, gender, and sexuality. Social justice and ethical concerns have always been central to the discipline of anthropology.

Students of anthropology draw meaningful interdisciplinary connections through an approach that involves strong observational and analytical skills, an open mind and willingness to challenge their own cultural assumptions, and a deep curiosity about how history and culture impact the most important and compelling contemporary social issues.

The Anthropology major provides excellent preparation for all kinds of careers that require an understanding of cultural differences in a transnational world, including education, journalism, law, art and media, medicine and public health, development, and social justice organizing, as well as graduate and professional studies.

ADMISSION TO THE MAJOR

If you plan to major in anthropology, you should take ANTH101, the department's required gateway course, during your first or second year. A minimum grade of B in ANTH101 is required for acceptance into the major. Students enrolled in ANTH101 during the spring of their sophomore year may declare the major if their midterm grade is a B or higher.

MAJOR REQUIREMENTS

Anthropology majors are required to earn a **minimum of 10 anthropology credits, at least eight of which must be numbered 201 or higher**. Students should work out their plans to fulfill the major requirements with their advisor by keeping their Major Certification Form up to date.

NEW ANTH MAJOR REQUIREMENTS

*Required for Class of 2028 and beyond. Class of 2027 can decide between the old and new requirements.

Code	Title	Hours
ANTH101	Introduction to Cultural Anthropology	1
ANTH208	Crafting Ethnography	1
Theory Courses (ANTH295 series, choose two)		2
Anthropology Electives (4 Courses Required) 201 or higher		4
Capstone - Fulfill any of the following requirements:		2
Seminar Paper (300-Level Course) and two additional Anth Electives (201 or above; at most 1 FYS)		
ANTH 400 and one additional ANTH Elective (201 or above or 1 FYS)		
Senior Thesis (ANTH400 and ANTH410)		
Reflection Paper		
Total Hours		**10**

OLD ANTH MAJOR REQUIREMENTS

*Required for Class of 2026. Class of 2027 can decide between the old and new requirements.

Code	Title	Hours
ANTH101	Introduction to Cultural Anthropology	1
ANTH208	Crafting Ethnography	1
Anthropological Theory Courses (ANTH295 series, choose two)		2
Area of Concentration (4 courses required in 1 concentration area)		4
Difference, Inequality, and Social Justice		
Local Distinctions, Global Connections		
Producing, Consuming, and Performing Culture		
ANTH Electives (1 FYS allowed and/or courses 201 or higher for a total of 2)		2
Capstone		
Total Hours		**10**

ANTHROPOLOGICAL THEORY COURSES

Majors must take any two core **ANTH295** courses in anthropological theory, offered in the fall and spring.

Code	Title	Hours
ANTH295A	Theory in Anthropology: Anthropology and the Experience of Limits	1
ANTH295B	Theory in Anthropology: Anthropology of Affect	1
ANTH295C	Theory in Anthropology: Anthropology of Conspiracy	1
ANTH295D	Theory in Anthropology: Anthropology and the Modern Media	1
ANTH295E	Theory in Anthropology: Anthropology of Time	1
ANTH295G	Theory in Anthropology: Anthropology of Semiosis	1
ANTH295H	Theory in Anthropology: The Anthropology of Capitalist Life/Worlds	1

RECOMMENDED SEQUENCE AND PREREQUISITES

The department recommends that students take ANTH208 in the spring of their sophomore or fall of their junior year. ANTH101 is a requirement for ANTH208 and ANTH295, and ANTH208 is a requirement for ANTH400.

CONCENTRATIONS

***Starting with the Class of 2028, we will be eliminating the concentrations and replacing them with a written reflection requirement.**

- **Class of 2026**: Students must follow the old requirements, including the concentrations.

- **Class of 2027**: Students have the option to choose between the old requirements (with concentrations) and the new requirements (with the written reflection).

Concentrations are flexible specializations that reflect your particular specialization within anthropology. Working with your major advisor, you decide on a coherent set of four courses as your concentration. We encourage you to include one course from outside anthropology. There are three standing concentrations:

- **Difference, Inequality, and Social Justice**
- **Local Distinctions, Global Connections**
- **Producing, Consuming, and Performing Culture**

You can also design your own concentration in consultation with your major advisor. Full descriptions of our concentrations are here (http://www.wesleyan.edu/anthro/concentrations.html).

CAPSTONE EXPERIENCE

The capstone may consist of a thesis, essay, or a senior seminar paper (see Honors/Capstone tab).

FINAL REFLECTION

***Starting with the Class of 2028, we will be eliminating the concentrations and replacing them with a written reflection requirement.**

In the spring semester of your senior year, you will be required to submit a written final reflection in your major certification form, answering the following prompt:

"Looking back to all the courses you have taken in the Anthropology major, what is your thematic focus in Anthropology, and how have your courses built on each other to help illuminate this focus? What, substantively thinking, have you learned as an emerging anthropologist?

Answering the question, you may mention any of the following: skills you have built, larger ideas or concepts you have engaged, and knowledge and new understandings you have gained. You might also consider non-Anthropology electives that have been relevant to your trajectory as an Anthropology major."

This reflection will be between 1 and 2 pages long, double-spaced. Once submitted, you will be required to meet with your major advisor to discuss your reflection. This means that as a graduating major you will have a chance to reflect holistically on how your core and elective courses in the major and your capstone synergize into concrete abilities and areas of expertise.

STUDENT LEARNING GOALS

Our overarching goal is to provide students with sophisticated ways of understanding both human unity and human difference. We want students to think critically about discourses that divide the world into fully modern western Selves and not-yet-modern non-western Others, but to do so without romanticizing cultural differences. We want them to appreciate how anthropological theory is constructed and used in understanding particular cases. Our approach is premised on complex global interconnectivity that interrogates boundary-making projects and explores the fabrication of national, cultural, and regional differences in a historical perspective. This means zooming in to understand how translocal ideologies and forces are negotiated in local settings, but also zooming out to link up localities and build a contingent picture of the interconnected world we inhabit.

STUDY ABROAD

Majors are encouraged to take advantage of study abroad programs and, with the approval of their advisor via the Major Certification Form, students may count up to three of their study abroad courses for concentration or elective credit. Theory and methods courses may not be substituted. A grade of B or higher is required for study abroad courses to count toward the major. The Office of Study Abroad (http://www.wesleyan.edu/cgs/osa/) has information about specific programs, application procedures, major credit, etc.

ADDITIONAL INFORMATION

Cross-listed courses: Various departments and programs offer cross-listed or other courses that can be counted toward the anthropology major. These include African American studies, American studies, archaeology, biology, classical studies, Earth and environmental sciences, history, religion, sociology, and feminist, gender, and sexuality studies. If outside courses are to be counted toward the anthropology major, your advisor must approve them using the Major Certification Form.

Double majors: Anthropology majors have combined anthropology with a range of other majors, including Science in Society; feminist, gender, and sexuality studies; American studies; environmental studies; English; dance; music; African American studies; film; and both art history and art studio; as well as the certificates in writing and in social, cultural, and critical theory. All the requirements for the two majors must be met, except when faculty representatives of the two departments approve alterations in your program. We generally expect students writing a thesis for honors in both majors to enroll in ANTH400 in their fall semester and enroll in a tutorial in the other department or program in their spring semester. Please consult with the department chair and/or a department advisor.

HONORS

Only theses are eligible for honors or high honors. A minimum grade of B+ in either ANTH295A, ANTH295B, ANTH295C, ANTH295D, ANTH295E, ANTH295G or ANTH295H is required for the pursuit of honors.

CAPSTONE EXPERIENCE

Senior majors are required to complete a **thesis, essay,** or a senior **seminar paper** as their capstone experience.

Theses. Only theses are eligible for departmental honors. A thesis is an independent, two-semester (or more) research project. In the fall semester of their senior year, students writing a thesis should enroll in ANTH400, a research and writing seminar in which students pursue individual research projects in a group context. In the spring semester of their senior year, thesis candidates should enroll in an individual thesis tutorial (ANTH410). It is strongly recommended that students contemplating a thesis either enroll in an individual tutorial (ANTH402) in the spring semester of their junior year, in which they would begin library research on their area of interest, or else take a course that is relevant to their research concerns.

Essay. An essay is also a serious research commitment: It is an independent, one-semester (or more) research project. In the fall semester of their senior year, essay writers should enroll in ANTH400. They will complete a draft of their essay in the fall semester and submit a final version by the first day of the spring semester.

Seminar papers. Students who select this option should take a 300-level course (or an advisor-approved 200-level course) that involves a substantial research paper in their senior year. The course will ordinarily (but not necessarily) be one that facilitates advanced work in the student's area of concentration. The course must be designated and approved by the major advisor in the student's Major Certification Form prior to spring break of their senior year.

Students wishing to write a thesis must submit a proposal to the department. Students wishing to write a thesis or essay involving field work with human subjects must complete the Ethics Questionnaire. Both are due the Friday before spring break of their junior year.

- more on **Thesis Proposals**
- more on **Ethics Questionnaires**
- more on the **Goffe Wesleyan Summer Experience Grant** (to support summer field work in anthropology)
- Check out previous anthropology thesis projects on WesScholar here (http://wesscholar.wesleyan.edu/anth_etd/)!

ARCHAEOLOGY MAJOR

MAJOR DESCRIPTION

The Major in Archaeology trains students to analyze and reconstruct past societies and their environments through their material remains. Students engage the past in ways that can address modern questions, such as what drives culture change, what creates resilient societies, the role of archaeology in construction of modern identities, and how we can rediscover sustainable technologies meet climate challenges. The major is fundamentally interdisciplinary and hands-on. Faculty specialize in a range of geographic regions and methodologies. Students apply analytical and interpretive frameworks from the humanities, sciences and social sciences, with many courses involving lab or experimental components and the opportunity to work directly with artifacts and eco-facts. Archaeological fieldwork provides experiences in excavation techniques and landscape survey.

Majors may pursue either the standard major or the archaeological science track in which they specialize in a particular analytical method, such as experimental archaeology, archaeological residue analysis, environmental archaeology, zooarchaeology, materials analysis, 3D modeling, or GIS/spatial analysis.

The Archaeology program draws students who are excited by ancient cultures, and who enjoy interdisciplinary research that invites them to apply a variety of methods from the sciences, social sciences, and the humanities to a range of material data. Students enjoy the process of making new discoveries in fieldwork, and the opportunity for extensive hands-on work with ancient objects from archaeological sites or Wesleyan's own collections. Archaeology students work critically, creatively, and cross-culturally.

The multidisciplinary nature of archaeology ensures that graduates develop the ability to document, research, and interpret both humanistic and scientific data at a high level of detail. Because Archaeology is also community-oriented, connecting people to their pasts, majors learn to translate detailed academic research into human stories that can be widely shared, which makes them strong writers and communicators. The skills they develop prepare them for any career track, but they are often drawn to careers in law, public policy, environmental research, natural resource development, historic preservation, museum curation, education, and cultural heritage management.

ADMISSION TO THE MAJOR

To apply to become a major in archaeology, a student must have taken or be currently enrolled in a Gateway course and earn a grade of B or better. Students intending to pursue the archaeological science track in the major must identify which scientific method(s) they intend to study and apply to their capstone research. Following electronic application, admission will be determined by a meeting of the ARCP faculty.

GATEWAY COURSES

Code	Title	Hours
ARCP201	Art and Archaeology of the Bronze Age Mediterranean	1
ARCP203	The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology	1
ARCP204	Introduction to Archaeology	1
ARCP214	Survey of Greek Archaeology and Art	1
ARCP223	Survey of Roman Archaeology and Art	1
ARCP260	Art and Archaeology of Ancient India	1
ARCP275	Introduction to Archaeological Science: Natural Science Approaches to the Human Past	1

MAJOR REQUIREMENTS

The major in archaeology consists of at least nine different courses numbered 200 and above, in addition to a capstone project (senior essay or thesis).

Code	Title	Hours
Gateway Course		**1**
Area Courses (1 course in each area)		**4**
Anthropology		
Art History		
Classical Civilization		
Methods		
Archeological Theory in Action Symposium (two required) *		**1**
Electives (in ARCP or related discipline) **		**3**
Senior Essay/Thesis		**1-2**
Recommended Fieldwork		
Total Hours		**10-11**

* recommended junior and senior fall

**One course in science or research methods originating outside the ARCP Program may be applied toward the major by those pursuing the archaeological science track, provided the student can demonstrate its

application toward their capstone or other archaeological research projects. This course must be declared upon admission to the major.

The archaeology major and minor was revised in spring of 2021. Majors declaring *prior to Spring 2022* may opt to follow the old pathway in which the Thinking Through Archaeology requirement was met by a single course with that designation; those declaring in spring 2022 or later will follow the new major.

FIELDWORK

Archaeological fieldwork, typically carried out over the summer, is an excellent way to acquire hands-on experience and training in archaeological methods and excavation techniques. It also allows students to explore the history and material culture of a region in greater depth and, in some cases, even to conduct research on primary materials from a site that can then serve as the basis for a senior thesis or capstone project.

Fieldwork opportunities are offered both by our Wesleyan faculty as well as through a number of programs worldwide. For more information and a list of archaeological field programs, visit wesleyan.edu/archprog/fieldwork/ (https://wesleyan.edu/archprog/fieldwork/). **Excavation experience is strongly encouraged, and completion of an approved archaeological field school program may be substituted for the methods and theory requirement.**

COURSES FOR NON-MAJORS

Since there are no **ARCP** courses with prerequisites, all of our courses are suitable for non-majors.

STUDENT LEARNING GOALS

Archaeology is the discipline most directly concerned with the understanding and explanation of past societies through the study of their material remains. Archaeology majors are expected to master four of seven themes or topics:

- History and theory of the discipline
- The nature of archaeological evidence
- The construction of archaeological arguments
- Chronology
- The materiality of social, political, and economic organization
- The intersection of archaeological evidence with past and present identities
- Scientific approaches to archaeological analysis

Majors are also required to take at least one course in each of the departments that contribute to the archaeology program (anthropology, art history, classical civilization) in order to expose them to different disciplinary approaches to the study of material culture.

STUDY ABROAD

Study abroad is possible at a number of institutions with well-established archaeology programs, some of which include tours of archaeological sites in addition to coursework. Wesleyan students have recently participated in semesters abroad at these institutions:

- University College London (UK)
- St. Andrews University (Scotland, UK)
- Intercollegiate Center for Classical Studies in Rome (Italy)
- College Year in Athens (Greece)

Interested students should consult the Office of Study Abroad (http://www.wesleyan.edu/cgs/osa/) for details about transferable credit.

ADDITIONAL INFORMATION

- We encourage students to take the Gateway courses first as these provide the best entry points into the discipline. However, as we have no prerequisites for entry to archaeology courses, it is possible for students to complete the requirements in variable order.
- With prior approval from the chair of the archaeology program, the methods and theory requirement may be fulfilled by academic credit from a field school program. We strongly encourage minors to gain fieldwork experience in archaeology.
- Upon the discretion of the archaeology chair, one non-fieldwork archaeology credit may be transferred in to cover a Gateway or area requirement.
- No more than two courses cross-listed with the student's major will be counted toward the archaeology minor.

HONORS

See Capstone Experience below.

CAPSTONE EXPERIENCE

In their senior year, ARCP majors are required to undertake an original research project culminating in either a one-semester essay ARCP403 or two-semester thesis project ARCP409 - ARCP410. These projects should be centered upon the analysis and interpretation of material remains, and may include work on objects in the archaeology and anthropology collections, materials tied to field projects of a Wesleyan faculty member, or experimental approaches to archaeological data. Students should begin planning their research focus together with their faculty tutor during their junior year, and should plan to have fully defined their data set by the summer prior to their senior year.

Students pursuing honors both in archaeology and in a second major are required to take at least one of their two required thesis tutorials in the archaeology program (i.e., either ARCP409 or ARCP410).

Honors Evaluation

In order to be considered for Honors, each thesis will be evaluated by two ARCP readers, of whom one may be the tutor. In circumstances where a student is submitting the thesis for multiple majors, or is drawing on techniques or methods which require expertise from outside ARCP faculty, a third reader from outside the department shall be included in addition to the two from within ARCP. Readers will be determined by the tutor in consultation with the student by the beginning of spring semester of senior year.

Readers shall write a short evaluation of the work, and offer an estimation of its merit in the form No Honors/Honors/High Honors. In cases where there is a disagreement between Readers about whether a work merits Honors, a third ARCP Reader will serve as a tie-breaker.

ART HISTORY MAJOR

MAJOR DESCRIPTION

The Major in Art History provides students with a strong understanding of the visual and material environment created by humankind and how those creations both embody and shape the culture, beliefs, and values of the people who made them. Taking artworks as primary objects of study, students will critically analyze their form and materials and draw upon written texts and/or oral sources to interpret their aesthetic, social, economic, political, philosophical, and religious significance. Students will gain an understanding of languages pertaining to material and cultural production, iconographical and historical analysis and archaeological methodologies, in addition to attaining intermediate-level proficiency in a foreign language.

The ideal student of art history is open-minded and insatiably curious about all aspects of human civilization, diverse cultures, and the historical contexts that have shaped—and been shaped by—human creativity through time. They are visually aware and perceptive, with an empathetic appreciation for the aesthetic choices made by artists. They are eager to explore all kinds of art in varying forms and settings and to engage in rigorous research using multiple sources. They are critical thinkers and effective communicators with excellent writing skills and the ability to participate in thoughtful discussions using sound reasoning and evidence.

The Art History program prepares students to pursue various professional careers in fields such as higher education, museum work, the art market, architectural history and practice, urban planning, landscape architecture, historic preservation, publishing, and cultural property law.

ADMISSION TO THE MAJOR

A prospective major should plan to take one 100-level introductory course and at least two other courses in art history by the end of sophomore year. The student must have at least a B average in art history courses, and a B average overall.

MAJOR REQUIREMENTS

Coursework requirements ensure that students gain geographic breadth and historical depth, while having the opportunity to define their interests and chart their own path through the major.

A minimum of 10 courses—all taken on a graded basis—is required for the Art History major. These include: one introductory course (numbered in the 100 range) plus seven intermediate and advanced courses (numbered in the 200 and 300 ranges) fulfilling the geographic and historical requirements

outlined below. In addition, students must select two electives (see below for parameters). Among required courses in Art History, two must be seminars (numbered in the 300 range). Finally, students must demonstrate proficiency in at least one foreign language.

To take full advantage of the program, students are encouraged to take more than the 10 required courses and to pursue honors in Art History.

Code	Title	Hours
Introductory Course		**1**
Geographic Areas (1 course in 4 different geographic areas)		**4**
The Americas		
Europe		
East Asia		
South and West Asia		
Africa		
Historical Periods (1 course in 3 different historical periods)		**3**
Historical Period 1 (up to ca. 1400)		
Historical Period 2 (ca. 1400 to ca. 1800)		
Historical Period 3 (ca. 1800 to the present)		
Electives (200-level or above)		**2**
Foreign Language Proficiency (second semester intermediate-level course or equivalent)		
Total Hours		**10**

Important note: Any single course may be counted toward only one geographic area or historical period requirement. All required courses (the introductory course, both seminars, and all courses fulfilling historical and geographical requirements) must originate in Wesleyan's Art History program, with the exception of courses in ancient art offered through the Classical Studies department.

ELECTIVES:

In addition to the above courses in Art History, two full credit electives are required. These can include: additional courses in Art History (100-, 200-, or 300-level; one 100-level course is permitted as an elective); preapproved courses taken off campus; or courses in cognate fields, such as anthropology, archaeology, art studio, CEAS, FGSS, film, foreign languages, history, music, religion; social, cultural, or critical theory; sociology; and/or urban studies.

To count as electives toward the Art History major, courses outside Art History must be petitioned prior to enrollment—and approved by the major advisor.

Up to two courses in a foreign language may count as electives toward the Art History major.

For the purposes of planning, students may click here for our Course Planning Documents and review the following:

- ARHA Program Course Projections, which estimate when specific courses will be offered during a three-year period.
- Comprehensive List of ARHA Courses, organized by the categories they may fulfill.
- ~~ARHA Planning Worksheets for Majors~~, to help students map out a course of study.

GENERAL EDUCATION

Candidates for Honors in Art History must comply with the University's General Education Expectations (through Stage 2).

STUDENT LEARNING GOALS

Art History majors acquire the following skills:

- Visual analysis of the form, materials, and meanings of specific works, buildings, and sites.
- Textual analysis of primary and secondary sources in both historical and theoretical genres.
- Historical awareness, or understanding of how a given object, building, or site relates to the culture(s) that produced them.
- Intercultural literacy, including proficiency in at least one foreign language and knowledge of artistic production in several world regions.
- Methodological sophistication, including experience with more than one art historical methodology and knowledge of critical theories.
- Expository writing.
- Research, including how to formulate a research question and relevant methodology, and to locate and evaluate appropriate sources.
- Originality, or the ability to think independently and create new knowledge.

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions, collaborative group work, and multimedia presentations. Written exams, peer review, and self-assessments also foster student learning.

STUDY ABROAD

Many Art History majors study abroad, most commonly during the fall or spring semester of their junior year. Students visit collections and museums in other parts of the world and may apply and deepen their foreign language skills. When selecting a study abroad location, students should consider their language abilities and the requirements of programs of interest. Many programs involving language immersion require completing at least two years of language study at the college level before studying abroad. While abroad, advanced students may want to use their time to identify artworks or collections that could serve as the basis for an honors thesis during their senior year. Students may also consider studying abroad during the summer months, whether on a shorter-length study abroad program or to undertake independent research. Juniors may apply for John T. Paoletti Summer Travel Fellowships.

ADVANCED PLACEMENT

A student who has completed an Advanced Placement (AP) Art History course or its equivalent while in secondary school and who has achieved a grade of 5 in the art history AP examination will be granted one AP course credit, but only after completing an introductory or intermediate-level course in art history at Wesleyan and receiving a grade of B+ or higher. Credit is not awarded for an AP score of less than 5.

AP credit may not be counted toward the completion of major requirements.

LANGUAGE REQUIREMENT

To become conversant in art history as a global practice, students must demonstrate proficiency in at least one foreign language. Proficiency consists of at least two full years of study at the college level, or the equivalent, as measured by a placement test administered by the language department in question. German, French, and Italian are normally considered the most useful for the study of European art. Students concentrating in the history of Asian art are encouraged to study a relevant Asian language. Other languages may be relevant depending on a student's course of study.

The Fries Center for Global Studies provides resources to study languages not formally taught at Wesleyan. For more information, visit the Language Resources and Technology page. Native speakers of languages other than English are encouraged but not required to study additional languages.

PRIZES

Alumni Prize in Art History
Awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

Beulah Friedman Prize
Awarded to seniors to recognize outstanding achievement in the history of art.

James E. Lieber ('84 P'24) Art History Internship Award

Provides grant support to outstanding Art History majors or minors pursuing summer or post-graduate internships in the field.

John T. Paoletti Travel Research Fellowship in Art History

Supports student research and travel related to a senior thesis project advised by an Art History faculty member.

TRANSFER CREDIT

To receive credit for elective courses in the art history major, Art History students should provide their major advisor with a course description and detailed syllabus in advance of taking the course. All courses taken off-campus for the major must be preapproved by the student's major advisor. The Office of Study Abroad must also preapprove courses taken abroad. Preapproved courses taken abroad or at other U.S. institutions can be used to satisfy the major's 200-level electives but will not be counted toward the major's geographical or chronological distribution requirements.

Students who wish to receive general education credit for Art History courses taken off-campus should send the Art History program director a copy of the course syllabus, indicating the number of contact hours, readings, and assignments. This course information is required in addition to the transfer credit petition available through the student portal.

Transfer students wishing to receive credit towards the Art History major for courses taken at their prior institution must provide the Art History program director with course syllabi indicating the number of contact hours, readings, and assignments. For transfer students majoring in Art History, a minimum of five courses within the major must be taken at Wesleyan.

Approval of a course for transfer credit will be based on the number of contact hours and the academic rigor of the readings and assignments, which must be comparable to a Wesleyan course.

ADDITIONAL INFORMATION

Students interested in pursuing museum internships may apply for education-in-the-field credit. To be approved, the internship must involve work that is the equivalent in intellectual content and rigor to a Wesleyan Art History course, as demonstrated in substantive research and writing. Students must provide a description of projects they will be working on and the name of their supervisor, who will coordinate with an on-campus advisor. Before credit is given, students must provide examples of the work they did.

Wesleyan University charges additional tuition for education-in-the field credits earned in the summer or while on an authorized leave of absence during the academic year.

Individual Majors in Art History or Art Studio:

Students majoring in one area can count toward the 32 courses required for graduation up to 16 courses in the department. University regulations regarding the maximum number of courses allowed in a department should be applied to the major itself: Art History or Art Studio. Thus, majors in either program may count toward their graduation requirements no more than 16 credits in their major program (of which no more than 3 may be 100-level courses, and no more than 13 may be 200-level and above). These 16 would include 2 credits of thesis in the case of students majoring in Art Studio or writing a senior thesis in Art History.

Double Majors in Art History and Art Studio:

Students double-majoring in Art History and Art Studio can take up to 20 credits in the department, providing that 2 of these credits are for senior thesis tutorials. In addition to listed courses, a limited number of tutorials, internships, and teaching apprenticeships are available under specific conditions. Prior approval must be obtained to transfer credit from another institution. Review and approval by a faculty member in the area of study must also be made after completion of such course work

HONORS

Honors candidates must earn a minimum GPA of B+.

Students seeking Honors in Art History enroll in a two-semester tutorial (ARHA 409/410) and undertake an independent, two-semester research project under the guidance of a faculty advisor, which results in an honors thesis. Honors students will formulate a research question, master the relevant literature,

propose a research methodology, and work independently to achieve a significant outcome with the goal of making an original contribution to the field.

Honors candidates will participate in a senior colloquium and will present 20-minute “senior talks” on their completed theses.

For students considering graduate or postgraduate studies in the humanities or related fields (including law, medicine, or business), the successful completion of a yearlong independent research project is a mark of distinction. For students applying to MA or PhD programs in Art History, an honors thesis is often the most significant component of an application.

Honors candidates should begin discussing ideas with relevant faculty tutors early in the spring semester of their junior year. Applications are due the third Friday in February, with all thesis decisions announced by the program director in early March. For detailed information and instructions, please visit the Honors in Art History page.

CAPSTONE EXPERIENCE

The Art History Capstone consists of two seminars in Art History, which foster more advanced skills in reading, writing, and independent research.

ART STUDIO MAJOR

MAJOR DESCRIPTION

The Art Studio major enables students to become fluent in visual languages--their analytical and critical vocabularies and the rigors of their techniques and methods--to explore intellectual issues and human experience. Students learn techniques associated with various media while developing a personal creative vision, beginning with basic studies in drawing and introductory art history. More focused studies train students in the practices of Architecture, Drawing, Ecological Design, Painting, Photography, Printmaking, Product Design, Sculpture and Time-Based Media. The program seeks to reflect the diversity of current technical and intellectual approaches to art and design and welcomes interdisciplinary experimentation.

The Art Studio major is comprised of two distinct pathways, the honors thesis and the capstone portfolio, each with its own emphasis, course requirements, and capstone experience. Students in the honors pathway spend their senior year working closely with a dedicated faculty advisor over two semesters towards the comprehensive thesis requirement--the development of a focused body of work and a solo exhibition in the spring of their senior year. The portfolio pathway emphasizes advanced coursework, requiring students to complete three 300-level courses. Instead of a thesis, students compile a portfolio in the spring of their senior year, documenting their creative achievements in upper-level courses. While this portfolio does not qualify for honors, it is a graduation requirement. Both pathways require students to complete at least three Art History courses, each covering a different geographical area, for a total of 11 departmental courses. Additionally, all students must fulfill their General Education requirements.

Students who gravitate towards the Art Studio major tend to be creative, visual thinkers with a passion for art and ideas, an experimental mindset, and a desire to develop their technical aptitude. They are self-motivated, open to constructive criticism, and dedicated to investing the time and effort to formulate their unique, creative expression.

Art Studio majors develop a broad awareness of current and historical art and design practices, their theoretical concerns and social impacts, and they acquire the ability to analyze art from diverse intellectual traditions. Critical thinking, technical proficiency, and observational skills are used to communicate ideas through artistic means and are applicable to a wide range of creative fields and careers in fine art, arts education, advertising, design, business, curation, art conservation and many others.

ADMISSION TO THE MAJOR

In the second semester of the sophomore year, students may declare the Art Studio major in their WesPortal. At the time of declaration, students are expected to have completed:

- Drawing I (ARST131)
- Another ARST course.
- One Art History course
- At the time of declaration, prospective majors must have a B+ average in the department and a B average overall. All Art Studio and Art History courses must be taken for a grade to count toward the major.

*Students may be currently enrolled in one of the courses at the time of major declaration.

MAJOR REQUIREMENTS

In their junior year, Art Studio majors will choose between two major pathways. The following outline presents these options:

Honors thesis pathway: course requirements and honors thesis

- Drawing 1 (ARST 131)
- Minimum 4 other ARST courses (including one 3-D course)
- 3 Art History courses in 3 different geographical regions (The Americas, Europe, East Asia, South and Southwest Asia, and Africa. A global survey course or a multi-continental course may substitute for one of the geographic areas)
- Senior Seminar (ARST 350)
- 2 semesters Senior Thesis Tutorial (ARST 409/410)
  = 11 courses

*Must be GenEd compliant
*1 Individual ARST Tutorial may be counted toward 6 ARST courses
*Eligible for honors
***Students pursuing the honors thesis pathway must secure the agreement of a thesis advisor.**
***** In the rare case a student finishes their graduation requirements in December of their senior
year, they may complete the major with only one semester of thesis tutorial, still exhibiting in the
spring.

Portfolio pathway: course requirements and capstone portfolio

- Drawing I (ARST 131)
- 6 ARST courses (including one 3-D course, and 3 x 300-level or higher)
- 3 Art History courses in 3 different geographical regions (The Americas, Europe, East Asia,
  South and Southwest Asia, and Africa. A global survey course or a multi-continental course may substitute for one of the geographic areas)
- 1 Elective (ARST or ARHA course of choice, any level)
- 1 capstone portfolio working with advisor spring senior year (not a credit, but a requirement)
  =11 courses

*1 Individual ARST Tutorial may be counted toward 6 ARST courses
*Must be GenEd compliant
*Not honors eligible

Teaching Apprentice Tutorials in will not be counted toward requirements in either major pathway.

GENERAL EDUCATION

All majors are required to fulfill their general education expectations as described by the University's guidelines.

STUDENT LEARNING GOALS

The Art Studio faculty has set the following goals for student achievement and success in the major:

- Exploration of and proficiency with a wide range of media and techniques, at the introductory level and beyond
- Honing of observational skill
- Fluency in visual language
- The development of technical facility enabling students to explore their personal visions through making art
- Broad awareness of current and historical art and its theoretical and historical context
- Methodologies of critique, and the ability to analyze art from diverse intellectual traditions and technical approaches
- Development of an independent studio practice, ideation, and methodology, culminating in a one-person exhibition senior year (for students in the honors pathway)

ADVANCED PLACEMENT

No Advanced Placement credit is accepted in art studio.

PRIZES

Jessup Prize • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

Elizabeth Verveer Tishler Prize—Art • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

TRANSFER CREDIT

ARST majors must consult with their advisor and receive approval for off-campus study, leaves, or the addition of a second major. Off-campus study in the senior year is discouraged and requires additional approval of the program director. All majors (or intended majors) should carefully consider their outstanding major requirements when planning off-campus study.

There are two types of ARST transfer credit:

- Courses that can be applied to ARST major requirements
- Courses that can be applied for general graduation credit

All ARST transfer credits must ultimately be approved by the Art Studio program director.

The process for students seeking transfer credit for *a major requirement* is as follows:

- Students should gather information about the course(s) they plan to take at other institutions, including links to course syllabi. The syllabi should outline class contact hours and expectations for work outside of class. This information must be submitted online with the Office of Study Abroad before enrollment.

- Pre-approval is required for courses intended for major credit. Students must present the course details to the Art Studio faculty member specializing in the corresponding concentration (e.g., a photography course must be pre-approved by the Art Studio photography professor).

- Upon course completion, students must undergo a portfolio review with the same faculty member to determine eligibility for transfer credit toward the major. Credit is not guaranteed.

*Wesleyan students who wish to transfer course credit toward the Art Studio major should note that approval is not automatic, even for courses from a Wesleyan-approved program. Students may apply a maximum of three combined ARST and ARHA courses taken outside Wesleyan toward their major, but only with specific permission from the Art Studio faculty.

*Transfer students who wish to receive credit toward the Art Studio major for art courses taken at another institution should seek approval from the program director prior to enrollment. A portfolio review is required, transfer of course credit to the Art Studio major is not automatic.

Process for students seeking *general credit* for graduation:

- Students should gather information about the course(s) they plan to take at other institutions, including links to course syllabi. The syllabi should outline class contact hours and expectations for work outside of class. This information must be submitted online before enrollment.

- Art Studio program director will review the course and approve general credit, if the proposed course is similar in contact hours/workload as a Wesleyan credit.

HONORS

Students interested in the honors thesis major pathway must first consult with an Art Studio faculty member in their proposed area of media concentration who is willing to serve as their advisor. Typically, faculty expect students to have demonstrated exceptional work in a second-level course within a specific medium (such as Photo II or Painting II) before agreeing to advise an honors applicant. The student and their major advisor will collaboratively design a program of study. Admission to the honors pathway requires a review by the Art Studio faculty, along with a minimum academic average of a B and a departmental average of B+.

In their final year of study, students in the honors pathway will develop a focused body of work and present a solo exhibition. This exhibition serves as the culmination of a two-semester thesis tutorial, developed through close critical dialogue with their faculty advisor. The senior thesis exhibition offers students a unique opportunity to engage in a rigorous and self-directed creative investigation and participate in a public conversation about their work.

Exhibitions are critiqued by the faculty advisor and a second critic and are subsequently reviewed by the faculty of the Art Studio program, who vote to determine high honors, honors, pass, or fail, on the criteria of originality, mastery of medium, depth and range of investigation, and coherence of the exhibition.

Students in the honors thesis pathway must document their theses and upload edited images to a shared ARST drive as part of their graduation requirements.

ASTRONOMY MAJOR

MAJOR DESCRIPTION

The Major in Astronomy (ASTR) enables students to explore the foundational concepts and recent discoveries that have shaped the modern study of celestial objects, space, the phenomena of the cosmos, and the universe. Students develop advanced proficiency with the theoretical concepts and observational tools employed in distinct subfields of astrophysics. The program blends coursework with research opportunities and provides students with access to professional-quality telescopes, instrumentation, and computers. All majors complete an in-depth senior capstone project and present their research in a public forum, e.g., by speaking in the research seminar, presenting a poster at the Wesleyan summer research program, or presenting at a professional conference.

The Astronomy program attracts students who have a passionate interest and curiosity about space, celestial objects, and the universe, along with an aptitude for mathematics and physics, the ability to work with complex data and technology, and the patience for long-term research projects.

Astronomy graduates may continue their studies in a graduate program or pursue a variety of careers in fields such as astronomy, astrophysics, data science, planetary science, aerospace engineering, space missions, science communications, education, and public outreach.

ADMISSION TO THE MAJOR

The standard introductory course for potential majors and other science-oriented students is ASTR155. It may be taken in the first or sophomore year. It assumes a good high school preparation in physics and some knowledge of calculus. ASTR211 is a sophomore-level course appropriate for interested non-majors as well as a gateway course to the major. Coding skills are required for ASTR211 and all upper-level astronomy courses. Prospective majors should take ASTR210 prior to ASTR211 or demonstrate their proficiency in coding to the ASTR211 instructor prior to taking that course. View courses in our Academic Catalog (https://catalog.wesleyan.edu/departments/astr/ugrd-astr/).

MAJOR REQUIREMENTS

The astronomy major is constructed to accommodate both students who are preparing for graduate study and those who are not.

The basic requirement for the major is the successful completion of the required courses as well as four upper-level astronomy courses. The required upper-level courses are taken one each semester in the junior and senior years.

Code	Title	Hours
Required Courses:		
ASTR155	Introduction to Astrophysics	
ASTR210	Fundamentals of Scientific Computing in Astronomy	
ASTR211	Observational Astronomy	
MATH121	Calculus I	
MATH122	Calculus II	
MATH221	Vectors and Matrices	
PHYS113	General Physics I	
PHYS116	General Physics II	
PHYS213	Waves and Oscillations	
PHYS214	Quantum Mechanics I	
PHYS215	Special Relativity	
Four Upper-Level Astronomy Courses*:		
ASTR221	Galactic Structure and Formation	
ASTR222	Modern Observational Techniques	
ASTR224	Exoplanets: Formation, Detection, and Characterization	
ASTR231	Stellar Structure and Evolution	
ASTR232	Galaxies, Quasars, and Cosmology	
ASTR240	Radio Astronomy	
*Upper-level Astronomy course offerings may vary year-to-year.		

Code	Title	Hours
Strongly Recommended Courses:		
MATH222	Multivariable Calculus	
PHYS324	Electricity and Magnetism	
PHYS219	Introduction to Contemporary Physics (if PHYS215 is not offered)	

Additional upper-level physics courses are also recommended but are not required. Prospective majors with graduate school aspirations should complete or place out of the basic physics and mathematics courses listed above,

preferably by the end of their sophomore year, and should also take ASTR155, ASTR210, and ASTR211 during their first two years.

Since physics preparation is an important admission criterion at most astronomy graduate schools, those planning to go on for a PhD should consider a double major in physics. This can be accomplished by taking several of the following additional courses, normally in the junior and senior years: PHYS324, PHYS313, PHYS315, and PHYS316. Check the published requirements for the physics major for more details and speak to your advisor.

Additional mathematics courses, such as MATH229, may also be chosen.

Click here (https://www.wesleyan.edu/academics/journey/Astronomy_Advising_Information.pdf) for more detailed information about the astronomy major, including a sample eight-semester course plan.

STUDENT LEARNING GOALS

In this major, students are expected to acquire or develop:

- a broad understanding at an introductory level of the foundational concepts and recent discoveries that have shaped modern astronomy and astrophysics
- proficiency at an advanced level with the theoretical concepts and observational tools employed in four or more distinct subfields of astrophysics
- firsthand experience with the process of science through participation in research
- the technical and research skills needed to pursue graduate study in astronomy
- analytical abilities and computing skills useful for careers outside of professional astronomy

BA/MA PROGRAM

[wesleyan.edu/grad/degree-programs/bama.html (https://www.wesleyan.edu/grad/graduate-programs/bama_program.html)]

This program provides an attractive option for science majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience.

ADDITIONAL INFORMATION

All astronomy majors are to enroll each year in the .25-credit courses ASTR430 and ASTR431. These discussion courses provide a broad exposure and introduction to research and education topics of current interest to the astronomical community. Majors are also encouraged to serve as teaching apprentices in a general education course at least once during their junior or senior year, to take part in the observing program with the department's 24-inch telescope, and to participate in the department's public outreach activities.

HONORS

Students considering graduate school are strongly urged to do a senior thesis project (ASTR409/ASTR410); honors in astronomy requires completion of a senior thesis. Students with an interest in planetary science are advised to look at the course cluster information on that topic.

CAPSTONE EXPERIENCE

Research is an integral part of an undergraduate education in astronomy, and all majors are required to complete a senior research capstone that provides experiences beyond those obtained as part of their academic coursework. The capstone, to be completed during the twelve months prior to graduation, can take several forms:

- completion of a senior thesis project
- non-thesis related astronomy research
- in-depth investigation of a current research topic, including a short written report

In all cases, students must present some aspect of their experience in a public forum, e.g., by speaking in the ASTR 431 research seminar, presenting a poster at the Wesleyan summer research program poster session, or making a presentation at a professional conference.

BIOLOGY MAJOR

MAJOR DESCRIPTION

The major in Biology provides students with the skills to perform scientific inquiry using current experimental approaches as they pursue a deeper understanding of the interconnections among living things. We study how recent advances in the biological sciences are driving extraordinary new discoveries and innovations in areas such as evolution, ecology, cell biology, genetics/genomics, and neuroscience. Biological research provides essential information as we address urgent challenges of biodiversity conservation, global climate change, epidemiology, and human health and well-being. Increasingly, biological issues are playing a fundamental role in social and medical ethics, journalism, and public policy.

Biology students are curious, keen observers who seek answers about the natural world. Coursework requires analytical and critical thinking skills and a sense of imagination. Students are encouraged to nurture abilities to understand complex processes, follow detailed protocols, analyze data, and communicate about their research. As biology deals with living organisms and potentially sensitive research, the model biology student should possess strong ethics, respect for life, and a commitment to responsible practices.

A major in Biology can form the foundation of a career in research, medicine, conservation, public health, bioethics, sustainable resource use, and many other areas.

ADMISSION TO THE MAJOR

Students who begin the Biology Major their first year are able to take maximum advantage of upper-level biology courses and research opportunities in later years. The major can successfully be completed if begun during sophomore year. Biology students may consider taking a semester abroad.

The required introductory courses (BIOL181/BIOL191 and BIOL182/BIOL192) do not have prerequisites or corequisites, but it is recommended to have some chemistry background or to take General Chemistry (CHEM141/CHEM142 or CHEM145) concurrently.

MAJOR REQUIREMENTS

The Biology Major's required course of study includes:

- Two introductory courses with their associated labs:
  - BIOL181 with lab BIOL191 is offered every fall semester.
  - BIOL182 with lab BIOL192 is offered every spring.
- Six or more elective biology courses at the 200 and 300 levels, which must include:
  - One mid-level cell/molecular course: MB&B208, BIOL210, BIOL212, or BIOL218
  - One mid-level organismic/population course: NS&B213/BIOL213, BIOL214, BIOL215, BIOL216, or BIOL217
- Required chemistry courses from the options below:
  - For students of the Class of 2029 and later:
    - General Chemistry: CHEM141 and CHEM142 OR
    - Honors Chemistry: CHEM145 OR
    - One semester of Organic Chemistry: CHEM251 or CHEM252
  - For students of the Class of 2028 and earlier:
    - General Chemistry: CHEM141 and CHEM142 OR
    - Honors Chemistry: CHEM143 and CHEM144
- Required Science Outside of Biology: Any three additional credits of related courses from at least two different departments. These are courses that address approaches and methodologies applied in biology and include:
  - Organic Chemistry: CHEM251, CHEM252
  - Physics: PHYS111, PHYS112, PHYS113, or PHYS116 and PHYS207
  - Mathematics: MATH117 or higher
  - Statistics: MATH132, ECON300, PSYC200
  - Quantitative Analysis Center: QAC201, QAC231
  - Computer Science: BIOL265, BIOL266 (0.5 credit), BIOL271 (0.5 credit), COMP112, COMP114, COMP115, COMP211, or a course higher than COMP211
  - Earth and Environmental Science: BIOL242/E&ES270, E&ES280, E&ES380
  - Archaeology: ARCP350
- One capstone experience

Important Notes for All Majors:

- No more than three of the mid-level courses listed above may be counted towards the six advanced elective requirements.
- At least three elective courses (200-level and above) that are counted toward the Biology major cannot be simultaneously used to fulfill any other major.
- Organic Chemistry (CHEM251 and CHEM252) can only be used to complete one Biology requirement, and can't also count towards the "Required Science Outside of Biology" requirement if used to complete the required Chemistry courses.
- Biology majors are allowed to apply at most one elective course or one cognate course taken credit/unsatisfactory toward fulfilling the major requirements. However, this is discouraged because good performance in major courses is an important aspect of a student's transcript.
- A strong background in chemistry is recommended for students planning to enter graduate or medical school. Most medical and health-related graduate programs require two years of college-level chemistry, including laboratory components and a biochemistry course.
- Students planning to attend medical, dental, or other health professions graduate school should note that admission requires a year each of introductory biology, physics, and math (such as calculus or statistics) **and** two years of chemistry (general and organic), including any laboratory components.

Important Requirements for Double Majors:

- At least three elective courses (200-level and above) that are counted toward the Biology major cannot be simultaneously used to fulfill any other major.
- For double-major in Biology and Neuroscience and Behavior, NS&B213/BIOL213 cannot count toward the six electives required for the Biology major; however, NS&B213/BIOL213 will fulfill the Column 2 breadth requirement.
- Two Statistics courses, even from different departments, cannot both be counted as cognates.
- Students cannot use E&ES280 if they use QAC231 .

Electives may be chosen from among the following courses at the 200, 300, or 500 levels. See WesMaps for current course offerings as not all courses below are offered every year. The courses are grouped thematically for your convenience only.

CELL AND DEVELOPMENTAL BIOLOGY

Code	Title	Hours
BIOL/MB&B223	The Molecular Basis of Cancer	1
BIOL/MB&B228	Medical Biochemistry	1
BIOL/MB&B232	Immunology	1
BIOL/MB&B237	Signal Transduction	1
BIOL241	Cell-Cell Interactions in Development	1
BIOL/IDEA267	Engineering Biology: Cells and Tissues	1
BIOL295	Physiology and Cell Biology of Cancer	1
BIOL317	Genes and Mechanisms in Vertebrate Sex Determination	1
BIOL322	Cell Migration in Development and Disease	1
BIOL/NS&B325	Stem Cells: Basic Biology to Clinical Application	1
BIOL332	Genomics Era Cell and Development	1
BIOL334	Shaping the Organism	1
BIOL340	EvoDevo: Origins of Variation in the Phenotype	1
BIOL/NS&B343	Muscle and Nerve Development	1

BIOL/NS&B345	Developmental Neurobiology	1
MB&B375	The Cell-Division Cycle and Cancer	1

EVOLUTION, ECOLOGY, AND CONSERVATION BIOLOGY

Code	Title	Hours
BIOL/ENVS220	Conservation Biology	1
BIOL/ENVS226/ E&ES240	Invasive Species: Biology, Policy, and Management	1
BIOL/ENVS233/ E&ES234	Geobiology	1
BIOL235	Comparative Vertebrate Anatomy	1.5
BIOL236	Comparative Animal Physiology	1
BIOL290/ENVS286	Plant Form and Diversity	1
BIOL308	Small Creatures, Big Impact: Vectors of Human Disease	1
BIOL/E&ES312/ ENVS311	Global Change Biogeography	1
BIOL316	Plant-Animal Interactions	1
BIOL318	Nature and Nurture: The Interplay of Genes and Environment	1
BIOL320	Everything is Everywhere: Environmental Microbiomes	1
BIOL/COMP/CIS327	Evolutionary and Ecological Bioinformatics	1
BIOL/ENVS337	The Origins of Bacterial Diversity	0.5
BIOL346/E&ES238/ ENVS340	The Forest Ecosystem	1
BIOL365	Calderwood Seminar in Public Writing: 21st-Century Biology	1
ARCP/E&ES350/ ENVS348	Animals in Archaeology	1
BIOL368/ENVS369/ E&ES342	Ecological Resilience: The Good, the Bad, and the Mindful	1

GENETICS, GENOMICS, AND BIOINFORMATICS

Code	Title	Hours
MB&B/BIOL231	Microbiology	1
BIOL242	Quantitative Methods for the Biological and Environmental Sciences	1
BIOL/NS&B257	Neurogenetics	1
BIOL/CIS263	Demystifying Data: Introductory Data Analysis and Modeling	1
BIOL/MB&B/ CIS265/COMP113	Bioinformatics Programming	1
BIOL/CIS270	Systems Biology with Programming	1
MB&B306	Epigenetics	1
BIOL/CIS310/ MB&B311	Genomics Analysis	1
BIOL/CIS/COMP327	Evolutionary and Ecological Bioinformatics	1
MB&B/BIOL333	Gene Regulation	1
MB&B394	Advanced Laboratory in Molecular Biology and Genetics	1

NEUROBIOLOGY AND BEHAVIOR

Code	Title	Hours
BIOL/NS&B224	Hormones, Brain, and Behavior	1
BIOL/NS&B/ PSYC239	Functional Anatomy of the Human Brain	1
NS&B/BIOL243	Neurohistology	1
BIOL/NS&B244	Neuropharmacology	1
BIOL/NS&B245	Cellular Neurophysiology	1
BIOL/NS&B247	Laboratory in Neurophysiology	1
BIOL/NS&B250	Laboratory in Cellular and Behavioral Neurobiology	1
BIOL/NS&B251	Laboratory in Basic Practices in Neuroscience	1
BIOL/NS&B252	Cell Biology of the Neuron	1
BIOL/NS&B254	Comparative Animal Behavior	1
BIOL/NS&B299	Waves, Brains, and Music	1
NS&B302	Neurobiology of Aging	1
NS&B304	Glia: Not just neuronal glue!	1
NS&B/BIOL328	Chemical Senses	1
BIOL/NS&B345	Developmental Neurobiology	1
BIOL/NS&B347	Mammalian Cortical Circuits	1
BIOL/NS&B351	Neurobiology of Learning and Memory	1
NS&B/BIOL/ PSYC353	Neurobiology of Neurological Disorders	1
BIOL/NS&B/ PSYC356	Neurodevelopmental Disorders	1
BIOL/NS&B/ FGSS357	Sex and Gender: From Synapse to Society	1
BIOL/NS&B358	Neurobiology of Movement	1
NS&B/BIOL360	Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits	1
BIOL/NS&B373	Exploring the Brain-Body Interface: The Neuroscience of Basic Survival	1

ADDITIONAL COURSES THAT CAN BE CREDITED TO THE ELECTIVE REQUIREMENT

The following courses may be applied toward fulfilling the mid-level elective requirement for the Biology major:

Code	Title	Hours
ARCP/ENVS/SISP/ IDEA203/ANTH212	The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology	1
ARCP/ENVS/ANTH/ E&ES257	Environmental Archaeology	1
CHEM/NS&B323	Biochemistry of Neurodegenerative Disease	1
CHEM/MB&B325	Introduction to Biomolecular Structure	1
CHEM/MB&B383	Biochemistry	1

Additional notes on fulfilling the Biology major:

- Cross-listed courses that are included on the list above are automatically credited to the biology major.
- Courses in the BIOL 400 series (such as research tutorials) contribute toward graduation but do not count toward the major, although they can be used to fulfill the capstone requirement (see below).

COURSES FOR NON-MAJORS

The following courses do not have prerequisites and, as such, are appropriate for non-majors.

Code	Title	Hours
BIOL106	The Biology of Sex	1
BIOL140	Classic Studies in Animal Behavior	1
BIOL146	Primate Behavior: The Real Monkey Business	1
BIOL173	Global Change and Infectious Disease	1
BIOL/MB&B181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
BIOL/MB&B182	Principles of Biology II	1
BIOL/ENVS/ E&ES197	Introduction to Environmental Studies	1

STUDENT LEARNING GOALS

Biology majors acquire the following knowledge and competencies:

- A broad and integrative understanding of the theory and practice of biology
- Critical and quantitative thinking
- Creative problem solving
- Scientific reasoning
- Ethics of biological research
- Understanding of the role of biology in society and sustainability practices
- Designing and conducting original research
- Written and oral communication about scientific concepts and research findings
- Comprehension and critical interpretation of primary scientific literature

Students will use their biological knowledge and skills to become effective, scientifically-informed citizens and professionals.

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions and collaborative group work, and presentations. Written exams, peer review, and self-assessment will also evaluate their class performance.

ADVANCED PLACEMENT

While placing out of Intro Biology lecture courses is discouraged, students who scored a 4 or 5 on the AP Biology exam may be eligible to place out of either BIOL181 or BIOL182. If you are interested in placing out, you are required to consult with an instructor from the relevant course.

Students interested in placing out of MB&B181, which is offered every fall semester, contact Professor Cori Anderson (canderson05@wesleyan.edu). This place out exam must be taken during the first week of the student's first semester at Wesleyan.

Students interested in placing out of BIOL 182, which is offered every spring semester, contact Professor Fred Cohan (fcohan@wesleyan.edu) and Professor Laverne Melón (lmelon@wesleyan.edu).

There is no process to place out of BIOL191 and BIOL192, the Intro Biology lab courses. BIOL191 is offered every fall semester. BIOL192 is offered every spring semester. Students who place out of either BIOL181 or BIOL182 must still take the corresponding lab course, especially those who plan on majoring in Biology, MB&B, or NS&B or those who are intending to continue with a health professions graduate program (ex: medical school, dental school, etc.).

PRIZES

Dr. Neil Clendeninn Prize – Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed their sophomore year and should exemplify qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

The Peirce Prize – Awarded in successive years for excellence in biology, chemistry, and geology.

TRANSFER CREDIT

Up to two outside credits for biology courses may also be applied from another institution (during a study abroad program, for example). Prior permission must be obtained from the departmental liaison, Professor Michael Singer (msinger@wesleyan.edu), to ensure creditability of specific courses from other institutions.

RELATED PROGRAMS OR CERTIFICATES

Environmental Studies Minor

The Environmental Studies (ENVS) program is interdisciplinary and offers both a minor and a linked major. The ENVS-linked major is a secondary major and requires a student also to have a primary major in another department, program, or college. ENVS majors write a senior thesis or essay in environmental studies that is mentored by a professor in another department, program, or college (e.g., biology). There is also an opportunity to earn an ENVS minor, which does not require a senior thesis or essay.

Informatics and Modeling Minor

The Integrative Genomic Science pathway within this minor will be of particular interest for life science majors. See wesleyan.edu/imcp/igs.html.

Neuroscience and Behavior Program

Several faculty members in the Biology and Psychology Departments also participate in the Neuroscience and Behavior Program that, at the undergraduate level, constitutes a separate major. Information about that program can be found at wesleyan.edu/nsb.

BA/MA PROGRAM

The BA/MA program provides an attractive option for life science majors to gain graduate level research experience. Students are advised to begin research by their junior year if they intend to pursue the BA/MA in biology. Admission

is competitive and based on GPA, faculty recommendations, and research experience.

ADDITIONAL INFORMATION

The BIOL/MB&B 338/339 seminar series features distinguished scientists from other institutions who present lectures on their research findings. These seminars aim to relate material studied in courses, tutorials, and research to current scientific activity. These seminars are usually held on Wednesday at noon and are open to all University community members. Undergraduates are especially welcome.

HONORS

To be considered for departmental honors, a student must:

- Be a biology major and be recommended by a faculty member.
- Have at least a B average (GPA of 85 or above) in courses credited to the major.
- Submit a thesis based on laboratory research, computational research, or mathematical modeling. The thesis is carried out under the supervision of a department faculty member.

CAPSTONE EXPERIENCE

The Capstone Experience is required for Biology majors and students must complete at least one of the following:

- One semester of a 300-level seminar, lab, or field course
  - One semester of BIOL338 or BIOL339 may be used to fulfill this requirement
- One semester of a 500-level journal club: BIOL505, BIOL506, BIOL507, BIOL508, BIOL509, BIOL510 , BIOL547 or BIOL548
- Two semesters of a Senior Thesis tutorial
- One semester of a 400-level research tutorial (BIOL423 or BIOL424)
- A summer research internship in biology or a related life sciences area

CHEMISTRY MAJOR

MAJOR DESCRIPTION

The Chemistry major provides students with a strong foundation in the chemical sciences and extensive experience in practical laboratory techniques. Students learn to apply the scientific method to develop and test hypotheses, perform experiments, analyze data critically, and effectively communicate their findings.

The Chemistry Department offers two pathways to complete the major:

- The **Standard Chemistry Track (A-track)** is designed for students seeking the breadth and depth of a traditional chemistry education.
- The **Chemical Biology Track (B-track)** is ideal for students who wish to focus on using chemical tools and concepts to explore and manipulate biological systems.

This program is well suited for students who are curious about how matter behaves at the molecular scale, have strong quantitative and analytical skills, enjoy solving complex problems, and value precision and attention to detail.

Graduates of the Chemistry major often pursue advanced studies in doctoral or medical programs. Others go on to successful careers in fields such as scientific research, chemical engineering, pharmaceuticals, materials science, environmental science, patent law, technical writing, forensic science, and education.

ADMISSION TO THE MAJOR

To declare the chemistry major, students must have earned a grade of C or higher in all 100- and 200-level chemistry courses completed prior to declaration.

MAJOR REQUIREMENTS

The **Standard Chemistry (A-track)** major requires the following coursework:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
(may be fulfilled using CHEM145 and/or AP credit)		
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Introductory Labs		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Mathematics		
MATH121	Calculus I	1
MATH122	Calculus II	1
(may be fulfilled using AP credit or placement beyond MATH122)		
Physics		
PHYS113	General Physics I	1
PHYS116	General Physics II	1
(may be fulfilled using PHYS111/PHYS112)		
Inorganic Chemistry		
CHEM361	Advanced Inorganic Chemistry	1
(waived for students who completed CHEM144)		
Physical Chemistry		
CHEM337	Physical Chemistry I	1
CHEM338	Physical Chemistry II	1
(MATH221/MATH222 are recommended)		
Advanced Labs		
CHEM375	Integrated Chemistry Laboratory I	1
CHEM376	Integrated Chemistry Laboratory II	1
300-Level Electives		**2**

Select two 300-level chemistry courses		
• electives must be 1.0 credit or greater and graded (A-F)		
• 2.0 accumulated credits of CHEM research may replace one elective		
• students who use CHEM144 for the Inorganic requirement must choose a third elective		
Colloquium		
CHEM521	Chemistry Colloquium (two semesters required)	0.5
Senior Thesis (optional -- required for Departmental Honors)		
CHEM409	Senior Thesis Tutorial	1
CHEM410	Senior Thesis Tutorial	1

The **Chemical Biology (B-track)** major requires the following coursework:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
(may be fulfilled using CHEM145 and/or AP credit)		
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Introductory Labs		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Mathematics		
MATH121	Calculus I	1
MATH122	Calculus II	1
(may be fulfilled using AP credit or placement beyond MATH122)		
Biology		
BIOL181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
BIOL182	Principles of Biology II	1
Inorganic Chemistry		
CHEM361	Advanced Inorganic Chemistry	1
(waived for students who completed CHEM144)		
Physical Chemistry		
CHEM381	Physical Chemistry for the Life Sciences	1
Biochemistry		
MB&B208	Molecular Biology	1
CHEM383	Biochemistry	1
Advanced Labs (choose two)		
CHEM375	Integrated Chemistry Laboratory I	1
CHEM376	Integrated Chemistry Laboratory II	1
CHEM395	Structural Biology Laboratory	1
300-Level Electives		**1**
Select one 300-level chemistry courses		
• electives must be 1.0 credit or greater and graded (A-F)		
• 2.0 accumulated credits of CHEM research may replace one elective		
• students who use CHEM144 for the Inorganic requirement must choose a third elective		
Colloquium		
CHEM521	Chemistry Colloquium (two semesters required)	0.5
Senior Thesis (optional -- required for Departmental Honors)		
CHEM409	Senior Thesis Tutorial	1
CHEM410	Senior Thesis Tutorial	1

COURSES FOR NON-MAJORS

Students with little or no prior background in chemistry are encouraged to enroll in General Chemistry I and II (CHEM141 /CHEM142) , both of which fulfill NSM general education expectations and are appropriate for non-science majors. Students may also enroll in the Introductory Chemistry Laboratory (CHEM152) to supplement their coursework with hands-on experience.

Students with advanced preparation in chemistry are encouraged to enroll in Honors General Chemistry (CHEM145), a one-semester alternative to CHEM141/CHEM142. This course offers an enriched curriculum that explores the breadth of general chemistry topics in greater depth.

Students planning to apply to **medical, dental, or veterinary schools** are advised to complete the following prerequisite courses:

Code	Title	Hours
General Chemistry		
CHEM141	General Chemistry I	1
CHEM142	General Chemistry II	1
or		
CHEM145	Honors General Chemistry	1
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Laboratories		
CHEM152	Introductory Chemistry Laboratory	0.5
CHEM257	Intermediate Chemistry Laboratory	0.5
CHEM258	Organic Chemistry Laboratory	0.5
Biochemistry		
MB&B228	Medical Biochemistry	1

STUDENT LEARNING GOALS

Graduates with a BA in Chemistry should be able to:

- Apply the scientific method to develop and test hypotheses
- Understand, interpret, and apply chemical data
- Conduct standard laboratory procedures safely and effectively
- Use quantitative methods to solve chemical problems
- Locate and comprehend primary scientific literature
- Critically evaluate claims in chemical research
- Communicate findings clearly in written, oral, and visual forms
- Uphold ethical standards in scientific work
- Connect chemistry to other scientific disciplines

STUDY ABROAD

A semester abroad is possible with sufficient advance planning. Students are encouraged to consult with a chemistry faculty member early in the process to ensure appropriate course sequencing and progress toward the major.

ADVANCED PLACEMENT

Students who earn any of the following examination scores automatically receive 1.0 prematriculation credit in chemistry:

- **AP Chemistry**: score of 4 or 5
- **IB-HL Chemistry**: score of 5, 6, or 7
- **Cambridge A-Level Chemistry**: grade of A

This credit may be used in place of CHEM141, CHEM142, and CHEM152 to satisfy requirements for majors, minors, and course prerequisites. Students awarded prematriculation credit are not eligible to receive credit for CHEM141 or CHEM142, but may elect to enroll in **Honors General Chemistry** (CHEM145) for credit. Students who complete CHEM145 may also take **Introductory Chemistry Laboratory** (CHEM152) for credit.

LANGUAGE REQUIREMENT

The Chemistry major has no language requirement.

TRANSFER CREDIT

Transfer credit for chemistry courses taken at other institutions is subject to departmental approval and is not guaranteed. Requests are reviewed by the Chemistry Department Curriculum Committee and must be submitted in advance to confirm course eligibility prior to enrollment.

Submission Guidelines

Send all materials by email to **chemistry@wesleyan.edu before** enrolling in the course. Include the following:

- Completed *Permission to Transfer Credit* form (Office of Student Affairs)
- Detailed course syllabus, including schedule and topics covered
- Textbook title, author(s), edition, and chapters used
- Length of class meetings and total instructional hours (excluding exams)
- Instructor name and contact information

Additional Requirements

- Online lecture courses must have **synchronous** delivery. In-person courses are preferred.
- **Online laboratory courses will not be accepted**

ADDITIONAL INFORMATION

HONORS

Departmental honors are awarded by the faculty to graduating chemistry majors based on a thorough evaluation of the senior thesis, recognizing excellence in research, analysis, and scientific communication.

CAPSTONE EXPERIENCE

The recommended capstone experience for chemistry majors is a substantial research project conducted in collaboration with a faculty member, ideally culminating in a senior thesis. Research is a central component of the major for many students, and Wesleyan's small but distinguished graduate program provides unique opportunities for undergraduates to engage in advanced research alongside tenured and tenure-track faculty who are actively involved in significant investigations.

COLLEGE OF EAST ASIAN STUDIES MAJOR

MAJOR DESCRIPTION

The East Asian Studies Major (CEAS) is designed to give students a broad knowledge of East Asian cultures with a deeper focus on a single country—China, Japan, or Korea. Cultural studies are grounded in one of four concentrations: Archaeology and History, Literature and Culture, Philosophy and Religion, or Political Economy. Students are expected to develop fluency in an East Asian language and are highly encouraged to study abroad to experience living in an East Asian country while practicing the language in its appropriate cultural context.

Students interested in this major bring an open-minded, interdisciplinary mindset and a global perspective. They are culturally curious and eager to hone their critical thinking, reading, writing, and language skills. Adaptability, patience, and dedication are key traits to apply to studying languages and complex cultural nuances.

CEAS majors gain strong language acquisition abilities, wide-ranging knowledge about East Asian cultures, and an area of expertise through engagement with both historical and contemporary issues in the region. These skills prepare students for careers in international relations, business, academia, translation, and cultural exchange.

ADMISSION TO THE MAJOR

Prospective majors are urged to start their language and Foundations core courses early in their Wesleyan careers. This will leave more time for study

abroad and for more meaningful work in the concentration of the student's choice. To help students chart their way, the college faculty members have designed the concentrations listed below. Admission to the college is most commonly requested during the spring semester of a student's first year, although students may join the major at any time, so long as they have a viable path towards completing the major's requirements.

In order for us to learn a bit more about you and to help us match you with an advisor, we ask all students to fill out and submit the new major student information form (https://docs.google.com/forms/d/e/1FAIpQLScf6XmieaLGh_-817Yp6HHLs-GobrpJHEsjSnro7L3f9Y5R5Q/viewform) prior to submitting your major declaration form via WesPortal.

MAJOR REQUIREMENTS

Majoring in the College of East Asian Studies (CEAS) requires seven courses. These include two core courses, four in a concentration, and one elective.

Code	Title	Hours
CEAS201	Proseminar	1
CEAS207	Introduction to History: Foundations of East Asian Cultures	1
Concentration (4 courses in one concentration area)		**4**
Archaeology and History		
Literature and Culture		
Philosophy and Religion		
Political Economy		
Elective		**1**
Senior Capstone		
Total Hours		**7**

Other requirements include language courses and a senior capstone project. In addition, although not required, there is an expectation that students will study abroad, which for most students forms a vital part of their learning experience. Up to one full credit of CLAC courses may be counted toward major credit. All other courses counting toward the major (unless only offered as Cr/U) must be taken for a grade. Please note that courses taken C/U during 2020 may also count towards the major in recognition of the difficulties that many students face as a result of the pandemic.

Core courses. Each CEAS major is expected to take an introductory "Foundations of East Asian Culture" course (usually taken in the spring semester of the first year) and our interdisciplinary Proseminar (CEAS201) (usually taken in the fall of the sophomore year). The goal is to ensure that each CEAS major is firmly anchored in the classical texts and key events that shaped the development of East Asian cultures before the 19th century as well as the basic methodologies and main areas of scholarship within East Asian studies. Details on the courses that count for the core courses are available at wesleyan.edu/ceas/majoring/core.html (https://wesleyan.edu/ceas/majoring/core.html).

Concentrations. Each CEAS major must choose one of the four concentrations listed below. Our goal is to ensure that each major's course of study has methodological coherence in a specific area of study. Course offerings for each concentration may vary in some years according to faculty on campus. Details on the courses that count for the concentrations are available at wesleyan.edu/ceas/majoring/concentrations.html (https://wesleyan.edu/ceas/majoring/concentrations.html).

- Archaeology and History
- Literature and Culture
- Philosophy and Religion
- Political Economy

STUDENT LEARNING GOALS

The College of East Asian Studies (CEAS) has two mutually reinforcing core missions: to cultivate an outstanding group of students with strong language abilities, wide-ranging knowledge about East Asia, and an area of particular expertise; and to promote knowledge of and engagement with the histories, cultures, and contemporary significances of East Asia across the campus, curriculum, and broader community.

STUDY ABROAD

Experience living in East Asia and use of language in its appropriate cultural context is viewed as a vital component of East Asian studies. Accordingly, although not required, CEAS majors are expected to study abroad to develop their language competency and acquire a more concrete grasp of a specific East Asian cultural context. This expectation may be fulfilled through a semester or one year in an approved program.

For more information, see wesleyan.edu/ceas/majoring/studyabroad.html (https://wesleyan.edu/ceas/majoring/studyabroad.html).

Questions about study abroad should be addressed to Prof. Wei Gong (China), Prof. Naho Maruta (Japan), or Prof. Hyejoo Back (Korea).

LANGUAGE REQUIREMENT

Students Majoring in CEAS must attain, at minimum, advanced-level proficiency in Chinese, Japanese, or Korean. Advanced-level proficiency is demonstrated by the successful completion of CHIN 218, JAPN 218, or KREA 218 (third-year level courses), or its equivalent as determined by the respective Language Coordinator. All students must achieve a minimum grade of B in their respective 218-level language course to demonstrate advanced-level proficiency. All students must take a minimum of four semesters of East Asian language courses at Wesleyan; this may mean being required to take language classes beyond the advanced level. Pre-approved language credit earned through CEAS-approved study abroad programs may count toward this semester minimum requirement, at the discretion of the respective Language Coordinator.

Students with pre-existing proficiency in Chinese, Japanese, or Korean must disclose this ability to the respective Language Coordinator before commencing language study at Wesleyan or before declaring the CEAS Major, whichever is earlier. Evaluation of any student's pre-existing language proficiency will be undertaken by the respective Coordinator, with course level placement determined accordingly. Majors who are deemed to be "native speakers" of Chinese, Japanese, or Korean will be required to study another East Asian language.

As is the case with CEAS courses generally, all language courses taken to fulfill CEAS Major requirements must be taken for a grade (unless said courses are only offered CR/U, such as CLAC and other specific courses). Questions about Chinese should be addressed to the Chinese Language Coordinator, Prof. Wei Gong. Questions about Japanese should be addressed to the Japanese Language Coordinator, Prof. Naho Maruta. Questions about Korean should be addressed to the Korean Language Coordinator, Prof. Hyejoo Back.

CAPSTONE EXPERIENCE

All majors must complete a written or (with approval) creative project during their senior year. This should involve the use of East Asian language materials to the extent that the student's preparation permits. There are several ways in which this requirement can be fulfilled:

- Write a substantial essay, focusing on East Asia, as assigned in a regular class. The instructor must approve of this project and may suggest revisions as needed. Similarly, faculty approval is required also for a creative project done in the context of a class or as a tutorial. If the class instructor is not a CEAS faculty member, the essay or the creative arts project must be approved by the student's CEAS advisor. Please note that this class can simultaneously fulfill other requirements.
- Write a one-semester senior essay in a tutorial, preferably given by a CEAS faculty member. The tutorial may be for a full credit or for 0.5 credit.
- Write a senior thesis, typically in a two-semester tutorial with a CEAS faculty member.
- Furthermore, each student will be expected to present his or her research at a poster presentation toward the end of the spring semester of the senior year. This presentation is in addition to and apart from the actual research project.

CRITERIA FOR HONORS

To qualify for Departmental Honors the student must complete a written or creative thesis, under the supervision of a faculty member, preferably in CEAS. If the thesis is supervised by non-CEAS faculty, then the student must consult regularly with a suitable CEAS faculty member as a secondary, informal tutor. Conversations with potential tutor(s) should be started before submitting the online application (link below).

CEAS expects students to make reasonable use of their language(s) of study (Chinese, Japanese, and/or Korean) in the research and analysis grounding the thesis. The specific nature and extent of this use should be determined in discussion with the CEAS thesis tutor, or with the secondary CEAS tutor. In the case a creative thesis includes ephemeral events like concerts, plays, exhibits, or dance performances, the student should inform the tutor of the date well in advance, so that the tutor and the other members of the evaluation committee can arrange to be present. Further, in such creative theses, students must include at least one written chapter of at least thirty pages, framing and explaining the research and ideas underpinning the project. This chapter must appeal to relevant sources and adhere to established scholarly conventions.

COLLEGE OF INTEGRATIVE SCIENCES MAJOR

MAJOR DESCRIPTION

The College of Integrative Sciences (CIS) offers a linked major that equips students with the skills needed to address current and emerging global challenges. These multifaceted challenges require flexible, innovative problem-solving approaches that draw upon scholarship in science, technology, and other perspectives. With a key focus on research, students are transformed from consumers into creators of knowledge. Guided by a faculty mentor, students explore open questions and develop new perspectives on the frontiers of science.

A linked major in CIS enables creative synergies among faculty and students of disparate disciplines and departments. Curious, ambitious students with a wide range of interests in the STEM fields may be attracted to this broad investigative approach of the CIS combined with the intellectual depth of a major in the Natural Science and Mathematics (NSM) program.

Graduates of the College of Integrative Sciences are primed to take a 'big picture' approach to solving complex, real-world problems that involve and contribute to multiple domains of knowledge and industry.

ADMISSION TO THE MAJOR

Students must apply for admission to the College of Integrative Sciences (CIS) by completing the following application materials (https://forms.office.com/Pages/ResponsePage.aspx?id=eWz9qXFt80mREQyOWR3D0RcLGAhK_YRHoLsNINFmLqlUQTlRQUdOS0JYNjlJWlgxUkVNR1
which include:

- A description of the proposed research project
- A description of the proposed course of study
- A letter of reference from the proposed faculty mentor

Normally, the deadline for applications is the Friday immediately prior to spring break. Please allow time to prepare your project description prior to the application deadline. If you miss the deadline, contact the director of the CIS to submit your application.

Students are eligible for the CIS linked major if they have chosen a Natural Sciences and Mathematics (NSM) major and have completed or are enrolled in at least one semester of the Research Frontiers Seminar (CIS221 or CIS222). Students should have an interest in interdisciplinary scientific research.

MAJOR REQUIREMENTS

In addition to majoring in one department or program in NSM, students in the CIS must take a minimum of six and a maximum of nine credits from the following courses:

OUTLINE OF THE LINKED MAJOR

- CIS221 **and/or** CIS222 **(0.5 credits/semester).** This course is designed to introduce students to ongoing research projects in the NSM division. Potential CIS students are encouraged to take the course as early as their first year or during their sophomore year to get exposure to the variety of research conducted in the NSM division.
- **Two interdisciplinary electives (2 credits).** These courses provide core skills from a discipline and department outside the primary major. Selections are made in consultation with your CIS linked-major advisor. The elective courses must be in Division III, outside the host major, and have a theme.
- **Two semesters of a journal club or seminar (0.5–1 credit).** The two journal clubs/seminar series must be in different disciplines. CIS221/CIS222 cannot be used to fulfill this requirement.

- CIS321 **and** CIS322 **Senior capstone colloquium (0.5 credits/semester).** Two semesters of the capstone colloquium are required. In this course, students learn about and discuss inherently integrative scientific topics, such as the Drake Equation. The capstone course also focuses on developing writing and presentation skills that will be useful going forward. Senior CIS majors present their research to their peers, junior CIS majors, and potential CIS majors.
- **Research (2–4 credits).** Research credits are typically earned in an Advanced Research Seminar or Senior Thesis Tutorial. Two credits of research is the minimum requirement. Four research credits are achieved by taking research for a full credit each semester in the junior year and the senior year. Students are strongly encouraged to write a thesis based on their research during their senior year. In unusual cases, the two-credit minimum can also be satisfied through credits for summer research.
- **One summer research experience.** All students are required to spend at least one summer performing research (https://www.wesleyan.edu/cis/summer-program/), preferably the summer after their sophomore year, immediately following acceptance to the College. Students are supported during the summer by a CIS fellowship or doing research for credit.

STUDENT LEARNING GOALS

Students in the College of Integrative Sciences will acquire the following knowledge and capabilities:

- A breadth of knowledge and creative synergies across various scientific disciplines.
- Skills related to scientific research such as developing a testable hypothesis, formulating research questions, evaluating experimental approaches, troubleshooting, analyzing data, and synthesizing conclusions.
- Applying quantitative and creative tools to address challenges in science and technology.
- Using primary scientific literature.
- Scientific communication in writing (research proposal and final paper), visuals (scientific posters, slideshows), and oral presentations.

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions, collaborative group work, and multimedia presentations. Written exams, faculty review, peer review, and self-assessments will also evaluate their class performance.

RELATED PROGRAMS

Students are eligible for the CIS linked major if they have chosen a Natural Sciences and Mathematics (NSM) major. Students should have an interest in interdisciplinary scientific research. There are many established and emerging fields of study that lie at the intersection of two or more disciplines. Examples of pathways to completing the CIS major that include synergies across departments are available on the CIS web page (https://www.wesleyan.edu/cis/about/pathways.html).

HONORS

Students pursuing a CIS linked major can pursue a senior thesis in either CIS or the department of their linked major. Honors in CIS requires completion of a senior thesis. Three thesis readers will evaluate the thesis work. One reader must be your research mentor, and the readers cannot all be from the same department.

CAPSTONE EXPERIENCE

Research is a cornerstone of the CIS major. A minimum of two credits of research and participation in at least one summer research program (https://www.wesleyan.edu/cis/summer-program/) constitutes the Capstone Experience in CIS.

COLLEGE OF LETTERS MAJOR

MAJOR DESCRIPTION

The College of Letters (COL) was founded in 1959 as a three-year interdisciplinary humanities program unique to Wesleyan University. The COL major integrates cultural competence, freedom of inquiry, critique, and rigor within a collaborative learning community, as manifest in our library where offices open into a shared space for study, discussion, research, workshops, readings, meals, and socializing. The structure of the major, smallness of classes, and openness to student concerns sustain a close rapport and lively dialogue between and among all COL professors and majors.

The COL curriculum coheres the benefits of rigorous requirements, small classes, and student-specific design. All majors take a sequence of five core co-taught colloquium seminars which integrate interdisciplinary and critical study of cultures and languages from all across the Mediterranean, Europe, and the Atlantic, and from antiquity to the present. Each student also collaborates with their academic advisor to choose electives in history, language, literature, and philosophy, to select a study abroad program, and to design a capstone project suited to their own academic and creative ambitions.

The COL pedagogy combines high expectations with creative exploration and communal support. In all courses taken for the major students receive honest written evaluations rather than letter grades. And, at the major's midpoint, students are independently evaluated by non-Wesleyan professors in the Junior Comprehensive Examinations. Constructive feedback is contextualized by an ethos of care in which professors actively equip students as collaborators in a shared intellectual project.

The flexibility and cultural range of the COL major equips graduates for success in vocations and careers as varied as Wesleyan students in general. The rigor of the COL major explicitly sets up our students for graduate degrees across the humanities, social sciences, law, professional schools, as well as (when combined with another major) science and medicine. Recent graduates from can be found in traditional and new media, government and intelligence, advocacy and policy NGOs, tech and AI, business and marketing, education administration and teaching, library science and art curation, medicine and healthcare, psychiatry and counseling, data and software, publishing and editing, business and finance, communications and creative writing, scriptwriting and film production, and more.

ADMISSION TO THE MAJOR

The College of Letters is a three-year major that students typically declare in the spring semester of their first year at Wesleyan. Declaration forms and further information can be found on the COL website under "Declare the Major (https://www.wesleyan.edu/col/apply.html)." Submission of these forms provides the department with information needed to advise an incoming major on all aspects of their academic career, including their choice of a foreign language and study abroad planning. Students will be assigned a COL advisor within two weeks of declaring the major. Sophomore transfer students may declare the major before or during orientation.

MAJOR REQUIREMENTS

The program consists of five components, eleven course credits in total. These are: Five Colloquia, a mid-point Junior Comprehensive Examination, a Study Abroad semester, Four Electives, and a Capstone Project.

COL students are encouraged and expected to take intellectual risks in fulfilling these requirements. To facilitate this culture, each course in the program is taken Cr/U (rather than for a letter grade) and assessed through detailed written evaluations filed with the registrar and the COL at the end of the semester. Upon graduation the Director compiles these assessments into a Director's Letter, a summary of each student's intellectual trajectory and accomplishments in the program, which can (upon request) accompany their official Wesleyan transcript. In addition to a broad and deep multi-cultural and inter-disciplinary compentence, and their inclusion in a lifelong learning community, the COL equips students with skills in writing, speaking, analytical argument, and creative critique.

Requirement 1. Colloquia

Five colloquium seminars are taken in sequence with the cohort of majors. The COL Colloquia integrate, in a chronological sequence from antiquity to the present, interdisciplinary and critical study of cultures and languages from all across the Mediterranean, Europe, and the Atlantic.

Requirement 2. Junior Comprehensive Examination

In November and December of the Junior year, a written and oral examination is administered and assessed by two carefully-chosen non-Wesleyan professors. The Junior Comps Exam covers the texts read in the first three colloquia and assesses students' mastery of the discussion, analysis, and writing skills taught to that point.

Requirement 3. Study Abroad

In consultation with their advisor, students identify a study abroad program which will enrich their connection to the COL curriculum and advance their language acquisition. This is an optional requirement for International Students (who are already studying abroad). Almost all students fulfill this requirement immediately following the Junior Comprehensive Examination, as a semester abroad in the Spring semester of the Junior year. Students may propose alternative timelines for compelling academic reasons and with the support of their advisor.

Requirement 4. Electives

Four electives, intentionally selected in discussion with the advisor, with a preference for small discussion-oriented and writing-intensive courses. One elective is taken in each of four areas: History, Philosophy, Literature/Representation, and advanced Foreign Language. Academic advisors approve that the language elective is connected to the core COL curriculum, and at a sufficiently advanced level. Each elective must be taken in the Cr/U grading mode (with a written semester-end evaluation rather than a letter grade). Students and advisors collaborate on crafting a set of specialized electives suited (where possible) to productive conjunctions with the content of the colloquia, to the intellectual trajectory unique to each student, and to set up the student's capstone project.

An up-to-date list of pre-approved electives in each of the four core areas is provided below (note: some interdisciplinary courses are pre-approved for multiple areas).

Courses taken prior to declaring the major (i.e., during the first year) will not count as one of the electives for major credit. Rather, students select their four electives in consultation with their major advisor as part of an intentional plan. Such intentionality fosters an intellectual synergy for all students in the major and their cohort, and for the entire learning community.

Elective List

Code	Title	Hours
History		
COL221	Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity	1
COL228	Virtue and Vice in History, Literature, and Philosophy	1
COL247	The Fall of Rome and Other Stories	1
COL273	The History of Science in Islam	1
COL275	Moral Complexity in Islam: Origins to the Present	1
COL282	Death and the Limits of Representation	1
COL283	The Rationalist Tradition in Early Modern European Philosophy	1
COL288Z	Solitude, Society and Loneliness in Romanticisim and Modern Culture	1
COL295	Rome After Rome: Culture and Empire of Constantinople	1
COL301	Researching and Writing Historical Narrative Nonfiction: A Workshop	1
COL350	History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena	1
COL354Z	Self and Text in Roman North Africa: Augustine's Confessions	1
COL375	Advanced Research in the Traveler's Lab	1
GRST294	Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond	1
GRST320	Places of Remembrance: Historical Consciousness in Germany	1
HIST215	European Intellectual History to the Renaissance	1
HIST216	European Intellectual History since the Renaissance	1
HIST227	Finance, the Stock Market, and the History of Economic Thought	1
HIST242	World History	1
HIST261	Enlightenment and Science	1

HIST291	Gender and History: Global Feminist Theories and Narratives of the Past (FGSS Gateway)	1
HIST338	History and Theory	1
HIST391	The Treason of the Intellectuals: Power, Ethics, and Cultural Production	1
Literature/Representations		
CLST340	Daemons, Enigmas, and the Cosmic Image: Classical and Modern Allegory	1
COL218	The Family Memoir: A Contemporary Study of the Genre	1
COL225	20th-Century Franco-Caribbean Literature and the Search for Identity	1
COL227	Life Writing: Writing About the Self and from Experience	1
COL227Z	Life Writing: Writing about the Self and from Experience	1
COL230	Longform Narrative	1
COL238	Animal Theories/Human Fictions	1
COL250	The Renaissance Woman	1
COL252	Writing Love: Articulations of Passion, Genres of Intimacy	1
COL254	Folly & Enlightenment: Madness Before and After the Mind/Body Split	1
COL256	European Realist Novels	1
COL257	Remembering Selves: Forces and Forms of Autobiography	1
COL258	The Word for World is Information: Ideologies of Language in Science Fiction & Film	1
COL259	The Human Condition: Arendt, Nietzsche, Marx	1
COL265	Frankfurt School Critical Theory, Then and Now	1
COL270	Modernist City-Texts	1
COL274	Outsiders in European Literature	1
COL282	Death and the Limits of Representation	1
COL288Z	Solitude, Society and Loneliness in Romanticisim and Modern Culture	1
COL301	Researching and Writing Historical Narrative Nonfiction: A Workshop	1
COL305	The Critic and Her Publics	1
COL309	Truth & the Poet: Lyric Subjectivity and Phenomenology	1
COL310	More-Than-Human-Worlds: Theories and Fictions	1
COL311	Translation Workshop in Early Modern Spain: Topographies of Love, Arcadia, and History	1
COL321	Dialogues of Love: A Close Reading	1
COL329	Madness and Its Others: The Ethics of Intelligibility	1
COL336	Theories of Translation	1
COL337	What is (a) Language?	1
COL338	Utter Nonsense: Modernist Experiments with Meaning	1
COL339	Reading Theories	1
COL373	"Real" Love: Subjects of Unreason	1
ENGL275Z	"Like Herding Cats"	1
GRST250	Cultural Criticism and Aesthetic Theory: Walter Benjamin and Theodor Adorno	1
GRST251	Kafka: Literature, Law, and Power	1
GRST279	Good, Evil, Human: German Fairy Tales and Their Cultural Impact	1
GRST294	Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond	1
GRST386	German Romanticism: Disenchantment and Re-enchantment	1
RL&L226	The Cosmos of Dante's "Comedy"	1
RL&L236	Don Quixote: How to Read the Ultimate Novel	1
WRCT210Z	Contemporary Short Stories in Translation	1
Philosophy		
CHUM339	Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution	1
COL228	Virtue and Vice in History, Literature, and Philosophy	1
COL259	The Human Condition: Arendt, Nietzsche, Marx	1
COL265	Frankfurt School Critical Theory, Then and Now	1
COL266	History and Limits of Aesthetic Theory	1
COL269	Modern Aesthetic Theory	1
COL273	The History of Science in Islam	1
COL275	Moral Complexity in Islam: Origins to the Present	1
COL282	Death and the Limits of Representation	1
COL283	The Rationalist Tradition in Early Modern European Philosophy	1
COL290	Nietzsche - Science, Psychology, Genealogy	1
COL292	Reason and Its Limits	1
COL300	Infinity and the Mathematization of Nature: Early Modern Perspectives	1
COL339	Reading Theories	1
GRST250	Cultural Criticism and Aesthetic Theory: Walter Benjamin and Theodor Adorno	1
GRST261	Reading Nietzsche	1
HIST338	History and Theory	1
HIST391	The Treason of the Intellectuals: Power, Ethics, and Cultural Production	1
PHIL210	Living a Good Life	1
PHIL250	Thinking By Analogy: The Philosophical Use of a Literary Form	1
PHIL303	Plato's REPUBLIC	1
PHIL350	Radical Self-Care	1
Advanced Foreign Language		
CHUM389	The Mediterranean Archipelago: Literary and Cultural Representations	1
COL225	20th-Century Franco-Caribbean Literature and the Search for Identity	1
COL265	Frankfurt School Critical Theory, Then and Now	1

GRST386	German Romanticism: Disenchantment and Re-enchantment	1
GRST390	Romanticism-Realism-Modernism	1
ITAL223	Home Movies: Italian "Families" on Film	1
ITAL241	Antonioni and Cinema of the Environment	1
ITAL260	Castles of Cards: Italian Romance Epic Storytelling Lab	1
RL&L123Z	Love, Sex, and Marriage in Renaissance Europe	1
RL&L234	Cuneiform to Kindle: Fragments of a Material History of Literature	1
RL&L236	Don Quixote: How to Read the Ultimate Novel	1
SPAN230	Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History	1
SPAN231	Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage	1
SPAN236	Cervantes	1
SPAN250	Modern Spain: Literature, Painting, and the Arts in Their Historical Context	1
SPAN254	The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde	1
SPAN257	Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain	1
SPAN260	Between Word and World: Major Spanish Poets of the 20th Century	1
SPAN264	Orientalism: Spain and Africa	1

Requirement 5. Capstone Project

A two-semester capstone project on a topic chosen in discussion with the major advisor, supervised by a professor with expertise appropriate to the project. The capstone should bring together the student's work in the COL with their own intellectual journey. The capstone is taken on either the "Thesis Track" or "Essay Track."

Thesis Track: (a) COL409 and (b) COL410 (or the equivalent in another department if the thesis is to also be submitted there)

Essay Track: (a) Either COL403 or COL404 and (b) an additional elective (in history, philosophy, literature/representation, or Foreign Language)

STUDENT LEARNING GOALS

The College of Letters (COL) is a three-year, interdisciplinary major for the study of European literature, history, and philosophy, from antiquity to the present. During these three years, students learn how to think and write critically about texts in relation to their contexts and influences—both European and non-European—and in relation to the disciplines that shape and are shaped by them.

Through a required sequence of five colloquia in Antiquity, the Middle Ages, the Early Modern period, the 19th and then the 20th and 21st centuries, students learn about the emergence of the constitutive idea of Europe out of Jerusalem, Athens, and Rome, and the contested history of Europe's diverse and changing

social norms and cultural expressions. Over these three years, students also learn about the emergence and change of the disciplines as well as the forms of argumentation associated with each. Collaborative team-teaching in the first three colloquia fosters this pedagogical goal, ensuring that distinct disciplinary perspectives are both represented in conversation and in the classroom. Finally, majors become proficient in a foreign language through study abroad, where they also deepen their knowledge of another culture.

Assessment of these goals takes place continuously over the three years of the major. In lieu of grades, students receive detailed written evaluations for each of their COL courses, which address both written work and class participation. Study abroad is required in the second semester of the junior year, and in order to be accepted for the study abroad program of their choosing, students must prove that they have acquired the necessary level of language proficiency. When abroad they take courses taught in the foreign language and when they return they must continue to maintain proficiency by taking at least one upper-level seminar in that language. Toward the end of the fall semester of their junior year, majors take comprehensive examinations that are planned, administered, and graded by two external examiners, representing different disciplines and with specializations in different time periods. The written portion of the comprehensive exam tests knowledge of the material covered in the first three colloquia and evaluates the students' ability to analyze and draw from a variety of sources in order to develop and support coherent, integrative, and interdisciplinary arguments about them. The oral portion of the exam tests the students' ability to orally defend and/or expand their arguments in a face-to-face conversation. In keeping with the COL's preference for evaluations over grades, the examiners' grading scale of Credit, Honors, and High Honors accompanies a written evaluation of each student's work on both parts of the exam. During the senior year, students must complete an honors project in their choice of disciplines and media. Senior theses (taking place over two semesters) are evaluated by two professors who are not the student's advisor, in order to assure an objective assessment. One of the two evaluators is always a non-COL professor. Honors essays (over one semester) require one evaluating professor who is not the advisor.

By virtue of the Junior Comprehensive Examinations, the COL also undergoes its own yearly self-evaluation. The evaluations written for each student by the external examiners are also made available to the COL director, who looks to see if there is a trend in the overall strengths and weaknesses among the students. In addition, the examiners are asked to give their assessment of the entire COL program, first in a meeting with us and then in a letter that they may write together or individually. These assessments are shared with the department as a whole and any suggestions for changes to the program or the teaching are taken seriously. Indeed, it is because of these yearly assessments that we have made significant changes in our curriculum and, most notably, in the sequence of the colloquia.

ADDITIONAL INFORMATION

Life in COL. The College of Letters attempts to integrate the social and intellectual lives of its members by inviting guest lecturers and by providing opportunities for students and faculty to meet such guests (and one another) informally. There are also regular informal social gatherings in the College of Letters library. The structure of the College of Letters and the smallness of its classes bring about a close rapport between tutors and students and a lively and continuing dialogue among students of different classes.

After graduation. The academic standards of the College of Letters are reflected in the fact that its graduates have consistently entered the best graduate and professional schools, including schools of law, medicine, and business administration, as well as communications and the liberal arts. They also have won national fellowships and scholarships.

COLLEGE OF SOCIAL STUDIES MAJOR

MAJOR DESCRIPTION

Founded in 1959, the College of Social Studies (CSS) is a three-year multidisciplinary major featuring courses in economics, government, history, and social theory. The CSS curriculum features highly interactive, reading- and writing-intensive classes encouraging intellectual independence within a vibrant and supportive learning environment.

CSS students seek to gain understanding of social structures and relations through intense study and critical assessment of competing perspectives. They learn to accommodate and respect difference by engaging complex social issues, such as discrimination, forms of inequality, and the sources and misuse of power, with their peers and tutors. All majors undertake a capstone independent research project on a topic of their choosing.

CSS graduates have gone on to a wide array of careers in fields such as law, social activism, public service, consulting, and academia.

ADMISSION TO THE MAJOR

Interested students apply for admission to CSS during the spring of their first year. Each applicant is interviewed by a team consisting of a CSS tutor and two current CSS students. All CSS majors must complete the economics prerequisite by taking either ECON101 or ECON110 (for which a full-year of college-level calculus is required) and achieving a grade of at least C- before taking the sophomore tutorial in Economics. Students are advised to have completed this required course before entering the College to promote flexibility in scheduling the tutorials over the academic year. However, some students who have not completed the Economics prerequisite are admitted each year on the understanding that they will complete the requirement in the fall semester of the sophomore year. A student who has taken an introductory Economics course in the first year but has not achieved a grade of C- or higher must take another Economics course, which will normally be a **200**-level elective, and achieve a C- or better. A score of 4 or 5 on the AP exams in BOTH Microeconomics and Macroeconomics or a score of 5 or higher on the IB exam in Economics is sufficient to satisfy the Economics requirement for the CSS. Failure to complete the Economics requirement by the end of the fall semester in the sophomore year will result in separation from the college.

MAJOR REQUIREMENTS

Code	Title	Hours
Sophomore Tutorials/Colloquium		
CSS220	Sophomore Economics Tutorial: Markets, Welfare & the State	1.5

CSS230	Sophomore Government Tutorial: State and Society in the Modern Age	1.5
CSS240	Sophomore History Tutorial: The Emergence of Modern Europe	1.5
CSS271	Sophomore Colloquium: Modern Social Theory	1
Junior Tutorials (choose 2)		**2**
CSS320 Junior Economics Tutorial		
CSS330 Junior Government Tutorial		
CSS340 Junior History Tutorial		
Junior Colloquium		
CSS371	Junior Colloquium: Cooperation, Coordination, and Conflict	1
Senior Colloquium		
CSS391	Senior Colloquium: Visions of World Order in the Modern Era	1
Senior Research Requirement (Essay or Thesis)		1-2
Total Hours		**10.5-11.5**

Methods Course Requirement. Effective Fall 2025 with the Class of 2028, CSS students are required to take a social science course that teaches methods and/or research design prior to the start of senior year. The CSS provides a list of acceptable principal methods courses in the social sciences.

Sophomore year. There are no letter grades in the sophomore year. At the heart of the program in the sophomore year is the tutorial (normally Friday afternoon). The tutorial essay is designed to develop the student's conceptual and analytic skills as well as promote precision in writing and argument. The academic year is composed of three trimesters of eight weeks each. Each student takes a tutorial in History, Government, and Economics. Due to their intensive nature, tutorials account for roughly half of the student's academic work during the year as the student earns a total of 4.5 course credits for work in the three tutorials. A semester-length colloquium in Social Theory in the fall and selected courses within and outside the social sciences complete the sophomore program. The CSS sophomore courses are graded CR/U. Comprehensive Examinations, administered by external examiners at the end of the sophomore year, yield the only official CSS grade for work during the sophomore year.

Junior year. In the first semester of the junior year, no CSS courses are required. This allows the student flexibility to take courses outside the College to work on completing a second major (a choice selected by about half of the CSS juniors) or to take a semester of study abroad or elsewhere (about half our majors take this option). The second semester of the junior year consists of a semester-long Social Theory Colloquium focusing on the modes of inquiry in the social sciences and a sequence of two seven-week tutorials, each carrying one course credit for a total of 3 course credits. Each student chooses two from among the three tutorials offered in the three disciplines, namely Government, History, and Economics. Students also take one or at most two elective courses outside of the CSS to complete the spring course work. Students must fulfill the methods course requirement by the end of junior year, by taking a social science course that teaches methods and/or research design to develop further the student's research skills and ability to complete a substantial writing project in the social sciences in the senior year.

Senior year. In addition to a CSS Senior Colloquium in the fall semester, the senior year requires a substantial capstone project. This project is often a two-semester Senior Thesis but the requirement may also be satisfied by a one-semester (fall or spring) Senior Essay. In either case, the capstone project involves a large-scale, sustained, and serious investigation of an intellectual topic in the social sciences.

GENERAL EDUCATION

Completion of the University's General Education Expectations at both stages I and II is required of CSS majors. Because the intensive nature of the CSS sophomore year schedule requires that the bulk of the student's time and course work be done in the College, CSS majors are given until the end of the junior year to complete Stage I expectations. Stage II expectations must be completed no later than the final semester of the senior year.

STUDENT LEARNING GOALS

CSS Learning Goals:

- Critical Thinking
- Creative Thinking
- Ability to write a high-quality academic paper with supportive evidence and argumentation
- Experience to debate and discuss, in a respectful manner, in the classroom
- Learning how to use comments from tutors to improve written work
- Comfort in talking about academic subjects and current events in informal settings with peers and tutors

ADDITIONAL INFORMATION

Regularly scheduled social events (Monday Lunch Talks, Friday post-tutorial Social Hours, semester banquets) provide a sense of community that enhances the educational mission of the College.

CAPSTONE EXPERIENCE

CSS students complete one of the following during their senior year:

- Senior honors thesis (two semesters)
- Senior essay (one semester)

COMPUTER SCIENCE MAJOR

MAJOR DESCRIPTION

The Major in Computer Science (COMP) gives students an understanding of the foundational concepts and technical tools used for solving computational problems and building computational systems. Students learn to program in high-level programming languages, analyze the efficiency and correctness of programs, and create original computational structures. Each students course of study is planned in consultation with their faculty advisor and the department's advisory committee.

Computer science spans a spectrum between mathematics and engineering, and students choose to study computer science for a variety of reasons. For example, a COMP major might be interested in the mathematical foundations of

computation and programming, or in creating software and hardware systems, or in the applications to other fields of study. To that end, the Computer Science program helps students both to develop a rigorous foundation of logical and mathematical thinking and to apply those foundations in a principled way to topics including robotics, privacy, networks, computational science, and the foundations themselves.

After graduation, Computer Science majors pursue a range of advanced study and professional roles. Some students go on to advanced study in masters and PhD programs in computer science, software engineering, computer engineering, computational science, and related fields. Some students go on to professional roles in fields such as software engineering, data science, cybersecurity, information systems, and information technology. These roles span various industries, including technology, finance, healthcare, and entertainment. Some students complete a second major in addition to computer science and apply computational skills in a job or further degree program related to their second major.

ADMISSION TO THE MAJOR

To declare the computer science major, a student must have

- earned a C- or higher in COMP211;
- either earned a C- or higher in COMP212 or be enrolled in COMP212 and be earning a grade of C or higher based on completed work; and
- either earned a C- or higher in MATH228 or MATH261 or be enrolled in MATH228 or MATH261 and be earning a grade of C or higher based on completed work.
- Courses taken in Spring 2020, Fall 2020, or Spring 2021 may be taken Cr/U to satisfy the major declaration requirements, in which case a student must have earned Cr.

MAJOR REQUIREMENTS

To complete the computer science major, a student must complete the following courses:

Code	Title	Hours
Gateway Courses		
COMP211 & COMP212	Computer Science I and Computer Science II	2
Core Courses*		**4**
Electives		
Any COMP courses 300-level or higher except COMP409 and COMP410		2
Mathematical Foundations		
MATH228	Discrete Mathematics	1
or MATH261	Introduction to Abstract Algebra	
Any other MATH course 200-level or higher		1
Total Hours		**10**

* Must take one course from each of the following four areas:

- Models of computation: any **COMP** course numbered **300-305**.
- Algorithms: any **COMP** course numbered **310-315**.
- Programming languages: any **COMP** course numbered **320-325**.
- Systems: any **COMP** course numbered **330-335**.

Notes:

- No course may be used to satisfy more than one requirement.
- At most one individual or group tutorial may be used to satisfy major requirements unless prior approval is given.
- An individual or group tutorial may be used to satisfy a core area requirement only if prior approval is given.
- Only 1.0-credit courses taken A–F may be used to satisfy major requirements.
- Courses taken in Spring 2020, Fall 2020, or Spring 2021 may be taken Cr/U to satisfy major requirements, in which case a student must have earned Cr.
- In some circumstances, a 1.0 credit graded research experience may be split over 2 consecutive semesters. Such an experience must include work that is equivalent to a 1.0 credit graded 300-level course. The faculty member directing the research must request approval from CADCOM prior to the end of the first semester; the student may not make this request independently.

STUDENT LEARNING GOALS

- Understanding abstraction: At its heart, computer science is the study of abstractions for the purpose of understanding computation, and as such, students must learn appropriate levels of abstraction for solving computational problems. All courses in the curriculum contribute to this goal.
- Programming: Students must learn how to program in a high-level language, as such programming is the primary tool in computer science. This is typically how students are first exposed to the field, and our majors achieve this goal in their first or sophomore years by taking the gateway sequence COMP211–212.
- Analysis: Students must learn how to reason about computation; this includes analyzing algorithms and proving properties such as correctness and complexity, and requires an understanding of appropriate mathematical tools. The courses that focus primarily on this goal are COMP312 (Design and Analysis of Algorithms) and COMP321 (Design of Programming Languages).
- Creation: Students must learn how to create original computational structures; this requires an understanding of fundamental techniques in algorithm and data structure design and an ability to combine established techniques in novel ways. All courses in the curriculum contribute to this goal.
- Limits: Students must understand not only how to analyze and create computational structures, but also the limits of computation itself; this requires an understanding of the mathematical foundations and formalisms of computer science. This goal is primarily addressed in COMP301 (Automata Theory and Formal Languages).

TRANSFER CREDIT

The transfer credit policy for the COMP major is:

- You can transfer at most 2 courses per semester (or summer, or winter session) away towards the COMP major.

- You can transfer at most 4 courses in total towards the COMP major.
- You must take at least 2 of COMP211, COMP212, and MATH228 at Wesleyan.
- You must take at least three 300-level COMP courses used to satisfy the major requirements at Wesleyan.

RELATED PROGRAMS OR CERTIFICATES

Informatics and Modeling Certificate. The department is an active participant in the Informatics and Modeling Certificate (wesleyan.edu/imcp (http://wesleyan.edu/imcp)). The certificate provides a framework to guide students in developing analytical skills based on the following two pathways:

- Computational Science and Quantitative World Modeling (CSM): wesleyan.edu/imcp/csm.html (http://wesleyan.edu/imcp)
- Integrative Genomic Sciences (IGS): wesleyan.edu/imcp/igs.html (http://wesleyan.edu/imcp)

The CSM pathway introduces students to modeling techniques and provides students with a foundation in the quantitative simulation, evaluation, and prediction of natural and social phenomena. The IGS pathway introduces students to the interdisciplinary field of bioinformatics and its relationships to molecular genomics, evolution, structural biology, and bioethics. The department offers courses that support both pathways, such as COMP211 and COMP212, and also offers special interdisciplinary courses for the IGS pathway, such as COMP327 and COMP350. The certificate requirements are described in the links for the two pathways.

BA/MA PROGRAM

This program provides an attractive option for mathematics and computer science majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience. For more information, visit wesleyan.edu/grad/degree-programs/ba-ma.html (http://wesleyan.edu/grad/degree-programs/ba-ma.html). Advanced undergraduates may enroll in graduate (**500-**level) courses.

ADDITIONAL INFORMATION

COLLOQUIA AND SEMINARS

Lectures. The departmental colloquium series presents lectures on recent research by invited speakers from other institutions. Advanced undergraduates are welcome and encouraged to attend these colloquia and to participate in the computer science seminar.

HONORS

An undergraduate may achieve the BA with honors in computer science via the following route:

- The honors thesis, written under the supervision of a faculty member under conditions monitored by the University Committee on Honors.

CAPSTONE EXPERIENCE

We encourage all students to participate in faculty research via individual tutorials and/or a Senior thesis. There is no mandatory capstone experience.

DANCE MAJOR

MAJOR DESCRIPTION

The Major in Dance is centered on the creative act—envisioning, making, and doing—to cultivate artistry and inspire personal and social transformation. It is an interdisciplinary, hands-on, and collaborative journey, demanding both physical and intellectual rigor. Our curriculum covers contemporary dance with a global lens, featuring historical and experimental approaches in Bharata Natyam, Ghanaian, Afro-Brazilian, ballet, Javanese, jazz, and hip hop, and contemporary dance. Students explore choreography, improvisation, pedagogy, research methods, dance ethnography, history, and techniques that embrace diverse learning styles.

Dance majors are driven by a passion for expressing themselves through movement. The artistic practice of dance requires physical strength, flexibility, endurance, and a dedication to refining their craft. Alongside their academic pursuits, they may have some performance experience or interests in other areas of dance, theater and arts production.

Dance majors develop keen intercultural competence and understanding of dance in its cultural manifestations, leading them to a deeper celebration of difference. They become articulate in movement, words and action, honing their skills to articulate original ideas and collaborate with fellow artists and scholars to create powerful original work.

ADMISSION TO THE MAJOR

In order to be admitted to the Dance Major a student must have completed, or be currently enrolled in, either Spring Dance Choreography Workshop (DANC250 Spring Semester) or Dance Tech Lab (DANC105). This requirement may be waived under special circumstances. Please contact the Department Chair with any questions.

MAJOR REQUIREMENTS

The Major in Dance Consists of 10.5-11.5 credits.

Choreography, 2 credits

Options include Solo Composition (DANC249), Improvisation (DANC354), Spring Dance Group Choreography (DANC250 Spring Semester), Winter Choreography Workshop (DANC250 Fall Semester). These courses can be repeated for credit.

Dance Tech Lab (DANC105), .5 credit

Dance Techniques, 2.5 credits

Advanced Dance Performance Practice (DANC435 or DANC445), 2 performance experiences

Can be repeated for credit.

Advanced Research in Dance 2 credits

At least one of these must be a hybrid course with a substantial written component. The second can be either another hybrid course, or an additional choreography course.

Applied Technical Practice (DANC444) .75 credits

Elective 1 credit

This can be any course that relates specifically to the student's interests in dance and may be taken in or outside the Dance Department.

Student Capstone Research 1 or 2 credits (Project or Thesis)

STUDENT LEARNING GOALS

List of Learning Goals

1. Develop **intercultural competence** and engage in **cross-cultural inquiry** through the study of diverse dance traditions.
2. Explore the **role of art in society**, examining its cultural, historical, and social significance.
3. Master the **principles of dance-making**, including choreography, improvisation, and public performance.
4. Achieve **technical proficiency and artistic expression** in a diverse range of dance techniques, including Modern/Contemporary, West African, Bharata Natyam, Ballet, Hip Hop, Javanese, Black and other American vernacular forms, and partnering.
5. Cultivate **critical inquiry skills** and embodied **research methodologies** in the field of Dance, through writing, choreography and performance.
6. Engage in **collaborative creative processes**.
7. Gain hands-on experience in **performance production**, technology and media.

HONORS

Dance majors who wish to be candidates for departmental honors must complete senior research in the form of a thesis. Projects are not eligible for the award of honors. The student's proposed research design will be revised and finalized in consultation with the student's prospective tutor and should reflect the special interests and talents of the individual student. The award of honors or high honors is based on the scope and excellence of the thesis and on the student's creative work.

CAPSTONE EXPERIENCE

All majors complete a capstone experience, either a one-semester senior project or a two-semester senior thesis.

EARTH AND ENVIRONMENTAL SCIENCES MAJOR

MAJOR DESCRIPTION

The Major in Earth and Environmental Sciences (E&ES) provides students with a broad base of knowledge of the natural world. Topics of study range from planetary evolution to climate change to ecosystem conservation. Courses in geology, environmental science, environmental chemistry, ecology, and how the Earth's spheres—geosphere, hydrosphere, atmosphere, biosphere—interact with each other prepare students to choose their own areas of specialization. E&ES majors work with faculty on research projects that range from research into past climates using terrestrial and ocean proxies to the geological makeup of the planet Venus, and from nearby coastal areas to faraway lagoons. The major culminates in a capstone course where students perform independent research in the field.

Students drawn to this major may have a passion for environmental awareness and responsibility, understanding natural systems, or an orientation toward problem-solving. They may enjoy spending time in nature doing fieldwork as well as working in the lab and communicating complex concepts to diverse audiences.

Earth and Environmental Sciences majors are equipped with the knowledge and skills to decipher the structure, composition, and dynamics of the Earth system, conduct research, analyze data, evaluate scientific claims, and communicate their findings. They are well prepared to pursue advanced post-graduate opportunities or various careers in fields like education, environmental consulting, conservation science, planetary science, sustainability, urban planning, renewable energy, and climate analysis.

ADMISSION TO THE MAJOR

GATEWAY COURSES FOR THE MAJOR

To declare E&ES as a major, students are required to have completed an E&ES gateway course (E&ES101, E&ES115, E&ES155, E&ES197), and to have completed (or be currently taking) two gateway courses (or higher) in biology, chemistry, mathematics, or physics.

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES197	Introduction to Environmental Studies	1

SOPHOMORE SEMINAR

Code	Title	Hours
E&ES195	Sophomore Field Course	0.5

MAJOR REQUIREMENTS

The Department of E&ES does not require completion of Wesleyan's General Education Requirements to complete the major. Honors students are required to complete Wesleyan's General Education Requirements through stage II.

The following is a list of required courses for the major (**14 credits total)**:

Code	Title	Hours
E&ES Gateway Course		
E&ES101	Dynamic Earth!	1.25
or E&ES115	Introduction to Planetary Geology	
or E&ES155	Earth System Science	
or E&ES197	Introduction to Environmental Studies	
Natural Science Courses & Mathematics *		
BIOL181 & BIOL182	Principles of Biology I: Cell Biology and Molecular Basis of Heredity and Principles of Biology II	4
or CHEM145	Honors General Chemistry	
or PHYS111 & PHYS112	Introductory Physics I and Introductory Physics II	
or PHYS113 & PHYS116	General Physics I and General Physics II	
or MATH121 & MATH122	Calculus I and Calculus II	
Upper-Level Requirements **		**7**
E&ES195	Sophomore Field Course ***	.5
E&ES497	Senior Seminar #	1

* E&ES majors are required to take one year (two semesters) of gateway courses from two of these disciplines for a total of four courses.

**Students must complete seven upper-level courses and senior seminar/capstone.

***This course is typically taken during the spring semester of the sophomore year.

\# This course is typically taken during the senior year.

We require a capstone experience in EES. The options are:

--Senior Seminar (EES 497 and 498) OR

--Senior Thesis (EES 409 and 410) OR

--Two full credits of Advanced Research Tutorial with the same faculty member (EES 423 and 424) in senior year OR

--Capstones with significant EES components in other majors (by petition)

NATURAL SCIENCE COURSES

Upper-level courses in these disciplines can be substituted, as can statistics courses for mathematics. Students are urged to complete these introductory courses within their first two years. Students considering professional work in the sciences are encouraged to take gateways in more than two disciplines, including any associated lab courses, as well as upper-level coursework in other natural science and mathematics disciplines.

UPPER-LEVEL ELECTIVES

Students must complete seven upper-level courses. Five of these courses must cover the following thematic areas: two from "Earth and Planets" (numbered 201-233 and 301-333), two from "Hydrosphere, Biosphere, and Atmosphere" (numbered 234-266 and 334-366), and one from "Methods" (numbered 267-299 and 367-399). Lab courses associated with the primary courses are required. The remaining two courses may come from any thematic area. Also, the following can be used: up to two upper-level natural science or math courses taken in other departments, and up to two pre-approved courses from study-abroad programs. At least four of the upper-level courses must be Wesleyan E&ES courses. Tutorials and the senior thesis do not count towards the requirement.

THEMATIC AREAS

EARTH AND PLANET COURSES

Code	Title	Hours
E&ES201	Geology of Connecticut	1
E&ES205	The Shaping of a Landscape: Exploring the Geology of Western North America	1.5
E&ES215 & E&ES216	Earth Materials and Earth Materials Laboratory	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES230 & E&ES231	Sedimentology and Sedimentology Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES319 & E&ES320	Meteorites and Cosmochemistry and Meteorites Laboratory	1.5
E&ES321	Planetary Evolution	1
E&ES325	Geologic Field Mapping	1
E&ES327	The Microbial Fossil Record	1

ECOSYSTEM AND ENVIRONMENT COURSES

Code	Title	Hours
E&ES234 & E&ES235	Geobiology and Geobiology Laboratory	1.5
E&ES238	The Forest Ecosystem	1
E&ES240		1
E&ES242	Irrigation	1
E&ES244 & E&ES245	Soils and Soils Laboratory	1.5
E&ES246	Hydrology	1
E&ES250 & E&ES251	Environmental Geochemistry and Environmental Geochemistry Laboratory	1.5
E&ES257	Environmental Archaeology	1
E&ES258	Community Paleoecology	1
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES312	Global Change Biogeography	1
E&ES327	The Microbial Fossil Record	1
E&ES329	Fire Ecology and Management	1
E&ES342	Ecological Resilience: The Good, the Bad, and the Mindful	1.25
E&ES350	Animals in Archaeology	1

METHOD COURSES

Code	Title	Hours
E&ES270	Quantitative Methods for the Biological and Environmental Sciences	1
E&ES275	Remote Sensing for Natural Hazards	1
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES368	Isotope Geochemistry	1
E&ES375	Modeling the Earth and Environment	1
E&ES380	Advanced GIS and Spatial Analyses	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5
E&ES399	Calderwood Seminar in Public Writing: Environmental Science Journalism	1
E&ES568	Isotope Geochemistry	1

CAREER OPTIONS AND THE E&ES MAJOR

Earth and environmental sciences majors go on to pursue a wide range of careers, limited only by their own imaginations. **E&ES** courses can be selected to help prepare for a student's long-term interests. The course listings below are not requirements, but suggested guidelines. Students interested in academic or research careers should consider involvement in research or producing a senior thesis.

Geology. These courses can help prepare students for academic careers or jobs in industry or government in natural resource or geohazard management (e.g., USGS, water resources, mining and energy industries).

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES201	Geology of Connecticut	1
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES230 & E&ES231	Sedimentology and Sedimentology Laboratory	1.5
E&ES246	Hydrology	1
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES321	Planetary Evolution	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5
E&ES497	Senior Seminar	1

Environmental Science/Environmental Chemistry. These courses can help prepare students for jobs in consulting, government, or nonprofit organizations (e.g., EPA, NOAA, USGS, state agencies), or for academic careers in climate science and water resources.

Code	Title	Hours
E&ES155	Earth System Science	1.25
E&ES197	Introduction to Environmental Studies	1
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES234 & E&ES235	Geobiology and Geobiology Laboratory	1.5
E&ES244 & E&ES245	Soils and Soils Laboratory	1.5
E&ES248	Environmental Investigation and Remediation	1
E&ES250 & E&ES251	Environmental Geochemistry and Environmental Geochemistry Laboratory	1.5
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES270	Quantitative Methods for the Biological and Environmental Sciences	1
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES380		1
E&ES368	Isotope Geochemistry	1
E&ES497	Senior Seminar	1
BIOL216	Ecology	1

Planetary Geology. These courses can help prepare students for jobs in government and industry (e.g., NASA, remote sensing, and GIS contractors) or for academic careers in space science and remote sensing.

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES321	Planetary Evolution	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5

GENERAL EDUCATION

Candidates for honors in E&ES are required to complete the University's General Education Expectations through stage II.

STUDENT LEARNING GOALS

Students graduating with a BA degree in Earth and environmental sciences should be able to:

- **Decipher the structure, composition, and dynamics of the Earth system.** The student should understand the structure and composition of Earth's spheres (geosphere, hydrosphere, atmosphere, biosphere), and how these spheres interact with one another and change over time.
- **Apply the scientific method.** The student should be able to develop and test scientific hypotheses.
- **Understand data.** The student should understand how earth and environmental sciences data are produced, interpreted, and applied.
- **Apply quantitative tools.** The student should be able to select and apply appropriate quantitative techniques to Earth and environmental sciences questions (e.g., calculus, statistics, spatial analysis).
- **Use the primary literature.** The student should be able to search for and understand publications from the primary scientific literature.
- **Critically evaluate scientific claims.** The student should be able to critique arguments made in the Earth and environmental sciences literature.
- **Communicate.** The student should be able to present Earth and environmental sciences data and their interpretation in a variety of written, visual, and oral formats.
- **Conduct research.** The student should be able to carry out an original research project, including: the identification of a research problem; the formulation of a hypothesis; the design of the methodology; the collection, processing, and interpretation of data; and the presentation of findings in written, visual, and oral formats.

RELATED PROGRAMS OR CERTIFICATES

- **The College of the Environment,** which includes the environmental studies-linked major and Environmental Studies Certificate, provides a linkage between the sciences, public policy, economics, and the arts and provides a wide variety of career options.
- **The Planetary Science Group and the Planetary Science Course Cluster** seek to understand the origin and evolution of the solar system in which we live and the other solar systems that we have identified in our galaxy.
- **The Service-Learning Center and Service-Learning Course Cluster** seek to broaden students' understanding of course content through activities that are, at the same time, of service to the community.

BA/MA PROGRAM

Wesleyan offers a BA/MA program for exceptional Wesleyan students. The E&ES Department requirements for the BA/MA degree are the same as those of the MA degree outlined above, however please note the expectations for BA/MA students in the timeline.

For details about the BA/MA program see: https://www.wesleyan.edu/grad/graduate-programs/bama_program.html

For additional information, please visit wesleyan.edu/ees/graduate (https://wesleyan.edu/ees/graduate)

HONORS

Candidates for honors in E&ES are required to complete the University's General Education Expectations through stage II.

CAPSTONE EXPERIENCE

Code	Title	Hours
E&ES409	Senior Thesis Tutorial	1
E&ES410	Senior Thesis Tutorial	1
E&ES497	Senior Seminar	1
E&ES498	Senior Field Research Project	.5

ECONOMICS MAJOR

MAJOR DESCRIPTION

The Major in Economics introduces students to the ways people, businesses, governments, and other entities allocate and manage finite resources to meet societal and individual needs. Students will examine various theories, principles, and analytical methods to learn about microeconomic topics like supply and demand, means of production, distribution of goods and services, market structures, and consumer choice. They will also learn about macroeconomic dynamics in trade, national income, employment, inflation, wealth inequity, public finance, and monetary policies. Students will gain an understanding of the historical evolution of economic thought and the factors that contribute to economic growth, development, or decline. Research and analysis methods rely on quantitative modeling, so mathematical techniques like statistics, calculus, and econometrics are used to help explain and predict economic phenomena.

The study of economics attracts a diverse range of students who bring an analytical mindset to learning more about human behavior, incentives, and decision-making processes—especially regarding the sharing and trading of scarce resources. Students may be interested in global issues and the economic factors behind current events. Some are drawn to the theoretical aspects of economics, while others are eager to apply these principles to real-world situations.

A Major in Economics affords students a broad and flexible base of knowledge that can be applied to a large range of pursuits. Students will be prepared for advanced study or future careers in fields such as academics, research, business, finance, consulting, entrepreneurship, law, and government. Junior transfer students should not expect to enter the major.

Wesleyan's Economics Department offers a math-based curriculum that integrates calculus into courses at all levels, beginning with ECON110. As a result,

transfer students should expect to start our major with the introductory course, even if they have completed multiple courses at prior institutions.

ADMISSION TO THE MAJOR

Students intending to major in Economics must complete Introduction to Economic Theory (ECON110). The prerequisite for ECON110 is calculus. The calculus requirement can be fulfilled by completing ECON102, MATH120, or MATH121. It can also be fulfilled by a score of 4 or higher in AP Calculus (AB or BC), by receiving a 5 or higher on the IB Higher Math test, or by placing into MATH122 or higher according to the Wesleyan Math Placement test. Students can be exempted from the ECON110 course requirement if they have a score of 4 or higher on both AP Micro and AP Macro or equivalent IB scores. Students who are exempted from ECON110 must meet the math pre-requisite and complete a 200-level Economics elective before continuing into the core courses (ECON300, ECON301, and ECON302).

Through spring 2026: to be accepted into the major, students must also have either completed or be enrolled in Introductory Econometrics (ECON300), Microeconomic Analysis (ECON301), or Macroeconomic Analysis (ECON302). All of these classes require students to have completed ECON110 or the bypass route (scores of 4 or higher on both AP Micro and AP Macro or equivalent IB scores, completion of a 200-level Economics elective, and the math requirement for ECON110).

From fall 2026: to be accepted into the major, students must also have either completed or be enrolled in Microeconomic Analysis (ECON301), or Macroeconomic Analysis (ECON302). All of these classes require students to have completed ECON110 or the bypass route (scores of 4 or higher on both AP Micro and AP Macro or equivalent IB scores, completion of a 200-level Economics elective, and the math requirement for ECON110). From fall 2026 ECON300 will be replaced with ECON303 which will require both ECON301 and ECON302 as prerequisites.

In addition, there is a probability and statistics pre-requisite for ECON300 and ECON302. The probability and statistics prerequisite can be fulfilled by completing ECON103, MATH132, or PSYC200, or by receiving a score of 4 or higher on AP Statistics or a 5 or higher on the IB Higher Math test.

Through spring 2026: a student who fails to obtain a grade of C+ or better in ECON110 may be admitted to the major only after obtaining a grade of C+ or better in ECON300, ECON301, or ECON302 and a student who has the ECON110 bypass must obtain a grade of C+ or better in one of the ECON300, ECON301, or ECON302. From fall 2026: a student who fails to obtain a grade of C+ or better in ECON110 may be admitted to the major only after obtaining a grade of C+ or better in ECON301, or ECON302.

Prospective economics majors are strongly encouraged to complete ECON301 and ECON302 by the end of sophomore year, and to have completed ECON300 by the end of junior year.

MAJOR REQUIREMENTS

The Economics curriculum consists of three types of courses: Introductory, Core, and Elective. All students majoring in economics must complete or pass out of the introductory course, ECON110 (https://catalog.wesleyan.edu/search/?P=ECON110), and complete at least eight letter-graded courses numbered 201 or above. Of these eight, three must be the core courses, and five must be electives. All courses counted toward the economics major must be taken for a letter grade. All core courses must be taken at Wesleyan.

Economics majors fulfill the capstone requirement by successfully completing three upper-level electives, each of which requires a substantial research paper or project.

Code	Title	Hours
Required Courses		
Core Courses		**3**
ECON300	Introductory Econometrics	
ECON301	Microeconomic Analysis	
ECON302	Macroeconomic Analysis	
Electives		**5**
200-Level Electives *		
300-Level Electives (3 required) ^		

STUDENT LEARNING GOALS

Economics majors acquire the following knowledge and competencies:

- The cultivation of a critical mindset and rigorous logical reasoning
- The capability to read and understand scholarly literature
- Quantitative methodologies and statistical skills, and working with large data sets
- The capability to engage in theoretical and empirical analysis of economic problems
- Research, analysis, and communications skills
- A fundamental knowledge of how resources and wealth have been created, consumed, and transferred through human history
- An understanding of economic principles and market forces and how they shape society such as macroeconomics, microeconomics, supply and demand, market structures, economic growth, inflation, employment, and international trade
- Adaptability and versatility in strategic problem-solving.

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions, collaborative group work, and multimedia presentations. Written exams, peer review, faculty committees, and self-assessments will also evaluate their class performance.

ADVANCED PLACEMENT

Please see the department web page for the latest information and the advanced placement policy.

ADDITIONAL INFORMATION

ACADEMIC OPPORTUNITIES

Phi Beta Kappa

This is a national honor society for the liberal arts. The department nominates senior Economic majors based on an evaluation of their GPA in economics courses, their overall GPA, their fulfillment of General Education expectations, and their performance in the department's core courses.

Omicron Delta Epsilon

This is an international honor society for economics. The current student leadership invites eligible students to join. The ODE faculty advisor screens students who have taken at least four economics courses, with at least three at the 200-level or higher. Their economics GPA must be B+ or better. Students do not need to be economics majors to qualify and may meet eligibility criteria as early as their sophomore year.

CONTACT INFO

Ryan Launder
Telephone: (860) 685-2348
Email: rlaunder@wesleyan.edu

HONORS

Honors and high honors in economics are awarded based on a completed honors thesis representing two semesters of independent research. To be considered for departmental honors, a student may choose one of two options:

1. Enroll in the two-semester senior honors thesis tutorial sequence (ECON409 and ECON410). The student begins thesis research with a faculty advisor in the fall and completes the thesis by the spring term.
2. Expand a research paper completed in a 300-level elective with a suitable faculty advisor and complete the thesis in the spring term (ECON410) .

Honors candidates present their work in progress to the faculty at the end of the fall semester. Theses are evaluated by a committee of readers, including the thesis advisor and two other faculty members.

All candidates for honors should have at least a B+ average in their economics courses before their senior year and a three-year cumulative average of B or better for all courses.

A student who does not meet these requirements may petition the department for an exception; the petition must be signed by the student and by the faculty member who has agreed to supervise the project. The petition should address the student's capability to undertake independent research and the feasibility of the proposed project.

CAPSTONE EXPERIENCE

Economics majors will fulfill the department's capstone requirement by completing three upper-level electives, each of which requires the successful completion of a substantial research paper/project.

ENGLISH MAJOR

MAJOR DESCRIPTION

The Major in English helps students hone their skills as critical writers and explore their potential as creative voices. English courses foster critical thinking about the relationships among literature, culture, and history. Students of English become adept critics of poetry, novels, essays, and plays. They develop knowledge of literary culture and about the evolving genres, forms, and ideologies of literary expression. They study the relation of literary texts to their historical contexts. They refine their craft as creative writers.

Students who pursue the Major in English often have a deep love for literature, language, and the written word. They seek to build upon their strengths in reading, writing, communications, and critical interpretation. They bring an open-minded intellectual curiosity to engage with complex social, cultural, and philosophical issues and ideas.

Studying English at the collegiate level prepares students for various career possibilities, including teaching, creative writing, journalism, publishing, marketing, information science, law, and business. Strong writing and communication skills are valued in nearly every profession and field of advanced study.

ADMISSION TO THE MAJOR

Students considering majoring in English should consult the department website (https://www.wesleyan.edu/english/students/index.html (https://www.wesleyan.edu/english/students/)). Potential majors must take ENGL201: Ways of Reading in their first or second year. Students who have taken the course and received a grade of B- or better will be admitted as majors during the spring term of their sophomore year. Students who take the course during that term will be admitted provisionally, pending receipt of a grade of B- or better. In exceptional circumstances, and with the approval of the department chair, students who have not taken ENGL201 by the end of the sophomore year may be admitted to the major contingent on completion of ENGL201 in the junior year.

MAJOR REQUIREMENTS

The English major at Wesleyan consists of requirements and electives totaling 10 distinct, full-credit courses, or the equivalent of partial-credit courses. Students choose one of two pathways to complete the major, Literature or Creative Writing.

All major courses must be sponsored or co-sponsored by English, with the exception of one "related course." A "related course" 200-level or above that bears on the study of literature but is not sponsored or co-sponsored by English may count as an elective with the approval of the English advisor (more information below). One English-sponsored or co-sponsored FYS may also count as an English major elective.

Remaining credits must be at the 200-level or higher, with at least one 300-level course required for the Literature Pathway and three 300-level creative writing

courses required for the Creative Writing Pathway. All but three of the 10 total credits must be taken at Wesleyan. Appropriate credits transferred from other institutions may count toward the 10-credit requirement in consultation with the department's Transfer of Credit coordinator (https://www.wesleyan.edu/english/contact/dept_contact.html). Students who believe that courses they have taken or will take at other universities should fulfill core course requirements may "petition" (https://www.wesleyan.edu/english/students/petitions.html) the Department for an exception. Requests to petition should be submitted to the chair.

The Major Program:

English major requirements consist of the gateway course (ENGL201: Ways of Reading), core requirements, Literature or Creative Writing pathway requirements, and electives.

Core Requirements: In addition to the gateway course, **ENGL201: Ways of Reading,** eight additional core requirements must be fulfilled to complete the major. These courses must be taken within the English department. An individual course may fulfill up to two core requirements. **Thus, core requirements may be completed with as few as four or as many as eight courses**.

- **Literary History**: 3 courses (Literary History 1: to 1660, Literary History 2: 1660-1870, Literary History 3: 1870-present)
- **Literary Geography**: 3 courses (World Literature, British Literature, American Literature)
- **Theory**: 1 course
- **Creative Writing**: 1 course

Paths through the Major (10 total credits required):

- **Literature Pathway:** ENGL201, core requirements (see above), plus electives, with at least one 300-level course.
- **Creative Writing Pathway:**

  Creative Writing Pathway: ENGL201, core requirements (see above), four creative writing courses (at least one of which must be 300-level), plus electives. (Completion of the Creative Writing core requirement can count towards the four).

As noted above, for both the Literature and Creative Writing pathways, a "related course" at the 200-level or above that bears on the study of literature but is not sponsored or co-sponsored by English may count as an elective with the approval of the English advisor. For example, this course may be in literature in translation or in another language. An English-sponsored or co-sponsored FYS may also count as an elective. Remaining electives must be numbered above 201.

GENERAL EDUCATION

English majors do not need to fulfill the GenEd requirements to complete the major or write an English Honors thesis. However, GenEd fulfillment is required to declare more than a combined total of two majors, certificates, and minors and to be eligible for Phi Beta Kappa and University Honors (not English Department Honors).

COURSES FOR NON-MAJORS

The department offers several FYS courses especially designed for first-year students. Non-major students may also be admitted to many other department courses; please check individual listings for details.

STUDENT LEARNING GOALS

- Develop skills in reading, interpreting, discussing, and writing about literature. English majors learn to be adept critics of a range of genres, including poetry, novels, essays, plays, and more.
- Experiment with or develop the ability to produce new works of literature.
- Build knowledge of the history of literature and develop critical thinking about the relationships among literature, culture, and history.
- Become conversant with literary theory.

STUDY ABROAD

The English Department encourages its majors to consider the valuable experience of study abroad. Study abroad policies are described in detail on the departmental website. (http://www.wesleyan.edu/english/students/studyabroad.html)

ADVANCED PLACEMENT

Students with AP scores of 4 or 5 in either English Literature or English Composition, or with scores of 5–7 on an English A1 or English A2 International Baccalaureate exam, will receive one course credit. No extra credit is given for taking more than one exam. This credit does not count toward the major.

LANGUAGE REQUIREMENT

There is no language requirement for the English major.

PRIZES

The Department of English annually gives out an array of academic awards, fellowships, and prizes. Fellowships and writing prizes may require applications and submission of writing samples. Full explanations are available on the department website (http://www.wesleyan.edu/english).

TRANSFER CREDIT

Students may obtain transfer credit in English for courses taken at other universities in the United States in the summer or during a leave of absence. Courses must be approved by the English Department's Transfer of Credit coordinator (https://www.wesleyan.edu/english/contact/dept_contact.html). Students should expect to provide documentation from a course catalog to receive advance permission. In most cases, on completion of courses taken at other universities, students will need to show additional documentation (e.g., syllabi and assignments) demonstrating their coursework to receive transfer credit. No more than two credits may be earned during a summer. More detailed

information about transfer credit can be found on the department website (http://www.wesleyan.edu/english/students/credit.html).

HONORS

The bachelor's degree with honors in English is awarded on the basis of an outstanding academic record and an honors thesis written during the senior year. Students are eligible to write a critical thesis if they have an average of 91.7 in the courses counting toward the major (at least six courses by the end of the junior year) and have completed a substantial research paper in a departmental course designated research or research option. Students wishing to write a creative thesis need not fulfill the research requirement, but they must have a 91.7 average in courses counting toward the major and have received an A- or better in at least two creative writing courses that count toward the major, one of which must be an intermediate or advanced workshop taken at Wesleyan. English majors do not need to fulfill the GenEd requirements to write an English Honors thesis. However, GenEd fulfillment is required to declare more than a combined total of two majors, certificates, and minors and to be eligible for Phi Beta Kappa and University Honors (not English Department Honors). A detailed description of the process for earning honors can be found on the department website (http://www.wesleyan.edu/english/students/honors.html).

CAPSTONE EXPERIENCE

English majors may undertake capstone experiences in several ways. Students who are eligible and who qualify to be candidates for honors may enroll in a two-semester honors tutorial that culminates in the submission of an honors thesis.

Students may also propose a one- or two-semester senior essay project. In addition, in each major pathway, students are required to complete a **300**-level seminar. This seminar may be taken before the senior year.

ENVIRONMENTAL STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Environmental Studies (ENVS) empowers students to evaluate, comprehend, communicate, and solve various environment-related issues. ENVS is multi-disciplinary: students take course work that spans the entire curriculum of Wesleyan, including courses in environmental science, ethics, philosophy, economics, government, policy, history, humanities, art, film, sciences, and writing.

Environmental Studies is a "linked major," in which students complete all the requirements from their primary major in addition to those of ENVS. This prepares them with both specialty knowledge and a breadth of perspective, enabling them to interpret environmental information, understand the linkages to social, political, or ethical issues, and formulate well-reasoned opinions.

The Environmental Studies program is suitable for students who are strongly interested in or concerned about environmental issues such as: environmental justice, food security, sustainability, global warming, and the impact of human activities on the planet. Students drawn to this program possess scientific and humanistic curiosity, analytical thinking, an interdisciplinary mindset, and a desire to find ethical solutions.

Environmental Studies graduates are prepared for careers spanning various sectors such as government, nonprofit organizations, education, research, environmental law, journalism, and sustainable business management.

ADMISSION TO THE MAJOR

One of the following introductory courses serves as the gateway to the ENVS linked-major program:

Code	Title	Hours
Environmental Science AP Exam with score of 4 or 5		1 (pre-matriculated)
ENVS197	Introduction to Environmental Studies	1
ENVS195	Environment and Society: Introduction to Environmental Studies through the Social Sciences	1
E&ES155	Earth System Science	1.25
ENVS219F	Knowing the Natural World (FYS)	1

MAJOR REQUIREMENTS

Major Requirements for the Class of 2025 & Beyond

Code	Title	Hours
Intro Course		
ENVS197	Introduction to Environmental Studies	1
or ENVS195	Environment and Society: Introduction to Environmental Studies through the Social Sciences	
or ENVS219F	Knowing the Natural World (FYS)	
or E&ES155	Earth System Science	
Core Electives		
Core Area 1: Environmental Justice, Philosophy, Ethics		1
Core Area 2: Economics, Policy, and Law		1
Core Area 3: Natural Sciences		1
Additional Electives		
Four additional electives, whether or not designated as Core Electives		4
Senior Colloquium		
ENVS391	Senior Colloquium: Environmental Studies	0.5
ENVS392	Senior Colloquium: Environmental Studies	0.5
Senior Capstone	**One semester if a senior essay; two semesters if a senior thesis**	**1 or 2**
Total Hours		**10-11**

Notes:

- Four additional electives from the Comprehensive List of Core and Additional Electives Offered since 2017 (https://bit.ly/wes-envs)
- With the exception of an introductory course (ENVS195, ENVS197 or E&ES155), and ENVS188 and PHYS105, all other courses must be at the 200 level or higher

- Up to two courses that are either student forums or research tutorials may be substituted for non-core electives
- Up to three courses that are used for another major may be counted as electives for the ENVS major
- Students are strongly encouraged to take at least one course in any subject that provides an intensive experience in writing.
- Students are also strongly encouraged to take at least one course in any subject that deals with analysis or interpretation of data.
- Any tutorial course may be taken only once as credit toward the major, with the exception of the senior thesis tutorials.

CORE AREA ELECTIVE LIST

Below is a list of Core 1, 2, 3 electives offered in 2025-26. **The most updated Core 1, 2, 3 course information for 2025-26 and a comprehensive list of all core and additional electives since 2017 can be found at https://bit.ly/wesenvs/ (https://bit.ly/wes-envs).**

CORE ELECTIVES AREA 1 (ENVIRONMENTAL JUSTICE, PHILOSOPHY, AND ETHICS)

Fall Semester 2025

Code	Title	Hours
ANTH279	Eating Others: Histories and Cultures of Animal Edibility	1
HIST221	History of Ecology	1
PHIL215	Humans, Animals, and Nature	1

Spring Semester 2026

Code	Title	Hours
AFAM213	Abolition Geographies	1
PHIL212	Introduction to Ethics	1

CORE ELECTIVES AREA 2 (ECONOMICS, POLICY, AND LAW)

Fall Semester 2025

Code	Title	Hours
ENVS276	Law and Policy of Natural Resources: Water, Air, Biodiversity, and Climate Change	1
GOVT308	Comparative Urban Policy	1
HIST267	Development in Question: Conservation in Africa	1

Spring Semester 2026

Code	Title	Hours
ENVS277	Law and Policy of Contamination, Cleanups, Communities (Environmental Justice), and Chemicals	1
ENVS297	Food Security and Environmental Conservation (CLAC 1.0)	1
GOVT206	Public Policy	1
GOVT222	Averting Catastrophe: Public Policy and Risk Management	1
GOVT273	Environmental Politics in East Asia	1
ENVS284	Animal Law and Policy	1

CORE ELECTIVES AREA 3 (NATURAL SCIENCES)

Fall Semester 2025

Code	Title	Hours
BIOL220	Conservation Biology	1
E&ES250	Environmental Geochemistry	1
ENVS278	Introduction to GIS	1

Spring Semester 2026

Code	Title	Hours
E&ES260	Oceans and Climate	1
ENVS329	Fire Ecology and Management	1
ENVS344	Renewable Energy and Negative Emission Technologies	1

Students will choose an additional four electives with their ENVS advisor. These electives may be selected from the entire list of electives since 2017 (see link in previous paragraph), in addition to those courses listed in core elective areas 1–3 above.

ADDITIONAL INFORMATION ON MAJOR REQUIREMENTS

- With the exception of the introductory courses (ENVS195, ENVS197, E&ES 155, E&ES199), plus ENVS188 and PHYS105, all other courses must be at the 200 level or higher.
- Up to three courses from the primary major may be counted toward the ENVS linked major.
- Students may substitute two reading or research tutorials, or one tutorial and one student forum, for two electives with approval of the ENVS advisor.
- Up to three credits from study abroad programs may be used for non-core elective courses, with prior approval of the ENVS advisor and provided that the credits from abroad are accepted by Wesleyan.
- Students are strongly encouraged to take at least one course in any subject that provides an intensive experience in writing.
- Students are also strongly encouraged to take at least one course in any subject that deals with analysis or interpretation of data.
- With the approval of the advisor and a written petition by the student, certain internships (e.g., Sierra Club, state agency, EPA, NOAA) may be substituted for one non-core elective.

STUDENT LEARNING GOALS

- Competence beyond the major-track introductory level in interpreting environmental information
- Develop a deeper understanding of the complex connections between environmental issues and social or political issues
- Develop the analytical and critical capacities necessary to formulate compelling arguments about environmental issues (over diverse modes of expression)
- Engage both scholars in the field who are making important environmental contributions and the lay public in discourse about environmental issues (mode of expression varied)
- Undertake a senior capstone encompassing practical and theoretical experiences in environmental issues

METHOD OF EVALUATION

Meetings with the student's advisor. Students will periodically meet with their environmental studies advisor to reflect on their progress in the major. At minimum, these meetings will occur once per semester during the course scheduling period. Because environmental studies is inherently multidisciplinary and because every student is linked to a primary major, ENVS student trajectories within the major are highly individualized. Regular meetings will help both the student and advisor chart the most successful path through the major.

Senior capstone and senior colloquium. Every major completes a capstone project during their senior year. The format of the capstone is typically determined by the student's primary departments (e.g., thesis, essay, performance, exhibit). The purpose of the capstone experience is to challenge students to think creatively, deeply, and originally about an environmental issue and to produce a significant work that uses their expertise from their primary major. Students formally propose their capstone projects at the end of their junior year, and the proposals are evaluated and approved by the Chair of ENVS. Several times throughout their senior year, students present progress reports of their projects in the senior colloquium; professors and student-peers attending the colloquia provide feedback for improvement. Finished capstone projects that are written under the auspices of the student's primary major are evaluated by the primary major department; capstones written for ENVS are evaluated by the ENVS program.

Senior reflection. Seniors will be asked to reflect on their experiences in the major. They will analyze their personal development in environmental studies and how the program impacted their development. These reflections will be recorded in the form of a questionnaire. Also, during one of the final colloquia in the spring, students will be encouraged to share their thoughts in a group setting and this will be recorded.

HOW THE DEPARTMENT/PROGRAM USES ASSESSMENT INFORMATION

The capstone projects and, more informally, the oral presentations in the senior colloquium, will help the ENVS faculty evaluate the success of the curriculum in fulfilling the learning goals of the program. Senior reflections on their experiences in the major will help inform curricular needs. For a multidisciplinary program with its faculty spread across all three divisions, the common experiences of the senior capstone/senior colloquium and senior reflections will be critical for the evaluation of both students and the program. Once a year, a committee will use information from these common experiences to discuss the state of the program. A summary of these discussions, including any recommendations for change, will be shared with the full ENVS faculty.

HONORS

SENIOR THESIS IN ENVIRONMENTAL STUDIES

Options for pursuing honors. Environmental Studies majors are required to complete a capstone project in their senior year. A senior thesis is one type of capstone project that will fulfill the ENVS major requirement. The other type of capstone is a Senior Essay (see Capstone Experience, category 3, below). You are strongly encouraged to pursue a capstone project, especially senior theses, in your primary major. You should consult with faculty in your primary major about qualifications and procedures for undertaking a senior thesis in your primary major.

Circumstances may arise that prevent you from pursuing a senior thesis in your primary major. It may be possible for you to undertake a senior thesis in Environmental Studies. A senior thesis in Environmental Studies will be approved only if (1) the student's primary major department/program is unable to provide a suitable advisor, or (2) the subject is deemed to fall outside the strict purview of that department/program.

You must receive approval prior to registering for a senior thesis in Environmental Studies in the fall of your senior year, during drop/add. Two signatures of approval will be required for you to proceed with a senior thesis in Environmental Studies: (i) your thesis tutor and (ii) the Chair of Environmental Studies.

Capstone proposal. Your thesis proposal must contain the main questions or thesis of the project, a statement of importance of the project and how you intend to carry out the project. Please also indicate who will serve as mentor for the project. That person must also send an email approving the basis for your project at this early date.

Please send your thesis proposal and ask your thesis mentor to send an email of approval for your project to Chair of Environmental Studies Fred Cohan at fcohan@wesleyan.edu. **The proposal is due by the last day of classes of your junior year.**The Chair of ENVS will consider your application for approval. You, your tutor, and your ENVS advisor will be informed of the Chair's decision. For any case that is unclear (e.g., suitability of the topic for ENVS), the Chair may consult with the College of the Environment Governing Board.

HONORS IN ENVIRONMENTAL STUDIES: ELIGIBILITY, CANDIDACY, AND BESTOWAL

Requirements for eligibility. To be eligible for honors in Environmental Studies you must (1) be an environmental studies major on track to complete the major requirements in a timely fashion; (2) achieve a grade point average of 90.00 or higher in courses that count towards the environmental studies linked major, calculated at the end of the spring semester of the junior year; and (3) have completed Stage I of the General Education Expectations.

Process for applying for admission to candidacy. To become a candidate for honors in Environmental Studies, you must meet the three eligibility conditions and also obtain official permission to undertake a senior thesis in Environmental Studies. The optimal time to try to find a faculty tutor and obtain permission is by the end of the spring semester of your junior year.

Once you have secured a thesis tutor and permission to undertake a senior thesis in Environmental Studies, you must enroll during the add/drop period of the fall semester of your senior year in ENVS409, "Senior Thesis Tutorial." You cannot include this tutorial in course planning during pre-registration; you have to add it during the in-semester add/drop period. You enroll in the tutorial electronically, following instructions in the Tutorial Manual on the Tutorial Registration page (http://www.wesleyan.edu/registrar/information/tutorial_registration.html) on the website of the Office of the Registrar. Enrolling in ENVS409 will indicate to the honors coordinator in the Office of the Registrar that you are an honors candidate from the standpoint of the University as well as Environmental Studies. Then, during the add/drop period of the spring semester of your senior year, you must enroll electronically (using the same procedure) in a second tutorial, ENVS410, which is also entitled "Senior Thesis Tutorial." Enrolling in ENVS410 will indicate to the honors coordinator in the Office of the Registrar that, just over halfway into your senior year at Wesleyan, you remain in good standing as an honors candidate from the standpoint of the University as well as the Department.

Finally, to actually receive honors in environmental studies, you must (1) complete the environmental studies linked major; (2) complete both Stage I and Stage II of the General Education Expectations; (3) write a thesis judged to be

of honors quality; and (4) maintain a grade-point average of at least 90.00 in courses that count towards the environmental studies linked major through the first semester of your senior year.
Environmental Studies prohibits double honors for the same thesis.

UNIVERSITY HONORS REGULATIONS

Wesleyan maintains university-level honors regulations, which are formulated by a university-wide faculty Honors Committee (http://www.wesleyan.edu/acaf/governance/rosters.html) and detailed on the Honors webpages (http://www.wesleyan.edu/registrar/honors/honors_program.html) maintained by the Office of the Registrar. Especially useful are the Jellybean Papers (http://www.wesleyan.edu/registrar/honors/jelly_bean_papers/) (so-called because they used to come in many colors), which will tell you how to register your thesis project with the coordinator of the university-wide Honors Program (http://www.wesleyan.edu/registrar/honors/honors_program.html) at the beginning of your senior year. You may apply to the Thorndike Fund (http://www.wesleyan.edu/registrar/honors/jelly_bean_papers/thorndike_fund.html) for help in paying the production costs of creating the bound copy of their thesis/essay you must deposit with Olin Library.

EVALUATION OF HONORS THESES IN ENVIRONMENTAL STUDIES

Soon after theses are submitted, the honors coordinator will deliver electronic copies of your thesis to your thesis tutor and faculty committee. Your thesis will be evaluated by three faculty members: your thesis tutor and two readers designated by the department chair in consultation with your tutor. One reader will be close to your field, and one will be farther afield. Your tutor and readers will read the thesis, write a commentary on it, evaluate it independently as worthy of high honors, honors, or credit (no honors), and the committee will recommend a grade for the thesis tutorial. The evaluations will be sent automatically to the chair of Environmental Studies.

If the tutor and the readers agree that the thesis deserves honors, or if they agree that the thesis deserves credit (no honors), the chair of Environmental Studies in deliberation with the governing board of the College of the Environment, awards the thesis the grade that the tutor and readers agreed upon.
If the tutor and the readers disagree with respect to honors or no honors, the following procedure will be used. If there are two evaluations of honors and one of credit (no honors), the chair of Environmental Studies and the governing board of the College of the Environment will consider you for being honors in Environmental Studies. If there is one evaluation of honors and two of credit (no honors), the chair of Environmental Studies will bring the case to the governing board of the College of the Environment with the recommendation of credit (no honors).

The Environmental Studies Program has stringent regulations governing high honors. High honors will be considered by the chair of Environmental Studies and the governing board of the College of the Environment if (and only if) the tutor and the readers agree that the thesis deserves high honors. That is, high honors in Environmental Studies requires unanimity among the three thesis readers that the thesis deserves high honors. In this respect, it is more difficult to achieve high honors in Environmental Studies than it is to achieve high honors in many other departments or programs at Wesleyan.

When all comments and evaluations have been received by the Department and when your thesis and achievements have been deliberated by the governing board of the College of the Environment, the chair of environmental studies will submit in writing the evaluations (but not the comments or the tutorial grades) to the coordinator of the university-wide honors program. The administrative assistant records the honors recommendation electronically and retains a copy of the comments and the recommended tutorial grades.

CAPSTONE EXPERIENCE

The ENVS linked-major program provides a capstone experience that includes a senior project and a full year of senior colloquia. The purpose of the ENVS capstone experience is to challenge students to think creatively, deeply, and originally about an environmental issue and to produce a significant work that uses their expertise from their primary major. The students will then have the opportunity to present and discuss their research in the senior colloquium (ENVS391 and ENVS392) with seniors and the faculty.

Senior capstone project. The creative exploration of a critical environmental issue through independent research is an essential part of ENVS. All ENVS majors must complete a senior capstone project in one of the four categories discussed below, though students are encouraged strongly to pursue a project in one of the first two categories. The topic must concern an environmental issue and must be approved in advance by the ENVS advisor and the Chair of ENVS. The student must be officially enrolled in one or more courses while they complete the research project. The students must submit to the Chair of ENVS no later than the last day of classes in the spring semester in their junior year a two-page research prospectus on their planned course of research. This plan must be signed by the potential mentor of the senior research. The mentor does not have to be a member of the ENVS faculty.

- **Category 1.** The capstone project may take any of the forms accepted by the primary department as a senior project (e.g., senior thesis, senior essay, senior performance, senior exhibition, senior film thesis). The topic must be approved by the ENVS advisor and Chair of ENVS. The senior project is submitted only to the primary department and is not evaluated by ENVS. Students may select an interdisciplinary thesis topic such that they solicit the help of more than one mentor if permitted by the primary department.
- **Category 2.** The capstone project may be a thesis submitted in general scholarship. The student must have a mentor for the thesis, and the topic must be approved by the ENVS advisor.
- **Category 3.** In the event that the student cannot satisfy the conditions for the above categories, the student may register for and complete a senior essay in Environmental Studies (either ENVS403 or ENVS404). The mentor can be any Wesleyan faculty member and the topic must be approved by the ENVS advisor. If the student cannot find a mentor, then it will be the responsibility of the chair of environmental studies to find a suitable reader or to evaluate the written work. The due date for the senior essay is set between the student and the mentor.
- **Category 4.** In the event that the student cannot satisfy the conditions for the above categories, the student may register for and complete a senior honors thesis in Environmental Studies (ENVS409 and ENVS410). The mentor can be any Wesleyan faculty member and the topic must be approved by the ENVS advisor. If the student cannot find a mentor, then it will be the responsibility of the chair of environmental studies to find a suitable mentor or to serve as mentor. The due date for the senior honors thesis is set by the Office of the Registrar, usually in mid-April.

Senior colloquium. The ENVS Senior Colloquium provides students the opportunity to discuss, workshop, and improve their senior capstone projects. Each student will present a live report on their capstone work once each semester. Before the presentation, the student will make available reading materials and questions they have about how to work through their most challenging issues. Students must be formally enrolled in the colloquium each

semester of their senior year. Attendance at all senior colloquium classes is mandatory for all senior ENVS majors.

FEMINIST, GENDER, AND SEXUALITY STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Feminist, Gender, and Sexuality Studies (FGSS) engages students in critical analyses of gender and sexuality within the broad context of race, class, and ethnicity, and the ways in which these categories shape institutional systems, cultures, and societies. . FGSS majors have excellent opportunities to develop their own concentrated area of study and individually designed research.

Students drawn to the FGSS Major are typically interested in understanding social norms, power structures, and systemic inequalities related to gender and sexuality. They may be motivated by a desire to advocate for marginalized groups, promote inclusivity, and advance social justice and equity.

A degree in Feminist, Gender, and Sexuality Studies prepares students for careers in various fields, including activism and advocacy, education, human resources, social work and counseling, law and public policy, media and communications, and non-profit organizations.

ADMISSION TO THE MAJOR

The prerequisite for becoming a feminist, gender, and sexuality studies (FGSS) major is taking one of the gateway courses. These courses are designated annually. Students ordinarily take a gateway course during either semester of the sophomore year and declare the major in the spring semester. Gateway courses include:

Code	Title	Hours
FGSS200	Sex/Gender in Critical Perspective (FGSS Gateway)	1
SOC245	Intersectionality and Identity (FGSS Gateway)	1
FGSS277	Feminist Philosophy and Moral Theory (FGSS Gateway)	1

MAJOR REQUIREMENTS

Students are assigned to faculty advisors and should familiarize themselves with requirements for writing a senior honors thesis, since these may affect curricular choices for the junior year. In the fall semester of the junior year, the student ordinarily takes FGSS209. During this semester the student, in consultation with the advisor, develops a major proposal that lists the courses that will compose the student's major course of study, including a written rationale for the student's chosen concentration within the major. The Major Proposal Form, approved by the advisor and with the concentration rationale attached, is submitted to the Feminist, Gender, and Sexuality Studies Department office by the end of the fall semester of the junior year.

The concentration rationale is a brief explanation (500 words) of the student's chosen concentration within the major and describes the courses the student has chosen to constitute it. The major as a whole consists of 9 courses as follows: Three core courses (a gateway course, FGSS209 and FGSS405), two distribution courses (FGSS courses from an area outside the concentration), and the four courses comprising the concentration. All FGSS majors complete senior research, either in the form of a senior essay (completed as part of the Senior Seminar) or a senior honors thesis (through a two-semester tutorial with a faculty member, normally in addition to the Senior Seminar). The senior year is devoted to completion of the coursework for the concentration, work on a senior essay or thesis, and participation in the senior seminar. Non-FGSS courses may count toward the concentration if approved by the student's faculty advisor. Only two credits transferred from another institution may be applied to the major.

Every major must take the following courses:

- **One gateway course.** These are designated annually and serve as introductions to the interdisciplinary field of feminist, gender, and sexuality studies. Gateway courses examine gender as a factor in the politics and practices of the production of knowledge and of social and cultural life, with particular attention to the intersection of gender with other identity categories and modes of power—race, class, sexuality, and ethnicity.
- FGSS209. This course traces contemporary developments in feminist theory and considers how feminism has been articulated in relation to theories of representation, subjectivity, history, sexuality, technology, and globalization, among others, paying particular attention to the unstable nexus of gender, sexual, racial, and class differences.
- FGSS405. Set up as a workshop, the goal of this course is to develop an enabling and challenging intellectual environment for majors to work through intensively the theoretical, methodological, and practical concerns connected with their senior research projects.

CORE COURSES

GATEWAY AND REQUIRED COURSES

In 2019-2020, these include:

Code	Title	Hours
FGSS200	Sex/Gender in Critical Perspective (FGSS Gateway)	1
FGSS209	Feminist Theories	1
FGSS277	Feminist Philosophy and Moral Theory (FGSS Gateway)	1
FGSS405	Senior Seminar	1

Distribution requirement. A distribution requirement of two **FGSS** courses that must be from two different disciplines and should not overlap in their content with courses that make up the student's concentration in the major.

Concentration. Four courses forming the area of concentration should represent a coherent inquiry into some issue, period, area, discipline, or intellectual approach related to feminist, gender, and/or sexuality studies. Normally, the courses will be drawn from various departmental offerings and will be selected in consultation with an advisor.

STUDENT LEARNING GOALS

The Feminist, Gender, and Sexuality Studies (FGSS) Department is an interdisciplinary program staffed by faculty with wide-ranging research interests from across the university. The FGSS Department major and curriculum enable

students to engage in critical analyses of the construction of gender and sexuality as categories of analysis and experience within the broad matrices of race, class, and ethnicity, and the ways in which these categories inform knowledge production. Our curriculum has a broad offering of courses with wide subject, geographic, and thematic coverage. Majors have excellent opportunities for developing their own areas of concentrated study and for individually designed research. Our courses offer students historical and contemporary explorations of women, gender, and sexuality from a variety of disciplinary and interdisciplinary perspectives on Africa, the Caribbean, East Asia, Europe, Latin America, and South Asia, as well as the U.S.

FGSS expects its majors to:

- become skilled at reading and writing critical feminisms;
- have a well-developed understanding of the interdisciplinary, transnational and intersectional concerns of the field; and
- interrogate the historical and contemporary, local and transnational forces underlying social and economic injustice and inequality in order to promote greater possibilities for freedom and social justice.

In other to achieve these goals, students should be able to:

- form an argument using evidence
- critically evaluate the arguments of others
- analyze texts from a variety of disciplines
- situate social and political issues in their historical context
- assess how activism and intellectual inquiry are interrelated

TRANSFER CREDIT

Only two credits transferred from another institution may be applied to the major.

HONORS

Rising seniors wishing to write a Senior Honors Thesis (click here for more information (https://www.wesleyan.edu/fgss/major/senior_research.html)) must have, at the end of their junior year, an average of at least B+ in all of the courses that count for the major. These courses include the following: gateway course, FGSS 209 (Feminist Theories), two distribution courses, and the four courses from the student's area of concentration within the major. Prospective thesis writers must submit to the FGSS Chair by the last Friday in April of their junior year a transcript reflecting that they have met this requirement (or will have done so by the end of the junior year). Only students who complete the two-semester thesis can stand for honors. Students who have not achieved a B+ average will undertake the one-semester senior essay project.

CAPSTONE EXPERIENCE

Completion of a senior essay (one credit) or an honors thesis (two credits) on a theme or topic related to the student's area of concentration within the major is required. Rising seniors wishing to write a senior honors thesis must have an average of B+ in all courses that count toward the major, including the gateway course, FGSS209, and three of the four courses from the student's area of concentration. Prospective thesis writers must submit to the feminist, gender, and sexuality studies department chair by the last Friday in April in the second semester of the junior year a statement indicating the topic of the thesis and name of the thesis tutor.

FILM STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Film Studies enables students to explore the moving image through a distinctive blending of history, analysis, and production. Studies focus on the art and craft of visual storytelling and the language of filmmaking in all its various forms—fiction, documentary, live-action, or animated—and venues such as cinema, television, and the internet. Film Studies majors in the College of Film and the Moving Image (CFILM) avail themselves of Wesleyan's rich and unique resources in the Film Studies Department, the Jeanine Basinger Center for Film Studies, WesDocs, the Student Film Series, and the Ogden and Mary Louise Reid Cinema Archives. Courses in history, analysis, and hands-on production facilitate a deep understanding of the medium.

Film Studies majors often bring an imaginative, creative mindset, a passion for visual storytelling, technical curiosity, and a collaborative nature. They may have a broad, eclectic taste in movies and television, a critical eye, an awareness of the industry, and multidisciplinary interests in the humanities and sciences.

Flim Studies students develop a critical and creative approach to the medium based on a strong visual vocabulary, extensive viewing, and a grasp of film production. Upon graduation, majors know how to make a movie, are experienced in film and television writing, understand film history, can offer original visions, and can extend our knowledge of the moving image. We encourage students to develop a personal vision, collaborate, take risks, solve problems, and learn from both failure and success.

ADMISSION TO THE MAJOR

The requirements for admission include a minimum overall academic average of B (85.0) and the successful completion of two designated entry-level courses with a grade of B+ or better in each. Entry to the major is possible only after completion of these two courses and application to the film major. To apply, students must meet with one of the Film Department Advisors by the end of the first semester of their sophomore year and place their names on the list of potential majors. The Film Department Advisors are Stephen Collins, Scott Higgins, Anuja Jain, Marc Longenecker, Sadia Shepard, Michael Slowik, and Tracy Strain. Students on this list will receive an application form. Applications will be evaluated based on performance in film studies classes (including but not limited to grades) and any other factors deemed pertinent.

Because of the prerequisites and major requirements, students transferring to Wesleyan after their first semester sophomore year are not eligible to declare the film studies major.

MAJOR REQUIREMENTS

To fulfill the major, students must satisfactorily complete 10 Film Studies courses, including:

- Two introductory courses—Film 304: History of Global Cinema and Film 307: The Language of Popular Cinema
- One basic production course—Film 450: Sight and Sound Workshop
- A minimum of six Film elective courses and
- FILM 456 (senior thesis) or one additional elective
- Students may count a maximum of 16 credits in any single department toward the 32 credits required for graduation. Credits that exceed this limit will count as oversubscription.
- The film major does not require a senior thesis.
- Courses taken CR/U are not counted toward Major requirements.

ADDITIONAL OPTIONS

Please be aware that cross-listed courses must be counted in all departments in which they are listed.

Course offerings vary from year to year and not all courses are available every year. With prior approval by the department chair, one history/theory course from another institution may be transferred to the Wesleyan major from study abroad. The department does not offer credit for internships or student forums, but uncredited opportunities to work on senior films are available. Consult the chair of film studies for further details. The Film Studies Department does not offer credit for internships.

Students may become involved in film studies in ways other than class enrollment. The College of Film and the Moving Image houses the Wesleyan Cinema Archives and the Wesleyan Documentary Project. The Film Board (composed of Wesleyan students) runs the Wesleyan Film Series. The College of Film also hosts the Wesleyan Freshman/Sophomore Filmmaking Workshop.

PREREQUISITE CLASSES

Code	Title	Hours
FILM304	History of Global Cinema	1
FILM307	Cinematic Storytelling: Styles, Tools, and Journeys	1

REQUIRED COURSES AFTER ENTRY INTO THE MAJOR

Code	Title	Hours
FILM450	Sight and Sound Workshop (in junior year)	1

- FILM 456 (senior thesis) or one additional elective listed below 1

REQUIRED FILM STUDIES ELECTIVES

Code	Title	Hours
Select a minimum of six of the following:		6
FILM250	Computational Media: Videogame Development	
FILM301	History of Spanish Cinema	
FILM305	Sophomore Colloquium for Declaring Majors	
FILM308	The "Hollywood" Musical	
FILM309	Film Noir	
FILM314	Directorial Style: Classic American Film Comedy	
FILM318	Awesome Cinema: Religion, Art, and the Unrepresentable	
FILM319	Television Storytelling: The Conditions of Narrative Complexity	
FILM322	Alfred Hitchcock	
FILM323	Film and Anthropology	1
FILM324	Visual Storytelling: The History and Art of Hollywood's Master Storytellers	
FILM326	At Home in the World: Transnational Women's Cinema	
FILM329	Bollywood and Beyond: Introduction to Indian Cinema	
FILM330	The Art and Business of Contemporary Film	
FILM331	Video Games as/and the Moving Image: Art, Aesthetics, and Design	
FILM333	Introduction to Russian and Soviet Cinema	
FILM336	Silent Storytelling

FILM387	Seminar on Television Series and Aesthetics	
FILM388	Global Film Auteurs	
FILM389	Film Genres: The Western	
FILM390	History of Film Sound	
FILM391	Sex and Violence: American Film-making Under Censorship	
FILM392	Cinema Stylists: Sternberg, Ophuls, Sirk, Fellini	
FILM409	Senior Thesis Tutorial	
FILM430	Documentary Production	
FILM453	The Art and Craft of Film Adaptation	
FILM454	Screenwriting	
FILM455	Writing for Television	
FILM456	Advanced Filmmaking	
FILM458	Screenwriting: The Short Film	
FILM459	Writing for Television II	
FILM460	TV Writer's Room	

FILM290	Global Film Melodrama	
FILM203	Hollywood and Big Data	1
FILM312	The Short Film: Study and Practice	1

OPTIONAL FILM/TELEVISION COURSES - DOES NOT COUNT TOWARD ELECTIVE CREDIT

Code	Title	Hours
FILM410	Senior Thesis Tutorial	
FILM457	Advanced Filmmaking	

Note: The oversubscription rule limits students to a maximum of 16 credits in a single department before oversubscription occurs, at which point further credits earned in the department cannot count toward the 32 credits required for graduation.

STUDENT LEARNING GOALS

MISSION OF THE FILM MAJOR

The mission of the film studies major is to deliver the finest undergraduate film, television, and media education through our distinctive blending of history, analysis, and production. The major explores moving image art and culture by looking at what is on screen using the language of filmmakers. We highlight visual storytelling. No matter the level of the course or the nature of the discussion, we maintain a direct route from our intellectual activity to filmmakers' choices and audience experiences. In contrast to graduate programs, which separate practice from study or teach methods of scholarship, we teach about the films themselves in a jargon-free classroom.

MISSION OF THE FILM MINOR

The film studies minor offers the same fundamental orientation as the major, but with fewer requirements and an emphasis on cross-listed classes. Its mission is to deliver an encompassing curriculum in film and media studies through an interdisciplinary approach.

OUR PEDAGOGICAL GOALS

Our broad goal is to foster the critical understanding of cinema and television as art forms. To all students, both general education and majors, we offer a unified perspective that enables students to think critically about form and the choices that visual storytellers face. No other liberal arts film program features such a broad and deep background in analysis, culture, and history coupled with sensitivity to film and television's immediate and intimate relationship with audiences.

Our majors develop a critical and creative approach to the medium based on a strong visual vocabulary, extensive viewing, and a grasp of film production. Production and studies are mutually reinforcing in this environment. Our 16mm and digital production courses facilitate deeper comprehension of film and television's complexities and demand a higher level of critical and analytical thinking. Likewise, students steeped in history and analysis bring a robust visual vocabulary and awareness of form and culture to the tasks of storytelling. Upon graduation, majors know how to make a movie, are experienced in film and television writing, understand film history, can offer original visions, and are capable of extending our knowledge of the moving image.

Our major demands and rewards critical thinking. We believe that true learning involves synthesis, discovery, and original thought. Our students must face the challenge of defining and resolving artistic, historical, and analytical problems on their own, while also learning to work in collaboration. We encourage students to develop a personal vision, take risks, solve problems, and learn from failure as well as success.

HONORS

Film studies majors are not required to complete Gen Ed requirements to be Honors Candidates in Film.

Film studies majors are not required to complete senior thesis projects to fulfill their major program of study. However, large percentages of majors do opt for a senior thesis, which can take the form of a written history thesis, a screenplay, a 16mm film, a digital video, an advanced television project, or a film criticism project. Senior theses provide majors with the opportunity to advance what they have learned in their previous coursework through an extended individual project. Film Studies maintains a rigorous approach to evaluating theses, but also provides close, one-on-one advising.

Those students wishing to make a senior thesis film, video, or virtual project must complete their introductory production course (Sight and Sound or Introduction to Digital) during their junior year.

CAPSTONE EXPERIENCE

The College of Film and the Moving Image provides an array of Capstone Experiences, including:

- Advanced senior 16mm filmed thesis
- Advanced senior digital thesis
- Advanced documentary thesis
- Advanced senior screenplay thesis
- Advanced television thesis
- Advanced film criticism project
- Senior paper
- Senior film board participation
- Senior presentation week participation
- Optional Capstone outside major
- No Capstone

FRENCH STUDIES MAJOR

MAJOR DESCRIPTION

The French Studies Major is designed for students interested in developing a command of the French language sufficient to live and work in a French-speaking environment. Students in the program develop a deep knowledge of French-language literature that informs a larger understanding of Francophone modes of

thought, expression, cultures, history, and society. This flexible, interdisciplinary program gives students the opportunity to pursue coursework in several fields, including other Romance cultures, politics, art, literature, and history, all of which may serve as the basis for further academic studies or careers. Study abroad and language immersion in a French-speaking country are encouraged.

Students interested in this major are encouraged to bring an open-minded, interdisciplinary mindset and a global perspective to their study that will allow them to learn more about the diverse cultures of French-speaking societies. Adaptability, patience, and dedication are key traits to apply to studying languages and complex cultural nuances.

French majors gain skills that present various career opportunities in fields such as international relations, business, academia, translation, or cultural exchange.

ADMISSION TO THE MAJOR

Students must have completed FREN215 or a higher-level course with a grade of at least a B to be admitted to the major.

MAJOR REQUIREMENTS

FREN215 or the equivalent is the prerequisite for all FREN courses numbered 216 or higher.

The major consists of a minimum of eight courses beyond FREN215:

- **Four FREN courses numbered 216-399.**
  - These courses must be taken on campus in French.
  - Courses numbered **216-299** are introductory courses intended for students who have completed FREN215, who have taken an equivalent course elsewhere, or who have placed out of FREN215 through the placement test. In general, these courses are designed for students who have not yet studied abroad in a French-speaking country.
  - **300-**level courses are upper-level courses intended for students who have already completed two courses in French beyond FREN215 or who have studied abroad in a French-speaking country for at least a semester.
- **Four other courses** whose content is devoted substantially to the study of French or Francophone literature, history, culture, or society. These courses may be taken on campus or abroad, may be in French or English, and may be chosen from among the following courses:
  - Courses from the French section's normal offering of FREN courses numbered 216-399.
  - Courses listed Romance Lang & Lit In Eng (RL&L).
  - Courses taken through approved study abroad programs.
  - Courses offered by other departments and programs on campus that include a study of French or Francophone culture, politics, or history. These courses must be approved by the student's major advisor.

A minimum grade of B is required for courses taken on campus to count toward the FRST major or the Romance studies (RMST) major where the student is combining French with another Romance culture.

Students majoring in FRST who receive two grades of B- or lower in FREN courses will be dropped from the major.

STUDENT LEARNING GOALS

The French studies major provides students with a command of the French language sufficient to live and work successfully in a French-speaking environment.

LANGUAGE REQUIREMENT

There is no language requirement for the French Studies Major.

ADDITIONAL INFORMATION

Students who receive a C- or lower in FREN course may repeat the course once.

Students who receive less than a B in FREN102, FREN112, or FREN215 will not normally be permitted to enroll in another FREN course or, in the case of students who receive less than a B in FREN215, to study abroad on the Vassar-Wesleyan Program in Paris.

Students who receive a B-, C+, or C in FREN102, FREN112, or FREN215 may petition the head of the French Section to be permitted to take the following course in the French sequence or study abroad on the Vassar-Wesleyan Program in Paris. In their petition, they must explain in detail what supplemental work they will undertake in order to prepare themselves for the following course in the sequence or for study abroad on the Paris program (for example: they will take a summer course). If their petition is approved, they must complete the proposed supplemental work, take the placement exam at the Fries Center for Global Studies, and place into the course they wish to take (or place above FREN215 if they wish to study abroad on the Paris program) before they will be admitted to it.

Students interested in enrolling in French, Italian, or Spanish at the elementary or intermediate levels are urged to do so during their first-year and sophomore years. Department policy gives priority to first-year and sophomore students in our language classes (numbered 101–112) to allow students to study abroad and to meet the requirements of those programs requiring language study. Juniors and seniors who wish to take elementary and intermediate language courses should submit an online enrollment request and attend the first class. They may be accepted during the drop/add period if seats become available. Should a junior or senior enroll in the first course of an ampersand sequence (such as 101–102), he or she will have priority for the second course, just like first-year and sophomore students.

HONORS

See departmental honors program.

CAPSTONE EXPERIENCE

See departmental description of capstone experiences.

GERMAN STUDIES MAJOR

MAJOR DESCRIPTION

The Major in German Studies provides students with a strong foundational understanding of German language, literature, and thought as they explore the rich and diverse cultures of German-speaking countries. The department offers courses both in German, at all levels of proficiency, and in English. The department's interdisciplinary program is organized around three major periods in German history: Enlightenment, Weimar Classicism, and Romanticism (1650–1830); Liberalism, Modernism, Fascism (1830–1945); and Cold War, Postmodernism, and Neoliberalism (post-1945). Students will strive for insight and understanding about the development of German-language cultures while achieving fluency and accuracy with spoken and written German in a variety of contexts. Study abroad in a German-speaking country is highly encouraged and supported by the department.

There are no prerequisites for students seeking to pursue the major. The department offers two sections of elementary German every semester, and the quick pace of learning in the department's language sequence enables students to study abroad as early as the spring semester of their sophomore year. The department's student body represents a diversity of intellectual backgrounds and academic interests. Students typically combine their German Studies major with an additional major, such as College of Letters, History, English, Psychology, Biology, or Computer Science.

German majors develop linguistic, transcultural, and analytic skills that can lead to advanced study and various career opportunities in fields such as international relations, business, academia, publishing, or cultural exchange.

ADMISSION TO THE MAJOR

To become a German studies major, a student should have no grade lower than a B in any language course taken in the department. All German language courses below the 300-level counted toward the major must be taken for a letter grade. The department recognizes the diversity of student interests and goals by giving its majors great flexibility in designing their programs of study. Students should work closely with their major advisors to put together coherent courses of study and assure that they will make steady progress toward their German language proficiency goals. The department strongly recommends that majors fulfill Stages I and II of the General Education Expectations.

MAJOR REQUIREMENTS

The German studies major requires satisfactory completion of nine credits' worth of courses. At least six credits must be earned in courses taught in German above the level of GRST102, with at least three of the six being GRST seminars at the 300-level or courses taken at a university in Germany. The remaining three courses may be in either English or German. All German language courses below the 300-level counted toward the major must be taken for a letter grade. Majors are strongly encouraged to spend a semester or a summer participating in an approved program in Germany. We encourage students to study at our Smith/Wesleyan program in Hamburg during their spring semester of the sophomore or junior year. A fall semester option is also available. Courses taken in Hamburg count toward the major, provided the subject matter is relevant to German studies and the instruction and assignments are in German. A maximum of four courses in one semester or six courses in two semesters taken in Germany may be counted toward the major. For students who have not taken GRST213, one credit of intensive language instruction in Germany may count toward the major. Before enrolling in courses in Germany, students must obtain approval from their major advisor. Students must take at least one 300-level German studies course at Wesleyan upon their return. Please note GRST101 and GRST102 do not count towards the German Studies minor.

STUDENT LEARNING GOALS

The German studies major is designed to allow students to explore the rich and diverse cultures of the German-speaking countries through a flexible interdisciplinary program that stimulates the students' creative and critical capacities and can serve as the basis for future academic or professional study or employment.

The specific goals are as follows:

- Knowledge of the German language: Courses are designed to enable students to achieve at least advanced mid-level proficiency in speaking and comprehending spoken German, according to the ACTFL guidelines. Students will have ample opportunity to become fluent and accurate writers in German in a variety of genres and contexts.
- Intercultural literacy: Students can expect to gain insight into unfamiliar cultural attitudes and artifacts, which enables them to be open-minded and competent participants in their own and foreign environments.
- Historical breadth: Students will be able to acquire insight into the development of German-language cultures and thought from the Enlightenment to the present and those cultures' and ideas' impact in Europe and across the globe.
- Knowledge in the field of German studies: Through their courses, majors become acquainted with techniques of textual interpretation, with the scope of the field, and with prevailing research methods and scholarly concerns.
- Experience in German-speaking countries: Students will receive strong encouragement and support to experience a German-speaking country firsthand through study abroad during the academic year or the summer, internships, thesis/capstone research, or study or teaching after graduation.

STUDY ABROAD

For more information about studying abroad in Germany, please visit our department website. (http://www.wesleyan.edu/german/studyabroad.html)

Please make sure to check the application procedures and deadlines for your program as well as those for Wesleyan's Office of Study Abroad (http://www.wesleyan.edu/cgs/osa), located in Fisk Hall 201.

Those students for whom study abroad is not possible during the fall or spring semester should consult with the department about the possibility of taking courses during the summer.

ADVANCED PLACEMENT

See Advanced Placement Credit (http://www.wesleyan.edu/registrar/general_information/ap_ib_credit.html) information. Students with prior knowledge of German should take the online placement examination before

registering for courses. For information about the placement test, please contact Emmanuel Paris-Bouvret (eparis@wesleyan.edu) in the Fries Center for Global Studies.

PRIZES

Students who demonstrate excellence in the study of German may be candidates for prizes given from the Scott, Prentice, and Blankenagel funds. Students seeking funding for special projects or summer language study can apply for the Helmut and Erika Reihlen Fund (http://www.wesleyan.edu/german/scholarships_prizes.html).

ADDITIONAL INFORMATION

German Haus is a wood-frame house at 65 Lawn Avenue, with six single rooms and one double, that provides a vibrant center for German-themed events and activities on campus. Whether discussing current events over coffee and pastries, interpreting poems, watching classic or contemporary films, or hearing about faculty members' research, the residents and their guests can explore a multitude of interests.

HONORS

- **Eligibility.** To become a candidate for honors in German studies, a student must have earned a B+ or better in all German Studies courses above GRST102 taken for a grade.
- **Candidacy.** A prospectus must be handed in and approved by the prospective tutor or the department chair by the end of the Reading Period in the spring of the junior year. Enrollment in senior thesis tutorials (GRST409 and GRST410) is required. Candidates for honors in German studies and another department or program may be required to have two thesis tutors. The two departments or programs must agree in advance about the tutoring arrangement and evaluation of the honors project.
- **Honors projects.** Honors can be earned only for two-semester projects.
- **Deadlines.** Deadlines for nomination to candidacy and submission of the honors project are set by the Committee on Honors.
- **Evaluation and award of honors.** Honors projects will be evaluated by the tutor(s) and at least two other readers. A student receiving high honors may, at the department's discretion and subject to the guidelines of the Committee on Honors, be nominated to take the oral examination for University Honors.

CAPSTONE EXPERIENCE

Students who wish to undertake a one-semester capstone project have wide latitude as to the topic, medium, and form they choose. They should discuss their idea with a member of the department and enroll in an individual tutorial (GRST401 or GRST402) supervised by a German studies or affiliated faculty member.

GOVERNMENT MAJOR

MAJOR DESCRIPTION

The Major in Government provides students with a broad knowledge of political science, or the cultural issues and social structures that determine how and why power is distributed, decisions are made, and policies are implemented. Government majors choose a concentration area for in-depth study—either American politics, comparative politics, international relations, or political theory. Each concentration has its own introductory course, survey courses, and advanced seminars.

Students who are drawn to the study of government and political science are typically fascinated with the dynamics of power, authority, and governance at local, national, and international levels. They may have a keen interest in current events and global affairs, or bring a passion for social issues, public service, and activism.

Government majors are prepared to pursue various career paths including public service, government relations, diplomacy, law, education, research, business and corporate sector, non-profits and NGOs, journalism, political campaign consulting, communications, and fundraising.

ADMISSION TO THE MAJOR

To be admitted as a government major, your academic history must show that you have completed at least one government course with a grade of B- or better.

MAJOR REQUIREMENTS

BASIC REQUIREMENTS

- The government major has total course, depth, and breadth requirements to complete the major.
- Total course requirement: 9 total approved government credits.
- Depth requirement: 4 courses in a concentration (American, Comparative, International Relations, and Political Theory). These can all be 200-level and above, or they may include the 100-level introductory course in that subfield and 3 200-level and above courses.
- Breadth requirement: At least 1 upper-level Government course (200 or above) in 3 of the 4 concentrations.

ADDITIONAL REQUIREMENTS

- Only one of our subfield introductory courses (GOVT151, GOVT155, GOVT157, or GOVT159) as one of the nine.
- A maximum of 2 courses for a semester or 3 courses for a year may count towards the major from study abroad. Note—many study abroad courses transfer at 0.75 Wesleyan credits. Those courses can count as a full credit for the purpose of completing the major.
- A course at Wesleyan in a "cognate" discipline (e.g., history, economics). You may count at most one cognate course toward the major. You may designate a course as a cognate course only if you have already declared the major and have acquired a Government advisor. To designate a course as a cognate

course, you need to get the approval of your Government advisor. A cognate course may count toward your concentration as well as toward the major if your advisor believes this to be appropriate.

- The government department does not limit cross-counting with other majors/minors/certificates. In other words, if you are using a GOVT course that is cross-listed with another unit (e.g., DATA, LAST, CEAS, etc.) you may count that course towards your government major. As long as it is a GOVT listed or cross-listed course, it can count towards the government major.
- Tutorials in the Department of Government. At most one non-thesis tutorial and at most one thesis tutorial may count toward the major.
- Political science courses taken at other institutions. No more than two such courses may count toward the Government major, and they may not be introductory courses, except in the case of a student who transfers from another institution to Wesleyan.
- At least five of the eight upper-division credits required to complete the major must be taken in the Government Department at Wesleyan, in courses numbered from GOVT201 to GOVT399.

THE FOLLOWING MAY NOT COUNT TOWARD THE MAJOR:

- Student forum courses.
- Teaching apprenticeships.
- First-year seminars except FYS versions of GOVT151, GOVT155, GOVT157, or GOVT159, which count the same as the regular versions of each course.
- Internships either in the United States or abroad.
- The Government Department does not grant credit or waive prerequisites for Advanced Placement, International Baccalaureate, or courses taken on ad-hoc programs (e.g., summer study abroad) prior to matriculation at Wesleyan. The only pre-matriculation credits that the department will accept are the government (political science, politics, etc.) credits that the University has authorized from a transfer student's previous full-time institution.
- The Department may authorize credit toward graduation for a political science-related internship undertaken for education-in-the-field credit.

GENERAL EDUCATION EXPECTATIONS

- **Stage 2** must be complete to receive honors in government.

PACING

- Majors with fewer than four Government courses by the end of the junior year must drop the major.

For more information, please visit the department's majoring page (http://www.wesleyan.edu/gov/about_major/majoring.html).

COURSES FOR NON-MAJORS

Many students take government courses without majoring in government. Sometimes First-Year Seminars (FYS) are offered, but demand for our regular courses is high, so we cannot offer as many FYS courses as we would like. First-year students and sophomores are welcome, however, to take the introductory courses we offer in each of our four concentrations. Another option is QAC201, the social science methodology course that is offered by the Quantitative Analysis Center and that is cross-listed as GOVT201 (it counts toward the government major). Most of our survey courses are open to first-year students and sophomores, although majors usually have preference.

GENERAL EDUCATION

- **Stage 2** must be complete to receive honors in government.
- For more information about Government Department regulations involving the General Education Expectations, please visit the Government Department's majoring page. (http://www.wesleyan.edu/gov/about_major/majoring.html)

STUDENT LEARNING GOALS

Students who complete the government major should be able to explore systematically a range of political issues and modes of argumentation, drawing on the knowledge, analytical abilities, and quantitative or qualitative skills they have acquired through their courses. They should also be better prepared to think critically, write clearly, and speak effectively. By acquiring these capabilities, government majors prepare themselves for lives of contribution in public service, education, law, business, journalism, and other fields.

STUDY ABROAD

For more information about deciding to study abroad, applying to study abroad, and getting faculty preapproval for study-abroad courses, please visit the department's study abroad page (http://www.wesleyan.edu/gov/department_policies/studyabroad.html).

Up to two courses on an approved one-semester study-abroad program may count toward the major. Majors on full-year programs may count a third course with the approval of their major advisor. A student seeking major or University credit for a study abroad course must give the **preapproving** faculty member a course title and a written course description **before** the first meeting of the study-abroad course, either in person before departing (preferable) or by e-mail from abroad (if the title and course description are unavailable before departure).

No credit will be approved toward the major for internships, introductory courses, or certain School for International Training courses.

Students may count toward the major no more than two credits earned in courses taken away from Wesleyan, whether in a study-abroad program or in another U.S. institution, except in the case of a full year of study abroad, in which case the faculty advisor has full discretion on whether to authorize credit for a third course toward the major.

Independent study projects conducted abroad may be included among the two study-abroad courses that may be counted toward the government major (up to three for a student studying abroad for a whole year). A student's major advisor may choose to give tentative approval for an independent study project, subject to a review of the written work after the student's return.

ADVANCED PLACEMENT

The Government Department does not grant credit or waive prerequisites for Advanced Placement, International Baccalaureate, or courses taken on ad-hoc programs (e.g., summer study abroad) prior to matriculation at Wesleyan. The only pre-matriculation credits that the department will accept are the

government (political science, politics, etc.) credits that the University has authorized from a transfer student's previous full-time institution.

PRIZES

In addition to honors and Phi Beta Kappa nomination, the department offers six prizes to students who excel in the government major. These prizes are listed on the Wesleyan Government Department website.

Davenport Prize: To senior majors who show excellence in the study of political science

Parker Prize: To a sophomore or junior who excels in public speaking

Rich Prize: To a senior whose orations are judged best in composition and delivery

Skirm Prize: To the best research or writing project completed by a government major in his or her junior year

Titus Prize: To support the summer studies of a deserving Wesleyan junior majoring in government, the College of East Asian Studies, or the College of Social Studies

White Fellowship: To majors who show excellence in the study of political science

The department is also formally represented in the Public Affairs Center (http://www.wesleyan.edu/pac) on committees that award Davenport Grants and the Hallowell Prize in the study of social science, as well as on the committee that awards the Carol A. Baker '81 Memorial Prize for the development and recognition of the accomplishments of junior faculty.

TRANSFER CREDIT

For information on how to apply for Government Department authorization to transfer credit from U.S. academic institutions, please visit the department's transfer of credit page (http://www.wesleyan.edu/gov/department_policies/transfercredit.html). For information on how to apply for Government Department authorization to transfer credit from approved study-abroad programs, please visit the department's study abroad page (http://www.wesleyan.edu/gov/department_policies/studyabroad.html).

Requests for Government Department-approved transfer of credit from U.S. academic institutions must be made before the first class meeting of the course whose credit you wish to transfer.

Approval will be granted if, and only if, the course for which you wish to transfer credit is:

- Upper level. Introductory courses may not be counted.
- In the field of government (political science, politics).
- Equivalent in terms of contact hours, content, and requirements to Wesleyan courses.
- Offered at a four-year, accredited institution.
- Graded. Credit/no credit courses may not be transferred.

RELATED PROGRAMS OR CERTIFICATES

- Civic Engagement Minor
- Environmental Studies Minor
- Global Engagement Minor
- Human Rights Advocacy Minor

For a full list of all minors and certificates, please visit Wesleyan's course listing (WesMaps (http://www.wesleyan.edu/wesmaps)). Government courses count toward several of them, and Government Department faculty are involved in several minors and certificates in addition to those listed above.

HONORS

For more information on honors at Wesleyan in general, University Honors regulations, evaluation of honors theses, and recipients of honors in government in previous years, please visit the department's Honors page (http://www.wesleyan.edu/gov/about_major/honors.html).

To be eligible for honors in government you must (1) be a government major on track to complete the major requirements in a timely fashion; and (2) have completed Stage I of the General Education Expectations.

To become a candidate for honors in government, you must meet the two eligibility conditions, submit the Thesis Application Form (http://www.wesleyan.edu/gov/forms/GOVTThesisApplication.pdf), and have your application accepted by the Government Department. As a general minimum guideline for Government Department acceptance at the time of application, candidates should at least have completed or be enrolled in five government courses and have a grade point average of 91.7 in all government courses.

Optimally, you will meet with a potential tutor (tenured, tenure-track, or full-time visitor in the Government Department) and discuss a thesis project prior to submitting an application. After the Government Department faculty review the applications, you will be notified as to whether you will be a candidate for honors, and as to the name of the faculty member who will serve as your tutor.

If you have become a candidate for honors, you must enroll during the drop/add period of the fall semester of your senior year in GOVT 409, "Senior Thesis Tutorial." You cannot include this tutorial in course planning during pre-registration; you have to add it during the in-semester drop/add period. You add the tutorial electronically, following instructions in the Tutorial Manual on the Tutorial Registration page on the website of the office of the Registrar. Enrolling in GOVT 409 will indicate to the Honors Coordinator in the Office of the Registrar that you are an honors candidate from the standpoint of the University as well as the department.

Before the end of the fall semester, you must submit to your tutor a thesis chapter and thesis outline. The Government Department faculty will review your progress in the honors program. If you are making satisfactory progress you will be approved to continue your honors thesis by enrolling in GOVT 410. If you are making unsatisfactory progress on your honors thesis you will be informed that you will not be able to continue in the honors program. In this case, alternative options, such as completing the project as a senior capstone, will be identified.

Then, during the drop/add period of the spring semester of your senior year, you must enroll electronically (using the same procedure described above) in a second tutorial, GOVT 410, which is also entitled "Senior Thesis Tutorial." Enrolling in GOVT 410 will indicate to the Honors Coordinator in the Office of the

Registrar that, just over half-way into your senior year at Wesleyan, you remain in good standing as an Honors Candidate from the standpoint of the University as well as the department. You may count either GOVT 409 or GOVT 410, but not both, toward the eight upper-division courses you need to complete the government major. Only one thesis tutorial credit may count toward the major.

Finally, to actually *receive* honors in government, you must (1) complete the government major; (2) complete both Stage I and Stage II of the General Education Expectations; and (3) write a thesis judged to be of honors quality.

CAPSTONE EXPERIENCE

There are several opportunities for Government majors to pursue an optional capstone.

A government thesis involves one-on-one tutorials (GOVT409/GOVT410) with a supervising faculty member for a full year, culminating in the submission of an honors thesis, many of which are about 100 pages long.

Seniors seeking a capstone experience lasting a single semester can choose either an individual undergraduate tutorial (GOVT401/GOVT402) or a survey course or seminar that requires a final independent research paper at least 15 pages in length whose topic is chosen by the student. It is not unusual for students to take several such courses during their junior and senior years, sometimes exploring related topics from several different angles. In some advanced survey courses or seminars, students may engage in a capstone experience that culminates in a work of nontraditional scholarship—service learning, public blogs, civic engagement, etc.—rather than a standard research paper.

HISPANIC LITERATURES AND CULTURES MAJOR

MAJOR DESCRIPTION

The Major in Hispanic Literatures and Cultures enables students to gain fluency in the Spanish language and knowledge of the diverse cultures of Latin America, Spain, and other Hispanophone communities in the United States and worldwide. The major emphasizes the history and cultural diversity of a world whose geographic reach is vast and whose legacy extends from the pre-colonial period in Latin America and European classical antiquity to the present. This interdisciplinary program focuses on literary and other modes of representation (such as film, performance, and the visual arts), while offering students opportunities to tailor their course of study to their broad intellectual interests. Study abroad in a Spanish-speaking country is highly encouraged and can count towards the major.

Students who major in Hispanic Literatures and Cultures develop an open-minded, inquisitive mindset and a global perspective. While improving their ability to communicate in Spanish, they acquire a deeper understanding of the vibrant and diverse cultures of the Hispanophone world, including its histories, politics, artistic and philosophical traditions. They also gain the language proficiency, communication and critical skills, and intercultural competencies to live, study, and work in a Spanish-speaking environment, in the United States or abroad.

Hispanic Literatures and Cultures prepares students to pursue their academic and professional interests in fields such as education, law, politics, international relations, social work, the arts, business and the medical professions, among others.

ADMISSION TO THE MAJOR

Students qualify for this major with a grade of B or better in SPAN 221 or the equivalent. Exceptions require a formal petition to the Spanish section.

MAJOR REQUIREMENTS

Nine (9) courses minimum numbered 203 and above.

- Five (5) courses minimum in SPAN numbered 221 or above taken from the Wesleyan Spanish section. To ensure that majors explore the historical and geographic diversity of the Hispanophone world, and make an informed choice about their electives, these courses must be distributed as follows:
  - one course pre-1700 (SPAN230-239)
  - one course post-1700 Spain (SPAN250-269)
  - two courses post-1800 Latin America (SPAN 240-249; SPAN270-299)
  - one elective
- At least one (1) course in SPAN at Wesleyan during the senior year

OTHER REQUIREMENTS

- A grade of B or better is required for courses taken for the major.
- Students who count SPAN 203 must also take SPAN 221.
- The following courses **do not** count toward the major:
  - Tutorials (for theses, essays, independent study, and course assistants)
  - Language courses taken abroad
  - Service learning courses
- It is possible to count a credit earned elsewhere (e.g., over the summer) toward the major, but petitions must be pre-approved by the section. The student must establish the course meets our standards for equivalence. Criteria and conditions (along with the petition) are explained here: https://www.wesleyan.edu/romance/spanish/aptransferofcredit.html (https://wesleyan.edu/romance/spanish/aptransferofcredit.html)
- Exceptions require a formal petition to the Spanish section. On the petition process (including timelines), see below.

COURSES IN RELATED FIELDS TAKEN ABROAD OR ON CAMPUS

We strongly encourage students to pick courses abroad on topics not available in the Spanish section at Wesleyan. Courses taken in Spanish on selected programs abroad may count toward the major if they have a strong interpretive dimension, with a focus on reading, writing, discussion, representation, or form (e.g., how genre, rhetoric, and/or style shape meaning). Such courses may also treat the subject's history or the debates within it. Courses that meet these criteria are ordinarily found in anthropology, art history, history, music, philosophy, and sociology. They can also be found in economics, government, and psychology when the course focuses primarily not on quantitative analysis or method but on the field's history or its use in public debates or contexts.

With the advisor's approval, majors may count courses in related fields as follows:

- Students who study abroad may count up to four (4) courses taken in Spanish on selected programs. Students who count courses taken abroad should aim for as much chronological and geographic diversity as possible.
- Students who do not study abroad may count up to two (2) related-field courses taken in English at Wesleyan on Latin America, Spain, or Latinx US. However, bear in mind you can create your own immersion experience at Wesleyan by taking more than one course in Spanish per semester as you would abroad. While you cannot replicate the full experience here, we offer such a wide range of seminars you can replicate the academic one.

PETITIONING FOR EXCEPTIONS TO MAJOR REQUIREMENTS

To ensure students are on-track to fulfill the requirements for the major, the Spanish section collectively reviews the academic histories of all juniors in February of each year, that is, before course selection for the senior year. Students may petition the Spanish section for exemption from a requirement by writing to the head of the section. Such requests should only be made in exceptional circumstances, taking into account the learning goals and rationales for the major requirements explained above. Students and their advisors should plan course selection accordingly, to ensure completion of the major regardless of the petition's outcome. Petitions should be submitted by March 30.

STUDENT LEARNING GOALS

Students who complete the major in Hispanic literatures and cultures have the knowledge and skills needed to successfully pursue their academic and professional interests:

- the language proficiency to live, study, and work in a Spanish-speaking environment, in the United States or abroad;
- strong communicative skills, in both Spanish and their native language;
- the capacity to understand diverse points of view;
- the ability to draw on a wide range of sources to stimulate their own creative and critical capacities; and
- a sense of the rich diversity and creative power of Hispanophone literary texts and films spanning ten centuries (five of them in Latin America) and five continents.

STUDY ABROAD

The following programs abroad are recommended for majors in Hispanic literatures and cultures:

- Vassar-Wesleyan Program in Madrid (Spain)
- Universidad de los Andes in Bogotá (Colombia)
- CIEE in Buenos Aires (Argentina)
- Middlebury in Chile (Various cities)
- CIEE in Santo Domingo (Dominican Republic)
- IFSA Butler at the Universidad Autónoma (Mérida, Mexico)

Students may petition for ad hoc approval of other programs abroad. For more information concerning study-abroad opportunities, visit the Office of Study Abroad, 201 Fisk Hall.

ADVANCED PLACEMENT

See wesleyan.edu/romance/spanish/aptransferofcredit (http://wesleyan.edu/romance/spanish/aptransferofcredit.html) for more information.

TRANSFER OF CREDIT

See wesleyan.edu/romance/spanish/aptransferofcredit (http://wesleyan.edu/romance/spanish/aptransferofcredit.html) for more information.

HONORS

See wesleyan.edu/romance/spanish/honors (http://wesleyan.edu/romance/spanish/honors.html) for more information.

CAPSTONE EXPERIENCE

Students are encouraged to present a substantial piece of work during their senior year that is comparative and transnational in nature, either within the framework of a single course (a term paper, for instance) or as their senior essay or thesis.

HISTORY MAJOR

MAJOR DESCRIPTION

The Major in History enables students to explore and develop a broad understanding of the human condition as it has unfolded throughout time. The study of history helps us to make sense of the present, from the meaning of words to the formation of identities, institutions, states, and societies.

History is inherently complex; by studying History, students learn how to acquire knowledge from both large amounts of information and from varied sources. Students assess evidence and analyze conflicting interpretations of the past, thus revealing interconnections and stories that offer insights about our own time and provide guidance for the future.

Students attracted to the History major are often intellectually curious, open-minded, and fascinated by diverse peoples, geographies, cultures, and ways of life that shape the richness of human experience. They enjoy the process of research and discovery—paying attention to details and interpreting evidence to draw substantial connections. They develop a passion for presenting historical events, figures, and ideas through engaging narratives and compelling presentations.

History majors develop valuable skills, including critical thinking, interpretation, persuasive writing, analytical research, and public speaking, all of which are needed for tackling complex questions. After graduation, students with History

Majors pursue highly varied careers, such as law, journalism and writing, museum curation, library and archival science, education, non-profit, travel, archaeology, politics, film, and finance.

ADMISSION TO THE MAJOR

Go to your portfolio and declare the history major.

Any history faculty member may serve as an advisor by agreement with the student. If you are not certain which faculty member would be an appropriate advisor for your intended course of study, you should meet with the department chair, William Johnston.

MAJOR REQUIREMENTS

Nine History Courses Total

N.B. -**higher level** History courses may be substituted for **lower level** ones

Courses taught on campus by History Department faculty but not cross-listed as HIST courses can count toward the major.

Courses to Satisfy the Major

- **One 150-199 "Intro to History"** course, normally taken as a first-year or sophomore at Wesleyan, can count toward the nine history courses in the major.
- **Five History courses 200 level or higher**
- **HIST300 "Issues in Contemporary Historiography" (usually taken first semester junior year).**
- **Two History courses 301 level or higher**
  - One 200 or 300 level History course must devote at least 50% of its attention and content to the period before 1800.
  - One semester of essay or thesis coursework can count toward completion of the History major (HIST403, HIST404, HIST409, or HIST410)
- **Pre-Industrial Era**
  - One 200 or 300-level course required from a pre-approved list.

Capstone Project

Every History Major is required to complete a substantial research project at Wesleyan under departmental faculty supervision. This can take the form of:

1. a senior thesis (HIST409-HIST410)
2. a senior essay (HIST403 or HIST404)
3. an approved research paper for a 300 level seminar indicated by enrollment in .25 credit tutorial (HIST401 or HIST402)

STUDENT LEARNING GOALS

Majoring in history develops valuable skills transferable beyond the classroom. Learning goals broadly include: critical thinking, flexible interpretation of diverse source material, and persuasive writing, as well as analytical and research skills for tackling complex questions that will prepare majors for the changing professional world.

Departmental learning goals are met incrementally as students combine diverse courses and course types:

Category 1: *100-level history courses* *(numbered 150–189)* are in lecture and discussion format and provide introduction to history, including key foundational elements of historical work. Students learn to:

1. Develop historical analysis through critical reading of primary and secondary sources
2. Develop historical writing in terms of argument and style
3. Navigate historical research resources, including libraries, internet sources, archives

Category 2: *200-level history courses* are in a lecture and discussion format and continue learning goals from category 1 while developing expertise in specific places, times, and themes. Students learn to:

1. Understand change over time in the context of specific regions, periods, and themes
2. Synthesize and analyze historical material in written work and oral presentations
3. Apply historical research methods and resources

Category 3: *300-level history courses* are in a seminar format and focus on specific areas of knowledge to develop subject expertise and research acuity. Students learn to:

1. refine their expository skills in writing and oral presentations
2. identify research questions and master historiography by critically assessing previous historical work
3. develop and execute original, independent research projects

Assessment occurs within each individual course and assignment but also through the History major's relationship with their advisor who monitors the student's overall progress.

LANGUAGE REQUIREMENT

There is no foreign language requirement for history majors, but the department strongly advises all history majors to learn at least one foreign language.

TRANSFER CREDIT

History majors wishing to count transfer credit toward the History Major must consult with their history advisor in advance, and upon their return to Wesleyan provide their advisor with syllabi and other materials, such as exams and papers, from the course(s) that they wish to apply toward the history major. Once approved by the advisor, the course may count for major credit.

CAPSTONE EXPERIENCE

The senior research project gives all history majors the opportunity to apply their skills in historical research toward a topic about which they are passionate. The Capstone Project can be a senior thesis (HIST 409-410) or a senior essay written in a tutorial (HIST 403 or 404) or as an approved research paper in a 300-level seminar indicated by enrollment in a .25 credit tutorial (HIST 401 or 402).

ITALIAN STUDIES MAJOR

MAJOR DESCRIPTION

The Italian Studies major provides students with solid training in the spoken and written Italian language, enabling in-depth study of Italian history, culture, and society from the Middle Ages to the present. Students study a variety of texts (literary, film, and cultural), which enhance their acquisition of the language. This flexible, interdisciplinary program allows students to explore their own intellectual interests across other fields and in such departments as History, the College of Letters, Art History, and Classical Studies. Recent graduates have also double majored in Neuroscience, Chemistry, Earth and Environmental Sciences, and Film. Small and highly interactive classes are typically conducted in Italian, and students work closely with their professors. Study abroad in an Italian-speaking country is encouraged with a warm invitation to study on Wesleyan's program in Bologna.

Students interested in the Italian Studies major develop an open-minded, inquisitive mindset as well as a global perspective. They may be passionate about Italian history, art, cinema, literary, or culinary traditions. Adaptability, strong communication and critical skills, creativity, and commitment are key traits that students gain from the study of Italian, its culture, history, and language.

The Italian Studies major develops capabilities including writing, speaking, interpretation, intercultural literacy, and effective citizenship—skills that prepare students for advanced study and are useful in a variety of professions including international relations, politics, business, academia, translation, the arts, travel, and cultural exchange.

ADMISSION TO THE MAJOR

Students qualify for this major with a grade of B or better in ITAL111 or the equivalent.

MAJOR REQUIREMENTS

- Nine courses above the level of ITAL102 (i.e., ITAL111 and higher) are required. Sophomores who are satisfactorily completing ITAL102 and intend to pursue Italian will be admitted to the major even though that course does not itself count for the major;
- All courses that count toward the major must be taken for a grade. Normally, only courses passed with a B or better will count for the major. Students are expected to request permission from the Italian section to count courses with a lower grade toward the major;
- Essay, thesis, and other (e.g., CA/TA) tutorials and language courses do not count toward the major, although they are encouraged;
- One of the nine required courses may be taken in English;
- For students placing into ITAL221 or higher, three of the nine required courses may be taken in English;
- One course in Italian at Wesleyan following study abroad is required;
- All students are required to take at least one course for the major in their senior year.

ADDITIONAL INFORMATION

- The Italian major is designed to allow students to start Italian at Wesleyan in their first or second year and complete the major. Completion is further helped by spending one semester abroad in Italy through the ECCO program or another program.
- Students are highly encouraged to satisfy the post study-abroad course requirement in the semester they return to campus.
- Four credits from the ECCO program in Bologna are accepted: Only one of these may be on a topic that is not Italian in nature (i.e., economy of Russia taken at the UniBo).
- Lecce credit is accepted only for students who have completed ITAL102 only before study abroad.
- If a student attends a study-abroad program other than ECCO, a review of the number of credits that will be accepted into the major is required.

STUDENT LEARNING GOALS

The Italian studies major combines the study of Italian language, literature, film, and culture, bringing humanistic tradition together with current global concerns. The major is designed to provide students with a comparative, international, and interdisciplinary education. Language training at Wesleyan serves as the base from which to explore Italian history, culture, and society from the Middle Ages to the present. Likewise, the in-depth study of a variety of texts (literary, filmic, and cultural) enhances the study of the language. The study of a foreign language and culture complements students' understanding of their own native cultures, enriching their critical understanding of it. Small classes taught through the medium of Italian, along with the extracurricular activities and study-abroad opportunities, allow students to study in detail and collaborate on a variety of critical topics and foster abilities considered essential in an ever-globalizing world, such as critical thinking, intercultural interpretation and literacy, and effective citizenship. These skills, in turn, prepare students for a variety of professions and lifelong inquiries.

STUDY ABROAD

ECCO program in Bologna, Italy. Wesleyan University cosponsors with Vassar College and Wellesley College a program in Italy for up to 15 students from each of the three colleges without regard to their choice of major. ITAL102 or the equivalent of one year of college-level Italian is the prerequisite for participation. Students may choose to participate in either the fall or spring semesters, or (optimally) both. For fall or full-year participants, the program begins with a seven-week (two-credit) intensive language and culture course that consists of three weeks in Lecce in the month of August, followed by a short break, and then four more weeks in Bologna before the beginning of the academic year. Spring-only participants will have a similar three-week (one-credit) course in Bologna in January. A full complement of courses taught in Italian dealing with Italian literature, history, government, art history, and other areas is offered at the program's center, taught by faculty from the Universitá di Bologna and by the program director.

Qualified students are strongly encouraged to enroll in courses at the Universitá di Bolgona, and, thus, students with good language skills will have a wide range of fields from which to choose, including economics, government, and the natural sciences. All courses carry one Wesleyan credit. Since the Italian studies major emphasizes linguistic and cultural competency, most courses taken at the Universitá di Bologna in Italian will normally count for the major. Only one course

that is not Italian in nature, yet taught in Italian (i.e., The Economy of Russia) taken at the Universitá di Bologna will be accepted.

The cost of the program is approximately equivalent to that of staying on the home campus for the same period, and it includes round-trip air transportation between New York and Italy. Applications for the fall semester are due by March 1, for the spring semester, by October 1, and must be submitted to the Office of Study Abroad (http://wesleyan.edu/ois/).

Students participating in Wesleyan's Program in Bologna for any duration may receive credit for four courses. Students attending study-abroad programs other than ECCO are required to have those credits reviewed by their advisor before they will be accepted for the major. Learn more at: wesleyan.edu/romance/italian/studyabroad.html (http://wesleyan.edu/romance/italian/studyabroad.html).

ADVANCED PLACEMENT

See wesleyan.edu/romance/italian/aptransferofcredit (http://wesleyan.edu/romance/italian/aptransferofcredit.html) for more information.

TRANSFER OF CREDIT

See wesleyan.edu/romance/italian/aptransferofcredit (http://wesleyan.edu/romance/italian/aptransferofcredit.html) for more information.

ADDITIONAL INFORMATION

Course assistantships in Italian. Majors and other accomplished students returning from overseas may apply to serve as a course assistant for elementary Italian. Students may not receive academic credit for this exercise; rather, they will receive a stipend for their work. Students should express their interest to the faculty advisor in the spring for the following fall semester and in the early fall for consideration for the spring semester. Please note that students may serve as course assistant for only one course at the University per semester.

HONORS

See wesleyan.edu/romance/italian/honors (http://wesleyan.edu/romance/italian/honors.html) for more information about honors.

CAPSTONE EXPERIENCE

See wesleyan.edu/romance/italian/honors (http://wesleyan.edu/romance/italian/honors.html) for more information about capstone experience options.

LATIN AMERICAN STUDIES MAJOR

MAJOR DESCRIPTION

Latin American Studies (LAST) is an interdisciplinary program that is designed to provide an integrated view of Mesoamerica, South America, and the Caribbean. This interdisciplinary approach is complemented by a concentration in a specific department. A student who completes the major will receive a degree in Latin.

American studies with a concentration in Economics, Hispanic Literatures and Cultures, History, or Government. The purpose of the concentration is to assure that Latin American Studies majors, even as they advance their interdisciplinary expertise in Latin American societies and cultures, master the substance and methods of at least one established academic discipline. Wesleyan students majoring in Latin American Studies have a wide range of opportunities to develop their skills in research, writing, Spanish language and intercultural literacy, cross-cultural communication, and critical thinking.

ADMISSION TO THE MAJOR

Admission to the Latin American Studies major requires (a) competence in Spanish; (b) an academic record that shows ability both in Latin American Studies and in the intended department of concentration; and (c) a judgment by the core Latin American Studies faculty that a prospective major is likely to be able to maintain a grade point average of B- or better in all courses taken at Wesleyan that are cross-listed with Latin American Studies. Find details on how to apply here (https://www.wesleyan.edu/last/formajors/).

MAJOR REQUIREMENTS

Ten semester courses are required to complete the Latin American Studies major, at least six in Latin American Studies, and at least four in a department of concentration. The four concentration courses need not be cross-listed with Latin American Studies. Concentration options include only departments with a Latin American Studies faculty member, which are currently Anthropology, History, Government, Economics, Hispanic Literatures and Cultures, and Theater.

The purpose of the concentration is to assure that the student majoring in Latin American Studies, which is an interdisciplinary program, has mastered the substance and methods of at least one established academic discipline. Accordingly, Latin American Studies majors may not *concentrate* in another program (e.g., Science in Society), or in an interdisciplinary department (e.g., American Studies), or in a college (e.g., College of Social Studies). Of course, the Program does not preclude its majors from *minoring* or *double-majoring* in any program, department, or college they choose.

To graduate as a Latin American Studies major, students must maintain an average of B- or better in all courses taken at Wesleyan that are cross-listed in the Latin American Studies major (regardless of whether a student elects to include each such course on the major certification form), complete a research requirement paper (see details here (https://www.wesleyan.edu/last/formajors/

researchrequirements.html)), and complete Stage II of the General Education Expectations.

Mandatory Latin American Studies courses at Wesleyan: Of the ten courses required to complete the Latin American Studies major, at least seven must be taken at Wesleyan. On petition to the chair, an exception may be made for (1) students who transferred to Wesleyan and who seek LAST major credit for courses taken at their previous institution(s) or (2) students participating in the Twelve-College Exchange Program who seek LAST major credit for courses taken at one of the other participating colleges.

Of the six LAST courses counted toward the major, at least four must be taken at Wesleyan. At least two of the six LAST courses must be cross-listed with Wesleyan Social and Behavioral Science department courses (SBS designation) and at least two must be cross-listed with Wesleyan Humanities and Arts department courses (HA designation). Of the two courses cross-listed with Humanities and Arts department courses, one must be LAST 226 (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?crse_list=LAST&offered=Y), Survey of Latin American Literature, Cultures, and Ideas. This required course is taught in Spanish. Admission to the major requires competence in Spanish.

Non-Latin American Studies courses at Wesleyan that may count toward the Latin American Studies major: In exceptional circumstances, Wesleyan courses that have significant Latin American content but are not cross-listed with Latin American Studies may count toward the major. Students must petition the Latin American Studies chair to obtain Latin American Studies major credit for such courses.

Courses at Wesleyan that may NOT count toward the Latin American Studies major: No Spanish *language* courses (100-level or SPAN 203 (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?stuid=&facid=NONE&crse=012580&term=1211), Spanish for Heritage Speakers) may count toward the major. The only SPAN courses that may count toward the major are SPAN 221 and SPAN courses numbered higher than SPAN 221 that focus on Latin America (usually numbered SPAN 270 to SPAN 299). If the Latin American Studies major's concentration is HISP, however, courses numbered SPAN 225 to SPAN 269 may be counted toward the four *concentration* courses required to complete the LAST major, provided that no such course has also been counted toward the six LAST courses required to complete the major.

No student forum courses may count toward the Latin American Studies major. Also, Latin American Studies does not sponsor student forum courses.

Restrictions on counting particular types of courses toward the Latin American Studies major:

No more than one introductory (100-level) course in a student's department of concentration.

No more than one music course involving primarily or exclusively performance.

No more than one thesis tutorial credit.

COURSES FOR NON-MAJORS

Non-majors are welcome in any course with a Latin American Studies crosslisting, unless the course's host department imposes a limitation or restriction. For example, ECON 101 or ECON 110 is a prerequisite for ECON/LAST 219 (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?stuid=&facid=NONE&crse=003644&term=1211), Latin American Economic Development.

GENERAL EDUCATION

Latin American Studies majors must complete Stage II of the General Education Expectations.

STUDENT LEARNING GOALS

The Latin American Studies major provides students with an interdisciplinary understanding of the historical, cultural, political, and socioeconomic contours of this diverse region and encourages them to develop expertise in the substance and methods of at least one established academic discipline. Students who complete the Latin American Studies major should be able to explore systematically a range of social-scientific and humanistic issues and modes of argumentation, drawing on the knowledge, analytical abilities, and quantitative, qualitative, and linguistic skills they have acquired through their coursework. Latin American Studies majors should also be better prepared to think critically, write clearly, and speak effectively. By acquiring these capabilities, Latin American Studies majors prepare themselves for lives of diverse contribution.

STUDY ABROAD

Find out more about how studying abroad in Latin America can count towards the major here (https://www.wesleyan.edu/last/studyabroad.html).

ADVANCED PLACEMENT

Find out more here (https://www.wesleyan.edu/last/formajors/Advanced%20Placement.html).

LANGUAGE REQUIREMENT

Admission to the major requires competence in Spanish. LAST 226 (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?stuid=&facid=NONE&crse=007142&term=1209), a required course, is taught in Spanish.

PRIZES

The Latin American Studies Program awards the Levy-Spira Prize for Distinction in Latin American Studies.

TRANSFER CREDIT

Find out more here (https://www.wesleyan.edu/last/formajors/Transfer%20Credits.html).

ADDITIONAL INFORMATION

HONORS

Find out more about honors theses here (https://www.wesleyan.edu/last/formajors/theses.html).

CAPSTONE EXPERIENCE

A research paper, senior essay, or honors thesis constitutes the capstone experience for LAST. Find out more here (https://www.wesleyan.edu/last/formajors/researchrequirements.html).

MATHEMATICS MAJOR

MAJOR DESCRIPTION

The Major in Mathematics broadly explores the relationships between numbers, shapes, measurements, structures, and patterns. Students gain strong computational abilities, abstract mathematical reasoning skills, an understanding of how to apply mathematical theories in practice, and the ability to write and speak clearly and elegantly about mathematics.

Students who are interested in developing strong analytical reasoning and logical thinking skills, attention to detail, and persistence in tackling complex problems should consider majoring in mathematics.

Mathematics majors graduate with knowledge and skills that are valued in many fields, including data analysis, software development, accounting, finance, insurance, operations, statistics, quantitative research, business, the physical and biological sciences, engineering, and education.

ADMISSION TO THE MAJOR

Every student is welcome to major in mathematics. Students are advised to finish calculus up to MATH222 and linear algebra (either MATH221 or MATH223), and MATH228 before making the decision.

MAJOR REQUIREMENTS

- A year of differential and integral calculus (typically MATH121 and MATH122)
- MATH221 or MATH223
- MATH222
- An elementary knowledge of algorithms and computer programming. (Successful completion of either COMP112 or COMP211 satisfies this requirement.)
- MATH261 and MATH225 (recommended for juniors or seniors)
- A coherent selection of four additional electives, chosen in consultation with an advisor from the department. Any 1.0 credit **MATH** course at the **200+** level can be used as an elective for the major.

Notes:

- Students who have completed a year of calculus in high school may place out of one or both of MATH121 and MATH122.
- An AP score of 4 or 5 on the AB calculus exam indicates the student should begin in MATH122.
- An AP score of 4 or 5 on the BC calculus exam indicates the student should consider beginning in any of MATH221, MATH222, or MATH223.
- Students may not earn credit for both MATH221 and MATH223.
- Students must complete either MATH228 or MATH261 by the end of their junior year.
- With advance approval from the departmental advisory committee, mild adjustments are allowed. For example, a Wesleyan course with substantial mathematical content but that is not listed in **MATH** may be used toward the four-electives requirement. Please note, however, that both MATH225 and MATH261 must be taken at Wesleyan to complete the major, and substitutions for these courses will not be approved.

STUDENT LEARNING GOALS

The department has the following learning goals for mathematics majors:

- Develop a basic understanding of, and computational facility with, major objects of mathematical and applied interest, such as differentiable functions, graphs, groups, manifolds, rings, or vector spaces.
- Understand abstract mathematical reasoning, e.g., understand an abstract system of rules, find examples of objects that satisfy those rules, conjecture theorems from those examples, and prove those theorems.
- Understand some mathematical applications and ways to use mathematics in practice, and be able to make connections to topics outside of the strict course content.
- Students should be able to write about and speak about mathematics, clearly and elegantly.

LANGUAGE REQUIREMENT

Undergraduate majors in mathematics are encouraged to study languages while at Wesleyan; majors who are considering graduate study in mathematics should note that graduate programs often require a reading knowledge of French, German, and/or Russian.

BA/MA PROGRAM

This program provides an attractive option for mathematics majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience. For more information, visit wesleyan.edu/grad/degree-programs/bama.html (http://www.wesleyan.edu/grad/degree-programs/bama.html). Advanced undergraduates may enroll in graduate (**500-**level) courses.

ADDITIONAL INFORMATION

COLLOQUIA, SEMINARS, AND MATH CLUB

Lectures. The departmental colloquium series presents lectures on recent research by invited speakers from other institutions. Advanced undergraduates are welcome and encouraged to attend these colloquia and to participate in graduate seminars. All students interested in mathematics are invited to attend the annual Coven-Wood Lecture Series in Mathematics. The first talk in the series is accessible to students at all levels. The undergraduate Math Club hosts informal talks in mathematics and other mathematical activities.

HONORS

An undergraduate may achieve the BA with honors in mathematics via one of two routes:

- The honors thesis, written under the supervision of a faculty member under conditions monitored by the University Committee on Honors.
- A strong performance in a suitable sequence of courses, normally including some graduate courses, selected in consultation with a member of the department's advisory committee. The candidate also is expected to prepare a public lecture on a topic chosen together with a faculty advisor.

CAPSTONE

* SENIOR THESIS-two semesters
* HONORS PRESENTATION
* APPROVED GRADUATE COURSEWORK IN MATH
* TUTORIAL WITH FACULTY

Students pursuing the Mathematics major are not required to complete a capstone experience. However, there are several options available if they wish to pursue one. These include:

* ***Graduate Coursework***: completing one or more approved graduate mathematics courses with a performance deemed satisfactory by the instructor(s). Students should consult with their major advisor or the department advisory committee to select appropriate coursework.
* ***Honors Presentation***: satisfactorily completing the public presentation related to departmental Honors
* ***Senior Thesis***: satisfactorily completing a Senior thesis under conditions monitored by the University Committee on Honors
* ***Tutorial with Mathematics Faculty***: Students may register for a tutorial with a faculty member to pursue study or research on a topic that will deepen or broaden the student's knowledge. Tutorials may involve independent research by the student, but this is not a requirement for the tutorial. To qualify as a capstone experience, the tutorial should culminate in a project or presentation by the student at the end of the semester.

In practice, students often complete more than one of the above experiences. Sophomores and juniors who are considering adding a capstone experience during their senior year may enjoy participating in the department's directed reading program and attending events and talks in the departmental Math Club.

MEDIEVAL STUDIES MAJOR

MAJOR DESCRIPTION

The Medieval Studies program fosters an ability to interpret intersections among cultures, religions, ethnicities, races, and identities, the critical use of historical evidence, and the ability to construct arguments informed by ideas of temporalities and geographies. Medieval Studies majors undertake an interdisciplinary approach to the study of a primary, secondary, and third area within the field. The areas of concentration are typically art history and archaeology, history and culture, and languages and literature. Classes in the College of Letters (COL), music history, and religious studies can also fulfill MDST electives.

Proficiency in at least one modern foreign language is required, and knowledge of Latin, Greek, or Arabic is strongly encouraged. Students are expected to complete a capstone project that may be a senior thesis, a senior essay, or a seminar paper. This can be evaluated for Honors or High Honors (by two MDST faculty). Those recommended for high honors may be nominated for University Honors.

The skills acquired by Medieval Studies students—knowledge of historic cultures, manuscript study and text analysis, experience handling artifacts, and familiarity with historic and modern languages—provide good preparation for advanced degrees, whether in the humanities, law, or other professional schools.

ADMISSION TO THE MAJOR

No specific courses are required for admission to the Medieval Studies major.

MAJOR REQUIREMENTS

Medieval Studies majors take 10 classes in a broad range of fields that include art history, archaeology, history, languages, literature, music, manuscript studies, and religious studies. Majors develop expertise in three areas of concentration (art history and archaeology, history and culture, and languages and literature). Selections are typically structured according to the following distribution:

· 4 courses in the student's chosen primary area of MDST

· 2 courses in the student's second area of MDST

· 1 course in the student's third area of MDST

· 3 additional courses in any area of Medieval Studies, or in another field deemed, in consultation with the advisor, to be closely related to the student's work, in subject matter or method

STUDENT LEARNING GOALS

Medieval Studies majors will be expected to master the following skills:

· An ability to interpret intersections among cultures, religions, ethnicities, races, and identities.

· The critical use of historical evidence across a range of disciplines.

· The ability to construct arguments informed by ideas of temporalities and geographies.

STUDY ABROAD

Students majoring in the program are encouraged to spend at least one semester studying abroad. Programs of study must be approved in advance by the student's advising committee.

LANGUAGE REQUIREMENT

Proficiency in at least one modern foreign language is required, and knowledge of Latin, Greek, or Arabic is strongly encouraged.

HONORS

Honors and high honors are awarded by vote of two Medieval Studies faculty to students whose coursework is judged to be of sufficiently high quality and who have done outstanding work on one or more of the following writing projects: a senior thesis, a senior essay, or a seminar paper nominated for honors or high honors by the instructor in the seminar. Those recommended for high honors in the program may be nominated for University Honors.

CAPSTONE EXPERIENCE

Students in the program are normally expected to complete at least one long paper that may be a senior thesis, a senior essay, or a seminar paper.

MOLECULAR BIOLOGY AND BIOCHEMISTRY MAJOR

MAJOR DESCRIPTION

The Major in Molecular Biology and Biochemistry (MB&B) is designed to accommodate a broad range of academic interests and allow students to concentrate on particular disciplines such as molecular biology, biochemistry, biophysics, structural biology, cell biology, genetics, epigenetics, genomics, and computational modeling.

While focused on exploring and understanding the molecular basis of life, the MB&B major allows for flexible, interdisciplinary studies, enabling students to couple their affinity for biological sciences with other majors.

Curious students who bring a passion for learning about the intricacies of the natural world, have a keen interest in science, and apply a logical, analytical, meticulous approach to their studies are likely to find great meaning and satisfaction in the MB& B major. Students with mathematical aptitude, perseverance, patience, and effective communication skills are those who excel in this course of study.

The Major in Molecular Biology and Biochemistry provides foundational training for various professional careers in medicine, public health, the pharmaceutical/ biotechnology industry, public policy, science journalism, and teaching, among others.

ADMISSION TO THE MAJOR

Students are encouraged to begin coursework toward the MB&B major in their first year to take maximum advantage of upper-level MB&B courses, research, and study-abroad opportunities in later years. However, the major can certainly be completed successfully if initiated during sophomore year.

MAJOR REQUIREMENTS

The requirements for the MB&B major are described in detail on this page. See the (https://www.wesleyan.edu/mbb/major/pathway.html)**Pathway Through the Major** page for a recommended path to fulfill the MB&B requirements.

The MB&B major begins with the core introductory biology series (the MB&B181 and MB&B182 lecture series and the associated laboratory MB&B191 and MB&B192) and/or the core general chemistry series (CHEM141/CHEM143 and CHEM142/CHEM144 lecture plus the associated laboratory, CHEM152). Our introductory cell and molecular biology course, MB&B181, is offered in small sections featuring problem-based learning to help students acclimate to their first semester of university-level biology. Visit Frequently Asked Questions About Introductory Biology for more information (https://www.wesleyan.edu/mbb/major/intro-faq.html).

The Molecular Biology and Biochemistry major requires the following coursework:

Code	Title	Hours
Introductory Biology		
MB&B181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
MB&B191	Principles of Biology I--Laboratory	0.5
MB&B182	Principles of Biology II	1
MB&B192	Principles of Biology II: Laboratory	0.5
General Chemistry		
CHEM141/143	General Chemistry I	1
CHEM142/144	General Chemistry II	1
CHEM152	Introductory Chemistry Laboratory	0.5
Gateway Molecular Biology		
MB&B208	Molecular Biology	1
Organic Chemistry		
CHEM251	Organic Chemistry I	1
CHEM252	Organic Chemistry II	1
Mathematics		
Select one Mathematics course (calculus or statistics recommended)		1
Physical Chemistry		
MB&B381	Physical Chemistry for the Life Sciences	1
Biochemistry		
MB&B383	Biochemistry	1
Advanced Laboratory		

MB&B394	Advanced Laboratory in Molecular Biology and Genetics	1
or MB&B395	Structural Biology Laboratory	
Electives		
Select two elective courses, at least one of which must be a **300**-level **MB&B** course		2

We require one semester of a chemistry lab course, which would typically be satisfied by introductory lab CHEM152 (offered in both fall and spring). This lab course requirement can also be satisfied by taking the intermediate chemistry lab, CHEM257.

One semester of college mathematics, typically calculus or statistics, is required (AP credit is not accepted). Students with deep theoretical knowledge in areas of mathematics, as evidenced by advanced coursework (e.g., in physics) or quantitative forms of research, may petition for the use of a less theoretical mathematics course (e.g., QAC courses) to satisfy the MB&B math major requirement.

One advanced laboratory class is required. Majors interested in a concentration in molecular biology should take MB&B394, which is offered every spring semester and generally taken in the junior or senior year. Students interested in the molecular biophysics minor should take MB&B395, which is offered every other year in fall semester. The Chemistry Integrated Laboratory courses (CHEM375 and CHEM376) do not satisfy the lab course requirement. Students taking both of the advanced lab courses (MB&B394 and MB&B395) may count one of the two courses as their 300-level elective.

MB&B381 may be replaced by two semesters of Introductory Physics (PHYS111 and PHYS112, or PHYS113 and PHYS116) or by Physical Chemistry (CHEM337 and CHEM338). Students who take two semesters of physics or physical chemistry may count MB&B381 as one of their required 300-level electives.

One of the two required electives must be a 300-level MB&B course. This may be fulfilled by taking a 1.0-credit 300-level course, or by taking two 0.5-credit 300-level courses.

The second elective may be a 200-level or 300-level MB&B course. Two consecutive semesters of research (in the same laboratory) for credit (MB&B423 and MB&B424, Advanced Research Seminar) with an MB&B faculty member (or a pre-approved faculty member in another department conducting research in molecular biology/biochemistry/biophysics) can be substituted for the 200-level elective, provided that it is taken for 1.0 credit each semester and a grade of B or higher is achieved. Honors Thesis (MB&B409 and MB&B410) may not be used to satisfy an elective requirement.

For potential elective courses outside of MB&B, including study abroad courses, students must consult with their faculty advisor and the MB&B chair in a timely manner. Prior approved courses outside MB&B that can be taken to satisfy the lower-level elective requirement include BIOL218 Developmental Biology, BIOL334 Shaping the Organism, and CHEM396 Molecular Modeling and Design. These courses offered by other (non-MB&B) departments may only be used to satisfy the 200-level elective requirement for completion of the MB&B major (even if the course has a 300-level designation).

All courses credited toward the MB&B major, both those hosted inside and outside the department, must be taken for a letter grade.

Pre-meds and pre-grads: Organic chemistry laboratory courses (CHEM257 and CHEM258) are requirements for virtually all graduate and medical schools. Most medical schools also require one year of physics with related labs and two semesters of mathematics. Many MB&B majors take more than the two required electives to better prepare for graduate or medical school.

All of the life science community is enriched by the weekly departmental seminar series (https://www.wesleyan.edu/mbb/seminars/)held on Wednesdays at 12:10 p.m. during the academic year, in which speakers are invited from different institutions to speak about their research. All are welcome to come learn about the latest cutting-edge work in the life sciences. You may receive a quarter credit for your attendance by enrolling in MB&B338 and/or MB&B339.

COURSES FOR NON-MAJORS

MB&B offers several courses designed to broadly introduce molecular biology to non–life science majors. Examples include MB&B103, MB&B107, and MB&B117. Alternatively, many non-science majors will take one of our introductory courses, MB&B181, or MB&B182 to meet NSM requirements. See WesMaps (https://www.wesleyan.edu/wesmaps) for current course offerings.

MB&B228 is an introductory biochemistry course for non-majors intending to pursue a medical degree.

STUDENT LEARNING GOALS

- Acquire mastery of core foundational knowledge of molecular biology and biochemistry
- Acquire selective familiarity with our primary literature and key resources
- Achieve familiarity with major questions at the forefront of our field
- Acquire mastery of analytical, quantitative, and creative approaches to analyze problems in our field and to synthesize them in order to create logical hypotheses and experimental plans
- Acquire ability to use multidisciplinary approaches to synthesize a cogent experimental plan
- Acquire mastery of important methodologies in our field
- Acquire hands-on experience with key experimental techniques in our field
- Acquire proficiency in oral, written, and visual modes of effective scientific communication

STUDY ABROAD

Like all Wesleyan students, MB&B majors often choose to study abroad for a semester or more. In recent years, MB&B majors have visited Australia, Chile, Denmark, South Africa, England, France, Tanzania, and Germany, among other countries. During their semester abroad, MB&B majors may choose to take courses that satisfy their major or general education requirements, and may also arrange to do research at the host institution. Decisions about whether courses taken abroad can count for credit towards the MB&B major are made by the department on a case-by-case basis. Students should consult with their major advisor and receive course approval from the chair of the MB&B department prior to their departure.

ADVANCED PLACEMENT

Wesleyan awards one credit to students with AP Biology scores of 4 or 5. Since high school AP Biology courses rarely include the full range of topics or depth covered in MB&B181, this credit does not automatically place out students from

MB&B181, our introductory cell and molecular biology course. Students with exceptional preparation can place out of MB&B181 by passing a placement exam. The placement exam must be taken during the first week of the student's first semester at Wesleyan (this applies to both incoming freshmen students and transfer students). Interested students should contact Professor Cori Anderson (canderson05@wesleyan.edu (canderson@wesleyan.edu/)) to schedule a placement exam.

Prospective MB&B majors with a score of 4 or 5 in AP Chemistry must meet the Chemistry Department requirements for advanced placement credit.

AP credit is not accepted for the math requirement.

PRIZES

Majors are eligible for several prizes based on their academic performance and contributions to the MB&B Department.

Hawk Prize: The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

Scott Biomedical Prize: Awarded to a member or members of the Molecular Biology and Biochemistry senior class who have demonstrated excellence and interest in commencing a career in academic or applied medicine.

William Firshein Prize: In honor of founding faculty member William Firshein, awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry department.

American Society for Biochemistry and Molecular Biochemistry Honor Society: The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

American Society for Biochemistry and Molecular Biochemistry Research Award: The ASBMB rewards exceptional rising seniors pursuing a degree in the molecular life sciences who have developed an exciting research project. More information is available on the ASBMB web page (http://www.asbmb.org/education/studentchapters/awards/ugresearch/).

Dr. Neil Clendeninn Prize: Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed his or her sophomore year and in that time have exemplified those qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

RELATED PROGRAMS OR CERTIFICATES

Molecular Biophysics Minor (https://www.wesleyan.edu/molbiophys). Molecular biophysics is an interdisciplinary area of research situated at the intersection of molecular biology, chemistry, chemical biology, physical chemistry, and molecular physics. Wesleyan's program includes faculty in the MB&B, chemistry, physics, and biology departments. Students are strongly encouraged to conduct independent research in the laboratory of a molecular biophysics program faculty member.

Informatics and Modeling Minor (https://www.wesleyan.edu/imcp/). The Integrative Genomic Sciences (IGS) pathway is an integrative program of coursework and research in the areas of bioinformatics, genomics, computational biology, and bioethics. IGS involves faculty and students in the life sciences, physical sciences, information sciences, and philosophy.

BA/MA PROGRAM

This program provides an attractive option for life science majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience. More information is available here (https://www.wesleyan.edu/grad/graduate-programs/bama_program.html).

ADDITIONAL INFORMATION

UNDERGRADUATE RESEARCH OPPORTUNITIES

Undergraduate research is an important part of the curriculum for many MB&B majors. Wesleyan's small but excellent graduate program makes it possible for majors to work alongside PhD and MA students at the cutting edge of discovery in molecular biology and biochemistry. To complement laboratory experiences, MB&B majors are also encouraged to gain exposure to current research through journal clubs and seminars. Undergraduate research encompassing multiple semesters or summers may be used towards completion of a senior honors thesis, or form the basis for pursuing a Master of Arts in MB&B through the BA/MA program.

Students interested in independent research for credit must find a faculty research mentor and submit an electronic tutorial form (Research Tutorial, MB&B423 or MB&B424) using the drop/add system in their portal. Based on discussions with the faculty research mentor, students may sign up for 0.25, 0.5, or 1.0 credits. Students enrolling for 1.0 credit are expected to dedicate at least 10 hours per week to their research project, which includes attendance in weekly group meetings and reading and discussion of current literature with group members, in addition to planning and performing experiments. Students will discuss specific expectations with their research mentor.

MB&B majors not participating in research tutorials will gain research experience in the Department's advanced laboratory courses; they are also encouraged to gain exposure to current research through journal clubs and seminars.

HONORS

To be considered for departmental honors, a student must:

- Be an MB&B major and be recommended to the department by a faculty member. The student is expected to have a B average (grade point average 85) in courses credited to the major.
- Submit a thesis based on laboratory research, performed under the supervision of an MB&B faculty member or pre-approved faculty member in another department conducting research in the fields of molecular biology, biochemistry, or biophysics.

Two readers (in addition to the research mentor) must be selected for review of honors theses in MB&B. It is expected that these readers will be MB&B research faculty; any exception requires approval of the MB&B department chair.

CAPSTONE EXPERIENCE

Independent laboratory research is strongly encouraged as it provides students with an exceptionally valuable learning experience. As research students, MB&B majors interact with faculty and graduate students in an environment that fosters strong intellectual and social connections. Moreover, many graduate and professional schools specifically recruit candidates with research experience. MB&B majors not participating in laboratory research can get a measure of this experience through participation in departmental and inter-departmental seminar series and journal clubs.

Faculty research interests cover an exciting range of current topics in molecular and cellular biology and biochemistry. Research areas include DNA replication and repair mechanisms, membrane transport processes, DNA-protein interactions, gene regulation, genome organization and structure, and membrane protein structure-function and dynamics. Students are encouraged to learn more about ongoing research (https://www.wesleyan.edu/mbb/grad_studies/research_areas.html) in the MB&B department. Many MB&B majors gain research experience at Wesleyan and other institutions in the summer months; the MB&B office and Wesleyan Career Resource Center can direct students to research opportunities.

All MB&B majors participate in independent research projects as part of our experiment-based advanced laboratory courses MB&B394 and MB&B395, at least one of which is required.

MUSIC MAJOR

MAJOR DESCRIPTION

The Major in Music has much flexibility and is built around the individual interests and needs of the student while providing a solid foundation in music history, culture, theory, composition, and performance. Students will explore how these different areas reinforce and inspire each other. Wesleyan's Music Department enjoys an international reputation for innovation, and majors will study at least one musical tradition outside their prime concentration. Special areas of strength include: experimental and digital music; composition and improvisation; American, European, and West African musics; and East, Southeast, South, and Central Asian musics.

Wesleyan Music Majors possess a unique passion with broad intellectual curiosity, an intense appreciation of artistic expression, dedication to their craft, a collaborative spirit, open-minded creativity, and an inspiring work ethic. Careers in music may include performance, composition, teaching, production, engineering and sound design, therapy, journalism and criticism, arts administration, entrepreneurship, and more.

ADMISSION TO THE MAJOR

Individual programs of study in the Music Major are developed by students with academic advisors. A student must have already taken at least one course in each capability area before applying for the major: theory/composition; history/culture; and performance. The Music Theory Gateway course (MUSC103) is a requirement of all majors which may be waived based on a placement test.

MAJOR REQUIREMENTS

Music majors take three courses in each capability area: theory/composition; history/culture; and performance. Two additional courses from the MUSC300-level Seminars for Music Majors bring the number of music credits to 11. The required senior project or senior honors thesis brings the total number of music credits to 12 or 13, respectively.

Diversity of musical experience is a core value of the Music Department and is expected of all music majors. Towards that goal, each major's program of study must include at least two Music credits out of the major's main area of interest.

Many Music majors, particularly those taking private lessons, end up taking more than 16 credits in music. However, since no more than 16 credits in music may be counted toward the 32 credits required for graduation, students must always complete at least 16 credits outside of music.

COURSES FOR NON-MAJORS

With the exception of Music Major Seminars, all classes offered by the Music Department are open to non-majors.

GENERAL EDUCATION

Music majors are advised to complete their General Education expectations (three each of Arts and Humanities, Natural Sciences and Mathematics, and Social Sciences courses). Prospective majors who have not taken enough courses outside the Music department may be refused entry into the major. Students who fail to fulfill the General Education expectations are not considered for department prizes and honors.

STUDENT LEARNING GOALS

At graduation, music majors will be able to:

- Think analytically and critically about musical languages, histories, and cultures
- Write effectively about music
- Perform and/or create music with proficiency and creativity
- Engage unfamiliar traditions and paradigms of humanly organized sound with sensitivity and insight
- Apply their musical knowledge and skills within broader investigations of the human experience

ADVANCED PLACEMENT

AP THEORY CREDIT IS CONSIDERED AS FOLLOWS:

AP THEORY CREDIT ON THE STUDENT'S WESLEYAN TRANSCRIPT

- A score of 4 or 5 does not complete a theory requirement for the major, but will provide one music credit beyond the requirements for the Music Major towards graduation
- Students will still need to complete 3 theory/composition credits for the major

STUDENTS WITH QUESTIONS REGARDING AP THEORY

- Should meet with the theory faculty of the Music Department teaching MUSC103 to discuss options

PRIZES

MERIT-BASED AWARDS THAT MAY BE AWARDED ANNUALLY

ELIZABETH VERVEER TISHLER PRIZE

Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance.

GWEN LIVINGSTON POKORA PRIZE

Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

LEAVELL MEMORIAL PRIZE

Awarded annually to a senior who has done outstanding work in music and whose work manifests the ideals of the World Music Program in the Music Department.

LIPSKY PRIZE

The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unfailing kindliness, quiet dignity, and brilliant scholarship.

SAMUEL C. SILIPO PRIZE

Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

ADDITIONAL INFORMATION

SPECIAL ACTIVITIES

The department supports a number of unusual activities, many of which are available to the student body in general as well as to music majors. Among them are ensembles in various Asian, African, American, and European traditions, as well as a variety of chamber ensembles.

PRIVATE LESSONS PROGRAM

Private lessons are available for many instruments and voice in Western art music, African American music, and a variety of other musics from around the world. Lessons are considered one-credit-per-semester courses. An additional fee, $780 per semester, is charged for these private lessons (financial aid may be available to students eligible for university financial aid). Approved music majors in their junior and senior years are eligible for partial subsidy when taking one (1) private lesson, per semester, for academic credit with a private lessons teacher.

DEPARTMENTAL COLLOQUIUM

An ongoing departmental colloquium is intended for the entire music community. It includes presentations by Wesleyan faculty, students, and outside speakers and encourages general discussion of broad issues in the world of music.

FACILITIES

The study facilities include a working collection of musical instruments from many different cultures; a music-instrument manufacturing workshop; a 45-piece Javanese *Gamelan* Orchestra; a large formal concert hall and a small multipurpose concert hall; an electronic music studio coupled to a professional recording studio; a computer-arts studio capable of producing electronic music, video art, and environmental simulations; a music and record library; an electronic keyboard lab; and an archive of world music.

COURSES

The following is a listing according to categories of courses offered by the department:

Code	Title	Hours
FYS Courses		
MUSC116F	Visual Sounds: Exploring the Landscape and Architecture of Musical Notation (FYS)	1
MUSC117F	Musicking Body (FYS)	1
MUSC118F	Bob Dylan and His World: Sources and Legacies (FYS)	1
MUSC119F	Jazz in the 1960s (FYS)	1
MUSC120F	Music, Place, and Culture: An Exploration of African American Soundscapes and Traditions (FYS)	1
MUSC124F	Mapping Culture (FYS)	1
MUSC125F	Music and Downtown New York, 1950-1970 (FYS)	1
MUSC126F	Poetry and Song (FYS)	1
MUSC128F	Music and the Moving Image: From Music Video to Film to Digital Media (FYS)	1
MUSC130F	Wagner and Wagnerism: Richard Wagner's Music and Influence from the 1840s to the Present (FYS)	1
MUSC131F	Gender and Sexuality in Hip Hop (FYS)	1
MUSC133F	Caribbean Connection: Music and Culture of Trinidad and Tobago Music (FYS)	1
Music Theory and Composition		
MUSC103	Materials and Design	1
MUSC104	Rhythms of the World: An Introduction to Rhythm, Meter, and (Musical) Time	1
MUSC105	MF DOOM and Pierre Henry	1
MUSC201	Tonal Harmony	1
MUSC202	Theory and Analysis	1
MUSC203	Chromatic Harmony	1
MUSC204	20th Century Compositional Techniques	1
MUSC205	Song: Music and Text	1
MUSC206	18th-Century Counterpoint	1
MUSC207	Orchestration	1

MUSC208	Post-Tonal Music Theory	1
MUSC210	Theory of Jazz Improvisation	1
MUSC212	South Indian Music: Solkattu	1
MUSC220	Composing, Performing, and Listening to Experimental Music	1
MUSC221	Live-Electronics for Composition, Improvisation, and Sound Art	1
MUSC222	Sound Art, Music, and Interactive Media	1
MUSC223	Music, Recording, and Sound Design	1
MUSC225	Sound Systems and Chamber Electronics	1
MUSC230	Music Theater Workshop (cross list)	1
MUSC240	Visual Sounds: Exploring the Landscape and Architecture of Musical Notation	1
MUSC308	Composition in the Arts	1
Music History and Culture		
MUSC102	World Music	1
MUSC106	A Thousand Years of Music History	1
MUSC108	History of Rock and R&B	1
MUSC109	Introduction to Experimental Music	1
MUSC110	Introduction to South Indian Music	1
MUSC111	Music and Theater of Indonesia	1
MUSC115	Introduction to North Indian Music	1
MUSC116	Visual Sounds: Exploring the Landscape and Architecture of Musical Notation	1
MUSC117	Musicking Body	1
MUSC121	Queering Russian Music	1
MUSC125	Music and Downtown New York, 1950-1970	1
MUSC127	C-Pop in the Shadow of a Rising China	1
MUSC129	The Art of Listening	1
MUSC241	Mystical Visions, Medieval Women, and the Performance of Early Music (cross list)	1
MUSC242	Baroque and Classical Music	1
MUSC243	Music of the 19th Century	1
MUSC244	Music of the 20th Century	1
MUSC245	Music in the United States in the Nineteenth Century	1
MUSC246	The Symphony: Evolution of Genre	1
MUSC248	Music in Outer Space	1
MUSC249	Calderwood Seminar in Public Writing: Music Journalism and Public Musicology	1
MUSC250	Film and Folk Music of India	1
MUSC261	Music and Modernity in China, Japan, and Korea	1
MUSC265	African Presences I: Music in Africa	1
MUSC269	Sacred and Secular African American Musics	1
MUSC272	History of Jazz in American Culture	1
MUSC273	BlaQueer Sounds: Queer Negotiations in African American Music	1
MUSC274	Hymnody in the United States Before the Civil War	1
MUSC275	Music and Downtown New York	1
MUSC277	Jazz Avant-Gardes	1
MUSC278	Survey of Jazz Styles	1
MUSC285	Global Hip Hop of the Non-Anglophone World (CLAC .50)	0.5
MUSC290	Research Skills in Ethnomusicology--IRL & Digital	1
MUSC291	The Gendering of Music in Cross-Cultural Perspective	1
MUSC293	Mapping Culture	1
MUSC294	Queer Opera	1
MUSC295	Global Hip-Hop	1
MUSC296	Soundscapes of Islam	1
MUSC297	Music of Central Asia: From Throat-singing to Heavy Metal	1
Music Major Seminars		
MUSC300	Seminar for Music Majors	1
MUSC304	Arranging and Composing for Jazz Orchestra	1
MUSC308	Composition in the Arts	1
Music Performance		
MUSC405	Private Music Lessons for Nonmusic Majors	1
MUSC406	Private Music Lessons for Declared Music Majors	1
MUSC413	Korean Drumming and Creative Music Ensemble	1
MUSC414	Korean Drumming and Creative Music Ensemble Advanced	1
MUSC416	Beginning Taiko--Japanese Drumming Ensemble	1
MUSC418	Taiko II: Japanese Drumming Ensemble	1
MUSC428	Chinese Music Ensemble	1
MUSC429	Voice Technique & Improvisation	1
MUSC430	South Indian Voice--Beginning	1
MUSC431	South Indian Voice--Intermediate	1
MUSC432	South Indian Voice--Advanced	1
MUSC433	South Indian Music--Percussion	1
MUSC434	Improvisational Techniques in South Indian Music	1
MUSC435	Keyboard Techniques for Composers and Conductors	1
MUSC436	Wesleyan Concert Choir	1
MUSC437	Singing to Your Instruments	1
MUSC438	Wesleyan University Collegium Musicum (cross list)	1
MUSC439	Wesleyan University Orchestra	1
MUSC440	Instrumental Conducting	1
MUSC441	Piping Performance: An Exploration of Artistic Expression through the Pipe Organ	1
MUSC442	Chamber Music Ensemble	1
MUSC443	Wesleyan Wind Ensemble (WesWinds)	1
MUSC444	African Popular Music Performance	1
MUSC445	West African Music and Culture: Beginners	1
MUSC446	West African Music and Culture--Intermediate	1
MUSC447	West African Music and Culture--Advanced	1
MUSC448	Ebony Singers: Gospel Music	0.5
MUSC450	Steelband	1
MUSC451	Javanese Gamelan--Beginners	1
MUSC452	Javanese Gamelan--Advanced	1
MUSC453	Keyboard Techniques II: Conducting and Score Reading	1

MUSC455	Jazz Ensemble	1
MUSC456	Jazz Improvisation Performance	1
MUSC457	Jazz Orchestra I	1
MUSC458	Jazz Orchestra II	1
MUSC459	Methods of Improvisation Ensemble	1
MUSC461	Sound Systems: The How of Hearing	1
MUSC463	Teaching Music Lessons to Children in Local Schools	1
MUSC464	Laptop Ensemble	1
Graduate Courses		
MUSC500	Graduate Pedagogy	0.5
MUSC505	Topics in Applied Ethnomusicology/Public Musicology	1
MUSC506	Reading Ethnomusicology	1
MUSC507	Practicing Ethnomusicology	1
MUSC508	Graduate Seminar in Composition	1
MUSC509	Special Topics in Contemporary Music	1
MUSC510	Graduate Proseminar in World Music Studies	1
MUSC513	Improvisation in Cross-Cultural Perspective	1
MUSC515	Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture	1
MUSC517	Sex/Gender/Queerness in Music and Music Scholarship	1
MUSC518	Music and Embodiment	1
MUSC519	Current Issues in Ethnomusicology	1
MUSC520	Explorations in Musicology	1
MUSC521	Seminar in Interdisciplinary Studies	1
MUSC522	Seminar in Comparative Music Theory	1
MUSC530	Department of Music Colloquium	0.25

HONORS

The senior project requirement may be satisfied by the completion of an honors project, a project that may encompass a composition, a concert, etc., but the honors project always contains a substantial written component; for this reason it is called the honors thesis. An honors thesis satisfies the departmental requirement for a senior project, even if it is not awarded honors. The honors thesis tutorial is always a two-semester undertaking.

CAPSTONE EXPERIENCE

All music majors are required to complete a senior project by the end of their final year. The purpose of the project is to give focus to the major by means of independent, creative work and to encourage independent study with the close advice and support of a faculty member. Students who choose to undertake an honors thesis may count this as their senior project.

NEUROSCIENCE AND BEHAVIOR MAJOR

MAJOR DESCRIPTION

The Program in Neuroscience and Behavior (NS&B) opens avenues for students to explore the role of the brain in expressing behavior in animals including humans. Students who major in NS&B learn the details of how the nervous system works and how it functions with other biological and psychological systems. New technologies in contemporary neuroscience have helped to bring about many important discoveries, with more on the horizon. Wesleyan neuroscience students learn in an interdisciplinary environment that includes coursework in biology, psychology, and chemistry. Students often expand their learning to include topics such as statistics, computer programming, design, and philosophy of science. Lab-based methods courses and hands-on research in state-of-the-art laboratories give students a rich educational experience that provides a foundation for various career options that include medicine, basic and applied research in the public or private sector, and scientific writing or reporting.

Students who pursue the NS&B major bring a strong curiosity about the intricate workings of the brain and nervous system. They strive to integrate knowledge and research from relevant areas of science to understand behavior. They develop analytical, detail-oriented problem-solving expertise and they learn how to stay current with the latest advancements in neuroscience.

ADMISSION TO THE MAJOR

One or more of the foundation courses in biology (BIOL181, BIOL182) are prerequisites for the advanced **NS&B** courses offered by the Biology Department. Although not legislated as prerequisites, NS&B213 and **NS&B** laboratory courses provide important conceptual and practical background for independent research in the junior and senior years.

A recommended course sequence for students with a strong background in science would include BIOL181 and BIOL182 (and associated labs) along with introductory chemistry in the first year. Other students may wish to take the Introductory Chemistry Sequence in the first year prior to the Introductory Biology sequence. In the sophomore year, one would take NS&B213. The other required courses and research tutorials would be spread out over the last two years. For information on the pathway through the major, please visit wesleyan.edu/nsb/pathways.html (http://www.wesleyan.edu/nsb/pathways.html) for further information.

To be admitted to the major during March of the sophomore year, a student must have completed, with grades of C- or better, at least two of the full-credit courses listed in foundation and core courses that follow. At least one of these credits must be either NS&B213 or BIOL181.

MAJOR REQUIREMENTS

FOUNDATION COURSES

Code	Title	Hours
BIOL181	Principles of Biology I: Cell Biology and Molecular Basis of Heredity	1
BIOL191	Principles of Biology I--Laboratory	.5
BIOL182	Principles of Biology II	1
BIOL192	Principles of Biology II: Laboratory	0.5
CHEM141 & CHEM142	General Chemistry I and General Chemistry II	2
or CHEM143 & CHEM144	Honors General Chemistry I and Honors General Chemistry II	
CHEM251 & CHEM252	Organic Chemistry I and Organic Chemistry II	2
Two additional courses from the following (beginning with the graduating class of 2016):		
PSYC105	Foundations of Contemporary Psychology	1
PHYS111	Introductory Physics I	1
or PHYS112	Introductory Physics II	
or PHYS113	General Physics I	
MATH117	Introductory Calculus (or higher)	1
COMP112	Introduction to Programming (or higher)	1

Core Course

Code	Title	Hours
NS&B213	Behavioral Neurobiology	1

ADVANCED COURSES

Five advanced courses from the following list are required for students; two must be cross-listed with biology; two cross-listed with psychology; and one, a research tutorial or methodological course. Some courses appear in both Biology and Psychology lists but may be counted only once, in either category.

Cross-listed with Biology

Code	Title	Hours
NS&B224	Hormones, Brain, and Behavior	1
NS&B239	Functional Anatomy of the Human Brain	1
NS&B244	Neuropharmacology	1
NS&B245	Cellular Neurophysiology	1
NS&B251	Laboratory in Basic Practices in Neuroscience	1
NS&B252	Cell Biology of the Neuron	1
NS&B254	Comparative Animal Behavior	1
NS&B299	Waves, Brains, and Music	1
NS&B302	Neurobiology of Aging	1
NS&B302Z	Neurobiology of Aging	1
NS&B303	Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function	1
NS&B304	Glia: Not just neuronal glue!	1
NS&B317	Neuroethics	1
NS&B320	Neuroscience of Learning and Memory	1
NS&B323	Biochemistry of Neurodegenerative Disease	1
NS&B325	Stem Cells: Basic Biology to Clinical Application	1
NS&B328	Chemical Senses	1
NS&B343	Muscle and Nerve Development	1
NS&B344	Developmental Biology of the Nervous System	1
NS&B345	Developmental Neurobiology	1
NS&B347	Mammalian Cortical Circuits	1
NS&B351	Neurobiology of Learning and Memory	1
NS&B353	Neurobiology of Neurological Disorders	1
NS&B357	Sex and Gender: From Synapse to Society	1
NS&B356	Neurodevelopmental Disorders	1
NS&B358	Neurobiology of Movement	1
NS&B360	Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits	1
NS&B373	Exploring the Brain-Body Interface: The Neuroscience of Basic Survival	1

Cross-listed with Psychology

Code	Title	Hours
NS&B220	Cognitive Psychology	1
NS&B222	Sensation and Perception	1
NS&B225	Cognitive Neuroscience	1
NS&B227	Motivation and Reward	1
NS&B228	Clinical Neuropsychology	1
NS&B238	Psychological Theories of Learning and Motivation	1
NS&B239	Functional Anatomy of the Human Brain	1
NS&B302	Neurobiology of Aging	1
NS&B316	Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives	1
NS&B317	Neuroethics	1
NS&B320	Neuroscience of Learning and Memory	1
PSYC322	Psychology of Decision-Making	1
NS&B329	Neural Costs of War	1
PSYC332	Seminar in Cognitive Neuroscience	1
NS&B335	Behavior Genetics	1
NS&B341	Psychology of Human Memory	1
NS&B348	Topics in Cognitive Development	1
PSYC351	Your Brain on Drugs: The Neuroscience Behind Drugs of Abuse and Addiction	1
NS&B353	Neurobiology of Neurological Disorders	1
NS&B356	Neurodevelopmental Disorders	1
NS&B358	Neurobiology of Movement	1

Research Methods and Practica

Code	Title	Hours
MATH132	Elementary Statistics	1
PSYC200	Statistics: An Activity-Based Approach	1
NS&B210	Research Methods in Cognition	1
NS&B215		1
BIOL242	Quantitative Methods for the Biological and Environmental Sciences	1
NS&B243	Neurohistology	1
BIOL247	Laboratory in Neurophysiology	1

NS&B250	Laboratory in Cellular and Behavioral Neurobiology	1
BIOL251	Laboratory in Basic Practices in Neuroscience	1
NS&B280	Applied Data Analysis	1
PSYC378	Advanced Research in Cognitive Neuroscience	1
PSYC382	Advanced Research in Decision Making	1
NS&B383	Advanced Research in Learning and Memory	1
NS&B390	Experimental Investigations into Reading	1
NS&B392	Behavioral Methods in Affective Neuroscience	1
NS&B399		1.25
The following are taken for two semesters, both in the lab of the same faculty member:		
NS&B409 & NS&B410	Senior Thesis Tutorial and Senior Thesis Tutorial (two semesters, both in the lab of the same faculty member)	1
or NS&B423 & NS&B424	Advanced Research Seminar, Undergraduate and Advanced Research Seminar, Undergraduate	

Note: MATH132 can be taken to meet requirements for either the methodological or foundation major requirements, but not both. Methodological courses cannot be credited toward the requirements of advanced courses cross-listed with biology or psychology. *Courses listed in both categories A. or B. can be counted only in A. or B. but not both.

Courses of relevance outside the program. Though not requirements of the major, students should be aware that courses in organic chemistry and molecular biology, as well as courses in non-neuroscience areas of biology and psychology, complement the **NS&B** major and should be considered, in consultation with your advisor, when planning your program of study.

SUBSTITUTING OUTSIDE COURSES FOR CREDIT TO THE MAJOR

Foundation courses: A student who has taken foundation courses outside of Wesleyan may be able to apply them to the major. As a general rule, courses acceptable to the biology, chemistry, and physics departments for university credit are acceptable to the NS&B program for substitution for foundation courses.

Advanced courses: Advanced courses, inside or outside of the University, might be acceptable as substitutes for the advanced courses of the NS&B major. In general, only one such course can be substituted, and approval must be obtained in advance from the program director.

UNDERGRADUATE RESEARCH

NS&B majors are encouraged to become involved in the research of the faculty. Research tutorials and senior thesis tutorials are taken with mode of grading and amount of credit to be arranged with the research supervisor. Research tutorials are numbered NS&B411/NS&B412, NS&B409/NS&B410, and NS&B423/NS&B424. These courses can fulfill the research methods requirement or can receive graduation credit. For the most up-to-date information on NS&B faculty research, please visit our department website (http://www.wesleyan.edu/nsb).

STUDENT LEARNING GOALS

Our program offers a curriculum that encourages fluency across multiple disciplines in the field of neuroscience and behavior. Immersion in this field requires thinking across multiple levels of analysis and an appreciation for how complex and broad questions can be made amenable to scientific inquiry. In terms of goals, we have three areas of knowledge that we expect all students to acquire by the time they have completed the NS&B major:

- **Structure:** The parts and how they connect. Structural knowledge includes neural development, neuroanatomy, neurotransmitters, and the cell and molecular biology of the neuron.
- **Function:** How the parts come together to produce systems. Such systems include various sensory, motor, and neuroendocrine systems. Knowledge concerning function is gained by studies of structures and studies of perception, learning and memory, behavior, and cognition.
- **Theory:** Governing principles that can be proposed from all the above. Examples of theories include those that address the relationships between brain and behavior, articulate how brain structure and function changes over time, and explain cognitive and perceptual processes.

In addition, it is our goal that all students can skillfully apply and analyze knowledge gained from their studies. Statistics courses, lab-based methods courses, and/or direct experience in research projects serve this goal.

ADVANCED PLACEMENT

AP credit may be used to place out of any of the foundation courses, subject to the guidelines of the department hosting these courses.

PRIZES

George H. Acheson and Grass Foundation Prize in Neuroscience: Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

BA/MA PROGRAM

This program provides an attractive option for science majors to enrich their course and research background. Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience. For more information, please visit https://catalog.wesleyan.edu/departments/nsb/grad-nsb/ as well as the Graduate Studies page: http://wesleyan.edu/grad/degree-programs/bama.html (http://www.wesleyan.edu/grad/degree-programs/bama.html).

ADDITIONAL INFORMATION

- **Teaching apprenticeships.** Students may be appointed teaching apprentices with the approval of the participating faculty member and the Office of Academic Affairs. The apprenticeship position involves assisting a faculty member in the teaching of a course. Concurrently, the apprentice enrolls in an apprenticeship tutorial (NS&B491/NS&B492) that is usually a one-credit course and operates in either the graded or credit/no credit mode.
- **Petitioning for exemptions.** A student may request a variance from the requirements of the major or for honors by submitting a written petition to the chair of the program. The petition should indicate why the requirement cannot be met and the educational justification for the alternative. The

petition will be considered by the NS&B faculty, and the student will receive a statement of the decision by letter.

- **Seminars.** The program periodically invites neuroscientists from outside Wesleyan to come here and describe their research. These seminars frequently complement course material and give students the opportunity to interact with noted researchers. The talks are usually scheduled for noon on Wednesdays. Students are encouraged to attend.

HONORS

To be considered for honors, a student must be an NS&B major and have a B average (grade average 85) in the courses credited to the major. The student must submit a laboratory research thesis that was supervised by a member of the NS&B faculty and be recommended for honors by the NS&B faculty.

PHILOSOPHY MAJOR

MAJOR DESCRIPTION

The Major in Philosophy provides students with a solid grounding in historical knowledge and skillful reasoning as they explore perennial human questions about the nature of reality, truth, knowledge, values, reason, ethics, beliefs, and the individual's place in relation to society.

Wesleyan's philosophy curriculum is organized into three broad categories: history, value, and mind and reality. Historical courses focus primarily on classical philosophical texts. Courses in the value area engage with ethical, political, and cultural practices. Mind and reality courses consider philosophical questions about language, reasoning, and the nature of reality.

The philosophy major at Wesleyan offers two tracks: general philosophy and social justice. The general philosophy track encourages students to explore issues and approaches from various historical periods and cultural traditions. The social justice track emphasizes philosophers' roles as theorists and as agents of social and political change.

Intellectually curious students who consider themselves open-minded, cerebral, and analytical, with a strong passion for discourse and debate, may gain great satisfaction from the study of philosophy.

The philosophy major's emphasis on critical thinking, problem-solving, and effective communication prepares graduates for a wide range of professions, including writing, law, education, business and management, research, and academia.

ADMISSION TO THE MAJOR

Because philosophy encompasses subjects in other disciplines, such as economics, government, mathematics, physics, psychology, and religion, students considering philosophy as a major are strongly advised to choose a balanced combination of solid liberal arts courses consistent with Wesleyan's General Education Expectations.

Prospective majors should pay particular attention to the prerequisites for intermediate and advanced courses when planning their schedules. Among other courses, PHIL201, PHIL202, PHIL205, PHIL212 , and PHIL231 are required or recommended for various subsequent courses.

Students who intend to apply for the social justice track will work with an advisor to submit a concentration proposal by the end of drop/add during their fifth semester.

MAJOR REQUIREMENTS

To complete the philosophy major's required coursework, both the general philosophy track and social justice track require at least ten courses, including eight PHIL courses.

General Philosophy Track

The general philosophy track encourages students to explore a range of issues and approaches from various historical periods and cultural traditions.

Courses must include:

- One History course
- One Value course
- One Mind & Reality course
- Two Advanced seminars taken as juniors/seniors
- Five electives, including up to two non-PHIL
- Optional Thesis Project

Of the ten courses counted toward the general major track, at least eight must be offered by the Department of Philosophy; as many as two may be given in other programs (e.g., College of Letters, Religion) that are relevant to the student's plan of study in philosophy and are approved by the philosophy faculty.

Social Justice Track

The social justice track emphasizes philosophers' roles not only as theorists but also as agents of social and political change. Philosophical methods of conceptual and contextual analyses and careful argumentation provide important tools for grappling with real-world injustices. The social justice track supports students in tailoring their philosophical understanding and skills around a particular concern in an area of social justice, such as human rights, equality, social responsibility, environmental justice, etc.

Courses must include:

- One History or One Mind & Reality course
- Five-course concentration, including two non-PHIL
- Two advanced seminars taken as juniors/seniors

- Two electives from PHIL
- Optional Thesis Project

At the core of the social justice major track is a social justice concentration that brings together a student's specific interests in social justice. Majors will submit proposals for acceptance to the track that will include three philosophy courses and two non-philosophy courses that fit together in a coherent concentration.

Below are two sample concentrations:

Sample Concentration 1: Human Rights in China
PHIL272
Human Rights Across Cultures
PHIL278
Political Philosophy
CEAS271
Political Economy of Developing Countries
CEAS297
Chinese Politics
PHIL263
Modern Chinese Philosophy

Sample Concentration 2: Challenging The Carceral State
PHIL214
Reasoning About Justice
PHIL368
The Ethics of Captivity
ANTH302
Critical Perspectives on the State
PHIL211
Critical Philosophy of Race
GOVT159
The Moral Basis of Politics

COURSE LIST

The introductory philosophy courses (200-249) are intended for both prospective majors and non-majors. (General-Education-only courses, with course numbers below 200, do not count toward the major.)

Intermediate courses (250-300) are generally not appropriate for first-year students, and some have explicit prerequisites. Intermediate-level classes tend to introduce students to a particular area of philosophy or to the discipline's historical development at a higher level and in more depth than introductory classes.

Advanced courses (301-399) are typically organized as seminars for majors and other students with significant related preparation. Students often participate in exploring an area of particular relevance to a professor's research program. Advanced classes may focus on a particular figure in the history of philosophy or on a topic of contemporary importance.

COURSES FOR NON-MAJORS

Courses numbered below **250** are designed to be appropriate as first courses in philosophy. In addition, many of our courses numbered **250** and above are of interest to majors in related departments. (For example, students majoring in neuroscience or psychology often take PHIL286.)

STUDENT LEARNING GOALS

The Major in Philosophy equips students with the following knowledge and skills:

- Open-minded learning and constructive, critical engagement with the ideas and values of others.
- Close reading to follow and evaluate paths of reasoning
- Recognizing alternative ways of framing and addressing a problem
- Knowledge and appreciation of multiple philosophical approaches, thinkers, traditions, and themes
- Appreciation of historical and cultural differences
- Recognizing connections across the philosophy curriculum and beyond
- Understanding how philosophical inquiry both relates to and challenges their own perspectives and priorities

Graduates will be well prepared for success in a wide range of careers and life paths, including but certainly not limited to graduate work in philosophy.

LANGUAGE REQUIREMENT

Knowledge of foreign languages is particularly useful for the study of philosophy and indispensable for serious study of the history of philosophy. It is therefore strongly recommended that students achieve reading fluency in at least one foreign language.

PRIZES

The Department of Philosophy annually awards the Wise Prize for the best paper written in philosophy in the current year. This prize is usually awarded to a senior thesis written in philosophy, but it is not restricted to philosophy theses.

TRANSFER CREDIT

Students who entered Wesleyan as first-year students may count up to two courses taken outside Wesleyan toward the 10 required to fulfill the major. These should be pre-approved by the student's advisor. Under special circumstances, such as a full year spent studying philosophy at a British university, it is possible to count more external credits toward the major. Students transferring into Wesleyan should review their academic histories with their departmental advisor as soon as possible to determine which will be counted toward the major requirements.

ADDITIONAL INFORMATION

Philosophy colloquia.

Every year the department arranges a series of public presentations of papers by visiting philosophers or Wesleyan faculty or students.

Majors Committee and Philosophy Club.

The department encourages its majors to attend departmental talks and social events. Students are also encouraged to organize student-led events and discussions.

HONORS

To qualify for departmental honors in philosophy, a student must achieve an honors level of performance in courses in the department, must declare the intention to work for departmental honors at the beginning of the senior year, must register for senior thesis tutorials in each semester of the senior year, and must write a thesis at an honors level. Theses must be submitted in accordance with Honors College procedures and will be judged by a committee made up of members of the department.

PHYSICS MAJOR

MAJOR DESCRIPTION

The Major in Physics equips students with an understanding of the fundamental laws that shape the universe and develops the skills needed to succeed in a technology driven society. Students develop competency in the main subject areas of quantum theory, electromagnetism and optics, thermodynamics and statistical mechanics, classical dynamics, and condensed matter physics. Preparation in mathematical and computational methods is an integral part of the program. Students are encouraged to consider faculty-mentored research, working collaboratively with other undergraduate and graduate students. Additionally, opportunities are available to work as a teaching assistant and to pursue advanced coursework in graduate courses.

The model Physics student is insatiably curious about the workings of the universe and has a healthy intellectual humility that enables them to learn through investigation. Students conduct experiments with precision, analyze the results, critically grasp deeper concepts, and communicate complex theories and real-world applications. Physics students are encouraged to cultivate an analytical mindset, strong quantitative aptitude, and the ability to understand complex mathematical models with the ultimate goal of expanding the boundaries of human knowledge through meaningful discovery. In addition, students should develop their communication skills for both technical and lay audiences.

Armed with problem-solving skills and a deep understanding of physics principles, Physics graduates have a wide range of career options in various industries. Example career paths include research and development, engineering, data analytics, computational science, education, finance and banking, medical physics, geophysics, and environmental science.

ADMISSION TO THE MAJOR

The appropriate course for each student depends primarily on their level of preparation and previous coursework. Prospective majors should consult with a member of the Physics faculty to determine their most suitable course of study. There are four common paths into the Physics major.

1. PHYS113 : A calculus-based introductory mechanics course requiring one semester of calculus, taken in either secondary school or in college, at or about the level of MATH121. A student who has had no calculus may take calculus during the first year, then PHYS113 in the first semester of the sophomore year, or they may take PHYS113 simultaneously with their first calculus course.
2. PHYS215/PHYS219: A vailable to first-year or other students who have had both integral and differential calculus at about the level of MATH121/MATH122 and a solid course in mechanics with calculus at the level of PHYS113.
3. PHYS116: Students from both of the above gateways merge into the electricity and magnetism course, PHYS116, in the spring. Students intending to major in physics should complete either track no later than the end of their sophomore year, preferably by the end of their first year. The PHYS113/PHYS116 sequence has associated laboratory courses, PHYS123 in the fall and PHYS124 in the spring. These sections are half-credit courses associated with the lecture courses. The laboratory course PHYS124 is required to enter the major.
4. PHYS213 : Exceptionally well-prepared students who have already mastered the material of PHYS113/PHYS116 should consult with a member of the Physics faculty to pursue this gateway to the major.

MAJOR REQUIREMENTS

The sequence of gateway courses describes the foundation for the core major courses.

By the end of sophomore year, students should complete the following courses:

PHYS113; PHYS116; MATH121; MATH122; MATH221; and MATH222. Students considering graduate work in physics should also complete PHYS213 and PHYS214 by the end of sophomore year.

Note: Completion of PHYS116 in your first year will add flexibility to planning for your major coursework.

Some advanced courses may not be offered every year, and you should plan accordingly.

To fulfill the major in physics, a student must complete eight lecture courses and two laboratory courses.

The lecture course requirements include four core physics courses which must be taken graded (A-F): PHYS213; PHYS214; PHYS316; and PHYS324. In addition, four elective lecture credits at the 200, 300, or 500 level are required. At least one of the elective courses must be a PHYS lecture course at the 300 level, usually PHYS313 or PHYS315.

The two required laboratory courses can be chosen from PHYS342, PHYS345, PHYS340, or a 1-credit research tutorial with a Physics faculty member. One of

the two laboratory courses must be an advanced experimental laboratory class, currently PHYS342 or PHYS345 , or an experimentally focused research tutorial.

Students planning graduate study in physics are advised to take a minimum of 14 credits at the 200 level or higher in physics, mathematics, and computer science. PHYS313, PHYS315, and PHYS358 are essential. The department strongly recommends PHYS565, MATH226, and MATH229. Graduate physics courses may be selected with permission, and experience in computer programming is extremely valuable.

Students not planning graduate study in physics and who are interested in applying their knowledge of physics to other areas of the curriculum may substitute up to two upper-level lecture courses from other departments. This must be done in consultation with the Physics Major advisor, and the selections must constitute a coherent, coordinated program of study. Substitution of more than two courses requires approval from the department. Preapproved tracks that may include electives from outside Physics are available here (https://www.wesleyan.edu/physics/tracksportal.html).

PHYSICS MAJOR REQUIREMENTS

COURSE CODE	COURSE TITLE
Gateway courses: The necessary foundation for the physics major.	
PHYS113	General Physics I
PHYS116 and PHYS124	General Physics II and General Physics Laboratory II
MATH221 or MATH223	Vectors and Matrices or Linear Algebra
MATH222	Multivariable Calculus
Core Courses: Four required courses which must be taken graded (A-F)	
PHYS213	Waves and Oscillations
PHYS214 (prerequisite MATH221 or MATH223. Math requirement can be taken concurrently)	Quantum Mechanics I
PHYS324 (prerequisite PHYS124 and MATH222)	Electricity and Magnetism
PHYS316	Thermal and Statistical Physics
Electives: Four credits from the following list of lecture courses.* **One of the four needs to be a 300-level physics course.**	
PHYS207	Introduction to Biophysics
PHYS215 (half credit)	Special Relativity
PHYS217	Nonlinear Dynamics and Chaos
PHYS219 (half credit)	Introduction to Contemporary Physics
PHYS313	Classical Dynamics
PHYS315	Quantum Mechanics II
PHYS358 (Pre-requisite PHYS315)	Condensed Matter Physics
Laboratory Courses:** Two laboratory courses	
PHYS342 (half credit)	Experimental Optics
PHYS345 (half credit)	Electronics Lab
PHYS340 (half credit)	Computational Physics
PHYS423/PHYS424 (1 credit)	Research Seminar, Undergraduate

* It is possible for elective credits to be substituted by upper-level lecture courses in other departments. This must be done in consultation with the physics major advisor, and the selections must constitute a coherent, coordinated program of study. Preapproved tracks that satisfy the elective lecture course requirement are available.
** One of the laboratory courses must be an advanced experimental lab, currently either PHYS342 orPHYS345.

COURSES FOR NON-MAJORS

The Physics department offers two two-semester survey courses covering many of the main subject areas of physics (mechanics, electromagnetism and optics, thermodynamics, and kinetic theory):

- PHYS111/PHYS112 uses less calculus and is often the choice for students studying physics for life science applications.
- PHYS113/PHYS116 uses more calculus and is the foundation for future work in physics, engineering, and related fields.

Associated laboratory courses, PHYS121/PHYS122/PHYS123/PHYS124, are also offered. Either of these two-semester course sequences (with the lab) typically satisfy the Physics requirement for admission to most schools of medicine, dentistry, or architecture. However, some graduate-level programs require a calculus-based series. It is recommended that students confirm the specific requirements with their prospective schools.

GENERAL EDUCATION

There are no General Education requirements imposed by the Physics Department for either the Physics major or honors in Physics. However, students should be aware that several forms of university honors do require completion of stage 2 general education expectations.

STUDENT LEARNING GOALS

Physics majors acquire the following knowledge and competencies:

- Application of precision and predictive mathematics to expand the description of natural phenomena
- Observation of physical phenomena through experimentation and research
- Determining the relevant parameters to quantify a complex system
- Open-ended problem-solving skills
- Quantum theory
- Electromagnetism and optics
- Thermodynamics

- Statistical mechanics
- Classical dynamics
- Condensed-matter physics
- Mathematical and computational methods

Students will demonstrate their knowledge and abilities through research projects, critical analysis papers, participation in class discussions and collaborative group work, and multi-media presentations. Written exams, peer review, and self-assessment will also evaluate their class performance.

STUDY ABROAD

Study abroad provides Physics majors an opportunity to gain appreciation of their potential as citizens of the world scientific community. Careful planning in consultation with a Physics advisor is recommended to determine the optimum semester for a study abroad experience, and to ensure that requirements for the major can be fulfilled.

ADVANCED PLACEMENT

Students may receive a maximum of two AP Physics credits if they have obtained a score of 5 on the AP Physics C, Mechanics exam, or the AP Physics C, Electricity and Magnetism exam. Special regulations apply to other Physics credits. Please check with the registrar or a departmental advisor.

PRIZES

Bertman Prize - Awarded to a senior majoring in physics who emulates the qualities that made Bud Bertman a valuable friend and respected colleague, e.g., physical insight and intuition, enthusiasm, resourcefulness, perseverance, and eagerness to help others.

Van Dyke Prize - Awarded to students majoring in physical science who show outstanding academic achievement and a promise of productivity in a professional career.

Outstanding Contribution to Science Education Award - Awarded to a senior who has demonstrated exceptional skills as an undergraduate course assistant.

Johnston Prize - In recognition of those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

TRANSFER CREDIT

Up to two registrar-approved outside credits for physics courses may be applied toward the Physics major from another institution. Prior permission must be obtained from both your Physics advisor and the departmental liaison, Professor Brian Stewart (bstewart@wesleyan.edu), to ensure the creditability of the specific courses.

RELATED PROGRAMS OR CERTIFICATES

Dual-degree programs in science and engineering.

Wesleyan maintains dual-degree programs with Columbia University, the California Institute of Technology, and Dartmouth College for students wishing to combine the study of engineering with a broad background in the liberal arts. For all options, participating students receive two degrees: a BA from Wesleyan and a BS or BE in engineering from our partner school.

- The “3-2 program”: Students spend their first three years at Wesleyan, followed by two years at the engineering school. At the end of the fifth year —after completing all degree requirements from both schools—students receive the two bachelor’s degrees. During the first three years, prospective 3-2 students complete the minimal requirements of their elected Wesleyan major and, in addition, fulfill science and mathematics requirements for the first two years of the engineering school and engineering major of their choice. During the two years at the engineering school, students follow the regular third- and fourth-year curriculum in their selected engineering field. During that time, other courses may also be taken to satisfy the degree requirements of Wesleyan and/or the engineering school.
- The “4-2 option,” offered by Columbia University. Students complete four years at Wesleyan before pursuing an engineering degree.
- The “2-1-1-1” option is offered by Dartmouth University. Students spend their junior year at Dartmouth, returning to Wesleyan for their senior year and graduation. A fifth year is at Dartmouth required to finish their engineering degree.

Contact the dual-degree advisor for further information and consult with your class dean to ensure that you can meet all Wesleyan University requirements for graduation.

ADDITIONAL INFORMATION

The Physics department encourages students to become creators of physics knowledge through faculty-mentored research or by arranging independent research tutorials. Research can be experimental or theoretical and may culminate in a senior honors thesis or a peer-reviewed publication. Students planning to write a senior thesis should begin research no later than their junior year and continue through the summer into their senior year. Faculty research expertise includes quantum computing, soft condensed matter physics, computational materials science, charge transport in photovoltaic devices, fluid dynamics, laser plasmas, spectroscopy, collision studies of excited atoms and molecules, wave transport, and photonics. Many students also utilize Wesleyan’s shared high-performance computing facilities for their research.

Opportunities are also available to serve as a teaching apprentice or course assistant, which many students find to be a stimulating way to improve their understanding of physics fundamentals. Serving as a course assistant is also an excellent opportunity to develop communication skills and learn the art of teaching.

The Cady Lounge provides a community space where students can study, discuss physics, and connect with peers. Additionally, there is a study area in the science

library (the “STEM zone”) where students in introductory courses can get help and collaborate.

Colloquia: This seminar series features distinguished scientists from other institutions who present lectures on their research findings. Seminars are usually held on Thursdays at noon in Exley 058 and are open to all members of the university community. Students may enroll in the colloquium course for credit.

Topical Seminars: The department hosts weekly seminars highlighting cutting-edge research in various areas, including condensed matter physics and atomic and molecular physics. These seminars include student-led research presentations, discussions of recent research literature, and advanced topics selected collaboratively by faculty and students.

Society of Physics Students (SPS): SPS is a national association of undergraduates interested in sharing their physics experiences. Wesleyan’s SPS chapter meets to support each other in the scientific community, plan department activities, and pursue community outreach. The chapter mentor is Professor George Paily (gpaily@wesleyan.edu).

BA/MA PROGRAM

This is a curricular option for those students who, along with their research mentor, desire an intensive research experience that an additional year of study can afford. During the additional year, the student will complete additional coursework and write an MA thesis based on original research. Interested students should consult their research mentor as early as possible.

HONORS

Honors candidates in Physics must submit a thesis describing the investigation of a project carried out by the candidate under the direction of a member of the Physics department. The candidate must also have attained a minimum average of B (85.0) for honors and B+ (88.3) for high honors in the eight lecture courses applied to the major (except those taken in the final semester of the senior year). Honors status is recommended by the faculty thesis readers and confirmed by the department.

CAPSTONE EXPERIENCE

The Physics department offers the following capstone experiences:

Two-semester senior thesis
Seminar in atomic and molecular physics (PHYS507/PHYS508)
Seminar in condensed matter physics (PHYS505/PHYS506)
Seminar in theoretical physics (PHYS509/PHYS510)

Physics Colloquium (PHYS521/PHYS522)

PSYCHOLOGY MAJOR

MAJOR DESCRIPTION

Psychology is the scientific study of behavior, mind, and brain. We seek to understand how people think and act, both as individuals and in groups. The department has 18 faculty providing expertise in six subareas of study: cognitive, cultural, developmental, social, psychopathology, and neuroscience. Features of the major include foundational courses, training in statistics and research methods, small advanced seminars, and opportunities to conduct original research.

ADMISSION TO THE MAJOR

Students wishing to declare a major in psychology should prepare as early as possible. Declaration must be done in the second semester during sophomore year. Thus, by the end of the first semester in the sophomore year, students should have completed all requirements for entry into the major.

At the time of application, a student must demonstrate that he or she (1) has taken two full-credit courses in the field of psychology at Wesleyan and received a B or higher in each course; (2) has completed the introductory psychology (or a replacement breadth course that allows an AP or IB credit in place of introductory psychology), research methods, and introductory statistics (these same courses may be used to fulfill the first requirement as well); and (3) has fulfilled the University’s stage I General Education Expectations.

MAJOR REQUIREMENTS

Ten full-credit psychology courses and General Education Expectations stages I and II are required for completion of the major. Nine of the 10 credits required for the major must be taken for a grade. Courses in introductory psychology and introductory statistics must be taken for a grade. Required elements of the major are introductory psychology (one credit), an introductory statistics course (one credit), research methods (one credit), one breadth course from each of three areas of psychology (three credits), a specialized course (one credit), and three additional elective credits that can come from any courses and tutorials associated with the major. All courses must be completed by the end of the senior year.

INTRODUCTORY PSYCHOLOGY

PSYC105, a lecture class that provides a broad overview of the field, is required for the major and should be taken in the first or second year. The course must be taken graded if used for the major. One can alternatively transfer a psychology AP or IB credit in place of this course (see the Advanced Placement section). Only one can be counted toward the major.

INTRODUCTORY STATISTICS

A psychological statistics course provides an introduction to data analysis in psychology. PSYC200, PSYC201, or PSYC280 is typically used to fulfill this requirement, but ECON300 and MATH132 are acceptable as well. The course must be taken graded if used for the major. A course in introductory statistics should be taken in the first or second year (some research methods courses require statistics as a prerequisite). Only one can be counted towards the major.

RESEARCH METHODS

A research methods course trains specific skills for evaluating and performing research. Research methods courses are numbered **PSYC202-219**. A 200-level course in research methods should be taken in the first or second year (some research methods require statistics as a prerequisite).

BREADTH REQUIREMENT

Students are expected to develop knowledge across the entire field of psychology. Toward this goal, students must choose a minimum of one course from each of the three columns below. These breadth courses (numbered **PSYC220-279**) can be taken throughout one's four years. When possible, a student should start with breadth courses of particular interest so that he or she can later do more advanced work in these areas. One course from each of the following areas: 1) cognitive/neuroscience; 2) developmental/clinical; 3) social/cultural. Please see our Psychology Majors Manual (https://www.wesleyan.edu/psyc/about/psyc_manual.pdf) for a list of courses by area.

SPECIALIZED

These courses (**PSYC311-399, excluding PSYC395**) aim to ensure that students study at least one subfield of psychology in depth. These courses have a variety of formats, including seminars (**PSYC311-369, excluding PSYC395**) and advanced research labs (**PSYC370-399**), and admission is typically by permission of instructor. A student must take at least one specialized course that deepens the knowledge she or he gained in a breadth course.

ELECTIVES

To reach the 10 course credits necessary for the major, one may count any other courses, tutorials, or teaching apprenticeships offered by the department or creditable to the major. Exceptions include: (A) only one introductory psychology course; (B) one introductory statistics course (PSYC200, QAC201/PSYC280, ECON300, or MATH132); (C) no more than two teaching apprenticeship tutorials; and (D) four tutorials (or six including senior thesis tutorials). The teaching apprenticeship can be repeated with the same course number. For electives, two half-credit courses may be used in place of one full-credit course. Some courses (cross-listed with psychology or hosted in other departments) can be used as electives for the major but fulfill no other requirements and cannot be used for admission to the major. See Department Majors Manual (http://www.wesleyan.edu/psyc/about/major_guides.html) for details.

COURSES FOR NON-MAJORS

PSYC105 is appropriate for non-majors.

GENERAL EDUCATION

Stage I General Education Expectations must be satisfied at the time of admission to the major (six different departments, please refer to WesMaps for Gen Ed Area Dept.). Fulfilling stage II General Education Expectations is required for completion of the major.

STUDENT LEARNING GOALS

The psychology department learning goals are organized by four objectives:

Objective 1: Knowledge Base in Psychology

- To understand and interpret basic theoretical perspectives, scientific principles, and empirical findings in three major content areas of psychology: (1) neuroscience and/or cognition, (2) psychopathology and/or developmental psychology, and (3) social and/or cultural psychology.
- To learn how to formulate research questions and conduct psychological studies.
- To obtain skills in statistical and data analysis techniques, quantitative and qualitative, and apply these techniques to psychological studies.

Objective 2: Scientific Inquiry and Critical Thinking

- To critically assess scientific methodologies in psychology, including:
  - understanding hypothesis formation;
  - applying standardized, reliable, and valid outcome measures;
  - applying sound data-analytic techniques; and
  - appreciating the importance of conducting research with samples that reflect the diversity of human experience, behavior, culture, and populations, including participants of color, women, LGBTQ+ people, individuals with disabilities, and other groups that have historically been underrepresented or marginalized in psychological research.
- Integrate knowledge and methodologies across different kinds of observation in the study of human behavior and mental processes, including social, cognitive, perceptual, and biological processes, as well as influences of culture and gender.
- Identify, understand, and address the ways that psychological research has been and often continues to be rooted in white sociocultural norms.

Objective 3: Ethical and Social Responsibility

- Recognize the necessity for ethical behavior in all aspects of the science and practice of psychology.
- Critically evaluate relations of psychological and behavioral knowledge with social policy, public health, and clinical practice.
- Use psychological knowledge to clarify social disparities, and to promote human well-being and change in a multicultural and global context.
- Endeavor to make psychology more inclusive, including practices that help dismantle systemic and structural forms of racism in psychological science, training, and applied settings.

Objective 4: Communication

- Acquire effective communication skills by disseminating research findings through skill-building in oral expression and expository writing.

STUDY ABROAD

For students in the **class of 2025, 2026, or 2027** planning to study abroad, the Department Advising Coordinator, Prof. Sarah Carney, handles preapproval requests for psychology major transfer credits. You can reach her at scarney_at_wesleyan.edu, 860-685-4976. Her office hours are available on her faculty website. It is highly recommended to obtain preapproval for a course before taking it.

Starting with the class of 2028, the Psychology Department encourages students to learn about cultures outside the United States through study abroad, but courses taken abroad cannot be used to satisfy psychology major requirements.

Study Abroad Course Approval. For students in the **class of 2025, 2026, or 2027**, study abroad courses must be submitted through WesPortal. For students in the class of 2027 and earlier, up to two credits can be transferred from study abroad programs. **Starting with the class of 2028,** study abroad courses will only count toward university credit and not the psychology major.

ADVANCED PLACEMENT

Students who receive a Psychology AP score of 4 or 5 or an IB (International Baccalaureate) score of 6 or 7 and complete a full-credit breadth requirement course **(PSYC220-279)** with a grade of B or better, can receive one credit for the AP/IB score. This credit will replace the introductory course requirement *only* if it appears on the Wesleyan transcript after completing the necessary breadth required course.

AP scores are posted in students' Placement Score and Recommendation link in WesPortal. To have the prerequisite for PSYC105 based on the AP score, students need to have their AP score on file with the University before preregistration begins for the upcoming semester. Once the breadth requirement course is completed, students go through their WesPortal to submit a request to post it on their transcripts. (If the AP is not in the folder, students should contact the Registrar's office.) This will also allow the preregistration system to automatically grant a prerequisite override for courses in which PSYC105 is required. All requests and actions regarding AP score and credit should be done through the Placement Scores and Recommendations link in WesPortal. For IB credit, contact the Dean's Office to have it transferred.

AP/IB credits count as transfer credits. AP/IB credits apply towards oversubscription. The AP/IB credit counts as the one non-graded course allowed towards the major. AP/IB credits may not be used towards major admission.

LANGUAGE REQUIREMENT

No language requirement.

TRANSFER CREDIT

The only credits that can be applied to the psychology major from other schools are credits that the University has authorized from a transfer student's previous full-time institution and that have been approved by the Psychology Department Advising Coordinator, Sarah Carney.

Transfer students should request that the Registrar's Office or their class dean send a copy of their previous institution's transcript to Prof. Carney for review of psychology courses toward the major. For transfer students, a maximum of three transfer credits can be counted towards the major.

For students in the **class of 2025, 2026, or 2027** taking courses at domestic institutions, up to two credits may be transferred towards the major.

Transfer Credit Course Approval. To request transfer credit approval, email the advising coordinator with:

- A course description from the university's catalog
- The syllabus
- The purpose of the course
- The transferable credit amount to Wesleyan
- The class year
- The Permission to Transfer Credit form from the Office of Student Affairs

RELATED PROGRAMS OR CERTIFICATES

Concentrations: Students are not obligated to do a concentration within psychology, and the vast majority of students do not specialize in a particular area. However, we do have two concentrations within the major—in cognitive science and in cultural psychology. These are essentially ways of traversing the major (with a few additional courses) for students who would like to organize their coursework around either of those two themes. Concentrations are not declared at major declaration. Rather, a requirements worksheet for each concentration is to be turned in by early February in the second semester of the senior year. Students who successfully complete the requirements will receive a departmental certificate indicating completion.

- **Cognitive Science Concentration.** Cognitive science is the interdisciplinary study of mental processes. Many areas of psychology contribute to the study of cognitive science, including cognitive psychology, developmental psychology, and cognitive neuroscience, fields that most typically use scientific research methods to study human mental processes. Beyond psychology, scholars use diverse methods to study mental processes in humans and nonhumans, including fields such as philosophy of mind, neuroscience and behavior, artificial intelligence, linguistics, education, and others. The focus of coursework within our department involves understanding the mental and underlying neural processes involved in areas such as human perception, attention, memory, language, and reasoning; as well as the development of these processes over the life span. Participation in laboratory research is expected. See the Cognitive Science Concentration Form (https://www.wesleyan.edu/psyc/about/major_guides.html) on the department website for requirement details.
- **Cultural Psychology Concentration.** Cultural psychology considers how the vast domain of culture and society is studied by psychologists, how cultural dynamics influence individuals, and how cultural practices define the various psychologies we practice. Many areas within psychology contribute to the study of cultures, including psychological measurement; social psychology, both experimental and qualitative; clinical psychology; developmental psychology; historical psychology; and cultural psychology. Beyond psychology, scholars in allied human sciences contribute to better understanding the dynamic relation of culture and psychology. Methods and theories abound in culture and psychology. Some focus on comparative research, others on ways of bringing the presence of underrepresented populations into scholarly projects, and some examine socio-political differences both between and within societies. While investigating social structures such as race, ethnicity, religion, gender, sexuality, and class is often central to works in this area, also of importance is understanding how such forces come to manifest themselves within the field of psychology and in our collective psychologies. See the Cultural Psychology Concentration Form (https://www.wesleyan.edu/psyc/about/major_guides.html) on the department website for requirement details.

BA/MA PROGRAM

The psychology department offers the BA/MA degree program. Wesleyan non-psychology students can apply to the program to work under the mentorship of a psychology faculty. For more information, please visit the Office of Graduate Student Service (https://www.wesleyan.edu/grad/graduate-programs/bama_program.html)s (http://www.wesleyan.edu/grad/).

HONORS

By the beginning of their spring semester junior year, psychology majors who have earned at least a B+ average in all psychology courses and at least a B average in all non-psychology courses are eligible to pursue honors in psychology by writing a thesis. A student must have a faculty advisor to write a thesis. An advisor should be secured by spring of the junior year through discussion with appropriate faculty. Honors will be awarded only if both the advisor and a second faculty reader evaluate the thesis worthy of honors.

CAPSTONE EXPERIENCE

Students interested in research opportunities are encouraged to develop statistics and research methods skills as early as possible, to develop broad knowledge in the research area of interest, and to then apply for permission of the instructor to enroll in an advanced research seminar. Speaking with individual faculty members about research opportunities that might be available in their labs is also appropriate.

RELIGION MAJOR

MAJOR DESCRIPTION

The Major in Religion (RELI) provides students with a cross-cultural, interdisciplinary, and critical exploration of various religious experiences and expressions. In addition to coursework that demonstrates the power and limits of some approaches to studying religion, students will analyze practices of interpretation, systems of belief, and patterns of religious behavior. Studies include the history of religious traditions; the effects of religion in society; the ways religions can form collective identity through race, nationalism, gender and sexuality, class, caste, language, and migration; and various forms of religious phenomena such as myth, ritual, texts, and theological and philosophical reflection. Students are encouraged to study an ancient and/or modern foreign language to consider study abroad opportunities.

Students of religion are open-minded and intellectually curious, able to consider different belief systems with empathy, cultural sensitivity, and ethical awareness.

Religion majors will cultivate valuable skills, including the ability to interpret and analyze social and cultural systems, to analyze texts critically, and to craft arguments in a variety of genres. Graduates are prepared to continue their studies in a graduate program or pursue a wide range of careers in fields such as education, media, business, law, medicine, politics, non-profits, advocacy, ministry, and many others.

ADMISSION TO THE MAJOR

To enter the minor, students should submit a request via the Major/Minor/Certificate Declaration link in their portfolio.

All majors are required to take RELI151. This introductory course is taught every semester. Majors are required to take it before the end of their junior year. It is strongly encouraged that students take RELI151 in their first two years at Wesleyan.

MAJOR REQUIREMENTS

The Department offers various categories of courses through which students organize their curriculum of studies. Please note that some courses fit more than one category; check the “additional requirements and/or comments” section of the WesMaps listing for a course’s official designation(s). Most courses are open without prerequisites.

- **RELI151.** The purpose of this course is to introduce students to the academic study of religion. It is not designed to survey the religions of the world or present an overview of global religious diversity. Rather, it uses a series of empirical case studies to explore methodological and theoretical issues in the study of religion by examining (1) the various intellectual tools used in religious studies; (2) the social, political, economic, and cultural context of those tools; and (3) the debates arising from their use. Students majoring in Religion must receive a B- or higher in this course.
- **Historical Traditions courses.** Many courses in the Department deal with the historical content of major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as secular, shamanic, Afro-Caribbean, and classical and modern Chinese traditions. These courses examine the texts, histories, institutions, and rituals of these religions.
- **Method and Theory courses.** These courses review and critically analyze methods, theories, and strategies employed by scholars of religion. Method and theory courses include the Religion Majors Colloquium (RELI398), which is required of all majors and to be taken in the junior year. The task of this course is to reflect upon the theoretical and methodological pluralism in the field of religious studies with the opportunity to apply these theories and methods to specific texts, concrete issues, or other cultural formations.
- **Additional Courses.** These are drawn from any of our course offerings, including those that examine specific problems, questions, or themes that intersect with the study of religion, such as gender, race, politics, sex, law, science, and colonialism. They may focus on one religious tradition or draw comparatively between traditions, but all are intended to provide tools for exploring and analyzing historical and contemporary phenomena.

Completing the Major

To complete a major in religion, students are required to take a minimum of 11 courses (10 credits + the .25-credit capstone, with a maximum of 15.25, including thesis credits). Students may count no more than two courses originating outside the Department (i.e. cross-listed from another department or from Study Abroad) towards the major.

The courses are distributed as follows:

- RELI151.
- Four Historical Traditions classes in at least three different traditions.
- Two Method & Theory courses, one of which must be RELI398.
- Three additional courses, which may be drawn from any of our course offerings. Alternatively, the student can include one Hebrew course (HEBR202 or higher) or a different fourth-semester language course with substantial religion content (see the Language section below).

- RELI404 (.25 credit), a capstone exploration of your work in the major to be taken during the spring of senior year.

Note: Although some courses may fit more than one category, they may not be included more than once in the overall count of courses taken.

STUDENT LEARNING GOALS

Our students are trained in cross-cultural, interdisciplinary, and critical approaches to the study of religion. They are expected to understand the power and limits of these approaches to the study of religion, and to demonstrate the ability to analyze practices of interpretation, systems of belief, and patterns of religious behavior. Each student will develop critical reading, writing, and research skills, and apply these to topics in the history, philosophy, and ethnography of religious traditions, including the effects of religion in society; the imbrication of religion with science and secularism; and the ways religions can form collective identity through race, nationalism, gender and sexuality, class, caste, language, and migration. They will demonstrate these skills relative to various forms of religious phenomena such as myths, rituals, and texts.

STUDY ABROAD

The Department enthusiastically encourages students to study abroad and will count up to two courses taken outside Wesleyan toward the major.

LANGUAGE REQUIREMENT

Religion majors are strongly encouraged to develop knowledge in an ancient and/or modern foreign language. One upper-level Hebrew course (202 or higher) can count toward the major as a tenth course. Language courses besides Hebrew (such as Arabic, Sanskrit, etc.) can count toward the major once approved by the Department chair. Such a course should be the equivalent of a fourth-semester language course, whose syllabus includes at least one-third religion content. For example, the course might look at religious writings, it might address some aspect of the role of religion or religious groups in society, or it might explore debates about religion, secularism, or modernity.

HONORS

Religion majors with a B+ (88.3) average in the Department may choose to write a senior honors thesis. Candidates for honors must submit to the Department chair a two- to three-page proposal abstract and bibliography by the last Friday of April of their junior year. The proposal should be a description of the intellectual problem of the thesis and the method to be used (whether it will be historical, ethnographic, etc.). Students should list three faculty members who would make good thesis tutors, in order of preference. The Department will determine which theses will move forward with which faculty and may reject some proposals. Students will be notified of the Department's decision before classes end in May. A student must be general education stage 1-compliant by graduation to be awarded honors or high honors. A passing grade, honors, or high honors will be awarded after a student's work has been presented to the Department.

In lieu of a traditional thesis, students with significant experience in a creative art form or medium may opt to pursue a creative thesis project. Such a project will consist of a combination of artistic production (music, art, theater, dance, film, etc.) and a written, substantive, analytic essay reflecting on the process and intention of the artistic production. The goal is to explore a religious studies question through artistic practice, while maintaining the analytic rigor expected of a more traditional written thesis. In order to be approved for a creative thesis project, a student must demonstrate significant coursework or other training in the creative medium chosen, and must have a thesis mentor in the relevant Department, in addition to a thesis mentor in Religion. There is no expectation that the student must submit the thesis for credit in two Departments, although double majors may choose to do so.

Creative thesis projects will go through the same approval process as traditional theses, are eligible for departmental honors, and are subject to the same deadlines. The student must find an advisor willing to supervise the artistic portion of the project before submitting their proposal to the Religion Department for approval. The project proposal should take the same format as that of a traditional thesis, as outlined above. The student will register for a variant of the thesis tutorial REL 409C/410C, which will list both the religion advisor and the creative advisor as instructors. If the student is submitting the project in both departments, they can opt to register for one thesis tutorial in Religion during one semester and another thesis tutorial in the secondary department during the other semester.

Details about proposing and writing a Senior Honor Thesis may be found here (https://www.wesleyan.edu/religion/formajors/thesisguidelines.html).

CAPSTONE EXPERIENCE

Assessment Portfolio and Capstone Symposium. During their time in the major, students will assemble a portfolio of three papers (at least four pages in length each) that they have written in the Department: one from the introductory course (RELI151), one from the Majors Colloquium (RELI398), and a third of their choice that was written in their junior or senior year. Taken together, these papers should give evidence of the development of the students' learning, as well as their command of critical, analytical, and interpretative skills.

In the drop/add period of the spring term, all senior majors enroll in a .25-credit pass/fail tutorial (RELI404), for which they will write a three- to four-page paper reflecting on the portfolio of papers they have assembled and perhaps on other work in the Department. This paper allows students an opportunity to assess the arc of their intellectual development as a religion major. Papers will be submitted to the Department chair and distributed to faculty members for evaluation. In the spring semester, faculty and senior majors will meet for a symposium discussion of these self-assessments, to be followed by a festive meal.

ROMANCE STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Romance Studies (RMST) enables students to develop a broad knowledge of two or more languages and cultures — those of Italy, France and the Francophone world, and the Hispanophone world —through a flexible, interdisciplinary program that combines coursework in several fields. Students explore literature, film and other art forms of various periods and regions to compare and gain insight into unique cultural modes of thought, expression, and creative achievement. Students improve their linguistic abilities in French and/or

Italian, and/or Spanish, become familiar with the cultural traditions, histories and politics of diverse civilizations and societies, and develop strong communications and critical skills, as well as the intercultural competencies to function effectively across cultures and work with people from different backgrounds. All RMST majors are strongly encouraged to spend at least one semester studying abroad in a Romance-language-speaking country.

The Romance Studies program prepares students to pursue careers in such diverse fields as education, media, politics, international relations, publishing, law, diplomacy, travel and hospitality, academia and the arts, including work in cultural institutions and heritage organizations.

ADMISSION TO THE MAJOR

Students qualify for this major with a grade of B or better in the following courses in their primary language or the equivalent: FREN215,ITAL111, orSPAN221; and a grade of B or better in the following courses in their secondary language or the equivalent: FREN112, ITAL111, or SPAN112.

MAJOR REQUIREMENTS

- Determination of a major (five courses in your primary language) and minor (four courses in your secondary language) focus.
- A minimum of two comparative projects. The idea is to suspend, for a moment, the nationalist assumption that languages and cultures exist in isolation from each other. Writers, artists, scientists, and businesspersons routinely cross borders and languages. We ask you to do the same in two short or long papers, to be completed at Wesleyan or during study abroad. A comparative project means simply that, in consultation with a course instructor, you will draw substantially on both your Romance Studies languages and cultures to explore a problem that interests you. We ask for two papers to encourage you to think comparatively from the primary viewpoint of each of your Romance Studies languages. We suggest you pursue this within courses you are taking anyway (including a senior thesis) because it need not require extra work--just a different way of thinking about work you must do regardless. The length is less important than the substance of your thinking. The project could be about border-crossing movements, reception, influence or adaptation, intertextuality, or dialogue between languages, literatures, and/or cultures. Or it could be an exploration of an issue that interests you (the environment, health care, urban planning, food, science, queer identities, fashion, etc.) in cross-cultural perspective, drawing on both languages and cultures. The projects may also be more informal or essayistic reflections (the equivalent of two short papers in length) on something significant you have learned or a perspective gained through study of two languages and cultures that you are unlikely to have learned through English only, a single foreign language, or another major. These essays may draw on work or study abroad or on the multiple courses you have taken at Wesleyan in your Romance Studies languages. They may be written in English or in one of your two languages. If you write in English you are expected to draw on sources in both languages.
- Nine courses at or above determined levels (FREN220, ITAL111, SPAN221) in two Romance languages.
- At least one course taken in both the student's primary and secondary languages in the student's senior year.
- Students are expected to earn a B or better in courses that count for the major. Students wishing to count a course with a lower grade toward the major are expected to consult with the chair of Romance Languages and Literatures (who will consult with the department) about it as soon as the grade is recorded.
- Courses must be taken for a letter grade, unless the student is also majoring in COL.

ADDITIONAL INFORMATION

- Study abroad is expected to take place on a Wesleyan-sponsored study-abroad program. Alternatively, students may, with the advisor's prior statement of support, study on another approved program. This practice is intended to promote the intellectual coherence of a major in which students acquire one language more recently than another.
- Students may petition their advisor for special permission to count take one course in English centered on the culture of their primary language towards the major.
- With the advisor's approval, students may satisfy the comparative requirement by way of coursework and/or written work conducted on a study-abroad program.
- Students whose primary language placement is higher than FREN215, ITAL112, SPAN221 are required to complete nine courses, two of which may be in English in the primary language's culture only.
- You may count up to three courses taken during one study abroad toward the major, and up to four courses if going abroad twice (once in each of your language of study). These courses may be taken in one or both of the major languages.
- Except in rare circumstances, students may not double major in any of the majors sponsored by the Romance Languages and Literatures Department: RMST, SPAN, FRST, ITST.
- Senior essays or theses must be comparative and involve the literatures and/or cultures of the student's major languages.
- Essay, thesis, and other (e.g., CA/TA) tutorials and language courses do not count toward the major, although they are encouraged.

STUDENT LEARNING GOALS

The Romance studies major provides students with the proficiency in two Romance languages (among French, Italian, and Spanish) to live, study, and work successfully in the corresponding French-, Italian-, and/or Spanish-speaking environments. They learn about their literatures and other cultural forms such as film and, through them, about their modes of thought, expression, and creative achievement. As a result, they improve their ability to communicate in French, Italian, and/or Spanish as well as their native language; become more adept at understanding other points of view; and learn to draw on a wide range of sources to stimulate their own creative and critical capacities. Students are encouraged to bring the resources of their two Romance cultures to bear together on problems that interest them, providing a depth of perspective unavailable in English only or a single foreign language. Finally, students explore the enormous cultural diversity of the French-, Italian-, and/or Spanish-speaking worlds through a flexible interdisciplinary program (often including study abroad) that can serve as the basis for future work or further academic or professional studies.

STUDY ABROAD

All majors are strongly encouraged to spend at least one semester studying abroad in a Romance-language-speaking country. In addition to Wesleyan's own programs in Bologna, Madrid, and Paris, there are currently Wesleyan-approved study-abroad programs in Argentina, Brazil, Cameroon, Chile, Colombia, Italy (Florence, Rome), Madagascar, Mexico, Cuba, and Senegal, among others. Wesleyan also sends one exchange student each year to the Institut d'Etudes

Politiques in Paris. Students who have strong academic reasons for wishing to participate in other programs may also petition the Fries Center for Global Studies for permission to do so. For information on the approved programs and the petition process, contact the Fries Center for Global Studies (http://www.wesleyan.edu/cgs/osa/).

ADVANCED PLACEMENT

See wesleyan.edu/romance/romancestudies/aptransferofcredit (http://wesleyan.edu/romance/romancestudies/aptransferofcredit.html) for more information.

LANGUAGE REQUIREMENT

Yes.

TRANSFER CREDIT

See wesleyan.edu/romance/romancestudies/aptransferofcredit (http://wesleyan.edu/romance/romancestudies/aptransferofcredit.html) for more information.

ADDITIONAL INFORMATION

Students are responsible for ensuring that major communications with the primary language advisor about the essay or thesis work also go to the secondary language advisor at the same time (and vice-versa: communications with the secondary language advisor should go to the primary language advisor).

HONORS

See wesleyan.edu/romance/romancestudies/honors (http://wesleyan.edu/romance/romancestudies/honors.html) for more information about honors.

CAPSTONE EXPERIENCE

See wesleyan.edu/romance/romancestudies/honors (http://wesleyan.edu/romance/romancestudies/honors.html) for more information about capstone experience options.

RUSSIAN, EAST EUROPEAN & EURASIAN STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Russian, East European, and Eurasian Studies (REES) provides students with a thorough, interdisciplinary understanding of contemporary Russia and other post-Soviet states, their culture, society, history, politics, and economic institutions. REES faculty specialize in the literature, history, politics, music, cinema, art, dance, and religion of this region. Students are expected to achieve an advanced level of fluency in Russian or another language of the region and learn to work with target-language sources and media to conduct original research in their chosen area of specialization. Study abroad in the region is encouraged when appropriate.

Students drawn to the REES major bring an interdisciplinary orientation, strong critical thinking and analytical abilities, and a curiosity about learning languages. They may have a cultural interest in the region's rich history, literature, or artistic traditions. Alternatively, they may want to focus on the role of this region--as it transformed from the Russian Empire to the Soviet Union and to its successor states--in global affairs and the worldwide economy.

The REES major can provide insights into different worldviews and social systems, preparing graduates for advanced study or careers in research and cultural analysis, education, law, artistic production, diplomacy and public service, business, and communication.

ADMISSION TO THE MAJOR

Students normally declare a major in Russian, East European, and Eurasian Studies in the spring of sophomore year. Interested students should begin their study of Russian language as early as possible and should consult a REES faculty member before declaring the major. To be accepted into the program, students must have a minimum overall average of B in courses related to the major.

MAJOR REQUIREMENTS

There are two possible concentrations in the REES major.

- Language, literature, and culture. Majors must complete RUSS 101, 102, 201, 202, and one 300-level course conducted in Russian or the equivalent, as well as five more courses, three of which must be in literature & culture and two of which must be in social sciences. If a student places out of one or more semesters of language, they must take enough courses in REES to add up to a total of 10. For example, a student who places out of two semesters of first-year Russian would take two more semesters of language, one 300-level course conducted in Russian, plus seven more courses.
- Social sciences. Majors must complete RUSS 101, 102, 201, 202, or the equivalent, as well as six more courses. These courses must include at least three in the category of social sciences and at least two in the category of literature & culture. If a student places out of one or more semesters of language, they must take enough courses in REES to add up to a total of 10. For example, a student who places out of two semesters of first-year Russian would take two semesters of language plus eight more courses.

Students who wish to fulfill the language requirement by studying a language of Eastern Europe or Central Asia other than Russian may do so, subject to approval by the chair.

REES COURSES

Code	Title	Hours
Social Sciences		
GOVT274	Russian Politics	1
RELI225	Socialist Utopias: Transcendence and Religion in Communist States	1

RELI225F	Socialist Utopias: Transcendence and Religion in Communist States (FYS)	1
RELI271	Secularism: Godlessness from Luther to Lenin	1
RELI239	Modern Shamanism: Ecstasy and Ancestors in the New Age	1
RELI289	Indigenous Religions: Politics, Land, Healing	1
HIST151	Introduction to History: The "Russian World" Past and Present	1
HIST219	Russian and Soviet History, 1881 to the Present	1
HIST318	The Politics of Death: The Living, the Dead, and the State	1
HIST353	The Communist Experience in the 20th Century	1
RELI299	Imagining Communities: National Religions and Political Rituals	1
HIST395	"If there is no God, then everything is permitted?" Moral Life in a Secular World	1
Literature and Culture in English		
MUSC121	Queering Russian Music	1
MUSC296	Soundscapes of Islam	1
MUSC297	Music of Central Asia: From Throat-singing to Heavy Metal	1
REES205	Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel	1
REES208F	Otherness & Belonging (FYS)	1
REES220	Speak, Memory: The Russian Memoir	1
REES223	After Communism: Animals, Avatars, Hybrids	1
REES224	Performing Russian Culture: From Peter the Great to the Russian Revolution	1
REES233	Introduction to Russian and Soviet Cinema	1
REES235	Queer Russia	1
REES240F	Russian Masterpieces: Great Short Works (FYS)	1
REES251	Dostoevsky	1
REES252	Tolstoy	1

REES268	Nabokov	1
REES276	Contemporary Russian Literature	1
REES277	Gogol and His Legacy: Witches, Con Men, and Runaway Noses	1
REES279	Chekhov: Prose vs. Drama	1
REES321	Moscow/Berlin: Dreamworld and Catastrophe	1
Courses Conducted in Russian		
REES260	Dostoevsky's BRAT'IA KARAMAZOVY	1
CGST234	Introduction to Russian and Soviet Cinema (CLAC.50)	0.5
CGST330	Reading Tolstoy in Russian (CLAC .50)	.5
CGST350	Twentieth-Century Russian Poetry (CLAC .50)	.5
CGST352	The Communist Experience in the Soviet Union (CLAC.50)	.5
Language		
RUSS101 & RUSS102	Elementary Russian I and Elementary Russian II	3
RUSS201 & RUSS202	Intermediate Russian I and Intermediate Russian II	2

STUDENT LEARNING GOALS

The major in Russian, East European, and Eurasian studies is designed to provide students with a thorough understanding of contemporary Russian culture and society, its history, its political and economic institutions, and its place in the world. At the end of their studies students should have achieved an advanced level of fluency in the language and should be able to work with Russian sources to conduct original research in their chosen area of specialization. They should be able to read or watch Russian media and understand the historical and cultural references that frame Russians' understanding of their world. Students should also have a basic familiarity with the historical, cultural, social, and political developments of the other post-Soviet states beyond Russia and have the opportunity to explore these countries in more detail if they so desire.

STUDY ABROAD

Given the ongoing armed conflict in Ukraine, students should consult with the faculty about any plans for study abroad. Students may study in Eastern Europe or Central Asia as long as the program includes a language component. For a semester of study abroad on an approved program, four credits will count toward graduation, of which two will count toward the REES major. For a summer of study abroad on an approved program, two credits will count toward graduation, of which one will count toward the REES major.

LANGUAGE REQUIREMENT

Majors must complete two or three years of college-level Russian or the equivalent, depending on their major track. Minors must complete one year of college-level Russian or the equivalent.

PRIZES

Scott Prize, Priscilla Meyer Fund

HONORS

To qualify to receive honors or high honors in Russian, East European, and Eurasian studies (REES), a student must write a senior thesis that will be evaluated by a committee consisting of the tutor, a second reader from the REES faculty, and one additional reader either from REES or from the faculty at large. This committee makes the final decision on departmental honors. Only a two-semester senior thesis may be submitted for honors in REES.

CAPSTONE

No capstone is required. Available capstone experiences include study abroad, seminars conducted in Russian, and senior honors theses.

SOCIOLOGY MAJOR

MAJOR DESCRIPTION

The Major in Sociology enables students to develop new frameworks for analyzing social behavior and human relationships. From everyday life interactions to large-scale historical and structural transformations, sociology concerns itself with traditional and emergent social formations and institutions,. seeking insight into intersecting cultures and subcultures.

Students of sociology study a panoply of topics including social theory, social movements, critical media studies, sexualities, family, gender, race & ethnicity, education, inequality, work, leisure, healthcare, urban sociology, religious movements, philanthropy, political sociology, and sociological methods of knowledge production.

The Sociology major is animated by a commitment to critical consciousness that prepares students for a life of self-reflexivity and social awareness. It yields opportunities for creative work in many significant spaces of cultural production and a wide variety of contemporary media platforms. Students often find innovative ways to apply sociological modes of analysis to transformative work in fields as diverse as fashion, education, social policy, journalism, health care and law.

ADMISSION TO THE MAJOR

Students who wish to declare the major must have completed or be currently enrolled in SOC151 and have completed or be currently enrolled in one additional course:

- any Sociology Department course, or
- a sociologically relevant course approved by petition to the department

MAJOR REQUIREMENTS

Majors must complete a total of 10 courses in fulfillment of the major requirements.

- Three sociology department foundations courses
  - SOC151
  - SOC202
  - SOC212
- Four sociology department topical courses, including independent and group tutorials (**SOC220-SOC 402**, **SOC 411-412**)
  - Note: students who write sociology theses are only required to take three sociology department topical courses.
- Three additional topical courses from any combination of:
  - **SOC220**-**SOC402**
  - **SOC 411-412**
  - **SOC 465-SOC466** (education in the field)
  - Advisor-approved courses taken outside the Wesleyan Department of Sociology, including study-abroad credit, sociology-relevant courses at Wesleyan, and sociology courses taken at other institutions.

All sociology majors must enter their senior year having taken a minimum of three courses within the Wesleyan Department of Sociology. This includes at least one of the two required courses (SOC202 or SOC212).

Non-Department Major Credit
Three of the seven topical courses needed to complete the major can be completed outside the Sociology Department. These courses include study abroad courses, transfer credit, and courses taken in other departments at Wesleyan. The courses must be sociology-related and require approval from your major advisor. Majors can request a **maximum of three courses (or three credits)** from outside the department.

STUDY ABROAD

Study abroad is fully compatible with completing the major, but students who plan to go abroad for a semester are expected to discuss with their major advisors how such studies will fit into their overall academic program before finalizing their plans. Pre-approved study abroad courses can be transferred to the major as non-departmental major credit (up to 3 credits; see details in Major Requirements and Transfer Credit).

TRANSFER CREDIT

The Sociology Department will consider requests to transfer credit for graded sociology courses taken at other U.S. academic institutions. For currently enrolled Wesleyan students, these requests must be made during the first two weeks of the course the student is requesting a transfer credit. In the event that a course is no longer available or some other circumstance bars a student from enrolling in the pre-approved course, students must contact their major advisor to get permission to have credit for a different course transferred instead.

Along with the transfer credit form (available at https://www.wesleyan.edu/studentaffairs/forms.html), a course syllabus must be provided showing that the proposed course is equivalent to Wesleyan courses.

Students who began their studies at other U.S. academic institutions can have their credits transferred upon admission to Wesleyan, and these credits can apply to the major. Already enrolled students who began their studies at Wesleyan can only request to have topical or upper division transfer credit applied to the major, which can count toward the maximum of three sociology-related credits taken outside the Department to fulfill the major requirements.

ADDITIONAL INFORMATION

- **Major advising.** Each major is assigned a faculty advisor with whom the student works out a program of study
- **Education-in-the-field credit.** Students, whether majors or non-majors, seeking education-in-the-field credit must provide the department, in advance, with an acceptable prospectus of their work and assurance of professional guidance during the field experience. Students must submit research papers based on this experience. These papers should refer substantially to sociological literature pertinent to their field experience.

In planning their programs, students should examine the full list of WesMaps (http://www.wesleyan.edu/wesmaps) course offerings. Other information about the sociology major is available in the department office, 212 College St.

HONORS

The Department of Sociology offers a two-semester Honors Thesis Seminar (SOC 405-406) supervised by a member of the sociology department faculty who serves as thesis advisor for students enrolled in the seminar. Students selected for participation in the seminar work individually with the seminar advisor and meet weekly with other thesis writers in a process directed toward the formulation and production of an original piece of imaginative and sophisticated scholarship. Consideration focuses on the potential for successful completion of a project that is both creative and well-formulated.

The Sociology Department's yearlong Thesis Seminar proceeds in three stages:

Stage 1. To apply to write a Sociology Honors project, students will submit a brief proposal and a writing sample that will be used to evaluate a candidate's potential for successful completion of an Honors project.

- The proposal should present a topic for the thesis alongside a discussion of how the student intends to approach their study, what compels them to take on the study, and what kinds of knowledge of/or experience they bring to the work. This should include a discussion of scholarly texts relevant to the project but may also include other ways the student has come to be interested in the topic through experiences or creative texts. Proposals are understood to be preliminary and provisional. It is expected that the shape and topic of the project will change substantially over the course of the thesis writing process.
- The writing sample should be a completed work, selected by the student to reflect the student's best work, i.e., the work of which the student is most proud. The central considerations for evaluation of the sample are formal, not substantive and, as a result, the student writing can be drawn from any creative context, including but not limited to, coursework completed in Sociology or elsewhere. There is no prescribed number of pages required for the submission.

Students who wish to be considered for enrollment in the Honors Thesis Seminar will submit a PDF file of the writing sample by the end of the first week of April (5pm 4/7).

Applications should be emailed to Professor Abigail Boggs, aboggs@wesleyan.edu. Please include THESIS SEMINAR APPLICATION—all caps—in the subject line of the email.

Stage 2. In some instances, the petition process includes an interview, either on-campus or virtual, with the professor leading the seminar in order to explore tentative ideas for thesis topics and discuss the nature of the commitment required for completion of an independent Honors Thesis. Candidates will be contacted directly in order to schedule an interview.

Stage 3. Enrollment in the two-semester Thesis Seminar is managed as a POI course. Successful candidates will be formally enrolled in the seminar (and, thus, in the university-managed Honors College administrative system) during add/drop at the start of senior year.

Department faculty may also elect to work with a senior major toward completion of an honors thesis outside of the context of the Thesis Seminar. Independent thesis tutorials are established at the discretion of members of the sociology department faculty.

Double-filing theses

Double-majors who are completing honors theses/projects for another department on campus can request to have their thesis considered for honors in Sociology. In this case, the student must complete a thesis tutorial with a member of the Sociology Department for at least one semester their senior year.

CAPSTONE EXPERIENCE

Capstone (optional)

Students who qualify for the honors program may apply to write an honors thesis during the seventh and eighth semesters. See section entitled "Qualifying for Honors" for full information on the honors program.

THEATER MAJOR

MAJOR DESCRIPTION

The mission of the Theater Department (THEA) is to graduate self-empowered, well-informed, creative storytellers engaged in their communities. The Theater Department considers the critical and creative study of the theatrical discipline to be an essential component of a liberal arts education. Offerings include courses in **Theater Arts** (acting, design, directing, playwriting, stage management), **Theater Methods** (dramatic literature and criticism, performance studies, theater history), and **Technical Theater** (lab and hands-on technical production). Foundational coursework introduces theater techniques, theories, literature, and discourses. Advanced courses prepare students to articulate their visions of theater both on stage and in writing, and to engage in deep scholarly and artistic research. The department embraces a broad definition of theater and encourages artistic innovation.

The Theater department welcomes students who seek to develop a strong passion for expressing themselves or communicating about meaningful human issues through the artistic process. They are interested in developing their confidence and empathy, embodiment, and collaborative skills. Theater majors acquire many valuable and transferable career skills such as public speaking and presentation, teamwork, creative problem-solving, adaptability, emotional intelligence, time and project management, and attention to detail.

ADMISSION TO THE MAJOR

The theater department has created a wide array of options for students to begin their path through the study of theater in areas other than acting, such as playwriting, design, or performance practice.

The following chart details the Gateway Course Categories that must be completed or underway by the fourth semester in order to be approved as a theater major:

Degree type	Area of Study
Gateway Courses	
Technical Theater (0.5 CR)	THEA105 (One 0.5 credit in the technical aspects of scenic/lighting or costumes)
Theater Arts (1.0 CR)	This includes courses in the areas of design, acting, playwriting, advanced technical theater, and performance practice
Theater Methods (1.0 CR)	This includes courses in the areas of dramatic literature, theater history, criticism, applied theater and service learning.
	(See list of courses shown below)

MAJOR REQUIREMENTS

Theater Major Requirements *(These requirements are in addition to the Gateway courses)*

- Three (3) credits in **Theater Arts** courses, which must include one design course (THEA359 - set design, THEA383 - costume design, THEA360 - media design or THEA305 - lighting design). One credit (and only one credit) of Performance Practice* (THEA427/THEA428/THEA431/THEA432/THEA433/THEA435/THEA437) is also required for this category. One instance of the course THEA183 (The Actor's Experience) or THEA180 (Reading Plays for Production) may be counted towards the Performance Practice requirement (for .5CR).
- Two (2) credits in **Theater Methods** courses. Only one course may be 100-level.
- One (1) credit of **Technical Theater** (THEA329/THEA331/THEA335) earned in .25, .5 and 1.0 credit increments through participation in department production related positions.** These opportunities are posted on the Theater Department Virtual Callboard (https://bit.ly/CBLanding) throughout the year as projects/production needs develop.
- One (1) credit Theater Elective, which includes THEA courses and courses cross-listed with the department in all areas, including Technical Theater, Theater Arts, and Theater Methods. This will allow students to deepen their knowledge within an area of theater that they are interested in, or conversely to increase the diversity of courses that they take in the major during their time at Wesleyan. For this category, majors will need to select a course to count as their elective and submit that choice in their major certification form to be approved by their major advisor.

*Performance Practice credits are earned by participating in a Theater Department project (Mainstage or Capstone Productions) as a performer/actor, director, assistant director, stage manager, assistant stage manager, dramaturg, designer or assistant designer. Auditions and opportunity info for these will be posted on the Theater Department Virtual Callboard (https://bit.ly/CBLanding) throughout the year as projects/production needs develop.

**Beginning with the class of 2027: in order to be eligible for any senior capstone project, students must have completed their Technical and Performance Practice credits by the end of their junior year.

Total major program requirements: 2.5 credits (Gateways) + 7 credits = 9.5 credits

GENERAL EDUCATION

In order to be eligible for Honors in Theater through a Capstone Thesis Project, students must be Gen Ed Stage1 compliant. In order to be eligible for High Honors in Theater through a Capstone Thesis Project, students must be Gen Ed Stage 2 compliant. See Guidelines and Proposal Requirements for Senior Capstone Projects in Theater (https://bit.ly/WesTheaterCapstoneGuidelines) for more information.

STUDENT LEARNING GOALS

The theater department teaches the fundamental tools of theater-making and emphasizes collaborative, exploratory work in order to give our students the ability to operate in and change the real world without hesitation and with

confidence. Our goal is to graduate self-empowered, well-informed, creative storytellers engaged in their communities.

We believe that theater can be created from multiple points of entry, such as utilizing plays and text; movement and physical composition; objects and visual elements; sound and music, to name a few. Therefore, we invite and welcome all students; particularly, those with a strong passion to express themselves and to be willing to fail, fall, laugh, and grow, while changing themselves and others in the process.

The theater department faculty believes in the power of performance as a transformational discipline, as an embodied process that, through technique, methodology, study, and commitment, has a unique capability to ask hard questions about who we are as a society, and serve as a rehearsal space for alternate futures.

STUDY ABROAD

Students are encouraged to spend a semester at Wesleyan-approved programs abroad or to petition for approval of other programs in countries of their choice. For information, contact the Office of Study Abroad (http://wesleyan.edu/studyabroad/).

Wesleyan pre-approved programs with focus on theater:

- British American Drama Academy, London
- CIEE, Buenos Aires
- C.V. STARR, Chile
- For Wesleyan policy on the programs not on the approved list, contact the Office of Study Abroad (http://wesleyan.edu/studyabroad/).

PRIZES

Rachel Henderson Theater Prize: Awarded annually to the student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of their undergraduate career.

Outreach and Community Service Prize: Awarded to the senior theater major who, through their work in the Theater Department, has done a significant service in the community.

J.Peter Adler ’90 Memorial Fund: Established in 1997 with gifts from family and friends in memory of J.Peter Adler ’90, the J.Peter Adler Memorial Fund provides two awards per year to support a student theater production: one in the fall and one in the spring semester. An avid theater lover, J.P. participated in Second Stage while at Wesleyan as a non-theater major. He died suddenly in 1995. The Adler Fund is awarded with preference to first-time directors of non-academic theater productions and, whenever possible, to non-theater majors. The fund may also support student theater productions associated with the Theater Department or other entities, such as senior thesis productions.

HONORS

Preliminary honors proposals are due during spring of junior year. Students can submit proposals for either critical or creative honors theses.

Preliminary proposals will be judged based on clearly expressed objectives and evidence of research and preparation. Judgments will be based equally on preliminary research, clarity of the objectives of the process, and rationale for staging a given production. Please consult Guidelines and Proposal Requirements for Senior Capstone Projects in Theater (https://bit.ly/WesTheaterCapstoneGuidelines) (inclusive of honors thesis projects), as well as honors eligibility details.

The Honors Committee will award honors on the basis of the readers’ evaluations. All departmental readers must recommend honors for a candidate to be successful. Students are entitled to copies of the readers’ comments. The honors tutor is responsible for assigning a grade for the courses THEA409 and THEA410; this grade need not reflect the decision of the Honors Committee to award or deny departmental honors.

The Honors Committee will evaluate eligible theses according to the following criteria: consideration of the readers’ evaluations, originality of research and thesis topic, the student’s performance in courses as reflected in his or her transcript, compliance with the General Education Expectations, and the extent to which the student’s educational experience reflects the philosophy, goals, and diversity of the department.

AFRICAN STUDIES MINOR

MINOR DESCRIPTION

The African Studies Minor enables students to develop a deeper understanding and engagement with Africa and its contemporary issues in addition to its great historical, cultural, political, and artistic importance to American society and the world. Students take an African History survey course plus at least four courses from across the Wesleyan curriculum: areas of study include art history, dance, economics, English, feminist gender & sexuality studies (FGSS), history, government, music, and Romance languages & literature. Students are also encouraged—but not required— to pursue the study of an African language and to study abroad in Africa.

MINOR REQUIREMENTS

The African studies minor allows students to create a coherent course of study by taking at least 5 courses that offer breadth and depth in the study of the continent. It enables them to develop an understanding of African history, contemporary issues facing the continent, and the creative and intellectual contribution of Africans. The minor consists of a minimum of 5 courses.

Although there is no overall GPA requirement to stay in the minor, a grade of B or higher is required to receive minor credit for a course.

Code	Title	Hours
At least one African History survey course:		**1**
HIST212	Modern Africa	
HIST217	Empires, Slavery, and Revolution: Africa to 1800	
Four additional African Studies courses from History, the Social Sciences, Humanities, or African Diaspora, with the following conditions:		**4**
-No more than 3 total History courses may count.		
-No more than 2 MUSC and/or DANC may count.		
-No more than 1 African Diaspora class may count		
-No more than 1 100-level course may count.		
African History (See WesMaps for a complete list)		
HIST212	Modern Africa	
HIST217	Empires, Slavery, and Revolution: Africa to 1800	
HIST226	Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa	
HIST267	Development in Question: Conservation in Africa	
HIST302	Reproductive Politics and the Family in Africa	
HIST334	Social History of Islam in Africa	
HIST341	Body Histories in Africa	
Social Studies (See WesMaps for a complete list)		
ECON366	The Economics of Developing Countries	
GOVT355	Political Theory and Transitional Justice	
Humanities (See WesMaps for a complete list)		

DANC260	West African Dance I (and subsequent sections of West African Dance II and III; Two dance courses must be taken to fulfill the one credit requirement)
ENGL131B	Writing About Places: Africa
ENGL221	The African Novel I: Nervous Conditions
ENGL223	The African Novel II: After Achebe
FREN281	French and Francophone Theater in Performance
FREN382	Jungle and Desert in Francophone African Literature
MUSC295	Global Hip-Hop
MUSC445	West African Music and Culture: Beginners
SPAN264	Orientalism: Spain and Africa
African Diaspora	
AFAM203	African American History, 1444-1877
AFAM223	20th-Century Franco-Caribbean Literature and the Search for Identity
AFAM233	All Ah We: Contemporary Afro-Caribbean Drama & Performance
ENGL286	Literature of the Harlem Renaissance
ENGL375	Black Global Cities
FREN324	Interpreting the "New World": France and the Early Modern Americas
Students are encouraged, but not required to study Arabic, French, Portuguese, or to pursue study of an African language through the Self-Instructional Program (SILP). Students who complete 1 credit of coursework through SILP may count their language instruction as 1 credit out of the total 5 credits.	
Students are encouraged to study abroad in Africa, and they may count 1 course taken abroad to fulfill one of the additional history, social sciences, or humanities course requirements. The study abroad course must focus on the study of Africa, or an African region.	

ADDITIONAL INFORMATION

Students may also create their own University Major (http://www.wesleyan.edu/studentaffairs/resources/majordeclaration/umajor.html) centered on the study of Africa:

FURTHER RESEARCH, LANGUAGE, AND STUDY ABROAD OPPORTUNITIES

RESEARCH

Besides participating in a variety of study abroad programs throughout the year, Wesleyan students often undertake their own original research in Africa as part of completing senior honors theses for their respective departments.

Theses are available here. (http://wesscholar.wesleyan.edu/etds/)

LANGUAGE

Students who wish to study an African language are encouraged to submit a petition through the Language Resource Center and the Self-Instructional Language Program (http://www.wesleyan.edu/lctls/silp.html) (SILP).

STUDY ABROAD

Information on current programs may be obtained from the Office of Study Abroad (http://www.wesleyan.edu/studyabroad), and should be discussed with a member of the African studies faculty cluster.

ANIMAL STUDIES MINOR

MINOR DESCRIPTION

The Animal Studies Minor engages students in multidisciplinary scholarship that provides them with an understanding of important debates and#varying disciplinary approaches in the field. Coursework from such fields as anthropology, ecology, environmental studies, ethnography, feminist studies, legal theory,#literary studies, philosophy, political theory, postcolonial studies, psychology, science studies,#and urban studies can be a part of the minor. Students must take at least 5 approved courses plus complete an internship/summer experience. This combination of scholarly and practical work prepares students for animal-related careers and post-graduate studies.

ADMISSION TO THE MINOR

Meet with coordinator of the minor.

MINOR REQUIREMENTS

Students must take a minimum of 5 credits plus complete an internship/summer experience
that must be approved by the coordinator of the animal studies minor.

In order to receive a minor in animal studies, students must take:

- PHIL215 (this course is taught every year)
- 4 other approved courses from the list below, and
- Internship/summer experience

The courses may be completed in any order.

ANIMAL STUDIES COURSE LIST

Code	Title	Hours
AMST203	Biopolitics, Animality, and Posthumanism: Junior Colloquium	1
AMST248	History of African American Art	1
AMST260	Bioethics and the Animal/Human Boundary	1
COL238	Animal Theories/Human Fictions	1
COL310	More-Than-Human-Worlds: Theories and Fictions	1
ENVS225	Liminal Animals: Animals in Urban Spaces	1
ENVS279	Eating Others: Histories and Cultures of Animal Edibility	1
ENVS295	Saving Animals: The Politics of Rescue, Captivity, and Care	1
PHIL283	Animal Law and Policy	1
PHIL357	Animal Minds	1

PHIL368	The Ethics of Captivity	1
PSYC361	The Psychology of Prejudice and Discrimination	1

ADDITIONAL INFORMATION

INTERNSHIP/SUMMER EXPERIENCE

Wesleyan animal studies, with outside funding, has been able to support student summer experiences. We will continue partnering with FGSS to offer the Ecofeminist Summer Internship Experience Grant, will work with the CoE to help coordinate Summer Research Fellowships for animal studies minors. The coordinator of the minor will assist students to facilitate internships/summer experiences. While most internships will be expected to be completed over the summer, the director of the minor may approve alternative arrangements for students who may be engaged in volunteer work or other immersive experiences during the school year.

CONTACT

Elan Abrell (eabrell@wesleyan.edu)

ARCHAEOLOGY MINOR

MINOR DESCRIPTION

The Minor in Archaeology trains students to analyze and reconstruct past societies and their environments through material remains. Students engage the past in ways that can address modern questions, such as what drives culture change, what creates resilient societies, the role of archaeology in construction of identity, and how we can rediscover sustainable technologies to meet climate challenges. Archaeology is fundamentally interdisciplinary and hands-on. Students apply analytical and interpretive frameworks from the humanities, sciences, and social sciences, with many courses involving lab or experimental components and the opportunity to engage directly with artifacts.

There are three tracks possible in the Minor: the Interdisciplinary Minor, with a regional focus; the Archaeological Science minor, with a focus on specific scientific methods of analysis; and the Experimental Archaeology linked minor with the College of Design and Engineering (CoDES), which focuses on reverse-engineering ancient technologies. The Interdisciplinary and Arch Sci Minors require six credits, including a gateway course, and classes in Theory, Anthropology, Classical Civilization, Art History, and Analytical Methods. The Experimental Archaeology/CoDES linked minor requires 7 credits, including the Archaeology gateway, 3 CoDES core courses for design/engineering fundamentals, and 3 experimental and project-based seminars in Archaeology.

ADMISSION TO THE MINOR

To declare the Minor, a student must achieve a grade of B or above in a designated Gateway course.

GATEWAY COURSES

Code	Title	Hours
ARCP201	Art and Archaeology of the Bronze Age Mediterranean	1
ARCP203	The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology	1
ARCP204	Introduction to Archaeology	1
ARCP214	Survey of Greek Archaeology and Art	1
ARCP223	Survey of Roman Archaeology and Art	1
ARCP260	Art and Archaeology of Ancient India	1
ARCP275	Introduction to Archaeological Science: Natural Science Approaches to the Human Past	1

MINOR REQUIREMENTS

The Minor in Archaeology requires a minimum of six credits in archaeology.

- 1 Gateway course
- 1 Elective course:
  The Elective requirement can also be met with two 0.5 credits of the Thinking Through Archaeology Symposium, offered each fall semester (beginning Fall '22)
- 1 course in each of four areas (Anthropology, Classical Civilization, Art History, Methods). For a listing of the different courses in each of these categories, please see Major Requirements (p. 1036).

The Minor in Archaeological Science requires a minimum of six credits in archaeology:

- 1 Gateway course
- 1 Elective course:
  The Elective requirement can be met by two 0.5 credits of the Thinking Through Archaeology Symposium Course. With the approval of the Chair, students in the ArchSci Minor can also apply one extra-departmental course in the sciences to their ARCP Minor.
- 1 course in each of three areas (Anthropology, Classical Civilization, Art History)
- 1 300-level lab-based ARCP course (this meets the Method requirement)

Archaeological and Design Approaches to Ancient Objects and Ancient Technologies

The new Linked IDEAS/ARCP Minor is a project-based curricular pathway that blends training in the fundamentals of Design and Engineering with robust study of archaeological methods and materials for the analysis of ancient artifacts and technologies. Through introductory and experimental courses, the Minor introduces students to the practices of experimental archaeology and materials analysis as methods embedded within anthropological and historical frameworks.

It requires 3 IDEAS courses and 4 ARCP courses:

- 1 Gateway: ARCP 204 Introduction to Archaeology
- 3 IDEAS Core requirements
  - IDEAS 170
  - IDEAS 180
  - IDEAS 220

- 1 ARCP course introducing experimental approaches (see list below)
- 2 ARCP project- based courses (see list below)

IDEAS CORE COURSES (ALL 3 REQUIRED)

Code	Title	Hours
IDEA170	Introduction to Mechanical Design and Engineering	1
IDEA180	Design Studies	1
ARST220	Ecological Design I: Being at Home in the World	1

Archaeology Required Course

Code	Title	Hours
ARCP204	Introduction to Archaeology	1

ARCHAEOLOGY COURSES INTRODUCING EXPERIMENTAL APPROACHES (1 REQUIRED)

Code	Title	Hours
ARCP201	Art and Archaeology of the Bronze Age Mediterranean	1
ARCP214	Survey of Greek Archaeology and Art	1
ARCP203	The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology	1
ARCP257	Environmental Archaeology	1
ARCP350	Animals in Archaeology	1

ARCHAEOLOGY PROJECT-BASED COURSES (2 REQUIRED)

Code	Title	Hours
ARCP234	Art and Society in Ancient Pompeii	1
ARCP257	Environmental Archaeology	1
ARCP285	Off with its Pedestal! The Greek Vase as Art and Artifact	1
ARCP291	East Asian Archaeology	1
ARCP293	Numismatics and the Archaeology of Money	1
ARCP352	Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean	1

To apply for the minor, please submit a declaration to add the minor through the Major/Minor/Cert Declaration application in your student portfolio. Students seeking to apply a science courses to meet their Elective requirement must explain the course they intend to apply and its application to archaeological research.

ART HISTORY MINOR

MINOR DESCRIPTION

The Art History Minor enables students to incorporate the study of artworks and architecture into their courses of study in other disciplines. The minor maintains the geographical breadth, historical depth, and academic rigor of the major but comprises fewer courses and does not require the study of a foreign language. Art History minors may not write honors theses.

ADMISSION TO THE MINOR

A prospective student must have taken a minimum of three Art History courses (including one 100-level and two 200-level courses), have a B average in Art History, and a B average overall.

To apply for the minor, students need to complete the minor declaration form found in WesPortal. Students are assigned a minor advisor and are encouraged to take part in program events.

MINOR REQUIREMENTS

To complete the Art History Minor, students take six credits, including one introductory course (100-level) and five intermediate (200-level) and advanced courses, one of which must be a seminar (300-level). The intermediate and advanced courses must encompass study in the following geographical areas and historical periods:

Geographic Areas (1 course in 3 of the 5 different geographic areas)

- The Americas
- Europe
- East Asia
- South and Southwest Asia
- Africa

Historical Periods (1 course in 2 of the 3 historical periods)

- Historical Period 1 (up to ca. 1400)
- Historical Period 2 (ca. 1400 to ca. 1800)
- Historical Period 3 (ca. 1800 to the present)
- All courses originating in the Art History program are eligible for the minor.
- No courses numbered 401 or higher may count toward the minor.
- One course in art history taken elsewhere may count toward the minor, subject to approval of the Program Director. This course may count as a 200-level course. The 100- and 300-level courses must be taken in Wesleyan's Art History program.
- All courses for the minor must be taken on a graded basis. Exceptions will be made for COL and CSS majors.

ADDITIONAL INFORMATION

For the purposes of planning, students should click here (https://www.wesleyan.edu/art/arthist/course_planning_documents.html) for our Course Planning Documents and review the following:

- ARHA Program Course Projections, which estimate when specific courses will be offered during a three-year period.
- Comprehensive List of ARHA Courses, organized by the categories they may fulfill.
- Planning Worksheet for Minors, to help students map out a course of study.

CARIBBEAN STUDIES MINOR

MINOR DESCRIPTION

The Caribbean Studies Minor engages students in the multidisciplinary study of this region at the historical center of the Americas. Peopled by indigenous, immigrant, settler, and diasporic communities, today's Caribbean has extraordinary diversity in its languages, political systems, and cultural histories —representing a microcosm of contemporary global challenges.

Coursework draws upon faculty and curricula from many programs, such as African American Studies, American Studies, Anthropology, The College of Letters, English, Latin American Studies, Religious Studies, Music, and Romance Languages (French and Spanish), among others. The minor consists of five credits: a foundational course, AMST 200 Colonialism and Its Consequences, plus four courses from other disciplines.

MINOR REQUIREMENTS

- The Caribbean Studies Minor consists of five credits.
  - AMST 200, Colonialism and Its Consequences, is required as a foundation course for the Minor.
  - The four additional courses may be drawn from courses that fall within the category of Caribbean Studies. While a specific distribution of the four electives across disciplinary and interdisciplinary fields is not required, no more than three courses in a single disciplinary field may be counted for the Minor.
  - All courses counted for the Minor should be 200-level and above.
  - While there is no general GPA requirement to declare the Minor, a grade of B or better is required for courses counted for the Minor.
  - Students who study abroad are allowed to count up to two courses for the Minor so long as the courses are focused on the Caribbean. To be counted for the Minor, study-abroad courses have to be approved in advance by the Coordinator for the Caribbean Studies Minor.

Fall 2024 Courses

Code	Title	Hours
AMST200	Colonialism and Its Consequences in the Americas	1
ENGL231	Foundations: Nation, South Asia, Diaspora	1
GOVT302	Latin American Politics	1

SPAN295	Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures	1
AFAM101	Introduction to Africana Studies: Examining the Spatial Dynamics That Constitute Diasporic Life	1
AFAM141		
AFAM175		

Spring 2025 Courses

Code	Title	Hours
AMST225	Latinidad: Introduction to Latina/o Studies	1
AFAM211	Critical Philosophy of Race	1
AFAM238	Imperial Education: Colonial Template	1
AFAM268	Caribbean Geographies	1
AFAM299	Medicine and Healing in the Black Atlantic	1
AFAM303	1492: States of War	1
AFAM309	Indentured Spatialities	1

COLLEGE OF EAST ASIAN STUDIES MINOR

MINOR DESCRIPTION

The East Asian Studies Minor (CEAS) enables students to enhance their knowledge of the history, culture, contemporary issues, and the languages of China, Japan, and Korea. Students complete any five CEAS courses, one of which may be from an approved study-abroad program. Courses may include archaeology, history, literature, culture, philosophy, religion, and political economies of the region. A key component of the CEAS Minor is the study of Chinese, Japanese, or Korean languages, in which students are expected to reach an intermediate competence level.

ADMISSION TO THE MINOR

Upon completion of any College of East Asian Studies (CEAS) course, students may apply to enter the CEAS minor. Students must fill out an online CEAS new minor student information form (https://docs.google.com/forms/d/e/1FAIpQLScnBK33CD9ypUTFW9uBS6rOubPLyd69FFpJ4yVxaExlq4Jgdg/viewform) and then submit a minor declaration via the Minor Declaration Tool in the electronic portfolio.

MINOR REQUIREMENTS

To earn the CEAS Minor, students must complete a minimum of 5 courses in CEAS. Only courses taken for a grade can be counted towards the Minor (unless said courses are only offered CR/U, such as CLAC and other specific courses). No more than two of the five courses can be language courses. No more than two of the five courses can be performance or studio art courses. No more than one of the five courses can be a study abroad course. Seniors must complete the Minor Certification form in their portfolio.

Students Minoring in CEAS must attain, at minimum, intermediate-level proficiency in Chinese, Japanese, or Korean. Intermediate-level competency is demonstrated by the successful completion of CHIN 206, JAPN 206, or KREA 206 (second-year level language courses). No more than two of the five required Minor courses can be language courses. This means that students beginning Chinese, Japanese, or Korean language study at Wesleyan may have to take as many as seven courses to fulfill Minor requirements (since four courses would be required to reach intermediate competence, of which only two will count toward the Minor).

Although successful completion of 206-level training in CEAS language classes is the most straightforward way to demonstrate intermediate-level language proficiency, students with pre-existing proficiency in Chinese, Japanese, or Korean (including “native speakers”) may petition to satisfy the intermediate-level proficiency requirement of the Minor on this basis. Students who can successfully demonstrate this proficiency, that is, may earn the CEAS Minor simply through taking five CEAS classes, and without necessarily taking language classes. Students wishing to exercise this option must contact the respective Language Coordinator to undergo a proficiency assessment one year prior to graduation (that is, in Spring semester of Junior year). Students not meeting proficiency requirements at this point may pivot to taking language training culminating in 206 in their Senior year, or re-take the proficiency assessment immediately prior to graduation.

DATA ANALYSIS MINOR

MINOR DESCRIPTION

The Data Analysis Minor provides students with a basic introduction to data analysis, giving them the theory and practical skills needed to collect and prepare data for analysis, explore and visualize data, build models and test hypotheses, discover insights, and communicate results meaningfully. Students will strengthen their ability to apply statistical, mathematical, and programming methods to traditional areas of empirical research within their fields. To complete the minor, five course credits are required in the following areas: Basic Knowledge, Mathematical, Statistical and Computing Foundations, and selected Applied Electives.

MINOR REQUIREMENTS

Code	Title	Hours
Basic Knowledge Courses		
Select one of the following:		1
BIOL242	Quantitative Methods for the Biological and Environmental Sciences	
MATH132	Elementary Statistics	
PSYC200	Statistics: An Activity-Based Approach	
QAC201	Applied Data Analysis	
QAC201Z	Applied Data Analysis	
QAC211	Digging the Digital Era: A Data Science Primer	
QAC250	An Introduction to Data Journalism	
Mathematical, Statistical, and Computing Foundation Courses		
Select two courses from the following, each from a different group:		2
Mathematical Foundations		
MATH221	Vectors and Matrices	
MATH223	Linear Algebra	
MATH228	Discrete Mathematics	
MATH274	Graph Theory	
QAC220	Applied Vectors and Matrices	
Statistical Foundations		
ECON300	Introductory Econometrics	
MATH231	An Introduction to Probability	
MATH232	Mathematical Statistics	
QAC300	Data Science I: Statistical Foundations	
Computing Foundations		
BIOL265	Bioinformatics Programming	
COMP112	Introduction to Programming	
COMP115	How to Design Programs	
COMP211	Computer Science I	
COMP212	Computer Science II	
Applied Electives		
Select two credits from the following:		2
E&ES280	Introduction to GIS	
ECON385	Advanced Econometrics	
ECON386	Introduction to Forecasting in Economics and Finance	
GOVT366	Empirical Methods for Political Science	
GOVT378	Advanced Topics in Media Analysis	
GOVT380	Public Opinion and Polling Lab	
PHYS340	Computational Physics	
QAC216	Introduction to Survey Design and Analysis	
QAC231	Introduction to (Geo)Spatial Data Analysis and Visualization	
QAC239	Proseminar: Machine Learning Methods for Audio and Video Analysis	
QAC241	Introduction to Network Analysis	
QAC251	Data Visualization: An Introduction	
QAC251Z	Data Visualization: An Introduction	

QAC305	Exploratory Data Analysis and Pattern Discovery
QAC307	Experimental Design and Causal Inference
QAC311	Longitudinal Data Analysis (0.5 credit)
QAC312	Hierarchical Linear Models (0.5 credit)
QAC313	Latent Variable Analysis (0.5 credit)
QAC314	Survival Analysis (0.5 credit)
QAC320	Applied Time Series Analysis
QAC323	Bayesian Data Analysis: A Primer (0.5 credit)
QAC356	Advanced R: Building Open-Source Tools for Data Science
QAC378	DeltaLab: Computational Media Analysis
can count QAC 380 or 381, not both	
QAC380	Introduction to Statistical Consulting
QAC381	QAC Praxis Service Learning Lab
QAC385	Applications of Machine Learning in Data Analysis
QAC386	Quantitative Textual Analysis: Introduction to Text Mining
QAC387	Generative AI -- LLM Tools for Data Analysis
QAC388	Deep Learning and Large Language Models: An Introduction

NOTE: at least one credit from the electives group should be at the 300 level

ADDITIONAL INFORMATION

- There may be prerequisite courses required for some of the courses that count toward the minor, such as calculus. These prerequisites do not count toward the minor, and students attempting to complete the minor are not recused from these prerequisites.
- Mathematics majors cannot count courses in the foundations groups already covered by their major toward the minor. They must instead complete one course from the statistical foundations group and complete three applied elective courses. Alternatively to completing three applied elective courses, they can take either MATH232 or COMP212 and complete two applied elective courses.
- Computer science majors cannot count courses in the foundations groups already covered by their major toward the minor. They must instead complete one course from the statistical foundations group and complete three applied elective courses. Alternatively, they can complete both MATH231 and MATH232 and complete two applied elective courses.
- Economics majors and minors cannot count ECON300 toward the minor and must instead complete one course from each of the other two foundation groups.
- Students cannot count more than one course toward this minor that is also counted toward completion of any other of their majors or minors.
- One course taken elsewhere may substitute as appropriate for any of the above courses and count toward the minor, subject to the QAC Advisory Committee's approval (where routine approval may be delegated to the QAC Director).
- A more advanced course can substitute for the basic knowledge course, subject to approval. Students with good quantitative skills are strongly encouraged to do this.
- Students cannot receive both the data analysis minor and the Applied Data Science Certificate (p. 1130).
- Only graded courses can satisfy the requirements for the data analysis minor and the applied data science certificate. Courses completed with a CR/U grading mode will not satisfy the requirements of the two programs.

ECONOMICS MINOR

MINOR DESCRIPTION

The Minor in Economics provides students with a solid historical, theoretical, and analytical basis for understanding the ways goods and services are produced, allocated, and distributed within societal structures. Numerous fields value the skills and knowledge gained from studying economics, including research, quantitative and statistical analysis, strategic problem-solving, and understanding the dynamics of human behavior, markets, and institutions.

ADMISSION TO THE MINOR

Students intending to minor in Economics must complete Introduction to Economic Theory (ECON110). The prerequisite for ECON110 is calculus. The calculus requirement can be fulfilled by completing ECON102, MATH120, or MATH121. It can also be fulfilled by a score of 4 or higher in AP Calculus (AB or BC), by receiving a 5 or higher on the IB Higher Math test, or by placing into MATH122 or higher according to the Wesleyan Math Placement test. Students can be exempted from the ECON110 course requirement if they have a score of 4 or higher on both AP Micro and AP Macro or equivalent IB scores. Students who are exempted from ECON110 must meet the math prerequisite and complete a 200-level Economics elective before continuing into the core courses (ECON300, ECON301, and ECON302).

Students who are exempted from ECON110 must meet the math pre-requisite and complete a 200-level Economics elective before continuing into the core courses (ECON300, ECON301, and ECON302).

Through spring 2026: to be accepted into the minor, students must also have completed or be enrolled in Introductory Econometrics (ECON300), Microeconomic Analysis (ECON301), or Macroeconomic Analysis (ECON302). All of these classes require students to have completed ECON110 or the bypass route (scores of 4 or higher on both AP Micro and AP Macro or equivalent IB scores, completion of a 200-level Economics elective, and the math requirement for ECON110).

From fall 2026: to be accepted into the minor, students must also have either completed or be enrolled in Microeconomic Analysis (ECON301), or Macroeconomic Analysis (ECON302). All of these classes require students to have completed ECON110 or the bypass route (scores of 4 or higher on both AP Micro and AP Macro or equivalent IB scores, completion of a 200-level Economics elective, and the math requirement for ECON110). From fall 2026 ECON300 will be replaced with ECON303 which will require both ECON301 and ECON302 as prerequisites.

Through spring 2026: a student who fails to obtain a grade of C+ or better in ECON110may be admitted to the minor only after obtaining a grade of C+ or better in one of ECON300, ECON301, or ECON302 and a student who has the ECON110 bypass must obtain a grade of C+ or better in one of ECON300, ECON301, or ECON302.

From fall 2026: a student who fails to obtain a grade of C+ or better in ECON110may be admitted to the minor only after obtaining a grade of C+ or better in ECON301 or ECON302.

In addition, there is a probability and statistics pre-requisite forECON300 and ECON302. The probability and statistics prerequisite can be fulfilled by completing ECON103, MATH132, or PSYC200, or by receiving a score of 4 or higher on AP Statistics or a 5 or higher on the IB Higher Math test.

Prospective economics minors are strongly encouraged to complete ECON301 and ECON302 by the end of sophomore year, and to have completed ECON300 by the end of junior year.

MINOR REQUIREMENTS

The Economics Minor curriculum consists of three types of courses: Introductory, Core, and Electives. All students minoring in economics must complete five courses (three core courses and two electives) in addition to completing or passing out of ECON110 . All courses counted toward the economics minor must be taken for a letter grade. All core courses must be taken at Wesleyan.

- The three core courses are: ECON300, ECON301, and ECON302
- The elective courses are numbered 201 and higher.
- One of the two electives must be an upper-tier elective, numbered 303 to 399.
- No courses numbered 401 or higher may count toward the minor.
- No courses in other departments, including CSS, may count toward the minor.

  One elective course in economics taken at another institution may count toward the minor as the lower-tier elective only, subject to the department chair's approval

EDUCATION STUDIES MINOR

MINOR DESCRIPTION

The Minor in Education Studies (EDST) helps students understand education and its relationship to society. Students will critically analyze educational institutions, practices, and theory—from early childhood through adulthood—using local, national, and global lenses. Foundational courses provide a background in the philosophy, history, and psychology of education, and further study illuminates aspects such as human development and cognition, pedagogy, curriculum design, methodologies, and sociocultural approaches. Rounding out their academic work, students in the minor will gain direct insight through a hands-on practicum experience.

ADMISSION TO THE MINOR

In order to declare the minor, students must first attend at least three events sponsored by the College, one of which must be academic in nature, and turn in a short reflection on each event. These reflections should be emailed to CES@wesleyan.edu. After review of the submitted reflections, students will be informed that they may declare the minor via their WesPortal. Alternatively, students who have taken EDST105 Foundations of Education Studies may declare the minor without the events and reflection.

Any student interested in Education Studies should join our **Wesleyan Education Network email list** where different members of the education studies community post events, opportunities, and more. You can subscribe to the list by emailing wesleyan-education-network-glist+subscribe@wesleyan.edu.

MINOR REQUIREMENTS

Students must take a minimum of 4.5 credits plus a practicum experience, through an approved class (at least .5 credit) or an approved independent practicum experience. Some courses can count toward different requirements, but students need to choose which requirement is being fulfilled by which course: an individual student cannot use the same course to fulfill multiple requirements toward the Minor. After declaring the minor students will meet with an advisor to map out their academic plan.

Students can use the same course to fulfill requirements in two academic programs (for example, a cross-listed course in ITAL and EDST could count toward both the EDST Minor and the ITST Major), if that is acceptable to the other department.

These are the requirements for the Minor in Education Studies:

1. Core Course (1 credit)
2. Category 1: Cognition, Development, & Science of Learning (1 credit)
3. Category 2: Social and Structural Analyses of Education (1 credit)
4. Category 3: Research Methods & Data Analysis (1 credit)
5. Pedagogy (.5 credit minimum)
6. Practicum (.5 credit or equivalent)

The courses may be completed in any order consistent with their prerequisites.

COURSE PETITIONS

Students may petition to substitute a different course to meet an Education Studies requirement by completing this petition form (https://forms.office.com/Pages/ResponsePage.aspx?id=eWz9qXFt80mREQyOWR3D0ZrbqMi0a91AqegIpgTx3ytUNDVQQ0FUU0NNWEExRzVPS1IyS
The petition form asks students to justify the substitution and to upload a syllabus or other supporting information. Students will be notified via email whether their petition requests are approved. Once approved, they can request the exception via Stellic in their WesPortal.

COURSE LISTS AND ARCHIVE

Click here to view all courses for the current year, as well as the course archive of all approved courses that fulfill requirements for

the Education Studies Minor. (https://docs.google.com/document/d/1gtZCuuzvRH8epYls8AF5EhE_RVAuvGu6A-gONyk-D_k/edit?usp=sharing)

CORE COURSE

Students must take one core course in Education Studies that broadly covers the field.

Code	Title	Hours
Core (1 credit)		
EDST230	Schools in Society (Foundations)	1
PSYC/EDST253	Educational Psychology	1

BREADTH COURSES

Students must take one course in each of three core areas of Education Studies. There are multiple options across the curriculum for each category.

Category 1: Cognition, Development, & Science of Learning

Category 2: Social and Structural Analyses of Education

Category 3: Research Methods & Data Analysis

PEDAGOGY & PRACTICUM

Students must complete two aspects of a practicum experience: pedagogy and practice.

- Students must take a minimum .5 credit course focused on pedagogy; there are several .5 and 1 credit courses with this focus offered at Wesleyan.
- Students must also complete a teaching practicum/in-school experience with a minimum of 20 hours of student contact. The practicum experience does not need to be credit-bearing, as long as the 20 hour requirement is met.
- Students can meet both the pedagogy and practicum portions of the requirement separately, or they can meet them with a single 1-credit course (i.e., a service learning course that provides 20 hours of student contact *and* covers elements of pedagogy). Apart from service-learning courses, many options exist to fulfill the practicum requirement through JCCP programs, summer programs, teaching apprenticeships, and internships while studying abroad.
- If the practicum experience is something other than one of the approved courses, student must submit a petition. See Practicum (https://www.wesleyan.edu/education/academics/Practicum.html) information.

FILM STUDIES MINOR

MINOR DESCRIPTION

The Minor in Film Studies enables students to explore the history and craft of filmmaking. Students begin with an introductory course in the language of cinematic storytelling, exploring how advances in technology bring new challenges and opportunities, surveying major directors and genres, and demonstrating how film exists at the intersection of business, technology, and art. Additionally, students choose five additional courses in film history, visual storytelling, criticism, or production. The Minor provides a flexible format that complements a major course of study in a different department at Wesleyan.

Students in the Film Studies minor develop a critical and creative approach to the medium based on a strong visual vocabulary, extensive viewing, and a grasp of film production.

ADMISSION TO THE MINOR

In accordance with the University guidelines, students minoring in film studies must complete six courses for a grade (courses taken as Credit/Unsatisfactory will not count) and achieve a B average. Internships and student forums do not count toward the minor.

Before becoming eligible for the minor, you must complete FILM307 as a prerequisite with a grade of B or better. You must also activate a minor course registration chart with the department (see the minor administrator). Transfer courses cannot be used for the prerequisite. After acceptance into the minor, you may submit courses taken overseas or at other universities to be considered on a case-by-case basis for credit.

MINOR REQUIREMENTS

FILM307 should be taken during the first or sophomore year. Students must meet with the minor administrator, Lisa Mingione at lmingione@wesleyan.edu to declare the minor. After that, they must complete five additional courses before graduation. Some course selections are subject to prerequisites from other departments.

Courses

The list of courses currently recognized as part of the film studies minor includes. (Please note that not all courses will be available every semester.)

Code	Title	Hours
FILM301	History of Spanish Cinema	1
FILM304	History of Global Cinema	1
FILM305	Sophomore Colloquium for Declaring Majors	1
FILM307	Cinematic Storytelling: Styles, Tools, and Journeys	1
FILM311	Israel in Therapy: Society Under the Influence of TV Series	1
FILM230	Introduction to Korean Cinema	1

ANTH285	Film and Anthropology	1
ANTH361	Calderwood Seminar in Public Writing: The Dark Turn in Television Storytelling	1
CEAS232	Introduction to Chinese Film	1
CEAS234	Modern Korea in Film and Fiction	1
CEAS248	South Korean Cinema: Re/imagining Modern History on Screen	1
CEAS266	Modern Korean Women's Literature and Film	1
CJST234	Israel in Therapy: Society Under the Influence of TV Series	1
CJST248	Designing Reality in Israeli Documentary Film	1
COL249	Thinking By Analogy: The Philosophical Use of a Literary Form	1
GOVT298	Terrorism and Film	1
GOVT387	Foreign Policy at the Movies	1
REES233	Introduction to Russian and Soviet Cinema	1
RL&L233	Modern Italy on the Silver Screen: 1960--2015	1
RL&L301	History of Spanish Cinema	1
SPAN280	Screening Youth in Contemporary Latin American Cinema	1
FILM232	Minority Voices in Japanese Film and Literature	1
FILM231	Wartime Film Culture in the Japanese Empire	1
FILM230	Introduction to Korean Cinema	1
ARST286	Introduction to Time-Based Media	1
ARST386	Intermediate Time-Based Media	1
ITAL245	Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)	.5

FRENCH STUDIES MINOR

MINOR DESCRIPTION

The Minor in French Studies provides students with a command of the French language sufficient to live and work successfully in a French-speaking environment. Students gain a fundamental background in French-language literature and Francophone modes of thought, expression, cultures, history, and society.

In addition to gaining a solid grounding in language classes taught on campus in French, this flexible, interdisciplinary program gives students the opportunity to take classes offered by other departments that include the study of French culture, history, and politics. These courses may be taken in French or English and may be offered on-campus or abroad.

Students who minor in French develop transferrable language skills that enhance their career opportunities in the global job market.

ADMISSION TO THE MINOR

Students must have completed FREN215 or a higher level course with a grade of at least a B to be admitted to the minor.

MINOR REQUIREMENTS

The minor consists of a minimum of five courses beyond FREN215:

- **Four FREN courses numbered 216-399.**
  - These courses must be taken on campus in French.
  - Courses numbered **216-299** are introductory courses intended for students who have completed FREN215 , who have taken an equivalent course elsewhere, or who have placed out of FREN215 through the placement test. In general, these courses are designed for students who have not yet studied abroad in a French-speaking country.
  - **300-**level courses are upper-level courses intended for students who have already completed two courses in French beyond FREN215 or who have studied abroad in a French-speaking country for at least a semester.
- **One other course** whose content is devoted substantially to the study of French or Francophone literature, history, culture, or society. This course may be taken on campus or abroad, may be in French or English, and may be chosen from among the following courses:
  - Courses from the French section's normal offering of FREN courses numbered 216-399.
  - Courses listed Romance Lang & Lit In Eng (RL&L).
  - Courses taken through approved study abroad programs.
  - Courses offered by other departments and programs on campus that include a study of French or Francophone culture, politics, or history. These courses must be approved by the student's major advisor.

A minimum grade of B is required for courses taken on campus to count toward the FRST minor.

Students minoring in FRST who receive two grades of B- or lower in FREN courses will be dropped from the minor.

ADDITIONAL INFORMATION

Students who receive a C- or lower in FREN course may repeat the course once.

Students who receive less than a B in FREN102, FREN112, or FREN215 will not normally be permitted to enroll in another FREN course or, in the case of students who receive less than a B in FREN215, to study abroad on the Vassar-Wesleyan Program in Paris.

Students who receive a B-, C+, or C in FREN102, FREN112, or FREN215 may petition the head of the French Section to be permitted to take the following course in the French sequence or study abroad on the Vassar-Wesleyan Program in Paris. In their petition, they must explain in detail what supplemental work they will undertake in order to prepare themselves for the following course in the sequence or for study abroad on the Paris program (for example: they will take a summer course). If their petition is approved, they must complete the proposed supplemental work, take the placement exam at the Fries Center for Global Studies, and place into the course they wish to take (or above FREN215 if they wish to study abroad on the Paris program) before they will be admitted to it.

Students interested in enrolling in French, Italian, or Spanish at the elementary or intermediate levels are urged to do so during their first-year and sophomore years. Department policy gives priority to first-year and sophomore students in our language classes (numbered 101–112) to allow students to study abroad and to meet the requirements of those programs requiring language study. Juniors and seniors who wish to take elementary and intermediate language courses should submit an online enrollment request and attend the first class. They may be accepted during the drop/add period if seats become available. Should a junior or senior enroll in the first course of an ampersand sequence (such as 101–102), he or she will have priority for the second course, just like first-year and sophomore students.

GERMAN STUDIES MINOR

MINOR DESCRIPTION

The Minor in German Studies is interdisciplinary in nature. It combines the close study of German language, literature, history, and culture with broad humanistic inquiry into trends and structures of German-speaking societies. Four of the six required courses are taught in German on the Wesleyan campus, with other electives available as local classes or study-abroad coursework.

Students who minor in German Studies develop transferrable language skills along with cultural knowledge and understanding that will enhance their career opportunities in the global job market.

ADMISSION TO THE MINOR

Any student who intends to earn the minor in German studies should speak with a faculty member of the department by the end of the sophomore year. Satisfactory completion of the minor will be certified by the department.

MINOR REQUIREMENTS

The minor requires six course credits with a minimum GPA of B. Four of the courses must be taught entirely in German and must be above the GRST102 level, at least one of these four courses must be at the 300-level. At least three of these must be taken at Wesleyan. The other two courses may be in either English or German. All German language courses below the 300-level counted toward the minor must be taken for a letter grade. Please note GRST101 and GRST102 do not count towards the German Studies minor.

HISTORY MINOR

MINOR DESCRIPTION

The Minor in History enables students to explore and develop a broad understanding of the human condition as it has unfolded through time. Students assess evidence and analyze conflicting interpretations of the past, revealing insights about the current times and providing guidance for the future. The History Minor consists of six required courses all taught at Wesleyan. It gives students knowledge of diverse peoples, geographies, cultures, and ways of life while, at the same time, developing their skills in critical thinking, analytical research, persuasive writing, and public speaking. The History Minor is a favorite

Minor for students with Majors from across the university curriculum--from the Sciences, the Social Sciences, and the Humanities.

ADMISSION TO THE MINOR

Students can declare the minor through the Minor Declaration tool in WesPortal.

MINOR REQUIREMENTS

(Approved by History Department on 2 February 2023) ~~7 April 2021)~~

Six History Courses Total

N.B. -**Higher** ~~**higher**~~ **level** History courses may be substituted for **lower level** ones. ~~ones~~

-Courses must be taken at Wesleyan; however, up to three courses taken by transfer students at their previous institution may count towards the minor. ~~Wesleyan.~~

-Courses taught on campus by History Department faculty but not cross-listed as HIST courses can count towards the minor.

Courses to Satisfy the History Minor

- **Three History courses 150 or higher**
- **Two History courses 300 level or higher**
  - One History course must devote at least 50% of its attention and content to the period before 1800.
  - Only courses taught by faculty appointed in or affiliated with the History Department may count toward the minor.
  - Tutorials, education in the field, and student forums cannot be counted toward the minor.
  - AP or IB credit cannot count toward the minor.

MEDIEVAL STUDIES MINOR

MINOR DESCRIPTION

The Minor in Medieval Studies (MDST) provides students with a basic knowledge of the history and culture of the European Middle Ages in an interdisciplinary context. Students complete six courses cross-listed with MDST, with at least two in the arts and humanities and two in the social sciences. Minors are strongly encouraged to take at least two years of a modern foreign language. Minors who anticipate going on to graduate work in the medieval or early modern period are strongly encouraged to take at least two years of Latin as well.

ADMISSION TO THE MINOR

No specific courses are required for admission to the Medieval Studies minor.

MINOR REQUIREMENTS

Students minoring in Medieval Studies complete 6 courses within MDST or approved by the chair of the Medieval Studies program. At least 2 must be taken in arts and humanities and 2 in social sciences.

Minors are expected to be proficient in a modern foreign language and encouraged to gain some knowledge of Latin, Greek, or Arabic.

PLANETARY SCIENCE MINOR

MINOR DESCRIPTION

The Minor in Planetary Science exposes students to an emerging interdisciplinary field that seeks to understand the origin and evolution of the solar system in which we live and the other solar systems that we have identified in our galaxy. Science questions include: How do planets form? How common are they in the universe? How do they evolve? Is there or was there ever life on other planets? This field has grown significantly over the last decade with major advances in our understanding of Mars, asteroids and the outer solar system and the discovery of hundreds of exoplanetary systems. Planetary research is a primary focus of NASA's current and future missions.#The minor comprises five graded courses plus at least three offerings of the 0.25 credit Planetary Science Seminar.

MINOR REQUIREMENTS

The planetary science minor consists of 5 graded courses plus at least 3 offerings of the 0.25 credit Planetary Science Seminar.

Code	Title	Hours
Introductory Courses		**2**
Students are expected to take Introductory Courses to both of the major areas important to our field, Astronomy and E&ES:		
ASTR155	Introduction to Astrophysics	
E&ES101	Dynamic Earth (or an upper level (200+) E&ES course)	
or E&ES115	Introduction to Planetary Geology	
E&ES155	Earth System Science	1.25
Intermediate Courses		**3**
The minor requires three upper-level courses chosen from a list of relevant offerings in Astronomy and E&ES. At least one of the intermediate courses would need to be from each of the departments, in order to preserve the interdisciplinary nature of the minor. These courses fluctuate from year to year but would currently be drawn from the following set:		
ASTR231	Stellar Structure and Evolution	
ASTR224	Exoplanets: Formation, Detection, and Characterization	
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	
E&ES215 & E&ES216	Earth Materials and Earth Materials Laboratory	

E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	
E&ES223 & E&ES224	Structural Geology and Field Geology	
E&ES234 & E&ES235	Geobiology and Geobiology Laboratory	
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	
or E&ES380		
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	
E&ES319	Meteorites and Cosmochemistry	
E&ES321	Planetary Evolution	
E&ES375	Modeling the Earth and Environment	
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	
Advanced Courses		**0.75**
To qualify for the minor a student must complete AST/E&ES 555 Planetary Science Seminar during at least three of the four semesters available in their junior and senior years. We encourage students to complete all four semesters if possible in order to obtain complete coverage of our cycle of topics.		
E&ES/ASTR555	Planetary Science Seminar	
Research (Optional)		
While research in the area of planetary science is not required, we hope that most students seeking this minor will elect to do research with a member of the Planetary Science Group. Research can be done during the semester or over the summer.		

RUSSIAN, EAST EUROPEAN & EURASIAN STUDIES MINOR

MINOR DESCRIPTION

The Minor in Russian, East European, and Eurasian Studies (REES) offers students a nuanced, interdisciplinary understanding of contemporary Russia and other post-Soviet states, their culture, society, history, politics, and economic institutions. The REES minor consists of six courses including language study, social sciences, and literature and culture – providing insights into other worldviews and social systems. Study abroad is encouraged.

ADMISSION TO THE MINOR

Any student who intends to earn the minor in REES should speak with the program chair by the end of the junior year at the latest.

MINOR REQUIREMENTS

The minor in REES consists of six courses, in which the student must achieve a GPA of B. These courses must include RUSS101 and RUSS102 or two semesters of Russian language study at the appropriate level and four more REES courses, of which two must be taken in the areas of social sciences and/or literature & culture (see course list). The remaining two courses may be in either of the two areas or in Russian language. Two of the courses may be taken during study abroad (with prior approval). Students should plan the minor in consultation with REES faculty.

If a student places out of one or more semesters of language, they must take enough courses in REES to add up to a total of 6.

Students who wish to fulfill the language requirement by studying a language of Eastern Europe or Central Asia other than Russian may do so, subject to approval by the chair.

Satisfactory completion of the minor will be certified by the program.

CERTIFICATES

Certificates provide curricular options that complement current departmental and interdisciplinary majors. They are designed to bring coherence to programs of study that include courses from many departments and programs. For each program, model curricula are provided to guide students in their choice of courses. Wesleyan currently has twelve certificate programs in place.

- Certificate in Applied Data Science (p. 1130)
- Certificate in Social, Cultural, and Critical Theory (p. 1131)

CERTIFICATE IN APPLIED DATA SCIENCE

INTRODUCTION

The Applied Data Science Certificate#provides students with an introduction to data analysis, including the theory and practical skills needed to collect and prepare data for analysis, explore and visualize data, build models and test hypotheses, discover insights, and communicate results in meaningful ways. The coursework builds on these skills and continues the development of strong statistical computing and programming skills by exposing students to "Big Data" topics such as deep learning, high-performance computing, text mining, machine learning, and AI applications in data analysis.

Through the practicum experience, students will work closely with a faculty member using real-world data to apply these skills to their interests in a semester long research project. To earn the Applied Data Science Certificate, students must complete#seven graded courses and the capstone Data Analysis Practicum.

CERTIFICATE REQUIREMENTS

To earn the Applied Data Science Certificate, students must complete seven graded courses and the capstone Data Analysis Practicum. Before admitted to the program students are asked to submit a tentative plan of study.

Code	Title	Hours
Select one of the following basic knowledge courses:		**1**
BIOL242	Quantitative Methods for the Biological and Environmental Sciences	
MATH132	Elementary Statistics	
PSYC200	Statistics: An Activity-Based Approach	
QAC201	Applied Data Analysis	
QAC211	Digging the Digital Era: A Data Science Primer	
QAC250	An Introduction to Data Journalism	
Select two courses from the following mathematical, statistical and computing foundation courses, each from a different group:		**2**

QAC378	DeltaLab: Computational Media Analysis	
QAC380	Introduction to Statistical Consulting	
can count QAC 380 or 381, not both		
QAC381	QAC Praxis Service Learning Lab	

NOTE: at least one of the electives credit should be a the 300 level	
The capstone Data Analysis Practicum that includes an ethics and epistemology seminar discussion as well as completing an independent data science project.	**1**

ADDITIONAL INFORMATION

- Some of the courses that count toward the certificate may have a prerequisite, such as calculus. These prerequisites do not count toward the certificate, and students attempting to complete the certificate are not recused from these prerequisites.
- Mathematics majors cannot count courses in the foundations groups already covered by their major toward the certificate. They must instead complete one course from the statistical foundations group and complete three applied elective courses. Alternatively to completing three applied elective courses, they can take either MATH232 or COMP212 and complete two applied elective courses.
- Computer science majors cannot count courses in the foundations groups already covered by their major toward the certificate. They must instead complete one course from the statistical foundations group and complete three applied elective courses. Alternatively, they can complete both MATH231 and MATH232 and complete two applied elective courses.
- It is strongly recommended that students who are not mathematics or computer science majors take courses in the computing foundations group to satisfy the certificate requirements. They can also substitute either MATH232 or COMP212 for one of their applied elective courses.
- Economics majors and minors cannot count ECON300 toward the certificate and must instead complete one course from each of the other two foundation groups.
- Students cannot count more than one course towards this certificate that also counts toward completion of any of their majors or minors.
- One course taken elsewhere may substitute as appropriate for any of the above courses and count toward the certificate, subject to the QAC Advisory Committee's approval (where routine approval may be delegated to the QAC director).
- Students can substitute a course from among the applied data science and applied elective courses for the basic knowledge course, subject to approval.
- Only graded courses can satisfy the requirements for the data analysis minor and the applied data science certificate. Courses completed with a CR/U grading mode will not satisfy the requirements of the two programs.
- Students cannot receive both the data analysis minor and the applied data science certificate.

CONTACT

Director of the QAC

CERTIFICATE IN SOCIAL, CULTURAL, AND CRITICAL THEORY

CERTIFICATE REQUIREMENTS

To help students develop proficiency in the study of social, cultural, and critical theory, this certificate encourages students to seek out theory-intensive courses in a wide range of disciplines and departments at Wesleyan.

To qualify for the Social, Cultural and Critical Theory (SCCT) Certificate, a student must successfully complete six authorized courses, hosted by at least three different departments or programs. All classes must be taken on a graded (A-F) scale. The minimum grade required in each course is a B-. Courses taken on a CR/U scale count only in the case of COL majors and CSS majors; for the latter, only CR/U courses taken during their sophomore year count. Of the six courses that count for the certificate, no more than two may be lecture courses.

Courses that are not listed as SCCT courses on WesMaps or included on the certificate's website (wesleyan.edu/theory (http://wesleyan.edu/theory)) may be used to fulfill certificate requirements if deemed suitable by the certificate director.

Up to two of the six courses may be taken during a semester abroad, and up to three may be taken during a year abroad. With authorization from the certificate director, students may also count up to two courses transferred from another U.S. institution.

ADDITIONAL INFORMATION

Students who wish to earn the certificate should declare it in their WesPortal and then meet with the certificate's director, Professor Ren Ellis Neyra (rellisneyra@wesleyan.edu), preferably in the fall of their junior year.

CLUSTERS

- Asian American Studies Cluster (p. 1132)
- Christianity Studies Cluster (p. 1132)
- Community-Engaged Learning Cluster (p. 1133)
- Disability Studies Cluster (p. 1134)
- Health Studies Cluster (p. 1135)
- Queer Studies Cluster (p. 1136)
- Sustainability and Environmental Justice (p. 1136)
- Urban Studies Cluster (p. 1137)

ASIAN AMERICAN STUDIES CLUSTER

Asian American Studies focuses on exploring the historical and current presence of Asians in the Americas. The field aims to understand both how people from East Asia, Southeast Asia, and South Asia have been racialized in the context of the United States, as well as how Asian Americans have constructed their identity and stories. This cluster also explores ideas of diasporic identity and transnational migrations and how they shape Asian America. Understanding the social and historical presence of Asians in America is crucial to an understanding of racial formation, immigration, citizenship, and nationality in the United States. Asian American Studies examines the experience of Asians in the United States, and how the unique history of marginalization and exclusion informs today's issues within the Asian American community.

The Asian American Studies course cluster introduces students to the central concepts of racialization, migration, and intersectionality as they relate to Asians in the United States. The cluster is interdisciplinary, incorporating perspectives from the humanities and social sciences.

CHRISTIANITY STUDIES CLUSTER

COORDINATOR

- STEVEN HORST (HTTP://WWW.WESLEYAN.EDU/ACADEMICS/FACULTY/SHORST/PROFILE.HTML)

Christianity has been a defining force in European and Euro-American history and culture, and has profoundly influenced the visual arts, theater, music, poetry, and philosophy. It has also spread throughout the world. The Christianity Studies cluster offers a way to study it without the constraints of a conventional major. As befits its place within a university curriculum, Christianity Studies courses are taught by people who come from a variety of faith commitments, including secular ones.

PATHWAYS

The Christianity Studies cluster offers a set of courses, changing from year to year, which can be grouped under the following headings, as pathways to assist in gaining a coherent understanding of Christianity. These are:

Christian Thought

Christianity's Role in the Development of Modern Institutions

Christianity and Contemporary Social Debates

World Christianity

Christian Origins

Christian Writers

Christianity in Music

Christianity in the Visual Arts*

Although these pathways should provide assistance in devising a more coherent educational experience, those marked with an asterisk also suggest links to various information available through the internet, such as bibliographies, important texts, and musical and video clips.

COMMUNITY-ENGAGED LEARNING CLUSTER

Department website: http://www.wesleyan.edu/slc/index.html (http://www.wesleyan.edu/slc/)

COORDINATOR

- AMY GRILLO (AGRILLO@WESLEYAN.EDU)

Community-Engaged Learning integrates experiences outside the classroom with an academic curriculum taught within the classroom. As one form of experiential education, community-engaged learning seeks to broaden students' understanding of course content through activities which are, at the same time, of service to the campus and/or surrounding community. Through structured reflection on their service, students are able to test and deepen their understanding of theoretical approaches in virtually any discipline.

The Allbritton Center (http://www.wesleyan.edu/allbritton/) for the Study of Public Life provides support and resources for faculty interested in incorporating service learning into their courses. Service-Learning Initiative Grants (http://www.wesleyan.edu/slc/facultyresources/obligations_support.html) (SLIGs) provide faculty with funds to develop their new service-learning courses. Faculty who teach service-learning courses often work closely with the Jewett Center for Community Partnerships (http://www.wesleyan.edu/jccp).

COURSES & PROJECTS

GETTING INVOLVED

Wesleyan students have a long history of getting involved in the greater Middletown community. Much of this is done through volunteer and community service through the Jewett Center for Community Partnerships (http://www.wesleyan.edu/jccp). But some academic courses—service-learning courses—also have a service component to them. In the past, students enrolled in service-learning courses at Wesleyan have:

- Conducted the homeless count required by the United States Department of Housing and Urban Development for the Middlesex Supportive Housing Coalition;
- Examined the effect of local preschools on preparing kindergarteners to be school-ready, for the Middletown School Readiness Council;
- Studied the North End landfill to determine whether the methane it produced could be harvested economically;
- Taught 20th century music compositional techniques to Middletown High School students;
- Taught dance classes at the Green Street Arts Center;
- Aided medical research at the Community Health Clinic.

If you think Wesleyan students might be of help in a project your organization or agency is doing, planning, or just imagining, the first step is an informal discussion with the Director of the Allbritton Center.

FACULTY RESOURCES

Getting Started with Service Learning

When integrated into an academic course, community service provides a pedagogical tool that allows students to develop a deeper understanding of course material. The service can take many forms such as volunteer work, research for local organizations, teaching opportunities, policy-related work, community organizing activities, as well as other forms of service activities. Students may work directly with local community members through direct engagement activities or work on campus in the service of the members of the university community.

Faculty who want to explore developing a service-learning course should feel free to contact the Director for Community-Engaged Learning, Amy Grillo, or

the Director of the Allbritton Center to discuss their ideas. Information about service-learning courses, including syllabi, from almost all disciplines is available at the Jewett Center for Community Partnerships (http://www.wesleyan.edu/ccp/) (JCCP) in Allbritton, 3rd floor. The Director for Community-Engaged Learning and other Allbritton Center staff members can assist faculty members in identifying potential community partners.

Service-Learning Initiative Grants (http://cascadewww-staging.wesleyan.edu/slc/facultyresources/obligations_support.html) (SLIGs) provide faculty with funds to support the development of a new service-learning course (transportation costs, materials, training, and stipend).

Transportation (http://www.wesleyan.edu/jccp/about/vaninfo.html) for students in service-learning courses to their community placements may be arranged through the Jewett Center for Community Partnerships.

DISABILITY STUDIES CLUSTER

COORDINATOR

- Megan Glick (http://www.wesleyan.edu/academics/faculty/mglick/profile.html)

Disability Studies is an interdisciplinary field that studies the systems of classification—medical, legal, social, cultural, historical—that organize bodily and psychological difference. Scholars in Disability Studies begin from the perspective that definitions of dis/ability vary historically and cross-culturally, and that bodily norms derived from these definitions have political, social, and economic ramifications for both disabled and nondisabled people. The field explores disability as a social and historical construction, a political identity, and a lived experience.

The Disability Studies course cluster at Wesleyan highlights courses across all divisions that explore disability from a wide range of perspectives. Courses in the cluster give students an introduction to the historical origins of disability, social and scientific classifications of embodied difference, artistic and literary representations of disability, and ongoing political struggles around access, power, and normalization. New directions in Disability Studies include questions of ethics and interdependence, global and local disparities in health and illness, human-animal boundaries, and intersections of disability justice with race, gender, sexuality, age, and other embodied forms of power.

HISTORY

Wesleyan's Course Cluster in Disability Studies was a student-led initiative. In 2010, two students active in Wesleyan Students for Disability Rights (WSDR), Ariel Schwartz and Allegra Stout, approached Professor Margot Weiss to discuss strategies for increasing Disability Studies offerings at Wesleyan (see

the WSDR 2010 statement of needs and goals here (https://sites.google.com/a/wesleyan.edu/wesleyan-students-for-disability-rights/statement-of-needs-and-goals)). Working with faculty in American Studies, Anthropology, English, FGSS, History, and SISP, Prof. Weiss proposed a Course Cluster in Disability Studies to the Wesleyan faculty in late 2010. The Cluster became part of Wesleyan's curriculum in April 2011 (see Argus coverage here (http://wesleyanargus.com/2011/04/15/disability-studies-course-cluster-added/)).

In 2014, Schwartz and Stout published a research article, "'It'll Grow Organically and Naturally': The Reciprocal Relationship between Student Groups and Disability Studies on College Campuses (http://dsq-sds.org/article/view/4253/3593)," in *Disability Studies Quarterly*. The article explores the role student activism can play in developing disability studies on campus.

EVENTS (HTTP://WWW.WESLEYAN.EDU/DISABILITYSTUDIES/EVENTS.HTML)

HEALTH STUDIES CLUSTER

Training for the health professions requires knowledge of a broad array of subjects, both science and non-science. For those seeking careers in a wide variety of health professions such broad-based training begins at the undergraduate level. Increasingly, emphasis is placed on the quantitative, medical knowledge required for patient care, the interpersonal and communication skills required for working in health care teams, and the cultural competencies needed for working with a rapidly changing patient demographic. The health studies course cluster offers students information about the types of courses at Wesleyan that provide appropriate background for those seeking careers in the health professions.

The goal of current health professions graduate programs is to create health professionals who have the knowledge, skills and flexibility to succeed in today's rapidly evolving health care environment. In addition to the commonly required science courses in biology, chemistry, and physics, studying anthropology, sociology, ethics, psychology, and statistics is an important aspect of preparation for any of the health professions, along with the ability to integrate and apply the knowledge obtained to improve health outcomes for all populations. Having appropriate courses listed in the cluster encourages students to sample the breadth of the curriculum while still achieving proficiency in the recommended areas. There are multiple courses in any one disciplinary area that can provide the needed information and conceptual foundation, so the cluster highlights many different courses offering appropriate content. We want to encourage students to pursue an integrative, interdisciplinary approach to their education in this area.

Students and advisors are encouraged to make use of the cluster listing when selecting courses to fulfill major, minor and certificate requirements, as well as general education expectations. By choosing from cluster courses students will gain proficiency in the health studies area while also mastering the in-depth disciplinary perspective that comes with their chosen major.

QUEER STUDIES CLUSTER

COORDINATOR

- **MARGOT WEISS (HTTP://WWW.WESLEYAN.EDU/ACADEMICS/FACULTY/MDWEISS/PROFILE.HTML)**

Queer Studies focuses on the social production and regulation of sexuality, asking: How does sexual normativity structure and shape diverse social and political institutions? What are the intersections of sexual marginality and other axes of difference (gender, race, ethnicity, disability, class, indigeneity, nation)? How does the social organization of desire produce forms of oppression and of resistance in varied places and times?

The Course Cluster in Queer Studies at Wesleyan includes courses across the humanities, the humanistic social sciences, and the interdisciplinary programs. Particular research and teaching strengths at Wesleyan include queer theory, theories of difference and embodiment (including disability and trans studies), queer of color critique, and transnational sexuality studies. Wesleyan Queer Studies courses are listed on WesMaps (https://owaprod-pub.wesleyan.edu/reg/!wesmaps_page.html?stuid=&facid=NONE&subj_page=XQST&term=1199).

If you have questions regarding Queer Studies at Wesleyan, please contact the cluster's coordinator, Professor Margot Weiss (mdweiss-at-wesleyan.edu (mdweiss@wesleyan.edu)).

SUSTAINABILITY AND ENVIRONMENTAL JUSTICE

In 2019, Wesleyan launched a new course cluster in sustainability & environmental justice (https://iasext.wesleyan.edu/regprod/!wesmaps_page.html?stuid=&facid=NONE&subj_page=XSEJ&term=1189). Encompassing climate change, ecological sustainability, and environmental justice, this course cluster recognizes that sustainability and environmental justice are (or should be) central to public policy debates, scientific and intellectual inquiry, and the foundations of social and economic life. By framing sustainability and environmental justice together, we draw attention to equitable access to

protection to all species without unfairly distributing risk of harm to some individuals and groups that live within them.

This course cluster is intended to cut across Wesleyan's academic divisions and within all disciplines, whether natural, social, or humanistic modes of thought and practice. A course cluster also makes these courses easier to find for both students and faculty advisors (especially important as they cross both disciplinary and divisional lines), attract prospective students to Wesleyan, and raise awareness of this field among students and faculty.

CONTACT

To submit a course to the cluster, please contact Tony Hatch at ahatch@wesleyan.edu.

DESCRIPTION

Topics that fall within sustainability and environmental justice may include but are not limited to the following eight themes and questions:

1. The relationship between power, social inequities and the development of just and sustainable communities.
2. How diversity, including biodiversity and cultural diversity, contributes to sustainable systems.
3. Dynamics of industrial production and mass consumption as they relate to environmental health and human well-being and explore strategies for developing sustainable life practices.
4. How social systems promote, or fail to promote, cultures of sustainability, especially in terms of tolerance, non-violence and peace.
5. How human well-being depends on ecosystem processes and non-toxic materials.
6. The politics and economics of sustainable development including its social benefits and environmental costs raise critical questions about what development and progress mean for different communities.
7. How science and technology shape the environmental realities and public health policies at both the local and global levels.
8. Multiple ways of representing and understanding humans' relationships to the environment, and how taken-for-granted metaphors and stories can promote or damage environmental and public health.

Wesleyan currently has several academic units that house faculty whose interests may fall under the domain of sustainability and environmental justice (e.g., the College of the Environment, Earth & Environmental Sciences), but not entirely nor comprehensively so.

Through the Wesleyan Sustainability Office and with funding from the College of the Environment, we anticipate offering pedagogical support to faculty on an ongoing basis, both increasing and sharpening course offerings in sustainability and environmental justice going forward. This will expand the number of faculty and students focused on this vitally important area of scholarly and policy concern.

COURSES ASSOCIATED WITH THE CLUSTER

For a current list of courses offered, visit WesMaps (https://iasext.wesleyan.edu/regprod/!wesmaps_page.html?stuid=&facid=NONE&subj_page=XSEJ&term=1189).

The course list includes*:
(All courses listed by originating department/program, and with the approval of the instructors)

Code	Title	Hours
AMST174	Popular Culture and Social Justice: An Introduction to American Studies	1
ANTH312	Eat, Grow, Heal: The Anthropology of Food and Justice	1

*This list represents interdisciplinary and interdivisional regularly-taught courses on Sustainability and Environmental Justice. Some courses on this list have emerged through the Sustainability Across the Curriculum initiative while others already fell within the scope of faculty research and teaching interests. Some courses position questions of sustainability and/or environmental justice at the center of inquiry, whereas others may devote only one or two course modules to such inquiry.

URBAN STUDIES CLUSTER

CO-COORDINATORS

- JOE SIRY (HTTP://WWW.WESLEYAN.EDU/ACADEMICS/FACULTY/JSIRY/PROFILE.HTML)
- DANIELLE GANDOLFO (HTTP://WWW.WESLEYAN.EDU/ACADEMICS/FACULTY/DGANDOLFO/PROFILE.HTML)

Urban Studies is an area in which Wesleyan students can have both curricular and professional interests. Several University Major proposals in the last few years have been in the area of Urban Studies, and a number of Wesleyan students go on to graduate school and/or careers in areas such as Architecture, Geography, Public Policy, Urban Policy, and Urban Planning.

AFRICAN AMERICAN STUDIES (AFAM)

AFAM101 Introduction to Africana Studies: Black Radical Thought and Praxis
This course will introduce students to the intellectual history and political economy of Africa and the African diaspora. It will take up important historical issues and questions that continue to animate, even haunt the modern world: race, race relations, and anti-Black racism; the universality of whiteness and white supremacy; the fungibility of the Black body; the vulnerability and precarity of Black life; and the complex and "unthinkable" histories and afterlives of chattel slavery, racial capitalism, settler colonialism, and the Middle Passage.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM112F Reading Black Culture (FYS)
Blackness is the lifeblood of the culture industry. U.S. popular culture--which traverses national boundaries due to the workings of imperialism and global capital--has a predominantly Black face, at the same time that Black people, in the United States and across the globe, are made to live in unrelenting proximity to death and destitution. This introductory course aims to tackle this seemingly contradictory state of things by considering the manifold ways Blackness circulates in the global cultural landscape. With the ultimate aim of increasing cultural literacy, we will engage with key questions such as: What makes a Black text? What, if any, political duty does the Black cultural worker have to the larger "Black community"? How does a critique of capital figure into Black culture? How might we conceptualize intellectual work as central to Black cultural traditions? This course traces these questions through the analytic of "reading"--as a mode of critical engagement that exceeds the textual. We will contend with Blackness in its varying permutations and figurations across the domains of literature, music, film, sport, visual art, and performance.

Prereq: **None**

AFAM115F Freedom School (FYS)
From the point of view of the U.S. nation-state, education has always been a hegemonic means to control knowledge, to calibrate unequal forms of citizenship, and to promote the social reproduction of power. Yet as W.E.B. Du Bois wrote in 1903, "education among all kinds of men [sic] always has had, and always will have, an element of danger and revolution, of dissatisfaction and discontent. Nevertheless, men [sic] strive to know." Drawing inspiration from the 1964 Freedom School Curriculum and spanning from enslavement to emancipation to the long civil rights movement, this course explores how people of African descent in the United States, and black women in particular, have used education to empower themselves, produce social change, and redefine the terms under which change may occur.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM116F The Black Radical Tradition (or Black Radicalism) (FYS)
In a nation that was founded on the liberty of white men and women, and the enslavement of people of African descent, black radical action and movements have steered the history of struggles for freedom, citizenship, equal treatment, social and economic justice, and protection from the state. Figures such as Maria Stewart, Frederick Douglass, W. E. B. Du Bois, Marcus Garvey, Paul Robeson, and Angela Davis constitute part of a long tradition of black radicals. Even as the meaning of "radical" has shifted historically, black radicals are joined by their visions of dismantling existing systems and institutions for a freer and more equitable society. Spanning the periods of black radical abolitionism, black nationalism, Black Power, and the Black Lives Matter movement, this course explores key radical thinkers, activists, and texts in historical perspective.

Credits: **1.00**
Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM141F The Revolutionary Rupture: Slavery, Latifundio & Rev. in Caribbean & Lat. Amer. Lit. & Cinema (FYS)
The word "Revolution" often evokes a vertical and/or eruptive image: a standing militant who was once a "premodern," non-European figure; a bottom-to-top explosion of imperial and colonial disorder and normative violence; a rising and world-overturning wind or "natural event." Does the eruption of an "event" worthy of the name "Revolution" begin on the imagined x-axis, say, of the earth's surface? Or does it point beyond that plane of seemingly commonly shared life? Or to that notion itself--i.e., commonly shared life--as a question? How do configurations of hell, heaven, God, Satan, the dead--what's below, what's above--come to bear in representations of "Revolutions"?

In this course, we will slow down, read, and work through these and other questions and figurations on the verge, in the midst, and/or seemingly on the other side of revolutionary ruptures--ruptures which are also returns. We will read select literatures and cinemas of Haiti, The Dominican Republic, Mexico, Guatemala, Puerto Rico, and Cuba that convey refusals of "given" life and death and that render different imperial, colonial, and neo-liberal systems of oppression and their attendant philosophies of the human, non-human, animal, native, enslaved, and blackened. The Haitian Revolution of the late 18th and early 19th century, insurrections in Chiapas before and after the Mexican Revolution of 1910, and 20th-21st century armed movements against U.S. economic and military invasions of the Caribbean and Central American regions would be the historical "flashpoints" of the course. While de-romanticizing the commercialized Che-t-shirt notion of "Revolution" in the U.S., we will, more importantly, encounter and deconstruct discourses of hetero-masculinity, modernization, mestizaje, whitening, and "development" that sometimes appear radical and/or revolutionary.

AFAM152F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.
Offering: **Crosslisting**
Grading: **A-F**

Prereq: **None**

AFAM171F The Prison State: Race, Law, and Mass Incarceration in U.S. History (FYS)
This first-year seminar course explores the history and effects of the United States' mass incarceration crisis. The U.S. incarcerates more people than any other country in the world. And people of color make up a highly disproportionate number of the over 2 million individuals incarcerated in the U.S. today. Beginning with slavery and continuing through the rise of prisons, debt peonage, Jim Crow, and the Black Lives Matter movement, the course will explore how efforts to police, detain, and control black bodies have been at the center of U.S. law and legal practice since the nation's founding. At the same time, we will compare and contrast how race, gender, and sexual orientation have been policed, controlled, and shaped through incarceration practices throughout U.S. history.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM175F The Black Atlantic, A Religious Interpretation (FYS)
The world as we know it is shaped by The Black Atlantic. This phrase centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. But Africans were not solely objects of dehumanizing subjugation and property. Africans co-created this world through material practices, traditions of knowledge, and meaning making summed up in the word religion. This course will both introduce students to the themes of Black religions formed in and through the Black Atlantic, and specific communities, for example, Rastafarianism, Islam, Buddhism, and Pentecostalism. Students will read scholarly articles and engage multi-sensory sources and first-person accounts of both themes and communities. All resources will be provided in class or via Moodle.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI177F**
Prereq: **None**

AFAM177 Introduction to Black Religions in the Americas
This course will both introduce students to the themes of Black religions formed in and through the Americas, and specific traditions, for example Santería, Islam, Christianity, and Buddhism. The Americas are formed in and through Black Atlantic. The phrase the Black Atlantic centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. The term aptly captures the shifting geographies we call the Americas. Africans were not solely objects of dehumanizing subjugation and property. Africans co-created the new world of the Americas through material practices, traditions of knowledge, and meaning

making summed up in religion. Students will read scholarly articles and engage multi-sensory sources and first-person accounts of both themes and traditions. All resources will be provided in class or via Moodle. Books for purchase are not required.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI177**
Prereq: **None**

AFAM177F August Wilson (FYS)
During his lifetime, the world-renowned African American playwright August Wilson graced stages with award-winning plays from his "Century Cycle." This course examines the cycle's 10 plays in the order in which the playwright wrote them, from Jitney (1982) to Radio Golf (2005). In all cases, we pay special attention to the playwright's presentation of language, history, memory, religion, visual art, and music within his oeuvre.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL176F, THEA175F**
Prereq: **None**

AFAM179F Not Like Us: Religion, Race, Pop Culture (FYS)
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What is this 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr. to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity, and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-RELI**
Identical With: **RELI179F**
Prereq: **None**

AFAM189F LGBTQ, or LGBT Who? Race, Sexuality, and Community in 20th-century U.S. History (FYS)
Beginning with the early-20th-century construction of the "homosexual" as a distinct identity, this course will explore the evolving, complex, and contested history of the queer community over the past century. The course will especially explore how race and gender frequently shaped marginalized yet resilient social movements for the lives, dignity, and rights of trans and other queer people of color, from the drag balls of a century ago through the Black Lives Matter movement.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

AFAM202 Introduction to African American Literature
This course will introduce students to African American literature. It will be divided into two parts. The first will pay particular attention to the experience of enslavement by focusing on several unique primary and secondary textual couplings, including (but not limited to): Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) and Saidiya Hartman's "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (1997); and Harriet Jacobs's "Incidents in the Life of a Slave Girl" (1861) together with Hortense Spillers's "Mama's Baby, Papa's Maybe: An American Grammar Book" (1987). In addition to these classic 19th-century slave narratives and contemporary sources, then, the first part will also include supplementary readings by Kenneth Warren, David Blight, Angela Davis, Alexander Weheliye, Spillers, Hartman, Farah Jasmine Griffin, Shelly Eversley, Jennifer Morgan, and Frank Wilderson. The second part will focus on 20th- and 21st-century African American literature and literary criticism. It will bring together a wide range of readings from across genres and disciplines, attempting to sketch out the major aesthetic and political features of the black literary project. Authors here will include W. E. B. Du Bois, Booker T. Washington, Michael Rudolph West, Hazel Carby, Cheryl Townsend Gilkes, Alain Locke, Shane Vogel, Alice Walker, Zora Neale Hurston, Richard Wright, Ralph Ellison, Asia Leeds, Roderick Ferguson, Claude McKay, Amiri Baraka, James Baldwin, Toni Morrison, Samuel Delany, Octavia Butler, Teju Cole, Ta-Nehisi Coates, Cornel West, Claudia Rankine, Warren, and Fred Moten.

AFAM203 African American History, 1444-1877
This course examines the historical interactions between peoples on three continents--Africa, Europe, and the Americas--and the consequences of European colonization, trans-Atlantic slavery, and racial capitalism. Focusing on a period from the Antiquity to the late 19th centuries, we will explore how European notions concerning Africa its peoples evolved over millennia in response to shifting political, economic, and demographic circumstances. We will chart how Africans and their descendants in the Americas experienced and responded to colonialism. And we will analyze how debates concerning enslavement and freedom, indigeneity and civilization, and pan-Africanism and national citizenship played out across the African Diaspora and in the United States.

Prereq: **None**

AFAM204 Introduction to Modern African American History
This course explores the African American struggle for equality, liberation, and justice from Reconstruction through to the present. We will examine how gender, class, sexuality, and ideology, among other factors, have shaped the history of black protest and community. We will visit key periods and themes including Jim Crow/segregation, The Great Migration, World War II, Civil Rights, Black Power, and Black Lives Matter, to understand the intersection of the African American lives and American history. Central to this course are the ways that African Americans have exposed American hypocrisy; have shown their historical patriotism; and have challenged American institutions to live up to their professed ideals.

AFAM208 History of African American Art
This course will introduce students to a history of African American artistic production from the late 18th century to the present, in a range of media and styles. While we will focus primarily on the visual arts--looking at sculpture, painting, photography, collage, film, performance, and installation--we will also consider the deeply interdisciplinary nature of Black cultural production, highlighting the important role of music, poetry, dance, and theater.

We will explore how African American artists, both individually and collectively, have negotiated the terms made available to them by cultural institutions, whether by struggling for inclusion, acknowledgement, and validation; actively protesting racist and exclusionary policies; or by forming alternative institutions, communities, and spaces in which to work and share support. From the Harlem Renaissance to the Black Arts Movement and "post-Black" exhibitions, art works will serve as a primary source to ask, is there such a thing as a "Black aesthetic" and if so, how would one define it? Why might an African American artist reject such an idea? Other key questions will include: What is the role of visual representation in political struggle? How have artists mobilized portraiture as a tool of liberation? What does it mean to turn away from figuration, toward abstraction or opacity? How have artists grappled with questions of nationhood, belonging, and diaspora?

Together, we will trace how artistic forms, techniques, and motifs have served both as sites of collective history and as speculative propositions to envision new futures, articulating what Robin D.G. Kelley calls "freedom dreams."

AFAM209 Digital and Visual Storytelling
During this seminar, we will develop a digital group project that addresses the question of remembering and denying pasts through the historical and critical relationship between carcerality, race, and storytelling in Connecticut. By engaging with contemporary forms of digital and visual storytelling (ArcGIS StoryMaps), this group project will work with the modalities of archival studies and digital humanities, accompanied by readings in critical race studies, visual and literary theory, and decolonial theory. We will first explore "remembering the past" through two post-Civil War Connecticut landmarks: The Church of the Good Shepherd (1867-69), dedicated to Samuel Colt, and the Mark Twain House (1874), now a museum. Both architectures exist as pivotal markers for a new modern American narrative intertwined with legacies of slavery, manufacturing, firearms, and storytelling. We will then consider how to make visible denied "pasts" by conducting archival research on the formative period of the 1860s and 1870s and in respect of the Connecticut context. Centrally, valuable insights for the project development will be provided by the in-class meetings with scholars, artists, and archivists, whose work rethinks and challenges the bond between carcerality, race, and storytelling.

AFAM210 Black Women and the Sacred
This course examines how Black women engage spiritual practices, in and beyond religious traditions to remake an anti-Black world. Black women have famously been called the "mule of the world." In this role, the Black woman is beast of burden, property, ungendered, enslaved. As such the Black woman constitutes a limit for the normal, the human, and thus the religious. In the study and practice of religions in the modern, western world, Black women are included through exclusion as heretics, demons, and witches. Nevertheless, Black women and their practices across normative formations of nation, race, and religion have cultivated social practices, ideas, and communities which form a counter-poetics, a counter-mythology, and an otherwise possibility of what religion, unbounded and non-normative might be. This course examines typical accounts of Black women in different religious traditions, but more importantly, the course examines how Black women's practices upset normal accounts of nation, race, gender, sexuality, and religion. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM211 Critical Philosophy of Race
What is race? Can philosophy account for it or describe it? This class will serve as an introduction to the field of philosophy of race, and examine the general crises or problems that race and racism raise for philosophical projects and methods. We will explore topics such as the ontology of race, its relationship to other social formations like class and gender, its foundations in violence, and its fugitive possibilities. We will read work from classical philosophers of race--like Charles Mills, Linda Alcoff, and David Haekwon Kim--and from scholars at the margins of philosophy--like Gloria Anzaldua, Adrian Piper, and Fred Moten.

AFAM212 Modern Africa
What is African Modernity? We will examine this question as we survey the major historical transformations in Africa since approximately 1800. Important themes include: African political innovations, the abolition of the slave trade and its effects, European colonialism, African adaptation and resistance, nationalism and decolonization, and Africa's role in shaping major global events. We will also study the impacts of religious and social transformations amid rapid economic and political change. Finally, we will examine African visions for post-colonial development and how to shape the future of the continent.

During the semester we will also cover some of the issues surrounding African history as a discipline. No single course can cover more than a sliver of the complexity and variety in the continent. For this reason, we approach the study of Modern Africa as comparative history. However, students satisfactorily completing this course will be able to write knowledgeably about African history and will have the foundation necessary to undertake further study about Africa with sensitivity to the complexity of its recent past.

AFAM213 Abolition Geographies
"Space always matters, and what we make of it in thought and practice determines, and it is determined by, how we mix our creativity with the external word to change it and ourselves in the process. In other words, one need not be a nationalist nor imagine self-determination to be fixed in modern definitions of states and sovereignty, to conclude that at the end of the day, freedom is a place. How do we find the place of freedom? More precisely, how do we make such a place over and over again?" --Ruth Wilson Gilmore, "Abolition Geographies" This course is not only an introduction to the burgeoning field of abolition geographies, introduced through the work of Ruth Wilson Gilmore, but invites students to engage with abolition geography as an intellectual and political practice. In this seminar, we will consider the relationship between freedom and place-making (the production of places) by examining Ruth Wilson Gilmore's analytics and by also engaging in a range of geographic struggles. For example, students will consider the extent to which enslaved rebellions, not limited to the Haitian Revolution, remade what we envision today as the Atlantic. Students will also have the opportunity to apply an abolitionist framework to their own research.

AFAM214 Postcolonial Religion: Pentecostalism and the Global South
This course examines the concepts and structures of the city and religion throughout the postcolonial global south through traditions and practices of Pentecostalism. The postcolonial marks both a theoretical and a historical break with the structured violence and domination imposed on most of the world through European expansion, land expropriation, indigenous extermination, African enslavement and Christian evangelization. Postcolonial religion, thus marks a reworking of the past, reforging of the present, and otherwise possibilities for communities and their sacred traditions in the future. This seminar will stretch and test this thesis through an examination of global Pentecostalism, a religion, which both marks the colonial, especially Christian evangelization, even as its rapid expansion in the global south among Latin American, sub-Sahara African and Black-descended people in the US and Europe expresses creolization, indigenization and urbanization. Perhaps, rather than a clean break, postcolonial religion, in the form of Pentecostalism indicates ongoing refusals, ruptures and relations between the metropole, and a history of subjugation and imagined utopian cities and futures of abolition. Seminar focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM216 A Small Place
Inspired by both Jamaica Kincaid and Paule Marshall's notion of a "small place," this seminar examines colonial and imperialist binaries of "large" versus "small" that render the Caribbean, the Pacific, and many other archipelagos as existing outside of the "world." How do islands become microsomes of a shared but contested global reality? This one of many questions students will be asked to consider throughout the seminar.

Gen Ed Area: **SBS-AFAM**
Prereq: **None**

AFAM217 Empires, Slavery, and Revolution: Africa to 1800
In this course we will examine the dynamic political and social histories of precolonial Africa. We will study the rise of kingdoms and empires such as Mali and Kongo, as well as revolutions in society from the technological development of iron production, to the emergence of trade networks, the development of ancient cities, the spread of religious healing and reform movements such as Cwezi spirit possession, and the role of gender in early African societies. Over the course of the semester we will also consider the impact of slavery and the first African encounters with Europeans. The methods for studying the early African past are interdisciplinary. You will have the opportunity to explore how ancient Africa has been imagined in the past by Africans and early Arabic and European observers, and how contemporary scholars write these histories. As we trace a history of early Africa in the world, we will consider several methods: the study of myths and oral traditions, linguistic and archaeological data, as well as ecological and archival records.

AFAM218 Literary Genres of Black History
This class proposes that literature has long been integral to the historical record of African American life. Black people have been denied the ability and means to create institutions for archiving, preserving, and memorializing their pasts -- from the days of chattel slavery when literacy was illegal, to the Dunning School of history that undergirded Jim Crow, up to the recent attacks on the teaching of African American history in primary education. Despite this deeply entrenched suppression, Black writers have found ways to ensure their lives were part of the written record. How do we write history when doing so is prohibited? What creative forms arise to tell the stories of Black life when the written word is so heavily policed? Through poetry, fiction, and drama, Black writers have done the deep archeological work to recover their own history and create counternarratives. Our class will develop a vocabulary for the written works of this counter-narrative tradition. We will read texts by Martin Delany, Harriet Jacobs, William Wells Brown, Zora Neale Hurston, Margaret Walker, Gwendolyn Brooks, Melvin Tolson, Robert Hayden, Toni Morrison, Claudia Rankine, M. NourbeSe Philip, and Tyehimba Jess. We will trace the aesthetic practices of writing history at various moments of its making, from the antebellum era to the present day. Along the way, we will read occasional examples of Black history writing that share methods with Black literature, such as works by Harriet Jacobs, Ida B. Wells, C.L.R. James, and Saidiya Hartman. Throughout, we will ask what these literary experiments with history allow us to envision for a more just future.

AFAM219 "The History that Hurts": Reading Saidiya Hartman
This course will introduce students to the major works of the Black literary theorist and cultural historian Saidiya Valarie Hartman (b. June 25, 1961), who was named a 2019 MacArthur "Genius" Fellow in Literary History and Criticism and American History. After graduating from Wesleyan in 1984, Hartman earned her PhD in American Studies from Yale in 1992; she is currently a professor in the Department of English and Comparative Literature at Columbia University. Students enrolled in this course will read and write about Hartman's trilogy of scholarly monographs: "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (Oxford University Press, 1997); "Lose Your Mother: A Journey Along the Atlantic Slave Route" (Farrar, Straus and Giroux,

2007); and "Wayward Lives, Beautiful Experiments: Intimate Histories of Riotous Black Girls, Troublesome Women, and Queer Radicals" (W. W. Norton, 2019). Finally, if her new book project is published before the syllabus is finalized, then students enrolled in this course will also read and write about Hartman's fourth scholarly monograph (tentatively titled "N Folio: An Essay on Slavery and the Archive"").

AFAM220 Poetics of Blackness
This course brings together Black critical theory and contemporary Black poetry in order to think through key sites of conflict in the theorization of Blackness. Rather than offer a literary history of Black poetry, this course is interested in approaching poetry as a crucial node of Black critical thought. Throughout this course we will pay particular attention to questions of form, genre, archive, queerness, gender, affect, visuality, ontology, and temporality as they approach and are undone by Blackness.

AFAM221 The African Novel
This class considers several canonical novels from sub-Saharan Africa. Our focus will be on their aesthetic and thematic properties; the novels are not meant as introductions to African histories, cultures, peoples, or practices. We will explore instead the specific subjects and styles of each work in the context of wider debates about orality, language, colonialism, gender, and the novel. To fathom the political and aesthetic stakes of African literary canon formation, we will also attempt to identify what makes a work canonical.

AFAM222 Literature and Black Feminism: The Dramas of Black Capital
This class explores Black women's fiction as a mode of critique and intervention into Black Americans' complicated relationships with social and economic capital in the wake of US chattel slavery. How do Black people negotiate the transition from being to owning property? How does the persistence of capital, even in the absence of the system of racial slavery that ushered it into being, continue to shape Black institutional access and Black intramural relations? How are white, Western regimes of value--constructed as they are through the production of racial-sexual difference in dominant habits of thought and representation--contested and, at times, recapitulated in Black social life? How does Black women's literature take up these questions, and what about Black women's literature uniquely equips it to meet this challenge? Ultimately, the course takes seriously Black women's literature as Black feminist thought, exploring how it indicts and imagines beyond the violence of modern racial capitalism.

AFAM223 Anthropology and (Anti)-Blackness
This course considers the intellectual and institutional developments of psychoanalysis and anthropology in the 19th and 20th centuries and the ways in which these disciplines defined a figure of the human that excluded the "African," the "Black," "the Negro" from the capacity to signify the universal. By examining these constitutive occlusions of race, the course considers the ways in which the "unthought" status of racial blackness, in particular, animates and aggravates the discipline of anthropology. The course will move from introductory readings in classical anthropology and psychoanalysis and a selection of works in Black critical thought towards contemporary scholarship that reappraises these fraught questions.

AFAM228Z Thinking with Octavia Butler's "Wild Seed"
Blend: Monday and Thursday class time synchronous; additional class hours asynchronous.

Black speculative fiction writer Octavia Butler's novel "Wild Seed" (1980) begins on the African continent in the 17th century amid the rise of transatlantic slavery and concludes on a plantation in Louisiana on the eve of the 19th-century American Civil War. "Wild Seed" was the last published book in Butler's Patternist series, but it relates the earliest segment of that epic story, which follows a shape-shifter named Anyanwu and a body-jumper named Doro across geographies, centuries, classes, corporealities, genders, races, and even, in Anyanwu's case, across species. To quote one student: "It's the weirdest novel I've ever read." This seminar takes up the myriad and interwoven provocations Butler offers in "Wild Seed" by reading her novel alongside a wide range of scholarly literature in the fields of African and African diaspora studies, Indigenous studies, gender & sexuality studies, animal studies, history, disability studies, religious studies, and cultural studies, as well as visual arts. Rather than "apply" the syllabus texts directly to Butler's novel, we will attend to how her novel not only reflects--indeed, anticipates--such scholarly and artistic production, but also produces its own aesthetics and epistemologies.

The seminar unfolds part-synchronously (via Zoom) and part-asynchronously (via writing assignments, screenings, and research project check-ins). Twice-weekly virtual meetings will be centered on presentations of research projects that students will develop over the course of the month, engaging a particular theme or question that they will identify in Butler's work. As such, the syllabus texts are subject to change. Students will be expected to read "Wild Seed" in its entirety in advance of the first class and to have begun thinking about topics they might explore for their presentation and research project (the former being preparation for the latter). The seminar's asynchronous component will consist primarily of weekly writing exercises asking students to reflect on how the assigned texts converse with Butler's novel and vice versa and to comment on one another's analyses. Shared annotatable pdfs will be used to generate conversations about the readings outside of class and to identify questions and topics for discussion. The professor will consider proposals for a creative final project, but it, too, will require substantive research.

AFAM229 Reading Toni Morrison: Blackness and the Literary Imagination
This course will introduce students to the major works of the late Nobel laureate Toni Morrison (1931-2019). In addition to the trilogy--"Beloved" (1987), "Jazz" (1992), and "Paradise" (1997)--and "Playing in the Dark: Whiteness and the Literary Imagination" (1992; originally delivered as the William E. Massey, Sr. Lectures in the History of American Civilization at Harvard University in 1990), readings may also include the following novels (in chronological order): "The Bluest Eye" (1970); "Sula" (1973); "Song of Solomon" (1977); "Tar Baby" (1981); "Love" (2003); "A Mercy" (2008); "Home" (2012); and "God Help the Child" (2015).

AFAM230F Marxism and Abolitionism (FYS)
This course explores the historical encounter of Marxist revolutionary theory, with its roots in German idealism (Kant, Schiller, Fichte, Hegel), and abolitionist causes. How have abolitionist movements historically informed, expanded, and challenged Marxist theory and its tactical playbook? What made Marx a touchstone for so many black revolutionary thinkers, including W.E.B. du Bois, Franz Fanon, C.L.R. James, and Angela Davis? How have anticommunist, racist, security-statist ideologies been mobilized to undermine and defeat transformative social movements? We will begin with the Haitian Revolution and work our way through the abolition of slavery in the US and the anticolonial and civil rights struggles of the mid-20th century to the prison abolition movement today. In addition to the above mentioned authors, readings will include Toussaint L'Ouverture, Frederick Douglass, Ottilie Assing, V.I. Lenin, Rosa Luxemburg, Georg Lukács, Max Weber, Martin Luther King, Jr., Herbert Marcuse, and the Combahee River Collective.

AFAM233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

AFAM234 Black Labor and Working-Class History
This course examines the history of Black people's work experiences, labor activism, and working-class life in the United States. Topics will include wage labor in the emerging market economy of the late 18th century; the many forms of enslaved labor; labor activism and radicalism in the late 19th and early 20th centuries; racial exclusion from the New Deal order; Black socialist and communist politics; changes and continuities in Black women's labor during the 20th century; the "surplus labor" to prisoner pipeline in the late 20th century; and the rise of gig labor and new worker movements (particularly in health care and e-commerce) during the 21st century. Using historical scholarship, novels, films, theory, and music, alongside a wide variety of primary sources, we will consider the changing ideas and practices of workers, their families and communities, and employers. We will highlight persistent themes that challenge the typical (white-centric) narrative of working-class history in the United States, such as the ways in which anti-Black racism has shaped labor politics. We will also discuss the flourishing of creative thought and practice that often happens alongside, or in response to, the seemingly endless demand for Black labor in American society.

AFAM235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.

AFAM236 Introduction to Postcolonial Theory
The 1978 publication of Edward Said's Orientalism signaled the presence of postcolonial studies, a field of intellectual inquiry that proved influential in the humanities and social sciences. How, from our vantage point, do we understand both the age of imperialism/colonialism, and what happens afterwards? What are the conditions of decolonization and national independences? How do the cultures of the formerly colonized countries use and modify imperial vestiges, and invent themselves anew? Central to our course will be the work of three major theorists in the field of postcolonial studies: Edward Said, Gayatri Spivak, and Homi Bhabha. Among other important ideas, we will discuss Orientalism, subalternity, and mimicry.

AFAM237 Technologies of the Self
Where does the idea of an authentic self come from? The desire to represent the authentic self informs the narrative genres of the confession and memoir and visual ones of the selfie and self-portrait alike. Yet both the memoir and the selfie "self" are mediated, first, via the technologies of print and screen, and second, via the conventions of particular genres that make these legible as a memoir and selfie, as opposed to, for example, an interview or a portrait. In this course, we will examine how different technologies not only represent but produce the self. These technologies include "writing" technologies: print and digital; genre and medium (autobiography, the slave narrative, memoir, self-portraits, and selfies); and technologies of the state, which produce citizens, subjects, and humans.

AFAM238 Imperial Education: Colonial Template
Where, how, and for what reasons did our modern structures of education originate? Beginning with the sketching out of an educational model in the British Raj, we will examine the dissemination of that model globally, in the British and French colonies of Asia, Africa, the Americas, and among immigrants and the proletariat. How and where does that model change, and to what effect? History will provide the context for our major subject matter: literature focussing on the educational experience. Among our historical and theoretical readings will be Macaulay's Minute on Indian Education, Viswanathan's The Beginnings of English literary study in British India, Wa Thiong'o's Decolonizing the Mind, Freire's Pedagogy of the Oppressed, and José Marti's On Education. We will also analyze literary texts and films, including Narayan's The English Teacher, Beti's Mission to Kala, Dangarembga's Nervous Conditions, Adichie's Purple Hibiscus, the film Sugar Cane Alley, and others.

AFAM240 From the Banjo to Dembow: Afro-Caribbean Music in Motion
This course analyzes the global circulation of Afro-Caribbean musicians, dancers, audiences, musical styles, and even musical instruments from the beginning of European colonialism to the present day. We will seek to understand the political interconnections between the Caribbean and the wider world by focusing our attention on specific "musical itineraries." These will include, among others, the creation of the banjo by enslaved people in the Caribbean and the instrument's role in black resistance in North and South America, the musical aftershocks of the Haitian Revolution in Cuba and Louisiana, the production of black internationalist politics at weekly "regge" dances led by Jamaicans in early 20th-century Costa Rica, and the rise of reggaetón between Panama, Puerto Rico, Cuba, the Dominican Republic, and the United States.

We will question how these musical itineraries propelled black political movements and shaped larger ideas about race, nation, diaspora, and the meaning of "the Caribbean" itself. No prior musical knowledge is required for this course.

AFAM241 Ebony Singers: Gospel Music
This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

AFAM242 Intimate Histories: Black Women's Sexuality
Black feminist theory teaches us that African American women have historically confronted racism and sexism in addition to other forms of oppression. How has this experience shaped the sexual lives of everyday black women and famous figures? This course places the sexual at the center of African American women's history. It will examine how regimes of violence have intervened in black women's sexual freedom, from intimate bonds to reproduction to same-sex desire. It will cover black women's resistance to these regimes; to their sexual agency in diverse spaces from the plantation to the porn industry. This course will also tackle the enduring impact of the Jezebel stereotype in the history of black women's sexuality. Using primary and secondary sources, this class will fundamentally investigate the significance of African American women's sexual history in the histories of American sexual, racial, gender, and class politics.

AFAM243 Caribbean Writers in the U.S. Diaspora
The Caribbean cloaks a complex history in a Club Med exterior. While white sands and palm trees proclaim it the "antidote to civilization," Caribbean writers undertake to represent a fuller picture of the individual in a world shaped by colonialism, slavery, nationalism, and cultural striving. This course will examine selected literary texts as part of an ongoing dialogue among the region's history, mythology, and aesthetics.

AFAM244 Girlfriend, Sister, Self: 20th-c. Black Women's Writing
This course will examine textual and visual constructions of the girlfriend, sister, cousin, and daughter in 20th-century black women's writing. We will read works by Toni Morrison, Alice Walker, Veronica Chambers, and Marita Golden as narratives of women loving women (sexually and not) and as sites through which to engage black women's subjectivity more generally. In this course we will attend to the interior landscapes of individual black female subjects as well as the social landscapes that produce and/or complicate notions of love, kinship, friendship, and self. We will draw on African American literary theory, queer and affect theory, and black cultural memory as well as turn to influential works by bell hooks, Deborah McDowell, Kevin Quashie, and Valerie Smith, among others. How do writers of the period imagine and articulate the relationship between black women and their others?

AFAM248 Race, Ethnicity, and Popular Music
This course explores race and ethnicity in the United States through sound and song. By studying diverse topics--from the Boston Tea Party, blackface minstrelsy, and the rise of Jim Crow, to Native Hawaiian influences on the Mississippi Delta blues, to the unexpected connection between elevator music and the Spanish American War--we will learn about the history of settler colonialism, anti-black racism, U.S. imperialism, global capitalism, and hetero-patriarchy. We will also remain attentive to music as a transgressive and revolutionary force, one that facilitates hybrid identities and movements that celebrate difference, offering alternate visions for what it means to be and sound free. Investigating primary sources will demonstrate how musical genres may act as reservoirs of shared history and collective identity. As Ronald Radano has argued, discussions about music can have tangible influences because debates about music are a proxy for larger social issues with real-life consequences. Can music make (or unmake) race? Can a song change the world?

AFAM250 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

AFAM252 Not Like Us: Religion, Race, Pop Culture
Starting with the work of Pulitzer Prize and Grammy award-winning, Super Bowl-performing artist Kendrick Lamar, this course examines how Black culture, and thus race, is often interpreted through religion. Afro-British theorist and cultural studies pioneer Stuart Hall famously published the article "What Is This 'Black' in Black Popular Culture" in the 1990s. In that essay, Hall sought to examine the work of the signifier of race in relationship to the idea of culture. This course, following Hall, will enable students to examine the relationship between structures, practices and ideas of race, with structures, practices and ideas of religion in defining Black people in the modern world. Through Hall's lens of culture, the class will examine people, places and periods, from witches and demons to Blues and Spirituals, Martin Luther King Jr to Malcolm X, the Black Arts Movement to Black Lives Matter, Beyoncé to Kendrick Lamar, Marlon Riggs to Michaela Coel, by considering questions of authenticity, claims of Africanity and formations of religiosity all in the word Black. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

AFAM254 The History of Race and Sex in America
Everything in our contemporary moment has a historical precedent. This course explores the ways that race, class, gender, ethnicity, and sexual orientation have intersected to shape American lives and group identities. Focusing on the concept of intersectionality, this course looks at the relationship between power, rights, and citizenship; namely who is included and who is excluded at a given time and why. Thinking about how sex has factored into these dynamics, we'll be covering topics such as sexual coercion and consent, interracial marriage, and civil rights in historical perspective. Spanning the early American period through to the present, we will focus specifically on how the understanding of blackness and whiteness, manhood and womanhood, and heterosexuality and homosexuality changed over time.

AFAM255 The Black Feminist Fantastic: Afrofuturism, Afro-Gothicism, and Afro-Speculative Fiction
This course looks at the specifically feminist literature of the Black cultural tradition that, variously, has been called Afrofuturism, Afro-Gothicism, and Afro-Speculative Fiction. This tradition combines science-fiction, history, fantasy, and horror in order emphasize processes of racialization, legacies of colonialism, theories of science and technology, and the general makings of the modern world. In helping to make this world, central Enlightenment thinkers (e.g., Burke and Kant) posited that the figure of the Black female induced a sublime terror that justified aesthetic and scientific racial hierarchies. In this class, we will examine how Black feminist fantastic literature does not simply rebuke this modern world order; it imagines a world otherwise. We will read Black female authors to study how their aesthetics accrued a Black feminist politics. We will trace the relationships of power that inhere in this tradition's tropes and formal conventions, and we will explore how authorial manipulations of such tropes and conventions seek to dismantle gendered and racialized power structures. While our course will predominantly focus on literature, we will also develop our understanding of this tradition's aesthetics through music, Black feminist theory, and visual art. Texts will include Pauline Hopkins's Of One Blood, Octavia Butler's Kindred, Toni Morrison's Beloved, Chimamanda Ngozi Adichie's Purple Hibiscus, and Tracy K. Smith's Life on Mars. We will interpret and build on Janelle Monae's Dirty Computer, Erykah Badu's Baduzim, Jennifer Nash's assertion of Black feminist theory's "visionary world-making abilities," Hortense Spiller's grammars of "ungendering," Jackie Ormes's comics, and Wangechi Mutu's mixed-media collage and film.

AFAM256 A Celebration of Women in Jazz: A Critical Analysis of Gender
How can we take the lessons of Jazz with us into other spaces? In this course, students will study Women in Jazz and examine the broad impact of our social structures and power systems to consider how the lessons of Jazz can help us navigate our future. How can we take the values of Jazz, such as improvisation, listening skills, democracy, a celebration of diversity, and equity work, and use our agency to effect change for the better in our communities? This course will examine the traditionally male-dominated nature of Jazz, its history of misogyny, and underrepresentation of women and other gender expressions. Students will learn in general about the musical art form of Jazz, its history as Black American music, and its unique qualities including improvisation, the blues, and swing. There will be a strong focus on listening to music from women musicians, and students will learn how to actively listen to jazz and all music. Together, we will look at case studies of successful women musicians and composers from the history of Jazz through the present, reading biographical information and reviewing their performance and compositional contributions. Musicians may include Mary Lou Williams, Carla Bley, Terri Lynn Carrington, esperanza spalding, Nina Simone, Billie Holiday, Ella Fitzgerald, Melba Liston, Lil' Hardin Armstrong, Dinah Washington, Abbey Lincoln, Toshiko Akiyoshi, and Marian McPartland.

AFAM257 System Mapping for Social and Environmental Impact
In recent years, growing interest in social entrepreneurship has pushed students to "solve" complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, half-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a "systems map" that documents the economic, political, and cultural factors behind their problem, as well as the current "solutions landscape."

AFAM258 The Literature of Black History
This class proposes that literature has long been integral to the historical record of African American life. Black people have been denied the ability and means to create institutions for archiving, preserving, and memorializing their pasts -- from the days of chattel slavery when literacy was illegal, to the Dunning School of history that undergirded Jim Crow, up to the recent attacks on the teaching of African American history in primary education. Despite this deeply entrenched suppression, Black writers have found ways to ensure their lives were part of the written record. How do we write history when doing so is prohibited? What creative forms arise to tell the stories of Black life when the written word is so heavily policed? Through poetry, fiction, and drama, Black writers have done the deep archeological work to recover their own history and create counter-narratives. Our class will develop a vocabulary for the written works of this tradition. We will read texts by Martin Delany, William Wells Brown, Harriet Wilson, Charles Chestnutt, Zora Neale Hurston, Margaret Walker, Gwendolyn Brooks, Melvin Tolson, Robert Hayden, Toni Morrison, M. NourbeSe Philip, and Tyehimba Jess. We will trace the aesthetic practices of writing history at various moments of its making, from the antebellum era to the present day. Along the way, we will read occasional examples of Black history writing that share methods with Black literature, such as works by Harriet Jacobs, Ida B. Wells, C.L.R. James, and Saidiya Hartman. Throughout, we will ask what these literary experiments with history allow us to envision for a more just future.

AFAM259 Queer of Color Critique
This course will serve as an introduction to the debates, theoretical interventions, and methodological concerns that frame and inform a "queer of color critique." In this course we will observe how the scholarly contributions of LGBTQ people of color complicate, revise and/or reimagine the fundamental presumptions of queer theory. We will be exploring the emergence and development of "queer of color" knowledge production and activism in relation to the field(s) of black studies, film studies, queer theory, and African American literary production. This course will cover specific topics like gender, sexuality, culture, diaspora, and mutuality, paying special attention to the politics, ethics, and aesthetics of race and racial difference.

AFAM260 On Evidence: Archives, Museums, and Prisons
This course introduces an interdisciplinary study of the idea of evidence in connection to the modern development of archives, museums, and prisons, by setting this in a contemporary dialog with the discourses on state violence, incarceration, and refugeetude. This course will firstly establish historical and theoretical connections between carcerality, Western archival record-keeping practices (e.g., scientific grids, mugshots, taxonomies, and forms of surveillance), and museological frameworks developed during the transition from the 19th to the 20th century.

Furthermore, it considers how records, artifacts, digital data, bones, sites of "memories," oral traditions, embodied knowledge, or intergenerational trauma can become evidentiary material. Such inquiries are central to decolonial archival studies as they are critical for historically marginalized, racialized, and gendered subjects, whose claims to social justice, human rights, and cultural heritage are tied to the aftermaths of slavery, genocides, and colonialism. Our readings and discussions will specifically draw upon decolonial archival studies, digital humanities, visual studies, human rights discourse, Asian American studies, Black studies, and Indigenous studies, which have continuously challenged what constitutes evidence.

AFAM261 Beyond the Talking Book: Reading African American Literature in the Newspapers
The majority of late-nineteenth and early twentieth century African American writers, such as Frances Harper, Martin Delany, Pauline Hopkins, W.E.B. Du Bois, and Langston Hughes, published their work in African American periodicals. In this course, we will examine the works of these canonical authors (as well as some lesser known ones) in their original publication context, the magazine archives of The Christian Recorder; The Anglo-African Magazine; The Colored American Magazine; The Crisis; Opportunity; and Fire!! The guiding question in our readings is this: how does our understanding of African American Literary History change when we spotlight the original magazine and newspaper contexts of its key texts? We will thus examine the serial installments of novels like Blake and Hagar's Daughter in relation to the various texts and images alongside which they were published and read. In addition to honing students' literary close-readings skills, this course aims to teach students how to do original research and critically engage with multi-genre, mixed forms like the magazine. Learning how to read a newspaper as both a historical document and a literary one will require you to navigate between multiple different texts on the same page, in the process of which you will acquire a new reading practice. Students will write five (5) 200-250-word blog posts and four (4) short papers, including a creative assignment, a paper on reading literature in newspaper formats, an essay on illustrations and visual culture in African American Magazines, and an essay that tells the story a literary text's significance through a discussion of its different reprints and editions.

AFAM263 Critical Race and Art History: Theories and Methods
How does the study of art shift if we begin with questions of race, power, and colonialism, rather than treating them as secondary? Concepts such as mastery, familiarity, strangeness, taste, and beauty are formed by conditions of domination and subjugation. Moreover, the histories of material production and cultural expression are fundamentally entwined with the circuits of enslavement, forced migration, and the extraction of resources, people, goods, and "styles."

For the bulk of the semester, we will focus on a series of case studies drawn from the 15th to 20th centuries, a period of intense European contact and conquest in Africa, Asia, the Caribbean, and the Americas. Topics will include: representations of Africans in Renaissance Germany; African depictions of the Portuguese circa 1492; the appearance of parrots, kraak (Chinese) porcelain, and other goods from "exotic" locales in 17th-century Dutch still lifes; the taxonomies of racial difference in Spanish casta paintings; debates about sculptural polychromy and the "whiteness" of marble; the relationship between expansionism, empire, and the genre of landscape; "primitivism" and European artists' "discovery" of African artistic forms; the critical interest in "racial art" in the interwar U.S.; and contemporary conversations about museums and restitution, among others.

Throughout, works of art are primary sources with which to study the specificities of periods, places, and their social arrangements. While we will emphasize difference and historical contingency, our longue durée approach will enable us to draw connections about art's role in processes of primitive accumulation, dispossession, and racial capitalism.

AFAM264 "Before the 'Body' there is the 'Flesh'": Reading Hortense Spillers
This course will introduce students to the major works of the black feminist theorist and literary critic Hortense J. Spillers (b. April 24, 1942), one of the greatest essayists and most gifted intellectuals of our times. While her published writings are legion, Spillers is perhaps best known for her scholarly article titled "Mama's Baby, Papa's Maybe: An American Grammar Book" (originally published by Diacritics in 1987). In addition to "Mama's Baby," then, together we will read and engage at close range with the essays collected in "Black, White, and in Color" (published by the University of Chicago Press in 2003) in order to reveal the extraordinary complexity and clarity of her thought.

AFAM265 Music and Downtown New York
This course will explore the history and flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of major cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of U.S. history. We will uncover their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and politics, and avant-garde aesthetics. Drawing from primary sources, we will read about and discuss recordings of a wide variety of musicians, view a broad cross-section of film, identify aesthetic and cultural trends, and study the local industry that supported them. A key theme will be the importance of a place. Projects throughout the semester can include written papers, recordings, artwork, culture mapping, or other creative endeavors somehow related to each of the four topics.

AFAM266 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

AFAM267 The Caribbean in Relation
"For through this experience made you, original victim floating toward the sea's abysses, an exception, it became something shared and made us, the descendants, one people among others. Peoples do not live on exception. Relation is not made up of things that are foreign but of shared knowledge. This experience of the abyss can now be said to be the best element of exchange." --Glissant, 1997
In this seminar, we will think with Glissant as well as others on how the Caribbean is a space of "relation." One of the main questions that we will address throughout the course is what are the historical, social, and physical mechanisms that define the Caribbean and its relationship to other geographies produced through slavery and colonialism? To answer this question we will engage the work of geographers, historians, and anthropologists, interested in the formation of political, cultural, and economic life in the Caribbean.
Offering: **Host**
Grading: **A-F**

AFAM269 Pessimism, Nihilism, and Black Literature
This course considers Black literature's interventions into philosophical discourses of pessimism and nihilism. In contrast to the pathologization and dismissal with which they are often met, we will take both seriously as schools of thought. How are pessimism and nihilism distinct from each other? What do they offer as interpretative lenses for and approaches to Black art and Black existence? How are they reflected in literary form? We will closely consider these, and related, questions, looking to the work of authors such as Percival Everett, Jesmyn Ward, Dambudzo Marechera, Frank B. Wilderson III, and Gayl Jones.

AFAM270 Carceral Connecticut: Policing Race, Gender, and Sexuality in the "Land of Steady Habits"
Often considered a progressive bastion, Connecticut in fact has been at the forefront of carceral practices since the eighteenth century. In 1773, the colony converted a copper mine into the below-ground Newgate Prison. Half a century later, the state constructed one of the nation's first penitentiaries, in operation in Wethersfield, Connecticut, until its demolition in the 1960s. In each of its iterations, Connecticut's carceral system has policed, shaped, and disciplined its subjects along lines of race, class, and gender, constructing the normative and punishing deviation. Through engagement with rich state and local archives, this course will use several case studies to examine how Connecticut's carceral practices have made and re-made the state's legacy of slavery and policed the borders of accepted gender and sexuality in this place nicknamed "the land of steady habits."

The Middlesex County Historical Society's rich collection of late-19th and early-20th-century Middletown police logs, county jail records, and police court proceedings will enable students to analyze on-the-ground carceral practices in Connecticut. The Connecticut State Archives's extensive state penitentiary records, pardon petitions, and other state-level records will enrich and contextualize the local picture in Middletown. In this service learning course, students will share their research with the community through public presentations, online, and by planning exhibits at the historical society and on campus. This course, and students' public-facing research in this course, is part of the Carceral Connecticut Project based at Wesleyan University. See: https://carceralconnecticut.com

AFAM271 The Prison State: Race, Law, and Mass Incarceration in U.S. History
This course explores the history and effects of the United States' mass incarceration crisis. The U.S. incarcerates more people than any other country in the world. And people of color make up a highly disproportionate number of the over 2 million individuals incarcerated in the U.S. today. Beginning with slavery and continuing through the rise of prisons, debt peonage, Jim Crow, and the Black Lives Matter movement, the course will explore how efforts to police, detain, and control black bodies have been at the center of U.S. law and legal practice since the nation's founding. At the same time, we will compare and contrast how race, gender, and sexual orientation have been policed, controlled, and shaped through incarceration practices throughout U.S. history.

AFAM272 History of Jazz in American Culture
Jazz, has been a staging ground for working out some of the most defining issues and aspects of American culture. These include the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s-40s, until it was displaced and pushed to the margins by R&B and rock in the 1950s. But it has remained an inspiration for many artists up to the present day, including Kendrick Lamar's jazz-drenched To Pimp A Butterfly and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

This course will provide students with a broad-based literacy in the history of jazz, while examining its significance and impact within American culture. We will explore its early 20th-century origins in New Orleans, its rise as America's popular dance music in the 1920-30s, a shift to a more concert art-oriented form in the 1940s-50 (representing the epitome of cool and hipness), avant garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, as well as new directions from recent generations. We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados, and those interested in the social and cultural dynamics as well as the musical materials.

AFAM274 Feeling Black Feminism
In this course we will explore the connected histories of the "felt life of black feminism" (Nash 2019) and Black feminist contributions to empowerment movements both inside and outside of the academy. Our class proceeds by reading some of the seminal texts that circulate as theory in US academic Black feminism alongside 20th and 21st century memoirs and poetry to explore how Black feminists articulate the relationship between their politics and the everyday psychic negotiations that comprise moments of rage, anxiety, melancholy, tenderness, joy, etc. This course engages in the study of collective minoritarian affect, feelings, and emotions as well as outlines their relationship to Black and/or women's liberation movements.

AFAM277 Defining Black Repair
Black Reparations is a concept that refers to claims for reparations made by African descendants in the United States as defined in Boris Bittker's (1973) "The Case for Black Reparations." However, the term is not exclusive to the experiences of slavery and other forms of racial violence in the U.S. As demonstrated by reparation activists of the African diaspora, the concept unifies the experiences of all African descendants. In this seminar students will explore both national and regional movements for reparations, primarily in the context of the Caribbean and the U.S. Students will compare the formation of reparatory struggles in both geographies, from post-emancipation to the present, which is instrumental to understanding the concept of Black Reparations. What constitutes Black Reparations? What are the frictions and connections between reparative struggles in the Caribbean and the U.S.? These are the questions that students will be asked to consider throughout the course. Building on scholarship on Black Reparations and reparation policies, students will be asked to design their own proposals for how Middlesex County could implement practices of Black repair.

AFAM278 Race & Slavery in New England
This course examines struggles over black and Native American slavery, freedom, and community formation in New England. We will explore the lived experiences and freedom struggles of people of color from the beginning of European colonization through the national abolition of slavery in 1865. The course, which satisfies the Early AFAM History requirement for the major, will particularly grapple with Wesleyan's and Middletown's complex relationships to slavery and emancipation. As we will learn, slavery and the slave trade played central roles in New England's culture and economy, especially here in Middletown. Like in other New England ports, Middletown merchants made a fortune from the trans-Atlantic slave trade and the plantation economy that supported it, even selling enslaved people of African and Native American descent on Middletown's Main Street. And southern slaveholders were among the first Wesleyan students in the 1830s. At the same time, free African Americans and their allies made Middletown a stop on the Underground Railroad and a center of the antislavery movement, laying the groundwork for Connecticut's eventual abolition of slavery and for high-profile court cases like the Amistad trial. Complicating popular images of the "free North," this course will examine the central roles of slavery and settler colonialism in New England history, while also exploring how the Connecticut River tied Connecticut to regional and even global currents of slavery and antislavery movements.

AFAM279 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

AFAM280 Religion and the Social Construction of Race
In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (a) the intersections of race and religion as a process in which power plays a pivotal role; and (b) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Father Divine, the Nation of Islam, Rastafari, Haitian Vodou, Jonestown, the Christian White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

AFAM281 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to

use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

AFAM282 Mixed in America: Race, Religion, and Memoir
This course examines the history of mixed-race and interfaith identities in America. Using the genre of the memoir as a focusing lens, we will look at the various ways that Americans of mixed heritage have found a place, crafted an identity, and made meaning out of being considered "mixed." How has being multiracial or bi-religious changed in the course of history in this country? What has occasioned these changes, and what patterns can we observe? We will explore questions of racial construction; religious boundary-making; rites of passage; gender, sexuality, and marriage; and some literary and media representations of mixed-heritage people.

AFAM283 Reading Against "The Propaganda of History": Reading W. E. B. Du Bois
This course will introduce students to the major works of the Black intellectual W. E. B. Du Bois (1868-1963), one of the most profound thinkers and prolific writers in American history. While his published writings are legion, Du Bois is perhaps best known for his early collection of essays titled The Souls of Black Folk (originally published by A. C. McClurg and Company of Chicago in 1903). In addition to Souls, we will read across Du Bois's oeuvre in order to reveal the extraordinary profundity and historical evolution of his thought. Readings will include (in order): (i) The Philadelphia Negro (1899); (ii) The Souls of Black Folk (1903); (iii) Black Reconstruction (1935); (iv) Color and Democracy (1945); and (v) The World and Africa (1947).

AFAM284 The Sociology of Reality TV: Race, Colorism, and Xenophobia
The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether responsibility exists on the networks who help create these shows.

AFAM285 Gender and Slavery in the Atlantic World
For most of the 20th century, historians of slavery in the Atlantic world overlooked the critical role of gender in shaping the marketplace, culture, and experience of the institution. Slaveholding and its attendant violence were presumed to be the domain of men. With a tragically limited archive, the popularity of slave narratives such as Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) reveal how the voices and perspectives of men have dominated our understanding of the enslaved experience. Since the 1980s, the work of black feminist historians such as Deborah Gray White's, "Ar'n't I a Woman?: Female Slaves in the Plantation South" (1985) have unpacked the profoundly gendered nature of slavery in colonial America, the United States, and the Caribbean. This course embarks on an exploration of this important intervention. We will engage primary sources to illuminate the voices of enslaved women and debunk some of the historical myths of slavery and slaveholding. We will also visit classic and fresh secondary literature to understand the evolution of the field. Major themes include but are not limited to the Middle Passage experience, gendered violence, fertility, reproduction and motherhood, the Southern Belle archetype and slaveholding mistresses, notions of beauty and purity in black and white, and fugitivity.

AFAM286 Harlem Renaissance Literature
During this course, students will read canonical and popular literary works by early 20th-century African American authors in tandem with the vibrant body of literary criticism that emerged from this cultural moment in order to arrive at a richer understanding of how the early 20th-century African American canon was curated and proliferated. To this end, we will pay special attention to the role of anthologies and literary magazines (such as "The Crisis," "Opportunity," and "Fire!!") in collating an emergent modern African American literary tradition. At the end of this course, students will be familiar with not only the key authors and works of the Harlem Renaissance, but also with the central debates about the direction and uses of African American literature in the early 20th century. These discussions of the uses and selection criteria of the book-form anthology on the one hand, and the serial literary magazine on the other will prepare students for one of the main assignments: curating a new syllabus entry for future versions of this course. The aim of this assignment is to alert students to the politics of knowledge production that determine which texts get taught, anthologized, and studied. Finally, the differing lengths and types of course assignments will require

students to learn how to present their ideas across a variety of genres (syllabus proposal, annotated bibliography, research paper, short close-reading paper).

AFAM287 Psychology and the Law
This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature. This course counts as an elective or column 3 breadth course towards the psychology major.

AFAM288Z "Writing Should Do Something": The Essays of James Baldwin
Baldwin's essays, both deeply personal and political, speak of a divided self in a divided country. As a Black man, he saw himself as a problem for America; as a gay man, he was a problem for many; and as a self-described "maverick," he resisted any identification other than "writer." He wrote frankly of hating, and being hated, while insisting that without love and compassion, even for those who hated him, a decent life was unattainable. In this course, we will consider Baldwin as one of the greatest essayists of his century, a social critic who believed that "writing should do something," in the words of a letter he wrote to his brother.

Baldwin began publishing to acclaim in the 1950s; he was a celebrated public figure in the fight for racial equality in the 1960s. By the mid-1970s, however, his complicated relationship both with white liberals and leaders of the Black Power movement diminished his political stature. With the Obama presidency and the emergence of the Black Lives Matter movement, his work experienced a renaissance: almost 30 years after Baldwin's death, Ta-Nehisi Coates acknowledged "The Fire Next Time," published in 1962, as the inspiration for "Between the World and Me."

This is not a theory course, either social or literary. While our supplementary material will place Baldwin's essays within their historical and social context, our focus will be on the narrative nonfiction techniques Baldwin used to such startling and timeless effect. We will read Baldwin's most famous essays, and some that are less well known. Our supplementary readings and viewings will explore his continuing influence, and the influence of Black music on Baldwin.

AFAM289 Eating the Other: Critical Perspectives on Difference and Desire
How does difference (race, class, sex) engender or attenuate desire? How does desire manifest as a wish to commodify, enjoy, or transcend racial difference? In this course we will study difference and desire as terms which inform one another and as sites through which discourses on race, sexuality, and power converge. We will explore these terms in relation to African American literary production, gender and sexuality studies, and film and queer theory. We will also take them up as they emerge as themes in the narrative fiction of James Baldwin and Marci Blackman as well as in essays by bell hooks, Jennifer Nash, Hortense Spillers, Aliyyah Abdur-Rahman, and Audre Lorde, among others. How do these key terms, alone and together, elucidate the contours of Black social and psychic life?

AFAM291 Afro-Asian Intersections in the Americas
This course explores a range of historical, cultural, and political intersections between African and Asian diasporic people in the Americas from the late 19th century to the present. Taking an interdisciplinary approach, we will examine key moments in the history of Afro-Asian encounters in the Americas, including the importation of slave and coolie labor in the 19th century, the formation of anticolonial and antiracist "Third World" movements in the United States and abroad, and the 1992 Los Angeles uprising. We will also study forms of cultural interracialism, from African Americans' mania for kung fu in the 1970s, to interracial buddy films like Rush Hour (1998), to the contemporary fiction of writers such as Patricia Powell and Charles Johnson.

AFAM299 Medicine and Healing in the Black Atlantic
This course examines the ways in which Black people have conceived of health, healing, and the body since 1500. Readings, lectures, and documentary films will focus on historical case studies in Western Africa, South America, the Caribbean, and North America. We will cover topics such as herbal and environmental medicine; the intersections of religion and healing; gendered medical knowledge and labor; medical racism and exploitation; health disparities; and health activism. To help us situate these topics in the lived experiences of historical actors, we will use a variety of primary sources, including narratives of formerly enslaved people, court cases, correspondence, interviews, and print culture. The goal of this course is not simply to show how Black people have used healing practices to endure racism, slavery, imperialism, and racial capitalism: We will also emphasize how medicine and healing have been sources of joy, conflict, knowledge production, and entrepreneurship within Black communities. Lastly, we will consider the present and future of Black health and think about what it would take to make medicine and health care for all.

AFAM300 Black Phoenix Rising: Death and Resurrection of Black Lives
The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racisms and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

AFAM301 Junior Colloquium: Defining African American Studies
Between 1896 and 1914, W.E.B. Du Bois organized an annual conference at Atlanta University devoted to documenting and analyzing the oppressive structural conditions shaping Black life in the United States. Though arguably the genesis of African American studies as a systematic academic endeavor, these sociological conferences also joined a long intellectual tradition that has always exceeded and often resisted the Western academy. This colloquium examines how the African diaspora has generated knowledge both within and beyond the ivory tower -- from cargo holds to quilombos, prisons to abortion clinics, newsrooms to classrooms, from music studios to dancehalls and soundstages. Students will engage closely with several defining texts, methods, movements, and moments concerning Black life in the Americas. Ultimately, we seek possibilities toward defining an African American studies program and praxis that addresses the political, social, intellectual, and epistemic needs of the 21st century.

AFAM303 1492: States of War
This course approaches 1492 as a signifier and time-stamp of modernity. It signifies an ongoing "war" against people of African descent -- one that goes beyond the terrestrial plane. It anchors systems of representation, racialization, colonization, and religion with which we must reckon -- ones that preceded it and that we continue to inherit. The course uses the specific historical frame of 1440 into the late 18th century. This frame holds with reference to Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically" and Sara E. Johnson's notion of "slavery in the plantation Americas as a 'veritable state of war.'" Thus, we will read symptomatic, primary historical documents and fiction about "blood," race, African slavery, and geography and being (including 15th and 16th century Castilian law, sundry genres that represent early Spanish colonial Mexico, Santo Domingo (contemporary Dominican Republic), Cuba, and French Saint Domingue (contemporary Haiti)), as well as contemporary fiction, cinema, and theory that configure historicity via the Caribbean. We will read sometimes for imperial notions of sovereignty, selfhood, force, indigeneity, (anti)blackness, property, labor, and the relation between conceptions of the heavens and "just wars" on earth, and other times for Caribbean notions and narratives that are at war with said Western theological and onto-epistemological schemata. Conceptually, the course thinks from and/or about Caribbean literary studies, black critical theory, demonology, scholasticism, mysticism, the functions and tropes of (anti)blackness in the discursive formation of the New World, Vodou(n) in the Haitian Revolution, colonialism and international law, and deconstruction.

AFAM304 Black Feminist and Trans Theories of the Hu/Man
This seminar provides an introduction to Black feminist and trans theories' interventions into the modern Western category of the human and its violent exclusions. Since their inception, Black feminist and trans theories have brought attention to the violence of what Sylvia Wynter has called our "genres of the human," and in so doing, have laid bare the very preoccupations of power that condemn the non-white, non-cisgender being to sub-Human status and death in the material and discursive economies of racial capitalism. Students will develop broad knowledge of Black feminist and trans theories' provocations regarding the intersecting identity categories that organize our world, and will be encouraged to develop their own critical approaches that are attentive to the hegemony of racialized gender and its attendant violences.

AFAM305 Lyric Poetry and Music: The Color and Politics of Cry, Sound, and Voice
Lyric poetry may be the most musical of literary forms. In one of its basic definitions, the lyric poem begins after the overhearing of a sound. This sound may be familiar and pleasant, like the timbre and cadence of a lover's voice. Or it may be unrecognizable and terrifying. It may be imbricated with other senses and feelings, provoking a memory that stimulates a sense of touch or smell. Or it may stimulate a sense of horror at the inevitability of death. In any of these cases, sound is thought to reveal an attachment, a memory, and to give rise to composition in the poet's effort to reshape memory and feeling in lyric form.

But such articulations do not always come out as evenly as this description may imply. Indeed, moans, screams, stutters, cries, and the madness of possession by the Muses are part of lyric's history and practice. In this course, we will read from African American, African diasporic, Caribbean, Latina/o/x, and Indigenous poetics, and we will consider their relation to myth and musical forms, such as the blues, son, bomba, biguine, jazz, reggae, hip-hop, salsa, among others. The dynamics between lyric speakers and musicians, sound and story, seen and voiced language will play out.

AFAM307 Black Middletown Lives: The Future of Middletown's African American Past
In this service learning course, students will do hands-on history by uncovering, preserving, and sharing Middletown's rich African American past. We will focus on the history of the Beman Triangle. This African American neighborhood, now part of Wesleyan's campus, served as a regional and national antislavery and Underground Railroad center and home to one of the nation's first handful of independent Black churches. Students will partner with local archives, libraries, and museums to help preserve and share this neighborhood's remarkable history. Our projects will include building a website and an exhibit to share this history with the Wesleyan and Middletown communities.

AFAM309 Indentured Spatialities
Inspired by many political and intellectual traditions, such as Caribbean Studies and Black Feminism, Indo-Caribbean scholars, activists, and artists have long grappled with the spatial entanglements of indentureship, slavery, and colonialism both in and beyond the Caribbean (Persadie, 2022; Hosein, 2016; Goesine, 2016). However, this canon of thought and practice needs more visibility. So, in this course, students will explore the spatial identities and experiences of "Indo-Caribbeans," descendants of "Coolie" indentureship, but IN RELATION to Black and Indigenous spatial realities that constitute the Indo-Caribbean. Through guest lectures and formal and informal written assignments, students will engage intellectually and creatively, fostering a deeper understanding of indentured spatialities. This course will require students to ground their contributions in the work of Indo-Caribbean thinkers like Patricia Mohammed and Andil Gosine and the activism of organizations such as the Caribbean Equality Project.

AFAM311 Vitalism and Black Aesthetics
What is the relationship between Black art and Black life? Does Black art, broadly construed, serve a mimetic function-merely re-presenting reality-or is it a vital expression of the essence of Blackness? These questions are at the root of Black Cultural Studies' engagements with the problem of the aesthetic. In the current conjuncture, reacting to the theorization of Black social death, many theorists have (re)turned to the aesthetic as "proof" of the mattering of Black life and "evidence" of a vibrant sociality. This course will consider the connection between (the theorization of) Black aesthetics and (the affirmation of) Black life. In so doing, we will question the political stakes of Black aesthetics, as well as the value placed upon the concept of life as such, in and through the aesthetic encounter. Additionally, we will explore ways of thinking of the aesthetic that challenge presumptions of its innate liveliness. Readings will include canonical texts in aesthetic theory and vitalist philosophy, as well as more contemporary engagements with these questions from the perspective of Black performance theory, literary theory, and Afro-pessimism.

AFAM312 Black Speculative Fictions and the Anthropocene
The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.

AFAM314 The Black Charismatic
In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called "charismatic") black political leadership by attending to Tavis Smiley's yearly "State of the Black Union" address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley's annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley's yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the

black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

AFAM315 Black Literary Theory
This course will bring together readings both literary and critical/theoretical, beginning with Frantz Fanon's "Black Skin, White Masks" (1952). Taking Fanon as its point of departure, then, this course will necessarily turn to a discussion of the recent discourse on Afro-pessimism and Black optimism, attempting to introduce students to important issues and questions of race, race relations, anti-Black racism, Black sociality, the universality of whiteness and white supremacy, the fungibility of the Black body, and the vulnerability and precarity of Black life; and together we will think more closely about how the complex and "unthinkable" histories and afterlives of chattel slavery, racial capitalism, settler colonialism, and the Middle Passage, for examples, continue to challenge the representational limits and potentialities of traditional literary genres and modes of emplotment. In addition to Fanon, authors will include Orlando Patterson, Toni Morrison, Hortense Spillers, Saidiya Hartman, Achille Mbembe, Frank Wilderson, Jared Sexton, Fred Moten, and others.

AFAM316 Carceral Connecticut: Middletown Stories of Race and Redevelopment
In the 1970s, during nationwide "urban renewal" or Redevelopment, the city of Middletown demolished an entire African American neighborhood to make parking lots and Route 9 on-ramps. Called the South End, this neighborhood had been Middletown's Black business and community center for decades.

Why did city officials see this neighborhood as disposable and its residents as displaceable? When, why, and how did this Black neighborhood form, and how did its residents experience, respond to, and navigate the displacement of urban renewal? What can this lost neighborhood--less than half a mile from Wesleyan University's campus--teach us about the history of race, inequality, housing, carcerality, segregation, and Black community and community resilience and resistance in the 20th century, and what lessons can this history teach us today?

In this Community-Engaged Learning course, you will not only read assigned primary and secondary sources. You will also conduct your own archival research and interview former South End residents to record, preserve, and share the largely undocumented history of this neighborhood and its legacies.

Although this course is entitled Carceral Connecticut and is one of the courses associated with the Carceral Connecticut Project (carceralconnecticut.com), of which Prof. Nasta is one of four Wesleyan faculty investigators, we will not focus primarily on prisons or incarceration. Rather, we will explore carcerality as a broader set of practices and policies that have structured the world--including 20th-century Middletown--in ways that reinforce racism and racial inequality, including policing, segregation, and displacement. At the same time, we will pay equal attention to how Middletown's Black community has created institutions and neighborhoods that have resisted and responded to displacement, containment, and other carceral practices.

AFAM317 Black Connecticut Revolutionaries: Making Freedom in Revolutionary-Era New England
What did the American Revolution mean to people of African descent, in Connecticut and throughout North America? More than you might think. Enslaved people seized upon the war to strike for freedom, some fighting with the colonists and others siding with the British in hopes of emancipation. Here in Connecticut, where several thousand people of African descent remained enslaved at the revolution's outbreak in 1775, hundreds fought for freedom by joining the Continental Army, escaping, or purchasing their freedom. In the aftermath, they forged New England's first free Black churches, antislavery movements, and communities, including the Beman Triangle here in Middletown. In this course, you will read a range of primary and secondary sources by and about Connecticut's earliest enslaved and free Black communities. As the nation marks the 250th anniversary of the American Revolution this year, we will reflect on the meanings of freedom in a nation built on slavery, and the role of Black Americans as freedom and democracy's champions since the nation's founding. For your final project, you will use local archival and secondary sources to reconstruct and share the life stories of early enslaved and free Black Middletown residents, drawing on sources at the Middlesex County Historical Society, Wesleyan University's Special Collections & Archives, and digitized documents. The ability to read 18th-century handwriting is helpful but not required, but an interest in "doing history" through archival exploration and discovery is important.

AFAM320 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

AFAM322 Black Girl Magic?: Survival and Speculative Fiction in the Social World
"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag -- cisgender, well-to-do, fit/thin, non-disabled, and/or famous -- and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/quare studies, popular culture, political science, speculative fiction, and cultural sociology.

AFAM323 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.

AFAM324 Black Power and the Modern Narrative of Slavery
The historical moment immediately after the Civil Rights and Black Power movements saw an explosion of African American writing about slavery. In the past half-century, black writers wrote award-winning novels that gave unprecedented attention to the intricacies of the life of people who are enslaved and to slavery as a system that they suggested could help us better understand late-20th-century American culture. We will read some of the most important works written by contemporary African American writers to see how and why they transformed the first autobiographical form for black writers--the slave narrative--into a fictional form that has served them as they dissect their own cultural moment.

AFAM325 Blackness and Affect
Critical theory and the humanities are in the throes of what has been termed "the affective turn," wherein scholars theorize affect--broadly construed as social feeling or bodily intensity--as central to understanding (post/human) relationality, the social, ethics, and the political. Haunting this field of inquiry is a series of questions: Can a turn to affect account for the figure of the Slave? Can an embrace of affectivity, as potential, bring Blackness into the realm of our understanding "without trying to fill in the void" (Hartman)? Rather than conceptualizing affect as the connective thread between bodies and worlds, or as a purely relational force, how might we think about affect and non-relationality; affect outside of and against the world; affect without the body? This seminar will engage these, and related, questions through extended explorations of the relationship between affect theory and Blackness. Readings will include: Frantz Fanon, Lauren Berlant, Brian Massumi, Sarah Ahmed, Rizvana Bradley, Xine Yao, Sianne Ngai, and Darieck Scott, among others.

AFAM326 Litanies for Survival, Plots for Revolution
This seminar centers black-feminist and queer-of-color theory, literature, and art from the 1970s to the present in order to interrogate and reimagine revolution and revolutionary praxes. We will examine the interrelatedness of art and activism, hope and despair, collaboration and erotics. Key questions include: How does "survival" put pressure on "revolution," and vice versa, particularly in light of contemporary and imminent catastrophes, local and planetary? How does a joint consideration of survival and revolution affect interpretations of the past, understandings of the present, and imaginings of the future? What political work might intellectual and creative labor perform? Is revolution an event, a practice, or both? A useful term or a ruse?

This seminar is offered in conjunction with the Center for the Humanities' Fall 2018-Spring 2019 theme, "Revolutions: Material Forms, Mobile Futures." Assigned readings will include the work of scholars participating in the Center's Monday night lecture series, and students will be required to attend several lectures over the course of the semester.

AFAM327 Biopolitics, Blackness and Spirit Baptism: The Birth of American Pentecostalism
American Pentecostalism is a conservative, Protestant, Evangelical revival movement that emerges in and through Black practices that constitute an exclusion in the racialized religious, social, cultural, and political formations of early 20th-century United States. Rather than examining Pentecostalism through a single lens called "religion," this course will use the themes of Biopolitics and Blackness to examine Pentecostalism through its most commonly known feature--an experience called the baptism of the Holy Spirit. Pentecostals were narrated in popular and critical accounts in the late 19th and early 20th century as exhibiting criminality, insanity, and raced, gendered, and sexed Black pathology. These marks of abnormality were all part of a formation of power in America known as biopolitics. As an idea, biopolitics is popularized by French historian/philosopher Michel Foucault. Foucault's concept attempts to explain how different intellectual and professional disciplines emerge in nations during the late 19th and early 20th centuries to best create a thriving population, which could be made to live. The power of the nation-state had traditionally been expressed in and through the power to kill. As a revival movement, Pentecostalism rehearses these themes, as early adherents fight over what it means to be made alive when racial Blackness is almost often seen as a mark of and for death. The course will study original accounts and sources from the historical period, read critical, interpretive accounts, and use a variety of media. All resources will be provided in class or via Moodle.

AFAM328 The Black Soul: DuBois and the Practice and Grammar of Religion
W.E.B. DuBois is a foreparent in modern sociology, history, poetics, and aesthetics. DuBois was no less formidable and foundational for understanding religion in general, and Black religions in particular. This course seeks to read several of the great works of DuBois, interpreting them in light of their relevance for the study of religion. The course will also give extensive consideration to how DuBois both studied and used religious grammar and practices to build his intellectual program. The course will examine DuBois's impact on the study of religion globally in the aftermath of his work. DuBois's works will be considered, along with interpretations from Edward Blum, Hazel Carby, David Chidester, Gary Dorrien, Cheryl Sanders, Theodore Vial, Stephanie Shaw, Victor Anderson, and Rebecka Rutledge Fisher.

AFAM329 Race and Reproduction
This interdisciplinary course explores the intimacy of race and reproduction against the backdrop of capitalist modernity. We scrutinize the policies, priorities, and perversions of slave owners, the racially differentiated family planning programs under apartheid, the eugenicist movements and the criminalization of poverty in the United States to interrogate what is generated by the incapacitation of blackness across scales of time and space. We examine the Marxist feminist elaboration of the concept of social reproduction and then consider black feminist rejoinders that center the reproductive labor of black women -- as slaves, as domestic workers -- that implicate violence and ownership in the mediation of biological and social reproduction as a set of racializing practices in which value is generated, accumulated, and expropriated. Finally, the course considers the proliferation of assisted reproductive technology (ART) in the 20th century, the recourse to surrogacy, and family abolition to interrogate the extent to which the "race-reproduction bind" is disaggregated or reanimated in the present.

AFAM331 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

AFAM335 Fugitives and Freedman: The Politics of Slavery in the Civil War Era
The actions of fugitive slaves and newly-freed people turned the crisis of American union into a war for emancipation. Questions of slavery's expansion, permanence, and end dominated the political discourse of the United States from 1848 through 1877. This course will examine the ways in which political actors, especially African Americans, kept the twin issues of slavery and emancipation in the public sphere to restructure American society in the middle of the 19th century.

AFAM336 Black Texts, Lost and Found
This course examines histories of loss and recovery of black texts in the US and the Atlantic world more broadly. We will bring a three-pronged approach to our subject matter. We will analyze first the constitutive silences of the archive: epistemic and material neglect, or what Michel Trouillot has termed the "silencing of the past"; second, the preservation efforts of black newspaper editors, librarians, and bibliophiles; and third, the "counter-archiving" work of Afro-diasporic historical and speculative fiction. As we traverse different periods and empires we will consider what the concepts of the "black archive" and "black ephemera" mean to different disciplines. We will study the repressions of black Arabic writing practices in the US South and our fragmentary recovery of them in the late 20th century, unfinished novels about Black Atlantic revolutions such as Martin Delany's "Blake," incomplete runs of historic black newspapers, debates

about the illusions and desires of "recovery," and the criteria that determine what counts as ephemeral and when.

We will move across different media, from print--"I, Tituba," "M Archive," "Blake," "(Dis)forming the American Canon: African-Arabic Slave Narratives and the Vernacular"--to films--"The Watermelon Woman," "Looking for Langston," "The Last Angel of History"--and from digitized databases of photographs at the ongoing archiving project The Missing Chapter: Black Chronicles to digitized newspaper archives.

AFAM343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations
The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

AFAM344 The Haitian Revolution Beyond Borders
In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti's neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti's founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti's long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

AFAM346 America's First Civil Rights Movement: Black Activism in the U.S. from the Founding to Reconstructio
Historians long described free African Americans in the early United States as occupying an "in-between" legal status, neither enslaved property nor entirely legal persons. This class would explore how free Black people rejected that status, seeking liberation, protection, and equality in the early United States. In so doing, they participated in, and meaningfully shaped, debates over the contours and privileges of American citizenship. Through this subject lens, students will be introduced to the methods of political, social, and legal history, and will have the chance to use contemporary social theories on activism, inclusion, and liberation as a critical lens.

AFAM347 Black Grammars
In her text In the Wake: On Blackness and Being, Christina Sharpe argues that Blackness, due its rearrangement of and resistance to hegemonic modes of meaning making, is "anagrammatical." As a concept, anagrammatical Blackness points to "the failure of words and concepts to hold in and on Black flesh." Taking this provocation as a point of departure, this course will consider the relationship between Blackness and the grammatical, with a particular focus on rhetoric and poetics. Each week will focus on a particular rhetorical figure or grammatical concept: subject, metaphor, metonymy, apostrophe, tense, irony, catachresis, parataxis, etc., considering how Blackness shifts our understandings of their operations. Readings will include Ronald Judy, Barbara Johnson, Jacques Derrida, Zakiyyah Iman Jackson, Fred Moten, and Paul de Man, among others.

AFAM348 The Problem of the Negro as a Problem for Thought
Philosophical inquiries into the "the Negro problem" -- the question of what blackness is and how we socially reckon with its existence -- have historically flourished outside of the academic mainstream, weaving through a myriad of forms -- art, criticism, sociology, autobiography, oral traditions, etc. -- that are typically not counted as philosophy. This class will challenge our assumptions about where good and rigorous philosophy happens by attempting to track the metaphilosophical challenges that the study of blackness produces. We will read a survey of black studies texts from writers including Nahum Chandler, Marquis Bey, Christina Sharpe, and Fred Moten.

AFAM350 The Law, the Citizen, and the Literary and Cinematic Imaginations
What gives the law its authority? (Can it remember?) Does it have rational or mystical foundations? What are the functions of the categories of slave, savage, scapegoat, stranger, other, family, and citizen in and for the law? How do we apprehend the relationship between the extensively legalized violations of the earth, the black, and the feminine? What gives the ongoing event of the Middle Passage so much force, and on a planetary scale? If laws of hospitality are sacred, then what are the implications of their prolific sacrilege? And what, for we can trace it, do such laws' selective "application" have buried within them? This course will attune us to who/what may be incorporated into the body politic

and who/what cannot be borne in the letter, by design, and on safeguarded, terrorizing terms -- legal, historical, and metaphysical, yes, and harboring those, ontological. We will read and analyze how literary and cinematic texts represent, critique, as well as reproduce the rhetorical and psychic effects of the law.
To echo Calvin Warren, "[Our] concern is not a particular law, but that all the laws are subordinate to a Law." Thus, while we will look at the language and aesthetic configurations of specific legal events and echoes -- the Zong Case, partus sequitir ventrem, Jim Crow, Nuremberg Laws, The Code of Native Status (in French-occupied Algeria), and so on -- we will not do so "comparatively" nor to inadvertently idolize encoded violence, but to apprehend what is buried and stirs beneath the law's foundations.

AFAM351 Queer of Color Critique
This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

AFAM352 Black Thought and Critical Theory
This course follows Stuart Hall's insistence in "What is this 'Black' in Black Popular Culture?" that the theoretical articulations of "blackness" are always "conjunctural." We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of "blackness" at specific historical and theoretical conjunctions. How is "blackness" useful for social theory? Must we assume there is a transhistorical identity to "blackness"? In what ways does "blackness" conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

AFAM353 Blackness in the Anthropocene
To deny the "unprecedented" geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this "new era" has afforded us in terms of critical potential. From accusations that what we now call the "Anthropocene" has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the "Anthropocene" are still contested terrains. The aim of this course is to investigate the Anthropecene's many forms of socio-political erasures and theoretical "blind-sights." We will examine the ways in which Anthropocenean discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocenean times. We will explore questions like "who are 'recognizable/legitimate' victims in environmental disasters," "do events like hurricane Katrina or the migration crisis teach us anything about our human condition," and "what is the 'post' in post-humanism." We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

AFAM354 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments
This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Truillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

AFAM355 Slavery and the American Legal System
This class will uncover the deep, foundational relationships between American slavery and the nation's legal, constitutional, and judicial traditions. It will, in turn, consider the historical and structural tensions between democratic state-building and the social, economic, and security imperatives of a slave society. It will begin with a historical analysis of how, starting in the seventeenth-century British empire, slaveholder sought to shape the construction of what would become the foundations of American law. After considering the historical foundations of American slavery, the class will turn toward an examination of how slavery's legal foundations shaped American legal, constitutional, and jurisprudential practices after its abolition. Students will complete final projects that work to uncover the extent of slavery's continued presence in the precedents and traditions that shape the modern American judiciary.

AFAM358 Fugitive Perspectives on Education and Civil Society
In 1946, the African American novelist Ann Petry imagined what a white schoolteacher might think about working with black students in Harlem, New York: "Working in this school was like being in a jungle. It was filled with the smell of the jungle, she thought: tainted food, rank, unwashed bodies." Petry had herself worked in Harlem schools. She also held credentials from well-heeled white schools in Connecticut. Despite her own academic success, she questioned the inherent value of schools that regarded black children as if they were untamed savages. Challenging prevailing narratives of excellence and achievement, this course examines fugitive perspectives of black, Indigenous, LBGTQ, and poor folks who resisted compulsory schooling and avoided conscription into so-called civilized society. If, as historian Michael B. Katz has argued, US schools "are imperial institutions designed to civilize the natives; they exist to do something to poor children, especially, now, children who are black or brown," then why should any self-respecting black or brown child endure such schooling? What might so-called truants, illiterates, failures, burnouts, dropouts, and delinquents teach us about education and civil society? The history of education, however, has largely been interpreted from a biased perspective--namely, those who have been successfully schooled. We will therefore search for contrary voices in fragments of oral culture, ranging from slave narratives to folktales and recorded music. Contemporary scholarship will inform our analysis. Interdisciplinary scholars such as James Scott, Eric Hobsbawm, Tera Hunter, Saidiya Hartman, Lisa Brooks, and Audra Simpson will illustrate how to read against the grain and unearth hidden transcripts from classic authors such as W.E.B. Du Bois, Carter G. Woodson, Anna Julia Cooper, and Gertrude Simmons Bonin.

AFAM369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire's A Tempest (1969), a bold postcolonial adaptation of Shakespeare's Tempest, to Winsome Pinnock's Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

AFAM371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

AFAM372 Negativity in Black Critical Thought
Lack, nothingness, negation, the void, the abyssal, absence, wretchedness these and other corollary terms are omnipresent grammars within Black critical thought's attempts to explicate the singularity of Blackness. Conversant with philosophical genealogies of pessimism, nihilism, and negativity, this course will examine various theorizations of the relationship between Blackness and the negative. Rather than framing negativity as essentially apolitical or unproductive, this course will consider what a fidelity to the negative portends for questions of Black politics, Black theorizing, and revolutionary action. In so doing we will pay particular attention to questions of affect, gender, sexuality, aesthetics, and psycho-politics.

AFAM375 Black Global Cities
In this course, we will analyze representations of cities and Black urban modernity in Afro- diasporic literature of the twentieth and twenty-first century. Placing special emphasis on the global hubs of London, Cape Town, Kinshasa Lagos, New York, Marseilles, and Kingston, we will ask what makes these former imperial sites Black global cities? We will read literary works on and from Black Global Cities alongside sociological texts on urbanization, globalization and discuss the extent to which literary representations either collude with or challenge dominant national and transnational narratives about Black urban modernity. Although each week's readings will focus on a different location, we will approach these locales as nodes in larger global networks of people, texts, and goods rather than as discreet, bounded places. To this end, we will trace how histories of racial formation move across borders and are transposed onto different spaces, and to what effect. Authors we will read include: Claude McKay, James Baldwin, Gabeba Baderoon, Petina Gappah, Kei Miller, and Teju Cole. We will also watch films such as Girlhood (2014), Black Panther (2018), The Harder They Come (1972), Bad Friday: Rastafari After Coral Gardens (2011), Welcome to Nollywood (2007).

AFAM379 The Fire Next Time: The Modern Black Freedom Struggle
The Fire Next Time explores the spectrum of African American politics in the mid-20th century United States. It will examine not only the nonviolent social movement against the Jim Crow South but will scrutinize expanding notions of black militancy against racial oppression in modern America. We will complete and discuss readings on the "short" and "long" civil rights movements; the position of women in movements for black equality; the leadership of Martin Luther King, Jr. and Malcolm X; the work of civil rights activists in the urban North; and the movement for Black Power. This course seeks to provide students with an understanding of the major themes and contexts of the most important social movement of the 20th-century United States.

AFAM387 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

AFAM391 Unsovereign Elements, Caribbean Poetics
This course aims to study and question sovereignty, begin to theorize "unsovereignty," and stake out what may be meant by "anticolonial imagination" in literary and other aesthetic forms, as well in the theories of history that it arranges under its name, "Unsovereign, Caribbean." Unsovereignty and the anticolonial will not be imagined as exact and liberated opposites of sovereignty and colonialism, but rather as epistemically and linguistically entangled therewith, and inviting further thought from Afro-Caribbean historical and deconstructive vantages. By reading richly symptomatic, primary, historical documents about race, geography, and slavery in San Domingue/Santo Domingo, as well as contemporary fiction, art, and criticism that re-narrate and theorize Caribbean history, we will focus on the historical frame of ~1492 into the 19th century. This frame holds with specific reference to Sara E. Johnson's notion of a foundational "state of war" against black people in the Americas and Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically." The 19th century will be studied comparatively, and not as the era of heralded "emancipation," but of abduction, re-enslavement, "travestied freedom" (Hartman), anti-emancipation (Eller), and white psychosis. We will read sometimes for imperial notions of sovereignty, force, race, property, and labor, and other times for Caribbean notions and narratives that are sometimes at war with and sometimes in bed with said imperial schema and this episteme. In the face of some contemporary critical theoretical tendencies to use terms like "fugitivity," "resistance," "freedom," "abolition," "the commons," etc., as ones that are equally at stake for all, or that signify one shared known, fixed, and agreed-upon meaning, we will, rather (and especially), attend to the historical specificity and signifying work of marronage in the Caribbean region and the complex tropology of unsovereignty and "unruliness" in the Caribbean. Conceptually, the course thinks from and about Caribbean studies, Black critical theory, Black studies, Enlightenment thought, and Deconstruction. Students who want to nerd-out on critical theory, history, and Caribbean aesthetics are encouraged to apply.

We will study digitized versions of imperial naval and commercial maps held at the John Carter Brown Library, Archivo de Indias, and in other archives, as

well as primary texts of different genres (e.g., pilotes, ledgers, letters, legal documents), including the writing and thinking of Christopher Columbus, Moreau de Saint Mery, Baudry des Lozieres, María de las Mercedes Santa Cruz, Immanuel Kant, and G.W.F. Hegel. We will also read selections from some of the following scholars, artists, writers: Colin Dayan, Sara E. Johnson, Evelynne Trouillot, Jacques Derrida, Robin Derby, Maryse Conde, Alejo Carpentier, Demetrius Eudell, Anne Eller, Dixa Ramírez D'Oleo, Ronald Mendoza de Jesús, Frank Wilderson III, Walter Benjamin, Gayatri Spivak, Aimé Césaire, Beatriz Santiago Munoz, Joiri Minaya, Jean Rhys, and others.

AFAM392 Black Grief Geographies
This course introduces students to literature and practices centered on post-slavery and post-colonial bereavement. Employing an interdisciplinary framework of Black Geography, Feminist geography, and post-colonial thought, students will examine the spatial orientations of Black grief and mourning. Here students will also evaluate the connections and frictions between queries on emotional geographies and Black grief. What are the affective and material forces of Black grief and mourning, and do they vary by place? How can we read Black grief and mourning beyond narratives of dispossession? What are the human and non-human assemblages that constitute Black grief and mourning? Is it possible to repair infrastructures that mark Black death? This course invites students to meditate on the above questions as well as to apply Black framings on grief to their own research by developing a 15-page visual essay or a 30-minute in-class lecture that draws on any of these questions.

AFAM393 The Library: Its Past, Present, and Future
The library is both a repository and a site for disciplining information. It is, at once, a space for democratizing knowledge and a locus of exclusion. A lifeline and a tomb. A place of radicalization and community, but also the handmaiden of state power. Indeed, the library's vexed role in the history of Western colonization has prompted scholars of African and postcolonial literature like Simon Gikandi to ask whether one can be a revolutionary in the library. This question has shaped the archiving sensibilities of African American collectors and librarians like Arthur Schomburg and Dorothy Porter Wesley as well as those of contemporary Black librarians and artists. This will be one of the central questions we explore in this course, too. We will examine artistic and literary representations of libraries, archives, and museums ("The Library of Babel," The Shadow Book, Lote, The Name of the Rose, Voyage of the Sable Venus, Yinka Shonibare's "The British Museum"), paying special attention to the fantasies, nightmares, and cultural narratives that cohere around the idea of the library. We will pay special attention to the place of the library in the Black literary imagination and to the theoretical and political interventions that Black librarians and bibliophiles brought into systems for categorizing and recovering knowledge.

AFAM394 Afrofuturist Cinema
In Space is the Place, jazz musician and cosmic philosopher Sun Ra states that "the first thing to do is to consider time as officially ended. We work on the other side of time." Afrofuturist narratives tend to unfold in this inverted time, or "after the end of the world." In this class, we will begin our research in the loop of Sun Ra's speculative refrain. We will examine cinematic depictions of hauntings, dystopias, aliens, the surreal, and space travel. We will discuss works by Anisia Uzeyman, Ryan Coogler, Wanuri Kahui, Ngozi Onwurah, Terrance Nance, Jordan Peele, Mati Diop and more.

AFAM395 Black American Cinema
What is Black Cinema? Is it, as Tommy Lott has claimed, a critical form of filmmaking that resists the "Hollywood master narrative"? Or, as Michael Gillespie claims, does it elaborate Black visual and expressive culture without any pressuposed commitment to a "real" Black lifeworld? While these are critical questions that we will encounter in this class, we will not attempt to answer them. The class surveys a wide range of films to tell a conceptual story about the complex relationship between Blackness and cinema. We will discuss works by filmmakers such as Melvin Van Peebles, Oscar Micheaux, Spencer Williams, Kathleen Collins, Charles Burnett, Julie Dash, Ayoka Chenzira, and more.

AFAM396 Jazz Orchestra I
This course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.

AMERICAN STUDIES (AMST)

AMST115F Reproductive Politics (FYS)
This course explores the history and current status of reproductive politics in the United States. Particular attention will be given to the intersection of scientific and bioethical concerns with matters of social difference and cultural meaning. Issues covered will include: the history and legacy of the birth control movement; the ideological construction of "infancy" and "childhood"; changing attitudes towards pregnancy and childbirth; conceptions of parenthood; abortion rights; the fetal personhood debates; the regulation of pregnancy within institutionalized settings; disability, selective abortion, and genetic engineering; race, gender, and reproductive justice; and more.

Prereq: **None**

AMST117F Social Norms / Social Power: Queer Readings of "Difference" in America (FYS)
This American Studies First Year Seminar is an interdisciplinary exploration of the privileges and penalties associated with "the normal" in the United States. We'll be centrally concerned with the ways bodily difference and social identity interarticulate with "normalness," locating individuals within hierarchical power structures. What is "normativity," if not a statistical norm? How are regimes of normativity produced, reproduced, and challenged?

Our focus is on queer studies, which we will approach through an intersectional lens, paying careful attention to the ways race, ethnicity, indigeneity, class, disability, gender, and sexuality intersect in social terrains of power. We will unpack and explore key concepts in American studies, including settler colonialism, compulsory ablebodiness, heteronormativity, biopolitics, neoliberalism, and ideology, drawing on a range of genres and disciplines, including memoir, ethnography, film, and theory in disability studies, queer theory, critical race studies, Marxist feminism, Native American studies, and trans studies. Along the way, we will encounter problematics ranging from disability and the "normal" to the American Dream, the "wedding-industrial complex," sexual "deviance" and desire, racialized state violence, the privatization of the public space, and the politics of queer/LGBT activism.

As a First Year Seminar, this course is writing-intensive and is structured to give you ample practice in core writing, reading, and presentation skills needed at Wesleyan.

AMST125F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

AMST130F Wilderness or Paradise? The Colonial World in the Western Imagination (FYS)
What do William Shakespeare's Tempest, Karl Marx's Capital, Georgia O'Keefe's Ram's Head, Bob Marley's Redemption Song, and Sterlin Harjo's Reservation Dogs have in common? What about Jean Jacques Rousseau's Discourse on Inequality, Mary Shelley's Frankenstein, Frida Kahlo's Two Fridas, Nina Simone's Mississippi Goddam, and George Lucas's Star Wars? All these works offer critical reflections on the process of European colonialization of the Americas that started in the late fifteenth century and extends to our days. They all grapple with the question of whether the New World was (and still is) an Edenic utopia or a hellish dystopia. And they all offer provocative answers and difficult new questions.

This first year seminar will explore how different thinkers and artists have imagined and reimagined colonialism in the Americas, from Alaska to Tierra del Fuego. We will also investigate how the representations they created have contributed to reinforcing or upending colonial relations. We will study cultural creators belonging to different groups, including indigenous peoples, enslaved and free Africans and African Americans, metropolitan and colonial elites, and Asian and European immigrants.

This course will introduce students to different forms of intellectual expression in the Western world--from philosophical treatises to movie series, passing through novels, paintings, and songs. To better understand these works, we will read academic texts and address the practical and theoretical foundations of academic thinking. As we engage with primary and secondary sources on colonialism, the students will also learn practical skills ranging from formatting texts and citations to finding books in the library and articles on the internet to making a compelling argument in an essay or a research paper.

AMST170 Solidarity Forever: An Introduction to American Studies
This course is an introduction to the interdisciplinary field of American Studies. We will explore how American Studies scholarship engages "solidarity" as a subject of study and as a practice. We will consider how conversations in the field relate to resistance and activist movements across time and space, from the US/Indian Country to the transnational and the global. By covering vast topics and themes such as settler colonialism, carceral politics, labor organizing, the war on terror, and more, we will examine the questions, methods, and

frameworks that animate and shape American Studies. We will reflect on the role of knowledge production in movements and struggles for justice.

AMST174 Popular Culture and Social Justice: An Introduction to American Studies
This course explores the interlocking histories of popular culture and social justice in the 20th- and 21st-century United States, with particular focus from mid-century to the current moment. By focusing on the ways in which social justice movements and ideologies have utilized and been informed by trends in art, film, television, music, and commercialism, we will interrogate critical concepts in the field of American studies, such as citizenship, belonging, difference, and equality. Topics covered will include feminism(s), antilynching, civil rights, labor and poverty, pro-choice, disability rights, queer liberation, leftism and countercultures, environmentalism, and animal rights.

Questions addressed will include, How has popular culture both advanced and hindered the progress of social justice movements? How has the idea of "social justice" changed over time? Which groups are included? What aims are articulated? How has the media portrayed and influenced social and political problems, and how has the rise of new media (from radio to television to the Internet and beyond) created new spaces for debating power and inequality?

AMST177 American Movies as American Studies: An Introduction to American Studies
Our aim is to see how movies from the 1930s to the present can help us grow as critical (and self-critical) American studies thinkers (and have fun--even as we question the effects and implications of this fun--doing it). Talkies appeared as a complex mass-cultural form of American studies, exported all over the world, precisely when the academic field of American studies emerged in the early 1930s. From the get-go, movies involved in mass-disseminating America's inventions of power have made available, in very entertaining ways, critical insight that can blow the whistle on how the reproduction of Americans and American ideologies are pulled off. Together we will explore the modern Americanization of power (hard power, soft power) and focus our exchanges on four intersecting concerns that movies can be particularly good at illuminating: (1) how culture industries (including movies) shape consciousness, needs, desires, incentives, values, and sense of belonging, and frame--limit--our vision of what constitutes problems and solutions; (2) how social critique (even movie critiques of movies) can be mass-popularized; (3) how America makes Americans, especially, into workers (even if they hate what they do and wonder about what and who they are working for) and weapons of various sorts (even if they are frightened and wonder about what and who they are fighting for and against); and (4) how and why America constructs difference (e.g., class, gender, race, individuality, national identity). This lecture/discussion course is a thinking-intensive and imagination-intensive critical project designed to engage compelling big-picture concerns--systemic matters--vital to American studies critiques.

AMST179 Contemporary U.S. Politics: An Introduction to American Studies
This course will focus on contemporary politics in the United States. We will cover topics such as populism and the Trump presidency, current political narratives concerning immigration, the rise of the "alt-right," debates over free speech, race and civil rights, state violence and the prison system, sexual assault and the abuse of power, religious freedom and freedom from religion, the workings of late capitalism, and the possibilities of environmental justice.

AMST180 Entertaining the Masses: An Introduction to American Studies
This course will explore the ways in which people living in the United States entertained themselves from colonial times to the present. From the circus to movie theaters, from pubs to video games, from hunting expeditions to football matches, from church choirs to hip hop battles, we will use mass entertainment as a window into American culture. We will question what American society has considered fun, how leisure became separate from labor, how capitalists have commodified and authorities have disciplined entertainment, how different groups created and/or appropriated different forms of entertainment. Through these questions, we will study classic and new topics of and approaches to American Studies.

AMST200 Colonialism and Resistance
Why does colonialism matter to the fields of American Studies, Latin American Studies, and Caribbean Studies? What have been the consequences of colonialism for peoples of the Western Hemisphere? This course offers a transnational approach to the study of colonial modernity through a comparative analysis of colonial ventures and their far-reaching consequences. With a focus on the interactions of Indigenous, European, and African peoples, the course introduces a diverse range of issues and topics, such as the organization of production, including chattel slavery, indenture, and free labor; imperial competition and state formation; emancipation struggles; and Indigenous sovereignty.

AMST201 Queer Theories
This seminar will give you a solid foundation in queer studies. Although "queer" is a contested term, it describes -- at least potentially -- sexualities and genders that fall outside normative constellations. This theory-based, reading-intensive seminar considers multiple genealogies of queer theory, from foundational texts and authors in queer theory, queer of color critique, trans theory, and crip theory, to lesser-known but critically important interventions. Structured as a series of conversations, we explore multiple locations of theory and notions of "queer." Rather than understanding queer studies as a singular school of thought, we will continuously problematize queer studies as a mode of analysis, asking: What kinds of bodies or desires does queer describe? What are the politics of queer? What are the promises of queer theory, and what are its failures? What is the future of queer? This course is excellent preparation for a queer studies concentration in American studies. Students should expect to end the semester confident of their ability to read and draw on a range of queer theories.

AMST203 Biopolitics, Animality, and Posthumanism: Junior Colloquium
This course asks what it would mean for the field of cultural studies to begin to include the category of the "human" within investigations of more traditional categories of social difference (including race, gender, sexuality, and so on). Historically, the category of the human has been taken for granted, as a biological marker imbued with particular intellectual and physical capabilities. Relatedly, the discourse of the human is often invoked in movements for political equality, inclusion, and enfranchisement (i.e., the call to "human rights"). Yet recent literature within the field of American studies broadly, and, more specifically, within the area of critical animal studies, has called these assumptions into question. In this junior colloquium, we will explore these critical turns in the field by considering the boundaries between the animal, human, and technological realms.

Important concepts addressed will include the utilization of animals as research subjects, food, and labor; the "nonhuman personhood" movement; intersectionalities between ideas of social difference and the posthuman; concepts of disability, debility, and capacity; technological enhancements of the human body; and cybercultural identities. Students will have the opportunity to engage with a wide variety of materials, including writing from the areas of critical race studies, feminist theory, and postcolonial theory. (Note: Students need not have familiarity with biopolitical theory; rather, the course will provide a primer in this area during the beginning weeks of the semester.)

AMST204 Saving America from Itself? Movie Interventions (Moore, Lee, DuVernay, Kopple): Junior Colloquium
We will convene four interventionist filmmakers--Michael Moore, Spike Lee, Ava DuVernay, Barbara Kopple--in a strategic dialogue to consider the American studies whistleblowing and anti-bamboozling potential of movies. Their movies have tried to sway elections, empower social movements, inspire protest, popularize national self-critique, study the tactics of top-down power (including scapegoating) and bottom-up resistance, and, perhaps, save America from itself. The many cultural-theoretical payoffs of their movies include moving us beyond any oversimple checklist tendency simply to observe representations of gender, race, and class. They help us question why these categories were produced in particular ways and help us interrogate (intersectionally and dialectically) how they interact with, rely on, and sometimes mask one another. Our four independent filmmakers--in trying to be changemakers--dare us not only to take a hard look at what kind of an America we have had and now have, but prod us, at times seduce us, to imagine more expansively what kind of America we might want to create. We will also put their movies in dialogue with related movies by D. W. Griffith, Boots Riley, Robert Reich, and others. And to establish a longue durée historical perspective, we will read Howard Zinn's epic classic A People's History of the United States. In terms of fields, our colloquium integrates movie studies, cultural studies, premises studies, resistance studies, and social transformation studies.

AMST205 Interdisciplinary Research Methods: Jr. Colloquium
This course will introduce students to interdisciplinary research methodologies and practices, with particular attention to critical themes within the field of American studies, including race, gender, and sexuality. Methods and practices covered will include (but are not limited to): close textual analysis, archival research, quantitative data procurement, interviewing tactics, ethnographic observation, the application of diverse theoretical frameworks, the Institutional Review Board, research ethics, and so on. Students will complete a variety of short assignments throughout the course of the term that will culminate in a final research paper. The class will be held in a seminar format that requires weekly reading, writing, and discussion.

Prereq: **None**

AMST207 Primitive Accumulation: The Beginnings of Capitalism
Karl Marx wrote in Capital, Volume I, "The discovery of gold and silver in America, the extirpation, enslavement and entombment in mines of the aboriginal population, the beginning of the conquest and looting of the East Indies, the turning of Africa into a warren for the commercial hunting of black-skins, signaled the rosy dawn of the era of capitalist production." This course will address the violent beginnings of capitalism from the perspective of the Americas and their connections to other parts of the world. By addressing class struggle, imperial expansion, and environmental degradation, we will analyze the emergence of an unprecedented mode of production that now dominates the world and threatens human existence. But this will not be a simplistic history of good and evil, a moralizing tale. We will unpack the complex historical process and the overwhelming historical forces that go beyond the moral choices of individual human beings. We will look into the interactions between society and nature to reflect on how capital has made an indelible mark in human lives and the rest of living beings on our planet. We will study primary and secondary sources to reconstruct the history of extraction and exploitation that gave birth to the modern era.

Prereq: **None**

AMST208 Visual Culture Studies and Violence
In this course, students will gain important foundational knowledge of the field of visual cultural studies. We will cover theories of the gaze, photographic sight, film and media, spectatorship and witnessing, museums and exhibitions, and trauma and memory, among others. Particular attention will be paid to issues of power, complicity, and resistance as we consider what it means to be "visual subjects" in historical and contemporary contexts. We will address how different media -- from photography, to television, to film, to the Internet -- transform our understanding of images and what it means to both "look" and "be seen." As a primary case study, this course will interrogate the politics of violence, focusing on the relationship between the production of visual culture(s) and acts of individual, collective, and state aggression. We will ask: How have images served to propagate climates of violence against marginalized persons? What are the ethics of looking at pain, torture, and exploitation? Do such images help us to work toward social change or create attitudes of indifference? How do images of war, prisons, pornography, death, crime, famine, and disease shape our understandings of citizenship, nationality, and identity? Finally, how do representations of social difference inform conceptions of violence and their place in the visual field?

AMST209 Cultural Theory and Analysis: Junior Colloquium
In this course, we will interrogate the ways in which we come to understand cultural representation and theories of social and political power within the field of American studies. We will analyze forms of representation using an array of theoretical and textual methods, from economic and class theories, to visual theory to feminist studies and critical race analysis, to theories of virtuality and freakery. We will engage with highly dense theoretical pieces as well as more popular cultural texts, such as film, documentaries, and websites.

AMST217 Carceral Landscapes: From Colonial Invasion to the Prison Economy
This course explores the expansive history of surveillance, policing, and incarceration in the territory now known as California. Engaging Indigenous critiques of settler colonial power, we begin in the late 18th century when Spanish Franciscan priests and imperial soldiers enslaved Native people in missions along the Alta California coast. We will move through crucial sites, such as the first California legislature's 1850 Act for the Government and Protection of Indians, to the establishment of the US border patrol in the early 20th century, and the criminalization of mobility of Indigenous, Latinx, and mixed-race people from both sides of the US-Mexican border, considering how these cases illuminate Kelly Lytle-Hernández's insight that "mass incarceration is mass elimination." Reading across scholarship, archival sources, activism, and news coverage, we will discuss the relationship between militarization and carcerality locally and globally, from the American occupation of California during the Gold Rush (1849), to post-WWII racialized urban policing, to the current construction of the "security fence" along the US-Mexico border that cuts through Kumeyaay lands.

AMST218 Introduction to Queer Studies
This course will examine major ideas in the field of queer studies. Relying upon theoretical, historical, and cultural studies texts, we will consider the representation and constructions of sexuality-based identities as they have been formed within the contemporary United States. We will explore the idea of sexuality as a category of social identity, probing the identities of lesbian, gay, bisexual, and transgender to try to understand what they really mean in various cultural, social, legal, and political milieus. In doing so, we will ask, What does it mean to study queerness? What do we mean by "queer studies"? How do institutions--religious, legal, and scientific--shape our understandings of queer identities? In what ways do sexuality and gender interact, and how does this interaction inform the meanings of each of these identity categories? How do other social categories of identification--race, ethnicity, and class--affect the ways in which we understand expressions of queerness? Moreover, what does studying queerness tell us about the workings of contemporary political, cultural, and social life?

AMST221 Nationalism and National Identity in the United States: Jr. Colloquium
After decades of (seemingly) hegemonic globalization, recent events brought the issues of nationalism and national identity to the fore again. In this course, we will explore classic and new approaches to the nation state and the cultural phenomena associated with it. We will study the institutions, symbols, rituals, myths, and other elements that make up nationalism and national identity in the United States. We will investigate how different groups and communities in North America reinvent national culture, often creating clashing ideas of what the nation should be. From sports to literature, from holiday celebrations to federal legislation, from culinary to military operations, we will use a wide array of case studies to survey national culture. Our goal is to develop intellectual tools that will allow us to understand nationalism and national identity as contested, ever-shifting, and highly consequential parts of reality.

This course will take transnational and comparative approaches. We will investigate American national culture from the perspective of outsiders such as immigrants and colonized populations. We will also compare American nationalism with other nationalisms, including those of Western empires, non-Western nations, and even peoples without a nation state. These perspectives will help us better understand how global forces such as capitalism and imperialism shape national culture in the United States.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST225 Latinidad: Introduction to Latina/o Studies
This course will introduce major themes within the field of Latinx studies, using an interdisciplinary approach to analyze the experiences of Latinx people within the United States and throughout the Americas. Employing a range of historical, theoretical, political, and cultural texts, this class will ask students to think about a number of issues central to the field of Latinx studies, including migration, language, nationalism, indigeneity, education, labor, assimilation, and cultural imperialism. This course will also look at the ways in which intersectional identifications, including race, sexuality, and gender, operate within frameworks of Latinidad.

Methodologically, this course will draw from such diverse fields as ethnic studies, history, political science, border studies, gender theory, sexuality studies, critical race theory, and urban studies. As we utilize a broad range of texts and synthesize diverse perspectives and ideas, students will be asked to interrogate formative concepts, such as the border, America(s), and the nation. Central class queries will probe the boundaries of Latina/o identity, the working of intersectional identities, patterns of migration, and the ways in which institutional power shapes the contemporary Latinx experience.

AMST226 High-Tech Imperialists: Technology and America's Rise to World Power
How did Americans use technologies such as the railroad, photography, the machine gun, and electricity to advance their interests abroad? In this course, we will study the interconnected histories of technology and empire from the American Civil War to the First World War, the period encompassing a techno-

scientific revolution that transformed human lives and power relations all over the world. This course adopts a broad definition of imperialism, reflecting on formal and informal strategies of expansion. It goes beyond US colonies and territories to inquire into how Americans engaged with other imperial powers and their colonial populations, advancing profitable -- and often destructive -- enterprises. It further asks how processes of internal colonialism influenced US power abroad and vice versa. Attentive to material reality, it examines the environmental impact of new technologies in colonial settings and how environmental changes disrupted local communities.

AMST228 Cancelled, Blocked, Banned
This seminar focuses on ideas, texts, and debates that have come to be considered politically and culturally provocative, perilous, or particularly acrimonious. We will read, think about, and discuss a host of issues that inspire discord, passionate debates, and a range of complex perspectives. Students will be asked to consider multiple -- often conflicting -- arguments and come to class ready to engage in good faith discussion. The class focuses on diverse topics and examines multiple perspectives surrounding each issue. Course discussions will include debates over reproductive healthcare, the legalization or prohibition of sex work, carceral politics and the drug war, nature versus nurture narratives and sex differentiation, challenges to free speech, diverse perspectives on best practice education policies (including affirmative action and standardized testing), as well as arguments as how to best achieve racial equity, equality, and justice.

Prereq: **None**

AMST233 Global Queer Studies
This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives.

Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and and the transnational lives of Filipino gay men in New York. Our aim is to challenge and expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative) and to center the ways sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.

AMST235 American Literature, 1865-1945: The Americanization of Power
Together we'll explore not only the complexities of American literature from the 1860s to 1940s, but also how this literature is usable today and excels as critical equipment that can advance our understanding of the modern Americanization of power (put narrowly, we'll develop insights into a "democratic" capitalism, what some called a "Robber Baron" plutocracy, that pulled off and contrived to maintain systemic class, gender, and ethnoracial hierarchies to reproduce its power). As we unpack the relationship of literary form and social form, we'll trace connections between historical developments such as the gothic genre and gender ideologies, domestic romance and the social reproduction of labor, realism and mass-urbanism, naturalism and immigration, modernism and imperialism, and narrative experimentation and anti-racism. The creative works of Emily Dickinson, Mark Twain, Stephen Crane, Henry James, Charlotte Perkins Gilman, Charles Chesnutt, F. Scott Fitzgerald, Langston Hughes, Ernest Hemingway, Eugene O'Neill, Nathanael West, William Faulkner, Richard Wright, and Zora Neale Hurston will help teach us to be more imaginative readers of literature, ourselves, and what America was, is, and might be. While pooling ideas about this, we'll savor the pleasures of reading inspiring and transformative writing. This is very much a thinking-intensive course.

AMST240 Work to Rule: American Labor between Emancipation and Empire
Why have workers in the US fought to join labor unions and participate in collective workplace action when the boss invariably responds with intimidation, repression, and even violence? And how has collective worker power been leveraged both for and against American colonialism and imperialism? In this course we will explore the conflict between capital and labor in the US across diverse sites of struggle, including Southern slaves' "General Strike" during the Civil War, autoworkers' shop floor militancy during the Great Depression, challenges to organizing agricultural, domestic, and service labor, and recent union campaigns of athletes and academics. What does American labor's victories and defeats reveal about the relationship between capitalism, settler colonialism, neoliberalism, and empire? Considering the divisions of race, gender, and class, how have workers in the US enacted or failed to enact the famous International Workers of the World slogan "an injury to one is an injury to all"?

AMST243 American Literature to 1865
This lecture course charts a selective path through the English-language literatures of conflict in North America. Our optic will be double: one eye on history, the other on literary form, and we will experiment with ways of dialectically combining these two lines of vision. The scope of the course is wide, but we will proceed in the style of an anti-survey. Rather than unifying America through a gathering of textual parts, we will attempt to understand how literary forms supply an important index of historical evidence even as their pleasures and contradictions refuse the stabilities of the evidentiary.

AMST243A American Literature on Fire: Conquest, Capitalism, Resistance: 1492-1865
We begin with a 1938 Langston Hughes poem, a north star shining light on American unexceptionalism and then move back in time: from Columbus's dismemberment and enslavement of the Arawaks when demanding gold; to

Cabeza de Vaca's feel-good handbook for the conquest of indigenous peoples; to Puritan inventions of a "God" that pulls the trigger; to Franklin's blowing the whistle on a mercantile capitalism he supercharged with a secular work ethic; to a Declaration of "Independence" in 1776 that provoked alternative declarations written by workers, women, and formerly enslaved persons in the 19th century; to Poe's readings of a Divided States of America (race, gender, domesticity) as gothic; to Douglass's representations of the tactical artfulness and subversions of "slave" culture; to Hawthorne's deconstruction of the Americanization of power; to Thoreau's entwining of collective protest and what he hoped would be an individualized escape route; to Melville's attacks on imperialism, racism, and class domination; to Elizabeth Stuart Phelps's critique of domestic slavery; to Stowe's socially transformative antislavery novel (whose sentimentalization recirculated stereotypes). Along the way, we will draw on Howard Zinn's classic A PEOPLE'S HISTORY OF THE UNITED STATES to help historicize the Americanization of inequality. During our literary-intellectual time travel, we will engage some of America's most "on fire" writers who make possible insights into the ideological foundations of American cultures, identities, and hegemonies that provocatively illuminate America's situation today (and offer some lessons for how to change it). And, not least of all, we will have critical fun throughout.

AMST244Z Imagining the End: Neoliberalism and the Arts
Many of us now like to paraphrase the philosopher Frederic Jameson when he argued that it has become "easier to imagine the end of the world than the end of capitalism." As the recent deluge of post-apocalyptic movies and documentaries about melting glaciers makes clear, this is an accurate statement. Yet while most of us imagine how neoliberal capitalism will bring about the end of the world, others try to imagine the end of the status quo. Since neoliberalism became the global hegemonic system, artists of all kinds have been imagining ways we can survive and (perhaps) overcome it: think about the songs of Tracy Chapman or Residente, the street art of Keith Haring or Lady Pink, the movies of Chloe Zhao or Alejandro González Iñárritu, or the writings of Ursula Le Guin or Roberto Bolaño. This course explores how engaged art from the 1970s to the present has responded to -- and fought against -- neoliberal hegemony in the United States, Latin America, and beyond. Through the arts, we will explore the nightmares of global collapse and the dreams of a new egalitarian and sustainable society. In addition to analyzing movies, poems, short stories, songs, and street art, we will read theoretical and historical studies that help us understand how neoliberalism shapes contemporary culture and makes art into one of the few areas in which dissent can be expressed.

AMST250 Incorporation of America: Corporate Capitalism and the American Way of Life
This course will examine how corporations have shaped and continue to shape American society and culture. Moreover, we will investigate how corporate capitalism has influenced U.S. relations with other countries. The course will extend from the mid-nineteenth century, when corporate capitalism clashed with alternative ways to organize the economy, to the present, when the neoliberal project faces a major crisis. We will read academic and fictional works, watch movies and TV shows, and analyze works of art that illuminate the history of corporate capitalism. We will explore how corporations have fostered class conflict, imperial expansion, technological change, structural racism, environmental degradation, ideological fundamentalism, among other things. In addition to writing individual papers, we will engage in collaborative and creative works to reflect on how corporations impact our lives.

Gen Ed Area: **SBS-AMST**
Prereq: **None**

AMST256 Race and Medicine in America
This course will trace ideas of race in American medical science and its cultural contexts, from the late 19th century to the present. We will explore how configurations of racial difference have changed over time and how medical knowledge about the body has both influenced and helped to shape social, political, and popular cultural forces. We will interrogate the idea of medical knowledge as a "naturalizing" discourse that produces racial classifications as essential, and biologically based.

We will treat medical sources as primary documents, imagining them as but one interpretation of the meaning of racial difference, alongside alternate sources that will include political tracts, advertisements, photographs, and newspaper articles. Key concepts explored will include slavery's medical legacy, theories of racial hierarchy and evolution, the eugenics movement, "race-specific" medications and diseases, public health politics and movements, genetics and modern "roots" projects, immigration and new technologies of identification, and intersections of race and disability.

AMST260 Bioethics and the Animal/Human Boundary
In this course, we will explore the construction of the animal/human boundary through the lens of bioethics. We will define bioethics as the study of the ethical consideration of medical, scientific, and technological advances and their effects on living beings. At the same time, we will pay close attention to the cultural contexts in which these advances emerge, imagining the realms of scientific progress and popular culture as mutually constitutive. We will consider topics such as cloning, organ transplantation, pharmaceutical testing, and gestational surrogacy, with a focus on the late 20th and early 21st centuries. We will begin by interrogating how ideas of the "animal" and the "human" are constructed through biomedical and cultural discourses. We will ask, How is the human defined? By intelligence or consciousness levels? By physical capabilities or esoteric qualities? Similarly, how has the human been defined against ideas of the animal? Or, what ethical justifications have been cited in the use of animals in biomedicine? What makes certain species "proper" research subjects and others not? What do these formulations tell us about our valuation of animal and human life, and what kinds of relationships exist between the two? To answer these questions, we will consult a wide range of interdisciplinary scholarship, from authors in the fields of animal/ity studies, bioethics and medicine/science history, sociology, anthropology, and philosophy. Students will also be exposed to the basics of biopolitical theory.

AMST269 New World Poetics
God and money, love and beauty, slavery and freedom, war and death, nation and empire: The themes of early American poetry will carry us from London coffeehouses to Quaker meetinghouses, from Philadelphia drawing rooms to Caribbean plantation fields. Our texts will range from pristine salon couplets to mud-bespattered street ballads, from sweetest love poems to bitterest satire. Digging deeply into the English-language poetry written, read, and circulated after the first English settlement in North America, we will trace the sometimes secret connections between history and poetic form, and we will listen to what these links can tell us about poetry and politics, life and literature in our own time. Our poets ignored false divisions between art and society, and so will we.

AMST270 Criminalization, Regulation, and Resistance: Introduction to Native North American History
This course explores Indigenous politics and US settler colonialism across the long 19th century, from the Constitution's Commerce Clause to the 1924 Indian Citizenship Act. We will examine how the US state relied on both criminalization and regulation of Native peoples' gender, sexuality, religion, social relations, and cultural and economic practices to expand and consolidate power on the continent. Readings will address how Native nations sustained their sovereignty and negotiated settler encroachment, covering conflicts around the liquor trade, allotment policy, the Ghost Dance, conservation's consequences, salvage anthropology, Progressive-era activism, and American citizenship.

AMST286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice
This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activisms, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

AMST290 Color Lines: The U.S. South and the Colonial World
The American South has always been a unique society. But it has never been exceptional or isolated from the world. Although located north of the equator, it shares many features with the Global South. Its history of conquest, slavery, patriarchy, rebellion, and white supremacy makes it similar to many tropical and semitropical countries that have been colonized by Western powers in modern times. In this course we will study the American South from the times of European colonization through the Civil Rights era. We will establish comparisons between the history of the American South and the histories of the Global South. How did the displacement of Native Americans in Georgia compare to the treatment of Indigenous populations in Australia? How did slavery in Virginia compare to slavery in Brazil? How did the emergence of the oil industry in Texas compare to that of Iran? How did Jim Crow in Mississippi compare to apartheid in South Africa? How did the struggle for civil rights in Alabama compare to struggles for decolonization in Vietnam?

In addition to a comparative approach, we will look into how Southerners engaged with people from the Global South. We will study primary and secondary sources that illuminate encounters between Southerners and foreigners. International trade, religious missions, infrastructural enterprises, political activism, and military operations, among many other events, put the American South in touch with the Global South. These encounters remade modernity, placing questions of racism, regionalism, and colonialism at the forefront of political and intellectual debates.

AMST298 From Seduction to Civil War: The Early U.S. Novel
This course examines the relationship between nation and narrative: the collective fantasies that incited reading and writing into the 19th century. We will study the novel as a field of literary production both in dialogue with European models and expressive of changes in national culture, a form that both undermined and reinforced dominant ideologies of racial, gender, and class inequality during this turbulent period of national formation and imperial expansion. We will consider the ways the pleasure of novel-reading depends upon, even as it often disavows, the world outside the story. Throughout our reading, we will trace the ways these novels both reflect and participate in the historical development of the United States during a period that spans national founding, the consolidation of northern capitalism and an exacerbated North/South division, expansion into Mexico and the Pacific, and civil war. Through close attention to literary form, we will continually pose the question, What is the relationship between literary culture and historical change? We will examine who was writing, for whom they wrote, and the situation--political, commercial--in which the American novel was produced and consumed. We will begin with the novel of sentiment and seduction and conclude with reflections on slavery and racial revolution on the eve of the Civil War, all the time asking about the ways the novel might seduce us into either tolerating or resisting the way of the world.

AMST300 The American West in the Age of Capitalist Transformation
This course examines the transregional and transnational forces that converged into the locations that, throughout history, American society has called "the West." It also explores how the occupation and development of the American West inspired similar expansionist projects in other parts of world. We will investigate the transformation of vast territories previously inhabited by Native groups into a booming agro-industrial empire controlled by white men. Within this context, we will study the cultures that developed and clashed in the West. We will use academic texts and primary-source material such as travel narratives, letters, ethnographies, novels, drawings, photographs, and film. We will delve into the lived experience in the West and the images, myths, and visions that

different groups produced about it. During the semester, students will write a research paper on a topic of their choice related to the American West in global perspective.

AMST301 Immigration and the Politics of Fear
This course will examine the role of fear in shaping ideas about immigrants. We start from the notion that emotions are social formations with particular histories and political significance. Therefore, we will refrain from assuming that fear is nothing more than a feeling or an automatic response and instead take it as a site that allows us to examine how psychological and legal discourses together define and dispute what is normal, reasonable, credible, plausible, real, appropriate, and timely. The seminar will cover themes such as risk and threat, race and origin, pain and injury, confession and testimony, fiction and figuration, and personhood and representation. We will look at newspaper articles, social media content, legal opinions, case law, court transcripts, and psychological evaluations, as well as texts in politics, anthropology, sociology, philosophy, literature, comics, and films. Students will write a short essay on the politics of fear. Throughout the course, they will develop their toolkit to critically reflect on an emotion of their choice.

AMST305 On Monsters: Race, Sex, Gender and the Other
The class will consider the category of the monster as a cultural site of meaning. We will explore narratives of the monstrous both literally and metaphorically, working from Jeffery Jerome Cohen's understanding of a monster as "as an embodiment of a certain cultural moment--of a time, a feeling, and a place." In situating the monstrous, we will consider Derrida's reminder that monstrosity is, at its heart, concerned with hybridity, border crossing, and miscegenation. In resisting clear categorization, the monstrous becomes terrifying, improper, and disorienting. As such, we will look at contested sites of American life, such as migration and the US/Mexican border, forms of racial hierarchy and social control, manifestations of postcolonial despair, the violence surrounding gender and sexual difference, as well as biopolitical and technological fears regarding the almost-human. The course will ask students to consider monstrosity as always already interwoven with cultural notions of racial and sexual deviance, which then contend with otherness through the guise of the supernatural. The course will also explore more literal manifestations of the monstrous, including the zombie, the doppleganger, the vampire, and the witch. In doing so, the monstrous takes shape as a way of facing what Cedric Robinson calls the "recovery of human life from the spoilage of degradation," or the idea that monstrosity centers on a politics of purity, a mode of analysis that thinks through the vulnerability of the corporeal self, the ravages of contamination, and the horror of existence despite, and in defiance of, necropolitical state praxis. This course requires students to watch weekly films in the horror/monster genre.

AMST306 The Politics of Emotions
This course treats emotions as social expressions that both shape and are shaped by the world. Drawing on ethnographic case studies, we examine the social life of sentiments and trace how emotions function as a medium through which narratives of American citizenship are formed. We begin with interdisciplinary scholarship on affect, emotions, feelings, and moods to establish a shared analytical framework for our case studies. Each week, we focus on the social formation of a specific emotion, including hate, anger, horror, terror, love, shame, resentment, and compassion. The course will be grounded in a critique of liberal concepts such as freedom, rights, autonomy, and human rights.

AMST312 Americans Abroad: Mapping Nineteenth-Century Travel Narratives
In this course, we will explore international travel in the long 19th century. We will focus on narratives published by Americans who had the opportunity to travel beyond the United States. Through individual and collective activities, we will survey the trajectories of activists, diplomats, doctors, entertainers, entrepreneurs, journalists, missionaries, sailors, scientists, soldiers, students, teachers, tourists, and many others who engaged with foreign societies. By analyzing travel narratives, we will delve into a globalizing new order of expanding empires and integrating capitalist economies.

The main product of this course will be digital humanities projects. Throughout the semester, we will conceptualize, design, build, and improve StoryMaps. Each student will develop their own individual project focusing on a set of travel narratives. Classes will alternate between historical and conceptual discussions about travel in the 19th century and technical matters related to digital humanities. Our goal is to reflect on the broad history of American foreign relations and the use of new technology to produce and communicate knowledge about the past.

AMST315 Entertaining Social Change
"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially

true of "entertainment." Power that may not seem like power -- only, say, like "fun" or "amusement" -- can be especially powerful. A thread that connects all of our texts will be: how has the systemic critique of social contradictions been popularized as compelling and fascinating in modern times? A related concern: what are the seductions and violence built into "enjoyment" -- "enjoyment" that reproduces "Americans"? We will "entertain" the diverse strategies that progressive moviemakers have developed to entertain Americans -- to teach, persuade, seduce, provoke, upset, anger, and move them through laughter, tears, and, not least of all, ideas -- so that Americans will be more inclined to "entertain" social critique that inspires and envisions social change. Our critical focus will be on the popularizing (and sometimes the selling) of social critique in movies including Straight Outta Compton, Malcolm X, Medium Cool, Network, El Norte, Smoke Signals, Before the Flood, The Black Panthers: Vanguard of the Revolution, Salt of the Earth, Matewan, and The Big Short. We will place special emphasis on self-reflexive movies about "entertainment" and about labor/social movement organizing. Entertainment, we will see, plays a key role in organizing and reorganizing Americans. In doing so, it can place limits on our vision of what -- and who -- needs to be changed. By putting our movies in conceptual dialogue and making these limits more visible, we will help one another think, see, and feel beyond these limits. As we are "entertained" (and we will be) we will consider the stakes of being "entertained."

AMST321 Migrant Personhood: Against Tales of Witches, Aliens, Beasts, and Pests
The contagious animal, the irrational woman, the foreign threat, the mentally incompetent -- this course follows the circulation of these portrayals of immigrants beyond rhetorical injury. Drawing on what Colin Dayan calls "negative personhood," we will focus on the symbolic, narrative, and representational violence of immigration law. We start with readings and films that look into the history of the idea of the "reasonable man" in immigration policy, the truth-making effect of courtroom hearings, and the figures of speech that give shape to stories about what it is to be an American in the eyes of the law. We then explore forms of alternative representation that elude legal containment and instead seek cultural membership and political participation. We finish the course by examining poetic testimonials, psychotic narrations, dirty protests, escapes from ideological frames of address, collective autobiography, imaginative refusals, and radical Latinx utopias. We will draw from interdisciplinary material in anthropology, literary theory, performance studies, philosophy, legal theory, and feminist studies, among other fields.

AMST322 Visions of the Future: Capitalism and Colonialism in the World's Fairs
This course will explore the history of the world's fairs from the 1851 Great Exhibition in London to the 1939 New York World's Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world's fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

AMST329 Issues in Latina/o Politics and Culture
This course explores the ways in which Latinas/os become legible as subjects in contemporary U.S. political thought and cultural life. We will consider struggles for Latina/o legal rights, the relationships between the Latina/o workforce and issues of global labor patterns, the workings of transnational economies and power, and popular cultural narratives depicting Latinas/os and U.S.-Latin America relations. This course offers the opportunity to explore, analyze, and decipher the ways in which Latinas/os inhabit a global world, built from a legacy of a colonial past and heading toward a neoliberal, globalized future. We will use an interdisciplinary approach, addressing a range of texts from various scholarly disciplines, including history, cultural studies, postcolonial theory, American studies, and political science, as well as popular cultural texts.

AMST347 Absences, Archives, and Adjudicating Criminalities in Settler Colonial States
Absence can refer to either distance or nonexistence. Archival inquiry embodies the former and can yield the latter. Both positions pose ethical, interpretive, and political problems. In this course, we will critically approach the archive to ask questions about how its evidentiary forms are used to narrate social relations of power, territorial claims, criminality, and adjudicate past wrongs. What genres of proof do archives produce and naturalize, and how do historical claims corroborate, refuse, or reinterpret "truth" and "knowing"? Readings span Native and Indigenous Studies, American Studies, History, Anthropology, and Postcolonial and Literary Studies, exploring how these approaches address the adjudication of individual and state crimes. The course focuses on settler colonialism and Indigenous politics in North America but engages other global examples.

AMST351 Queer of Color Critique
This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each

of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

AMST352 Settler and Native Ecologies of Power in North America
This course examines how settler colonial dis/possession, resource extraction, and spatial domination have generated ecological catastrophes in North America while at the same time shaping discourses of environmental "protection" and "preservation." Reading the work of historians, anthropologists, critical theorists, knowledge-keepers, and activists and examining sites such as national parks and infrastructure projects in the 19th, 20th, and 21st centuries, we will learn how efforts to define, manage, regulate, and exploit "natural" resources occur/red simultaneously with assaults on Native nations' sovereignty. We will explore how Indigenous people(s), in spite of continuous settler state violence and violations, have cared for and defended their lands and human and nonhuman relatives, drawing from a wealth of traditional knowledges and tribal political practices. We will end the course by bringing these critiques to current "environmental issues" such as wildfires, toxic contamination, and pipelines.

AMST353 Health, Illness, and Power in America
In this class, we will explore the interlocking histories of health, illness, and power in America. Special attention will be paid to the ways in which discourses of the healthy body have undergirded notions of citizenship and belonging in the nation. We will consider how processes of disease, disability, and contagion have been imagined through the lenses of social difference, including race, gender, sexuality, and class. We will address civil institutions designed to manage individual and population health, and we will consider theories of political power in the making of the "modern" body. Sample topics covered will include immigration policies and contagious disease scares; STDs and the politics of public health campaigns; physical fitness and the value of bodily labor under capitalism; the management of diseases that are symptomatic and those that are not; individualized approaches to medicine and medical difference; clinical trials and the ethics of human experimentation; pregnancy and childbirth; regulations surrounding blood and organ donation; changing rituals of bodily hygiene; preventative medicine and the call to personal responsibility; mental health policies and institutions; and pride movements surrounding the "unhealthy" body.

ANTH103F Anthropology of Gifts and Giving (FYS)
What is a gift? A commonplace understanding is that a gift is something given gratuitously, selflessly, and without the expectation of a return (just look the word up in any dictionary). Why, then, upon receiving a gift, do we feel indebted to the giver? And rather than free and gratuitous, isn't most gift giving compelled by socially significant events and regulated by relatively rigid rules? This FYS is an in-depth examination of gift giving as one of the most powerful forces binding individuals and groups in society into relationships of reciprocity. Students become familiar with critical anthropological and philosophical debates about the gift and consider their application to contemporary forms of giving, including traditional gift-giving events, sacrifice, philanthropy, volunteering and voluntourism, international aid, and types of giving made possible by advances in technology, such as organ donation and surrogacy. We attend to the economic, political, ethical, cultural, gender, and personal dimensions of gift giving in their remarkable power to make and break social bonds and undo or reinforce hierarchical relations at all levels of local and global society. Students draw a deeper understanding of the connection between generosity and power to inform their own ethics of gift giving, sharing of wealth, and sense of responsibility, wellbeing, and place in the world.

ANTH111F Anthropology of Conspiracy (FYS)
This first year seminar explores the relationship between conspiracy theory and contemporary life through the discipline of anthropology. We learn how to read, discuss, and write about anthropological texts using conspiracy as a starting point. We trace the history of conspiracy theory, read ethnographies of conspiracy, and extend the concept of what counts as conspiracy to anthropological topics such as culture, class, ideology, myth, virtuality, race, affect, gender, and sexuality. We ask what the utility of conspiracy is in world-

building, ritual, and belief structure inherent in both cultural cohesion and conflict.

Prereq: **None**

ANTH112F The Anthropology of Godzilla: Unconventional and Monstruous Perspectives on the Anthropocene (FYS)
In this First Year Seminar, we will use anthropology--the study of how humans make cultural, social, and political meaning in the world--in order to better understand contemporary global, ecological conditions through the lens of giant monster movies. It begins from the argument that "monstruous media" reflects our cultural worlds back at us in productive and insightful ways, and that Godzilla, in particular, helps us better understand the ways the Anthropocene is at once a product of human action and seems at the same time to totally exceed human capacities. We will combine some traditional readings with extensive film viewing in order to help students develop their academic writing and analytical skills.

ANTH120F Indigenous Environmental Justice (FYS)
Environmental justice--as both a social movement and an area of scholarship--emphasizes the disproportionate impact of environmental harm on human communities already marginalized because of factors like race, class, and indigeneity. While Indigenous activists and scholars have strategically mobilized under the banner of environmental justice, conventional U.S. environmental justice frameworks have not always acknowledged the status of Indigenous nations as sovereign political and legal entities or their distinctive articulations of justice and environment. Focusing primarily on North America, this First Year Seminar will explore how Indigenous land and water protectors have long put forward visions for collective futures that diverge from intertwined histories of social and ecological violence, including through multiracial collaborations and campaigns. We will engage texts from a wide range of disciplines, as well as non-academic materials and films.

ANTH135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH201 Key Issues in Black Feminism (FGSS Gateway)
This course surveys key issues in the historical development of black feminist thoughts and practices through readings of canonical works especially from the 1980s and '90s that contribute to this extensive body of knowledge. Our aim is to engage black feminist and womanist theorists, activists and artists from the diaspora who are exploring intersections of race, class, sexuality, religion, and other indices of identity affecting their daily lives. To that end, we will take an interdisciplinary approach to unpacking the historical tensions and politics and poetics in theory/practice, representation/self-making and expression/performance. We will also examine more recent turns in #BlackLivesMatter, #SayHerName and #BlackGirlMagic and conclude with Post-Zora Interventions--feminist interrogations on the borders anthropology, art, and activism.

ANTH202 Anthropology and/of Islam
This course examines the relationship between the discipline of Anthropology and Islam while also surveying the development of the Anthropology of Islam. Until the middle of the 20th century, Western study of Islam was dominated by Orientalists and colonial social scientists. As the study of Islam and its social worlds entered into the field of modern anthropology alongside decolonizing processes worldwide, the anthropological study of Islam was caught up in, and crucial to, the various critical turns in the discipline that faced as it attempted to decoupled itself from colonialism. With this as the backdrop, "Anthropology and/of Islam" takes on the rich and varied, often complicated, canon of the "Anthropology of Islam" with a particular focus on the Middle East and North Africa primarily between 1975 and 2025 but with an eye to the field globally. It also also attends to the ways in which this field has been responsible for paradigmatic shifts in the Anthropology itself.

ANTH203 Sex, Money, and Power: Anthropology of Intimacy and Exchange
Sex and money--intimacy and economy--are often imagined to occupy distinct and separate spheres. Sex and intimacy are located in the private or domestic realm, in spaces of leisure, feelings, care, and personal connections. Money and economy, on the other hand, are purportedly public, located in the market and

tied to labor, rationality, and impersonal (non)-relations. This course brings these spheres together, focusing on the links, exchanges, and circuits between the intimate and the economic in diverse cultural contexts.

Drawing on anthropological, feminist, Marxist, queer, and critical race theory, we will build

working definitions of key concepts: intimacy, division of labor, domestic labor, sexual labor, exchange, commodity, value, neoliberalism, consumer culture, and more. We'll test, apply, critique, and expand these concepts as we work through ethnographic case studies on contemporary sex work and tourism, marketing and pornography, reproduction and domestic labor, marriage, class and sexual lifestyle, labor and care work, and sex stores and commodities. We will connect economic, cultural, and political formations with race, ethnicity, nation, sexuality, class, and gender, scaling up to consider global and transnational exchanges and down to consider how these circuits impact families and communities. Throughout, we will ask: Whose labor is valued and recognized, and why? How do bodies accrue value, and in what kinds of marketplaces? When are intimacies--sexual and social--commoditized? How is race, gender, and sexuality central to these exchanges? How do new transnational circuits constrain and/or empower people? And finally, who benefits from these relations, and who does not?

ANTH205 Borderlands in the African Mediterranean and Beyond
The past decade has seen one of the largest mobilizations of human migration in recent history. This migratory flow is usually discussed within spatial frames such as movement across borders, between countries, and across the sea. This course departs from those narratives by bringing into focus the routes, social worlds, and systems of exchange that emerge during time spent between borders, a time often eclipsed as "just waiting." The beginning of the course sets the theoretical tone for our readings and discussions by revisiting how anthropology has questioned the stability of the linkage between culture and space, and placing this into the context of scholarship on liminality and borderlands. Subsequently, we will examine ethnographic studies, as well as some literary texts, that focus on migration and immigration primarily across the African Mediterranean, with comparative examples drawn from South and North America and Western Asia. The course's goal is to trace the communal sentiments enmeshed in these routes and worlds and to inquire what they may imply for political and subjective belonging, beyond narratives centered on the anxieties that emerge once "migrants" enter into European and North American territories.

ANTH206 Ethnography of the American Rural
The rural stands as a fraught American symbol, positioned in stark contrast to its corollary: the urban and its cosmopolitan subjects. The American rural is variously represented as vulnerable, disappearing, backwards, regressive, slow. In this course, we elucidate the texture of the American Rural by engaging with ethnographic writing from the early 20th century into the contemporary. In exploring the rural as a meeting place of working-class expressive cultures, an atmosphere of slow or strange time, a dramatic history of industry and agriculture, a notoriously tense racial zone, an icon of severity, and a place of exuberant stories and poetics, we uncover the vital ideological function of the rural as the urban's dark twin in American myth throughout history and today.

ANTH208 Crafting Ethnography
This course is an introduction to the craft of ethnographic research and writing. In the first half, we will explore some of the research methodologies anthropologists use to understand, interpret, and analyze culture. Each student will choose an ethnographic field project for the semester and practice ethnographic methods (participant observation, interviewing, virtual ethnography, auto-ethnography, visual representation, and more). In the second half of the course, students will begin to write their ethnography, practicing writing in a variety of styles and genres (including realist, reflexive, dialogic, engaged, and experimental). Guided, weekly peer workshops throughout the semester will give students a chance to hash out and talk through questions of ethics, positionality, representational politics, and the improvisational felicities and challenges that arise during fieldwork and writing. This course will give students a solid grasp of ethnographic methods and how anthropologists construct ethnographies. It is ideal preparation for ethnographic theses and essays during senior year.

ANTH210 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.

ANTH211 The Politics of Place
How do we come to a know a place? How are senses of place enacted and with what consequences? This course will focus on "place-making" as a historical, emergent, and contested process. Through course texts, films, and ethnographic exercises, we will explore places as sites of individual and collective self-making, power consolidation, not-only-human-collaboration, and the provisioning of specific futures. While anthropologists will be our primary guides, we will also engage scholarship from Black studies, Indigenous studies, history, and ecology. Although we will consider examples of place-making from around the world, our primary focus will be on the U.S. with a particular focus on Middletown/ Mattabesset. Taking settler colonialism and racial slavery to be foundational to local and national projects of place-making in the U.S., we will explore how memory, landscape, affect, political economy, and history interact in more-than-human social worlds.

ANTH212 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.

ANTH213 Indigenous Anthropology
In this course, we will explore what anthropology looks like from an indigenous perspective. Focusing on four significant texts by indigenous anthropologists, we will explore concepts of indigeneity, mobility, gender, DNA, and indigenous rights and sovereignty as they are articulated between anthropology and indigenous studies. At the same time, we will examine how anthropological research and writing can be conducted from the perspective of the historically colonized as opposed to the colonizers, navigating the ambiguities of anthropology's own legacy as it is rearticulated by scholars from diverse positionalities and perspectives.

Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Prereq: **None**

ANTH214 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.

ANTH215 Nature/Culture
In this course, we are going to explore--and problematize--the boundary between the so-called "natural" world and human social and cultural life. Rather than assuming that "nature" is something that already exists in the world that humans have systematically excoriated and transformed, we consider instead the idea that nature and culture are fundamentally co-constitutive concepts--that is to say, that one cannot exist without the other. As we go, we will explore pressing concerns such as the boundaries between human and non-human, the nature of the Anthropocene, the question of what it means to be "modern," and the power of ecological politics in our contemporary orders of global capitalism.

ANTH217 Anthropology of Science
What are scientific facts? How do we know what we know? In this course, students will gain an introduction to thinking about science and technology as cultural practices shaped by power, politics, race, indigeneity, gender, and sexuality. Students will explore how anthropologists, long interested in how "culture" works, have recently turned their gaze toward critically examining the cultures of people in positions of technoscientific power, including nuclear scientists, Wall Street analysts, drone weapon designers, climate scientists, molecular biologists, and more. Students will also be trained in conducting ethnographic fieldwork on a group of experts in their own communities in order to ask questions about scientific rituals, truth-making, and distributions of power and privilege. Students who received credit for SISP 265---Introduction to Science as Culture may NOT enroll in this course for credit

ANTH220 Anthropology and (Anti)-Blackness
This course considers the intellectual and institutional developments of psychoanalysis and anthropology in the 19th and 20th centuries and the ways in which these disciplines defined a figure of the human that excluded the "African," the "Black," "the Negro" from the capacity to signify the universal. By examining these constitutive occlusions of race, the course considers the ways in which the "unthought" status of racial blackness, in particular, animates and aggravates the discipline of anthropology. The course will move from introductory readings in classical anthropology and psychoanalysis and a

selection of works in Black critical thought towards contemporary scholarship that reappraises these fraught questions.

ANTH221 Multispecies Ethnography
Human life is forged through constitutive relationships with a vast array of nonhuman actors. While anthropologists have always recognized this, escalating concerns about the nature of these relationships in a moment of great ecological precarity has led to a profusion of ethnographic attention to the human/nonhuman interface. In this course, we will engage multispecies ethnographies from around the world and consider how multispecies approaches connect to the analysis of subjects like race, gender, and nationality. We will also explore how grappling with the representational challenges posed by species difference can sharpen ethnographic attunement in all research contexts.

ANTH222 Magic of Despair: Terror, Colonialism and Healing
This course proceeds through the haunted lens of colonial medicine and its afterlives. The course investigates both the ways in which madness, sorcery, and healing became entangled in the racial logics of empire. Drawing on anthropological theory, historical texts, and critical insights from black critical thought, the course investigates the production of subjectivities that emerge from encounters between colonizer and colonize, doctor and patient, body and world. Tracking the appearance of ancestors, witchcraft, possession, and cults of affliction across colonial and contemporary ethnographies, we consider how constructions of health and pathology were means of colonial governmentality and came to constitute the ethical terrain of colonial capitalist modernity. The course concludes with reflections that trace connections between the concepts of neurodiversity, disability and decolonization. The course is especially focused on Africa and its diaspora.

ANTH227 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

ANTH230 Anthropology of Cities
This course is an introduction to the practice of urban anthropology. Attention is placed on the intellectual challenges recent local and global urbanization trends present to us in our attempts to think and write about cities today. We will reflect upon the production of space and place, the creation of "other spaces" through borders and limits, and the making of meaning through everyday practices and experiences in the city. We will consider how cities become foremost spaces for the exercise and contestation of power, for social cohabitation and conflict, and for cultural creation and repression. Class discussions will also focus on fieldwork methods and problems of ethnographic representation and writing in preparation for a research project that will culminate in an urban mini-ethnography.
Offering: **Host**
Grading: **A-F**

ANTH233 Global Queer Studies
This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives.

Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and and the transnational lives of Filipino gay men in New York. Our aim is to challenge and expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative) and to center the ways sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.

ANTH241 Critical Interculturality and the Pedagogy of Unlearning
This course is offered by our study abroad partner, Pachaysana, online from their site in Ecuador, with local educators.

An ever-growing number of students, scholars, and activists criticize our educational institutions for upholding colonial structures, and via numerous movements are calling for "decolonization." Any effort to decolonize our education must go well beyond the content of what we teach in the classroom. In addition to what we are learning, we must explore how we learn, where we learn, and with whom we learn. We also must think about what "decolonization" means, taking into consideration the lands on which our campuses and communities are located. This course addresses decolonization through the lens of critical interculturality, referring to Catherine Walsh's critique of multiculturalism as functional or relational interculturality. Bringing in readings from Indigenous and Latin American scholars and taking part in workshops facilitated by local Ecuadorian community members, we will use

interactive methods to explore some of the most challenging concepts related to decolonization, including "decolonization is not a metaphor," epistemic justice, border thinking, and embodied methodologies. Those concepts will then be examined with regards to the realities on our college campuses and our communities, and we will begin to dream about moving from the "functional" to the "critical." By the end of the course, informed by the readings and interactions with community-based educators in Ecuador, students will formulate clear questions and identify potential strategies for applying critical interculturality at their college campuses.

ANTH242 Other Worlds Are Possible: Life Against and Beyond Neoliberal Logics
This four-week intensive course examines radical challenges, in theory and on the ground, to mainstream neoliberal capitalism and development strategies promoted by international organizations such as World Bank and the IMF. After the 1980s, considered by many as "the lost decade" of development, some scholars and practitioners declared the development enterprise as fundamentally wrong: It was a misguided and violent neocolonial project that could never provide the answer to inequality and poverty. These radical critics argued for building a "post-development" era. In this course, we look at the conceptual history of the term "post-development" and also examine what post-development life looks like on the ground, among dispossessed communities. We will focus on lived and imagined challenges to neoliberal capitalism. We spend the first week at Wesleyan, brushing up on the critical ideas and movements that have emerged out of Mexico (and Latin America, broadly) over the past four decades in reaction to mainstream development discourse. We will then explore these ideas and lived alternatives in Oaxaca, Mexico. We will spend three weeks learning about and working with marginalized communities that are rejecting capitalist development and building and experimenting with living a "good life" (buen vivir) on their own terms.

ANTH243 Medical Anthropology
Situated at the intersection of the clinical and social sciences, medical anthropology seeks to understand bodies, afflictions, healing, and care in cross-cultural contexts. This course serves as an introduction to the exciting field of medical anthropology. Students will begin by mastering dominant approaches within medical anthropology for studying the body as a site of meaning, a moral battleground, a biosocial entity, an object of regulation and control, and a tool of resistance and change. We will then turn our attention to different kinds of bodies in distress and to the therapeutic responses they invoke (or fail to invoke) from healers, doctors, kin groups, aid workers, and state actors. Of particular concern will be those aspects of healing that challenge commonsense notions of how therapies work and where they may fall short. Specific concepts and topics to be covered include illness narratives, idioms of distress, structural and symbolic violence, culture-bound syndromes, nature/nurture debates, ritual healing, high-tech medicine, and humanitarianism.

ANTH244 Television: The Domestic Medium
Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

ANTH249 From Metropolis to Megalopolis
What is the urban experience today? Are the old European metropolises, the global cities of New York or Tokyo, and the new megalopolises of the Global South commensurate entities? What are the theoretical and methodological challenges we face in thinking about "the urban" today, given the vastly different histories, trajectories, and physical and social realities of cities around the world? This course is an introductory and interdisciplinary survey of urban theory. We will critically examine "the city" as a transhistorical category of analysis and focus on issues of anthropological concern regarding the experience and epistemology of urbanization and urban life. No prior background in urban studies is expected, but an interest in theory is a must.

ANTH250 Identity and "Pacha" (Land-Based Knowledge and Re-imagining Community) - Taught from Ecuador
This course is taught from Ecuador by our study abroad partner, Pachaysana.

According to indigenous Andean scholars, Pacha refers to the time-space continuum, or as the "everything around and inside us." This course asks students to challenge their identities by broadening their epistemological and ontological lenses to see their individual and collective lives as they relate to Pacha. To synthesize this complicated process, we ask participants to examine who they are as related to the ever-changing ecology in which they live. For this course, ecology is approached broadly, referring to the Greek origin on the word oikos, meaning home. We take advantage of our virtual exchange and examine home as an interconnection of how we relate to "place and space," exploring our ecology as the triad of our immediate territory (llakta in Kichwa), our surrounding natural environment (allpa in Kichwa), and our global and pluriversal space (pacha). Throughout the course, we use an interdisciplinary lens to examine "who we are" as related to this diverse understanding of ecology, taking into consideration that our ever-changing environment includes an ever-changing human story. Readings are transdisciplinary, coming from the fields

of anthropology, sociology, human geography, gender studies, ethnic studies, history, the arts, and development studies. Toward the end of the course, after examining certain theories and case studies, we will imagine the reconstruction of our identities contextualized to pacha, space, place, ecology, oikos, and home.

ANTH256 Anthropology of the Senses
How do we know what we know? Is seeing really believing? And what about hearing, smelling, tasting, and feeling? This course explores Anna Tsing's provocation to "look around instead of ahead," asking: what kinds of participatory observation of the senses help us identify what we know about the world? Through readings, lectures, short form writing, and field trips, we examine the role of the senses in forming what we know about ourselves and others. Writing and research assignments develop tools for documenting, analyzing, and communicating our senses and work towards a critical acknowledgment of sensory hierarchies. Our course readings consist of selections from theories of affect, sound studies, and food studies, as well as key texts in cultural anthropology in order to build an appreciation of the range of sensory information available to us and the strategies we use to communicate our sensory worlds. Our goal is to probe how ethnographic work sensitive to the multidimensionality of the human sensorium can discover and propose real strategies for human vitality.

ANTH257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.

ANTH259 Development, Disasters, and Beyond: The Global Politics of Aid
Development is one of the most important ideas of our times. It is a powerful way of reorganizing the world into the Global South and the Global North (or the Third and First Worlds) and promising modernity to "backward" places and people. It is an equally powerful way of intervening in "underdeveloped" regions in the name of progress and beneficence through aid programs. Our purpose in this course is to use the spy lens of anthropology to critically examine the global politics of development aid, whether given for poverty alleviation, infrastructure projects, disease and healthcare, or disaster relief. While development aid is certainly a potent way to exert power over and regulate Third World Others, it is also a fiercely contested space of struggle. This course approaches it as a "problematic"--an unsettled, contentious, and unpredictable formation.

ANTH260 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH267 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

ANTH274 Self & Social Transformation
Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault's later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood's dawa movement from Egypt, Weight Watchers, and finally "ballroom" culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

ANTH275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.

ANTH276 Museum Collections: Ethical Considerations and Practical Applications
Serving as a broad overview of museology, this course introduces students to the principles underlying the foundations of museum work and collections stewardship. Topics covered will include the origins of museums and collecting, the rationale behind museum policies, and the legal frameworks and professional standards that guide collections management. Ethical considerations surrounding issues such as NAGPRA/repatriation, decolonization, accessibility, looted artifacts, and cultural patrimony will also be covered. Finally, students will explore the practical aspects of preventive conservation, museum documentation, and exhibition development. Although topics covered in this course will apply to a variety of museums, the primary focus will be on cultural heritage collections. Readings and class discussions will be supplemented with hands-on exercises using the Wesleyan University Archaeology & Anthropology Collection.

ANTH279 Eating Others: Histories and Cultures of Animal Edibility
For many people, animals form a significant and cherished part of their diet. Indeed, humans have used other animals as sources of nutrients for hundreds of thousands of years. What can these animal-based dietary practices tell us about humans and their relationships with other animals? Of course, these inter-species relationships have varied as radically across time and cultures as the dietary practices that have shaped them. To better understand some of these practices and the relationships they generate, this course will explore the following questions: How did animal-based food practices develop from pre-domestication to the contemporary era of industrialized animal agriculture? How have cultural categories of "edibility" developed in different cultural contexts? What is meat, and how does it differ from inedible flesh? How have gender, class, race, sexuality, and other categories of difference intersected with and shaped animal consumption practices in different times and contexts? How has animal consumption shaped and been shaped by animal ethics, philosophy, and scientific knowledge production? How has large-scale animal consumption contributed to the ecological crises of the Anthropocene, and how have these in turn affected animal consumption practices? What is the future of animal-based food? This course will use ethnographies, historical and legal analyses, and philosophical inquiries to examine the histories and cultures of animal edibility. Specifically, it will focus on topics including human evolution, animal domestication, slaughter practices, industrialized animal agriculture, indigenous ecological ontologies, hunting, dairy and egg consumption, cannibalism, cultural conflicts over the edibility of specific species, and recent technological innovations that can produce animal products without animals.

ANTH285 Film and Anthropology
Film & Anthropology is an exploration of the cross-pollinating relationship between ethnographic and filmmaking methods and styles. This is, in part, an effort to understand the contributions of both to the observed and documented experience of cultural life. We will watch films weekly and discuss them, as well as respond to them individually in weekly critical précis. We will, in the course of these viewings, come to some consensus as to what we mean by ethnographic and cinematic elements. The films themselves will cross genre boundaries, running the gamut from "traditional" ethnographic films to various forms of documentary and experimental film that in some way address or explore what I consider ethnographic elements. We will cover canonical early ethnographic work (Gardner, Asch, Marshall), feminist experimental interventions in ethnographic film (Minh-Ha, Varda, Deren), and contemporary work that experiments with ethnographic elements, and we will synthesize various genres into new forms of long-form documentary, ethnofiction, and trance film (Marker, Oppenheimer, Sensory Ethnography Lab, Gonzalez, Rosi, Minervini, Kuchar). We will observe the progression of style through the 20th century into the 21st, with the various intellectual threads of post-structuralism, creating modifications of centering the experience and voice of the oppressed, narrative reflexivity/abstraction/unreliability, formal experimental editing styles, the decolonial method as filmmaking practice, and the historicization and interrogation of anthropology as a fraught discipline.

ANTH286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice
This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activisms, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

ANTH290 Style and Identity in Youth Cultures
This course focuses on young people's engagements with commercially provided culture and their implications for identity formation. We begin in the postwar United States, when producers of symbolic goods, such as movies, music, and clothes, began aggressively tailoring products for young people; over the rest of the 20th century and into the 21st, new youth-oriented cultural commodities and sites of consumption have been used by young people in diverse ways to define themselves in relationships to adult society and to other young people. We will examine young people's intensifying involvement with the cultural market, with attention to both the diversity of youth-cultural formations that have emerged within the United States and to the global circulation of Euro-American youth culture. Using case studies, we will consider the ways in which young people's consumption practices have both reinforced and transgressed intersecting boundaries of class, race, gender, and nationality. An overarching concern in the course will be to assess whether or to what extent particular cultural practices may help prepare young people for positions of privilege, reconcile them to structural disadvantages, or provide them with resources to challenge the dominant society.

ANTH291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.

ANTH295A Theory in Anthropology: Anthropology and the Experience of Limits
Theory in Anthropology courses are core courses for the major, designed to elucidate historical influences on contemporary anthropological theory. While precise topics may vary from year to year, the overall goal of the courses remains the same: to familiarize students with the main traditions from which the discipline of anthropology emerged and to explore the diverse ways in which contemporary anthropological practice defines itself both with and against them.

This course considers the possibilities of an anthropology of transgression, excess, and unreason. This is an anthropology of all things cultural that work outside the logic of function and utility--that is, of actions and events that, while being eminently social, exceed reason and rational explanation. We will take as our point of departure an understanding of political economy that no longer has production and rationality as its core principles but rather consumption and waste. For this "general economy," as Georges Bataille called it in opposition to a "restricted economy" focused on utility, he drew from the anthropology of his time and its study of societies organized around complex systems of gift-giving, collective ritual, and periods of wasteful consumption (through festivals, for example). Ultimately, Bataille sought to formulate a critique of the early-20th-century European political and economic order, which emphasized individualism, rationality, and profit and which, he believed, fostered disenchantment with liberal democracy, totalitarian impulses, and war and calamity.

Class readings and discussions will be organized around topics such as profitless expenditure and the festival; gift-giving and sacrifice; taboo and transgression; formlessness and abjection; sex and erotism; and subjectivity, excess, and the experience of limits. Students will develop research projects on these and other topics of their interest, which could include theoretical and ethnographic explorations of, for example, particular festivals, games of chance, religious experience, the writing of poetry, nonreciprocal giving (organ donation,

surrogate motherhood), and the experience of extreme sports and high-risk tourism.

ANTH295B Theory in Anthropology: Anthropology of Affect
Theory in Anthropology courses are core courses for the major, designed to elucidate historical influences on contemporary anthropological theory. While precise topics may vary from year to year, the overall goal of the courses remains the same: to familiarize students with the main traditions from which the discipline of anthropology emerged and to explore the diverse ways in which contemporary anthropological practice defines itself both with and against them.

This semester, our topic is the anthropology of affect. Affect: to affect and be affected. Anthropologists and other social theorists from Durkheim onward have considered questions of bodies, sensation, emotion, and social change. In recent years, the "affective turn" in the humanities and humanistic social sciences has brought renewed attention to these dynamics. For some, affect is contrasted with emotion; it is potential or capacity, not set cultural meaning. For others, affect is contrasted with structure or form; it is bodily sensation or intensity--dynamic, energetic, mobile. And for others still, affect might enable us to grasp how it feels to inhabit a life world, a particular atmosphere, texture, sensuality, the feel of things.

This course explores the genealogy and range of theories of affect, foregrounding anthropology's distinctive contributions to and critiques of the study of affect. We'll discuss ways that centralizing affect might disrupt dichotomies of structure/agency, opening up modes of analysis that are not centered on cultural meaning-making, and enabling us to explore forms of life that exceed human subjects and socialities. Readings will tack between more theoretical essays and ethnographic representations of affect, sensuality, mobility, and emotion. Weekly experimental sensoriums, designed to attune us to the world, are a central component of the course.

ANTH295C Theory in Anthropology: Anthropology of Conspiracy
This course explores the relationship between conspiracy theory and contemporary life through the discipline of anthropology. We trace the history of conspiracy theory, read ethnographies of conspiracy, and extend the concept of what counts as conspiracy to anthropological topics such as culture, class, ideology, myth, virtuality, race, affect, gender, and sexuality. We ask what the utility of conspiracy is in world-building, ritual, and belief structure inherent in both cultural cohesion and conflict.

ANTH295D Theory in Anthropology: Anthropology and the Modern Media
This course considers the relations among symbolic representations, modern media, and social practices of imagination. Taking the Durkheimian theory of collective representation as a point of departure, we will first look at the role of rituals and myths in oral cultures, with emphasis on the notion that human beings add to the world through representation and inhabit the worlds they imagine. We will go on to interrogate the ways in which the formation of media industries in capitalist societies has transformed the role of imagination in social life, both within and beyond the societies where those industries emerged. Cultural forms may have always had extrinsic as well as intrinsic origins, but in a world where the products of large, centralized media industries circulate nationally and globally, the resources of imagination increasingly come from outside of local communities, from urban centers and other nations. The consequences of such national and global flows, however, are neither uniform nor predictable, as images and narratives are locally received and negotiated. In exploring the relations between media production and reception, we will look at critical theories of media in Euro-American societies, as well as ethnographic studies of the reception of Western media forms in other parts of the world, the role of media from both the host country and the home country in immigration, and the production of indigenous media. Methodologically, we will consider the relationship between anthropology and the interdisciplinary fields of cultural and media studies. Class readings and discussions will be organized around topics such as media technologies and modern societies, the role of the media in the transformation of time and space, media and modern subjectivities, broadcasting and national identities, the organization of particular mediascapes, taste, identity, and popular media, mediated citizenship, media and cosmopolitanism, movie-going as public experience, the formation of hybrid identities through media consumption, soap opera, melodrama, and gendered subjects. Readings by Emile Durkheim, Claude Lévi-Strauss, Jean-Pierre Vernant, Pierre Bourdieu, Marshall Sahlins, Raymond Williams, Stuart Hall, John Thompson, John Frow, Arjun Appadurai; as well as ethnographic studies of media consumption and production by Brian Larkin, Lila Abu-Lughod, Faye Ginsberg, Sunaina Maira, Purnima Mankekar, and others.

ANTH295E Theory in Anthropology: Anthropology of Time
In this course, we will examine anthropology's integral (and often fraught) relationship with time. The course is divided into two major segments. In our first half, we explore the philosophical backstory as a particular--and, perhaps, foundational--category of human perception and experience. We will then trace how classic anthropology attempted to pick up these debates via core anthropological concerns with relativism, with cultural particularity, and with the social origins of perception.

With these canonical foundations in place, we will turn in our second segment to the myriad ways in which the concern with time infuses contemporary anthropology. Here we will move from questions of anthropological representation--especially the notorious critique of the "ethnographic present"--to recent anthropological attempts to discuss the cultural, social, and political work inherent in the production of different pasts, presents, and futures. As we will explore, though it may seem intimate and inherent, the production of time cannot be separated from ongoing histories of colonial domination, violence, resilience, innovation, and transformation.

ANTH295G Theory in Anthropology: Anthropology of Semiosis
This course inquiries into the process of semiosis and traces the parallel developments of anthropology and the study of signs, symbols, and how we use language--or language uses us--to make sense of the world. As we move through the foundations of North American anthropology and the then-nascent interest in languages of Turtle Island, and the problematic invention of the category of the primitive, we will also begin to understand the development of structural linguistics around the same time and what led to the differential emergence of social and eventually symbolic and structural anthropology across the Atlantic. As anthropology began to take an interest in the language of the unconscious, social and otherwise, we will look toward how a post-structural approach to anthropology offered a radical new turn in the discipline. We will conclude by questioning if semiosis still poses a radical horizon here not there, now not then.

ANTH295H Theory in Anthropology: The Anthropology of Capitalist Life/Worlds
This course charts a genealogy of anthropology's long and critical engagement with capitalism as a transnational political, cultural, and economic force. We begin with classic theories and debates about capitalism, social change, and globalization. We then turn to how anthropologists have built on, extended, and tweaked these insights to illuminate capitalist world making and lifeworlds. Reading ethnographies that take us from factory floors to gig work; from logos to brands and knock offs; from wall street to occupy wall street; from extractivism to regeneration of life in devastated landscapes, and more, we delve into fundamental questions about power and resistance, human nature and sociality, production and labor, consumption and taste, struggle and justice, and radical reimaginations of life under and beyond capitalism.

ANTH301 Immigration and the Politics of Fear
This course will examine the role of fear in shaping ideas about immigrants. We start from the notion that emotions are social formations with particular histories and political significance. Therefore, we will refrain from assuming that fear is nothing more than a feeling or an automatic response and instead take it as a site that allows us to examine how psychological and legal discourses together define and dispute what is normal, reasonable, credible, plausible, real, appropriate, and timely. The seminar will cover themes such as risk and threat, race and origin, pain and injury, confession and testimony, fiction and figuration, and personhood and representation. We will look at newspaper articles, social media content, legal opinions, case law, court transcripts, and psychological evaluations, as well as texts in politics, anthropology, sociology, philosophy, literature, comics, and films. Students will write a short essay on the politics of fear. Throughout the course, they will develop their toolkit to critically reflect on an emotion of their choice.

ANTH302 Critical Perspectives on the State
This course builds on Marxist, poststrucuturalist, feminist, anarchist, and cultural analyses to take a critical approach to the state--what it is and what it does. We will examine how the state is imagined by those who write about it and struggle against it. Where does the state begin? How do states act, and what are the consequences of these acts? How is rule consolidated and how are individuals and communities annexed to the project of rule? How do people engage with state acts and ideologies? We will read texts drawn from a variety of disciplines, including anthropology, feminist theory, political theory, philosophy, sociology, and geography, that examine the nature, everyday workings, and effects of state power. Drawing upon ethnographic examples from around the world, we will analyze how states are cultural artifacts that produce and regulate people's identities and bodies, reproduce social inequalities, and engender resistances of all sorts. Some of the topics we will discuss include bureaucracy, governmentality, the security state, the prison industrial complex, terror and militarism, law and justice, citizenship, democracy, refugees, anti-state movements, the "man" in the state, and welfare and post-welfare politics.

ANTH303 Ritual
Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion, and not all rituals are religious. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

ANTH304 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ANTH305 Semiotics of al-Barzakh: The Grammars of the End of Days and Horizons of Possibility
This course builds from the Islamic eschatological concept of "al-Barzakh" as it has been taken up in anthropological theories, as well as in Islamic thought more generally, with careful attention to the term's semiotic transformations and significations. It does so in order to explore both how the term describes an earthly place and an eschatological hereafter as well as a theoretical and practical alternative to the notion of the liminal personhood.

Since at least the 12th century, thinkers have explored the Islamic concept of al-Barzakh to explore the connection between the earthly present and the heavenly hereafter and the scales of judgment in between. This term, somewhat akin to Christian notion of purgatory or limbo, appears only three times in the Qur'an. It is explained as being like the productive firmament that separates salt and sweet water. In places like Morocco, this is commonly interpreted as referring to the Strait of Gibraltar and the underwater isthmus that separates and produces the waters of the Atlantic Ocean and the Strait of Gibraltar.

We will read both contemporary scholarly apprehensions of this term and its various applications in Muslim-majority contexts such as Morocco, Egypt, Sudan, and Iran--often ethnographic--as well as Islamic philosophy that attempts to bring the concept into relation with earthly personhood. In our approach, we will move through a variety of scholarly genres and epochs in order to trace the genealogies of present-day popular invocations of the term as we contrast it with other apprehensions of the eschatological and the liminal.

We will work to understand how this term contains space for both an imagination of everyday life as well as the boundary-generating difference marking here and there, then and now, by looking at how the term is evoked by artists, scholars, religious adherents, psychoanalysts, and border crossers. As we go along, we will pay special attention to the languages of belonging and difference evoked by this term and attend to how an anthropological approach to semiotics might elucidate new grammars of community and horizons of possibility that exist alongside notions of the liminal, uncanny, dreaming, the hereafter, and the imagination of the end of days.

ANTH306 Mobilizing Dance: Cinema, the Body, and Culture in South Asia
This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

ANTH308 Television Storytelling: The Conditions of Narrative Complexity
This course examines the industrial and cultural conditions for the development of relatively complex forms of storytelling in commercial U.S. television. Narrative complexity is a cross-generic phenomenon that emerged over the 1980s and has proliferated within an increasingly fragmented media environment. In class discussions and individual research projects, students will analyze particular programs in-depth, with attention to their industrial and social conditions of production, their aesthetic and ideological appeals, and the cultural tastes and viewing practices they reflect and promote. We will also consider how television studies has responded and contributed to the increased prestige of certain types of programs.

ANTH309 Reading Ethnography: Toward an Otherwise Anthropology
In this reading-centered seminar, we will consider the potential of ethnography as a way of knowing, form of argument, and genre of writing. We will take up contemporary interventions and critical turns including decolonizing and abolitionist anthropology, the politics of witnessing and ethnographic refusal, approaches to more-than-human anthropologies, queer/ing anthropology, and the craft of ethnographic storytelling and experiments in ethnographic poetry, prose, and fiction. Our seminar emphasizes collaborative close reading and discussion of a range of cutting-edge ethnographies that challenge the boundaries of disciplinary practice and seek to open up an anthropology that might enable us to think and know otherwise.

ANTH310 Un/Settled: The Anthropology of Displacement, Migration, Borders, and Refuge
How does one account for the ever-present and growing phenomenon of displaced people on the move in a world of bounded nation-states and citizens? How does one make sense of temporary encampments and refuge in a world of stable home/lands, and exile and fugitivity in a world of legal belonging?

As key political figures, refugees and migrants contest and transect our normative ideas about the national and the global. They force us to reckon with the hardened and profoundly consequential legal categories of borders and citizenship around which our world is organized. This course takes a deep dive into the modern experience of displaced people to understand their predicament and how it unsettles our fundamental notions of the political, nation-states, freedom, home, crises, violence, human rights, and humanitarian care.

Texts: Hannah Arendt, Zora Neale Hurston, Lori Allen, Julie Peteet, Urvashi Butalia, Giorgio Agamben, Amitav Ghosh, Saida Hodzic, Miriam Ticktin, Liisa Malkki, Judith Butler, Justin Hoseby, Simone Browne, Neil Roberts, and others.

ANTH311 Migration and Movement in/between Muslim Worlds
The spectacular migrant crisis across the Mediterranean Sea since 2014 has frozen a particular racialized understanding of migration and flight out of the Middle East and North Africa. This course looks to trouble this singular narrative of movement out of the Middle East and Africa by looking at the multiethnic and transnational flows of workers, capital, fighters, and aid workers in and out of the region since the late 1990s. We read ethnographies of development, war, exile, investment, and activism in order to better understand exchange, change, and fluid continuities in overlapping theaters between Africa, Europe, Asia, and the Middle East.

ANTH312 Eat, Grow, Heal: The Anthropology of Food and Justice
This course uses the lens of justice to examine the politics of food. We will look at the cultural and political-economic dynamics of food production and consumption, considering questions of taste, class, labor, marketing, and food sovereignty. We will also examine the environmental and social impact of food production and the consumption choices we make, from organic, to vegan, to animal proteins, to foraging and hunting. We will use a range of texts, including ethnographies, theory, film/documentary/TV shows, creative nonfiction, fiction, cookbooks, blogs, and magazine articles.

ANTH313 Producing and Performing Anthropology
This course examines the various modes through which anthropology can and has been performed and produced. Partially exploring the historical relationship between film, museum curation, and ethnography, while also looking toward how anthropology has verged into other media such as the audiovisual and digital, this class pairs reading ethnographies with practical projects, which could take performance, written, audiovisual, or even web forms. What does it mean to make an ethnographic website, for instance, or write a performative ethnographic text? How does this differ from a museum, and how are the history and practices of curation related to anthropology? This course draws from theoretical positions in the discipline as well as performance and artistic production, and includes in-class/virtual visits from figures in this field across the U.S., Europe, North Africa, and the Middle East, aimed at fostering opportunities for more long-term mentorship and collaborations.

ANTH314 Curating Religion: Museums, Monuments, and Memorials
Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they represent present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan's collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

ANTH315 Cultural Politics of the Body
In this course, we will consider 'the body' as both material and symbolic, imbued with meaning, politicized and expansive. We will ask ourselves: what is a body, where does it begin and end, what does it do? Recognizing the ongoing relations of power that seek to control and exploit different types of bodies (both human and nonhuman), it is critical that we ask ourselves how the body comes into being and how it subverts colonial domination. Accordingly, we will read and

discuss texts that examine these themes through many different lenses, including science and technology studies, medical anthropology, environmental studies, disability studies, posthumanism and multispecies ethnography, queer studies, and Black studies.

ANTH316 Critical Global Health
What does it mean to approach global health as not an applied science but an ethnographic object? This course will explore this question by bringing critical, social science perspectives to bear on global health issues and interventions. This course covers three areas of scholarship. First, we will examine the processes by which social inequalities produce patterns of health and disease in globalizing contexts. This will be followed by an interrogation of the term "global health," in which we will trace its emergence as a discourse and enterprise and unpack its contested meanings. While some view global health as a clinical practice, others conceptualize it as a business, security concern, charitable duty, or human right; yet another camp probes the term's ideological construction. We will consider how such vantage points are underpinned by cultural assumptions and ethical agendas that, in turn, can determine how, and to whom, care is delivered. As a third area of inquiry, we will investigate the implications and unintended effects of doing global health by probing such questions as, When are good intentions not good enough? How useful is biomedicine for alleviating locally defined problems? Under what conditions does global health exacerbate the social inequalities it seeks to overcome?

ANTH317 Culture and Consumption
This seminar examines the formation, development, and contemporary forms of cultures of consumption in EuroAmerican societies and their gobal exportation and adaptation to diverse local situations. The course is premised on the idea that the spectacular and continuous rise of commodity consumption that began in the late 17th century is as much a cultural as an economic process, one that both shaped and was shaped by shifts in ideas about personal and social development. Once associated with negative meanings of waste, excess, and depletion, consuming, especially of clothes, domestic goods, new foods and beverages, and artistic forms, came to be seen as a critical dimension of self-fashioning and sociability. While the course situates these developments in the context of expanding markets and new modes of distribution, it will emphasize the post-purchase moments of consumption, that is, the ways in which consumers incorporate goods into their everyday lives. Among the themes we will consider are the gendering of consumption, the social dynamics of taste, commodity consumption and ideologies of authenticity, consumption and social inequality, the consequences of consumption, and the emergence of the ethical consumer.

ANTH318 Global Indigeneities
This course focuses on theories of indigeneity in examining indigenous peoples' lives, cultural practices, resistance and activism. The term "indigenous" has had varied and contested genealogies across time, geography, political contexts, and fields of study. Although dominant societies tend to claim that indigenous peoples are either entirely extinct due to genocide or diluted due to racial and cultural mixing, indigenous refers to the wide range of relations to region and nation of the more than 370 million indigenous people who are spread across 70 countries worldwide. Some indigenous peoples define themselves by their historical continuity with precolonial and presettler societies; others by ties to territories and surrounding natural resources; others in relation to distinct social, economic, or political systems; and still others by their distinct languages, cultures, and beliefs. Attempts at the historical erasure and subsequent memorialization of indigenous peoples serve the colonial goals of refuting indigenous claims to land and rights and have been the primary means by which dominant populations asserted their own modernity while denying it to putatively "primitive" indigenous peoples. Today, nation-states continue to impose this notion of the "pre-modern" savage as a mechanism of control in their negotiations with indigenous peoples' legal status and land rights. This course will focus on a range of cases studies including indigenous peoples in North America contending with the states of Canada, the United States, and Mexico; Indigenas encompassed by select countries in South America; Aboriginal peoples in Australia, the Sami (across various countries in Scandinavia), the Ainu (Japan), the Maori (New Zealand), and Palestinians (Israel-Palestine). Topics will include indigenous peoples' struggles for autonomy and survival; self-determination and political status under international law; the UN Declaration on the Rights of Indigenous Peoples; the UN Permanent Forum on Indigenous Issues; land struggles and the protection of natural resources; cultural resurgence and revival of select traditions; and varied forms of political resistance and decolonization.

ANTH319 Toxic Sovereignties: Life after Environmental Collapse
What politics emerge at the borders of life and nonlife? Representations of the human species as being on the brink of environmental collapse have become increasingly common, as the specters of climate change and cataclysmic environmental disaster seem to bear down ever more heavily upon us. At the same time, the increasing entanglement of human bodies with various forms of chemical and otherwise man-made pollutants presage a slightly different future, one in which, if the human species does not outright disappear, it will be fundamentally transformed. This course explores different forms of political and social action that have emerged in response to these seemingly epochal shifts with a particular emphasis on the ever-mutating concept of sovereignty. Our goal is to explore the ways in which the shifting borders between human life and its artificially produced absence can serve as productive sites of new political forms and transformations of older ones, even as they also generate tremendous social and cultural anxiety.

ANTH320 The Idea of Palestine
This course traces contestations over the idea of Palestine, beginning in the late 19th century. In its approach to an archaeology of the idea of Palestine and its discursive circulation, it draws from the disciplines of history and anthropology while also incorporating primary texts. Its goal is to provide a rigorous foundation in the origins of the debates that shape discussions of Palestine today while also outlining the history of the land and its peoples, from before the imposition of the Sykes-Picot partition plan and the violence that followed it through today. Permission of instructor required.

ANTH321 Migrant Personhood: Against Tales of Witches, Aliens, Beasts, and Pests
The contagious animal, the irrational woman, the foreign threat, the mentally incompetent -- this course follows the circulation of these portrayals of immigrants beyond rhetorical injury. Drawing on what Colin Dayan calls "negative personhood," we will focus on the symbolic, narrative, and representational violence of immigration law. We start with readings and films that look into the history of the idea of the "reasonable man" in immigration policy, the truth-making effect of courtroom hearings, and the figures of speech that give shape to stories about what it is to be an American in the eyes of the law. We then explore forms of alternative representation that elude legal containment and instead seek cultural membership and political participation. We finish the course by examining poetic testimonials, psychotic narrations, dirty protests, escapes from ideological frames of address, collective autobiography, imaginative refusals, and radical Latinx utopias. We will draw from interdisciplinary material in anthropology, literary theory, performance studies, philosophy, legal theory, and feminist studies, among other fields.

ANTH322 The Agent
A curious feature of contemporary North Atlantic culture is its concern to discover, describe, obtain, and distribute something called "agency." In tandem with with CHUM's Spring 2026 theme, Doing Nothing / Nothing Doing, this course critically re-examines the cultural metaphysics of agency and action that captivates modernity in general and liberalism in particular. Reading widely across anthropology, STS, philosophy, literary studies, political theory, religious studies, and aesthetics, we will critically explore the peculiar form of life whose protagonists and critics alike are transfixed by the figure of the Agent.

ANTH323 Biocapital and the Commodification of Life
Karl Marx described capital as "dead labour, that, vampire-like, only lives by sucking living labour." But what happens when capital itself is alive? Biotechnological and scientific advancements have enabled the commodification and exploitation of living organisms and tissue at a scale barely imaginable in Marx's time, opening new global markets for the circulation of "biocapital." What is biocapital, and how might it transform our understandings of labor, value, property, and even life itself? Drawing on a variety of course material -- including critical theory, ethnography, literature, and films -- the seminar seeks to answer these questions by exploring the historical, socio-cultural, and political-economic dimensions of biocapital and the technoscientific processes employed to extract value from living things.

ANTH325 Race and Reproduction
This interdisciplinary course explores the intimacy of race and reproduction against the backdrop of capitalist modernity. We scrutinize the policies, priorities, and perversions of slave owners, the racially differentiated family planning programs under apartheid, the eugenicist movements and the criminalization of poverty in the United States to interrogate what is generated by the incapacitation of blackness across scales of time and space. We examine the Marxist feminist elaboration of the concept of social reproduction and then consider black feminist rejoinders that center the reproductive labor of black women -- as slaves, as domestic workers -- that implicate violence and ownership in the mediation of biological and social reproduction as a set of racializing practices in which value is generated, accumulated, and expropriated. Finally, the course considers the proliferation of assisted reproductive technology (ART) in the 20th century, the recourse to surrogacy, and family abolition to interrogate the extent to which the "race-reproduction bind" is disaggregated or reanimated in the present.

ANTH330 Economies of Erasure: Exploring the Violence Concealed by the Liberal Promise of Care
This course will aid students in understanding and recognizing the processes of erasure that maintain ongoing regimes of domination. In particular, we will attempt to understand how the twinned promises of equity and tolerance made by seemingly liberal, multicultural democracies work to conceal the ongoing -- and specifically targeted -- violence that in fact constitute and continue to subtend these nation-states. How, we will ask, do these regimes make violence disappear through the promise to "care" for their citizens, even as they wield spectacular violence to maintain domination? How are we as subjects of these regimes conditioned to pay attention to certain events, ideas, and systems, and what is made to disappear through such selective forms of attention? What communities, bodies, and individuals are sacrificed by the liberal promise of care? To answer these questions, the course will juxtapose readings in philosophy and social theory with ethnographic and historical case studies, giving students both the conceptual tools to analyze erasure and a set of examples through which to understand how these forms of erasure operate in the world.

ANTH331 Race, Colonialism, and the Nonhuman
This course responds to growing scholarly attention to the entwinement of racial slavery and settler colonialism as foundational forces in U.S. society as well as to the relationships between colonial, racial, and ecological violence. Through materials from anthropology, Black studies, Indigenous studies, environmental history, and critical animal studies, this class will explore the entanglement of human and nonhuman difference--primarily in North America--both historically and in the present. Students will become familiar with conversations about racialization, settler colonialism, and the figures of the human/nonhuman that are increasingly prominent in anthropology as well as adjacent fields in the humanities and humanistic social sciences.

ANTH332 The Native Northeast
The Indigenous peoples of northeastern North America have been on the frontlines of settler colonialism for over four hundred years. Nevertheless, numerous sovereign Indigenous nations resolutely persist in their homelands despite conditions of intense constraint, their members enacting trajectories for regional thriving that often diverge from those of the colonial mainstream. Guided by materials from Indigenous studies, anthropology, and history, this course will foreground the work of Indigenous scholars, activists, and artists who engage the northeast as a decidedly -- although not exclusively -- Indigenous space. Focusing primarily on Indigenous peoples living south of the U.S.-Canada border in the present and recent past, the course will center topics including the politics of Indigenous sovereignty, enduring relations with the more-than-human world, land return, and the contestation of regional Indigenous erasure.

Prereq: **None**

ANTH333 The Problems of the Fetish
This course traces the vicissitudes of the concept of the fetish, a term foundational to the theorization of value, desire, and belief across multiple intellectual traditions. The course begins with the term's first systematic formulation in Charles de Brosses's 1760 publication On the Worship of Fetish Gods, which introduced fetishism to describe forms of "direct worship, rendered without figuration." The concept brought into focus a set of pressing questions concerning representationalism, materiality, mediation, and magical thinking that troubled Enlightenment rationality. Spanning geographies, histories, and disciplines, the course examines fetishism in relation to the anthropological study of religion, Portuguese colonization in West Africa, and the rise of mercantile capitalism. We then track the term's uptake and transformation in philosophy, political economy, and psychoanalysis, focusing on key figures including Kant, Hegel, Marx, Freud, and Lacan. The course concludes by examining contemporary engagements with fetishism in film theory, new materialism, Women's, Gender, and Gexuality Studies, and Black studies to trace connections between power and embodiment.

ANTH337 Missionary Mysteries: the Objects and Archives of Wesleyan's Missionary Past
This course examines the history of Wesleyan University's connections to missionary work in the nineteenth and early twentieth centuries, as seen through the university's archival and object collections. Students will spend the bulk of classroom time in hands-on learning as they engage with the archives of the Wesleyan Missionary Lyceum and cultural heritage collections obtained by missionaries and brought back to the University. Beginning with an overview of historical, archival, and museum methods, the course then will examine objects and written records from the Americas, West Africa, East Asia and the South Pacific. Students will be challenged to consider the ways in which Wesleyan has been engaged in colonialism, imperialism, and global evangelism. Topics of investigation will include: gender, linguistics, museum ethics and repatriation, the use of objects as educational tools.

ANTH355 Social Movements Lab
What can we learn from social justice activists about the economic, political, and environmental struggles facing us today, including mass incarceration, immigration, economic precarity, and the violence of the state? Where are the critical sites of queer, trans, left, feminist, black, indigenous, disability, and environmental struggle? How do these movements converge, and where do they diverge? This participatory, interdisciplinary research seminar enables you to embark on an independent, semester-long research project on the social movement or activism of your choice. We'll start with some foundational reading on multidisciplinary social movement research; archival, ethnographic, and participatory methodologies; and histories of social justice struggles in the U.S. The remainder and majority of the seminar is laboratory style, taking shape around your particular projects. Each week, we will collaboratively analyze one or two projects, mapping out and comparing methods, goals, visions, struggles, and contexts of the movements under study. Our goal is to understand a range of social justice activisms in their economic, political, and historical context, with an eye toward integrating activist scholarship and social change. The activism you research can be contemporary or historical; local, national, or global; and can take any shape: direct action, community organizing, activist philanthropy, art as activism, etc. You do not need previous experience or activist contacts for this course--just passion and the desire to learn collaboratively!

ANTH356 Decoding the Stone Age: Analysis of Lithic Technology
Lithic (stone) tools are the oldest known type of human technology. They represent the most abundant and by extension one of the most informative components of the archaeological record for reconstructing ancient human behavior over the last 3.3 million years. In this course, students will learn the methodological and theoretical basics used by archaeologists working on the Stone Age. The course includes hands-on training in how to identify and analyze stone tools, qualitative and quantitative approaches, and interpretive frameworks that allow archaeologists to use stone tools to understand broader anthropological questions about the evolution and diversity of human behavior. Students will analyze actual archaeological assemblages from important Stone Age sites stored in the Wesleyan University Archaeology and Anthropology Collections. Through this, students will be exposed to elements of data collection protocols and research design in a collections setting. Further, students will design exhibits for the campus community that incorporate the collections and the data they produce.

ANTH360 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.

ANTH361 Calderwood Seminar in Public Writing: The Dark Turn in Television Storytelling
This course, offered in association with the Calderwood Seminars in Public Writing, examines a certain tendency in contemporary television storytelling. Taking the debut of "The Sopranos" in 1999 as a benchmark, we will explore the emergence in dramas and comedies of a dark, uncertain, pessimistic, or disillusioned address within a medium long known for its reassuring tone. We will consider the industrial and social conditions for this tonal shift, as well as the role it has played in elevating public perceptions of television's cultural value.

ANTH392 Sacrifice
Sacrifice entails the surrender, destruction, or self-denial of something precious or desired in exchange for peace, power, prosperity, freedom, or edification. Destruction by sacrifice, says anthropologist E. E. Evans-Pritchard, is an act of giving of the self that must be costly and "necessarily reciprocated." In sacrifice, humans come face-to-face with death without dying. Through a collection of interdisciplinary readings, this seminar examines the implications of this ruse through the themes of war, animal and human sacrifice, asceticism, acts of political immolation, big-game hunting, high-altitude mountaineering and extreme sports, and the experience of excess in festivals such as Burning Man.

ANTH395 The Anthropology of Religion
What do we study when we study religion? We can observe practices, record speech, examine objects and actions--but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of "explaining away" the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

ANTH397 Difficult Women: Post/Feminism in Television Comedies and Dramedies
Although postwar family sitcoms represented women as homemakers, one of the first and most popular sitcom wives also articulated discontent with domestic femininity. Lucy Ricardo became the prototype of the "unruly woman," a figure with feminist potential whose desires exceed and disrupt dominant gender norms. As those norms have shifted, so have TV's unruly women. Second-wave feminism, anticipated in I Love Lucy, was incorporated into a 1970s cycle of comedies centered on single working women whose career aspirations were rewarded. Over the following decades, a postfeminist sensibility dominated television comedies and dramas and became central to a gendered neoliberalism in which energetic individuals "empower" themselves. In recent years, a new type of female protagonist has emerged. Alongside the can-do optimism of single-women comedies from The Mary Tyler Moore Show to Sex and the City to 30 Rock and Parks and Rec, a stream of comedies and dramedies, made largely by and for women, have depicted a variety of flawed, difficult, unruly women coming of age under conditions of socioeconomic precarity, whose less focused energies seem to articulate a more uncertain, downbeat, post-recessional mood. In this course we will situate the latter cycle in relation to both the longer history of televisual representations of women and to the current state of feminist politics. Among the shows we will look at are: I Love Lucy, Bewitched, The Mary Tyler Moore Show, Sex and the City, Ally McBeal, Girlfriends, The Mindy Project, 30 Rock, Parks and Rec, Girls, Insecure, Broad City, Better Things, Two Broke Girls, New Girl, Crazy Ex-Girlfriend, Jane the Virgin, Unreal, Abbott Elementary, Fleabag, Dear White People, and Somebody Somewhere.

ANTH398 Queer/Anthropology: Ethnographic Approaches to Queer Studies
What are the many ways in which queerness obtains meaning across cultures? What does it mean to have a queer relationship to one's world? Queer/Anthropology traces the history and present state of ethnographic studies of queerness, defined here as non-heteronormative sexualities and gender embodiments. We examine the way in which heteronormativity is established as integral to hegemonic order and the manner in which it functions within Western armchair ethnographic studies and sexology of the early 20th century. We look at the binary system as a mode of organization and the way in which anthropological studies of sexuality and gender have nearly always challenged the presumed universality of these modes. We read contemporary ethnographic work in order to compare and contrast different cultures' usage of sexuality and

gendered categories in relation to various contexts, such as colonialism, race/racism, capitalist and non-capitalist economic and political systems, cosmology/religion, and regionality/place.

ANTH400 Cultural Analysis: Senior Capstone Seminar
This seminar is for all senior anthropology majors who intend to write honors theses or senior essays. It is designed to enable students to pursue individual research projects in a group context, with attention to debates on the nature of anthropological interpretation. The seminar is structured as a workshop: each student gives a series of presentations on their own research project to the group; equally important is engaging with and offering constructive criticism of the projects presented by others.

ARABIC (ARAB)

ARAB101 Elementary Arabic I
Arabic 101 is the first introductory course of Modern Standard Arabic (MSA). The course will be conducted primarily in Arabic, except at the very beginning when students are learning the alphabet (Sound and Script). The course is communicative proficiency-based but other methods such as the translation are integrated in the course. While the communicative approach stresses the importance of developing the oral skills in class, all the other skills of language learning be emphasized. Arab culture and history are systematically integrated in the course through student groups cultural presentations as well as other activities.

The class will focus on speaking as an effective way of learning (speak it to learn it). Students will be able to write and create basic words, sentences and eventually write their first essay. The latter will cover--but will not be limited to--FORTE elements (family, occupation, recreation, travel and education). Students will able to converse basic dialogues comfortably in class, and HW will be assigned on a daily basis. There is a weekly Teaching Assistant's session conducted by a native Fulbright scholar from an Arab country.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB101Z Elementary Arabic I
ARAB101Z is the first introductory course of MSA (Modern Standard Arabic) designed for students who have never had any training in MSA while ARAB102 is its sequel appropriate for students who have taken ARAB101 and/or for individuals who are decent heritage speakers of an Arabic regional dialect. By taking ARAB101 & ARAB102, the student would earn 3 credits and would be able to enter ARAB201 if they choose to do so, as well as reach a low-intermediate level in MSA.

MSA is the official medium of oral and written communication in the Arab World and for religious services in the Islamic world. It has derived from Aramaic, has a close kinship to Hebrew, and it is the language spoken first by the Bedouins of the Arabian Peninsula in the fourth and fifth centuries A.D. It is the language used in books, novels, newspapers, conferences, official and religious speeches, business transactions, legal and government documents, court rulings, public signs, TV and radio newscasts and many TV/cinema productions and shows. It is the language of the Holy Quran and Hadith (sayings by the prophet Mohamed (PBUH) and/or his companions), and it is understood practically by every native Arabic speaker from Morocco to Bahrain. Being the language of Islam, more than one billion Muslims use it in their religious daily rituals all around the world, namely central Asia, South East Asia (Indonesia, Malaysia, India & Bangladesh etc.), the Middle East, the Great Sahara & North Africa.

It is very important to note that Modern Standard Arabic is not exactly the language spoken on the streets in the Arab world. However, anyone with a solid knowledge of MSA will have little to no problem "picking up" any of the main regional Arabic dialects (North African, Egyptian/Sudanese, Gulf, Iraqi, or Levantine)

The course will be conducted primarily in Arabic, except at the very beginning stages which will require the use of English (during Sound and Script discussions). The course is communicative proficiency-based, which stresses the importance of developing the oral skills but also aims at developing the other skills of language learning (listening, reading and writing).

Arab Culture and History are systematically integrated in the course and will be referred to, whenever appropriate and possible. References will also be made to the regional dialects for comparison with Modern Standard Arabic. Student Groups in-class presentations will be an excellent tool for students to learn about different aspects of Arab & Muslim culture, society and history.

The course will be supplemented by audio and video material as well as printed handouts provided by the instructor. Students are expected to do daily homework, role-play, group work, and give regular in-class feedback/ presentations, and are supposed to come prepared for class on a daily basis.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB102 Elementary Arabic II
This course is a second-semester course in modern standard Arabic (MSA) that will continue to stress the basic skills of reading, writing, speaking, and listening. The course will focus on speaking as an effective way of learning (speak it to learn it). Students will continue to learn MSA grammar, write and create paragraphs, and begin to converse comfortably in the target language. Students are expected to develop better listening, speaking, reading, and writing skills in Arabic and to become familiar with Arabic culture. Oral drills and speaking activities will be done in the classroom, and the class will be conducted primarily in Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101**

ARAB102Z Elementary Arabic II
ARAB102 is its sequel appropriate for students who have taken ARAB101 and/or for individuals who are decent heritage speakers of an Arabic regional dialect. By taking ARAB101 & ARAB102, the student would earn 3 credits and would be able to enter ARAB201 if they choose to do so, as well as reach a low-intermediate level in MSA.

MSA is the official medium of oral and written communication in the Arab World and for religious services in the Islamic world. It has derived from Aramaic, has a close kinship to Hebrew, and it is the language spoken first by the Bedouins of the Arabian Peninsula in the fourth and fifth centuries A.D. Prereq: **ARAB101 OR ARAB101Z**

ARAB201 Intermediate Arabic I
This course is a second-year, lower intermediate course in modern standard Arabic (MSA) designed mainly for students who have completed at least two semesters of Arabic Fusha or those who already possess a basic foundation in Arabic. Students will develop more skills in writing concrete essays and narrating. They will start talking about current events and describing places and people. Narration, in fact, is the hallmark of the intermediate level, so conjugation tenses will need to be memorized. The course will primarily be conducted in Arabic, except for some cases which require the use of English. The course is communicative proficiency-based, which stresses the importance of developing the oral skills, while giving equal attention to the other skills of language learning (reading, writing and listening). The measure chart and the case system will continue to be discussed and practiced. Aspects of contemporary life and culture in the Arab world as well as Arabic regional dialects will be constantly referred to. Students are expected to do daily homework, role-play, group work, and give regular in-class feedback/presentations. The course will be supplemented by audio and video material as well as printed handouts by the instructor.
Offering: **Host**
Grading: **A-F**
Credits: **1.25**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101 AND ARAB102**

ARAB202 Intermediate Arabic II
This course is a second-year, upper intermediate course in modern standard Arabic (MSA) that will continue to focus on the four basic skills of reading, writing, speaking, and listening. In this level, students will be able to speak Arabic comfortably enough to communicate with a native speaker on a variety of topics. Students should be able to write simple texts on everyday themes and read uncomplicated authentic texts on familiar or concrete topics, as well as newspaper articles and storybooks. Culture will continue to be integrated in the classroom.The class will be conducted primarily in Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.25**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101 AND (ARAB102 OR ARAB201)**

ARAB301 Advanced Arabic I
Arabic 301 is the fifth semester of Arabic MSA and is designed for students who have had at least two full years of Arabic MSA or its equivalent.

This first semester of third-year Arabic will continue to emphasize the four skills in language learning mainly through readings that introduce students to more advanced topics that draw from literature, Arab Media, sciences and other disciplines. The course will be conducted entirely in Arabic, apart from cases where intricate grammar concepts necessitate English use.

The course is communicative proficiency-based, and students will continue to do role-play, pair work, write weekly reports and commentaries and give regular in-class feedback/presentations. They are expected to contribute orally to class discussions and lectures.

Arab culture and history will continue to be systematically integrated in the course through constant reference. Regional dialects will continue to be referred to, with the purpose of comparing them to Modern Standard Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB311 Introduction to Colloquial Levantine Arabic I
This course offers students an introduction to the spoken Arabic of the Levant (Syria, Lebanon, Jordan, Israel, and the Palestinian territories). One of the difficulties facing nonnative speakers trying to master Arabic is that very few Arabs can carry on a conversation in modern standard Arabic, so students must be familiar with a colloquial dialect as well as the standard literary language to communicate effectively in Arabic. Although Levantine Arabic is not as widely spoken as is the Egyptian dialect, it provides a useful entry for English speakers into colloquial Arabic, as it is about halfway between the Egyptian dialect and that spoken in Iraq and offers a useful bridge to mastering either dialect. The text for this course uses the Arabic alphabet. Students need to have a thorough knowledge of the Arabic alphabet and writing conventions to take this course. As much of the vocabulary used by the speakers of the Levantine dialect is derived from standard Arabic, this course will help build students' knowledge of basic Arabic vocabulary.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB201**

ARAB322 Media in the Arab World: From TV and Film to Social Media (CLAC.50)
Media in the Arab world has undergone significant changes in recent times, with the emergence of new technologies, platforms, and voices across various mediums such as movies, newspapers, magazines, and social media. This course will introduce students to some of the main channels for the communication and expression of information in the Arab world today.

While television remains the most popular source of information - with channels such as Al-Jazeera even having an international audience - access to information has expanded to include online news websites and social media. Social media, in particular, has become an increasingly important source of information, especially among younger generations.

In this course, we will delve into the evolution and impact of media in the Arab world, exploring its role in shaping public opinion, identities, and narratives across different channels. We will look at movies, television series, and social media programs, as well as sources of traditional information, such as newspapers, magazines, and news broadcasts.

This course is open to students studying all levels of Arabic, but is particularly suited to students who have completed Intermediate Arabic as well as native speakers of Arabic.

Prereq: **None**

ARAB380 Arabic in Translation: Arabic-English & vice versa (CLAC.50)
This course is aimed at introducing students of Arabic, who are already advanced in the Arabic language and have a decent command of it, to the art of translation--namely, translation between Arabic and English. After an overview of translation concepts and techniques, we will study and tackle samples from news media, literature, publicity announcements, novels, and a wide range of actual translation assignments. The course will be conducted in Arabic, except for the parts where English has to be used as part of the translation processes.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-CGST**
Identical With: **CGST380**
Prereq: **None**

ARAB381 Arabic Calligraphy (CLAC.50)
This course caters to students with an interest in Arab culture, offering hands-on workshops to acquire basic skills in various Arabic calligraphy styles using classical materials (qalam, pen, ink, brush). In addition to practical sessions, the course provides a historical perspective on calligraphy, showcasing examples from the Middle East and North Africa. The instructor, who is experienced in creating calligraphic art, will guide students through the intricate world of Arabic calligraphy.

ARCHAEOLOGY (ARCP)

ARCP135F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

ARCP150F Myths, Martians, and Monsters: Archaeology and Pseudoscience (FYS)
This FYS will explore fantastic claims about the human past by critically examining pseudoarchaeological claims and comparing them with the actual archaeological record. Emphasis will be placed on the scientific method, critical thinking, and media literacy. We will discuss well known myths, frauds, and misinformation, both past and present, including Atlantis, Ancient Aliens, Piltdown Man, Ancient Apocalypse, the Moundbuilder Myth, and their use and misuse. By the end of the course, students will be able to differentiate reproducible scientific data from the fictitious and fabricated. Additionally, we will discuss the motivations, ethics, and consequences of sensationalized accounts of the human past.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Prereq: **None**

ARCP153F Single Combat in the Ancient World (FYS)
This course celebrates the clash of warriors in warfare, sport, and spectacle in the classical world. Using primary sources and archaeological evidence, the class will survey traditions of combat in ancient art, literature, and society, beginning with Greek and Near Eastern epic; the modes of warfare in Greek society; ancient Olympic combat sports; and, finally, Roman gladiator spectacle. We will examine the role of violent sport in Greek and Roman society, the reception of the competitors, and the use of these events for political or nationalistic ends. Throughout the course we will explore the flexibility of concepts such as military ethics, "western" warfare, violence, honor, and excellence, both in the classical world and in our modern lives.
Offering: **Crosslisting**

ARCP201 Art and Archaeology of the Bronze Age Mediterranean
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST, SBS-CLST**
Identical With: **CLST201, ARHA202**
Prereq: **None**

ARCP203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ENVS203, ANTH212, STS203, IDEA203**
Prereq: **None**

ARCP204 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**

Identical With: **ANTH214, ENVS207, IDEA204**
Prereq: **None**

ARCP209 Tradition & Testimony: Protecting Native American Sacred Lands, Ancestral Remains, & Cultural Items
This course will explore the historic genesis of present-day U.S. and international policies toward Native American peoples and other indigenous communities. In addition, studies will include traditional indigenous and tribal perspectives, investigate indigenous-specific origin stories and the connections these stories have with historic events and places, and take a hard look at repatriation policies. Students will investigate several case studies involving current issues Native American communities are facing in repatriation and protecting sacred places, both local and national.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ANTH**
Identical With: **ANTH209**
Prereq: **None**

ARCP210 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **IDEA205, STS211, ANTH210**
Prereq: **None**

ARCP214 Survey of Greek Archaeology and Art
This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda!) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST214, ARHA203**

ARCP223 Survey of Roman Archaeology and Art
This course begins with the art, archaeology, and culture of the Etruscans and their important contributions to the early history of Rome. After a brief examination of the influences of Hellenistic culture on Rome, the course surveys the archaeological evidence illustrating the principal architectural and artistic achievements of the Romans down to the reign of Constantine the Great.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CLST223, ARHA207**
Prereq: **None**

ARCP233 History and Archaeology of Industrial Connecticut
Despite the fact that Middletown is a UNESCO Site of Memory and is home to many preserved historical sites, there has been little archaeological excavation, documentation, and storytelling specifically focused on extant industrialization, weaponry, and carceral artifacts dating to the Revolutionary War and early industrial eras. This course will explore the rich history of industrial sites in Middletown and surrounding regions of Connecticut. Students will learn about historical and archaeological methods for the study of past material culture, landscapes, and environments, focusing on how objects and sites can reveal hidden traces of Middletown's ties to agricultural, textile, munitions, and other forms of industrial production over the last few hundred years. Students in the course will have opportunities to work with archaeologists and museum professionals as they research local historic and archaeological objects. Students will also take part in archaeological investigations of local sites near Wesleyan's campus. As a final project, students will produce a public-facing online exhibit, physical exhibit, or public outreach activity based on their research. Students enrolling in the course must be available for a weekend fieldwork activity in April involving survey and/or excavation of a local archaeological site. This course is supported by a Mellon Foundation grant.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Identical With: **HIST233**
Prereq: **None**

ARCP234 Art and Society in Ancient Pompeii
This seminar surveys the art, architecture, and material remains of the cities buried by the eruption of Mt. Vesuvius in 79 CE. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the social and political life of a small Roman city and examine the unique evidence for reconstructing the private life of Roman citizens, from their participation in local politics and government, to their religious beliefs and lives, to the interior decoration of their homes and their burial customs.
Offering: **Crosslisting**

ARCP242 Tablets, Temples, and Cities: Near Eastern Art and Archaeology
History starts in the Near East with many firsts in human culture: domestication, writing, cities... Throughout its long history, the ancient Near East has produced a unique corpus of material culture, architecture, and textual records. In this course, we will survey the art and archaeology of the ancient Near Eastern civilizations with contextual information about the cultures that created them.

Every week we will progress chronologically and will explore broader socioeconomic, political, and cultural changes by discussing art historical, archaeological, and textual evidence. We will look at examples from Anatolia, Mesopotamia, and the Levant, and compare these to one another. Students will gain a larger understanding of commonalities and differences in the cultural expressions of these cultures. The last section of this course will be dedicated to current issues concerning the archaeology and cultural heritage of the Middle East.

This course will also have various hands-on components: We will learn about textile production by using spindle whorls, learn about cuneiform writing by making clay tablets, and create our own seals based on ancient Near Eastern imagery and mythology.

ARCP244 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt
This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house floors. Drawing upon a blend of archaeological, art historical, and mythological evidence, we will examine how the funerary practices and the very notions of the soul, the body, and the afterlife compare in these two societies. We will also explore how social class, gender, and ethnicity influenced those ideas. The course will also provide an introduction to archaeological theory and the interpretive strategies employed by archaeologists, art historians, and historians in the reconstruction of ancient societies.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

ARCP245 The Archaeology of Ancient Foodways
Bread, wine, olive oil, fish sauce -- what did it mean to eat in the ancient Mediterranean world? In this course, we explore the archaeology of food in ancient Greece and Rome, from farms and vineyards to markets and banquets. Using archaeological evidence, primary literature, and theoretical approaches, we examine how food production, trade networks, and dining practices reflected and reinforced social hierarchies and cultural values. The course will also employ digital mapping tools to trace the movement of ingredients around the Mediterranean and help us reflect on how global food systems shape our own consumption habits.

This course satisfies the Archaeology and Archaeological Science requirements for the Classical Studies major.

Identical With: **CLST245**
Prereq: **None**

ARCP248 Who Owns the Past? Cultural Heritage, Archaeology, and Politics
Cultural heritage is defined by UNESCO as the tangible and intangible attributes of a group or society that are inherited from past generations, which should be preserved and maintained for future generations. In practice, this is maintained through the archaeological, historical, and legal practice of cultural resource management (CRM). While many think of archaeology as a purely academic field, archaeologists are largely employed outside of the "Ivory Tower" in this rapidly growing industry. This course will explore how this industry is practiced in the United States and abroad, and its role in preserving heritage. This course will also introduce students to the wider world of cultural heritage studies. Along with the practice of protecting cultural resources, we will explore the ethics of managing the past and the legal frameworks that govern cultural heritage. Students will also consider the effects of colonialism, nationalism, armed conflict, climate change, uncontrolled development, and illicit trade on cultural heritage and group identity. Further, students will engage with current debates about ownership of cultural heritage and responsibility around its management.

Prereq: **None**

ARCP255 The Archaeology of Identities in the Ancient Mediterranean and Beyond
Human beings all hold a wide range of socially constructed and physically lived identities, expressed and experienced sometimes continuously and simultaneously, and sometimes only occasionally under specific circumstances. These identities might include, but are not limited to, race, ethnicity, gender, sexuality, social status, occupation, and health. Many of these identities, expressed and experienced in various tangible and intangible ways in our lived reality, can only be accessed indirectly through the physical proxy of the archaeological record when it comes to people living in the past. This course will explore a variety of archaeological methodologies for accessing the social identities of past lives, as well as the sometimes problematic role that archaeology has played in this type of research over the course of the 20th and 21st centuries (is ancient DNA bringing us back full circle to scientific racism?). The primary focus of the course will be on the ancient Mediterranean, with additional case studies drawn from other parts of the world serving to illustrate the cross-regional applicability of approaches to past identities.

Identical With: **CLST260**
Prereq: **None**

ARCP257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.

ARCP260 Art and Archaeology of Ancient India
This course is an introduction to the art and material culture of ancient India, from prehistory through the formation of the classical tradition in the fourth century CE. The broad swath of human experience covered necessitates a thematic approach, focusing on key moments, cultures, object types, and methodological approaches, arranged in a roughly chronological fashion. Thematic units may vary somewhat from year to year, but are likely to include: the meaning and use of the carved stone seals of the Indus Valley civilization; the impact of the Vedic Aryas on the development of Indian ritual and imagery; how to read the iconographic language of the "plant and animal style" in decorative sculpture; the meaning and significance of the Asokan pillars; and the architecture and ritual of Buddhist monastic life in the cave monasteries of western India.

ARCP267 Museum Collections: Ethical Considerations and Practical Applications
Serving as a broad overview of museology, this course introduces students to the principles underlying the foundations of museum work and collections stewardship. Topics covered will include the origins of museums and collecting, the rationale behind museum policies, and the legal frameworks and professional standards that guide collections management. Ethical considerations surrounding issues such as NAGPRA/repatriation, decolonization, accessibility, looted artifacts, and cultural patrimony will also be covered. Finally, students will explore the practical aspects of preventive conservation, museum documentation, and exhibition development. Although topics covered in this course will apply to a variety of museums, the primary focus will be on cultural heritage collections. Readings and class discussions will be supplemented with hands-on exercises using the Wesleyan University Archaeology & Anthropology Collection.

ARCP268 Disaster, Destruction, and Resilience in the Ancient World
How did ancient societies confront catastrophe, and what can we learn from their responses? This course explores themes related to natural and human-caused disasters in the ancient Mediterranean world, including earthquakes, volcanic eruptions, fires, floods, plagues, droughts, and famines. Drawing on archaeological and literary evidence, we will examine the causes and aftermaths of events like the eruption of Vesuvius, the floods and fires of Rome, the Antonine Plague, and more. Through these case studies we will deepen our understanding of ancient experiences of risk, vulnerability, and resilience, and inform our own attitudes toward disasters in our modern world.

Prereq: **None**

ARCP270 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.
Offering: **Crosslisting**

Identical With: **MUSC260, ANTH260, COL255, MDST260, REES206**
Prereq: **None**

ARCP275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.
Offering: **Host**

Identical With: **IDEA275, ANTH275, STS275**
Prereq: **None**

ARCP285 Off with its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase--as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating!) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

The course falls under the Archaeology/Archaeological Science track of the Classics/CCIV Major requirements.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST283, ARHA204**

ARCP290 Unearthing Early China: Art and Archaeology
This course introduces early China by examining major archaeological discoveries from prehistory through the second century CE. We will analyze the formal and material features of early Chinese artifacts from important archaeological excavations at sites such as Liangzhu, Anyang, Zhouyuan, and Mancheng. We will discuss the ways in which these artifacts and archaeological sites demonstrate early Chinese cosmological beliefs and ritual practices, especially notions related to heaven, afterlife, and the transition from ancestor worship to the pursuit of personal welfare in immortality. In addition, we will study the iconography and symbolism of objects found in these archaeological discoveries, which would serve as a foundation for the inception of visual arts in the later periods of Chinese history.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CEAS**
Identical With: **CEAS290**
Prereq: **None**

ARCP291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ANTH291, CEAS291, ENVS291, IDEA291**
Prereq: **None**

ARCP292 Archaeology of Food, Trade, and Power in South India
This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life--agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority--as well as historical events and processes that brought change to those patterns. The course capitalizes on South India's rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART, SBS-ART**
Identical With: **ARHA292, ENVS262**
Prereq: **None**

ARCP293 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds--also known as coin hoards--provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard, the numbers in which they occur, and the spatial patterning of their findspots: all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value.

In this hands-on course, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA293**
Prereq: **None**

ARCP310 Archaeological Theory in Action: Research Design and Analytical Frameworks
Archaeologists draw upon diverse data sets and approaches to reconstruct rich pictures of ancient ecologies, build environments, economies, cultural and cognitive practices. This 0.5 credit seminar explores, challenges, and evaluates the theoretical frameworks employed by archaeologists in research design and analyses of past societies. Topics will rotate depending upon student interests and current research projects but will be chosen from among anti-racist archaeology, gender and ethnicity studies, object and entanglement theory, frameworks for experimental archaeology, funerary analyses, typology and data management, landscape archaeology, conservation, or ethical approaches to archaeological science, among others. Foundational theoretical texts will be discussed alongside current publications in each topic area. The seminar is designed to prepare students for independent research in archaeology and related fields. This seminar is required for all Archaeology majors and strongly recommended for Archaeology minors, in addition to being open to all students in related disciplines
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ARCP**
Prereq: **None**

ARCP329 Roman Villa Life
This seminar will explore life in the Roman countryside, from the luxurious suburban villas near major urban centers to working estates in Italy and the Roman provinces. The course will begin with a general survey of Roman villa life and then move to a more focused inquiry into specific topics including art and

architecture, production, slave life, and transportation. Readings will be drawn from ancient literary sources, inscriptions, and modern social and archaeological studies. The course is intended for students from a variety of disciplines and backgrounds, but some knowledge of the Roman world is recommended.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST329**
Prereq: **None**

ARCP335 Art and Society in Ancient Pompeii
Buried by the eruption of Mt. Vesuvius in 79 AD and rediscovered in the mid-18th century, the once ordinary city of Pompeii is now an extraordinary laboratory for the study of ancient Roman life. This seminar surveys the art, architecture, and material remains of Pompeii and other cities destroyed by the eruption. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the political, social, and commercial life of a small Roman city and examine the unique evidence for reconstructing the private lives of Roman citizens.

This course fulfills the Archaeology and Archaeology Science track of the Classical Studies major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST335, ARHA335**
Prereq: **None**

ARCP338 Economies of Ancient Port Cities: Trade, Mobility, and Identity
This course explores urban life in ancient Mediterranean port cities, where harbors facilitated connectivity and long-distance trade and created cities that were defined by multicultural exchange and constantly reshaping identities. Through case studies drawn from Greek and Roman sites, the class will examine the lives of residents and port workers, focusing on themes such as trade, urban development, art, religion, food, and spectacle. With an emphasis on the archaeological material left behind, the course also explores how narratives about the past are shaped by the nature of surviving evidence.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CLST**
Identical With: **CLST338, ARHA219**
Prereq: **None**

ARCP341 Visualizing the Classical
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen--through landscape, sound, light, functionality/monumentality, and spatial relationships--shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical mapping, modeling, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST341, ARHA205**
Prereq: **None**

ARCP350 Animals in Archaeology
This laboratory course will explore how zooarchaeological methods for analyzing animal bones and teeth excavated from archaeological sites allow us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and techniques, including hands-on sessions for the identification and quantification of faunal remains. By the end of the course, students will be able to identify every bone in the mammalian skeleton and distinguish between the bones of common non-mammalian taxa. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP, SBS-ARCP**
Identical With: **E&ES350, ENVS348**
Prereq: **None**

ARCP352 Ancient Medicine: Potions, Poisons, and Phytochemistry in the Ancient Mediterranean
This course brings a blend of ethnographic, environmental, philological, and scientific frameworks to the study of ancient medicine. For the first half of the class, students will explore the theories and concepts of medicine and the body in classical antiquity from Hippocrates to Galen. Students will tackle case studies (e.g., treatment of war wounds, epilepsy, gynecological ailments) and suggest appropriate treatments. The second half of the course will focus on medicinal plants as discussed in Dioscorides, considering their ecology, archaeology, and phytochemistry, with hands-on lab modules in which students will learn how to extract and analyze bioactive compounds of medicinal plant species. In final group-based projects, students will present a "plant biography," tracking the arc of the medicinal and cultural uses of a particular species from the ancient Mediterranean to the present day.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **CLST352**

Prereq: **None**

ARCP355 Decoding the Stone Age: Analysis of Lithic Technology
Lithic (stone) tools are the oldest known type of human technology. They represent the most abundant and by extension one of the most informative components of the archaeological record for reconstructing ancient human behavior over the last 3.3 million years. In this course, students will learn the methodological and theoretical basics used by archaeologists working on the Stone Age. The course includes hands-on training in how to identify and analyze stone tools, qualitative and quantitative approaches, and interpretive frameworks that allow archaeologists to use stone tools to understand broader anthropological questions about the evolution and diversity of human behavior. Students will analyze actual archaeological assemblages from important Stone Age sites stored in the Wesleyan University Archaeology and Anthropology Collections. Through this, students will be exposed to elements of data collection protocols and research design in a collections setting. Further, students will design exhibits for the campus community that incorporate the collections and the data they produce.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ANTH356**
Prereq: **None**

ARCP360 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **IDEA206, ANTH360, STS363**
Prereq: **None**

ARCP380 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

ARCP390 Making Rome: Monuments of Life in Ancient Rome
The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

ARCP421 Undergraduate Research, Science
Advanced students in archaeology have an opportunity to work intensively with departmental faculty to contribute to a variety of ongoing faculty research projects. These collaborations offer the chance for students to refine their research skills, gain exposure to conservation and research methods outside the basic curriculum, and work towards tangible research outcomes. Such outcomes may include research posters, creation of online databases, contributions to published works, contributions to or solo exhibit designs, or senior essay/thesis projects. Faculty projects vary from year to year but currently include studies in Mediterranean palaeoclimate, lab-based scientific study and digital modeling of archaeological artifacts, organic residue or ceramic studies (Dr. Birney, the OpenARCHEM project), or museum research projects in the Wesleyan Collections (which comprise approximately 35,000 objects), cataloging and researching artifacts (Dr. Murray, Wesleyan Collections). Participation is POI only. Contact the Archaeology Program Chair for more information.

ART HISTORY (ARHA)

ARHA109 Introduction to Western Art I: Ancient to Medieval
This course introduces the art and architecture of the Western world during the ancient and medieval periods. The artistic traditions of the Near East, Europe, and the wider Mediterranean will be surveyed from the prehistoric era to ca. 1400 CE. Questions of style, content, function, and cultural and historical context will be examined alongside such perennial concerns as religion, rulership, social class, luxury, and the definition of art within its ancient and medieval milieus.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **MDST131**
Prereq: **None**

ARHA110 Introduction to Western Art II: Renaissance to Modern
This course surveys the development of European art from the Renaissance through the modern period. We will examine art's changing status within specific social and artistic contexts: from the Church and court of the Renaissance, through the formation of art academies in the late 16th century, to the development of an increasingly individualized artistic practice that led to the formation of an avant-garde. Classes will be organized chronologically and touch upon the following themes and ideas: politics, religion, and patronage; perception and experience; artistic identity and originality; relationships between artistic media; and the rise of a public sphere for art.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA127 Venice and the Renaissance
Venice -- a city built almost impossibly on a forest of stilts sunk into the mud of the lagoon and buttressed by powerful myths of divine origins, permanence, and prosperity - produced some of the most spectacular works of Renaissance art and architecture. This introductory-level course on the art and culture of Venice's "golden age" considers the works of artists such as Carpaccio, Bellini, Giorgione, Titian, Veronese, and Tintoretto, and architects such as Codussi, Sansovino, and Palladio in the context of the city's unique setting, social and governmental structure, cultural and political milieu, and larger geopolitical significance. It also positions Venice's artistic production within the broader framework of early modern Europe, exploring its connections with Byzantium and the Islamic world. The course also introduces students to key issues and methods of art history.

ARHA140F Van Gogh and the Myth of Genius (FYS)
This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist's own account of his career in his paintings and prodigious correspondence. Van Gogh's extensive, insightful, and fascinating writing begs the question of how one should treat an artist's statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886--1890.
Offering: **Host**

ARHA141 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of Impressionist, Neo-impressionist, and Symbolist painters before moving to the south of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

ARHA151 European Architecture and Urbanism to 1750
This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society's identity? What is the relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

ARHA161 Objects of Authority: Arts of African Royal Courts
This course will focus on African arts produced in courtly contexts between the eleventh and twentieth centuries. We will study domestic art objects that were integral to the exercise of power and authority in several African court traditions such as Benin, Ife, Kuba, Ashanti, Igbo, and others. Students will learn about formal qualities and thematic concerns that locate certain artworks exclusively within the royal lineage and monarchy. They will also come to understand how such artworks were deployed within chieftaincy circles to wield great spiritual and mystical power. Class readings and discussions will help us navigate questions of hierarchy and authority to transcend elitist narratives of power regarding African arts.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA162 History of African Art and Material Culture
This course offers an introduction to the rich and varied visual arts of Africa. By examining certain visual practices that evoke a distorted understanding of the continent, the course confronts stereotypes about the African continent. There will be an examination of compelling objects that represent a variety of African visual cultures, both historical and contemporary. The course offers evidence of a continent with a history to counter the idea that Africa is "frozen in time" and that African "traditions" never change. Weekly readings aim to provide a comprehensive overview of the art of diverse ethnicities to counter the notion that "Africa is a country" and "a continent in isolation."
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA172 Memory Image: Introduction to Art (as) History
One premise of art history is that works of art necessarily register or encode the time and place of their making. Some art practices, though, operate historically in more than an artifactual sense, whether by revisiting the art historical past through citation, or by actively responding to the socioeconomic, technological, or cultural conditions of their present. Works that comprise the focus of this class engage directly in the project of historical representation and research, recasting these activities through painting, photography, installation, and performance. Spanning a series of case studies from the 1960s through the present, this course provides an introduction to the practice of art history by way of recent works of art that have made the resources (and limitations) of historical methodology a subject of investigation. What is the role of art as a form of historical memory in an increasingly image-soaked world?
Offering: **Host**
Grading: **A-F**

ARHA175 Japanese Narrative Painting
The narrative handscroll (emaki) has been a major form of Japanese pictorial art from its origins in the eighth century. Characterized by a long, horizontal format designed to be unrolled and viewed in shoulder-width sections, the narrative handscroll combines text and image in a linear progression of time and space. This course will cover the historical evolution of the handscroll format, its inter-relation with the written word, as well as its artistic roots and subsequent impact. Special attention will be paid to the translation of the handscroll's narrative modes and imagery to large-scale painting formats, such as six-panel folding screens (byobu) and hanging scrolls (kakejiku). Among the questions to be considered are: What are the representational and narrative strategies that painters of narrative scrolls employ to tell their stories? How do we define the relationships between written text and visual image, and what roles do they play? What were the viewing practices for narrative scrolls, and in what contexts were they viewed and read? Through an investigation of a dozen masterworks, including the "Illustrated Scrolls of the Tale of Genji," "Illustrated Legends of Mount Shigi," and "Life of Saint Ippen," the course will familiarize students with the major modes--literary, hagiographic, historical, didactic--of Japanese narrative painting from the 12th through 18th century, as well as the major interpretive methods used by art historians to search for "meaning" in the visual arts--authorship, connoisseurship, formalism, iconography/iconology, semiotics, feminism, and social art history.

ARHA181F Mughal India: Introduction to the Practice of Art History (FYS)
Founded in northern India in the early 1500s, the Mughal empire was one of the largest centralized states in the history of the early modern world. During the two centuries of their effective rule over most of the Indian subcontinent, the Mughal emperors and their subordinates were prolific patrons of the arts, overseeing the production of lavishly illustrated books and picture albums and commissioning such architectural masterpieces as the Taj Mahal. This course offers an introduction not only to the art and culture of Mughal India but also to the practice of art history itself, through a sequence of six thematic units exploring and applying different methods that are central to the discipline. Each unit begins with critical reading and discussion of one or two key theoretical or methodological statements, then continues through application to case studies drawn from Mughal India. The units include (1) techniques of visual description and formal analysis, (2) the concept of style and stylistic analysis, (3) the analysis of meaning in visual images (iconography and iconology), (4) models of time and the historical explanation of change, (5) architectural and historical analysis of buildings and their sites, and (6) historiographic assessment of debates and changing interpretations within art history. Each unit culminates in a writing exercise designed to provide students with structured experience in some of the various modes of art historical writing. The course is appropriate as an introduction both to art history and to Mughal art.

ARHA201 Pyramids and Funeral Pyres: Death and the Afterlife in Greece and Egypt
This course explores the archaeology of death and burial in Egypt and Greece, from the royal burials in the pyramids at Giza, to the cremated remains of warriors in Lefkandi, Greece, to the humble burials of infants under house floors. Drawing upon a blend of archaeological, art historical, and mythological evidence, we will examine how the funerary practices and the very notions of the soul, the body, and the afterlife compare in these two societies. We will also explore how social class, gender, and ethnicity influenced those ideas. The course will also provide an introduction to archaeological theory and the interpretive strategies employed by archaeologists, art historians, and historians in the reconstruction of ancient societies.

Prereq: **None**

ARHA202 Art and Archaeology of the Bronze Age Mediterranean
This course is an introduction to the history, art, and archaeology of the Bronze Age Mediterranean. Throughout the semester we will explore the development of civilization and high society in the Aegean world (mainland Greece, the islands, Cyprus, and Crete), the rise of Minoan and Mycenaean palace power, the origin of the biblical Philistines, and, of course, the historical evidence for the Trojan War. We also look at the contemporary Near Eastern cultures with which these societies interacted, exploring the reciprocal exchange between the Aegean world and Egypt, Syria, and the Hittite kingdoms. For each period we will survey the major archaeological sites (civic and cultic), examine archaeological questions, and study the development of sculpture, painting, ceramics, and architectural trends in light of political and social changes.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST, SBS-CLST**
Identical With: **CLST201, ARCP201**
Prereq: **None**

ARHA203 Survey of Greek Archaeology and Art
This course introduces the art and archaeology of Greek civilization from Mycenaean palaces of the Bronze Age, to tombs of warriors and battlefields of Marathon, through the theatrical and political centers of democratic Athens. Throughout the semester we will survey the major archaeological sites (civic and cultic) for each period and study development of sculpture, painting, ceramics, and architectural trends in light of political (propaganda!) and social changes. More than a tour of monuments and mosaics, however, this course will show students how to interpret and apply literature, material science, anthropology, and art history to address archaeological questions, and to consider the relationship (ancient and modern) between social trends and material evidence.

This course counts toward the archaeology/archaeology science track.
Offering: **Crosslisting**

ARHA204 Off with its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase--as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating!) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit.

The course falls under the Archaeology/Archaeological Science track of the Classics/CCIV Major requirements.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CLST**
Identical With: **CLST283, ARCP285**
Prereq: **None**

ARHA205 Visualizing the Classical
This project-based learning course integrates archaeology, classical texts, and the technologies of virtual construction to rebuild the material remains of the ancient world. Student teams will draw upon theories of urban design, engineering, and performance theory to create a material or virtual reconstruction of a classical built environment or object. Through the reconstruction of such spaces, we will explore how the ancient builders and craftsmen--through landscape, sound, light, functionality/monumentality, and spatial relationships--shaped the experience of the ancient viewer.

The course is divided into three modules. The first module will use case studies to survey the principles of archaeological reconstruction and explore the concepts and language of design and planning used by archaeologists and design specialists. These case studies will range from Greek and Roman temples, to city blocks and houses, to public spaces for entertainment or governance. In the second module, a series of technology workshops and in-class projects will give students hands-on training in the analytical mapping, modeling, interpretive, and reconstructive approaches such as ArcGIS, CAD, Sketchup and 3D printing. This practical training will form the foundation for the third module, during which student teams will apply these technologies to collaborate on the reconstruction of an ancient built environment or object. During this section of the course, students will discuss and collectively troubleshoot the problems of design and reconstruction they encounter as they go. Students will present their work at the end of the course, and discussion will focus on the insight that the process of reconstruction has offered into principles of ancient design and the values of ancient communities.

This seminar will be of interest to students with experience in classical studies, archaeology, studio arts, and digital design.
Offering: **Crosslisting**

ARHA208 ¿Convivencia o conflicto?: Las tres culturas de la España medieval a través del arte (CLAC.50)
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual wellbeing. This Spanish-language section complements the ARHA 310 curriculum, by exploring the resonance between medieval experiences of identity, pluralism, appropriation, and exchange and our own uneasy attempts at building a multiethnic, multicultural society. This class will be conducted in Spanish. ARHA 208 is open to intermediate and advanced Spanish learners (SPAN 113 and above), bilingual students, and heritage speakers. Enrollment in ARHA 310 is optional but encouraged.

ARHA209 Mosque and Cathedral: Islam and the West, c. 600-1500
This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaic, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

ARHA210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

ARHA213 Cross, Book, Bone: Early Medieval Art, ca. 300-1100
This class surveys the art and architecture of early medieval Europe, from the decline of the Roman Empire and the multiculturalism of Late Antiquity through the glory of Byzantium, the rise of Islam, and the establishment of Germanic kingdoms in Northern Europe. Style, content, function, and historical context shall be examined across monuments of architecture, sculpture, mosaic, manuscripts, painting, and the luxury arts. Questions of religious practice, political messaging, and cross-cultural translation shall be threaded throughout, for example: How might one picture God? How might one build a house of worship or decorate a sacred text? How might one best picture a ruler? How were art and artistry defined in early medieval Europe? How might we see dialogue, overlap, and/or competition between the art and architecture of Islam and Christianity, among other religious traditions? The art historical periods

considered will include Late Antique, Byzantine, Umayyad, Abbasid, Migration, Insular, Carolingian, Mozarabic, Ottonian, and Viking art.
Offering: **Host**

ARHA215 Art Criticism
As a young critic, the art historian Hal Foster wrote: "I do not demystify the work which I discuss so much as I am demystified by it." Beyond criticism's primary object -- the artwork to be judged, rejuvenated, revealed -- what does it let slip about its own function as a social and cultural practice? This course will introduce students to art criticism while also attempting to understand the rapidly changing economic conditions that make it possible (or not). Students will be invited to write pieces of criticism on a range of media -- sculpture, photography, painting, print, video, and performance -- with assignments modeled on different genres of art writing (e.g., the exhibition review, the "critic's pick," the single artwork study, and the "hybrid" review-essay). The course will give students a chance to work closely with the Davison Art Collection and the Zilkha Gallery.
Offering: **Crosslisting**

Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT214, COL211**
Prereq: **None**

ARHA217 Building Nothing: Design After Progress
The built environment is responsible for over 40% of humanity's greenhouse gas emissions, but despite attaching words like "sustainable" and "resilient" to their products, design and construction practices remain fundamentally unchanged. This seminar considers the possibility of a design philosophy that doesn't take the goal of creation as a given. Topics include the lifespan of buildings and products, their maintenance and care, the unintended consequences of making, relationships with and obligations to materials and resources, and strategies for degrowth found in indigenous and vernacular design precedents. We read and discuss a key text each week that examines the history of technology and critically evaluates shifting theoretical perspectives on nature and human development as they relate to design.
Offering: **Crosslisting**
Grading: **A-F**

Prereq: **None**

ARHA219 Economies of Ancient Port Cities: Trade, Mobility, and Identity
This course explores urban life in ancient Mediterranean port cities, where harbors facilitated connectivity and long-distance trade and created cities that were defined by multicultural exchange and constantly reshaping identities. Through case studies drawn from Greek and Roman sites, the class will examine the lives of residents and port workers, focusing on themes such as trade, urban development, art, religion, food, and spectacle. With an emphasis on the archaeological material left behind, the course also explores how narratives about the past are shaped by the nature of surviving evidence.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CLST**
Identical With: **CLST338, ARCP338**
Prereq: **None**

ARHA220 Northern Renaissance Art
The Northern Renaissance, roughly ca. 1400-1600, was a period of thrilling transition in Europe and profound change for the Western tradition of art and architecture. For art history, the period's many paradigm shifts include the rise of oil painting, the spread of the printing press and print media, the growth of middle-class patronage, the Protestant Reformation, radical developments in the practice of portraiture, an increasingly global worldview and mentality, the foundations of what might be referred to as an art market, and a fundamental revision of the purpose and definition of both art and the artist. This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England. We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourgs, Campin, van Eyck, van der Weyden, Fouquet, Riemenschneider, Lucas van Leyden, Bosch, Dürer, Grünewald, Altdorfer, Cranach, Holbein, and Bruegel. Such a narrative will be equally enriched with less familiar and less canonical works. Threaded throughout are questions of mimesis, realism, skill, medium, and the growing cult of genius, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe.

ARHA221 Early Renaissance Art and Architecture in Italy
This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

ARHA222 Art and Architecture of Renaissance Florence
How did Florence rebound from calamitous plague to become the self-styled locus of the Renaissance? This survey of the art and architecture of Florence evaluates its cultural achievements against the improbabilities of their success. The city had negligible Roman history but championed the revival of classical antiquity; it was repressive but pushed the boundaries of representing gender and sexuality; its government slid from a republic to an absolute monarchy but fostered creative latitude; it spawned one of Italy's most popular religious zealots and popularized secular ideals; it had no empire but became a hub of global trade and knowledge transmission. To understand how this happened, we will study famous artists like Botticelli, Leonardo da Vinci, and Michelangelo alongside their lesser-known and even nameless contemporaries. Painting, sculpture, architecture, drawing, and printmaking will come alive in lectures and by discussing related texts in translation, recreating artistic techniques, and examining original Renaissance artworks in person.

ARHA223 Visual Worlds of Himalayan Religions
How do Tibetan Buddhists look at religious images? What do pilgrims in Nepal see when faced with sacred monuments? Why do devotees in Bhutan display erotic caricatures in public? This seminar will explore the ubiquitous role of images and imagining in the religious traditions of the Himalayan region. Readings and viewings will examine the painting, sculpture, architecture, and performing arts of the Himalaya (including Tibet, Nepal, north India, and Bhutan), placing them in the context of local religious beliefs, ritual practices, and literary canons. The seminar aims to understand how Himalayan cultures produce religious images and the ways of seeing that invest them with meaning. Classes will address specific modes of visual representation, the relationships between text and image, and the social lives of images, as well various theoretical and methodological approaches for their reading and interpretation. Particular attention will be paid to representations of Buddha Sakyamuni and visual expressions of his life.

ARHA224 Italian Art and Architecture of the 16th Century
In addition to key monuments of 16th-century Italian art and architecture, this course seeks to introduce students to some of the most important figures of the period: artists and architects--such as Leonardo, Michelangelo, Raphael, Bronzino, Titian, and Palladio; their princely and ecclesiastical patrons--such as Cosimo I de' Medici and Pope Julius II; and their critics and biographers--such as Giorgio Vasari and Ludovico Dolce. Our aim will be to understand the complex artistic and architectural landscape of the period against the backdrop of shifting intellectual and religious trends, including the Counter-Reformation. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

ARHA226 Global Rome: Art and Architecture in Early Modernity
Rome has long called itself the "head of the world," but in the early fifteenth century, it was a backwater. This course surveys the art and architecture of Rome as it reclaimed the papal seat, grew its population, witnessed their deaths amid an infamous sack, and then amassed singular power through the transoceanic expansion of Catholicism. The local particulars of Rome will be considered alongside its global history, situating the accomplishments of Raphael, Michelangelo, Caravaggio, Artemisia Gentileschi, Bernini, and others in relation to Rome's ties to Europe, Africa, the Americas, and Asia. Particular attention will be given to Rome's relationship to its ancient empire, as well as the roles of female artists and patrons in a city whose population skewed increasingly male. Students will study architecture, painting, sculpture, drawing, print, tapestry, arms and armor, jewelry, clothing, and ephemeral design, as well as period texts in translation.

ARHA228 Off with Its Pedestal! The Greek Vase as Art and Artifact
This course explores the dual role of the Greek vase -- as objét d'art and as material culture. The first half of the course will trace the origins and development of Greek vase painting from Mycenaean pictorial vases to the masters of Attic Red Figure, examining the painters, the themes, and (often titillating) subject matter in its social and historical context. The second half will focus on the vase as an artifact and tool for reconstructing social values and economic trends throughout the Mediterranean. We will look at rip-offs, knock-offs, and how much Attic pottery was really worth, and evaluate the use of pottery as an indicator of immigration or cultural imitation. The course will include work with 3D scanning and digital optimization, as well as the construction of a virtual museum exhibit. The course falls under the Archaeology/Archaeological Science track of the CLST Major requirements.

ARHA233 Art and Culture of the Italian Baroque
This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

ARHA239 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

ARHA240 Revolutionary France and the Birth of Modern Art, 1789-1900
This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. Themes this class explores include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution in France and its colonies; the redefinition of history painting in light of the abolition of slavery and the Declaration of the Rights of Man; the expansion of France's colonial empire and the representation of racial difference; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the destabilization of classicism in light of scientific discoveries and ideas of "primitivism"; and the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience. Although these developments took place two centuries ago, they continue to define the field of modern art today.

ARHA241 Introduction to European Avant-Garde, 1880-1940
This course introduces students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

ARHA243 American Modernisms, 1900-1945
Focusing on three case studies -- the Stieglitz Circle, the Harlem Renaissance, and Mexican Muralism -- this course examines the specifically pluralistic and diverse contributions of American artists to the development of modernism from 1900 through the Second World War. During this period, the United States began to be a terrain on which artists with roots in Europe, Africa, and the Americas developed advanced language in the visual arts and experimented with new mediums and formats for art. Topics we will explore include the relationship between art and industry in painting, sculpture, film, and photography; relationships between cosmopolitan and indigenous cultures; primitivism and its legacies; interrelationships between the visual arts, music, and poetry; constructions of gender and the emergence of the female artist; racial pluralism; and the articulation of hybrid American (and Pan-American) modernisms.

ARHA244 European Architecture and Urbanism, 1750-1910
This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include Neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

ARHA246 American Architecture and Urbanism, 1770-1914
This course considers the development of architecture and urbanism in the United States from the late 18th through the early 20th century. Major themes include the relationship of American to European architectures; the varied symbolic functions of architecture in American political, social, and cultural history; and the emergence of American traditions in the design of landscapes and planning for modern cities, especially Boston, New York, Philadelphia, Washington, D.C., Chicago, Los Angeles, and San Francisco. The course considers houses for different sites and social classes, government buildings, churches and synagogues, colleges, and commercial architecture of different kinds includes the origins of the skyscraper. Urban environments include cemeteries, public parks, streets, and civic centers. Discussion will be informed by recent historiography on race and the American built environment. Movements studied include neoclassicism, the Gothic and Romanesque revivals, the Chicago School, the Arts and Crafts movement, and the City Beautiful movement. Major figures studied include Thomas Jefferson, Benjamin Latrobe, Frederick Law Olmsted, Frank Furness, Henry Hobson Richardson, Louis Sullivan, the early work of Frank Lloyd Wright, Greene and Greene, Bernard Maybeck, Julia Morgan, and McKim, Mead and White.

ARHA249 "Public Freehold": Collective Strategies and the Commons in Art Since 1960
Art since 1960 has forged a contradictory alliance between the legal field of intellectual property and the expanded tradition of poststructural thought. Taking its title from conceptual artist Lawrence Weiner, this course navigates that contradiction via four units, each corresponding to a specific artistic strategy: appropriation, scoring, collaboration, and participation. Testing the limits of the signable, saleable, and stealable, such techniques have thrown traditional concepts of originality and possessive individualism into arrears while giving rise, quite paradoxically, to some of the most celebrated careers and widely reported lawsuits involving allegations of creative property theft. Do such maneuvers amount to specious self-aggrandizement? Or do they indicate a renewed search to locate, foment, and protect sources of creative invention?

The ever-expanding horizon of collaborative media access and increased pressures to enclose this new electronic commons have made such questions all the more urgent today.

ARHA250 Unsettling American Art, 1600-1900
This course examines developments in American art from roughly 1600 to 1900. Core objects in this class will range widely: quilts; maps; baskets; paintings across genres of portraiture, landscape, and still life; engravings; public monuments; daguerreotypes; and more. We will seek to understand the particular concerns and traditions animating objects across this heterogeneous span of materials, forms, and techniques. In so doing, we will also ask how artists and makers--including those whose names were never recorded--variously internalized, articulated, or examined the historical contradictions of their time, including the consolidation of settler colonialism and racial capitalism; rebellion, revolution, abolition, and civil war; industrialization and its ever-expanding and often violently lopsided acceleration of communication networks, labor relations, travel, and exchange; and the contested aim of defining a distinctively American aesthetic tradition in a land born of migration, encounter, forcible displacement, and polyphonic hybridization. Visits to area museums and collections will complement in-class work.

ARHA251 Artists Design Exhibitions
This course explores the history and theory of exhibition-making as an artistic form. We examine key episodes in the history of artist-designed exhibitions, focusing on major works since the 1960s with an eye to foundational case studies in the early- to mid-20th century. Our discussions will generate a working typology of the form's various modes and functions, tracking how artist-designed exhibitions have variously served as spaces of public debate and agitation, propaganda spectacles, didactic displays, activist interventions, and sites of aesthetic experimentation. Exhibition design's material supports and conditions have been just as disparate: room-scale interiors, polyform spatial sequences, distributed multiples, and outdoor installations on city streets. Across each of these divergent formats, exhibitions are distinguished by their shared potential to create what Walter Benjamin once described as "simultaneous collective reception." As Benjamin's phrase suggests, exhibitions constitute publics, and in this course special attention will be paid to the types of publics--and the types of subjects--that specific exhibitions and exhibition strategies presuppose.

What can the history of exhibition design show us about the new "curatorial condition" of everyday life, in which data specialists now curate information, an artisan cheese shop curates its merchandise, and anyone with a social media account curates a presentation of self? Artists central to this history, and to which this course attends, include: El Lissitzky, Marcel Duchamp, Charles and Ray Eames, the Rosario Group, the Independent Group, Hélio Oiticica, Marcel Broodthaers, Louise Lawler, Group Material, Fred Wilson, Philippe Parreno, Mark Leckey, and Camille Henrot.

ARHA252 Contemporary Art Since 1980
This historically rooted introduction to contemporary art sets an anchor around 1980 and moves through the major debates of the last 35 years. This period gave rise to a bracing range of historical transformations: a post-communist Europe; an economically prominent China; queer and antiracist activism; increasingly molecular degrees of technological mediation in everyday life; assymetrical consolidations of a globalized network of travel, communication, and capital; climate and refugee crises; and a state of seemingly perpetual war, to name only a few. This course attends to the changing vocabulary of approaches by which artists intervened in these conditions and positioned their work in relation to a longer view of the history of art. Far from a comprehensive survey, the course acknowledges the inherently recursive and unstable condition of contemporary art history, a field of research and inquiry defined as a work in progress. The course is nonetheless structured in a loosely chronological fashion, sequenced according to formal techniques that emerged as timely responses to specific historical moments (photographic appropriation, moving image projection, social practice, painting, institutional critique, web-based art, etc.). Our work throughout will attend to theoretical frameworks that have remained influential in recent practice (postcolonial, feminist, poststructural, etc.).

ARHA253 Art After 1945
This course examines artistic production in the United States between 1945 and 1980, with a primary focus on the United States. The historical conflicts of that tumultuous period presented new challenges for artists as they attempted, in their work, to respond to the "caesura of civilization" brought about by the Holocaust and World War II, to contend with the consolidation of postwar consumer capitalism and mass culture, and to situate their work in relation to the far-reaching social upheavals of the 1960s and '70s. Practices linked to the historical avant-gardes (such as abstraction, the readymade, Dada, and surrealism) echoed in these years as attention shifted from the canvas and studio to greatly expanded contexts of reception and public experience. The boundaries of the art object transformed in turn as artists developed new models of spectatorship to confront a world that had placed enormous pressure on traditional concepts of humanist subjectivity. Topics include New York School painting, pop art, minimalism, process art, conceptual art, performance, institutional critique, and site-specificity.

ARHA254 Architecture of the 20th Century
The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-aided design from the 1990s, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa. Major movements and architects considered include the Viennese Secession, the Bauhaus, Le Corbusier, Mies van der Rohe, Frank Lloyd Wright, Alvar Aalto, and Louis Kahn, among many others.

ARHA256 New York City: Architecture and Urbanism
This course considers the history of architecture and urban development in New York City from colonial times to the present. Emphasis is on major landmarks of each historic period, with attention to related planning, parks, land and water transportation, housing trends, and urban infrastructure. Conditions of settlement, growth, decline, and renewal will be examined from a political, economic, and social perspective in varied neighborhoods. Contemporary topics include neo-liberal policies for urban development, green buildings, gentrification, affordable housing, and planning for the city's future in the era of impending climate change. While the focus will be on architecture, every effort will be made to see built environs as points of intersection between competing ideals and interests that shape the city we see.

Gen Ed Area: **HA-ART**
Prereq: **None**

ARHA257 Just Cities: Architectures of Public Encounter
What is "the public," and how has it been conceived, relative to notions of the urban--to the web of ideas, forms, and fantasies constituting "the city"? Can art and architecture play a role in defining the public, or does the public's political and social construction place it outside the scope of specifically aesthetic concerns? This course addresses these and other related questions, positioning art and architecture in their broader cultural and historical contexts. It explores a range of socially charged, experiential, and participatory aesthetic and political practices, characterized by their distinctly public character and decidedly architectural and urban settings. At its core, it is concerned with issues of social justice as they relate to the material spaces of the modern city, and the manner in which those spaces are identified, codified, and made operative in the service of aesthetic, social, and political experience.

This course will be taught by M. Surry Schlabs, Yale School of Architecture.

ARHA258 Contemporary World Architecture
This course is a study of architecture and urban design throughout the world from the 1990s to the present. American topics include public and private development in the "neoliberal" city in New York, Chicago, Los Angeles, and post-Katrina New Orleans; contemporary museum architecture; sprawl and New Urbanism; and affordable housing. Major American architects considered include Frank Gehry, Richard Meier, Daniel Libeskind, and Diller Scofidio + Renfro. In Europe, the focus is on contemporary public architecture in Berlin, London, Oslo, Hamburg, Paris, Valencia, Lisbon, Rome, and Athens, with attention to major works of Sir Norman Foster, Zaha Hadid, Jean Nouvel, Santiago Calatrava, Rem Koolhaas, and Renzo Piano, among others. In China we will study state monuments of the Communist Party in Beijing and issues of preservation and urban development there and in Shanghai. In Japan the recent work of Tadao Ando, Kengo Kuma, and Shigeru Ban is a focus, as are selected projects by other architects in Tokyo, Yokohama, and Osaka. Additional lectures will treat airport architecture in Asia, and sites in India, Jerusalem, Cairo, Abu Dhabi, Guinea, South Africa, Nigeria, Rio di Janeiro, Chile, and Quito, Ecuador. The last quarter of the course focuses on green or sustainable architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling and ventilation, timber and rammed-earth techniques, LEED certification, wind and geo-exchange energy, green skyscrapers, vertical farming, and zero-carbon cities.

ARHA259 Currents of Post/Minimalism, 1960-1979
This course examines visual production made in North America between the 1960s and the 1970s with attention to Minimalism and its antecedents. Since its inception, Minimalism has been a measure and benchmark for twentieth century artistic practice. A primary focus will be artistic interpretation of form and to the challenges posed to its political exigency during a period marked by global warfare, new technologies, fierce protest, and economic shift. Each lecture will be anchored by a discussion of an artist whose practice will be the basis for course themes--energy, distance, education for example. With artists as our guides, we will revisit the development of the aesthetic boundaries, (sculpture, film, performance, institutional critique) which were asserted as well as challenged by attuning to exhibition histories and interdisciplinary practices. As this moment of artistic contribution is actively under consideration by curators of contemporary art, this course will also feature practical insight into the methodology and concerns of contemporary exhibitions dedicated to this period.
Offering: **Host**

ARHA262 Censorship, Culture Wars, and Controversy in Art
Art history is marked by various forms of state, community, or institutional censorship. Such events can be flash points in culture wars, as in the United States in 1989, when four artists--most of them queer--were denied funding from the National Endowment for the Arts after their work was deemed "obscene." Sometimes art that unearths sensitive cultural histories can lead to calls for destruction, as in Sam Durant's 2012 work Scaffold, which referenced state violence against the Dakota people, leading tribe members to protest what they felt was Durant's insensitive handling of the subject. Events like these raise key questions within art and broader society: Who should have the authority to decide which art should be exhibited, and to what audiences? What constitutes censorship? When might censorship, or the curtailing of speech, be justified?

This course will examine these questions focusing on the 20th and 21st centuries in the United States, but also global contemporary art. We will consider such issues in the wake of a recent spate of museum exhibitions canceled due to controversial content, the dismantling of monuments to colonialism and the transatlantic slave trade, as well as today's culture wars as conservative book bans make headlines and hate speech abounds. We will also explore new channels for arts funding, exhibition, and publishing that emerge in response to censorship. In addition to important texts by art historians including Sarah Parsons, Aruna D'Souza, and Rosalyn Deutsche, among others, we will also read interdisciplinary legal scholars like Sonya Katyal and Amy Adler who write from the perspective of law and policy. We will also read the landmark Supreme Court case NEA v. Finley. Assignments include an in-depth case study of a canceled exhibition.

ARHA263 Curatorial Workshop: Images of the Floating World
This course will provide students with practical training in the design and development of a gallery installation in the Davison Art Center (DAC). The theme for this semester is Japanese woodblock prints. We will carry out the many and diverse components involved in creating a gallery installation, from conception to execution, including concept development, catalog and label entries, accessibility, layout, and design. The course will culminate with an installation at the DAC, which will include an accompanying publication as well as permanent online catalog entries for individual prints on the DAC's website.

Images of the floating world, or ukiyo-e, refers to a genre of Japanese art that emerged in the 17th century to depict the pleasures of life of that period--beautiful women, famous kabuki actors, views of famous places, and erotic pictures, among other subject matter. In most cases, these are woodblock prints, images produced by craftsmen from woodcuts based on originals painted by artists. Because they could be produced quickly, cheaply, and in large numbers, woodblock prints were exceptionally well-suited for the representation of the latest fashions or politics. Ukiyo-e prints made their way to Europe in the 19th century and remain the most popular form of East Asian art in the West. The Davison Art Center has around 600 Japanese woodblock prints in its collection, ranging in date from the 17th to 20th centuries and including works from all the major artists of the Edo period (1615-1868).

ARHA263B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870
This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

ARHA263C Curatorial Workshop: The Northern Renaissance Print
The flourishing of the print medium in Northern Europe during the later 15th and 16th centuries is one of the defining hallmarks of the Northern Renaissance, as well as one of the most significant turns in the Western tradition in general. The rise of this medium rested upon the ca. 1450 development and spread of the printing press, which helped spark numerous episodes of historical consequence, including the Protestant Reformation, the spread of Italian humanism, and the continued rise of an increasingly literate, and increasingly image-hungry, middle class. Many of the most influential artistic personalities of the era, including Schongauer, Dürer, van Leyden, Altdorfer, Holbein, Cranach, and Bruegel, pushed this exciting new technology in multiple directions, many of which altered and impacted fundamental concepts of art, the artist, authenticity, and value. Wesleyan is fortunate to possess one of the foremost collections of print media in the country in the collections of the Davison Art Center. This Curatorial Workshop is structured around the study and first-hand examination of the DAC collection, and it will include a class-generated exhibition of Northern Renaissance prints.

ARHA264 Photography and Law: Mugshots, Privacy and Publicity, Obscenity, Copyright, and Evidence
This seminar is designed as an introduction to the major developments in the legal history of photography in transatlantic (US-UK especially) society from the first law cases involving photography in 1840 through to contemporary legal debates about such topics as cameras in the courtroom, sexting, surveillance, photographing police, dash cam and body cam videos, admissibility of photographs as evidence, obscenity and moral boundaries of subject matter, and copyright. A range of secondary historical and theoretical writings will anchor the discussions, but the course will focus primarily on student analysis and interpretation of primary and archival sources (texts of legal cases, law reviews and dissertation, news articles, and documentary and video footage). Students will gain knowledge of how legal history has shaped the history of photography, and new perspectives on the historical origins of contemporary issues in photography and digital imaging. This course should be of interest especially to history majors and non-majors who are interested in law, photography, and culture and will also contribute to the "Visual and Material Studies" module in History.

ARHA266 History and Core Ideas in African Photography: 1850s to the Present
This course explores the history of photography on the African continent from the mid-nineteenth century to the present. It focuses on the colonial experience, anti-colonial struggles, decolonial imagination, the materiality of the medium, gender, and the nature of modernist expressions provoked by the medium since the twentieth century. These themes are explored through a study of specific photographers, archives, concepts, and exhibitions.

ARHA267 Memorials, African Art, and the Burden of Remembering
Throughout history, Africans have preserved the memory of their loved ones through words chanted in songs such as Yoruba Oriki; images rendered in wood, concrete, and metal; and other means. This course explores the multitude of ways in which Africans have memorialized their dead from the 9th century BCE to the present. In Western commemorative paradigms individuals have written poems, books, or essays, produced paintings and sculptures, taken photographs, and recorded videos. In Africa, comparable modes of preserving the memory of the dead have included sculpted ancestral figures, memorial effigies, and potent power objects. For instance, the memory of the 98th king of the Kuba people in the Democratic Republic of the Congo (who was believed to have reigned during the solar eclipse of 1680) was preserved in the sculpture of Shamba Bolongongo, while a mask named mwaash a mbooy memorialized the son of Woot, the iconic ancestor who married his sister, Ngaady a mwaash and founded the ruling Kuba dynasty. In Luba society, visual memory devices such as lukasa have been deployed to trigger memories of past heroes and their exploits during a ritual ceremony known as Mbudye. In Yoruba society, Ibeji figures have preserved the memory of the late twins, while Dogon sculptures have been used to embody the soul of the deceased. Through weekly readings and lectures, this course will examine these commemorative objects by focusing on their formal qualities and thematic usage in African art over the centuries. The course is divided into two segments. The first segment deals with pre-colonial modes of preserving the memory of the dead, such as sculpted ancestral figures, memorial effigies, masks and masquerades, and potent power objects. The second segment deals with contemporary forms of memorialization through museums, monuments, commemorative art, among others, in Africa from the 19th century to the present. Through weekly readings and lectures, the course will examine these commemorative objects by focusing on their formal and thematic qualities, as well as the larger political questions surrounding their production, usage, and survival in Africa over the centuries.

ARHA268 African Avant-Garde: Contemporary African Art in a Global Dialogue, 1900 to the Present
This course provides an introduction to modern and contemporary art produced by Africans on the continent and in the diaspora. Africa is famous for its dynamic wood and metal sculptures that played a vital role in launching the modern era in Western art. While Pablo Picasso, George Braque, and Henri Matisse were studying African masks and figurative sculpture, African artists such as Aina Onabolu, Gerard Sekoto, and Kofi Antubam, among others, were beginning to experiment with new idioms of visual expression introduced from Europe. Professional schools of fine art were established in urban centers across the continent as part of the colonial project. Thus, an African avant-garde was born. African artists have been contributing to global visual dialogues in contemporary art; they participate in major biennials, and some have become superstars in the international art world. The work of artists such as Julie Mehretu, Yinka Shonibare, Ibrahim Mahama, and El Anatsui is collected by museums all over the world. This course traces the development of African art during the twentieth and twenty-first centuries, exploring the lives of artists as well as the national and global contexts in which they have worked and in which their art circulates. Class meetings will include lectures and discussions organized around reading assignments and video screenings.

ARHA269 History of African American Art
This course will introduce students to a history of African American artistic production from the late 18th century to the present, in a range of media and styles. While we will focus primarily on the visual arts--looking at sculpture, painting, photography, collage, film, performance, and installation--we will also consider the deeply interdisciplinary nature of Black cultural production, highlighting the important role of music, poetry, dance, and theater.

We will explore how African American artists, both individually and collectively, have negotiated the terms made available to them by cultural institutions, whether by struggling for inclusion, acknowledgement, and validation; actively protesting racist and exclusionary policies; or by forming alternative institutions, communities, and spaces in which to work and share support. From the Harlem Renaissance to the Black Arts Movement and "post-Black" exhibitions, art works will serve as a primary source to ask, is there such a thing as a "Black aesthetic" and if so, how would one define it? Why might an African American artist reject such an idea? Other key questions will include: What is the role of visual representation in political struggle? How have artists mobilized portraiture as a tool of liberation? What does it mean to turn away from figuration, toward abstraction or opacity? How have artists grappled with questions of nationhood, belonging, and diaspora?

Together, we will trace how artistic forms, techniques, and motifs have served both as sites of collective history and as speculative propositions to envision new futures, articulating what Robin D.G. Kelley calls "freedom dreams."

ARHA276 Eccentricity, Gender, and Occidentalism in Edo-Period Art (1615-1868)
The course will explore the history and artistic production of Japan's Edo period (1615-1868). This was a time of unprecedented peace, a time of social, economic, and political change that brought new modes and manners of visual expression and a sharpened focus on the individual artist. New trends in artistic identity emerged during this period, particularly those related to eccentricity, gender, and Sinophilia (love of Chinese culture). We will study the major artists and artistic movements of the Edo period, considering how these new trends found expression in the works of art produced during this time. Formal examination of the material and expressive qualities of works of art will be followed by a consideration of how other factors such as location, social background, education, and the religious faith of the artist are visible in the works they produced. The interplay between historical and artistic movements will be examined through discussion of issues such as materiality and medium, patronage and individuality, and traditionalism and poetic expression. Students will become familiar with the various media employed by Japanese artists, the techniques of painting and printing, and the sources and theories that inspired the innovative objects under investigation. More broadly, this course aims to teach students how to "read" Japanese art, how to look at a work of Japanese art and understand what it is they are seeing.

ARHA279 Arts of China and Japan: From Shang Bronzes to Erotic Woodblock Prints
The course will introduce students to the visual arts of China and Japan, focusing on painting, sculpture, and the decorative arts from the Bronze Age through the early modern period. We will study key moments in the history of Chinese and Japanese art and the major works that distinguish these moments. The works will include Shang Dynasty bronze vessels, Buddhist art, early calligraphy and figure painting, narrative handscrolls, landscape painting, and popular art. We will apply different critical and analytical methodologies to our study and will pay close attention to social, political, religious, and cultural contexts of artistic production.

ARHA281 Modern Japanese Art
This class is an introduction to the history of Japanese art from the mid-nineteenth century to the present. In this chronological study we will encounter a range of forms--woodblock prints, painting, photography, sculpture, performance, and new media--and we will consider how Japanese artists responded to major societal, political, and economic changes over the last two centuries, including industrialization and modernization, major natural disasters, war, questions of cultural/national identity, and debates centering on what "tradition" meant to artistic practice in the modern and contemporary eras. Using visual analysis as our core skillset, this course will also rely on readings from secondary scholarship, as well as those by Japanese artists and art critics from each time period to help us better understand the historical contexts surrounding each artist, artwork, or art movement.

ARHA284 Buddhist Art and Architecture
Visual imagery plays a central role in the Buddhist faith. As the religion developed and spread throughout Asia it took many forms. This class will first examine the appearance of the earliest aniconic traditions in ancient India, the development of the Buddha image, and early monastic centers. It will then trace the dissemination and transformation of Buddhist art as the religion moved north and then east through Central Asia, China, Korea, and Japan. In each region indigenous cultural practices and artistic traditions influenced Buddhist art. The class will address topics including the nature of the Buddha image, the expansion of the Buddhist pantheon, the function and reception of Buddhist images, the political uses of Buddhist art, and the importance of pilgrimage, both in the past and the present. Over the course of our study, we will consider four important movements in Buddhist practice: Mahayana, Pure Land, Esoteric, and Zen.

ARHA285 Art and Archaeology of Ancient India
This course is an introduction to the art and material culture of ancient India, from prehistory through the formation of the classical tradition in the fourth century CE. The broad swath of human experience covered necessitates a thematic approach, focusing on key moments, cultures, object types, and methodological approaches, arranged in a roughly chronological fashion. Thematic units may vary somewhat from year to year, but are likely to include: the meaning and use of the carved stone seals of the Indus Valley civilization; the impact of the Vedic Aryas on the development of Indian ritual and imagery; how to read the iconographic language of the "plant and animal style" in decorative sculpture; the meaning and significance of the Asokan pillars; and the architecture and ritual of Buddhist monastic life in the cave monasteries of western India.

ARHA286 Empire and Erotica: Twenty-three Masterworks of Indian Painting
The history of later Indian painting (16th--19th centuries) is dominated by two distinct stylistic traditions, one flourishing at the court of the Mughal empire, the other at the courts of the various Rajput dynasties that held sway in regions along the periphery of the Mughal domain. The course introduces these two traditions through in-depth consideration of twenty-three representative masterworks, paintings that demand sustained close examination to fully unpack their content, their aesthetic dimensions, and the historical milieu in which they were produced and received. The first half of each session is devoted to a collective "close looking" at one of the key paintings (in the form of a high-resolution digital image), which then leads into broader discussion of related works and larger interpretive themes. Topics to be considered include the historical connections between the Mughal and Rajput schools; the relationships

between painting, poetry, and music; the concerns of natural history painting; and the manner in which both Mughal and Rajput artists appropriated formal conventions from 16th century European prints and paintings. No previous knowledge of Indian art or the methods of art history is assumed or needed to succeed in this course.

ARHA287 Islamic Art and Architecture
From merchant mosques in China to paintings of lovers exchanged in the urban squares of Iran, Islamic visual culture encompasses a vast geographic and cultural span. What holds this large and diverse corpus--elite and common, religious and secular--together in this class is an interest in how works of art interact with their communities. This course is an introduction to the art, architecture, and material culture of the Islamic world, from its beginnings in the seventh century, with an emphasis on the premodern periods. Our thematic approach will cover questions of interfaith exchange, race and slavery, and gender and sexuality. We will study manuscript paintings, calligraphy, mosques, palaces, pottery, lacquer, and metalwork.

ARHA289 Art, Wit, and Might in Islamic Courts
How do artists, patrons, and audiences negotiate power and aesthetic pleasure? This course examines the art produced for courtly elites between 1300-1800 in the Islamic world. In recent years, scholars have increasingly relied on the term "Persianate culture" to describe a set of literary texts, bodily practices, and codes of conduct shared in courts across the Islamic world. Our focus will be this shared courtly culture, supplemented with comparative cases from other parts of the world. We will study luxury objects, poetry, architecture, illustrated manuscripts, customs of dining, princely collections, and objects of sensory pleasure to understand how courtiers fashioned identities, and how the arts shaped courtly societies. Readings include primary sources and influential secondary texts from art history, literature, and the social sciences.

ARHA290 Mahabharata and Ramayana: The Sanskrit Epics and Indian Visual Culture
This course explores the complex interface between literary texts, painted illustrations, and visual performance traditions in South Asia, taking as our primary focus the two great Sanskrit epics, Mahabharata and Ramayana. Both epics will be read in abridged translation to provide familiarity with the overall narrative structure and thematic concerns of the two texts, and a number of excerpts from unabridged translations will be studied in detail to arrive at a fuller understanding of the contents of key episodes and of the style and texture of the two works. The first part of the course addresses a series of questions pertaining to the literary versions of the two epics: What is epic as a genre, and what are its social roles? Do the Mahabharata and Ramayana manifest similarities that permit us to identify a distinctive Indian epic type? What are the connections between these epics and the early history of India? Why, and how, did the written texts we have today come to be redacted from bodies of oral tradition? In the second part of the course, we will consider the visual manifestations of the Sanskrit epics in the form of painted manuscript illustrations, classical Sanskrit plays (known literally as "visual poetry"), later performance traditions such as Kutiyattam, and, finally, selected films of the Hindi- and regional-language cinemas. This course requires no prior knowledge of Indian literature, history, or art and may serve as an effective introduction to the culture and civilization of South Asia.

ARHA292 Archaeology of Food, Trade, and Power in South India
This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life--agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority--as well as historical events and processes that brought change to those patterns. The course capitalizes on South India's rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.

ARHA293 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds--also known as coin hoards--provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard, the numbers in which they occur, and the spatial patterning of their findspots: all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value.

In this hands-on course, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

ARHA294 Art and Revolution in Modern and Contemporary Middle East
This course examines the intersection of art and politics in the Middle East from the late nineteenth century to present day. From the fall of empires to the rise of nation states, the modern period left a particular legacy in the Middle East. Artists in the Middle East have responded to the complex dynamics of Westernization and Orientalism, created avant-garde movements, and negotiated the tensions between the traditional and the new. For their part, governments -- whether democratic and authoritarian -- have sought to create or erase a national image, whether in the Republican Ankara, post-Islamic Revolution Tehran, or in the West Bank. Focusing on painting, sculpture, architecture, and mass media, this course offers students critical tools to analyze art's relationship to identity, war, gender, and museology.

ARHA295 Critical Race and Art History: Theories and Methods
How does the study of art shift if we begin with questions of race, power, and colonialism, rather than treating them as secondary? Concepts such as mastery, familiarity, strangeness, taste, and beauty are formed by conditions of domination and subjugation. Moreover, the histories of material production and cultural expression are fundamentally entwined with the circuits of enslavement, forced migration, and the extraction of resources, people, goods, and "styles."

For the bulk of the semester, we will focus on a series of case studies drawn from the 15th to 20th centuries, a period of intense European contact and conquest in Africa, Asia, the Caribbean, and the Americas. Topics will include: representations of Africans in Renaissance Germany; African depictions of the Portuguese circa 1492; the appearance of parrots, kraak (Chinese) porcelain, and other goods from "exotic" locales in 17th-century Dutch still lifes; the taxonomies of racial difference in Spanish casta paintings; debates about sculptural polychromy and the "whiteness" of marble; the relationship between expansionism, empire, and the genre of landscape; "primitivism" and European artists' "discovery" of African artistic forms; the critical interest in "racial art" in the interwar U.S.; and contemporary conversations about museums and restitution, among others.

Throughout, works of art are primary sources with which to study the specificities of periods, places, and their social arrangements. While we will emphasize difference and historical contingency, our longue durée approach will enable us to draw connections about art's role in processes of primitive accumulation, dispossession, and racial capitalism.

ARHA301 Making Rome: Monuments of Life in Ancient Rome
The Colosseum, the Circus Maximus, and the Forum are just the most famous monuments to adorn the ancient city of Rome: its streets and temples were cluttered with honorific statues, dedications, and inscriptions; monumental fountains marked the terminus of the great aqueducts supplying the city and its public baths; shops and markets jostled with shrines and workshops in the public plazas; and public works like harbors and warehouses ensured a steady flow of food, wine, and materials into the city. Through in-depth research into the literary and archaeological record of Rome students will examine these monuments in the context of their original urban spaces and reconstruct them digitally or through other visual and written media.

ARHA310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why "convivencia" ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

ARHA311 The Body in Medieval Art
Medieval thinkers theorized the body in ways vastly different from how human bodies are conceptualized and defined today in the twenty-first-century West. Indeed, the "medieval body" was not at all a stable or monolithic entity, but rather a shifting constellation of ideas and practices that waxed, waned, and coexisted throughout the European Middle Ages, ca. 400-1400. The diversity of medieval attitudes toward the body helped inform its representation in art, which, simultaneously, was also dependent upon conventions of craft, medium, artistry, preciousness, and style. "Body" signals not only earthly bodies -- sexed, fleshly, corruptible, and soon to decay -- but also the soul (whose well-being was equally fragile), as well as heavenly, angelic, and divine bodies, including that of Christ. This course analyzes medieval strategies of representing these bodies while situating them in their respective intellectual and cultural environments. Primary-source materials will be contextualized by secondary literature, and our inquiries will remain cognizant of gender-, sexuality-, race-, and performance-critical methods. The bodies examined will include, and are not limited to, saintly, gendered, racialized, clerical, monstrous, virginal, heretical, sickly, healthy, courtly, resurrected, and uncircumscribable bodies.

ARHA312 Medieval Manuscripts
Medieval manuscripts were dense, considered gatherings of text and image, and they are among the richest of artifacts bequeathed to us by the Middle Ages. Manuscripts both crystallized and intervened in many of the key intellectual, religious, and aesthetic foundations of medieval Europe. To step into a luxurious medieval manuscript--into its script, its miniatures, its marginal decoration, its scribbles, its little monsters and unexpected grotesques, its tears and signs of use--is to probe a particular artform, distinct to pre-modernity, in which the definition of painted image and written word differed markedly from later centuries of the Western tradition. Throughout, basic questions of the relationship between text and image, and the linguistic and the pictorial, repeatedly beg attention. How were these books made, who used them (if they were used at all), how did the reading process unfold in the medieval period, and how did pictorial decoration assist in revealing--or, perhaps, obscuring--truth? These questions, and more, will inform this seminar's systematic inquiry of the making, function, and layout of the medieval book, from its Late Antique origins to the 15th century advent of printing.

ARHA325 Eloquent Forms: Topics in Italian Renaissance and Baroque Sculpture
Early modern Italy was a site of vibrant and far-reaching innovation in the plastic arts. Driven by intense artistic competition, sustained by lavish patronage, and produced for religious, commemorative, and decorative purposes in both public and private settings, sculpture reached an unprecedented peak of creative ambition, material experimentation, and theoretical reflection during this period. From monumental urban commissions such as fountains to small-scale precious objects prized by elite collectors, sculptural works profoundly shaped the visual and sensory worlds of early modern Italy. This seminar explores the making and meaning of sculpture in the Renaissance and Baroque periods through close engagement with the works and careers of key artists, including Lorenzo Ghiberti, Donatello, Andrea del Verrocchio, Niccolò dell'Arca, Francesco Laurana, Properzia de'Rossi, Michelangelo, Benvenuto Cellini, Giambologna, Leone Leoni, Gianlorenzo Bernini, and Alessandro Algardi, among others. Readings and discussions are organized around thematic issues such as the making and viewing of early modern sculpture; the rhetoric of sculptural materials; verisimilitude and animation; sculpture and the senses; fragmentation and the non finito; touch, desire, and the nude; representations of force and violence; antiquarianism and collecting; tombs and sculptural commemoration; and monsters and monstrosity in garden sculpture.

ARHA335 Art and Society in Ancient Pompeii
Buried by the eruption of Mt. Vesuvius in 79 AD and rediscovered in the mid-18th century, the once ordinary city of Pompeii is now an extraordinary laboratory for the study of ancient Roman life. This seminar surveys the art, architecture, and material remains of Pompeii and other cities destroyed by the eruption. Through readings, class discussions, and student research presentations, we will explore the ways in which this material can be used to study the political, social, and commercial life of a small Roman city and examine the unique evidence for reconstructing the private lives of Roman citizens. This course fulfills the Archaeology and Archaeology Science track of the Classical Studies major.

ARHA338 Bauhaus: Art, Craft, Design
This seminar examines the theory and practice of the Bauhaus, the most influential art school of the 20th century. The Bauhaus proposed a radical concept: to reconstruct the material world of war-torn Europe to reflect principles of unity in the arts and within all world cultures. In the 15 years of its existence, from 1919 until 1933, the Bauhaus underwent many changes, including moves from Weimar to Dessau and Dessau to Berlin, as well as the reorientation of its curriculum away from craft and towards industrial production. Throughout, its activity was defined by a series of tensions, between fine and applied arts and between form and function. Attracting men and women from Western and Eastern Europe, the Americas, and East Asia, the Bauhaus adopted an international and gender-inclusive orientation from the beginning, even as gender inequalities persisted. After the school's forced closure in 1933 by the National Socialists, many of its teachers and students left Germany to found art schools throughout the globe, and its core principles continue to shape art pedagogy and practice today, above all its a commitment to experimental learning in de-hierarchized workshops. This course will examine the origins, core products and theories, and afterlife of the Bauhaus.

ARHA339 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

ARHA352 Energy and Modern Architecture, 1850-2020
This seminar explores the evolution of mechanical systems for heating, ventilating, and cooling in modern architecture from the mid-19th century to the present. The aim is to show how architects, engineers, fabricators, and urban governments worked to develop modern systems of environmental controls, including lighting, as means of improving both the habitability of buildings and health of their occupants. The course will trace the adaptation of technical innovations in these fields to the built environment and how those responsible for it sought to manage energy and other resources, such as funds and labor, to create optimal solutions for different building types, such as factories, theaters, assembly halls, office buildings, laboratories, art museums, libraries, and housing of various kinds, including apartment buildings for higher- and lower-income residents. An important theme will be the relationship of energy systems for individual buildings and urban infrastructure, including water systems, electrical, and other utilities. The last part of the course focuses on contemporary green, or sustainable, architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling, LEED certification, wind and geo-exchange energy, green skyscrapers, net-zero energy buildings, vertical farming, and zero-carbon cities in the United States, Europe, and Asia.

ARHA355 Concepts in Contemporary Art
In this interdisciplinary seminar and studio course, we explore key concepts in contemporary discourse across a range of forms, genres, and disciplines. How do works of art respond to and reframe central debates in the wider culture? In what ways do the theory and practice of art supplement or contradict each other? How does research function within the context of art historical study and contemporary artistic practice?

To contend with these questions, students develop a series of projects over the course of the term in response to specific conceptual prompts. These investigations may take the form of studio-based work or written scholarship depending on student interest and will culminate either in a final research paper (for those registering for Art History credit) or a final project in any medium (for those registering for Art Studio credit). Along the way, we study artworks, literary texts, works of social theory, art historical scholarship, films, popular culture, and other objects to ground our research. Parallel activities may include conversations with artists and art historians, methodological workshops, site-visits, trips to museums, and archival research.

Since the course's aim is to cultivate unexpected collaborations, cross-disciplinary encounters, and new ways of conjugating the history, theory, and practice of art, the final portion of the semester will focus on the organization of a collective exhibition, event series, symposium, publication, or other expanded curatorial endeavor. The course meets Fridays 12:30 pm-5:30 pm, with a break during that interval. Class time may on occasion include individual meetings and independent work.

ARHA360 Art and Ecology, 1960s to the Present
This seminar examines the place of ecological thinking in modern and contemporary art since the 1960s. Through a series of case studies, we will explore a range of approaches, from works investigating systems of interconnecting flows binding the living and non-living, to interventions that more directly confront ecological destruction and climate emergency. Projects of activist immediacy will be considered alongside works of more distanced aesthetic experimentation, across a range of modalities including lens-based media, performance, painting, site-specificity, and sculpture.

ARHA364 Architecture: Historiography, Theory, Criticism; Traditional and Contemporary Approaches
This seminar -- intended primarily for majors in history of art and architecture, for studio majors concentrating in architecture, and students interested in urban studies -- surveys different methods of studying architecture and its history. Emphasis throughout is on comparison of general theories of interpretation in art history and other disciplines and their application to specific works of art and architecture. Topics include monumentality and collective memory, stylistic analysis, philosophical aesthetics, iconography and semiotics, patronage and ideological expression, structural technology and building process, material culture and consumption, vernacular architecture and cultural landscapes, spatial form, urban landscapes, sociology, and affordable housing. Along with colonial, postcolonial, and decolonial studies of architecture, the seminar incorporates feminist architectural history and theory, energy studies, race and histories of modern architecture, and questions of canon formation and canonicity.

ARHA367 African Modernism and the African American Diaspora
This seminar will examine the relationship between African art and the Black diaspora, especially in the United States. We will look at the crosscurrents of artistic ideas and the impact of artists' ongoing travels between Africa and the United States during the twentieth and twenty-first centuries. The seminar will investigate how these exchanges gave birth to a robust intellectual movement and artistic pan-Africanism in the United States and beyond. By juxtaposing the works of a range of artists such as Jacob Lawrence, Aaron Douglas, Ben Enwonwu, Skunder Boghossian, and others, the course will propose an alternative reading of the transnational, transatlantic aesthetic sensibilities that informed these artists' works during the post-WWII period and their wider impact on African modernism.

ARHA379 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage
This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity

of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel. Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

ARHA381 Relic and Image: The Archaeology and Social History of Indian Buddhism
This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

ARHA382 Numismatics and the Archaeology of Money
In many parts of the world, lost coins numbering in the millions lie buried in the ground. Periodically, some of these coins come to light in the course of plowing, digging to repair a water main, or prospecting with metal detectors. These "treasure-trove" finds-also known as coin hoards-provide the archaeologist of money with rich evidence of how money was actually used in pre-modern times. Which coins occur together in a hoard; the numbers in which they occur, and the spatial patterning of their findspots all speak volumes about pre-modern economies, circulation patterns, and beliefs about money and value. In this seminar, we explore the evidence of coins and coin hoards, studying them from numismatic perspectives (the images and legends on a given coin type, metals used, weights, fabric), metrological and denominational perspectives (what coins reveal about systems of weights and denominational structures), and statistical approaches (for example, studying patterns of weight loss as indicators of the velocity of circulation and degree of monetization in a given society).

ARHA385 The Indian Temple
The temple (devalaya, "house of god") was the unparalleled building type in South Asia from the fourth through fourteenth centuries, and it is still of great importance today. This seminar examines the type from an interdisciplinary perspective, considering theological and ritual dimensions, matters of design and style, programs of decorative sculpture and painting, and the economic and political functions these buildings and institutions carried. Sessions will be arranged thematically, but we will also be concerned with processes of temporal change. No prior knowledge of temple architecture or Indian history and religion is assumed.

ARHA387 The Persian Illustrated Book
From comic books to Magritte's "This is not a pipe," there are numerous ways texts and images connect. Do images and texts "speak" differently, or can they be in sync? In this seminar, we turn to fourteenth- to seventeenth-century illustrations of a body of Persian literary masterpieces, among them Ferdowsi's Book of Kings and Nizami's Quintet. Our discussions will focus on artistic media and translation: What can an artist's illustration choices tell us about their reading of the text? What happens when a literary work moves from book to picture, culture to culture, painting to vessel? Students will get hands-on experience with rare books.

ART STUDIO (ARST)

ARST131 Drawing I
This introduction to drawing gives special attention to the articulation of line, shape, volume, light, gesture, and composition. A variety of media and subjects will be used, including the live model. This course is suitable for both beginners and students with some experience. Individual progress is an important factor in grading. The graded option is recommended. Full classroom attendance is expected.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST171 Design Lab
Design Lab is an introduction to design representation and production methods, focused on the integration of design software, model-making, and portfolio instruction with the introductory design studios. This course is to be taken concurrently with ARST 220, ARST235, or ARST270.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST190 Digital Foundations
This course introduces the foundations of digital art through contemporary artistic practice. Students will research the history of digital art and examine relationships of digital media and contemporary art. The class has a theoretical focus on machine use within the process of art making while building foundational digital skills. Projects will focus on four key areas including: Digital Imaging, 3D Modeling and Virtual Design, Time Based Media, and Digital Fabrication. Building on these four areas the course will culminate in an individualized research based final project and presentation. Through experimentation, critical analysis, critique and peer review; students will generate a unique portfolio of digital art works.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA190**
Prereq: **None**

ARST190Z Digital Foundations
This introduction to the digital studio engages software and electronic media as an expanded field of creative production in contemporary art and design. Through a sequence of workshops, exercises, and hands-on digital projects, students will develop their critical and creative toolkits and learn to conceive, refine, and present original work. Open to all skill levels, this course prioritizes sustained and rigorous engagement with digital practice as well as conceptual and formal problem-solving.

Workshops in image manipulation, compositing, motion graphics, and visual communication will be led synchronously online by the instructor. This will be complemented with weekly online studio sessions, discussions, screenings, and reviews. Students will be provided access to all course materials using Google

Drive and other digital platforms. Access to Adobe Creative Cloud software will be provided by Wesleyan, but individual licensing is also encouraged. Course assistants will offer peer mentoring and technical support in person through the DDS and online through Zoom.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**

Prereq: **None**

ARST220 Ecological Design I: Being at Home in the World
Being at Home in the World is an introduction to the skills and thinking involved in the ecologically responsible creation of objects. This course is intended to provide a foundational understanding of the language of design, sources of materials, and energy systems. The studio encourages students to develop a rigorous, iterative working method to deeply analyze the nature of land and resources, explore options, and test ideas. This process of making is complemented and supported by an introduction to the history and theory of design, training with techniques and equipment, and active practice in keeping a sketchbook. Early exercises and projects in the course build familiarity and confidence with analytical drawing, making, and modeling techniques, which build toward the creation of a novel piece of design work presented at the final review.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ENVS232, IDEA120**
Prereq: **None**

ARST221 A Thousand Years of Iteration: Design for an Uncertain Future
The climate emergency is a product of design. Centuries worth of aesthetic and industrial innovation have created extractive infrastructure, efficient machines, and disposable products that make it increasingly easy to consume energy and resources on a global scale. As new conversations about just transitions, a circular economy, and a Green New Deal have begun to proliferate among designers, the discipline's troubled relationship to notions of "progress" remains largely unquestioned.

This reading- and research-intensive studio asks students to examine this history of technology and to critically evaluate shifting theoretical perspectives on nature and human development as they relate to design. Topics will include the lifespan of buildings and products, relationships with and obligations to materials and resources, and strategies for de-growth in indigenous and vernacular design precedents. These will be studied through assigned readings and in-class discussion, a series of design exercises, and the production of a final project from materials immediately at hand in Middletown.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA221, ENVS227**
Prereq: **None**

ARST229 Community-Based Public Art: Mosaics on Main
In this course, students will have the opportunity to work directly with an ongoing major community art project in Middletown called "Mosaics on Main/ Tunnel Vision." The course will include an overview of this project as well as research into other public art installations. Technical skills introduced in the course will include mold making, mosaic tile setting, and design strategies for large scale works. There will be field trips to local public art installations as well as Middletown City Hall to meet with members of the Middletown Commission on the Arts. Students will learn about finding funding sources and will review existing grants and grant opportunities. This is a hands-on course that will involve working with members of the Middletown community.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST233 Studies in Computer-based Modelling and Digital Fabrication
This course operates at the intersection of design and production, introducing students to digital tools critical to contemporary architecture and design. Throughout the semester, students will develop a series of projects that fluidly transition between design, representation, and fabrication with an emphasis on understanding how conceptual design interfaces with material properties. The course will offer a platform for students to research, experiment, and, ultimately, leverage the potential of digital tools toward a wide array of fields and disciplines. Students will be expected to utilize the Digital Design Studio's resources, including 3D printers, laser cutter, and 4-Axis CNC mill, as well a selection of fabrication equipment housed in the school's metal and wood shops to represent, model, and realize a series of design projects.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA233**
Prereq: **None**

ARST234 Xerox Dreams
This course will explore the histories and methods of making zines, investigating the strategies of quantity and dispersion. Students will learn about the processes of making a democratic multiple through processes such as silkscreen and digital printing. To spark inspiration and develop artistic values, we will learn about contemporary and historical independent presses, artists, and communities who use zines as an essential mode of expression. We will examine the ways the form of the multiple has allowed artists and activists to share ideas with fewer overhead costs and without permission, bypassing institutional gatekeeping, surveillance, and censorship. Later in the semester, we will challenge our understanding of form, function, and artistic authorship by making wearables and working collaboratively.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST235 Architecture I
This course is a synthesis of fundamentals of design principles and introduction to design vocabulary, process methodologies, and craft. Emphasis is placed on developing students' ability to examine the relationship between production (the process of creating things) and expression (the conveying of ideas and meaning) involved in the making of architecture. The intent of the course is to develop students' awareness and understanding of the built environment as a result of the investigations, observations, and inquiries generated in the studio.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA234**
Prereq: **None**

ARST236 Fast & Furious
Fast and Furious is a class which explores the power of the multiple through the production of zines, posters, t-shirts, tote bags, pins and more. Beginning in the 1930s, the production of zines mainly in the sci-fi fan world became popular after the advent of the mimeograph--the first widely available duplicating machine. This way of making content was able to circumvent mainstream and institutional publishing models creating channels for more creatives to distribute their work. Today, there are even more technologies that can be used in the production of zeitgeist material. In this class, we will learn how to create with a Xerox machine, silkscreen, letterpress, polymer, and more. In each assignment we will contend with the power of quantity. What does it mean to make five of something? Ten? Fifty? One hundred? We will also experiment with format. How can a message be told through a wearable garment? How does the narrative change when it's a tote bag? And finally, we will explore the poetics of distribution. What are the artistic possibilities of a zine when it can be sent through the mail or left in a pile for the public?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA236**
Prereq: **None**

ARST237 Printmaking I
This course is an introduction to the practice and art of printmaking. Through technical instruction and personal exploration, students learn the rudiments of relief and intaglio printmaking media. Students learn to develop a print through a series of proofs with critical consideration as an important input in this progression from idea sketch to final edition.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST238 Print Culture 101
Print Culture 101 is an introductory course about the vast medium of printmaking: its techniques, its traditions, and its possibilities. Throughout the semester, students will learn how to use each area of the printshop, and the fundamentals of relief, recessed, planographic, stencil, and photographic processes of printmaking. Additionally, students will gain some elemental skills in working with paper, ink, and adhesives. These skills will also equip students with useful knowledge to experiment with unconventional materials.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST239 Painting I
This introductory-level course in painting (oils) emphasizes work from observation and stresses the fundamentals of formal structure: color, paint manipulation, composition, and scale towards artistic expression. Students will address conceptual problems that will allow them to begin developing an understanding of the power of visual images to convey ideas and expressions. The course will include lectures and individual and group critiques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST242 Typography
The fundamentals of fonts, letter forms, typographic design, elements of the book, and an introduction to contemporary graphic design are considered through a progression of theoretical exercises. Once working knowledge of the typeshop and InDesign (software for book design) is acquired, each student conceives, designs, and prints: first, a broadside, then a book. Use is made of the collection in the Davison Rare Book Room at Olin Library. While NOT a required sequence, this course is strongly recommended before taking ARST243.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST243 Introduction to Graphic Design
This course will open your mind to the world of graphic design, both past and present. You will learn how to analyze and critique design in addition to how to present your work and convey your ideas to others. You'll explore various tools available to a designer including hand skills and computer software. Computers will simply be a possible tool to help complete each project - this is not a software class.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA243**
Prereq: **None**

ARST245 Sculpture I
An introduction to seeing, thinking, and working in three dimensions, the class will examine three-dimensional space, form, materials, and the associations they elicit. Through the sculptural processes of casting, carving, and construction in a variety of media, students will develop and communicate a personal vision in response to class assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST246 Graphic Design: Website as Portfolio
Students will focus on the creation of an online portfolio of work as both an extension of their own practice and calling card for the world at large. Emphasis will be placed on the deployment of the site as a space for both interactive and graphic design and the development of writing about/documenting work and projects. Hard coding skills not necessary; focus will be on familiarization with user friendly sketching platforms, research organization systems, and out-of-the-box CMS for website development. Visiting artist talks will also be arranged.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA246**
Prereq: **None**

ARST251 Photography I
This is a comprehensive introductory course to the methods and aesthetics of film-based and digital photography. The topics of study will include evaluating negatives and darkroom prints, developing film, Lightroom and Photoshop software, inkjet printing, reading light, visualization, photographic design, and history of photography.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **HA-ART**
Prereq: **None**

ARST252 Photography I
This class is only intended for first year students. This is an introductory course to the methods and aesthetics of film-based and digital photography. The class is designed for students with no prior formal experience in photography, though it will still challenge those that are already versed in film and digital. The first few weeks of class will be devoted to comprehensive technical instruction including exposure, film processing, and darkroom enlargement. Subsequently, class time will be split between weekly critiques and lectures covering topics including visualization, reading and evaluating light, and photographic history. The shooting assignments are open ended and conceived to push each student to define their own visual interests as they continue to immerse themselves in the language of the medium. After fall break, we will switch to working digitally. Software instruction will include Lightroom and Photoshop, with significant time devoted to inkjet printing. The course will culminate in a final portfolio that will reflect the formal, technical, and conceptual experimentation that the students will engage in throughout the course.

***Please note that this is an intensive course with a significant work load. Students should expect to spend at least 15 hours outside of class on weekly shooting and production. Please feel free to reach out to the instructor at arudensky@wesleyan.edu if you have any questions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST253 Digital Photography I
This course is an extensive examination into the methods and aesthetics of digital photography. The topics of study will include DSLR camera operation, Adobe Photoshop, Adobe Bridge, and printing as well as, most importantly, a focus on photography as a fine art through both a historical and contemporary viewpoint.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST260 Introduction to Sumi-e Painting
We will learn basic technique and composition of traditional Japanese sumi-e painting. Sumi-e is a style of black-and-white calligraphic ink painting that originated in China and was introduced into Japan by Zen monks around 1333. We will concentrate on the four basic compositions of sumi-e: bamboo, chrysanthemum, orchid, and plum blossom. We will also study the works of the more famous schools, such as Kano. Students will create a portfolio of class exercises and their own creative pieces.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CEAS460**
Prereq: **None**

ARST261 Alternative Printmaking: Beginning Japanese Woodblock Technique
Students are taught traditional Japanese techniques for conceptualizing a design in terms of woodcut, carving the blocks, and printing them, first in trial proofs and editions. After understanding how both of these methods were originally used and then seeing how contemporary artists have adapted them to their own purposes, both for themselves and in collaboration with printers, students will use them to fulfill their own artistic vision. Considerable use is made of the Davison Art Center collection of traditional and contemporary Japanese prints as well as many European and American woodcuts.

ARST265 Action: Art, Politics, Counterpublics
In this interdisciplinary studio course, we explore action as a category of art practice. What does it mean to take action, either individually or collectively? What does it mean to refuse to take action? Through a series of projects, assignments, and discussions, we work through various possibilities, drawing on methods from public interventions, performance, institutional critique, social practice, experimental film, and work by non-art practitioners. The course is organized around the production of student projects and research, culminating in a self-directed capstone work. In the initial stages, students will be asked to work through three distinct modalities (performance, site-specific intervention, and collaborative practice) while developing their ideas. Time will be devoted to discussion of historic and contemporary examples, including European avant-gardes (Dada, Productivism), feminist film and performance, Happenings, Indigenous performance art, and work connected to political organizing, such as the Black Panther Party, United Farm Workers, Young Lords, ACT-UP, Art Workers' Coalition, and EZLN, among others. Students will be exposed to a variety of techniques and will gain access a range of facilities, including the woodshop, digital technologies through the Digital Design Studio, etc. Depending on Covid restrictions, trips to contemporary exhibitions will provide a theoretical framework. Work in this class can be created individually or collaboratively. Depending on interest, we may also organize an end-of-semester exhibit.

Prereq: **None**

ARST270 Fundamentals of Design I
In this introductory product design course, students will experience basic design processes such as problem identification and possible resolutions; the use of design development and communication skills via design observation and research; iterative process and prototyping; and representation and presentation in two and three-dimensional forms. Students will explore how design can play a role in our community and how it can impact our society. Students will work both individually and collaboratively in a studio environment. Field trips to New York City fabricators, galleries, and workshops may be expected as part of this course.

Identical With: **IDEA160**
Prereq: **None**

ARST271 Designing With Living Systems: Soft + Hairy
In this part seminar, part studio course, students will go on field trips and read extensively to develop an understanding of mycelium and how it is explored in design. We will explore temporality in design with particular focus on how biodegradable materials such as mycelium can form our experience of an object. We will study how mycelium can be utilized as a living material to form a built ecology. In particular, we will study how to design for impermanence -- sometimes using waste materials -- and develop an understanding for material recovery. Students will work both individually and collaboratively in a studio

environment. Field trips to New York City museums, fabricators, and galleries, as well as around CT may be expected as part of this course.
Offering: **Host**

ARST286 Introduction to Time-Based Media
This introductory course offers a comprehensive exploration of time-based media in the expanded field, providing a foundational skillset for students interested in fine arts and media practices, yet open to all majors eager to develop their creative and critical voice. A core focus of the course is the act of making, which will be coupled with an investigation into how video can transform our relationship with ourselves, others, and the material world. Through screenings of historical and contemporary video art, we'll investigate theoretical frameworks, asking critical questions such as: What sorts of videos do we consider "art," and how might we use video as a tool for empathy, accountability, and aesthetic inquiry?

Students will build essential practical skills through regular technical exercises and hands-on projects, including camera operation, sound recording and design, lighting techniques, and video and sound editing, utilizing industry-standard software and various capture devices. Each assignment will be contextualized through group discussions and readings, investigating established video art traditions as well as the medium's role in vernacular applications like live-streaming, and social media. By the end of the course, students will gain both technical facility and a sharp critical eye for time-based art and culture.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Prereq: **None**

ARST287 Video Basics
This introductory course is for students of all majors eager to think critically and creatively about their relationship to video. How many videos do you have on your phone? How does the intimate, often humorous content we create relate to public space and artistic expression? Together, we'll explore the rich tradition of video art, which began in the mid-20th century when new technology was suddenly placed in the hands of everyday people. Artists quickly adopted, subverted, and transformed this specialized equipment beyond its initial commercial intent. Through hands-on projects, you'll learn to use affordable, widely available tools like CapCut and DaVinci Resolve to move beyond commercial aesthetics and create personal works of art. You will also be introduced to the specialized video equipment available on campus, focusing on the fundamental principles that can be applied to any camera you pick up. No prior experience is required: just a willingness to challenge and experiment with the videos you create every day.

Identical With: **IDEA287, DDC208, IDEA287**
Prereq: **None**

ARST308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.
Offering: **Crosslisting**

ARST320 Ecological Design II: Worn Out/Broken In
This course will function as a design studio that examines the afterlife of material production. While designers have traditionally focused their attention on the creation, distribution, and consumption of new products, this course asks students to carefully consider everything that follows those acts. By scrutinizing the use, care, maintenance, repair, and eventual demise of designed objects, students come to understand the intended and unintended consequences of making. Rigorous observation and research lead to the creation of analytic drawings and models for presentation at project reviews.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **IDEA320, ENVS321**
Prereq: **ARST270 OR ARST235 OR ARST220**

ARST321 Wood: Building with the Forest
This studio introduces students to full-scale design and construction through the production of a single, collaborative project over the course of the semester. Working from land-based research and precedent analysis, students develop a detailed design for a structure on a specific site in Middletown, then build it together in the field. Materials will be sourced from the northern hardwood forest and the design crafted to suit its ecosystem.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**

Prereq: **ARST270 OR ARST235 OR ARST220**

ARST323 Topics in Studio Art: Information
Artists in all media have historically responded to common, formal, and ideological motivations. These motivations encompass the very fabric of a liberal arts education. This course is intended to develop such a conversation among the various studio art disciplines as the foundation for making art. The course centers on a topic determined by the instructor. The class will function as a study group (of painters, sculptors, photographers, drawers, printmakers, architects

and so on) that tackles the topic through the act of art-making. The topic will be introduced through readings and visual precedents, and through discussion we will determine means to respond as artists, each student in his or her own medium. These individual responses will then be analyzed in group critiques. Later in the semester, students will expand their investigations to include studio disciplines other than their own.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

ARST332 Drawing II
This class builds upon the course content covered in Drawing I (ARST131). As we continue to draw from observation, topics will include an in-depth exploration of the human figure, various approaches to pictorial space, and an introduction to color. This course also introduces a concept-based approach to drawing that explores narrative and content. Brainstorming exercises and ideation techniques widen the scope a of "what is a drawing," and we will experiment with various methodologies in pursuit of developing personal style and studio practice. Drawing II serves as an essential bridge between introductory-level courses and the individualized pursuit of the ARST senior thesis.

Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST336 Architecture II
This course is a second-level architecture studio whose focus will be a single, intensive research and design project. As the semester progresses, additional design, representation, and production tools will be introduced and used for developing work for the project, from graphics software to the laser cutter. Additional information about the architecture studio at Wesleyan and its past projects may be found at: http://www.facebook.com/wesnorthstudio
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **IDEA336**
Prereq: **ARST235**

ARST337 Codex Unbound
Codex Unbound is a course that investigates the art of the book. It asks: What is a book? And what are the expansive possibilities of this form? Students will explore these large questions through the process of making books in a variety of binding and printing techniques that range in cultural and historical origin. In learning such techniques, students will also be tasked with intervening with forms and creating their own innovations, which can incorporate their own intellectual interests.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST338 Printmaking II
This upper-level printmaking course focuses on the application of various printmaking methods in response to conceptual prompts. There will be instructional units on lithography, the Vandercook letterpress, and digital technologies. In addition to learning these new techniques, students are expected to build on previous printmaking experience to hone their skills and sharpen their creative vision. Routine print assignments and a final substantial project will task students with the development and presentation of professional, finished work.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST237 OR ARST261 OR ARST361**

ARST339 Surface Tension
Bumpy, smooth, fuzzy, and sharp. These are all surfaces we are familiar with through our experience of the world. In art, the surface of an object, whether it is a sculpture or painting or anything else, is a port of entry into the experience, subject, and appreciation of the work. Tension in visual art can be thought of as the push and pull form has to provoke and/or engage the viewer. These points of strain could appear at the intersection of opposing marks, contrasting color, disharmonious imagery and much, much more. "Surface tension" refers to qualities in visual art related to the superficial veneer of an art object which can support the expression of content more deeply. In printmaking, surface tension can be literally created or optically suggested through a variety of techniques. In this class, we will learn advanced methodologies in intaglio, lithography, relief, letterpress, digital printing and more. Each assignment will task students to combine these mediums in surprising ways that encourage contrast, opposition, and traction. We will explore the possibilities of mixing water and oil based printing techniques, utilize digital medium in tandem with analog processes, apply dry and wet techniques together, and learn to gild metals on a variety of substrates. This class is open to any advanced student of art who wants to experiment with their practice in the arena of printmaking.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST261 OR ARST337 OR ARST238 OR ARST361**

ARST340 Painting II
In this class, students will develop an artistic vision and studio practice while exploring open-ended prompts and engaging in conversations that unpack approaches and methods toward achieving artistic goals. Each individual will work uniquely in both approach and technique in order to become fluent and make conceptual and aesthetic choices that will best convey their singular creative concerns. All prompts and concerns addressed in this course allow for any formal, conceptual, or stylistic method of expression to solve them. The knowledge and skills gained in ARST239 will serve as the foundation for a deeper inquiry into how formal decisions about process inevitably impact expression and the reading of artworks. While analyzing differing approaches to solving the same problem, students will discover how their own practice can transform their relationship with others and the world. Lectures and discussions will provide information and feedback on historical and contemporary issues, project proposals, goals for the work with respect to identifying an ideal audience, and the development of an artist's vision and statement.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **(ARST131 AND ARST239)**

ARST341 Developing a Studio Practice Based in Painting
This course is intended for students with a solid foundation in painting or a related media concentration. In this class, students will develop an artistic vision and studio practice while exploring open-ended prompts and engaging in conversations that unpack approaches and methods toward achieving artistic goals. Each individual will work uniquely in both concept and technique in order to become more fluent in their media and make conceptual and aesthetic choices that best convey their singular creative concerns. The knowledge

and skills gained in ARST239 and/or other studio art courses will serve as the foundation for a deeper inquiry into how formal decisions about process inevitably impact expression and the reading of artworks. While analyzing differing approaches to solving the same prompts, students will discover how their own practice can transform their relationship with others and the world. Lectures and discussions will provide information and feedback on historical and contemporary issues, project proposals, goals for the work with respect to identifying an ideal audience, and the development of an artist's vision and statement. Prerequisite: You must have taken any second level Art Studio course in any concentration or Painting 1.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST345 FAN FICTIONS: Alternative Universes, Gender Swaps, Ship-ping
In the vernacular, a "fan fiction" is a type of writing that reimagines a piece of popular media such as a book, TV show, or movie. This happens without consent and is used to explore alternative narratives or taboos.

Artists such as Kara Walker have reimagined the Antebellum south as an erotic horror, Mike Kelly created installations based on the cities of Krypton from the comic book Superman.

In our class we will utilize printmaking methodologies to explore strategies of fan fiction, by creating artworks that reconfigure both historical and fictional canons that have historically been entrenched in ideas of authenticity and devotional labor. Students will create etchings, silk screens, and zines.

Students should have print media experience though the class is not strictly restricted to printmaking.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST131**

ARST346 Sculpture II
This is an intermediate-level course. Projects focus on the associative nature of three-dimensional form--how issues intrinsic to sculpture reflect concerns extrinsic to the art form. The class will emphasize the development of personal expressions of students' visions in response to class assignments.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST245 OR [ARST235 or IDEA234]**

ARST349 Junior Studio
Junior Studio is an interdisciplinary, studio-based course designed for advanced Art Studio majors that centers on the idea of "Call and Response." Our work doesn't happen in isolation but through exchange. This course positions artmaking as conversation -- between artists, across disciplines, and through time. The class will be structured in repeating two-week segments. The first segment will focus on a "call": an in-depth engagement with a specific artist's practice, or a close analysis of a particular work or body of work (including, but not limited to, art, music, and film). Together we'll unpack each practice or work conceptually, contextually, and materially and identify the ideas central to our understanding of it as a class. This work will take place through reading, in-class discussion, student-led presentation, and class visitors. The second segment focuses on "response": students will develop their own work in whatever medium they choose as replies, riffs, or counterpoints to the "call" -- testing how response becomes creation and exploring how their artistic instincts shape their output. Student work will be shared and discussed in a group critique format that encourages both critical feedback and supportive dialogue. The goal of Junior Studio is not to produce technicians of any single medium, but to help students develop a deeper connection to their own creative processes. The course emphasizes ideas: how we arrive at them, how they take form, and how they communicate meaning. Ultimately, students will build intimacy with their artistic instincts, expand their understanding of interdisciplinary practice, and situate their work within the cultural and artistic contexts that inform and inspire them.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST350 Senior Seminar
This is an interdisciplinary critique-based course designed for advanced Art Studio majors. Our primary aim is to provide a structure for the development of each student's thesis work, research, and thinking as it evolves over the course of the semester. Through extensive in-class discussions and reviews, we devote a substantial portion of time to the presentation and discussion of student work. We devote time to the discussion of installation strategies, readings in contemporary criticism, visiting artist lectures and presentations, and, if possible, visits to contemporary exhibitions in the area. The course is also an interdisciplinary workshop, an opportunity to share your work with your fellow students, and to participate in a structured response to one another's work across different types of media. Participation in the class will include leading discussions of readings, attending visiting department lectures, sharing work in class, and responding to/giving feedback to classmates' work. The course is designed as a complement to the Art Studio Senior Thesis process and is an elective for Art Studio majors. This class will break for lunch from 12:30-1:15 p.m.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ARST352 Photography II
This is an intensive course intended for students with a solid foundation in photography. Students can choose to work in either film-based or digital media while developing their own unique voice. Topics will include medium-format film cameras, fiber paper, virtual drum scanning, large-format digital printing, and editing and sequencing images. The second part of the course will be devoted to developing a body of work that will result in a photo book project. Lectures and class discussions will provide a historical context, while presentations by visiting artists will introduce students to contemporary work in the medium. Emphasis will be placed on the weekly discussion of students' work.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST353 Photography III - Documentary Practices
This is an intensive course that will provide students with a historical, theoretical, and ethical overview associated with documentary photographic practice. It is

intended for advanced students that have taken Photography I (ARST 251) or Photography II (ARST 352). Assignments, readings, and discussions will be geared toward the development of a cohesive body of work with focus on research and development of a concept, editing and sequencing of photographs, and fine printing. This course will serve as preparation for thesis work undertaken during the senior year and is recommended for prospective or current majors.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **ARST251 OR ARST352**

ARST355 Concepts in Contemporary Art
In this interdisciplinary seminar and studio course, we explore key concepts in contemporary discourse across a range of forms, genres, and disciplines. How do works of art respond to and reframe central debates in the wider culture? In what ways do the theory and practice of art supplement or contradict each other? How does research function within the context of art historical study and contemporary artistic practice?

To contend with these questions, students develop a series of projects over the course of the term in response to specific conceptual prompts. These investigations may take the form of studio-based work or written scholarship depending on student interest and will culminate either in a final research paper (for those registering for Art History credit) or a final project in any medium (for those registering for Art Studio credit). Along the way, we study artworks, literary texts, works of social theory, art historical scholarship, films, popular culture, and other objects to ground our research. Parallel activities may include conversations with artists and art historians, methodological workshops, site-visits, trips to museums, and archival research.

Since the course's aim is to cultivate unexpected collaborations, cross-disciplinary encounters, and new ways of conjugating the history, theory, and practice of art, the final portion of the semester will focus on the organization of a collective exhibition, event series, symposium, publication, or other expanded curatorial endeavor. The course meets Fridays 12:30 pm-5:30 pm, with a break during that interval. Class time may on occasion include individual meetings and independent work.

ARST358 Video Installation
We live in a world where screens are often taken for granted. How has the omnipresence of video transformed visual perception? This course will focus on video installation and the ways video can shift our relationship to objects, space, and each other. Students will experiment with lighting and environment building, paying particular attention to how surfaces are transformed by the lens. We will explore projection mapping, live-streaming, installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly exercises and regular group critiques, we will begin to unpack how the videos we make contact with daily shift our relationship with both our own bodies and the material world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST361 Monotype Printmaking
The monotype print is a free form of printmaking more akin to painting or drawing than to traditional printmaking. It is also a process in which the artist encounters fewer technical difficulties than in other traditional printmaking methods. Students in this course will create images using various mediums and methods. We are going to use different material like wood, plexiglass, paper, and textiles. Also, we may use laser cutting or digital printing, to combine with drawing or painting.

The goal of this course is not perfection of technique, but rather students experimenting with material and technique, to produce their own visual images.

ARST362 Sumi-e Painting II
Sumi-e Painting II is an advanced class for which Introduction to Sumi-e Painting (ARST 260) is a prerequisite. In this course, foundation techniques will be expanded upon. We will re-examine traditional techniques and composition, and there will be exploration of new contemporary techniques. There will also be experimentation with tools beyond the brush. This course will introduce a concept based approach to narrative and content. Students will be encouraged to develop a personal style and method.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CEAS362**
Prereq: **ARST260**

ARST370 Regenerative Design II
This course builds on the exploration and knowledge learned in Product Design I to discover opportunities for systems thinking in design. Students will study challenges and opportunities related to aging, education, food, and mobility to investigate potential opportunities through the lens of regenerative design. The course will support students in developing digital modeling skills as well as rapid prototyping and fabrication techniques. Students will work both individually and collaboratively in a studio environment. Field trips to New York City design ateliers, fabricators, and workshops may be expected as part of this course.

ARST380 Interdisciplinary Studio: Politics of Land and Place
Notions of "place" are particularly fraught in North America, where legacies of development and dispossession have etched enduring power relationships onto the land. Contemporary spatial experience is marked by what Mindy Fullilove has called root shock: the reverberating effects of losing one's place and the collective struggle to reclaim it. In this interdisciplinary studio course, we develop artistic responses to the ways in which power shapes the natural

and built environment. We look at a range of sites--the home, the city, the border, the wilderness, the commons--as spaces of memory and belonging, sociality and resistance. We explore the ways in which people have engaged with place through a range of forms, including roadside monuments, site-specific sculptures, landscape films, community-based performances, situationist dérives, plein air painting, collective rituals, and political protests. Over the course of the term, students will identify a site in the Lower Connecticut River Valley and develop their own aesthetic language in response to it. These works may take the shape of installations, performances, digital media, or texts, and will draw on our discussions of land art, institutional critique, social practice, and experimental film. While the course is geared primarily toward the development of student projects, our work will be informed by a series of site visits, readings, screenings, and discussions of contemporary land struggles, anticolonial movements, and feminist and indigenous geographies.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST381 Intermediate Public Practice
What are the possibilities and challenges of making work in the public domain? This intermediate studio course provides students with the framework, conceptual language, and technical means to develop ambitious projects in public space. Over the course of the semester, students will be introduced to a range of working methods, including new genre public art, research-based practices, site-specific projects, and collaborative practices. While the course focuses on contemporary issues and debates, it situates these topics within a set of broader global and historical traditions. Through group discussions, critiques, site visits, and presentations, the course will assist students in developing a series of works that build towards a self-directed final project. We look thematically at a range of sites as spaces of memory and belonging, sociality and resistance. We explore the manifold ways in which people have engaged with place through a range of forms, including roadside monuments, site-specific sculptures, landscape films, community-based performances, architectural interventions, collective rituals, and political protests. Attention will be placed on sites around Middletown in order to situate our research and practice. These may include Harbor Park, Middlesex Historical Society, Beman Triangle, Connecticut Valley Hospital, Colt Armory, Portland Brownstone Quarries, among others. Support will be provided to students along the way in negotiating relationships with local institutions and stakeholders. Supplementary readings will introduce students to questions related to spatial theory and practice, agonism and democracy, monuments and counter-monuments. Successful completion of the course will prepare students for advanced work in the public domain. Course is open to all students. Preference given to students who have taken ARST131 and ARST235 or ARST238 or ARST239 or ARST245 or ARST 251 or ARST286 or other course in a related discipline.

Identical With: **CSPL381**
Prereq: **None**

ARST382 Intermediate New Genres
In this interdisciplinary studio course, we make work that traverses traditional disciplinary boundaries in order to develop a methodology that prioritizes questions of context, material, and theme. Building on the history of experimental and avant-garde practices of the 20th and 21st centuries, work in this course may take the form of installations, performances, videos, texts, participatory and collaborative projects, site- and context-specific works, and other as-yet undefined forms.

Our work will not be defined by adherence to any specific discipline or genre. In this way, the course serves as a springboard for each student to develop a relationship to contemporary interdisciplinary practice as well as an opportunity to explore, collectively and individually, pivotal theoretical frameworks that have shaped the field. Successful completion of the course will provide students with a solid foundation for experimentation in the expanded field of contemporary artistic practice.

Prerequisite: Students must have successfully completed an Introductory- or Intermediate-level Studio Arts course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**

ARST384 Special Topic: Between Forms: Intermedia Arts Workshop
This advanced project-based workshop is for poets and artists interested in interdisciplinary practices crossing over between poetry, visual art, and performance. It is taught in conversation with the Fall 2021 exhibition, The Language in Common, in Zilkha Gallery including the work of Cecilia Vicuña, Tanya Lukin Linklater, Julien Creuzet, Jasper Marsalis, and Alice Notley.

Facilitated by Professors Benjamin Chaffee and Danielle Vogel, with modules taught by visiting artists from across the arts, this workshop is designed for students interested in working outside of--or between--their primary mediums. Professors will guide students as they choose "companion mediums" to work in for the semester while employing interdisciplinary approaches to writing and art-making in order to discover their own unique and hybrid forms.

We will divide our time between intensive laboratory-like spaces for composing work, conversations with visiting artists, student presentations and workshops, and studying the works of artists working between forms, all in an attempt to root ourselves more dynamically in our individual practices. The course will culminate in a reflective essay or artist statement, as well as an exhibit of poems, objects, installations, and performances created during our time together.

Prereq: **None**

ARST385 Introduction to Social Practice
This studio seminar will serve as an introduction to contemporary issues in socially engaged art practice, with the goal to familiarize students with the history, theory, and practice of socially and politically engaged art. This course is intended for students with significant prior experience in studio art or related coursework in other disciplines. Interviews for the course will be held during the first class meeting.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**

Prereq: **ARST131 OR ARST190 OR ARST237 OR ARST239 OR ARST242 OR ARST243 OR ARST245 OR ARST253 OR ARST260 OR ARST261 OR ARST285 OR ARST352 OR ARST353 OR ARST361**

ARST386 Intermediate Time-Based Media
In this interdisciplinary studio course, we make work that traverses traditional disciplinary boundaries in order to develop a methodology that prioritizes questions of context, material, and theme. Building on the history of experimental and avant-garde practices of the 20th and 21st centuries, work in this course may take the form of installations, performances, videos, texts, participatory and collaborative projects, site- and context-specific works, and other as-yet undefined forms. Our work will not be defined by adherence to any specific discipline or genre. In this way, the course serves as a springboard for each student to develop a relationship to contemporary interdisciplinary practice as well as an opportunity to explore, collectively and individually, pivotal theoretical frameworks that have shaped the field. Successful completion of the course will provide students with a solid foundation for experimentation in the expanded field of contemporary artistic practice. Prerequisite: Students must have successfully completed an Introductory or Intermediate level Studio Arts course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST387 Virtual Production: The Music Video
This intensive studio course will explore the breadth and depth of the music video genre. Students will learn advanced post-production, motion capture, and video recording techniques. Class sessions will include technical demonstrations, group discussions, and conversations with practitioners in the field. Readings and screenings will examine the relationship between music videos, technology, contemporary art, and popular culture. Students will learn how to use the 3D motion capture studio and record live musical performances. Software will include Adobe AfterEffects, Blender, and DaVinci Resolve. Through weekly exercises and a final independent project, students will learn to work collaboratively and develop a distinct creative voice. The course will culminate with a final music video project, to be screened at the end of the semester. Previous experience in Adobe Premiere Pro software is required. Preference will be given to students who have successfully completed ARST 286, ARST 386, DDC 108, or DDC 448. All students must be concurrently enrolled in the virtual production lab which meets Fridays 1:20 p.m. - 3:20 p.m. in DDC.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**

ARST420 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Host**
Grading: **Cr/U**

ARST430 Architecture Senior Thesis Studio
This course fulfills the fall semester requirement of the Senior Thesis Project in Studio Art for Architecture majors. Structured as a Studio, the goal of this course is to develop a collaborative intellectual environment (studio culture) for senior majors to work through the theoretical, methodological, and practical concerns connected with their individual thesis projects under the guidance of an Art Studio faculty advisor. Topics to be examined will be based on students' research and studio practice, and participants are expected to engage critically, yet generously, with the projects of their peers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

ARST465 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

ARST466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

ARST467 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**

ARST468 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**

ARST469 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ARST484 Data, Art, and Visual Communication
This course looks at the ways the digital arts--broadly defined--can be used to explore the intersections of research, data, design, and art. Following a creative software "bootcamp," students will execute projects intended to help them generate, manipulate, and remix data for the purposes of visual communication and art. Students will use Adobe Creative Suite and Processing, an open source programming language, and integrated development environment (IDE) built for electronic arts, new media, and visual design. In addition to working in the studio, seminars, readings, and student presentations will explore the role of data visualization, "big data," and the web in culture and society today. No prior software knowledge or coding skills are required. Students working in STEM, humanities, and social sciences are encouraged to enroll.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **CIS284**

ASTRONOMY (ASTR)

ASTR102F Planets Near and Far: The Diversity of Worlds in the Solar System and Beyond (FYS)
For the past 4,000 years, ancient and modern astronomers have tracked the motion of the solar system planets across the sky. Thanks to some very recent discoveries and technological innovations, we now know of thousands of additional planets orbiting other stars. With the cumulative knowledge of millennia of solar system research and recent extrasolar breakthroughs, what planetary science questions can we now answer? How do planets form and evolve? Does the solar system look like a typical planetary system? How many planets are similar to Earth and can any support life? Students in this course will explore these questions and more while developing skills vital to scientific inquiry, writing, and communication.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ASTR103 The Planets
More than 100 planets are now known in the universe, eight of which circle the sun. NASA missions and improved telescopes and techniques have greatly increased our knowledge of them and our understanding of their structure and evolution. In this course, we study those eight planets, beginning with the pivotal role that they played in the Copernican revolution, during which the true nature of the Earth as a planet was first recognized. We will study the geology of the Earth in some detail and apply this knowledge to our closest planetary neighbors--the moon, Venus, and Mars. This is followed by a discussion of the giant planets and their moons and rings. We will finish the discussion of the solar system with an examination of planetary building blocks--the meteorites, comets, and asteroids. Additional topics covered in the course include spacecraft exploration, extrasolar planetary systems, the formation of planets, life in the universe, and the search for extraterrestrial intelligence.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES151**
Prereq: **None**

ASTR105 Exploring the Cosmos
This introductory course for non-science majors unveils the universe and how we have come to understand our place in it. We will touch on a full range of

astronomical topics, including the mechanics of our solar system, the discovery of planets around other stars, the stellar life cycle, the formation and evolution of galaxies, the big bang, and the ultimate fate of the universe. Occasional evening sessions will provide the opportunity to observe celestial objects through Wesleyan's telescopes.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR106 History of Astronomy from Copernicus to the Modern Age
Since the dawn of human consciousness, we have gazed at the sky with wonder and pondered our place amongst the heavens. In this class, we will discuss the key discoveries of astronomy and the people who made them, placing these discoveries in historical context: what was the world like when humans first discovered the size of the Earth or determined the distances to the stars? How did society influence discovery, and how did achievements in astronomy impact society?

Through discussion, telescopic observation, and demonstration of techniques, we will examine the major astronomical achievements from antiquity to the present day, with an emphasis on the past 500 years. We will discuss astronomy's changing role over time, from mystical (astrology and mythology), to practical (time keeping and navigation), to physical (the nature of stars and planets). Finally, we will gaze to the future and discuss the biggest unsolved mysteries in astronomy, and what we will need to achieve to solve them.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR107 The Universe
This course focuses on the modern scientific conception of the universe, including its composition, size, age, and evolution. We begin with the history of astronomy, tracing the development of thought that led ultimately to the big bang theory. This is followed by a closer look at the primary constituent of the universe--galaxies. We end with consideration of the origin and ultimate fate of the universe.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR108 Conceptual Astronomy: Science Fact vs. Science Fiction
Our conceptual understanding of the world around us is shaped by our experiences, often in subtle ways. In this media-dominated world, the public's predominant exposure to science comes from science fiction in popular culture, especially TV and movies. In this course, we will examine the ways in which popular culture has influenced our collective knowledge about astronomy: the good, the bad, and the really bad. Wide-ranging topics will include asteroids and comets threatening the earth, travel through space and time, and life in the universe. Through lecture, discussion, and laboratory exercises, we will examine these topics through the lens of science to expose the reality of the universe that is our home.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR109 Worlds Beyond: The Search for Life in the Universe
We are living through a unique time with the recent discovery of other worlds, planets orbiting nearby stars, and the capability to obtain detailed observations of those planets in the coming decades. This makes tangible the age-old question of whether we are alone in the universe, as the only known life-bearing planet. This introductory course for non-science majors will explore the fundamental concepts that are needed to place life into a cosmic context. We will discuss planetary systems near and far, stars as the integral hosts of planets, and prospects for finding and identifying life elsewhere in the universe. Occasional evening sessions will provide the opportunity to observe celestial objects through Wesleyan's telescopes.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR111 The Dark Side of the Universe
The physical world we experience is one of normal matter, energy, and--if one looks up at night--stars. But on larger scales, the universe has an exotic and much-less-well-understood side dominated by things we call dark matter, dark energy, and black holes. What are these mysterious components, and what is the relationship between them and the world that is familiar to us? The answers lie at the frontier of modern astrophysics. In this course, we explore the evidence for the existence of these dark components and the current debates regarding their nature and origin. In different ways, each of them has a vital role in the evolution of the universe and its ultimate fate.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Prereq: **None**

ASTR155 Introduction to Astrophysics
The fundamentals of astronomy will be covered. This course serves as an introduction to the subject for potential majors and as a survey for non-majors who have a good high school preparation in math and science. We will cover selected topics within the solar system, galaxy, local universe, and cosmology, including the Big Bang Theory of the origin of the universe and the discovery of planets around other stars.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR210 Fundamentals of Scientific Computing in Astronomy
Computing is essential to the practice of modern astrophysics, from the visualization and analysis of large observational datasets to the numerical simulation of complex physical processes. This course develops the computational skills necessary for astronomical research and prepares students for advanced coursework. Through hands-on tutorials and exercises, students will learn to read, manipulate, and visualize astronomical datasets using basic UNIX and Python programming. The course will also include an introduction to data analysis using statistical techniques.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-ASTR**
Prereq: **None**

ASTR211 Observational Astronomy
This course introduces the techniques of observational astronomy. Students will acquire a basic knowledge of the sky and become familiar with the use of Van Vleck Observatory's telescopes and instruments. Acquisition and analysis of astronomical data via modern techniques are stressed. Topics include celestial coordinates, time, telescopes and optics, astronomical imaging, and photometry. Some basic computer and statistical analysis skills are developed as well. The concepts discussed in lecture are illustrated through observing projects and computer exercises.
Offering: **Host**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-ASTR**
Prereq: **ASTR108 OR ASTR111 OR ASTR105 OR ASTR107 OR E&ES151 OR ASTR155 OR ASTR210**

ASTR221 Galactic Structure and Formation
The fundamentals of astrophysics are applied to galaxies and the objects contained therein. Topics include galaxy formation and evolution, the Milky Way, galaxy scaling relations, stellar populations, morphology and kinematics, clusters and dark matter halos, and the interstellar and circumgalactic media. In addition, we cover some of the basic numerical methods commonly used in astronomy, such as interpolation, numerical integration, and curve-fitting, and apply them to observational and theoretical problems.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR521**
Prereq: **(ASTR155 AND ASTR211)**

ASTR222 Modern Observational Techniques
This course reviews the practices of modern observational astronomy, focusing primarily on techniques employed in the optical and x-ray bands. Topics will include a description of the use of digital detectors for imaging, photometry, and spectroscopy in a wide variety of applications. Data acquisition, image processing, and data analysis methods will be discussed. In particular, students will gain hands-on experience with the analysis of data obtained from both ground- and satellite-based observatories. An introduction to relevant error analysis methods is included. Students will also become familiar with the fundamental techniques that will be necessary when "big data" projects like LSST come online in the near future: database querying, metadata handling, and modern programming techniques.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR522**
Prereq: **ASTR211**

ASTR224 Exoplanets: Formation, Detection, and Characterization
Our ability to place the earth into a cosmic context has dramatically improved in recent decades with the discovery of planets around other stars (exoplanets). The study of exoplanets has quickly become a dominant field in astronomy. This course will focus on the fundamentals of exoplanet formation, detection, and characterization (interiors and atmospheres) based on astronomical observables. We will also discuss the assessment of habitability for Earth-like exoplanets and the prospects for the detection of biosignatures.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR524**
Prereq: **(ASTR155 AND ASTR211)**

ASTR231 Stellar Structure and Evolution
As the principal source of light in galaxies today and as drivers of chemical evolution, stars play a critical role in the universe. It is important to understand their structure and evolution. Fortunately, we have a fairly well-developed and tested theory of stellar structure covering both their interiors and atmospheres. In this course, we will provide an introduction to that theory and examine its key results, including a basic description of how stars evolve.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR531**
Prereq: **(PHYS213 AND PHYS214 AND ASTR155 AND ASTR211)**

ASTR232 Galaxies, Quasars, and Cosmology
This course introduces modern extragalactic astronomy, blending established practices in the field and important recent discoveries. Three major themes will be developed. First, the basics of Newtonian and relativistic cosmologies will be discussed, including modern determinations of the Hubble Law and the observations that have led to the currently favored cosmological model. Next, the universe of galaxies will be investigated: their constituents, structure and kinematics, and multiwavelength properties. Finally, the nature of galactic nuclei will be explored, including the observational consequences of black-hole accretion and the coordinated growth of galaxies and their central black holes. Outstanding research questions related to the topics covered will be highlighted throughout the course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR532**
Prereq: **(ASTR155 AND ASTR211)**

ASTR240 Radio Astronomy
This course will introduce students to the origins, theory, and practice of radio astronomy. It will cover theory of antennas and interferometers, as well as signal detection and measurement techniques. Particular emphasis will be placed on the theory and applications of Fourier transforms. A practical laboratory component will provide experience working with single-dish and interferometric data.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ASTR**
Identical With: **ASTR540**

Grading: **OPT**

ASTR555 Planetary Science Seminar
This course will examine topics and methods in the interdisciplinary field of planetary science. Students will join several faculty members in the planetary science group to discuss the origin, evolution, and habitability of planets in this

and other solar systems. This class is intended for graduate students who are pursuing or who intend to pursue the planetary science concentration. Other graduate and undergraduate students may request admission to the course.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES555**
Prereq: **None**

BIOLOGY (BIOL)

BIOL106 The Biology of Sex
This course is featured as a general education course within the Department of Biology. Serving to complement courses currently offered within biology that only touch upon the subject of sex, this course will dive into specifics regarding sexual behavior and will serve to highlight new discoveries that have been facilitated by novel scientific techniques and approaches. As we study the biology of sex in the animal world, it becomes apparent that sex is achieved in a multitude of ways, many appearing rather bizarre and flamboyant. Yet under these guises, animals are still able to mate and reproduce. Sex is often defined according to sexual reproduction, whereby an egg is fertilized by a sperm, and offspring arise. However, many organisms engage in asexual reproduction and/or a combination of the two reproductive strategies. Reproductive anatomy and behavior will be addressed as we explore a variety of organisms, ranging from marine clown fish and their ability to produce both sperm and eggs along with the male chimeric marmoset (monkey) that mates with his brother's sperm. As an organism pursues reproduction, what are the mating strategies? What are the chemicals of sex (pheromones and hormones)? By examining the biology of reproduction, we will debate the competing strategies of males and females, and whether human cultural displays are yet another way to decipher quality in a potential mate.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL118 Reproduction in the 21st Century
This course will cover basic human reproductive biology, new and future reproductive and contraceptive technologies, and the ethics raised by reproductive issues.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **FGSS118, PHIL118, STS118**
Prereq: **None**

BIOL137 Writing About Evolution
This class will explore various interesting problems in natural history, using short writing assignments to build familiarity with concepts of organismic evolution.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL140 Classic Studies in Animal Behavior
This course will focus on the major concepts in the field of animal behavior. We will discuss the major selection pressures that shape animal behavior as individuals avoid predators, find mates, and produce offspring in their preferred habitats. What are the limiting resources for male and female animals, and why are some species sexually dimorphic? We will commence with the early pioneers in the field of ethology and highlight comparative studies in understanding territorial behavior, alarm calling, kinship, and the role of hormones/pheromones in reproduction. Both instinctual and learned behaviors are important components in an animal's behavioral repertoire and will be explored in field experiments. This course is designed for students to gain a clearer understanding of the mechanisms that drive the natural world around them. All biological jargon will be defined as original research is discussed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL140F Classic Studies in Animal Behavior (FYS)
This course will focus on the major concepts in the field of animal behavior. We will discuss the selection pressures that shape animal behavior and whether the study of primate social and mating systems can provide insight into human behavior. Other questions include, Why do certain animal species exhibit altruistic behavior and others do not? What are the limiting resources for male and female animals, and why do they behave so differently? This is but a sampling of the subjects to be covered in a course that is specifically designed for students to gain a clearer understanding of the mechanisms that drive the natural world around them. We will commence with the early pioneers in ethology who were the first to describe the behavioral repertoire of a single species and progress onto the more current, comparative approach, in which two animals are compared for a more fine-tuned analysis. Biological jargon will be defined as original research is discussed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL145F Primate Behavior: The Real Monkey Business (FYS)
This course will examine the full spectrum of the primate order. How has evolution shaped these different primate species, and what underlying mechanisms have fueled their development? We will discuss primate ancestry, primate environments, and primate competition, all factors that mediate primate behavior. In addition, we will take the lessons learned from primate studies to determine how humans might use this knowledge toward the preservation and conservation of their nonhuman relatives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL146 Primate Behavior: The Real Monkey Business
This course will explore primate behavior starting with an overview of primate ancestry as gleaned from the fossil record. How has evolution shaped these different primate species, and what underlying mechanisms have fueled their behavioral repertoires? The major selection pressures on primates will be investigated together with parental care, self-medication, and Machiavellian intelligence. The class will also examine theoretical models explaining the evolution of the oversized human brain by Geoffrey Miller and how the advent of cooked foods supported a large brain mutation (Richard Wrangham). In addition, we will take the lessons learned from these aforementioned primate

studies to determine how this knowledge can work toward the preservation and conservation of our nonhuman primate relatives.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL149 Neuroethology: Sensory Basis of Animal Orientation and Navigation
This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B149**
Prereq: **None**

BIOL153F Stress: The Good, The Bad, The Ugly, The Resilient (FYS)
Stress, what is it and what is it good for? This course will introduce students to the neurobiology of stress. We will read the foundational works that helped us understand that stress can have real, measurable, and lasting effects on the entire body and across generations. Next, we will break down major concepts in the field (including allostasis, fight or flight, tend and befriend and hyperkatifeia) that describe how the body handles acute and chronic stress. Finally, we will end the course with a focus on stress resilience. We will discuss how social interaction, exercise, nutrition, and mindfulness approaches work to contribute to the remarkable resilience that has defined the success of our species. Our major sources of information will include original scientific reports, essays, magazine articles, podcasts, films, lectures and guest appearances by neuroscientists in the field. Throughout the course, students will maintain a journal with daily entries that document their understanding of the material and its relevance to their lives. As a final project, students will be asked to work in pairs to build a digital zine for distribution to other incoming frosh to help develop their appreciation for how stress can impair cognition and emotional regulation, how stress can aid learning and memory and what tools of resilience students can lean on throughout their time at Wesleyan to temper the former and facilitate the latter.

Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL155 Tiny Organisms with a Big Effect: The Microbiome
With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multicellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual's health. This course will look at the true nature of the microbiome, to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B155**
Prereq: **None**

BIOL155Z Tiny Organisms with a Big Effect: The Microbiome

BIOL160 Life in the Oceans in the Anthropocene and Beyond
Little is known about life in the deep sea, the largest habitat on Earth, even about the largest animals living there, such as the giant squid. Humans, however, are severely affecting even these most remote areas of our planet, and wildlife populations in the oceans have been badly damaged by human activity. We will look at the amazing diversity of ocean life and the disparate building plans of its animals, and see how oceanic ecosystems are fundamentally different from land ecosystems. Then we will explore how human actions are affecting oceanic ecosystems directly, for instance by overfishing (especially of large predators and filter feeders), addition of nutrients (eutrophication) and pollutants, and the spread of invasive species, as well as indirectly, through emission of carbon compounds into the atmosphere. Rising atmospheric CO_2 levels lead to ocean acidification and global warming, affecting the all-important metabolic rates of ocean life, as well as oceanic oxygen levels and stratification, thus productivity. We will try to predict the composition of future ecosystems by looking at ecosystem changes during periods of rapid warming in the geological past and see whether future ecosystems will become dominated by jellyfish, as they were 600 million years ago.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES160, CIS160**
Prereq: **None**

BIOL161 Science Materials For a Malagasy Classroom
Students will design and produce a variety of educational science materials to be used in a fifth grade classroom in Madagascar. These items include a science logo, bookmarks, educational science games, posters, and a comic book with conservation themes for children. Students who are interested in design and

natural history as a means through which to communicate science themes on wildlife endemism, evolution, and climate change would be appropriate for this course. All students will need to conduct independent research into science topics, distill down the salient features, and use that information to design elementary school materials. Working both individually and in teams, students will conceive, design, critique, and move into product production (MakerSpace). In addition, prototypes of the materials will be reviewed and rated by fifth graders in a Middletown elementary school for feedback.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS261, IDEA261**
Prereq: **None**

BIOL173 Global Change and Infectious Disease
This course will cover how human demands upon the environment have come back to bite us through infectious diseases. The most devastating infections, now and in the past, have spilled into humanity from other animals through our quest for food, either through hunting and trade of wild animals (COVID-19 and HIV) or through agriculture (smallpox and measles). Additionally, taking over huge swaths of land has fragmented natural habitats, with the result that some pathogens have increased in abundance (Lyme disease) and some pathogens have moved closer to humanity when humans have encroached on natural lands (Ebola). Living at high density in interconnected cities has sustained the severe infections that became humanity's childhood diseases (mumps, measles, smallpox); high densities have also brought us diseases brought by fecally contaminated water, as well as those diseases brought by the animals that cohabit our cities and suburbs (rats, robins). Our demand on energy has brought us global warming, which is transporting tropical diseases, such as malaria, poleward from the tropics; the extreme weather events of a changed world are leading to outbreaks of zoonotic diseases (hantaviruses). Moreover, our penchant for transporting wild animals and ourselves has had the potential to spread any local flare-up of any novel disease to the whole world (plague, COVID-19). We will discuss how, even if we mitigate every existing human infection, we should expect an unending stream of new pathogens. We will discuss technological solutions to infectious diseases, as well as how changes in our ethics might help contain existing pathogens and avoid future spillovers. Lectures will cover these and other topics. There will be two 65-minute lectures each week, with frequent opportunities for students to break out into smaller sections to figure out interesting biological challenges. There will also be a 30-minute discussion each week for each of 11 discussion sections (probably about 15 students each). These discussions will focus mostly on how policy changes might best mitigate the environmental disturbances that are bringing us infections. The course has no formal prerequisites and will introduce material from ecology and microbiology, as needed, to allow students to read and interpret the recent literature on global change and infectious disease.

Identical With: **ENVS260**
Prereq: **None**

BIOL181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication, chromosome dynamics, transcription, translation, and gene regulation. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including transport across cell membranes, cellular energetics, protein sorting, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology. This course will require about 10 hours per week of engagement. Students should enroll separately in MB&B/BIOL191 Principles of Biology 1 - Laboratory.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B181**
Prereq: **None**

BIOL181Z Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of genetics and gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from genetic code in DNA through protein synthesis and function. Topics include DNA replication and repair, chromosome dynamics, RNA transcription, protein translation, gene regulation, and genomics. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including cell signaling, energetics, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B181Z**
Prereq: **None**

BIOL182 Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B182**
Prereq: **MB&B181 OR MB&B181Z**

BIOL182Z Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that

underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

BIOL186 Introduction to the Biology of Nutrition and Impact on Human Health
This course will introduce students to the concepts of nutrition. It will cover the biology of the different food groups that make a balanced diet (carbohydrates, fats, proteins) and how our bodies obtain energy and important molecules, such a vitamins, from our food. The course will also cover the relevant anatomy involved in digestion and excretion. Other topics such as the effects of food production on the environment, fad diets, and disease states will also be studied, along with the latest hot topics in the news.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL191 Principles of Biology I--Laboratory
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B191**
Prereq: **None**

BIOL192 Principles of Biology II: Laboratory
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. A specific emphasis will be placed on science communication.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B192**
Prereq: **[MB&B191 or BIOL191]**

BIOL193 Principles of Biology I Laboratory (Online)
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B193, NS&B193**
Prereq: **None**

BIOL194 Principles of Biology II: Advanced Topics
This course provides an optional supplement to the introductory course in physiology, development, evolution, and ecology (BIOL182, which should be taken concurrently). It is designed for highly motivated biology students who seek to enrich their understanding by engaging with current research in an intensive seminar setting. Students in BIOL194 will read and discuss recent journal articles that probe in greater depth some of the subjects covered in BIOL182. Weekly meetings will consist of a short lecture by the professor followed by group discussion of the readings.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B194**
Prereq: **BIOL181 or MB&B181**

BIOL197 Introduction to Environmental Studies
This course explores the interdisciplinary field of environmental studies to better understand the characteristics of human interaction with and dependence on the environment, and the causes and consequences of environmental degradation at local and global scales. We will explore key processes, characteristics, and phenomena of the natural world, and relevant human system and social dynamics. We will apply this information to identifying important issues and trends of global climate change and sustainability. Projects facilitate synthesis and application, skill development, reflection, and independent exploration.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS197, E&ES197**
Prereq: **None**

BIOL198 Principles of Biology II Laboratory _ Online
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophysiology, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **MB&B198, NS&B198**
Prereq: **BIOL192**

BIOL208 Molecular Biology
This course is a comprehensive survey of the molecules and molecular mechanisms underlying biological processes. It will focus on the cornerstone biological processes of genome replication, gene expression, and protein function. The major biomacromolecules -- DNA, RNA, and proteins -- will be analyzed to emphasize the principles that define their structure and function. We will also consider how these components interact in larger networks within cells to permit processing of external and internal information during development and how these processes become perturbed in disease states.
Offering: **Crosslisting**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B208**
Prereq: **MB&B181 OR MB&B181Z**

BIOL210 Genetics and Genomics
Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B210**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

BIOL212 Principles and Mechanisms of Cell Biology
The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and behavior of cells, because with this perspective one can begin to ask complex questions including: why does mutating a protein cause a cell to malfunction and how does this cause tissue malfunction or disease? We will examine the cell mainly in the context of the multicellular organism--where cells respond to as well as regulate their local environment. Hence, this course provides students with a firm foundation in cell biology as we examine eukaryotic cell structure, organelle function, cell adhesion and motility, signal transduction and cell differentiation, cell survival and apoptosis, and consider how these mechanisms integrate to generate coherent cell behaviors. Published research will be discussed throughout the course in order to build students' understanding of research in cell biology. Lectures, assignments and assessments include opportunities for students to develop a broad and deep knowledge of cell biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B212**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

BIOL213 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B213, PSYC240**
Prereq: **None**

BIOL214 Evolution: Pattern and Process
Over the last 3.5 billion years, life has taken on a vast array of forms in a multitude of environments. In this class, we will use evolutionary analysis to reveal the key patterns and processes that produced this amazing diversity of life. Topics will include: the evidence for evolution, the nature of variation, adaptive and random evolutionary processes in natural populations, mechanisms of speciation, phylogenetic reconstruction with molecular and morphological data, and major events in the history of life on earth. Motivating examples will be drawn from across the domains of life.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B182 OR BIOL182 OR BIOL182Z**

BIOL215 Evolution in Human-Altered Environments
Human activities have altered natural environments and, indeed, have created entirely novel ecosystems such as cities and high-input farms. This course examines how these human alterations to the environment affect the evolution and coevolution of diverse organisms. Starting with an intensive overview of microevolutionary processes, we will consider a number of contemporary scenarios: evolutionary response to environmental contaminants, exploitation of natural populations, and global climate change; evolution in urban and agricultural ecosystems; and the evolutionary impact of nonnative, invasive, and genetically modified organisms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL515, ENVS210**
Prereq: **[BIOL182 or MB&B182]**

BIOL215Z Evolution in a Changing World
Human activities have dramatically altered natural environments, and have even created entirely novel ecosystems such as farms and cities. How do these changes affect the evolution of animal and plant populations? In contrast to the traditional view that evolution takes place over millions of years, 21st-century scientists have been astonished to observe that rapid, human-caused environmental changes can lead to evolution in just a few short generations. Can the process of adaptive evolution keep up with the rapid pace of human-caused environmental change and allow species to cope with new conditions? What factors can promote "evolutionary rescue," and what may constrain it in different types of organism?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS210Z**
Prereq: **MB&B182 OR BIOL182**

BIOL216 Ecology
Ecology is the scientific study of interactions between organisms and their environment, both biotic and abiotic. We will look at how these interactions shape fundamental characteristics of populations, communities, and ecosystems. Topics will include predation, competition, symbioses, and effects of stress and resource limitation in diverse environments. We will cover important consequences of interactions such as coevolution, population outbreaks, ecological coexistence, patterns of biodiversity, ecological succession, species

invasions, food web dynamics, nutrient and energy cycling, variation in ecosystem goods and services, and global change.

This course emphasizes several learning goals in biology, including skill in formulating original ideas and experiments, using quantitative and graphical tools and interpreting quantitative information, and scientific writing.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS216**
Prereq: **[BIOL182 or MB&B182]**

BIOL217 Microbial Genomics and Evolution
In this course, students will learn the principles governing the structure, regulation, and evolution of bacterial and viral genomes. We will emphasize the experimental logic and conceptual models that researchers use to link genotype to phenotype. Specific topics will include operons, genetic networks, horizontal gene transfer, phylogenetics, and genome-wide association studies. Motivating examples will be drawn from both medical and environmental microbiology.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B181 OR MB&B181Z AND MB&B182 MB&B182Z**

BIOL218 Developmental Biology
This is an extraordinary time for the field of Developmental Biology: advancements in imaging and experimental strategies, especially those that manipulate gene expression, have led to an explosion in the amount that we know about how an organism develops and how developmental programs are used also in the adult organism. Developmental Biology is a discipline that utilizes a variety of model organisms, and students will be introduced to some of these as we cover the mechanisms of development at the molecular, cellular, and organismal levels. Special attention will be paid to the process of scientific discovery -- the experiments -- and students will engage with original research data throughout the course. We will also cover recent work that aims to understand very early human embryo development, and consider ethical and medical considerations that this work raises. Lectures, class discussion, and assignments will include opportunities for students to develop a broad and deep knowledge of developmental biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL220 Conservation Biology
This course will focus on the biology of conservation rather than cultural aspects of conservation. However, conservation issues will be placed in the context of ethics, economics, and politics. We will cover the fundamental processes that threaten wild populations, structure ecological communities, and determine the functioning of ecosystems. From this basis, we will explore important conservation issues such as habitat loss and alteration, overharvesting, food web alteration, invasive species, and climate change. We will use readings from the primary literature and field projects to learn about current research methods used in conservation biology. This course emphasizes reading and interpreting primary scientific literature and quantitative information, thinking critically about morals and ethics in society, and includes some hands-on research methods.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **ENVS220**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL223 The Molecular Basis of Cancer
Cancer is a group of diseases characterized by unregulated cell growth and tissue invasion. This course will focus on the molecular events that lead to cancer. We will cover topics in both molecular and cellular biology and genetics that are relevant to understanding the differences between normal and cancer cells. Particular focus will be placed on oncogenes and tumor suppressor genes, DNA damage responses, the p53 signaling pathway, cell cycle regulation, and the molecular basis of cancer therapies. This course will utilize both the textbook and primary scientific literature in the study of cancer.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **MB&B223**
Prereq: **MB&B181**

BIOL224 Hormones, Brain, and Behavior
Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Identical With: **NS&B224**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [BIOL182 or MB&B182]**

BIOL228 Medical Biochemistry
This introductory course will focus on the essential concepts of biochemistry important to students interested in the health professions, including the chemical and biological foundations of cellular metabolism and related disease states. Major topics will include the structure and function of biological molecules in the human body (proteins, carbohydrates, fats, nucleic acids, vitamins), enzyme catalysis, cellular signaling, and digestion, absorption, and processing of nutrients for energy and growth.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B228**
Prereq: **[MB&B181 or BIOL181] AND CHEM251**

BIOL229 Geobiology Laboratory
This laboratory course will explore more deeply some of the concepts introduced in E&ES234. Both the fundamental patterns and practical applications of the fossil record will be emphasized.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES235**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR EES199 OR [ENVS197 or BIOL197 or E&ES197]**

BIOL231 Microbiology
This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B231**
Prereq: **BIOL182 OR MB&B208**

BIOL232 Immunology
In this introduction to immunology, particular emphasis will be given to understanding both the innate immune response and its agents as well as the acquired immune response mediated by B and T cells. Cellular and antibody responses in health and disease will be addressed, along with mechanisms of immune evasion by pathogens, autoimmune disease, and cancer.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **NSM-MBB**
Identical With: **MB&B232**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182]) OR [MB&B208 or BIOL208]**

BIOL233 Geobiology
Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology). Typically, this involves studying fossils within the context of their sedimentary setting. In this course, we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on the climate.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**

BIOL235 Comparative Vertebrate Anatomy
This course will provide a comprehensive overview of the main organ systems in vertebrates, emphasizing phylogenetic relationships and anatomical features of major vertebrate groups. Using a comparative, systems-based approach students will explore the relationships between structure and function, evolutionary and developmental constraints on vertebrate anatomy, and the ways that a comparative anatomical approach informs our understanding of the human body. The course format will consist of two lectures and one lab per week, with lab sessions focusing on detailed dissection of several representative vertebrate species.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **NSM-BIOL**
Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182] AND [MB&B191 or BIOL191] AND [BIOL192 or MB&B192])**

BIOL236 Comparative Animal Physiology
This course studies the fundamental mechanisms that diverse animals (mostly vertebrates) have developed to deal with common functional problems posed by their environments, and the special mechanisms that some animals use to cope with extreme environments. Animal physiology focuses on the functions of tissues, organs, and organ systems, investigating the mechanisms that operate at all levels ranging from molecules to the whole organism. Animal physiology is thus an integrative science, attempting to bring together everything that is known about an animal's function to create an integrated picture of how that animal operates in its environment. The mechanisms of function and regulatory processes that will be covered include gas exchange, circulation, excretion, osmoregulation, sensing mechanisms, temperature regulation, muscle contraction/locomotion, and endocrine coordinating mechanisms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **(BIOL181 OR MB&B181) AND (BIOL182 OR MB&B182)**

BIOL237 Signal Transduction
Cells contain elaborate systems for sensing their environment and for communicating with neighbors across the membrane barrier. This class will explore molecular aspects of signal transduction in prokaryotic and eukaryotic cells. Topics will include membrane receptors, GPCRs, kinases, phosphorylation, ubiquitination, calcium signaling, nuclear receptors, quorum sensing, and human sensory systems. We will integrate biochemical functional approaches with structural and biophysical techniques.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-MBB**
Identical With: **MB&B237**
Prereq: **[MB&B208 or BIOL208]**

BIOL239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works. This course counts as an elective or column 1 breadth course towards the psychology major.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **NS&B239, PSYC239**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL241 Cell-Cell Interactions in Development
This course is about the exploration of the cellular interactions during development. Students will examine interactions between cells in the specification of the overall body plan, tissues and organs; the role of adhesions and migration; and the intracellular and extracellular cues that regulate these processes.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **(BIOL182 AND BIOL212) OR BIOL218**

BIOL242 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL542, E&ES270, E&ES570, ENVS242**
Prereq: **None**

BIOL243 Neurohistology
The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B243**
Prereq: **[NS&B213 or BIOL213 or PSYC240] OR [MB&B181 or BIOL181]**

BIOL244 Neuropharmacology
This course will introduce students to the physiological and molecular effects of drugs on neuronal activity and behavior. We will cover key concepts in neuropharmacology, including pharmacokinetics and pharmacodynamics, alongside techniques used in modern pharmacotherapeutic discovery as it relates to the treatment of neurological and neuropsychiatric disease. Student assessment will include in-class quizzes and exams.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B244, BIOL544**
Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

BIOL245 Cellular Neurophysiology
This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B245, BIOL599**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL247 Laboratory in Neurophysiology
The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems. Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (Aplysia), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B247**
Prereq: **([NS&B213 or BIOL213 or PSYC240] AND [BIOL182 or MB&B182])**

BIOL248 Introduction to Human Body Morphology
The human body is both complex and fascinating. This introductory course in human anatomy, explored across different scales, is designed to provide students with a precise and comprehensive understanding of the human body's morphological organization, using accurate and specialized terminology. The course will primarily focus on anatomy, constantly relating it to histology concepts to understand the relationship between structure and function within the body's systems and organs. The program is structured into three modules: Module 1 - Organization of the Human Body and Methods of Study, Module 2 - Integration of Functions, and Module 3 - Interaction with the External Environment. Each module will offer foundational knowledge in anatomy and histology, laying a solid foundation for further study in disciplines related to the human body and other mammals. The goal is for each student to master essential concepts and develop cognitive skills that will deepen their understanding of the body's functioning. Students will be encouraged to actively engage in class discussions, adopt a reflective approach to knowledge, and, most importantly, foster a lasting passion for learning.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **(BIOL181 OR MB&B181) AND (BIOL182 OR MB&B182)**

BIOL250 Laboratory in Cellular and Behavioral Neurobiology
The goals of the course are to introduce students to a number of contemporary laboratory techniques in neuroscience and behavior. The laboratory introduces students to experimental method and techniques including neuroanatomy, immunohistochemistry, primary neuronal and astrocyte cell culture methods, analyses of electrical activity in the brain, and behavioral analyses of learning, memory, social behavior, and social dominance in inbred strains of mice.

Students will learn to analyze experimental data and write a series of laboratory reports on the experiments done during class. In addition, students will write a term paper related to one of the experimental approaches.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B250, NS&B555**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL251 Laboratory in Basic Practices in Neuroscience
This course will provide students with the knowledge and some tools to solve problems in neurobiology. Topics covered include a fundamental review of neurobiology and approaches in neuroscience research methods, behavioral studies, tissue/cell preparation, and histology/microscopy.

Students will learn how the applications of advanced neuroscience techniques have answered fundamental questions in neurobiology and neurophysiology. Modern approaches and their applications will be discussed, including behavioral studies, tissue preparation and analysis, histology, and microscopy.

The learning outcomes will be assessed by a project, oral presentation of the project, written laboratory class reports (lab notebooks), and a lab practicum.
Offering: **Crosslisting**

Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B251**
Prereq: **NS&B213 OR BIOL213 OR PSYC240**

BIOL252 Cell Biology of the Neuron
Understanding the cellular biology of neurons is critical for understanding neurological disorders as well as neuropharmacological methods for treating the nervous system. In this course, we will explore how neurons function, focusing on structure-function relationships of the molecular building blocks of neurons. We will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include cytoskeleton, cellular polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, neuronal plasticity, and regeneration. This course is designed to follow on from NS&B213 Behavioral Neurobiology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-NSB**
Identical With: **NS&B252**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL254 Comparative Animal Behavior
In this survey course, we explore a wide range of animal behaviors at the proximate and ultimate levels of analysis. Main topics include: the principles of communication, genetic regulation of behavior, neuroethology, biological rhythms, hormones and behavior, reproduction, and animal cognition. Students gain foundational knowledge by engaging with textbook readings and traditional lectures. Students practice self-directed inquiry, peer-assisted learning, and scientific communication through in-class work sheets, group discussions, take-home assignments, and presenting topics of their choosing. Finally, students will learn about research and the academic career path through scholar highlights, interacting with guest speakers, and reading primary literature.
Offering: **Host**

BIOL256 Quantifying Evolution: The Genetics of Populations
How can we forecast the survival of an endangered species? How quickly can antibiotic resistance arise? Who is Lucy? Population genetics studies the genetic variation within and between populations that arise from several factors, including natural selection. Migration, mate choice, and habitat all influence the evolution of life. In this course, we will use mathematical modeling to describe how these fundamental forces change populations over time, and we will learn how these principles are used to breed our food supply, build our medicines, and manage our ecosystems. Class sessions will combine lectures with discussion and in-class problem-solving. Using these ideas, students will learn how evolutionary biologists reconstruct history using the principles of inheritance and variation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Prereq: **MB&B181**

BIOL257 Neurogenetics
Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Identical With: **NS&B257**
Prereq: **BIOL181 AND BIOL182**

BIOL263 Demystifying Data: Introductory Data Analysis and Modeling
How do scientists make sense of the data they collect, especially as datasets grow in size and complexity? In this course, students will learn fundamental concepts in data collection, statistics, and modeling through hands-on analysis of publicly available datasets from the COVID-19 pandemic. We will cover the effects of biases in data collection, models of epidemic growth and spread, and the principles of studying a rapidly evolving pathogen. While we will use motivating examples from the life sciences, students can expect to learn techniques and ways of thinking that will form a foundation for evaluating and analyzing data across scientific disciplines. Students will learn the basics of using the R programming language to visualize, analyze, and model data, so no previous programming experience is expected.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **CIS263**
Prereq: **None**

BIOL265 Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of

computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **MB&B265, COMP113, CIS265**
Prereq: **[MB&B181 or BIOL181]**

BIOL265Z Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics. MB&B/BIOL181 or POI: Those not meeting the prerequisite should contact the professor directly.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **NSM-BIOL**
Identical With: **CIS265Z, COMP113Z, MB&B265Z**
Prereq: **MB&B181 OR BIOL181**

BIOL266 Bioinformatics
This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **COMP266, MB&B266, CIS266**
Prereq: **[MB&B181 OR BIOL181]**

BIOL267 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding, diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Host**

BIOL270 Systems Biology with Programming
Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology. Students will spend the first part of the course learning how to program in Python in order to model, simulate, and visualize these systems. No previous programming experience is expected.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **CIS270**
Prereq: **BIOL181 OR BIOL181Z AND BIOL182 OR BIOL182Z**

BIOL271 Systems Biology with Programming
This course is similar to BIOL270, but only meets in the second half of the semester with BIOL270 and is designed for students with a solid background in programming in Python. Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology.

Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL295 Physiology and Cell Biology of Cancer
This course focuses on the cellular and physiological aspects of cancer, examining the major hallmarks of cancer. Recent advances in cancer treatment are also covered.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **None**
Prereq: **(MB&B181 or BIOL181) AND (MB&B182 or BIOL182) AND (BIOL212 or BIOL218)**

BIOL299 Waves, Brains, and Music
Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **NS&B299**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

BIOL302 Neurobiology of Aging
This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to the study of aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should have a clear understanding of what aging is and what effects it has on normal brain function. In class, I will introduce the topic with slide presentation and after that, we will discuss the topic based on the scientific article discussion. After the last class, students will have extensive opportunities for feedback and will write a project and present it in class as an oral presentation. Student evaluation will include weekly quizzes, project, a midterm and final exams, and class participation/attendance.

Course Objectives:

By the end of this course, students will:

1. Gain a Comprehensive Understanding: Develop a comprehensive understanding of the neurobiological processes associated with aging, including neurodegenerative diseases.

2. Explore Structural Changes: Examine structural changes in the aging brain, such as alterations in neuron density, synapse formation, and brain volume.

3. Analyze Functional Changes: Analyze functional changes in the aging nervous system, including changes in memory, cognition, sensory perception, and motor function.

4. Study Neurodegenerative Diseases: Investigate common neurodegenerative diseases associated with aging, such as Alzheimer's disease, Parkinson's disease, and age-related macular degeneration.

5. Explore Cellular and Molecular Mechanisms: Explore the cellular and molecular mechanisms underlying age-related changes in the nervous system, including oxidative stress, inflammation, and genetic factors.

6. Examine Potential Interventions: Review potential interventions and strategies to promote healthy aging and delay or mitigate age-related neurobiological changes.

BIOL302Z Neurobiology of Aging
This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to studying aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should clearly understand what aging is and its effects on normal brain function. In class, I will introduce the topic with slides presentation and after that, we will discuss the topic based on the scientific article discussion. After the classes, students will have extensive opportunities for feedback and will be requested to write a project for the last, oral presentation of the project in the class, and a final exam.

Identical With: **NS&B302Z**
Prereq: **NS&B213**

BIOL304 Glia: Not just neuronal glue!
Historically, neuroglial cells (i.e., astrocytes, oligodendrocytes, and microglia) were considered the space-filling cells of the brain, simply the brain's "glue."

Later, their primary role was considered metabolic support of neurons (e.g., buffer extracellular potassium, recycle neurotransmitters, myelination, etc.). However, the notion of glia as inert bystanders has recently been revised. It is now accepted that glial cells play critical physiological roles in normal nervous system development and function, including controlling brain wiring, modulation of synaptic transmission, regulating blood flow, and serving as the brain's lymphatic system just to name a few functions. Moreover, glia contributes to a variety of neurological disorders such as epilepsy, glioma, multiple sclerosis, neurodegenerative diseases, and psychiatric disorders like major depressive disorder and schizophrenia. Hence, these underappreciated cells are long overdue recognition. This is an interdisciplinary course in which students will engage in a focused, in-depth exploration of how glial cells contribute to neurological and psychiatric disorders. Lectures by both basic scientists and clinicians will highlight recent research on the molecular mechanisms by which glial cells contribute to the establishment and progression of neurological and psychiatric disorders.

This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes, students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include quizzes and assessments for a lay audience, a midterm and a final exam, class participation, and attendance.

Course Objectives:

1. Describe the development, histology, and normal physiological function of glial cells.

2. Describe the role inflammation plays in neurological and psychiatric conditions.

3. Describe the role traumatic brain injury plays in neurological and psychiatric conditions.

4. Describe the role genetics plays in neurological and psychiatric conditions.

5. Describe the physiology, pathology, and disease mechanisms of neurological and psychiatric conditions.

6. Demonstrate effective written communication skills to construct a succinct "News & Views" style summary of a primary research report for a lay audience.

Prereq: **NS&B213**

BIOL306 Ecology and Natural History of Freshwater Fishes of South America
South America has the highest diversity of freshwater fishes anywhere in the world. In fact, there are more than twice the number of mammals and about the same number of birds in the world. Why has this remarkable radiation occurred in a relatively short period of time? How can so many fishes coexist in the same rivers, utilizing the same resources? In this intensive course, we will travel to Colombia during spring break (March 7-21) in order to gain firsthand knowledge about the ecology and natural history of freshwater fishes in South America. We will learn about the ecological and environmental factors that contribute to perhaps the largest biological radiation on the planet.

Students will obtain firsthand experience with the South American tropics, freshwater fishes, and with doing experiments in the field. Each day there will be a combination of lectures and field or laboratory exercises. We will travel to and explore fish ecology in different types of rivers at different elevations. Students will gather and analyze data about biological, physical, and environmental issues that are covered in the lectures. The habitats that we explore will be both terrestrial and freshwater rivers. Our base will be at the Instituto Humboldt in Villa de Leyva, Colombia. We will interact with Colombian students who are studying ecology and biodiversity at the Institute in order to exchange ideas about current environmental issues.

All the costs of travel, lodging, and meals will be covered by the course.
Offering: **Crosslisting**

Prereq: **None**

BIOL308 Small Creatures, Big Impact: Vectors of Human Disease
This course will discuss the connection between public health and vector-borne disease (illness transmitted to humans through insects like mosquitoes, ticks, and flies). By understanding the role of entomology (study of insects) in global burden of these diseases, students will gain an understanding of why vector-borne disease account for more than 17% of all infectious diseases, causing over 700,000 deaths annually. Part 1 of this course will cover the biology and ecology of key vectors such as mosquitoes, ticks, snails, sandflies, kissing bugs, and flies, which are responsible for transmitting pathogens like malaria, dengue, Zika, West Nile, Lyme disease, anaplasmosis, Schistosomiasis, Leishmaniasis, Chagas disease, sleeping sickness, and many others. Students will learn about insect physiology, vector/parasite behavior, life cycles, and the environmental conditions that influence their populations. We will also explore vector control strategies and the impact of climate change on vector-borne disease transmission. In part 2 students will understand how limited access to healthcare, inadequate sanitation, and poor living conditions increase the risk of disease transmission by providing vectors the ability to thrive. Addressing these challenges requires a comprehensive approach that includes improving healthcare infrastructure, enhancing disease surveillance, and implementing sustainable vector control strategies. By the end of this course, students will have an understanding of the public health implications of vector-borne disease in developing countries and the entomological factors that contribute to disease burden worldwide, including epidemiology, prevention, and vector control methods. We will examine the socio-economic and environmental factors that contribute to the spread of these diseases and discuss strategies for effective intervention and policy-making. By understanding these unique challenges, students will gain insights into the global health disparities and the importance of tailored public health approaches.

BIOL310 Genomics Analysis
This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.

BIOL312 Global Change Biogeography
On our home planet, Earth, the current geologic epoch is characterized by rapid changes to the environment due to human behavior. Biogeography examines the spatiotemporal distribution of life on Earth, from species to ecosystems and from landscapes to continents. How is anthropogenic climate change modifying the distribution and function of organisms and ecosystems? What can we learn from the evolutionary history of the life-planet system that can help us understand the possible impacts of future climates on the biosphere? To address these questions rigorously, we will explore primary literature from a wide range of theoretical and empirical studies. The course emphasizes inquiry, contact with primary literature, discussion, statistical and spatial coding, learning to obtain data, and visualization. The beginning of the semester provides an overview of physical geography and the Earth System, with field and data experiences that build remote sensing and spatial analysis skills. The second half of the semester is focused on the exploration of relevant scientific literature based on student interests and recent papers, as well as independent research projects.

BIOL316 Plant-Animal Interactions
This course will explore the ecology and evolution of interactions between plants and animals, including mutualism (e.g., pollination, frugivory) and antagonism (e.g., herbivory, granivory), that are central to the functioning of ecosystems and the generation of biodiversity. The format will be seminar-style, involving reading, discussion, and student presentations of key papers on chosen topics. This course emphasizes reading and interpreting primary scientific literature and quantitative information, formulating original ideas in scientific inquiry, writing, and oral communication.

BIOL317 Genes and Mechanisms in Vertebrate Sex Determination
Sex determination in vertebrates is a highly plastic process that centers on the decision within a bipotential organ, the gonad, to differentiate into either an ovary or a testis. Interestingly, the "problem" of how to determine sex has been solved in many different ways across the animal kingdom. This course will explore the basic principles and molecular networks involved in sex determination across vertebrate species including fish, reptiles, birds, and mammals. The format will be primarily seminar-style, involving brief introductory lectures, reading, discussions, and individual and group presentations of key papers on chosen topics.

BIOL318 Nature and Nurture: The Interplay of Genes and Environment
Ever since Watson and Crick proposed the DNA molecule as a heritable genetic "code," biology has emphasized genes ("nature") rather than environmental influences ("nurture") as the primary agents of biological causation. This genetic determinism continues to shape perspectives beyond research, including such critical concerns as public health and human diversity. Recent insights to environmental and inherited epigenetic factors demand that we rethink this established view to build a more integrated understanding. In this advanced seminar, we consider how genetic and environmental factors jointly determine the development and behavior of organisms, including ourselves. After an initial series of lecture/discussion sessions on foundational concepts, this seminar course will consist of student-led discussions of scientific articles on genetic and environmental causes of specific diseases, capacities, and behaviors. Subject to class choice, possible topics will include: causes of lung cancer and of asthma; variation in IQ; the Human Genome Project; and "personalized medicine." Any 200-level course in genetics, development, or neuroscience can fulfill the required prereq; interested COE or other students without this background are encouraged to directly contact Prof Sultan to request a prerequisite override. Students gain understanding of scientific inquiry and interpretation, as well as specific knowledge of a range of human health issues and behavioral capacities. Through reading recent data papers, participating actively in small-class discussions, and giving short oral presentations, students will build their skills in critical thinking about biological and environmental questions and related ethical issues, scientific scholarship, and oral communication of scientific information.

BIOL320 Everything is Everywhere: Environmental Microbiomes
In 1934, the ubiquity and diversity of microbial life led Baas Becking to hypothesize that "everything is everywhere but the environment selects." Despite being proposed over 90 years ago, this hypothesis continues to motivate cutting-edge research elucidating the adaptations that microbes have evolved in environments all over the world. In this class, we will address this hypothesis by sampling, sequencing, and analyzing local microbial communities (i.e., environmental microbiomes). Students will gain hands-on experience formulating their own scientific questions, collecting samples from the environment, extracting DNA, and assembling novel metagenomes using bioinformatics methods. Key concepts in microbial genomics, evolution, and ecology will be covered through mini-lectures, primary literature, and

group discussion. The class will culminate with students authoring a draft scientific manuscript. Students should have familiarity with advanced concepts in microbiology, evolution, or ecology as evidenced by completion of any one of the required prerequisite classes.

BIOL322 Cell Migration in Development and Disease
What do the formation of an embryo, the healing of a wound, the surveillance of the immune system, and the invasion of metastatic cancer all have in common? Each of these processes requires the coordinated movement of cells, alone or in groups. In this course, we will learn how and why cells move, and explore what happens when they stop moving properly. We will build up our knowledge from "small" to "large," spanning biological scales from molecules to tissues. Topics will include: (1) the biomolecules of migration: cytoskeleton, focal adhesions, molecular motors; (2) cellular locomotion: protrusion, adhesion, contraction, retraction; (3) cell mechanics and force generation; (4) collective motions during morphogenesis and repair; (5) mechanisms for steering migration: chemotaxis, haptotaxis, galvanotaxis, durotaxis, etc.; (6) cancer as a disease of aberrant cell migration. Throughout the course we will emphasize model systems, experimental design, and technology and measurement techniques. We will focus on seminal works, with attention paid to how these works rippled forward in time, along with cutting edge research.

BIOL327 Evolutionary and Ecological Bioinformatics
Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.

BIOL328 Chemical Senses
The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.

BIOL332 Genomics Era Cell and Development
Each decade, technological advances shape the kinds of research questions that can be asked and solved. This past decade, sequencing technologies have delivered rich data sets analyzing genomes and transcriptomes. In this functional genomics course, we'll discuss several cases where the starting point for research was a genetic change (or several genetic changes) found in a tissue, disease, or population. We'll look at the cell and molecular research that was then done and what was learned. For case studies that relate to disease we will also consider how research discoveries shaped treatment options.

This course will greatly expand students' foundational knowledge of cell and developmental biology. Students will also develop their data interpretation and communication skills. Since we all harbor genetic changes that modify our susceptibility to a disease or condition, we will also think critically about moral and ethical issues that arise from the case studies we discuss in class.

BIOL333 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in

particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

Prereq: **MB&B181 OR BIOL181**

BIOL334 Shaping the Organism
We are composed of tissues and organs of distinct shapes, but how are these shapes formed? To answer this question, biologists turn to the embryos and developing tissues of model organisms to study the mechanisms that build tissues with distinctive shapes and patterns. These mechanisms include changes in the cytoskeleton and cell adhesion, changes in cell shape, changes in the forces within a cell and across a tissue, and signals that determine whether cells live or die. It turns out that most of the processes required to correctly shape embryos and tissues have also been found to function incorrectly in a variety of human diseases!

This is a part-seminar, part-laboratory course that examines tissue and pattern generation in Drosophila (the fruit fly), an accessible model organism that has been extensively used to study the conserved processes and proteins that shape tissues. First, we will examine how the Drosophila embryo is shaped and patterned. Second, we examine how the Drosophila eye is assembled and patterned. Students will set up Drosophila crosses, use popular techniques to manipulate protein expression, and dissect and image fly tissues.

BIOL337 The Origins of Bacterial Diversity
Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

BIOL340 EvoDevo: Origins of Variation in the Phenotype
This advanced seminar explores the field of evolutionary developmental biology (EvoDevo). EvoDevo seeks to understand the developmental mechanisms underlying the origin of newness in the biological world, by exploring the origin of morphological novelty, understanding how development permits (or constrains) the types of bodies that can be produced, and describing how developmental mechanisms themselves evolve. In this course, we will explore central concepts in EvoDevo, consider the role of development in evolution writ large, and connect both to case studies from the primary literature. The course format will consist of a mixture of lecture, class discussion, guest lectures by visiting evolutionary developmental biologists, and assignments focusing on both oral and written scientific communication skills.
Offering: **Host**

BIOL344 Developmental Biology of the Nervous System
Near the top of the list of unsolved mysteries in biology is the enigma of how the nervous system constructs itself. Here is a part of our body that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has

begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. We will also discuss some disorders and dysfunctions that may happen during the neurobiology of development, such as cerebral palsy, autism, and attention-deficit hyperactivity disorder (ADHD). We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a mid-term and a final exam, and class participation.

BIOL347 Mammalian Cortical Circuits
The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Most of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

BIOL351 Neurobiology of Learning and Memory
Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

BIOL353 Neurobiology of Neurological Disorders
This course aims to provide a foundation in the underlying mechanisms of neurological and psychiatric disorders. We will explore through lectures and readings of primary literature a number of important neurological and psychiatric diseases, including including schizophrenia, Alzheimer's disease, sleep disorders, anxiety disorders, and Parkinson's disease. This course focuses on the fundamental molecular and cellular mechanisms that underlie neurological disorders and is designed to engage students who wish to study basic aspects of brain function.

BIOL357 Sex and Gender: From Synapse to Society
From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.
Offering: **Host**

Prereq: **BIOL182 AND NS&B213**

BIOL358 Neurobiology of Movement
This course is designed to take a comparative approach to understanding the major motor systems of the brain and will cover the basic elements of motor "control." However, the motor system does much more than contract muscles. Even the most basic movements such as walking require whole-body coordination that must be learned and adapted to our environment. During active sensation, motor systems even modulate our sensory perceptions. Much of what we have learned about motor systems comes from animals as diverse as crickets, electric fish, and birds. This course uses a comparative approach to understand the functions various brain regions contribute to our active lives.

BIOL360 Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits
This course will examine structural and functional neuroplasticity in the nervous system. The ability of the nervous system to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and discover how adult neurogenesis is altered by the aging process, physical exercise, stress, and neuropsychiatric disorders, such as epilepsy and Alzheimer's disease. We'll also learn about potential stem cell therapies for enhancing brain repair and plasticity after brain injuries. Students will prepare for class by reading scientific papers and reviews on the topic. In class, I will introduce the topic with slide presentations, and after that we will discuss the topic based on the scientific article discussion. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a final exam, and class participation.
Offering: **Crosslisting**

BIOL365 Calderwood Seminar in Public Writing: 21st-Century Biology
Twenty years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the human genome was nearing release, a year ahead of schedule. Biologists envisioned an era of unparalleled progress leading in a straight line from DNA sequence data to the precise causes of human health and behavior, and to the development of genetically modified crops that would end global hunger. As to populations in natural habitats, any evolutionary impacts of climate change were thought to be far in the future. Instead, 21st-century biologists are scrambling to understand the human-caused evolutionary changes taking place in our lifetimes. Genetically modified crops have led to unforeseen threats to the survival of their wild relatives, while constructed ecosystems provide alternative farming approaches. Molecular insights have uncovered the unexpected roles of epigenetics and the microbiome in development and disease. Tools are available to not just decode genes but to edit them, at once raising new possibilities and urgent ethical questions. How can we approach this changed biological prospect? The course invites students to engage with these broadly resonant issues by framing them for general audiences rather than in specialized scientific terms. Drawing on common content from recent journal articles, guest research lectures/Q&A sessions, and a field trip to a local kelp-shellfish farm, students will unpack these contemporary themes by explaining the basic science in their own voices while considering them in larger contexts and exploring connections to their own knowledge and experience. The course will build strengths in communication and collaboration through individual writing and revising (in a variety of formats), active peer editing, and in-class workshopping of each piece, in a collective student-led format.

BIOL365Z Writing 21st Century Science
Twenty-five years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the Human Genome was nearly complete, a year ahead of schedule. Biomedical scientists envisioned an era of unparalleled progress, leading in a straight line from the new DNA sequence data to human health and behavior. At the same time, new technologies were expected to produce genetically modified crops that would end global hunger. Any evolutionary impacts of climate change on animals and plants in nature were thought to be far in the future. Instead, molecular insights have uncovered unexpected factors in development and disease including epigenetics and the microbiome. Genetically modified crops have led to unforeseen threats to their wild relatives, while constructed ecosystems are providing completely new ways of farming. For natural populations, twenty-first century biologists are scrambling to understand the human-caused evolutionary changes taking place within our lifetimes. Tools are available not just to decode genes but to edit them, at once raising new possibilities and urgent ethical questions.

This course invites students to grow as writers by engaging with these new areas of scientific investigation in an intensive workshop format. Drawing on common content from recent journal articles, Q&A sessions with guest researchers, and a virtual field trip to an innovative farm, students will unpack contemporary biology by explaining the basic science in their own voices, while considering the science in larger societal contexts through connections to their own knowledge and experience. Through science journalism pieces, blogposts, Powerpoint slideshows and researcher profiles, students will learn to communicate cutting-edge scientific findings in clear, non-specialist language. The course will build strengths in communication and collaboration through individual writing and revising, active peer editing, and in-class workshopping of each piece, in a collective student-led format. In place of a final exam, students submit a final essay reflecting on their experience in the course.
Offering: **Host**
Grading: **A-F**

Identical With: **ENVS365Z, STS369Z, WRCT301Z**
Prereq: **None**

BIOL368 Ecological Resilience: The Good, the Bad, and the Mindful
This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.
Offering: **Crosslisting**

Identical With: **ENVS369, E&ES342**
Prereq: **[E&ES197 or BIOL197] OR [BIOL182 or MB&B182]**

BIOL373 Exploring the Brain-Body Interface: The Neuroscience of Basic Survival
Basic survival depends on the brain's regulation of fundamental behaviors and physiological pathways, such as drinking, eating, digestion, thermoregulation, breathing, and cardiovascular function. How do the brain and body communicate with each other to achieve homeostasis under different physiological states, and what goes awry in disease? How have species adapted to thrive in challenging environments, such as extreme temperatures and resource scarcity? In this advanced seminar, students will take a deep dive into the exciting research taking place at the brain-body interface. We will explore the main components of the peripheral nervous system, such as the vagus nerve and the dorsal root ganglia, that act as gatekeepers into our internal and external sensory worlds. We will also explore pathways within the central nervous system that regulate our basic bodily functions. By reading primary literature and review papers and participating in in-class discussions, students will gain deep knowledge of this burgeoning field of neuroscience. Through short written assignments and oral presentations on topics of their choosing, students will gain practical skills in scientific scholarship and communication.

Grading: **OPT**

BIOL515 Evolution in Human-Altered Environments
Human activities have altered natural environments and, indeed, have created entirely novel ecosystems such as cities and high-input farms. This course examines how these human alterations to the environment affect the evolution and coevolution of diverse organisms. Starting with an intensive overview of microevolutionary processes, we will consider a number of contemporary scenarios: evolutionary response to environmental contaminants, exploitation of natural populations, and global climate change; evolution in urban and agricultural ecosystems; and the evolutionary impact of nonnative, invasive, and genetically modified organisms.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL215, ENVS210**
Prereq: **[BIOL182 or MB&B182]**

BIOL516 Plant-Animal Interactions
This course will explore the ecology and evolution of interactions between plants and animals, including mutualism (e.g., pollination, frugivory) and antagonism (e.g., herbivory, granivory), that are central to the functioning of ecosystems and the generation of biodiversity. The format will be seminar-style, involving reading, discussion, and student presentations of key papers on chosen topics. This course emphasizes reading and interpreting primary scientific literature and quantitative information, formulating original ideas in scientific inquiry, writing, and oral communication.
Offering: **Crosslisting**
Grading: **A-F**

BIOL518 Nature and Nurture: The Interplay of Genes and Environment
Ever since Watson and Crick proposed the DNA molecule as a heritable genetic "code," biology has emphasized genes ("nature") rather than environmental influences ("nurture") as the primary agents of biological causation. This genetic determinism continues to shape perspectives beyond research, including such critical concerns as public health and human diversity. Recent insights to environmental and inherited epigenetic factors demand that we rethink this established view to build a more integrated understanding. In this advanced seminar, we consider how genetic and environmental factors jointly determine the development and behavior of organisms, including ourselves. After an initial series of lecture/discussion sessions on foundational concepts, this seminar course will consist of student-led discussions of scientific articles on genetic and environmental causes of specific diseases, capacities, and behaviors. Subject to class choice, possible topics will include: causes of lung cancer and of asthma; variation in IQ; the Human Genome Project; and "personalized medicine." Any 200-level course in genetics, development, or neuroscience can fulfill the required prereq; interested COE or other students without this background are encouraged to directly contact Prof Sultan to request a prerequisite override. Students gain understanding of scientific inquiry and interpretation, as well as specific knowledge of a range of human health issues and behavioral capacities. Through reading recent data papers, participating actively in small-class discussions, and giving short oral presentations, students will build their skills in critical thinking about biological and environmental questions and related ethical issues, scientific scholarship, and oral communication of scientific information.
Offering: **Crosslisting**

Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL318, ENVS338**
Prereq: **BIOL214 OR BIOL218 OR [BIOL210 or MB&B210] OR [BIOL224 or NS&B224]**

BIOL527 Evolutionary and Ecological Bioinformatics
Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.
Offering: **Crosslisting**

Identical With: **BIOL327, COMP327, COMP527, CIS327**
Prereq: **[BIOL182 or MB&B182] OR [BIOL196 or MBB196] OR COMP112 OR COMP211**

BIOL533 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

BIOL537 The Origins of Bacterial Diversity
Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

BIOL540 EvoDevo: Origins of Variation in the Phenotype
This advanced seminar explores the field of evolutionary developmental biology (EvoDevo). EvoDevo seeks to understand the developmental mechanisms underlying the origin of newness in the biological world, by exploring the origin of morphological novelty, understanding how development permits (or constrains) the types of bodies that can be produced, and describing how developmental mechanisms themselves evolve. In this course, we will explore central concepts in EvoDevo, consider the role of development in evolution writ large, and connect both to case studies from the primary literature. The course format will consist of a mixture of lecture, class discussion, guest lectures by visiting evolutionary developmental biologists, and assignments focusing on both oral and written scientific communication skills.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL340**
Prereq: **BIOL218 OR BIOL214**

BIOL542 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.

Offering: **Crosslisting**
Grading: **A-F**

BIOL544 Neuropharmacology
This course will introduce students to the physiological and molecular effects of drugs on neuronal activity and behavior. We will cover key concepts in neuropharmacology, including pharmacokinetics and pharmacodynamics, alongside techniques used in modern pharmacotherapeutic discovery as it relates to the treatment of neurological and neuropsychiatric disease. Student assessment will include in-class quizzes and exams.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL244, NS&B244**
Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

BIOL545 Developmental Neurobiology
Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.
Offering: **Crosslisting**

Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL345, NS&B345, NS&B545**
Prereq: **(NS&B213 AND MB&B181 AND BIOL182) OR (NS&B213 AND MB&B181 AND BIOL196) OR (NS&B213 AND MBB195 AND BIOL182) OR (NS&B213 AND MBB195 AND BIOL196)**

BIOL546 The Forest Ecosystem
This course examines basic ecological principles through the lens of forest ecosystems, exploring the theory and practice of forest ecology at various levels of organization from individuals to populations, communities, and ecosystems. Lectures, lab exercises, and writing-intensive assignments will emphasize the quantification of spatial and temporal patterns of forest change at stand, landscape, and global scales.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**

Prereq: **BIOL182 OR E&ES197**

BIOL549 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

BIOL550 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

BIOL557 Advanced Research Seminars in Biology
This course focuses on the specific research projects of individual graduate students in the Department of Biology, and it comprises student presentations and discussion including the department faculty, graduate students and post doctoral fellows. The course offers a forum for presenting new results and exploring new ideas, as well as for providing researchers with feedback and suggestions for solving methodological problems. It also provides an opportunity for students to become familiar with the wide range of biological research taking place in the department.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

BIOL567 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding, diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how

this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL267, IDEA267**
Prereq: **BIOL208 OR BIOL212 OR BIOL218 OR BIOL228 OR PHYS207**

BIOL571 Teaching: Techniques and Theory
This course will help teaching assistants working with the Principles of Biology labs prepare to teach weekly lab sessions. Students will obtain hands-on experience with various techniques in the areas of molecular and cell biology. In addition, best teaching practices will be discussed and students will share their teaching experiences with each other.

This course may be repeated up to two times for credit.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **MB&B571**
Prereq: **None**

BIOL572 Teaching: Techniques and Theory
The course will help teaching assistants working with the Principles of Biology labs prepare to teach weekly lab sessions. Students will obtain hands-on experience with various techniques in the areas of anatomy and physiology, evolution, and ecology. In addition, best teaching practices will be discussed, and students will share their teaching experiences with each other.

This course may be repeated up to two times for credit.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

BIOL574 Concept Building and Pedagogical Development
The course will help course assistants and teaching assistants working with BIOL 182 (Principles of Biology II lecture) prepare to lead weekly problem-solving sessions. Students will review the content and core concepts of each problem-solving session, develop strategies to use in assisting students with the Friday problems, review the progress of the peer mentored study sessions, and discuss pedagogical best practices.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Prereq: **None**

BIOL590 Plant Form and Diversity
The course begins with an overview of plant evolutionary history, then covers the basic structure and function of the plant body, the plant life cycle in nature, including interactions with animals, and ecological diversity of plants in contrasting habitats. Special events include a field trip to the Smith College Botanic Garden, two hands-on days for working with living specimens, and a special guest lecture by a local plant biologist.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL290, ENVS286**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

BIOL599 Cellular Neurophysiology
This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL245, NS&B245**
Prereq: **[NS&B213 or BIOL213 or PSYC240]**

CENTER FOR GLOBAL STUDIES (CGST)

CGST131B Writing About Places: Africa
This course is one in a series called "writing about places" that explore the long tradition of writing about travel and places and changing attitudes toward crossing cultural borders. We will examine historical and cultural interactions/ confrontations as portrayed by both insiders and outsiders, residents and visitors, colonizers and colonized--and from a variety of perspectives: fiction, literary journalism, travel accounts, and histories. Writing assignments will include critical and analytical essays as well as encouraging students to examine their own experiences with places and cultural encounters.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL131B**
Prereq: **None**

CGST136 Writing for Fellowships
National fellowships are prestigious, competitive awards that enable the recipient to pursue graduate study, a research project, or travel abroad. While fellowship winners experience great personal growth and gain credentials that aid future success, preparing the application itself helps students clarify their

goals and learn how to present themselves to an unfamiliar audience, such as future employers. In this course students will learn about various fellowship opportunities, identify steps toward building a strong candidacy, and create a portfolio of compelling application materials. To inspire creative thinking, we will read short writings in various genres; authors may include Octavia Butler, Jose Antonio Vargas, Ruth Bader Ginsburg, N.K. Jemisin, Ursula Le Guin, and Ocean Vuong. We will then craft personal statements and other fellowship materials, taking them through a rigorous writing process with multiple revisions. By completing the course students will grow as writers and gain skills that can also be used in writing grants and seeking a job.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

CGST141 Depicting Death in Literature
This course analyzes the theme of death primarily within French and francophone writing (in English translation), tracing the evolution of death imagery over time in literary texts. The curriculum will investigate various contexts related to the environment and language usage, offering a nuanced understanding of how the portrayal of death has changed in literature.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **HA-CGST**
Identical With: **CHUM141, RL&L211**
Prereq: **None**

CGST155 Portuguese (Romance Language Speakers) I
This course offers students who have a strong working knowledge of Spanish or another Romance language the opportunity to study Brazilian Portuguese in an accelerated format. This course is conducted entirely in Portuguese. Completion of both semesters is required for study abroad in Brazil.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **PORT155**
Prereq: **FREN112 OR ITAL112 OR SPAN112**

CGST201Z Teaching English as a Foreign Language (TEFL)
This course is designed for students that are considering teaching English outside of the United States in the future. It may be particularly useful for those considering applying for a Fulbright English Teaching Assistant, the JET program, the Peace Corps, or continuing after Wesleyan to get a TEFL or TESOL certificate or master's degree. The course will include basic language acquisition theory, TEFL teaching techniques, readings by sojourners in various programs, and opportunities to reflect on personal reasons for choosing to teach abroad.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT201Z, EDST201Z**
Prereq: **None**

CGST202 Preparing to Study Abroad: Culture and Language
This course is designed to facilitate students' preparations to study abroad during the following term. Through exploration of intercultural and language learning theories, intercultural communication strategies, and theories about culture, students will build a foundation for their learning and achieving their individual goals during the semester abroad. The course is open to those who are studying abroad in English as well as those who are studying a language. The course is graded at the end of the term, but ungraded check-ins during the study abroad experience are required for the credit to be awarded.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **SBS-CGST**
Prereq: **None**

CGST203 Returning from Study Abroad: Integrating Your Experience
This course will facilitate returning students' integration of the study abroad experience into their academic and personal lives. Through guided activities, readings, and weekly writing assignments, students will reflect on the many facets of the study abroad experience and how they relate to identity, academic interests, and future plans, including fellowship applications and career opportunities abroad.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **SBS-CGST**
Prereq: **CGST202**

CGST204 Artificial Intelligence and Other Digital Tools for Learning Another Language
This course will explore the applications of generative artificial intelligence and other technologies to enhance the language learning process. Through readings of current literature in the fields of Computer Assisted Language Learning (CALL) and language pedagogy, as well as hands-on experience, students will develop an understanding of guiding principles for implementing various technologies soundly in language learning activties. Class format will include conversations based on readings and work on projects using various technologies such as generative AI, augmented reality, and virtual reality environments; video games; and dedicated language learning software. Students will develop sample learning activities, participate in a presentation for the language teaching/learning community, and develop a project of their choice. This course is well suited to students with an interest in learning languages and understanding pedagogical approaches to the teaching of languages and cultures.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-CGST**
Prereq: **None**

CGST205 Introduction to Global Engagement
This team-taught and community-engaged seminar introduces students to the ideas and practices central to strengthening one's intercultural competence, in part through a critically informed approach to globalization. The course views "cultures" as porous, fluid, internally contested, and often overlapping -- and yet still as vital realities shaping the lived experiences of all people. Building intercultural competence requires not just acquiring new knowledge but also practicing the skills and honing the attitudes that are needed to interact effectively and appropriately on a basis of informed, mutual respect. This course is a core requirement of the Global Engagement Minor (GEM); students will begin to work with the eportfolio that they will use over their time in GEM to track, reflect on, and synthesize the various experiences making up the minor.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-CGST**
Prereq: **None**

CGST206 Global Engagement in Practice, Swahili Language and NGO Case Study in Kenya
This integrative, hands-on course is only open to Global Engagement Minors selected during the fall application process. Building on the theoretical

frameworks and practical tools introduced in the gateway course, CGST 205: Introduction to Global Engagement, it weaves together Swahili language learning, regional studies, and an immersive spring break engagement with an educational NGO in Nairobi, Kenya. Situated within the broader regional education landscape, the course invites students to contextualize the NGO's work while also making their experience personally relevant through the design and implementation of a micro-project aligned with their academic interests. Course content introduces key historical, cultural, and contemporary dynamics of East Africa, with particular attention to the NGO's role within this evolving ecosystem. Through structured reflection and post-travel analysis, students critically examine their field experiences, strengthening their intercultural competence and deepening their global perspective. Throughout the semester, students will study beginning Swahili while exploring the broader context of the case study NGO, Kenya Education Fund. Course content will introduce students to key historical, cultural and contemporary dynamics of the East African region, with particular attention to the youth-led movements shaping present-day Nairobi and the NGO's role within that landscape. In preparation for the trip, students will design a personalized micro-project aligned with their academic interests, to be implemented during their time on the ground. Upon return, they will reflect on and analyze their experiences, deepening their intercultural understanding and global perspective.

Credits: **1.00**
Gen Ed Area: **HA-CGST**
Prereq: **CGST205**

CGST208 ¿Convivencia o conflicto?: Las tres culturas de la España medieval a través del arte (CLAC.50)
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual wellbeing. This Spanish-language section complements the ARHA 310 curriculum, by exploring the resonance between medieval experiences of identity, pluralism, appropriation, and exchange and our own uneasy attempts at building a multiethnic, multicultural society. This class will be conducted in Spanish. ARHA 208 is open to intermediate and advanced Spanish learners (SPAN 113 and above), bilingual students, and heritage speakers. Enrollment in ARHA 310 is optional but encouraged.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **ARHA208**
Prereq: **None**

CGST210 Language and Thought: Introduction to Linguistics
What makes human language unique? This course is an introduction to the study of human language and its underlying properties. Much of our linguistic competence lies below the level of conscious awareness, and linguists seek to uncover the subconscious principles and parameters that govern our knowledge of language. This course first explores the core theoretical areas of linguistics: phonology (sound structure), morphology (word structure), syntax (sentence structure), and semantics (meaning). Then, we will explore such topics as the workings of language use, language variation, and first- and second-language acquisition.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CGST**
Prereq: **None**

CGST213F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)
This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT135F**
Prereq: **None**

CGST214 Language Shift, Change, and Loss
South Asians (India and Pakistan) are multilinguals or at least bilinguals. Most of the world's population is at least bilingual, if not trilingual or more; nevertheless, fluent bilingualism in the United States is relatively uncommon, and biliteracy is even more rare. However, much of the research on language development and bilingualism has been conducted in the United States, even though we (USA) are a "minority world population" in these matters and we interpret the research findings in ways that most of the world's multilingual speakers would find unusual. In this course, we will study both first language and multiple language development. We will look carefully at both simultaneous bilingualism (early bilingualism, bilingualism as a first language, or "bilingualism from the crib") and sequential bilingualism (learning a second language, or more, after the first language is established). We will explore language shift (from mother tongues to majority language), and change and loss from South Asians' perspectives and how these perspectives are different from and similar to the rest of the world, and consider what should be done for language maintenance.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-CGST**
Identical With: **GSAS214**
Prereq: **None**

CGST215 What is (a) Language?
Scholarly inquiries into language have always faced the distinctive (though not unique) problem of how to define their object of study. What is language? Language in general, human language, a particular language, language as opposed to dialect or idiolect, etc.

This course will not answer these questions. It will, however, examine the most important and influential ways that they have been formulated and answered throughout the Western tradition of linguistic inquiry. Our survey will be organized around two main tendencies that are sometimes distinct but often complementary. First, the question of origins: Where does (a) language come from, and what does this tell us about its nature? We'll look at etymology and theories of language change alongside thought experiments and evolutionary theories that try to narrate the emergence of language from nonhuman forms of animal communication. Second, the questions of structure and function: How does (a) language work; what do we use it to do? We'll look at the medieval trivium of grammar, logic, and rhetoric, alongside the (approximate!) modern analogues of morphosyntax, semantics, and pragmatics. Our goal will be to get a sense of the major theoretical issues that have run through scholarly inquiries into language(s) across disciplines ranging from linguistics and philosophy

through anthropology, sociology, and literary theory, to cognitive studies and evolutionary biology.

While our scope is large, our method will be narrow, focusing on close readings of important primary texts in the history of Western linguistic thought. Since our emphasis will be on the coherence of theoretical positions rather the coherence of historical narratives, we'll focus especially on works that have exerted the strongest influence on contemporary understandings of language, particularly those from the 20th and 21st centuries.

CGST218 Teaching Spanish K-12: Second Language Pedagogy (CLAC 0.5)
This is a community engagement course in which students learn basic principles of language pedagogy and language acquisition to inform their teaching of Spanish to children at one of the Middletown public schools. Readings in English and Spanish; class discussion and assignments in Spanish. Students will familiarize themselves with characteristics of second language (L2) learning and teaching, a basic know-how on analyzing and preparing materials for language learning/teaching, and L2 teaching as a profession.

Language and course requirement: Students must have recently taken a SPAN course numbered 221 or above. Preference will be given to EDST and HISP majors, as well as juniors and seniors.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **SPAN204, EDST204**
Prereq: **None**

CGST220 Italian Gaming Lab: Using Tabletop Games for Language Learning (CLAC.50)
Italian Gaming Lab is designed as a game-based Italian language laboratory that will focus on why and how tabletop games can be effective tools for language learning; examples will include board games, card games, and tabletop role-playing games (TTRPGs), an increasingly popular type of game that is based on collaborative storytelling in which participants either impersonate one or more characters or create and organize entire worlds.

In this CLAC course, we will explore how a game-informed pedagogy can work in Italian language and culture classrooms and to highlight analog gaming approaches that have worked inside and outside the language classroom. We will discuss the basics of Game-Based Learning (GBL) applied to L2 acquisition, as well as play a series of games that can illustrate the gameful principles previously studies. Participants will discuss the application of gaming principles to L2 acquisition and create reports and playful presentations on their linguistic journey through play. The course offers students the opportunity to use language creatively and to develop critical knowledge within the rising and innovative field of Game-Based Learning and educational game design.

The course will be conducted in Italian, and games will be played in Italian. Both intermediate/advanced learners of Italian (second-year level or above) and native speakers are welcome. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.
Offering: **Crosslisting**

Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **ITAL220**
Prereq: **ITAL102**

CGST221 Food in Japanese Media (CLAC.50)
This 0.50 CLAC section is conducted in Japanese and will feature Japanese-language media (documentaries, films, TV shows, anime, and some texts such as news articles and manga). It is designed to supplement CEAS 210: From Tea to Connecticut Rolls: Defining Japanese Culture Through Food. All materials and discussion will be in Japanese. There may be some writing assignments depending on ability. The section is open to students with Japanese-language ability, from intermediate level to native speakers. With the instructor's approval, this section may be taken independently of the parent course. Evaluation will be primarily based on participation, effort, and completion of assignments.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-CEAS**
Identical With: **CEAS211**
Prereq: **None**

CGST222 Translating Modern Japanese Song Lyrics (CLAC.50)
This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other's choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-CEAS**
Identical With: **JAPN285**
Prereq: **JAPN218**

CGST223 French Literary Masterpieces on Screen (CLAC 0.5)
This CLAC course is linked to the FYS RL&L 252F: French Literary Masterpieces in Translation and on Screen. In this CLAC course, conducted entirely in French, students will have the opportunity to read the texts in their original language, and to hone their French speaking, listening, and writing skills. Assignments will include written commentaries (i.e., close readings) and short presentations on the material. As for the films, students in the CLAC course will be expected to watch and discuss French-language adaptations. This CLAC course is intended for students who have at minimum an advanced intermediate level of French. Learners of French as well as native and heritage speakers of French are welcome. Credit: 0.5. Regardless of students' previous exposure to the French language, including AP and IB courses, students interested in the CLAC course must take Wesleyan's French placement test and score into at least FREN 215 (Advanced Intermediate French). Should they place into FREN 215, they must enroll in this class in order to be eligible for the CLAC course. Students who place into FREN 112 or below will not generally be eligible due to the degree of difficulty, though students may submit a petition. Moreover, all students

must meet with the instructor before enrolling in the CLAC course for an oral comprehension and expression evaluation. This CLAC course, in combination with the FYS in English, will count toward the French Studies Major or Minor, as well as the Romance Studies Major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **FREN253F**
Prereq: **None**

CGST224 Living a Good Life: Chinese Lab (CLAC.50)
This optional "lab" class is intended for students (1) who have taken or are currently taking PHIL 210: Living a Good Life; and (2) who have little or no exposure to classical Chinese. Each weekly session will introduce students to aspects of the classical Chinese language--the written language of pre-20th-century China. Students will be able to read (in Chinese) and discuss (in English) key passages from the Confucian classics on which the Living a Good Life courses is partly based. No previous knowledge of Chinese (classical or modern) is necessary.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Identical With: **PHIL151, CHIN151**
Prereq: **None**

CGST225 Living a Good Life: Greek Lab (CLAC.50)
This half-credit "Greek Lab" uses a slow reading of Plato's Republic to invite students into the world of Ancient Greek. In the first three weeks of the semester, students will be introduced to the Ancient Greek alphabet and explore the meanings of two key Greek philosophical terms -- eudaimonia (often translated as "happiness" or "flourishing") and dikaiosune ("justice" or "righteousness") -- that will set the stage for our study of Plato. In subsequent weeks, we will progress through each of the ten books of the Republic, highlighting a pivotal Greek keyword in each class session and discussing how its nuances inform Plato's argument for the good life as the just life.

No prior experience with Greek (ancient or modern) is required, and all readings and discussion will be geared toward students with little to no background in classical languages. Our goal is twofold: to develop an appreciation for Attic Greek, and to discover how direct exposure to the language enhances our understanding of a core text in the history of philosophy. Through short reading assignments prior to class, followed by group work and guided discussion in class, students will gain a unique perspective on some of philosophy's most enduring questions, while also developing the tools to navigate Ancient Greek terminology with confidence. Please note: this course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative and is not meant to replace a full introductory course in Ancient Greek. Students seeking more in-depth language training should enroll in GRK 101.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-PHIL**
Identical With: **PHIL152**
Prereq: **None**

CGST226 French and Francophone Gastronomy (CLAC .50)
This course explores the variety of French and Francophone gastronomy through texts, recipes, and other media such as films and cooking shows. Through these materials, students will reflect on the relationship between food and culture and the shape it takes in French and Francophone cultures. They will develop a deeper knowledge and appreciation for various foods and dishes. The course will include a hands-on component through which students will cook and taste foods from various areas in the Francophone world. The course will culminate in a final public event during which students will introduce and share foods from the Francophone world, which attendees will have the opportunity to taste. In addition to weekly meetings, there will be a few cooking workshops. Grade will be based on class participation, weekly reflection journals, a final presentation, and a final paper. This course is taught entirely in French. Readings, written assignments, and class discussions will be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. This course will count as one course toward the French studies major and minor, the Romance Studies major, and the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

CGST227 Writing Short Fiction in Spanish
This course will be both an examination of the short story form in Latin American letters, a genre that has been crucial to the region's intellectual traditions and its ruptures, and a deep exploration of the act of writing short fiction in Spanish. By examining diverse aspects of the craft of fiction writing, and through a discussion of their own writing and that of their peers, students will search for their (multilingual) voice to explore some of their philosophical, affective and linguistic concerns, become stronger writers and storytellers and improve their skills in Spanish. They will also familiarize themselves with some of the most captivating fiction produced by Latin American and Latinx short story writers over a century.

CGST229 Language and Politics: Making and Unmaking of Nations
This course explores the key topics at the intersection of language and politics, including language choice; linguistic correctness; (self-)censorship and hate speech; the performance of ethnic and national identity in language; gender politics and "powerful" language; rhetoric and propaganda; and changing conceptions of written language, driven in part by technological advances. One of the examples of such topics is Tweet politics or incivility on the web around

the globe. This course consists of three modules. In the first two modules the above-mentioned topics will be discussed in general, while in the last module we will see how preferences in language policies and politics played a significant role in making and unmaking of nations in different parts of the world, from South Asia to East Asia to North America.

CGST230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s
In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

CGST231 Love and Suffering in Ancient Rome (CLAC.50)
In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

CGST233 Introduction to ASL / English Interpretation (CLAC 0.5)
Having completed course work in Beginning ASL I, II and Intermediate I, II, students who have demonstrated a strong interest in continuing their studies at a more sophisticated and challenging level may find this course work interesting pursuant to becoming a professional, credentialed Sign Language Interpreter.

This experience will provide students with a working knowledge of the profession of interpreting including the Code of Professional Conduct, certification criteria, the roles and responsibilities of a professional interpreter and discussions of the role of the interpreter in a variety of professional settings including educational, medical, legal, the performing arts, counseling, and rehabilitation.

Students who attend this course demonstrate that they are able to express in ASL, with some confidence, routine and everyday experiential topics within a conversational format with some elaboration. They demonstrate clear and accurate signing and fingerspelling at a moderate rate of speed.

This coursework uses a process-oriented approach for applying the essential cognitive strategies for interpretation. These strategies include organizing and manipulating visual images, analyzing message for meaning, and self-monitoring for message accuracy. This experience serves as a transition from language learning to beginning interpretation.

CGST234 Introduction to Russian and Soviet Cinema (CLAC.50)
This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

CGST235 Brazilian Culture and Identity Through Media (CLAC.50)
If asked about Brazil, chances are one may answer by invoking stereotypes that once conveyed Brazil's global image: samba and futebol (soccer). While music, carnaval, and soccer are central elements of the national identity, these aspects of Brazilian culture fail to do justice to the complexity of a country of ever-increasing global impact, with a top-ten economy, a massive, continental territory. and some 200 million inhabitants who constitute what may be the most diverse population on the planet.

In this course we will critically examine how the media has helped shape Brazilian identity and how the country is perceived from outside. We will cover topics such as social relations, race, poverty, gender, violence and human rights. Readings will draw upon theories and concepts in media studies and cultural studies. Class discussion will consider cultural texts, television shows, films, music, poetry, fashion, and social media posts. This course will be taught in English and Portuguese (introductory or intermediate level is sufficient).

CGST236 Music, Culture and Social Justice in Latin America (CLAC.50)
This course examines influential Latin American musicians and the relationship between their artistic production and the battles for human rights, democracy, and social justice in the hemisphere. The seminar will focus on the periods of dictatorial rule and transition to democracy in the Americas (mostly, from the 1960s through the late 1980s). We will study the main musical trends and leading artists in Spanish and Portuguese speaking countries in those decades, assessing the role of their music in battles for free expression, democracy, and social justice in human rights. Among the artists whose work we will consider are Victor Jara (Chile), Mercedes Sosa (Argentina), Los Guraguao (Venezuela), Catano Veloso, Gilberto Gil, and Chico Buarque (Brazil). Students will be encouraged to analyze music through lyrics and song form, while understanding the historical, political, and social climates in which these artistic productions developed. Students will understand how music and culture can be powerful tools of resistance, assessing their impact in educating, inspiring, and creating social awareness and commitment in Latin American societies. This course will be taught in English, Portuguese, and Spanish (introductory or intermediate level is sufficient).

CGST237 The Soviet Century (CLAC.50)
This course begins and ends with two crucially important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the Russian government with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to remake the world. On December 26, 1991, the Soviet Union collapsed into 15 countries. The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will explore the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the course will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider key theoretical writings in addition to poetry and prose by major Russian and Russophone authors. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. This class consists of lectures and focused discussion of essays and films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

CGST240 Introduction to Tamazight: The Native Language of North Africa and Beyond (CLAC.50)
This course will introduce students to the language (sounds and script) and culture of the Amazigh people, an ethnic group (commonly known as Berbers) native to North Africa and West Africa, specifically Morocco, Algeria, Tunisia, Libya, Mauritania, northern Mali, and Niger, with some oases in Egypt and the Canary Islands. The Tamazight language--the alphabet of which is called Tifinagh--has been a written language for almost 3000 years, although it was disrupted throughout history due to various invasions and conquests of the area. The Tuareg people of the Sahara desert in Northern Africa, and as of late Morocco and Algeria, have been using the Tifinagh alphabet (oldest dated inscription from about 200 BC) and the Tamzight language as a secondary national language. The objectives of this course are: 1. To introduce students to the sounds and script of Tifinagh; 2. To teach students basic conversation and essential elements of the Tamazight language; and 3. To familiarize students with the culture of the different Amazigh peoples.

CGST241 Introduction to ASL in the Performing Arts (CLAC.50)
This course offers an introduction to artistic ASL interpreting. "Artistic ASL Interpreting" does not apply only to performing groups who present songs in sign language on a stage. Nor is it a term that is exclusively linked with theatrical interpreting in a "platform" setting of plays, musicals, or poetry. Artistic

interpreting can be explained as a refined, more creative style of interpreting at the highest levels of the profession. For students, it presents challenges that encourage more attention to eye gaze and contact; shifts in body stance and positioning; size and style of sign production; facial expressions; gestures as communication and sign alternatives in overall concept formations and messaging. These are, in fact, some of the most important components in ASL communication and some of the most challenging aspects to encourage or teach.

CGST243 Die Grenzen meiner Sprache bedeuten die Grenzen meiner Welt (CLAC .5)
This CLAC will explore the practice of translating philosophical German by focusing on Wittgenstein's Tractatus, its recent translations, and its (often unnamed) sources and influences -- including writings by Gottlob Frege and Immanuel Kant as well as by various Viennese intellectuals such as Karl Kraus and Otto Weininger. The Tractatus is a particularly productive focal point because it advances a theory of language and meaning that has immediate relevance for conceptualizing what is involved in translating from one language into another. In practicing translation, students will be testing the theory that they are attempting to translate. This will provide them an additional dimension in which to wrestle with the content of the text. Enrollment in the associated seminar, PHIL389/COL386, is encouraged but not required. The course is open to students at all levels of German study. Discussions will be conducted in a mixture of English and German, since we will be discussing the nuances of words and phrases in both languages. By preparing (and discussing) their own translations of texts, students will become familiar with the sorts of challenges that arise in rendering philosophical German into English and will develop strategies for negotiating these challenges. Students will also be encouraged to consider translations into other languages in which they are competent.

CGST245 Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)
This 0.5-credit course is conducted in Italian and designed to supplement the English-language Italian cinema course "Not Just Neorealism: Italian Cinema, its History, and Politics" (RL&L 245). The presentations that are part of the requirements for the parent course (RL&L 245) will serve as our basis in this discussion-based section: Students will be responsible for screening films in addition to those required for 245, for presenting them, and, during the discussion sections in Italian, responsible also for linking them to the course material. Further, students enrolled in the CLAC will also make mini-presentations to the broader body of the students enrolled in the parent course only, linking the extra screenings to those that are part of the course syllabus, and enriching the discourse and knowledge base.

Students are required to be simultaneously enrolled in the parent course in order to enroll in the CLAC section. For this reason, enrollment is granted on a POI basis.

Students must have advanced competency in Italian: completed ITAL 221 or a course with a higher number, spent a semester (or more) in Wesleyan's Program in Bologna, or be linguistically proficient. For any questions about linguistic preparation, please contact the instructor.

Please note that at present this section is not acceptable as one of the nine required courses for the ITST major.

CGST250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC.50)
The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these

societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

CGST251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

CGST252 Chinese Calligraphy (CLAC.25)
This 0.25 CLAC course will provide students with a brief understanding of the art of Chinese calligraphy through calligraphy practice. They will learn about the characteristics of Chinese calligraphy from the "Four Treasures of the Study," as the tools of calligraphy (writing brush, ink stick, ink stone, and paper). They will understand the development history of Chinese calligraphy from five basic scripts of Seal (zhuanshu), Clerical (lishu), Standard (kaishu), Semi-cursive (xingshu), and Cursive (caoshu). The course focuses on imitation and practice of the Standard script kaishu. Prerequisite: Current or future Chinese class students are preferred.

CGST255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)
This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

CGST262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

CGST264 Portuguese and the Luso-Brazilian Short Story (CLAC.50)
This course offers students a chance to read and discuss short stories written in Portuguese from around the world (Brazil, Portugal, Mozambique, and Macao). It is open to students with intermediate or advanced Portuguese. Heritage learners and students with native Portuguese, both spoken and written, are also welcome. Assignments will include presentations and written work in Portuguese; assessment will be tailored to each student's language background.

All classroom discussion will be in Portuguese. Readings/films will be discussed weekly, including topics of language and content. Everyone will participate in discussions. Each class will include a short presentation (5-10 minutes) by a student on the week's assignment, including a brief introduction of the text, author, and geographical/historical context. Each student will contribute a discussion question before class on the assignment.

CGST265 History of Spanish Cinema for Spanish Speakers (CLAC.50)
Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: https://span301.site.wesleyan.edu/. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

CGST266 Neotropical Acuatic Ecosystems: Their Importance, Sustainable Use, and Conservation (CLAC 1.0)
(English translation below Spanish text) El curso de Ecosistemas Acuáticos Neotropicales permitirá a los estudiantes buscar información y discusión sobre la diversidad y complejidad de los ambientes acuáticos en la América tropical. Comenzaremos a aprender definiciones, características, distribución y ejemplos de humedales, lagos, ríos y muchos otros hábitats acuáticos en todo el neotrópico. El origen del sistema hidrológico. Evolución de las principales cuencas: Amazonas, Magdalena, Orinoco y Paraná. El Paleo Orinoco-Amazonía: Importancia geológica y biótica. Dinámica geológica. Evidencia geológica y biológica. Hipótesis evolutivas de la fauna piscícola. Evolución del paisaje amazónico como parte del conocimiento para comprender los diversos procesos y patrones de riqueza y distribución de la biodiversidad. Los humedales (sabanas inundadas) de Colombia-Venezuela como ejemplo de humedales neotropicales. El Pantanal brasileño y las llanuras colombo-venezolanas como "áreas de criadero" para la biota acuática y terrestre y su importancia para el mantenimiento de la biodiversidad. Los estudiantes también leerán y buscarán información sobre el Sistema Fluvial Orinoco como ejemplo de estudio. La importancia biótica, el desarrollo sostenible y la conservación. Identificar los factores antrópicos que afectan al sistema. El desarrollo social y económico, y las contribuciones a través de los Programas de Evaluaciones Acuáticas Rápidas (RAP's) como metodología para producir información que permitió proponer áreas para la conservación de la biodiversidad. Terminamos con un análisis de los recursos y la importancia pesquera de las principales cuencas neotropicales: Amazonas, Orinoco y Paraná-Paraguay. Seguridad alimentaria. Ejemplos de ríos en riesgo.

This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemicity, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST267 Current Environmental Issues in Latin America (CLAC 1.0)
(English translation below Spanish text) Este curso proporcionará información histórica y actual sobre el desarrollo de temas ambientales en América Latina. La información se dividirá en la evaluación del uso del medio ambiente durante los períodos precolombino y colonial (a); y b) período moderno. Se discutirá la organización, estructura y gobernanza del medio ambiente. El desarrollo de políticas públicas, planes de gestión, factores que se deterioran y los posibles usos sostenibles del medio ambiente y sus recursos. Leeremos literatura interdisciplinaria incluyendo: académica, informes, documentos oficiales gubernamentales y proyectos de ONG dedicados al diagnóstico, desarrollo y uso o nuestros recursos en América Latina. Por último, se estudiarán casos particulares de países latinoamericanos como Argentina, Brasil, México, Costa Rica, Perú y Venezuela. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs' projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST268 Food Security and Environmental Conservation (CLAC 1.0)
(English translation below Spanish text) En este curso los estudiantes investigarán información y discusión sobre la seguridad alimentaria y el uso del medio ambiente en una selección de países de América Latina. Haremos preguntas sobre la base de la producción y disponibilidad de alimentos. También examinaremos la información disponible de las agencias públicas y privadas sobre los programas establecidos por los países para garantizar la seguridad alimentaria de sus habitantes y el uso sostenible y la conservación del medio ambiente. Discutiremos conceptos como: La soberanía alimentaria y la seguridad como un sistema alimentario en el que las personas que producen, distribuyen y consumen alimentos también controlan los mecanismos y políticas de producción y distribución de alimentos; La nutrición como normas mundiales y particulares de consumo de alimentos; La Justicia social relacionada con la accesibilidad de los alimentos; y el derecho humano a una alimentación adecuada y a la libertad del hambre como uno de los objetivos del milenio de las Naciones Unidas. El estudiante revisará casos particulares en América Latina. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. In this course students will research and discuss food security and the use of the environment in a selection of Latin American countries. We will ask questions about the basis of food production and availability. We will also examine the available information from public and private agencies about programs established by countries to ensure the food security of their inhabitants and the sustainable use and conservation of the environment. We will discuss concepts such as: food sovereignty and security as a food system in which the people who produce, distribute, and consume food also control the mechanisms and policies of food production and distribution; nutrition as a global and particular standard of food consumption; social justice related to the accessibility of food; and the human right to adequate food and

freedom from hunger as one of the United Nations' objectives of the millennium. Students will look at particular cases in Latin America. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST273 Tatort - Window into Germany (CLAC.50)
Few television shows have become anchored in German cultural discourse as firmly as "Tatort," a weekly crime show produced and broadcast by public television since 1970. Watched by up to 40% of all potential viewers, new episodes are prominently reviewed in major daily newspapers and serve as a focus for discussions about German politics, culture, and society. Episodes have tackled questions of police brutality, immigration, gentrification, and the surveillance state, while also shining a light on Germany's changing conception of itself. Over the years, the show has attracted some of the major directors and actors from German-speaking regions, such as Wolfgang Petersen, Margarethe von Trotta, Dominik Graf, Sibel Kekili, and Götz George. In this course, we will watch current and canonical episodes of the show, using it as a way into discussions about Germany's past, present, and future.

CGST281 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)
This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

CGST283 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy (CLAC 1.0)
(English translation follows below) Este curso examinará los factores clave que han afectado el desarrollo de Venezuela y su entorno desde el período precolonial hasta el presente. Dividiremos la historia de Venezuela en dos períodos críticos: antes y después del descubrimiento de petróleo. Haremos preguntas sobre la naturaleza y las interacciones de los factores y agentes clave que transformaron a Venezuela de una colonia a la de un país económicamente independiente. Al examinar los períodos económicos anteriores y posteriores al petróleo por separado, aprenderemos que los factores clave, como la agricultura, el uso de la tierra y la influencia colonial europea, cambiaron drásticamente, transformando así muchas instituciones sociopolíticas. Los contrastes incluirán la resiliencia y la erradicación de enfermedades, los derechos humanos y la esclavitud, la propiedad de la tierra, la salud humana, los impactos en la biodiversidad y la salud humana, y la protección de las culturas indígenas. En última instancia, examinaremos los factores que han llevado al colapso de la democracia. Leeremos una literatura interdisciplinaria que incluye antropología, religión, sociología, ciencias ambientales, derecho e historia. El curso se presenta en un formato de lectura / discusión en el que todas las lecturas, escritos y discusiones serán en español. This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST285 Global Hip Hop of the Non-Anglophone World (CLAC .50)
Proficiency in a language other than English is required. Each student will present to the class a single piece of their choice in a non-English language every other week (for a total of five presentations). Presenters will provide the class with written lyrics in both the original language and in English translation. In lieu of analyzing recordings by others, students have the option to compose their own non-English rap songs and record (or perform) them for in-class discussion. The final paper will tie the five presentations together in a single formal document (or website). Class discussion will be in English, but the topics will all be rap lyrics and hip hop/youth culture in the non-Anglophone world.

CGST290 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests

convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

CGST291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)
The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of ta Aphrodisia (the things/matters related to Aphrodite) in a culture that has no one term/ concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

CGST302 Narrating China: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Narrating China: Introduction to Modern Chinese Literature (CEAS 202) course. It allows students to encounter a selection of modern and contemporary Chinese literary texts in their original Chinese. As the parent course guides students through major literary movements and themes from 20th-century China, students in the CLAC tutorial will read poems, short stories, or excerpts of longer texts from the same periods in the original Chinese. In weekly meetings, students will discuss the readings in Chinese, to delve deeper into their stylistic and linguistic characteristics unobservable in translations.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Evaluation is based on students' preparedness, participation, and formal oral presentations, and will be tailored to students' language background. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

CGST303 Ukraine and Its Environment
International perspectives on environmental issues are critical in order to address the challenges facing the world. Developing an international perspective requires more than learning from printed literature--it requires in-country experience and the desire to be able to view issues through different cultural lenses. This course will provide such experience by learning about the diversity of Ukrainian environments, people, and cultures both in the classroom at Wesleyan and by traveling to Ukraine during Spring Break. During our time in Ukraine we will receive lectures in English from noted scholars, politicians, professors and scientists on topics such as environmental law, global environmental security, urban environment, environmental policy in developing states, and sustainable development for the developing world. We will travel and learn from scientists at Chernobyl about the regeneration of forest ecosystems, learn from agronomists about agriculture on the steppes, and learn from politicians and scholars about Ukrainian environmental policy and their views of U.S. policies. We will also enter into round table discussions with university students to exchange ideas about potential international solutions and approaches to environmental problems. These are just some of the experiences that are planned for our visit. Ukraine, as a pivotal democracy of the former Soviet Bloc, is an amazing place to witness how a nation wrestles with dramatic changes in policy. At the same time Ukraine is culturally diverse, which presents interesting challenges to formulating fair and cohesive policies.

CGST304 Urdu Literature and Poetry (CLAC 1.0)
This course is specifically designed for the learners who want to advance their skills through reading and discussing authentic materials in poetry and prose. The syllabus includes readings which range from the classic to current traditions. Students will read Mir Taqi Mir, Mirza Ghalib, Iqbal, Nasir Kazmi, Ahmad Nadeem Qasmi, Sadat Hassan Manto, Bano Qudsia, Abdullah Hussein, and many more. The main goal of the course is to familiarize students with Urdu literary traditions before and after partition of the subcontinent. Students will also get opportunity to improve their writing and creative writing skills in Urdu scripts (Nastaliq) by completing various projects and assignments.

Medium of instruction for this course will be standard Hindi/Urdu. This course is suitable for the advanced heritage learners, advanced Hindi/Urdu and native speakers.

CGST308Z Dealing with Difference: Intercultural and Multicultural Education
How do students learn about cultural difference in school and college? Multicultural education, intercultural education, international education, global learning, internationalizing the curriculum -- all are terms related to bringing cultural competence into teaching and learning. These different approaches are often in conflict with each other, while ostensibly teaching the same knowledge, skills, and attitudes. In this course, we will trace the histories of multicultural and international education to the present day. We will explore the purposes, theories, practices, and pedagogies associated with these two fields, as well as their intersections, convergences, and divergences. Finally, we will view these fields through a critical lens to reveal their successes and shortcomings, and formulate our own recommendations for the future direction of each -- or both.

Prereq: **None**

CGST320 La cultura y la historia de la España islamica (CLAC.50)
This course will be taught in Spanish, and spans a timeline between 711 and 1492, i.e., from the date of the conquest/invasion of Iberia by Muslim troops to the fall of Granada and the expulsion of Muslims and Jews from Spain. Before starting discussion of the course material, students will be introduced to Arabic sound and script, as well as some common vocabulary and lexical concepts shared between Spanish and Arabic. This makes sense because Muslim culture and the Arabic language were present in Iberia for the better part of 800 years. We will discuss not only the main events that took place during the Muslim occupation of parts of Iberia but also the cultural legacy Muslims and Jews left behind in the peninsula after they were expelled in 1492, especially in the realms of art, science, language, architecture, and le savoir-vivre. We will look at the different theories put forth by scholars about the conquest/invasion of the peninsula, in regard to the ease and speed with which the peninsula was overrun by Muslims. We will examine the hereafter and the consequences of the expulsion of Muslims and Jews on the Iberian peninsula as well as the neighboring territories. Finally, we will make a jump to the 21st century and try to connect some dots by looking at the current situation in and around the Strait of Gibraltar, particularly the influx of illegal immigrants from North Africa and sub-Saharan countries, and the ensuing issues.

CGST321 Theatre for Social Change - Taught from Ecuador with Local Participants
This course is taught in Spanish. Students should have Spanish proficiency equivalent to SPAN 112 or higher. This course is designed to lead Wesleyan students and Ecuadorian community counterparts through the process of creating social change by practicing social change. Using exercises and activities that pull from the areas of Theatre of the Oppressed and Performance Activism, as well as traditional theatre tools such as movement and mask-making, we engage challenging concepts and conflicts by dialoguing via our performative work. Our exploration stretches from the theoretical foundations of structural and symbolic oppression to ongoing real-life events related to themes that are selected by the course participants (examples include cultural identity, systemic racism, privilege, power, environmental justice, and gender equality/equity). Each course participant chooses a thematic area and joins a small group with which they will apply learned methods to exploring their theme. Together, Wesleyan students with local counterparts create short virtual theatrical projects to be presented to the whole cohort. Readings cover theory and methods in Applied Theatre, community-based case studies, and articles related to the chosen themes. The readings are contextualized to the diverse lived realities of the course's participants as well as to our globalized society.

CGST322 Storying and Re-Storying (Storytelling for Social Change) - Taught from Ecuador w Local Participants
This course is taught in Spanish. Students must have proficiency in Spanish equivalent to SPAN 112. When we consciously appropriate the power of stories to collectively reimagine our world, we turn the word story into a verb. We "story" our world. When our "storying" seeks to transform a system founded on unjust stories, we are "restorying" our world. This course begins with our human ability, and need, to tell stories, examining how we use them for communication, as well as how we become empowered or disenfranchised by them. Based on the realities present in our communities (our local community of place, college campuses, cities, neighborhoods, spiritual communities, etc.), students work with their counterparts, combining theory with practice, to create and tell stories with the goal of identifying shared conflicts and inspiring change. Since stories are told in many ways, the course engages the "telling" through various methods: writing stories and poems, Spoken Word, coloring/drawing, mapmaking, and moving our bodies. In each project, we implement the elements of storytelling, balancing distinct narrative traditions, such as myth and legend, with influences of the modern world. Readings look at a wide array of narrative theory and methods, focusing on storytelling as a form of creating and expressing knowledge. The course concludes with the interweaving of local and international stories into "our stories."

CGST323 Hebrew in the Media: From National Literature to International Films and TV Shows (CLAC 1.0)
This language course is offered as an enrichment opportunity to students with intermediate or advanced Hebrew skills who are interested in improving all their language skills and/or acquiring additional linguistic and cultural preparation for study abroad in Israel. Cultural activities including participating in the 24th Annual Contemporary Israeli Voices 2026 and Lunch and Learn meetings with native speakers are part of the course. In addition, special writing workshops with internationally renowned Israeli scholars will be integrated into the course curriculum. The course explores the changes in Israeli society as it moves from national ideological literature to the exploration of new multicultural media such as films and TV shows and thus gaining international fame and inspiring widespread emulation. The course may be repeated for credit. The course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

The course counts toward the minor in Jewish and Israel Studies.

CGST324 Cuban Literature and Film: Imagination, Revolt, and Melancholia
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

CGST325 Media in the Arab World: From TV and Film to Social Media (CLAC.50)
Media in the Arab world has undergone significant changes in recent times, with the emergence of new technologies, platforms, and voices across various mediums such as movies, newspapers, magazines, and social media. This course will introduce students to some of the main channels for the communication and expression of information in the Arab world today.

While television remains the most popular source of information - with channels such as Al-Jazeera even having an international audience - access to information has expanded to include online news websites and social media. Social media, in particular, has become an increasingly important source of information, especially among younger generations.

In this course, we will delve into the evolution and impact of media in the Arab world, exploring its role in shaping public opinion, identities, and narratives across different channels. We will look at movies, television series, and social media programs, as well as sources of traditional information, such as newspapers, magazines, and news broadcasts.

This course is open to students studying all levels of Arabic, but is particularly suited to students who have completed Intermediate Arabic as well as native speakers of Arabic.

Prereq: **None**

CGST331 Love and Suffering in Ancient Rome (CLAC .50)
In this CLAC course, students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

CGST334 Exploring Personhood in the 20th and 21st Centuries (CLAC 1.0)
The goal of this course is to provide a thorough examination of the concept of personhood in the 20th century by studying how it has been portrayed and understood in diverse cultural contexts across Arabic, English, and Francophone cultures. Through the use of comparative analysis and an interdisciplinary approach to cultural artifacts--such as works of literature, art, and religious texts as well as current debates around AI and personhood--students will explore how different cultures have approached the question of what it means to be a person and how this has evolved over time. By the end of the course, students will have a deeper comprehension of the various ways in which personhood has been created and perceived throughout different cultural and historical contexts.

The impact of historical occurrences and cultural movements on the construction of personhood, the influence of religion and politics or the fictional writing on conceptions of personhood, the representation of personhood in literature and art, and the emergence of AI as a new frontier in the investigation of personhood are some of the major topics covered in the course. This will open up new discussion topics about posthuman beings and persona status, particularly in science fiction.

CGST335 Politics, Revolutions and Visual Culture in the Post-Revolutionary Arab Societies
The course "Politics, Revolutions, and Visual Culture in Post-Revolutionary Arab Societies" critically investigates the interaction of politics, social revolutions, and visual culture in the aftermath of the Arab Spring. This course examines the dynamic interaction between political transformation, revolutionary movements, and the various forms of artistic expression in Arab countries.

Students will delve into the complex interplay between politics and visual culture through a combination of theoretical discussions, case studies, and visual analysis, gaining a nuanced understanding of how images, art, photography, film, and other visual media have shaped and reflected sociopolitical changes in post-revolutionary Arab contexts.

CGST340 Identity and "Pacha" (Land-Based Knowledge and Re-imagining Community) - Taught from Ecuador
This course is taught from Ecuador by our study abroad partner, Pachaysana.

According to indigenous Andean scholars, Pacha refers to the time-space continuum, or as the "everything around and inside us." This course asks students to challenge their identities by broadening their epistemological and ontological lenses to see their individual and collective lives as they relate to Pacha. To synthesize this complicated process, we ask participants to examine who they are as related to the ever-changing ecology in which they live. For this course, ecology is approached broadly, referring to the Greek origin on the word oikos, meaning home. We take advantage of our virtual exchange and examine home as an interconnection of how we relate to "place and space," exploring our ecology as the triad of our immediate territory (llakta in Kichwa), our surrounding natural environment (allpa in Kichwa), and our global and pluriversal space (pacha). Throughout the course, we use an interdisciplinary lens to examine "who we are" as related to this diverse understanding of ecology, taking into consideration that our ever-changing environment includes an ever-changing human story. Readings are transdisciplinary, coming from the fields of anthropology, sociology, human geography, gender studies, ethnic studies, history, the arts, and development studies. Toward the end of the course, after examining certain theories and case studies, we will imagine the reconstruction of our identities contextualized to pacha, space, place, ecology, oikos, and home.

CGST341 Critical Interculturality and the Pedagogy of Unlearning
This course is offered by our study abroad partner, Pachaysana, online from their site in Ecuador, with local educators.

An ever-growing number of students, scholars, and activists criticize our educational institutions for upholding colonial structures, and via numerous movements are calling for "decolonization." Any effort to decolonize our education must go well beyond the content of what we teach in the classroom. In addition to what we are learning, we must explore how we learn, where we learn, and with whom we learn. We also must think about what "decolonization" means, taking into consideration the lands on which our campuses and communities are located. This course addresses decolonization through the lens of critical interculturality, referring to Catherine Walsh's critique of multiculturalism as functional or relational interculturality. Bringing in readings from Indigenous and Latin American scholars and taking part in workshops facilitated by local Ecuadorian community members, we will use interactive methods to explore some of the most challenging concepts related to decolonization, including "decolonization is not a metaphor," epistemic justice, border thinking, and embodied methodologies. Those concepts will then be examined with regards to the realities on our college campuses and our communities, and we will begin to dream about moving from the "functional" to the "critical." By the end of the course, informed by the readings and interactions with community-based educators in Ecuador, students will formulate clear questions and identify potential strategies for applying critical interculturality at their college campuses.

CGST352 The Communist Experience in the Soviet Union (CLAC.50)
Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

CGST413 Israeli Cinema (CLAC 1.0)
This Hebrew course will be linked to the film course, taught in English, entitled CJST 250: Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema. This course is targeted toward students with very advanced knowledge of the Hebrew language. Students will mostly view the same films as the parent class, with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in format and themes of Israeli films. Scholar visits will be part of the course, and students will attend a few cultural enrichment activities. This course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative; for more information, see https://www.wesleyan.edu/cgs/eventsprograms/clac/index.html.

CGST414 Israeli Cinema (CLAC 1.0)
This most advanced Hebrew course can be taken either as a language enrichment course to the parent course, CJS223: Israeli Women Filmmakers and Israeli Society, or taken by itself independently as an advanced Hebrew course. The focus of the course will be studying films made by female filmmakers. Students will analyze, discuss, and write on the films with special attention to mapping the cultural and social changes in Israeli society as well as changes in films' formats and themes. Conversing in Hebrew with Israeli film directors and scholars during Lunch and Learn Meetings as well as attending the screening of films in Hebrew in the 20th Annual Ring Family Wesleyan University Israeli Film Festival and writing reflective papers on films will provide a cultural and social framework for the course. In addition, the course will include special workshops delivered by renowned Israeli filmmakers and scholars. The course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

The course counts towards the Minor in Jewish and Israel Studies.

CGST480 Engaged Projects
Engaged Projects (EPs) are rigorous, self-designed endeavors in which a student studies a topic of their choice and completes a final project intended for a non-academic audience. Students are encouraged but not required to select a topic that is connected to another class or their major. Final projects can take the form of blogs, videos, a website, or other media; a work of art, an event, a workshop, a presentation, or panel; a policy proposal or analysis; a white paper or op-ed series; a business plan; and/or any other piece(s) thoughtfully designed for the public.

EP students will develop a self-directed research and project plan. They must enlist an EP Sponsor who will serve in an advisory/mentor role; Sponsors can be Wesleyan faculty, staff, alumni, or community partners; family members or friends; or other experts or professionals willing to play this role. Seeking and enlisting an appropriate Sponsor is a component of the EP learning experience.

In addition to conducting their own extensive research and producing a summative project by the end of the semester, students will write a series of reflections to document their progress and their learning.

For more information, visit https://www.wesleyan.edu/patricelli/engaged-projects.html.

CENTER FOR JEWISH STUDIES (CJST)

CJST114F Netflix and Shul: Jews on TV (FYS)
Jews have always been an inseparable part of the small screen--first, mainly (but not only) as writers and producers, and gradually as characters and protagonists. Today, American television is more Jewish than ever. Jews changed TV. But did it also change them? This course will study the long history of Jews and Jewishness in American Television. Each class will revolve around one episode of a show and discuss how it reflects on different aspects of Jewish life--Jewish humor, Jewish crime, Jewish Upward mobility, Jewish guilt, the Jewish mother, Jewishness and whiteness, antisemitism, and more. In keeping with the Jewish tradition, we will obviously ask many questions, including the most complex one: What does "Jewish" mean?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-CJST**
Prereq: **None**

CJST150F Four Bar Mitzvahs and a Funeral: Being Young and Jewish in America (FYS)
How is the American Jewish experience viewed from the perspective of Jewish children and young adults? This course will discuss depictions of Jewish coming-of-age in American popular culture. We will examine various age groups--from elementary school to college; and through various art forms--literature, film, and television ("Are You There God? It's Me Margaret," "The Plot Against America," "An American Tail," "Wet Hot American Summer," "A Serious Man," "Superbad," "Booksmart," "Glee," "The O.C.," "Big Mouth," "Never Have I Ever," among others). Analyzing these works together will illuminate different facets of Jewish American life including immigration, assimilation, education, tradition, family, anti-Semitism, and more. They will also allow us to broach more universal questions surrounding representation, identity, and the complex relationship between popular culture and society.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

CJST151F What is Religion? JewBus, Museums, and the First Amendment (FYS)
Why did the FBI assault the Branch Davidians' compound near Waco, Texas, thinking it was a cult, while those inside viewed the government as serving the anti-Christ? Can one be Buddhist and Jewish at the same time? Are museums religious spaces? Does secularism protect religion from the government or the government from religion? This class will introduce you to the ways in which we study religions by reading critical case studies, including those about Muslims debating the hijab, the treatment of sacred objects in museums, and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.

CJST165F Anne Frank's Diary and its Legacy (FYS)
Since its publication, "The Diary of Anne Frank" has become one of the bestselling non-fiction books of all time. Moreover, it has inspired numerous adaptations in different forms: films, stage plays, TV series, graphic novels and more. In this course, we will closely read the original diary, and engage with various incarnations, asking: Why did the world iconize Anne Frank, and is it a lionization or an appropriation? What does this global phenomenon tell us about the legacy of the Holocaust and of that of Anne Frank, and, finally, what does Anne Frank's diary tell us about the world?

CJST214 Refugees & Exiles: Religion in the Diaspora
Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. What does it mean to be forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? In our search for answers, we will examine a variety of case studies including the contemporary refugee crises in the Middle East, the border between the United States and Mexico, the black transatlantic, and the destruction of the temple in the Hebrew Bible. This course is a project-based Service Learning in which all assignments are geared toward the final project, in which each student will produce a radio show based on an analysis of a refugee crisis of their choice. These shows will air on WESU 88.1 FM Middletown. To learn more and listen to previous seasons of last year's radio shows visit https://reli213.site.wesleyan.edu

CJST216 Jesus Through Jewish Eyes
In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

CJST219 The Environment, The Bible, and Moral Debate
The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular "biblical" view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

CJST221 Jewish Identity in the Ancient World
Jewish Identity is not monolithic but instead, wonderfully, varied, and diverse. The Hebrew Bible gives a multitude of accounts of how many different identities within the course of history came to be and through analyzing these accounts, this course will aim to answer the questions of: What did Jewish Identity look like in the time period of ancient Israel? What variety of identities can be seen in the Hebrew Bible itself? What key historical events aided in the development

of different identities in the ancient world? What was the process of identity formation in the ancient world? Is that process of identity formation different than how one might construct identity today? Is it right to even speak of Jewish Identity in 600-700 years in which the Hebrew Bible was written?

CJST222 Identity and Jewish Literature: Sexuality, Race, and Gender
What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

CJST223 Israeli Women Filmmakers and the Israeli Society
Historically, women filmmakers account for only around seven percent of the films produced in Israel, reflecting the marginalization of the female voice in the local society, culture, and discourse. However, in the last decade, they have finally moved to the center stage to create some of our time's most successful and essential Israeli films. This course will discuss Israeli women's cinema from artistic and historical vantage points. Students will engage in critical thinking and use film theory and terminology to analyze the featured films, and to contextualize them in the broader context of Israeli history. This analysis will reveal recent shifts in Israeli society, including how women find their place in the army, how they fight the patriarchal religious institutions, and how they turn the Israeli His-tory into the Israeli Her-story. Furthermore, the course will touch on more universal questions on narrative structure, representation, and the male and the female gaze.

CJST224 The Holocaust in Contemporary Popular Culture
How to describe the indescribable and to speak the unspeakable? Long after the end of World War II, filmmakers still grapple with these questions, and their answers vary ethically and aesthetically. This course will discuss depictions of the Holocaust in contemporary popular culture. We will touch on graphic novels, TV sketches, and social media, but mainly focus on film. While the time frame will be limited to mainly the last two decades, we will explore a vast range of texts including: Hollywood fare and East European art-house movies; gritty dramas and dark comedies; reenactments of real-life events and alternative history. From Hipster Hitler to the Jojo Rabbit, from "Inglorious Basterds" to "Son of Saul," what all these examples share is an artistic and thematic audacity. We will examine how they try to propose new and unsettling answers to old but ever-vital questions: How did the Holocaust happen and might it happen again?

CJST225 Angels in America, Devils Wearing Prada - How Jews Became (Almost) Mainstream
For many years, the mantra in American showbiz was "write Yiddish, cast British." The writers were Jewish, as were the humor and sensibilities of their work, yet the characters were often depicted as WASPs. This dynamic began to shift between the late 1980s and early 2000s, marking a transformative period for Jewish representation in American media. Adam Sandler performed "The Chanukah Song" on SNL; Seinfeld became the first sitcom with a Jewish lead character to top the Nielsen ratings; the Jewish American epic Angels in America won a Tony Award before being adapted into an Emmy-winning limited series; and a Jewish scientist helped save the world in the blockbuster Independence Day. Jewish protagonists and themes became increasingly prominent in other iconic shows and films of the era. However, this transition was neither smooth nor absolute. For example, network executives pushed Seinfeld to minimize the Jewishness of all its characters except the lead; Friends obscured the Jewish identity of its protagonists; and the best-selling novel The Devil Wears Prada lost its Jewish elements when adapted for the screen. This course examines how and why Jews became mainstream, cool, and "sexy"--but only to a certain extent--while exploring the limits of Jewish acceptance in American culture. We will analyze how media representations grapple with themes such as assimilation, interfaith marriage, faith, and guilt. These discussions will also serve as a basis for addressing broader issues of representation and stereotyping. Most importantly, the course will center on two critical questions: What does it mean to be Jewish? And what does it mean to be Jewish in America?

CJST230 Antisemitism in Popular Culture
Antisemitism is a complex subject. This course employs popular culture to study it. We will explore a wide range of texts from different periods. Some promote Antisemitism, and some challenge or combat it. We will examine how bigots use the media to spread hate, how Jews and their peers use it to challenge jew hatred, and how popular culture sometimes subconsciously perpetuates harmful stereotypes. We will discuss how humor and satire are utilized to tackle serious issues. We will also see how popular culture views Antisemitism in the broader context of White supremacy and violence directed at other minority groups. Most importantly, we will ask -- what can we learn from the media on Antisemitism, and what can Antisemitism teach us about the media?

CJST231 The Holocaust in Art-House Cinema
Theodor Adorno famously wrote in 1949 that "writing poetry after Auschwitz is barbaric," but what about making movies? Some prominent filmmakers agreed with Adorno and refused to make films about the Holocaust on the grounds that it was an immoral and impossible task. Other directors turned the tragedy into commercial entertainment, didactic sermons, or action-filled blockbusters. This course will focus on the filmmakers who sought a middle ground. They argued that the Holocaust is a story that cannot but must be told, and they experimented with the medium of film to find ways to tell it without exploiting its horrors. Throughout the semester, we will watch classics like Night and Fog, recent films like Zone of Interest and The Brutalist, iconic epics like Shoah and Come and See, and lesser-known films. Through this challenging body of work, we will inquire if and how it is possible to describe the indescribable and speak

the unspeakable. We will examine what films can teach us about the Holocaust and what the Holocaust can teach us about filmmaking. Finally, we will question whether these films are truly distinct from Hollywood's war and genocide narratives -- are they also not manipulative? Are they also not barbaric?

CJST232 Rereading the Bible After the Holocaust
The Holocaust profoundly challenged traditional Jewish theological and interpretive frameworks, compelling Jewish thinkers to revisit and reinterpret biblical texts. This course examines the reinterpretation of key Hebrew Bible passages in light of post-Holocaust Jewish thought, focusing on themes of suffering, justice, covenant, and the nature of God. We will explore biblical texts alongside the writings of seminal Jewish thinkers, including Emil Fackenheim, Elie Wiesel, and others, to understand how the Holocaust reshaped Jewish approaches to scripture and theology.

CJST233F Holocaust Remembrance in Germany: The Third Generation (FYS)
Remembering the Nazi past is a fundamental aspect of postwar German culture. In this course, we will trace the Holocaust's aftermath in contemporary German literature and thought. We will pay close attention to the socio-cultural and historical-political changes in attempts to glean new meanings from a past that is both omnipresent and highly evanescent. It will be our particular concern to encounter versions of Jewish identity and attempts to prescribe different narratives. We will focus especially on contrasting the creative works of the immediate postwar period and "the third generation." These contemporary writers explore a historical trauma that has become an integral part of specific Jewish-German identity. At the same time, their temporal and personal distance to the actual events necessitates new imaginative approaches to the past. Careful readings of literary, theoretical, journalistic, and historical texts, as well as personal discussions will enable us to critically think about the challenges and limits of how to write about the Holocaust 70 years after it occurred, and how the difficulties in doing so might inform other kinds of writing about historical and personal trauma. Students need to read Olga Grjasnowa's "All Russians Love Birch Trees" prior to the start of the course. Students will have Zoom class discussions and intensive peer-feedback-driven writing practice.

CJST234 Israel in Therapy: Society Under the Influence of TV Series
The course deals with the prototypes of the Israeli character as they appear in the original Israeli TV series In Treatment, and other Israeli TV series, such as Florentine and A Touch Away. We will compare the structure and the characters of the series to other dramatic Israeli series, examine the appearance of the characters, and discuss the similarities and differences between the roles they perform. In addition, we will examine the role of television drama series as a tool to define and characterize our societies, and also look over the five characters that appear in the first season of In Treatment, define them, and examine the five prototypes of the Israeli character they represent.

The instructor is the co-creator and head screenwriter of the original version of the TV series In Treatment as well as the Center for Jewish Studies distinguished Visiting Professor.

CJST234F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

CJST235 Remembering the Holocaust
How should the Holocaust be remembered? How do we want it to be remembered, and how can we ensure that it will be? These questions preoccupied Jews even as the genocide was unfolding, and many documented their experiences in diaries, while a few were able to clandestinely photograph life and death in the camps. Today, these questions are more urgent than ever, as we are living through the final era in which it is still possible to engage personally with Holocaust survivors; soon, none will remain alive. In this course, we will explore the different ways, formats, and perspectives through which the Holocaust has been remembered: diaries, fiction, art-house and commercial films, limited series, graphic novels, art installations, recorded testimonies, still photography, social media projects, memorials and museums, televised trials, and more. We will ask what was and what is the "right" way to remember the Holocaust, and whether such a way even exists. We will also discuss the rise of Holocaust denial and examine how AI can be used both to promote it and to combat it. The course will include close readings, guest speakers, virtual visits, and creative projects.
